

2025 Car Safety Seat Product Listing

When looking for a car seat for your child, you may be uncertain which features to look for based on your child's age, size and other needs. This list can help you sort through all the choices.

Notes:

*Weight is in pounds [lbs.] and height is in inches ["]

**Load legs and anti-rebound bars are features that can help absorb the energy of a crash. Load legs reduce forward rotation in the initial phase of a crash, and anti-rebound bars protect the child during the second phase of a crash from rearward rotation.

Rear-facing only seats

(Used rear-facing. All seats have a 5-point harness.)

Name	Rear-Facing Weight Limits*	Height Limits*	Load Leg or Anti-Rebound Bar**	Price

<https://www.healthychildren.org/CarSeatGuide>

All products listed meet Federal Motor Vehicle Safety Standard 213 as of the date of publication. Car safety seats may be available that are not listed in this publication. Prices are approximate and may vary. The following information is current as of the date of publication. Before buying a car safety seat, check the manufacturer's instructions for important safety information about proper fitting and use.

The National Highway Traffic Safety Administration (NHTSA) has put together the car safety seat Ease-of-Use Ratings to educate parents and caregivers about car safety seat features and to assist them in finding the appropriate seat for their needs. You can view the ratings at <https://www.nhtsa.gov/car-seats-and-booster-seats/car-seat-ease-use-ratings>.

Although the American Academy of Pediatrics (AAP) is not a testing or standard-setting organization, this publication sets forth AAP recommendations based on the peer-reviewed literature available at the time of its publication and sets forth some of the factors that parents should consider before selecting and using a car safety seat.
