Shelf * 1

LED Strip with USB Cable * 1

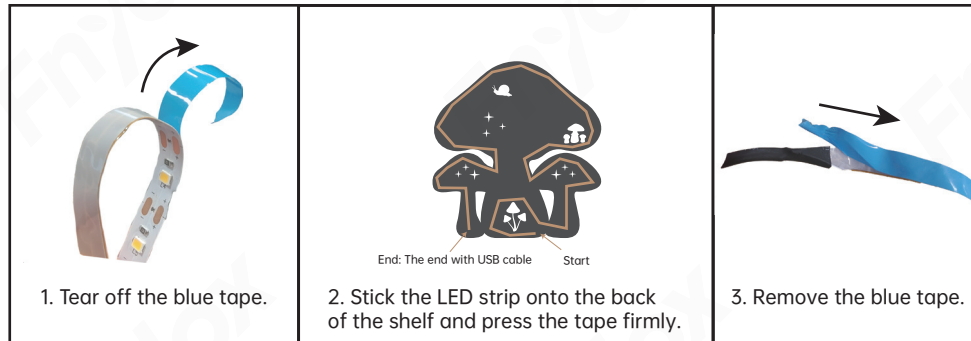

Wooden Shim * 1

Self Tapping Screw * 2

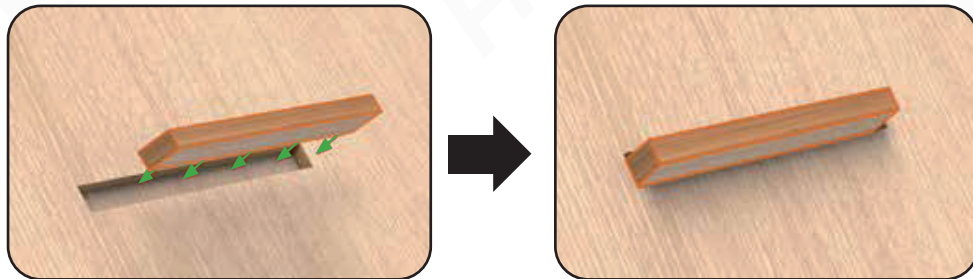

Plastic Expansion Tube * 2

User Manual * 1

LED Installation

Wooden Shim Installation

The shelf has been thoughtfully upgraded with an elaborate design to ensure items stay securely in place. To install, simply insert the wooden shim into the groove on the back of the shelf before hanging it up.

Wall Mount

1. Mark the Spots

Measure and mark where you want the screws (the distance between two screws should be 3.94" / 10cm).

2. Drill the Holes

- 1) Choose a drill bit that matches the size of the plastic expansion tubes.
- 2) Drill two holes slightly deeper than the expansion tubes.

3. Insert the Plastic Expansion Tubes

Tap the plastic expansion tubes into the holes until they are flush with the wall.

4. Insert the Screws

- 1) Place the screws into the expansion tubes.
- 2) Tighten with a Phillips screwdriver.

Tips:

- Match the drill bit size to the expansion tubes.
- Don't force the screw if it resists; adjust and try again.

Care Instruction

- The shelf and LED strip are not water-resistant; please be cautious when installing and using.
- Clean with a dry cloth.
