Think it over.

REAL ALTITUDE.
REAL TEST.
REAL RESULTS.

Not bothered about lactic acid now !
recovery is in minutes
my muscles fresh anytime ! everytime !

Tired Muscles? Slow Recovery?
Here's What Every Sportsperson Needs to Know.

How a revolutionary oxygen supplement is helping athletes recover faster and go further.

Dear Athlete,

Whether you're on the court, track, field, or pitch, one thing stops every great performance:

Lactic acid buildup. Muscle fatigue. Delayed recovery.

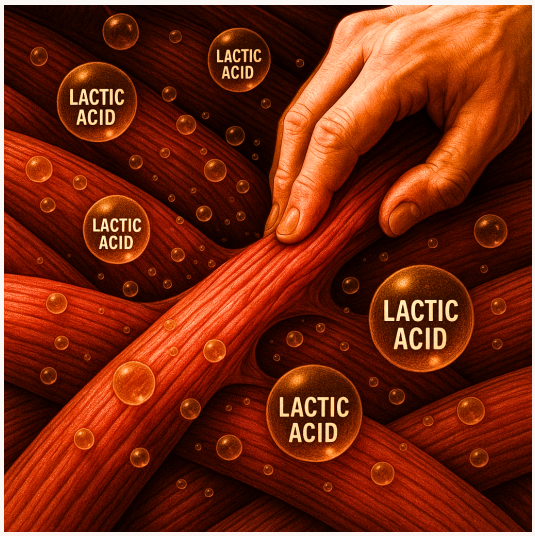

That **burning sensation...**
The **slowness after a hard match...**
The **tight muscles** even the next day...

These are signs your body is **suffocating at the cellular level.**

But what if your **recovery could happen in minutes?**
What if you could **feel fresh, focused, and recharged–anytime, every time?**

The Lactic Acid Problem

When you train hard or compete under pressure, your muscles use more oxygen than your body can supply.

That's when they switch to **anaerobic mode**, producing l**actic acid.**

Too much lactic acid =
- Muscle cramps
- Fatigue
- Drop in performance
- Slower recovery

The result? Even the fittest player feels burnt out.

The Game Changer:
Ox66® – Oxygen for Sport

Ox66® is solid, ingestible oxygen—
a breakthrough supplement that:

Ox66® is solid, ingestible oxygen–a breakthrough supplement that:

- ✅ Boosts cellular oxygenation instantly
- ✅ Clears lactic acid faster
- ✅ Reduces fatigue
- ✅ Enhances stamina and endurance
- ✅ Speeds up recovery
- ✅ Keeps your muscles fresh–even in the 4th quarter or 5th set

It bypasses lungs and delivers oxygen straight to your cells—where performance begins.

Why Every Sportsperson Needs It

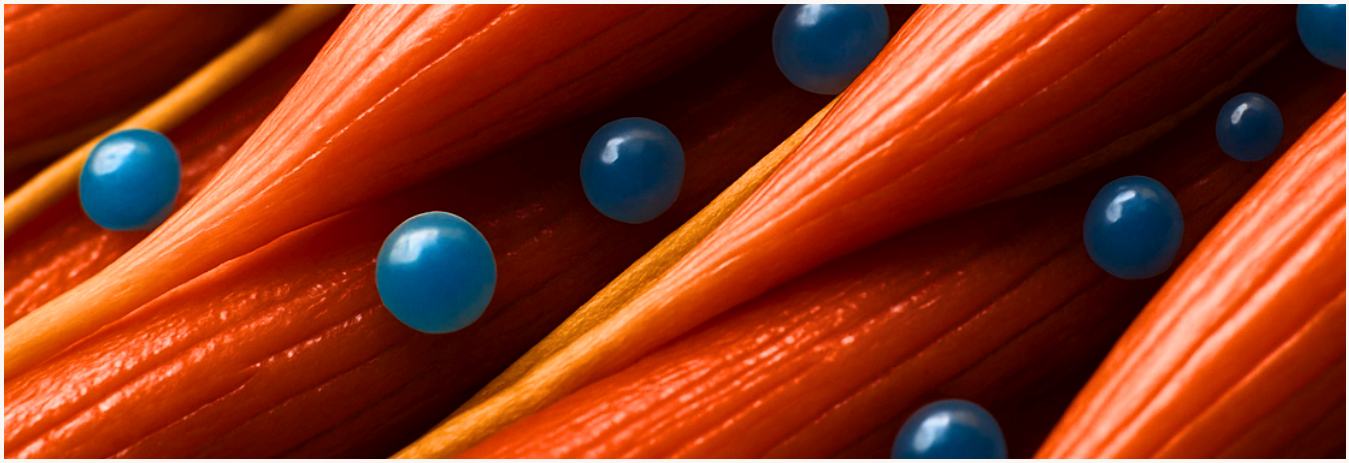

🏃‍♂️ **Sprinters** – Power through multiple heats without muscle burn
🏸 **Shuttlers** – Stay agile and fresh through every smash and rally
🏏 **Cricketers** – Recover between overs and innings
⚽ **Footballers** – Maintain energy till the last whistle
🏓 **Table tennis players** – Stay mentally sharp & reflex-ready
🏑 **Hockey players** – Combat turf heat and breathlessness
🏋️‍♀️ **Indoor athletes** – Reoxygenate faster in closed environments
🧗‍♂️ **Mountaineers** – Perform better even at high altitudes
🤼 **Kho Kho players** – Improve recovery between high-speed chases and dives
💪 **Kabaddi players** – Boost stamina and lung power for intense bursts and tackles

Real Athletes. Real Results.

“Not bothered about lactic acid now!”

“Recovery is in minutes.”

“My muscles stay fresh—anytime, every time.”

No more ice baths.
No more energy crashes.

One capsule of Ox66®, taken before or after your session, can:

⚡ Cut your recovery time
⚡ Boost your Pre-post match energy
⚡ Give you that extra mile when everyone else slows down

Science Meets Stamina

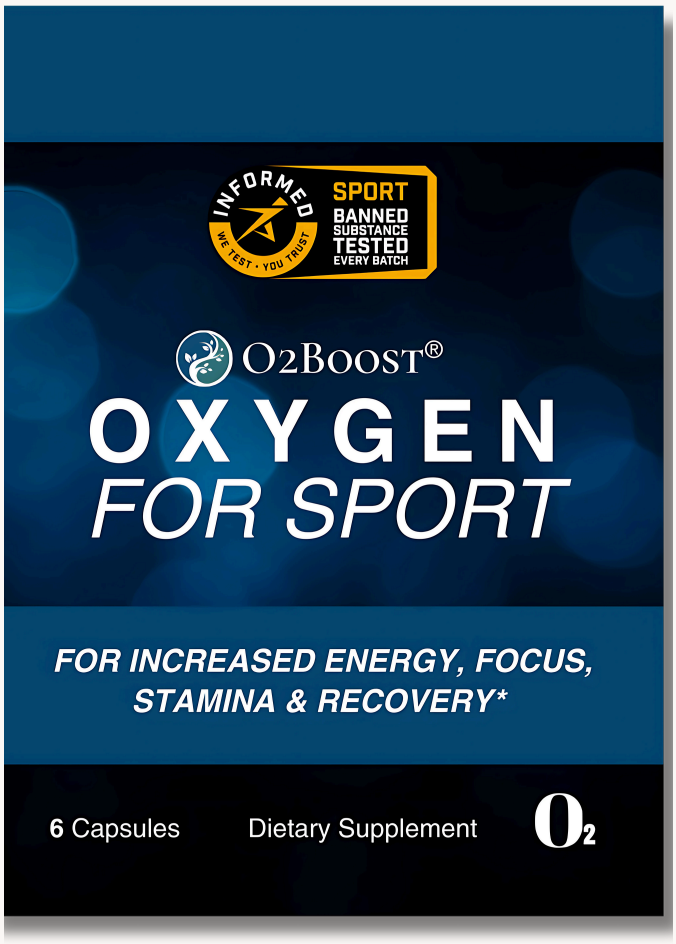

FDA - GRAS certified in the USA

✓ Tested for banned substances – Safe for all levels of competition

✓ Patented

✓Used by athletes

Your Edge is Here

The difference between good and great is oxygen.
And now, you can carry it in your sports bag.

Available in pouches of 4-6 capsules as well as in bottles of 30 capsules | 100% safe | No machines, no oxygen tanks

Real Altitude. Real Test. Real Results.

Climbing Mt. Whitney with Oxygen for Sport: A Breakthrough in Endurance & Recovery

“You don’t just climb Mt. Whitney… You climb your limits.”
That’s what one experienced mountaineer said after completing a grueling section hike on the **John Muir Trail**, ascending the towering **14,505 ft peak of Mt. Whitney.** But this time, something was different.
There were no oxygen cylinders.
No extended fatigue. No breathlessness.

A Real-World Endurance Trial

Climbing at high altitudes often means:

- Muscle fatigue
- Breathlessness
- Lactic acid buildup
- Hours of recovery after every stretch

But this athlete turned his climb into a **live oxygen trial**, taking **18 capsules of Ox66® in a single day:**
🕒 4 capsules every 3 hours x 3 days
🌙 6 capsules before sleep x 3 nights

“I stayed sharp. I stayed strong.
My legs didn’t crash. My mind didn’t fog.
I recovered in minutes, not hours.”

Proof of Strength. Proof of Safety.

This wasn't just a performance boost—it was a **safety statement.**
18 capsules. Zero side effects. Only stamina, clarity, and controlled breathing.
It proved two things:

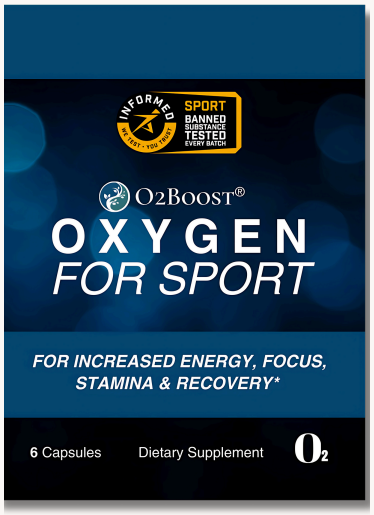

1. Ox66® is powerful even under extreme physical and environmental pressure
2. It is 100% safe—even at high doses when the body needs it most
