

Discover. Design. Deploy.

Bringing Power Systems to Life

RE+Source PRO is the 24/7 online community for the power system industry. Offered by RE+ Events and designed by Direct Energy Partners, it connects manufacturers, designers, engineers, and developers in one trusted, intelligent platform. Discover innovative products, access real-world case studies, and collaborate with peers any time, from anywhere. More than a catalog, RE+Source PRO is your always-on community to: streamline and accelerate project planning; deliver recommendations that are relevant, compatible, and ready to act on; and, build lasting business partnerships that shape the future of clean energy.

WHO BENEFITS FROM RE+SOURCE PRO?

Manufacturers: RE+Source PRO extends the reach of manufacturers beyond the tradeshow, offering increased visibility to a global audience year-round. This platform allows manufacturers to showcase their products, provide training materials, share in-depth product knowledge, and offer direct support to customers, resulting in lasting connections and repeat business. By strengthening their reputation and building lasting connections, manufacturers can drive repeat business and expand their market presence.

Designers: With RE+Source PRO's integrated design platform, designers can visualize how products fit into specific projects, search reference designs, create concept one-line drawings, and check power flows, and size wires – all in one place. This streamlines the design process, minimizes errors, and reduces rework and commissioning issues, allowing for faster project timelines and better client outcomes.

EPCs: RE+Source PRO saves EPCs time by consolidating product information from multiple manufacturers in one centralized platform. It simplifies the process of finding and comparing products, ensuring compatibility and quality. By using the right products and optimized designs, EPCs can reduce material waste, avoid unnecessary purchases, and deliver higher-quality installations.

Business Developers: RE+Source PRO supports business developers growth opportunities by showcasing their company and solutions to a global, year-round audience. The platform provides access to a curated network of manufacturers, engineers, EPCs, and service providers, along with case studies and reference designs that strengthen proposals. By positioning their offerings in front of the right decision-makers 24/7, business developers can generate leads, build trust, and accelerate business deals beyond the tradeshow floor.

With RE+Source PRO ...

- » Discover products within this curated library of top manufacturers and their applications.
- » Explore tools that provide resources designed to boost your business development and sales efforts with multiple companies.
- » Review case studies, including real-world examples of successful infrastructure.
- » Examine design integration and equipment compatibility with streamlined tools for planning and execution.
- » Connect designers directly with manufacturers and service providers.
