MARGIN FOREIGN EXCHANGE & CONTRACTS FOR DIFFERENCE

PRODUCT SCHEDULE – MT4 & MT5

IMPORTANT NOTICE

This Product Schedule issued by AxiTrader LLC **("Axi", "we", "our"** or **"us")** should be read in its entirety. It sets out the Margin Requirements, fees and charges you will incur when dealing in our Products, the interest that you may pay or receive in respect of your Account balances and other costs you will incur. This Product Schedule describes the various Contract specifications for the Margin FX Contracts (FX) and Contracts-for-Difference (CFDs) that we offer.

LIQUIDATION LEVEL

We may place a liquidation order for your open Position(s) when your Total Equity balance falls below the Liquidation Level or zero, whichever is the greater.

Standard, Premium and Elite Accounts

The Liquidation Level is **20%** unless varied by us in writing.

COMMISSIONS

Premium and Elite Accounts

Our commission on Premium and Elite Accounts pays for our clearing and aggregation costs, together with our cost of providing the service to you.

Commissions are charged in the Account Currency and are based on the number of standard Contracts bought or sold in each transaction. Where a fraction of a standard Contract is dealt the charge is made on a pro-rata basis.

The table below sets out the commissions payable on FX and Bullion transactions on Premium Accounts when you open a Position.

Account Currency	Per Standard Contract	Account Currency	Per Standard Contract
AUD	$4.50	JPY	¥500
CAD	$6.00	NZD	$7.00
CHF	4.50	PLN	zł17.00
EUR	€4.00	SGD	$6.00
GBP	£3.50	USD	$4.50
HKD	$35.00	Other	USD$4.50 equivalent

Commissions payable on Elite Accounts may be lower than the above table.

Perpetual Future CFDs

All Account types will be charged a commission rate of 3.5 basis points on each of the Opening trade legs and Closing trade legs of a position.

Standard Accounts

Our transaction fees are incorporated into the bid-offer spread for each Product (our spread). Because we deal as principal, the prices we offer you may not be the same as those in the Underlying Market and may be wider or narrower.

The price offered to you may depend upon several factors including transaction size, term of the Product, our business relationship with you, the prevailing Underlying Market rates and in the case of swaps and rollovers on the differing interest rates applicable to the currency pair involved in a FX transaction.

Remuneration of Introducing Brokers or other partners

We may remunerate a third party for introducing you to us in the form of wider spreads, commissions, or other charges payable by you.

FEES & CHARGES

Fees and charges apply to Contracts as follows:

Charges Benefits and Adjustments	Applicable Contract types
Financing Charge/Benefit	Margin FX Contract Bullion Spot CFDs Commodity Cash CFDs Index Cash CFDs Cryptocurrency CFDs Share CFDs
Rollover Charge/Benefit	Commodity Futures CFD Index Futures CFDs
Dividend Adjustments	Index Cash CFDs Share CFDs
Funding Fee	Perpetual Future CFDs

Financing Fees

The Financing fee is an adjustment reflecting the relative difference in interest rates or yield on the Underlying Instruments.

A Client Account will either be credited or debited with financing fees based on open Positions as at the close of each Business Day. Financing fees accrue in each positions "Swap" field in MT4 and MT5 whilst a Position remains open and are credited or debited to Client Accounts when the trade is closed.

Financing fees are calculated in relation to the counter currency and are converted to and applied in the Account Currency.

Financing fees are subject to change and are available within the Trading Platform.

FX & Bullion Spot CFD Financing

If you are long a Contract where the platform's swap rate for long Positions is a positive value, you will accrue a Financing Benefit. If you are long on a Contract where the swap rate for long Positions is a negative value, you will accrue a Financing Charge.

If you are short a Contract where the platform' swap rate for short Positions is a positive value, you will accrue a Financing Benefit. If you are short on a Contract where the swap rate for short Positions is a negative value, you will accrue a Financing Charge.

In certain interest rate market conditions, the swap rate may be negative for both long and short Positions.

We apply Financing fees daily and usually in the 30 seconds before 5pm New York close. Currency pairs will have triple daily swaps applied on either Wednesday or Thursday in order to reflect the Underlying Market Settlement Date rolling over the weekend. The Product Schedule displays, for each pair, which day triple swaps are applied.

We may not incorporate short currency holidays into the swap rate calculation but may for extended currency holidays periods, for example Lunar New Year and Golden Week.

Funding Fee Mechanism – Perpetual future CFDs

The funding fee is a periodic payment exchanged between buyers and sellers designed to align the market price of the perpetual contract with the index price. The funding rate can be positive or negative.

A positive funding rate means the perpetual contract price is higher than the spot rate (known as contango) and results in Long positions paying Short positions.

When the funding rate is negative, there is backwardation in the market and the perpetual contract price is lower than the spot price. In this case, the Shorts pay the Longs.

Funding rate	Long	Short
+%	Debit	Credit
-%	Credit	Debit

The funding fee is settled every 8 hours, unless specified otherwise, and based on the open market position at the point of the fee assessment, scheduled at 12:00 am, 08:00 am and 4:00 pm UTC, each day.

Funding fees are managed via a balance credit or debit.

Swap Free Accounts

Swap free Accounts are not subject to Financing Charges or Benefits on FX Margin Contracts, Bullion Spot CFDs and Cash CFDs. We reserve the right to revoke the swap free status of any live account considered to be misused, trading in a suspicious manner or operating outside the realms of good faith.

Futures CFD Rollovers

The principle of the Futures CFD rollover process is that traders will neither profit nor lose from the CFD rolling from the current underlying futures price to the next.

A rollover will arise in a Futures CFD when the underlying front month futures contract is approaching the Expiry Date of the Underlying Instrument and we change our CFD pricing from the front month to the Next Serial Futures Contract. When the new price feed takes effect, this will immediately create a gain or loss upon your open Position. This profit or loss will depend upon your Position size and direction, the price differential of the expiring and the new Underlying Instrument upon which the price will be now based.

You will be credited or debited with a Rollover Charge or Rollover Benefit that reflects the buying and selling of the expiring and next Underlying Instrument contract. For example, if you have incurred a profit on the change to the new Contract Price you will receive a Rollover Charge which will offset the gain. If you incurred a loss on the change to the new Contract Price you will receive a Rollover Benefit which will offset the loss.

This rollover process will cause a temporary account equity swing in your account for up to an hour until we publish the new price level updates on MT4/MT5. If you have positions open in 24/7 markets like Crypto or Perpetual Future CFDs they could be partially or wholly liquidated if the rollover incurs a large negative equity swing. It remains your responsibility to ensure there is sufficient free equity in your account when a futures rollover occurs. We recommend reviewing the price difference of the serials on the exchange to calculate how much sufficient free equity is required to avoid this liquidation risk.

We typically switch from using the front month to the Next Serial Futures Contract 1-2 trading days prior to the Underlying Instrument's last trading day when liquidity can be limited.

The rollover dates can be found on our Website.

Index Cash CFD Finance Charges

If you keep an Index Cash CFD Position open overnight (after 5pm New York time) we will post a finance adjustment to your open trades in the form of a Financing Charge or Financing Benefit, to reflect the cost of funding your Position. This finance adjustment is based upon a central bank financing reference rate (FRR) relevant to the symbol and has our margin applied. Charges are annualised and triple finance charges are charged on a Friday to reflect the charge over the weekend.

Index CFD Dividend Adjustments

Index CFDs are made up of a group of shares that may pay dividends throughout the year. When a dividend is paid on a share, the value of the share will drop and therefore so does the value of the Index. Dividend adjustments are applied on these Products to negate the impact of the drop in Index price.

Short Positions will be positively impacted by the drop in Index price, so you will be debited the dividend adjustment value. Long Positions are negatively impacted so you are credited the dividend adjustment.

Commodity CFD Finance Charges

Finance rates for Commodity Cash CFDs reflect the carry cost of our liquidity sources plus our margin and will have the potential to change daily.

You can view the current finance rates on the Trading Platform. Triple finance rates apply on a Friday to reflect the weekend.

Cryptocurrency CFD Finance Charges

Finance rates for Cryptocurrency CFDs reflect the carry cost of our liquidity sources plus our margin and will have the potential to change daily.

You can view the current finance rates on the Trading Platform. Charges are annualised and triple finance charges are charged on a Friday to reflect the charge over the weekend.

Share CFD Finance Charges

Finance rates for Share CFDs reflect the carry cost of our liquidity sources plus our margin and will have the potential to change daily.

You can view the current finance rates on the Trading Platform. Charges are annualised and triple finance charges are charged on a Friday to reflect the charge over the weekend.

Share CFD Dividend Adjustments

When a dividend is paid on a share, the value of the share price will drop. Dividend adjustments are applied on these Products to negate the impact of the drop in price.

Short Positions will be positively impacted by the drop in price, so you will be debited the dividend adjustment value. Long Positions are negatively impacted so you are credited the dividend adjustment.

CRYPTOCURRENCY PRICING

Cryptocurrencies are extremely volatile and can move or jump in price with no apparent reason due to lack of liquidity. There is little or no fundamental reasoning behind its pricing and as such trading Cryptocurrency CFDs pose a significant risk to you.

MT4 cannot process prices under the 0.00001 price level therefore limiting the lowest possible price we are able to quote to you. In the event an asset price drops below or approaches this level we reserve the right to withdraw the product immediately and will liquidate all positions in good faith at the market rate we deem appropriate for the situation.

Cryptocurrency Hard Fork Events

If a Cryptocurrency splits into two, new coins are created, this is known as a "Hard Fork". We will generally follow the coin that has the majority consensus of Cryptocurrency users and will

therefore use this as the basis for our prices. In addition, we will also consider the approach adopted by the exchanges or market-makers we deal with, which will help determine the action we take. We reserve the right to determine which Cryptocurrency unit has the majority consensus behind them.

As the Hard Fork results in a second Cryptocurrency, we reserve the right to create an equivalent Position on your Accounts to reflect this. However, this action is taken at our absolute discretion, and we have no obligation to do so. If the second Cryptocurrency is tradeable on major exchanges, which may or may not include the exchanges we deal with, we may choose to represent that value, but have no obligation to do so. We may do this by making the product available to close based on the valuation, or by booking a cash adjustment on your Accounts. If, within a reasonable timeframe, the second Cryptocurrency does not become tradeable, then we may void Positions that had previously been created at no value on your Accounts.

Over periods of substantial price volatility around fork events, we may take any action we consider necessary in accordance with our terms and conditions including suspending trading if we deem not to have reliable prices from the underlying market.

Cryptocurrency Soft Fork Events

A "Soft Fork" event reflects a Cryptocurrency change which influences the price but typically exhibit smaller price changes than a Hard Fork event. These events are simply passed through as an updated price of the symbol. We reserve the right but not the obligation to book a cash adjustment on client accounts for any material Soft Fork adjustments.

OTHER CHARGES

Deposits

To deposit funds, please login to your Client Portal to view your payment options. All funds must be remitted from a bank account, card or other account in your name.

In the event we suspect third-party funding has occurred, we reserve the right to return the funds to the remitter and retain the balance in your Account, pending verification of proof of identity and the source of funds before processing. In the absence of verification, we reserve the right to retain the balance in your Account and you will not be permitted to withdraw the balance in your Account.

If funding exceeds monthly limits (set out in the table below) we may charge fees. For example, charges are applied for card payments and other payment methods where deposits exceed a monthly limit of US$50,000. Payments below this monthly limit and all bank transfers remain free.

Deposit Method	Monthly Limit	Fees
Bank transfers	no limit	No fees
Card payments	more than US$50,000	3.0%
Other methods	more than US$50,000	3.0%

Please be advised that your credit card provider may view payments made to us as a cash advance and that they may charge you accordingly.

Withdrawals

To withdraw funds, please login to your Client Portal and submit a withdrawal request.

All withdrawals from your Account are subject to available funds. When processing a withdrawal request, we may require additional information to prove that the beneficiary account is under your name as third-party remittances are not permitted.

All withdrawal requests are processed Monday to Friday during normal business hours. All requests received outside of these hours will be processed on the next Business Day.

Withdrawals are free if they are above US$50 or for the full balance of your Account. Otherwise, an administration fee of US$25 may apply.

We may apply charges relating to debt collection communications, agency fees and legal costs. Fees will be advised when applicable.

Inactivity Fee

We reserve the right to charge an inactivity fee where there are funds in your Account but there has been no trading activity and no open positions on your Account for a continuous period of 12 months. After 12 months of inactivity, the fee will be charged within 30 business days and deducted monthly thereafter.

The fee charged is based on your Account currency as follows:

Account Currency	Monthly inactivity fee
AUD	10
CAD	10
CHF	10
EUR	10
GBP	10
HKD	80
JPY	1000
NZD	10
PLN	40
SGD	10
USC	1000
USD	10
ZAR	177

We reserve the right to close your Account without further notification to you, in the event your Account reaches a zero balance and there has been no trading activity on your Account for a period of 12 months.

Inactive Accounts and Server Performance

We further reserve the right to close your Account without further notice to you if your Account has a zero balance and has been inactive (no trades) for a period of 6 months or more.

We will regularly archive data on our trading platform servers (including MT4 and/or MT5 servers) to maintain server performance so your historical trade data may only be accessible for a period of 12 months. You may contact us to retrieve archived data

Bank Transfers

For all international bank transfers, we require proof of identity and source of funds before processing. The corresponding bank account must be in the same name as your Account.

We cannot guarantee same day value for receipt of funds. Processing times are subject to your bank's processes. international bank transfers may take between 2 – 5 Business Days to be received.

Your bank may charge you a receiving fee for any international bank transfer, we are not liable for this fee and this will be incurred by you.

Cards

If you have deposited by debit or credit card, withdrawals may be made back to the card originally used to deposit funds. Refunds usually take between 3 -5 Business Days to appear on your card statement.

We may only be able to return up to the original deposited amount of funds back to the same credit card. We may refund excess amounts by an alternative method which may require

verification prior to payment.

Administrative Charges

We may apply administration charges for duplicate statements, telephone transcripts, audit certificates or for other requests. Fees will be advised upon request.

MARGIN REQUIREMENTS

Leverage

Margin requirements change dependent on leverage. The higher the leverage, the lower the margin requirement, and vice versa.

For FX and Bullion Spot contracts, the contract specification tables display the Maximum Product Leverage which is the leverage you may receive after both the symbol margin rate and Account leverage settings are considered.

The Margin Requirements for Other CFDs are not influenced by your Account leverage but may be influenced by dynamic margin tiers.

Dynamic Margin

Our dynamic margin structure reduces leverage and increases margin requirements as your open position size increases in accordance with tiers set for each Product group.

Hedged Position Margin Requirement

We do not fully net off the notional values of opposing long and short contracts when calculating your Initial Margin. We will margin both the long and short contracts separately from any opposing positions you hold for between 10% to 100% of the normal margin rate depending upon the market.

Variations

We shall always endeavour to provide notice of variations to Margin Requirements but please be aware that in some circumstances, such as unanticipated market events, advance notice may not be possible.

We may reduce your leverage when large exposure limits are offered or used by you.

CONTRACT SPECIFICATIONS

The tables below show the Contract specifications which are correct as at the published date but are subject to change in accordance with the Client Agreement.

Pricing

The price of a CFD is based upon the value of the Underlying Instrument. We deal as principal therefore the prices we offer you may not be the same as those in the Underlying Market. We derive our price by applying our spread to the prevailing bid and offer price in the Underlying Instrument.

Market Hours

Trading Platform server time is based on GMT+3 when New York is observing Daylight Savings Time and GMT+2 when New York is observing Eastern Standard Time.

For non-US time zones their local and New York daylight savings changes will affect the sessions times relative to Trading Platform server time.

Min and Max Trade Size (Lots)

The minimum and maximum trade sizes quoted in the contract specification tables are indicative of our typical default. We may at times elect to change the maximum sizes for some symbols. We reserve the right to increase or reduce these at our discretion where we feel market conditions or other factors warrant it.

DYNAMIC MARGIN TIERS

Crypto – BTC

Margin Tiers	Position Sizes	Margin Rate
Tier 1	< USD 2,000,000	0.5 %
Tier 2	USD 2,000,000 to USD 4,000,000	2 %
Tier 3	USD 4,000,000 +	3.3%

Symbols in this margin group					
BTCUSD	BTCJPY	ETHUSD	ETHJPY		

Crypto – Minors 1

Margin Tiers	Position Sizes	Margin Rate
Tier 1	< USD 500,000	1 %
Tier 2	USD 500,000+	20 %

Symbols in this margin group
XRPUSD

Crypto – Minors 2

Margin Tiers	Position Sizes	Margin Rate
Tier 1	< USD 250,000	2 %
Tier 2	USD 250,000 +	20 %

Symbols in this margin group
All Crypto symbols other than Bitcoin, Ethereum and Ripple

Commodity Futures 1

Margin Tiers	Position Sizes	Margin Rate
Tier 1	< USD 500,000	1 %
Tier 2	USD 500,000+	2 %

Symbols in this margin group					
WTI.fs	BRENT.fs				

Commodity Futures 2

Margin Tiers	Position Sizes	Margin Rate
Tier 1	< USD 500,000	1 %
Tier 2	USD 500,000+	3 %

Symbols in this margin group					
NATGAS.fs	COCOA.fs	COFFEE.fs	SOYBEAN.fs	COPPER.fs	

Higher Margin Requirements (HMR)

HMR refers to specific time windows when **new** positions are temporarily required to have their leverage capped to mitigate risks during volatile events, such as news releases, market closures and earnings releases. Once the HMR window ends, margin requirements are automatically recalculated back to normal leverage settings. Leverage for positions opened outside of the HMR windows remain unaffected by the HMR policy. The policy information below should be considered indicative as we reserve the right to change HMR windows and leverage settings without notice when we deem markets to be particularly volatile.

Instruments and their leverage during HMR

		Leverage Caps			
Instrument Group	**Included Symbols**	**News Release**	**Market Closure**	**Daily Break**	**Weekend Break**
FX	FX excluding NDFs	200:1	200:1	200:1	200:1
Metals	XAU, XAG & XPT	200:1	100:1 to 50:1	200:1	100:1 to 50:1
Cash Indices	All	100:1	100:1	100:1	100:1
Oil	USOIL, UKOIL, WTI, BRENT	N/A	50:1 to 20:1	100:1	50:1 to 20:1

HMR during News Releases; This pertains to news and market data release events and the HMR window starts ~30 minutes ahead of the release and ceases 2 minutes after the event.

HMR during Market Closures; Market Closures arise from typically a public holiday and as a result they may cancel the entire trading day(s). The HMR window starts ~3 hours ahead of the session close and ceases 2 minutes after market resumption.

HMR during Daily Break; The daily break refers to the end of each midweek trading session. The HMR window starts ~1 hour ahead of the end of each market close and ceases 2 minutes after market resumption except for FX which will cease at 00:30 platform time.

HMR during Weekend Break; The weekend break begins on the Friday close of each market. The HMR window starts ~3 hours ahead of the end of Metals, Indices or Oil session and ceases 2 minutes after market resumption. For FX the window starts 1 hour before the session closes and ceases at 00:30 Monday.

HMR during Earnings Season; We apply a HMR of 20% margin from ~2 days prior to a company's earnings release. The HMR window ceases a few minutes into the next trading session.

Weekend trading may be infrequently disrupted by third party maintenance. Where practical, we will endeavour to provide reasonable notice however this may not always be possible. We will not be responsible for losses that may arise in the event our weekend Cryptocurrency CFD service is not available. Additionally, please note our client service desk operates with reduced staffing levels on weekends. Please allow additional time for weekend queries to be responded to as we may not be able to respond until the following Monday.
