

Prepare for your future!

We invite students interested in a career in health or medicine to apply our Health Science Academy. Our curriculum is rigorous in detail and highly relevant to the needs of today's health care industry. Real world experiences will be provided to each student, allowing for practical application of classroom knowledge in ongoing civic and business ventures.

Our partnership with the Emergency Training Academy (ETA) offers enhanced educational opportunities for those with a keen interest in the medical and health fields. Together with advanced science courses and dual enrollment offered at SACH, students will have a distinct advantage as they pursue higher education and career opportunities in the health care field.

Pursue Industry Certifications

- Health Care Level CPR/Basic Life Support
- Emergency Medical Responder
- Emergency Medical Technician

Pre- Requisite to enter the Health Science Academy Physical Science

Curriculum

9th Grade: Anatomy and Physiology
10th Grade: Emergency Medical Responder
11th Grade: EMT Course Term 1
12th Grade: EMT Course Term 2

Receive professional medical training through innovative partnerships

Students will receive daily instruction by the instructors actively in the field from ETA. Students will be required to complete all graduation requirements necessary to receive an EMT Diploma as an integrated part of their school day. This will allow the student to apply for National and State licensure after passing the EMT National Examination.

Students in the Health Science Academy have access to college-level science courses. Students can receive up to 8 college credits per school year by taking Doral College science courses, which include College Biology, Chemistry, and Principles of Biology I & II. Students receive this instruction as a part of the regularly scheduled school day.

Gain real-world experience through the Externship Program

- Hands on training
- Rescue Field Externships
- Hospital Internships
