WELCOME TO NEW PERSPECTIVE

“They Said It Couldn’t Be Done

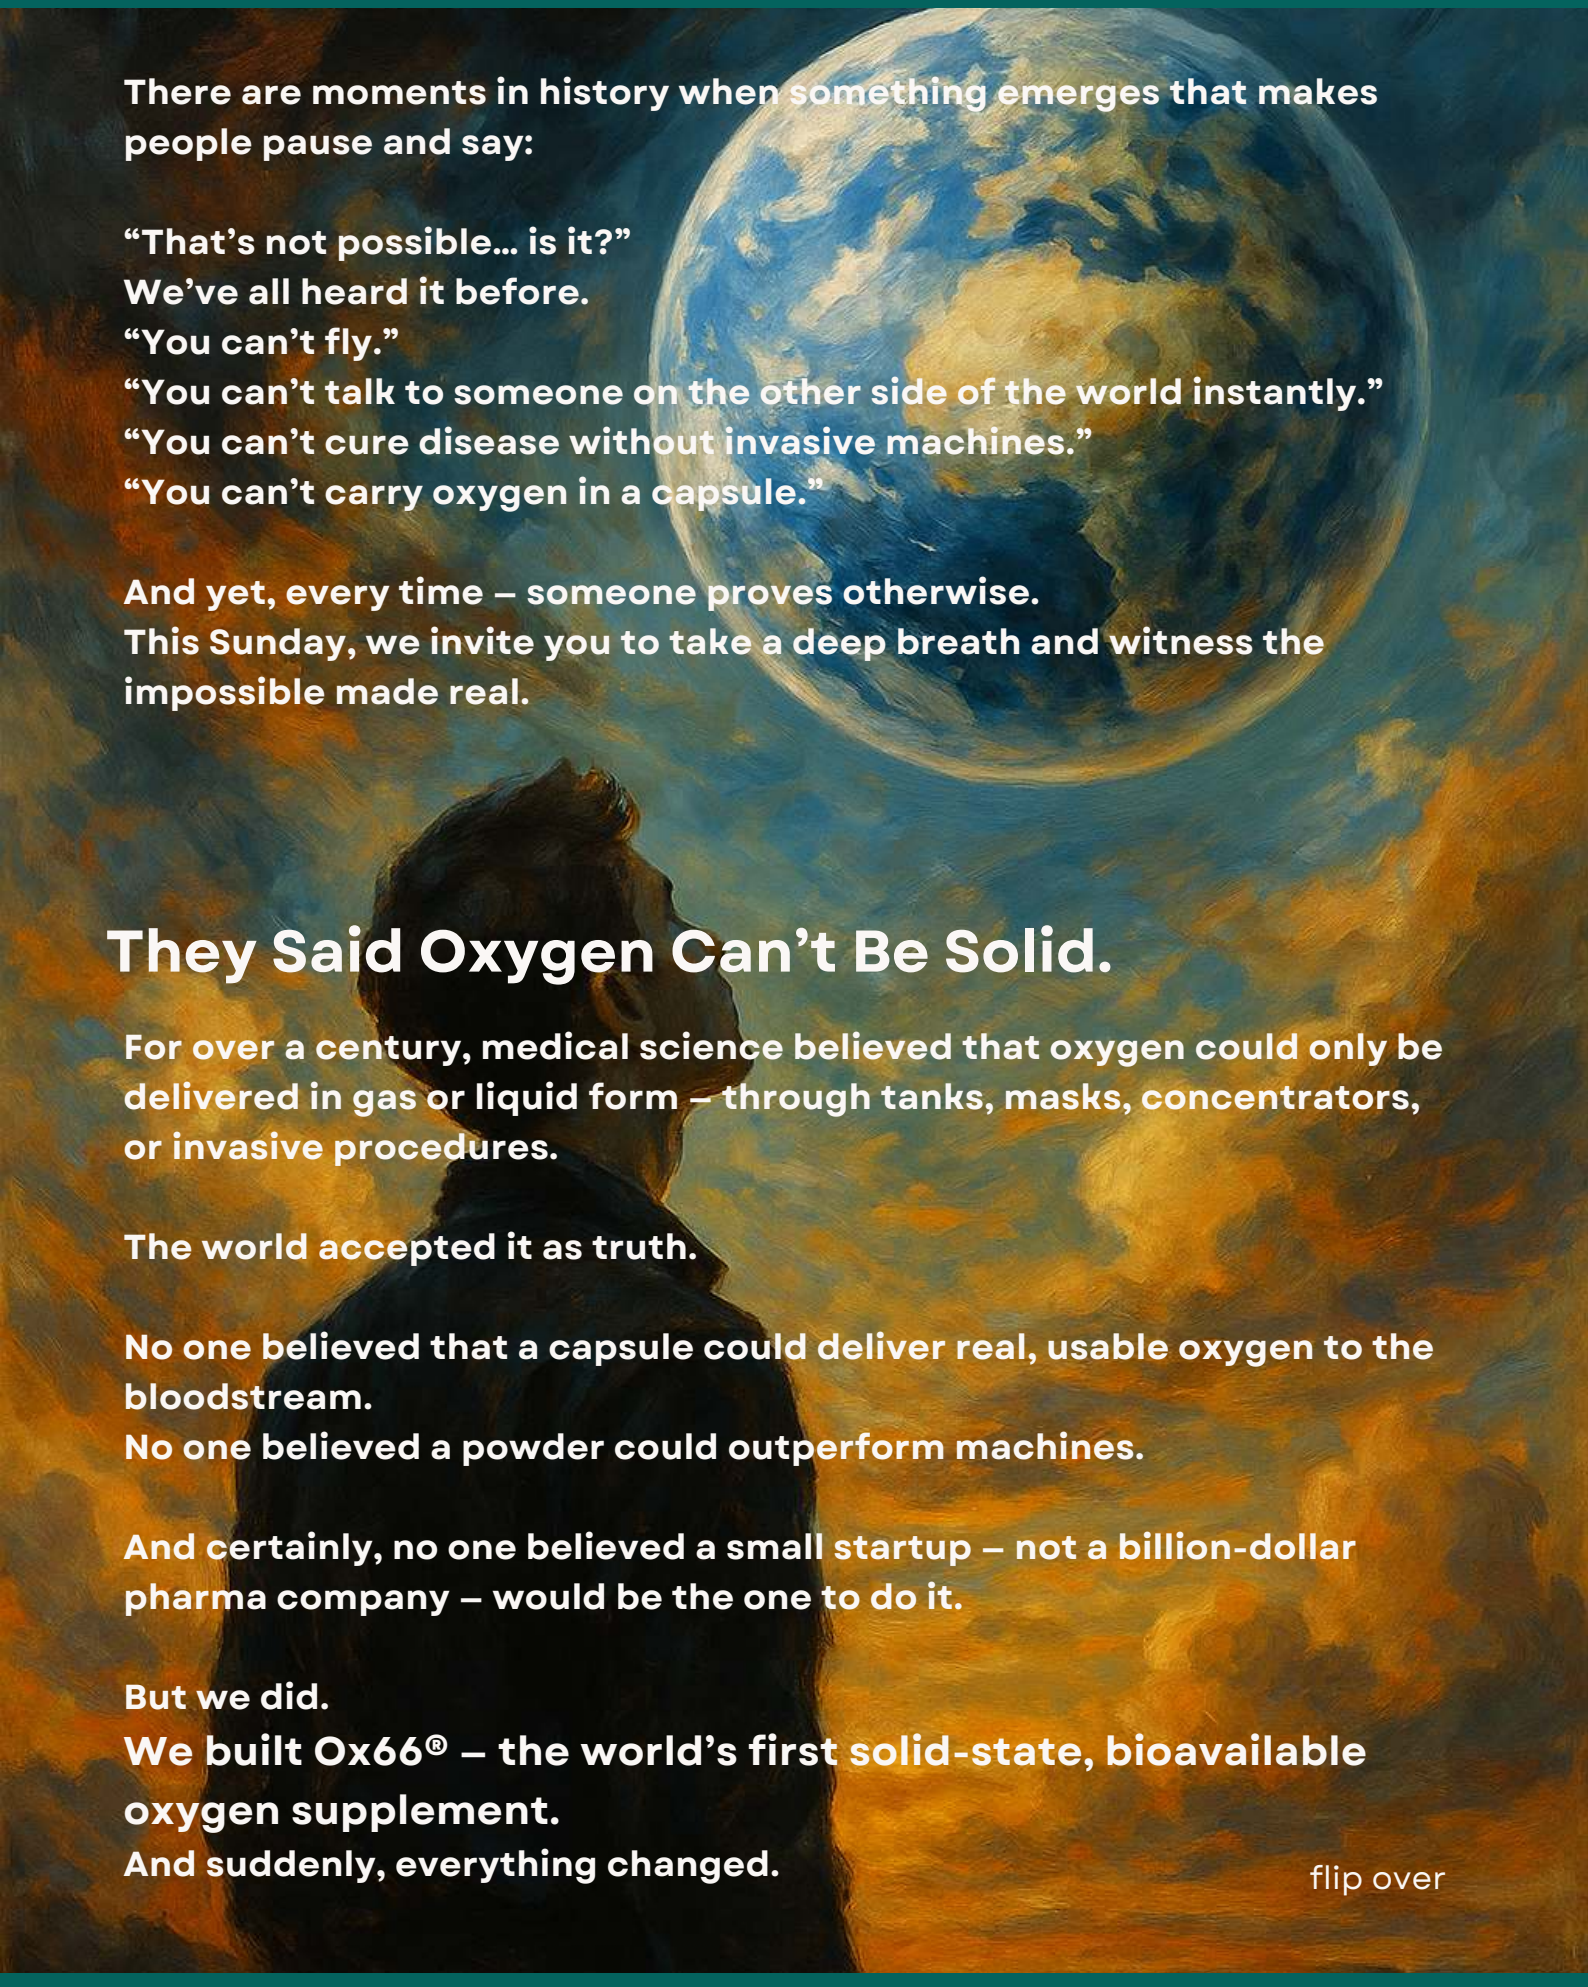

Today, Breathe in the Impossible

Let’s understand this !

flip over

Welcome to the Impossible Made Real

There are moments in history when something emerges that makes people pause and say:

“That’s not possible… is it?”
We’ve all heard it before.
“You can’t fly.”
“You can’t talk to someone on the other side of the world instantly.”
“You can’t cure disease without invasive machines.”
“You can’t carry oxygen in a capsule.”

And yet, every time – someone proves otherwise.
This Sunday, we invite you to take a deep breath and witness the impossible made real.

They Said Oxygen Can’t Be Solid.

For over a century, medical science believed that oxygen could only be delivered in gas or liquid form – through tanks, masks, concentrators, or invasive procedures.

The world accepted it as truth.

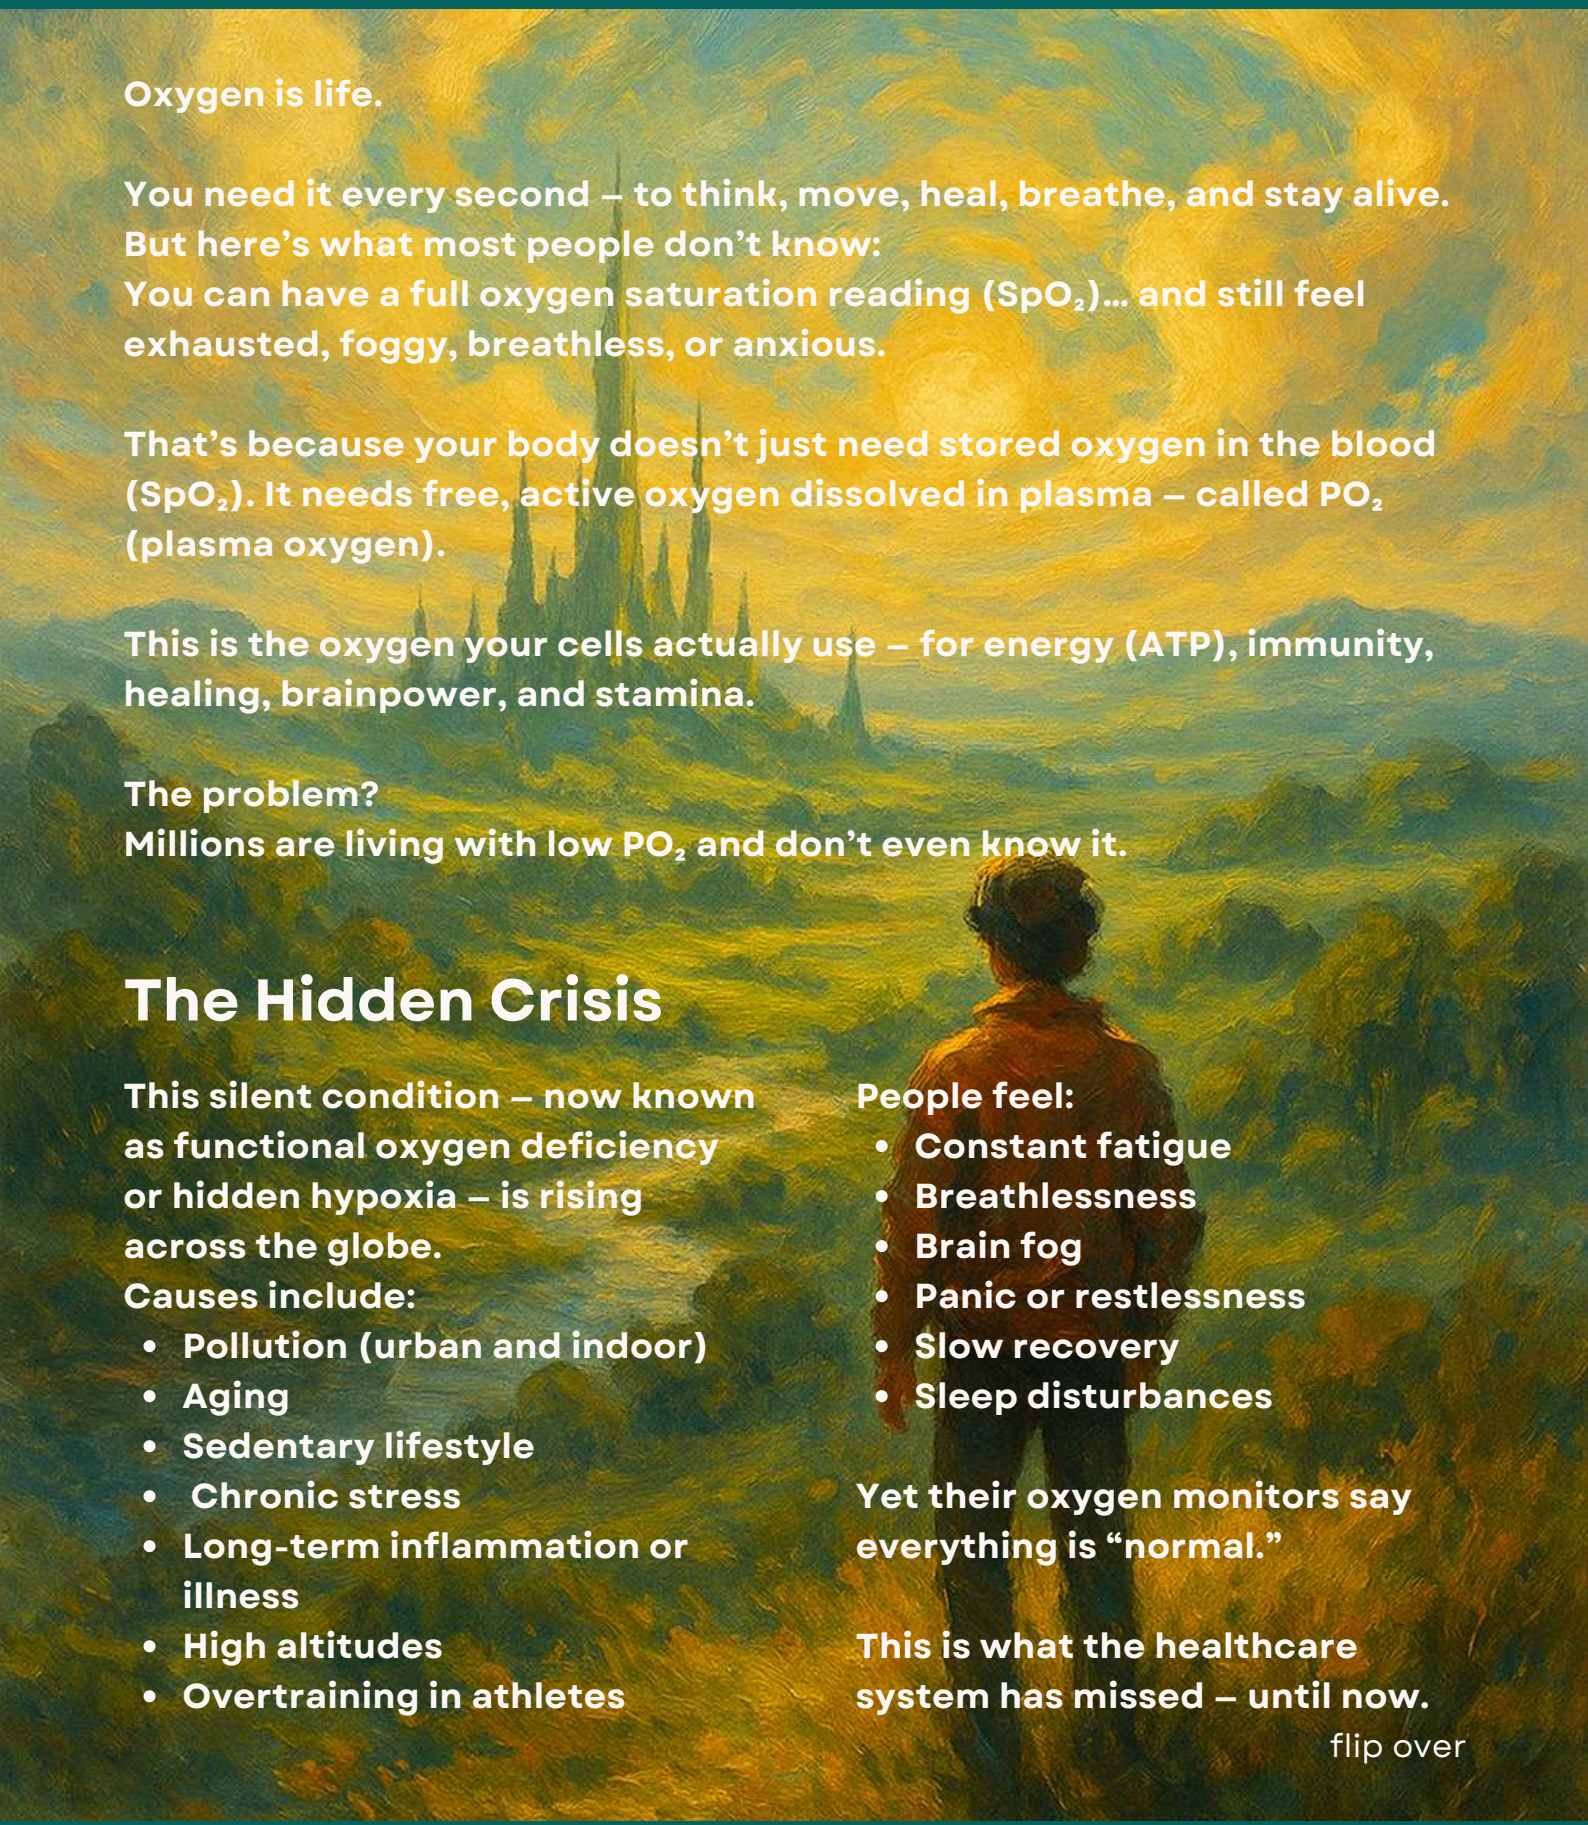

No one believed that a capsule could deliver real, usable oxygen to the bloodstream.
No one believed a powder could outperform machines.

And certainly, no one believed a small startup – not a billion-dollar pharma company – would be the one to do it.

But we did.
We built Ox66® – the world’s first solid-state, bioavailable oxygen supplement.
And suddenly, everything changed.

Reimagining Oxygen for a New World

Oxygen is life.

You need it every second – to think, move, heal, breathe, and stay alive.
But here's what most people don't know:
You can have a full oxygen saturation reading (SpO_2)... and still feel exhausted, foggy, breathless, or anxious.

That's because your body doesn't just need stored oxygen in the blood (SpO_2). It needs free, active oxygen dissolved in plasma – called PO_2 (plasma oxygen).

This is the oxygen your cells actually use – for energy (ATP), immunity, healing, brainpower, and stamina.

The problem?
Millions are living with low PO_2 and don't even know it.

The Hidden Crisis

This silent condition – now known as functional oxygen deficiency or hidden hypoxia – is rising across the globe.
Causes include:

- **Pollution (urban and indoor)**
- **Aging**
- **Sedentary lifestyle**
- **Chronic stress**
- **Long-term inflammation or illness**
- **High altitudes**
- **Overtraining in athletes**

People feel:

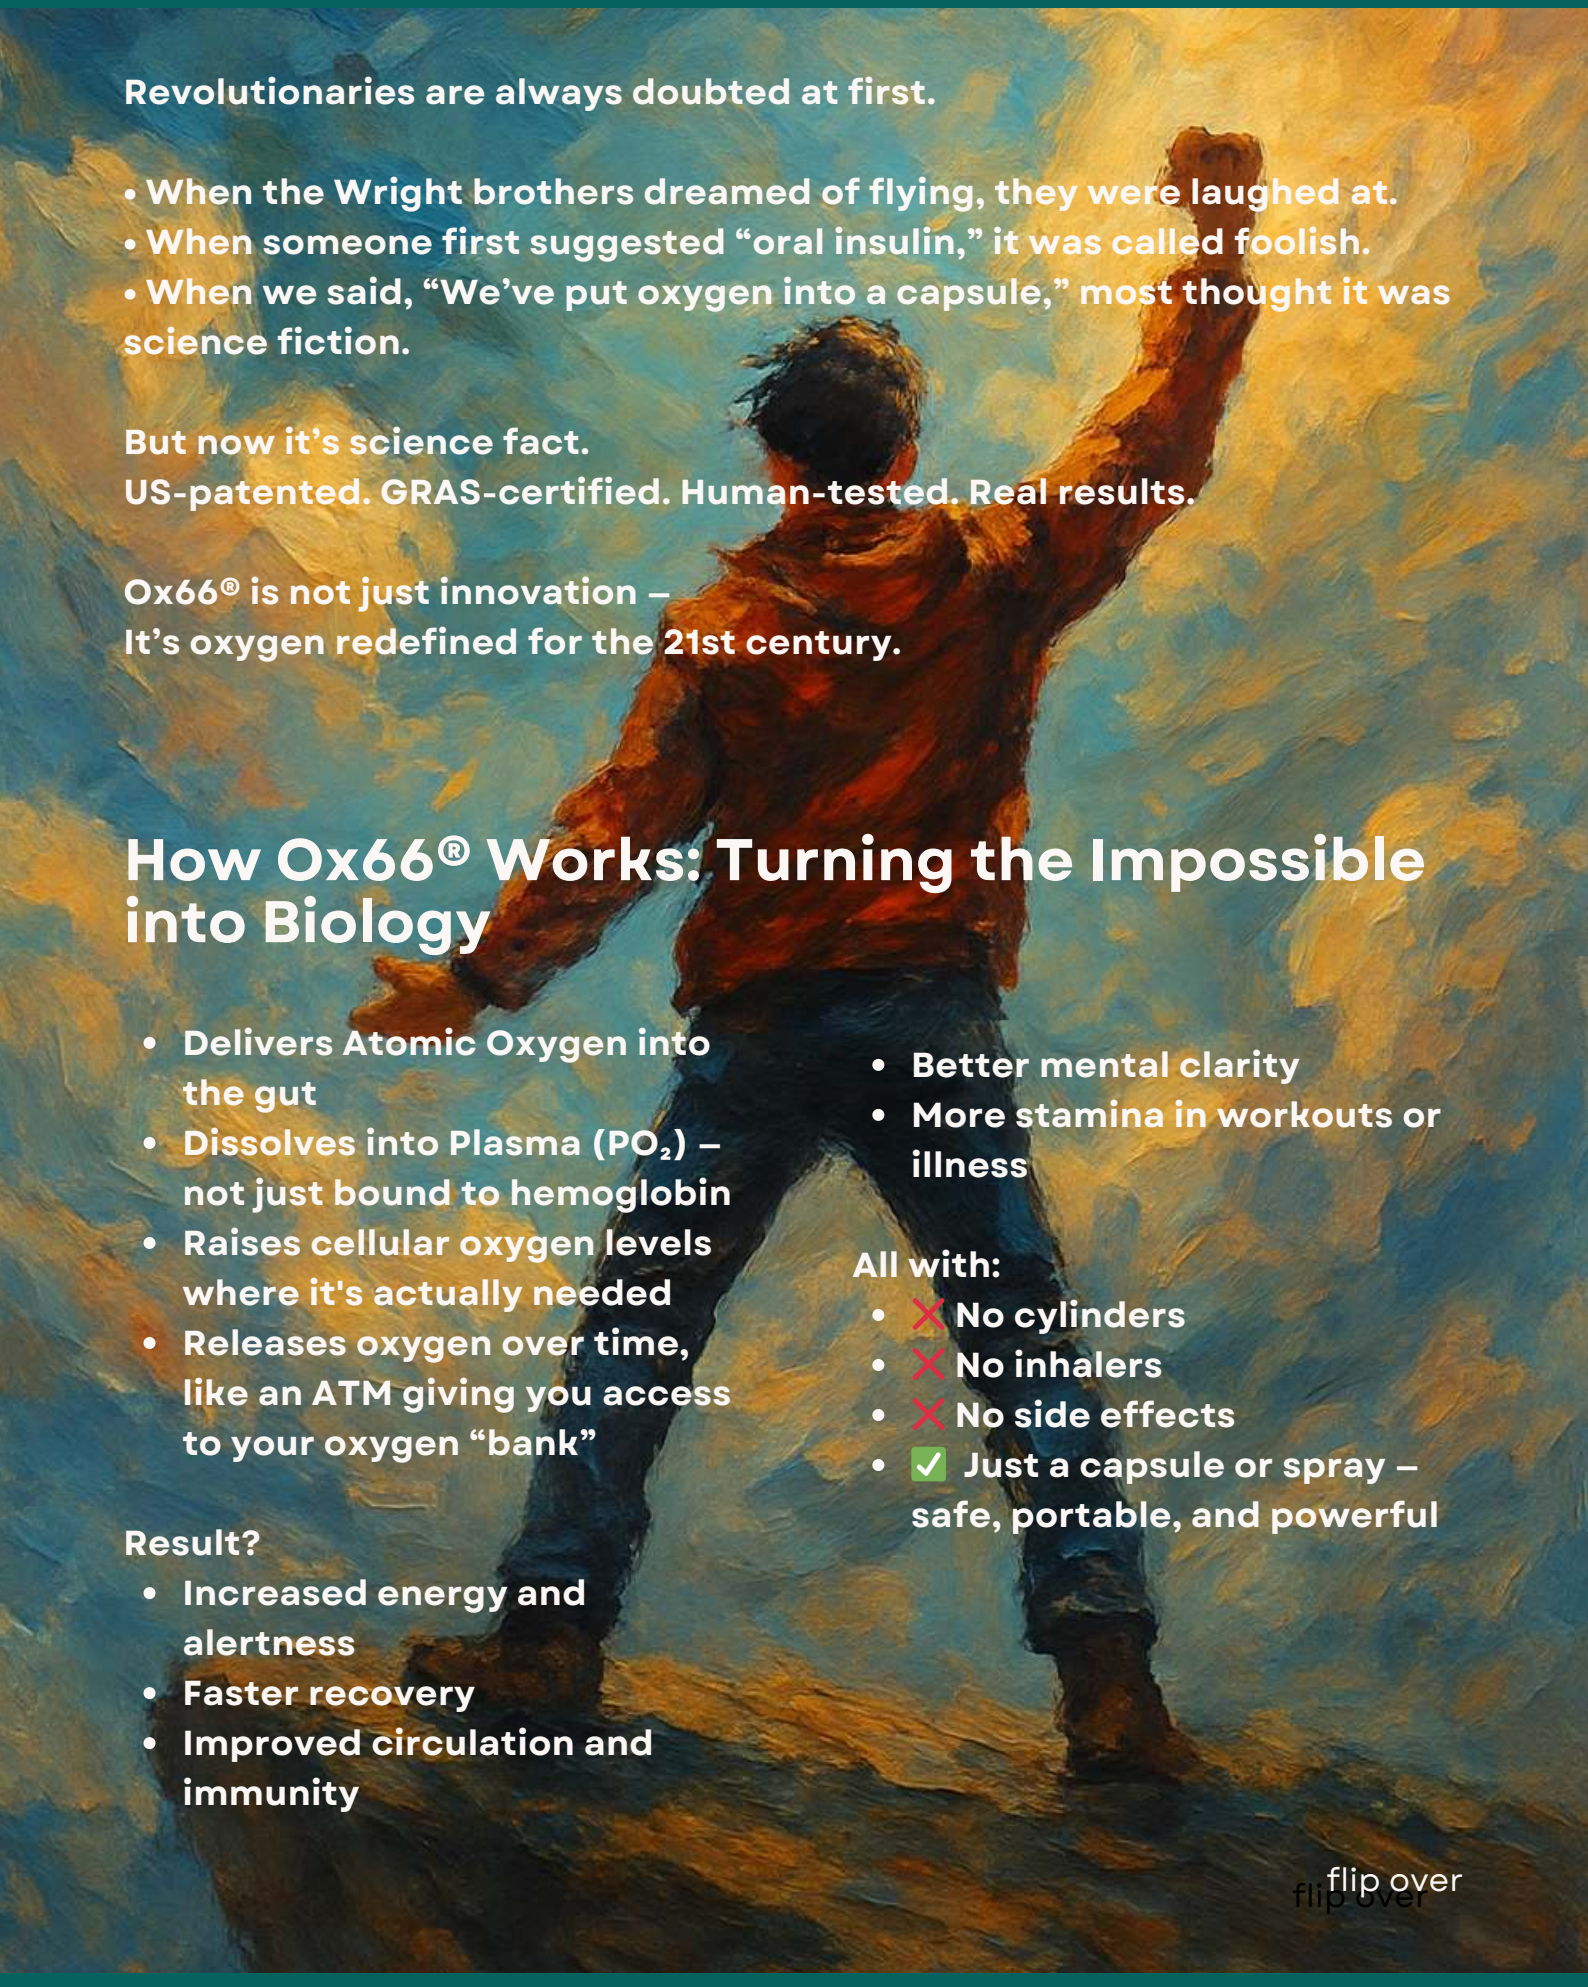

- **Constant fatigue**
- **Breathlessness**
- **Brain fog**
- **Panic or restlessness**
- **Slow recovery**
- **Sleep disturbances**

Yet their oxygen monitors say everything is "normal."

This is what the healthcare system has missed – until now.

They Called Us Crazy. We Call It Courage.

Revolutionaries are always doubted at first.

• When the Wright brothers dreamed of flying, they were laughed at.
• When someone first suggested "oral insulin," it was called foolish.
• When we said, "We've put oxygen into a capsule," most thought it was science fiction.

But now it's science fact.
US-patented. GRAS-certified. Human-tested. Real results.

Ox66® is not just innovation –
It's oxygen redefined for the 21st century.

How Ox66® Works: Turning the Impossible into Biology

- Delivers Atomic Oxygen into the gut
- Dissolves into Plasma (PO_2) – not just bound to hemoglobin
- Raises cellular oxygen levels where it's actually needed
- Releases oxygen over time, like an ATM giving you access to your oxygen "bank"

Result?

- Increased energy and alertness
- Faster recovery
- Improved circulation and immunity
- Better mental clarity
- More stamina in workouts or illness

All with:

- ❌ No cylinders
- ❌ No inhalers
- ❌ No side effects
- ✅ Just a capsule or spray – safe, portable, and powerful

You Are Part of This Movement

Every time someone takes Ox66®, they're not just taking a product.
They're making a decision.

A decision to challenge the status quo.
A decision to stop "waiting until it gets worse."
A decision to help their body thrive – not just survive.

And those who choose to spread the word... become something more.

They become OxygenPreneurs™ – early leaders in a health revolution.
Building legacy, impact, and business – by offering real oxygen to those who need it.

Ready to Join the Revolution?

- If you're:
- Tired of being tired
- Caring for someone with breathlessness or chronic fatigue
- Committed to wellness
- Passionate about creating impact in your city

Ox66® is your entry point.

- And OxygenPreneur™ is your next step.

OxygenPreneur™

- Be your own boss
- Own your own territory
- Your investment secured with CCPS - company shares
- Create Wealth + Profits
- Limited Spots per city • Fastest finger first !

Sunday Thought

"The people who are crazy enough to think they can change the world..
Are the ones who do."
– Steve Jobs

Final Word

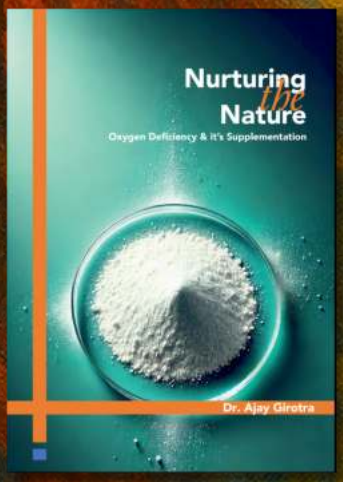

They said it couldn't be done.
They said it wouldn't work.
They said no one would believe us.

And yet — here you are.
Reading this. Breathing it in.
Living proof that the impossible.. is just the beginning.

Let's breathe differently.
Let's heal boldly.
Let's prove the world wrong — together.
