**THE BOLD
FUTURE**

MITEC
29 JUL » 01 AUG 2026
10AM - 7PM

**ASIA'S LEADING
ARCHITECTURE
BUSINESS EVENT**

Held In Conjunction with:

KLAW
KL ARCHITECTURE WEEK

In Collaboration with:

Endorsed by:

Jointly Organised by:

ARCHIDEX 2026 comes at a time when the architecture and built environment industry is adjusting to change — shaped by shifting economic conditions, growing urban pressures, and a shared responsibility to build in ways that are more resilient, more sustainable, and more considered in their long-term impact.

At its heart, ARCHIDEX is an invitation to the industry to take time to engage — to listen as much as to speak, to reconnect with purpose, and to remain open to what emerges when the full ecosystem is present in one place.

A Bold Future in the Making, Together.

YB Tuan Nga Kor Ming

Minister of Housing and
Local Government, Malaysia

“

Platforms like AREC and ARCHIDEX are so vital.

**It serves as a global nexus
where policymakers and industry
leaders meet to exchange the
transformative ideas**

necessary to address global challenges; and more importantly, make them implementable at the local level.

It is time for us to once again: Think Global, Act Local. While AREC fosters the strategic dialogue necessary for better policy, ARCHIDEX ignites business innovation where industry leaders showcase their solutions, thereby shaping the future of the built environment. I invite each of you to join us for this landmark gathering, right here in the heart of Kuala Lumpur.

“

Within the Kuala Lumpur Architecture Festival (KLAF), ARCHIDEX represents more than a marketplace, it is a meeting point where architecture is discussed, questioned, and reimagined.

Held concurrently, is the DATUM Conference, the region's premier gathering of architectural thinkers. Over the years, DATUM has evolved into a celebration in its own right.

**We celebrate the belief that
architecture can drive positive change
and inspire the next generation to
design with purpose and responsibility.**

Let ARCHIDEX, KLAF2026 and DATUM remind us that design, dialogue and industry are strongest when they move together. I look forward to seeing all of you here.

Ar. IDR Dexter Koh

President of PAM

“

Every year, ARCHIDEX reminds us why coming together still matters. No matter how fast the world is changing, people still value meeting face to face for real conversations, sharing ideas, and learning from one another.

Together with DATUM, the region's largest and most influential architecture conference, and the ASEAN Real Estate Conference, AREC this platform brings the industry together in a way that strengthens business, relationships, and trust. For our exhibitors,

**this is a space to share what you
have built and the value you bring.**

For our visitors, it is a chance to discover, learn, and be inspired. More than anything, I hope ARCHIDEX gives everyone the confidence to connect, collaborate, and celebrate, because this is what exhibitions are truly about. At the heart of it all are people, and it is through these moments that industries grow stronger and futures are shaped together. Welcome to ARCHIDEX 2026!

Dato' Vincent Lim

President of C.I.S

AREC: Developers,
Policymakers, Investors

One Table, One Region

The ASEAN Real Estate Conference (AREC), brings together leading developers, government leaders, and investors to shape ASEAN's real estate future.

AREC connects real estate vision with architectural excellence—positioning Malaysia as a key regional hub where ideas, projects, and partnerships converge to shape a dynamic, future-ready built environment.

Rethinking
Real Estates:

Housing With Hearts

AREC calls on industry players to move beyond profit-driven development towards a more holistic approach—one that prioritises human values, sustainability, and community wellbeing.

Held Concurrently with:

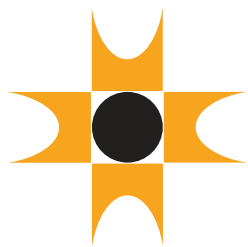

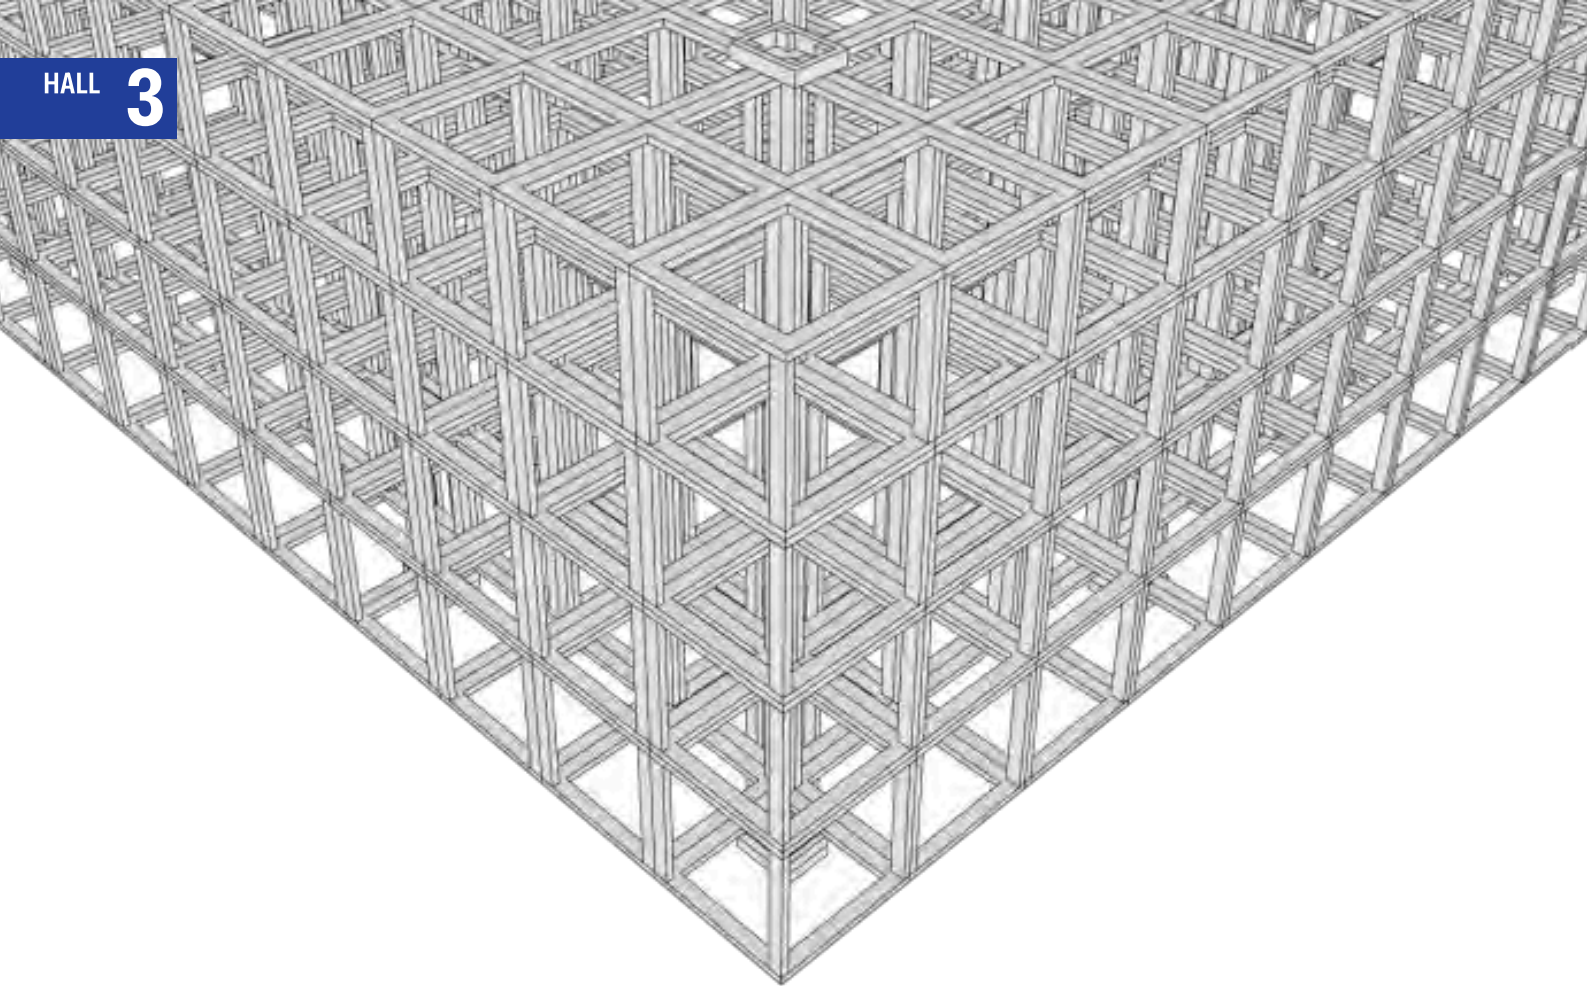

Organised by:

Managed by:

PAM PAVILION

**A spatial installation
where structure,
light, and encounter
come together.**

Where ideas take shape

More than an installation, it becomes a place for talks, reflection, and chance encounters, where ideas are exchanged in motion and the future of architecture begins to take shape.

“

The bare minimum
isn't about lack.
It's about using only
what is necessary
to create a space
that feels right.”

8W599

Nippon Paint Total Coating & Construction Solutions Provider

Nippon Paint continues to push boundaries through innovation, evolving into a Total Coating & Construction Solutions provider for the building and construction industry.

Through a one-stop solutions approach from bare concrete surfaces to final finishing, Nippon Paint offers a comprehensive range of solutions, including Architectural Coatings, Protective Coatings, Waterproofing Solutions, Flooring Solutions, Drymix Solutions, and Sealant, Adhesive & Filler Solutions.

With compatible systems designed to work together from bare to finish, Nippon Paint helps address these challenges through integrated solutions that promote better system compatibility, quality, durability, and a more coordinated "no blame game" approach for every project.

Common construction pain points such as peeling, cracking, powdery surfaces, patchiness, water leakage, watermarks, tile delamination, hollowiness, fungus and mould growth, rising damp walls, paint bulging, and corrosion can often lead to repeated rectification and the "blame game" among project stakeholders.

Experience the New Standard in Complete Surface Solutions

Discover Guocera's latest innovations at ARCHIDEX, where design, technology, and functionality come together to shape modern architectural spaces.

Engineered for performance-driven environments, **Guocera's Functional Tiles** are designed to enhance safety, durability, and everyday living. Featuring specialized technologies such as **Microstep - Anti-Slip** surfaces and **Diamond Surface - Anti-Scratch** and durable finishes, these solutions are built to meet the demands of high-traffic residential, commercial, and public spaces.

Elevating premium interiors further, **Verticas Large Format Slabs** bring expressive surface design into contemporary architecture. Crafted with advanced printing technology to replicate the tactile beauty of natural stone and marble, these grand-format slabs minimize grout lines while

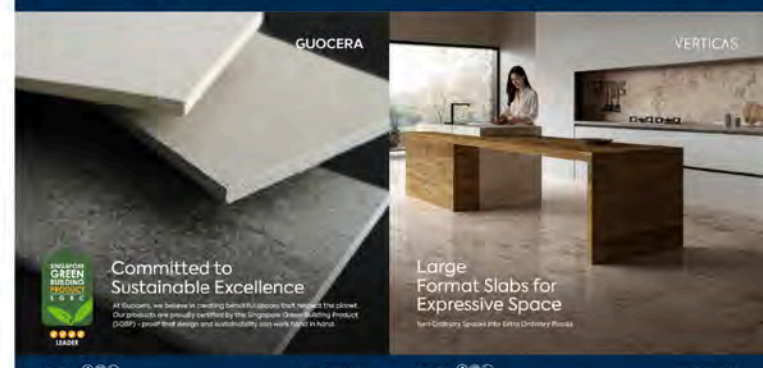

creating seamless, sophisticated spaces across floors, walls, countertops, and bespoke surfaces. Complementing innovation with sustainability, Guocera proudly offers products certified under the **Singapore Green Building Product (SGBP)** assessment with the highest 4-tick "Leader" rating — reflecting our ongoing commitment towards responsible manufacturing and eco-conscious building solutions.

Backed by advanced manufacturing capabilities and comprehensive installation support, Guocera delivers a complete surface ecosystem tailored for architects, developers, and industry professionals.

The Next Cycle of Aluminium, Designed for Sustainable Impact

The future of aluminium is entering a new cycle, one shaped by carbon awareness, circularity and meaningful design impact.

At PMB Aluminium, we believe aluminium should go beyond strength, durability and performance. As sustainability expectations continue to rise, material choices must also support transparency, certification and responsible manufacturing. This is where our sustainable aluminium solutions come in.

Through recycled aluminium solutions, certified aluminium extrusion products, MyHIAU and Eco Label recognition, together with Environmental Product Declaration support for selected products, we help customers make material

choices with greater confidence. Our solutions are designed to support green building requirements, ESG goals and responsible sourcing practices across the built environment and industrial sectors.

This year, we invite you to experience our sustainability journey at our booth. Discover our sustainable aluminium solutions through product showcases and knowledge-sharing sessions that connect carbon reduction, circularity and long-term design value, supporting your next sustainable project.

Visit PMB Aluminium and discover the next cycle of aluminium, designed for sustainable impact.

COLORBOND® steel: 60 Years of Building That Lasts

Some places stay with us long after we leave them.

Not because they are remarkable, but because they are familiar—the home where a family grows together, the workplace that welcomes people every morning, and the everyday spaces where life quietly unfolds. These are the places that shape our routines, hold our memories, and become part of who we are.

For 60 years, COLORBOND® steel has been part of these places across Malaysia and around the world. Not as the centre of attention, but as a trusted presence behind the scenes — protecting homes, supporting businesses, and standing strong through changing seasons and generations.

The best building materials are often the ones we rarely notice. They endure scorching sun, heavy rain, and the passage of time without demanding recognition. Their true value lies in their reliability, quietly performing year after year so people can focus on what matters most.

As Malaysia continues to grow and communities evolve, the responsibility to build lasting spaces becomes even more important. The buildings we create today will shape the lives of tomorrow.

COLORBOND® steel has helped build places where life happens. And together, we will continue building the places the future will call home.

WoW

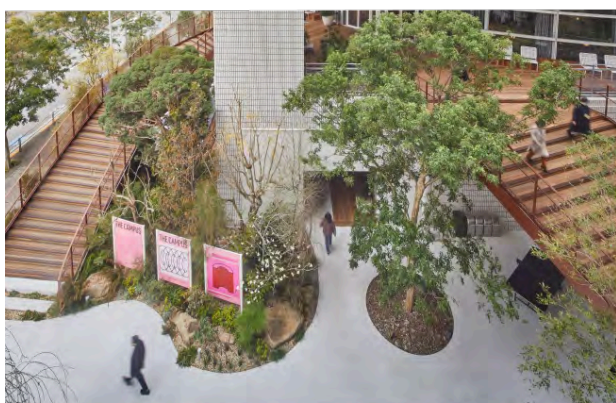

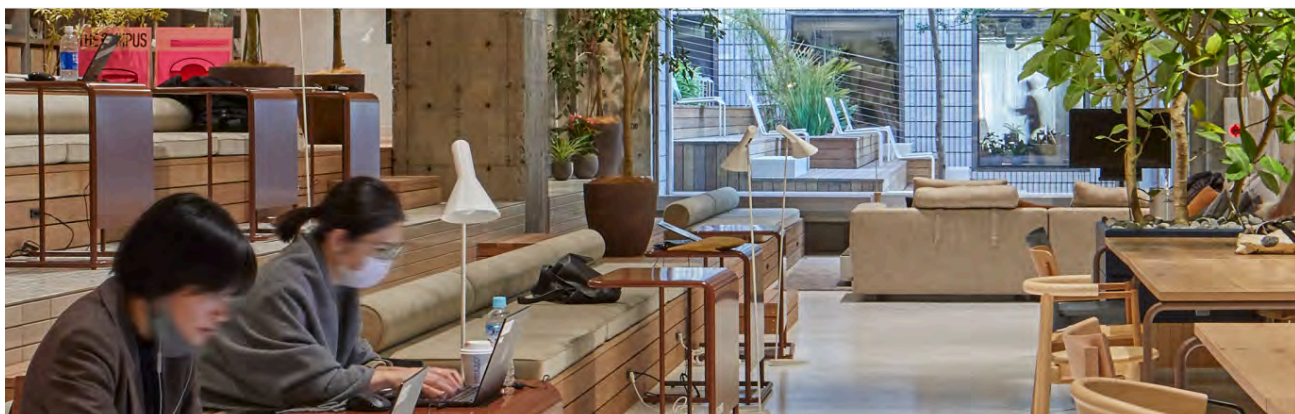

KOKUYO

KOKUYO LET'S WORK.

IN THE CITY, WITH THE TEAM.

This is the lab where diverse values intermingle, constantly sparking new reactions.
Introducing the "Work & Life Freedom Hub" open to the entire city.

1

A HUB FOR NEW IDEAS

KOKUYO believes the modern office should be more than just a place to work; it should be an *"open arena"* for everyone. The goal of **THE CAMPUS** is to expand experiences beyond daily tasks and create a hub where new *"knowledge"* for the future is born. By focusing on long-term social challenges, **KOKUYO** uses this facility as a *"living laboratory"* to experiment with and design the future of work.

2

To achieve this vision, **THE CAMPUS** focuses on three key areas:

The Three Strategic Concepts

A "Live Office"

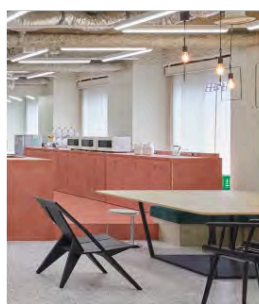

Testing Next-Generation Workstyles To discover what the future office needs, **KOKUYO** employees lead by example. They actively practice and test advanced ways of working within their own office. By treating the workspace as a *"live exhibition,"* **KOKUYO** provides real-world insights into how spatial design can improve productivity and well-being.

A "Space Open to the City"

Connecting with the Community To create a rich and diverse environment, **THE CAMPUS** is open to the public. By making parts of the building accessible to everyone, **KOKUYO** transforms a private corporate office into an inclusive landmark. This integration with the city encourages people to meet and share ideas, creating a sense of shared prosperity.

"Open Innovation"

Solving Social Issues Together **KOKUYO** aims to expand its business and solve social problems by working with outsiders. Through events and joint product development, **THE CAMPUS** promotes *"co-creation"* with other companies and universities. By breaking down organizational walls, it serves as a platform for innovation that one company could not achieve alone.

WHAT OUR VISITORS SAID LAST YEAR

I come every year because of the quality of the exhibition and the strong Spanish presence, mainly Roca, which has a strong footprint in Malaysia.

ARCHIDEX is an important platform for our brand.

H.E. Jose Luis Pardo Cuervo,
Ambassador of Spain to Malaysia,
Embassy of Spain

ARCHIDEX is a great resource for product materials,

especially with up-to-date and green options. It makes sourcing easier, and I always attend to keep myself updated on current industry trends."

A. Gamariah Abdul
Shukor,
Architect, Jabatan Kerja
Raya (JKR), Malaysia

I came from India via the Maldives to see how your architects are working. I'm also here for networking. It's an amazing experience; I've been to many similar exhibitions, but I appreciate this one most because it combines many products under one umbrella. Having travelled to Big 5 [Dubai] and BAU [Munich],

I feel ARCHIDEX compares well with them.

Er. S. Madhukar Shiva,
Director s-Project
Consultant, SES Engineering

The quality of workmanship in Malaysia surpasses what we typically see in India,

We're here to explore partnerships and source innovative products not readily available in our market."

Shinto Mathew,
ID, U&S Fifthwall Design
LLP, India
