INFORMATION

TexFix® is the abbreviation of Textil Fixing, our range of textile graphics exhibition applied on aluminum profiles. A system where innovation and high quality go hand in hand. The process of creating TexFix® is as simple as it is easy to apply: around the entire edge of the textile graphic a fine silicone cord is sewn and then inserted into the rail of the aluminum profile. Its versatility, simplicity of application and high visual impact (with the possibility of incorporating an LED system), makes it currently one of the most demanded and effective communication solutions in the market: store decoration, shop windows, offices, exhibitions, waiting rooms, as in the creation of stands, furniture, promotional totems or exhibitors.
