

HOW TO USE

Uses: EltaMD UV Clear Broad-Spectrum SPF 46 helps prevent sunburn and, if used as directed with other sun protection measures (see Directions), decreases the risk of skin cancer and early skin aging caused by the sun.

Directions

- Apply liberally to face and neck 15 minutes before sun exposure
- Use a water-resistant sunscreen if swimming or sweating
- Reapply at least every 2 hours
- **Sun Protection Measures.** Spending time in the sun increases your risk of skin cancer and early skin aging. To decrease this risk, regularly use a sunscreen with a broad-spectrum SPF of 15 or higher and other sun protection measures including:
 - Limit time in the sun, especially from 10 a.m. – 2 p.m.
 - Wear long-sleeve shirts, pants, hats, and sunglasses
- Before use on children under 6 months: Ask a physician

How to activate pump:

1. With the cap cover in place over the pump, invert the container upside down and tap firmly 4-5 times. (This will force the liquid up into the actuator and create a vacuum).
2. Return the container to its upright position.
3. Remove the cap, and with the nozzle away from your face, press the pump to dispense the product into your hand. It may take several pumps to completely prime the pump to allow the actuator to deliver product.
4. If pump continues to fail, try steps again.
