Key Role Call votes in the Michigan House of Representatives.

24

House members who earned a perfect 100% score, receiving special designation as a “Champion of Free Enterprise.”

Michigan Chamber Members:

We are pleased to again present the Michigan Chamber’s biennial voting scorecard: the 2023-24 Job Provider Index (JPI).

Every election year, the Chamber releases its JPI, tracking key legislative votes on top policy issues impacting job providers, their employees and the state’s business climate and economy. We are particularly focused on fostering pragmatic problem solving and advancing policies that ensure businesses across the Great Lakes State can grow and thrive, so our communities and families can too.

While this tool is intended to inform our members, it also serves as the basis for determining the Michigan Chamber’s endorsements for incumbent legislators. Any incumbent legislator who has a 75 percent or better voting record with the Chamber will receive an earned endorsement for re-election to that same office. The Chamber reserves the right to withhold an earned endorsement for any condition or information that would reflect poorly on the organization. Legislators scoring a perfect mark, or 100%, earn the special designation as a “Champion of Free Enterprise.”

Only members of the Michigan House of Representatives will be up for election in 2024, not the Michigan Senate. Consequently, only the votes of Michigan’s state representatives are considered within the 2023-24 version of the Chamber’s JPI.

We hope this tool will serve as a valuable resource for you as both a voter and business leader as the 2024 primary and general elections approach.

Jim Holcomb

President & CEO,
Michigan Chamber

2023-24 Key House Votes and Bill Descriptions

Employment Law

Hinders Michigan's competitiveness and the rights of employees (Senate Bill 34) – Passage of a bill to repeal Michigan's landmark Right to Work law, marking the first state in nearly 60 years to repeal the policy. Eliminating the state's Right to Work status is a step backward for hardworking Michiganders and will make Michigan less competitive with neighboring states and nationally. The Michigan Chamber opposed this legislation. The bill passed and was signed into law.
Roll Call Number 34

Increases the cost of public construction and infrastructure projects (House Bill 4004) – Passage of a bill to reinstate Michigan's Prevailing Wage Law, requiring all publicly funded construction projects to pay union-level wages and benefits, regardless of whether the worker is unionized. This policy change will drive up the cost of public construction projects and make it more difficult for small businesses and non-union contractors to compete for projects. The Michigan Chamber opposed this legislation. The bill passed and was signed into law. *Roll Call Number 20.*

Environment and Sustainability

Imposes aggressive new "clean" energy mandates, threatening affordability and reliability (Senate Bill 271) – Passage of a bill mandating restrictive new renewable and clean energy mandates, which have deep potential to drastically increase energy costs and threaten reliability for businesses and residents alike. The Michigan Chamber opposed this legislation. The bill was passed and signed into law.
Roll Call Number 486

Decreases transparency and accountability in environmental rule-making process (House Bill 4824) – Passage of a bill to eliminate the state's Environmental Rules Review Committee (ERRC), an oversight panel that had reviewed all proposed rules by the Michigan Department of Environment, Great Lakes, and Energy. The ERRC was created to increase transparency in the Department's rulemaking process and to advise the governor on a rule's feasibility. The Michigan Chamber opposed this legislation. The bill passed and was signed into law. *Roll Call Number 548*

Regulatory Climate

Authorizes state agencies to adopt rules stricter than federal standards (Senate Bill 14) – Passage of a bill to rescind prohibitions on state agencies from promulgating rules stricter than federal standards. The bill will increase the regulatory compliance burden and costs on businesses forced to adhere to new rules more restrictive than what is required nationally, jeopardizing our state's competitiveness. The Michigan Chamber opposed this legislation. The bill was passed and signed into law.
Roll Call Number 260

Tax Policy and Economic Competitiveness

Exempts delivery and installation services from state sales and use tax (House Bill 4039) – Passage of a taxpayer-friendly bill to stop the Michigan Department of Treasury from deviating from existing statute and erroneously requiring businesses to collect a 6% sales and use tax on delivery and installation services. The legislation also requires Treasury to drop pending actions and collection activities against businesses. The Michigan Chamber supported this legislation. The bill was passed and signed into law.
Roll Call Number 26

Exempts road production machinery from sales and use tax (House Bill 4054) – Passage of a bill to help ensure long-lasting infrastructure by lowering the cost of products that build Michigan's roads. The bill, supported by the Michigan Chamber, exempts any machinery processing aggregates from the state's sales and use tax. The bill was passed and signed into law. *Roll Call Number 27*

Modernizes property tax assessments (House Bill 4926) – Passage of a bill to modernize Michigan's personal property tax collection processes in a post-COVID environment. The bill ensures property used for remote-based work (e.g., computers, phones, office chairs, etc.) is taxed in a consistent manner regardless of where the employee is working. The Michigan Chamber supported this legislation. The bill was passed and signed into law. *Roll Call Number 321*

Creates a research and development (R&D) tax credit in Michigan (House Bill 5100) – Passage of a bill to create an R&D tax credit as a beneficial economic development tool to attract and retain businesses and spur innovation in our state. Michigan is just one of 12 states that does not offer such an incentive. The Michigan Chamber supported this legislation. The bill was passed by the House. *Roll Call Number 428*

Workforce

Incentivizes work through the Earned Income Tax Credit (HB 4002) – Passage of a bill to help address the workforce crisis and build up our state's talent pipeline by increasing the state's EITC from 6% to 30% for low-to-moderate-income workers. For workers, the EITC has a history of pulling people into the workforce; for businesses, it incentivizes potential employees to join the workforce and remain employed. The Chamber supported this legislation. The bill passed the House but ultimately was combined with an unrelated proposal before it was signed into law. *Roll Call Number 6*
