PREFACE

The Fiji Fisheries Bibliography is an initial attempt to document the available literature on fisheries in Fiji. It has been compiled and published at the request of the Fisheries Division, Ministry of Primary Industries, Fiji.

Entries include items pertaining to fisheries in a broad sense and specifically to the geographical area of Fiji. Many of the references are to unpublished reports or "grey literature". Although we have tried to be as comprehensive as possible, some items will inevitably have been missed. Various libraries, archives, institutions and databases were searched for relevant items including: Fiji Fisheries offices, University of the South Pacific, Forum Fisheries Agency, South Pacific Applied Geoscience Commission, South Pacific Commission, UNDP/Regional Fisheries Support Programme Office, Suva City Library and the Fiji National Archives.

The main body of the bibliography is organized in broad subject groupings based on the Aquatic Sciences and Fisheries Information System ASFIS Subject Categories and Scope Descriptions. An outline of the subject organization is provided. There are two indexes: an author index and a subject index. The subject index uses descriptors from Aquatic Sciences and Fisheries Thesaurus, supplemented with common species names and concepts specific to Fiji.

The majority of citations have a location code which indicates where the item was sighted and verified. Other locations were added where known, but not comprehensively. Items without location codes have not been verified. A key to the location codes has been provided.

The Fiji Fisheries Bibliography has been compiled as a database using CDS/ISIS software. Further references will be added as they are brought to the attention of the compilers. Any contributions to the bibliography should be addressed to:

There are many people we would like to acknowledge for their support and contributions: the Fiji Fisheries staff, in particular Krishna Swamy and Subodh Sharma; our library colleagues at the Forum Fisheries Agency, the South Pacific Applied Geoscience Commission, the South Pacific Commission and The University of the South Pacific; and Bob Gillett of the FAO/UNDP Regional Fishery Support Programme Office.

The International Centre for Ocean Development (ICOD) and the International Development Research Centre (IDRC) are gratefully acknowledged for support in funding this publication.
