• **Summary:** Contents: Introduction, by Elaine Brown. Using this cookbook: Soy cooking oil, soy margarine, soy shortening, soy sauce, whole soybeans, soy flour, soy granules, soy grits, soy milk, soya nuts, special cookbook features. Recipes: Spaghetti sauce. Salmon croquettes. Chili. Beans with ham. Chicken pie. Green bean casserole. Soya quiche. Tuna loaf. Asparagus casserole. Date bars. Pie crust. Banana bread. Peach surprise muffins. Caramel rolls. Banana cream pie. Soya doughnuts. Pumpkin bread. Cherry coffee cake. Protein and calorie analysis. Address: Home economist, P.O. Box 27300, St. Louis, Missouri.

5458. Schafer, Edward H. 1977. T'ang. In: K.C. Chang, ed. 1977. Food in Chinese Culture. New Haven, CT, and London: Yale Univ. Press. 429 p. See p. 85-140. [34 endnotes]

• **Summary:** The T'ang dynasty lasted from +618 to 907. Contents: Introduction. Foodstuffs. Sweeteners. Condiments and spices (incl. salt). Pickles and preservatives. Cooking. Beverages. Utensils. Visual aspects. Geographical differences. Taboos and prejudices. Food in ceremonies and special occasions (incl. feasts and festivals). Inns and taverns. Footnotes (34).

Legumes (*tou*) were an important part of the Chinese diet in T'ang times. Soybeans (*ta tou* = large beans) had a variety of uses and received considerable attention from the T'ang pharmacologists, who claimed to have discovered that the beans had different effects on the body depending on the way they were prepared. For example, when stir-roasted they were excessively heating, boiled they were too chilling [cooling], made into a relish (*shih* = fermented black soybeans) they were very cool, but pickled to make *chiang* (Chinese-style miso) they were balanced. However when

stir-roasted and taken in wine, they were said to be curative of certain kinds of paralysis. The young shoots of a variety of soybean called "white legume" (*po tou*) were much admired for their flavor, either cooked or raw, and were said to be good for the kidneys (p. 90).

Also important in the diet were "true" millet (*chi*; *Panicum miliaceum*), foxtail millet—also called spiked or Italian millet (*su*; *Setaria italica*), *shu* was the common word for glutinous millet and *no* was that for glutinous rice, various sea vegetables such as purple-leaved laver, green laver or "sea lettuce," and the sugary sweet tangle (p. 91), Far Eastern eggplant or brinjal (p. 93), and the jujube—which resembled the Western date (p. 95). Sesame seeds were chiefly of interest as a source of oil, but they were also fried and eaten (p. 98).

Concerning animal milk, there is the widespread idea that a line divides East Asia into two cultural groups: One depends on milk products (Indians, Tibetans, and many Central Asian nomads), and the other (which includes the Chinese) rejects them with loathing. "Indeed some evidence for this classification can be found at every period of Chinese history, even though warm milk was regarded as a highly nutritious food from very ancient times (Cooper and Sivin 1973, p. 227). It seems, however, that after Han times, when the intermingling of Chinese and Altaic customs became pronounced to a new degree, the barrier of prejudice broke down, and by T'ang times milk products formed a significant part of the diet of the upper classes." Probable reasons for this change are given. "Milk was modified in many ways. It was curdled to make, for instance, (*ju fu*), analogous to bean curd [tofu]. Indeed, much more popular than unaltered milk were a number of fermented or soured derivatives." Three of these, which formed a hierarchy, were given special attention and spiritual significance corresponding to the development of the Buddha spirit: kumiss (*lo*, the lowest), kaymak or Devonshire cream (*su*), and clarified butter (*t'i-hu*, the highest) (p. 105-06).

Fresh ginger had a cooling property if used with the skin intact, but was warming if the root was peeled (p. 111).

The section titled "Pickles and preservatives" notes that the most characteristic and traditional Chinese methods of preserving involved fermentation processes which reduced "proteins into their component amino acids and amides by the action of enzymes, ferments, and molds. A very special species of pickle was called *chiang*, which has been aptly translated 'bean-pickle.' The word *chiang* appears in altered form as the first syllable of the Americanized Japanese expression for shoyu—soya. However in pre-modern times, *chiang* was not necessarily a soybean product. Indeed the word was sometimes applied to pickles based on meats and seafoods (Shih 1959, p. 84-85; *Fan Sheng-chih Shu*)... I shall use the term *bean-relish* to represent the Chinese word *shih*, the name of a popular relish of decomposed soybeans that assumes a dark color by interruption of the hydrolytic

process or by drying at a high temperature (Shih 1959, p. 87). The name was given to a number of similar concoctions, some prepared with wine, some with vinegar, some with brine, and so on. The differences were frequently local. One authority mentions a variety peculiar to a region in Honan that was made from steamed soybeans, with salt and fagara added. It matured in two or three days of warm weather. It was said that this salty pickle could be kept for ten years without spoiling."

"The milky bean curd—also known to Westerners by its Japanese name, tofu (Chinese *tou-fu*)—was a ferment made from many kinds of beans and peas. It was an ancient and familiar product (S.C. Li 1965 ed. of *Pen-ts'ao kang-mu*, 25:5)." Note: The author must be referring to fermented tofu, which was usually made from soybeans.

In the discussion of fish farming (p. 102) no mention is made of soybeans being fed to the fish. Address: Prof. of Oriental Languages, Univ. of California at Berkeley.

5459. Seki, Nobuo; Sakaya, Hiroshi; Onozawa, Tetsuhiko. 1977. [Studies on proteases from Antarctic krill]. *Nihon Suisan Gakkai shi (Bulletin of the Japanese Society of Scientific Fisheries)* 43(8):955-62. [12 ref. Jap; eng]

• **Summary:** Proteases were extracted from Antarctic krill (*Euphausia superba*). Through purification, they were separated into two trypsin-like proteases and a protease of unknown specificity. The trypsin-like proteases inhibited the activity of soy-bean trypsin inhibitor. Also mentions myosin. Address: Lab. of Biochemistry, Faculty of Fisheries, Hokkaido Univ., Hakodate [Japan].

5460. Spence, Jonathan D. 1977. Ch'ing. In: K.C. Chang, ed. 1977. *Food in Chinese Culture*. New Haven, CT, and London: Yale Univ. Press. 429 p. See p. 259-94. [38 ref]

• **Summary:** The Ch'ing dynasty (China's last dynasty) lasted from 1644 to 1911.

Concerning peanuts: Ho Ping-ti (1959, p. 183-95) has shown how maize, sweet potatoes, Irish potatoes, and peanuts all became basic crops in China during the Ch'ing, and how their story is enmeshed with the drama of China's internal colonization (p. 263). During the 1750s, Magistrate Li Hua-nan in Chekiang reported the popularity of peanuts. Table 4 (p. 269) shows the relative prices of sweet oil, peanut oil, salt, and salt turnip from 1902 to 1912. In 1928 L.K. Tao reported that peanuts were bought by 89.6% of the families in Peking (p. 270). Note: Reischauer and Fairbank in *East Asia: The Great Tradition* (1960, p. 393) agree. There was considerable growth in China's population during the 18th century, before the impact of industrialization. The leading explanation for such growth lies in the increase of the food supply made possible by (1) the opening up of new land to cultivation, often under imperial encouragement, and (2) the consumption of new food crops. Maize (corn), sweet potatoes, peanuts, and tobacco were all introduced into China

from the Americas in the 16th or 17th centuries. The sweet potato became the poor-man's food of south China.

Also discusses: Vegetarianism (p. 290). Address: Prof. of History, Yale Univ., New Haven, Connecticut. Phone: 609-452-4284.

5461. White, Beverly. 1977. *Bean cuisine. A culinary guide for the ecogourmet*. Boston, Massachusetts: Beacon Press. xv + 142 p. Illust. by Julie Maas. Index. 21 cm.

• **Summary:** Contents: Introduction. 1. Becoming a bean cook. 2. Bean soups. 3. Bean salads. 4. Bean sandwiches, spreads, and such. 5. Stovetop beanpots. 6. Oven beanpots. 7. Feasts for special occasions. Dried legume glossary.

Contains good information about pressure cookers and pressure cooking beans (p. 6-10, including soybeans). Soy-related recipes include: Soy sprouts (p. 13). Basic tofu (p. 14). Bean on bean soup (p. 18). Tofu mayonnaise (p. 27). Apple bean sprout salad (with tofu dressing, p. 39). Carrot salad with tofu (p. 40). Soy joy salad (p. 48). Amarillo taco (with cooked soybeans, p. 50). Soy sandwiches (p. 57-58). Soyburgers supreme (p. 58-59). USA paté (p. 60). Soybeans creole (p. 85). Hearthside baked soybeans (p. 99). Vegetable medley (with soybeans, p. 110). Miso shiru soup (p. 126). Soy cucumber salad—sunomono (with soy sauce, p. 126). Vegetable sukiyaki (with tofu and soy sauce, p. 127). Basics (p. 136).

Soybean sprouts should be ½ to 1 inch long; they need to be parboiled for 10 minutes before use in salads. Freshen old tofu by parboiling for 2-3 minutes in a pot of boiling water.

5462. Whyte, Karen Cross. 1977. *The original diet: Raw vegetarian guide and recipe book*. San Francisco, California: Troubador Press. x + 109 p. Illust. by Bill Yenne. Index. 21 cm. [60+ ref]

• **Summary:** "The raw food vegetarian can make better use of legumes and grains by sprouting them." Soybean sprouts should be about 50 millimeters long (p. 37). Also contains a recipe for Ginger-soy sauce (p. 71).

5463. Wilkins, Mira. ed. 1977. *Foreign investments in the United States: Department of Commerce and Department of Treasury estimates*. New York: Arno or Ayer Publishing. See p. 48. Series: European business: Four centuries of foreign expansion. *

• **Summary:** The section titled "Oriental Show-You Company" (p. 48) states that the vested minority interest in this company was also sold to a high bidder at a public sale. "At that time none of the bids received were adequate and all were rejected; the reoffering produced an acceptable bid."

5464. Wong, Irene. 1977. *Great Asia steambook*. Brisbane, California: Taylor & Ng; New York: Distributed by Random House. [viii] + 97 p. Illust. (photos). Index of recipes. 22 x

22 cm.

• **Summary:** Includes recipes (all steamed) and ingredients from throughout Asia, but with emphasis on China.

The “Glossary of ingredients” (p. 80-95, with a large photo of each) includes:

“Bean curd, fresh.” Bean curd, red (Nam yue).

Bean sauce: “Sold as ‘Yellow bean sauce’ and ‘Ground bean sauce’; also known as brown bean sauce or *mien see* (Cantonese Chinese).”

“Black beans, fermented and salted (*Dow See*): A Chinese spice. Small raisin-size black beans sold in plastic or cellophane packages. May be rinsed and mashed with minced garlic and ginger for steaming, stir-frying, and braising...”

Fu: pressed, dry wheat gluten cakes. Hoisin sauce. Miso. Nam yue. Nori. Oyster sauce: Made from oysters and soy sauce. Red bean curd. Red bean paste [azuki an] (*Dow sah*). Sweetened to make a filling for steamed bread (*bao*). Soy sauce. Sweet rice (see glutinous rice). Teriyaki sauce. Tofu: See bean curd, fresh.

About the author: She was born in Fresno, California and grew up in a spacious Victorian frame house in the thriving Chinatown section. Her father and uncle had immigrated from Sun Doh, a village in Kwantung province of mainland China, when the Japanese army invaded the region in 1938. She graduated from the University of California, Berkeley, then taught English as a second language in the Chinatown of nearby Oakland. In 1974 she married Alan Gribben, now an assistant professor at the University of Texas in Austin. Currently Irene is an instructor of Chinese cooking at Taylor & Ng, San Francisco importers and designers. Address: San Francisco Bay Area, California.

5465. Wood, B.J.B. 1977. Oriental food uses of *Aspergillus*. In: J.E. Smith and J.E. Pateman, eds. 1977. Genetics and Physiology of *Aspergillus*. New York: Academic Press. x + 552 p. See p. 481-98. [33 ref]

• **Summary:** Contents: Introduction. Koji. Tamari. Miso. Tempeh. Sake. Some minor fermentations. Fermented foods and mycotoxins. Acknowledgments. References. Address: Dep. of Applied Microbiology, Univ. of Strathclyde, Glasgow [Scotland], U.K.

5466. Yokotsuka, Tamotsu. 1977. Shokuhin Kagaku Daijiten: Shôyu [McGraw-Hill encyclopedia of food, agriculture & nutrition: Soy sauce]. Tokyo: McGraw-Hill Kodansha. See p. 309-310. [Jap]

• **Summary:** History: Hishio and Kuki production techniques came to Japan from China and Korea. According to the Taiho Ritsuryo (702 A.D.), various types of Hishio and Kuki and Miso (this is the Misho character—NOT the present Miso one) were made from soybeans in the Hishio Tsukasa of the Kunaisho. It is in later times that they started to use the liquid which was separated from the above three as seasonings. In

the Kamakura (1185-1333 A.D.) period in the Wakayama prefecture they collected the liquid accumulated in the bottom of Miso Oke. In the Muromachi period (1338-1573 A.D.) they added water to miso and squeezed it to extract the liquid (called Usudare or Taremisu). Shoyu (which is different from miso) was first mentioned in Ekirinbon Setsuyoshu (1597 A.D.). Address: Kikkoman Corporation, Noda, Japan.

5467. Haddix, Carol. 1978. You’ll feel a bit smarter at the Co-op. *Chicago Tribune*. Jan. 12. p. F3.

• **Summary:** The Hyde Park Co-op Super Market looks like any other supermarket, but you’ll soon discover the many rows of “strange Oriental vegetables.” The Japanese produce man will help you decipher the “strange names like bok toi [bok choy, bok choy], hakusai, cilantro, tofu, and wonton wrappers.”

Two recipes are given. The one for Japanese beef sukiyaki calls for “½ cup soy sauce” and “½ soy bean cake [tofu], diced.”

5468. Clark, Sandra. 1978. Higher education of a decadent cook. *New York Times*. Jan. 25. p. C3.

• **Summary:** A “Recent College Graduate” (RCG) arrives home for the holidays. It’s 1978. She’s hip, interested in new foodways, makes delicious stir fries, and eats with chopsticks. She takes the author (her mother) to Chinatown and introduces her to “the mysteries of sesame oil, bok choy (chinese cabbage) and tofu (soy bean curd). ‘You change the tofu water every day, it’ll keep.’”

Back in the home kitchen cooking, her mother offers her some “soy.” “‘Not that watery supermarket brine!’ she scolds. She reaches into her backpack, produces a jar of something black, with a lotus blossom and haiku label. ‘Tamari,’ she informs me.

She teaches her mom how to grow sprouts in a Mason jar using alfalfa seeds and mung bean sprouts, how to rinse them twice a week, to re-oil the wok, and to change the tofu water.

5469. Wells, Patricia. 1978. How to increase nonanimal protein in the daily diet. *New York Times*. Jan. 25. p. C6.

• **Summary:** It is no accident that Mexicans eat corn with their beans, that Italians combine pasta with their beans, or that Japanese sprinkle soy sauce on their rice. These are all simple ways of “combining incomplete vegetable proteins to create a balanced protein.” The idea of “complimentary protein” is not new, but it has been popularized by the book *Diet for a Small Planet*, by Frances Moore Lappe.

When baking, experiment with soy products. In recipes calling for 2 cups wheat flour, for example, use ¼ cup soy flour and 1 ¾ cups wheat flour.

Gives 4 recipes, including: Leafy Chinese tofu (with sesame seeds, soy sauce, and brown rice). Vegetable rice

curry (with soy grits and peanuts). Garbanzo spread.

5470. Abdon, Isabel C. 1978. Soy sauce industry in the Philippines. In: ASEAN Soy Sauce Committee, ed. 1978. Report of the ASEAN Workshop on Soy Sauce Manufacturing Techniques. Singapore. 252 p. See p. 32-40. [7 ref]

• **Summary:** Dietary surveys conducted by FNRI all over the Philippines from 1958 to 1975 showed an average per capita intake of 1.0 gm of soy sauce per day. Consumption was highest in Mindanao (1.05 gm), followed by Luzon (0.997 gm) and Visayas (0.816 gm).

“Very little information is available on the present stats of the soy sauce industry in the Philippines. In 1959 one of the B.S. Food Technology students at the University of the Philippines made a study on the soy sauce industry in Manila and the suburbs for her thesis. No other publication on this subject is available to date except the annual reports published by the National Census and Statistics Office (NCSO)...

“The 1959 survey was conducted by distributing questionnaires to soy sauce manufacturers listed with the Bureau of Commerce... Of ten respondents, 50% were owned by Chinese, 30% by Filipinos, and 20% by both Filipinos and Chinese. Type of ownership was 30% sole proprietorship, 20% partnership, and 50% corporation.”

The manufacture of soy sauce in the Philippines is believed to have “started in 1929 by the Chinese. At present most of the large and small establishments are found in the Metro Manila area. Of the 23 factories registered with the Philippine FDA, 18 are operating in Luzon, 4 in the Visayan Islands, and 1 in Davao, Mindanao.” Address: Food Research Div., Food and Nutrition Research Inst., National Science Development Board, Manila, Philippines.

5471. American Soybean Assoc. ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. Held 25-27 Jan. 1978, Republic of Singapore. No index. 29 cm. [328 ref]

• **Summary:** Contains 34 papers, largely about the use of modern soy protein products. Individual papers are cited separately. The “registration list” (p. 127-35) is a detailed directory of participants and the press. The eight “Exhibitors” (p. 136) were American Soybean Association (Hudson, Iowa), DeKalb County Exports Inc. (Ottawa, Illinois), Intercom News (Kansas), Japan Vegetable Protein Food Association (Tokyo), Kikkoman Shoyu Co. Ltd. (Tokyo), Ralston-Purina (St. Louis, Missouri), United Vegetable Oil Co. (Pte) Ltd. (Singapore), and Wenger International Inc. (Kansas City, Missouri). Address: Hudson, Iowa.

defatted meal. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 53-58.

• **Summary:** Contents: Abstracts. Introduction: Non-fermented products (soymilk, soybean curd, yuba), fermented products (soy sauce, soy cheese, tempeh), others (soybean sprouts, whole bean), soymilk and soymilk powder from defatted soymeal. Results and discussions: Preparation of soymilk powder. Conclusion. Address: Dep. of Scientific Services, Singapore.

5473. ASEAN Soy Sauce Committee. ed. 1978. Report of the ASEAN Workshop on Soy Sauce Manufacturing Techniques. Singapore. 252 p. Held 22-24 Jan. 1978 at Singapore. No index. 30 cm. [200 ref]

• **Summary:** This is the 4th ASEAN Protein Workshop. Near the front is a List of participants (directory). Address: Singapore.

5474. Asunaro Eastern Studies Institute. 1978. Now offering fall classes in traditional fermented foods: Miso, tamari, tofu, nato [sic, natto], sake, tekka, etc. (Ad). *East West Journal*. Jan. p. 82.

• **Summary:** Classes “taught by Naboru [sic, Noboru] Muramoto, author of *Healing Ourselves*. Also daily cooking classes. Located on 134 acres in Sonoma, California.” For further information, send for brochure. An illustration shows the Asunaro logo. Address: 4600 Cavedale Rd., Glen Ellen, California 95442. Phone: (707) 996-9659 or 938-9846.

5475. Eden Foods. 1978. Catalog 1978. 4601 Platt Rd., Ann Arbor, MI 48104. 57 p.

• **Summary:** On the cover is a workman loading sacks from one of many large hoppers. Another man, in front of a truck, moves a pallet. Pages 17 and 18 contain detailed information about and photos of the Eden-brand tamari (natural shoyu) and miso products. Eden now sells a brown rice miso, aged naturally for 1½ years. Hacho miso is now called “Soybean miso.” Nigari and Tekka are also listed. No prices are listed in this catalog; it contains descriptions of the products and many nice illustrations. The prices are listed on separate sheets. Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

5476. Fukushima, D. 1978. Soy sauce manufacturing techniques. In: ASEAN Soy Sauce Committee, ed. 1978. Report of the ASEAN Workshop on Soy Sauce Manufacturing Techniques. Singapore. 252 p. See p. 138-47. Address: Kikkoman, Walworth, Wisconsin.

5477. Fukushima, Danji. 1978. Fermented soybean protein foods in Japan. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 39-42.

• **Summary:** There are three major kinds of fermented soybean foods in Japan: Shoyu, miso, and natto. "In Japan, about 439,500 tons of soybeans and defatted soybeans are used as the materials of these fermented soybean foods. Among these, 175,000 tons are used for shoyu, 195,000 tons are used for miso, and 69,000 tons are used for natto."

Table 1 shows the consumption of soybeans and defatted soybeans in Japan in 1976 for foods (1,026,000 tonnes) and feeds (1,980,000), for a total of 3,006,000 tonnes. Foods are divided into fermented (shoyu, miso, natto; 439,500 tonnes) and non-fermented (tofu and aburage, kori-tofu, and others; 586,500 tonnes). For non-fermented soyfoods 466,500 tonnes of soybean are used for tofu and aburage, 29,000 tonnes for kori-tofu, and 91,000 tonnes for other products.

"Recently, a new fermented drink using soybeans appeared on the market. This product is a drink which is made by the fermentation of soy milk by lactic acid bacteria. There are many patents related to these kinds of products, including a yogurt type, in Japan. Therefore many new fermented soybean foods may appear on the market in the future."

Other tables show: (2) Typical composition of different kinds of shoyu. (3) Annual production of purely fermented, semi-fermented, and chemical shoyu in 1976. (4) Annual production of Japanese Agricultural Standard mark shoyu in 1976. (5) Chemical composition of major types of miso.

Figures (flow sheets) show: (1) Shoyu manufacturing process. (2) Rice miso manufacturing process. (3) Natto manufacturing process. (4) Shoyu manufacturing process. Address: Noda Inst. for Scientific Research, Kikkoman Shoyu Co., Tokyo, Japan.

5488. Wang, Jun Ryun; Lee, Yang Hee. 1978. Traditional soybean foods in Korea. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 43-47. [13 ref]

• **Summary:** “The origin of soy sauce and paste in Korean literature dates back to 683 A.D. (Shinmu King 3rd year of the United Silla period). Since an old Japanese literature [document], *Hwameyruitsuroku* [*Wamyô Ruijusho*; Collections of Japanese Names, by Subject], of Heyan [Heian] records that ‘Maljang (Meju) is a Korean soy sauce and paste’ and a record on Maljang was also observed in the ruins of Nara, it is evident that soy sauce and paste were introduced from Korea to Japan during the Nara period (645-793 A.D.). Therefore, it is believed that the beginning of their consumption in Korea should be in the third century of Kokuryo period.”

“Soybean has been a major protein source in the Korean diet.” In 1976 some 442,803 tonnes (metric tons) of soybeans were used in Korea as follows: oil and defatted meal 28.5%, curd (*tubu*, or tofu) 24.5%, paste (*doenjang*) 18.3%, soy sauce (*kanjang*) 10.6%, soy sprouts (*kongnamul*) 9.0%, hot soy paste (*kochujang*, made from meju, hot pepper flour, and cooked glutinous rice) 6.6%, soymilk (*kongkuk*) 0.14%, and other 2.4%. Other includes roasted soy flour (*konggomul*, used for coating rice cakes [mochi]), fried tofu (*yubu*), salted natto paste (*jeonkukjang* / *cheonkukjang*). *Doebiji* is fresh soybean puree, made by grinding soaked soybeans. When used as a food, it is usually cooked with vegetables, kimchi, and meat. Meju is balls of soybean koji like Japan’s miso-dama. All fermented Korean soybean foods except Joenkukjang are prepared from meju. Its characteristic flavor results from *Aspergillus*, *Penicillium*, and *Mucor* species of molds on the surface of the balls and *Bacillus subtilis* on the inside. Damsuejang is a quick fermented soy paste made by crushing meju to a powder, adding a warm brine solution, then allowing it to ferment and ripen.

Note: This is the earliest English-language document seen (March 2009) that uses the word “Damsuejang” to refer to Korean-style soybean paste (miso).

The above usage is the equivalent of 12 kg per capita per year. The daily per capita consumption of soy sauce (*kanjang*) is 20 ml, of soybean paste (*doenjang*) is 15 gm, and of hot soybean paste is 10 gm. Most of the soy sauce (64%), doenjang (82%), and kochujang (76%) and all of the salted natto paste (*jeonkukjang*) and quick fermented soy paste (*damsuejang*) are produced at a household level and consumed directly.

Both soybean production and imports have grown in recent years. In 1970 production was 231,994 tonnes, and

imports were 36,291 tonnes for a total of 268,285 tonnes. In 1976 production was 294,949 tonnes (up 27% over 1970), and imports were 147,854 tonnes (4 times as much as in 1970) for a total of 442,803 tonnes (up 65% over 1970). Address: Korea Food Development Centre, Seoul, South Korea.

5489. Westbrae Natural Foods. 1978. Someday all of this will be as familiar as apple pie (Ad). *Whole Foods* (Berkeley, California). Jan. Inside front cover.

• **Summary:** This full-page color ad shows Westbrae Red Miso, Barley Miso, Brown Rice Miso, Soybean Miso, Hatcho Miso, and Tamari, plus various sea vegetables (nori, hijiki, wakame, kombu, etc.). The ad also appeared in East West Journal, May 1978, inside front cover. Address: 4240 Hollis St., Emeryville, California 94608. Phone: 415/658-7520.

5490. Yeoh, Q.L.; Merican, S.; Aziz, A.; Mohamed, R. 1978. Survey of some soy sauce factories in peninsular Malaysia. In: ASEAN Soy Sauce Committee, ed. 1978. Report of the ASEAN Workshop on Soy Sauce Manufacturing Techniques. Singapore. 252 p. See p. 69-116. [5 ref]
Address: Agricultural Products Utilisation Div., Mardi, Serdang, Selangor, Malaysia.

5491. Yu, Swee Yean; Ch’ng, Guan Choo. 1978. Soy bean foods in Malaysia. In: American Soybean Assoc., ed. 1978. International Soya Protein Food Conference, Proceedings. Hudson, Iowa: ASA. 136 p. See p. 48-52. [16 ref]

• **Summary:** Contents: Introduction. Fermented soya bean products: Soya sauce (manufacture of ‘thin’ (dilute) soya sauce, manufacture of ‘thick’ (viscous) soya sauce, microbiology of Malaysian soya sauce, stability of the product), tempeh, tau cheo (thick paste-like sauce), tao si (fermented black soybeans). Non-fermented soya bean products: Soya bean sprouts, tofu (semi-firm curd), tofu fah (soft curd), tow kwa (firm curd), tin chok (dried, flat sheets [yuba]), fu chok (dried, rope-like [dried yuba sticks]), tofu pok (deep-fried curd [tofu cubes]), chak tie (vegetarian [yuba] sausage), soya bean milk (tau cheong), meat analogues (soya flour is shaped into desired forms by hand). Nutritional data. Conclusion. Address: Universiti Pertanian Malaysia, Serdang.

5492. Clough, Jean. 1978. Kitchens that dish up naturally good food. *Chicago Tribune*. Feb. 3. p. A1.

• **Summary:** The Plowshare Cafe (6155 N. Broadway) serves macrobiotic food and is also a health foods store. They use foods grown locally, in season. In addition, all meat, dairy products, tropical fruits, most sweeteners, and many spices are not served. The Macro-plate (\$2.50) includes brown rice, miso soup and sea vegetables. Miso “is a black creamy paste made of fermented soy beans.” The sea vegetables included

hiziki seaweed in tamari sauce. Also offered was a sandwich with seitan (made of gluten), “tofu, soy mayonnaise, sesame seeds, carrots, and natto miso, a less-aged miso that includes barley and ginger. Its a granular to be sprinkled on rice or sandwiches.”

New Earth Cafe and Mama Peaches are also vegetarian restaurants. Address: Dr.

5493. Haider, Vicky Chen. 1978. Up and down Chinatown: A guide to help shoppers, diners, and the curious orient themselves (heh-heh). *Chicago Tribune*. Feb. 5. p. H24-H26.

• **Summary:** About 80% Chicago’s nonresidential Chinatown is located on both sides of Wentworth Avenue. This is a walking tour, starting at the west end of Wentworth at Cerniak, walking east along the south side of Wentworth, and discussing and giving the address of each shop (1-24) as she comes to it. At the top of the first page of the article is a map of this Chinatown, and each shop is represented by a number on that map—the same number it has in the text. At 24th Pl. she cross Wentworth and walks back along the north side of the street (shops 25-47)—to which she gives much less attention. That is because the shops on the southern side generally cater to local residents rather than to tourists.

During the past five years there has been a major change in Chicago’s Chinatown in the form of an influx of foods and merchandise from mainland China—the People’s Republic of China. Before the 1970s it was almost impossible to find imports from this country.

Shop 25, at the far northeast end of Wentworth is Wah May (No. 25), which is a huge grocery store “that also carries a large range of goods from Southeast Asia, such as *ketjap manis*, a sweet soy sauce,…”

An illustration (line drawing) above the top of the map and down the right side shows a marvelous Chinese / Asian dragon.

5494. Westbrae Natural Foods. 1978. Price list [Catalog]: February 1978. Emeryville, California: Westbrae. 20 p. 26 cm.

• **Summary:** On the cover are a black plum blossom logo and a large, bold double “W” in calligraphy near the bottom against a gray background.

Interesting products: Natural fruit butters and unsweetened fruit spreads. Four types of granola and two trail mixes. Panda snacks: Tamari almonds, Tamari cashews, Tamari nut roaster’s mix, Tamari sunflower seeds, White water trail mix (tamari roasted). Westbrae roasted nuts (25 lb boxes): Tamari almond, Tamari cashew pieces, Tamari valencia peanuts, Tamari nut roaster’s mix, Tamari sunflower seeds, Tamari pepitas (pumpkin seeds), Tamari filberts. Tamari nut butters (12, incl. almond, 6 peanut, and sesame tahini). Whole wheat soy pasta.

Asian foods & sea vegetables: Miso (red miso, brown rice miso, barley miso, Hatcho miso, soybean miso, light

yellow miso, natto miso). Miso made in the United States: Light yellow, mellow white, red, mixed case. Sea vegetables: Agar, dulse (whole or flakes / powder), sea palm, nori, arame, hijiki, kombu, wakame. Shoyu and shoyu products: Josen shoyu, Sendai shoyu, White Tiger Tofu Sauce. Nigari. Kudzu. Umeboshi. Toasted sesame oil. Helpful tools: Wok (11 inch), vegetable brush, glass shoyu dispenser, Tofu kit, Tempeh kit, rice koji (Cold Mountain brand made by Miyako Oriental Foods). Beans: Azuki (10 lb or 25 lb bag), soybeans (60 lb or 25 lb), soy grits raw. Publications: Includes four books and 3 pamphlets by Shurtleff and Aoyagi.

Note: The products in this catalog do not require refrigeration; they contain no refined sugar / white sugar, no meat, and no dairy products—just like the catalogs of almost all other natural food distributors during the 1970s and 1980s. Address: 4240 Hollis St., Emeryville, California 94608. Phone: (415) 658-7518 (order) or 7521 (office).

5495. Claiborne, Craig. 1978. The mushroom comes of age. *New York Times*. March 1. p. C1, C6.

• **Summary:** On page C6 are various mushroom recipes including “Virginia Lee’s black bean and ginger sauce.” The ingredients include “2 tablespoons fermented salted black beans (available in Chinese markets)… 1 tablespoon light soy sauce, 3 tablespoons oyster sauce (available in Chinese markets).”

Place the beans and sherry (or water) in a small bowl. “Mash the beans lightly,” then saute in a wok or skillet with the remaining ingredients.

Note: This is the earliest document seen (Nov. 2011) that uses the term “black bean and ginger sauce” to refer to a sauce made from fermented black soybeans and ginger. This new term appears six times between 1978 and 2003.

This is also the earliest document seen (Oct. 2008) in all major U.S. newspapers digitized by ProQuest that uses the term “fermented salted black beans” to refer to salted fermented soybeans (fermented black soybeans). This new term appears four times between 1978 and 1986.

5496. Takei, Kaz. 1978. Re: Sending sample of fermented soy sauce in powdered form. Letter to Dr. W.J. Wolf, Northern Utilization & Development Div., 1815 North University St., Peoria, Illinois 61604, March 16. 1 p. Typed, with signature on letterhead.

• **Summary:** “The sample of our fermented Soy Sauce in powder form has been forwarded to you so you should receive it within a few days. Enclosed is our specification sheet.” Address: Vice President, Industrial Sales, 1581 Webster St., San Francisco, California 94115. Phone: (415) 563-8700.

5497. Rice, William. 1978. The wok and I: Florence Lin stir-fries Chinese cuisine to suit American stomachs and mealtime habits. *Washington Post*. March 30. p. E1, E8, E14.

• **Summary:** Florence Lin's books and cooking classes has made her one of the 3-4 leading interpreters of Chinese cooking in the USA. "There's no need to prepare a banquet every time you make Chinese food," she said recently. She believes that soy sauce is the only essential ingredient for Chinese cooking—enabling many American cooks to heave a sigh of relief. Rice is the most important part of every meal. To "red-cook" a dish is to braise it in soy sauce. In China, "the meat is intended to supplement the vegetables," just the opposite of the Western practice.

The recipe for steamed fish notes at the end: "You may add 2 teaspoons coarsely chopped fermented salted black beans to the fish in addition to the basic ingredients. Add about ¼ teaspoon ground red pepper with the black beans to give a spicy flavor."

Two photos show Florence Lin, a friendly woman of human and good will.

5498. Asunaro Eastern Studies Institute. 1978. School of Oriental medicine and traditional fermented foods (Leaflet). Glen Ellen, California. 4 panels. Front and back. Each 22 x 14 cm. Undated.

• **Summary:** Classes "taught by Naboru [sic, Noboru] Muramoto. Schedule: (1) Oriental medicine classes. April through September. Monday, Wednesday, Thursday, Friday. 7:30 to 9:30 p.m. (2) Daily cooking classes. (3) Traditional Fermented Food Preparation. Monday, Wednesday, Thursday, Friday, beginning at 9:00 a.m.

"Asunaro Eastern Studies Institute is a newly-established non-profit educational organization..." Located at Top of the World Ranch, it "is 140 acres of forest and open fields with two ponds and four springs and a large 3-level building. The Ranch is located in the Sonoma Mountains (elev. 2,200 feet) overlooking San Pablo Bay."

"Classes in natural food making (miso, tamari, shoyu, sake, natto, tofu & bran pickles) are conducted from 9 a.m. until completed during the cooler months of the year (October through March). This time is ideal for fermentation processes..." Address: 4600 Cavedale Rd., Glen Ellen, California 95442. Phone: (707) 996-9846.

5499. Manabe, Masaru; Tsuruta, Osamu; Tanaka, Kenji; Matsuura, Shinji. 1978. [Distribution of aflatoxin-producing fungi in soil in Japan]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku (Report of the National Food Research Institute)* No. 33. p. 233-41. March. [19 ref. Jap; eng]

• **Summary:** The fungi in 722 soil samples collected from throughout Japan were investigated, with special focus on *Aspergillus flavus*. 32 strains of *Aspergillus tamarii* Kita were isolated from all parts of Japan; none of these produced aflatoxin. 34 strains of *Aspergillus flavus* Link were isolated from the southern part of the of the Kinki district in southern Kyushu. These fell into two groups; the aflatoxin-producing group was found only but frequently in southern Kyushu.

6 strains of *Aspergillus parasiticus* Kita were isolated from the southern part of Kyushu; all of these strains produced aflatoxins B1, B2, G1, and G2.

Conclusion: The "northern limit of the natural habitat for aflatoxin-producing fungi exists somewhere in the south" of Kyushu.

Reprinted from *Nippon Kingakkai Kaiho (Transactions of the Mycological Society of Japan)* 17:436-44 (1976).

Address: National Food Research Inst., MAFF, Tokyo, Japan.

5500. **Product Name:** Dofu-Gan (Firm Tofu Simmered in a Marinade). By 1980 subtitled Savory Baked Tofu.

Manufacturer's Name: Soy Plant (The).

Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.

Date of Introduction: 1978. March.

Ingredients: Water, organic soybeans, nigari, soy sauce, honey, garlic, spices.

How Stored: Refrigerated.

New Product—Documentation: Label. 1980. for Dofu Gan. Savory Baked Tofu. 2 by 3 inches. Black on white. "Slice and serve with crackers, sandwiches, or salads." Company name is given as Soyplant Co-op Inc. at 211 East Ann St.

Talk with Steve Fiering. 1988. June 10. This was the company's third commercial product. "There was a Chinese guy who worked with us, whose first name was Lee and who had a recipe for this product. He cooked very firmly pressed tofu in a marinade. It was sold in the deli, which was our company's Ann Street location. The first location was a room in the basement of a restaurant called Eden's." Soyplant. 1984. Produce co-op price list—Delivered. Effective April 30, 1984 and subject to change. Lists Dofu Gan savory baked (\$1.92/lb).

5501. Claiborne, Craig. 1978. The saga of a sauce [Worcestershire]. *New York Times*. April 19. p. C1, C8. Living section. Wednesday.

• **Summary:** An interesting, supposedly in-depth history of Lea and Perrins and their famous Worcestershire sauce, said to have been on the market by the 1830s. Much of the information in this article first appeared in the *Worcester News and Times* in 1939.

Like Cross and Blackwell, the names Lea and Perrins are inextricably linked in the world of food and beverages. Lea and Perrins are makers of the original Worcestershire sauce, and a label states: "the original and genuine, from the recipe of a nobleman in the county." The county is, of course, Worcestershire, England, but to this day the manufacturers will not reveal the name of the nobleman.

The story of this sauce is said to date back to the early 1800s, when the governor general of Bengal returned from his colonial post to his native land, England. He brought with him a formula for a sauce that had been created in India, one

which he had enjoyed at his home and offered to his guests. John Lea and William Perrins, chemists in the Midlands of England at the time, were partners in a “chain” of chemists shops. Their association had begun in the 1820s and their main office was in the town of Worcestershire in the shire or county of the same name. The governor general is said to have taken the recipe to the two chemists and to have asked them to try to reproduce it as closely as possible. It is said that they did so, but that the resulting product smelled and tasted bad—so they stored it in a cellar and forgot it.

Some months or year later they sampled it again and found the flavor and aroma to be not only acceptable, but haunting. Soon they were bottling the brew and before long it came to be known and coveted in kitchens throughout the world. The governor general’s family, not invited to join in the production and marketing, was upset and refused to allow the family’s name to be used in connection with the product.

The great haste with which the reputation of Worcestershire sauce spread is often accredited to the fact that the manufacturers had cases of the sauce loaded on most of the ocean liners that came in and out of England’s ports. The stewards were “encouraged” with a few pounds and shillings now and then to offer the sauce to the passengers. Passengers were invited to buy samples to take with them when the embarked.

The author traveled to Fair Lawn, New Jersey, where Lea and Perrins’ sauce is manufactured and aged. He spoke with Ransom Duncan, age 40, the technical director of the American firm and the great-great grandson of the original American importer of the sauce from England. In the lobby of the building where the sauce is aged and bottled is an antique display case, which had been built for the Exposition of the Industry of All Nations in New York in 1853, and was used again for the Centennial Exposition in Philadelphia [Pennsylvania] in 1876. Displayed in this case were 20-30 of the earliest bottles of Lea & Perrins available in the USA. One label reads: “Butlers in the best families... tell you that soups, fish, meats, gravy, game, salads and many other dishes are given an appetizing relish if flavored with Lea & Perrins sauce.” Another: “Club men and all good livers appreciate the appetizing relish given to Oyster cocktails, Welsh rarebits, Lobster Newburgh [also spelled Newburg, meaning served with a sauce made of cream, butter, sherry, and egg yolks] and all dishes flavored with this sauce.”

The first American importer of the sauce, John Duncan, had a small business in Manhattan, New York, named John Duncan and Sons, which imported liquors and wines from Europe, and preserves, jams, and jellies from England. He learned of Lea & Perrins’ sauce in the 1830s and ordered a small shipment. Imports grew rapidly and soon salesmen were peddling the product across America. “Demand became such that he opened a processing plant using the exact English formula and using English imports.”

Since his childhood, Ransom Duncan has enjoyed

reading the bottles labels. The ingredients (tamarind, anchovies, shallots, garlic, molasses, soy, cloves, peppercorns, etc.) reminded him of exotic things and far-away places. Unpeeled red-skinned onions are one of the few domestic ingredients. The author noted a pleasant smell around the 35 giant wooden curing vats—each holding a total of 6,000 gallons. No one would tell him how long the base for the sauces is aged, but he estimated a minimum of two years.

There follow six recipes that use Worcestershire sauce. Photos show: Ransom Duncan, an executive in his ancestor’s company. A man standing among six huge aging vats. Address: New York.

5502. *Erewhon News (Newbury Street)*. 1978. Erewhon—Happy Birthday!! April 17-23. p. 1.

• **Summary:** “This weeks marks the twelfth anniversary of Erewhon Natural Foods. It was right here in Newbury Street twelve years ago that Michio and Aveline Kushi, along with a few young friends, bagged the first Brown Rice and bottled the first Tamari that have since become Erewhon standards and the backbone of the Natural Foods movement in America.” Address: 342 Newbury Street [Boston, Massachusetts]. Phone: 262-3420.

5503. Eden Foods. 1978. Spring-summer pricelist 1978. 4601 Platt Rd., Ann Arbor, MI 48104. 37 p.

• **Summary:** Products are similar to the catalog published earlier in 1978. Eden now carries many East Asian (mostly Japanese) herbal products from Herb T. Company in San Francisco, incl. Kuzu Root Tea. Salt products include: Mineral Salt (Indianola Oquirrh), and Herba Mare (France). Pure & Simple now makes 3 salad dressings: Romano, Sesame Herbal, and Mayonnaise.

Page 11 lists “Eden Brown Rice Miso (Genmai)” as a new product. It is sold in 4 sizes: 14 oz, 8.8 lb, 22 lb, and 44 lb. Address: Ann Arbor, Michigan. Phone: (313) 973-9400.

5504. Shurtleff, William. 1978. Re: Proposal for establishing a Soycrafters Union or Cooperative in North America. Letter to all “Soycrafters in North America,” April. 2 p. Typed, with signature on letterhead.

• **Summary:** This open letter, written on NAFSC letterhead and dated April 1978, was submitted to *Soycraft* newsletter, where it was published in June 1978 (which see). It led to the first national meeting of soycrafters in Ann Arbor, Michigan, on 28-30 July 1978 and the founding of the Soycrafters Association of North America at that meeting.

The letter begins: “Dear Soycrafters of North America: There has recently been growing interest in North America in starting a Soycrafters Union or Cooperative, perhaps along the lines of Japanese National Tofu, Miso, Shoyu, Natto, etc. Unions [Associations]. Such a development would seem to represent a great leap forward, of benefit to many

in the expansion of consciousness and production of quality soyfoods in the Western world.”

Note 1. This is the earliest document seen (Jan. 2003) in connection with the Soy Crafters Association of North America (SANA).

Note 2. This is the 2nd earliest document seen (Sept. 2011) that contains the word “soyfoods.” Address: Director, New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

5505. Wells, Patricia. 1978. What is this thing called tofu? *New York Times*. May 3. p. 19-20. Reprinted in the Boston Herald-American. June 15.

• **Summary:** “In the early 1970s the Hashizume Bean Cake Corporation came to life as a minor cottage industry tucked away in the basement of a giant red brick factory in Long Island City. Each day it churned out a few hundred pressed soybean cakes, or tofu, and supplied the handful of Japanese restaurants and Oriental specialty stores in business at the time in the New York area.

“Today, thanks to what one company representative called ‘the American-natural-organic-people’... seven trucks loaded with tofu leave the steamy Hashizume factory each day.”

“A combination of events awakened the West to the wonders of tofu. One was the 1975 publication of *The Book of Tofu*, an Autumn Press cookbook and resource manual that caught on quickly with natural food followers. The other is tofu’s nutritional attributes.

“While traditionally Oriental tofu companies as Hashizume and Tanaka & Company, which is on Manhattan’s West Side (326 Amsterdam Ave. at 75th St.), have profited from the Westernization of tofu, young, counterculture entrepreneurs throughout the country have taken advantage of the growing demand.” These include the “Laughing Grasshopper New England Soy Dairy” (which now makes 5 tons of tofu a week, that’s 20,000 cakes). “Other successful American-run tofu factories have mushroomed in Bethlehem, Massachusetts [actually New Hampshire; Crystal Springs], Summertown, Tennessee, and Island Springs, Washington.” A description of the process for making tofu at Hashizume is given.

Page 20 is titled “The West wakes up to the wonders of tofu.” “Following are recipes using tofu in both Oriental and Westernized versions. The Oriental recipes are included in *The Book of Tofu*. The others were developed by the people at Laughing Grasshopper and the Crystal Hills Tofu Shop in Bethlehem, N.H.: Tofu clam dip, Maple walnut bars, Tofu manicotti, Chilled tofu, Shoyu dipping sauce, Raspberry pudding, and Miso soup with tofu and onions.”

5506. Federal Supply Service, General Services Administration. 1978. Federal specification: Soy sauce. *Federal Specifications*. EE-S-610G. 16 p. May 5.

Superseding Federal Specification EE-S-610F, 20 Jan. 1976. [1 ref]

• **Summary:** The two main types are classified as Type I–Soy sauce (fermented) and Type II–Soy sauce (non-fermented). Address: Washington, DC.

5507. Freiman, Jane Salzfass. 1978. Sushi: A ‘fast-food’ fish dish from Japan. *Chicago Tribune*. May 12. p. B1.

• **Summary:** Begins with a description of sushi and the different types (such as nigiri sushi and maki sushi), then continues with a review of six sushi restaurants in or near Chicago. “Like other arts practiced in Japan, the preparation of sushi is an effortless performance requiring great skill.” Sushi has been prepared in Japan since the mid-1700s. Each bite of sushi (a finger food) is dipped in a tiny sauce of shoyu or soy sauce just before it is eaten.

At Hamehachi the writer enjoyed “two delicious, sweet, stuffed deep-fried bean cakes called *inari sushi*. A complete order of six *inari sushi* is \$3.” Two photos show a *sushi-ya* (sushi chef, sushi-master) at work in his sushi bar or restaurant.

5508. ASEAN Sub-Committee on Protein. ed. 1978. Report on the First ASEAN Workshop on Solid Substrate Fermentation. Bandung, Indonesia. Held 8-13 May 1978 at Bandung, Indonesia. [100+ ref]*

• **Summary:** This is the 5th ASEAN Protein Workshop. Address: Malaysia.

5509. Bellicchi, Kathy. 1978. Cook it with seaweed! *East West Journal*. May. p. 68-72.

• **Summary:** Contents: Introduction. Nori. Hiziki [Hijiki]. Arame. Wakame. Kombu. Dulse. Irish moss. Agar agar kanten. Variations on the basic hiziki recipe call for tofu, whole soybeans, and tamari. Wakame is used in miso soup, and in Ojea stew with miso and aduki [azuki] beans. Kombu is used in a broth with tamari, and in Oden with natto miso and tofu.

5510. Kikkoman Foods, Inc. 1978. Re: Invitation to celebrate five years of operations (Folded card). Walworth, Wisconsin. 4 panels.

• **Summary:** On the cover of this printed, folded invitation card (each panel is 4½ by 6 inches) is written “Kikkoman Foods, Inc.” On the inside is written: “Kikkoman Foods, Inc. requests the pleasure of your company on June 16, 1978, to celebrate five years of operations at Walworth, Wisconsin.

“Tour of plant at Six Corners Road, 5:00 P.M.

“Cocktails, dinner and entertainment in the Martini Room, The Abbey, Fontana, from 6:30 P.M.

“Please reply on enclosed card.” Address: P.O. Box 69, Walworth, Wisconsin 53184.

5511. Mori, H. 1978. Shôwa 52 nendo ni okeru shôyu, miso

no kenkyû gyôseki [Review of annual achievements in shoyu and miso research]. *Nippon Jozo Kyokai Zasshi (J. of the Society of Brewing, Japan)* 73(5):351-69. May. [532 ref. Jap]

• **Summary:** This important Japanese-language article, published each year in the May issue of this periodical, has two parts: (1) A review of the past year's major discoveries and developments in the fields of miso and soy sauce in Japan. (2) A bibliography related to those discoveries and developments. Address: Noda Sangyo Kagaku Kenkyusho.

5512. Nihei, Takao. 1978. Hawai ni okeru Nihon-shu, miso, shôyu no rekishi [A history of Japanese sake, miso, and shoyu in Hawaii]. *Nippon Jozo Kyokai Zasshi (J. of the Society of Brewing, Japan)* 73(5):346-50. May. [Jap]

• **Summary:** In 1868, the first year of the Meiji Period, the first 153 Japanese immigrants arrived in Hawaii on board the three-masted sailing ship Scioto (Saioto-go). They brought with them miso and shoyu. This article otherwise contains no mention of soyfoods.

Note: This document contains the earliest date seen for soybean products in Hawaii (1868); soybeans as such had not yet been reported by that date. Address: Honolulu Shuzo Seihyo Gaisha.

5513. Whitaker, John R. 1978. Biochemical changes occurring during the fermentation of high-protein foods. *Food Technology* 32(5):175-80. May. [42 ref]

• **Summary:** Foods are fermented to improve the flavor, color, aroma, and texture, and to remove toxic constituents. Occidental fermentations generally use bacteria and non-filamentous fungi, whereas Oriental fermentation procedures generally use filamentous fungi. The following foods are discussed: Cheeses (particularly Roquefort and Cheddar), sufu, yoghurt, meat, fish, soy sauce, miso, tempeh, and angkak. Flow sheets show the production of sufu and soy sauce.

Contents: Reasons for fermenting foods. Occidental vs. oriental fermentations. Major fermented high-protein foods. References. Address: Dep. of Food Science and Technology, Univ. of California, Davis, California.

5514. Shurtleff, William. 1978. Report with color slides on trip to Suzuki Jozo, Daifuku-ji, and Yamaya in central Japan to study method for making savory soy nuggets (*Hamanatto*). Nerima-ku, Tokyo, Japan: New-Age Foods Study Center. 1 p. Unpublished manuscript. June 8.

• **Summary:** We have coined the term "soy nuggets" to refer to a family of traditional fermented soyfoods that are known throughout East Asia. In China they are called shih, chi, touch'ih, or douchi. The two most popular varieties in Japan are Hamanatto (savory soy nuggets) and Daitokuji natto (Daitokuji soy nuggets). The Philippines and Malaysia have tausi or tao-si (soy nuggets).

Note: On 21 Nov. 2011 we decided, after 30 years of questioning, to change our name for this category of

soyfoods to "fermented black soybeans" instead of "soy nuggets." We did this largely to conform more closely to current usage in English, where they are generally called "fermented black beans."

Soy nuggets are unrelated to regular sticky natto except both are fermented whole soybeans; soy nuggets are inoculated with a mold (*Aspergillus oryzae*) rather than a bacterium, are not sticky, are salted, and originated in China (rather than Japan) more than 2,200 years ago. Here we see savory soy nuggets and Daitokuji soy nuggets. Both look something like dark-brown to grayish raisins and have a savory, slightly salty flavor resembling that of mellow Hatcho miso.

Shurtleff took many color slides of the Hamanatto process on this one-day train trip to Yamaya. The slides / photos are now in a numbered set as follows: 10. Close-up of Hamanatto (savory soy nuggets) and Daitokuji natto on white plates. Sprinkled over rice or rice porridge, served as an hors d'oeuvre with green tea or sake, or used as an ingredient in miso soups or cooked vegetables, they add zest to otherwise bland dishes. Some Westerners sprinkle them over curry or spaghetti sauces, or fried eggs. 11. Six different Hamanatto packages from Japan. 12. A closer view of the six packages. 13. Four more packages of traditional Hamanatto products. 14. One large maker of Hamanatto is Suzuki Jozo. Located near Hamamatsu in Central Japan, they also make shoyu. Their process for Hamanatto goes as follows: Soak soybeans for two hours, steam cook, then leave in the cooker overnight.

15. The next morning remove beans from cooker, crumble to break up any lumps, spread on rice-straw mats, then inoculate by sprinkling on the starter, *Aspergillus oryzae* mold spores. 16. Transfer inoculated beans by conveyor into the koji incubation room. 17. The room is a large shallow stainless steel box perforated with many holes to allow for air circulation. Here the beans are left to ferment at 35°C (95°F) for 4 days. 18. On the fourth day, dry the soybean koji in the sun on mats on the rooftops for 5 hours. 19. Put the koji in 70-liter (18.5 gallon) wooden vats, put on a heavily weighted pressing lid, pour in a 10% salt solution to cover the koji, and allow to ferment at the ambient temperature for 2 to 4 months. 20. After fermentation is complete, drain off the liquid tamari, spread the soy nuggets on mats on the rooftop, and sun-dry for 5 hours to make the finished product.

21. Savory soy nuggets (Hamanatto) are said to have originated in Hamamatsu at this temple, Daifukuji, about 350 years ago, and they are still produced there today. The photo shows the front gate to the temple. 22. Here we see the incubation trays, fermentation vats, and pressing weights that are used. 23. Here is the steamer in which the soaked soybeans are steamed. 23A. After being mixed with one-tenth their weight of roasted wheat or barley flour plus a little koji starter, they are placed in shallow wooden trays

and incubated at 35°C for 4 days to make a unique type of soybean koji. 23B. After the 2-4 month salt fermentation, the product in a small wooden vat looks like this. 23C. The liquid tamari is drained of and the product is briefly sun-dried. 24. Then it is mixed with a small amount of slivered gingerroot pickled in moromi (shoyu mash) and salt-pickled sansho seeds (shown here) to make the finished product.

Note 1. This is the earliest English-language document seen (Nov. 2011) that uses the term “savory soy nuggets” to refer to Hamanatto. By 1987 Shurtleff preferred to call these “Hamanatto soy nuggets.”

Note 2. This is the earliest English-language document seen (Nov. 2011) that contains the term “Daitokuji soy nuggets.”

Note 3. This is the earliest English-language document seen (Nov. 2011) that uses the word “douchi” to refer to fermented black soybeans, or the word “Daifukuji” (a temple name) in connection with fermented black soybeans. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

5515. Sheraton, Mimi. 1978. Restaurants: Stuffed cabbage and sushi on East Side. *New York Times*. June 9. p. C14.

• **Summary:** This is a review of Hatsuhana, a Japanese sushi restaurant at 17 East 48th St., New York City. “Advised by a Japanese friend, we ordered natto, a pungent mix of fermented [soy] beans, tuna fish and scallions; nuta, a sensual blend of raw fluke [flounder, a type of flatfish] and scallions in a satiny yellow sauce made of soy bean paste [miso], lemon and sake.” Also salmon teriyaki, and “wrappings of spinach-green seaweed.” All sushi and sashimi, nuta and natto are recommended.

5516. Claiborne, Craig. 1978. Rijsttafel: The easy feast. *New York Times*. June 21. p. C1, C6.

• **Summary:** Rijsttafel, literally “rice table,” is a traditional Indonesian buffet. The recipe for “Ketjap manis (Sweet soy sauce ketjap)” calls for: 2½ cups sugar, 22 ounces “dark soy sauce,” 3 cloves of garlic—peeled and crushed, 1 teaspoon star anise, 2 salam leaves, 2 slices laos, and ½ cup water.

5517. *New York Times*. 1978. Pirate’s paste and coconut milk. June 21. p. C6.

• **Summary:** Recipes are given for the dishes that comprise one type of “rijsttafel (A small Indonesian dinner for summer).” One of these is “Ketjap manis (Sweet soy sauce ketjap)” which has the following ingredients: 2½ cups sugar, 1 bottle (22 ounces) dark soy sauce, 2 cloves, peeled and crushed, 1 teaspoon star anise (see box), 2 slices laos (see box), and ½ cup water. The directions are giving, starting with caramelizing the sugar. Yields about 3 cups. It will keep for months if properly refrigerated.

5518. Brooks, Charles D. 1978. Cooking with steam

the Chinese way: Use wok for delicate flavor, ease of preparation, savings on fuel for cookery. *Christian Science Monitor*. June 29. p. 14.

• **Summary:** Contains a recipe for “Chinese steamed fish with black bean sauce,” that calls for “1 tablespoon salted black beans,... 1 tablespoon soy sauce, 1 teaspoon ginger root, minced,... Dash of sesame oil.

“The black beans are called dow see and can be found in an oriental grocery store.” Address: San Francisco.

5519. Goel, S.K.; Wood, B.J.B. 1978. Technical note: Cellulase and exo-amylase in experimental soy sauce fermentations. *J. of Food Technology* 13(3):243-47. June. [13 ref]

• **Summary:** Previous reports have dealt with the production of various enzymes by *Aspergillus oryzae* during the koji stage of soy sauce production. These include sucrase, endo-amylase (α -amylase), proteinase, lipase, and tyrosinase. The research shows that exo-amylase and cellulase can be added to the list of carbohydrate-hydrolyzing enzymes present in soy sauce fermentations conducted under the controlled conditions employed in the authors' work. Cellulase degrades the cell walls of intact soybeans. The levels of both enzymes increase rapidly starting about 24 hour after inoculation of the koji. Address: Dep. of Applied Microbiology, Univ. of Strathclyde, Glasgow G1 1XW Scotland; Goel now in Maharashtra, India.

5520. Jacobs, Leonard. 1978. Menage: Vitamin B-12 in macrobiotic or strictly vegetarian diets. *East West Journal*. June. p. 10-11. [2 ref]

• **Summary:** A reader asks: “Many critics of a macrobiotic or strictly vegetarian diet point out the lack of a source of vitamin B-12. Can this essential vitamin actually be synthesized (or transmuted) by the body if one’s diet is composed entirely of whole grains?”

Jacobs discusses vegetarian sources of vitamin B-12 (sea vegetables, microalgae {*Spirulina maxima*}, and fermented soy products including soy sauce and miso), and the results of a B-12 deficiency—pernicious anemia. Dr. Wolfgang Tilling, who administered a diet of only soymilk to undernourished children in Germany, is said to have “discovered the synthesis of vitamin B-12 in the intestines of these children.” Address: Publisher, East West Journal.

5521. Shurtleff, Bill. 1978. News from New-Age Foods Study Center. *Soycraft (Lawrence, Kansas)* 1(3):3-5. June.

• **Summary:** This open letter begins: “Dear Soycrafters of North America: There has recently been growing interest in North America in starting a Soycrafters Union or Cooperative, perhaps along the lines of Japanese National Tofu, Miso, Shoyu, Natto, etc. Unions [Associations]. Such a development would seem to represent a great leap forward, of benefit to many in the expansion of consciousness and

production of quality soyfoods in the Western world.”

The author then summarizes five major functions of Japanese national trade associations related to soy products, and suggests how each of these be adapted to present American conditions and consciousness which are very different from those in Japan: Purchasing soybeans, maintaining a list of member shops, doing “soyfood publicity,” publishing a newsletter, and establishing and running a nationwide center, information clearing house, and school for teaching production of low-technology “soyfoods” to people from both developed and developing countries.

“How might this basic model be adapted to the United States? First, since soyfoods are still quite new in the USA, we might want to form one united front cooperative or union for all soycrafters or producers of soyfoods, rather than trying to form individual unions for tofu & soymilk, miso, tempeh, shoyu, etc. Given such a joint union, it would seem that all of the functions performed by the Japanese unions would be of great potential value to producers in North America. The key point, however, is that for the Union to work it must be financially viable and sound. Thus it must be created and supported by individual members who understand clearly that its functions are in their best interest, both in the short and long run.”

“Second, we must remember that the number of shops presently producing soyfoods here is still very small. We have the names of 95 tofu shops and/or soy dairies in the United States plus 6 more in Canada, 9 tempeh shops, 8 miso shops, and one shoyu factory (Kikkoman). Of these, about 41 of the tofu shops and soy dairies, 5 of the tempeh shops, and 2 of the miso shops are ‘new-age’ types, newly started by Caucasian Americans. This latter group would probably form the initial nucleus of the Soycrafters Union, however after the benefits of membership could be clearly demonstrated, the more conservative Japanese producers might be eventually interested in joining.”

“At the proposed First North American Soycrafters Convention to be held in Ann Arbor [Michigan] July 28-30 the above suggestions might be discussed one by one...”

At the end of the article is a form which new or existing tofu or soymilk manufacturers in the U.S. are invited to fill out and return to Shurtleff so that he can list them in the next edition of *The Book of Tofu*. It asks for the name, address, and phone number of the company, the person(s) in charge, the date tofu or soymilk production started, the approximate cost of getting started, the average quantity of soybeans used per week, the soyfoods produced (in order of importance), the main pieces of equipment purchased, and equipment the company plans to purchase in the near future.

Note the early use of the terms “soyfoods” and “soyfood” in this article. The term “soyfoods” was coined by Surata Soyfoods of Eugene, Oregon, in Dec. 1976.

Note 2. This is the earliest document seen (Oct. 2008) that contains the term “low technology” (or “low tech”).

Shurtleff coined this term to refer to soyfoods that could be made, and had long been made, using simple, traditional technologies, appropriate to Third World countries or relatively poor areas. Address: Director, New-Age Foods Study Center, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

5522. Product Name: Missing Egg Salad.

Manufacturer’s Name: Soy Plant (The).

Manufacturer’s Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.

Date of Introduction: 1978. June.

Ingredients: Tofu, tahini, soyamaze [soy mayonnaise] (soymilk, safflower oil, cider vinegar, honey, salt), tamari, celery, onion, nutritional yeast, spices.

Wt/Vol., Packaging, Price: 12 oz. plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Steve Fiering. 1979. Whole Foods. Jan. p. 38, 40. “A Midwestern Interest in Tofu.” This is included in a list of products presently produced by the company. It contains eggless soy mayo and turmeric. Talk with Steve Fiering. 1988. June 10. The word “tofu” was not in the title. It was introduced before the Conference, and one of their first two deli items. It was later sold occasionally wholesale outside the deli. The eggless soy mayo was first introduced as a separate product in the deli about a year later.

Rectangular Label in Soy Plant scrapbook from 1979. 3 by 2 inches. Green on orange. 12 oz.

Square Label in Soy Plant scrapbook from about 1980. 3 by 3 inches. Black on white. 12 oz. Ingredients: Tofu, soynaise (soymilk, oil, vinegar, salt, honey), celery, parsley, onion, spices. 12 oz. Zip: 48104.

5523. Product Name: Teya’s Sprout & Tofu Pie.

Manufacturer’s Name: Tumaro’s Inc.

Manufacturer’s Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.

Date of Introduction: 1978. June.

Ingredients: Crust: Organically grown whole wheat flour, corn oil, water, sea salt. Filling: Tofu (soy beans, water, nigari), mung bean sprouts, celery, green peppers, onions, tamari (soy beans, water, sea salt), arrowroot starch, ginger, garlic, pepper.

Wt/Vol., Packaging, Price: 9 oz.

How Stored: Frozen.

New Product–Documentation: Label. 1981. 4 by 2.5 inches. Self adhesive. Brown on tan. “No meat or meat derivatives.” Letter from Kaye Dunham. 1981. March 30. This was his company’s first soy product. He bought the tofu from Hinode. Poster. Back to back, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Note: This appears to be America’s first frozen tofu entree.

5524. Westbrae Natural Foods. 1978. Price list [Catalog]: June 1978. Emeryville, California: Westbrae. 30 p. 22 by 28 cm.

• **Summary:** On the cover are pink, red and light blue Japanese plum blossom crests against a blue background. Address: P.O. Box 8711, Emeryville, California 94662. Phone: 415/658-7518.

5525. Fabricant, Florence. 1978. Food: How the Chinese cook at home. *New York Times*. July 9. p. L16.

• **Summary:** Chinese home cooking is, of course, much simpler, quicker, and less expensive than restaurant cooking. Bick Lee, in order to expand her knowledge of “Chinese vegetable cooking” spent several days in the kitchen of the Ching Kok Lin Buddhist nunnery in Kowloon, Hong Kong. The nuns lead very frugal, spartan lives. Bick Lee’s mother is a Buddhist, but the Lees are not vegetarians—although their meals do tend to emphasize vegetables.

A meatless recipe for “Mock duck” is given. The ingredients include: “1 tablespoon light soy sauce (or Kikkoman brand soy sauce), 1/8 teaspoon monosodium glutamate (optional), 1 teaspoon sesame oil, 1 round sheet pressed bean curd (see note).” Then: “Cut sheet of bean curd in half and trim the thick edge with scissors. Lay one of the pieces of bean curd on a cookie sheet. Moisten it with half the sauce, brushing it over the surface or folding the bean curd over itself to pick up the sauce... 4. Lay the second piece of bean curd over the first and repeat the process with the sauce and mushrooms.” Steam then pan fry.

“Note: Dried straw mushrooms and bean curd sheets may be obtained only in Chinese groceries in Chinatown.”

Note: These “bean curd sheets” are clearly what we call “pressed tofu sheets” (*pai-yeh* or *chien-chang*).

5526. Birnbaum, Alfred. 1978. Re: Hama-natto [or Hamanatto]. Letter to William Shurtleff at New-Age Foods Study Center, Lafayette, California, July 12. 1 p. Handwritten and signed.

• **Summary:** Concerning Hama-natto [from Yamaya / Yama-ya]: It is a special product of Hamamatsu, used as an accompaniment to rice, tea, or fried egg yolks. Two sources give two processes.

Process No. 1: Mix 2 liters of large steamed soybeans with 1 liter of roasted barley- or wheat flour. Add koji and incubate in a koji incubation room (30-35°C) for 3-4 days. Then dry the product in the sun until its moisture content has dropped to 20-25%. Prepare a salt solution by mixing 0.5 liters salt with 2 liters water. Mix this salt solution with the dried molded soybeans in a vat, and place a pressing lid on top, weighted with a stone. Allow to ferment for several months. Remove and sun-dry, or add shoyu and sliced ginger. Note: The source of these instructions is given in Japanese: *Daizu-Sono tokuksei to tabekata* [Soybean: Their special features and ways of using them as food], by

Masaaki. Kobayashi

Process No. 2: This is less precise. Cook large soybeans in salty *tsuyu*, composed largely of water seasoned with shoyu. Add koji and roasted barley- or wheat flour. Ferment for several months. Then add [finely slivered or diced] gingerroot (Ryûzô Nakano).

The package: Yamaya-ya Hamanatto, Main office: Shizuoka prefecture, Hamamatsu city, Naruko-machi, 8 banchi. Factory: Shizuoka prefecture, Hamakita city, Komatsu, 4880 banchi.

The nutritional composition of the Yamaya product is given: Protein 25.41%. Fat 10.44%. Non-nitrogenous substances [carbohydrates; *muchitsu-butsu*] 12.62%. Fiber 2.95%. Ash 14.51%. Moisture 34.07%. Per 100 gm: Vitamin B-1 0.21 mg. Vitamin B-2 0.53 mg. Calories 246. Address: Tama-sô No. 1, Inokashira 1-28-30, Mitaka-shi, Tokyo 181, Japan. Phone: 0422-47-7130.

5527. Elias, Stanley. 1978. In Japan, puffing goes continuous. *Food Engineering* 50(7):58-59. July.

• **Summary:** For the past several years, Kikkoman Shoyu Co., Ltd. has been using a continuous explosion puffing system, based on superheated steam, for treating granulated soybeans prior to further processing. Developed in-house, this system has also been tested on wheat and polished rice. The residence time is as short as 5 seconds, the pressure up to 15 psi (15 kg per square cm), and the capacity up to 4 tons/hour. After Japanese and U.S. patents are secured, Kikkoman plans to license the manufacturing rights to Kurimoto Iron Works. A schematic diagram shows the process. Photos show: (1) The control panel. (2) The puffing chamber and discharge hopper. (3) The rotary transfer valve, a key component. Address: Technical Editor.

5528. Nihei, Takao. 1978. Hawai ni okeru Nihon-shu, miso, shôyu no rekishi. Miso, shôyu. Fu: Nenpyô oyobi raberu nado [A history of Japanese sake, miso, and shoyu in Hawaii: Miso and shoyu. With a chronology, copies of sake and shoyu labels, and a directory]. *Nippon Jozo Kyokai Zasshi (J. of the Society of Brewing, Japan)* 73(7):542-49. July. [14 ref. Jap]

• **Summary:** By far the best history of miso and shoyu in Hawaii, this work is a treasure. Address: Honolulu Shuzo Seihyo Gaisha.

5529. **Product Name:** Vegetarian Soysage (Meatless Okara-based Sausage).

Manufacturer’s Name: White Wave.

Manufacturer’s Address: 3869 Walnut St., Boulder, CO 80301.

Date of Introduction: 1978. July.

Ingredients: Okara, wheat germ, whole wheat flour, nutritional yeast, oil, soymilk, shoyu, oregano, prepared (wet) mustard, garlic, allspice, salt, fennel, sage, cayenne,

liquid smoke (hickory).

Wt/Vol., Packaging, Price: 8 oz disks in plastic wrap.

How Stored: Refrigerated.

New Product–Documentation: Label. 1979. 3.75 inches square (8 oz.). Paper. Brown on tan. Drawing of happy pig face. 3 inch diameter (16 oz.). Paper. Brown on tan. Ingredients on labels are: Okara (soy fiber), nutritional yeast, wheat germ, whole wheat flour, safflower oil, shoyu (soy sauce), herbs and spices. Label and recipe given by Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 169. Product Price List. 1979, winter. “Spicy vegetarian ‘sausage type’ soy patty. Slice thin or fry and use on pizza. 8 or 16 oz.”

Interview with Steve Demos. 1987. In early 1978 they introduced soymilk. At about the same time they started to use the okara from their tofu to make one of America’s earliest brands of soysage—if not *the* earliest! In late July 1978, at the first Soycrafters’ Conference in Ann Arbor, Michigan, White Wave gave instructions for tube-processing of soysage.

5530. Shurtleff, William. 1978. Re: Proposal to add new categories and information about soyfoods to *Soybean Digest Blue Book*. Letter to Mr. Lynn Munyer, editor, *Soybean Digest Blue Book*, P.O. Box 158, Hudson, Iowa 50643, Aug. 21. 2 p. Typed, with signature on letterhead.

• **Summary:** Contents: Introduction to publications and work of New-age Foods Study Center. Statistics on consumption of traditional soyfoods in East Asia. Tofu. Soymilk. Miso. Shoyu. Tempeh. Natto. Conclusion.

“Worldwide and increasingly in the United States the traditional soyfoods discussed in our books account for an extremely large proportion of world soybean consumption for human diets.

“Therefore we feel it is in the interest of the ASA [American Soybean Association] and American Soybean farmers to do more to introduce these traditional soyfoods to people around the world via your publications.” Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

5531. Arrowhead Mills, Inc. 1978. Price list. Hereford, Texas. 6 p. Sept. 15. 28 cm.

• **Summary:** Printed with light brown ink on white paper. Contents: Whole grains. Beans, seeds and nuts. Cereals and flakes. Flours. Packaged grains. Packaged beans, seeds and nuts. Packaged cereals and flakes. Packaged flours. Oils. Nut butters (Peanut butter {creamy or crunchy}, sesame butter, sesame tahini). Condiments. Pastas. Beverages. Earthwonder dinners. Miscellaneous. Simpler Life vitamins. “The Simpler Life” Unit A all #10 cans. Unit B all #2½ cans. Unit C all #2½ cans. Star Unit all #2½ cans. Additional Simpler Life foods.

Soy related products—bulk: Soybeans (50 lb). Bulghur-

soy grits (50 lb). Seven grain cereal (40 lb). Soybean flakes (25 lb). Soy flour (roasted, 30 lb).

Soy related products—packaged: Soybeans (12 x 1 lb). Bulghur-soy grits (12 x 20 oz). Seven grain cereal (12 x 24 oz). Soybean flakes (12 x 1 lb). Soy flour, whole (12 x 1½ lb). Soy oil (pint, quart, or 5 gallon). Tamari soy sauce (pint, quart, or 4.7 gallon). Protein powder (in Simpler Life Unit-B #2½ cans). Address: Box 866, Hereford, Deaf Smith County, Texas. Phone: (806) 364-0730.

5532. Lekachman, Robert. 1978. Selling our own backyard: Review of the book *American for Sale*, by Kenneth C. Crowe (Doubleday. 213 pp.). *Saturday Review*. Sept. 16. p. 44-46. [1 ref]

• **Summary:** A number of towns in several U.S. states have competed vigorously to attract assembly plants to be built by Volkswagen, Honda, and Datsun in the USA. Congressman Henry Reuss of Wisconsin has nothing but good things to say about Kikkoman’s teriyaki and soy sauce plant in his state at Walworth. Today, he says, the company is a great success. It has built a new \$9 million plant and created 50 new jobs. This helps America’s balance of payments. Japanese families are popular in the area and a delight to the local school system.

5533. Liardon, Rémy; Philippossian, Georges. 1978. Volatile components of fermented soya hydrolysate. I. Identification of some lactones. *Zeitschrift fuer Lebensmittel-Untersuchung und -Forschung* 167(3):180-85. Sept. 28. [28 ref. Eng; ger]

• **Summary:** Vegetable protein hydrolysates are widely used as food seasonings. Soya protein hydrolysate was prepared by fermentation with *Aspergillus oryzae* and *Saccharomyces rouxii*. Address: Research Dep., Nestlé Products Technical Assistance Co. Ltd., P.O. Box 88, CH-1814, Tour-de-Peilz, Switzerland.

5534. **Product Name:** Tamari Soy Sauce.

Manufacturer’s Name: Arrowhead Mills, Inc. (Marketer).

Manufacturer’s Address: Box 866, Hereford, TX 79045. Phone: (806) 364-0730.

Date of Introduction: 1978. September.

New Product–Documentation: Arrowhead Mills.

1978. Sept. “Price list.” (pints, quarts, and 4.7 gallons). / Arrowhead Mills. 1987. Catalog. 1.5 and 30 lb.

5535. Lachman, Gaella; Elwell, Christian. 1978. Making miso in America. *East West Journal*. Sept. p. 54-59.

• **Summary:** A colorful account of making 1,000 lb of miso in the spring of 1978 with Noboru Muramoto at Asunaro, on Mt. Veeder, at 4600 Cavedale Road, Glen Ellen, California 95442. Phone: (707) 996-5365. Christian writes in the introduction that several years ago, upon returning from India and recovering with a serious bout with jaundice, he came across Naboru [sic] Muramoto’s book, *Healing*

Ourselves (Avon Books, 1973), “one of the few reliable guides to preventive medicine now available.” After this he began to use food as medicine for the first time. Within a year he was attending seminars by Michio in Boston, Massachusetts, and learning about macrobiotics. He later learned that Mr. Kushi and Mr. Muramoto had both been students of George Ohsawa. While in Boston, Christian met Gaella, his wife to be. They left Boston to visit California, and from January to April 1978 they studied at Asunaro Eastern Studies Institute (established in the fall of 1976) in Glen Ellen, California, with Mr. Muramoto. By mid-April, in addition to miso, they had also learned to make soy sauce, saké, tofu, seitan, mochi, bran pickles, sauerkraut, tekka [miso], and bread. Natto making is also taught. A large photo shows the two of them cooking soybeans for making miso.

Note: Talk with Christian Elwell. 1996. Sept. 7. While Christian and Gaella were at Asunaro, Thom Leonard visited for a few days. Thom and Christian met and talked, recognized that they had a lot in common, and stayed in touch afterward. Christian eventually purchased Thom’s Ohio Miso Co. He was already making miso experimentally, and he had plans to go back to Ohio to make commercial miso.

5536. Mutual Trading Co., Inc. 1978. Price book: Miyako brand. Fancy Oriental Japanese foods—Importer & Distributor. Los Angeles, California. 60 p. Sept. Index. 22 cm. [Eng]

• **Summary:** Includes: Miso (p. 3-4). Soy sauce and other sauces (p. 4-5). Dried seaweed (p. 32-33). Vegetable (edamame, natto {Miyako brand}, inari age, konbu natto, p. 37). Salted black bean (Chinese, p. 60). Address: 431 Crocker St., Los Angeles, California 90013. Phone: 213-626-9458.

5537. Hughes Markets. 1978. Final five weeks... (Ad). *Los Angeles Times*. Oct. 12. p. 127.

• **Summary:** The section titled “Foods of the Orient” includes:

Yamasa soy sauce, 1 gallon can \$4.05.

Seaweed, Yamamotoyama momi nori 0.7 oz. \$0.79. Soy bean paste, Yamajirushi shiro miso 32 oz. \$1.55.

5538. Minard, L. [L.M.]. 1978. Yes, we have no paternalism. *Forbes* 122:112. Oct. 16.

• **Summary:** In 1974 Kikkoman Shoyu, in business since 1661 and now having \$800 million a year sales, announced that it would build a soya sauce brewery in Walworth, Wisconsin. “But Walworth’s townfolk and farmers refused to rezone a 200-acre Kikkoman plot for industrial use... The county planners intervened and gave Kikkoman the go-ahead on its \$10 million, 2.4 million-gallons-a-year plant.

“The plant has been a huge success... Kikkoman’s U.S. sales have doubled in the last five years. The firm’s

market share is now 46%, having surpassed that of its main competition, Beatrice Food’s La Choy brand, a year ago...

“With only \$20 million in sales and 70-odd workers, Kikkoman-Walworth is too small to import much of the Japanese management style.”

A large photo shows Dr. Danji Fukushima.

5539. Daniels, Stevie. 1978. I was a sucker for protein. *East West Journal*. Oct. p. 60-62.

• **Summary:** Her introduction to soyfoods came the hard way—by trying a “can of textured soy protein”—the food that could end world hunger. She tried preparing it in many different ways. “Nothing worked. It was terrible. I threw it on the compost pile and watched squirrels, rats, and chipmunks detour around it for weeks... It was easy to see why even starving people gave thumbs down to this orangish, gloppy, spoiled-tasting canned concoction.” She learned that the oil companies extract the oil from soybeans with hexane solvent then use the defatted leftovers to feed livestock and make textured soy protein.

Later she became a vegetarian, tried cooking whole soybeans, and then “fresh soybeans” in the pods—which a local organic farmer brought to her co-op. Finally one day she found a brochure stating: “The four main foods made from soybeans are tofu (soybean curd), tempeh (fermented soyburger), shoyu (soy sauce), and miso (fermented bean paste).

“I was amazed. The Eastern people, one-fourth of the world’s population, had known how to use soybeans for centuries. I learned they also sprouted the beans...” She tried these foods and liked them. Bill Shurtleff stopped by the EWJ’s office after attending the first national soyfood conference in Ann Arbor, Michigan. She describes their discussion, including the founding of the Soycrafters Association of North America. At the end is a list of resources and a bibliography of EWJ articles on soyfoods: Larry Needleman (Soycrafters Assoc. of North America, P.O. Box 76, Bodega, CA 94922. Phone: (707) 876-3341). Bill Shurtleff, The Farm (Summertown, Tennessee), Asunaro Eastern Studies Institute (Attn: Dina Drago, 4600 Cavedale Rd., Glen Ellen, California 95442. Phone: (707) 996-5365. Miso and shoyu production taught by Naboru [sic, Noboru] Muramoto).

5540. *East West Journal*. 1978. East West mail order (Ad). Oct. p. 68-69.

5541. Jacobs, Leonard. 1978. Menage: Where can I get information about traditional Japanese foods—like miso, soy sauce, umeboshi, sea vegetables—that are sold at my natural food store? L. Paulsen, Chicago, Illinois. *East West Journal*. Oct. p. 12.

• **Summary:** Answer: One of the largest exporters of these foods, Muso Co., has recently printed a series of pamphlets

describing how these products are made and the nutritional value of each. The pamphlets are available from: Stephen Earle, Muso Co., Ltd., Nishishinmachi 1-2-18, Wakae, Higashi-Osaka 578, Japan. Address: Publisher, East West Journal.

5542. Shurtleff, William. 1978. Protein source for the future. *PHP (Japan)*. Oct. p. 8-18, 79-82. Illust. 18 cm.

• **Summary:** Contents: Introduction. Ten reasons why soybeans will be the protein source of the future: 1. Optimum land utilization. 2. Lowest cost source of protein in almost every country of the world. 3. High nutritional value. 4. Time tested for over 2,000 years. 5. Remarkably versatile. 6. Appropriate technology ("Traditional soyfoods can be produced in cottage industries"). 7. New dairylike products. 8. Soybeans are hardy and adaptive. 9. Free nitrogen fertilizer from nodules on soybean plants. 10. Great productivity potential.

Discusses new patterns of soy protein utilization, with specific reference and descriptions of tofu, soymilk, tempeh ("Indonesia's most popular soyfood"), miso, shoyu, whole dry soybeans, roasted soybeans, fresh green soybeans, soy flour, kinako, soy sprouts, and textured soy protein (TVP), yuba, and natto. Concludes with a discussion of new developments in the Western world. Address: New-Age Foods Study Center, P.O. Box 234 (951½ Mountain View Dr.), Lafayette, California 94549. Phone: 415-283-2991.

5543. **Product Name:** Seitan Roast.

Manufacturer's Name: Soy Plant (The).

Manufacturer's Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: 313-663-0500.

Date of Introduction: 1978. October.

Ingredients: Organic whole wheat flour, tamari soy sauce (aged 3 years), mild spices.

New Product–Documentation: Leaflet / Label in Soy Plant Scrapbook, next to article dated 4 Oct. 1978. 5½ by 4¼ inches. Black on light blue, front and back. Logo on front in upper right corners shows a hand holding a flower with the words "Traditional Foods" around the bottom. "We at The Soy Plant pride ourselves on providing tasty as well as nutritious products and our Seitan reflects this tradition. New to us, Seitan was being enjoyed by Tibetan Monks more than 3000 years ago." Gives ingredients, nutritional value, and 13 serving suggestions. "For more information about Seitan and Class on making your own Seitan at home, visit The Soy Plant, 211 E. Ann St., Ann Arbor, Michigan, 48104. [Phone] 663-0500.

Talk with Steve Fiering, a founder of The Soy Plant in Ann Arbor. 2000. Dec. 3. Sue Kalen, who was into macrobiotics, probably had the idea for this product and wrote the text. It was packaged with a liquid in a round plastic tub–like tofu. It never sold very well–maybe 5 lb/week. It was made sporadically, when someone who knew

how to make it felt like making it.

5544. Westbrae Natural Foods. 1978. Price list [Catalog]: October 1978. Emeryville, California: Westbrae. 34 p. 22 by 28 cm.

• **Summary:** On the cover are orange and yellow Japanese plum blossom crests against a brown background. New products (written in all capital letters): Wholewheat soy spirals (pasta). Address: P.O. Box 8711, Emeryville, California 94662. Phone: (415) 658-7518 (orders).

5545. Lindsay, Anne. 1978. Try Oriental options: Easy-to-prepare Japanese recipes. *Toronto Star (Ontario, Canada)*. Nov. 15. p. C1-C2.

• **Summary:** Japanese recipes include: Gomoku gohan (Rice with vegetables; with "2 cakes aburaage {fried bean curd}, cut into matchstick size, julienne strips," and "¼ cup soy sauce"). Sukiyaki (with "2 pieces tofu {fresh bean curd} cut into one-inch pieces"). Sukiyaki sauce (with "½ cup soy sauce").

Note: A very good description of authentic sukiyaki and how to make it.

5546. Nicholson, Tom; Cumming, J.B., Jr.; Sylvester, M. 1978. Bosses with an accent. *Newsweek* 92:80. Nov. 27.

• **Summary:** An American working at the Kikkoman Shoyu soy-sauce factory in rural Wisconsin has made a happy discovery; most Japanese make excellent employers. The factory is owned by the Japanese, staffed at the top with talented Japanese managers, and permeated by a Japanese worldview and way of doing business—including loyalty to the company and a consensus style of management. Both American workers and Japanese employers have difficulty adjusting to the new arrangement, but both are trying and—generally—succeeding.

5547. Chen, Philip S.; Chung, Helen D. 1978. Soybeans for health and longer life. New Canaan, Connecticut: Keats Publishing, Inc. xii + 178 p. Index. 18 cm. (A Pivot Health Book).

• **Summary:** A revised and condensed pocketbook version of Chen and Chen 1956. Contents: Preface. Foreword. Introduction. Part I: Nutritive value of the soybean. 1. Protein. 2. Fat. 3. Carbohydrates and caloric value. 4. Minerals. 5. Vitamins. 6. Soybeans and world population. 7. Soybeans and disease.

Part II: Soy products. 8. Soybean oil: Phosphatides, margarine. 9. Soybean oil meal: Gelsoy, Multi-Purpose Food. 10. Soy flour. 11. Concentrated soy protein products: Soy protein concentrates (Griffith Laboratories makes Isopro and GL-301), soy protein isolates, and textured or spun soy proteins. 12. Soy milk. 13. Soy cheese (tofu). 14. Soy sauce. 15. Soybean sprouts.

Part III: Soybean culture and preservation. 16. Soybean

culture. 17. Preservation of soybeans (preserving green soybeans by canning, freezing, and dehydration).

Part IV: Recipes. 18. Soybeans and soybean pulp. 19. Soy flour: Breads, cakes, cookies, pies, soups, other recipes. 20. Soy grits and soy flakes. 21. Soy milk. 22. Soy cheese. 23. Soybean sprouts. Appendix: Soybean utilization (chart). References. Address: 1. PhD; 2. M.S. Both: USA.

5548. **Product Name:** Samurai Hero (Brown Rice & Tofu Sandwich in a Chapati).

Manufacturer's Name: City Samurai.

Manufacturer's Address: San Francisco (actually Berkeley), California.

Date of Introduction: 1978. November.

Ingredients: Brown rice, tofu, carrot or seasonal vegetable, sea salt, lettuce, sprouts, green onion, safflower oil, whole grain chapati, barley miso, sesame butter, spring water, tamari.

Wt/Vol., Packaging, Price: 9 oz (at least).

How Stored: Unrefrigerated and perishable.

New Product–Documentation: Talk with Paul Duchesne. 1989. July 31. Chris Smith, after discussing the matter with Duchesne (who was in Boston), showed Joe Nixdorff (who had been coming to macrobiotic potluck dinners) how to make the BRTS in about Nov. 1978. He made it every other day and sold it at multiple outlets until about March 1982, when competition from Wildwood Natural Foods put him out of business. Though the label shows San Francisco as the business location, this was not true; the business was actually in Berkeley. At one time he was making the sandwiches at Pacific Tempeh run by Travis Burgeson.

Talk with Travis Burgeson. 1989. Aug. 7. Joe Nixdorff introduced this sandwich before 1980. He started making it at Tony Plotkin's mochi plant [Grainaissance], then expanded into Travis' tempeh plant. Travis estimates that Joe made about 750 sandwiches/week. He delivered them himself in a car to natural foods stores, mostly in Berkeley and the San Francisco Bay Area. Joe was squeezed out of business by Wildwood before Travis sold his business in 1983. This sandwich was in no related to the Samurai cart that sells sandwiches in Berkeley. Label sent by Paul Duchesne. 1989. Aug. 11. Black on gold. "A complete meal for today's warrior. Organically grown ingredients used when available."

5549. Fortner, Heather J. 1978. The limu eater: A cookbook of Hawaiian seaweed. University of Hawaii Sea Grant Program, 2540 Maile Way, Spalding Hall 253, Honolulu, HI 96822. ix + 107 p. Illust. Index. Nov. 23 cm. Sea Grant Miscellaneous Report UNIHI-SEAGRANT-MR-79-01. [39 ref]

Address: Honolulu, Hawaii.

5550. Nunomura, N.; Sasaki, M.; Asao, Y.; Yokotsuka, T.

1978. Shoyu (soy sauce) volatile flavor components: Basic fraction. *Agricultural and Biological Chemistry* 42(11):2123-28. Nov. [23 ref]

Address: Central Research Labs, Kikkoman, Noda, Japan.

5551. Fleiss, Paul M.; Douglass, J.M.; Wolfe, L. 1978. Vitamin B-12 deficiency in strict vegetarians. *New England J. of Medicine* 299(23):1319. Dec. 7. [2 ref]

• **Summary:** This letter was written in response to a letter by Higginbottom et al. in the Aug. 17 issue of JAMA. "A nutritionally adequate, strict vegetarian diet is, in fact, possible. Natural vitamin B-12 is synthesized by microorganisms, and, accordingly, vegans may obtain vitamin B-12 from soy sauce (3 micrograms per 5 ml), miso, and tempeh, as well as certain seeds and nuts, or by colonic synthesis when adequate unheated seeds are eaten (U.D. Register, personal communication)... Our experience with hundreds of healthy, breast-fed infants indicates that omnivores, lacto-ovo-vegetarians, lacto-vegetarians, and strict vegans (some practicing lifetime avoidance of animal products) can nourish their infants adequately for the first few months of life without supplementation." Address: 1. USC School of Medicine; 2-3. Kaiser-Permanente Center, Los Angeles, California 90027.

5552. Hittle, Carl N. 1978. Soybean potential in Nepal: A report. Mimeographed, spiral-bound manuscript. 30 p. 28 cm. [26 ref]

• **Summary:** Dr. Hittle served as a soybean consultant in Nepal from Sept. 23 to Oct. 11, 1978. Contents: 1. Introduction. 2. Terms of reference for soybean consultant. 3. Background information: Soybean production, production research, evaluation of germplasm, local varieties and selections, preservation of soybean germplasm, rhizobial microbiology, economics of soybeans, soybean statistics, present uses of soybeans in Nepal, Food Research Services of the Ministry of Food, the dairy industry in Nepal, solvent extraction, CARE, UNICEF. 4. Observations at the research stations: Kakani Hill Station, Pakhribas Agricultural Centre, Lumle Agricultural Centre, Central Research Station–Khumaltar, Bhairawa Agricultural Farm, Rampur Agricultural Experiment Station, National Rice Station–Parwanipur.

Note 1. The first 3 stations are located in the hills, Khumaltar is in the Kathmandu Valley, and the last 3 are located in the plains (Tarai [Terai]).

5. Comments and suggestions: Priority of soybeans, operational work plan, assignment of national staff, assignment of international staff, training, linkages, a national soybean research center. Appendixes. I. Itinerary of C. N. Hittle. II. Persons met by soybean consultant. III. List of background information. IV. Sarbottam Pitho (Super Flour made from 50% soybeans). Uses of soybeans.

The soybean is an ancient crop in Nepal. Generally its

culture has been restricted to terraces and valleys ranging from 500 to 1,500 meters (1,642 to 4,925 feet) in altitude. Soybeans are usually grown at lower altitudes in single rows on the bunds of rice paddy fields, or at higher altitudes as an intercrop with maize or millet. Hectarage is difficult to estimate; estimates made from 1976 to 1978 range from 10,000 to 70,000 hectares. Yields are low, ranging from 300 to 500 kg/ha. This is because of the two ways soybeans are traditionally grown, because they rarely have been grown in the Tarai [Terai] (Plains area) where higher yields can be expected, and because little emphasis has been given to developing superior varieties and cultural practices.

Soybeans are used mainly for human food in Nepal by “roasting the dried seeds (parching) or as green vegetables (boiling or frying the green pods followed by shelling of the seeds and eating the green soybeans). Parched soybeans are frequently mixed with popped maize (corn) and eaten daily as tiffin. Green soybeans are frequently mixed with other vegetables to make curry. A snack food is prepared by removing the seed coat of parched soybeans, splitting the cotyledons and mixing with garlic, salt, and chilli powder. Sprouted soybeans are mixed with other sprouted pulses and used as vegetable soup. Fermented soya products include soya sauce and kirima [kinema].”

Soybeans are one of the main sources of protein for the majority of the people in the Hill regions. Only small quantities of soybeans reach the market.

Note 2. This is the earliest document seen (Jan. 2012) that uses the alternative spelling “kirima” to refer to kinema, a fermented soyfood from Nepal and a close relative of Nepalese kinema and Japanese natto. Address: Soybean consultant in Nepal.

5553. *Politics Today*. 1978. Soy sauce for the goose. 5:64. Nov/Dec.

• **Summary:** This article focuses on opposition by Japanese *mikan* (mandarin orange) growers to U.S. orange exports to Japan. But it notes: “Half of U.S. exports to Japan are agricultural products. The U.S. market hold is so complete that without the Midwest’s soybean production, there might be no soy sauce on the table at Tokyo’s famous restaurant, Benihana of New York. Indeed, as much as 80 or 90% of the soybeans, wheat, corn, animal feed, and lumber consumed in Japan comes from America.”

5554. Swan Food Corp. 1978. Collected papers (Archival collection). Miami, Florida. 5 file folders, 1½ linear inches.

• **Summary:** Swan Foods was the first soyfoods company in the United States to make a wide variety of innovative soyfoods products. The company’s papers are located at Soyfoods Center in Lafayette, California. In December 1978, when the company declared bankruptcy after about two intense years in business, Danny Paolucci cleaned out the office, keeping all documents that he believed might be of

future importance. He kept them for 19 years, then sent them to Bill Shurtleff at Soyfoods Center at Shurtleff’s request. Most of the papers relate to recipes. There are no commercial papers (invoices, ledgers, etc.).

Folder 1: Bulk soyfoods recipes, typed. Each recipe is typed on a sheet of 8½ by 11 inch lined paper. Recipes made in a Hobart mixer are marked with an asterisk (*) after the recipe name. The recipes (listed alphabetically) are: Baked tofu (with tamari sauce for marinade, bake at 350°F for 30-35 minutes). Caraway tofu (add 5 ingredients to curdling tofu; stir and let curds form). Carob cream cake* with topping (incl. 2 gallons soymilk). Cashew carob swirl cake* (incl. 3 gallons soymilk). Devils food cream cake* (incl. 2 gallons soymilk and tofu topping). Eggless egg salad* (incl. 10 lb boiled and cooled Swan Tofu). Marinade for tofu (incl. 1 gallon tamari; mix all ingredients in a 5 gallon bucket, add sliced tofu, and seal). Soy burgers* (incl. 2 gallons each cooked rice and fresh okara, and 2½ cups tamari). Tofu chip dip* (large and small; the small incl. 6 lb tofu boiled and cooled, ¼ cup tamari, and ¼ cup umeboshi plum paste; the large incl. 42 lb tofu).

Folder 2: Lists of ingredients for various soyfoods products typed on Swan Foods’ blue-on-white letterhead: The products (listed alphabetically) are: Carob swirl marble cake (non-dairy) (incl. soy milk). Okara granola. Roasted cashew tofu pie (incl. tofu and organic soy milk). Soyogurt (non-dairy): Note: These ingredients are handwritten below a sample label design on the back of the bottom half of a Swan Foods order form.

Folder 3: Legal-sized yellow lined note pad with 17 pages of notes written in blue ink—probably by Mary Pung. Subjects: *Nutrition Almanac* (soybeans and soy milk, p. 71; malt, p. 76). One page of 6 bibliographic references for publications related to soy, with a large note: “Sell *Book of Tofu*, etc. in shop.” *The Health Food Dictionary* & recipes (mu tea, p. 102; soybean, p. 159; tofu, p. 174). *Diet for a Small Planet* (Lappé, 1975 ed.) (protein table III—Legumes; notes on tofu, p. 102, soy yogurt vs. milk yogurt, p. 128-29; tofu, p. 132). *Recipes for a Small Planet* (Ewald, 1973) (table showing no. of calories you have to consume in order to get one gram of usable protein, p. 16; notes on Net Protein Utilization). *Soybean Diet* (Herman Aihara, 1974) (table of nutrients in various foods; cow’s milk, p. 44; soybeans can help with environmental problems, p. 4; soybeans vs. meat, p. 6, 8-9; tofu preparation, p. 115; nigari, p. 116; nutrient value of tofu, p. 125). *The Book of Tofu* (Shurtleff & Aoyagi, 1975) (moral and emotional appeal, health, religion, ecology, economic, p. 19; complementary proteins, p. 24, 26; easy to digest and diet food, p. 26; low in saturated fats and cholesterol, linoleic acid, rich in minerals and vitamins, p. 27; nigari, free of chemical toxins, p. 28; quick and easy to use, p. 29; ecological, nitrogen from the air, p. 55; okara, p. 77-78; uses of agé, deep-fried tofu, p. 154-55; soymilk, p. 200). Six interesting teas.

Folder 4: Handwritten recipes (some very rough) and notes, in pen and pencil, mostly on individual sheets of paper. Soy-related recipe names (listed alphabetically): Basic tofu cheesecake. Basic tofu pie. Carob marble cake. Carob on blonde with tofu topping (also called Blonde on carob; baked, with soy milk). Carob tofu pie. Dips in tofu containers: Chive tofu dip, pimento tofu dip, sea tofu dip, Italian herb tofu dip, pimento olive dip (ideas only). Dressings: Miso, avocado, green goddess, creamy garlic, red Russian, spinach Russian (ideas only). Eggless egg salad. Eggless tofu salad. Frozen tofu cutlets. Mary's deluxe pizza (with tofu, from "Swan Food Corp."). Milk shake. Nori rolls. Okara products: burgers, burritos, felfafels (ideas only). Pumpkin pie. Quiche with tofu. Sweetened carob shake. Tofu lemon pie. Tofu mayonnaise. Tofu pie filling. Tofu pudding, vanilla. Tofu quiche lorraine [Note: According to the *Joy of Cooking* (1975, p. 254-55), early recipes for quiche called for bacon and cream, but later cheese was added. When sautéed onions were included, the dish was called Quiche Alsacienne. Quiche Lorraine now typically contains egg white, bacon, milk or cream, and Swiss cheese]. Tofu rice salad. Tofu tarts. Tofu turkey (Barbara's, with stuffing). Yogurt dressing. The names of some people are included: Diane Kellar. Sherry (nori rolls).

Folder 5: Other. Tear-off recipes published by Natural Recipes, 94 Bourne St., Boston, Massachusetts 02130. Carob brownies (copyright 1974). Carob cake (copyright 1975). Note: Neither of these recipes contains any soy. Address: 5758½ Bird Road, Miami, Florida 33155. Phone: (305) 667-7141.

5555. Ajinomoto K.K. 1978. Ajieki [Ajieki, HVP soy sauce (Brochure)]. Tokyo, Japan. 8 p. [Jap]
Address: Tokyo.

5556. **Product Name:** [GranoVita Vegetarian Soy Sausages (Spicy)].

Foreign Name: GranoVita Vegetarisch essen Soja-Wuerstchen (Pikant Gewuerzt).

Manufacturer's Name: DE-VAU-GE Gesundheitswerk GmbH.

Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

Date of Introduction: 1978.

Ingredients: Vegetable oils and fats in varying proportions by weight, water, whole soybean puree, egg protein, onions, red cabbage, garlic, wheat gluten, glucose, spices, salt, seasonings, smoke seasoning, yeast flakes, rolled oats, thickeners (carob seed meal and guar seed meal), Graham flour, citric acid as an acidifier. Sauce: Water, salt, soy sauce.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Form filled out and Labels sent by DE-VAU-GE. 1990. June 11.

5557. **Product Name:** Seitan.

Manufacturer's Name: East West Center.

Manufacturer's Address: Moctezuma St., Ensenada, Baja California, Mexico. Phone: 52-667-61005.

Date of Introduction: 1978.

How Stored: Refrigerated.

New Product–Documentation: Talk with Carlos Richardson of Gold Mine. 1992. July 10. The first seitan sold commercially by Gold Mine (in about 1989) was purchased from Arturo Beamonte at the East West Center in Ensenada, in Baja California, Mexico.

Talk with Ygnacio Beamonte at the East West Center in Ensenada, Baja California, Mexico. 1992. July 13. Ygnacio and his wife, Loretto, began to make and sell seitan commercially in 1978 at East West Center on Moctezuma St., in Ensenada. He learned the seitan process in seminars taught by Jorge Badillo, a naturopathic doctor, who lived in Ensenada and introduced macrobiotics there; he now lives in Seattle, Washington. Jorge Badillo learned how to make seitan from Roy Steevensz at the East West Center and Kushi House in Hollywood. Later they moved to Melrose Ave. There are at least 2 places in Latin America making seitan. For details contact the Great Universal Brotherhood, an international organization which was started in Venezuela by Dr. La Ferriere (a famous French teacher) in the 1950s, and now teaches lacto-ovo vegetarianism, yoga, etc. In Mexico City and other big cities in Mexico people have started making gluten but not seitan. Ygnacio's brother, Arturo, started making seitan at the East West Center in about 1984. Then he moved to Oregon. In about 1986-87 he moved to the East West Center in San Diego, where he took over as seitan maker from David Jackson (who now lives in Arizona). The East West Center in San Diego no longer exists. In about 1989 Arturo returned to Ensenada and has been the seitan maker there from that time until today.

Ygnacio and Arturo taught the East West Center in Los Angeles a new process for making seitan using iridea [*Iridaea cordata*] seaweeds in place of kombu to make the seitan softer and creamier.

5558. Hsu, W.H.; Lin, K.C.; Wang, I.H. 1978. Survey of inyu production in Taiwan. *Food Industry Research and Development Institute (Taiwan), Research Bulletin* *

• **Summary:** The production of inyu (fermented soy sauce made from black soybeans), which still relies on traditional methods, has a low efficiency and no adequate control of microorganisms. Only 55% of the protein in the soybeans ends up in the finished inyu. Address: FIRDI, Hsinchu, Taiwan.

5559. Nihei, Takao. 1978. Hawai no Nihonshu, miso, shōyu no rekishi [History of sake, miso, and shoyu in Hawaii]. Thesis, Hawaii. 5 + 21 + 18 leaves (some folded). Illust.

Portraits. 28 cm. [Jap]

• **Summary:** Handwritten manuscript, with news clippings, photographic prints, forms, bottle labels, and other miscellanea affixed throughout text. Includes bibliographical references (leaves 104-109) and a biography of the author. Address: Honolulu Shuzo Seihyo Gaisha.

5560. **Product Name:** [Soy Sauce].

Manufacturer's Name: President Enterprises Corp.

Manufacturer's Address: 2-20 Yan Harn, Tainan (Yungkang) 711, Taiwan. Plant at 1-20 Tahying Vill., Hsinshi, Tainan 744, Taiwan.

Date of Introduction: 1978.

New Product–Documentation: *Soybean Digest Blue Book*. 1978. p. 24.

5561. **Product Name:** Flavored Soy Bean Cake.

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1978.

Ingredients: Water, soy beans, soy sauce (consisting of water, soy bean, salt, wheat caramel), soy oil, salt & spices, 1/10 of 1% calcium sulfate.

Wt/Vol., Packaging, Price: 6 oz (170 gm).

How Stored: Refrigerated.

New Product–Documentation: Label. 1979, undated. 3 by 2 inches. Black and silver on shiny red. The Chinese characters read: “Wu hsiang doufu kan.” Five-spice tofu. Talk with Ben Lee. 1988. Oct. He guesses it was launched in about 1978. In Jan. 1979 a similar product, named Savory Baked Tofu, was introduced; it was also a type of five-spice tofu, but was baked.

Note: This is the earliest known five-spice pressed tofu sold in the Western world.

5562. Slamet, Dewi S.; Gandjar, I.; Suryana, -. 1978. Indonesian soy sauce. In: Collection of Papers in Seminar Microbiologi II. Yogyakarta, Indonesia. See p. 127. *

5563. **Product Name:** Smoky Soy Bits (Bacon-like Bits made of TVP and Gluten).

Manufacturer's Name: Vegetable Protein Co.

Manufacturer's Address: 140 River St., Cambridge, Massachusetts.

Date of Introduction: 1978.

Ingredients: Textured soy flour, gluten, natural flavors, spices, soy oil.

How Stored: Refrigerated.

New Product–Documentation: Letters from John Weissman. 1992. May 29 and June 25. In about 1978-79 John introduced a new product to salad bars around Boston. Named Smoky Soy Bits, it was a combination of TVP and gluten (produced by Ogilvie Ltd. in Montreal, Quebec

H3C 3H1, Canada) made into bacon-like bits, but without hydrogenated oils or salt (he used tamari instead). It was an “all natural” product—to the extent that TVP is natural. It was sold to salad bars and to Tom Iglehart’s Sunrise Sandwich Company for use in a sandwich. He made a thick spread out of the Smoky Soy Bits. Later versions did not contain gluten.

5564. **Product Name:** Soy Sannies. Miso Tahini (Sandwiches with Miso-Tahini Spread).

Manufacturer's Name: White Wave.

Manufacturer's Address: 1738 Pearl St., Boulder, CO 80302.

Date of Introduction: 1978.

Ingredients: Miso (fermented soybean paste), tahini (sesame butter), walnuts, honey on sunflower seed whole wheat bread with alfalfa sprouts, avocado, tomato and missing egg mayonnaise (soycream, safflower oil, vinegar, honey, lemon, soy sauce).

Wt/Vol., Packaging, Price: 7.5 oz.

How Stored: Unrefrigerated and perishable.

New Product–Documentation: Label. 1978, dated. 3.5 by 4 inches. Paper. Black on white, photocopy. Interview with Steve Demos. 1987. Oct. Sold commercially at a few nearby retail outlets.

5565. Abehsera, Michel. 1978. Cooking with care & purpose: menus for strength and peace of mind. Brooklyn, New York: Swan House Publishing Co. 271 p. Index. 21 cm. *

Address: Brooklyn, New York.

5566. Ballero, Mireille. 1978. Les meilleures recettes végétariennes du monde entier [The best vegetarian recipes from around the world]. Paris: Albin Michel. 286 p. Illust. Index. 22 cm. [Fre]

5567. Beuchat, Larry R. 1978. Food and beverage mycology. Westport, Connecticut. AVI Publishing Co. x + 527 p. See p. 224-42. Illust. Index. 23 cm. [300+* ref]

• **Summary:** Chapter 9, “Traditional fermented food products” (p. 224-53), by Larry R. Beuchat, is cited separately.

In Chapter 13, “Metabolites of fungi used in food processing” (p. 368-96), by R.J. Bothast and K.L. Smiley, the section on enzymes (p. 378) begins: “Fungal enzymes have been used for hundreds of years, especially in the Orient. However, modern industrial enzyme technology probably started with Takamine (1894) [Note: In Sept. 1894 he was issued two U.S. Patents for “Process of making diastatic enzyme,” Nos. 525,820 and 525,823] and his work with *Aspergillus oryzae*. Today many industrial enzymes are of fungal origin.” These include α -amylase (from *Aspergillus oryzae* and *A. niger*), glucoamylase, pectic enzymes or pectinases, naringinase, invertase (sucrase), α -galactosidase,

lactase (Beta-D-galactosidase), protease (from *Aspergillus oryzae*), rennet (called rennin, if pure; from *Mucor pusillus*, *Mucor miehei*, or *Endothia parasitica*; used in many types of cheeses), and glucose oxidase, cellulase, lipase, catalase.

There are also chapters on: 14. "Myctoxins," by N.D. Davis and U.L. Diener. 15. "Methods for detecting mycotoxins in foods and beverages," by L.B. Bullerman. 16. "Methods for detecting fungi in foods and beverages," by B. Jarvis. Address: Assoc. Prof., Dep. of Food Science, Agric. Exp. Station, Univ. of Georgia, Experiment, GA.

5568. Beuchat, Larry R. 1978. Traditional fermented food products. In: L.R. Beuchat, ed. 1978. Food and Beverage Mycology. Westport, Connecticut. AVI Publishing Co. xi + 527 p. See p. 224-53. Chap. 9. [69* ref]

• **Summary:** Contents: Introduction, Koji. Soybeans: Shoyu, miso, natto (incl. itohiki-natto, yukiwari-natto, and hama-natto / hamanatto), sufu, meitauza, témpé. Peanuts: Oncom. Rice: Lao-chao, ang-kak, idli. Maize: Ogi, kaanga-kopuwai, injera. Cassava: Tapé, gari. Taro (*Colocasia esculenta*): Poi. Cacao beans: Cocoa, chocolate, and chocolate liquor are products derived from cacao fruits (*Theobroma cacao*).

Tables show: (1) Some fermented foods of fungal origin. For each food is given: Product name, geography, substrate, microorganisms, nature of product, and product use. Soy-related products include: Chee fan, Chinese yeast, Hamanatto, ketjap, meitauza, meju, miso, shoyu, sufu, tao-si, taojjo, and témpé.

"Yukiwari-natto is made by mixing itohiki natto with rice koji and salt, and aging at 25 to 30°C for about two weeks." Note 1. Yukiwari natto is natto resembling miso, featuring the stickiness (*nebari*) of natto and the sweetness of koji. It is made by a two-step fermentation. Another process: (1) Make the natto and the koji, separately. (2) Mince natto finely and mix it with koji, shoyu, and dashi made from kombu. Ferment at 30-33°C for 30-40 days.

Note 2. This is the earliest English-language document seen (Aug. 2006) that mentions the term yukiwari-natto (or yuki-wari natto). Address: Dep. of Food Science, Agric. Exp. Station, Univ. of Georgia, Experiment, GA.

5569. Calella, John R. 1978. Cooking naturally: An evolutionary gourmet cuisine of natural foods. Berkeley, California: And/Or Press. ix + 112 + 5 p. Illust. by Pedro J. Gonzalez. Index. [81 ref]

• **Summary:** The author of this vegetarian cookbook, of Italian ancestry, is popularly known as "Organic John." He likes to use fresh foods, and he has a call-in radio show in San Francisco. In chapter 4, Ingredients (p. 16-), he discusses soya butter [margarine], miso, tamari, instant protein powder (incl. Shaklee's Instant Protein), lecithin granules, Soyamel powder (powdered soymilk made by Worthington Foods), Balanced protein seasoning (powdered HVP made from soybeans).

Chapter 10 (p. 79-83) contains a long section on soya beans, with recipes: Homemade soya bean curd (tofu). Things you can do with tofu. Soya patties (with dry soya beans). Soya bean loaf. Green soya bean mix (with dry green soya beans). Soya beans in a beet stew. Soya bean spread.

In the section on Fruit Sherbets, many of the recipes contain 2 tablespoons Soyamel (powdered soymilk) and lecithin granules. Address: Berkeley, California.

5570. Calkins, Peter H.; Huang, Kuang-Rong. 1978. Soybean production in Taiwan: A farm survey. AVRDC Technical Bulletin No. 11 (78-89). 27 p. (Shanhua, Taiwan). [15 ref. Eng]

• **Summary:** Describes profitability and yield from soybean, the motivations and problems of farmers, and the reaction of farmers in the past to measures such as the extension of improved varieties. Since 1973 scientists at the Asian Vegetable Research and Development Center (AVRDC) have been working to improve soybean's contribution to consumer diets and farmer incomes in Asia. In Taiwan soybean is used as a source of cooking oil, "milk, beancurd, sprouts, fresh seed, dried seed, flour and a green vegetable (the stems and leaves are fried)." It is also used to make textured vegetable protein products such as artificial chicken and fish; when cooked with miso, soysauce, and various spices, these "are practically indistinguishable from the real versions. Entire banquets of rice and little else but soybean are routinely served in the vegetarian restaurants and Buddhist monasteries of Taiwan."

"In 1976, the government of Taiwan started guaranteeing a price of US\$277/tonne to encourage farmers to plant more soybeans. The response has been modest, largely because soybeans have not been as profitable as competing winter crops, such as adzuki beans." Table 1 (p. 2) shows that between 1967 and 1976, the area planted to soybeans in Taiwan decreased from 52,000 ha to 36,000 ha, the farm price increased from US\$188/tonne to \$256/tonne, production decreased from 75,000 tonnes to 53,000 tonnes, but imports increased dramatically from 347,000 to 780,000 tonnes (more than doubling). Thus the total supply/consumption of soybeans in Taiwan (domestic production + imports) increased from 422,000 tonnes to 833,000 tonnes, while domestic production as a percentage of total consumption decreased from 18% to 6%.

"Before 1945 most soybean cultivars in Taiwan were of local origin, with an average yield of only 500-600 kg/ha. However, the government introduced Japanese cultivars such as 'Shih-shih' and Palmetto' in 1952. Since the early 1960s, scientists in Taiwan have also worked to develop improved cultivars by crossing cultivars introduced from abroad (in this report, the former will be termed 'improved' and the latter 'introduced' cultivars). As a result, the percentage of farmers planting introduced and improved cultivars has increased steadily, from about 53% in 1963 to 92%

in 1976 and yield has risen to 1.5 tonnes/ha.” Address: 1. Assoc. Agricultural Economist; 2. Research Assistant. Both: AVRDC, Shanhua, Taiwan.

5571. Destenay, Anne L. ed. 1978. Nagel’s encyclopedia-guide: China. 3rd ed. Geneva: Nagel. 1503 p. Plus 29 unnumbered pages. See p. 380. [Eng]*

• **Summary:** “The seven sauces used in the stew are replaced by soy sauce, in which the meat is dipped before being cooked.”

Note: A product of a group of young French sinologists, it was first published in 1967. The English edition was edited by Anne L. Destenay.

5572. Duff, Gail. 1978. Gail Duff’s vegetarian cookbook. London: Macmillan. 374 p. Index. 23 cm.

• **Summary:** Pages 14-15 note that: “Products made from soya beans are very important in meatless diets...” She uses tamari, miso, whole dry soybeans, and soya flour, but has an intense dislike of TVP (textured vegetable protein). Soy-related recipes include: Soya mayonnaise (made with soya flour, p. 81-82). Barbecued soya bean and tomato spread (p. 246). Crunchy soya bean sandwich spread (p. 247). Miso, onion and parsley sauce (p. 319). Basic soya bechamel (p. 319).

The section titled “Soya beans” (p. 190-97) has a nice introduction followed by recipes for: Salted soya beans. Basic method for soya beans. Soya bean hot pot. Soya bean blanquette. Soya bean goulash. Soya bean and tomato casserole. Spiced lemon soya beans. Barbecued soya beans. Soya beans with cucumber–Chinese style.

5573. **Product Name:** Erewhon Natural Shoyu.

Manufacturer’s Name: Erewhon Products [Los Angeles, California]. (Imported). Made in Japan.

Manufacturer’s Address: Los Angeles, California. Phone: (213) 836-7569.

Date of Introduction: 1978. January.

New Product–Documentation: Ad (¼ page, black and white) dated 1978. Source unknown. An illustration (line drawing) shows a dispenser of Erewhon Natural Shoyu. The text underneath it reads: “Aged two years in wooden barrels using well water, sea salt, and whole soybeans. Rich in available protein, vitamins, natural sugars and minerals.”

5574. Frazier, W.C.; Westhoff, D.C. 1978. Food microbiology. 3d ed. New York, NY: McGraw-Hill Book Co. xvi + 540 p. Index. 24 cm. [400+* ref]

• **Summary:** Contents: 1. Food and microorganisms. 2. Principles of food preservation. 3. Contamination, preservation, and spoilage of different kinds of foods. 4. Foods and enzymes produced by microorganisms. 5. Foods in relation to disease. 6. Food sanitation, control, and inspection.

In the section on “Oriental fermented foods” (p. 387-91), the following soy-related foods are mentioned: Koji (*chou* in Chinese), soy sauce, tamari sauce, miso, tempeh, natto, soybean cheese or *tou-fu-ru*. Address: 1. Univ. of Wisconsin 2. Univ. of Maryland.

5575. Haedrich, Ken. 1978. Good food, good folks: A collection of vegetarian recipes from across America. Plainfield, New Jersey: American Impressions. 46 p. Illust. by Diane Haedrich. 21 cm.

• **Summary:** This booklet, printed with brown ink on beige paper, was published by the author. Some of the recipes are from other books, with proper acknowledgment. Contents: Dedication (to World Hunger Year, P.O. Box 1975, Garden City, New York 11530). Introduction (He owns a print shop. The book idea was conceived while listening to singer / songwriter Harry Chapin talking about world hunger on the radio). Recipes–Breads & butter. Soups. Main courses & salads. Desserts. Many of the recipes call for “milk or soymilk,” and for “tamari or soy sauce.”

Soy-related recipes: Tofu sandwich spread (p. 20). A tofu primer (incl. Tofu “mayonnaise” and praise for *The Book of Tofu*, by Shurtleff and Aoyagi). Soyburgers (p. 23). Sweet & sour soybeans (p. 26). The rear cover states that half the proceeds from sale of this book will be “donated to World Hunger Year—an educational, resource organization focusing on food and hunger issues of local and global impact.” Address: Plainfield, New Jersey.

5576. Holmes, Charlotte Van Gundy. 1978. Cooking for living. The art of healing. Sulfur Springs, Arkansas: Philadelphia Institute, Inc. 102 p. No index. 20 cm. [11* ref]

• **Summary:** The section titled “Soy beans” (p. 31-33) has the following contents: Introduction and list of different food products made from soy beans. Drying, freezing, canning, and tenderizing whole dry soybeans. How to make soybean milk: From beans, from soy flour, how to use the residue [okara] left from making soy milk. Soy cheese (also called

“vegetable cheese” or “tofu”): How to make soy cheese from soy milk, how to make soy cream, how to make soy mayonnaise.

Also discusses: Homemade soy butter [soynut butter] (p. 57-58). Entrees (p. 58-60): Soy bean loaf, Soy cheese patties, Soy loaf, Soy grits loaf, Peanut butter patties. Soy sauce and Sovex (p. 83).

Note 1. The author’s father, Theodore Van Gundy, was a soyfoods pioneer in southern California. The first printing of this book was in 1967, the second in 1970, and the third in 1973. Note 2. On the cover is written (as if it were the title): *Keys to Cooking for Living: Recipes and Menus*. Address: M.D., P.O. Box 308, Sulphur Springs, Arkansas 71768.

5577. Kawamura, Wataru. 1978. *Miso shōyu* [Miso and shoyu]. Tokyo: Tokyo Shobo-sha. 376 p. 22 cm. Series: *Nihon no Aji Meicho Senshū* (Selected Great Books on Japanese Taste). Reprinted in 1983 as *Miso shoyu no hyakka* [Encyclopedia of miso and shoyu]. [Jap]

• **Summary:** Contents: Topography of miso in Japan (*Miso fudoki*, p. 7). Miso in festivals, rituals, customs, and sacred rites (*Miso saijiki*, p. 92). History of miso (p. 120). Classical miso cookery (short recipes, p. 139). Collection of beautiful words about miso in proverbs, poems, and songs (p. 169). A short history of shoyu (p. 187). Documents: History of miso and shoyu (p. 195). Kojiruien–Inshoku-bu (Food & drink section, on shoyu, p. 354). Chronology of miso (p. 366–72). Address: 2-4-7 Kugenuma, Tachibana, Fujisawa-shi, Kanagawa-ken 251, Japan.

5578. Kawamura, Wataru. 1978. *Miso shōyu no hyakka* [Encyclopedia of miso and shoyu]. Tokyo: Tokyo Shobo-sha. 376 p. 22 cm. Series: *Nihon no Shokubunka Taikei* (Japanese Food Culture Collections), no. 10. [Jap]

• **Summary:** This is a reprint of the author’s 1978 book *Miso shōyu* [Miso and shoyu]. Address: 2-4-7 Kugenuma, Tachibana, Fujisawa-shi, Kanagawa-ken 251, Japan.

5579. Lai, H.M. 1978. Island of immortals: Chinese immigrants and the Angel Island Immigration Station. *California History* 57(1):88-103. See p. 96, 102. [59 ref]

• **Summary:** This issue (spring 1978) is a special issue titled “The Chinese in California.”

Fermented bean curd is mentioned in two footnotes on page 102; both refer back to page 96.

Footnote 40: Breakfast may include “dried bean sticks” [dried yuba sticks]. Dinner includes a main dish “plus one small dish. “The small dish could be salt fish, preserved olive, fermented bean curd, sweet pickles or plum sauce.”

Note 1. Footnote 40 refers to a menu listed in *Chinese World*, 28 Feb. 1910 for three meals served in one day at Angel Island. Complaints about food were common so the government agreed to have the food provided by private concessionaires—the first one being a firm run by a Chinese

man, Fong Wing (Kuang Zhujing) and his white partner. The dinner meal consisted of a main course plus one small dish—as described above.

Footnote 42. “... pork and mustard greens soup, fermented bean curd (Tues.); pork with greens, salt fish (Wed.); pork with dried bean sticks, plum sauce (Thurs.); pork and winter melon soup, bean curd with soy sauce (Fri.);...”

Note 2. Footnote 42 mentions another menu provided by the white concessionaire who won the next bid. A similar menu was offered which also included fermented bean curd, plus dried yuba sticks and tofu. Address: Vice president and past president of the Chinese Historical Society of America in San Francisco and an instructor in Asian American Studies at the University of California, Berkeley.

5580. Miller, Lindsay. 1978. *The apartment vegetarian cookbook*. Culver City, California: Peace Press. 312 p. Index. 22 cm. [30 ref]

• **Summary:** Soy-related recipes include: Soybean bulgar casserole (p. 148). Soybean stuffed eggplant (p. 157). Soybean creole (with brown rice and tomato paste, p. 175). Soybean patties (p. 182). Whole wheat soy bread (with soy flour). Cornmeal-soy grits bread (p. 211). Wheat germ-soy grits bread (p. 212). Quick wheat-soy bread (p. 219).

The glossary contains substantial entries for miso, peanut butter, soy beans, soy flour, soy grits, tamari soy sauce, tisanes or herb teas, and tofu. Address: Culver City, California.

5581. Muljokusumo, E. Sudigdo. 1978. *Kecap: Kedelai, bungkil kacang, ikan* [Soy sauce: Soybean, peanut flakes, fish]. Bandung, Indonesia: Penerbit Tarate. [Ind]*

• **Summary:** Describes how to make Indonesian-style soy sauce from soybeans, peanut press-cake, or fish.

5582. Muljokusumo, E. Sudigdo. 1978. Hasil proses fermentasi, kedelai dijadikan lebih bergizi [As a result of the fermentation process, the soybean is made more nutritious]. Bandung: Tarate. 79 p. [Ind]*

5583. Null, Gary; Null, Steve. 1978. *The new vegetarian: Building your health through natural eating*. New York, NY: William Morrow and Company, Inc. 350 p. Index. 22 cm. [63 ref]

• **Summary:** In the chapter titled “Incomplete Protein Foods,” soybeans are discussed on pages 183-86. A brief introduction is given to soy protein concentrates, isolates, spun protein fibers, and textured vegetable proteins. Full-fat soy flour, soy granules, soy flakes, and defatted soy flour and grits are available in natural-food stores.

“In striking contrast to these highly refined products of the West are the traditional East Asian products, tamari soy sauce, miso (fermented paste), and tofu... Tofu (soy curd or

soy cheese) is a truly remarkable food. It is very inexpensive when purchased at Oriental markets or natural food shops and even more so if made at home.” A description of how to make tofu and a summary of its nutritional benefits are given.

The soybean is “delicious when served a fresh green summer vegetable, simmered or steamed in the pod.” Or as roasted soybeans [soynuts, dry-roasted or oil-roasted], cooked whole dry soybeans, tempeh, or soy sprouts. The same chapter also discusses miso and tamari in detail (p. 197-99), wheat gluten (p. 178-79), and azuki beans (p. 180). Address: Director, Nutrition Inst. of America, New York. Host of the daily radio program “Natural Living.”

5584. Passmore, Jacki. 1978. *All Asian cookbook: Japan, China, Korea, India, Malaysia, Singapore, Indonesia, Laos, Thailand, Burma, Cambodia, Vietnam, Philippines, Sri Lanka*. Secaucus, New Jersey: Chartwell Books. 224 p. Illust. (color photos). Index. 29 cm.

• **Summary:** Soy-related recipes: Vietnam: Soya sauce pork (Thit bho to, p. 71, with light soya sauce). Malaysia and Singapore: Mixed vegetables with salted black beans [fermented black soybeans] (the black beans are crushed, p. 103). Stuffed beancurd, peppers and black mushrooms (with 6 pieces hard beancurd, each 5 cm {2 inches} square, p. 103). Fried beancurd squares (Taukwa goreng, with 6 squares hard beancurd and dark soya sauce, p. 103). Chinese soup with pickled vegetables, beancurd and mixed meat (with 2 squares soft beancurd, p. 106).

Indonesia: Sweet pork (Babi kecap, with sweet soya sauce {kecap manis}, p. 118). Soya sauce sambal (with dark soya sauce, p. 124). Mixed vegetable soup (Sayur campur, with 2 cakes soft beancurd, p. 126).

Philippines: Lumpia (with dark soy sauce in the sauce, p. 136).

China: Fish with hot bean sauce (with hot bean paste or hoisin sauce, p. 146). Lobster with salted black beans and chili (p. 11). Stewed spare ribs with salted black beans (p. 159). Mixed green vegetables with salted black beans (p. 163). Hotpot of vegetables and beancurd (with 8 squares soft beancurd, p. 164). Ma po beancurd (with 6 squares soft beancurd, p. 166). Cold beancurd salad (with 6 squares soft beancurd, p. 166). Fried beancurd (with 8 squares soft beancurd, p. 166). Sharks fin soup (with dark soya sauce, p. 167). Wonton soup (with light soya sauce, p. 168).

Japan: Soya bean paste (miso, homemade from canned chick peas + soya sauce!, p. 178). Tuna glazed with miso (Gyoden, with dark miso paste, p. 180). Sukiyaki (with 3 squares soft bean curd, p. 187). Braised pork and leek rolls (Teriyaki, with light soya sauce, p. 188). Fried eggplant in miso sauce (with white miso paste, 194). Miso soup (miso shiru, with diced bean curd and white miso paste, p. 195).

The Glossary includes: Bean paste, hot (made from chilies and soya beans, La do ban jiang, Chinese). Bean

paste, salted (also known as yellow bean paste, made from soya beans, Taucheo, Chinese). Bean paste, sweet (either tien mien jiang or do ban jiang, made from soya beans, Chinese. See also hoisin sauce). Beancurd. Beancurd ‘cheese,’ fermented (in brine with chilies, wine, and spices, Dofu ru, Chinese). Beancurd skin [yuba] (yellowish, almost transparent sheets). Beans, salted, black: See Salted black beans. Kecap manis (Sweet, slightly thick soya sauce, Indonesian, Malaysian). Miso (Japanese). Soya sauce (light, dark, and sweet). Tahu (Malaysian): See beancurd. Taucheo (Chinese): See Bean Paste, salted. Taukwa (Chinese, hard beancurd). Tien mien jiang (Chinese): See Bean paste, sweet. Tofu (Japanese): See beancurd. Vinegar and soya sauce dip: “A sharp-flavoured Korean accompaniment made by blending 3/4 cup light soya sauce, 3 tablespoons white wine vinegar, 3 tablespoons ground sesame seeds and 2 teaspoons finely chopped spring onions. Serve in individual sauce bowls.” Yellow bean paste: See Bean paste, salted.

Note: This is the earliest document seen (Feb. 2011) that contains Vietnamese recipes that use soy as an ingredient. Address: Australian-born food writer.

5585. Perkins, David W. ed. 1978. *Hong Kong and China Gas Chinese cookbook*. Hong Kong: Published for the Hong Kong & China Gas Co. by Pat Printer Associates Ltd. (Hong Kong). 319 p. Illust. (mainly color). Index to recipes. 31 cm.

• **Summary:** A treasure for anyone who admires Chinese cookery, this large, oversized, visually spectacular and beautifully designed book is also rich in culture and history. Comprehensive, with many insights, it contains numerous two-page color spreads. One of the best books seen to date (1978) on Chinese cookery, except for its poor index.

Hong Kong is located on the Pearl River Delta in China, bordering the province of Guangdong to the north and facing the South China Sea to the east, west and south. Its cuisine resembles that of Canton.

A full-page color map of China shows (with different colors) China’s four main regional cuisines: Northern (incl. Beijing), Eastern (incl. Shanghai and Nanking), Southern (incl. Canton, Kwantung and Kwangsi), and Western (incl. Hupei, Hunan, Szechwan, Kweichow, and Yunnan).

Peking is only 40 miles away from the nearest point of the Great Wall of China, which started to be built during the Ch’in / Qin Dynasty (225 BC to 207 BC) as protection against invasion by Tartar Hordes. Genghis Khan (1162-1227) is said to have been the first to penetrate it (p. 21).

The last period of Imperial rule in China was the long-lasting Ch’ing / Qing Dynasty (1644-1911) (p. 22).

Since ancient times, when the feet become swollen, the Chinese have eaten peanuts and soya beans (p. 38).

Buddhist vegetarian cookery has existed in China since the 10th century AD (p. 60).

The section titled “Soya beans” (p. 62-63) mentions bean curd or tou fu (“the most versatile of foods in the hands

of any cook with any degree of imagination”), soy sauce, soya bean ‘milk,’ dried bean curd, frozen bean curd, and *mao tou* [green vegetable soybeans] (which “make a delicious hors d’oeuvre when prepared Shanghainese-style”).

The “mysterious MSG (Monosodium glutamate) is a ubiquitous ‘instant flavouring’; but more dishes have been spoiled by the addition of too much MSG rather than by the addition of too little” (p. 76).

A large colored photo and accompanying numbered outlined diagram (p. 77-78) shows many different seasonings, incl. Hoisin sauce, hot bean paste, dark soy sauce, light soy sauce, and Worcestershire sauce. “Soy sauce rules the kitchen as undisputed emperor. Basically a fermented extract of the soya bean with salt added, it is available in three main types: heavy or ‘black’; dark, containing caramel as colouring and light (both in colour and flavour).” The finest, most expensive, and most concentrated is the first extraction. Specialty soy sauces flavoured with mushrooms or shrimp roe are also available.

“Black bean sauce is a near relative of soy sauce, being made from salted, fermented black soya beans. Again, mention must be made of the three main types of soya bean pastes: hot (with chillies), sweet (with flour, sugar and spices [t’ien mien chiang]) and yellow, which is very salty indeed... *Hai Hsien* [Hoisin] sauce combines garlic, chilli, beans and ginger with other elements.”

A color photo shows most recipes. Soy related recipes include: Shredded pork with dry beancurd saute (p. 112). Chopped soya bean sprouts with pork (p. 113). Stewed lamb with dried beancurd (p. 127). Stir fried chicken with [soya] bean paste (p. 135). Roast Peking duck (with 4 tablespoons “sweet bean paste,” p. 153). Braised duck with lo han vegetables (and 60 gm “fried beancurd cubes,” p. 156). ‘Lu Shui’ goose (p. 157; the Lu Shui sauce is made with 250 gm sugar, 250 gm salt, 2 five-spice bouquets, 250 ml light soy sauce, 10 slices ginger). Braised fish with beancurd and vegetables (p. 161). Eight treasure beancurd soup (with “4 squares soft beancurd,” p. 193). Vermicelli and fried beancurd soup (p. 199). Beancurd with shredded pork in soup (p. 201). Fried beancurd (p. 204-05). Spicy beancurd with ground pork (Ma P’o tou fu, p. 208). Braised beancurd with mushrooms (p. 212).

Note: This is the earliest English-language document seen (May 2012) that contains the term “braised beancurd;” it refers to grilled tofu.

Beancurd stuffed with shrimp paste (p. 215). Steamed fish and beancurd cake (p. 221). Vegetarian goose (Su ngo, with “20 dried beancurd skins [yuba], about 41 cm = 16 inches in diameter,” p. 227). A full-page photo shows a quern = hand turned stone mill (p. 243). Sweet bean paste dip (*tien tou chiang*, with “4 tablespoons sweet bean paste,” p. 278).

Note 1. This is the earliest document seen (May 2012) that uses the term “Su ngo” in connection with yuba.

Also: Sweet red bean paste (hung tou sha hsien, with

small red beans [azuki], p. 278).

Glossary (p. 302-11; all Chinese words are given only in Chinese characters, which we have romanized in pinyin) incl.: Beancurd (*doufu*). Beancurd, dry (*toufu gan*). Bean curd cubes, fried (*zha doufu*). Beancurd cubes, preserved (*la furu*, spicy fermented tofu); also known as preserved beancurd and Chinese cheese. Beancurd skins, dried (*fupi*) [*doufu pi*, yuba]. Beancurd sticks, dried (*fuzhu*; [dried yuba sticks]) used frequently in vegetarian cooking. Bean pastes (*gan shi jiang*). Sauces produced from soya beans and other ingredients: Hot bean paste (*xiang shi la jiang*), soya bean paste (*mo shi jiang*), “sweet bean paste (*tian shi jiang*; produced from fermented black soya beans, flour, sugar and spices. Substitute: Hoisin sauce.” Note 2. This is the earliest document seen (Feb. 2009) that uses the term “sweet bean paste” to refer to a Chinese paste made with soybeans. Yellow bean paste (*dou ban jiang*). Bean sprouts: Shoots of the mung bean or the soya bean (*da dou ya cai*), the latter being much larger and stronger flavoured. “Black beans (*dou shi*): Salted, fermented black soya beans, Lightly salty in flavour. Used as seasoning. Will keep indefinitely in dry conditions. Chinese cheese (see beancurd cubes, preserved). Dry beancurd (see beancurd, dry). Flour—“High gluten flour (*gao jin fen*): A special kind of ‘strong’ flour, which gives extreme elasticity, making it possible to roll out the dough to very fine layers. Used for wonton wrappers.” Fried beancurd cubes (see beancurd cubes, fried). “Hoisin sauce (*hai xian jiang*): A seasoning sauce or condiment made from red beans (*hong dou*) [azuki], soya beans, sugar and spices. Sweet-spicy and tangy in flavour. Sold in cans or jars... Also known as Seafood Sauce and Barbecue Sauce.” Hot bean paste (see bean paste). ‘Lu Shui’ sauce (*lu shui zhi*, in Cantonese ‘Lu Soy’). A ‘master sauce’ or more accurately, a stock made with soy sauce, sugar, five spices and ginger. Used for simmering foods, particularly poultry, It gives a rich flavour and deep brown colour. For recipe see p. 157. Note: Widely used in Shanghai, and in Jiangsu and Zhejiang provinces). “Mao tou green peas (*mao dou*): Small beans, grown in the north, with dark-green, slightly hairy pods, which should be removed. Substitute: lima beans.” Monosodium glutamate. Oyster sauce (*hou you*): A viscous dark-brown sauce made from oysters and soy sauce through a process of fermentation. Used as a flavouring and/or colouring agent ad as a condiment. Sold in bottles.” Preserved beancurd (see beancurd cubes, preserved). Red beans (*hong dou*), [azuki]. Soya bean paste (see bean paste). Sweet bean paste (see bean paste). Yellow bean paste (see bean paste).

Talk with Cecilia Chiang, founder of The Mandarin restaurant in San Francisco. 2009. Feb. 16. She has this book. The authors of this book are not well known in China; they are mostly amateurs. The best Chinese cookbooks are written by Fu Peimei, a lady who was a real authority on all the different styles of Chinese cooking; she is no longer living. Many of her cookbooks are in both English and

Chinese. Concerning “Bean paste,” some of these are no longer available in the USA. Cecilia says Sweet bean paste may be something like *t’ien mien chiang*. Hoisin sauce is not used in Beijing, Shanghai, or anywhere in northern China; it is used mainly in Canton and south China. Cecilia thinks “Sweet bean paste” (*t’ien shih chiang*, p. 303) may be used only in Hong Kong. Most Chinese have never heard of this kind of sweet bean paste. True Cantonese food is quite different from that of Hong Kong. Cecilia knows Cantonese cooking very well; she goes there several times every year. Cantonese make the best soups, the best steamed fish and steamed chicken, and also their famous pork sausage (*la chong?*). Beijing cookery uses hard tofu, but most soft and silky tofu is imported from Japan.

5586. Rhoads, Sharon Ann; Zunic, Patricia. 1978. *Cooking with sea vegetables: 150 natural-style recipes*. Autumn Press, 25 Dwight St., Brookline, MA 02146. 136 p. Illust. by the author. Recipe index. 18 x 26 cm. [99* ref]

• **Summary:** Contents. Preface. Acknowledgements. I. Sea vegetables: Past and present. The bounty of the sea. Plants of a thousand uses. Preparing sea vegetables. II. Cooking with sea vegetables: Kombu and the kelps. Arame. Wakame. Nori. Hijiki. Agar. Irish moss. Dulse. Appendixes: Sources of sea vegetables. Nutritional value of sea vegetables. Bibliography. Address: New York City.

5587. Shihani, S. 1978. *Microbiology of the soy sauce and tempeh fermentations*. MSc thesis, Dep. of Applied Microbiology, University of Strathclyde, Glasgow, Scotland. *

Address: Univ. of Strathclyde, Glasgow, Scotland.

5588. Shindumarta, Rudy Susiawan (Thung). 1978. *Hidrolisa parsil protein kedele [Partial hydrolysis of soy protein]*. MSc thesis, Universitas Padjadjaran Bandung, Indonesia. 100 p. [24 ref. Ind; eng]

• **Summary:** This work is aimed at developing a semi-chemical soy sauce, midway in price and quality between fermented soy sauce and chemical soy sauce. Partial hydrolysis of defatted soy flour and okara with HCl 6N (hydrochloric acid) was studied at 3 different temperatures (30, 60 and 90°C). Address: Bandung, Indonesia.

5589. Smith, Allan K.; Circle, S.J. eds. 1978. *Soybeans: Chemistry and technology*. Vol. 1. Proteins. Revised. Westport, Connecticut: AVI Publishing Co. xiii + 470 p. Illust. Index. 24 cm. [500+ ref]

• **Summary:** This revised edition contains relatively few, unimportant changes from the original, classic 1972 edition. The following changes have been made: Addition of a 7-line preface to the “revised second printing” dated 4 Oct. 1977, updating of a graph of U.S. soybean production (p. 1). Updating (to 1976) of a table on U.S. and world production

of important oilseeds (soybeans, cottonseeds, peanuts, sunflower, rape, sesame) (p. 2). Minor textual changes on pages 18-19. Addition of a table showing distribution of the 3 leading soybean varieties in 14 major states and the percentage of acreage harvested for each variety in 1976 (e.g., in Illinois, Williams accounted for 25.1% of harvested acreage, Amsoy 17.3%, and Wayne 12.8%). And updating of a table on U.S. soybean production by state showing acreage harvested, yield per acre, and production for 1974, 1975, and 1976 (p. 32).

The foreword, chapter titles, and index have not been changed at all. Note: Vol. 2 was never published. Address: 1. Oilseeds protein consultant, Hot Springs, Arkansas; 2. Oilseed protein consultant, Protein Technology, Richardson, Texas.

DaSilva, eds. 1978. *GIAM V; Global Impacts of Applied Microbiology: State of the Art: GIAM and its Relevance to Developing Countries*. Kuala Lumpur: UNEP/UNESCO/ICRO Panel of Microbiology Secretariat. Universiti Malaya Press. 323 p. See p. 173-79. Conference held 21-26 Nov. 1977 in Bangkok, Thailand. [23 ref]

• **Summary:** Contents: Meat analogs: Ontjom, soy sauce, seafood sauces, tempe, tape (tapeh). Microbial protein.

Mass doubling times: Bacteria and yeasts 10-120 minutes, molds and algae 2-6 weeks, grass and some plants 1-2 weeks, chickens (broilers) 2-4 weeks, young pigs 4-6 weeks, young cattle 4-8 weeks, humans 2-6 months.

Yields of protein in kg/ha/year: Elephant grass 2,000 to 8,775 (world's record), alfalfa 3,000, soybeans (four successive crops) 3,200, Miracle Rice (IR-8) 1,600, groundnut 500, mungo bean (2 crops) 500, coconut 190, cow's milk 90, yeast (continuous fermenter charged with 500 kg yeast cells built on 1 hectare of land) 250,000 (dry basis, of *Candida lipolytica*).

Note: UNEP is the United Nations Environment Program. MIRCENs are Microbiological Resources Centres. GIAM 1 was held in 1963 in Stockholm, Sweden; Proceedings edited by M.P. Starr were published in 1964. GIAM 2 was held in 1966 in Addis Ababa, Ethiopia; Proceedings edited by E.L. Garden, Jr. were published in 1969. GIAM 3 was held in 1969 in Bombay, India; Proceedings edited by Y.M. Freitas and F. Fernandes published in 1971. GIAM 4 was held in 1973 in Sao Paulo, Brazil; Proceedings edited by J.S. Furtado were published after 1978. Address: Cornell Univ., Geneva, New York, USA.

5591. Yanwar, Afrida Nazir; Saparsih, Sri Budhi. comps. 1978. *Selected abstracts of traditional fermented food*. Jakarta, Indonesia: National Scientific Documentation

Center, Indonesian Institute of Sciences (PDIN–LIPI). iv + 470 p. Author index. 29 cm. [506 soy ref]

• **Summary:** These are abstracts of documents published from 1910 to 1976 on traditional fermented food, particularly of food prepared and consumed in Southeast Asia and the Far East. Each chapter is divided into 6 sections: Method of preparation, microorganisms, fermentation studies, nutritive values, other influence in the foodstuff, storage. Within each section, the references are listed alphabetically by author. The source of most of the references is *Chemical Abstracts*, to which an exact citation is usually given.

Contents: Preface. Introduction. 1. Fermented rice (incl. tape ketan [tapeh], sake, awamori). 2. Fermented soy beans: Soysauce (p. 173-294; 350 references), tempe (p. 294-307; 43 refs), natto (p. 307-312; 13 refs), miso (p. 312-343; 100 refs). 3. Fermented coconut press cake (bongkreng; p. 345-47). 4. Sauerkraut. 5. Fermented fish. 6. Vinegar. 7. Fermented cassava (tape / tapeh). Author index (p. 459-70).

Financial assistance was received from the National Institute of Chemistry, the Indonesian Institute of Sciences, the Indonesian Protein Project in the framework of ASEAN–Australian Economic Co-operation. Address: Indonesia.

5592. Zurbel, Runa; Zurbel, Victor. 1978. The vegetarian family: With recipes for a healthier life. Englewood Cliffs, New Jersey: Prentice-Hall, Inc. 185 p. Edited by Lester Alexander. Illust. Index. 23 cm. [44 ref]

• **Summary:** The section on soybeans (p. 62-67) discusses soybeans and soyfoods, then gives recipes for: Basic soybeans. Mediterranean soybean casserole Soybean casserole. Soybean salad. Soy milk. Sesame soy milk. Roasted soybeans (baked). Other soy-related recipes include: Soyburgers (p. 80). Ginger tamari sauce (p. 118). Miso yogurt dip (p. 127).

The section titled “Basic Macrobiotic Cooking” discusses shoyu tamari, and miso, and gives recipes for: Miso soup. Miso spread. Nerimiso (Sweet simmered miso).

Chapter 7 (p. 88-101) is titled “Tofu: The food of the future—Discovered over two thousand years ago.” A full-page photo opposite the title page shows a wooden forming box, with cakes of tofu and soybeans nearby. *The Book of Tofu*, by Shurtleff and Aoyagi, is praised and credited as the source of much of the information on tofu in this book. Recipes include: Quick tofu. Homemade traditional tofu. Tofu sandwich. Tofu salad. Tofu and peas. Tofu and snow peas. Tofu and Chinese vegetables. Tofu and [mung] bean sprouts. Tofu and sesame. Kinugoshi and how to make custard style kinugoshi. The chapter ends with 2 pages on tempeh, but no recipes.

5593. Birnbaum, Alfred. 1978? Re: Yuki-wari natto. Letter to William Shurtleff at New-Age Foods Study Center, Lafayette, California, July 12. 1 p. Undated. Handwritten in pencil.

• **Summary:** “A nattô resembling miso, featuring the nebari [stickiness] of nattô and the sweetness of koji. A two-fermentation product.

“Process: Regular nattô is minced finely with koji, shoyu and (kombu) dashi and fermented at 30° to 33°C for 30-40 days.”

Note: This top portion of page 2 of some letter from Alfred has been separated from the body of the letter; hence the lack of date and address.

5594. Nihon Shoyu Kensa Kyokai [Japan Shoyu Inspection Assoc.]. 1978? Kensa jisshi yôryô, an [Points to watch in conducting practical inspections, proposals]. Tokyo. 8 p. Undated. [Jap]
Address: Tokyo.

5595. Claiborne, Craig; Franey, Pierre. 1979. Winging it: Food. *New York Times*. Jan. 21. p. SM16.

• **Summary:** Recipes are given for chicken wings. One of these is Chinese Indonesian chicken wings, which calls for “¼ cup ketjap manis (see note).”

The note says: “Ketjap manis [sweet Indonesian soy sauce] is widely available in specialty shops that deal in Far Eastern foods.”

5596. **Product Name:** Soysage (Meatless Okara-based Sausage).

Manufacturer’s Name: Crystal Hills Tofu Shop.

Manufacturer’s Address: Bethlehem, New Hampshire.

Date of Introduction: 1979. January.

Ingredients: Okara, whole wheat flour, wheat germ, nutritional yeast, oil, soy sauce, honey, herbs, spices.

New Product–Documentation: Whole Foods. 1979. Jan. p. 40-41. “Soysage from Crystal Hills.” The company started tofu production in September 1977. Not clear when Soysage production started, but they now make 1,500 lb of tofu and several hundred pounds of soysage each week; Shurtleff & Aoyagi. 1979. *Tofu & Soymilk Production*. p. 169.

Note: This is the earliest document seen (Oct. 2001) that gives soy fiber statistics for an individual company.

5597. Fillip, Janice. 1979. The fermentation transformation. *Whole Foods (Berkeley, California)* 2(1):31-33. Jan. [2 ref]

• **Summary:** Contents: Introduction. Shoyu, tamari and soysauce. Tempeh. Address: California.

5598. *GOMF News (Oroville, California)*. 1979. Tamari quality. Jan. p. 4.

Address: 1544 Oak St., Oroville, California.

5599. Industrial Services Centre. 1979. Soyabean processing industry in Nepal. Kathmandu, Nepal: Industrial Services Centre. ii + 39 p. + 15 p. Appendix. Jan. Prepared for NIDC. 39 cm. [1+ ref]

• **Summary:** Contents: Introduction. Background. Market. Uses and introduction of soybean products (soybean oil, flour and grits, milk, sauce, curd, lecithin, neutral spray dried soybean protein, soybean protein and flour in ice cream), possible uses of soybean products in Nepal, basic idea of consumption of soybean in Nepal, possibilities of export of soybean oil in India, general conclusion. Raw material. Technical. Financial. Conclusion.

“The purpose of this study is to examine the feasibility of setting up a soybean processing industry in Nepal and the report is prepared by the Centre at the request of the Nepal Industrial Development Corporation (NIDC), Kathmandu.”

“Out of the various crops under cultivation in Nepal, soybean is one of them but a very little attention is given to the cultivation of this product. It is usually cultivated during the Monsoon time and harvested during November-December. The Department of Agriculture is carrying out varietal trials in the different stations with a view to introduce high yielding varieties and promote the cultivation of it in the different parts of the country. Although at present, it is cultivated mainly in the hilly regions at different altitudes ranging from 6000 to 4000 feet, the observations made at the plain region reveal that there is a possibility of extending its cultivation in the terai region too.”

“Soybean oil: In India, soybean oil is being widely used in the manufacture of vegetable ghee and constitutes the major part of consumption in the Vanaspati industry. The little production of soybean oil in Nepal is being used as a cooking oil.”

“Possible uses of soybean products in Nepal. A few of the soybean products that are in use in Nepal are soybean oil for cooking, soy curd and soy sauce in the restaurants and full-fat soy flour product by simple grinding in the different houses. If soybean oil could be made available, it may find its wide use in the future in the Vegetable Ghee Factory the installation and erection of which is nearly complete at Hetuuda, Soap factory, and in Paint Varnish industry to act as a film forming material. The soy sauce requirement of to-day in Nepal is met by the imports... Soy milk would be another product which might come into wide use in the future.”

Address: Balaju, Kathmandu, Nepal.

5600. Product Name: Kikkoman Japanese Style Steak Sauce, Sweet & Sour Sauce.

Manufacturer's Name: Kikkoman Foods.

Manufacturer's Address: California.

Date of Introduction: 1979. January.

Ingredients: Incl. soy sauce.

Wt/Vol., Packaging, Price: Steak: 12 oz. bottle retails for \$0.79. Sweet & Sour: 9½ oz bottle retails for \$0.69.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: *Food Product Development*. 1979. “Oriental sauces thrive on ethnic food boom.” July. p. 58. A photo shows the two products. It is not

clear whether the soy sauce used in the two products is made by Kikkoman in Japan or in Walworth, Wisconsin.

5601. Manabe, Masaru; Matsuura, Shinji. 1979. [Studies on the fluorescent compounds in fermented foods. V. The behavior of fungi during miso and shoyu fermentation and aflatoxin inspection]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku (Report of the National Food Research Institute)* No. 34. p. 79-83. Jan. [9 ref. Jap; eng]

Address: National Food Research Inst., MAFF, Tokyo, Japan.

5602. Product Name: Savory Baked Tofu (Vacuum Packed).

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1979. January.

Ingredients: Water, organically grown soybeans, soy sauce (water, soybeans, wheat, salt) spices, nigari (magnesium chloride).

Wt/Vol., Packaging, Price: Vacuum packed.

How Stored: Refrigerated.

Nutrition: Per 3.5 oz.: Calories 193, protein 23 gm, carbohydrate 5 gm, fat 9.

New Product–Documentation: Label. 1981. 3.5 by 2 inches. Self adhesive. Brown and silver on light green. 7.5 oz. Label. 1979. 2 by 2 inches. Self adhesive. Mustard yellow on white. Back label. 3.75 by 2 inches. Self adhesive. Brown on white. “Savory Baked Tofu has a flavor and consistency remarkably like that of smoked or seasoned ham. Enjoyed for centuries in Northern China, it is prepared by marinating pressed tofu in natural soy sauce and seasonings, then baking it to give a meaty texture and wonderful flavor. The finished savory tofu is 23% protein, more than chicken or steak, and almost three times as much as regular tofu. One 4 oz serving provides you with 27 gm of quality protein, nearly half your daily need with only 219 calories.

“Savory baked tofu is ready to eat. Sliced or diced, it can be used in sandwiches, for hors d’oeuvres or in salads like ham, bacon, or cheese. It is also delicious in soup or with noodles. For outdoors, enjoy it from the package as a quick, high-protein snack. Our unique vacuum packaging allows savory baked tofu to remain fresh in the package over one week without refrigeration.

“For more recipe ideas see *The Book of Tofu* by Shurtleff & Aoyagi (Autumn Press or Ballantine Books).” Ad in Whole Foods. 1979. Jan. p. 40. Poster. Color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Vacuum packed tofu! Savory baked–Deep-fried cutlets.

5603. Sakaguchi, Kinichiro. 1979. Shôyu no ruutsu o saguru [Searching for the roots of shoyu]. *Sekai (The World)* No. 398. p. 252-66. Jan. [Jap; eng+]

• **Summary:** A fascinating enquiry into the early history of fermented soyfoods by one of Japan's most eminent microbiology professors. For details, see *The Book of Miso*, and *History of Soybeans and Soyfoods*, both by Shurtleff and Aoyagi.

Yokotsuka (1986, p. 325) cites this as Sakaguchi. 1981. "Searching for the route of shoyu." *SEKAI* 398:252-266. This magazine is published by Iwanami Shoten in Tokyo.

"The *Chou-li* states that this jiang was made by mixing the meat of animals, birds, and fish with millet koji and salt, then pickling it in wine in a crock for a hundred days. It is quite remarkable that even at this early date the Chinese were consciously using the enzymes produced by the koji molds (whose airborne spores fell on the substrate naturally, rather than by deliberate inoculation), to make fermented foods such as jiang and fermented grain-based alcoholic beverages. It is also clear from the context that jiang was regarded as a highly prestigious food and a delicacy."

"Today's shoyu traces its ancestry back through early shoyu, then through the four fermented soyfoods tamari-shoyu, tamari miso, Hatcho miso, and savory fermented black soybeans (*Hamanatto*), and ultimately back to Chinese fermented black soybeans (*chi*). Miso, he asserts, traces its ancestry back through early Japanese misos and hishio to jiang. In the shoyu lineage, the koji is always made with either soybeans alone or a mixture of soybeans and cracked or ground wheat, whereas in the miso lineage the koji is usually (except for soybean misos) made from grain. Sakaguchi believes that the fundamental biochemical consequences of this difference in koji substrates are of much greater importance than the more superficial differences of consistency or form that have led researchers up until now to group solid or semisolid fermented soyfoods in the miso lineage and liquid products in the shoyu lineage. Thus it is not obvious that liquid shoyu stems from mushy jiang. In shoyu, the *Aspergillus oryzae* molds grow directly on the soybeans (and wheat) during the koji fermentation and their enzymes begin to digest the koji substrates, then continue to digest the soybeans (and wheat) during the subsequent brine fermentation. This *in vivo* and *in vitro* extended hydrolysis leads to the formation of complex metabolic compounds, a higher degree of protein hydrolysis and liquefaction, and the production of a richer and stronger flavor in shoyu than in miso. Sakaguchi argues that miso has a 3,000 year history dating from the development of jiang during the Chou dynasty in China, whereas shoyu has a 2,000-year history dating from the development of fermented black soybeans (*shih*) during the Han dynasty.

"It is important to note here that the ancient Chinese language seems to indicate that soy sauce derives from jiang and not from *shih*, as evidenced by the Chinese word for soy sauce, *jiangyou*, meaning 'the liquid extracted from jiang.' Moreover, most Chinese jiang and fermented black soybeans have both always been made with a soy-based koji.

Sakaguchi's analysis is helpful, but lacking on a few points. The jiang has not, as Sakaguchi argues, been made with a grain-based koji. Even in the earliest description of Chinese soybean jiang in the *Ch'i-min yao-shu* (described in detail in the Miso chapter) the koji is made primarily from soybeans. Thus while retaining the essence of Sakaguchi's argument, we would suggest that it be modified slightly to say that *both* shoyu and miso trace their ancestry back to *both* fermented black soybeans (*shih*, which existed prior to 206 BC) and to soybean jiang (which existed prior to AD 500).

"Dr. Sakaguchi considers there to be three main reasons that shoyu and miso were not developed in the West: (1) very few Westerners ever learned how to make koji using molds; (2) they had virtually no soybeans until the 20th century; and (3) the basic flavoring components of shoyu and miso, especially natural L-glutamic acid and inosinic acid, were traditionally unknown in the West."

"In 1944 Kinichiro Sakaguchi and Koichi Yamada discovered a new species of *Aspergillus* mold, which appeared widely in shoyu koji; they named it *Aspergillus sojae*."

Photos show: (1) Three ancient earthenware jars, from about the 1770s (Thunberg's time), in which shoyu was pasteurized and shipped to Europe. Address: Professor of fermentation science, Tokyo Univ.

5604. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tofu: Food for mankind. Condensed and revised. New York, NY: Ballantine Books. A division of Random House, Inc. xii + 433 p. Jan. Illust. by Akiko Aoyagi Shurtleff. Index. 18 cm. [60 ref]

• **Summary:** This book has been extensively revised and updated. Many names of Japanese tofu have been Americanized. Contents: Preface. Acknowledgements. 1. Protein East and West. 2. Tofu as a food. 3. Getting started: Favorite tofu recipes. 4. Soybeans. 5. Fresh soy puree. 6. Okara (Soy pulp). 7. Curds and whey. 8. Tofu & firm tofu. 9. Deep-fried tofu: Deep-fried tofu cutlets, deep-fried tofu burgers & treasure balls (tofu treasure balls, p. 269), and deep-fried tofu pouches. 10. Soymilk. 11. Silken tofu. 12. Grilled tofu. 13. Frozen & dried-frozen tofu. 14. Fermented tofu. 15. Yuba. Appendices: A. Tofu restaurants in Japan. B. Tofu shops and soy dairies in the West. C. Varieties of tofu in East Asia. D. Table of equivalents. Bibliography. Glossary. Contains 250 recipes and 100 illustrations. Price: \$2.95.

This new edition features: (1) New recipes: Over fifty new American-style tofu recipes including Creamy Tofu Dressings, Tofu Teriyaki, Tofu Burgers, Tofu Eggless Egg Salad, and the like. The key to the book is an updated list of favorite tofu recipes plus suggestions for incorporating them into a weekly menu (p. 56). (2) New sections: An extensive new introduction to Soy Protein Foods (p. 66), dairylike products made from tofu (p. 150), dairylike products made from soymilk (p. 302) including soymilk yogurt (fermented),

ice cream, kefir, mayonnaise, whipped cream, popsicles, buttermilk, and soy shakes. (3) New chapters: Fermented Tofu and Varieties of Tofu in East Asia. (4) New basic methodologies: The key recipes for homemade tofu and homemade soymilk have been simplified and improved. (5) Updates: A complete listing of the 120 tofu shops and soy dairies now operating in the West; over 60 Caucasian-run shops have opened in the past two years. (6) New Americanized tofu names: Including deep-fried tofu burgers, deep-fried tofu cutlets, deep-fried tofu pouches, deep-fried tofu puffs, silken tofu, wine fermented tofu, and fresh soy puree. A major goal of this book is to coin English names for tofu products that will catch on and come to be used in labeling commercial products, in cookbooks, etc. (7) No sugar.

Note 1. This is the earliest English-language document seen (May 2012) that contains the following terms related to deep-fried tofu: “fried tofu cutlets” or “deep-fried tofu cutlets” (p. v, to refer to *nama-agé*), “fried tofu burgers” or “deep-fried tofu burgers (to refer to *ganmodoki*), “tofu treasure balls” or “deep-fried tofu treasure balls” (p. v, 269, to refer to *Hiryozu*), “fried tofu pouches” or “deep-fried tofu pouches” (p. v, to refer to *aburagé*).

Page 110: “In Japan, tofu is also called *momen-goshi* (‘cotton-filtered’) to distinguish it from its popular counterpart *kinu-goshi* (‘silken tofu’).” Note 4. This is the earliest English-language document seen (March 2004) that uses the term “silken tofu.”

Note 5. This is the 2nd earliest English-language document seen (Oct. 2011) that contains the term “Wine-fermented tofu” (p. 361).

In Jan. 1988 a new printing (but not a new edition) of this book (the 13th), slightly revised, appeared. It had a new cover and many new small illustrations. The subtitle was “Protein Source of the Future-Now!” The heading: “The World’s Bestselling Book on Tofu.” Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

5605. Shurtleff, William. 1979. Protein source for the future. *Cosmos (NSW, Australia)* 6(6):1, 4-5. Jan.

• **Summary:** Gives ten reasons why soybeans will be the protein source of the future: 1. Optimum land utilization. 2. Lowest cost protein. 3. High nutritional value. 4. Time tested. 5. Remarkably versatile. 6. Appropriate technology. 7. New dairylike products. 8. Hardy and adaptive. 9. Free nitrogen fertilizer. 10. Energy and resource efficient. “All of these ten factors work together synergistically, reinforcing one another, to give added weight to the prediction that soybeans will be a key protein source for the future on plant earth.”

Note: This information was published in July 1979 in *The Book of Tempeh* (p. 21-24). Address: Lafayette, California.

5606. Shurtleff, William; Aoyagi, Akiko. 1979. Soybeans (Document part). In: William Shurtleff and A. Aoyagi. 1979. *The Book of Tofu*. New York: Ballantine Books. 433 p. See p. 58-75. Chap. 4.

• **Summary:** Contents: Introduction. Soy protein foods—Traditional non-fermented soyfoods: Whole dry soybeans, soynuts, roasted soybeans, fresh green soybeans, soy sprouts, natural soy flour and soy grits, roasted soy flour (kinako).

Traditional fermented soyfoods: Tempeh, miso, shoyu (Japanese natural soy sauce), natto (fermented whole soybeans, including Japan’s cracked natto {*hikiwari natto*} and finger lickin’ natto {*yukiwari natto*, containing rice koji and salt}, and thua-nao from northern Thailand), soy nuggets (inc. Japan’s Hamanatto and Daitokuji natto).

Modern western soyfoods (developed using high-level technology): Soy flakes, defatted soy flour and grits, soy protein concentrates, soy protein isolates, spun soy proteins, textured soy proteins (TVP is an ADM brand name), textured soy concentrates, soy oil products. Address: P.O. Box 234, Lafayette, California 94549.

5607. **Product Name:** Soken Tamari Soy Sauce [Regular, or Gentle].

Manufacturer’s Name: Soken Trading, Inc. (Importer). Made in Japan.

Manufacturer’s Address: P.O. Box 1705, Sausalito, CA 94965.

Date of Introduction: 1979. January.

Ingredients: Soybeans, whole wheat, sea salt, water.

Wt/Vol., Packaging, Price: Glass bottles.

How Stored: Shelf stable.

New Product–Documentation: Ad in Whole Foods. 1979. Jan. p. 24. “Soken tamari soy sauces.” Gentle tamari is 11% lower in sea salt. Ad in Whole Foods. 1980. March. “Soken tamari natural soy sauce.”

Spot in NASFT Showcase (New York, NY). Dec. New packaging for both sizes (150 ml and 500 ml) of Gentle Tamari Soy Sauce. Ad in Natural Foods Merchandiser. 1988. Sept. p. 82. They now have three types of soy sauce: Natural, wheat free, and gentle. “Tamari” is written at the bottom of all three. Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. “Soken Gentle Tamari. Low Sodium Wheat Free Soy Sauce.” 5 oz (148 ml; Retail for 2.45) or 10 oz bottles. Red, blue, black, white, brown, yellow, green, and white. Woodblock print of a Japanese girl with folded arms in a kimono in front of traditional houses. “It’s naturally good. Since 1789. Ingredients: Whole soybeans, well water, sea salt. Contains 81 mg of sodium per ½ teaspoon serving (2.5 gm). Distributed by Sokensha Co. Ltd., P.O. Box 883033, San Francisco, CA 94188. Product of Japan. Refrigerate after opening. Soken Gentle Tamari is produced by the same time honored methods developed in Japan over centuries. It is brewed by the Kimbue Co., makers of fine soy sauce for over 200 years.”

5608. Soken Trading, Inc. 1979. Soken tamari soy sauces (Ad). *Whole Foods (Berkeley, California)* 2(1):24. Jan.

• **Summary:** This half-page black-and-white ad shows three bottles of tamari soy sauce, including Regular Tamari, Gentle Tamari (which is 11% lower in salt), and tamari from a dispenser. The Soken-sha logo appears. Address: P.O. Box 1705, Sausalito, California 94965. Phone: (415) 332-2313.

5609. Wang, H.L.; Mustakas, G.C.; Wolf, W.J.; Wang, L.C.; Hesseltine, C.W.; Bagley, E.B. 1979. Soybeans as human food: Unprocessed and simply processed. *USDA Utilization Research Report* No. 5. iv + 54 p. Jan. Slightly revised, July 1979. Jan. No index. 28 cm. Compiled for USAID. [50+ ref]

• **Summary:** Contents: Introduction. 1. Soybean food uses in Asia. China: Soaking dry soybeans, tou chiang (soybean milk), tou fu (soybean curd), processed tou fu products, tou fu pi (protein-lipid films), huang tou ya (soybean sprouts), whole soybeans, fermented soybean foods, production and consumption. Japan: Tofu (soybean curd), kinugoshi tofu, processed tofu products, yuba (protein-lipid film), soybean milk, gô (ground soybean mash), daizu no moyashi (soybean sprouts), whole soybeans, fermented soybean food, production and consumption. Korea: Tubu (soybean curd), processed tubu product, soybean sprouts, whole soybeans, soybean flour, fermented soybean food, production and consumption. Indonesia: Tahu or tahoo (soybean curd), bubuk kedele (soybean powder), tempe kedele, tempe gembus [the name in Central and East Java for okara tempeh], oncom tahu [the name in West Java for okara onchom], other soybean products (soybean sprouts, green soybeans, roasted and boiled soybeans, kecap {soy sauce}, tauco {soybean paste}), food mixtures, production and consumption. Thailand: Tofu (*tauhu*), soy sauce, green soybeans in the pods (*tourae*). Philippines: Soybean sprouts, soybean coffee, soybean cake, soybean milk, tou fu and processed tou fu products, production and consumption. Burma. India. Malaysia. Nepal. Singapore. Sri Lanka (Ceylon). Vietnam. Middle East. References—Soybean food uses in Asia.

2. Soybean food uses in Africa. Ethiopia: Injera, wots and allichas, kitta, dabbo, dabokolo, porridge. Kenya. Morocco. Nigeria: Whole soybeans, soybean paste, corn-soy mixtures (soy-ogi). Tanzania. Uganda. Production. References—Soybean food uses in Africa.

3. Soybean food uses in Europe and U.S.S.R.

4. Soybean food uses in Latin America. Argentina. Bolivia. Brazil. Chile. Colombia. Ecuador. Guyana. Paraguay. Peru. Uruguay. Venezuela. Mexico: New village process, commercial developments. Honduras. Costa Rica. Panama. Dominican Republic. Jamaica. Haiti. Trinidad. References—Soybean food uses in Latin America.

5. Soybean food uses in North America. United States. Canada. References—Soybean food uses in North America.

6. Soybean food uses in Australia. 7. Summary of soybean food uses. Traditional soybean foods: Soybean milk, soybean curd and processed soybean curd products, protein-lipid film, soybean sprouts, tempe (tempeh), green soybeans, boiled soybeans, roasted soybeans, soybean flour, soy sauce, fermented soybean paste, fermented whole soybeans, natto, fermented soybean curd. Experimental soybean foods: Whole soybean foods, soybean paste, soy flour, soy beverage. Production and consumption.

8. Simple village process for processing whole soybeans: Equipment, process, sanitation requirements, quality of product, evaluation of product in formulas and procedures for family and institutional use in developing countries. NRRC village process. 9. Industrial production and selling prices of edible soybean protein products.

10. Barriers to accepting and using soybeans in food: Availability. Cultural and social factors. Texture. Flavor. Nutrition and food safety. Technology development. Technology transfer. Address: NRRC, Peoria, Illinois.

5610. Westbrae Natural Foods. 1979. We believe if you've seen one health food nut you *haven't* seen them all (Ad). *Whole Foods (Berkeley, California)* 2(1):8. Jan.

• **Summary:** In this full-page color ad, a large photo with diagram shows ten different types of Westbrae's nuts, seeds, dried fruits and trail mixes, including Tamari cashews, Deluxe tamari nut mix, Tamari almonds, Tamari sunflower seeds, Tamari nutroaster's mix, Chisholm trail mix, and Jubilee trail mix. "For more information write Westbrae, P.O. Box 8611, Emeryville, California 94662. All Tamari roasted nuts and trail mixes are available in bulk and a select few in two or ten ounce Panda packages." Address: P.O. Box 8611, Emeryville, CA 94662.

5611. Sheridan, Margaret. 1979. Mighty bean zaps food bills, packs in protein. *Detroit News*. Feb. 28. p. E-1, E-9.

• **Summary:** A weak history of the soybean followed by recipes from the book *Barbara Farr's Super Soy* (Keats Publishing). The article begins: "Fed up with the soaring cost of meat? Dine like the cows. Eat soybeans. These homely beige beans have been nourishing livestock, peasants and dynasties for 5,000 years."

A great half-page illustration (cartoon), by John R. Clarey, shows Super Versatile Soy, a character like Superman with a bean-like body, a cape, and two thunderbolts in one hand. Address: News staff writer.

5612. Westbrae Natural Foods. 1979. Price list [Catalog]: February 1979. Emeryville, California: Westbrae. 35 p. 22 by 28 cm.

• **Summary:** On the cover are yellow and light green Japanese plum blossom crests against a green background. New products (written in all capital letters): Kelp (powder and granules). Traditional (true) tamari—wheat free. Mu

tea. Address: P.O. Box 8711, Emeryville, California 94662. Phone: (415) 658-7518 (orders).

5613. Davis, Melissa. 1979. The soy of cooking: Out of the field, into the kitchen. *Washington Post*. March 15. p. E1, E14, E20.

• **Summary:** Starts by discussing Henry Ford's interest in and work with soybeans. He wanted to find a way to "grow automobiles out of the soil. In 1940 he discovered that soybeans were his bumper crop."

Last week a milestone in soybean history was made on Capitol Hill [Washington, DC]. "About 500 people including senators, representatives, ambassadors, diplomats and freeloaders turned up at the International Soybean Fair.

While Chai Zemin (of the People's Republic of China) and Bob Bergland (U.S. Secretary of Agriculture) stood shaking hands, people pushed and shoved to get to the bar and to hors d'oeuvres made from every soybean product imaginable—soy flour, bean curd, textured vegetable protein (TVP), soy milk, soy sauce, etc. Also mentions tempeh and miso.

The event was largely sponsored by the Food Protein Council and its member companies. "There were a few interesting hors d'oeuvres including soy nuts and garlic smothered bean curd." Contains recipes.

5614. Fukushima, D. 1979. Fermented vegetable (soybean) protein and related foods of Japan and China. *J. of the American Oil Chemists' Society* 56(3):357-62. March. [10 ref]

• **Summary:** Contents: Abstract. Introduction. Soy Sauce: Fermented soy sauce: Japanese and Chinese styles of soy sauce and their characteristics. Manufacturing process. Comparison of fermented soy sauce with chemical soy sauce. Fermented soy paste. Chinese soybean cheese (sufu). Fermented whole soybean (natto). New fermented soybean products.

Tables show: (1) Types of fermented soy sauce (shoyu) in Japan. The five types are koikuchi shoyu [regular shoyu] (85.4% of total; 1.050 million kiloliters a year), usukuchi shoyu [light-colored shoyu] (11.1%), tamari shoyu (2.2%), shiro shoyu [clear shoyu] (0.4%), and saishikomi shoyu [twice-fermented shoyu] (0.3%).

(2) Consumption of whole soybeans and defatted soybeans in Japan, 1976 (one-third is for foods, especially shoyu, and two thirds is for feed).

(3) Typical composition of soy sauces recognized by the Japanese government. The five types are the same as those discussed in Table 1, however their names are spelled out in full.

Note 1. This is the earliest English-language document seen (April 2012) that uses the word "saishikomi" or the term "saishikomi shoyu" to refer to twice-fermented shoyu, which is one of Japan's five basic types of shoyu.

Note 2. This is the earliest English-language document seen (April 2012) that uses the term "shiro shoyu" to refer to light shoyu, which is one of Japan's five basic types of shoyu.

(4) Annual production of soy sauce by grade, as graded by the Japanese Agricultural Standard (JAS) in 1976. The 3 grades are special (53.4% of total), upper (26.0%), standard (12.9%), non-JAS mark (7.7%). Total production is 1.226 million kiloliters.

(5) Chemical composition of major types of miso in Japan. The five types are rice miso (sweet, semisweet, and salty), barley miso (semisweet), and soybean miso (salty). For each is given the color, aging time, chemical composition, and total tonnage produced.

Figures show: (1) Flow sheet for making koikuchi (regular) shoyu. (2) Flow sheet for making tamari (regular) shoyu.

(3) Two chromatograms comparing the organic acids of fermented and chemical (HVP) soy sauce. Fermented soy sauce has an abundance of lactic acid, whereas HVP soy sauce has an abundance of formic acid.

(4) Flow sheet for making rice miso. (5) Flow sheet for making sufu [fermented tofu]. (6) Flow sheet for making natto. (7) Flow sheet for making fermented soy milk drink.

Concerning fermented whole soybean (natto): It is a traditional fermented food that originated in the "northern parts of Japan 1,000 years ago." It is usually served with shoyu and mustard.

A portrait photo shows Danji Fukushima. Address: Kikkoman Foods, Inc., P.O. Box 69, Walworth, Wisconsin.

5615. Fukushima, D. 1979. Additional comments on traditional fermented foods. *J. of the American Oil Chemists' Society* 56(3):379-80. March. [2 ref]

• **Summary:** See also p. 357-62. Address: Kikkoman Foods, Inc., P.O. Box 69, Walworth, Wisconsin.

5616. Hesseltine, C.W. 1979. Some important fermented foods of Mid-Asia, the Middle East, and Africa. *J. of the American Oil Chemists' Society* 56(3):367-74. March. [34 ref]

• **Summary:** Contents: Abstract ("These fermentations, unlike those of the Orient, use bacteria and yeasts instead of filamentous fungi"). Introduction. Eight reasons for using a fermentation process in the production of acid foods. Idli. Kishk. Ogi (The Yoruba {western Nigerian} name for a fermented sour maize product found throughout Black Africa). Mahewu (Magou). Kaffir beer (Bantu beer, sorghum beer, mqombothi).

"When we think of food fermentations, aside from those we encounter daily such as cheese and bread, we think of those strange and exotic products like soy sauce, soybean paste [miso], and tempeh made in China, Japan, and the East Indies."

A photo shows Hesseltine. See also p. 380-81 of this March issue. Address: NRRC, Peoria, Illinois.

5617. Hesseltine, C.W. 1979. Other fermented foods. *J. of the American Oil Chemists' Society* 56(3):380-81. March.
 • **Summary:** Discusses four more examples of traditional fermentations that have been industrialized: Kaffir beer (Bantu beer), the new Kikkoman plant in the USA, mahewu (sour maize from South Africa), and tempeh. Address: NRRC, Peoria, Illinois.

5618. Leon, Sonia V. de. 1979. Tropical foods in the Far East. In: G.E. Inglett and G. Charalambous, eds. 1979. *Tropical Foods: Chemistry and Nutrition*. Vol. 1. New York: Academic Press. x + 701 p. See p. 351-63. [15 ref]
 • **Summary:** The section titled "Fermented Cereals and Grains" gives basic information about the following fermented soybean foods: Tempeh, soy sauce, miso, and sufu or Chinese cheese. Address: Dep. of Food Science and Nutrition, Univ. of the Philippines, Diliman, Quezon City, Philippines.

5619. Olsman, H. 1979. Hydrolyzed and autolyzed vegetable proteins as functional food ingredients. *J. of the American Oil Chemists' Society* 56(3):375-76. March.
 • **Summary:** Contents: Abstract. History. Definitions, raw materials, processes, and economy. Functional properties of HVPs. Legal status of HVP. A photo shows Olsman. Address: Unilever Research Lab., Vlaardingen/Duiven, Helhoek 30, Groessen, Netherlands.

5620. Sakaguchi, Yukio. 1979. Opening remarks—Vegetable proteins in fermented foods and other products. *J. of the American Oil Chemists' Society* 56(3):356. March.
 • **Summary:** "Miso, or soybean paste, one of the most important fermented soybean foods, was originally made in China. A missionary who was sent [from Japan] to China learned its production and modified it into a product suited to the Japanese taste in the 7th century. About 185,000 tons of soybeans are used for miso production annually.

"Another major fermented soybean food is soy sauce which was originally developed by the Zen Monk Kakushin in 1234. He also visited China and discovered that the liquid portion from Miso was very delicious. This liquid became the base for soy sauce, an essential ingredient in the Japanese diet. Soy sauce required the annual use of nearly 175,000 tons of soybean meal, the equivalent of 222,000 tons of soybeans.

"Natto, the third major fermented soybean product of Japan, originated in our country. In 1087, a ruler in the northern part of Japan discovered natto to be part of local farmers' diets. Today, nearly 60,000 tons of soybeans are consumed in its production.

"As Japan continues to draw from its historic past for

a source of soy-based foods, we also are full participants in the new era of sophisticated vegetable protein foods. To promote utilization and production of this product, the Japan Vegetable Protein Food Association was organized in 1975."

A photo shows Dr. Yukio Sakaguchi. Address: Japan Vegetable Protein Food Assoc., 9th Floor, Rainbow Building, 2-15-17 Nishi-Shinbashi, Minato-ku, Tokyo, Japan.

5621. Winarno, F.G. 1979. Fermented vegetable protein and related foods of Southeast Asia with special reference to Indonesia. *J. of the American Oil Chemists' Society* 56(3):363-66. March. [22 ref]

• **Summary:** Contents: Abstract. Introduction. Fermented foods and food needs. Tempeh and oncom. Bongkreng (and its toxic-producing bacteria) and tauco. Wholesomeness of fermented foods. Development of food supplement using fermented food as a basic ingredient.

Table I shows the population, population growth rate, and average national income per capita in ten Southeast Asian countries. Indonesia has by far the largest population (136.9 million), followed by Vietnam (47.3). Khmer republic (Cambodia) has the highest population growth rate (2.8%), followed by the Philippines (2.7%); Singapore has the lowest (1.3%). Singapore has by far the highest average national income per capita (US\$2,510), followed by Malaysia (\$720), then Maungthai (Thailand—\$350); Khmer Republic and Laos have the two lowest per capita incomes (\$70). Table II shows the nutritional composition of tempeh, oncom, bongkreng, and tauco per 100 gm. Table III shows 7 fermented vegetable protein foods in Southeast Asia: Tempeh, bongkreng, oncom, tauco, kecap (shoyu), ang-kak, and sofu (sufu); for each is given the microorganism used, substrate, nature of product (solid, liquid), and area where article is sold commercially. Table IV shows the composition and nutritional value of TFR (Tempeh-Fish-Rice), as developed at the National Research Institute, Bogor, Indonesia. A photo shows F.G. Winarno. Address: Bogor Agricultural Univ., Fatemeta, IPB, Jalan Gunung Gede, Bogor, Indonesia.

5622. Shurtleff, William. 1979. Notes on visit to Quong Hop & Co. tofu factory in South San Francisco. Lafayette, California: New-Age Foods Study Center. 1 p. Unpublished typescript. April 26.

• **Summary:** Quong Hop is the leading (and perhaps the only) manufacturer of fermented tofu in North America. We were allowed to study and photograph the process in detail, and all our questions were answered. The entire process is described, with illustrations, in *Tofu & Soymilk Production*, by Shurtleff & Aoyagi (1979) in the Chapter 16 titled "Fermented tofu" (p. 283-86). Taken that day, photos show: (1) A man standing next to rolling rack of skewered inoculated tofu cubes, which are about to be incubated. (2) Pouring brining liquor over mold-covered tofu cubes packed into empty glass jars. (3) A close-up view of the previous

view showing labels of the two different types of fermented tofu made by Quong Hop & Co.—Bean Cake (*Fu-Yu*) and Pepper Bean Cake (with hot chili flakes in the brining liquor). (4) A sample of well-molded tofu cubes.

Also describes the process and equipment used by the company to make tofu. The soybeans are ground in a Rietz disintegrator. The whole system is run by a control panel from Japan. “You *must* have an in-house repairman for the control panel says owner Stanley Lee. From the slurry tank, the slurry is pumped into a two-chamber continuous cooker. The slurry fills the chambers and cooked slurry exits by overflowing. It works well. The cooked slurry is then pumped onto a vibrating screen and down into the Brown soymilk extractor. The soymilk from the screen is run directly into a huge steam-jacketed holding tank. The soymilk extracted by the Brown is run back into the slurry tank. Curding is done in barrels. Pneumatic pressers are used to press the curds into tofu. Vacuum packaging with a Multivac vacuum packager. Then pre-weighed labels are applied with a Hobart. But the labels are too small and unattractive; need two labels per package.

Tofu burgers: Run through three-patty former. Arrange on trays. Deep fry on screens in batch oil fryer. Slow. They have an oven for Savory Baked Tofu, which is pre-dipped in hot teriyaki sauce mixture. Address: Lafayette, California 94549. Phone: 283-3161.

5623. S.W. 1979. Japan via Italy . . . tofu casserole. *Sunset* (Menlo Park, California). April. p. 214. Central edition.

• **Summary:** “Versatile tofu combines with vegetables, mozzarella cheese, and Italian seasonings to make a substantial meatless casserole with a taste rather like lasagna. Glazed with soy sauce and honey, the tofu acquires a pungent meaty flavor when fried.” Gives a recipe for Tofu Vegetable Casserole [with tomato sauce]. Address: Makawao, Hawaii.

5624. Watanabe, Tokuji. 1979. Developments in the processing of traditional soybean foods in Japan. In: Hideo Chiba, et al., eds. 1979. Proceedings of the Fifth International Congress of Food Science and Technology (1978-Kyoto). Tokyo: Kodansha Ltd.; Amsterdam and New York: Elsevier Scientific Publishing Co. xi + 436 p. See Chapter 2.1, p. 66-73. Illust. Author index. Subject index. 26 cm. Series: Developments in Food Science, Vol. 2. [9 ref]
• **Summary:** Chapter 2, titled “Efficient utilization of food resources,” has three parts, of which this is the first. Contents: Introduction. Tofu (incl. “packed tofu” using GDL as a coagulant). Kori-tofu. Miso. Soy sauce (shoyu). Natto. Conclusion. A figure shows five flow-sheets, one for making each of the different foods mentioned above.

The importance of soybeans as a food ingredient in Japan is evident from the fact that nearly 1 million metric tons of soybeans, including those used after oil extraction, are consumed each year to make tofu, kori-tofu, natto,

miso, soy sauce, and other foods. “The development of automated equipment for continuous processing has made mass production of these foods possible, ensuring evenness of quality and lowness of price, to the benefit of consumers.” Address: Kyoritsu Women’s Univ., 2-2-1 Hitotsubashi, Chiyoda-ku, Tokyo 101, Japan.

5625. Claiborne, Craig. 1979. Q&A. *New York Times*. May 9. p. C4.

• **Summary:** A displaced New Yorker, now living in Kansas City, Missouri, asks for a recipe for ketjap manis (the local Oriental grocery store has never heard of it), and for information about it, and a recommendation for a possible substitute.

“A. Ketjap manis is an ingredient widely used in Indonesian cookery. Basically it is a sweet soy sauce. Here is the recipe of Mrs. Melita Soeharjo, a marvelous Indonesian cook who lives in Manhattan.”

Note: This recipe is identical in every way to the recipe that appeared in this newspaper on 21 June 1978 (p. C6).

In New York City, a good source of Indonesian specialty ingredients is the Southeast Asia Food and Trading Company, 68A Mott Street.

5626. Flinders, Carol. 1979. Soybean key to world food plight? Notes from Laurel’s Kitchen. *Rocky Mountain News* (Denver, Colorado). May 16. p. 24A.

• **Summary:** Twelve years ago (i.e., in late 1968) Carol spent a memorable week at the Tassajara Zen Mountain Center near Big Sur, California. “Among the many good people I met, one I’ve always remembered was Bill Shurtleff, who helped run the kitchen out of which was issued the well known Tassajara bread.

“Spare of words, lean and thoughtful, he had a kind of banked fire in his eyes that told you he was a man in search of a vocation. Last week Bill and his wife, Akiko, came to our home to visit and exchange ideas. It’s clear that he has found the vocation he’s been looking for, and that, in a sense, all of us stand to gain from the passion with which he’s answered it.

“The cause Bill has taken up is that of the more than one billion people of the world for whom hunger is *the* central fact of life. To be as continually mindful of their plight as he is would probably be unbearable if he didn’t believe he holds a significant key to relieving it. The key? ‘Glycine max’—soybeans to you and me.

“Western exploitation of the soybean has been absurdly slight until recent years. Mostly we’ve fattened our livestock with it. That soy is ‘king of beans’ we’ve long recognized.” But they have entered the American food supply well disguised in such forms as textured vegetable protein. “The soybean foods Bill is promoting are of a much more sophisticated nature. Their names fall oddly on the Western ear.” tofu, shoyu, tempeh, miso.

Bill and Akiko met in Japan. She “was a fashion designer in Tokyo before they were married. The image of big city haute couture doesn’t attach easily to the simply dressed and unpretentious Akiko, and everything makes a little more sense when you find out the fashions she designed were actually for handicapped children.

“Akiko’s skill as a graphic artist and fine cook are the perfect complement to Bill’s, as writer and investigator. Her warmth and gentleness are the perfect balance to his single-minded intensity. (Akiko doesn’t just invite you for dinner. She seizes your arm as you’re walking along together, wraps it close in her own and holds on tight, convincing you life will be pure misery for them until you come to their house).

“Tofu was the soyfood that first captured Bill’s interest.” Discusses its virtues. “But what really wins him over, I think, is the sheer romance of tofu. What you know of tofu, and what I’ve told you about Bill, might make that seem unlikely. But read his book and see for yourself—beneath that samurai exterior beats the heart of a Shelley or a Keats. Listen:

“Like water that flows through the worlds, serving as it moves along, tofu joyfully surrenders itself to the endless play of transformation. Pierced with a skewer, it sizzles and broils above a bed of live coals... deep-fried in crackling oil, it emerges crisp and handsome in robes of golden brown, frozen all night in snow under vast mountain skies, it emerges glistening with frost and utterly changed. All as if it knew there was no death to die, no fixed or separate self to cling to, no other home than here.”

Contains a favorite Flinders’ recipe for tofu patties.

5627. Hoang, Van Chi. 1979. Report to the Bureau of Industrial Guidance, FDA: Vietnamese soysauce. Its particularities and our manufacturing process. Bowie, Maryland: Vietnam Food & Drink Co. 4 p. May 25. Unpublished typescript on letterhead. 28 cm.

• **Summary:** Contents: Names of company director, plant manager, and technical board (in left margin). Bibliography: Translation into English of article on Vietnamese soysauce production found in *Khoa Hoc Thuong Thuc*, a scientific magazine published in Hanoi. The translation follows: General process (for making soysauce). Some differences between Chinese and Vietnamese soysauces.

Our manufacturing process: Ingredients to obtain 8 gallons of soysauce (Soybeans 10 lb. Rice 5 lb. Salt 5 lb. Sugar 5 lb. Water 5 gallons). Rice fermentation or “koji” preparation. Soybean fermentation or preparation of the brine. Preparation of soysauce. Packaging. The pH problem. The problem of oxydation [sic, oxidation]. Our request with FDA.

Vietnamese always prefer their own soysauce to the Chinese brand. After fermentation is over, the Chinese filter the product, taking only the filtrate to make their sauce, while discarding all the solid particles that remain. The Vietnamese, on the other hand, grind the whole product

to obtain a sauce which is much thicker. The Chinese add *Lactobacillus* to the cooked soybeans to stimulate their fermentation. The Vietnamese roast their soybeans before cooking. Chinese like black soy sauce. To get that black color, they keep their soysauce in an open jar, exposed to the air for as long as three months; auto-oxydation turns the sauce black. Vietnamese prefer brown-colored soysauce. Vietnamese soybeans do not have a great tendency toward oxydation. Roasted soybeans and rice inoculated with *Aspergillus oryzae* are fermented separately. The finished koji has a pH of 4.0 (sample A1). During the soybean fermentation, if the temperature is maintained at 35-38°C, the fermentation is complete in 9 days, with a pH of 5.0 to 5.2 (sample A2). “Fermented rice [koji] and fermented soybeans are mixed together, and salt and sugar are added. The whole mixture is then ground in an industrial blender and reduced to a thick paste” (sample A3). The pH of the final mixture is important since “Vietnamese customers have a traditional for a sweet and only slightly sour sauce.” The addition of a few grams of vitamin C to each 8-gallon batch of soysauce helps to fight oxidation and prevent unwanted darkening of the sauce. The finished soysauce is poured into glass bottles (8 oz or 16 oz) and sealed with a cap. The company requests that the FDA consider this soysauce as a fermented food rather than an acidified food, and authorizes the company to keep its pH around 4.8—the same as some Chinese-style sauce made in the USA (sample A4).

Note 1. This is the earliest document seen (March 2001) concerning the work of Vietnamese with soyfoods or soybeans overseas (one of two documents). By June 1979 Hoang Van Chi was making Vietnamese soy sauce in Bowie, Maryland.

Note 2. The address of the company’s factory is handwritten in red at the top left of page 1: 3824 Ironwood Place, Landover, Maryland 20785. Phone: (301) 322-7948. The company director, Hoang Phan, is the writer’s wife. Address: Technical Director, Vietnam Food & Drink Co., Inc., 12653 Heming Lane, Bowie, Maryland 20716. Phone: (301) 262-3735.

5628. Brown, Marlene. 1979. How to put together a co-op party. *Better Homes and Gardens* 57(5):128, 130, 132, 138-42, 184. May.

• **Summary:** The menu for a traditional Japanese dinner includes “Chilled tofu hors d’oeuvres.” “Garnished chunks of chilled tofu (also called soybean curd) set the stage for this Far Eastern presentation. Assemble the tofu on a bed of crushed ice at the party site...” Shabu-shabu includes tofu and soy sauce.

5629. **Product Name:** Health Valley Vegetarian Chili [Spicy, Mild, or Unsalted].

Manufacturer’s Name: Health Valley Natural Foods.

Manufacturer’s Address: 700 Union St., Montebello, CA

90640.

Date of Introduction: 1979. May.

Ingredients: Vegetable broth, organic pinto beans, tomatoes, onions, organic carrots, soy granules, olive oil, tomato paste, chili pepper, concentrated organic apple juice, sea salt, bell peppers, unsulfured molasses, garlic powder, cumin, organic potato flakes, paprika, ground bay leaves, organic oregano, organic sage, organic thyme.

Wt/Vol., Packaging, Price: 15 oz (425 gm) can.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. See p. 86-87. Ad: “New! From Health Valley. Vegetarian Chili. Ingredients include pinto beans, soy grits, and aged tamari soy sauce.

Ad in Bestways. 1979. Oct. p. 51.

Label obtained at World Vegetarian Day in San Francisco. 1990. Oct. 6. 9 by 4 inches. Paper can label. Reddish brown, yellow, black, brown, green, and white. Color photo of crock of chili surrounded by uncut vegetables. “Certified organic beans. Made the healthy way. Plenty of zesty robust flavor without any meat.” Distributed by Health Valley Foods, Inc., 16100 Foothill Blvd., Irwindale, California 91706-7811.

5630. McDermott, Chris; Klein, Ruth Hodgson. 1979. Tofu: The once and future food? (Leaflet). New York: Cornell University, Cooperative Extension. 2 p. May 7. Focus on the food markets. [1 ref]

• **Summary:** “You can do just about anything to a soybean: sprout it, ferment it into soy sauce; grind it into flour; isolate the protein for use as a meat extender, or extrude and texture it into imitation meat and fish products. While agribusiness spends \$20 million a year on high-technology research into soy foods, consumers are increasingly turning to tofu, the ancient staple of Oriental diets, as an inexpensive source of protein. Tofu, more familiar to some as bean curd, is widely available at health food stores, fruit and vegetable markets, and an occasional supermarket; it usually sells for about 70 cents to \$1.09 a pound.”

Discusses how to buy and store tofu and the many different type. A table compares the nutritional value of tofu, hamburger, cottage cheese, and cheddar cheese—based on USDA Agriculture Handbook No. 456, *Nutritive Value of American Foods*. Address: 1. Editor; 2. Senior Extension Associate. Both: Consumer Education, Cornell Univ.

5631. Midwest Natural Foods Distributors, Inc. 1979. Catalog 13. Spring, 1979. Ann Arbor, Michigan. iv + 290 p. Index by product category. Index of manufacturers. Index of advertisers. Illust. 28 cm.

• **Summary:** One the cover are two kites (colored orange and red) flying in the sky. This catalog, largely printed by a computer, contains many ads on numbered pages. Contents:

Policies and terms. Catalog information. Packaged. Books. Refrigerated and frozen. Bulk. Literature and flyers. Indexes (3).

“One stop shopping... We are now a Full Line distributor.” List of new lines. List of new products within existing lines. Symbols and abbreviations.

Suppliers are listed alphabetically: Arrowhead Mills, Balanced Brand [Balanced Foods, New Jersey], Bragg’s (Liquid Aminos), Dr. Bronner’s (with full page ad showing the doctor), Carmé (lecithin), Cedar Lakes, Cellu (Soy bean flour), Chico-San, A.A. Debole (Spaghetti sauce—soy conc), Dragon’s Milk (Arica), Elam’s (soy flour), El Molino, Ener-G—Jolly Joan, Erewhon (with “Erewhon West” full-page ad), Family Orchards (Tamari mixes, Trail mix), Fantastic Foods, Fantastic Falafel [Felaful], Fearn Soya Foods, Flavor Tree, Hain Pure Foods (“Cold pressed” vegetable oils, mayonnaise, nut butters), Hansen’s juices, Health Valley (incl. Vegetarian Chili), Hi-Energy Foods (food bars), Hoffman’s (protein powders, snack bars), Lact-Aid (p. 109, ad p. 118), Jack La Lanne, Lange’s, R.G. Lecithin, Lifestream (p. 113, 251, ads p. 249-50), Malt-O-Meal, Maya Grainburgers (p. 119, ad p. 126—mix with tofu), Midland Lecithin, Miso Cup, Modern Products (Gayelord Hauser), Mus-L-On (MLO), NF Factors, Niblack (“Tamari toasted sunflower seeds,” Tamari pumpkin seeds,” raw or toasted wheat germ, unprocessed miller’s bran), Old Stone Mill (soy), Orjene, Parkelp, Plus Produces (incl. Tiger’s Milk), Richter Bros., Soken, Sovex, Viobin, Waring (blender, juicer), Westbrae.

Books, Talking Foods, Meats (nitrate and nitrite free), Poultry (no hormones or antibiotics), Soy Products (Health Valley soy milk, tofu), Soy Plant Tofu (nigari, and tofu sausage, p. 259-60), Tumaro’s, Willow Run (Soybean spread [margarine]). Bulk—Beans, dry roasted soybeans, fruit & nut mixes (trail mix), nut butters, condiments, vegetable oils, pasta (with nomenclature), granola, teas & herbs. Literature & flyers. Indexes. Note: Many companies have a large selection of herbs. Address: 170 Aprill Dr., Ann Arbor, Michigan 48103. Phone: 313-769-8444 or in Area 313 1-800-552-6297.

5632. Tofu Shop (The). 1979. Our favorite tofu recipes (Leaflet). Telluride, Colorado. 1 p. Spring. Single sided. 28 cm.

• **Summary:** Typewritten on letterhead. The four recipes are: “Tofu Turkey with Mushroom Gravy (serves 12-16).” Tofuburgers. Spicy tofu and rice burritos. Creamy tofu salad dressing.

The Tofu turkey is especially innovative: Place 8 lb tofu (one large block if possible) in a large, shallow baking pan. Melt ½ lb soy margarine or butter in a small sauce pan, mix in herbs, and use this sauce to baste “turkey.” “Bake tofu for 2 hours at medium temperature, or until a golden crust forms all around. Baste regularly. Garnish with sprouts, parsley,

and thin apple rings, and serve with mushroom gravy. For an extra treat, hollow out blocks of tofu and stuff with veggie and rice mixture prior to baking.”

Mushroom gravy” Add 3 tablespoons arrowroot and ½ cup whole wheat flour to 4 cups hot water, and cook 10 minutes. Sauté 2-4 cups sliced mushrooms and one small diced onion. Combine all ingredients and season to taste with shoyu [Japanese-style soy sauce], garlic, lemon, and cayenne (optional).

Letter (e-mail) from Matthew Schmit. 2009. March 28. Concerning the Tofu turkey recipe: “As technically simple as the recipe was, it was how the turkey idea started. Note the sentence at the end of the first paragraph describing ‘stuffing’ the tofu turkey. This is what I later started doing in Arcata with our tofu turkeys.” Matthew thinks this sheet of recipes was printed in the spring of 2009. Address: The Tofu Shop, 116 N. Oak St. (P.O. Box 69), Telluride, Colorado 81435.

5633. Claiborne, Craig. 1979. A word or two about passionfruit: De gustibus. *New York Times*. June 18. p. B12.

• **Summary:** Part II of this article begins: “One of the great and essential ingredients for the cooking of Indonesia and other Eastern countries is a liquid called ketchup or ketjap manis. It is a dark, sweet soy sauce that is vital to impart the ‘native’ flavors of Indonesia.”

It is quite readily available, in bottled form, in almost all fine-food specialty shops in Manhattan [New York City] and throughout the United States. A recipe (that came from an excellent Indonesian cook) was recently printed in this newspaper (9 May 1979, p. C4).

Claiborne now has a letter from Rachael Baker of Princeton, New Jersey, which contains three recipes for simplified versions of ketjap manis, which she had found in cookbooks over the years; they do not require the use of any special Indonesian ingredients—such as salam leaves and laos.

The main ingredients is these are soy sauce, dark molasses, and brown sugar. The source of each recipe is given.

5634. Liebman, Bonnie. 1979. Sea salt: No great shakes. *Nutrition Action* 6(6):13, 16. June. Address: CSPI Nutritionist.

5636. Pardo, L.V.; Luis, E.S.; Soriano, M.R.; Bucoy, A.S. 1979. Changes in the free amino acid content of an experimental soy sauce. *Philippine J. of Food Science and*

Technology 3(1):31-45. Jan/June. Paper presented at the 13th annual convention of the Philippine Assoc. of Food Technologists, 20-21 Nov. 197a, Manila. [26 ref]

• **Summary:** Describes changes in the content of 16 free amino acids (of which 9 were essential amino acids) in a soy sauce mash during a 12-week fermentation. “The maximum formation of amino acids was reached between the 7th and 11th week of fermentation. Glutamic acid was the most abundant and it exhibited a very irregular increase-decrease pattern. The others also showed almost the same pattern.” Address: Food Technology Research Div., Industrial Research Center, National Inst. of Science and Technology, NSDB, Manila, Philippines.

5637. **Product Name:** Bodhi Sauce and Tuong Cu-Da (Vietnamese Soy Sauces).

Manufacturer’s Name: Vietnam Food and Drink Co.

Manufacturer’s Address: 12653 Heming Lane, Bowie, Maryland 20716. Phone: (301) 322-7948, 262-3735.

Date of Introduction: 1979. June.

Ingredients: Soy-beans, rice, salt, water.

Wt/Vol., Packaging, Price: 10 oz.

How Stored: Shelf stable.

New Product–Documentation: Hoang, Van Chi.

1979. “Report to the Bureau of Industrial Guidance, FDA: Vietnamese soysauce. Its particularities and our manufacturing process.” Bowie, Maryland: Vietnam Food & Drink Co. 4 p. May 25.

Label. 1980. 7.25 by 3 inches. Paper. Black on white. “A wholegrain soybean sauce used for centuries by Buddhist monks in S.E. Asia. Wholegrain soysauce like this one has many virtues among which: It helps the skin remain fresh and young. There probably lies the secret of Oriental women’s skin beauty. It eliminates from the body toxic substances produced by tobacco, alcohol and atomic radiation. The yeast that remains alive in the sauce prevents the development of harmful germs. It is a food for good health and longevity. Reference *The Chinese Journal*, New York. Used to dip To-Fu (bean curd), boiled vegetables or just plain rice. Non-vegetarians can use this sauce to dip: chicken, duck, pork, beef boiled or roasted.”

Leviton. 1982. Soyfoods. Winter. p. 68-69. “Tuong Cu-Da is identical to Bodhi Sauce but contains added sugar for the extra sweetness the Vietnamese prefer.” Both are made with glutinous rice (sweet rice). Soya Bluebook. 1987. p. 92. Address is now 3824 Ironwood Place, Landover, Maryland 20785.

Spot in *Whole Foods* magazine. 1982. Feb. p. 50. A photo shows Hoang Van Chi and many bottles of his Bodhi Sauce.

5641. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tempeh: A super soyfood from Indonesia. New York, NY: Harper & Row. 160 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [24 ref]

• **Summary:** Contents: Acknowledgments. What is tempeh? Preface. 1. Soybeans—Protein source of the future: Introduction, the causes of hunger and starvation—two analyses (*The Twenty-Ninth Day*, by Lester Brown—population, affluence; *Food First: Beyond the Myth of Scarcity*, by Lappé and Collins—population, narrow focus on increasing food productivity, international food exploitation, land monopolization and misuse, cash crop system of export agriculture). Ten reasons soy will be the protein source of the future: 1. Optimum land utilization. 2. Lowest cost protein. 3. High nutritional value. 4. Time tested. 5. Remarkably versatile. 6. Appropriate technology. 7. New dairylike products. 8. Hardy and adaptive. 9. Free nitrogen fertilizer. 10. Energy and resource efficient. “All of these ten factors work together synergistically, reinforcing one another, to give added weight to the prediction that soybeans will be a key protein source for the future on plant earth.” Present patterns of soy protein utilization. New developments. An idea whose time has come.

2. Tempeh as a food. 3. Getting started (incl. basic preparatory techniques and 18 recipes, incl. a recipe for sweet Indonesian soy sauce {*kechap manis*}). Favorite tempeh recipes (13 Western favorites, 6 non-fried favorites, and 12 Indonesian favorites; also Suggestions for serving tempeh throughout the day). 4. Western-style and Oriental tempeh recipes (68 recipes). 5. Indonesian tempeh recipes

(70 recipes). 6. Making tempeh at home or in a community. 7. Making tempeh starter. 8. The Indonesian tempeh shop. Map of Southeast Asia, including Indonesia. Map of Java, Madura, and Bali (p. 144). Appendix A: A brief history of tempeh East and West. Appendix B: Tempeh shops in the West. Weights, Measures, and Equivalents. Glossary. Bibliography. About the authors. About the New-Age Foods Study Center.

The first book in the world devoted entirely to tempeh. It contains the first sizeable collection of American-style and Indonesian tempeh recipes (130 in all), the first illustrated descriptions of making tempeh, tempeh starter, and onchom on various scales in Indonesian tempeh shops, the first history of tempeh, detailed discussion of tempeh in Indonesian culture and of the many varieties of Indonesian tempeh, and the first recommendations for commercial names for the more than 30 types of tempeh that could easily be made in the West. It also contains chapters and reviews of the literature on tempeh nutrition and the microbiology and biochemistry of tempeh fermentation, plus the largest bibliography on tempeh to date (including many new Indonesian references), an annotated listing of 61 people and organizations around the world connected with tempeh, and the first list of tempeh companies in the West.

Page 26 states: “Modern soy-protein products, such as textured soy proteins, are increasingly available at supermarkets, often in forms that simulate the fibrous, chewy texture of meat.

Note 1. This is the earliest known book in any language devoted entirely to tempeh. Note 2. This is the earliest English-language document seen (Aug. 2011) that contains the term “modern soy protein products;” Shurtleff would soon start to use it to refer to defatted soy flour or grits, soy protein concentrates, soy protein isolates, and textured soy protein products.

Illustrations (line drawings; unnumbered, not including “spots”). Indonesian dancer in sarong and crown. Balinese lion mask dancer. Two Indonesian women dancing. Cuts of fresh tempeh on a woven bamboo tray. Woman in a traditional Indonesian kitchen cooking tempeh. Terraced rice patties in Java. Woman selling tempeh in Bali market. Masked Indonesian figure. Soybeans in the pod. A hand holding dry soybeans over a sack of such soybeans. Three women selling beans and grains in a Javanese market. Two men selling tempeh in a Javanese market. Balinese mask. Indonesian mortar and pestle. Traditional oil skimmer for deep frying. A wok. Tamarind paste and pods. Soy sprouts. Pieces of tempeh on a bamboo tray Gado-gado. Laos root & chilies. Palm sugar. Chilies. Indonesian woman carrying fruits in a bowl on her head. Salam leaf. Botok tempeh. Peté beans. Winged and masked Balinese figure. Indonesian spices. Soybean (enlarged). Cartoon of a fuzzy little critter driving his tiny tractor over a cake of tempeh, inoculating it with a secret enzyme (The Farm, Summertown, Tennessee).

Placing tempeh into a homemade Styrofoam incubator. Cross section of good tempeh and bad. Winged beans. Close-up of outside of a homemade tempeh incubator. Dry soybeans in pods on plant. Woman in the USA making tempeh. A deep woven bamboo basket for treading soaked soybeans. Ten steps in the process for making traditional soy tempeh in a small shop (GIZI, Bogor). Twenty steps in the process for making and delivering traditional soy tempeh in a large shop (Oeben, Bandung). Two views of a modern dehuller and dehuller-separator. Five steps showing making tempeh in plastic bags. Three steps showing making tempeh in banana-leaf wrappers. Fourteen steps in the process for making and delivering Malang tempeh.

Map of Southeast Asia. Map of Java, Madura, and Bali (incl. West, Central and East Java). Indonesian stilt house (house on stilts, famous among the Dayak in Borneo, the Minangkabau and Batak of Sumatra, and the Toraja of Sulawesi). Woman selling leaf-wrapped tempeh in a Balinese market (color, rear cover).

Numbered figures (line drawings unless otherwise stated. The number before the decimal refers to the chapter number). 1.1 Table: The changing pattern of world grain trade (exporters and importers). 1.2 Graph: Projected population densities in various regions of the world. 1.3 Bar chart: Per capita protein consumption in rich and poor countries. 1.4 Bar chart: Per acre yields of usable protein from various food sources (pounds per acre). 1.5 Graph: World soybean production (1965-1977). 1.6 Bar chart: Protein consumed vs. protein returned from milk, eggs, chicken, pork, beef. 1.7. Where the world's money goes (yearly global and U.S.).

2.1 Table: Percentage of protein in various foods. 2.2 Table: Composition of nutrients in 100 grams of tempeh of different types. 2.3 Table: Protein quality (NPU) of various foods. 2.4 Table: Amino acid composition of tempeh compared with the FAO/WHO reference pattern. 2.5 Bar chart: Limiting amino acids in rice and tempeh. 2.6 Table: Combining foods to increase protein. 2.7 Bar chart: Grams of dietary fiber in 100 grams of various foods. 2.8 Table: Fatty acids in soy tempeh. 2.9 Table: Vitamins and minerals in soy tempeh. 2.0 Table: Price of one day's supply of usable protein from various foods.

3.1 Bar chart: Comparison of nutrients in brown and white rice. 3.2 Shoyu (natural soy sauce) in four wooden keg, can, bottle, and small dispenser. 3.3 Grating a coconut. 3.4 Mortar & pestle (two types). 3.5 Cross section of a coconut in the husk. 3.6 Making coconut milk (7 steps). 3.7 Ladies in a Javanese market selling chilies (in mounds). 4.1 Deep-frying tempeh, with all utensils shown. 4.2 Shallow-frying tempeh. 4.3 Seasoned crisp tempeh with dip. 4.4 Tempeh shish kebab. 4.5 Coriander & garlic crisp tempeh. 4.6 Tempeh fondue. 4.7 Making tempeh-filled pot-stickers or gyoza. 4.8 Tempeh pita bread sandwich. 4.9 Tempeh burger. 4.10 Tortilla with tempeh & guacamole. 4.11 Tempeh

guacamole. 4.12 Tomatoes stuffed with tempeh.

5.1 Woman in an Indonesian village kitchen. 5.2 Woman grinding spices with a mortar. 5.3 Table: Indonesia's 7 most popular tempeh recipes, in descending order of popularity: Tempeh goreng, tempeh bachem, keripik tempeh, sayur lodeh, sambal goreng tempeh, terik tempeh, sambal goreng kering tempeh. Recipes for each are given. 5.4 Selling traditional banana-leaf wrapped tempeh in Yogyakarta, Java. 5.5 Deep-frying tempeh keripik in batter. 5.6 Deep-frying tempeh keripik in Javanese market. 5.7 Botok tempeh #1. 5.8 Botok tempeh #2. 5.9 Gadon tempeh. 5.10. Folding leaf wrappers for gadon tempeh. 5.11 Rolling leaf wrappers for pepes tempeh. 5.12. Pepes tempeh on broiler and packets ready to serve. 5.13 Folding leaf wrappers for Balinese pepesan. 5.15. Saté tempeh on broiler. 5.15 Saté vendor in Java. 5.16. Saté manis tempeh. 5.17 Tempeh sambal accompaniment for rice.

6.1 Flowchart for homemade soy tempeh. 6.2 Tempeh incubator (home-made). 6.3 Good soy tempeh (diagonally sliced). 6.4 Four types of homemade tempeh. 6.5 Wooden tempeh incubation tray designs. 6.6 Community tempeh incubator. 6.7 Graph: Tempeh incubation time versus temperature for soy tempeh (shows slow, moderate, and quick combinations).

7.1 Graph: Loss of tempeh starter potency when stored at various temperatures and humidities. 7.2 Sporulated tempeh for starter in bread pan. 7.3 Dry-strainer spore extraction. 7.4 Sporulated rice, pressure cooker, and Mason jar method of making tempeh starter. 7.5 Picking leaves from a hibiscus tree for tempeh starter. 7.6 Arranging inoculated soybeans on hibiscus leaves. 7.7 Covering hibiscus leaf sandwiches in trays. 7.8 Hibiscus leaves for tempeh starter ready to use. 7.9 Hibiscus inoculum leaves on round tray. 7.10 Drying inoculum leaves in sun on roof. 7.11 Tying inoculum leaves under rafters to dry.

A color photo shows a high-quality cake of tempeh sliced on a plate. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

5642. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tempeh: A super soyfood from Indonesia. Professional hardcover edition. New York, NY: Harper & Row. 248 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [190 ref]

• **Summary:** A special cloth-bound professional edition of *The Book of Tempeh* prepared for libraries, commercial tempeh producers, microbiologists, students of Indonesian foods, and those who love fine books. In addition to the full contents of the paperback edition, it contains the following lengthy appendixes: B: Tempeh in Indonesia (an overview

of the tempeh industry and market, including the number of shops by province, per capita consumption, etc.). C: The Varieties of Tempeh. D: Soybean Production and Traditional Soyfoods in Indonesia. E: The Microbiology & Chemistry of Tempeh Fermentation. H. Onchom or Ontjom. A Glossary of Indonesian Foods (the most extensive one available in English). Bibliography on Tempeh containing over 190 entries: Works on the world food crisis, works on tempeh cookery or Indonesian cuisine, scientific journal articles on tempeh, early Dutch- and German-language works on tempeh, Indonesian-language works about tempeh, key English-language works on microbiology, film and color slides on tempeh. Illustration of an Indonesian dancer. Expanded Index. A great deal of original research is contained in the extra 88 pages and 54 illustrations.

Appendix C, “The varieties of tempeh, states: “The many varieties of tempeh may be grouped into five basic types, according to the primary ingredient used: legumes, grains & soy, grains, presscake residues, and nonlegume seeds. Legume tempehs: Soy tempeh (*tempe kedelé* or *kedelai*, made from the seeds of *Glycine max*). Velvet-bean tempeh (*tempe benguk* or *tempe koro benguk*, made from the seeds of *Mucuna pruriens*, which are called *kara benguk* in Indonesian). Winged-bean tempeh (*tempe kecipir*, made from the seeds of *Psophocarpus tetragonolobus*). Leucaena tempeh (*tempe lamtoro* or *tempe mlandingan*, made from the seeds of *Leucaena leucocephala*). Mung bean tempeh (*tempe kacang hijau*, made from the seeds of *Vigna radiata*, which are called *kacang hijau* in Indonesian). Broad-bean or fava-bean tempeh (*tempe kacang babi*, made from the seeds of *Vicia faba*, also called horse beans). Sesban-bean tempeh (*tempe turi*, made from the seeds of *Sesbania grandiflora*). Pigeon-pea tempeh (*tempe kacang iris*, made from the seeds of *Cajanus cajan*). Green-bean tempeh (*tempe kacang merah*, made from the seeds of *Phaseolus vulgaris*, which are called *kacang buncis* in Indonesian). Lima-bean tempeh (*tempe kara* or *tempe kara kratok*, made from the seeds of *Phaseolus lunatus*). Lablab-bean tempeh (*tempe kara-kara* or *tempe koro wedus*, made from the seeds of *Lablab purpureus*, which is called hyacinth bean in the USA). Jack-bean tempeh (*tempe kara bedong* or *tempe kara pedang*, made from the seeds of some strains of *Canavalia ensiformis*). Lupin tempeh (developed in Australia, made from the seeds of the narrow-leafed sweet lupin (*Lupinus angustifolius*) or the Andean lupin (*Lupinus mutabilis*)). Cowpea or black-eyed pea tempeh (developed in West Africa and Thailand, made from the seeds of *Vigna unguiculata*). Note: Chickpeas (garbanzo beans), baby limas, and great northern beans have also been used to make tempeh.

Grain & soy tempehs: Wheat & soy tempeh, barley & soy tempeh, rice & soy tempeh, bulgur & soy tempeh. Grain tempehs: Barley, rice, wheat, oats, and rye have been used with good results.

Presscake tempehs: Okara tempeh (called *tempe gembus*

in Central and East Java where it is most popular, and called *oncom hitam* in West Java where it is not widely used). Peanut presscake tempeh (called black onchom (*oncom hitam*) in the Bogor region of West Java where it is most widely consumed, or white onchom (*oncom putih*) in the Tasikmalaya region, or “tempeh from peanut presscake” (*tempe bungkil kacang*) in East Java). Coconut presscake tempeh (*tempe bongkreng*, *tempe bungkil kelapa*, or *tempe kapuk*) comes in several varieties and can be can be poisonous if the pathogenic aerobic bacterium *Pseudomonas cocovenenans* grows on it and produces either yellow-colored toxoflavin or the more toxic colorless bongkreng acid. Peanut- & coconut-presscake tempeh (*tempe menjes*). Mung-bean-presscake tempeh (*oncom hitam* or *oncom ampas kacang hijau*). Soy- & peanut-presscake tempeh. Defatted soy-meal tempeh.

Seed tempehs (nonleguminous): Rubberseed tempeh (*tempe kaloko*) is made from the seeds of the rubber tree (*Hevea brasiliensis*). Okra tempeh. Sesame & soy tempeh. Tempeh extenders and adulterants: Okara, cassava, mung-bean presscake, soybean hulls, sweet potato, coconut- or peanut presscake, papaya. The stages of tempeh fermentation (underripe to overripe): Premature tempeh (*tempe koro*), mature tempeh, slightly overripe tempeh (*tempe semangit* or *tempe lanas*), overripe tempeh (*tempe busuk* or *tempe bosok*), rotten tempeh. Tempeh wrappers.

Appendix D: “Soybean production and traditional soyfoods in Indonesia” discusses: Soybean production in Indonesia, traditional Indonesian soyfoods: Kechap (*kecap* / *ketjap*, incl. *kecap manis*), tauchō (*tauco* or *taoco*), okara onchom, sereh (*sere*), taokoan or takoa, tofu (*tahu*). Other nonfermented soyfoods: Soy sprouts (*taugé kedele*), yuba (*bungah tahu*), soymilk, roasted soybeans (*dele sangan*, *kedele sangrai*), roasted soy grits or full-fat flour (*bubuk kedele*), fresh green soybeans (*kedelai rebus*).

Note: This is the earliest English-language document seen (March. 2009) uses the word “tauchō” (spelled in that way) to refer to Indonesian-style miso.

Appendix E: “The microbiology and chemistry of tempeh fermentation” discusses: What are fungi?, general characteristics of *Rhizopus* molds, *Rhizopus* species used to make tempeh, pure cultures versus mixed cultures, preparing soybeans for fermentation, requirements for mold growth, general changes during tempeh fermentation, changes in nutrients and digestibility, the finished tempeh, the advantages and disadvantages of tempeh fermentation, suggestions for further research.

Appendix H: “Onchom or ontjom” discusses: Introduction. The varieties of onchom (*onchom merah* or *onchom beureum*): Peanut-presscake onchom, okara onchom, soy onchom, coconut-presscake onchom. Making peanut-presscake onchom in a commercial shop. Making okara onchom in a commercial shop. The microbiology of onchom. Laboratory studies of onchom. Aflatoxins. Works

on onchom and Neurospora. People connected with onchom and Neurospora. Continued. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

5643. *Food Product Development*. 1979. Oriental sauces thrive on ethnic food boom. 13(7):58. July.

• **Summary:** Discusses two new sauces made by Kikkoman Shoyu Co., Ltd. of Noda, Japan: Japanese-Style Steak Sauce (resembling Japanese Tonkatsu Sauce; \$0.79 for a 12-oz bottle) and Sweet & Sour Sauce (\$0.69 for a 9.5-oz jar). The ingredients of each are given. The addition of soy sauce, an ingredient not found in Kikkoman Tonkatsu Sauce, makes the Steak Sauce better suited to American tastes. Both sauces have been on the market a little more than 6 months, contain soy sauce as an ingredient and flavor enhancer (not as a base), and are made and packaged in California. Kikkoman did taste panel tests using a consulting form that employs about 200 housewives from northern California.

Note: It is not clear whether the soy sauce used in the two products is made by Kikkoman in Japan or in Walworth, Wisconsin.

5644. **Product Name:** Soysage (Meatless Sausage Based on Cooked Soybeans).

Manufacturer's Name: Joy of Soy.

Manufacturer's Address: 510 Kasota Ave., Minneapolis, MN 55414.

Date of Introduction: 1979. July.

Ingredients: Filtered water, organic whole wheat flour, organic rolled barley, organic soybeans, tamari soy sauce (containing water, soybeans, wheat, seasalt), unrefined sesame oil, yeast, spices, granulated garlic, dried onion, vinegar, seasalt.

How Stored: Refrigerated.

New Product–Documentation: Label. 1981. 3 inch diameter. Self adhesive. Green on yellow. "A spicy vegetarian soyfood. Soysage is precooked. To serve, slice in sandwiches, scramble with eggs, or crumble over pizza."

Jamie Stunkard. 1981. Soyfoods. Summer. p. 41. "Making Soysage." The main soy ingredient in this soysage is cooked soybeans; it contains no okara.

5645. **Product Name:** New World Rice & Tofu Sandwich.

Manufacturer's Name: New World Enterprises. Renamed New World Natural Foods in 1985.

Manufacturer's Address: 226 Cypress St., Brookline, MA 02146. Phone: 617-232-5973.

Date of Introduction: 1979. July.

Ingredients: Organic short grain brown rice, tofu, carrot, lettuce, scallions, peanut butter, miso, safflower oil, tamari, ginger root, and sea salt, wrapped in chapati bread.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Talk with Paul Duchesne.

1989. Aug. This company was started in about 1980-81 by a woman in Brookline. He does not know from whom she learned to make the sandwich. The product was called Rice and Tofu Sandwich. Label sent by Paul Duchesne. 1989. Aug. 11. 3 inch diameter. Dark blue lettering on a light blue and orange background illustration of the world. This label is currently in use by Emily Merghart in Brookline. Phone: 617-232-5973.

Talk with Emily Morse Merghart. 1989. Aug. 18. Emily started this company on 5 July 1979 at 226 Cypress St. in Brookline. Before that she was a ballet dancer. Her husband was a dancer. She developed the product herself and did not learn the process from anyone else. She never met Paul Duchesne. This was her first sandwich. She is positive that there were no other rice and tofu sandwiches on the market at the time; she never saw any in the many stores to which she distributed hers. In mid-1988 she moved to her present address, 157 Sutherland Rd., Brookline, Massachusetts 02146. Phone: See above. She now has a line of ten sandwiches, and makes 1,000 a day.

5646. **Product Name:** Nori Rolls (With Tofu Filling).

Manufacturer's Name: Real Food Co.

Manufacturer's Address: Boulder, Colorado. Phone: 449-7790.

Date of Introduction: 1979. July.

Ingredients: Rice, nori, tofu, zucchini, green pepper, carrots, turnips, onions, sesame oil, miso, umeboshi salt plums, shoyu, garlic, spices.

Wt/Vol., Packaging, Price: 8 oz.

New Product–Documentation: Label. 1981. 6.25 by 2.5 inches. Paper. Black on tan. Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 167.

5647. Shurtleff, William; Aoyagi, Akiko. 1979. Tofu & soymilk production: A craft and technical manual. Lafayette, California: New-Age Foods Study Center (Renamed Soyfoods Center in Sept. 1980). 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. First published in Aug. 1977 as a rough photocopied manuscript with a yellow cover. [223 ref]

• **Summary:** Contents: Preface. 1. How to start a tofu shop or soy dairy. 2. Setting up shop; The community or village shop; The traditional caldron shop; The steam cooker plant; The pressure cooker plant; The soy dairy; The automatic steam cooker plant; The modern factory. 3. Ingredients. 4. Sanitation and safety. 5. Principles of tofu & soymilk production. 6. Tofu. 7. Firm tofu, pressed tofu & smoked tofu. 8. Foods made from tofu: Introduction, creamy tofu dressing, tofu chip dip, tofu mayonnaise, tofu cream cheese, cottage cheese, sour cream, tartare sauce, tofu eggless egg spread or missing egg salad, tofunafish spread or salad, tofu rice salad, tofu cheesecake (Sprucetree Baking Co. and White Wave), tofu pies, tofu creamies or tofu-coconut cream

bars, tofu tarts, tofu turnovers, tofu puddings, fruit whips, custards and parfaits, tofu cinnamon rolls, tofu whipped cream, tofu icing and cream cakes, marinated tofu (fried or baked, p. 166), tofu jerkey [sic, jerky] (p. 166), teriyaki tofu, tofu teriyaki, savory baked tofu, savory pressed tofu (with five spice powder, *wu-hsiang toufu-kan*), nori rolls with brown rice & tofu, tofu & brown rice burgers, tofu baby foods, tofu in ready-made sandwiches. 9. Using okara, whey, curds & hulls. Deep-fried tofu (cutlets, cubes, burgers, treasure balls, burger balls, pouches, puffs). 11. Soymilk. 12. Dairylike products made from soymilk: Frozen soymilk desserts (soymilk ice cream, frozen soymilk yogurt, soymilk sherbets, soysicles, frozen soymilk custard, ice soymilk), fermented or cultured soymilks (soymilk yogurt, acidophilus soymilk, soymilk kefir, soymilk piima, soymilk buttermilk and other fermented milks), soymilk cheeses (unripened fresh, unripened soft {quark, queso blanco, panir, etc.}, ripened soymilk cheeses), soymilk mayonnaise, soy shakes and energy drinks, soymilk eggnog (soy nog), soymilk whipped cream, chip dips, puddings, custards. 13. Silken tofu & pressed silken tofu (Silken tofu is made from concentrated soymilk). 14. Lactone silken tofu (GDL). 15. Grilled tofu. 16. Fermented tofu. 17. Dried-frozen tofu. 18. Yuba. Appendix A: Resources. People & institutions connected with tofu & soymilk production. B: Weights, measures & equivalents. Bibliography. About the New-Age Foods Study Center.

See ¼-page ads in *East West Journal*. 1979. Dec. p. 4. 1980. Jan. p. 19.

Note 1. This is the earliest English-language book seen with the term “soymilk,” spelled as one word, in the title.

Note 2. This is the earliest document seen (Feb. 2002) that mentions tofu jerky or any kind of soy jerky.

Note 3. This is also the earliest English-language document seen (Feb. 2004) that uses the word “quark,” or “queso blanco,” or “panir” in connection with soy cheese or tofu.

Note 3. This is also the 2nd earliest English-language document seen (Feb. 2004) that uses the term “smoked tofu,” but the first that uses it in its modern sense.

Note 5. This book was first printed on 1 Aug. 1977 in a photocopied and rough-typed edition with a yellow and black cover.

Note 6. Reviews of this book appeared in many publications: (1) Richard Leviton. 1980. *Soycraft* (Massachusetts). 2(1):63-64. Winter. “An indispensable operating manual for soyfoods entrepreneurs... The illustrations alone make the book a valuable reference tool... a sustained inspiration. The only book of its kind in English.” (2) *Food Chain* (Intermediate Technology, England). 1997. No. 20. March. p. 6. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

5648. Shurtleff, William. 1979. Report on trip to second annual meeting of Soycrafters Association of North

America (Amherst College, Massachusetts, July 26-29), and subsequent visit to Rochester, New York. P.O. Box 234, Lafayette, CA 94549. 2 p. Aug. Unpublished manuscript.

• **Summary:** July 15–9:45. Akiko and I fly to New York City from Lafayette. The previous day our *Book of Tempeh* had arrived from Harper & Row, and we took it with us to the conference. Stay in a hotel near a park, with fear of being mugged or robbed in this unfriendly city.

We attend and I speak at Buckminster Fuller’s World Games (about world hunger and world resources) in New York City. Have a nice talk there with Robert Rodale.

Akiko and I meet Uri Geller at his home / apartment—at his invitation, because he knows and admires our *Book of Tofu*; he is a very nice, healthy man with world-famous psychic abilities. He bends my house key before my eyes by psychic force, without touching it; I carry that useless house key on my key chain for years and show it to many people. Uri also replicates a drawing I made of a stick figure standing with both hands held high under a rayed sun; he was sitting across the room and could not see what I had drawn.

I do about 3 live radio broadcasts for Gary Null (WBAI Natural Living) and visit his home for taping segments; he is a bachelor. Also do an evening program on soyfoods for Annemarie Colbin at her home. And we have dinner at The Cauldron (that makes tofu—and probably tofu cheesecake—we visit the kitchen) and Souen (which makes tofu cheesecake), both macrobiotic restaurants.

While in New York City, Akiko and I visit our editors at Harper & Row headquarters—many stories up in Manhattan.

July 22—Overnight at Ira and Kathy Leviton’s home at Sunrise Farm, 100 Heath Road., Colrain, Massachusetts.

July 24? Visit Michael and Shelley Cohen’s Tempeh Works, which is preparing to open in a gas station in Greenfield, Massachusetts (production officially began on Oct. 1). I take 3 pages of handwritten notes and many photos for our forthcoming book *Tempeh Production* (see p. 95-98). I first describe each piece of equipment in the shop and illustrate some, then describe the process (20 lb of dry beans makes 52 lb of tempeh), and finally draw a detailed floor plan of the shop. This was the first batch of tempeh Michael had ever made in this shop. He sold 200 lb of tempeh to the Soycrafters Conference later that week.

July 25. Our book *Tofu & Soymilk Production*, published by our New-Age Foods Study Center, arrives from the printer (Braun Brumfield) in Ann Arbor, Michigan. It is the first book we have self-published properly, and the first to contain an ISBN (our second, 0-933332-01-7) and an LCCN.

July 26-29 (Thurs. to Sun.) Second Annual Soycrafters Association of North America (SANA) conference at Hampshire College in Amherst, Massachusetts, organized and run by Ira / Richard Leviton. 230 people attend. It is Akiko’s first SANA conference. A magnificent event. Also first issue of *Soyfoods* magazine out, published by Leviton. One evening there is a square dance. I recall Jon Lee of New

England Soy Dairy being a superb square dancer. I meet angry Paul Duchesne. Steve Earle from San Jirushi gives a wooden speech on the history of his company and the tamari they make.

July 30-31. After the conference, with Richard Leviton driving and Jeremiah Ridenour on board, we visit The Tofu Shop, a soy deli at 686 Monroe Ave., Rochester, New York, founded by Andy Schecter, Greg Weaver, and Norman Holland. Very interesting. Ira takes lots of photos for an article in *Soyfoods* magazine. One nice one shows Akiko and Jeremiah Ridenour seated in the Deli at a table which is loaded with soyfoods dishes ready to eat.

Will in Rochester, Shurtleff presented a lecture and slide show to 150 people at the Eisenhart Auditorium in the Rochester Museum and Science Center; it was sponsored by The Tofu Shop.

Aug. 2—We arrive back in Lafayette. Address: New-age Foods Study Center, Lafayette, California.

5649. Shurtleff, William; Aoyagi, Akiko. 1979. Kecap (Indonesian soy sauce) (Document part). In: Shurtleff & Aoyagi. 1979. *The Book of Tempeh: A Super Soyfood from Indonesia*. Professional hardcover edition. New York, NY: Harper & Row. 248 p. See p. 168-69. Illust. by Akiko Aoyagi Shurtleff. [190 ref]

• **Summary:** This section contains the most detailed English-language information on Indonesian style soy sauce. “Formerly spelled *ketjap* (and now spelled *kecap* in Indonesia) [pronounced KEH-chup], this Indonesian soy sauce, generally made from black soybeans, has a dark-brown color and pleasant aroma. Unlike Japanese soy sauce, it [usually] contains no wheat or other grain and is fermented for a relatively short time. A popular all-purpose seasoning used with the entire panorama of Indonesian cuisine, it comes in three basic types:

“*Sweet Indonesian soy sauce (kecap manis)*, which is by far the most popular, accounts for an estimated 90 percent of the nation’s total soy sauce production. It has a very thick consistency and a strong, sweet molasses flavor, since it may contain up to 50 percent palm sugar [jaggery, *gula merah*]. Unlike most other Asian soy sauces, it contains numerous spices (such as star anise) which enrich the flavor. Widely used in stews and sambals, it is available in the West at Indonesian specialty shops. A recipe for making a similar product at home starting from Japanese soy sauce (shoyu) is given in the Preparatory Techniques section [p. 48]. The top grade contains 6% protein, 1% fat, 9% carbohydrates, 63% water (moisture), and 18% salt.

“*Mellow Indonesian soy sauce (kecap manis)* is a close relative of its sweet counterpart except that it contains only about half as much palm sugar and therefore has a somewhat thinner consistency and less dominant sweetness.

“*Salty Indonesian soy sauce (kecap asin)*, also called light soya sauce, is of Chinese origin and has a thin

consistency, light color, and rather salty flavor, not well suited to most Western tastes.

“The Indonesian word *ketjap* and the American word *ketchup* (tomato paste) are believed to share a common ancestry, having both been derived from the Malay word *kechap*, which refers to a kind of spiced fish sauce...”

“Kechap is traditionally made by a two-part fermentation process: a solid-substrate mold fermentation and a submerged brine fermentation. To make sweet Indonesian soy sauce, whole black soybeans (which give the product a better flavor and aroma than regular yellow soybeans) are soaked for 12 hours in excess water, boiled until tender, drained, and cooled. Spread on round trays of woven bamboo (*tampah*), they are covered with other trays (or in some cases rice straw and gunny sacks), placed in an incubation room on floor-to-ceiling shelves or racks, and allowed to stand for 3 to 5 days. During this time the beans are inoculated naturally by mold spores of *Aspergillus oryzae* and/or *Rhizopus* species (*R. arrhizus* and *R. oligosporus*) that are on the trays or in the air of the incubation room. No special inoculum is added. When the beans are covered with a fragrant mycelium of light yellow mold, they are crumbled by hand, sun-dried for 2 days, then rubbed with a clean cloth to remove excess mold spores, which are sifted off and discarded. The beans are now mixed with an 18 to 20% brine solution (4 to 6 liters of brine for every 1 kg of dry soybean koji) in 2-foot-deep earthenware or wooden crocks, which are put outdoors in the sunlight; they are left open by day [unless it rains] and covered at night. The contents are stirred from time to time and allowed to stand for an average of 1 month (minimum 2 weeks; maximum 1 year)... After fermentation is completed, the mash is brought to a boil (some fresh water being added if necessary), then filtered and lightly pressed to extract the flavorful liquid. The residual solids are mixed with several times their volume of 20% brine, boiled for several hours, and filtered again to yield the second extract. The process of adding brine, boiling, and filtering is repeated one to three more times to yield lower-grade extracts. The final residue cake, which contains very little flavor or nutrients, is used as livestock fodder. The liquid obtained from each extraction is further processed separately to provide different grades of kechap. Nitrogen (or protein) content is one of the criteria used in determining kechap quality. Grade 1, usually made from the first extract, must contain at least 6% protein...

“Next, 40 to 50 parts by weight of palm sugar is caramelized until it is light yellowish brown, then combined with 100 parts by weight of one of the extracts, together with various spices and herbs, the most important of which is star anise (*Illicium verum* or *I. anisatum*; called *pekak* or *bunga lawang* in Indonesian), the licorice-flavored tan seeds of a dry 8-pointed star-shaped fruit of an evergreen tree native to China and widely used in Chinese cookery. Also used are coriander, fennel (*adas pintang*), and sliced garlic, all

of which are dry roasted. Sprigs of lemongrass, laos, and/or salam leaves may be added fresh. Some makers also add a fish sauce or extract (*sari ikan*) and/or bouillon, plus wheat flour or cassava flour thickeners. The mixture is now brought to a boil and concentrated by simmering for 4 to 5 hours; finally it is filtered through cheesecloth and stored in tanks, from which it is ladled manually via a funnel into small glass bottles bottle and hand capped. Bottles containing first and second grade kechap have a red label, while lower-grade extracts have a black label.”

“Most Indonesian kechap is made in small-scale cottage industries. Of the 408 producers, 205 are located in West Java, 131 in Central Java, 68 in East Java, and 4 in Jakarta. The largest and most modern factory is the A.B.C. Kechap Factory, Tangerang, Jakarta.” Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

5650. Shurtleff, William; Aoyagi, Akiko. 1979. The book of tempeh: A super soyfood from Indonesia. Professional hardcover edition (Continued). New York, NY: Harper & Row. 248 p. Illust. by Akiko Aoyagi Shurtleff. Index. July. 28 cm. [190 ref]

• **Summary:** Continued: Numbered figures (line drawings unless otherwise stated. The capital letter before the decimal refers to the appendix number). B.1 Table: Tempeh shops in Indonesia by province: Home-industry scale. B.2 Table: Relative frequency of tempeh consumption in Indonesia (by province). B.3 Carrying tempeh to market in Java using a shoulder pole and trays stacked on two baskets. B.4 Cost of one day's supply of protein in Indonesia.

C.1 Table: Edible grain legumes. C.2 Map: Distribution of legumes in southeast Asia. C.3 Winged bean, showing leaves, pods, flowers and beans. C.4 *Leucaena* leaves and pods (*peté china*). C.5 Reduction in bongkre toxicity from bongkre acid during fermentation (Ko 1977). Okra. Packets of tempeh, ready to sell, wrapped in leaves and tied. A large soybean, with hilum showing.

D.1 Table: Soybean production in Indonesia (1950-1976). D.2 Table: Major Indonesian food crops, D.3 Table: Indonesian soybean production and yields (by province). D.4 Map: Major soybean producing districts in Java (1976; most are in East Java, led by Jember and Pasuruan). Table: Daily per capita consumption of tempeh (by province, led by Central Java, then West Nusa Tenggara, Yogyakarta, and East Java). Table: Percent of dietary protein supplied by major food categories (led by cereal grains, then fish, nonlegume vegetables, and soy products). Table: Percentage of dietary protein supplied by soy products (by province, led by Central Java, then East Java, Yogyakarta, and West Java). D.5 Table: Statistics on production and consumption of basic Indonesian soyfoods (led by tempeh, then tofu, kechap, tauchō). D.6 Star anise. Grinding soybeans for tofu using traditional push-pull stone mills. Pouring soy curds into cloth-lined forming box. Javanese shadow puppet (*wayang kulit*).

Table: Classification of *Rhizopus oligosporus*. E.1 Two stages in the germination of a spore (after 1½ and 10 hours). E.2 Two successive views of hyphal tip growth at half-hour intervals.

E.3 *Rhizopus oligosporus* (Frazier 1957, showing sporangium, columella, apophysis, sporangiophores, stolon, sporangiospores, node, rhizoid). E.4 *Rhizopus stolonifer*. A. Columella and attached spores. B. Collapsed (invaginated) columella (Webster 1970).

E.5 Life cycle of *Rhizopus* (Raven and Everet 1976). E.6 Graph: Changes in tempeh oil and moisture content during fermentation (Sudarmadji 1977). E.7 Graph: Three phases of tempeh fermentation (rapid, transition, and deterioration; Sudarmadji 1977). E.8 Graph: Changes occurring during tempeh fermentation (temperature, soluble solids, pH, soluble nitrogen, and reducing solids; Steinkraus et al. 1960). E.9 Graph: Yields of tempeh and of solids and different stages of the fermentation process (100 gm of whole dry soybeans yield 173 gm of tempeh on average; Steinkraus 1960; Murata 1967). E.10 Table: Loss of solids and protein during tempeh fermentation. E.11 Table: Percentage changes in composition of key essential amino acids during tempeh fermentation. E.12 Table: PER (protein efficiency ratio, a measure of protein quality for humans) changes during tempeh fermentation. E.13 Graph: Changes in concentration of three carbohydrates during tempeh fermentation (sucrose, stachyose, and raffinose, all decrease; Shallenberger et al. 1976). E.14 Table: Amount of B-complex vitamins in 100 gm of tempeh vs. 100 gm unfermented soybeans (all increase in tempeh except thiamine {vitamin B-1}). Changes in peroxide value and TBA value tempeh and soy flour during storage at 37°C (98.6°F; both rise rapidly in soybeans, but stay near zero and stable for tempeh; Watanabe et al. 1971).

H.1 Table: Foods known in Indonesia as “onchom” (made from peanuts or soybeans). H.2 Selling onchom in a Javanese market. H.3 Graph: Changes in soy onchom during fermentation (temperature, soluble solids, pH, soluble nitrogen, and reducing solids; Steinkraus et al. 1965). H.4 Flowchart for preparation of peanut presscake onchom. Unnumbered illustrations show 12 steps in the process of making onchom in a commercial shop in Indonesia. *Neurospora*: Budding conidia, conidiophore. H.5 Graph: Reduction in onchom aflatoxin during fermentation with *Neurospora* (Ko 1974). A thermometer, showing both Fahrenheit and Centigrade.

Glossary of Indonesian foods, spices, etc. Agar. Amaranth, Indonesian. Apem. Arak. Aren sugar. Aromatic ginger. Asam. Bananas (pisang). Basil. Bawang merah. Bawang putih. Bayam. Bean sprouts. 5651. *Soycraft (Greenfield, Massachusetts)*. 1979. Soyfoods at San Francisco's New Earth Exposition. 1(1):4. Summer.
• Summary: "The Soycrafters Association of North America was offered the free use of a booth at the New Earth Exposition in San Francisco from March 15-18. The booth was manned by Bill Shurtleff, Akiko Aoyagi, Larry Needleman, and friends from Quong Hop Tofu Company. Over 50,000 people attended the exposition and an estimated 12,000 visitors stopped by the booth and tasted free samples of Creamy Tofu Dip and slices of Tofu Burgers and Teriyaki Tofu, all prepared by Quong Hop. Over 6,000 "What is Tofu?" pamphlets were given away and Bill Shurtleff gave two one-hour slide presentations about soyfoods, protein, and world hunger on the main Exposition stage to an audience of 400. Down the aisle, the Gilman Street Gourmet had a large booth where over 3,000 tofu burgers were sold while The Farm [Farm Foods] sold delectable soymilk ice cream (Soy Ice Bean), tofu salad [like an eggless egg salad], and tofu cheesecake."

5652. **Product Name:** Tofu Turnover.
Manufacturer's Name: Tumaro's, Inc.
Manufacturer's Address: Los Angeles, California.
Date of Introduction: 1979. July.
Ingredients: Crust: Whole wheat flour (organic), corn oil, water, sea salt. Filling: Tofu, mung bean sprouts, celery, green peppers, onions, shoyu, arrowroot, ginger, garlic, pepper.
How Stored: Refrigerated.
New Product–Documentation: Recipe given by Shurtleff & Aoyagi. 1979. *Tofu & Soymilk Production*. p. 165.

5653. **Product Name:** Missing Egg Salad.
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Tofu (organically raised soybeans, filtered water, nigari salt bitterns), celery, dill pickles, tofu mayonnaise, shoyu, prepared (wet) mustard, honey, granulated onion, granulated garlic, granulated kelp, turmeric, poppy seeds, dill weed, paprika.
Wt/Vol., Packaging, Price: 10 oz deli container. Retail for \$1.43.
How Stored: Refrigerated.
New Product–Documentation: Label. 1981. 2.5 by 2.5 inches. Paper. Brown on tan. Wings on chicken legs illustration. Shurtleff & Aoyagi. 1979. *Tofu & Soymilk Production*. p. 163. "White Wave in Boulder, Colorado, uses the following recipe for their Missing Egg Salad. Parboil 48 pounds of tofu for 7 minutes and drain very well. Add tofu and the following ingredients to a VCM: 2½ bunches celery, chopped; 3 pounds chopped dill pickles; 13 cups Tofu Mayonnaise, 2¼ cups shoyu; 14 ounces prepared (wet) mustard; ¾ cup honey; 9 tablespoons granulated onion; 5½ tablespoons granulated garlic; 4½ tablespoons granulated kelp; 3 tablespoons turmeric; 1 tablespoon poppy seeds; 9 teaspoons dill weed; and 4 teaspoons paprika. Mix briefly on low speed to preserve chunks. Yields 56 pounds. Sold in 10-ounce containers for \$1.43 retail or sold on a tofu salad sandwich for \$1.25 retail by Grateful Sandwiches in Denver; their best seller!"

5654. **Product Name:** Tofu Turnover (with Spinach).
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Crust: Whole wheat flour, water, salt. Filling: Tofu, spinach, mushrooms, nutritional yeast, chopped onion, oil, shoyu, sesame salt, dill weed.
How Stored: Refrigerated.
New Product–Documentation: Recipe given by Shurtleff & Aoyagi. 1979. *Tofu & Soymilk Production*. p. 165. This was one of America's earliest refrigerated tofu entrees.

5655. **Product Name:** Marinated Tofu Cutlets.
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.
Date of Introduction: 1979. July.
Ingredients: Firm tofu. Marinade: Shoyu, water, granulated onion, granulated garlic, dark (toasted) sesame oil, powdered ginger, cayenne.
How Stored: Refrigerated.

New Product–Documentation: Recipe for this non-fried product is given by Shurtleff & Aoyagi. 1979. Tofu & Soy milk Production. p. 166.

5656. Flinders, Carol. 1979. Tofu, a soyfood, captures food writer's interest: Notes from Laurel's Kitchen. *Hartford Courant (Connecticut)*. Aug. 8. p. 2A.

• **Summary:** This article is almost identical to one by the same writer titled "Soybean key to world food plight? Notes from Laurel's Kitchen" published in *Rocky Mountain News* (Denver, Colorado) on May 16 (p. 24A).

5657. Lin, J.Y.; Wang, H-I.; Yeh, Y-C. 1979. The mutagenicity of soy bean sauce. *Food and Cosmetics Toxicology* 17(4):329-31. Aug. [15 ref]

• **Summary:** This is the first investigation of mutagens in shoyu. The Ames test was used. Mutagenicity was studied by adding various levels of nitrite to shoyu. Mutagenic material was formed in shoyu when 2000 ppm of nitrite was present at pH 3.0. Addition of ascorbic acid to the shoyu prevented the formation of mutagenic products. Address: Inst. of Biochemistry, College of Medicine, National Taiwan Univ., Taipei.

5658. Simonds, Nina. 1979. Chinese cuisine: Soybeans. *Gourmet* 39:28-29, 74-77. Aug.

• **Summary:** After a brief history of soya in China, gives recipes for: Fried soybeans [soynuts]. Sweet soybean milk. Stir-fried soybean sprouts red-in-snow (incl. how to sprout soybeans). Braised soybeans and meatballs. Sparerib and soybean sprout soup. Stuffed wheat gluten balls with soybean sprouts (*Mien Chin Jou Yüan*). Braised bean sticks [*fu tsu*; dried yuba sticks] with black mushrooms. Buddha's delight (*Lo Han Su Ts'ai*). Stuffed bean curd rolls. Sweet-and-sour fish in bean milk skin [yuba]. Bean milk skin (*fu p'i*) and eggplant rolls.

5661. Esko, Wendy. 1979. Introducing macrobiotic cooking. Tokyo: Japan Publications. 144 p. Foreword by Aveline Kushi. Preface by Edward Esko (both written June 1978). Illust. by Bonnie Harris. Index. 26 cm. Reprinted in 2006 by Square One Publishers (Long Island, NY, 240 p.).

• **Summary:** The author was introduced to macrobiotics in upstate New York in about 1971. This is her first book on macrobiotics. It was originally published under the title of *An Introduction to Macrobiotic Cooking* by the East West Foundation, 17 Station Street, Brookline, Massachusetts 02146. Though copyrighted in 1978, the first edition appeared in Sept. 1979. The fourth printing was May 1981.

The chapter titled "Beans including tofu and natto" gives descriptions of and recipes for making: Japanese black beans (black soybeans, p. 54; "These beans are therapeutic for the sexual organs and will relieve an overly yang condition caused by too much animal food or fish.") Soybeans (p. 54. "These beans are the most yin of the bean family... It is recommended that soybeans be eaten only occasionally as a separate side dish. Because they are very yin, they should be cooked with yang vegetables such as lotus root or burdock, for balance. The best way to eat soybeans is in the form of *tofu*, *okara*, *natto*, *tempeh*, and, of course, miso and tamari.") Tofu, and Homemade tofu (curded with nigari, p. 54-55). Okara (p. 55-56). Tofu and corn. Tofu, onions and water cress. Dried tofu (dried-frozen, p. 57). Yuba (dried soy milk; how to make at home). Vegetables and dried soy milk (p. 57). Ganmodoki (Tofu and jinenjo patties, p. 57-58). Natto (description and how to make at home, p. 58-59).

Other soy-related recipes include: Tofu soup (p. 68). Miso soup (p. 69-70, basic, or quick). Watercress miso soup (p. 71). Daikon and sweet rice dumpling soup (with miso). Chinese cabbage and tofu miso soup (p. 71). Aveline Kushi's miso stuffed lotus root (p. 86). Tofu dressing (p. 91). Miso-tahini spread (p. 92). Miso-sesame spread (p. 92). Miso-lemon sauce (p. 93). Tofu dip (p. 93). Miso with scallions (p. 95). Tamari (description, p. 95). Tekka (made with Hatcho miso, p. 96). Miso pickles (p. 100-01). Tamari pickles (p. 101). Tofu plaster (p. 130). Ume-Sho-Kuzu drink (with umeboshi, tamari and kuzu, p. 131). Ume-sho-bancha (with tamari, p. 131). Use of tamari, miso, and tekka (p. 132).

Also includes instructions for making amasake at home (p. 116; it is a natural sweetener made from fermented sweet rice), and a recipe for Amasake bread (p. 107), instructions for making seitan at home (p. 46-47, using 3½ lb of hard spring or hard winter whole wheat flour; spring wheat flour produces a much softer texture of seitan than the winter variety), and recipes for seitan stew, seitan-barley soup, sauteed vegetables and seitan, stuffed cabbage with seitan, and seitan croquettes (p. 47-49), plus recipes for leftover seitan (p. 125). Address: East West Foundation, near Boston/Cambridge, Massachusetts.

manual]. Taipei, Taiwan: American Soybean Assoc. 130 p. Sept. [Chi]*
Address: American Soybean Assoc., Taiwan.

5664. Nathan, Joan. 1979. The venerable soy sauce from Vietnam. *Washington Post*. Oct. 4. p. E1, E3.

• **Summary:** After the fall of Saigon in 1975, Vietnam no longer exported goods to the United States. So Vietnamese living in the USA were no longer able to buy their traditional soy sauce, named Tuong, a key ingredient in many Vietnamese recipes. Tuong is quite different from its Japanese or Chinese counterparts. It is "much lighter in color and thicker in consistency, with a slightly sour taste."

Now Tuong is being made in Bowie, Maryland (in the Ardmore Industrial Park), by Hoang Van Chi (a chemist) and his wife Hoang Phan. Many relatives have helped them to start the small business named Vietnam Food and Drink.

Their first shipment, in June 1975, was 4,000 pounds, sent to Paris where the largest community of expatriate Vietnamese live. "The second shipment went to California and the third to Texas."

Tuong is not used in place of salt as is soy sauce in Japanese and Chinese cookery. For that the Vietnamese use Nuoc Mam, made by layering fresh fish and salt, in alternating layers, in barrels

Describes briefly how Tuong is made and gives three Vietnamese recipes: (1) Dau phu ran cham tuong (Fried tofu dipped in Vietnamese soy sauce). (2) Bo tai tuong gung (Steak with soy sauce and ginger). (3) Banh xeo (Pork, shrimp and vegetable pancake / omelet).

Before becoming a voluntary exile in 1959, Hoang Van Chi wrote his classic book *From Colonialism to Communism*.

A photo shows Hoang and his wife holding bottles and jars of their soy sauce.

5665. Barton, David. 1979. Foods from the Far East. *Whole Foods (Berkeley, California)*. Oct. p. 28-34, 54.

• **Summary:** Mutual Trading Co. is making 500 tons of miso a year, and this is expected to increase by 10-15% in 1980. Their miso sales are up 300% in 5 years. Erewhon wholesale sales by product for the year ended June 1979 were: Miso \$100,000, shoyu \$200,000, tofu \$110,000. Japanese trade commission figures for 1978 natural food imports are: Miso \$625,528, and shoyu \$1,466,909.

5666. **Product Name:** Seitan.

Manufacturer's Name: Rising Tide Natural Market.

Manufacturer's Address: Long Island, New York.

Date of Introduction: 1979. October.

Ingredients: Incl. wheat gluten, soy sauce.

How Stored: Refrigerated.

New Product-Documentation: Barbara and Leonard Jacobs. 1985. *East West Journal*. Oct. p. 38-39. "Flour

power! Cooking with seitan, the delicious natural food from grain." "Michael Vitti of Rising Tide Natural Market in Long Island has been making seitan commercially for six years [i.e. since about Oct. 1979]. He has seen a 400% increase in his sales over this time. He makes several different varieties of seitan, using a number of spices in addition to a plain soy sauce base. About one-third of his production is bought by another company for use in making sandwiches."

Barbara and Leonard Jacobs. 1987. *Cooking with Seitan: Delicious Natural Foods from Whole Grains*. Current U.S. seitan manufacturers include Rising Tide Natural Market in Long Island, New York.

Talk with Lenny Jacobs. 1992. May 19. Michael Vitti is still making a very good seitan product at Rising Tides Natural Foods in Locust Valley, New York, in Long Island.

• **Summary:** Jeri (Kui Yun) Sipe, born in Taiwan, was given to foster parents when only 40 days old because of her natural family's poverty. From age 9, she was forced to cook for these parents (with regular whipping) until she was farmed out at age 12 to aunts who paid her natural parents \$2 a day for her services. At age 19 she ran away and hid in her sister's house, until her sister found her work with a master who had two wives and a family of 13 in Hillsboro, Oregon.

Neither wife was happy with her cooking. In the years that followed she learned to cook many kinds of cuisine for her master. "The great turning point in her life came in 1964 when she met her husband, James Sipe, of Bellingham, Washington." She was a waitress in an officers club and he was an electrical engineer. In a story not unlike Pygmalion, he taught her to read, write, and speak good English. They lived in Seattle, Washington, had three children, and entertained regularly on a large scale. She never lost her enthusiasm for cooking.

A recipe for Sesame chicken wing appetizers calls for: "1 tablespoon salted black beans... 2 cloves garlic, crushed. 2 slices fresh gingerroot cut into very fine shreds. 3 tablespoons dark soy sauce... ½ teaspoon monosodium glutamate, optional." Then: Crush the beans, add 1 tablespoon of water and let stand.

• **Summary:** A glossary titled "Odds and Ends" (p. 32-33) contains entries for tamari, miso soybean paste, and tofu. Soy-related recipes include: Rye oatmeal soy bread (p. 69). Soybean casserole (p. 142). Soy flour and grits are discussed under "Complementary protein proportions" (p. 113). Page 117 notes that soybeans should be cooked for 3 hours or more, soy grits for 15 minutes. Address: Eau Claire, Wisconsin.

5673. White Wave Soy and Natural Foods. 1979. Product price list: Winter. 3869 Walnut St., Boulder, CO 80301. 6 panels. Catalog. Dec.

• **Summary:** Soyfoods: Nigari tofu (bulk, packaged, doufu [extra firm Chinese style]). Salad dressings (mellow miso salad dressing, hearty miso salad dressing). Tempeh. Soysage. Tofu Mayo. Savory baked tofu. Polar bean (banana-

carob soy ice cream).

The company also sells sesame products (raw tahini, roasted tahini, sesame butter, sesame salt), peanut butters (salted or unsalted; crunchy natural, creamy natural, Valencia {crunchy or creamy}), more nut and seed butters (roasted almond butter, raw cashew butter, roasted cashew butter, roasted sunflower butter), and tamaried nuts and seeds (tamaried almonds, tamaried cashews, tamaried Spanish peanuts, tamaried sunflower seeds, and tamaried nut mix [a blend of peanuts, sunflower seeds, cashews, and almonds]). Note: This is the earliest English-language document seen (April 2012) that uses the word "tamaried" to refer to nuts and seeds that have been seasoned with tamari soy sauce and then baked.

"White Wave was founded in 1977 upon the principle of supplying the Rocky Mountain region with high quality protein foods. As these foods are an extension of our own lifestyles, we offer only products we personally feel are wholesome and nutritious. It is our pleasure to guarantee the quality of all our products. All foods carrying a White Wave label are made solely by us. We thank you for supporting our business. The Folks at White Wave." Address: White Wave, 3869 Walnut St., Boulder, Colorado. Phone: 303-443-3470.

5674. **Product Name:** Tamaried Nuts and Seeds [Almonds, Cashews, Spanish Peanuts, Sunflower Seeds, or Nut Mix].
Manufacturer's Name: White Wave.
Manufacturer's Address: 3869 Walnut St., Boulder, CO 80301.

Date of Introduction: 1979. December.
New Product–Documentation: Product Price List. 1979, winter. One category of products made and sold by White Wave is "Tamaried nuts and seeds," including tamaried almonds, tamaried cashews, tamaried Spanish peanuts, tamaried sunflower seeds, and tamaried nut mix (a blend of peanuts, sunflower seeds, cashews, and almonds). 25 lb. "All are made with traditional 2 year Japanese soy sauce."

Note: This is the earliest English-language document seen (March 2012) that uses the word "tamaried" to mean "seasoned with tamari."

5675. **Product Name:** Defatted Soy Flakes [Untoasted, or Heat Treated].
Manufacturer's Name: Archer Daniels Midland Co.
Manufacturer's Address: Box 1470, Decatur, Illinois 62525.

Date of Introduction: 1979.
New Product–Documentation: Manufacturer's catalog. 1987. For use in protein extraction (HVP, etc.).

5676. **Product Name:** Captain Organic Vital Burgers (Meatless Burgers).
Manufacturer's Name: Captain Organic.
Manufacturer's Address: P.O. Box 606, Hermosa Beach,

California.

Date of Introduction: 1979.

Ingredients: Incl. tofu, lentils, rice.

Wt/Vol., Packaging, Price: Paperboard box.

How Stored: Frozen.

New Product–Documentation: Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. This frozen veggie-burger, introduced in 1979, was the first soy product he ever developed. It was on the market until 1983, made with tofu, lentils, and rice. Another similar product of his was made with garbanzos, zucchini, and millet; it contained no tofu. He made the products in his own plant, and bought the tofu from Mr. Yamauchi of Hinode Tofu Co. He mixed the ingredients, put them through a patty machine, and then froze them. They were not fried. On the package was a cartoon of Captain Organic. Andrew's forte is sales and marketing; he has worked with distributors and brokers in the natural foods industry for 12 years. In the early days he worked with a yogurt company named Natural and Kosher, then went to a distribution company named Nature's Food Farms, then spent 4 years at a brokerage named MBA and Associates where he represented a lot of soy lines like Legume and Pizsoy. In 1988 he went to Westpico Foods, which is a kosher poultry and secondary frozen supermarket distributor and he got a lot of perishable natural foods into supermarkets in southern California. From there he started Heart and Soul because he was competing against Cedarlane and Soy Power, who had their brands. One he was a vicious competitor of Cedarlane; now he works very closely with them.

5677. **Product Name:** Soup Bases.

Manufacturer's Name: Custom Food Products, Inc.

Manufacturer's Address: 3127 W. Chicago Ave., Chicago, IL 60622.

Date of Introduction: 1979.

New Product–Documentation: *Soybean Digest Bluebook*. 1979. p. 94.

5678. **Product Name:** Granose Frikalets. Soya Rissoles in Onion Sauce.

Manufacturer's Name: Granose Foods Ltd. (Marketer). Made in Denmark by Nutana Helsekost.

Manufacturer's Address: Stanborough Park, Watford, Herts., WD2 6JR, England.

Date of Introduction: 1979.

Ingredients: Rissoles: Textured soya protein (textured soy flour), oat flakes, onion, egg white powder, hydrolised vegetable protein. Sauce: Onion, soya oil, wheat flour, maize starch, soya sauce, salt, hydrolised vegetable protein, yeast, spices, monosodium glutamate.

Wt/Vol., Packaging, Price: 425 gm (15 oz) can.

How Stored: Shelf stable.

New Product–Documentation: Manufacturer's catalog.

1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. Label. 1980, undated. 9.5 by 4.25 inches. Full color, mainly beige, blue, and white. Photo shows 2 burgers or rissoles with peas and carrots. "Ready to serve. Granose frikaletts need only to be heated in their own sauce. Serve with potatoes and other vegetables for an easily prepared meal." Labels in Danish, Dutch, and Finnish.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by Nutana, was introduced in 1979. It has been discontinued.

5679. Ko, Tokubo. 1979. Kankoku no hakkô shokuhin [Korean fermented foods]. *Hakko to Kogyo (Fermentation and Industry)* 37(3):202-11. [75* ref. Jap]

• **Summary:** Shoyu and varieties of miso: 1. Historical background: The major foods used in Korea that contain soy are soy sauce (kan jang), soybean miso (doen jang), and red-pepper miso (kochu jang). Also there are jonkutsu jang, tamusu jang (makujang) and jupu jang. The suffix jang is the same as the Chinese chiang and the Japanese hishio, meaning mash. The origins of the varieties of shoyu and miso are not clear. But there was a character, tojang, in "Ronko" which was written by Oju? of the Gokan period. Also, there are some references to jang in the Analects of Confucius (Lun yu; Jap. Rongo). They indicate that jang existed years before Christ. In the "Kaitoyakushi?" there is a quotation from "Shintosho?" (618-907) that "shi" (fermented black soybeans or misodama) was a well known product of Bokkai (north of the Yellow Sea) in those days (Sakueki). It is thought that jang first appeared in Manchuria (Manshu was called Kokuri in those days) where soybeans were originally grown. Soybeans later spread to China and Japan.

In Korea the oldest record of any variety of jang was found in *Sangokushiki* (683) as "shôshi?". This indicates that people were already making shoyu and miso quite early on. In the *Ch'i-min yao-shu* (AD 530-550) a method of shi (or kaki) making was recorded. We guess that shi was the predecessor to today's meju (= misodama). The classic book *Kyukosetsuyo?* that was compiled in 1554 (Richo? period–Meisoo 9) is the oldest book that contains the techniques for making the Korean varieties of jang. About 8 different methods of production were recorded, amongst them the sink gan (chinjangho) and zojangho methods. In those days, meju (= misodama) was called misho. It is written that they steamed the soybeans, roasted and ground the wheat, then mixed the soy and the wheat in a 2:1 ratio. From this they made koji and dried it in the sun. That method was very similar to the koji-making method used in Japan. In Japan it was called kokori, hishio, or misho. Later, shoyu became known as jang? Miso became massho? and then returned to being called misho. Address: Presently: Tokyo Daigaku Biseibutsu Kenkyusho #3 Kenkyubu. Formerly: Seoul, South Korea. Tokoku Daigaku Shokuhin Kogakubu.

5680. Kohler, Jean Charles; Kohler, Mary Alice. 1979. Healing miracles from macrobiotics: a diet for all diseases. West Nyack, New York: Parker Publishing Co. 290 p. Index. 24 cm. [70* ref]

• **Summary:** This book is by and about people who were cured of cancer, apparently by following a macrobiotic diet, lifestyle, and worldview.

Miso soup is mentioned on pages 29, 30, 112, 122, 161, 169, 173. Miso-tahini spread p. 208. Miso, tekka, p. 131. Shoyu, p. 169. Soybeans, p. 122, 169. Soy ice cream, p. 214. Tamari, p. 112, 169. Tofu, p. 179. Seitan is mentioned on pages 202, 216, and 218.

The index also contains many entries for seaweed (edible), sesame oil, sesame seeds, sugar, sunflower seeds, tahini, umeboshi plum, vegetarian diets and nutrition, Zen, etc.

At age 16, while visiting a shrine in Akita (in northeastern Japan), Michio Kushi had a profound spiritual experience, which is described at length (p. 88). "I saw... that everything was being; everything was radiating light. I could then understand that everything is living, everything is breathing, including plants, grasses, trees, birds, and even houses, stones, and soil; everything without exception. Then I understood that life is nothing but light and vibration, or waves, and the universe is full of life, and is one continuity, yet is manifested in everything and every being."

Jean Charles Kohler (husband) was born in 1916 and Mary Alice Kohler (wife) was born in 1917.

5681. **Product Name:** The Original Fried Rice Sandwich (With Tofu).

Manufacturer's Name: Natural Cafe.

Manufacturer's Address: 1494 Cerrillos Rd., Santa Fe, NM 87501.

Date of Introduction: 1979.

Ingredients: Organic brown rice fried with scallions and soy sauce, wrapped in a whole wheat tortilla with steamed organic carrots, alfalfa sprouts, miso tahini sauce, tofu, green leaf lettuce.

Wt/Vol., Packaging, Price: 10 oz. Retails for \$2.95 (1988).

New Product–Documentation: Label sent by Paul Duchesne. 1989. Aug. 11. Handwritten "Naturally delicious. Made fresh today. To eat; peel back wrapper from one end." When Paul went to Boston, he taught Barbara and Marty Roth how to make the Brown Rice & Tofu Sandwich. (Barbara's maiden name was Svenning; she married Jack Garvey then lived for years with Marty Roth.) After he left, they made it for a while. Then they began as a restaurant in Santa Fe, New Mexico based on a this sandwich. At one point they were making their own tofu, sprouts, and chapatis. When Barbara separated from Marty (they were never officially married), she moved to Black Mountain (near Asheville), North Carolina, where she continued to make a

line of tofu sandwiches.

Talk with Martin Roth. 1989. Aug. 17. He learned how to make The Original Fried Rice Sandwich (With Tofu) from Paul Duchesne at the macrobiotic study house on Boylston St. in Brookline, Massachusetts. In about 1979 Martin (unable to convert his macrobiotic house to a Zen center) moved to the Bodhi Mandala Zen Center in Jimenez, New Mexico. He was the head cook (Tenzo) for a while. Then, forsaking Zen for tofu, he and Barbara Svenning Garvey moved to Santa Fe into the Linda Motel on Cerrillos Rd. They got a room with a stove, and then persuaded the Santa Fe Health Inspector to certify the room as a facility for tofu sandwich production. They fried the rice and made the chapati-wrapped sandwiches early each morning, wrapped them in plastic, and delivered them to the local co-ops and health food stores. The sandwiches soon became very popular (they were selling 30-50 a day, six days a week), so they expanded into an apartment and decided to start a natural foods manufacturing and distribution company named New Mexico Natural. In the apartment they made the sandwiches, and started to make tofu, mochi, sweet white miso, sauerkraut, pickles, amasake, etc. In late 1979 or early 1980, as the sandwich grew even more popular they bought an old Mexican restaurant in Santa Fe named El Charro and converted it into a natural foods and macrobiotic restaurant called the Natural Cafe, based on the brown rice and tofu sandwich which evolved into the Fried Rice Plate (with tofu) and remained their most popular item. They were purists and self sufficient. All ingredients were organically grown and they used only spring water, even in their ice cubes. They made their own tofu from soybeans, their own miso, and their own chapatis from wheat. They grew their own sprouts and ground their own sesame seeds for the sauce. They made seitan and sold seitan burgers. As the restaurant business demanded more and more of their time, they decided to discontinue the distribution company.

At one point Martin considered starting a tofu shop, but a rebuff from a local Japanese restaurant, the fact that they were too busy with other things, and the availability of good tofu from Kathryn Peterson Bennett of Southwest Soyfoods (which she had started by June 1978) led him to drop the idea. But they sold miso out of the restaurant as a commercial product. At the restaurant they also made and sold amasake, amasake shakes (which the Mexican men loved, and called "chakes"), and amasake ice cream. Martin believes this was America's first amasake ice cream.

In 1981 Martin and Barbara sold the restaurant to one of their employees; it still exists under the same name. Then they went to Boulder for several months, then to Miami for several months, then to North Carolina, where they stayed for several years while Martin helped to start Great Eastern Sun. In about 1985 they separated and Barbara moved back to North Carolina.

5683. **Product Name:** Seitan, Chili (with Seitan), Tamale Pie (with Seitan), Sandwiches with Seitan, Basmati Rice Salad (Curried with Seitan), and Seitan Pups.

Manufacturer's Name: Proteeno.

Manufacturer's Address: 19805 Valley View Dr., Topanga Canyon, California.

Date of Introduction: 1979.

New Product–Documentation: Talk with Ken Smith now living in Makawao, Maui, Hawaii. 1991. Dec. 8. He learned about seitan in a macrobiotic cooking class taught by Yvette Delangre in about 1971 in Hollywood, California. From 1974 to 1976 he studied macrobiotics in Boston. Then he returned to live in Topanga Canyon, near Los Angeles, where he started making and distributing seitan and seitan products 3 times a week to Mrs. Gooch's, Quinn's, and other places. The business was pretty low key; they were operating out of their home. His first traditional seitan was made with gluten, tamari, ginger, kombu, etc. Then he expanded into the other products shown above. The Seitan Pups, which were dipped in a batter and deep-fried, were based on the Tan Pops he had seen (and loved) in Boston. The business was doing well and customers loved the products. He made about 60 lb/week of seitan by washing high-protein wheat. The business only lasted for 4-5 months, and he was just in the process of getting labels printed. Then they sold their house, in part because a huge flood cut off his direct access to town.

5684. **Product Name:** Powdered Soybean Miso.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 3236 Boulevard, Colonial Heights, VA 23834. Phone: 804 / 520-1513.

Date of Introduction: 1979.

Ingredients: Soybeans, water salt (No wheat).

Wt/Vol., Packaging, Price: 44 lb (22 kg) metal cans.

How Stored: Shelf stable.

Nutrition: Moisture 5%, protein 33%, carbohydrates 25%, vegetable fat 14%, salt 20%. 332 calories per 100 gm. 6.08 gm glutamic acid per 100 gm.

New Product–Documentation: Product Data Sheet. 1982. Contents: Description. Ingredients. Composition. Amino acids per 100 gm. Characteristics. Application. Specific suggested uses. Packaging. Shurtleff & Aoyagi. 1983. The Book of Miso. 2nd ed. p. 239.

Letter (fax) from Norio Kushi. 1995. May 1. Steve Zoller says that San-J sells a miso powder, which they import from Japan. It has always been an imported product.

5685. Shurtleff, William. 1979. Names and addresses of makers of soy nuggets [fermented black soybeans] in Japan. Tokyo, Japan. 1 p. Unpublished manuscript. Handwritten,

pencil.

• **Summary:** Note: Daitokuji natto and Hamanatto are both traditional Japanese types of fermented black soybeans.

At Daitokuji they may start in mid-July or August. Daitokuji natto we call "Savory soy chunks." (1) Moriguchi Kakko Shokuhin. Phone: 076-491-3568 or 492-0682. Mr. Nakano Takazo. Ushiwaka-cho 22, Murasaki-taki, Kita-ku, Kyoto 603. They also make large and small bean natto in Kyoto.

(2) Moriguchi factory in Shiga prefecture. Phone: 07495-2-1165. Nagahama Kojo, Kao-do, Umi-cho, Sakatagun, Shiga-ken 526. Attention: Mr. Nakano Takazo. They have 40 years experience. Make 1,200 kg/year.

(3) Ikkyu, Daitokuji-nai [inside Daitokuji], Kita-ku, Kyoto. They make traditional Daitokuji natto but may be secret.

(4) Ikkyu-ji. Phone: 07746-2-0193. Aza-maki, Tanabe-cho, Kyoto-fu, 610-03. A second maker of Daitokuji natto. They seem to have taken the Ikkyu-ji name and started to compete with the original maker at Daitoku-ji. They make only 6 kegs a year, each keg holding 25 kg. 150 cm diameter and 75 cm deep. For temple and tourists. Only use the traditional process. Small scale. Makes ichi-mei Ikkyu-ji natto.

(5) Jofukuji natto. Are they in Nara?

(6) Tenryuji natto: Make at Tenryu-ji, Ukyo-ku, Kyoto—in Kyoto's Arashiyama district. Founded in 1339, it is the head temple of the Tenryu branch of Rinzaï Zen Buddhism.

Hama-natto—which we call "Savory soy bits." (1) The top scholar is Hiroshi Ito at the National Food Research Institute. Phone: 645-9911.

(2) Factory: K.K. Yamaya shoyu. Phone: 053-587-0621. Komatsu 4880. Hamakita-shi, Shizuoka-ken 434. Attn: Mr. Suzuki Tsumotsu. Mechanized koji. Old vats. Makes miso and shoyu too. 30 minutes from Hamamatsu by Enshu railroad. Office in Hamamatsu city, Naruko-cho 8.

(3) K.K. Hamana. Phone: 053-433-6211. Joko-cho 1356. Hamamatsu-shi 431-32. Attn: Saito Shigeo. Eigo no Okiai. Mr. Suzuki.

(4) Daifuku-ji. Phone: 05352-5-0278. Related to Tokugawa Ieyasu. Mikkabi-cho, Fukunaga, Inasa-gun, Shizuoka-ken 431-14.

(5) Horinji. Phone: 0534-71-0838. Mr. Matsuyama Gizen (very nice). Tomitsuka-cho 1976, Hamamatsu-shi 432.

(6) Yamaya (new, from July 1976). Mr. Suzuki. Zaimoku-cho 30, Hamamatsu-shi 430. Address: c/o Aoyagi, 278-28 Higashi Oizumi, Nerima-ku, Tokyo 177, Japan. Phone: (03) 925-4974.

5686. So, Enshi. 1979. Taiwan no hakkô shokuhin [Fermented foods of Taiwan]. *Hakko to Kogyo* (Fermentation and Industry) 37(2):102-12. [Jap; eng+]

• **Summary:** Includes a good map of Taiwan and its prefectures. In 1976 there were 433 soy sauce manufacturers

in Taiwan. Taiwanese divisions of grading soy sauce plants numbered as follows: A (Ko) class, 39; B (Otsu) class, 12; C (Hei) class, 223; others 159. They produced the equivalent of 1,681,870 dozen bottles/month. Each bottle contains 540 ml of soy sauce, so 12 bottles contain 6,480 ml or 6.48 liters or 1.712 gallons. Thus Taiwan produces 10.89 million liters a month or 130.71 million liters/year of soy sauce. This is equivalent to 2.878 million gallons a month or 34.53 million gallons a year. Taipei prefecture produced 46.8% of this total, followed by Changhwa prefecture with 10.7%.

Soy sauce was initially made by monks. Because they didn't eat meat, it gave them important protein and fat. Gradually, it became more popular and spread to all parts of China. Monks also transmitted the method of soy sauce production to Japan and all over East Asia. It is said that around 1230 A.D., the Zen monk, Kakushin of Kofukuji, Kishu Yura, went abroad to southern Sung in China and brought back to Japan fermentation methods of Miso and Kinzanji Miso.

There are 3 types of soy sauce produced and sold in Taiwan today: (1) Tou-yu, soy sauce (*daizu shoyu*) which originated in China, (2) Inyu, black bean sauce which is the traditional Taiwanese soy sauce, and (3) Chemically prepared soy sauce (*kagaku shoyu*) which was invented in Japan. Processing techniques for making Koji and pressure-straining methods have made great progress in recent years. Address: Kokuritsu Taiwan Daigaku Kyoju, Ken Nogyo Kagaku Kenkyu-jo sho-cho, Nôgaku Hakase.

5687. **Product Name:** Creamy Tofu Dressing [Italian, or Bleu Cheese].

Manufacturer's Name: Traditional Tofu.

Manufacturer's Address: Oakland, California.

Date of Introduction: 1979.

Ingredients: Italian: Tofu, water, vinegar, salt, soy sauce powder, fructose, onion powder, garlic powder, natural flavors, spices, vegetable gum. Blue Cheese: Tofu, water, vinegar, blue cheese powder, salt, soy sauce, onion & garlic powders, parsley other spices, calcium phosphate, vegetable gum.

Wt/Vol., Packaging, Price: 1 pint jar.

How Stored: Shelf stable.

New Product–Documentation: Label. 1981. 3.75 by 6 inches. Paper. Italian: Dark blue and white on yellow. Bleu Cheese: Dark blue and white on light blue. Shurtleff & Aoyagi. 1979. Tofu & Soymilk Production. p. 161.

5688. **Product Name:** Tamari [Traditional Wheat-Free Tamari, or Johsen Shoyu Tamari].

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1979.

Ingredients: Wheat Free: Whole soybeans, water, sea salt. Johsen Shoyu: Water, whole soybeans, whole wheat, salt.

Wt/Vol., Packaging, Price: 5 fluid oz (147 ml), 16 fluid oz (473 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1982. 6 by 3.5 inches. Paper. Red, green, black, and white on gold. Label. 1982. Wheat Free: 6.5 by 3.5 inches. Paper. Red, blue, green, grey, tan, black, and white. 5 fl oz. Label. 1982. Johsen Shoyu: 8 by 3.5 inches. Paper. Red, blue, green, tan, black, and white. 16 fl oz. "The words 'Tamari,' 'Shoyu' (shoyu), and 'Soy Sauce' are often used to describe the same product. The history of soy seasoning explains the product's evolution and name. Tamari—Centuries ago, the Japanese discovered the seasoning and nutritive benefits of the liquid that collected in hollows of soybean miso. Miso-tamari was the forerunner of all soy sauces. The natural food movement began calling premium or naturally brewed soy sauce 'Tamari...' Explains shoyu and modern soy sauce. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Letter from Gordon Bennett. 1987. Oct. Gives date as 1979. I had 1982.

5689. **Product Name:** White Tiger Tofu Sauce.

Manufacturer's Name: Westbrae Natural Foods.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1979.

Ingredients: Soy sauce (water, soybeans, wheat, seasalt), honey, vinegar, toasted sesame oil, lecithin, gum tragacanth, cayenne.

Wt/Vol., Packaging, Price: 10 fluid oz, 12 fluid oz (355 ml) bottle.

How Stored: Shelf stable.

New Product–Documentation: Two Labels (see next page). 1979. undated. 3.5 by 3.5 inches. Paper. Red, black, and white or green and yellow-orange. Stalking tiger illustration. 5.25 by 3.5 inches. Paper. Brown, blue, black, orange, white. Mt. Fuji logo illustration. Small tiger in title. **Ingredients:** Soy sauce, malt syrup, cider vinegar, honey, sesame oil, natural gum stabilizers, ginger, cayenne. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Westbrae Natural Wholesale Food Catalog. 1980. Spring. **Ingredients are now:** Tamari, honey, apple cider vinegar, toasted sesame oil, guar gum, gum tragacanth, cayenne. Letter from Gordon Bennett. 1987. Oct. Gives date as 1979.

5690. Aidoo, K.E. 1979. Studies on the koji process in soy sauce fermentation with mechanised solid state fermentation.

Thesis, Dep. of Applied Microbiology, University of Strathclyde, Glasgow, Scotland. *

Address: Univ. of Strathclyde, Glasgow, Scotland.

5691. Aihara, Cornelia. 1979. The calendar cookbook. George Ohsawa Macrobiotic Foundation, 1544 Oak St., Oroville, CA 95965. 253 p. [unnumbered]. Illust. by Nan Schleiger. Index. 17 x 24 cm.

• **Summary:** This macrobiotic cookbook is designed for cooking with the seasons. Breakfast and dinner menus are given for every day of the year. A glossary gives brief descriptions of the Japanese foods listed in the recipes. For example: “Tamari: traditional soy sauce (*shoyu*) made without chemicals. Tofu: curdled soy milk. Tekka: condiment of miso and vegetables cooked a long time.” All recipes are numbered.

Soy-related recipes include: 2d. Baked mochi with kinako. 4. Kombu, age, albi nishime. 5. Black bean nishime [these are almost certainly black soybeans]. 8. Amasake. 8a. Amasake kanten. 13. Natto with pickled daikon leaves. 18. Vegetable miso soup. 20. Mackerel with ginger miso. 28. Wakame miso soup. 32. Kidney beans with miso. 35. Onion miso. 46. Burdock, carrot and lotus root with oily miso. 60. Vegetable oden (with stuffed age). 63. Collard greens with age nitsuke. 64. Home-made age (deep-fried tofu). 73. Home made natto I and II. 75. Northern white beans with miso. 80. Home made tofu and nigari. 80a. Clear soup with tofu and shingiku [sic, *shungiku* = chrysanthemum leaves]. 80b. Tofu scallion miso soup. 82. Amasake cake with cream cheese frosting (3-layer, using 1 lb of dairy cream cheese). 87. Wheat gluten (made from 10 cups whole wheat flour and 4 cups unbleached white flour). 87a. Seitan (with wheat gluten and tamari soy sauce). 87b. Fresh wheat fu (with wheat gluten). 87c. Boiled fu. 87d. Fried fu (Gluten cutlet). 87e. Cutlet kabobs (with cooked wheat gluten). 97. Scallion miso. 100. Okara nitsuke (okara is “soybeans which are leftover after making tofu”). 132. Amasake cake. 135. Amasake yeasted doughnuts. 138. Vegetable kabobs with lemon miso sauce. 159. Koi-koku (carp soup with barley miso). 161. Amasake cake with fruit and nuts. 177. Buckwheat dumpling

miso soup. 183. Cooked vegetable salad miso ai (miso dressing). 191b. Tomato sauce with miso. Amasake cookies. 197. Onion cream miso soup. 199. Soybean soup. 220. Tofu, snow peas and white rice miso soup. 229. Cucumber with miso. 233. Fresh corn tortillas with scallion and oily miso. 236. Toasted rice balls with soy sauce or miso. 244. Barley miso soup. 245. Tekka [miso]. 251. Pan-fried eggplant with lemon-miso sauce. 257. Green pepper with sauteed miso. 259. Tofu with mustard sauce. 261. Goma tofu (made from sesame butter and a little tamari soy sauce). 263a. Parsley miso pickles. 263b. Miso pickles. 266. Amasake wedding cake. 274. Shingiku miso soup. 290. Tofu with kuzu sauce. 294. Soybean nitsuke. 304. Kombu, dried tofu, age nitsuke. 305a. Millet and soybean soup. 329. Amasake crescent cookies. 333. Tofu-egg clear soup with watercress.

The Acknowledgments section begins: “After the French Meadows Summer Camp sponsored by the George Ohsawa Macrobiotic Foundation in 1972, I looked over the menus of the meals I served at camp. In revising them, I had the idea to keep a one-year record of menus. I thought this would be a practical, everyday help for those people beginning to cook...

“Since then, seven years passed.” Address: Oroville, California.

5692. Aoki, Hiroshi; Ito, Kiyoe. 1979. *Chôri to daizu* [Cooking and soybeans]. Gakken Shoin K.K., Tokyo. 173 p. Illust. Index. 22 cm. [151 ref. Jap]

• **Summary:** Contents. I. Cooking and soybeans. II. Soybean molecules and soybean protein. III. Cooking and traditional soy protein foods. 1. Cooked whole soybeans (nimame), green vegetable soybeans (yude-mame, edamame), soy sprouts. 2. Roasted soy flour (kinako). 3. Tofu. 4. Deep-fried tofu pouches and tofu burgers (aburaage and ganmodoki). 5. Dried frozen tofu (kori-dofu). 6. Yuba. 7. Natto. 8. Tempeh. 9. Soymilk. 10. Miso (Miso soup, miso-ni, ae-mono). 11. Shoyu. IV. Cooking and new soy protein products. Address: 1. Prof., Otsuma Joshi Daigaku; 2. Prof., Tokyo Gaku Gei Dai.

5693. Barer-Stein, Thelma. 1979. *You eat what you are: A study of ethnic food traditions*. Canada: McClelland & Stewart, Ltd. xii + 13-624 p. Index. 23 cm. [550+* ref]

• **Summary:** This is largely a compilation of information from many other books and articles. On the cover is a color painting of The Gardener (or Vertumnus), from his series, The Four Seasons, c. 1590, by Giuseppe Arcimboldo (or Arcimboldi) of Milano.

In Chapter 12, on China, the section titled “Meats and alternates” (p. 110-13) notes that the soybean is called the “Chinese Cow” [sic, “Cow of China”] because of its versatility. Soybeans are used as whole dry beans and as sprouts, or they can be made into a firm white curd called “Chinese cheese” [sic], which can be used in many different ways. Soybean milk may be used in much the same way

that westerners use cow's milk. They are fermented to make the favourite condiment, soy sauce. "Bean curd sauce is fermented bean curd that is packed in jars and sold as red bean curd sauce or white bean curd sauce,..." Cantonese names for soy products are (p. 111-12): Mien chiang: A syrup-like sweet bean paste. Dow-foo (tofu). Foo yu (fermented tofu). Tiem jook (dried yuba, broken into pieces [sweet dried yuba sticks]). Wow doo [Wu dou]. Black soybeans. Dow see [doushi, fermented black soybeans]: Salted, fermented black bean paste [sic, fermented black soybeans] often garlic flavoured and used in small amounts as a condiment or seasoning.

In Chapter 30, on Japan, the section titled "Meats and alternates" (p. 336-37) notes that products made from soybeans include: (1) "Shoyu, a sweetish soy sauce made from wheat and barley [sic], soybeans, salt, and water." (2) Miso, or "fermented soybean paste," used mostly for flavouring soups [miso soup]. (3) Tofu, or soybean curd, is a staple in Japanese cookery. "Its smooth, custard-like texture and bland flavour make it an ideal ingredient. It is extremely versatile and readily absorbs other flavours. Many "restaurants in Japan take great pride in their tofu dishes."

In Chapter 31, on Korea, the section titled "Fruits and vegetables" (p. 350-51) discusses soybeans and their products at length. Soy sauce is used to season *kim* (nori) and other edible seaweeds. Soy sauce is an ingredient in "hot pepper mash" [*kochu jang*]. Soybeans are used to make "soybean mash" [*doen jang*]. Dry soybeans are roasted in an iron pot, then ground, and the roasted soy flour is used as a garnish over rice cakes [mochi] or plain cooked rice; children enjoy eating the coarser roasted bits that are sifted out of roasted flour or meal. Soybeans sprouts are eaten lightly cooked as a vegetable. Soybeans are also made into tofu (*tu bu*); a brief description of the process is given, in which the drained curds are left in their hemp bag to form a firm cake, which may be cut, dipped into soy sauce, or fried in sesame oil. "Oil can also be made from the soybeans, but it is not commonly used or prepared."

Although commercial soy sauce, made in factories, is now widely available, many Korean households still prepare their own soy sauce each fall. Boiled soybeans are pounded, molded into a cone shape, and set to dry until hard. They are then wrapped with rice straw, hung from eaves, rafters or ceilings, and allowed to ferment for several weeks [until they become *meju*]. During the winter, these fermented cones may be stored in huge rice-straw bags kept in a cool place.

In the spring, break the cone into small pieces and place in a large earthenware jar, nearly filled with water. Add salt, spices, red peppers, and a few charcoal lumps. Leave this in the sun for a few days [sic, 30-60 days] until the molded soybean chunks float to the top and the resulting liquid turns black. Ladle out and filter the black liquid, then boil it to make soy sauce. The solids remaining in the jar are used as soybean mash [after the charcoal is removed].

A portrait photo of the author, with a brief biography, appear on the rear cover and in the Introduction. Address: Ph.D. student, Ontario Inst. for Studies in Education, Toronto, Ontario, Canada.

5694. Berry, Mary. 1979. *Lea and Perrins Barbecue cookbook*. Cambridge, England: Martin Books. 96 p. Foreword by Julian Lea, Marketing, Sales, and Distribution Director, Lea & Perrins Ltd. Illust. (color). 22 cm.

• **Summary:** A book about barbecuing (more than you could want to know) and Worcestershire Sauce. Contents: Acknowledgements. Introducing barbecues: What is barbecuing all about, how to build your own barbecue, barbecues to buy, fuel for the barbecue, lighting the fire, cleaning and caring for the barbecue, safety first, barbecue extras, planning a party, how to buy and cook the basic meat and poultry.

Variety recipes: 28 recipes all of which call for meat, fish, or poultry.

Bastes, sauces, dips, marinades, and savoury butters: All recipes call for "Worcestershire sauce."

Good things to go with barbecues: Soups, salads and vegetables, sweets, and drinks. All recipes call for "Worcestershire sauce." Address: TV personality and cookery expert.

5695. Colbin, Annemarie. 1979. *The book of whole meals: A seasonal guide to assembling balanced vegetarian breakfasts, lunches and dinners*. Brookline, Massachusetts: Autumn Press. Distributed by Random House. 232 p. Illust. Index. 28 cm. Reissued in Feb. 1983 by Ballantine Books, NY. 28 cm. [88 ref]

• **Summary:** In this macrobiotic cookbook, note (despite the subtitle) that fish are used in some recipes, so it is not actually a vegetarian cookbook. The term "shoyu (natural soy sauce)" is used throughout. Contents: Part I: Theory: A kitchen philosophy. Where we are now. Choosing our food. Balance. Menu planning: General guidelines, food categories. In the kitchen: Cooking: why and how, setting up the kitchen, buying, storing, and preserving food, cutting vegetables. Special situations: Eating away from home, if you live alone, entertaining, the art of eating.

Part II: The practice. Using this book. Fall meals. Winter meals. Spring meals. Summer meals. Basic beverage recipes. Homemade bread. Appendix. Bibliography (24 cookbooks, 65 reference books and others).

Soy-related recipes include: Miso soup (with tofu, p. 69), Hiziki [Hijiki] with mushrooms and tofu (p. 74), Tofu-ginger dressing (p. 93), Miso-tahini spread I (p. 94), Oden stew (with fried tofu, p. 112), Fried tofu (p. 113), Miso-tahini spread II (p. 118), Tofu-miso spread (p. 127), Daikon with miso (p. 139), Cold tofu with garnish (p. 144), Tofu-sprout spread on toast (with alfalfa sprouts, p. 146), Tofu cream pie (p. 156), Scrambled tofu (p. 158), Noodles with tofu

and bean sprouts (p. 165; the type of “bean sprouts” is not specified), Miso-dill dressing (p. 172), Tofu mayonnaise (p. 182-83), Lemon-miso soup (p. 185), Peanut-apple-miso spread (p. 190), Tofu pickle spread (p. 191), Miso-dill dressing with tahini (p. 195), Miso-vinegar dressing (p. 204), Baked tomatoes with miso (p. 207), Tofu dip (p. 208), Miso dip (p. 209), Tahini-tofu dressing (p. 209), Tofu-mustard dressing (p. 213). Address: 365 West End Ave., New York City, NY 10024. Phone: 212-580-7121.

5696. Doyle, Rodger Pirnie. 1979. *The vegetarian handbook: A guide to vegetarian nutrition and foods*. New York, NY: Crown Publishers. x + 182 p. Illust. Index. 24 cm. [20+ ref]
• Summary: Table 3, “Daily food guide for vegan adults” (p. 30) recommends soy milk, tofu, and fermented soybean curd [fermented tofu].

The section titled “Weaning infants on vegan diets” (p. 40-44) also discusses soy milk and The Farm in Tennessee. Soy milk is also recommended for pregnant and lactating women (p. 54-55).

Chapter 9, titled “A pair of unusual diets,” discusses macrobiotic diets and fruitarian diets. The author is quite critical of a number of macrobiotic practices and teachings: Studies have shown nutritional deficiencies. Restricted intake of liquids may lead to kidney stones and kidney failure. “The greatest danger of a macrobiotic diet is not to adults but to newly weaned infants... Don’t wean infants on Kokoh... Wean them instead on either milk or fortified soy milk.”

Page 93 states: “Soybeans are among the most valuable of vegetarian foods, not only because of their high-quality protein but because they can be made into soy milk and tofu (soybean curd)... Two other soy products that are widely used in the United States are soy sauce and miso.” Pages 96-97 discuss soy milk and textured vegetable protein (TVP).

5697. Fukuo, Takeshirô. 1979. *Nihon kodai no ‘hishio’ no seishitsu ni suite—sono shôyu taru koto no teishô* [On the nature of hishio in ancient Japan—an essay on the soy sauce of the time]. In: Fukuo Takeshiro, ed. 1979. *Nihon Shi Senshû* [Anthology of Japanese History]. Osaka: Fukuo Takeshirô Sensei Koki Kinenkai. See p. 455-70. [Jap]*
• Summary: The prototype of soy sauce, a semi-liquid flavoring named *hishio*, was probably in use in Japan as early as the 8th century.

5698. Hsiung, Deh-Ta. 1979. *Chinese regional cooking*. New York, NY: Mayflower Books; London: Macdonald. 224 p. Illust. (chiefly color). Maps. 28 cm. 1st American ed.
• Summary: A superb and beautiful book, loaded with beautiful color photos printed on glossy paper. It identifies four regional schools: Peking (Northern school). Shanghai (Eastern School). Sichuan (Western school). Canton (Southern school). The Pearl River delta, with Canton as the capital of Guangdong (W.-G. Kwangtung) province, “is

undoubtedly the home of the most famous of all Chinese cooking styles... Because Canton was the first Chinese port opened for trade, foreign influences are particularly strong in its cooking.” Note: Likewise, what most Westerners have traditionally thought of a “Chinese cooking” comes from Canton.

Archaeological evidence shows that by 5000 B.C. the people of north China had begun to settle down, to farm, and to make painted pottery and cooking utensils. Written records first appeared in about 3500 B.C. “Later, during the Chou dynasty (11th century to 221 B.C.) soy beans were added to the Chinese diet” (p. 32.).

Northern soy-related recipes: Fried bean-curd [tofu] (with 2-3 cakes of bean curd) and a color photo of “A bean-curd factory run by a unit of the People’s Liberation Army on the outskirts of Peking” (p. 53). Rinsed lamb in fire-pot (with 2 cakes of bean curd, fresh or frozen, p. 68-71). The Yangtse [Yangtze], China’s longest river, is a natural divide between north and south in China. Those in the north eat more wheat and soybeans (p. 94).

Shanghai / eastern soy related recipes: The Yangtse River has already traveled 3,000 miles before it reaches its Lower Plain where many crops, including soy beans are grown (p. 98). A page titled “Buddhist and Taoist dishes,” notes that they are vegetarian (actually vegan), since “Chinese vegetarians are not allowed anything remotely connected with animals, including eggs or milk. They get their protein mainly from the soy bean and its by-products, such as bean-curd and imitation meat. Curiously these imitation meats (known as vegetarian meat, chicken, fish, and so on) bear an amazing resemblance to their fleshy counterparts in form, texture and flavor.

“For some unknown reason, the best vegetarian restaurants [in China] are to be found in Shanghai—a thriving commercial center and seaport...” (p. 119). Buddha’s fry (with 1 oz. dried bean-curd skin [yuba], p. 120-21). A small color photo shows sheets of dry yuba. Eight treasure bean curd (p. 132). “This recipe used to be called ‘Prince’s Bean-Curd’ and originally appeared in *Sui-yuan Shihtan* (Recipes of Sui-yuan), by the 18th century man of letters and gourmet, Yuan Mei.” A small color photo shows fresh bean-curd on a wooden table in a Chinese market stall. Bean curd a la maison (p. 144).

Sichuan / western soy related recipes: Bean curd fish in chili sauce (p. 164). Steamed beef with ground rice (with 1 tablespoon {15 ml} salted black beans, crushed). ‘Pock marked woman’ bean curd (Mabo doufu, with salted black beans, p. 173). This is another nationally popular dish that originated in Sichuan. The woman was the wife of a well-known chef who worked in Chengdu about 100 years ago; she created the dish. Hot and sour soup (with 1 cake bean curd, p. 174). Fish soup (with bean curd, p. 181). Soy braised duck (with Hoi Sin sauce and soy sauce, p. 182).

Cantonese / southern soy related recipes: Fish and bean-

curd casserole (p. 194-95). Eight treasure stuffed bean-curd (a well known Hakka dish, p. 198). Squid and peppers with shrimp (prawn) balls (with 1 tablespoon crushed black bean sauce, p. 202-03). Fish head casserole (with 2 cakes bean-curd, p. 203). Steamed bass in salted black beans (p. 209).

Glossary of main ingredients (p. 219-21) has entries for: Bean-curd (toufu, incl. dried bean-curd skin). "Bean sauce: Sometimes called 'Crushed bean sauce,' this thick sauce is made from black or yellow [soy] beans, flour and salt. It is sold in tins... (N.B. Black bean sauce is very salty, while yellow bean sauce is sweeter with sugar added)." Bean sprouts: Of the two kinds, yellow soy bean sprouts are sold only in Chinese provision stores.

A large excellent photo (p. 219) shows: 1. Hoi Sin [hoishin] sauce in white bowl. 2. Salted black beans in can. 3. Light soy sauce in bottle. 4. Dark soy sauce in bottle. 5. Red bean-curd sauce in small brown crock. 6. Crushed yellow bean sauce in bowl. 7. Yellow bean sauce in white bowl.

"Chili paste: Also called 'Chili purée,' is made of chili, soy bean, salt, sugar and flour. Sold in jars; will keep almost indefinitely." "Hoi Sin sauce: Also known as barbecue sauce. Made from soy beans, sugar, flour, vinegar, salt, garlic, chili, and sesame." "Red bean curd sauce: A thick sauce made from fermented bean curd and salt. Sold in cans or jars, will keep indefinitely." "Salted black beans: Whole bean sauce, very salty." Sesame seed oil: Chinese typically use vegetable oils; soy bean oil is very widely used. Soy sauce: "The darker colored sauces are strongest and more often used in cooking, whereas the lighter are used at the table."

5699. Lo, Kenneth H.C. 1979. The encyclopedia of Chinese cooking. New York, NY: A & W Publishers, Inc. viii + 369 p. Plus 10 unnumbered pages of color plates. Illust. Index. 26 cm.

• **Summary:** The Introduction notes: "Everybody who has lived through the last couple of decades in the West has noted the tremendous expansion in the desire for increased sensuality; for the freer and fuller use of our senses of sound, sight, taste, and touch" (p. 1).

"Chinese meals are communal meals." Chinese food and cooking "are undoubtedly one of China's unique contributions to the sum total of the world's civilization" (p. 3).

Note: This book calls for the use of monosodium glutamate in many recipes.

Soy related recipes: Peking soy-meat sauce for noodles (with soy sauce, brown bean paste, and hoisin sauce, p. 39). Soy-celery sauce for deep-fried chicken (with soy sauce, p. 42). Soy-stock sauce for deep-fried chicken (with soy sauce, p. 42). Soy-vinegar sauce for deep-fried chicken (with soy sauce, p. 42). Soy and mixed vegetable sauce for deep-fried chicken (with soy sauce, p. 43). Soy-stock sauce for boiled, white-cut, or sliced chicken (with soy sauce, p. 43).

Soy-red bean cheese marinade for pork or spare ribs (with "1 tablespoon red bean cheese," p. 48). Basic soy-vinegar dressing (with soy sauce, p. 49). Strengthened soy-vinegar dressing (with soy sauce, p. 49). Hot soy dressing (with soy sauce, p. 50). Soy-sesame dressing (with soy sauce, p. 50). Soy-onion dressing (with soy sauce, p. 50).

Basic condiments: Soy sauce (p. 52). Hoisin sauce (p. 53). Soy sauce comes in three grades: light, dark, and heavy. The heavy type can be used as a tasty dip. "Good quality heavy soy-sauce has a flavor of its own..."

Various dips for chicken (all with soy sauce): Soy-oil dip for chicken (p. 55). Soy-oil-garlic dip (p. 55). Soy-oil-ginger dip (p. 55). Soy-ginger-garlic dip (p. 55). Soy-oil-scallion dip (p. 56). Soy-mustard dip (p. 56). Hot soy-oil dip (p. 56). Soy-sherry dip (p. 56). Hoisin or plum sauce for pork (p. 56). Soy-sesame dip for pork (p. 57). Dip for deep-fried bean curd (with soy sauce, peanut butter, sesame oil, etc., p. 58). Sliced pork and bean curd soup (with "2-3 cakes bean curd," p. 67).

Hot noodles with soy jam and fresh vegetables (with "6¼ tablespoons soy jam or paste," p. 102).

The chapter titled "Vegetable and vegetarian dishes" (p. 106-21) begins: "There are three background factors in Chinese vegetable and vegetarian cooking which give them strength, tradition, and variety.

"The first of these is the widespread use of soy beans and their by-products [soyfoods] which, as we have already seen, add a great deal of flavoring power to Chinese meat cooking, as well as the cooking of other foods. One must also recognize that the use of bean curds is of great importance—for sheer versatility—for sheer versatility they have few equals in the whole realm of food materials." This type of cooking is derived "principally from Buddhist monastery and temple cooking. "Soy beans and their by-products (soy sauce, soy paste [jiang], soy cheese [fermented tofu], soy bean curd, and fermented salted black beans) [fermented black soybeans] act as a common denominator between meat and vegetable dishes." The "Basic vegetarian stock" has three main ingredients: fresh and dried mushrooms and mushroom stalks, 1½ lb yellow [soy] beans, and ¼ teaspoon MSG. The technique of "Splash frying" is used in the recipe for "Splash-fried bean sprouts" (p. 112). Soy related: Vegetarian toasted 'shrimp' (with 2 cakes bean curd and 1 teaspoon bean curd cheese, p. 119). Vegetarian spring rolls (with 2 cakes bean curd 1 teaspoon bean curd cheese, p. 119).

Spare ribs with black beans (Chinese style) (with "2 tablespoons fermented black beans," p. 142).

Spare ribs with black beans (overseas Chinese style) (with "2 tablespoons fermented black beans," p. 142). Spare ribs with red bean curd cheese (p. 143-44). Sliced roast pork stir-fried with bean curd (p. 150). Diced chicken in soy jam (with "2 tablespoons soy jam or paste," p. 212-13). Soy eggs (made by simmering hard-boiled eggs in soy sauce).

The Glossary (p. 343-46) includes entries for: Bean curd. Bean curd cheese ("It is used extensively for flavoring, and is often eaten in small quantities with congee {plain, boiled rice porridge} for breakfast in China"). Bean sprouts ("Young sprouts of the mung bean"). Black beans (Fermented) ("Small, black, salted soy beans"). Hoisin sauce ("Literally translated it means 'Sea-Fresh Sauce.' The ingredients are soy sauce, soy paste, ground yellow beans, garlic, sugar and vinegar). Light soy sauce. Monosodium glutamate ("It can be eliminated from the recipes if desired"). Red bean curd cheese [a type of fermented tofu]. Soy jam (soy bean paste) (This is almost a solid version of soy sauce; it is somewhat less salty but often tastier than soy sauce).

Note: This book was first published in 1974 by William Collins Sons & Co. in London.

5700. National Academy of Sciences, National Research Council, Board of Science and Technology for International Development, Commission on International Relations, Advisory Committee on Technology Innovation. 1979. Microbial processes: Promising technologies for developing countries. Washington, DC. xii + 198 p. Illust. No index. 23 cm.

• **Summary:** Soy-related chapters include: 1. Raw materials for microbial processes. In 1977 an estimated 13,842,000 metric tons of soybeans were grown in developing countries. Soybeans were number 15 on a list of 22 major food crops grown in developing countries, and accounted for 1.59% of the total production. The largest crops produced were paddy/rice (21.36% of total), cassava (11.87%), wheat (10.90%), maize/corn (8.41%), and banana/plantain (6.33%). 2. Food and animal feed. Discusses production of meatlike flavors using miso and shoyu, the koji method of producing enzymes, and Indonesian tempeh.

3. Soil microbes in plant health and nutrition.

"Mycorrhizal fungi: Most plants, both wild and cultivated, have roots infected with fungi that increase nutrient and water uptake and may also protect the root from certain diseases. These infected roots are called mycorrhizae. Although the mycorrhizal fungi probably increase uptake of all the essential elements, they are usually most important in improving phosphorus nutrition. Phosphate is generally present in the soil in low concentrations and it is also highly immobile. Strands of fungal hyphae grow out from mycorrhizae and greatly increase the volume of soil from which phosphorus is obtained. So mycorrhizal plants, in general, can grow and thrive in soils much lower in phosphate and other essential nutrients than a comparable nonmycorrhizal plant. Many plants are so dependent on mycorrhizal fungi for nutrient uptake that they may starve if these fungi are absent. There are a number of types of mycorrhizae. The two that occur on the most economically important crops, the endomycorrhizae and the

ectomycorrhizae, are discussed."

4. Nitrogen fixation. "Air is four-fifths nitrogen, yet it is the absence of this particular element that most commonly limits food production. Neither man, animals, nor higher plants can use elemental nitrogen; it must first be 'fixed,' that is, combined with other elements such as hydrogen, carbon, or oxygen before it can be assimilated.

"Certain bacteria and algae have the ability to utilize (fix) gaseous nitrogen from the air. Some microorganisms work symbiotically in nodules on the roots of plants, with the plant providing food and energy for the bacteria, which, in turn, fix nitrogen from the air for their host...

"Bacteria that fix nitrogen in nodules on the roots of leguminous plants are called rhizobia...

"Leguminous plants have been known for centuries to enrich soils, but the reason was not understood until 1886 when two German scientists, Hellriegel and Wilfarth, found that the bacteria in the nodules on the leguminous root brought about nitrogen fixation. Nitrogen-fixing microorganisms fix an estimated 175 million metric tons of nitrogen annually, or about 70% of our total supply. The remainder is produced in chemical fertilizer factories." The nitrogen fixed by the soybean-rhizobium association is about 60-80 kg/ha/year. 5. Microbial insect control agents. Green cloverworm on soybeans can be controlled by *Bacillus thuringiensis*. 10. Pure cultures for microbial processes. Discusses world culture collections. Address: Washington, DC; Peoria, Illinois.

5701. Ng Sock Nye. 1979. Soya bean—Nutritious food for the people. Malaysia: Institut Masyarakat Berhad, 9 Lorong Kucing, Pulau Tikus, Penang. 19 p. Illust. 21 cm. [3 ref]

• **Summary:** A very original and informative booklet, containing a photo or illustration (line drawing) of most of the soyfood products discussed.

Contents: Nutritional value of soya bean, soya bean milk (tau chui [soymilk]), soya bean curd (tau fu fah [soymilk curds]), soya bean jelly (tau fu [tofu]), fried bean cake cubes (tau fu pok [deep-fried tofu cubes]), bean cakes (tau kuah [pressed tofu]), dried soya strands (tau ki / fu chok [dried yuba sticks]), soya skin sheets (tau pui; dried yuba), sweet bamboo (t'im chok [sweet dried] yuba), vegetarian duck (chai ak [Buddha's duck made from seasoned and steamed yuba]), vegetarian salted fish (chai kiam hu [Buddha's fish made from tofu spread on yuba]), vegetarian meat (chai tu kar [Buddha's ham made from seasoned yuba; may be steamed]), soya bean sprouts (tau geh [soy sprouts]), soya sauce (tau eu [soy sauce]), salted soya beans (tau chio [Malaysian fermented black soybeans]). Bibliography.

On page 18 is a photo of all the soyfood products discussed on one table, each neatly labeled with its Malaysian name.

5702. Ogawa, Hiroshi. 1979. Noda no taru shokunin [The

craftsmen who make wooden kegs in Noda]. Nagareyama, Chiba prefecture, Japan: Ron Shobo. 150 p. Series: Furusato Bunko. [20+ ref. Jap]*

5703. Padilla, Jean. 1979. Les recettes végétariennes de l'Auberge "in" [The vegetarian recipes of the Auberge "Inn"]. Paris: Editions Robert Laffont. 142 p. Illust. No index. 22 cm. [Fre]

• **Summary:** The Auberge "Inn" is apparently a restaurant in France. In French, the word *Auberge* refers to an inn, public house, hostel, or tavern. Soy-related recipes include: Macao salad (with soy sprouts, p. 113). Tropical salad (with soy sprouts, p. 116). Macrobiotic pâté (with soy flour, sesame butter, etc., p. 125). Miso pâté (with miso [soja fermenté em pâté], chickpea flour, Chinese-style tofu [pâte de soja = fromage de soja], and soy sprouts, p. 126). Shallot sauce (with tamari, p. 127). Clafoutis Auberge "In" (with soy flour, p. 137). Address: Paris, France.

5704. Pederson, Carl Severin. 1979. Microbiology of food fermentations. 2nd ed. Westport, Connecticut: AVI Publishing Co. ix + 384 p. Illust. Index. 24 cm. [38 soy ref]

• **Summary:** Chapter 11, on "Nutritious fermented foods of the Orient" contains (p. 310-33): Introduction. Soy sauce. Natto. Koji, ragi, and similar inocula. Miso. Sufu or Chinese cheese. Monosodium glutamate. Aroz fermentado of Ecuador. Tempeh ("The term catsup originated from the Chinese ketsiap, a salty condiment prepared from fish" {p. 325-26}). Fish sauces. Taro. Address: Prof. Emeritus Cornell Univ. and New York State Agric. Exp. Station.

5705. Peppler, Henry J.; Perlman, D. eds. 1979. Microbial technology. 2nd ed. Vol. 1. Microbial processes. Vol. 2. Fermentation technology. New York, NY: Academic Press. Vol. 1, 544 p. Vol. 2, 536 p. Subject index.

• **Summary:** Contents of Vol. 1: 1. Beer brewing. 2. Cheese. 3. Distilled beverages. 4. Mold modified foods, by Hwa L. Wang and C.W. Hesseltine (p. 95-129, cited separately; incl. soy sauce, miso, hamanatto, sufu, tempeh). 5. Wine. 6. Vinegar. 7. Ketogenic fermentation processes. 8. Mushroom fermentation. 9. Inocula for blue-veined cheese and blue cheese flavor. 10. Microorganisms for waste treatment. 11. Elementary principles of microbial reaction engineering. 12. Microbial culture selection. 13. Methods for laboratory fermentations. 14. Instrumentation of fermentation systems. 15. Computer applications in fermentation technology. 16. General procedures for isolation of fermentation products. 17. Use of immobilized cell systems to prepare fine chemicals. 18. Economics of fermentation processes. 19. Fermentation processes and products: Problems in patenting.

Page 111: "Sufu, a traditional Chinese food, is a soft cream cheese-type product made from cubes of soybean curd (tofu) by the action of a mold. In the Western world, sufu has been referred to either as Chinese cheese or as bean

cake. Because of the numerous dialects used in China, the product is also known as fu-ju, tou-fu-ju, and others (Wang and Hesseltine, 1970a)." Address: 1. Universal Foods Corp., Milwaukee, Wisconsin; 2. School of Pharmacy, Univ. of Wisconsin, Madison.

5706. Rattazzi, Ilaria; Rivetti, Franz. 1979. La soia. Semi e germogli: come coltivarli, prepararli e cuocerli. Gli abbinamenti con carne e verdure. Come preparare il go, il latte di soia e il tofu [Soybeans. Seeds and sprouts: how to grow, prepare, and cook them. Combining with meat and vegetables. How to prepare fresh soy puree (gô), soymilk, and tofu]. Milano, Italy: Sonzogno. 127 p. [73 ref. Ita]

• **Summary:** Contains many recipes. Address: Italy.

5707. Riker, Tom; Roberts, Richard. 1979. Directory of natural and health foods: A sourcebook for dietary revolution. New York, NY: Putnam (A Paragon Book). 320 p. Index. 37 cm.

• **Summary:** The first part of this book (p. 7-49) consists of essays on natural foods and nutrition (some reprinted). Part two is a commercial catalog/directory of natural foods available in 1979; it lists and describes (with many photos and labels) products from most of the major U.S. natural foods manufacturers. An Index (p. 293-308) lists participating companies alphabetically.

Soy-related products include: Hain Super-E Soy Oil and Crude [unrefined] Soy Oil (Los Angeles, California, p. 55). Health Valley Soy Moo (Montebello, California, p. 56). Edward & Sons Miso-Cup (Union, New Jersey, p. 57). Family Orchards Fruit & Nut mixes, incl. Back Packer+*, Hi-Fiber Mix+, Hi-Iron Mix+, Hi-Protein Mix+*, Hiker's Helper, Mixed Nuts*, Mountain Munchies*, Tamari Mixed Nuts* (+ = contains Soy Nuts; * = contains Tamari Peanuts) (Berkeley, California, p. 60-61). Niblack Tamari Pumpkin Seeds (Pepitas), Tamari Roasted Sunflower Seeds, Liquid Lecithin, Granular Lecithin (Rochester, New York, p. 72-73). Arrowhead Mills Unrefined Soybean Oil (Hereford, Texas, p. 75). Good Morning New England Granola incl. Cashew-Raisin Bran-ola (with okara soy fiber), Happy Trails Mix (with roasted soynuts) (Amherst, Massachusetts, p. 79). Elam's Soy Flour (Broadview, Illinois, p. 81).

A long section on Erewhon and its products (p. 84-108) is probably the reproduction of an Erewhon catalog. Erewhon is now located at 3 East Street, Cambridge, MA 02141. Following several pages about the company and its philosophy and standards, each of its major products is discussed in detail, often with nutritional analyses. A label for Soy Flour (organically-grown stone-ground, 24 oz.) is shown; the main recommended use is for making soy milk! A major part of the presentation is titled "Japanese food guide." Products described include: Umeboshi (2 pages): Plums pickled in brine (umeboshi). Umeboshi paste. Plum concentrate (*bainiku ekisu*). Miso (2 pages): Hatcho, waka-

Hatcho, soybean, barley, brown rice, rice, and natto miso varieties. Tekka (made with Hatcho miso). Sweets made from mizu ame [rice syrup]. Nigari. Gomashio. Koji starters for various types of miso or shoyu. Goma-muso (60% barley miso and 40% whole sesame seed butter). *Gomamiso furikake* (with barley miso, whole roasted sesame seeds, and shredded nori seaweed). Kombu candy. Kokkoh. Dried tofu (*Kohya-dofu*). Brown rice sake. Mirin. Gluten cakes (*Kuruma-fu*). Seitan (Gluten cooked in shoyu). Rice crackers seasoned with tamari soy sauce. Kuzu (3 pages). Tamari and shoyu (4 pages; Johsen Shoyu is made in Sendai and tamari is made by San-jirushi Co.). Seaweeds (4 pages): Kanten, arame, hijiki, kombu, ne-kombu, nori, seasoned nori, kanten, kanten flakes, wakame, and mekabu.

Good Food brand Soy-Millet Bread (Austin, Texas, p. 120). Arrowhead Mills Bulgur-Soy Grits (p. 121). Erewhon Morning Cereal, and Infant Cereal (each containing soy beans). Chico-San Black Soybeans (imported), and Azuki Beans (Dainagon imported small red), and Lima Soy Sauce (Chico, California, p. 126-27). Arrowhead Mills 7 Grain Cereal, and Deaf Smith Crunch (granola-type cold cereal) (each contains soybeans, p. 130).

The section on pages 188-197 is titled "Soy." It lists Farm Foods Tempeh Kit, Tempeh Starter, Natural Nigari for Curding Tofu, Soyflour, Whole Cleaned Soybeans, Good for Ya Textured Vegetable Protein (Summertown, Tennessee, p. 189). New England Soy Dairy Tofu (with many tofu recipes, Greenfield, Massachusetts, p. 192-96).

The Redwood Sprouter Co. sprouter containing Soy Sprouts (1976, Austin, Texas, p. 202-04). Worthington Foods (a photo shows their line of 38 products). Millstone Burger-Like (with soy flour and TVP), Wheat Fries (with wheat gluten), Tender Cuts (with wheat protein and soy flour) (Penryn, California, p. 222-23). Sunrise Health Products Lecithin Granules (p. 274-75).

5708. Product Name: [Tofu kit].

Foreign Name: Tofu kit.

Manufacturer's Name: Roland A. di Centa.

Manufacturer's Address: Via Maffei, Milan, Italy.

Date of Introduction: 1979. January.

New Product–Documentation: Ad (in French, 2 inches square, black and white) in *Le Compas* (France). 1981. No. 17. Spring. p. 52. "Tofu kit. Contains everything to prepare tofu in your own home, including a 16-page booklet and enough nigari for two batches of tofu. Price: 120 francs, postpaid. Send a check to De Centa, 12, rue des Patriarches, 750-05, Paris."

An undated booklet accompanied this tofu kit made in Italy by Roland A. di Centa, Italy's first Caucasian tofu maker. On the yellow cover of the French-language booklet the word "tofu" is also written using Chinese characters. Contents of the booklet: Tofu: What is tofu?, vitality and energy, proteins, easy to digest, saturated fats and

cholesterol, easy to prepare in recipes, make tofu at home using the tofu kit. The tofu kit and its contents. Details on the tofu kit and how to use it. How to store and press tofu. How to make tofu at home: Detailed instructions with illustrations. Ingredients used in preparing tofu recipes: Tamari, miso, kuzu, unrefined sea salt, sesame oil, sesame seeds and gomashio, tahini (most sold at macrobiotic food stores). Recipes for using tofu. Recipes for using okara. Soymilk.

Note: This booklet was sent with a letter by Roland A. di Centa. 1993. Aug. 9. For details, see that letter.

5709. Product Name: [Tofu kit].

Foreign Name: Tau-fu kit.

Manufacturer's Name: Roland A. di Centa.

Manufacturer's Address: Via Maffei, Milan, Italy.

Date of Introduction: 1979. January.

New Product–Documentation: An undated booklet accompanied this tofu kit made in Italy by Roland A. di Centa, Italy's first Caucasian tofu maker. On the white cover of the Italian-language booklet the word "Tau-Fu Kit" is written in brown outline letters. Contents of the booklet: Tofu: What is tofu?, vitality and energy, proteins, easy to digest, saturated fats and cholesterol, easy to prepare in recipes, make tofu at home using the tofu kit. The tofu kit and its contents. Details on the tofu kit and how to use it. How to store and press tofu. How to make tofu at home: Detailed instructions with illustrations. Ingredients used in preparing tofu recipes: Tamari, miso, kuzu, unrefined sea salt, sesame oil, sesame seeds and gomashio, tahini (most sold at macrobiotic food stores). Recipes for using tofu. Recipes for using okara. Soymilk.

Note: This booklet was sent with a letter by Roland A. di Centa. 1993. Aug. 9. For details, see that letter.

5710. Sato, Yoshiya. 1979. Fûmi o uru otoko-tachi: Yonjû oku nin shijô ni idomu Kikkôman [The men who sell flavor: Kikkoman challenges a world market of 4 billion people]. Tokyo: Nihon Rikuruto Senta. 245 p. No index. 18 cm. [Jap] Address: Member of newspaper inspectors committee (Shinbun Kansa Iinkai Iin).

5711. Shulman, Martha Rose. 1979. The vegetarian feast. New York, NY: Harper & Row. xii + 319 p. Illust. by Beverly Leathers. Index. 24 cm.

• **Summary:** The author, born in Connecticut in 1950, is the daughter of writer Max Shulman. A color photo on the back dust jacket shows Martha Shulman. Address: Austin, Texas.

5712. Voldeng, Harvey D. 1979. Soybeans in Canada—Past, present and future. Based on an article [sic, manuscript] by Dr. H. Voldeng. In: 1979. *Fats and Oils in Canada: Annual Review*. Ottawa, Ontario, Canada: Grain Marketing Office, Dept. of Industry, Trade and Commerce, Agriculture Canada. [vi] + 95 p. See p. 1-10. Chap. 1. [7 ref]

• **Summary:** Contents: Introduction. Introduction of soybeans to Canada. Importance of the soybean [worldwide]. Utilization. Food uses of soybeans: Oriental foods—Soy milk, tofu, sufu, miso, soy sauce, tempeh, Hamanatto, natto. Western ingredients—Full fat flour, defatted flour, soy protein concentrates (70% protein), soy protein isolate (more than 90% protein), textured soybean protein. Soybeans in Ontario. Development of short season varieties. Soybeans in Quebec and the Maritimes. Soybeans in the Prairies (southern Manitoba and Alberta).

A table shows soybean acreage in Ontario's leading counties in 1978. Kent 205,000. Essex 192,000. Lambton 170,000. Elgin 63,000. Middlesex 40,000. Other 7,000. Total (Ontario) 705,000 acres.

Soybeans grown in Ontario can be crushed at three plants: (1) Victory Soya Mills (owned by Procter and Gamble) in Toronto. (2) Canadian Vegetable Oil Processing Limited (owned by Canada Packers) in Hamilton. (3) The recently completed Maple Leaf Monarch plant (affiliated with Unilever Corporation) in Windsor. Total crushing capacity in Ontario is about 35 million bushels per year.

The CSP Foods Plant in Altona, Manitoba, has in some years crushed limited amounts of soybeans imported from the U.S.

“Development of short season varieties: The justification for the effort to develop a large acreage outside of southwestern Ontario has been the magnitude of imports of soybeans, meal and oil. This has been and continues to be sizeable. The situation (in metric tons = tonnes) is outlined below for the 1977/78 crop year: (1) Whole soybeans: Production 527,361. Imports 262,835. exports 64,173. Domestic crushing 728,400.

(2) Soybean oil: Imports 28,100. Exports 1,400. Domestic production 125,600.

(3) Soybean meal: Imports 376,300. Exports 45,600. Domestic production 575,400. Source: *Fats and Oils in Canada, Annual Review*, 1978.

Letter (e-mail) from Dr. H. Voldeng of Agriculture and Agri-Foods Canada. 2010. Feb. 16. The original “article” was not an article but a manuscript that was sent to the publishers of this volume; they reduced the length slightly. It was never published separately, no longer exists, and cannot be cited separately. Address: Agriculture Canada, Ottawa, Ontario.

5713. Wang, Hwa L.; Hesseltine, C.W. 1979. Mold-modified foods. In: H.J. Peppler and D. Perlman, eds. 1979. *Microbial Technology*. 2nd ed. Vol. 2. Fermentation Technology. New York: Academic Press. 544 p. See Vol. 1, p. 95-129. [90 ref]

• **Summary:** Volume 1. Microbial processes. Volume 2. Fermentation technology. Contents: 1. Introduction. 2. Soy sauce. 3. Miso. 4. Hamanatto. 5. Sufu [fermented tofu]. 6. Tempeh. 7. Ang-kak (red rice, used as a color agent). 8. Absence of mycotoxins in fermented foods. 9. Conclusions.

For each food is given: General description, method of preparation, composition [chemical / nutritional]. In addition for tempeh is given: Tempeh-like products, biochemistry and physiology of *Rhizopus oligosporus*, changes occurring during fermentation, nutritional value.

“Soy sauce “is known as *chiang-yu* on China, *shoyu* in Japan, *kecap* in Indonesia, *kanjang* in Korea, *toyo* in the Philippines, and *see-iew* in Thailand. In the Western World the product is often referred to as soy sauce.” Japan is the leader worldwide in sauce production; it has the largest fermentation plant and uses the most advanced technology.

Hamanatto: Products similar to Japan's hamanatto are known as *tou-shih* in China, *tao-si* in the Philippines, and *tao-tjo* [sic] in the East Indies [Indonesia]. A typical process for making hamanatto in Japan, based on information supplied by Dr. T. Kaneko of Nagoya Univ., Japan, is as follows: Wash soybeans, then soak, steam until soft, drain, and cool. Mix with parched wheat flour in the ratio of 2 parts soybeans to 1 part flour. Inoculate the soybeans with a short- or medium-stalked strain of *Aspergillus oryzae*. Incubate for 1-2 days until the beans are covered with a fragrant mycelium and have become soybean koji. Pack the soybeans in a container [wooden keg] with (for example) 2.5 kg soybean koji, 650 gm salt, 3.6 liters water and some freshly sliced gingerroot. Cover the container tightly and age under pressure for 6-12 months. Remove beans from liquid and dry them in the sun to give hamanatto. The composition of the brine may differ among manufacturers.; thus the finished hamanatto differs somewhat in taste and appearance. “Japanese hamanatto is rather soft, having a high moisture content. Chinese *tou-shih* has a much lower moisture content... and therefore is not so soft. *Tao-tjo* tends to have a sweet taste because sugar is often added to the brine.”

Shoyu in Japan: Although there are more than 4,000 shoyu makers in Japan, the largest 4-5 companies produce about 50% of the total.

Note: A wide variety of dairy cheeses, especially of French origin, are made with surface mold growth. Typical varieties are Camembert, Coulommiers, and Brie. Address: NRRC, Peoria, Illinois.

5714. Yamaguchi, Momoo; Kojima, Setsuko. eds. 1979. *Wa-Ei Nihon bunka jiten* [A cultural dictionary of Japan]. Tokyo: Japan Times. vii + 408 p. See p. 108. 19 cm. [Eng; jap]

• **Summary:** A very useful book with excellent definitions of Japanese words in English. It is divided into nine parts; No. 2 is titled “dietary habits” (p. 79-131). Each definition has four parts: (1) The word is written in romanized English, with diacritical marks and a hyphen in compound words. (2) The word is written in characters. (3) A long definition is given in English. (4) Related words and “see also” words are given (romanized) and key words in the definition are defined in Japanese (Chinese characters).

Words only distantly related to soy are preceded below

by an asterisk. Soy-related words: abekawa-mochi (with “sweetened yellow soybean powder–kinako”), abura-age (fried soybean curd), aemono, age-dama, age-dashi (“soybean curd fried lightly without a tenpura batter”), Ajino-moto (“a popular brand of monosodium glutamate”), ama-zake, * an (sweet bean jam = azuki-an; Can be strained {*koshi-an*} or mashed {*tsubushi-an*}), dengaku-tofu, doburoku, eda-mame, fu (“dried, bread-like pieces of wheat gluten”), fucha-ryori (“Chinese-style vegetarian dishes served in some Japanese temples of Chinese origin”), gan-modoki, goma-ae, goma-shio (widely used with sekihan), hiya-yakko, inari-zushi, isobe-maki (with mochi, soy sauce and nori), kara-age, kashiwa-mochi (stuffed with sweet [azuki] bean paste), kina-ko (“yellowish soybean powder”), kishimen (seasoned with soy sauce and topped with a few pieces of fried bean curd), kitsune udon (seasoned with soy sauce and topped with a few pieces of fried bean curd), koji, koya-dofu, * kuzu-manju (a ball of sweet redbean paste {*azuki-an*} with a covering of kuzu starch), kuzu-mochi (with kinako), masu (a small square measuring box, usually made of Japanese cypress {*hinoki*}). The three sizes measure 0.18, 0.9 and 1.8 liters. It is constructed by dovetailing, without the use of nails or adhesive. It is used for measuring soybeans, cereal grains, or for drinking saké), miso, miso-shiru, miso-zuke, * mochi, nabe-mono (often contain tofu; examples are sukiyaki, yose-nabe, and mizu-taki), nama-gashi (traditional Japanese confections made with beans and/or glutinous rice, cooked but not baked), natto, * nori (a dried sheet of laver, a seaweed), * oboro (related to sushi, not soy), oden, * ohagi (coated with sweet redbean paste {*azuki-an*}), shiru-mono (the two basic types are clear soup and miso soup), * shiruko (sweet beanpaste soup with mochi; see zenzai), shojin-age, shojin-ryori, shoyu, suki-yaki, sukiyakinabe, suri-bachi, suriko-gi [suri-kogi], sushi, sushi-ya, teriyaki, tofu, * ume-boshi (a Japanese pickled plum), wa-gashi (Japanese-style confectionery), wakame, warishita (soy sauce flavored seasoning), washoku = nihon-ryori, yaki-dofu, yaki-mono, yakko-dofu, yu-dofu, * zenzai (“a thick kind of sweet redbean soup”).

Page 24 defines hiragana (lit. flat kana) as “The cursive form of *kana* script, one of the two sets of Japanese syllabary writing. *Hira-gana* is more commonly used than the other set called *kata-kana*. It is usually used for writing inflectional endings and function words not represented by Chinese characters (*kanji*).” Address: Tokyo, Japan.

5715. Yueh, Jean. 1979. The great tastes of Chinese cooking: contemporary methods and menus. New York, NY: Times Books. A Division of Quadrangle / The New York Times Book Co., Inc. xiv + 302 p. Illust. (line drawings and photos). Index. 24 cm.

• **Summary:** “Western food technology is applied to classical Chinese recipes, allowing for the use of the food processor, blender and microwave oven in preparing a variety of

Chinese dishes” (from the publisher). The romanization / transliteration is in Pinyin (which means “transcription”). The index contains 8 recipe entries for black beans, salted, 6 for brown bean sauce, 4 each for black bean sauce and for hoisin sauce, 3 each for bean curd and for soy sauce, and 1 for fermented bean curd.

The section titled “Chinese ingredients” (p. 267-80) includes: Bean curd, fresh (2 Cc = 2 Chinese characters are given): Dou-fu. “This ivory-colored, smooth and custard-like product is made from soybean milk...”

“Black beans, salted (2 Cc): Dou-chi—One of the most interesting seasonings, they are salty with a distinct flavor. The beans are available in cans or plastic bags. To store: Will keep indefinitely in a covered jar at room temperature. Tiny white salt crystals may appear after a long period...”

Brown bean sauce (3 Cc): Yuan shai-chi. “Made from fermented soybeans, salt, flour, and water, it is a salty, thick, brownish sauce. When the beans in the sauce are ground up, it is called *ground* brown bean sauce.”

Fermented bean curd (red or white) (4 Cc): Fu-ru (Hong, Bai): “Both are pungent and salty in taste, and are used mostly for seasoning or as condiments for Chinese breakfast with rice congee.”

Hoisin sauce (3 Cc): Hai-xian-jiang. “Thick, reddish brown sauce made from sugar, vinegar, soybean, salt, flour, fermented rice, chili, and spices.”

Soy sauce (2 Cc): Jiang-you. “This is the most important and distinctive seasoning in Chinese coking.” Light soy sauce (or thin soy) (2 Cc): Sheng-chou. Use when you wish to retain the natural color of the food. Dark soy sauce (thick or black soy) (2 Cc): Lao-chou. It has a slightly sweet taste from the caramel that is added for coloring. Use when a dark, rich color is desired.

About the author: “Jean Yueh, Chinese cooking authority, native of Shanghai and protégé of noted Hong Kong chefs, runs the Jean Yueh cooking school in Berkeley Heights, New Jersey.” A portrait photo shows Jean Yueh (inside rear dust jacket). Address: Berkeley Heights, New Jersey.

5716. *Manna Bulletin*. 1979-- . Serial/periodical.

Meeuwenlaan 70, 1012 JK Amsterdam, Netherlands. Editor: Sjon Welters. Illust. 21 cm. [Dut]

• **Summary:** This is a magazine about natural foods, macrobiotics, and alternative lifestyles. Soyfoods Center owns Vol. 3, No. 2 (June 1979), and Vol. 4, No. 3 (autumn 1982). In the former issue, the advisors are Adelbert Nelissen and Willem de Ridder. The editors are Hans den Hoed, Wieke Nelissen, etc. The latter issue contains one article titled “Macrobiotic Economics and the Practice of Manna” (a photo shows Adelbert Nelissen, Manna director), and another titled “Fermented products, an essential supplement to a vegetarian (*plantaardig*) diet.” Page 12 shows an ad for Witte Wonder Products (2 Riemerstraat 186, 2513 EZ Den

Haag), producers of tofu and seitan.

Talk with Sjon Welters. 1994. April 4. He was once the editor of this publication. He thinks it stopped being published in about 1984-1985. Address: Amsterdam, Netherlands.

5717. Product Name: Family Orchards Snack Line—Fruit & Nut Mixes with Soynuts [Back Packer, Hi-Fiber Mix, Hi-Iron Mix, Hi-Protein Mix].

Manufacturer's Name: Family Orchards, Inc.

Manufacturer's Address: 2546 Tenth St., Berkeley, California 94710. Phone: 415-849-2222.

Date of Introduction: 1979?

Ingredients: See below.

Wt/Vol., Packaging, Price: Snack packs (1.5 oz), family packs (4 to 12 oz), or bulk (11 or 22 lb).

How Stored: Shelf stable.

New Product—Documentation: Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*, p. 60-61. Products containing soynuts: Back Packer: Date pieces, tamari peanuts, diced prunes, raisins, soy nuts, sunflower seeds, coconut, almonds. Hi-Fiber Mix: Diced pears, black figs, apricots, sunflower seeds, soynuts, coconut. Hi-Iron Mix: Raisins, pumpkin seeds, sunflower seeds, soynuts, diced prunes, cashews, almonds. Hi-Protein Mix: Tamari peanuts, soynuts, pumpkin seeds, raw and tamari sunflower seeds, cashews, almonds, filberts.

For more on this company and its owner Mithra Grossman, see the SoyaScan interview with Bob Gerner conducted on 25 June 1992.

5718. Product Name: Family Orchards Snack Line—Fruit & Nut Mixes with Tamari-Roasted Peanuts [Hiker's Helper, Mixed Nuts, Mountain Munchies, Tamari Mixed Nuts].

Manufacturer's Name: Family Orchards, Inc.

Manufacturer's Address: 2546 Tenth St., Berkeley, California 94710. Phone: 415-849-2222.

Date of Introduction: 1979?

Ingredients: See below.

Wt/Vol., Packaging, Price: Snack packs (1.5 oz), family packs (4 to 12 oz), or bulk (11 or 22 lb).

How Stored: Shelf stable.

New Product—Documentation: Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*, p. 60-61. Products containing tamari-roasted peanuts: Hiker's Helper: Cashews, tamari peanuts, raisins, almonds, date pieces, diced prunes, coconut. Mixed nuts: Cashews, almonds, tamari peanuts, filberts, Brazil nuts. Mountain munchies: Cashews, date pieces, raisins, almonds, tamari peanuts, diced prunes. Tamari Mixed Nuts: Peanuts, almonds, cashews, sunflower seeds.

For more on this company and its owner, Mithra Grossman, see the SoyaScan interview with Bob Gerner conducted on 25 June 1992.

5719. Earle, Stephen J. 1980. Re: Starting a new plant to manufacture real tamari in Virginia, and looking for apprentices. Letter to Richard Leviton, editor of Soy craft magazine, 158 Main St. No. 3, Greenfield, MA 01301, Jan. 7. 2 p. Typed, with signature on letterhead.

• **Summary:** Sanjirushi is a well reputed manufacturer of genuine tamari soy sauce and soybean miso. "We have a subsidiary company called San-Jirushi International located in Virginia and plan to establish a manufacturing facility for tamari in the U.S. within one or two years time."

The company is looking for American personnel to assist in the eventual operation of the U.S. plant. "We would ask for an apprenticeship of about two years with a commitment of at least two more years to our employ after returning to the U.S. San-Jirushi would provide room, board, and a basic salary, plus return transportation to the U.S. upon completion of the training."

Note: This is the earliest English-language document seen (March 2012) that contains the term "genuine tamari" or "genuine tamari soy sauce." Address: Sanjirushi Jyozou Co. Ltd., 1 chome Meiseidouri, Kuwana-city, Mie-pref., Japan. Phone: (0594) 22-3333.

5720. ASEAN Sub-Committee on Protein. 1980. ASEAN Protein Project. Bangkok, Thailand. 24 p. Jan. Illust. 29 cm. [Eng]

• **Summary:** Contents: Introduction (incl. history, programs, and budget). Administration (incl. list of workshops held by the ASEAN Sub-Committee on Protein). Research and development. High-protein low-cost foods. Full-fat soy flour (a plant at Chiang Rai, northern Thailand, produces 100 tons/month). Fermented foods (incl. soy sauce). Soy products (incl. tofu). ASEAN network (directory).

"The ASEAN Protein Project was conceived at a joint research project on soybeans and protein-rich foods at the first meeting of the ASEAN Permanent Committee on Science and Technology held in August 1971 in Indonesia. Meetings of food specialists soon followed, one in September 1972 in Malaysia and another in November 1972 in Indonesia. At a further meeting in August 1974, involving Australian technical experts, four areas for research co-operation were identified, namely: (1) Identification, development, and utilisation of low-cost, protein-rich foods for children and other vulnerable groups. (2) Processing and utilisation of full fat soy flour (3) Improvement of fermentation technology; and (4) Microbiological culture collection.

Workshops held by the ASEAN Sub-Committee that concern soya include: 1st Workshop on soy products (1976, Kuala Lumpur, Malaysia). 3rd Workshop on culture collection (1977, Bangkok, Thailand). 4th Workshop on soy sauce manufacturing techniques (1978, Singapore). 5th Workshop on solid substrate fermentation (1978, Bandung,

Indonesia). 8th Workshop on extruder technology (1980, Bangkok, Thailand).

Photos show: (1-4) Participants, meetings, and tours. (5-6) Full fat soy plant at Chiang Rai, Thailand. (7) Commercial soy sauce factory. Address: Bangkok, Thailand.

components of fermented soya hydrolysate. II. Composition of the basic fraction. *Zeitschrift fuer Lebensmittel-Untersuchung und -Forschung* 170(3):208-13. March. [11 ref. Eng; ger]

• **Summary:** Fermented soya hydrolysate (FSH) is better known as soy sauce. The authors found pyrazines FSH. Several gas chromatograms are shown. Address: Research Dep., Nestlé Products Technical Assistance Co. Ltd., P.O. Box 88, CH-1814, Tour-de-Peilz, Switzerland.

5728. Schmit, Matthew. 1980. Tofu-Helper: New directions in packaging and marketing for the soy industry, 1980. Bayside, California. 5 p. April 12. Unpublished manuscript. 28 cm.

• **Summary:** A proposal for a new product developed by Matthew Schmit. Five pages of black and white photocopies: (1) Title page. Handwritten. A rectangular photo in the center shows 3 prototypes of the product and 3 tubs of tofu atop a wooden barrel, outdoors. (2) Statement of original idea (handwritten): Name: Tofu-Helper portion pouch. Description. Purpose. Adaptation. Sketch (blank). Signed: Matthew Schmit, Date: 4/12/80.

(3) Tofu-Helper: Getting off the ground: An example of the steps undertaken by a tofu company beginning to introduce Tofu-Helper sauces into their sales region. "Choose a name for the campaign, such as Tofu Internationale, and sauces such as... Tofu turkey and dressing.

(4) Letter to Mr. Jeno Paulucci, 535 Lake Avenue South, Duluth, Minnesota 55802. From Matthew Schmit, Bayside, California. 1 page typewritten, no letterhead, with signature. Explains the product to Mr. Paolucci and suggests that he make and package it. New foods, "primarily tofu, tempeh, and soysage, have burst upon the American natural foods market in the last two and a half years. I have worked with these now items since September 1977, and have followed closely the 'new soyfoods' industry."

(5) Reply from Jeno F. Paolucci, chairman. May 29. Typed on letterhead with signature. "I appreciate your writing me in this connection. However, I just don't feel we would have any interest in going into soyfoods at least at the present time."

Note 1. Jeno was founder of Chun King Corp. and Jeno's Pizza. Matthew's father, Justin, was the company's executive vice president for years in Duluth, Minnesota, and later engineer.

Note 2. Matthew never commercialized this product. Address: Rt. 1, Box 484, Bayside, California 95524. Phone: 707-443-9054.

5729. Haddix, Carol. 1980. Ingrid: Master of the cold buffet. *Chicago Tribune*. April 17. p. S_A1, or N_B1.

• **Summary:** Ingrid Kostrubala (Swedish), one of Chicago's hottest caterers, has a constantly varying repertoire. Part of it is her unusual tofu appetizer. "Still a relatively unknown

food for most Americans, tofu has a wonderful texture that contrasts well with crisp greens, Ingrid said. But its bland flavor (it actually is soy bean curd) stops many people cold.” So Ingrid serves tofu with a dipping sauce that contains soy sauce laced with the hotness of shredded fresh ginger; it contrasts nicely with the mild tofu flavor. Contains several recipes, including Tofu with ginger sauce. Mix ½ cup each freshly grated ginger root and soy sauce with ¼ to ½ cup cream sherry in a small serving bowl. Cut tofu (use 3 cartons, 15 ounces each, drained) into 1-inch cubes. Dip and enjoy. A photo shows Ingrid standing by her buffet.

5730. Product Name: Chinese soy sauce and Wing Nien Soy Sauce Mfg. Co. (Interview).

Date of Introduction: 1980. April.

New Product–Documentation: Shurtleff visited David at the Wing Nien plant. David’s light soy sauce is fermented at room temperature for an average of 9 months (range 6-12 months); at this time the color is pale amber. Why is it not the same color as tamari? David says that to Chinese thick and dark soy sauce connotes low quality since makers add brine to the residue remaining after the first drawing off of light soy sauce, and referment once or twice more for 6-9 months each time. The soy sauce gets darker each time. To get dark soy, David just adds molasses to light soy. He sells it for less than light soy sauce even though it costs him more to make.

“Hoisin” is pronounced like it is written. The characters are sea + a kind of fish + jiang. It is sometimes made from the residue remaining after the first drawing off of light soy sauce. This residue is lightly pressed, ground to a smooth paste, then mixed (at Wing Nien) with the following in order of predominance: soybeans, sugar, water, salt, flour, wine vinegar, garlic, chili, spices, artificial color, and 0.1% sodium benzoate. It is jet black, creamy smooth, and very sweet. Sold in a 14-ounce bottle. Hoisin sauce is typically used with Peking Duck, Mu Shu Pork (served in pancakes), Chinese-style spareribs, or barbecued pork. Brush it on the meat while cooking or mix with ½ part soy sauce.

Notes to accompany flow chart of Wing Nien Soy Sauce: The koji is made with 100 lb of whole dry soybeans and 5 lb wheat flour. It is inoculated by mixing a Japanese koji starter (olive green) with the wheat flour and dusting it over the soybeans. Incubate in wooden trays 1½ by 3 feet, each with a copper screen on the bottom—first in one room at 90°F, then in an adjoining room at a lower temperature for 2-3 days. Pre-mix the koji in a small fiberglass tank with brine, then put it into 7,000 gallon fiberglass tanks. Agitate it with air from below for 15 minutes a day. After 9 months of fermentation, run into flour sacks placed in 3½-foot diameter pressing tanks (each perforated inside with ½-inch diameter holes), and press overnight with 300-400 lb of stones atop each. David also mixes chemical [HVP] soy sauce; 70% of his business is fermented and 30% is chemical / HVP.

HVP is a brown liquid, fairly dark in color, sold as a liquid concentrate. It has a pretty good flavor but Akiko got a splitting headache after sipping it. It contains a high percentage of protein. Chemical soy sauce with good flavor is that with a large amount of HVP concentrate. To distinguish HVP soy sauce from fermented, just read the label. Chemical soy sauce will read HVP, caramel, corn syrup, etc. Check at local Monty grocery store; transcribe a La Choy label.

David sells most of his chemical soy sauce cheaply to the institutional market.

Chinese warming their soy sauce in the sun is their equivalent of Japanese pasteurization in terms of aroma and color. In China, light soy sauce is good quality; dark is second rate.

Chinese fermented soy sauce makers in the USA also exist in New York and Palo Alto; Wei Chuan will soon start in Los Angeles.

Light Chinese soy sauce is amber, not brown. The ingredients in Wing Nien’s light Chinese soy sauce are water, soybeans, salt, wheat and less than 1/10 of 1% sodium benzoate.

In Chinese soy sauce, wheat is used only as a starter for the fermentation—about 5% of the weight of dry soybeans. After the first soy sauce (light) is drawn off, add brine, referment. and re-draw. Do this up to three times total. The Chinese re-use the residue (lees). An estimated of this residue is used to make the condiment / paste Min See Jiang [Mian Shi Jiang], a bean paste which is served on steamed fish with gingerroot and onion. After the third drawing off of the soy sauce, press the lees / residue with a heavy rock.

Question: How exactly is Chinese soy sauce drawn off? See a description by A.K. Smith in the late 1940s. David is not sure. A woven bamboo basket is pressed into the jiang in an earthenware crock. The liquid soy sauce collects in the basket, then it is siphoned off.

Sona in Los Angeles makes only chemical soy sauce, as does the Chinese company in Seattle [Washington].

David’s output of fermented soy sauce is 20% light and 80% dark. In China, the total output of soy sauce is about 70% light and 30% dark.

David thinks the best imported soy sauce is Tung Chung from Hong Kong. The “4 in 1 Co. makes fermented and HVP soy sauce. Chemical / HVP soy sauce usually contains more protein than fermented soy sauce; the specifications dictate that. The GSA (General Services Administration, which takes government bids) now has specifications for both fermented and non-fermented soy sauce.

In the USA, retail sales of soy sauce imported from countries of Chinese heritage [Hong Kong, PRC / China, Taiwan, Singapore] are about even for light and dark. However foodservice institutions buy about three times as much light as dark. They use poor quality meat and add good seasoning.

Of the soy sauce made in China / PRC, about twice as much light is sold compared to dark. Most imported dark soy sauce does not contain caramel.

To cook with salted black beans (*dow-si*), grind them in a container with water and soy sauce, then add to a wok and use for stir frying.

5731. Kikkoman International Inc. (KII). 1980. Kikkoman: the company and its soy sauce (Interview). *SoyaScan Notes*. April 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Shurtleff and Aoyagi visited Kikkoman's office in Japantown, armed with a list of questions.

Why doesn't Kikkoman use alcohol as a preservative in their shoyu in the USA? (1) Some people, such as Seventh-day Adventists, object to its use in foods. (2) There is a high tax on U.S. products containing added alcohol (ethyl alcohol = ethanol); for shoyu it is about \$0.15 per gallon of shoyu. (3) Kikkoman believes that sodium benzoate, which has been approved by the FDA, is safe. It is contained in some natural foods such as dry shiitake mushrooms and cranberries.

Kikkoman conducted a chemical analysis of San Jirushi tamari. The regular contains 2.5% ethanol (alcohol) and the low-salt (low-sodium) contains 3.5%. Ordinarily tamari in Japan contains only about 0.1% ethanol. Therefore they must be adding alcohol as a preservative and not listing it on the label. This tamari also contains 6-10% carbohydrates. If it contained no wheat, it have only 5-6% carbohydrates. Therefore they must be adding wheat.

Saccharomyces rouxii and *Torula* are yeasts, not molds; they can eventually form a white film on the surface of shoyu. They are salt tolerant. Most are killed by heat treatment (*hiire*; also called pasteurization). In the old days, Japanese would just filter off this white film.

To make their shoyu (soy sauce) Kikkoman uses a specially made soybean meal called *kakko daizu*. More of the natural soybean oil is left in it, and the nitrogen solubility index (NSI) is 25-30% instead of the typical 10%. It has a flaky rather than a meal-like, texture. Who makes it for Kikkoman in the USA? At Walworth, Wisconsin, is any soybean oil left over from the process? If yes, what is done with it?

In Japan Kikkoman uses whole soybeans in their Tokusen (Special) grade soy sauce. Why?

Beatrice Foods makes La Choy soy sauce (America's #2 brand) and RJR Foods made Chun King, but Del Monte recently bought RJR Foods, so Del Monte now makes Chun King.

The three JAS (Japanese Agricultural Standard) shoyu grades (in Japan) are Tokkyu (which has 1.50 or more grams of nitrogen per ml volume of shoyu = w/v), Jokyu and 1.35 to 1.49 gm, and Hyojun has 1.2 to 1.35 gm. Higher in nitrogen than all of these is Tokusen, which is not recognized by JAS. Who uses the word Tokusen? Kikkoman does. U.S.

shoyu is equivalent to Tokkyu in nitrogen content. Kikkoman makes no Hyojun grade. More than 90% is Tokkyu. Grades lower than Tokkyu are made by Kikkoman only on special request. The specific gravity of shoyu is 1.19.

In Japan, the real name for "tamari" is tamari shoyu. The definition of tamari shoyu from the Ministry of Agriculture (*Norinsho*) is vague. The word *kikaku* means "standard of identity."

Hawaiian-style shoyu is called amakuchi (sweet); it is made in Japan but sold in Hawaii, not in the USA. It does not have an identity in the JAS standards, but it is considered a type of *koikuchi* (regular shoyu). After fermentation, a natural sweetener (typically *kanzo*, an extract of liquorice root) is added. It contains less salt than typical *koikuchi*.

Milder soy sauce (Kikkoman's green label) has the salt removed after fermentation by use of the ion exchange membrane method—the same used to extract salt from sea water. This is done after pressing but before heating.

Lots of HVP / chemical soy sauce is made and consumed in Kyushu—Japan's southernmost main island; lots of it is sweet.

After shoyu is pressed, the oil layer on top and the bottom layer of high molecular weight substances are both discarded. The middle is the choice. The process is called "clarification" (*seicho*).

Kikkoman says the last time they made a product made by blending shoyu of different ages (1, 2, and 3 years old) was in the 1940s. Ask Dr. Yokotsuka or Fukushima. In 1967 Kikkoman was making a Tokusen consisting of a mixture of 1 year and 2 year fermented shoyus. They called it an 18-month shoyu. If they now had to return to "naturally fermented" with temperature control (*tennen jōzō*) they would ferment the shoyu for 1 year, then mix winter *shikomi* and summer *shikomi*.

The Chinese traditionally did temperature controlled fermentation by placing the large earthenware jars in a courtyard in the sunlight.

Concerning heat treatment or pasteurization (*hiire*), people nowadays like a lighter colored shoyu than formerly. Kikkoman's heat treatment is done using a plate heater at 82°C. There are two methods of heating: (1) Put hot shoyu into a large open top tank and allow it to cool very slowly. During this time, lots of the natural alcohol evaporates off (0.3 percentage points of the total). (2) Run the shoyu through a plate cooler after a plate heater. Get details of times and temperatures from Drs. Yokotsuka or Fukushima.

After heat treatment there are almost no enzymes left in the shoyu. All the molds have been killed but a small number of spore-forming bacteria and yeasts survive—about 10 to 100 per ml.

Semichemical shoyu is called *shinshiki shoyu* ("new-style shoyu") in Japanese. Kikkoman stopped making it about 15 years ago. There are an estimated 4 commercial shoyu makers in Hawaii and 24 in the United States, but

only 5 of those in the U.S. make fermented shoyu; the rest just mix ingredients to make quick HVP soy sauce. One can do this in a small room. The American Soybean Association might have the addresses of these companies. Why are they not in the Soya Bluebook? One may be in Seattle [Washington]. The shoyu makers in Hawaii are Diamond & Marumasa, Honolulu Sake and Shoyu, Aloha Shoyu, and Island Shoyu. U.S. shoyu makers include Jan-U-Wine and Sona, both in Los Angeles, Chinese Maid, and Reese Finer Food Co.

In making shoyu, something is filtered with a ceramic filter. What? And at what stage?

The emperor of Japan does not use shoyu made by Kikkoman at their Goyo Gura in Noda. It is forbidden for him to use any special products. No one is allowed to supply him specially—even as a gift. The imperial household must pay for everything on the open market.

Dehydrated shoyu is most widely used in dehydrated instant ramen—in the broth packet; it is also used in making beef jerky and salami / sausages.

In making tamari shoyu, salt water is always added (to the presscake?) to get *assaku tamari*, which is usually called *niira tamari*. Why didn't San Jirushi mention this?

What is *bansui*? *Ichiban* (“number one”) is the shoyu itself. The 2nd extraction (*ni-ban*) is made by washing the presscake with salt water; this is called *shokuen-sui*. Only makers of low-quality shoyu do this nowadays. *Ensan* means hydrochloric acid; it is used in making HVP.

To make *saishikomi* shoyu, the koji is mixed with shoyu rather than with salt water. *Saishikomi* is also called *kanro shoyu*; it is used to season sashimi and sushi.

HVP/ chemical soy sauce costs 10-15% less than Kikkoman.

Shiro shoyu is made in Nagoya. They roast the soybeans and steam the wheat. See flow chart. The *moromi* is fermented for 3 months. It is salty, and is used in *nimono* (dishes simmered in broth). It is 1/3 as light as *usukuchi* = much lighter than *usukuchi*. *Usukuchi* does not add rice koji any more. They add *mirin* instead.

The character for *hishio* first appeared in Japan in about 600 AD. In which document? *Hishio Tsukasa*? Continued. Address: San Francisco, California.

5732. Kikkoman International Inc. (KII). 1980. Kikkoman: the company and its soy sauce. Part II (Interview). *SoyaScan Notes*. April 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Yamasa, Higeta and Kikkoman do not use any HVP in making shoyu. In the USA, HVP is made with stronger hydrochloric acid (HCL) than is used in Japan, so the former takes less time to make and is lower in quality.

Formic acid and levulinic acid are the main ones that show up on gas chromatograms of chemical soy sauce.

Most Chinese soy sauce made in the USA contains HVP

says Kikkoman. See also interview with David Hall on this same date.

In their color film, Kikkoman showed that they were using whole soybeans since at that time all of their exported soy sauce was made with whole soybeans. Note: The use of whole soybeans also looks better and raises less questions. Concerning Kikkoman's reluctance to use the word “mold” in connection with koji, a key ingredient in soy sauce: Dr. Hesseltine used the word “yeast” instead of the correct word “mold” to describe the making of koji. Japanese are comfortable with the word “mold” in connection with food, but most Americans are not—even though many enjoy mold-ripened cheeses.

Sendai shoyu is not really traditional shoyu since: (1) They don't use little wooden koji trays. (2) They use koji starter (moreover, pure culture koji starter) rather than airborne yeasts. (3) Traditionally neither yeasts nor bacteria were added to the *moromi*. (4) Traditionally, *moromi* was made only during the cold months; if it were produced during the summer, it was made with chilled water to slow down the fermentation process. How was the water chilled?

Ajinomoto is a major maker of HVP, a tan liquid. How is it shipped? As a liquid or a solid?

Kikkoman says the term *tennen jôzô* (“naturally fermented”) refers to the way they make shoyu. We say it means fermented at the natural temperature of the environment without any heat control. Is there any formal definition of *tennen jôzô*? Must it be made with whole soybeans? This creates a lot of environmental pollution during disposal of the salty oil. Ask Haga-san at Sendai.

Fermented shoyu is *hon-jôzô*. Semichemical shoyu is *shinshiki-jôzô*.

Farmer Jones uses shoyu in curing bacon and in making liverwurst (“liver sausage”).

Note: Liverwurst is an anglicisation of the German word, “Leberwurst.” Liverwurst normally contains pigs' livers, rather than calves' livers and also contains veal. Most liverwurst varieties are spreadable. The sausage is usually made with pork. Only about 10-20% of the sausage is actually made using pork liver, which is enough to give it a distinctive liver-taste. Other ingredients are meat, fat, and spices including ground black pepper, marjoram, allspice, thyme, ground mustard seed, or nutmeg (Source: Wikipedia, at Liverwurst, Sept. 2011). Address: San Francisco, California.

5733. *SoyaScan Notes*. 1980. Chinese soy products purchased in San Francisco Chinatown (Overview). April 17. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Commercial products purchased in San Francisco Chinatown. Shurtleff and Aoyagi purchased these before visiting David Hall, owner of Wing Nien Soy Sauce Mfg. Co., in San Francisco, and discussed some of them with him.

Soybean condiment: It is brown and moderately salty; it has a little texture. Contains soybean, wheat, salt, water, molasses, caramel coloring, MSG, garlic powder, sesame seed, sodium benzoate.

Koon Chun Thin soy sauce contains water, soybeans, salt, flour. No preservative. Made in Hong Kong.

Pearl River Bridge Soy Superior sauce. Made in mainland China (PRC). 21 fl. oz. Ingredients: Extract of soybeans, wheat flour, salt, sugar. Very dark. Use for dipping, not for cooking.

Pearl River Bridge Superior Soy: 22 fl. oz. Ingredients: Extract of soya beans, wheat flour, salt, water. No sugar, no preservative. Made in China (PRC). Not as dark as "Soy Superior." Use for dipping.

Yuet Heung Yuen-Dark soy. Ingredients: soybeans, flour, salt, water. No preservative. 11 fl. oz. Address: 171-175 Main St., Aplichau, Hong Kong.

"Salted black beans." They look like hamanatto, sold 8 oz. (by weight) in a plastic bag. Flecks of salt can be seen on the surface of each bean. Ingredients: Black beans [soybeans] and salt. Made in Hong Kong. Also called "sadow-si" = salted black beans.

5734. Will, Joanne. 1980. Saute pan encounters wok in chinois cuisine. *Chicago Tribune*. April 17. p. W_B3, or S_A3, or N_B3.

• **Summary:** Ruth Law is an accomplished Chinese cooking instructor. John Snowden is a chef and the proprietor of a French cooking school. Chinois cuisine aims to mate this two great culinary traditions. "Law has had to eliminate soy bean curd, a favored Chinese ingredient but one that Snowden finds offensive. 'We cook things that are compatible, so that the menu is harmonious,' Law explained." Four recipes are given. Flower soup calls for 1 teaspoon light soy sauce and 1½ teaspoons sesame oil. Address: Food editor.

5735. Spencer, Colin. 1980. Food: Black marks. *Guardian (England)*. April 18. p. 10.

• **Summary:** Chinese stores stock most of the flavourings [and seasonings] used in restaurants and for home cooking, such as "satay, five spices powder, sesame paste, yellow bean paste, black bean paste," or hoisin sauce.

5736. Dosti, Rose. 1980. Nutrition class: You practice eating what you preach. *Los Angeles Times*. April 24. p. L29.

• **Summary:** "Elementary-school teachers who registered for a course called Nutrition Update at Cal State Long Beach last week learned a thing or two about teaching children nutrition and got to eat what they learned, too." The recipe for Basic stir-fried meat and vegetables calls for "1 (7-ounce) package baked soy bean cakes (tofu)."

A recipe for Chicken marinade calls for "1 tablespoon light soy sauce." Address: Staff writer.

5737. Yoneda, Soei. 1980. Shôjin ryôri, osôzai: Take-no-Gosho fû [Zen vegetarian cookery, side dishes: Kyoto Take-no-Gosho style]. *Kurashi no Sekkei (Designs for Living)* No. 131. 196 p. April. Illust. 30 cm. (Tokyo: Chuo Koronsha). [Jap]

• **Summary:** Filled with hundreds of lovely color photos of prepared dishes, steps in preparation, Zen temples and their art treasures, gardens, and buildings. Many of the recipes include soyfoods, especially tofu, miso, shoyu, and okara. Includes a color portrait of Soei Yoneda (p. 5) and the story of her life and work (p. 165-67). Address: Abbess, Sanko-in Zen temple, Honcho 3-1-36, Koganei-shi, West Tokyo (Musashi Koganei Station).

5738. Earle, Steve. 1980. Re: Tamari and other types of shoyu in Japan. Letter to William Shurtleff at Soyfoods Center, May 7. 5 p. Typed, with signature. [2 ref]

• **Summary:** A long, excellent letter containing detailed answers to ten questions from Shurtleff about tamari in Japan. Address: San-Jirushi Corp., 1-chome, Meisei-dori, Kuwana, Mie 511, Japan. Phone: (0594) 22-3333.

5739. **Product Name:** Soysage.

Manufacturer's Name: Bountiful Bean Plant.

Manufacturer's Address: 903 Williamson St., Madison, WI 53703. Phone: 608-251-0595.

Date of Introduction: 1980. May.

Ingredients: Okara (soybean pulp), soybeans, buckwheat flour, oats, nutritional yeast, tamari, oil, malt syrup, garlic powder, allspice, ginger, fennel, oregano, sage, black pepper, cayenne pepper.

Wt/Vol., Packaging, Price: Four 3-lb. blocks per case, \$1.28/lb wholesale.

How Stored: Refrigerated or frozen.

New Product-Documentation: Bountiful Bean Plant. 1980. Soysage News! "Soysage is about ready to be produced for distribution to your store... The Bountiful Beaners." Suggests that stores cut each block into 12-oz. pieces.

5740. *Food Product Development*. 1980. Oriental specialty miso expands market horizons. 14(5):26. May.

• **Summary:** About Kikkoman Instant Miso-Shiru Soy Bean Soup Mix, available in red (aka) and white (shiro). "Following the lead of its soybean cousin tofu, miso is beginning to break away from its limited market in gourmet, ethnic, and health food stores and filter into select supermarkets." A photo shows the front of the two packages, written in both Japanese and English.

5741. **Product Name:** Marusan's Genuine Tamari Soybean Sauce.

Manufacturer's Name: Marusan, Inc. (Importer). Made in Japan by Marusan.

Manufacturer's Address: 297 Galvan Place, Box 507,

Bergenfield, NJ 07621. Or 8780 E. Valley Blvd., Rosemead, CA 91770. Phone: 201-385-5367.

Date of Introduction: 1980. May.

Ingredients: Soybeans, water, salt (wheat free).

Wt/Vol., Packaging, Price: glass dispenser, pint, or quart bottle.

How Stored: Shelf stable.

New Product–Documentation: Ad in *Macroscopic*. 1980. May. p. 2. “Marusan makes quality a natural.” “Genuine Tamari Soybean Sauce—priced like so-called tamari, but made the traditional wheat-free way from the aging process of Mame Miso (Soybean Miso) for the denser, more flavorful richness only Real Tamari provides.”

Note: This is the earliest published English-language document seen (March 2012) that contains the term “real tamari” or the term “genuine tamari.”

5742. Mori, H. 1980. Shôwa 54 nendo ni okeru shôyu, miso no kenkyû gyôseki [Review of annual achievements in shoyu and miso research]. *Nippon Jozo Kyokai Zasshi (J. of the Society of Brewing, Japan)* 75:384-410. May. [625 ref. Jap]

• **Summary:** This important Japanese-language article, published each year in the May issue of this periodical, has two parts: (1) A review of the past year’s major discoveries and developments in the fields of miso and soy sauce in Japan. (2) A bibliography related to those discoveries and developments. Address: Noda Sangyo Kagaku Kenkyusho.

5743. Shurtleff, William; Aoyagi, Akiko. 1980. Soyfoods America Tour: May 5 to June 10; July 25 to Aug. 3, 1980 (Log and trip report—unpublished, including Itinerary with map). Lafayette, California: New-Age Foods Study Center. Unpublished log.

• **Summary:** This trip had five purposes: (1) To introduce tempeh to America; (2) To promote the authors’ newly published *Book of Tempeh*. Harper & Row, the publisher, paid most of the trip expenses; (3) For William Shurtleff to attend the University of Illinois Short Course in Soybean Processing; (4) To visit and study soyfoods companies in America; (5) To introduce people to the many advantages of a meatless / vegetarian diet.

A photo shows: Shortly before the trip, Akiko (left) and Valerie Robertson (right) (working in the Shurtleff’s small home kitchen) “canned” many quart Mason jars of Tempeh Cacciatore to serve at the intermission of each lecture / presentation.

Includes the name and address of 37 people and organizations visited. Many of these were pioneers in the soyfoods and natural foods movement: April 25—Optimum Foods (Napa, California). April 27—David Burns (Sebastopol, CA). May 5—Jeremiah Ridenour of Monterey Bay Soyfoods (Santa Cruz, CA). May 6—Thelma Dalman, Foodservice Director for the Santa Cruz City Schools, *Monterey Peninsula Herald*, Ted & Marie Fehring (Carmel),

Paula Welch Terui of Jack and the Beanstalk (Carmel Valley, CA). May 8—Al Jacobson of Garden of Eatin’, Mr. Kaye Dunham of Tumaro’s, Hugh Roberts of Meals for Millions. May 9—Eddie Okita of Okita Enterprises, and Noritoshi Kanai of Mutual Trading Co. (Los Angeles, CA). May 10—Kay Glass (La Cañada, CA). May 11—Frazier Farms natural foods supermarket (Escondido, CA), Bill Walton vegetarian and basketball star (San Diego, CA; we stay with Craig Wright and Andrew Solony of TriLife; they hope to market Bill Walton’s tofu under the TriLife brand). May 12—Clare Quinn of The Farm (Tucson, Arizona; her check bounced so we never got paid). May 13—Kathryn Bennett of Southwest Soyfoods (Santa Fe, New Mexico), Tracy McCallum, Taos. May 14—Leslie Wertz (Alamosa, Colorado). May 16—Stay with Christie and John Baker (Boulder, Colorado). May 17—Steve Demos of White Wave Soyfoods and Good Belly Deli. May 18—Sanford and Rebecca Greenwood of East West Center (Boulder, Colorado). May 19—Judson Harper and the low cost extrusion cooker program at Colorado State Univ., Carol Hargadine of Nupro Foods & Soywaze Tofu (Fort Collins, CO). May 21—Gale Randall of the Indonesian Tempeh Co. (Palmyra, Nebraska). May 22—David Tucker of New Pioneer Co-op Society (Iowa City). May 23—George Strayer of Edible Soy Products (Makers of Pro-Nuts, May 23) and Agricultural Exports (Hudson, and Cedar Falls, Iowa). May 24—Cedar Falls (Iowa) and Minneapolis media. May 25—Pat Aylward and Jamie Stunkard of Joy of Soy Tofu (Minneapolis, Minnesota). May 27—Richard Cihoski (Duluth, MN). May 28—Chris Burant of Bountiful Bean Plant and Jehan Ziegler of Higher Ground Cultured Foods (Madison, Wisconsin). May 29—Danji Fukushima of Kikkoman Foods (Walworth, Wisconsin), Diane Loomans of The Magic Bean Co-op (Milwaukee, Wisconsin). May 30—Susan Dart (Lake Forest, Wisconsin), Research staff of Kraft Foods (Glenview, Illinois), Brian Schaefer of It’s Natural (Evanston, Illinois). May 31—Paul Obis of *Vegetarian Times* magazine (with Brother Ron Pickarski) (Oak Park, Illinois). June 2—Lou Richard of Fearn Soya Foods, Leonard and Irene Stuttman of INARI, Ltd. June 3—John Gingrich of The Soy Plant. June 4—Tim and Carol Ann Huang of Yellow Bean Trading Co. (Detroit, Michigan). June 5—Glen Blix and Charles D. Howes of Loma Linda Foods (Mt. Vernon, Ohio; furthest point east on tour). June 6—Warren Hartman of Worthington Foods (Worthington, Ohio). June 7—Mick Vissman and Bill Lutz of Hip Pocket Tofu Deli and Rain Star (Columbus, Ohio), Ed Willwerth of Soya Food Products (Cincinnati, Ohio). June 8—Jay McKinney of Simply Soyfoods (Bloomington, Indiana). June 9—Lynn Adolphson and Bob Thompson of Archer Daniels Midland Co., and Grant Smith of A.E. Staley Mfg. Co. (Decatur, Illinois). June 10-11—Les Karplus of Corn Country Foods and Strawberry Fields. June 11—William Thompson and John Santa of INTSOY (Champaign, Illinois).

During the INTSOY Short Course: July 6—We did a

program hosted by Patricia Mutch at Andrews University (Berrien Springs, Michigan). July 9-13—Third Annual Soycrafters Association of North America conference was held at the University of Illinois, produced by Richard Leviton. There were 270-285 attendees, and it made good money.

People at the University of Illinois we met during the course: Dr. William Thompson, Frances Van Duyne, Harold Kauffman, John Erdman, L.S. Wei, A.I. Nelson, M.P. Steinberg, Munir Cheryan, Ted Hymowitz, Woody Yeh.

Return trip after course: July 28—Bob Davis of Light Foods (St. Louis, Missouri). July 30—James Lowrie of Iowa State University (Ames, Iowa). Aug. 2—Lake Tahoe. Aug. 4—Home in Lafayette, CA.

At most of the public classes/lectures on this trip, Shurtleff and Aoyagi served their favorite tempeh and tofu dishes. They wanted to find out how Americans liked tempeh, so they asked for a show of hands as to which the attendees liked best. The tempeh dish was usually Tempeh Cacciatore, and the results were, on average, that the tempeh was preferred by a ratio of 2 to 1 over the tofu.

On this trip, Shurtleff and Aoyagi did 27 public programs, had 28 media interviews and appearances, traveled 9,000 miles, earned \$13,000 gross income and \$8,500 net income. Address: P.O. Box 234, Lafayette, California 94549.

5744. Westbrae Natural Foods. 1980. Wholesale food catalog: Spring 1980. Emeryville, California: Westbrae. 23 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue and dark red on a tan background. Contents: Westbrae juices. Honey butters. Unsweetened spreads. Preserves. Applesauce. Nut butters (Almond butter roasted, cashew butter roasted, cashew butter raw, cashew-peanut-date butter, raw sesame tahini, toasted sesame tahini, peanut butter crunchy, peanut butter smooth, peanut butter crunchy salted, organically grown Valencia peanut butter crunchy). Cereals (mostly granola, incl. cashew granola, maple almond granola).

Trail mixes: Bay to Breakers trail mix (with sunflower seeds and Valencia peanuts, both roasted and coated with shoyu), Chisholm trail mix (with sunflower seeds, cashew pieces, and almonds, each roasted and coated with shoyu).

Roasted nuts (bulk, 12-25 lb; * = 9 oz package also available): Tamari almonds*, Tamari cashews*, Tamari Chisholm mix*, Tamari Valencia peanuts, Tamari pepitas (pumpkin seeds), Tamari sunflower seeds*, Tamari nutroaster's mix*, Deluxe tamari nut mix, roasted Spanish [peanuts] splits for butter stock, roasted Valencia peanuts. Packaged nuts.

Wholegrain pasta (incl. Soy linguini). Westbrae miso (imported from Japan): Red miso, brown rice miso, barley miso, Hatcho miso, soybean miso, natto miso. Cold Mountain miso (made in Los Angeles): Light yellow, mellow white, red. Sea vegetables: Kombu, hijiki, arame, wakame,

nori. Atlantic Mariculture dulse.

Westbrae tamari and other Asian foods: Johsen shoyu-tamari, Traditional (true) tamari—wheat free, White tiger tofu sauce, natural nigari, agar flakes and sticks, umeboshi salt plums, rice wine vinegar, brown rice wine vinegar, ramen with soup stock.

Helpful tools (incl. Learning Tree tofu kit, wok, vegetable steamers, vegetable brush, utility knife). Informational pamphlets: What is miso? What is tofu? Miscellaneous (incl. falafel mix, tabouleh mix, Ak Mak crackers, sea salt, mayonnaise, black spiced olives, kosher dill pickles). Oils. Sweeteners. Bakery products. Dried fruit. Beans (incl. azuki beans, soybeans). Grains. Nuts and seeds. Non edible (drums, jars, and bottles). Glossary of manufactured products showing ingredients. Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

5745. Bu'Lock, J.D. 1980. Such a tasty dish (Letter to the editor). *Times (London)*. June 4. p. 19, cols. 5-6.

• **Summary:** In reply to a letter about "ergot" by Dr. Alan Long. "The traditional oriental fermentations of soya and the like work reliably in their places of origin because those places are so heavily 'infected' with the correct mould species that other microorganisms—including some real nasties—have no chance to gain a foothold. By the same token, anyone trying to introduce them in the West had better employ some trained microbiologists. The Kikkoman company has manufactured fermented soya products in Japan for over 300 years, but the factory they recently [1973] established in the United States had to conform to the very highest standards of food microbiology. A start along similar lines is already being made in Britain, but I am fearful that amateur enthusiasms will do such ventures more harm than good." Address: Weizman Microbial Chemistry Lab., Dep. of Chemistry, The Univ. of Manchester, Manchester [England].

5746. Gevaert, Pierre. 1980. Re: Early work with tamari and miso in Europe. Letter to William Shurtleff at Soyfoods Center, June 11—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** "Your note about the misuse of the term 'tamari' is correct." Lima started producing tamari in 1968. It first appeared on the market in 1961, under the name "tamari." Production continued until 1966. "Our shoyu, called and registered as 'tamari' at George Ohsawa's request, was a dark, rather thick liquid very similar to real tamari even though our product was made from 5% soybeans and 50% wheat. I think this was because we aged the product for at least 3 years, and some of it was even older because we could sell only a small part of the production. In 1967 we had such large stocks of miso and tamari that we stopped their production and cured our weak financial situation by selling

off these stocks. We still remember the good Lima Tamari, and when we started to import from Japan, we always mixed at least 1/3 of Japanese tamari to approach our own quality.

“This month we will produce a good quality of miso in our French artisanal factory running on water energy.” Address: P.V.B.A. Lima, Edgar Gevaertdreef 10, 9830 Sint-Martens-Latem, Belgium. Phone: (09) 82.41.76.

5747. Yokotsuka, Tamotsu. 1980. Re: Brief chronology of shoyu in Japan. Letter to William Shurtleff at Soyfoods Center, June 15. 1 p. [2 ref. Eng]

• **Summary:** 1521. The characters used today for the term shoyu were first used in Japan in the *Ekirin Bonsetsu Yoshu*. Prior to this time the characters hishio, mame-bishio, etc. were commonly used.

1532. Today’s characters for shoyu were first used in a cooking book, the Daiso Ryôri-sho.

1558 A brewer in Noda sent tamari to Kawanaka-jima. Address: Kikkoman, Noda, Japan.

5748. *Consumer Reports*. 1980. Soybeans—the “meat” that grows on vines. 45(6):360. June.

• **Summary:** This sidebar to the article “Vegetarianism: Can you get by without meat?” gives a brief description of the soybean and its food uses. “Roasted soybeans [soynuts] can be a delicious snack food.” A small amount of soy flour added to bread or pasta dough appreciably increases those foods’ protein content. Sprouted soybeans can be eaten cooked or as a salad vegetable and are a good source of vitamin C.

“Soybeans can be made into a milk that, when fortified, can supply nutrients usually obtained from cow’s milk. That’s important for total vegetarians or those allergic to milk protein. Soy milk can be made into a cheese: soybean curd, or tofu, familiar to many as the little white cubes floating in the soup at a Chinese restaurant.” Also mentions soy sauce, miso, tempeh, and meat extenders or meat analogs.

5749. Darby, William J. 1980. Why salt? How much? *Contemporary Nutrition (General Mills, Minneapolis, Minnesota)* 5(6):1-2. June. Reprinted in *Sourcebook on Food and Nutrition*, 3rd ed. 1982. p. 132-34. [11 ref]

• **Summary:** Contents: Salt and its history. Physiological salt requirements. Appetite for salt. Estimates of salt intake. Acute salt depletion. Toxicity of excessive salt. Dietary salt and hypertension. Controversy on salt intake limitation. Summary. Address: President, The Nutrition Foundation, 489 Fifth Ave., New York, NY 10017.

5750. **Product Name:** Living Tempeh Starter [Kit Size 15 x 60 mm Petri dish, or Professional Size 15 x 100 mm Petri dish], Koji Starter for Miso (40 gm) [Light Rice, Red Rice, Barley, or Soybean Koji], Shoyu Koji Starter (60 gm),

Natural Nigari (Tofu Coagulant).

Manufacturer’s Name: GEM Cultures.

Manufacturer’s Address: 30301 Sherwood Rd., Fort Bragg, CA 95437. Phone: 707-964-2922.

Date of Introduction: 1980. June.

New Product–Documentation: Article and ad in *Soyfoods*. 1980. Summer. p. 4-5. “New Source of Tempeh Starter.” “Gordon McBride, PhD, former manager of the Living Culture Department at Ann Arbor Biological Center [Inc. in Michigan], and his wife, Betty Stechmeyer, B.S., announced the formation of GEM Cultures, which will provide high-quality tempeh starter cultures at reasonable prices.”

Letter and catalog from GEM Cultures to Tempeh producers. 1980. July. Offers a free sample of professional size Living Tempeh Starter (a pure culture of *Rhizopus oligosporus*).

Shurtleff & Aoyagi. 1985. *History of Tempeh*. p. 55. This starter, sold live, was grown on agar in petri dishes.

Letter from Betty L. Stechmeyer of GEM Cultures. 1991. Oct. 18. These four basic products were introduced in June 1980. For a while, they tried to import commercial shoyu and miso cultures from Nihon Jozo Kogyo but it never worked, so they ended up ordering via Mitoku.

5751. Hesseltine, C.W.; Wang, H.L. 1980. The importance of traditional fermented foods. *BioScience* 30(6):402-04. June. [12 ref]

• **Summary:** Table 1 gives, for each food, the name, area or country, microorganism used, substrate, nature and uses. The following soy-related foods are included: Soy sauce (chiang-yu, shoyu, toyo, kecap, see-ieu), miso (chiang, doenjang, soybean paste, taucu), Hamanatto (toushih, tao-si, tao-tjo [sic, tao-tjo = taucu is Indonesian-style miso]), sufu (fu-ru, fu-ju, tou-fu-ju, bean cake, Chinese cheese), tempeh, bongkreik, ontjom (oncom), natto. Address: NRRRC, Peoria, Illinois.

5752. **Product Name:** [Soyacreme Natural].

Foreign Name: Soyacreme Natuur, Naturel, Naturell.

Manufacturer’s Name: Jonathan P.V.B.A.

Manufacturer’s Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

Date of Introduction: 1980. June.

Ingredients: Well-water, soya*, sesame, brown rice*, arrowroot, soya sauce, vegetable extract, sea-salt, sea-vegetables, spices. * = Organically grown.

Wt/Vol., Packaging, Price: 100 gm.

New Product–Documentation: Label. Received 1988.

3 by 2 inches. Self adhesive. Blue, orange, and black on a seaside background with sea gull. “Vegetable.” Form filled out by Jos van de Ponsseele. 1989. Jan. 11. This product was introduced in June 1980.

5753. **Product Name:** [Soyspread].

Foreign Name: Sojapaste, Pâté de Soya, Sojapasta.

Manufacturer's Name: Jonathan P.V.B.A.

Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

Date of Introduction: 1980. June.

Ingredients: Well-water, soya*, vegetables*, sesame, brown rice*, arrow-root, soya sauce, vegetable extract, sea-salt, sea vegetables, spices. * = Organically grown.

Wt/Vol., Packaging, Price: 250 gm jar.

New Product–Documentation: Label. Received 1988. 1.25 by 10.5 inches. Glossy paper. Orange and black on a pastoral background with sea gull and duckling. "Pure vegetable." Form filled out by Jos van de Pongseele. 1989. Jan. 11. This product was introduced in June 1980.

5754. **Product Name:** [Soyacreme with Seitan].

Foreign Name: Soyacreme Met Seitan, Avec Seitan, Mit Seitan.

Manufacturer's Name: Jonathan P.V.B.A.

Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

Date of Introduction: 1980. June.

Ingredients: Well-water, seitan (wheat proteins)*, vegetables*, soya*, sesame, arrowroot, soya sauce, brown rice*, vegetable extract, sea-salt, sea vegetables, spices. * = Organically grown.

Wt/Vol., Packaging, Price: 100 gm.

New Product–Documentation: Letter from Sjon Welters. 1982. April 16. "Jonathan is a macrobiotic food company. They produce a wide assortment of macrobiotic products, such as... seitan..."

Label. Received 1988. 3 by 2 inches. Self adhesive. Orange and black on a seaside background with sea gull. "Vegetable." Form filled out by Jos van de Pongseele. 1989. Jan. 11. This product was introduced in June 1980.

5755. Kikkoman Corporation. 1980. Kikkoman: Management and performance (Brochure). 399 Noda, Noda City, Chiba 278, Japan. 4 p. 18 x 15 cm.

• **Summary:** This is a financial statement as of 2 June 1980. U.S. \$1.00 = ¥224. Lists the company's directors. Katsumi Mogi is president. Sales increased from about \$180 million in 1970 to about \$500 million in 1979, or three-fold in ten years, and at an average annual growth rate of 13.3%. Capitalization has grown from about \$16 million in 1968 to \$33.48 million in 1980. The total annual demand for soy sauce in Japan is about 324 million gallons. Kikkoman's yearly production is about 110 million gallons, or about 34% of the total. Address: Noda, Japan. Phone: (0471) 233-5610.

5756. **Product Name:** Soysage (Meatless Okara-based Sausage).

Manufacturer's Name: Light Foods Inc.

Manufacturer's Address: 6144 Bartmer, St. Louis, MO

63133.

Date of Introduction: 1980. June.

Ingredients: Okara (Soypulp), whole wheat, flour, soymilk, nutritional yeast, wheat germ, safflower oil, bulghur wheat, soy grits, shoyu, honey, barley malt, sesame seeds, herbs & spices.

Wt/Vol., Packaging, Price: 20 oz (1 lb 4 oz), 567 gm.

How Stored: Refrigerated.

Nutrition: Per 2 oz.: Calories 147, protein 6.3 gm, carbohydrate 16.5 gm, fat 6.1 gm, sodium 292 mg.

New Product–Documentation: Label. 1980. June. 3 inches square. Self adhesive. Purple on white. Illustration of a winged unicorn jumping across a stream in front of a rising or setting sun. "No preservatives."

Barbara G. Ostmann. 1980. Post-Dispatch (St. Louis, Missouri). Oct. 29. p. 1E, 4E. "Time for tofu." Bob Davis' company Light Foods Inc. makes Soysage (soy "sausage").

Label. 1981, undated. 3 inches square. Self adhesive. Purple on white. Illustration of a winged unicorn rearing on its hind legs jumping across a stream in front of the rising or setting sun. "No preservatives. Please refrigerate." The size is now 22 oz (567 gm) plastic wrapped.

Leviton. 1981. Soyfoods. Summer. p. 42. "They produce up to 300 pounds weekly." 1983. Winter. p. 48. Gives name now as Light Soysage and ingredients as: Okara, bulghur wheat, whole wheat flour, wheat germ, nutritional yeast, sesame seeds, shoyu, oil, mustard, soymilk, and 10 different seasonings.

5757. Shurtleff, William; Aoyagi, Akiko. 1980. Kicking the meat habit with soyfoods. *Vegetarian Times* No. 38. June. p. 30-31.

• **Summary:** Contains recipes for: Tofu steak. Tofu burgers. Teriyaki tofu. Tofu cutlets. Tofu Italian meatballs. Tempeh burger. Sloppy Joe tempeh. Tofu jerky (marinated in teriyaki sauce, then baked). Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

5758. Steinkraus, Keith H. 1980. Introduction: Food from microbes. *BioScience* 30(6):384-86. June. [12 ref]

• **Summary:** Contents: Meat analogs. The role of plants. Microbe production. Fermented foods: Tempeh, miso, soy sauce. Address: New York State Agric. Exp. Station, Geneva, NY 14456.

5759. **Product Name:** Golden Light Baked Tofu.

Manufacturer's Name: Sunshine Soy Co. Inc.

Manufacturer's Address: 4015 Laguna St., Suite "H," Coral Gables, FL 33146. Phone: 305-447-1277.

Date of Introduction: 1980. June.

Ingredients: Tofu, organic soybean, pure water, natural nigari, yeast, tamari, spices.

Wt/Vol., Packaging, Price: 8 oz. retails for \$1.50.

How Stored: Refrigerated.

New Product–Documentation: Sunshine Soy Company. 1980. Retail price list—Effective May 1980. 8 oz retails for \$1.50. One case of 12 units weighs 6 lb 6 oz and retails for \$18.00.

Needleman. 1981. Soyfoods. Summer. p. 29-30. “Tofu plant profiles: Swan Gardens and Sunshine Soy (Miami).” Danny Paolucci started Sunshine Soy in June 1980.

Label. 1983. 3.5 by 3 inches. Self adhesive. Orange, green, blue and yellow on white. Soy fields with sun illustration. “Natural. No preservatives.” Label says: “Mtd. by Sunshine Soy Co. Inc., Coral Gables, Florida 33146.”

Talk with Danny Paolucci, founder and former owner of Sunshine Soy. He thinks this product was introduced in about Oct. 1980.

5760. American Dietetic Association. 1980. Position paper on the vegetarian approach to eating. *J. of the American Dietetic Association* 77(1):61-70. July. [54 ref]

• **Summary:** This position paper is surprisingly supportive of a lacto-ovo vegetarian diet, although the ADA continues to feel that combining proteins is important. It states that “a growing body of scientific evidence supports a positive relationship between the consumption of a plant-based diet and the prevention of certain diseases,” including coronary heart disease, osteoporosis, and gastrointestinal and reproductive cancers.

Contents: Introduction. Definition of terms: Vegetarian, vegetarianism, traditional vegetarians, total vegetarians or vegans, lacto-vegetarians, semi-vegetarians or partial vegetarians, new vegetarians (since 1960, incl. yogic vegetarians, Hare Krishnas or Krishnas, Sufis, Sikhs, Macrobiotics), fruitarians, raw food eaters, individualistic vegetarians, alternative life style diet. Other terms which relate to vegetarianism: Natural foods, organic foods, unrefined foods, unprocessed foods, health foods, meat analogs (look and taste like meat), nutritional or food yeast, milk substitute (alternate) (usually based on soy. “Calcium, zinc, vitamins A, B-12, D, and K, and thiamin are all substantially lower (or missing) in these home-made products than in breast milk or other proprietary formulas”), fermented foods (incl. soy sauce, miso, tempeh—may contain some vitamin B-12), seaweeds and algae.

Vegetarianism past and present: Historical perspectives (omnivorous diets), vegetarianism in the U.S. today (it is more popular than at any time in the nation’s history). Nutrition issues: Proteins, energy, carbohydrates and fats, vitamins and minerals (vitamins B-12 and D, calcium and riboflavin, iron and phytic acid, zinc and phytates). Groups with special physiologic risks: Pregnant and lactating women, infants and children (lacto-ovo- and lacto-vegetarian diets, vegan diets—the use of properly fortified soy milk is strongly recommended, vitamins and minerals), adults with special health problems (lactose intolerance, diabetes mellitus). Implications of vegetarian diets for health

promotion and prevention and treatment of disease: Coronary heart disease, cancer, obesity, dental caries, osteoporosis. Menu planning guidelines for vegetarians. Meat analogs. Summary. The President’s page: Esther A. Winterfeldt, PhD, RD, on “Position papers.”

“Macrobiotics—persons who consume vegan or vegetarian diets which involve extensive non-animal food avoidances, use of unprocessed, unrefined, ‘natural’, and ‘organic’ foods; and also, in some forms, fluid restriction. Tamari, miso, and various seaweeds are used extensively and are believed to be endowed with special properties.

“Vegetarianism—past and present: The American Dietetic Association recognizes that most of mankind for much of human history has subsisted on near-vegetarian diets. The vast majority of the population of the world today continues to eat vegetarian or semi-vegetarian diets for economic, philosophical, religious, cultural, or other reasons. The matter of motivation is crucial, because it affects the diet adopted, adherence to it, and other characteristics of life style.”

“Nutrition issues: The American Dietetic Association affirms that a well planned diet, consisting of a variety of largely unrefined plant foods supplemented with some milk and eggs (lacto-ovo vegetarian diet) meets all known nutrient needs. Furthermore, a total plant dietary can be made adequate by careful planning, giving proper attention to specific nutrients which may be in a less available form or in lower concentration or absent in plant foods.”

Note: This is the earliest English-language document seen (June 2002) that uses the term “plant-based diet” to refer to one that contains no animal products.

5761. **Product Name:** New World Wheatmeat Sub (on a Wholewheat Sub Roll).

Manufacturer’s Name: New World Enterprises. Renamed New World Natural Foods in 1985.

Manufacturer’s Address: 226 Cypress St., Brookline, MA 02146. Phone: 617-232-5973.

Date of Introduction: 1980. July.

New Product–Documentation: Talk with Emily Merghart Morse. 1992. July 16. This sandwich was introduced in July 1980. The Wheatmeat (seitan) was supplied to her by John Weissman.

5762. **Product Name:** Marinated Tofu (Tofu in a Marinade).

Manufacturer’s Name: Redwood Valley Soyfoods Unlimited.

Manufacturer’s Address: P.O. Box 371, (8473 East Rd.), Redwood Valley, CA 94570.

Date of Introduction: 1980. July.

Ingredients: Tofu, shoyu, garlic, onion, cayenne.

Wt/Vol., Packaging, Price: 8 oz cakes.

How Stored: Refrigerated.

New Product–Documentation: Label. 1981. 4 by 3.5

inches. Self adhesive. Black on yellow. "New! A delicious ready to eat tofu... naturally!" Spot in *Soyfoods*. 1982. Summer. p. 56. "Prepared Tofu Salads and Desserts." Letter from Richard Rose. 1987. Aug. 29. The company was named Brightsong Tofu from its founding in June 1978 to June 1980. Then it changed to Redwood Valley Soyfoods Unlimited, until June 1982, when it changed to Brightsong Light Foods.

5763. Shurtleff, William; Aoyagi, Akiko. 1980. *Das Miso-Buch: Nahrung fuer alle Band 1* [The book of miso: Food for mankind. Vol. 1]. Soyen, West Germany: Ahorn Verlag. 266 p. July. Illust. by Akiko Aoyagi Shurtleff. Index. 23 cm. A co-production of Ost-West Bund e.V. and Ahorn Verlag. Translated from English by Rainer Bosch and Gudrun Klein. [43 ref. Ger]

• **Summary:** Contents: What is miso? Foreword.

Acknowledgments. Part I. Miso: Nutritional value and varieties. 1. Soybeans, protein and the world food crisis. 2. Miso as a food. 3. The miracle of fermentation. 4. The varieties of miso.

Part II. Cooking with Miso (400 recipes). 5. Getting started—principles, kitchen utensils, preparation. 6. Recipes from East and West. Part III. The Preparation of Miso.

Part III. The production of miso. 7. Making miso at home and in communities. 8. Japanese farmhouse miso. 9. The traditional miso shop. 10. The modern miso factory. Appendixes: A. The history of chiang, miso, and shoyu, and their historical significance. B. The chemistry and microbiology of miso fermentation. C. Miso additives. D. Miso with seafoods, chicken, and meat. E. When you want to study miso in Japan. F. People and institutions worldwide connected with miso. G. Natural food stores in German-speaking countries. Bibliography. Glossary. About the authors and their work (autobiographical).

Published in both hardcover and paperback editions. Address: New-Age Foods Study Center, P.O. Box 234, Lafayette, California 94549.

5764. Shurtleff, William; Aoyagi, Akiko. 1980. In search of the real tamari. *Soyfoods* 1(3):20-25. Summer.

• **Summary:** An in-depth study of tamari soy sauce, based on a trip by W. Shurtleff to the San Jirushi plant that makes tamari in Kuwana, Japan, on 5 July 1977. Contents: What is tamari? History of misuse of the term "tamari" by macrobiotics. Comparison with shoyu (Ingredients. Flavor, consistency, color, and aroma. A regional food. Japan's earliest soy sauce). The five varieties and three grades of tamari. How tamari is made at San Jirushi. How to make tamari at home.

"For each of the five varieties of shoyu [see table 1] the Japanese Agricultural Standards (JAS) recognize three grades: Special Grade (*Tokkyu*, which comprised 53% of all shoyu in 1976 and which can consist of only high quality

fermented shoyu unmixed with any chemical [HVP] shoyu); Upper Grade (*Jokyu*, comprising 26%); and Standard Grade (*Hyojun*, comprising 13%). Each grade is determined by overall quality, total nitrogen content, soluble solids other than sodium chloride, and color. Some producers also make a special grade, higher than the others, called *Tokusen*, or Special Select; it has no legal identity."

Table 1, titled "Varieties, composition, and production of Japanese shoyu," (from Fukushima 1981, p. 347) gives basic statistics concerning the following five varieties: *koikuchi*, *usukuchi*, *tamari*, *shiro*, and *saishikomi*. For each, it gives the English name, Japanese name, Bé [Baumé; specific gravity / relative density], percentage of sodium chloride (weight / volume), percentage of total nitrogen (weight / volume), percentage of reducing sugar (weight / volume), percentage of alcohol (volume / volume), pH, color, and percentage of total annual shoyu production in Japan.

Sanjirushi makes at least four different consistencies of tamari: (1) Sashimi tamari (*roku-sui*) which is delectably rich and thick; (2) Cuisine tamari (*ryotei-damari*) is especially prized as an all-purpose seasoning for cooking; (3) Tabletop tamari shoyu (*kibiki-damari*; *Kyu-sui*) is meant to be used both in the kitchen and at the table, quite like shoyu. It is made from 85% soybeans and 15% cracked roasted wheat; (4) Regular tamari shoyu (*jusan-sui*) is the most popular type of tamari product in Japan. It is made using the same proportion of ingredients as Tabletop Tamari except that 13 parts of water are used for every 10 parts of soy and wheat.

Color photos (taken by Shurtleff) show: (1) The automated soybean koji chamber. (2) The liquid tamari being pressed from the mature moromi (mash) in strong bags by a hydraulic press. (3) A roomful of tamari vats, in which the moromi is aging. (4) A man standing on a board placed across the rim of a vat ladling liquid tamari into a floating keg. (5) A man stirring a vat filled with liquid tamari. (6) Five bottles of tamari behind tasting dishes. Address: New-Age Foods Study Center, Lafayette, California.

5765. *Soyfoods*. 1980. Soyfoods to the American taste: An interview with Drs. Clifford Hesseltine and Hwa L. Wang.

1(3):58-62. Summer. [1 ref]

• **Summary:** Dr. Hesseltine has just returned from a six-week trip to East Asia. In Taiwan he studied soy sauce fermentation and gave advice on setting up a national collection of microorganisms used in soybean fermentations. In Indonesia he attended an international symposium on various aspects of fermentation as a method a processing foods, with an emphasis on soybeans in Southeast Asia. "These people look to us in the West as far as science is concerned. Suddenly we see scientific institutions in the U.S. and now in Europe being interested in high protein foods made from soybeans. The East Asians follow and say, 'Well, if its very interesting for the West, then we should be interested in it.'" There is increasing interest in traditional, lightly-processed soyfoods.

Way back in 1963 the NRRL did research on making tempeh perforated plastic bags. Today, "on the island of Java, 90 percent of tempeh is now produced using plastic bags, including the tempeh I saw being sold on the street,..."

Dr. Wang, who was born and raised in China, recently returned there to visit family. She noted: "To me, it is a very sad story... Even tofu is rationed now. You can't buy tofu every day, probably once a week." "Soy sauce is not hard to get. Miso never had as much importance as in Japan... Tofu and soymilk are the two foods that were very common before. We stayed at a hotel and we only had soymilk once a week, in the morning for breakfast. And tofu, I don't even remember having eaten any."

"Dr. Hesseltine: Natto is one of the most rapidly growing fermented soyfoods in Japan, which surprised me, over something like miso. Natto has become more popular because it's supposed to be the great aid for digestion. In the new form, natto is much more acceptable as a food because the old, traditional type is sticky (it's a real mess) and this isn't. This is coated, so what you get is like small peanuts coated with powder; they don't stick to your hands."

Dr. Hesseltine: "What I saw in Taiwan really fascinated me—pressed tofu sheets [*pai-yeh*]. We would like to see the soycrafters making some recommendations [for us] as to practical areas of research for soybeans."

Portrait photos show (1) Dr. Clifford Hesseltine. (2) Dr. H.L. Wang. Two photos of each, seated. Address: NRRC, Peoria, Illinois.

5766. **Product Name:** Miso-Garlic Dressing.

Manufacturer's Name: Soyplant Co-op Inc. (The).

Manufacturer's Address: 711 Airport Blvd., Suite 1, Ann Arbor, MI 48104. Phone: 313-663-8638.

Date of Introduction: 1980. July.

Ingredients: A rich, smooth blend of miso (fermented soybeans and rice), safflower, shoyu sauce, garlic, onion, cider vinegar, water, lemon oil.

Wt/Vol., Packaging, Price: 16 oz.

How Stored: Refrigerated.

New Product—Documentation: Label in Soy Plant scrapbook from about 1980. 2½ by 2½ inches. Black on white. 16 oz. Sold in a plastic tub.

5767. Walker, Martin. 1980. Serendipity on £5 a day: Overland to Asia. *Guardian (England)*. Aug. 9. p. 11.

• **Summary:** In Bali, the writer and his wife rented the rajah's bedroom in the Tintagangga water palace. "Included in the price of the room was a meal of *nasi goreng*, a fried rice dish with peanuts and fish and vegetables, with an egg mixed into it and the whole flavoured with *kecap manis*, a sweet soy sauce."

5768. Fabricant, Florence. 1980. Dining out: Cantonese with surprises. *New York Times*. Aug. 24. p. L117.

• **Summary:** This is a review of the Cantonese Chinese restaurant Diamond's (40-20 Nesconset Highway {Route 347}, East Setauket—a census-designated place (CDP) in Suffolk County, New York on the North Shore of Long Island).

Recommended dishes include: "Clams with black bean sauce." "King crab dow see." "Black bean chicken." The menu includes a number of dim-sum style appetizers, chicken or seafood bathed in black beans and ginger or richly seasoned with dark hoisin sauce." A "hot and sour soup, thick with squares of bean curd [tofu],..." "Seamed littleneck clams in a dark sauce spiked with salty black beans [fermented black soybeans] made another rewarding appetizer..."

Note 1. This is the earliest document seen (Nov. 2011) in all major U.S. newspapers digitized by ProQuest that uses the term "salty black beans" to refer to fermented black soybeans. The new term appears in about 18 documents between 1980 and 2003.

Note 2. "Dow see" is the Cantonese term for fermented black soybeans.

5769. Chico-San, Inc. 1980. Good things come naturally from Chico-San (Ad). *Health Foods Retailing* 44(8):139. Aug.

• **Summary:** A photo shows Chico-San's products. Next to each is a brief description. New Rice Nuggets. New Carob Rice Cakes. Rice cakes. Yinnies taffy and caramel candies. Yinnies rice syrup. Lima soy sauce (A traditional, natural shoyu, made from whole soy beans and pure well water).

"Chico-San products are all natural. No preservatives. Nothing artificial." Chico-San's spiral logo appears on each product. Address: Chico, California 95927.

5770. Dinshah, Freya. 1980. More vegan recipes. Malaga, New Jersey: American Vegan Society. 27 p. Aug. No index. 22 cm. Spiral bound.

• **Summary:** Soy-related recipes include: Soy bean cheese spread (with cooked, ground soybeans, p. 5). Slicing soya

cheese (with vegetable margarine and soya powder/flour, p. 5). Simple soy cheese (with soya powder and nutritional yeast, p. 5). South Jersey soy patties (with soy granules, p. 7). Corn bread (with soya powder/flour, p. 9). Sesame soy milk (with soya powder/flour, p. 11). Sunflower soy milk (with soya powder/flour, p. 11). Scrambled tofu, Tofu salad dressing, Yeasted tofu, Tofu Cantonese, Tofu, mushrooms and greens, Tofu in savory crumbs, Tofu turino, Tasty tofu strips (baked with soy sauce) (all p. 15). A photo on the title page shows the author. Address: 501 Old Harding Highway, Malaga, New Jersey 08328.

5771. *Health Foods Retailing*, 1980. Part I. 44(8):1-98. Aug.
 • **Summary:** Selected full-page ads and articles: (1) Norganic–Wheat pilaf (Anaheim, CA, p. 7). (2) “Health Valley’s great pasta dinners,” from Health Valley Natural Foods. Whole wheat pasta, tomato sauce and raw milk (Montebello, CA 90640, p. 11). (3) “Richlife natural protein drink a meal.” Each can (11.5 oz) “contains a balanced formula of vitamins and minerals with over 20 grams of protein from nonfat dry milk, peanuts, soy and whole milk (Anaheim, CA, p. 15). (4) Hain specials for September include 15% off Natural Teriyaki Marinade and Tenderizer Mix (p. 17). (5) Solgar Co.–Lecithin granules, Formula VM-75 (Lynbrook, New York, p. 29, 33). (6) Tiger’s Milk Nutrition Boosters, come in colorful new packaging and four flavors: Unsweetened Plain, Carob, Vanilla, or Cocoa. In 12, 24, or 36 oz. cans. From Plus Products (Irvine, California 92714, p. 43).

(7) “Federal court issues injunction against FDA protein regulations.” “The regulations, which were to go into effect Aug. 4, would require that warning labels be put on certain food products deriving 50% or more of their caloric value from protein; the warning required varies according to the use for which the product in question is promoted, but in the case of protein products promoted for use in weight reduction, the warning includes the statement that “Very low calorie protein diets... may cause serious illness or death” (p. 50).

(8) “Lectures boost business,” by Mary Conte. Photos show: (a) A hugely muscled man in a tiny swim suit, with the caption: “Dr. Franco Columbu, a former Mr. Universe, lectures on body building.” (b) Jack LaLanne, “a famous TV personality,” dressed in a striped suit and lecturing. (c) Dr. Robert C. Atkins on the cover of his book “Dr. Atkins Diet Revolution.” (d) Dr. Allan D. Cott (p. 51).

(9) “Europe’s Helfex attracts U.S. trade.” Helfex is “Europe’s International Health Food Exhibition, held from May 18 to 21 in Brighton, England,” the historic seaside town (p. 67, 228). (10) Naturade–Elastin (p. 82). (11) Alta-Dena Dairy, which was established in 1945, sells kefir, yoghurts, frozen yoghurts, and Golden Honey ice creams, ice milks, and cheeses (City of Industry, CA, p. 83). (12) The Pavo Co., Inc.–Distributor since 1931 (Minneapolis,

Minnesota, p. 96). (13) American Diet aids–Papaya enzyme with chlorophyll (p. 97).

5772. Ochi, Hirotomo; Blenford, D.E. 1980. The soy sauce explosion: Worldwide demand for this centuries-old Japanese food ingredient has been stimulated by the development of new drying techniques to produce it in powder form. *Food Processing Industry (UK)* 49(585):25, 27, 29. Aug.

• **Summary:** Natural flavors are increasingly in demand worldwide. The many different kinds may be divided into three main types: (1) Extracts, as from beef, chicken, bonito, mushroom, or onion. (2) Fermented products, e.g. soy sauce or wine. (3) Hydrolyzed products, such as HVP or yeast.

“Soy sauce (or Shoyo sauce [sic, shoyu]) is a liquid seasoning which was originally developed in Japan [sic] via the fermentation process. There are two main types of soy sauce in Japan, strong and weak [sic] (koigushi [sic, koikuchi] and usugushi [sic, usukuchi]). In 1977 an estimated 1,200 million liters of soy sauce was made in Japan, equivalent to about 10 liters per person per year.

During the 1960s, with the development of new drying techniques, soy sauce and various extracts were introduced in powdered form. The most popular method of drying was spray drying. Using dextrin, gelatin, or gum as carriers, the powders were made using 70-90% soy sauce solids together with 10-30% of the carrier. Table 1 gives the chemical composition of two typical soy sauce powders. HVP powders are inferior to soy sauce powders.

In Japan one of the major applications for soy sauce powder is for instant and cup noodle soups. In 1977 the production of these two products was 2.6 billion meals, requiring the use of 3,000 tons of soy sauce powder. The total amount of soy sauce powder made in Japan in 1977 was 4,000 to 4,500 tons.

Soy sauce powder, which was first produced in the 1960s, can be made using either of 3 processes, each of which has advantages and disadvantages: (1) Spray drying was the most popular drying method. Using dextrin, gelatin, or gum as carriers, the powders contained 70-90% soy sauce solids and 10-30% of carrier. (2) Freeze drying, gives the product with the best flavor but the processing costs are very high and four times as much energy is used as in spray drying. (3) Continuous vacuum drying takes place in a vacuum chamber under conditions of low temperature and short residence time. It was developed by Nikken Food Co. in Japan. Energy consumption is much less than with spray drying and the soy sauce flavor is unchanged. The resulting products, in the form of granules or porous powders, have excellent solubility. Address: 1. President, Nikken Food Co., Komaba 1-37-7, Meguro-ku, Tokyo, Japan.

5773. Westbrae Natural Foods. 1980. Distributor food catalog: Summer 1980. Emeryville, California: Westbrae. 12 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue and dark red on a tan background. Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

5774. *SoyaScan Notes*. 1980. Is naturally occurring MSG found or formed in tofu or shoyu? (Overview). Sept. 11. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** There are no sodium glutamates in tofu or shoyu. They exist in tofu as glutamic acid residues incorporated into the protein molecules, and in shoyu as ammonium glutamates. Both of these are different from commercial MSG (monosodium glutamate) as sold by Ajinomoto, both in their chemical composition and in their physiological effects.

5775. Kushi, Michio. 1980. Re: Thoughts on phasing out use of the word "tamari" to refer to naturally fermented shoyu. Letter to William Shurtleff at Soyfoods Center, Sept. 13. 1 p. Typed, with signature.
Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

5776. Arum, Nancy. 1980. A market for gourmet tastes. *New York Times*. Sept. 21. p. WC15.

• **Summary:** Twelve years ago, John and Anita Borghese fled their apartment in Manhattan and moved to Westchester [a county in New York state, just north of Long Island]. Together they started a specialty food store named Gourmet Bazaar (3 Purdy Ave., Rye, New York). Since many of the local residents have Dutch ancestry, they carry a good selection of Indonesian ingredients, such as "ketjap manis,... a sweet soy sauce [which] is one of the basic ingredients in Indonesian cooking."

A recipe for Rempah babi (Sumatra pork balls) calls for 1 teaspoon "ketjap manis."

A photo shows John and Anita Borghese in their Gourmet Bazaar.

• **Summary:** Includes a review of the Japanese restaurant Kyori, 316 N. Michigan Ave. "You can make a meal on the appetizers alone, which include such tasty little side dishes as *agedofu*, (\$2.25), three cubes of deep-fried *tofu* in a ginger sauce;..." Chicken teriyaki is also served. Address: Restaurant critic.

5778. Aihara, Cornelia. 1980. Cornelian's corner: Tamari. *GOMF News (Oroville, California)*. Sept. p. 3-4.

• **Summary:** George Ohsawa called his soy sauce 'Ohsawa Soy Sauce,' when he started teaching macrobiotics in Europe

around 1957. He made a Frenchman the sole distributing agent for macrobiotic foods imported from Japan. This agent later began to import cheap, poor quality soy sauce from Japan under the name 'Ohsawa Soy Sauce.' As a result, Ohsawa had to import traditional natural soy sauce from Japan once again. He could no longer use the name 'Ohsawa Soy Sauce' because the other importer had copyrighted the name. Ohsawa therefore called the traditional natural soy sauce imported from Japan 'tamari'—even though, in the strict sense of the word, it was not tamari.

"Tamari sauce was a historical precursor to soy sauce and is available today in very limited quantities. It is a by-product of a particular type of miso that is made with only salt and soybeans (with a bit of koji enzyme). Its flavor and taste-enhancing qualities are not as distinctive as natural traditional soy sauce.

"*The Calendar Cookbook* was published last year but was written in 1972 when I was using natural soy sauce; in this as well as in *Macrobiotic Child Care* (1979) I called it 'tamari.' This was a mistake. I meant natural soy sauce, not tamari. Really, tamari means the liquid that comes to the bottom of the barrel under stone pressure when making miso... Making 100 pounds of miso, only one or two cups of tamari come. But I don't like to take this tamari off—I mix it up with the miso. If you remove it, the miso is less sweet... I never used tamari in my cooking.

"Last summer in Japan, Mr. Murata of Ohsawa Japan introduced us to the Yamaki factory. They are using good quality salt, not commercial government salt." Address: GOMF, 1544 Oak St., Oroville, California 95965.

5779. Hesseltine, C.W.; Wang, Hwa L. 1980. Fermented foods. *Food Trade Review* 50(9):473-79. Sept.; 50(10):543-45. Oct. [4 ref]

• **Summary:** Discusses shoyu, tempeh, wheat soya tempeh, sufu, natto, koji, miso, ragi, and soy yogurt. Address: USDA NRRC, Peoria, Illinois.

5780. Nihon Keizai Shinbun. 1980. San-Jirushi Jozo K.K. "Honmono no tamari-shōyu" o shuryoku ni [San-Jirushi Jozo K.K. Focusing on making real tamari-shoyu]. In: 1980. Chubu [Chihō] no Chuken 170-sha [Directory of 170 Medium-sized Corporations in Central Japan]. Nagoya: Nihon Keizai. See p. 326-227. [Jap]

• **Summary:** A brief history of and introduction to San Jirushi. Address: Japan.

5781. Johnstone, Bill. 1980. Scots find source for soy dressing: Microbiology cuts two years' work to four weeks. *Times (London)*. Oct. 7. p. 15, cols. 3-4.

5782. Hodgson, Moira. 1980. Restaurants: Sushi and more and new Italian. *New York Times*. Oct. 10. p. C22.

• **Summary:** A review of Sushiko, a small Japanese

restaurant in New York City between Broadway and Eighth Avenue, which has a “sushi bar.” Inexpensive side orders include: “Natto, mustard-colored fermented soybeans, gooey and unusual, were seasoned with mustard, chopped scallions and soy sauce, and had an extraordinary and subtle flavor, tasting slightly smoky, resembling food that has been cooked over charcoal. Bean curd came in large moist squares in a bowl of water, accompanied by a sauce of dried tuna [sic, bonito] flakes and scallions mixed with soy.”

Paper-thin yakitori (toasted nori) could be used as a wrap for natto. Spectacular *nasu shiroyaki* was an eggplant sliced in half, covered with miso sauce, and grilled. *Misoshiru* [miso soup] is a rich brown soybean soup. Tofu is added to a tossed American-style salad.

5783. Ellis, Merle. 1980. A reunion with Japanese food: The butcher. *Los Angeles Times*. Oct. 16. p. K10.

• **Summary:** “If good food, simple preparation, beautiful presentation and economy are some of the things you look for in a meal, look to the Japanese.”

Three recipes are given. *Mizutaki* means (literally) “water + boiling.” “Legend has it that Samurai warriors (and ancient Mongolian warriors in China before them) used their helmets to cook a meal of whatever was at hand in a helmet full of boiling water.” That is *mizutaki*. A “Mongolian hot pot” is a special utensil used for this dish, when available. The *mizutaki* recipe calls for “1 block tofu (soy bean cake) cut in 1-inch cubes.” The *Mizutaki* sauce recipe calls for ¼ cup soy sauce.

Note: This article, titled “Japanese cuisine: Simple, beautiful and economical” also appeared in the *Hartford Courant* (Connecticut) (Oct. 16, p. E12). Address: Staff writer.

5784. Hauser, Nao. 1980. The joy of eating this Thai’s food. *Chicago Tribune*. Oct. 20. p. E1.

• **Summary:** Chanpen Ratanadilokchai is the cook at Thai Room Restaurant in Chicago. A recipe for Fried whole red snapper calls for “1 tablespoon each: soy sauce, brown bean sauce.”

At the end of the recipe we read: “Note: Chanpen prefers Kikko-man soy sauce because it is the right weight.”

When shopping, she buys “thick bean sauce” and “bean cake [probably tofu] to use in fresh egg rolls.”

A photo shows Chanpen happily at work in the restaurant kitchen.

• **Summary:** Black on white (photocopied). Address: 4240 Hollis St., Emeryville, California 94608; 4841 Eastern Ave., City of Bell, CA 90201 (10 miles southeast of Los Angeles). Phone: (415) 658-7518 (orders).

5788. Institute of Food Technologists’ Expert Panel on Food Safety and Nutrition. 1980. Monosodium glutamate (MSG). A scientific status summary. *Food Technology* 34(10):49-53. Oct. Also published in *Sourcebook on Food and Nutrition*, 3rd ed. 1982. p. 135-39. [38 ref]

• **Summary:** Glutamic acid is one of the most common natural amino acids. The various salts of glutamic acid are used to enhance flavor. The sodium salt of glutamic acid, usually called MSG (for monosodium glutamate), is by far the most widely used glutamate, although potassium, ammonium, and calcium glutamates have been used in low-salt formulations as salt substitutes.

In East Asia, cooks have long used the sea vegetable *Laminaria japonica* (called “kombu” in Japanese) to make a tasty soup stock. The link between the seaweed flavor and glutamate (first isolated in 1866) was discovered by Professor Kikunae Ikeda of the University of Tokyo in 1908. He demonstrated that kombu contained generous amounts of glutamate and that it was the seaweed component responsible for food flavor enhancement. The Japanese began production of glutamate almost immediately. Thirty years passed before it was produced in North America from corn and wheat gluten. Today, MSG is produced in the USA from sugar beet molasses in a fermentation process. Or it may be extracted directly from sugar beets.

“Glutamate is ubiquitous in nature and is present in both food and the human body, either as one of the amino acid building blocks of protein and peptides, or in its free form. The glutamate bound into a protein structure has no flavor enhancing properties—only the free form has that, and then only the ‘L isomer.’ Protein-rich foods such as human milk, cow’s milk, cheese, and meat have a high content of bound glutamate, while most vegetables contain little, because of their low protein content. However many of these

vegetables—such as mushrooms, tomatoes, and peas—do have high levels of *free* glutamate. In fact, some investigators have suggested that this explains the effectiveness of mushrooms and tomatoes in enhancing the flavor of other foods, in much the same way as seaweed.”

“Glutamate exists as part of the human body in both free and bound form. The human body contains 14 to 17% protein, of which about one-fifth is glutamate. An adult weighing 70 kilograms (156 pounds) contains, on the average, 2 kilograms (4.4 pounds) of glutamate in his protein... The free glutamate concentration of the brain is about 100 times as in the blood.” Address: Chicago, Illinois.

5789. *Nutrition News* (Pomona, California). 1980. Soyfoods from the magic bean. 3(10):1-4.

• **Summary:** Discusses the nutritional value of soybeans, meat analogs, tofu, tempeh, miso, soy sauce, and TVP.

• **Summary:** “Except for *Mucor dispersus* NRRL 3103 and *Actinomucor elegans* NRRL 3104, all the other molds tested produced both extra- and intracellular phytase.” Molds were tested that make the following fermented foods: Sufu, tempeh, Lao-chao, soy sauce, and miso. Address: NRRC, Peoria, Illinois.

5791. Goodbrad, John. 1980. History of Sovex Natural Foods, Inc. and other small Adventist food companies (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 26. 1 p. transcript.

• **Summary:** Sovex is a private company. John and his wife are Seventh-day Adventists, as are many of the company’s employees. John worked at the Boulder Sanitarium (also called the “San,” in Boulder, Colorado) from 1947 to 1953; the Sanitarium owned 8 health food stores and he was in charge of them. During the time he was in Boulder, the Sanitarium did not manufacture any foods; they had already gotten out of that business.

Then he went to work for Collegedale Distributors (in Collegedale, Tennessee), which was owned by Southern Missionary College. They made, and still make, granola.

Sovex was founded in 1953 by the Hurlingers in Holly, Michigan. The company’s original product was Sovex, a flavor concentrate paste, made from a mixture of brewer’s yeast and soy sauce. In 1964 John bought the business and moved it to Collegedale, Tennessee, where he worked.

In 1981 Sovex products containing soy include Prothin Snack Chips, Vege-Pat (textured soy flour, in sausage, burger, and chili flavors), and Granola (their main product line, in nine flavors, many of which contain soy grits).

Sovex had no relationship with Madison Foods (of Madison, Tennessee). Madison was one of the pioneers in the

meat substitute field. They were purchased by Worthington Foods, which phased out the Madison products. John has eaten Madison products on and off for over 50 years, but has had no direct contact with them for a number of years. John has a copy of *Back to Eden*, autographed by Jethro Kloss.

A Mr. White, who was a grandson of Ellen G. White, had a super soymilk recipe about 20 years ago. He started with soy flour, ran it through an homogenizer, then sweetened it with honey. People loved the flavor; it was fresh, not canned. He called it Nu-Milk and made it on the sly at the Southern Missionary College dairy in Collegedale, Tennessee. It was illegal because there are laws against putting anything but milk in a milk processing plant.

John just talked with Frank Miller (phone: 817-641-8343), who used to work for Madison Foods and who now owns Texas Protein Products, a company that sells TVP in Texas. Another key man was Bruce Stepanske, who made soymilk at Madison until it was discontinued. Address: President, Sovex Natural Foods, Inc., Box 310, Collegedale, Tennessee 37315. Phone: 615-396-3145 (or 2111).

5792. Andoh, Elizabeth. 1980. At home with Japanese cooking. New York, NY: Alfred A. Knopf. 254 p. Illust. by Michiko Fujiwara. Index. 25 x 22 cm.

• **Summary:** A beautiful, intimate and very useful book, approachable and suffused with a unique tranquility and charm. The illustrations (line drawings) are exquisite.

Contents: Acknowledgments. Introduction. A note about the romanization of the Japanese language (Hepburn system). In the Japanese kitchen: Techniques and equipment—Grilling, broiling, steaming, braising and simmering, frying, dry roasting, grinding, crushing and mixing, using knives (four types, and how to hold and use them), skewering, straining and mashing, grating, pots and pans, miscellaneous equipment (chopsticks, rice paddle, rice tub, flat fan, bamboo mats, bamboo trays, metal mold, etc.). Meals and menu planning. The recipes: Soups, rice, noodles, braised and simmered foods, grilled and skillet-grilled foods, deep-fried foods, steamed foods, mixed, sauced and tossed foods, pickles, sweet things and beverages. In the Japanese kitchen: Foodstuffs. Suggestions for ordering Japanese foodstuffs, A glossary of Japanese terms.

The very helpful glossary includes (soy related): Abura agé: fried bean curd [tofu]. Aka miso: dark bean paste [miso]. Daizu: dried soybeans. Eda mamé: fresh soybeans. Kikkoman: brand name of soy sauce. Kinako: soy flour [roasted]. Marukomé miso: brand name of medium fermented bean paste. Miso: fermented bean paste. Miso shiru: soup thickened with fermented bean paste. Natto: fermented sticky soy beans. Okara: by-product of fresh tofu-making. Saikyô miso: light bean paste, a brand and regional name. Sendai miso: dark bean paste, a brand and a regional name. Shinshû Ichi miso: medium bean paste, a brand and regional name. Shiro miso: white (or light) bean paste.

Shōyu: soy sauce. Teri yaki: glaze grilling. Tōfu: bean curd. Usu kuchi shōyu: thin or light soy sauce. Yuba: thin brittle sheets of soy milk (by-product of tōfu-making).

Note: This is the earliest English-language document seen (May 2012) that contains the word *Abura-agé* (hyphenated with diacritics). It refers to deep-fried tofu pouches.

Also includes: Each of the basic sea vegetables / sea greens used for food in Japan (ao nori, hijiki, konbu, nori, wakamé, etc.). Umé-boshi: pickled plums.

The book contains excellent recipes and descriptions (see the index) using bean curd [tofu] (7 recipes), eda mamé (1), fried bean curd (*abura agé*) (5), grilled bean curd (*yaki-dōfu*) (3), miso (17), and soybeans, dried (1); natto is not mentioned.

Elizabeth concludes the Introduction by explaining: “What I’ve tried to write here is the very book I wish I’d had with me when I started out fourteen years ago.”

About the author (last page and with portrait photo on inside rear dust jacket): Elizabeth, who was raised in New York and graduated from the University of Michigan, traveled to Japan in 1966 to study Japanese, lived with the Andoh family on the island of Shikoku, and married into that family two years later. Shortly after her marriage, she enrolled in a class at the Yanagihara School of Classical Japanese Cooking, where she studied for six years. She has a daughter, Rena, to whom this book is dedicated.

The copyright page states: “Many of the recipes which appear here were originally printed in slightly different form in *Gourmet* magazine, 1975, as part of a 6-part series entitled ‘The Seasonal Japanese Kitchen,’ by Elizabeth Andoh.” Address: Tokyo, Japan.

5793. ASEAN Sub-Committee on Protein. ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. Kuala Lumpur, Malaysia. 415 p. Held 27-29 Nov. 1980 at Kuala Lumpur, Malaysia. 29 cm. [100+ ref]

• **Summary:** This the 10th workshop organized by the ASEAN Sub-Committee on Protein and the second workshop in the series on solid substrate fermentation. The first was held in May 1978 at Bandung, Indonesia. The protein project, which has a newsletter and is directed toward the development of small industries, has been active since 1974. Members of the Main Organising Committee include Prof. Ho Coy Choke (Chairman), Dr. Ahmad Zaharudin Idrus, and Ms. Yeoh Quee Lan. At the back is a directory of participants (p. 411-15). Address: Malaysia.

5794. Esko, Edward; Esko, Wendy. 1980. Macrobiotic cooking for everyone. Tokyo: Japan Publications, Inc. 272 p. Nov. Foreword by William Tara, Director, Community Health Foundation, London, England. 26 cm. [50 ref]

• **Summary:** The authors studied in Japan (mostly Kyoto), from Sept. 1978 to May 1979, at which time they returned

to Boston. In the summer of 1979 “more than 100 delegates from various regional centers throughout the United States and Canada met in Boston for the first North American Congress of Macrobiotics.” Part I of this book discusses the theory of macrobiotics and Part II gives recipes.

Unfortunately, the book has no index, and the bibliography gives no years of publication. There are chapters on: Seitan, fu, and noodles (incl. soba), and Sea vegetables.

Soy-related recipes include: Brown rice and soybeans (p. 90). Miso soft rice (p. 96). Somen with deep-fried tofu (p. 118). Kenchin soup (with deep-fried tofu cubes and tamari, p. 130). Okara soup (p. 132). Miso soups (p. 137-143; 12 recipes are given plus a long letter from Jan Belleme, about how she and her husband, John, who arrived in Japan in late October 1979, are now living with the Onozaki family and studying miso-making there—p. 138-39). Sauteed cucumbers and miso (p. 154). Boiled cabbage, sweet corn, and tofu (p. 155). Udon-vegetable bane (with deep-fried tofu, p. 159). Steamed kale and tofu (p. 161). How to make sprouts (incl. soybean sprouts, p. 177).

Chapter 5 is titled “Bean dishes, including tofu and natto.” It states (p. 178-79, without citing the source) that “In China and Japan there is a proverb, ‘A man who eats too many beans becomes a fool.’... Lima beans and soybeans are both very yin, and require thorough chewing. They should be eaten only on occasion and in small quantities... Kombu can be placed on the bottom of the pot when cooking chickpeas, soybeans, lima beans or kidney, pinto and navy beans. I have found that kombu definitely improves their flavor, and because of its high mineral content, creates a very balanced dish.” To pressure cook soybeans so that they do not clog the steam escape valve, first boil them for 30 minutes. Skim the foam off the top as it rises, and when no more foam rises to the surface you may place them in a pressure cooker and continue cooking until done. Recipes include: Japanese black beans (black soybeans). Soybeans with kombu and burdock. Soybeans with lotus root and salmon. Following a long discussion of tofu, Homemade tofu. Tofu with scallions. Tofu with bonito flake broth. Baked tofu with miso/lemon sauce. Broiled tofu. Tofu loaf. Steamed tofu rolls. Deep-fried tofu cakes. Aburage (Age or deep-fried tofu). Stuffed age pouches. Okara. Okara croquettes. Sautéed natto. Natto rice or noodles. Natto tempura. Dried natto.

Note 1 This is the earliest English-language document seen (May 2012) that uses the term “broiled tofu” to refer to grilled tofu.

Hijiki with soybeans (p. 193). Hijiki and deep-fried tofu (p. 194). Tempuraed tofu-nori rolls (p. 198). Koi-koku (Carp miso soup, p. 220). Daikon and tamari. Scallion miso. Green peppers and miso (p. 224). Miso condiments (p. 226). Tamari. Moromi (p. 227). Rutabaga-tamari pickles (p. 233). Quick miso pickles (p. 234). Tofu tamari dressing (p. 236). Tofu-sesame dressing. Shiro-miso-tofu dressing. Miso dressing (p. 237). Tamari-lemon dressing. Tamari-rice

vinegar dressing. Miso-tahini dressing (p. 238). Miso-rice vinegar dressing. Miso walnut dressing. Miso-tahini spread. Sesame miso spread. Miso-nut spread (p. 239). Lentil-miso spread. Lima bean miso spread (p. 240). Tofu dip (p. 243). Amazake (p. 247-48). Clear broth soup with tofu & scallions (p. 253). The glossary lists many soy products plus azuki beans, sea vegetables (many types), gluten, koji, kuzu, mochi, natto, nigari, okara, seitan, tekka, tempeh, umeboshi, unohana (okara), and yuba.

Macrobiotic periodicals include: *East West Journal* (Brookline, Massachusetts). *Kushi Institute Study Guide and Kushi Inst. Newsletter* (Brookline, MA). *The Order of the Universe* (East West Foundation, Brookline, MA). *The Macrobiotic Review* (East West Foundation, Baltimore, Maryland). *Spiral* (Community Health Foundation, London). *Le Compas* (Paris). Note: The date each periodical began publication is not given.

The lengthy section on seitan (p. 110-13) gives a detailed recipe for making seitan at home using the short method and 3½ lb hard spring wheat flour or hard red winter wheat flour. The broth is made with kombu and tamari. Seitan recipes include: Seitan stew. Seitan fried rice. Stuffed mushrooms (with sauce). Stuffed squash or Hokkaido pumpkin. Address: Boston, Massachusetts.

5795. Flegel, T.W.; Bhumiratana, A. 1980. Studies on *Aspergillus flavus* var. *columnaris* in soy sauce koji. In: ASEAN Sub-Committee on Protein, ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. Kuala Lumpur, Malaysia. 415 p. See p. 106-20. [6 ref]

• **Summary:** Reviews attempts to improve the quality of soy sauce and tao chieo [miso] in Thailand by the introduction of *Aspergillus flavus* var. *columnaris* inoculum (found to produce the most protease) for the koji stage of production. Two major proteases were isolated and characterized. A low-cost, easy, and reliable method is described for the production of koji inoculum by factory personnel using plastic bag incubators.

Good quality soy sauce should have a high soluble nitrogen and a high reducing sugar content in the final product. To obtain this, one must optimize production of protease and amylase during the koji stage. Factory owners all prefer green koji (made in cool weather, dominated by *Aspergillus* species) to black koji (resulting from hot weather and dominated by Zygomycetous molds such as *Rhizopus*, *Syncephal*, *Mucor*, *Absidia*, etc.). In the moromi stage, factory owners say that the total salt content of the moromi and final soy sauce should not fall below 18% (w/v = weight to volume) lest the soy sauce spoil, nor exceed 22% (w/v) lest it be too salty. Koji usually takes 5-7 days to make. The optimum growth temperature for the koji mold, determined by radial growth on agar, was found to be 30°C. When tao chieo was made by the new method, white crystals of pure tyrosine appeared since they were not harmful, they were

accepted by factory owners. An increase in soluble nitrogen leads to a darkening of color caused by the complexing of glucose with amino acids such as lysine. Address: Microbiology Dep., Faculty of Science, Mahidol Univ., Rama VI Road, Bangkok, Thailand.

5796. Hartadi, Sri. 1980. Inoculum preparation for tempe and soysauce fermentation. In: ASEAN Sub-Committee on Protein, ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. 415 p. See p. 256-62. Held 27-29 Nov. 1980 at Kuala Lumpur, Malaysia. [9 ref]

• **Summary:** Usar is the Indonesian name of the inoculum used to make tempeh. It consists of strains of *Rhizopus* molds, plus yeast and bacteria. It is prepared by placing inoculated soybeans on leaves of *Hibiscus* species, *Tectona grandis*, *Musa paradisiaca*, or *Bambusa* species. There are two ways of making tempeh inoculum: The traditional usar method in which the mold is grown on soybeans on leaves, and the powdered form inoculum, in which it is grown on rice.

Most of the soysauce made in Indonesia does not use special inoculum. However two new methods have been developed; growing a powdered inoculum on rice and rice bran, or a fresh inoculum on soybeans. Address: Dep. of Microbiology, Faculty of Agriculture, Gadjah Mada Univ., Yogyakarta, Indonesia.

5797. Impoolsup, Attawut; Flegel, T.W.; Bhumiratana, A. 1980. Isolation and characterization of proteases from *Aspergillus flavus* var. *columnaris*. In: ASEAN Sub-Committee on Protein, ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. Kuala Lumpur, Malaysia. 415 p. See p. 369-400. [21 ref]

• **Summary:** *Aspergillus flavus* var. *columnaris* is a mold that was isolated from a soy sauce factory near Bangkok, Thailand. It is recommended for use in preparing soy sauce koji because it does not produce aflatoxins and because it is an exceptionally high producer of protease. This study examines the various types of protease produced by the mold. Address: Dep. of Microbiology, Faculty of Science, Mahidol Univ., Rama VI Road, Bangkok 4, Thailand.

5798. Karim, Mohamad Ismail Adbul. 1980. The role of microorganisms in food fermentation with special reference to Malaysian fermented foods. In: ASEAN Sub-Committee on Protein, ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. Kuala Lumpur, Malaysia. 415 p. See p. 31-64. [27 ref. Eng]

• **Summary:** Traditional Malaysian fermented soyfoods include kicap (soy sauce), tempeh, and tauco (Malaysian miso). Fermentation is considered by most small-scale processors to be more of an art than a science. The secrets of the processes have been passed down in the family from one generation to another. Much of the flavor of fermented soy

products comes from fatty acids (glutamic acid, propionic acid, butyric acid, etc.), ammonia, and amines.

In Malaysia, the manufacture of soy sauce is normally done by small establishments using traditional methods. Boiled soybeans are cooled then mixed with 40-50% by weight of wheat flour. The mixture is spread onto large shallow bamboo trays (90 cm diameter and 5 cm deep) to a depth of 5 cm. The trays, which are used repeatedly, harbor many useful microorganisms. The trays are then stacked in tiers 15-30 cm apart on wooden racks for 7-10 days. The mixture is broken up and turned every 2 days to allow aeration. At the end of the fermentation, the white mycelium-impregnated mass, with its spores turning yellow and greenish yellow, is filled into earthenware jars (190 liters capacity) and covered with brine solution of 15-20% concentration. The jars are exposed to the sun and covered with lids at night or whenever it rains. The brine mixture is allowed to ferment for 2 to 24 months depending on the quality of the sauce needed. At the end of the fermentation period, the resulting dark liquid (soy sauce) is removed by siphoning or straining through a cheese cloth or suitable strainer. The sauce is then bottled. Sometimes sugar or benzoic acid (a preservative) is added to the sauce before bottling. A sauce could also be cooked and thickened with caramel (up to 80%) and bottled as thick sauce for sale. The production of thin sauce requires a short fermentation (1½-6 months) whereas thick sauce requires a longer fermentation (6-24 months). The extraction process could be repeated 4 to 6 times by topping the remaining mash with brine solution (10-14%) after each extraction.

Soybean paste or tauco is made in essentially the same way as soy sauce except that broken soybeans are used and the liquid is not removed. The final product is reddish brown. Most Malaysian tauco is not sun-dried, but is packed into wide-mouth jars in its moist paste form. Address: Jakatan Sains dan Teknologi Makanan, Universiti Pertanian Malaysia, Serdang, Selangor, Malaysia.

5799. Somporn, Wannee. 1980. Review of solid substrate fermented products in Thailand. In: ASEAN Sub-Committee on Protein, ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. Kuala Lumpur, Malaysia. 415 p. See p. 235-49. [3 ref]

• **Summary:** Table 3 shows fermented foods prepared in Thailand from legumes and cereals. Fermented foods having soybeans are the main substrate are: See iew (a condiment, made in central and south Thailand using bacteria, molds, and yeasts). Thua nao (main dish, made in north Thailand using bacteria). Tao hoo (tofu, main dish, made in central and south Thailand using bacteria, molds, and yeasts). Tao jiao (flavoring, made in central and south Thailand using bacteria, molds, and yeasts). Tao si ([fermented black soybeans], flavoring agent, made in south Thailand, using molds).

A survey of all soy sauce factories in Thailand was

conducted in 1975. Representative samples were analyzed for both pathogenic organisms and aflatoxin, but neither was found (Biological Science Division, 1975-1976).

Note 1. This is the earliest English-language document seen (Feb. 2004) that uses the word "Tao hoo" (or "Tao-hoo") to refer to tofu.

Note 2. This is the earliest English-language document seen (Jan. 2012) that uses the term "Thua nao" (with no hyphen) to refer to Thua-nao. Address: Biological Science Div., Dep. of Science Service, Ministry of Science, Technology and Energy, Thailand.

5800. Soriano, M.R.; Navarro, N.S.; Parel, S.O. 1980. Solid substrate food fermentation technology in the Philippines. In: ASEAN Sub-Committee on Protein, ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. Kuala Lumpur, Malaysia. 415 p. See p. 198-223. 29 cm. [45 ref]

• **Summary:** This paper gives a brief history of the development of food fermentation technology in the Philippines, including fermented soy products such as toyo (soy sauce), tausi (or tao-si [fermented black soybeans], called "taoushih" by the Chinese and "tao tjo" [sic] by the East Indians), tahuri (fermented tofu, sufu, or Chinese cheese. Cubes of tofu are inoculated with an *Actinomucor* mold; angkak is often used to impart a red color), and miso (called chiang in China). A related product is angkak, or "red rice," made by fermenting rice with the red mold *Monascus purpureus* Went for coloring and flavoring. The science of fermentation can be said to have dawned in the mid-1800s when Louis Pasteur discovered that every fermentation process was associated with a corresponding organism. Before World War II the use of microorganisms for the processing of foods was an unexplained field of study in the Philippines. The four pioneering studies from 1934 to 1937 included one by Yenke and Baens in 1940 the use of rice as a source of carbohydrate in the production of soy sauce. The first scientific investigation (1934, with nata) was done in the University of the Philippines, College of Agriculture in Los Baños, Laguna, and the last three studies were pursued in the former Bureau of Science, now the National Institute of Science & Technology (NIST).

There are no local written reports or scientific investigations of tausi, tahuri, or miso. Their manufacture is dominated by Chinese in the Philippines. Much attention, however, has been given to the production of soy sauce (toyo). Reviews of studies conducted in the Philippines have been given by Soriano (1975) and Soriano and Pardo (1977). Work is presently being done at NIST on the replacement of soy beans with local beans, and wheat with rice, cassava or banana flour in the production of soy sauce. Address: National Inst. of Science and Nutrition, Manila.

5801. Tang, Charles Chang Chiu. 1980. Studies of solid

substrate fermentation in Singapore. In: ASEAN Sub-Committee on Protein, ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. Kuala Lumpur, Malaysia. 415 p. See p. 225-233. [5 ref]

• **Summary:** Many of Singapore's fermented foods are traditional indigenous foods. These include: (1) Fermented soya beans used in the koji to make soya sauce. (2) Fermented whole soya beans, which are preserved in brine (fermented black soybeans) or made into a paste (like Chinese soybean jiang). (3) Fermented cubes of tofu.

Of these fermented food products, only the fermentation process for making soya sauce has been studied at length by the National University of Singapore and the Singapore Institute of Standards and Industrial Research. Their findings of improved *Aspergillus* mutants for the production of better quality soya sauce have been reported at a previous ASEAN Workshop on Soya Sauce Manufacturing technique (1978 Singapore). "The Department of Scientific Services has analysed samples of fermented 'Tofu,' soya beans, soya sauce and shrimp paste and found that aflatoxins were absent in these fermented products." Address: PhD, Dep. of Scientific, Outram Road, Singapore 0316.

5802. Ten, Sew Keoh; Ho, Coy Choke. 1980. Characterization of *Aspergillus* from the koji phase of soy sauce fermentation in the ASEAN region. In: ASEAN Sub-Committee on Protein, ed. 1980. Report on the Second ASEAN Workshop on Solid Substrate Fermentation. Kuala Lumpur, Malaysia. 415 p. See p. 326-39. [11 ref]

• **Summary:** Some 178 strains of *Aspergillus* were isolated from the koji (solid substrate) phase of soy sauce fermentation from factories in West Malaysia. The authors separated these strains into two distinct morphological groups based on the color and ornamentation of the conidial heads. 90.5% of the isolates were identified as belonging to the *Aspergillus flavus oryzae* group and 9.5% as members of the *Aspergillus wentii* group. This grouping is based on the taxonomic key of Raper and Fennell (1965) and the mycological color chart of Raynor (1970). The characteristics of the two groups are shown in Table 1. Address: Dep. of Genetics and Cellular Biology, Univ. of Malaya, Kuala Lumpur, Malaysia.

5803. Anderson, Eugene N. 1980. Re: Soybeans, tofu, and tempeh. Letter to William Shurtleff at Soyfoods Center, Dec. 12—in reply to inquiry. 2 p. Typed, with signature on letterhead. [4 ref]

• **Summary:** A sinophile, he is collaborating with Dr. Paul Buell (an historian at Western Washington University, Bellingham, WA) on various books on Chinese agriculture, including an economic botany. "We are currently working on the soybean article for this and drawing heavily on your books. He is an inveterate tofu maker who lives by your books."

The spices in real curry are fascinating and much different from those in the "nauseating and disgusting 'curry powder' of commerce."

He is aware of some spectacularly fine Chinese books on vegetarian soyfoods cookery, written by Buddhist religious groups. "Most of the Chinese cookbooks in English are obscene and should be banned as pornography."

It is now known that the old Shen Nung Herbal is from ca. 100 A.D.

"Tempe I assume to be an application to soybeans of earlier technology used on coconut. Incidentally the soybean was introduced to the Malay world by people from the Fujian-Guangdong border between Xinmen (Amoy) and Swatow (Shandou), as shown by the distinctive dialect words borrowed into Malay (*bahasa Indonesia, bahasa Malaysia*)—*taohu, taugé, tauchu, tausi*, etc. These are also in Indonesian and Filipino—though *tausi* could be from Cantonese. These are direct borrowings of precisely the dialect forms of the border area, the southern dialects of the Southern Min or Hokkien language. *Tauhu*, for instance, is their pronunciation of tofu (dofu in standard Chinese). One word I can't explain is *kecap* (formerly spelled *ketjap* and so pronounced), the Malay word for soy sauce. It seems to have referred earlier to quite a different, local brew. It has nothing whatever to do with ketchup.

"The latest soy news is yet another proof that peasant techniques have their reasons. It now appears that soybeans have a huge amount of phytate, amounting to up to several percent of the bean. Phytate (the distinctive ion of phytic acid) takes up calcium, zinc magnesium, niacin and other chemically active items in food and makes chemical compounds that humans can't digest effectively. Thus the calcium, niacin, etc., of food is lost. This leads to calcium deficiency, zinc deficiency (as with whole-grain wheat bread eaters in the Near East), or worst of all, pellagra (corn is classically associated with pellagra because it's high in phytate and low in niacin). But of course if you add calcium or magnesium or the like to your food, it takes up the phytate and you're OK. Heat also destroys some of it. Micro-organisms such as yeasts and *Aspergillus* can also destroy it, having appropriate enzymes. Thus processing soybeans with gypsum, nigari or fungal fermentation wipes out this danger." Address: Dep. of Anthropology, Univ. of California, Riverside, CA 92521.

5804. Freiman, Jane Salzfass. 1980. Banzai! Two stellar cookbooks from the land of the rising sun. *Chicago Tribune*. Dec. 22. p. C1.

• **Summary:** One of the books, *Japanese Cooking: A Simple Art*, by Shizuo Tsuji (Kodansha 1980, 517 pages, \$14.95) was sponsored by Kikkoman (the soy sauce people) and Suntory (the Japanese whisky people).

A recipe for Spinach with sesame dressing calls for "2 teaspoons dark soy sauce."

5805. Bau, H.M.; Debry, G. 1980. L'art de l'utilisation du soja: Habitudes et traditions [The art of soya utilization: Customs and traditions]. *Cahiers de Nutrition et de Dietetique* 15(4):277-84. Oct/Dec. [40 ref. Fre; eng]

• **Summary:** "For many centuries, soybeans have meant meat, milk, cheese, bread, and oil to the people of Asia. Because of their great food value, they not only have long had a definite place in the oriental diet but now belong in the diet of America and of the entire world. In Europe, the use of soybean products in the quotidian diet is still limited, however it is sure that they will be an important factor in the balanced diet of the future."

Note 1. Soyfoods Center has a 16-page English-language translation of this article.

Note 2. *Webster's Dictionary* defines quotidian (derived from the French *quot* = as many as + *dies* = day) as "occurring every day." Address: University of Nancy, France.

5806. Chen, Sheng-Lo. 1980. Zhongguo jiangyou xin zhizao fa zhi yanjiu [Studies on the new manufacturing method of Chinese soy sauce]. *Chung-Kuo Nung Yeh Hua Hsueh Hui Chih (J. of the Chinese Agricultural Chemical Society, Taiwan)* 18(34):42-52. Dec. [12 ref. Chi; eng]

• **Summary:** The traditional brewing period was reduced from about 8 months to about 1-2 months. About 83% of the soybean protein was utilized and 52.11% of the amino nitrogen was solubilized. "The quality of the sauce in this quick brewing method was excellent." Address: Dep. of Agricultural Chemistry, National Taiwan Univ.

5807. **Product Name:** [Seitan Goulash].

Foreign Name: Seitangoulash.

Manufacturer's Name: Jonathan P.V.B.A.

Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium.

Date of Introduction: 1980. December.

Ingredients: Water, seitan (wheat proteins)*, peppers, onions*, carrots*, leek*, peas*, mushrooms, soya sauce, spices, starch, sea-weed. * = Organically grown.

Wt/Vol., Packaging, Price: Sterilized.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Minerals 1.64%, vegetable proteins 1.26%, vegetable fats 0.73%, carbohydrates 7.37%. 73.1 calories (Kcal) per 100 gm.

New Product-Documentation: Letter (fax) from Jos van de Ponsele and Magda Verfaillie of Mycelia b.v.b.a. in Gent, Belgium, in response to an inquiry. 1992. July 6. This product was introduced at the end of 1980 as a sterilized product.

Label sent by Jos van de Ponsele. 1988. 6.25 by 10.5 inches. This card-stock sleeve fits over the product. Color photo of seitan with various vegetables with item name in

white on orange. The product is named Seitangoulash in English or Seitangulasch in German. "Vegetable product." Code CINAB.

5808. **Product Name:** Tahini-Tofu Salad.

Manufacturer's Name: Tofu Shop (The).

Manufacturer's Address: 768 18th St., Arcata, CA 95521.

Date of Introduction: 1980. December.

Ingredients: Fresh organic tofu, celery, green onions, olives, sesame tahini, tamari, mustard, seasonings.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product-Documentation: Leaflet 1980, undated.

"New deli foods from The Tofu Shop" (768 18th St., Arcata, California 95521). "Your local soyfoods producer." In the upper left corner is a dragon in a round circle. In the lower right is a little man whose body is a paper deli takeout container; he has two arms and two legs, and is wearing a top hat.

Label. Received 1988. Launched Dec. 1980. July. 2.5 inches diameter. Self adhesive. Green on yellow. "Fresh 'N Natural." Net weight: 5 oz. (142 gm). Great hot or cold as a spread, salad, or side dish. Lactose-free and cholesterol free.

5809. **Product Name:** Tofu Veggie Patties. Delicious and Baked.

Manufacturer's Name: Tofu Shop (The).

Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

Date of Introduction: 1980. December.

Ingredients: Tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari).

Fresh vegetables (carrots, green onions, parsley). Tamari (natural soy sauce made with water, soybeans, wholewheat and salt). Garlic and ginger.

Wt/Vol., Packaging, Price: 10 oz.

How Stored: Refrigerated.

New Product-Documentation: Label (metallic). Received 1988. 4 by 2.5 inches. Self adhesive. Green, red, gold, and white. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great in your favorite burger with all the fixin's or as a main dish. Simple to heat in oven (350°F, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39°." Matthew Schmit says (March 2009) that the metallic label was first used in 1985.

5810. **Product Name:** Granose Sausfry: Seasoned Soya Protein Sausage Like Mix.

Manufacturer's Name: Granose Foods Ltd. (Marketer-Distributor). Made in the UK by British Arkady.

Manufacturer's Address: Stanborough Park, Watford, Herts., WD2 6JR, England.

Date of Introduction: 1980.

Ingredients: 1980: Vegetable fat, textured soya protein

[textured soy flour], rusk, glucose, stabiliser, salt, herbs, spices, colouring, added vitamins.

Wt/Vol., Packaging, Price: 500 gm (1.1 lb) bag.

How Stored: Shelf stable.

New Product–Documentation: Manufacturer's catalog. 1980. April. "Textured soya protein in a beef sausage like flavour which only requires the addition of water to make it usable in any of the ways in which sausage meat can be used."

Form filled out and Label sent by Granose Foods Ltd. 1990. June 13. States that the product, made by British Arkady, was introduced in 1980. Address on bag is now Newport Pagnell. Label. 1990. 3.5 by 8 by 2 inch white coated paper bag. Red, yellow, brown, and black on white. An illustration (line drawing) on front panel shows a woman standing behind a table of baked goods. "Healthier wholesome food." Pack panel: "Make it plain... Add 750 ml (1.33 pints) of cold water to contents and leave the mixture for five minutes. Divide and form into sausage shapes, fry gently until golden brown.

"Make it fancy... Cook Sausfry shapes in hot batter for a tasty toad-in-the-hole or wrap in pastry to make savoury Sausfry rolls. Add onion, tomato, sage—any of your favourite flavours—and create exciting new ways to serve Sausfry.

"Note: Sausfry contains no animal matter and no Monosodium Glutamate.

"Ingredients: Textured defatted soya flour (defatted soya flour, iron, thiamin, riboflavin, vitamin B-12), hydrogenated vegetable oil, rusk, stabiliser (Methyl Cellulose, of plant origin), sea salt, hydrolysed vegetable protein, herbs, spices, colour (beetroot red)."

Color photo of package in *Linda McCartney's Home Cooking*. 1990. p. 18.

5811. Kikkoman Foods, Inc. 1980. Graham Kerr—the Galloping Gourmet speaks out for Kikkoman: Soy sauce. Teriyaki sauce (TV ad synopsis). Walworth, Wisconsin. 1 p. Color.

• **Summary:** Note: Graham's surname Kerr is pronounced like the word "Care." We will give each frame a number: "Kikkoman Soy Sauce. (1) Graham Kerr. (2) This is Kikkoman naturally brewed soy sauce... (3) and these words are terribly important to me as a cook. (4) It's put together only with soy beans, wheat, salt and water. (5)... and brewed and checked until its mild, but magnificent! (6) What it does for your food is incredible... (7) It sparks it up and gives it life. (8) Just look for the soy sauce called Kikkoman. (9) Hmm... mm... I'll say its fantastic."

"Kikkoman Teriyaki Sauce. (1) I've got a wonderful seasoning comparison to show you. (2) There's a link between this beautiful chicken... (3) Made from a base of Kikkoman naturally brewed soy sauce... (4) and a fantastic collection of herbs, spices and wine. (5) That's easy... its basted with Kikkoman teriyaki! (6) You can baste and

marinate and splash on this sauce... (7) on roasts and steaks and hamburgers and fish. (8) One of the world's great tastes... Kikkoman teriyaki sauce." Address: Walworth, Wisconsin.

5812. **Product Name:** Noble Bean Tempeh Salad.

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: c/o Cleveland Tofu Co, 8021 Euclid Ave., Cleveland, OH 44121.

Date of Introduction: 1980.

Ingredients: Tempeh (Organic soybeans, water, Rhizopus culture), Hellmann's Mayonnaise (soy oil, partly hydrogenated soy oil, whole eggs, vinegar, water, egg yolks, salt, sugar, lemon, juice, natural flavors, calcium disodium, EDTA added to protect flavor), celery, pickles, onion, parsley, shoyu, mustard, garlic powder.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. Oval 4 by 2.75 inches. Green, blue, red, and yellow on white. Jeff Narten. 1987. "History of North Coast Tempeh and its Products." 4 p. Dec. 7.

5813. **Product Name:** Noble Bean Tempeh Salad Sandwich.

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: c/o Cleveland Tofu Co, 8021 Euclid Ave., Cleveland, OH 44121.

Date of Introduction: 1980.

Ingredients: Whole wheat bread (organic whole wheat, molasses, corn oil, yeast, sea salt, malt), tempeh (Organic soybeans, water, Rhizopus culture), Hellmann's Mayonnaise (soy oil, partly hydrogenated soy oil, whole eggs, vinegar, water, egg yolks, salt, sugar, lemon, juice, natural flavors, calcium disodium, EDTA added to protect flavor), celery, pickles, lettuce, tomato, onion, alfalfa sprouts, parsley, shoyu, mustard, garlic powder.

Wt/Vol., Packaging, Price: 6 oz.

How Stored: Unrefrigerated and perishable.

New Product–Documentation: Label. 1987. Oval 4 by 2.75 inches. Green blue, red, and yellow on white. Jeff Narten. 1987. "History of North Coast Tempeh and its Products." 4 p. Dec. 7.

5814. **Product Name:** Teriyaki Tofu.

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1980.

New Product–Documentation: Shurtleff & Aoyagi. 1980. List of soyfoods products.

5815. Slamet, Dewi Sabita; Tarwotjo, Ignatius. 1980.

Komposisi zat gizi makanan Indonesia [The nutritional composition of Indonesian foods]. *Penelitian Gizi dan*

Makanan (Research on Food and Nutrition) 4:21-36. [4 ref. Ind]

5816. **Product Name:** Sovex Chili (Meatless Dry Mix).
Manufacturer's Name: Sovex Natural Foods, Inc.
Manufacturer's Address: Collegedale, TN 37315.
Date of Introduction: 1980.
Ingredients: Soy flour, coconut oil, tomato powder, minced onions, tamari soy sauce (made from water, soybeans, wheat, sea salt), chili powder (made from oregano, chili peppers, salt, cumin, garlic).
Wt/Vol., Packaging, Price: 17 oz In a 1 quart Pure-Pak carton.
How Stored: Shelf stable.
New Product–Documentation: Label. 1980. Label reads: "Sovex. The Granola People. Contains No Animal Products. No Preservatives. No Artificial Colors or Flavors. No MSG. No Sugar." Two recipes and serving suggestions.

5817. **Product Name:** Sovex Vege-Pat (Vegetable Burger Dry Mix).
Manufacturer's Name: Sovex Natural Foods, Inc.
Manufacturer's Address: Collegedale, TN 37315.
Date of Introduction: 1980.
Ingredients: Rolled oats, soy flour, sesame seeds, oat flour, miller's wheat bran, soy grits, potato flour, sunflower seeds, minced onion, tamari soy sauce, food yeast, sage, garlic, onion.
Wt/Vol., Packaging, Price: 15 oz 1 quart Pure-Pak carton.
How Stored: Shelf stable.
New Product–Documentation: Label. Undated. Label reads: "Sovex. The Granola People. Hamburger Flavor–Without Meat. Makes 16–3.5 inch patties. Contains No Animal Products. No Imitation Ingredients. No Artificial Colors or Flavors. No MSG. No Sugar." Two recipes.

5818. **Product Name:** Sovex Vege-Pat (Vegetable Sausage Dry Mix).
Manufacturer's Name: Sovex Natural Foods, Inc.
Manufacturer's Address: Collegedale, TN 37315.
Date of Introduction: 1980.
Ingredients: Soy flour, unhulled [dehulled] sesame seeds, miller's wheat bran, oat flour, rolled oats, tamari soy sauce, potato flour, food yeast sage, crushed red pepper.
Wt/Vol., Packaging, Price: 15 oz In 1 quart Pure-Pak carton.
How Stored: Shelf stable.
New Product–Documentation: Label. Undated. Label reads: "Sovex. The Granola People. Sausage Flavor–Without Meat. Makes 18–2.5 inch patties. Contains No Animal Products. No Imitation Ingredients. No Artificial Colors or Flavors. No MSG. No Sugar." Two recipes.

5819. **Product Name:** Tofu Onion Dip, and Creamy Tofu

Dressing [Thousand Island].
Manufacturer's Name: Summercorn Foods Inc.
Manufacturer's Address: 401 Watson, Fayetteville, AR 72701. Phone: 501-521-9338164.
Date of Introduction: 1980.
Ingredients: Dip: Tofu, safflower oil, vinegar, onion, tamari, garlic.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Label for Dip. 1981. 2.5 inch diameter. Self adhesive. Blue on white. "Low cholesterol. Low calorie." Talk with David Druding. 1988. May 18. They made this while they were still in the Community Cannery.

5820. **Product Name:** [Dried Flavored Tofu].
Foreign Name: Tofu Saveur Sec (Wu Hsiang Doufu Kan).
Manufacturer's Name: Sunrise Market Ltd.
Manufacturer's Address: 729 Powell St., Vancouver, BC, V6A 1H5, Canada. Phone: 604-254-0701.
Date of Introduction: 1980.
Ingredients: Water, extract of soy, water, salt, calcium sulphate, soy sauce, egg color, monosodium glutamate, spices.
Wt/Vol., Packaging, Price: 250 gm (8.8 oz).
How Stored: Refrigerated.
New Product–Documentation: Label. 1987. 5 x 2 inches. Red on white. Form filled out by Peter Joe. 1988. May 20. Gives date. The term "dried" in the product name means that the tofu is pressed until it is very firm. It does not undergo a drying process.

 Address: FIRDI, Hsinchu, 300 Taiwan.

5822. Aihara, Herman. 1980. Learning from salmon. Oroville, California: George Ohsawa Macrobiotic Foundation. xiii + 156 p. Illust. No index. 22 cm.
 • **Summary:** This is a collection of Herman Aihara's writings, over the past 20 years, compiled by Sandy Rothman, editor of GOMF. Each article or essay is dated. Contains a good early history of macrobiotics in the USA, and of Chico-San (p. 26-35).

Herman was born Nobuo Nishiyama on 28 Sept. 1920 in Arita, Kyushu, Japan. George Ohsawa's teaching was about how to understand and acquire infinite freedom, absolute justice, and eternal love. He inspired his students greatly, and told them it was their own fault if they were not happy. The food you eat is one of the most important factors that influences a person's health and happiness.

Herman landed in San Francisco in 1952 at age 32 to start a new life. His wife was sick, and two of their babies died.

Before March of 1961 Ohsawa visited Europe and saw many beautiful macrobiotic restaurants and clinics in Belgium, France, Italy, Germany, Switzerland, and England. The Lima factory in Belgium produces macrobiotic foods. Macrobiotic restaurants include Au Riz Dore, and Longue Vie.

Like the salmon, Ohsawa took his most adventurous trip late in his life (p. 77). He held his first American macrobiotic lectures in 1960 on Long Island, New York. They lasted for 2 months. At that time Herman was manager of the first macrobiotic food store in the USA, in New York City [Named Ginza, it had been started by Herman in 1960.] In 1960 Herman went to Europe to solve visa problems, then in about late 1960 he returned to New York and started publication of *Macrobiotic News*, a magazine that contained mostly Ohsawa's lectures. In 1961 Ohsawa returned to New York for a summer camp in the Catskill Mountains. After the camp he said that followers of macrobiotics should leave New York because nuclear war was immanent. 36 people, including 15 families, decided to move to Chico, California, which they had calculated was the safest place from nuclear fallout. Arriving in Sept. 1961, they soon founded Chico-San, which was the first macrobiotic food production and distribution company in the USA. The first store was in the basement of a small shop. Herman began to import miso, tamari, and other traditional, natural foods from Japan (p. 31).

Some followers of macrobiotics stayed in New York to keep up the Ohsawa Foundation and food store. One customer got sick and died [Beth Ann Simon died in Nov. 1965]. The FDA came in and closed the store. Bob Kennedy became president of Chico-San and soon began America's first successful production of Rice Cakes.

Herman moved to San Francisco in about 1971 (p. 35). At the end of 1970, John Deming Jr. had given him some land in Mendocino. In Sept. 1972 a fire, started by a rice-cake machine, burned down the Chico-San factory (p. 34) and most of its inventories of food. Chico-San started making money in about 1978.

Western medicine is interested only in treating symptoms. Medical professionals are largely ignorant of the influence of diet on health, and even block the development of the dietary approach to healing.

Page 155: "The author: Herman Aihara was born in Arita, a small town in southern Japan, on September 28, 1920. The town is famous for its production of porcelains called *Imari-ware* or *Kakiemon-ware*. Imari is the name of the port from which Arita porcelains were shipped to Europe... His birth family was too poor to support ten children, and so at the age of nine Herman was adopted into his uncle's home in Tokyo. His family name was changed

to Aihara. He grew up without knowing his actual mother... His 'stepfather' owned a factory that produced iron materials for the national railways and telephone companies, and Herman chose metallurgical engineering as a life work. He was accepted by the school of engineering at the reputable Waseda University." Address: Oroville, California.

5823. Bhumiratana, Amaret. 1980. Traditional fermented foods in Thailand. In: 1980. Proceedings of the Oriental Fermented Foods. Food Industry Research and Development Institute, P.O. Box 246, Hsinchu, (300) Taiwan. iv + 229 p. See p. 58-70. [19 ref]

• **Summary:** Tao-jeow is Thai miso. Sufu is fermented tofu. The author uses the terms tao-nou and thuo-nao instead of thua-nao throughout; he even misspells it when citing Sundhagul 1970. It is sold as a paste or chips. Soy sauce (the Chinese type), soy paste and fermented soybean curd are commonly available throughout the country although they are more common in the Chinese community. Tao-nou, however, is the product which is popular in the northern part of the country. Flowcharts show the processes for producing soy sauce and tao jeow, tofu and sufu, and thuo-nao.

Note: This is the earliest (and only) English-language document seen (Jan. 2012) that uses the term "tao-nou" or the term "thuo-nao" to refer to thua-nao. Address: Dep. of Microbiology, Faculty of Science, Mahidol Univ., Rama VI Rd., Bangkok 4, Thailand.

5824. Binding, G.J. 1980. About soya beans: Wonder source of protein and energy. Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. and New York: Pyramid Books. 64 p. 18 cm. 1st ed. 1970. About series, no. 35.

• **Summary:** Contents: 1. Beans in general. 2. History of the soya bean. 3. Content of soya beans. 4. About lecithin—vital for retaining youth. 5. The soya bean in the Far East. 6. American influence on the soya bean. 7. Industrial uses in America. 8. The soya bean and world food shortage. 9. Soya bean recipes.

A section titled "Wonder food—God's gift to man" (p. 10) states: "For over 5,000 years this tiny seed has been the staple food of certain parts of the East, including North China, Japan, Korea, and some areas of India. The ancient Yogis, who were among the world's first vegetarians, placed great faith in the soya bean as a supplement to their meatless diet." On the cover is a color photo showing TVP, lecithin, soymilk, soy sauce, miso, soya bean oil, soya flour, and soya sprouts.

Note 1. The copyright page states: "First published 1970. Second impression 1971. Third impression 1977. Second Edition, revised and reset 1980." Note 2. This book has no preface by Carlson Wade. Address: F.R.H.S., England.

drying. Paper presented at the Second ASEAN Workshop on Solid Substrate Fermentation. Held 27-29 Nov. 1980 at Kuala Lumpur, Malaysia. *

• **Summary:** The author isolated, identified, and preserved the microorganisms in some traditional Indonesian foods such as tempe, tauco (Indonesian miso), and kecap (soya sauce). Address: Malang Research Inst. for Food Crops (MARIF).

5826. Chen, Steve; Wang, E. 1980. Huang-dou shu-pin [Soy foods]. Taipei, Taiwan: American Soybean Assoc. 248 p. Illust. 19 cm. [Chi]

• **Summary:** On the cover is written: "In celebration for the 10th anniversary of ASA/Taiwan. American Soybean Association. China Nutrition Society. China Institute of Food Science Technology. China Food Health, Nutrition Research Foundation." Contains many photos and graphs. Address: American Soybean Assoc.

5827. Cheryan, Munir; Deeslie, W. David. 1980. Production of protein hydrolyzates in ultrafiltration-enzyme reactors. In: Anthony R. Cooper, ed. 1980. Ultrafiltration Membranes and Applications. New York: Plenum Press. See p. 591-601. Proceedings of a symposium "Ultrafiltration Membranes and Applications" held 11-13 Sept. 1979 at the 178th National Meeting of the American Chemical Society in Washington, DC. [21 ref]

• **Summary:** "From a historical perspective, the development of soy sauce manufacture in the 13th century may be the earliest and most successful batch-enzymatic hydrolysis process known. Recently, there has been a great interest in functionally-modified proteins known collectively as protein hydrolyzates for specific end uses. The shortage of egg albumin during World War II resulted in the first development of an enzymatically hydrolyzed protein food ingredient for purposes of replacing an existing ingredient; its use as a whipping aid is still a major market today. Protein hydrolyzates, whether chemically or enzymatically modified, are also used as flavor enhancers..."

"The major advantage of UF-enzyme reactors is that the enzyme is theoretically retained within the system and can be re-used a number of times; also, some control is possible over the molecular size of the product by choosing the appropriate membrane pore size." Address: Dep. of Food Science, Univ. of Illinois, Urbana, IL 61801.

Los Angeles (Santa Monica), California: Golden Glow Publishers. ix + 106 p. Illust. Index. 26 cm. 2nd ed. 1982. *

• **Summary:** This near-vegetarian cookbook was Marilyn Diamond's first book on food. It was self published (the Diamonds founded Golden Glow Publishers), shortly after Harvey's first book titled "A case for health." Address: Venice, California.

5831. Doi, Tadao; Takeshi, Morita; Chonan, Minoru. 1980. Hôyaku Nippo jisho [Vocabulary of the language of Japan]. Tokyo: Iwanami Shoten. xxxiv + 862 p. 27 cm. [Jap; Por]

• **Summary:** This is a Japanese-language translation of the original 1603 edition, *Vocabulario da Lingua de Iapam*, the second earliest dictionary of the Japanese language compiled by Europeans. Soy-related terms in this dictionary, which are translated from the original hard-to-read Portuguese into modern Japanese, are described in detail at the reference for the original 1603 dictionary, which see.

In the Forward, the author notes that this is the entire translation of the Nagasaki edition of the Japanese Portuguese Dictionary. The original title is *Vocabulario da Lingoa de Iapam com a declacaração em Portugues* (Japanese dictionary with explanation in Portuguese), published in 1603 by the Japanese Society of Jesus (Nihon Iezuzu-kai). In 1604 a second dictionary was published, titled *Arte da Lingoa de Iapam Composta Pello Padre Iaaod Rodriguez* (1604-1608).

Christian priests traveled by boat to Japan to teach the Japanese Christianity. As a result, they left many historical documents. Francis Xavier first arrived in Japan in 1549 and only 54 years later his group published this remarkable Japanese dictionary. The year 1603 was also the year that Tokugawa Ieyasu became the shogun (Seiitaishogun, or highest ranking samurai), founding the Tokugawa Shogunate or Edo period. In Japanese history it was the turning point at which the country changed from the medieval period to the modern one. This dictionary is a very unique mirror which reflects this period and is regarded as an important document that raises many questions in Japanese cultural

history. The dictionary is indispensable in Japanese linguistic history since it contains many Japanese words of the period with explanations in Portuguese. In those days the Japanese had dictionaries that focused on Chinese characters (kanji) and simple dictionaries for waka and renka poems. This dictionary picked up a wide range of words from daily conversation, organizing and defining them in modern dictionary form. The original edition was stored in a secret place in Europe, inaccessible to Japanese, who therefore had to largely depend on a 19th century French translation by Leon Pajés. A rotogravure edition of the book stored at Oxford University entered Japan during the Taisho period (1912-1926) and was studied. Only recently was a facsimile copy of the original edition published, and it is being used increasingly.

This dictionary was produced by the Japanese Society of Jesus [Jesuits] to further their goal of spreading Christianity. The 1603 dictionary was developed to help the priests understand dialects, lower-class speech, and the confessions of the local common people. The 1604 dictionary focused on the speech of the upper classes and more educated people. Thus the 1603 dictionary collected words the priests needed to understand, while the 1604 dictionary collected those that they wanted to use.

5832. Easterday, Kate Cusick. 1980. *The peaceable kitchen cookbook: Recipes for personal and global well-being*. New York, NY, Toronto, Canada: Paulist Press. 313 p. Illust. by Ragna Tischler Goddard. 21 cm. [28 ref]

• **Summary:** A vegetarian cookbook. Page 45 describes how to sprout various seeds and beans, including soybeans. The section titled “Soybeans Simplified” (p. 66-75) begins by asking “Why are soybeans so highly praised?” then gives recipes for: Basic cook soybeans. Soyburgers (from cooked, mashed soybeans). How to make soy milk (12 cups, using soy flour or soybeans). Soy “coffee.” Tofu (soybean curd). Tofu sandwich spread. How to roast soybeans (dry). The last page of the section, titled “Soybean Terminology” gives 1-2 line descriptions of: Soy grits, soy meal, soy granules, soy flour, soy powder (extra fine soy flour, used to make soy milk), soya (implies that the product has been toasted), roasted soybeans, tofu, miso, tamari.

Other soy-related recipes include: Wheat-soy pancakes (with soy flour, p. 169). Soy fritters (with mashed soybeans, p. 222). Simple soy bean loaf (p. 228). Vegetarian sukiyaki (with tofu and soy sauce, p. 231). Soy cheesecake (with tofu, p. 291). Address: Illinois.

5833. Fessler, Stella Lau. 1980. *Chinese meatless cooking*. New York, NY and Scarborough, Ontario, Canada: New American Library. 298 p. Illust. by Janet Nelson. Index. 20 cm.

• **Summary:** This vegetarian cookbook, which contains more than 180 recipes, demonstrates vividly how much Chinese

vegetarian cookery depends on soyfoods—especially tofu (bean curd). The glossary includes excellent descriptions of bean curd—fermented red (*nan-ru*), bean curd—fermented white (*tofu-ru*), bean curd—pressed threads or noodles, bean curd sheets (*tofu-pi* [*yuba*]), bean curd sheets (*er-ju*), bean curd sheets—pressed or hundred-leaf (*bai-yeh*), bean curd sticks (folded bean curd sheets), brown bean paste or brown bean sauce, bean paste—Szechuan hot bean or spicy soy, bean sprouts—soy or yellow, fermented or salted black beans, Hoisin sauce, Oyster sauce (with soy), soy sauce, soy sauce—light or thin.

The chapter on soups stocks notes that soybeans or soybean sprouts have a delicate flavor and are most suitable for making stock. Soy sprouts, which are much larger than mung bean sprouts, have a more chewy texture and a very sweet, delicate taste; they are often used to strengthen the flavor of a dish (see recipe p. 90).

Soy-related recipes (each with the name written in Chinese characters) include: Mixed pressed bean curd threads (p. 68). Spinach and deep-fried bean curd puff salad (p. 70). Soybean sprout salad (p. 73). Pressed bean curd salad (p. 76). Monks in a storm of wind and snow (Asparagus and bean curd salad, p. 82). Soybean sprout stock (p. 90). Deep-fried bean curd and mung bean noodle soup (p. 93). Spinach and bean curd soup (p. 98). Seaweed and bean curd soup (p. 99). Soybean soup (p. 100). Soybean with fried gluten soup (p. 101). Asparagus and bean curd soup (p. 106). Goddess of Mercy (Kuan-yin) soup (With bean curd and tiger lily bulbs, p. 112-13).

One long chapter (p. 118-160) is titled “Bean curd dishes, mock meat dishes, and mock fish dishes.” It gives good definitions of and home-scale recipes for: Bean curd. Deep-fried bean curd puffs. Plain pressed bean curd cakes. Five-spice pressed bean curd cakes. Braised deep-fried bean curd puffs. Bean curd with oyster sauce (not vegetarian). Braised bean curd. Spicy bean curd. Steamed bean curd with spicy bean paste sauce. Bean curd with tomatoes. Bean curd with fresh mushrooms. Cold bean curd. Stubborn stones’ obeisance (Fried bean curd with vegetables). Braised frozen bean curd with chives. Braised Fukien [Fujian] bean curd. Stir-fried Chinese chives with pressed bean curd. Stir-fried pressed bean curd with carrots and bamboo shoots. Mock lion’s head (with five-spice pressed bean curd). Stir-fried green peppers with mock meat (pressed bean curd). Mock moo goo gai pan (Stir-fried pressed bean curd with vegetables). Mock roast duck (with dried bean curd sheets and soy sauce). Mock soy sauce chicken (with fresh or frozen hundred-leaf bean curd sheets). Mock velvet chicken (fried bean curd with egg whites). Spicy mock chicken (with mock soy sauce chicken). Mock ham (with dried bean curd sheets). Mock abalone (braised gluten balls). Mock mu-shu pork (with five-spice pressed bean curd, shredded). Fried mock squab (with chopped pressed bean curd). Mock twice-cooked pork (with five spice pressed bean curd). Bean curd

with thousand-year eggs.

Other interesting recipes include: Wheat gluten (homemade mein jin or vegetable steak, p. 165-66; At Chinese grocery stores, wheat gluten is sold in various forms—fried, dried, steamed, boiled, canned, and frozen). Fried gluten balls. Boiled gluten. Lo Han vegetable dish (with fried wheat gluten balls, p. 169-70). Chinese mustard greens in black bean sauce (p. 173-74). Stir-fried leeks with bean curd (p. 186). Fresh soybeans stir-fried with fresh mushrooms (p. 187). Boiled fresh soybeans in their pods (p. 188). Bean sprouts stir fried with wheat gluten (p. 190). Stir-fried soybean sprouts with bean curd puffs (p. 191). Cauliflower and bean curd sticks (p. 192). Winter melon with red fermented bean curd sauce (p. 195). Stir-fried asparagus with fermented bean curd (p. 197). Stir-fried lettuce with white fermented bean curd sauce (p. 198). Sweet and sour fried gluten and cabbage (p. 208). Two immortals in the apricot garden (fried gluten with vegetables and almonds, p. 209). Braised eggs with bean curd sticks (p. 213-14). Scrambled eggs with fermented bean curd (p. 214). Bean curd with salted eggs (p. 216-17). Wonton soup (with fresh bean curd, p. 233-34). Fried wontons (filled with five-spice pressed bean curd, coarsely chopped). Soybean milk, sweet soybean milk, and salty soybean milk (p. 247-48). Deep-fried crullers (*yu chiao*; sometimes served in hot soymilk, p. 249-50). Noodles with spicy bean paste sauce (and five-spice pressed bean curd, p. 258-59).

Note 1. This is the earliest English-language document seen (Oct. 2011) that uses the term “red fermented bean curd” to refer to red fermented tofu.

Note 2. This is the earliest English-language document seen (Oct. 2011) that uses the term “white fermented bean curd” to refer to regular white fermented tofu. Address: Cornell Univ., Ithaca, New York.

• **Summary:** Contents: Fermented soybean foods. Non-fermented soybean food. Conclusion. References.

The following statistics show the amount (tons) of whole soybeans / defatted soybean grits / total of whole and grits consumed for various soybean foods and feeds in Japan in 1976.

Fermented soyfoods: Shoyu (soy sauce) 10,000 / 165,000 / 175,000, miso 190,500 / 5,000 / 195,500. Natto 69,000 / 0 / 69,000.

Non-fermented soyfoods: tofu and aburage (fried tofu pouches) 411,500, 55,000 / 466,500. Kori-tofu (dried-frozen tofu) 29,000 / 0 / 29,000. Others 16,000 / 75,000 / 91,000.

Animal feeds: 30,000 / 1,950,000 / 1,980,000. Thus total use for foods and feeds is whole soybeans 756,000. Defatted soybean grits 2,250,000, total of both 3,006,000. By type of use, animal feeds account for 65.9% of total Japanese usage of whole soybeans and defatted grits, non-fermented soyfoods account for 19.5%, and fermented soyfoods account for 14.6%. The top three food users are tofu (466,500 tons, 45.5% of all food uses), miso (195,500), and shoyu (175,000). There are 35,000 tofu plants in Japan.

Fermented soybean foods described are shoyu (soy sauce; 5 types), miso (3 basic types, 6 varieties), sufu (Chinese soybean cheese), tempeh (fermented soybean cake), natto (fermented whole soybeans; itohiki-natto and hama-natto), and fermented soymilk (recently a new fermented soybean product appeared on the market in Japan. It is a soy milk drink fermented by lactic acid bacteria).

Non-fermented soybean foods described are tofu (soy milk curd), aburage (fried tofu pouches), kori-tofu (dried-frozen tofu), yuba (coagulant film of soy milk), kinako (roasted soybean powder), moyashi (soybean sprouts), and soybeans. Production, chemical composition, and use of each of these foods is discussed.

Figures (flow sheets) show: (1) Shoyu manufacturing process. (2) Rice miso manufacturing process. (3) Sufu manufacturing process. (4a) Tempeh manufacturing process. (4b) Natto manufacturing process. (5a) Tofu manufacturing process. (5b) Kori-tofu manufacturing process. Address: Kikkoman Foods Inc., P.O. Box 69, Walworth, Wisconsin 53184.

5836. Gay, Martin; Gay, Kathlyn. 1980. Eating what grows naturally. South Bend, Indiana: And Books. 137 p. Illust. by Brian “Woodie” Byrn. 21 cm. [75 ref]

• **Summary:** A book about natural foods, with some vegetarian recipes. Martin was born in 1950. Pages 79-80 give ten menus based on Shelton’s food-combining principles, including (5) Stir-fried vegetables and tofu cubes, and (9) Tofu-vegetable casserole with green salad. Page 106 gives definitions of miso, tamari, tempeh, and tofu. Soy-related recipes include: Soy burgers (with ground, cooked soybeans, p. 108), and tofu casserole (p. 109).

5837. Himalayan International Institute. 1980. The Yoga way cookbook: Natural vegetarian recipes. 4th ed. Honesdale, Pennsylvania: Himalayan International Institute of Yoga Science and Philosophy. 249 p. Illust. Index. 22 cm. 1st ed. as 1974.

• **Summary:** A vegetarian and natural foods cookbook. Pages 8-9 describe in detail how to make tofu at home. A list of special ingredients includes soybeans, soy granules, grits, and flour, miso, tamari, and tofu. Soy-related recipes

include: Tofu spinach pie (p. 18). Soybean tacos (p. 32). Soy burgers (p. 36). Tofu burgers (p. 40). Tofu rice with vegetables (p. 47). Soybean rice (p. 49). Soy-potato soup (with soy granules, p. 105). Miso soup (p. 116). Tamari soup (p. 117). Tofu salad dressing (p. 127). Scrambled tofu (p. 228). Tofu-avocado supersandwich (p. 233). "Short order" tofu luncheon.

5838. Hua, J.J.; Wang, I.H.; Chen, S.K.; Hsu, W.H. 1980. Studies on inyu (black bean sauce) fermentation. In: Proceedings of the Oriental Fermented Foods. Food Industry Research and Development Institute, P.O. Box 246, Hsinchu, (300) Taiwan. iv + 229 p. See p. 102-11. Held 10-14 Dec. 1979 in Taipei, Taiwan. 8 tables. 3 figs. [12 ref]

• **Summary:** Inyu is a fermented soy sauce made with black soy beans (*Glycine soja* Sieb. and Zucc). The annual consumption of regular fermented soy sauce and of inyu in Taiwan was worth over 25 million U.S. dollars in 1974; inyu accounted for 30% of this. Unlike soy sauce, the flavor of inyu is intensified after cooking. This is one of its major characteristics and makes it better than soy sauce for use in cooking. Fig. 1 shows the traditional inyu fermentation process.

"The chemical composition, enzyme activities, and microbial population in the process for Inyu fermentation from black bean were investigated. The results indicate that the major microorganism responsible for the aging of Inyu is the halophilic lactobacilli, while yeast has only a minor role in Inyu fermentation. When the washed-koji was preincubated at 40-45°C for 4 hours, the aging period could be reduced from 90 to 40 days. The conversion of total nitrogen from Inyu-mash to Inyu increased from 60% to 66%.

"To further improve the productivity of Inyu fermentation, the defatted black bean flakes and crushed black bean flakes were used to replace the whole black bean as raw material. The nitrogen utilization of Inyu-mash also increased from 60% to more than 72% after 56 days at 30°C. However, the flavor and aroma of Inyu made from defatted black bean flakes need to be further improved." Address: Food Industry Research and Development Inst., Hsinchu 300, Taiwan.

5840. Iwamoto, H. 1980. General aspects of Japanese fermented foods. In: Proceedings of the Oriental Fermented Foods. Food Industry Research and Development Institute, P.O. Box 246, Hsinchu, (300) Taiwan. iv + 229 p. See p. 31-45. Held 10-14 Dec. 1979 in Taipei, Taiwan. 15 tables. 2 figs.

• **Summary:** The fermented foods indigenous to Japan which are made from protein-rich materials can be grouped into

two types: the soybean group and the fish group. The former, which includes miso, shoyu, and natto, is the more popular and production is very large. The author presents an early history and genealogy of miso, shoyu, and natto based on the Japanese-language writings of Prof. K. Sakaguchi and Prof. M. Nakano. Shi [fermented black soybeans] were recently found in an ancient Chinese tomb of the 2nd century B.C. "The word *shoyu* or *chiang-yu* never appeared in any old Chinese manuscripts. Nevertheless I wonder if the origin of Japanese shoyu might be the Chinese *chiang* in the Ming dynasty or an earlier period. Anyhow, the question is still: When did the Chinese start making koji from a mixture of soybean and wheat? And when and where was filtration of soybean *chiang* successfully commenced. As for the later, it is quite possible that the filtration was started in Japan."

In 1977 the following amounts of fermented soyfoods were produced in Japan: miso 620,902 tonnes (using 190,000 tonnes of whole soybeans and 1,579 tonnes of defatted soybean meal), shoyu 1,228,244 tonnes (using 11,788 tonnes of whole soybeans and 180,000 tonnes of defatted soybean meal), and natto 120,000 (using 71,000 tonnes of whole soybeans).

Table 2 shows soybean production in Japan and the USA every 5 years from 1930 to 1978. Production in Japan was 388,600 tonnes in 1930, reaching a peak of 507,100 in 1955, falling to a low of 109,500 in 1976, then rising slightly to 187,900 in 1978. The first year for which imports are shown in 1970, when 3,243,790 tonnes were imported, 91% of which from the USA. In 1978 4,260,041 tonnes were imported, 97% from the USA.

Table 6 shows miso production in Japan from 1967 to 1976. Factory production grew from 535,000 tonnes in 1967 to a peak of 650,000 tonnes in 1973, down slightly to 630,000 tonnes in 1976. Farmer (household) production decreased steadily from 207,000 tonnes in 1967 (39% of factory production and 26% of total production) to 67,000 tonnes in 1976 (11% of factory production and 10% of total production). Total production and annual per capita consumption decreased from a peak of 789,000 tonnes in 1967 (7.8 kg/capita) to a low of 697,000 tonnes in 1976 (6.5 kg/capita).

Table 7 shows the number and capacity of miso factories in Japan and their production in 1959, 1968, and 1977. The number of factories decreased dramatically during this 18-year period (to from 2,987 to 1,996), but the total amount of miso produced increased 503,000 tonnes to 621,000 tonnes, and the percentage of all miso made by large factories (those making 3,751 tonnes/year or more) rose from 15% to 52%, while the percentage of all miso made by small factories (those making 1-375 tonnes/year) decreased from 29% to 14%.

Table 8 shows the materials used in making shoyu in Japan from 1968 to 1977. The amount of whole soybeans decreased from 15,000 tonnes to 9,000 tonnes, the amount

of defatted soybean meal increased from 147,000 tonnes to 176,000 tonnes, the amount of wheat increased from 127,000 to 178,000 tonnes, and the amount of salt from 170,000 tonnes to 204,000 tonnes. The amount of amino liquor (HVP) decreased from 140,000 tonnes to 89,000 tonnes.

Table 9 shows shoyu production in Japan from 1967 to 1976. Factory production grew from 1,201 kiloliters (kl) in 1967 to a peak of 1,403 kl in 1973, down slightly to 1,349 kl in 1976. Farmer (household) production decreased steadily from 20 kl in 1967 (1.67% of factory production 1.63% of total production) to 9 kl 1976 (0.66% of factory production and 0.66% of total production). Total production and annual per capita consumption increased from 1,221 kl 1967 (12.0 liters/year) to a high of 1,411 kl in 1973 (12.6 liters/year), then down slightly to 1,355 kl in 1976 (11.9 liters/year).

Table 10 shows that in 1977 there were 3,135 shoyu factories in Japan. Of these, 2,654 (85% of the total) were in the smallest scale, having 10 or fewer employees, while 5 had 201-300 employees, and 8 had 301 or more employees.

Fig. 2 shows the percentage of shoyu that is distributed through various channels as it moves from the factory to large or small consumers. Address: College of Agriculture, Meiji Univ., Ikuta, Tama-ku, Kawasaki-shi, Japan.

5841. Kan, Johnny; Leong, Charles L. 1980. Eight immortal flavors. Rev. ed. San Francisco, California: California Living Books. xiii + 236 p. Illust. 24 cm. 1st edition 1963.

• **Summary:** The title page states: "Including new recipes kitchen-tested by Master Chef Sun Pui Wong, Executive Chef, Kan's Restaurant." This book is almost identical to the original 1963 edition. However Roman numerals have been assigned to the front matter, so the recipes are on different pages. None of the original soy-related recipes or definitions have been changed or deleted.

On the rear cover (undated): "Will probably become a standard reference work... It is admirable for its scope and authenticity." Address: 1. Chef, Chinatown; 2. Historian of Chinese life in America.

5842. Kikkoman International Inc. 1980. The endless possibilities of Kikkoman (Brochure). [San Francisco, California]. 16 p. 21 x 21 cm.

• **Summary:** A color booklet with a large label from Kikkoman soy sauce on the front and rear covers. Opposite each page of recipes is a full-page color photo of one of the preparations. Contents: The family of Kikkoman. Meat. Seafood. Grills. Poultry. Vegetables. Large or small, Kikkoman comes in a package that's right for your business.

p. Illust. (photos). Portraits. 24 x 20 cm. A project of the Chinese Culture Foundation of San Francisco. [Eng; Chi]

• **Summary:** This is a remarkable book, another painful example of American racism and insensitivity. The majority of the approximately 175,000 Chinese immigrants (most from Canton) who came to the United States from 1910 to 1940 passed through the detention center at Angel Island—the West Coast counterpart of Ellis Island. Here they awaited jurisdiction on the outcomes of medical examinations, interviews, and immigration papers. It was an ordeal that left many scars. Some wrote poems on the walls of the center to express their grief or sadness. The poems, written on facing pages in both Chinese and English, are divided into chapters. There are also many transcriptions of interviews, each accompanied by a Chinese person's name, age, and date, plus some footnotes of explanation.

In the chapter on "The detainment" Mr. Dea, age 26, writes in 1939 (p. 74): "We would get up in the morning and there was no set time for this, and have plain congee with fermented bean curd. Then, after breakfast, we could go out and exercise..."

In the same chapter, Mr. Low, Kitchen helper, 1923-25, wrote (p. 77): "The main dish included soup, and the following served in turn: vermicelli and pork, dried bean curd and pork, potatoes and beef, dried greens and fish... The small dish was usually either salted fish, fermented bean curd, or *hoisin* sauce."

Footnote 20: Soya bean is one ingredient in *hoisin* sauce. Address: California.

5845. McConnaughey, Evelyn. 1980. More sea vegetable recipes from the Oregon coast. Plus seaweeds from the Orient. 1653 Fairmount Blvd., Eugene, OR 97403. 41 p. Illust. by Catherine Vignaux. No index. 22 cm. [8 ref]

• **Summary:** On page 7 is nutritional information about tofu, tempeh, miso, and tamari (shoyu). Soy-related recipes: Miso (p. 13). Tempeh (p. 26, 27, 37). Tofu (p. 15, 27). Tamari shoyu (p. 27). Line drawings of sea vegetables appear on most pages. Address: Oregon.

5846. Miller, Lani; Rodgers, Diane. 1980. We love your body. Seattle, Washington: Morse Press, Inc. vii + 256 p. Illust. by Joanie Oliver. 25 cm.

• **Summary:** A natural foods, vegetarian cookbook. The glossary describes soybeans (incl. soy flour, milk, and tempeh, p. 246), tamari sauce, and tofu (p. 247).

5847. Mogi, Koya. 1980. Recent progress of soy sauce

manufacturing in Japan. In: Proceedings of the Oriental Fermented Foods. Food Industry Research and Development Institute, P.O. Box 246, Hsinchu, (300) Taiwan. iv + 229 p. See p. 88-101. Held 10-14 Dec. 1979 in Taipei, Taiwan. 13 tables. 6 figs. [2 ref]

• **Summary:** Contents: Introduction. Manufacture: Treatment of raw materials, koji making, aging, pressing, refining. High temperature and short time cooking method. The following tables are included: 1. Classification of shoyu (5 kinds, 3 grades, 3 production methods). 2. Some characteristics of different kinds of shoyu (kinds, color, soybean:wheat ratio). 3. Typical composition of 5 different kinds of shoyu. 4. Differences in koikuchi shoyu grades (total nitrogen, soluble solids except NaCl, alcohol). 5. Differences in shoyu production methods (hon-jozo, shinshiki, amino acids liquid mix). 6. Shoyu production of different kinds in 1977 (koikuchi 917,738 kl = 85% of total, usukuchi 124,829 kl = 11.6% of total, tamari 23,437 kl = 2.2% of total, shiro 4,456 kl = 0.4% of total, saishikomi 3,072 = 0.3% of total). 7. Shoyu production in different grades in 1977 (special 59.3% of total, upper 27.5%, standard 13.2%). 8. Shoyu production by different methods in 1977 (hon-jozo 66.9% of total, shinshiki-jozo 28.4%, amino acids liquid mix 4.7%).

The innovation of treating soybeans using the high temperature and short time cooking method increased the yield of shoyu very much and was patented in Japan, the USA, and Canada. The protein in raw soybeans is undenatured and cannot be hydrolyzed (digested) by the enzymes of koji molds. Therefore it is necessary to denature the soybean protein by cooking so that it can be hydrolyzed. "The phenomenon of the so-called 'N-property' (turbidity nature) appears, if portions of soybean protein remain undenatured. 'N-property' is the phenomenon that *shoyu* becomes turbid when it is diluted and heated. This is the appearance of insoluble form of undenatured protein and remarkably diminishes the commercial value of *shoyu*."

"Undenatured protein is soluble in water, especially saline water, and goes into the product. If the product contains undenatured protein, 'N-property' described above appears as a coagulant when *shoyu* is diluted to the concentration fitted to the specified cuisine and/or further heated. However, excess denaturation also makes soybean protein undecomposable by proteolytic enzymes. Thus, over-denaturation results in a decrease of the yield of *shoyu* and an increase of the production cost."

"Steam cooking has been used as a means to increase digestibility of soybean protein. Technical know-how of so-called 'NK-method' developed by Mr. Tateno *et al.* of the author's company in 1952 has been generally used by many soy sauce manufacturers. It was an epoch-making method of soybean treatment in *shoyu* making. Before that time, the utilization rate of nitrogen was about 66 to 70%. A utilization rate of nitrogen is defined as a percentage of soluble nitrogen in *moromi* mash to total nitrogen in the raw materials used."

In this method, soybeans are cooled rapidly after cooking to prevent excess denaturation. Soybeans are steamed at 0.9 to 1 kilogram per square centimeter gauge pressure for 30 to 60 minutes (average 45 minutes) and then cooled as soon as possible with the aid of jet condenser to reduce the pressure inside the cooker. Thus, the utilization rate of nitrogen attained by the 'NK-method' is 81 to 82%. After many years, the 'NK-method' was first replaced with 'high temperature and short time cooking method' in about 1970."

"It has long been believed that the treatment of the 'NK-method' is best with steam at 0.9 kilograms per square centimeter for 30 to 60 minutes and that either higher temperature or longer time causes excess denaturation and decrease of the utilization rate of nitrogen. However, the author's results of bench-scale experiments indicate better digestibility of soybeans when the conditions of higher temperature and shorter time are used for denaturation of protein." Address: Kikkoman Shoyu Co., Ltd., Plant No. 7, 339 Noda, Noda-shi, Chiba-ken, Japan.

5848. Nagahori, Takashi; Motai, H.; Okuhara, A. 1980. Shōyu no N-nitroso amin seisei yokusei busshitsu [On the substances in shoyu to suppress the nitrosation of dimethylamine]. *Eiyo to Shokuryo (J. of Japanese Society of Food and Nutrition)* 33(3):151-60. [39 ref. Jap]

• **Summary:** Amino acids in shoyu competitively inhibit formation of nitrosamines from nitrite and amines. Shoyu, miso, and protein hydrolysates suppress nitrosation by 60-70%, by means of Van Slyke reactions between amino acids in the soyfoods and nitrites. Rates of suppression are: regular (*koikuchi*) shoyu 62-65%, tamari shoyu 69-79%, and rice miso 71-77%. Address: Central Research Labs., Kikkoman Shoyu Co. Ltd., Noda, Japan.

5849. Null, Gary. 1980. The new vegetarian cookbook. New York, NY: Macmillan Publishing Co., Inc.; London: Collier Macmillan Publishers. x + 310 p. Recipe index. 24 cm.

• **Summary:** One chapter (p. 52-60) titled "Soybeans and Soybean Products" discusses: "Whole, raw soybeans" [green vegetable soybeans], dried soybeans, soybean milk soy flour, soy grits, soy flakes, tempeh, tamari, miso, and tofu. The long section on tofu begins: "As a high-quality source of complete protein, tofu (soybean curd, usually called bean curd) is hard to beat, not to mention inexpensive, low in calories and versatile." It ends: "As you become more familiar with tofu, you'll come up with many of your own innovations. But no matter how you choose to serve this natural, high-protein food, serve it often and savor its benefits!"

Page 78, under "Bean Sprouts," states that "Soybeans make the most delicious sprouts, but are a little more difficult to grow" than mung bean sprouts. Page 88 notes that tamari and miso are good alternatives to salt.

Soy-related recipes include: Miso tofu soup (p. 132-

33). The section titled "Tofu Dishes" (p. 199-208) includes: Butternut tofu. Tofu cauliflower casserole. Herby tofu croquettes. Mushroom and tofu sautéed in miso. Tofu Orleans. Red and green peppers with tofu. Soba tofu dinner. Tofu eggplant Parmesan. Yogurt tofu casserole [with cow's milk yogurt]. Tomato tofu and kidney beans. Bulgur, lentil and tofu casserole. Tofu à la king. Sesame tofu (Tofu plus sesame seeds). Hot breakfast for two (tofu with oatmeal, raisins, and walnuts).

Soy-enriched wheat berry bread (p. 242). Page 304 contains a list of food suppliers, including Chico San, East West Journal Mail Order, and Walnut Acres (Penns Creek, Pennsylvania). Address: New York City, NY.

5850. Pennington, Jean A.T.; Church, Helen Nichols. eds. 1980. *Bowes and Church's food values of portions commonly used*. 13th ed. Philadelphia, Pennsylvania: J.B. Lippincott Co. xvii + 186 p. Index. 28 cm. 1st ed. was 1937. 2nd ed. was 1939. 10th ed. was 1966. [62 ref]

• **Summary:** The index contains entries for: Beans (but no soy). Cheese and cheese food (but alternatives). Cheez-its, Chili-vegetarian. Float, Dairy Queen. Flour. French fried potatoes (Arthur Treachers, Burger Chef, Burger King, Dairy Queen, Long John Silver's, McDonald's, Wendys). Ice cream bars. Infant formulas (Isomil-Ross Labs, L-Soyalac-Loma Linda, Neomullsoy-Syntex, Nursoy, ProSobee-Mead Johnson, Soyolac-Loma Linda). Irishmoss [Irish moss]. Milk (goat, human, Indian buffalo, reindeer, sheep, soybean, whole). Miso. Natto. Oils. Soyamaise dressing (p. 122). Soyamel. Soybeans, fermented. Soybean curd. Soybean flour. Soybean milk. Soybean nuts. Soybean oil. Soybean protein. Soysauce. Teriyaki sauce. Tigers Milk Bar. Tofu. Tom Collins. Veg Skalops. Vega-Links. Vegeburger. Vegetarian products made mostly by Worthington Foods and Loma Linda (p. 22-23): Beef style roll, Chicken style, Chic-Ketts, Chili, Corned beef style, Croquettes, Dinner cuts, Fry Sticks, Gran Burger, Meatloaf mix, Nuteena, Prosage, Proteena, Rediburger, Smoked beef style, Stakelets, Stripples, Tasteecuts, Turkey Style-Smoked, Vega-links, Vegeburger, Veg Skalops, Vegetarian Burger, Vitaburger, Wham. Yogurt.

Aluminum is not among the lists of trace minerals in foods in the back. The book *does* list the following as trace minerals: chromium, cobalt, fluoride, iodine, molybdenum, nickel, selenium, and tin. Address: 1. • **Summary:** This children's book discusses the reasons for vegetarianism, the different types of vegetarian diets, and

why modern meat-raising techniques are causing many Americans to change their diets. Also offers alternative protein-rich recipes.

Pages 42 mentions soybeans, and page 48 mentions tofu, tempeh, and soy sauce. Address: Beechhurst, New York.

5852. *Quadernos de Natura (Editorial Posada, Mexico)*. 1980. *La alimentacion macrobiotica* [The macrobiotic diet]. No. 10. 88 p. [10 ref. Spa]

• **Summary:** Includes information on miso, natto, tamari, tekka miso, and sea vegetables.

5853. Redfield, Linda. 1980. *Vegetarian cooking with tofu*. Davis, California: Printed by the author. 9 p. 21 cm.

• **Summary:** This typewritten booklet of vegetarian tofu recipes has the Chinese characters for "tofu" written on the brown cover. It was reproduced by photocopying and bound with four staples (saddle stitched). Contents: Nutritional information. A simplified method of preparing tofu from soybeans. Sauces (incl. Miso spread, Dipping sauce with tamari, Tofu marinade with tamari, Teriyaki marinade with tamari). Tofu salads. Chinese recipes. Mexican recipes. Recipes using sliced tofu. Italian recipes. Tofu desserts and fruit whips.

Talk with Linda Redfield. 2002. Sept. 23. She developed this booklet in about 1980 in Davis—before she went to Arcata, where she now lives. Her business is now named Holistic Self Healing. She does nutritional and wellness counseling, whole foods meal service, cooking and nutrition classes, and energy therapies. After her name are the following title abbreviations: D.C. (Diet Counselor), N.E. (Nutrition Educator), W.C. (Wellness Consultant). She is like a wholistic dietitian. Address: Davis, California.

5854. Shandler, Nina; Shandler, Michael. 1980. *How to make all the "meat" you eat out of wheat: International gluten wheat "meat" cookbook*. New York, NY: Rawson, Wade Publishers, Inc. xiv + 241 p. Index. 24 cm. [10 ref]

• **Summary:** How to make and use wheat gluten in a vegetarian diet, with 250 American and international recipes. Contents: Acknowledgements. Author's note. Part I. Introducing wheat "meat": 1. The cost of the meat-centered diet: How meat consumption affects ecology, economy and health, food economy, fuel conservation, water reserves and pollution, heart disease, cancer and meat eating, premature aging, chemical residues in meat, medical costs. 2. Introducing wheat "meat": a low-cost, homemade alternative to meat (gluten meats cost about \$0.15 per serving). 3. How to make "meat" from wheat: Preparing raw gluten (from 7 cups whole wheat flour), seven varieties of wheat "meat," cutlets (a veal substitute), steak (a mock beef steak), ground gluten (a hamburger taste-alike), spiced links (an alternative to sausage), roast with a beef flavor, seawheat (a clam alternative), poultry pieces (chicken-flavored wheat

“meat”), using the reserved starch, bran and germ: Gluten-free crackers, and cold crunchy cereal.

Part II. Hundreds of international ways to serve wheat “meat”: 4. All-American wheat meat recipes. 5. Mexican wheat “meat” food. 6. Latin American. 7. British. 8. French. 9. Spanish. 10. Italian. 11. Austrian. 12. Greek. 13. African. 14. Indian (from India). 15. Chinese. 16. Japanese wheat “meat” cooking.

Note 1. Tamari soy sauce and miso are used to flavor a number of recipes in this book. Other soy-related recipes include: Spiced bean curd and cutlet (with tofu, p. 212). Spares with black beans (mock spare ribs with “Chinese prepared black beans [fermented black soybeans], p. 216). Family-style bean curd (with tofu, p. 219). Poultry with orange-flavored soy sauce (p. 228-29). Seawheat in soy and ginger sauce (p. 229). Seawheat with bean curd and vegetables in casseroles (p. 230). Seawheat with vinegared miso (p. 231). Note 2. This book does not mention “seitan,” but a Japanese recipe titled “Seawheat in Soy and Ginger Sauce” is quite similar; It uses tamari soy sauce and grated gingerroot, and kombu is used in making Seawheat, a clam alternative. A photo on the inside back dust jacket shows Nina and Michael Shandler.

Talk with Michael Shandler in Amherst, Massachusetts. 1992. Jan. 14. He and Nina became vegetarians in 1969. They were first introduced to wheat gluten in about 1970; at that time they were served gluten steaks by a friend, Jayanti Peterson, in Santa Cruz, California. At the time their book was published, they were probably not aware of “seitan.” They did not know of any other books on gluten when they were writing their book—which is why no gluten books are listed in their bibliography. The book sold about 2,000 copies in hardcover and 5,000 to 6,000 in quality paperback; it went out of print 6-7 years ago. They have had many requests for the book since it went out of print. He is an organization development consultant and Nina is a child psychologist. Food is their hobby. Their best-selling book is *The Complete Guide and Cookbook for Raising your Child as a Vegetarian* which has sold over 50,000 copies (Shocken & Ballantine). Address: Amherst, Massachusetts. Phone: 413-549-1671.

5855. Shufu-no-tomo sha. 1980. Wa-yô-ka no tôfu ryôri [Japanese, Western, and Chinese-style tofu cookery]. Tokyo: Shufu-no-tomo-sha: Shufunotomo Bunka No. 568. 84 p. Illust. No index. 19 cm. [Jap]

• **Summary:** Contents: Healthy menu. New discovery of taste. Making tofu recipes more filling by adding some oil. The main character of the diet. Tofu side dish for wines (sake). Contains many recipes.

The entire rear cover contains a color ad for Higashimaru Shoyu (usukuchi), and shows the label in a size that all ingredients are legible. Address: Tokyo, Japan.

5856. Su, Yuan-Chi. 1980. Traditional fermented foods in

Taiwan. In: Proceedings of the Oriental Fermented Foods. Food Industry Research and Development Institute, P.O. Box 246, Hsinchu, (300) Taiwan. iv + 229 p. See p. 15-30. Held 10-14 Dec. 1979 in Taipei, Taiwan. 8 tables. 9 figs.

• **Summary:** Contents: Introduction. Bean sauce: Soy sauce, black bean sauce (*in-yu* [inyu]), *in-si* or *tou-si* (Taiwanese fermented black soybeans / salted fermented soybeans made from the dried mash of black bean sauce). Fermented jam: Tou-chiang (Taiwanese soybean jiang), tou-pan-chiang (made from sprouted broad beans; soy is not used), tien-mien-chiang (made with wheat flour; no soy). Fermented tou-fu: Tou-fu-ju (also named sufu, soybean cheese, or Chinese cheese), chou-tou-fu (also named “fetid bean curd” [stinky tofu]). Anka (also called ang-kak or red koji, made by growing a *Monascus* mold on rice). Discussion. Color photos are given of *in-si* (*tou-si*) and the pehtze of fermented tofu overgrown with *Mucor* mold species.

Flow sheets (without quantities of ingredients) show the basic process used in making each of the following: fermented soy sauce, *in-yu* and *in-si* (*tou-si* [pronounced doushi, fermented black soybeans]), *tou-chiang* (soybean jiang), *tou-pan-chiang*, *tien-mien-chiang*, *tou-fu-ju*, *anka*.

Note 1. This is the earliest English-language document seen (Oct. 2011) that uses the term “Tou-fu-ju” to refer to fermented tofu.

Note 2. This is the earliest English-language document seen (Oct. 2011) that uses the term “fetid bean curd” to refer to stinky tofu.

In 1978 there were 433 soy sauce plants in Taiwan (39 produced a class-A product, and 12 produced class B; most were unclassified) with an annual production capacity of 160,000 kiloliters. This is equivalent to an annual consumption of 9 liters per capita. The 8 largest manufacturers control 45% of the Taiwanese market. 25% of the soy sauce is 100% fermented, 5% is HVP chemical soy sauce, and 70% is a blend of the two. “Originally, whole soybean was used as the protein source. Now it is replaced by defatted soybean [meal], and the whole soybean is used only when high quality soy sauce is desired. The Chinese National Standards (CNS) for soy sauce were established in 1954 and have since been revised several times. On 24 Oct. 1971 the CNS 423 was established. Grade A soy sauce must have the following composition in gm/100 ml: Pure solid matter excluding NaCl > 12, total nitrogen > 1.3, formol nitrogen > 0.56, and pH from 4.5 to 5.3. The corresponding figures for grade B are: Pure solid matter excluding NaCl > 9, total nitrogen > 0.9, formol nitrogen > 0.40, and pH from 4.5 to 5.3.

In-yu or black bean sauce is undoubtedly Taiwan’s the oldest prepared condiment. In-yu is different from soy sauce in that it is produced from black [soy] beans and its flavor becomes stronger as it is cooked. Therefore it is used by many families in frying and cooking meat. Currently, in south Taiwan, the market for in-yu is about 30% that

of soy sauce. Black soybeans are produced in Pingtung, Taiwan. The amount produced is not enough to meet the local demand. Therefore, black soybeans are imported from Thailand for making *in-yu* (fermented black soybean sauce). Table 4 gives the general composition of black soybeans grown in Taiwan.

Figure 2 shows a flow sheet for making *in-yu* or *in-si*. Wash the black beans, soak (for 2-3 hours in summer, 4-5 hours in winter); after soaking, the weight of the black soybeans should have increased by about 80-100%. Then steam the soaked black soybeans at 0.5 to 0.7 kg per square cm for 20 minutes or at atmospheric pressure for 2 hours. When finished, pour them out onto a flat bamboo tray and allow to cool and dry (at 32-33°C in summer, 40-42°C in winter) until they are no longer sticky. Inoculate by mixing in the starter culture [*Aspergillus oryzae* mold spores]. Spread the inoculated soybeans on koji trays to a depth of 1.5 to 2.2 cm and incubate in a koji room at 32-33°C for 5 days to make soybean koji. Optional washing step (see p. 29): Wash the finished koji with water for 2 minutes to remove the spores and mycelium that grew on the surface and thereby to prevent an undesirable moldy odor and bitter taste in the final product; with this step about 3-4% of the total nitrogen is lost but the weight of the koji will have increased by about 50%. Now place the washed soybean koji in bamboo baskets (30 kg capacity) for pre-fermentation (6-8 hours in summer or 16-20 hours in winter). Now mix in salt (adding 30-32 kg of NaCl per 100 kg of black soybeans), then put the salted mixture into a ceramic pot (30 kg capacity for fermentation. Note that no additional water is added). Seal the mouth of the pot using calcium carbonate paste. Allow the fermentation to proceed for 1.5 to 2 months in summer or 2-3 months in winter. The resulting mature *in-yu* mash is ready to be pressed, filtered and pasteurized to make Taiwanese black bean sauce (*in-yu*). Or instead it can be dried to make *in-shi* (*tou-shi*; Taiwanese fermented black soybeans). These dry fermented black soybeans, which are widely used in Taiwanese meals, have the following analytical data: (Table 6): NaCl 12.7%. Acidity 1.2. Formol nitrogen (F.N.) 0.98, Ammoniacal nitrogen (A.N.) 0.36. Total nitrogen (T.N.) 3.22. Ratio of F.N. to T.N. 30.4. Ratio of A.N. to T.N. 11.2. The Chinese national standards define 3 grades of *in-yu* (Table 5).

Production of Taiwanese miso (*tou-chiang*) is currently 11,000 tons. Per capita consumption is decreasing.

Fermented tofu (Tofu-fu-ju) is produced both commercially and domestically. The annual production is about 10,000 tons while weekly consumption is about 12 gm per capita. Address: Dep. of Agricultural Chemistry, National Taiwan Univ., Taipei, Taiwan.

5857. Sung, Ying-sing. 1980. *T'ien Kung K'ai Wu*: Exploitation of the work of nature: Chinese agriculture and technology in the XVII century. Taipei, Taiwan: China

Academy. xii + 488 p. Illust. Index. 22 cm. [Eng]

• **Summary:** The *T'ien Kung K'ai Wu*, by Sung Ying-hsing (pinyin: *Tiangong Kaiwu*, by Song Yingxing) was published in 1637. This English-language translation of the 17th century work on Chinese technology contains 18 chapters, 166 superb illustrations, and extensive information on soybeans. Each chapter was translated by a person specializing in that subject matter.

5858. Tsai, Wei-Chong; Wong, C.M. 1980. Proceedings of the Oriental fermented foods. Food Industry Research and Development Institute, P.O. Box 246, Hsinchu, (300) Taiwan. iv + 229 p. Held 10-14 Dec. 1979 in Taipei, Taiwan. Illust. No index. 26 cm.

• **Summary:** "The symposium was jointly sponsored by ASPAC Food and Fertilizer Technology Center (FFTC), President Enterprises Corporation, and Food Industry Research and Development Institute (FIRDI). The information contained in this book is a blend of theoretical considerations and practical applications on the Oriental food fermentations. In addition to the above, it includes some studies of microbiology and biochemistry relevant to the discipline, which have hardly caught due attention before.

The welcoming address is by Paul C. Ma, director of FIRDI. Opening remarks are given by Carson K.C. Wu (director of the Food and Fertilizer Technology Center), and by Chin-yuan Kao (president of President Enterprises Corporation, who generously paid for the printing of the proceedings, and who notes that Taiwanese consume 9.3 liters of soy sauce per capita). Address: 1. FIRDI; 2. FFTC.

5859. Tsuji, Shizuo; Sutherland, Mary. 1980. Japanese cooking: A simple art. New York and Tokyo: Kodansha International. 518 p. Introduction by M.F.K. Fisher. Illust. (510 line drawings by Yoshito Suzuki. 16 color pages, mostly photos). Index. 27 cm.

• **Summary:** This is a beautiful and informative book by a great Japanese chef, though the awkward English terminology often sounds like "Japlish." The illustrations are very nicely done, but the artist's name does not appear in the book. Tsuji is the author of 29 books on gastronomy, travel, and music. His basic thesis is that "like Japanese and poetry, cooking is simply the result of an acute awareness of the seasons, Freshness and naturalness are the *sine qua non* of Japanese cuisine."

This definitive treatise on Japanese cooking, the most complete and well-thought-out to date, is written by the head of the *Ecole Technique Hoteliere Tsuji*, the technical hotel school in Osaka, Japan. This is the "largest school training professional chefs in Japan," according to the publisher.

The excellent "Ingredients" section (p. 53-100) gives detailed descriptions (with Japanese characters) of: Azuki beans (p. 55). including red rice (*sekihan*) and "sweet red-bean paste" (*an*). Bean curd (*tôfu*, p. 56-61) incl. *momen*

tofu (regular; “The type described here as ‘regular’ is known in Japan as *momen*—‘cotton’ tofu... ‘Cotton’ bean curd is the type most commonly used in Japan”), *kinu-goshi* (silk tofu), *yakidôfu* (lightly broiled or grilled bean curd), *atsu-age* or *nama-age* (thick cakes), *aburage* or *usu-age* (thin deep-fried tofu), *ganmodoki* (mixed tofu), *kôya-dôfu* or *kôri-dôfu* (“freeze-dried bean curd”), *yuba* (“soybean milk ‘skin’” [soybean milk skin]), *okara* (“bean curd pulp or ‘lees’”).

Note 1. This is the earliest English-language document seen (May 2012) that contains the term *atsu-age* or the term *usu-age* or the term “thin deep-fried tofu” (all regardless of hyphenation), all of which refer to types of Japanese of deep-fried tofu.

Miso (p. 76-77) incl. shiro-miso, Shinshû-miso, inaka-miso, Hatchô miso, akadashi miso. Soybeans and edamame. Soy sauce (shôyu, p. 90-93) incl. Natural Japanese soy sauce, synthetic soy sauce, Kikkoman, light soy sauce (*usukuchi shôyu*), tamari (“In Japanese cooking tamari is generally used as a dipping sauce or a base for basting sauce such as Yakitori Sauce”). “Dutch traders in Nagasaki in the seventeenth century exported soy sauce to Europe, and it was the secret seasoning served at the court banquets of Louis XIV of France” (sic). Kuzu (p. 93-94). Wheat gluten (p. 98, 60).

Soy-related recipes include: Making soups (p. 151-56). Miso soup (*Miso-shiru*, p. 156-57). Ginger soy sauce (*Shôga-jôyu*, p. 172). Ponzu sauce (p. 172, with soy sauce and tamari). Mustard-vinegar miso sauce (*Karashi-su-miso*, p. 172-73). Dengaku, dengaku miso toppings, and bean curd dengaku (*Tôfu dengaku*) (p. 190-93). Teriyaki (p. 199-202, 370; the meaning in the United States is now different from the original meaning in Japan. Definition and history, homemade teriyaki sauce, teriyaki yellowtail, chicken teriyaki, steak teriyaki). Egg “tofu” (*Tamago-dôfu*, p. 216). Dressings for aemono (salads, p. 246, incl. white tofu dressing, white miso dressing, red miso dressing). Rice with miso soup and pickles (p. 270-71). Nori-roll sushi (*Nori-maki*, p. 300, with freeze-dried bean curd). Fox noodles (*Kitsune udon*, p. 312). Pickling vegetables (*Tsukemono*, p. 315, 318, with miso). Pureed corn soup (*Tômorokoshi surinagashi-jiru*, p. 347, with miso). Thunder soup (*Kaminari-jiru*, p. 349, with “1 cake *tôfu* (bean curd)” and “2-3 cakes thin deep-fried *tôfu* {*aburage* or *usage*}, cut into julienne strips). Potatoes simmered in miso (*Jaga-imo miso-ni*, p. 393). Radish with white miso sauce (*Furofuki daikon*, p. 394). Chinese cabbage and deep-fried tofu (*Age-dôfu hakusai-ni*, p. 398). Tortoiseshell tofu (*Tôfu bekkô-ni*, p. 398-99). Fried and simmered freeze-dried tofu (*Kôri-dôfu age-ni*, p. 399-400). Gold purses (*Fukuro*, p. 400, with thin deep-fried bean curd). Deep-fried tofu (*Agedashi-dôfu*, p. 412-13). Green beans with sesame-miso dressing (*Sandomame goma-miso ae*, p. 420). Savory okra (cold) (*Okura wasabi-joyu*, p. 420-21). Tangy white salad (*Shirazu-ae*, p. 421-22). “River Bank” oyster stew (*Kaki dote-nabe*,

p. 433-34, with miso). Simmering tofu (*yudôfu*, p. 436-37). Mushroom rice (*Shiitake gohan*, with “1 cake thin deep-fried bean curd (*aburage* or *usage*),” p. 438-39). Soybeans in the pod (*Edamame*, p. 471-72).

Murasaki (p. 287): Japanese love *sushi* so much that they have developed a special aficionado’s vocabulary. “At a *sushi* restaurant, you do not ask for soy sauce as *shôyu*, but, rather, as ‘purple,’ or *murasaki*. Every shop has its own house sauce, made by reducing soy sauce or thicker *tamari* sauce over heat with *saké*, *mirin*, bonito flakes and so on.” Since the resulting sauce is darker than regular soy sauce, the name *murasaki* seems appropriate.

Concerning azuki beans (red beans; characters small + bean) (p. 55): “This small, red bean is the legume you will most frequently encounter in Japanese cooking besides soybeans (*daizu*). It is used in the cooking of many countries, so it is stocked in most supermarkets throughout the United States. For some historical reason this bean is commonly spelled *adzuki*. This spelling is a Victorian romanization; phonetically, *azuki* is correct.

“These beans are steamed with glutinous rice on special occasions to make the festive red rice (*sekihan*; p. 280). They are more commonly boiled with sugar to make sweet red-bean paste (*an*), which forms the base of a large percentage of Japanese sweet confections (see p. 327). *An* is made in two textures: smooth puree (*koshi-an*) and ‘chunky,’ with beans partially crushed (*tsubushi-an*). If there is no time to make *an* from scratch, ready-made *an* is available canned and stocked in most Japanese food stores.”

Note 2. This is the earliest English-language document seen (March 2006) that uses the term “sweet red-bean paste” to refer to sweet azuki bean paste [*azuki-an*], or the term “smooth puree” to refer to *koshi-an*, or the term “chunky” to refer to *tsubushi-an*. Address: Tsuji Professional Culinary Inst., Osaka, Japan.

5860. Yu, Ju-Hyun; Pyun, Yu Ryang. 1980. Korean fermented foods. In: Proceedings of the Oriental Fermented Foods. Food Industry Research and Development Institute, P.O. Box 246, Hsinchu, (300) Taiwan. iv + 229 p. See p. 46-57. Held 10-14 Dec. 1979 in Taipei, Taiwan. 7 tables. 4 figs. • **Summary:** Fermented foods in Korea can be classified into alcoholic beverages, seasonings, kimchies (fermented vegetables), fermented milk (liquid type), and cakes and bread. Traditional Korean fermented foods made with soybeans are all seasonings: Ganjang is soy sauce, doenjang is soybean paste, and gochujang is a red pepper paste containing rice and/or barley and soybeans. Sikcho (vinegar) is the only traditional Korean seasoning that contains no soybeans.

In Korea, production of soy sauce (ganjang) has increased from 93,355 kiloliters (kl) in 1975 to 97,830 kl in 1978. Production of soybean paste (doenjang, Korean miso) has decreased from 67,227 tonnes (metric tons) in 1975

to 51,237 tonnes in 1978. Production of red pepper paste (gochoojang) has increased from 29,000 tonnes in 1975 to 33,525 tonnes in 1978. A detailed description is given of the production process, and nutritional composition of gochoojang. The production of monosodium glutamate by fermentation was begun in 1963 by Miwon Co. and Chiel Sugar Co. Address: Dep. of Food Engineering, Yonsei Univ., Seoul, Korea.

5861. Boykin, Craig; Boykin, Annie. 1980? The drama of the two soyboys. 2 p. Unpublished manuscript. Undated.

• **Summary:** "Narrator: The year—1999. The place: The great American west. Gone are the herds of cattle. With the growing popularity of tofu, the range lands have been planted with soy beans. Gone is the cowboy. But a new breed of man has moved into the big sky country... A strong, independent and often lonely kind of man. Yes, the American soyboy.

"Scene: Two grisly looking range hands sitting at a campfire, tearing with their teeth at the food they have been roasting over the fire on a stick. They are wearing yoga pants and cowboy hats.

"1st soyboy: This range tofu sure is tough.

"2nd soyboy: Damn right, pass the tamari..."

5862. **Product Name:** [Soy sauce, and miso].

Manufacturer's Name: Chinese-run company.

Manufacturer's Address: Quevedo, Ecuador.

Date of Introduction: 1980?

How Stored: Shelf stable.

New Product—Documentation: Letters from Richard Jennings in Ecuador. 1981. Feb. 14 and March 8. There is a Chinese-run soy sauce and miso factory in Quevedo, in the lowlands of Ecuador, where there is a constant warm climate for fermentation. They make a kind of miso, but with some sugar and spices.

5863. INTSOY. 1980? Soybean Foods Research Centre (SFRC), Gannoruwa (Brochure). 3 p. Undated. Publisher not given.

• **Summary:** Contents: Introduction. Home level. Village level. Commercial level: Full fat soya flour, coconut milk substitute, soya cereal extrusion cooked blends, soya milk (beverage), soya oil and meal, soya and cassava extrusion cooked blends, soya-maize extrusion cooked blends, Oriental soya foods (tofu and tempeh), soya sauce. Future plans.

5864. Lea & Perrins. 1980? Light & elegant: superb recipes for chicken, fish & lighter foods. Fair Lawn, New Jersey: Lea & Perrins. 23 p. Undated. Saddle stitched. Illust. (color). 22 cm.

• **Summary:** A booklet of recipes that call for Lea & Perrins' White Wine Worcestershire Sauce. In a cut-out window on the front cover (4½ by 1½ inches) is a color photo of a bottle

of Lea & Perrins White Wine Worcestershire Sauce. On the rear cover, near the bottom, we read: "... from the first family of fine quality sauces, Lea & Perrins, Fair Law, NJ 07410."

Contents: Introduction. Great beginnings. Pastas & salads. Poultry. Seafood. Light meals. On the side. Finishing touches.

Note: Most of the recipes in this booklet call for meat, poultry, fish or seafoods.

5865. **Product Name:** Wheat Meat Burger.

Manufacturer's Name: Sheffield Seitan.

Manufacturer's Address: South Wheelock, Vermont.

Date of Introduction: 1980?

Ingredients: Seitan (wheat gluten cooked in a broth of soy sauce, garlic powder, and cayenne).

Wt/Vol., Packaging, Price: 5 oz.

New Product—Documentation: Talk with Leo Denby, owner of Sheffield Seitan. 1998. Feb. 3. The company's second product, this patty was introduced in about 1980.

5866. **Product Name:** Vi-Zate HVP Hydrolyzed Vegetable Protein Powders.

Manufacturer's Name: Staley (A.E.) Manufacturing Co.

Manufacturer's Address: 2200 E. Eldorado St., Decatur, IL 62525.

Date of Introduction: 1980?

New Product—Documentation: Manufacturer's catalog. 1980. Staley Protein Products. Made by hydrolyzing corn and soy proteins.

5867. **Product Name:** Staley Hydrolyzed Vegetable Protein Sauces (Liquid HVP's) [43 Sauce, 15 Sauce, or Soy Sauce].

Manufacturer's Name: Staley (A.E.) Manufacturing Co.

Manufacturer's Address: 2200 E. Eldorado St., Decatur, IL 62525.

Date of Introduction: 1980?

Ingredients: Soy Sauce: Water, salt, hydrolyzed vegetable protein, corn syrup, caramel coloring.

Wt/Vol., Packaging, Price: 10 and 55 gallons steel drums, or in tank car or tank truck quantities.

How Stored: Shelf stable.

Nutrition: 38% solids, 19% flavor solids, 19.0% salt, 6.9% protein.

New Product—Documentation: Manufacturer's catalog. 1980. Staley Protein Products. Made by hydrolyzing corn and soy proteins.

5868. **Product Name:** Vico SSD (Soy Sauce Dried) Seasoning Powder.

Manufacturer's Name: Vico Products Div., A.E. Staley Manufacturing Co.

Manufacturer's Address: 2536 North Elston Ave., Chicago, IL 60647.

Date of Introduction: 1980?

Ingredients: Dextrin, hydrolyzed vegetable protein, corn syrup solids, salt, caramel coloring.

Wt/Vol., Packaging, Price: 100 lb corrugated cartons fitted with polyethylene bags.

How Stored: Shelf stable.

Nutrition: Moisture 2%, salt (NaCl) 36%, protein 14%, fat 1%.

New Product–Documentation: Manufacturer's catalog. 1980. Staley Protein Products. Composed of soy sauce solids (i.e. hydrolyzed vegetable protein, corn syrup solids, salt, and caramel coloring) on a dextrin base. Food Engineering. 1987. May. p. 163. Vico makes acid-hydrolyzed vegetable protein (HVP) flavorings used in table sauces and in processed and pre-cooked foods. The products are an improvement over previous HVPs because of a drying method developed in Switzerland that uses a PLC-controlled continuous vacuum band dryer. They have a natural "meaty" flavor.

5869. **Product Name:** Vico BF Seasonings (Granules or Powder).

Manufacturer's Name: Vico Products Div., A.E. Staley Manufacturing Co.

Manufacturer's Address: 2536 North Elston Ave., Chicago, IL 60647.

Date of Introduction: 1980?

New Product–Documentation: Manufacturer's catalog. 1980. Staley Protein Products. "Carefully formulated blends of corn, wheat, soy, and yeast protein that have been hydrolyzed to yield a series of intense meat-like flavorings. Designed to replace or supplement extracts of meat, especially beef."

5870. Hansen, Barbara. 1981. Rice leads the flavorful parade of dishes in this Indonesian feast: 'Colonial cooking' a blending of cultures. *Los Angeles Times*. Jan. 15. p. J1.

• **Summary:** The Indonesian *rijsttafel* is a magnificent parade of dishes, featuring rice. When Bob Blansjaar, who was born in Surabaya on the Island of Java, prepares *rijsttafel* for guests, he makes more than 20 dishes—marking it as the real thing.

A standard recipe is *Gado Gado*, a sort of salad topped with peanut sauce. "He also sliced and fried tofu for the salad, using Chinese style hard tofu rather than the softer variety."

Another key dish is Sambal Ketjap (hot sauce); the ingredients include "2½ teaspoons Indonesian sweet soy sauce" [probably ketjap manis]. Ten recipes are given, including Gado Gado and Sambal Ketjap.

Photos show: (1) The *rijsttafel* served in many dishes on a large table. (2) Bob Blansjaar as he chops vegetables in the kitchen. Address: Staff writer.

5871. Root, Waverley. 1981. A cordial bow to the byproducts of the soybean. *Los Angeles Times*. Jan. 15. p. J42.

• **Summary:** This article is indebted to: Simonds, Nina. 1979. "Chinese cuisine: Bean curd." *Gourmet*. Sept. p. 28-29, 84-91.

The soybean, which offers extraordinary versatility as a human food, can be transformed into soybean milk, "the soybean milk skin [yuba] derived from the milk, the bean sticks [dried yuba sticks] made from the milk skin, the also edible sediment given off by the milk [okara], untreated bean curd [regular tofu and perhaps silken tofu], pressed bean curd which produces bean curd noodles [pressed tofu noodles], more tightly compressed bean curd cakes, and frozen-and-thawed bean curd [dried frozen tofu]." Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "frozen-and-thawed bean curd" to refer to dried frozen tofu.

In the process of making "pressed bean curd, another soybean food is created—bean curd skin [*pai yeh*, pressed tofu sheets], which should not be confused with soybean milk skin [yuba]. Dried bean curd skin," which needs no refrigeration and is often stuffed, for example with chopped meat, is sold by weight by Chinese specialty shops throughout the world; five or six sheets weigh one ounce.

"There is a whole family of foods made from fermented bean curd" [fermented tofu]. Bean curd can be fermented in various ways. Bean curd loaves, for example, can be stored for the winter in a cool dark place; micro-organisms from the air cause fermentation. "The loaves acquire a fungoid coating, which has to be scraped off, and as far as I know is not used for food,..." Fermented bean curd, which has been called "soybean cheese," is easier to digest than unfermented bean curd. Bean curd can also be marinated in rice wine, flavored with spices, and then allowed to ferment. A most unusual type of fermented tofu is stinky bean curd (*sh'ou tou fu*), a favorite Chinese snack. In Taipei, there are many street vendors who ply the streets with their portable deep fryers. This fermented tofu is usually deep-fried and usually eaten with one's choice of soy sauce, vinegar, mashed garlic, and chili paste.

Other fermented foods include miso, natto, hamanatto (which is of Korean origin), tempeh (of Indonesian origin), and shoyu (Soybean sauce, soy sauce).

"It is said that the best grades of soy sauce can take as much as six to seven years of aging to reach perfection, and that the making of a superb soy sauce requires 'as much art in its preparation as good French wines.'"

Flavorings are added to some Chinese soy sauce "various herbs, especially citronella; spices (ginger); aromatic vegetables (onions); and not only fermented fish, but even fermented chicken meat. To produce three liters (3.1 quarts) of sauce requires on kilogram (2.2 pounds) of beans.

"Fukien has the reputation of producing the best soy bean sauce in China and consequently stews many foods in it, giving them a color which has caused the culinary techniques of this region to be called 'red cooking.'"

Soybean sauce is “often an important ingredient in many more complicated sauces—for instance Hoisin sauce in China and Worcestershire sauce in England.”

5872. Hoang, Van Chi. 1981. Re: Vietnamese soy sauce. Questions answered on Soyfoods Center letterhead (dated 18 Jan. 1981) and returned to SC. 1 p.

• **Summary:** His family name is Hoang and his given names are Van Chi (he writes in the three characters).

An early Vietnamese writer about soyfoods was Bui Quang Chieu [1905]. He was a man; his family name was Bui and his given names were Quang Chieu. He was a French educated politician and journalist. He wrote in French because he could not write in Vietnamese. “His writing about Tuong is certainly not interesting, although I do not have his article. He certainly repeated something previously written by some French scientist.

“There are two types of tuong. (1) The Tuong Ban, produced in Ban village, is like the Chinese Chiang (pronounced “jiang”) in texture. (2) The Tuong Cu Da, made in Cu Da village, is ground smooth [but not filtered]. That is why I call my product “Tuong Cu Da.” Note: Tuong Cu Da. is a uniquely Vietnamese product is that it is not filtered, but ground. Chinese jiang is not filtered and not ground, so it has a soft, chunky consistency like applesauce.

Ruou dau nanh is called “soy alcohol.” Most liquor in Vietnam is made from sweet [glutinous] rice; it is like Japanese sake. But the Vietnamese *Ruou* is distilled and, as such, is very strong, up to 100 proof. Some people in Central Vietnam make it from a mixture of soybeans and rice.

The jars or containers used to make Tuong in Vietnam have no fixed capacity, but they are usually are 15 to 20 gallons in capacity. They come in two shapes: One is shaped like a vertical cylinder, and the other bulges at the top with a smaller mouth, as used by the Chinese to make jiang. These jars are kept in the courtyard and covered with a conical woven bamboo cap, to keep out the rain while permitting aeration. Address: Bowie, Maryland.

5873. Poole, Shona Crawford. 1981. The Times cook. *Times (London)*. Jan. 22. p. 10.

• **Summary:** A recipe for Stir-fried spring onions calls for “1 tablespoon soy or tamari sauce” and “2 tablespoons peanut oil.” Also mentions “bean sprouts” and “beansprouts.”

Note: This is the earliest document seen (Dec. 2005) in the *Times* (London) that uses the word “tamari” to refer to a type of soy sauce.

5874. Chico-San, Inc. 1981. Chico-San products: A catalog of unique natural foods. P.O. Box 1004, Chico, CA 95927. 28 p. Revised Jan. 1981.

• **Summary:** Contents: A message from the president, J. Robert Kennedy. Chico-San rice products: Rice Cakes (6 varieties; plain, millet, or buckwheat, each salted or

unsalted), Carob Crunch (carob-coated rice cakes in plain or mint flavors), Golden Rice Nuggets, Yinnies candies (Taffy made from rice and barley; Caramel made from rice, barley, oat powder, raisins, almonds, sesame oil, coconut, rice bran, lecithin, natural vanilla, and agar agar).

Yinnies brand Rice Syrup (“A pure, natural sweetener made from rice, water, and barley malt...”). “How Yinnies brand Rice Syrup is made: Chico-San’s process involves the conversion of the natural starches in the rice into complex sugars. Extended low temperature cooking allows the enzymes from the malted grains to create a fermentation which occurs in a liquid mash. After an optimum period of fermentation, the process is halted and liquid squeezed from the mash. This liquid is then vacuum cooked at low temperature, bringing the syrup to the proper consistency.” Yinnies brand rice syrup and refined sugar comparison. This rice syrup is high in maltose.

How Chico-San guarantees Oriental-type organically-grown brown rice (describes in detail how the rice is grown in California). Chico-San whole grains, seeds and beans (Incl. organically-grown brown rice, sweet brown rice, sesame seeds, black soybeans, and azuki beans). Chico-San condiments: Lima soy sauce, soybean puree (miso, in 3 types, mugi, kome, or hacho), barley koji, kuzu, malt vinegar malt vinegar, salt plums, nigari (for tofu making), sesame oil (light or dark), tekka. Chico-San imported seaweeds: Hijiki, kombu, wakame, nori, sea vegetable gelatin (kanten). Herb teas and other products. Chico-San cookbooks. Chico-San special recipes—including recipes for Sesame miso spread, Black soy beans, Azuki beans, and Wakame miso soup. Address: Chico, California.

5875. Eden Foods. 1981. Catalog 1981. 701 Tecumseh Rd., Clinton, MI 49236. 69 p.

• **Summary:** On the cover is a stylized 2-story house (Cliff and Fran Adler’s home) in the snow. This is the earliest catalog seen after the major Eden fire in Nov. 1979. The cover design is by Fran Adler. Prices are given in the catalog. Address: Ann Arbor, Michigan.

5876. Fukushima, Danji. 1981. Re: History of tofu in Japan. Letter to William Shurtleff at Soyfoods Center, Jan. 22—in reply to inquiry. 1 p. Typed, with signature on letterhead. [2 ref]

• **Summary:** Tofu was first introduced into Japan in the 8th century; from that time until about the 12th century it was called “okabe.” Source: Tomomi Kono. 1970. *Encyclopedia Japonica*. Tokyo: Shogakukan. Vol. 13, p. 227. Please see enclosed photocopy.

Fermented tofu originated in China in the 5th century A.D. Source: T. Watanabe, H. Ebine, and T. Ota. 1971. *Daizu Shokuhin*. Tokyo: Korin Shoin. p. 196. Please see enclosed photocopy.

In Japan today, several factories produce 50,000 to

100,000 packages of packaged tofu per day.

By separate mail, Dr. Fukushima is sending a copy of a color slide showing Kibun's Soena. Address: Kikkoman Foods, Inc., Walworth, Wisconsin 53184.

5877. Product Name: Pacific Tempeh Burger (Vacuum Packed).

Manufacturer's Name: Pacific Tempeh.

Manufacturer's Address: 1508 62nd St., Emeryville, CA 94608.

Date of Introduction: 1981. January.

Ingredients: Soy tempeh, water, shoyu, lemon juice, garlic, paprika, thyme, oleic safflower oil.

Wt/Vol., Packaging, Price: 7 oz 2 x 3.5 oz burgers. Vacuum packed.

How Stored: Refrigerated.

New Product–Documentation: Label. Undated. 3.25 inch diameter. Brown and white on orange. "A natural hearty meal." Leviton. 1982. Soyfoods. Winter. p. 27. Sales climbed to 5,000 a week by Nov. 1981. Leaflet. 1982. 8½ by 11 inch. Color. "A what burger? A Pacific Tempeh Burger. A hearty and satisfying cultured soyfood with twice the protein of tofu and more vitamin B-12 than tuna or eggs. Take the taste test."

Talk with Travis Burgeson of Pacific Tempeh. 1983. April. Pacific Tempeh now makes 4,000 to 4,500 lb/week of tempeh, 75-80% of it in the form of tempeh burgers.

5878. Wang, H.L.; Hesseltine, C.W. 1981. Use of microbial cultures: Legume and cereal products. *Food Technology* 35(1):79-83. Jan. [38 ref]

• **Summary:** Contents: Introduction. Use of nontoxin-producing cultures. Safety of fermented foods: Several factors contribute to their safety: Soaking and cooking, salting, acid formation, antibiotic production, alcohol production, low surface moisture, decrease of aflatoxin by *Rhizopus* and *Neurospora*. Shelf life of fermented foods. Nutritive value of fermented foods: Complementary effect of mixed proteins, protein efficiency ratio and digestibility, vitamins. Future of fermented legume-cereal foods.

The following fermented soy-related foods are described briefly, including names, area of origin, organisms used, substrate, and nature and use: Soy sauce (chiang-yu, shoyu, toyo, kanjang, kecap, see-ieu). Miso (chiang, doenjang, soybean paste, tauco). Fermented bean (hamanatto, tou-shih, tao-si). Sufu (fu-ru, fu-ju, tou-fu-ju, bean cake, Chinese cheese). Tempeh (tempe kedele). Natto. Ontjom (onchom). Address: NRRC, Peoria, Illinois.

5879. Product Name: Tofu Steak Sandwich.

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1981. January.

Ingredients: UFO Tofu by Wildwood, whole grain bread, sprouts, lettuce, brine pickles, mustard, tamari, safflower oil, apple cider vinegar, herbs & spices, sea salt.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated.

New Product–Documentation: Xiques. 1981. Pacific Sun. Jan. 16. "A surprised convert to tofu... Wildwood's latest invention, the Tofu Steak Sandwich, is rising on the charts as well. It looks questionable... but it is quite delicious." Phillip. 1981. May. East West Journal. p. 40 "The Amazing Tofumobile." Cohen. 1981. Nov. 23. San Francisco Business Journal. p. 6. "To make tofu steak for tofu steak sandwich, the end cuts of raw tofu blocks are marinated in tamari and baked."

Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on orange-yellow. Silhouette of woods with birds. "Fresh Daily. Ready to Eat Foods. Naturally. Perishable. Keep Refrigerated."

5880. Product Name: Tofunofish Sandwich.

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1981. January.

Ingredients: UFO Tofu by Wildwood, onions, lettuce, scallions, brine pickles, safflower oil, tamari, apple cider vinegar, garlic, kelp, sea salt, spices, whole grain bread.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Xiques. 1981. Pacific Sun. Jan. 16. "A surprised convert to tofu... The Tofunofish Sandwich not only uses tofu for the 'nofish' but features 'tofunoegg' mayonnaise." Phillip. 1981. May. East West Journal. p. 40 "The Amazing Tofumobile." Cohen. 1981. Nov. 23. San Francisco Business Journal. p. 6. "The tofunofish sandwich contains many of the same ingredients as the brown rice and tofu sandwich, minus the brown rice. To give it a tuna fish taste and texture, the sandwich has okara in it."

Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. "Fresh Daily. Ready to eat foods, Naturally. Perishable, keep refrigerated."

Talk with Billy Bramblett, an owner of Wildwood. 1998. Aug. 8. This product definitely contained okara; Billy will ask Paul Orbuch and Doug Porter why okara was not listed on the label. He thinks he has the original recipe in his archive of old Wildwood recipes that are no longer in production. This was an actual sandwich, but Billy thinks that from time to time Wildwood marketed the Tofunofish filling/spread in a plastic tub.

5881. Fabricant, Florence. 1981. A good place to sample

sushi: Dining out. *New York Times*. Feb. 1. p. L117.

• **Summary:** This is a review of the two-star Japanese restaurant Taiko. Recommended dishes include “fried bean curd appetizer.”

“Hot appetizers of deep-fried bean curd, the squares of tofu finished with a crunchy coating and seasoned with a gingery sauce...”

“Rich miso soup with diced bean curd provides a warmly restorative interlude between the main courses, especially on a bitter winter evening.”

Sukiyaki casserole includes “bean curd in a soy-based broth.”

Note that the word “soy” (used by itself, at this late date) refers to soy sauce.

5882. Stop & Shop. 1981. Happy Chinese New Year! (Ad). *Hartford Courant (Connecticut)*. Feb. 1. p. V5.

• **Summary:** “La Choy, 10 ounce bottle—Soy Sauce—69¢... Soy bean cake—Tofu 1 pound package—89¢.” Also includes Azumaya egg noodles, egg roll wrappers, wonton wrappers (each in a 1-lb. package).

5883. Takeda Chemical Industries, Ltd. 1981. Display ad: Report by Mr. Shinbei Konishi, President. *Times (London)*. Feb. 4. p. 20, cols. 1-2.

• **Summary:** Includes a financial summary and a summary of the activities of each of the company’s divisions. In April 1980, the Food Products Division introduced “‘Soft Shoyu Takeda,’ a low-salt soy sauce.” Address: Japan.

5884. Sheraton, Mimi. 1981. Restaurants: Tempura treats, a neighborhood spot. *New York Times*. Feb. 13. p. 58.

• **Summary:** This is a review of Inagiku, a Japanese restaurant inside the Waldorf-Astoria at 111 East 49th St. They serve “soba (cold buckwheat noodles enlivened with soy sauce and scallions),...” and “small dishes such as nimono, a combination of simmered vegetables and bean curd [tofu]...” Also teriyaki fish.

“At one dinner we asked a waiter for natto, a cool side dish of fermented soybeans in a spicy, eggy sauce...”

5885. Sripathomswat, Nongnuch; Thasnakorn, Prayad. 1981. Survey of aflatoxin-producing fungi in certain fermented foods and beverages in Thailand. *Mycopathologia* 73(2):83-88. Feb. 13. [25 ref]

• **Summary:** Aflatoxin-producing fungi (four strains of the genus *Aspergillus*) were found in seven Thai foods and beverages, including soybean sauce [sic, miso] (*taotjo*), soy sauce (shoyu), peanut butter, and fermented rice (*kaomak*). Large amounts of aflatoxin were found on only the latter two products—both of which contain no soy. Address: Dep. of Microbiology, Faculty of Medicine, Siriraj Hospital, Bangkok 7, Thailand.

5886. Jennings, Richard. 1981. Re: Use of soybeans in Ecuador. Letter to William Shurtleff at Soyfoods Center, Feb. 14. 1 p. Typed, with signature on letterhead. [Eng]

• **Summary:** “The most popular use for soya in Ecuador is solvent extracted oil, with the presscake being fed to chickens. As to machica (máchica), this is made with frijol tumbre (black-eyed peas = cowpeas) which are grown in the coastal areas and are somewhat similar in shape and size to soya. Mehica (Méhica) is made in the Sierra, and while the black-eyed peas are used, it is usually made with maize/corn or barley (cebada).

“The other use for soya is at the Chinese-run soy sauce and miso factory in Quevedo, in the lowlands where there is a constant warm climate for fermentation. They make a kind of miso but with some sugar and spices. When I visited the factory, I was not enough in the owner’s confidence to ask about specifics, but I saw tangerine peels being dried, and also tasted anise and maybe cinnamon. The recipe on the jar recommends using their product for cooking pig and turkey. The people there also make an edible soy sauce. Ecuadorian soy sauce is for the most part horrible, consisting of a lot of burnt sugar and very little soy. I would with some confidence rank it as the worst in the world. It is used for *chaulafan*, which is the name here for a fried rice dish, and is preferred because it is thick and dark, and turns the rice a brown color. Anyway the Chinese in Quevedo make this petroleum-like glop, but also make an edible normal soy sauce which I am distributing along with the miso until I can get it together to make a better product.

“There are few Chinese and Japanese making tofu at home, and there is one restaurant that claims to sell about 40 lbs daily, so a friend tells me. No soymilk that I know of.” Address: Casilla 252A, Quito, Ecuador. Phone: 529-679.

5887. Hesseltine, C.W. 1981. Aflatoxins in soyfoods (Interview). *SoyaScan Notes*. Feb. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Concerning the 1969 *Time* magazine article on aflatoxins in homemade miso and soy sauce in Korea—There is a lot of incorrect information in the literature based on a problem with determining aflatoxins, since not all things that fluoresce are aflatoxins. A test for fluorescence needs to be followed by a chemical test. He found that one-third to one-half of all oats sampled in the USA contained fluorescent material that looked like aflatoxin—but was not. The oats were fed to animals and no problems resulted.

A study in Japan showed that when homemade miso was properly inoculated, it contained no aflatoxins, but when inoculated with natural spores, it did contain some aflatoxins. He has never seen any figures on the aflatoxin content of the latter miso. He has seen no evidence to indicate that there are problems with aflatoxins in naturally inoculated homemade misos. Good studies conducted in Japan have found aflatoxins in homemade miso but they were found only in

a few samples and the levels were so low that there was no problem. No aflatoxins have ever been found in commercial misos as far as he knows. In short, he feels there is no risk in consuming any type of miso.

Dr. Hesseltine is now on a low-sodium diet and has therefore started eating a lot of tofu. In addition, he and Dr. Wang are conducting an interesting study on microbial spoilage of tofu. Address: NRRC, Peoria, Illinois.

5888. Hewsom, David. 1981. Tucking into the pot snack market. *Times (London)*. Feb. 24. p. 21, cols. 3-7.

• **Summary:** A ‘pot snack’ seems to refer to a hot snack sold in a small cup [like instant ramen noodles or Cup Noodles]. The article begins: “Most Chinese cookery books would not include the following recipe for chow mein: antioxidants, preservative, yeast extract, inosine monophosphate, fruit acids, spices, colour, emulsifier, flavouring, garlic, sugar, soy sauce, monosodium glutamate, hydrolysed vegetable protein, soya flour, mushroom, salt, mixed peppers, starch, green beans, edible fat, carrot, onion, and noodles.

“The know-how behind the instant snack market is Japanese...” A bar chart shows the growth of Britain’s instant hot snacks market from 1978 to 1981 (estimate). For each year is given the number of units sold and their value in British pounds sterling.

5889. Drake, Milan. 1981. Re: HVP soy sauce. Letter to William Shurtleff at Soyfoods Center, Feb. 26—in reply to inquiry letter dated 21 Dec. 1981. 2 p. Handwritten.

• **Summary:** Where do Hercules and Stange make their soy sauce? (1) Hercules, 79 East State St., Harbor Beach, Michigan 48441. Contact: Art Cronin. He encloses some information about Hercules. (2) Stange makes their soy sauce at Keratene Co., P.O. Box 560, Winsted, Connecticut 06098. Contact: Rudy Krukar.

A.E. Staley makes both soy sauce and HVPs. So do Hercules and Keratene.

Milan believes that fermented soy sauce was used in early Worcestershire—but he is not positive. Address: Director, Research & Development, La Choy Food Products, 901 Stryker Rd., Archbold, Ohio 43502. Phone: 419-445-8015.

5890. Chu, Yung-shung. 1981. Soybean protein food in China. *J. of the American Oil Chemists’ Society* 58(2):96A, 98A, 100A. Feb. Reprinted in APCC Quarterly, 30 June 1981, p. 23-27.

• **Summary:** Contents: Abstract. Methods of preparation: Bean curd (tu fu), bean curd derivatives (tough bean curd, smoked tough bean curd, dried soybean sheets, fried bean curd, vegetable chicken), fermented bean curd (fu ru), dried bean milk cream (fu tsu [dried yuba sticks]).

For 4,000 years soybean have been one of the main crops cultivated in China. The history of extracting protein

to prepare tofu is about 1,000 years old. The soybean was important not only as a food but also as a seasoning. The earliest fermented soybean products were dou-jiang (soybean ch’iang) and dou-chi [fermented black soybeans].

Note: This is the earliest document seen (Nov. 2011) that uses the term “dou-chi” to refer to fermented black soybeans.

The preparation of these two products was recorded briefly in *On Medical Emergency Treatment* written by Si Yu during the Western Han Dynasty (100 B.C.). [Note: This is the *Chi chiu p’ien* by Shih Yu.] Later, these procedures were described in detail in the *People’s Agricultural Calendar* written by Cui-Zi during the Han Dynasty (200 A.D.). Illustrations of techniques appeared in 600 A.D. in special chapters of *The Principal Methodology of Economics*, by Jia Si-Yi.

According to historical literature of the Min [Ming] and Qing [Ch’ing] Dynasties, the preparation of bean curd [tofu] was first recorded in Han Zi, written by Liu An, King of Huai Nan (179-122 B.C.) In the book of Qin-Yi, Tao Gu (907-960 A.D.) said that bean curd was a common food in the market of the south Huai district.

Fu ru is the fermented form of bean curd. The earliest record of this is in the book called *Night Dialogue Under the Shade*, written by Li Ri-huo (1636-1661). He said that fu ru was prepared between summer and autumn in the Qi Men district and briefly described the procedure. In a famous book on Chinese herbal medicine, *Compendium of Materia Medica*, the author, Li Shizen (1518-1593), describes the preparation technique in detail.

Later, these procedures were described in detail in the *People’s Agricultural Calendar* written by Cui-Zi during the Han Dynasty (200 A.D.). Illustrations of techniques appeared in 600 A.D. in special chapters of *The Principal Methodology of Economics*, by Jia Si-Yi. Address: Oil and Fat Research Inst., Shaanxi, China.

5891. Fountain, Michael S. 1981. Marketing real tamari [San-J]. *Soyfoods* 1(4):7. Winter.

• **Summary:** This real tamari, made in the traditional manner without wheat, is brewed by the San-Jirushi Corp. of Kuwana, Japan, the largest and most famous of only a few remaining Japanese brewers of genuine tamari.

5892. **Product Name:** Tofu Spreads [Teriyaki, or Curry].

Manufacturer’s Name: Harvest Wholefoods.

Manufacturer’s Address: 403 Richmond Rd., Grey Lynn, Auckland, New Zealand.

Date of Introduction: 1981. February.

Ingredients: Tofu, tamari, garlic vinegar.

Wt/Vol., Packaging, Price: 200 gm plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Chalmers, Elizabeth. 2007. Jan. 16. “Business history of the Chalmers family: Making soyfoods in New Zealand” (Interview). Letter (e-mail) from

Elizabeth Chalmers. 2007. Jan. 24. Harvest Soyfoods made "Tofu Spread" in two flavors, Teriyaki and Curry. Teriyaki sold best. Ingredients: Tofu, tamari, garlic, vinegar. They were sold in 200 gm small plastic tub, refrigerated. Bean Supreme discontinued them. "We did actually start to make these again when we started the Organic Soy Company, but only for about 6 months, as we could not get a long enough shelf life out of them—only 2 weeks. All our products (except Teriyaki sauce) have always been refrigerated. New Zealand has a population of 4 million in a country the size of the whole United Kingdom. Because of these logistics we are always 'playing to a small audience,'" and need to send our products to all corners of the country. Hence we need to get a shelf life of 6-8 weeks out of all of our products. If we were just to sell locally in Auckland, it would not be enough business to keep us going."

Letter (e-mail) from Elizabeth Chalmers. 2007. Jan. 24. "Now that I really set me mind to it, I think we started making the spreads before we made Tempeh. I would take a guess at early 1981, February, when we were still in the back of Harvest Wholefoods."

5893. **Product Name:** San-J Tamari.

Manufacturer's Name: San-J International, Inc. (Importer). Made in Japan by San-Jirushi Corp.

Manufacturer's Address: 3236 Blvd., Colonial Heights, VA 23834.

Date of Introduction: 1981. February.

Ingredients: Whole soybeans, water, sea salt.

Wt/Vol., Packaging, Price: 5.07 fluid oz (150 ml) dispenser, 20 fluid oz (592 ml) plastic bottle.

How Stored: Shelf stable.

Nutrition: Per 1 tbs.: Calories 11.34, protein 1.84 gm, carbohydrate 1.06 gm, fat 0 gm.

New Product—Documentation: Ad in Natural Foods Merchandiser. 1981. Feb. "Some Soy Sauces are Called Tamari. But They're Not! San-J is the Real Tamari." The first appearance of this influential ad in a trade publication. Ads also in East West Journal. 1982. April. Rear cover. Soya Bluebook. 1983. p. 75.

Label. 1983. 9 by 2 inches and 6.5 by 3.5 inches (20 fl oz and 5.07 fl oz respectively). Paper. Orange, yellow and white on dark brown. Label. 1983. 6.5 by 3.5 inches. Paper. Red and green on yellow. "San-J Tamari is the ultimate soy sauce! It is an entirely natural product made from the finest quality U.S.-grown soybeans. Slow-brewed in the traditional Japanese manner, San-J Tamari is aged a year or more before it is bottled."

Leaflet. 1985. "Seasoned by Experience." Shows the new Labels for tamari, shoyu, and teriyaki seasoning and marinade in full color. When the Sato family founded San-Jirushi in 1804, the traditional recipe for tamari was already over 500 years old. Today, seven generations later, San-J still faithfully follows the same exacting art of natural brewing. Taste the time-honored flavor of San-J wheat-free Tamari, Shoyu, and Teriyaki Sauce and trust the experience of Japan's finest.

"Every year the All Japan Association of Shoyu Brewers holds exhibitions for soy product manufacturers. And each year San-Jirushi is recognized for its superior quality. Although there are nearly 3,000 shoyu manufacturers in Japan, there are less than 20 companies still producing genuine wheat-free Tamari soy sauce... The proud San-Jirushi logo was inspired by the Sato Family's history in shipping. Three horizontal lines represent the three great rivers of Kiso, Ibi, and Nagara, which flow to the nearby Bay of Ise."

Ad in Vegetarian Times. 1988. April. p. 51. "You don't

San-J Tamari is the ultimate soy sauce. It is made entirely from whole soybeans, naturally brewed and aged in wooden casks over four seasons.

Unlike most soy sauce (what the Japanese call shoyu) San-J Tamari contains no wheat. This is the major difference between San-J and shoyu, which in America is often mistakenly called tamari.

San-J is the real tamari, an all-purpose, protein rich gourmet seasoning. It brings out the natural taste of each ingredient in soups, stews, casseroles and salads. San-J Tamari is rich, mellow and more flavorful than any other soy sauce. It belongs in your kitchen as the perfect seasoning and on your table as the perfect condiment.

cook ordinary food. Why use ordinary soy sauce.” Also in East West. June.

5894. *Telefood*. 1981. Sauces: House of Lawrence debuts tempura and tamari lines. Feb. p. 29, 32.

5895. **Product Name:** Tofu-Vegetable Salad.

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 135 Bolinas Road, Fairfax, California 94930. Phone: 415-459-3919.

Date of Introduction: 1981. February.

Ingredients: UFO tofu by Wildwood, any of the following seasonal vegetables: celery, carrots, onions, cabbage or daikon radish, safflower oil, tamari, sea salt and spices.

Wt/Vol., Packaging, Price: 12 oz plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Leviton. 1981. Soyfoods. Winter. p. 61. “Putting tofu in the lunch boxes of America.” Wildwood produces a line of eight packaged vegetarian sandwiches including... *Tofu Vegetable Salad*...

Label sent by Wildwood on their letterhead. 1983. 2.75 by 1.75 inches. Self adhesive. Green and black on white. “Ready to eat Foods, Naturally.” Talk with Paul Duchesne. 1989. Oct. 27. Paul opened the account that starting this product being sold through Diet Centers.

5896. Fukushima, D. 1981. Soy proteins for foods centering around soy sauce and tofu. *J. of the American Oil Chemists' Society* 58(3):346-54. March. [41 ref]

• **Summary:** Contents: Abstract. Introduction. Soy sauce varieties: Koikuchi, usukuchi, tamari, saishikomi, and shiro shoyu. Soy sauce manufacturing process (for each of the 5 types). Miso. Other fermented products: Tempeh and natto. Tofu and related products: Regular and silken tofu, dried-frozen tofu, deep-fried tofu. Fermented tofu (Sufu). Other soy products: Soy milk, fermented soy milk beverages, yuba.

This paper discusses traditional Oriental soy protein foods which are growing rapidly in popularity in the USA among non-Asian-Americans.

“Generally speaking, soy sauce is divided into two groups: fermented soy sauce and chemical soy sauce. Fermented soy sauce has a long history as a human food, whereas chemical soy sauce has a history of only several decades. In fermented soy sauce, the proteins and carbohydrates contained in the materials are hydrolyzed very slowly under mild conditions below 30°C for over six months, whereas in chemical soy sauce they are hydrolyzed quickly by hydrochloric acid at 80°C for 8-10 hours. Chemical hydrolysis is a cheap and rapid process, but during the hydrolysis, various secondary reactions occur and produce undesirable compounds, e.g. dark humins, furfural, dimethyl sulfide, hydrogen sulfide, levulinic acid and formic acid, which are not present in fermented soy sauce. Furfural, dimethyl sulfide and hydrogen sulfide, which have

strong, bad odors in themselves, are derived from pentose, methionine, and sulfur-containing amino acids respectively. Furthermore, tryptophane, one of the nutritionally important amino acids, is destroyed almost completely. As shown in Figure 1 [two chromatograms], the main organic acid of fermented soy sauce is lactic acid, whereas the main organic acid of chemical soy sauce is formic acid. Levulinic acid, present in chemical soy sauce, does not exist naturally.

“To improve the odors of chemical soy sauce, semichemical soy sauce was devised. It is made by hydrolyzing raw soybeans with a lower concentration of hydrochloric acid (7-8%) as the first step, followed by fermenting the hydrolysate with osmophilic yeasts in the presence of wheat koji.” In Japan, chemical soy sauce is not used as a soy sauce in itself, but as an extender for fermented soy sauce.

Table 1 gives the typical chemical composition (per 100 ml) of the five varieties of traditional soy sauce in Japan, including Bé [Baumé; a measure of the relative density of liquids], sodium (koikuchi is lowest at 17.6%, usukuchi is highest at 19.2%), total nitrogen (koikuchi has 1.55 gm, tamari has 2.55 gm or 65% more), formol nitrogen, reducing sugar, alcohol (koikuchi is 2.2%, by far the highest), pH (ranges from 4.6 to 4.8), and color.

A brief description of each of the five traditional varieties: (1) Koikuchi: This “dark-colored” shoyu is by far the most popular of the five types of fermented soy sauce in Japan, comprising 85% of the total. It is an all-purpose seasoning with a strong aroma, complex flavor, and deep, reddish-brown color. These characteristics are mainly derived from the use of equal amounts of wheat and soybeans in the koji; (2) Usukuchi [light-colored] shoyu is characterized by a lighter, red-brownish color and a milder flavor and aroma. It is used mainly for cooking when one wishes to preserve the original flavor and color of the food itself. As in koikuchi, equal amounts of soybeans and wheat are used in the koji, but the fermentation is done under conditions which prevent the development of a dark color. (3) Tamari shoyu has a higher amino acid content, but it lacks aroma. The koji is made primarily from soybeans with little or no wheat. (4) Saishikomi (twice-fermented) shoyu is made using equal amounts of wheat and soybeans in the koji, but using raw (unpasteurized) soy sauce instead of salt solution, which is mixed with the harvested koji. Saishikomi is characterized by aroma and full-bodied taste. (5) Shiro (clear, or “white”) shoyu is made by using a very high ratio of wheat to soybeans in the koji, and further by fermentation under conditions which prevent dark color development. It is characterized by a very light yellow to tan color, though the amino acid content is very low because of the low soybean content in the koji. Flow sheets show the process for manufacturing koikuchi, usukuchi, and tamari shoyu. Each has three basic parts: Koji making process, brine fermentation process, and refining process.

Concerning soy sauce production and consumption: The total annual production of soy sauce in Japan in 1979 reported by the Japanese Agricultural Standard (JAS) was 1,252,431 kiloliters (kl). In 1979 in Japan, about 70% of the soy sauce products in Japan were purely fermented, 25% contained some semichemical soy sauce, and the remaining 5% contained chemical (HVP) soy sauce. The most recent estimates of annual consumption of soy sauce in the USA are as follows: Fermented soy sauce 17,850 kl; Chemical (HVP) soy sauce 25,500 kl. Within fermented soy sauce, production of koikuchi soy sauce is estimated to be 16,500 kl/year.

In Japan an “instant tofu powder” is actually a spray-dried soy milk. This product was made and introduced by *Nihon Tanpaku Kogyo* (Japan Protein Industry) about 15 years ago (ca. 1966) and was used mainly as a raw material for making regular or silken tofu in order to save time. “Recently, however [1973], the product was placed on the market as an instant powdered tofu [named *Hausu Hontôfu*] by Hausu [House] Foods Co.”

A photo shows D. Fukushima. Address: Kikkoman Foods, Inc., Walworth, Wisconsin 53184.

5897. Haytowitz, David B.; Marsh, Anne C.; Matthews, Ruth H. 1981. Content of selected nutrients in raw, cooked, and processed legumes. *Food Technology* 35(3):73-74. March. [11 ref]

• **Summary:** Contents: Introduction. Peanuts and soybean products (soy flours, soy isolates, soy concentrates). Conventionally cooked legumes. Oriental legume products (includes tofu, tempeh, soy sauce, miso, and natto). Address: Consumer Nutrition Center, Human Nutrition, Science and Education Administration, USDA, Hyattsville, Maryland 20782 USA.

5898. **Product Name:** [Soyacreme with Mushrooms].

Foreign Name: Soyacreme Met Paddestoelen, Avec Champignons, Mit Pilze.

Manufacturer's Name: Jonathan P.V.B.A.

Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

Date of Introduction: 1981. March.

Ingredients: Well-water, mushrooms*, vegetables*, soya*, sesame, soya sauce, arrowroot, brown rice*, vegetable extract, sea-salt, sea vegetables, spices. * = Organically grown.

Wt/Vol., Packaging, Price: 100 gm.

New Product–Documentation: Label. Received 1988. 3 by 2 inches. Self adhesive. Brown, orange, and black on a seaside background with sea gull. “Vegetable.” Form filled out by Jos van de Pongseele. 1989. Jan. 11. This product was introduced in March 1981.

5899. *Prevention* (Emmaus, Pennsylvania). 1981. A health food dictionary: Soybeans. March. p. 144-46.

• **Summary:** Soybean foods include soybean oil, tofu, tamari, soy milk, tempeh, miso, soybean sprouts, soy flour, soy ice cream, and soy nuts.

The article ends: “Do yourself a favor. Get to know the soybean.” Address: Emmaus, Pennsylvania.

5900. Shurtleff, William; Aoyagi, Akiko. 1981. The book of miso: Food for mankind. Revised. New York, NY: Ballantine Books. xx + 618 p. March. Illust. by Akiko Aoyagi Shurtleff. Index. 18 cm. [82 ref]

• **Summary:** Contents: What is miso? Preface.

Acknowledgments. Part I. Miso: Savory, High Protein Seasoning. 1. Soybeans, protein and the world food crisis. 2. Miso as a food. 3. The miracle of fermentation. 4. The varieties of miso: Regular Miso: Rice miso (red / aka, light-yellow / shinsu, mellow red / amakuchi akamiso, mellow beige / amakuchi tanshoku, mellow white / shiro koji, sweet red / edo or edo ama-miso, sweet white / Kyoto shiro miso), barley miso (karakuchi mugi, mellow barley / amakuchi mugi), soybean miso / mamé miso (miso-dama, Hatcho miso, soybean miso / mame miso, tamari miso). Special Miso: Finger lickin' miso / Namemiso (Kinzanji miso, moromi miso, hishio, namémiso, natto miso, goto miso), sweet simmered miso / nerimiso. Modern Miso: Akadashi miso, dehydrated or freeze-dried miso, low-salt / high-protein miso.

Part II. Cooking with Miso (400 recipes). 5. Getting started. 6. Recipes from East and West. Part III. The Preparation of Miso. 7. Making miso at home and in communities. 8. Japanese farmhouse miso. 9. Traditional and modern miso production.

Appendixes: A. A history of chiang, soy nuggets [fermented black soybeans], miso, tamari, and shoyu. B. Other East Asian misos: Chiang, jang, tauchou, and tausei. C. The microbiology and chemistry of miso fermentation. D. People and institutions connected with miso. E. Miso additives. F. Miso with seafoods, chicken, and meat. G. Measures, weights, and equivalents. H. So you want to study miso in Japan? Bibliography. Glossary.

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term “soy nuggets” to refer to Fermented black soybeans. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5901. Soycrafters Assoc. of North America; Soyfoods Center. 1981. Estimated soyfoods industry statistics (News release). Sunrise Farm, Heath Rd., Colrain, MA 01340. 1 p. March. Updated in Aug. 1981.

• **Summary:** 1. Number of companies manufacturing tofu, tempeh, miso, soynuts, soy sprouts, soy sauce, secondary soyfoods, soy delis & restaurants, in the USA, Canada, and Latin America. 2. Production statistics for USA and Canada: Raw soybean usage, food production, employees, and retail sales value are given for 4 types of tofu makers (caldron,

steam kettle, pressure cooker, factory), tempeh, soynuts, and soy delis and restaurants. With totals. Actual gathering of statistics was done largely by Soyfoods Center. Address: 1. Richard Leviton, Colrain, Massachusetts; 2. W. Shurtleff, Lafayette, California.

5902. Product Name: Tree of Life Tamari.

Manufacturer's Name: Tree of Life, Inc. (Importer/Distributor). Made in Japan.

Manufacturer's Address: 315 Industrial Dr., P.O. Box 410, St. Augustine, FL 32084. Phone: 904-829-3483.

Date of Introduction: 1981. March.

New Product–Documentation: Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in 1981. Talk with Greg Leonard of Tree of Life. 1988. Oct. 5. This product was introduced on 17 March 1981.

5903. Hansen, Barbara. 1981. A treasury of Chinese cookery: Culture and history. *Los Angeles Times*. April 9. p. J1.

• **Summary:** This is a review of the Hong Kong and China Gas Company's *Chinese Cookbook*, a treasure for anyone who admires Chinese cookery. This large, beautifully designed book is also rich in culture and history.

A recipe for Braised shin of beef with cloud ears and golden noodles calls for "1 tablespoon light soy sauce... 2 teaspoons yellow bean paste."

5904. Product Name: Vegie Yaki (Teriyaki Flavored Vegetarian Jerky) [Mild, or Wild].

Manufacturer's Name: Garden of Eatin'.

Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.

Date of Introduction: 1981. April.

Ingredients: Soy protein, soy oil, water, honey, ginger, garlic, mustard, coriander, sea salt.

Wt/Vol., Packaging, Price: 7/8 oz.

How Stored: Shelf stable.

New Product–Documentation: Labels. 1981, dated. 100% natural. 100% meatless. (And that's no bull!). Article and photo in Soyfoods. 1981. Summer. p. 44-45. "100% Natural. 100 Meatless (And that's No Bull!)." 7/8 oz. packets retail for \$0.59.

5905. Hoefer, Hans Johannes; Lueras, Leonard; Chung, Nedra. 1981. Korea. Hong Kong: Apa Productions. 377 p. Illust. (some color). 23 cm. Series: Insight Guides.

• **Summary:** In the section titled "Korean cuisine" (p. 316-19), soy beans, soy sauce, *twoenjang-guk* (a popular "fermented soybean paste soup"), and soybean curd (*tubu*) are mentioned on p. 317 (right side).

Page 318 (right): "At important celebrations, steamed rice cakes (*ttök*), sometimes embellished with aromatic mugwort leaves or dusted with toasted soy, barley, or millet flour, are presented as tasty ritual food."

Directed by Hans Johannes Hoefer; produced, edited, and designed by Leonard Lueras and Nedra Chung.

Note: The 2nd updated edition (1983) has the same number of pages as the 1st edition (April 1981).

Address: 1-3. Food Research Inst., Aichi prefecture, 2-1 Shinpukuji-cho, Nishi-ku, Nagoya-shi 451, Japan; 4. Tokyo Nogyo Daigaku Jozo Gakka (Tokyo Univ. of Agriculture, Dep. of Brewing), Sakura-oka 1-1-1, Setagaya-ku 156, Tokyo.

5907. Okada, Y.; Yoshii, H.; Takeuchi, T. 1981. Jôzô shokuhin no teishokuen-ka ni kansuru kenkyû. X. Tei-shokuen tamari no hinshitsu ni tsuite [Study on the reduction of salt concentration in fermented foods. X. On the quality of low-salt tamari]. *Nippon Shokuhin Kogyo Gakkaishi (J. of the Japanese Society for Food Science and Technology)* 28(4):208-15. [5 ref. Jap; eng]

Address: 1. Food Research Inst., Aichi prefecture, 2-1 Shinpukuji-cho, Nishi-ku, Nagoya-shi 451, Japan; 2. Tokyo Nogyo Daigaku Jozo Gakka (Tokyo Univ. of Agriculture, Dep. of Brewing), Sakura-oka 1-1-1, Setagaya-ku 156, Tokyo.

5908. Soyfoods Center; Soycrafters Assoc. of North America. 1981. Soyfoods Production in America and the West (News release). Lafayette, California: New-Age Foods Study Center. 1 p. April. Updated in Sept. 1981 in a neater format.

• **Summary:** A table shows production statistics for 25 types of soyfoods. Number of manufacturers in the USA, Canada, Other West, Total; Tons of raw soybeans/year used by each food. Yield of food from 1 unit weight of soybeans. Wholesale value. Retail value. Number of people employed. Address: P.O. Box 234, Lafayette, California 94549.

5909. Product Name: BRT: Brown Rice & Tofu Sandwich (In a Chapati) [Regular, Curry, or Mustard].

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1981. April.

Ingredients: Regular 1983: Brown rice, UFO Tofu by Wildwood, alfalfa sprouts, tahini, barley miso, seasonal vegetables (celery, carrots, zucchini, chard, or parsley), whole grain chapati, lettuce, scallions, tamari, sea salt.

Wt/Vol., Packaging, Price: 11.5 oz.

How Stored: Refrigerated.

New Product–Documentation: Leviton. 1981. Soyfoods. Winter. p. 61. “Putting tofu in the lunch boxes of America.”

Leviton 1983. Soyfoods. Summer. p. 42-43. “Wildwood’s sandwich power.” “Dated for 1 day although they stay fresh for 2. Their Brown Rice & Tofu Sandwich accounts for 30% of sandwich sales.” Labels set by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Mustard: Black and green on orange-yellow. Curry: Orange and green on white. Regular: Black and green on white. Silhouette of woods with birds. “Fresh Daily. Ready to Eat Foods. Naturally. Perishable. Keep refrigerated.”

Labels for all 3 flavors. Sent by Paul Duchesne. 1989. Aug. 11. This set of labels is slightly different from those described above; each has the slogan “Ready to eat foods, naturally.” In the ingredients, the tofu is listed as “Wildwood Tofu” rather than “UFO Tofu by Wildwood.” Talk with Paul Duchesne. 1989. Aug. 17. The term “BRT” probably started to be used in late 1981 or early 1982, while Paul was still with Wildwood. The term “UFO Tofu” was used for all tofu made by Wildwood. It is a palindrome, which reads the same backward or forward.

5910. Hansen, Barbara. 1981. Indonesia in the heart of L.A.: Let’s eat out. *Los Angeles Times*. May 14. p. L33.

• **Summary:** This is a review of the small Indonesian restaurant Dewi (Alpine Plaza, 211 Alpine St No. 4, Los Angeles). It has been open for about four years and is popular with local Indonesians.

Dewi simulates the *rijsttafel* with a combination plate that includes spiced hardcooked egg and “bean curd.”

Dewi sometimes serves *nasi gudeg*, a specialty of Yogyakarta in central Java, that includes “bean curd cubes.”

“*Tahu ketoprak* is a salad of deep-fried bean curd cubes in a sweet peanut sauce.”

If you like the meal, pick up some “sweet Indonesian soy sauce” [probably *ketjap manis*] and coconut milk at Dewi’s grocery.

5911. *Hawaii Herald*. 1981. Honolulu sake: Bending with the winds of change. May 15. p. 6-7.

• **Summary:** A history of the Honolulu Sake Brewery and Ice Co., which was started in about 1908 and is still in business. Originally called the Honolulu Japanese Sake Brewing Co. Ltd., it is said to be the first sake brewery in the Western world. Numerous trials (such as Prohibition and Hawaii’s warm climate) marked its history, but continual innovation led to survival. When World War II started a law prohibiting the use of rice in making sake was enforced. So the company switched to making shoyu. Under the label of Marumasa Soy sauce and later Diamond Shoyu, the locally made products soon became popular in Hawaii. It was another innovation that kept the company alive. Owners include Tajiro, Daizo,

and Shinzaburo Sumida. Photos show the plant in 1912 and the delivery trucks in 1919. Address: Hawaii.

5912. Shurtleff, William. 1981. Analysis of the U.S. and Western world tofu industry. Lafayette, California: Soyfoods Center. 1 p. May 17. Unpublished typescript.

• **Summary:** In this 1-page summary, prepared for Kikkoman Corporation, a table gives the following statistics for the years 1979, 1980, and 1981: Number of tofu manufacturers in the USA (120, 145, 159), Canada (7, 14, 19), other non-Asia, total. Raw soybeans used (tons/year) in USA. Percentage of total raw soybeans used for all soyfoods in the USA. Yield (pounds of tofu made from 1 pound of soybeans) (2.5). Tons of tofu produced in USA (16,250, 20,500, 26,000). Wholesale value (million dollars) (12.0, 17.5, 25.0). Retail value (million dollars) (23.2, 33.9, 48.5). Number of production employees (602, 759, 965).

Notes: The largest food uses of soybeans in the USA in 1981 are: Soy flour and grits (defatted) 52.6% (of all soybeans used), textured soy flour (incl. TVP) 19.7%, soy protein isolates 16.9%, soy protein concentrates 7.7%, soy sauce 1.2%, tofu 0.8%, soymilk and dairylike products 0.6%.

Estimates of regional markets for tofu: Largest market—California. Second largest—East Coast from Massachusetts to Maryland. Third largest—Pacific Northwest. Fourth largest—Northern Midwest (Wisconsin, Michigan, Illinois, Minnesota, Indiana).

Addresses of tofu manufacturers is included. Address: The Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5913. Boynton, Suzanne. 1981. Tofu: It is low cal, low cost, nutritious, and versatile [Larry Needleman, his Tofu Kit and favorite tofu recipes]. *Press Democrat (Santa Rosa, California)*. May 27. p. 1C, 4C. [1 ref]

• **Summary:** A nice introduction to tofu, featuring the work of Larry Needleman, president of Bean Machines Inc. After graduating from Cornell University’s hotel administration school, Larry worked at the swanky Four Seasons. “A few years later he dropped out of the mainstream rat race to become a long-haired hippie in the Mendocino County [California] woods. Now, a shave and a haircut later, he lives in a fancy barn surrounded by virgin redwoods in rural Sebastopol [California].”

Large photos show: Larry Needleman standing in a kitchen, wearing a cook’s apron, holding a bottle of soy sauce. The Learning Tree Tofu Kit, developed by Needleman, inspired by *The Book of Tofu*.

5914. **Product Name:** Seitan (Wheatmeat).

Manufacturer’s Name: Bailey’s Traditional Seitan.

Manufacturer’s Address: Jamaica Plain, Boston, Massachusetts.

Date of Introduction: 1981. May.

Wt/Vol., Packaging, Price: Sold in bulk.

New Product–Documentation: Talk with Carlos Richardson of Gold Mine Natural Food Co. 1992. July 10. The first seitan he tasted was made by Chrys and Bruce Bailey in New England.

Talk with Chrys Bailey at Source Point in Paonia, Colorado (Phone: 303-527-6471). 1992. July 10. She and her husband had a company in Jamaica Plain, Boston, Massachusetts named Bailey's Traditional Seitan. Their only product was seitan, sold in bulk at the Erewhon retail store, Bread & Circus, etc. "Wheatmeal" was written on the label in parentheses after the word "Seitan." She thinks the term was not copyrighted at that time. They ran a catering business at the same time; there they made other products using seitan (such as seitan meatballs [meatless], deep-fried seitan strips with kuzu coating, etc.) but they did not sell these commercially except to the guests being catered. She learned how to make seitan from an article in about 1972, probably published in one of the GOMF magazines. It was rather hard to follow, so she developed her own unique process. It requires many more steps than most other recipes: Make the dough and let it sit for 12-14 hours in refrigerated, cold water. This causes the gluten strands to adhere to one another more firmly, resulting in a much firmer finished product. Wash the gluten and let it sit for another 10-20 hours. Boil in plain water in either balls or loaves, then wash it thoroughly in cold water, cool well, then deep-fry. Wash thoroughly to rinse off the excess oil, then simmer in a broth containing tamari, water, shiitake mushrooms, ginger, garlic, and kombu. After selling their seitan in Boston stores for several years, they moved to Western Massachusetts, then to California, then to Colorado where she now lives. In each state she made seitan and sold it out of her home to people in cooking classes, rather than to stores. She still makes seitan today.

She thinks that either Bill Gleason's wife (Hisako) or Charles Kendall's wife (Yoko) made seitan on a small scale, commercially, in Boston for a short time in about 1980.

5915. *Compas (Le) (France)*. 1981. Le soja et ses dérivés: Miso, tamari, tofou [The soybean and its derivatives: Miso, tamari and tofu]. No. 17. p. 37-54. Spring. Illust. 27 cm. [Fre]

• **Summary:** An in-depth look at each of these three soyfoods, with illustrations from books by Shurtleff & Aoyagi. The section titled "Tofu and its craftsmen" (p. 42-44) profiles Le Bol en Bois, Les 7 Marches, and Jonathan. Photos show Jos van de Pongseele and his wife, plus Lima tofu and seitan in a retail cooler. The section titled "Make tofu—An occupation for the future" (p. 45-49) contains excerpts from the book *Tofu and Soymilk Production*, by Shurtleff & Aoyagi. The section, titled "Making tofu at home" (p. 50-53) contains the basic method, with many illustrations, from *The Book of Tofu*, by Shurtleff and Aoyagi.

The last section, titled "Tofu—Is it yin or yang?" (p. 54) is by Louis Thévenon.

5916. *Compas (Le) (France)*. 1981. Cuisine: Soja d'hier, et d'aujourd'hui [Cookery: The soybean of yesterday and of today]. No. 17. p. 59-63. Spring. [Fre]

• **Summary:** Contains recipes for natto, miso, tofu, and tamari. With illustrations from books by Shurtleff & Aoyagi.

5917. Erewhon Mail Order. 1981. Erewhon. Natural foods mail order catalog. Brookline, Massachusetts. 16 p. May. Catalog and price list.

• **Summary:** This is a new mail order catalog, whose prices become effective on 1 May 1981. On the front cover is a woodblock print of a man with a sickle cutting sheaves of grain in a field. He is wearing a hat, and behind him on the ground is a wooden barrel. Erewhon is now located at 26 Washington St. in Brookline Village—also the home of Erewhon Mail Order. There are retail stores at 342 Newbury St. in Boston and 1731 Massachusetts Ave. in Cambridge. Address: 236 Washington Street, Brookline, Massachusetts 02146. Phone: 617-738-4516.

5918. Hesseltine, C.W. 1981. Future of fermented foods. *Process Biochemistry* 16(3):2-6, 13. April/May. [11 ref]

• **Summary:** Discusses shoyu, miso, natto, and tempeh in Korea, the USA, and Japan. There are nine factors that favor the increased use of fermented foods. Address: NRRC, Peoria, Illinois.

5919. Kikkoman International Inc. 1981. Introducing the Kikkoman soy ceremony (Ad). *Food Processing (Chicago)* 42(5):95. May.

• **Summary:** The top half of the ad contains a photo showing two shoyu tasting dishes on a lacquerware tray, each with a bullseye (target) design on the bottom.

The text begins: "Of all the flavoring ingredients bearing the name soy sauce, Kikkoman stands alone. Go ahead. Match us up with any other soy sauce and you'll easily be able to see, smell and taste the difference."

Below the text is the octagonal Kikkoman logo with the words "Since 1630." And below that the tagline: "Kikkoman. Good taste is good business." Address: P.O. Box 784, San Francisco, California 94101. Phone: (415) 956-7750.

Address: Chicago, Illinois.

5922. Ochi, H.; Blenford, D.E. 1981. The soy sauce explosion. *Food Technology in Australia* 35(5):242, 244. May.

• **Summary:** This is a reprint of an article with the same title first published in August 1980 in *Food Processing Industry* (UK). Address: Nikken Food Co., Tokyo, Japan.

5923. San-Jirushi International, Inc. 1981. This old timer solves some modern processing problems (Ad). *Food Processing (Chicago)* 42(5):126. May.

• **Summary:** "Who would believe a 1200-year-old natural seasoning could prove effective for: (1) enhancing and retaining natural flavors in frozen and canned foods and snacks, and (2) reducing sodium in processed foods without leaving them dull and bland."

"San-J Tamari is brewed from whole soybeans only, in a traditional process that dates from the 7th century.

"By laboratory analysis, San- Tamari contains 30% more organic protein than any popular soy sauce sold in the U.S. This protein, in the form of 18 amino acids, enables San-J Tamari to effectively replace salt as an all-purpose, reduced-sodium seasoning."

A large vertical photo shows a 61 fl. oz. plastic bottle of SanJ Tamari. Address: 3235 Boulevard, Colonial Heights, Virginia 23834. Phone: (804) 520-1513.

5924. **Product Name:** Savory Soysage [Mild, or Spicy Hot].

Manufacturer's Name: Summercorn Foods Inc.

Manufacturer's Address: 401 Watson, Fayetteville, AR 72701. Phone: 501-521-9338164.

Date of Introduction: 1981. May.

Ingredients: Okara (water-extracted organic soybeans), organic whole wheat flour, nutritional yeast, cold pressed safflower oil, sesame meal, soy sauce, unsulphured molasses, spices.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Frozen or refrigerated.

New Product–Documentation: Steve, David and Annee. 1981. Spring. Swallows. Summercorn Soyfoods is now producing tofu, soymilk, and soysage. Label. 1987. 3.25 x 2.75 inches. Self adhesive. Brown and green on beige. "No liquid smoke flavorings or preservatives. New high-protein recipe. Contact us for detailed nutritional information & menu ideas." The company is now named Summercorn Foods.

5925. Wang, Hwa L. 1981. Oriental soybean foods: Simple

techniques produce many varieties. *Food Development* 15(5):29-34. May.

• **Summary:** Methods of preparation are given for the following soyfoods: Tofu, soy sauce, miso, hamanatto, sufu, tempeh, natto. A table gives local names, descriptions, and uses for traditional East-Asian non-fermented soyfoods: "Fresh green soybeans (mao-tou, edamame)," soybean sprouts (huang-tou-ya, daizu no moyashi), soybean milk (tou-chiang), protein-lipid film (tou-fu-pi, yuba), soybean curd (tofu, tou-fu, tubu, tahoo, touhu, taufoo, dou-fu, dan-fu), and soybean flour (tou-fen, kinako). Local names, organisms used, substrate, and description of the product are given for traditional East-Asian fermented soyfoods: soy sauce, miso, hamanatto, sufu, tempeh, and natto.

Note: This is the earliest English-language document seen (Feb. 2004) that uses the word "tafoo" to refer to Chinese-style tofu. Address: NRRC, Peoria, Illinois.

5926. Hale, William C. 1981. Re: Etymology of the terms soy and soya. Letter to William Shurtleff at Soyfoods Center, June 2. 1 p. Typed, with signature on letterhead (photocopy).

• **Summary:** "English borrowed the words *soy* and *soya* from the Dutch around the end of the seventeenth century. The Dutch, as merchants, had direct contact with the Japanese at this time, which is why we borrowed our words from their word *soja*. The Dutch word is probably from Japanese *shōyu*, soy. It is really impossible to tell at this point what is the relationship between Japanese *shōyu* and Chinese (Pekingese, Pinyin transcription) *jiànyóu*. Some of our sources indicate that the compound *shōyu* was formed in Japanese first and that the Chinese formed their own compound (in characters) on the model of the Japanese." Address: Etymologist, G.&C. Merriam Co., 47 Federal Street, Springfield, Massachusetts 01101. Phone: 413-734-3134.

5927. Rothert, Yvonne. 1981. Use of soybean well-known, but here comes tempeh. *Oregonian (The) (Portland, Oregon)*. June 24.

• **Summary:** About Seth Tibbott (a photo shows him carrying a tray of finished tempeh) and Turtle Island Soy Dairy. Tibbott started make tempeh on a home scale in Tennessee in 1977, and commercially in December 1980 in Oregon, in 50- to 60-lb batches. Compared with tofu, says Tibbott, tempeh has a more meatlike texture and flavor that "you can sink your teeth into and chew on." "Tibbott has also begun marketing an herb-seasoned tempeh, flavored with basil and oregano, which is pressed into sausagelike rolls instead of cakes."

Contains recipes "collected from Oregon tempeh lovers" for: Indonesian-style baked tempeh. Sauteed tempeh. Tempeh spaghetti. Tempeh cutlets. Tempeh Reuben. Tempeh teriyaki. Address: Oregonian staff.

5928. **Product Name:** Tempeh Brothers Soyfurters (Marinated Tempeh Sticks Resembling Square Hot Dogs).

Manufacturer's Name: Appropriate Foods, Inc.

Manufacturer's Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1981. June.

Ingredients: Organic soy tempeh, shoyu, herbs, spices.

Wt/Vol., Packaging, Price: 5 oz.

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1982. June 15. 2 by 5 inches. Orange on light grey. Interview with Robert Werz. 1987. Sept. 9. Made by slicing a cake of tempeh lengthwise into 4 sticks and marinating in a soy sauce, seasoned with liquid smoke. Introduced 15 June 1981. Discontinued 30 Dec. 1982.

5929. Earle, Steve. 1981. Pillars of sea salt. *East West Journal*. June. p. 52-58.

Address: San-Jirushi Corp., Japan.

5930. Eden Foods. 1981. Catalog II, 1981. 701 Tecumseh Rd., Clinton, MI 49236. 71 p.

• **Summary:** On the cover is a stylized 2-story house on a farm. Address: Ann Arbor, Michigan.

5931. Sugimoto, Hiroshi; Nishio, M.; Horiuchi, T.; Fukushima, D. 1981. Improvement of organoleptic quality of fermented soybean beverage by additions of propylene glycol alginate and calcium lactate. *J. of Food Processing and Preservation* 5(2):83-93. June. [10 ref]

Address: Central Research Labs., Kikkoman Corp., 399 Noda, Noda-shi, Chiba-ken 278, Japan.

5932. **Product Name:** Soysage (Meatless Okara-based Sausage).

Manufacturer's Name: Redwood Valley Soyfoods Unlimited.

Manufacturer's Address: P.O. Box 371, Redwood Valley, CA 94570.

Date of Introduction: 1981. July.

Ingredients: Okara, wheat germ, whole wheat flour, nutritional yeast, unrefined safflower oil, soymilk, shoyu, natural herbs and spices.

Wt/Vol., Packaging, Price: 1 lb units.

How Stored: Refrigerated.

New Product–Documentation: Label. 1980. 4 by 3.5 inches. Self adhesive. Navy on white. "100% Vegetarian. To use: Remove lid, bake 350°/40 minutes, or form patties or balls and cook. Pizzas too!" Ingredients: Okara, wheat germ, whole wheat flour, nutritional yeast, unrefined safflower oil, Soy Juice, tamari, natural herbs and spices. Label. 1980. 5.5 by 4.5 inches. Paper. Red, black and blue on white. "New! A 100% vegetarian meat substitute. No preservatives or chemical additives. High protein and fiber, low calorie and

fat. No cholesterol." Ingredients on label: Organic okara (soy fiber), toasted wheat germ, Red Star T-6635 nutritional yeast, organic whole wheat flour, safflower oil, well water, tamari, honey, garlic, onion, salt and other natural herbs and spices. Label. 1981. 3 inches square. Self adhesive. Red and blue on white. "New! Just slice, heat and eat!" Ingredients: Organic okara, organic whole wheat flour, toasted wheat germ, nutritional yeast, safflower oil, well water, shoyu tamari, honey, garlic and other natural herbs and spices. Label. 1981. 3.5 by 4 inches. Self adhesive. Red on white. "Pre-baked! Use on pizzas or burgers, fried or baked. Great scrambled with Missing-Egg Salad." Ingredients: Organic soy fines, organic whole wheat flour, peanuts, toasted wheat germ, nutritional yeast, soy oil, filtered water, real tamari, honey, garlic, salt and other natural spices. Leviton 1981. Soyfoods. Summer. p. 42. "Weekly sales are 100 pounds." Spot in Whole Foods. 1982. April. p. 60. "Convenience Soyfoods." Spot in Soyfoods. 1982. Summer. p. 56. "Prepared Tofu Salads and Desserts. Use as you would meat." 16 oz. portions. Spot in Whole Foods. 1983. Nov. "Soysage Repackaged."

5933. Shurtleff, William. 1981. William Morse: The father of soybeans in America (Continued–Part II). *Soyfoods* No. 5. p. 56-60. Summer.

• **Summary:** Continued: "It is truly remarkable that the authors were able to write such a complete and detailed book when neither of them had been to East Asia. (Morse would later spend two years there; 1929-1931.) Most of the book was actually written by Morse who, nevertheless, kindly listed Piper as the senior author. He gathered his information and photographs by extensive correspondence with researchers throughout East Asia and apparently drew heavily on a large collection of books on Chinese agriculture called the Swingle Collection, named after Walter T. Swingle of the Office of Crop Physiology, who spoke Chinese, had traveled extensively in the Orient collecting plants and the books, and had housed them at the USDA library, where Morse did much of his research. Decades ahead of its time, *The Soybean* soon became the standard work on the subject and was referred to by many as 'the soybean bible.' Dr. Piper died in February 1926 at the age of 69.

"Morse's fine work was already starting to give real substance to Piper's dream. In 1920, Morse helped to found the American Soybean Association (ASA) and thereafter helped to unify and direct an ongoing program of research and experimentation. Morse distributed seed from new introductions to anyone interested in soybeans. Among his closest contacts at the State Agricultural Experiment Stations were W.L. Burlison in Illinois and C.B. Williams in North Carolina. As late as 1927, most soybean agronomy research was still done on plots in Washington, D.C. outside the USDA south building. Morse sent out seeds to the states but farmers had problems; they shattered at maturity, were

hard to harvest, and were abrasive on the binder canvas in those days before combines. Thus in the early years the tide of interest in soybeans ebbed and flowed. Doubters were always ready to laugh at anyone who talked of the soybean becoming a major U.S. farm crop. But this only served to spur Morse on to greater efforts. He was a very effective extension worker with many contacts, a deep knowledge of his subject, and good intuition. His desk at the USDA soon became the clearing house for information about the soybean. In 1927 he wrote: 'We may keep this work going and place the soybean where it belongs—in the King row with King Corn and King Cotton.'

"The Dorsett-Morse Expedition to East Asia (1929-1931): In the late 1920s it became evident to the USDA that the soybean had definite promise as a crop in America and it was decided to send W.J. Morse and P.H. Dorsett to East Asia for two years on what was officially known as the Oriental Agricultural Exploration Expedition (but which people interested in soy usually call the Morse Expedition) to 'make investigations regarding the utilization of the soybean in Oriental countries and the securing of varieties that might be of value to widespread American conditions' (Morse, 1929). In 1929 when the expedition left, Morse was age 45 and had worked on soybeans with the USDA for 22 years. Dorsett (1862-1943), now age 67, was a plant explorer from the USDA Office of Plant Introduction; he was described by a fellow agricultural explorer, David Fairchild, as one of the most ingenious and indefatigable workers he had ever known. Whereas Morse was a specialist, interested in soybeans, Dorsett was a generalist, interested mainly in persimmons, but also in grasses, forages, and other plants.

"During the expedition, Morse and Dorsett kept detailed daily journal notebooks, which were typewritten after the trip and bound in 17 hardback volumes. These volumes, primarily the work of Dorsett, also contain correspondence plus thousands of black-and-white photographs taken by both men. In the bound volumes there are several references to a 'special report on the soybean and its products' that Morse intended to write. Apparently he never completed it, although he did complete detailed chapters on tofu and soymilk. The only original copy of the documents described above is in the archives of the American Soybean Association in St. Louis, Missouri. [Note: As of 2011, it is in Rare and Special Collections, at the National Agricultural Library, Beltsville, Maryland].

"The group arrived in Tokyo on March 18, 1929, and set up headquarters. In August they traveled to Hokkaido, the northernmost island of Japan and center of soybean production, where they studied both soybean cultivation and food uses. In December 1929 they returned to Tokyo and spent full time until March 1930 collecting soyfoods and studying their production and use. On April 1, 1930, they arrived in Dairen, Manchuria, to study soybean cultivation and oil extraction. Dorsett left Morse in the summer of

1930 and went to Peking. He did not rejoin Morse on the trip, although he wrote regularly. Morse went to Korea on August 22, to Mukden in Manchuria on September 29, back to Dairen, the oil-processing capital of East Asia, and then to Peking on October 20; Morse apparently spent only 20 days in China on the entire trip. In late December they took a ship from Dairen back to Kyoto and then Tokyo. On February 17, after several more months of soyfoods research in Tokyo, they sailed for America, arriving in San Francisco on March 4, 1931. Morse's collection efforts—months of tramping through the fields of East Asia—were a bonanza. He discovered that almost every village in the Orient had its own distinctive soybean varieties, developed during thousands of years of close cultivation and inbreeding. Unlike their Western counterparts, Chinese farmers didn't think of looking for improved varieties in nearby villages and then growing these in their own village. They loyally grew the varieties that had been handed down by their honorable ancestors, and wouldn't dream of growing a variety handed down by someone else's ancestors. Morse's major accomplishments on the expedition were: (1) he collected approximately 4,600 distinct soybean seed samples representing roughly 2,000 soybean varieties and including 150 large-seeded vegetable type varieties collected mostly in Korea and Japan; all of these were introduced into the U.S. germplasm collection; (2) he realized for the first time the superiority and potential of the vegetable-type soybeans for food use and later played the leading role in propagating them and teaching others of their value; (3) he developed a much better understanding of soybean growing methods and technology; and (4) he collected more than [commercial] 250 food products made from soybeans, which he took back to America, and did by far the most extensive studies on soyfood production of any Westerner up to that time.

"In his journals and letters, Morse wrote more than once that he was 'amazed at the extent to which the soybean was used for food in Japan.' He was intrigued by the techniques for making tofu, miso, shoyu, natto, and other soyfoods, spent many days in small shops with producers, and described their processes in great detail, taking hundreds of pages of typed text with hundreds of photographs.

"The two-year trip was a tremendous adventure for both Morse and Dorsett. Morse later remarked that he considered it the highlight of his career. He was finally able to fully grasp the great potential of the soybean, which he had only been able to glimpse through his years of reading and work in America." Continued. Address: Soyfoods Center, P.O. Box 234, Lafayette, California.

5934. Stunkard, Jamie. 1981. Making soysage. *Soyfoods* No. 5. p. 41. Summer.

• **Summary:** Contains a detailed description, with a bulk recipe, of how Joy of Soy in Minneapolis, Minnesota, makes soysage in 65-70 pound batches. The soysage recipe

developed by The Farm in Summertown, Tennessee, was adopted as a starting point. "Our decision not to use okara was tough. We wanted to use our tofu by-product, yet when we compared its taste and texture with soyage that uses the whole soybeans, okara just didn't make it to the finals.

The major ingredients in the recipe are 5 gallons cooked soybeans (okara is not used), 11 lb 14 oz whole wheat flour, 5 lb rolled barley, 2 lb nutritional yeast, 2¼ lb herb & spice mix, 7 cups shoyu, 6 cups sesame oil, 1 cup vinegar, and 27 cups water.

Joy of Soy has been making soyage for two years. It sells for \$1.18/lb at the rate of about 150 lb/week. It enjoys steady sales, but is not a big seller. Address: Joy of Soy, Minneapolis, Minnesota.

5935. Yokotsuka, Tamotsu. 1981. Recent advances in shoyu research. In: G. Charalambous and G.E. Inglett, eds. 1981. *The Quality of Foods and Beverages: Chemistry and Technology*. Vol. 2. New York: Academic Press. See p. 171-96. Proceedings of a Symposium of the Second International Flavor Conference. Held 20-21 July 1981 at Athens, Greece. [140 ref]

• **Summary:** Contents: Introduction. Manufacture: Treatment of raw materials, koji making, mash making and aging, pressing, refining. Flavor evaluation of koikuchi shoyu. Flavor components of shoyu. Some recent research and technological progress in shoyu manufacturing: Treatment of raw materials, koji molds and koji making, control of mash (temperature of mash, period of mash fermentation, microbes in mash), refining (pressing of mash, pasteurization, color of shoyu). Safety problems regarding koji molds and shoyu. Address: Kikkoman Corp., Noda-shi, Chiba-ken, Japan 278.

5936. Magida, Phylis. 1981. How to eat well and still kiss salt, sugar, and fat goodbye. *Chicago Tribune*. Aug. 10. p. A11.

• **Summary:** Many Chinese, Japanese and Korean dishes consist largely of vegetables. Instead of using meat, many use tofu (soy bean curd) as a protein source, since tofu contains no cholesterol and relatively little fat. When eaten with rice, the protein quality of tofu increases.

To decrease salt intake, use a low-salt soy sauce available from Yamasa soy sauce company. Or you can decrease the amount of salt or soy sauce by increasing the amount of garlic and/or ginger.

5937. Sass, Lorna J. 1981. Soy foods: Versatile, cheap and on the rise. *New York Times*. Aug. 12. p. C1, C6. Widely syndicated.

• **Summary:** The article begins: "Soy foods have come west and, apparently, are here to stay. No longer restricted exclusively to the world of woks and cleavers, soybeans in America are now patted into soyburgers, and tofu (soybean curd) is puréed into soy mayonnaise, baked into 'cheesecake'

and fried as 'cutlets,' while soy milk emerges from the blender as a frothy carob shake or from the freezer as cantaloupe 'ice cream.'

"Because soy foods are an inexpensive source of protein, low in fat and completely cholesterol-free, they have been attracting more and more attention among the growing number of weight-conscious, health-conscious and dollar-conscious Americans. Until recently, soy sauce was the only soy product familiar to most Americans.

Contains a long discussion of David Mintz (owner of Mintz's Buffet, a kosher delicatessen at 1040 Third Avenue at 62nd Street). He makes a tofu ice cream, and a tofu-spinach quiche. "A large Japanese company wants to buy exclusive rights to distribute Mintz's tofutti 'ice cream' in Japan. 'The more dishes I make with tofu, the better my business is,' said Mr. Mintz." He is frequently called upon to cater "tofu weddings."

Also discusses Light Foods in St. Louis (Missouri), and the Rochester Soy Deli (in New York). "Two of the people most responsible for introducing soy foods to Americans are William Shurtleff and his wife, Akiko Aoyagi, who in 1975 wrote 'The Book of Tofu,' a comprehensive cookbook and introduction to the untapped potential of soy foods as an alternate source of protein."

There follow seven recipes featuring tofu and tempeh: Mintz's tofu herb dip. Breaded tofu cutlets (with frozen tofu. Might also be called "Fillet of tofu," plus a note on how to freeze tofu at home). Tofu tartare sauce. Tempeh salad. Carob-tofu-mint pie. Whole wheat pastry crust (with soy milk and soy oil). Lotus Cafe not-dogs (meatless hot dogs).

Next comes a section titled "Learning more about soy: A listing of useful books." For example: "There is no more thorough book on the history and myriad Oriental forms of tofu than the profusely illustrated *"Book of Tofu,"* by William Shurtleff and Akiko Aoyagi (Autumn Press / Random House; 334 pages; \$8.95). First published in 1975, it is credited by most tofu cookbooks as the one that 'spread the light.' The hundreds of recipes, mostly Oriental in style, will fascinate adventurous cooks. Beginners may prefer the condensed, somewhat more Americanized version (Ballantine, 433 pages, \$2.95)."

The long article ends with a helpful sidebar titled "How to buy and store tofu." "A four-ounce piece of tofu (bean curd) sells for about 30 cents..." One main difference "between the tofu sold in health food stores and the Oriental-style tofu sold by many greengrocers is the type of coagulant used. Tofu from health food stores is almost always made with nigari (primarily magnesium chloride and trace mineral elements derived from evaporated seawater), while Oriental tofu makers generally use calcium sulphate."

A photo shows Katherine Iselin with some of the special sandwiches at the Tofu Shop, a fast-food soy deli in Rochester, New York. She is wearing a Soyboy Tofu T-shirt. On the wall behind her is the restaurant menu.

Note: A similar article titled “More budget-conscious Americans are hitting the soy—its not just sauce” in the *Chicago Tribune* (29 Oct. 1981, p. W_A21).

5938. Krieger, Verena. 1981. Gestern Steak, Morgen Tofu: Oder was man mit einer Bohne so alles machen kann [Yesterday steak, tomorrow tofu: Or all the things that can be made with one bean]. *Tages Anzeiger Magazin* No. 34. p. 6-12. Aug. 22. Also translated in English, French, and Italian. [4 ref. Ger; Eng; Ita; Fre]

• **Summary:** A lengthy, pioneering account of the virtues of tofu, and its development in the USA and Switzerland by the Sunday supplement to Switzerland’s biggest daily newspaper. Contains numerous color photos of soyfoods from around the world. Also defines and discusses soymilk, miso, tamari, shoyu, and soy sauce, tempeh, and soy sprouts. Discusses the work of Edgar W. Schweizer (underway by 1977) in attempting to grow soybean varieties suited to Switzerland.

The Geneva restaurant “La Moisson” has had tofu on the menu for 5 years. In Bern, in the beginning of July, the restaurant “Sesam” was acquired by the first Swiss organic food store (*Bioladen*), the “Lotusbluemli” (Little Lotus Blossom). Since Sesam opened, the people of Bern have been able to get to know a rich treasure of dishes from tofu made at Sesam, as well as many applications of miso and shoyu or tamari. The vegetarian restaurant “Bristol” in Lucerne is launching tofu as its summer hit this year, in the form of Tofu Schnitzels and Burgers... In organic food shops, Reform Houses and Oriental specialty shops, miso and soy sauce are available. The following places in Switzerland sell fresh tofu, which they make on the spot: (1) Centre macrobiotique de Lausanne, ruelle de Bourg 7, 1003 Lausanne. (2) S. Gänterli, Vonmattsrr. 50, 6003 Lucern. (3) Le Grain d’Or, rue Voltair 27, 1201 Geneva. (4) De Lade, Oberaltstadt 8, 6300 Zug. (5) S. Lotusbluemli, Gerechtigkeitsgasse 17, 3011 Bern. (6) Madal Bal, Kreuzplatz 10, 8032 Zurich. On the last page of the article is an ad for Soyana in Zurich.

Note: The Italian-language edition of this article is titled “Ieri bistecca, domani il tofu.” It is the earliest Italian-language document seen (Sept. 2011) that mentions tempeh, which it calls “tempeh.” Address: Lucerne, Switzerland.

5939. **Product Name:** Fried Rice Sandwich (With Tofu).

Manufacturer’s Name: Community Kitchens.

Manufacturer’s Address: Maplewood St., Boulder, Colorado.

Date of Introduction: 1981. August.

Ingredients: Organic brown rice fried with scallions and soy sauce, wrapped in a whole wheat tortilla with steamed organic carrots, alfalfa sprouts, miso tahini sauce, tofu, green leaf lettuce.

New Product–Documentation: Talk with Marty Roth.

1989. Aug. 16. Barbara started her own sandwich business in Boulder making a brown rice sandwich with tofu. Talk with Barbara Svenning. 1989. Aug. 21. She went to Boulder by herself in mid-Aug. 1981 and started a business to support herself. Her only product was the Fried Rice Sandwich. She called it Community Kitchens. It was a cover to keep her away from the health inspector. She was pregnant with her son, Ricky, who was born later on 28 April 1982. For the first 3 weeks she made the sandwiches out of Rebecca Woods’ kitchen, then she moved right across the street on Maplewood St. She made and distributed 30-40 sandwiches a day to 3-4 natural food stores in Boulder. She continued until the health inspector shut her down. She bought her tofu in the form of fresh scraps from White Wave. She continued until the health inspector shut her down, then she sold the business to Gloria Gilbert.

5940. Kushi, Aveline. 1981. My favorite tempeh recipes: Cooking with a versatile Indonesian staple. *East West Journal*. Aug. p. 62-65.

• **Summary:** “Tempeh became popular in this country about two years ago. Bill Shurtleff was largely responsible, and I will always be grateful to him for this. Tempeh is not available in Japan, so I did not eat it while I was growing up.

“Tempeh is a very nice *whole* food. It gives great energy, especially to vegetarians, and it is very appealing to someone who is craving animal foods.”

“I’m in my fifties and I stopped menstruating several years ago. The first time I ate tempeh—it was pan-fried with just a brush of oil, and cooked with onions and tamari—my menstruation returned for a time! So I think that tempeh perhaps helps to increase sexual vitality for women and strengthen men’s and women’s sexual organs.” Contains 11 tempeh recipes: Tempeh with arame (a sea vegetable). Kimpura (with burdock and tempeh). Cabbage-roll tempeh. Tempeh with vegetables. Fried rice or noodles and tempeh. Paella without fish. Tempeh in soup. Tempeh macaroni salad. Barley stew with tempeh. Shish-ke-bab. Tempeh with kombu, daikon, and shiitake. A large photo shows Aveline Kushi smiling and cutting carrots. A large ad (p. 65) shows *The Book of Tempeh* by Shurtleff & Aoyagi.

5941. Lenetsky, Mark. 1981. Short course on soyfoods: What they are, how they are used. *Health Foods Business*. Aug. p. 46, 49-50, 52, 53. [2 ref]

• **Summary:** Contents: Introduction. Tofu or “soy cheese.” The many uses of tofu. Makings of miso. Tamari—by any name. Tempting tempeh. ‘High tech’ approach (TVP). Its a joy to cook with soy: Selected recipes from suppliers. Address: Nutritional consultant, Applegate Natural Foods, Tigard, Oregon.

5942. Shurtleff, William; Aoyagi, Akiko. 1981. History of Butler Food Products (Document part). In: William

Shurtleff and A. Aoyagi. 1981. History of Small Seventh-day Adventist Food Companies and Sanitariums. 8 p. See p. 4-6. Unpublished manuscript. [1 ref]

• **Summary:** In operation from 1939 to 1946, this was a private company in Cedar Lake, Michigan. "This creative company was founded in 1939 by Howard O. Butler and run primarily as a family enterprise. Butler got interested in soyfoods from people he knew at Madison Foods in Tennessee. He hired people with prior experience in soyfoods production; Howard Hoover (who made soymilk with Dr. Miller in East Asia) and a Mr. Roose. An initial aim of the business was to offer jobs for Adventist youth to pay their tuition at nearby Cedar Lake Academy, although the business was not formally connected with the Academy. The company's primary product, first produced in 1942, was 'Soya Butter,' actually what we would now call soy margarine; it contained 79% lightly hydrogenated soy oil, soymilk (18% by weight), salt, vitamin A carotene (as a natural coloring), and butter flavor. The melting point was 110°F (43°C). Butler advertised the product as being nonfattening.

"He soon ran into problems with the government concerning his soya butter. In August 1944 the *Soybean Digest* reported that 'H.L. Hoover, manager of the firm, claims that he is the victim of conflicting federal and state regulations, and that he cannot comply with one set of regulations without violating others. Hoover points out that while the Food & Drug Administration prohibits his company from labeling the product oleomargarine without the addition of dairy products to it, the Bureau of Internal Revenue classifies it as oleomargarine for taxing purposes.' Margarine was then defined as vegetable oils churned with dairy milk; Butler used soymilk in place of dairy milk to give a completely vegetarian product. Furthermore, it was claimed by the Bureau of Dairying in Lansing, Michigan, that the product had been illegally colored in imitation of butter, and in several instances had been sold as butter. In August 1944 cases were pending in circuit and U.S. courts, awaiting trial. In May 1945 a federal judge in Cleveland, Ohio ruled that Butler's Soya Butter was not taxable as margarine and should not be labeled as margarine, but shortly thereafter the Ohio Department of Agriculture, in variance with the federal ruling, classified soya butter as colored margarine, which could not be sold legally in Ohio. In June 1945 the American Soybean Association came out in favor of a congressional bill to define soya butter as being distinct from margarine. Finally in December 1945, at which time the company was manufacturing 100,000 units of soya butter a month, a federal judge in Detroit ruled that the product was oleomargarine as defined by the internal revenue code, and therefore subject to back taxes of 10 cents a pound on every pound made to date. The three-year battle and the ruling assessing an estimated \$150,000 in back taxes drove the company out of business in 1946. In about 1950,

while typing out an appeal to the government to reconsider his case, Butler suffered a fatal heart attack. Shortly after his death, the margarine law was changed and the tax (on other companies) removed.

"During the early 1940s, Butler Foods was a thriving operation. In early 1942 they were making a nice line of nine soyfoods including ready to eat Soy-Fruit & Nut Cereal (with figs, dates, and bran), ViM-eat Soy-Nut-Loaf, ViM Soy-Nut Cheese, Soy-Kawfee, Entire Soybean Flour (i.e. full-fat), Entire Soybean Wheat Flour Mix (70:30), Soybeans with Tomato Sauce, ViM-ilk (soymilk) and Soy-Nuts. An attractive brochure, which described the company's products and gave recipes, noted that some of the soybeans were 'grown on Butler's own mineralized farm.' In mid-1942 Soya Butter was added to the line. The company also made bulk soymilk for use in its Soya Butter. In September 1943 Butler Foods ran a full-page ad in the *Soybean Digest* headlined 'New Foods from the Wonder Bean' showing pictures of cans of Butler's Soynut Cheese, Vegeburger, Soya Nut-Loaf, Soya Butter, and Vegetarian Chops. The chops, his most popular meat analog, were a blend of wheat gluten and soy flour, sliced, pre-cooked, then canned in a broth made of soy sauce and other savory seasonings. A September 1945 ad showed that Butler's Meatlike had been added to the line.

"After the government tax ruling of 1946, Cedar Lake Academy leased Butler's property and tried to operate the food business for 2 years, but the plant was too big and the company had now lost its vital income from sales of soya butter. The Academy food business ceased operation in 1949. The supervisor at that time, Vesper Sias, who had worked at Butler Foods since 1942, then left and started his own company, Cedar Lake, in November 1949." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5943. Shurtleff, William; Aoyagi, Akiko. 1981. History of Cedar Lake Foods (Document part). In: William Shurtleff and A. Aoyagi. 1981. History of Small Seventh-day Adventist Food Companies and Sanitariums. 8 p. See p. 6-7. Unpublished manuscript. [1 ref]

• **Summary:** In operation from 1949 to the present, this was a private company in Cedar Lake, Michigan. "In 1949 when the Cedar Lake Academy ceased operating the former Butler Foods, Vesper Sias, a former employee of both companies, purchased the name Cedar Lake Foods and the food manufacturing rights from the Academy. He then started a business in rooms in the back of his home, working on a kitchen scale with his wife, making meatless products similar to those developed by Butler Food Products. The line started with Vegetarian Chops (like a veal cutlet with a savory soy sauce), Vegeburger, Soynut Cheese (whole soaked soybeans and nuts milled together, slurried, then cooked down to form a spreadable or sliceable loaf), Soynut Loaf, and Meatlike. They also made tofu. In 1959 the business expanded into a newly constructed plant, and four workers were kept busy

meeting a growing demand and adding new products such as meatless frankfurters. Sias soon opened a storefront in his plant where all of his products were retailed (*Grand Rapids Press* 1962). In 1968 Cedar Lake bought the production of Sunnysdale Foods of Centralia, Missouri. At the same time, Sias purchased the canning division of Lange Foods. The product Turkettes, Hostess Cuts, Vegebits, Lentil Roast, and Breakfast Links were added to the Cedar Lake line. In 1975, after several months of illness, Sias sold Cedar Lake Foods (which employed 26 people and had \$500,000 yearly sales) to a corporation of five stockholders, who operated the business as Cedar Lake Foods Inc. of Tennessee. In the spring of 1981 the business, after being closed for 6 months, was sold to Country Life Natural Foods, a non-profit corporation and self-supporting Adventist group that made other vegetarian health food items such as nut butters, pastas, and juices, and ran several natural food restaurants. Many of the new company's foods contained soy products. TSF (textured soy flour) and soy sauce were used in the Vegeburger. Defatted soy flour was used in the Soynut Loaf. And soy sauce was the only soyfood used in the Hostess Cuts, Sloppy Joe, Vege-bits, Chops, and Chipettes. Wheat gluten served as the primary ingredient in most of the products. In March 1981 a typical 19-ounce can retailed for \$1.75-\$1.95. The plant continued to be located in Cedar Lake, Michigan, near the original Cedar Lake Academy, founded in 1898." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5944. Shurtleff, William; Aoyagi, Akiko. 1981. History of Millstone Foods (Document part). In: William Shurtleff and A. Aoyagi. 1981. History of Small Seventh-day Adventist Food Companies and Sanitariums. 8 p. See p. 8. Unpublished manuscript. [1 ref]

• **Summary:** In operation from 1977-1985, this was a private company in Penryn, California (near Sacramento). "Founded in 1977 and run by Ken Innocent, who formerly worked in the personnel department at Worthington Foods. Millstone Foods makes canned products that contain soy, including Burger-Like (an imitation ground beef of textured soy flour {TSF} in a rich broth), Dehydrated Vegetarian Stew with TSF, and Tender Cuts (a gluten patty containing a little soy flour). While the products contain no MSG, some contain HVP (hydrolyzed vegetable protein)."

In 1985 the company was sold to Loma Linda Foods in Riverside, California. Basically the same product line continued to be manufactured, with new green and yellow labels. They were still available in July 1990. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

5945. Aiba, Shuichi. 1981. Development of microbial industry in Japan. *Kukem Dergisi (J. of KÜKEM, Turkey)* 4(2):1-6. Special Issue of the Second National Congress of Culture Collections and Industrial Microbiology (KÜKEM).

[Eng]

• **Summary:** Contents: Preface. Brief history of development: Up to 1945, 1946-1960, 1961-1980, 1981. Economic aspects: Vista, antibiotics, amino acids (esp. glutamate), nucleotides, enzymes, miscellaneous (citrate, gluconic acid). Epilog.

The modern fermentation industry, characterized by mechanization and quality control, was motivated and triggered by the appearance of antibiotics. Before 1945, besides the brewing of alcoholic beverages, the Amylo-process and acetone-butanol were the most representative of large-scale fermentations in the pre-war and during the war days. In the former, starchy materials were saccharified aerobically by the use of *Aspergillus oryzae*. The period from 1946 to 1960 was characterized by two major developments: the emergence of the penicillin industry and the production of amino acid (glutamic acid) by fermentation. Bioengineering became sophisticated. During the period 1961-1980 biochemical engineering and computers came to be widely used.

The fermentation industry in Japan is large. In 1974 it produced \$8,404,000,000 worth of products. The largest segments were liquor \$6,300,000,000 (75.0% of the total), antibiotics \$1,183,000,000 (14%), fermented foods \$550,000,000 (6.5%), amino acids \$250,000,000 (3.0%), and other (nucleotides, yeast, ethanol, enzymes, organic acids) \$121,000,000 (1.5%).

The main amino acid is glutamic acid, of which the Ajinomoto Co. has almost 50% of the market. Production peaked at 100,000 tons/year in 1971 and had fallen to 73,000 tons by 1975. The main nucleotides are inosinic acid and guanylic acid. The main enzymes are alpha-amylase (12,000 tons/year), protease (1,500 tons/year), and glucose isomerase (300 tons/year). Miscellaneous includes citrate, lactic acid, and gluconic acid (each organic acids). Genetic manipulation of microorganisms is expected to revolutionize the fermentation industry.

Note: This periodical about microbiology is published twice a year by the Center for Culture Collections of Microorganisms (KUKENS) in Istanbul, Turkey. Address: Prof. Dr. Dep. of Fermentation Technology, Faculty of Engineering, Osaka Univ., Yamada-kami, Suita-shi, Osaka, Japan.

5946. Corn Country Whole Foods, Inc. 1981. Market Street: Natural foods with a difference (Catalog). 132 South Market St., Champaign, IL 61820. 24 p. Index. 28 cm.

• **Summary:** This natural foods, vegetarian catalog is printed on beige paper with black ink. Corn Country is now distributing products made by many other companies. Interesting products: (1) Stoneground flours: Soy flour-full fat (OG = Organically Grown). Chickpea (garbanzo) flour. Our "old fashioned granite stone mills keep the flour at the lowest grind temperature..." Soybeans and chick peas are preheated before grinding. (2) Beans: Soybeans

OG. Azuki beans. Chickpeas (Garbanzos). Lentils (green or red). Mung beans (for sprouting). (3) Peanut butter. Almond butter. Sesame tahini. (4) Sea vegetables (10 types). Westbrae miso (7 types). (5) Light Foods: Tofu. Marinated tofu. "Soyproducts are becoming an increasingly attractive source of protein throughout the world... We offer a small variety of soy products." (6) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Miso (red or white). Tamari (with dispenser to quarts). (7) Market Street meals (vegetarian): Nutburger. Soyburger. Chick 'n sea burger. (8) Nutritional (brewer's) yeast (20 lb to 125 lb): "These yeasts are primary yeasts cultured on molasses for human consumption. They are not a byproduct of petroleum, or paper industries." Sold in powder or flakes. (9) Natural oils: Sesame oil. Safflower oil. (10) Seeds. Alfalfa seed for sprouting. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. (11) Market Street shoyu almonds, suns (sunflower), cashew pieces. (12) Soy & corn "nuts": Soy nuts salted. Soy nuts plain. (13) Market street mixes (unsulfured fruits and natural nuts): Sweet & shoyu mix. (14) Literature: 26 Talking Foods pads. (15) Dr. Bronner's soap (14 types). (16) Kitchen help: Tofu kit. Sprouter lids. Wok set. Address: Champaign, Illinois. Phone: 217-359-8843.

5947. Inkson, Ms.; Mann, E.J. comp. 1981. Thesaurus: Food Science and Technology Abstracts. 2nd ed. Shinfield, Reading, England: IFIS (International Food Information Service). 238 p. No index. 30 cm. First edition, 1977. [Eng] • **Summary:** The Introduction states: "The original IFIS word list, issued in 1970, did not attempt to give more than the barest outline of the relations between the terms encountered. In 1977, therefore, an FSTA Thesaurus was published, in which the basic structuring of the material found in FSTA was set out. The Thesaurus was designed to give maximum compatibility with the EEC Multilingual (English / French / German / Italian) Food Thesaurus, published in 1979 (and itself based largely on the FSTA system for the English version), and to take into account the needs of on-line users."

The terms are divided into headings (main terms or descriptors), which are printed in capital letters, and lead-in terms (non-descriptors) printed in lower case. Additional information is included in square brackets. The following abbreviations show the types of relationship between terms: BT = broader terms. NT = narrower terms. RT = related terms. UF = used for: lead-in term followed by "see" heading (e.g. bean curd see TOFU).

Soy-related terms: Beverages: UF soy milk. Lecithins: BT Emulsifiers, Phospholipids. UF phosphatidylcholine. Legumes: NT Soybeans. Miso: BT Soy Products. natto: see Soy Products. Sauces: NT Soy Sauces. soy flour: see Soy Products. soy milk: see Beverages; Soy Products.

Soy Products: BT Soybeans, Vegetable Products, Fermented Products. NT Miso, Soy Proteins, Soy Sauces, Soybean Oils. UF natto, nyufu, soy flour, soy milk, sufu,

tempeh, tofu, tsukudani, vital.

Soy Proteins: BT Protein Products, Soy Products, Proteins Vegetable. RT Textured Vegetable Proteins. UF okara protein, Promine [Central Soya Co.], Supro 620, yuba.

Soy Sauces: BT Fermented Products, Sauces, Soy Products. UF moromi, shoyu.

Soybean Oils: BT Oils Vegetable, Soy Products. Soybeans (*Glycine max*): BT Legumes, Oilseeds. NT Soy Products.

Note: This is the earliest document seen (Sept. 2003) that is a thesaurus containing terms related to soybeans and soy products. Address: IFIS (International Food Information Service), Lane End House, Shinfield, Reading RG2 9BB, England.

5948. **Product Name:** Living Lightly Tofu Ravioli.

Manufacturer's Name: Pacific Trading Co.

Manufacturer's Address: San Francisco, CA 94110.

Date of Introduction: 1981. September.

Ingredients: Pasta: Whole wheat flour, soy oil. Filling: Soybeans, spinach, toasted wheat germ, nutritional yeast, whole wheat flour, safflower oil, water, tofu, shoyu soy sauce, honey, garlic, onion, salt, herbs, spices.

Wt/Vol., Packaging, Price: 6 and 14 oz.

How Stored: Frozen.

New Product–Documentation: Price List & Catalog. 1981.

Sept. 14 oz. Spot in Soyfoods. 1982. Winter. p. 57. 14 oz.

"Tofu with Pastabilities. No preservatives. No additives."

Label. 1982. 3 by 4 inches. Self adhesive. Red and green on white. This is the world's earliest known tofu ravioli.

5949. Shurtleff, William; Aoyagi, Akiko. 1981. What is real tamari? *East West Journal*. Sept. p. 16, 18-19.

• **Summary:** A guide to natural soy sauces. Explains why George Ohsawa coined the misnomer "tamari" in about 1960 for Lima Foods in Belgium to refer to natural shoyu. Contains a recipe for using 20 lb of soybeans to make real tamari at home. Address: Soyfoods Center, Lafayette, California.

5950. **Product Name:** Tempeh Burgers (Non-fried: Vacuum Packed).

Manufacturer's Name: Soyfoods Unlimited, Inc.

Manufacturer's Address: 14670 Doolittle Dr., San Leandro, CA 94577.

Date of Introduction: 1981. September.

Ingredients: Soy tempeh (made with soybeans organically grown in accordance with section 26569.11 of the California Health and Safety Code), natural soy sauce, herbs, spices.

Wt/Vol., Packaging, Price: 6 oz (170 gm). Vacuum packed in poly pouch.

How Stored: Frozen or refrigerated.

Nutrition: Per 3 oz.: Calories 190, protein 9 gm, carbohydrates 6 gm, fat 3 gm, sodium 466 mg.

New Product–Documentation: Label. Undated. Blue and red on white, with rainbow border. “No oil. Tasty. To serve: Brown in oiled pan or steam for 5 minutes.” Ads in *Vegetarian Times* and *East West Journal*. 1982. Oct. “All the Sizzle... None of the Steak.” Also in *New Age*. 1982. Dec. Inside rear cover; Spot in *Soyfoods*. 1984. Summer. p. 43. “America’s first tempeh burgers were developed by Pacific Tempeh and Soyfoods Unlimited.” Shurtleff & Aoyagi. 1985. History of Tempeh. p. 53. America’s first non-fried tempeh burger, sold vacuum packaged.

5951. *Sunset (Menlo Park, California)*. 1981. It’s tofu, breaded and fried. 167:160-61. Sept.

• **Summary:** “Fried fish? No, it’s low-cal tofu, fried crispy, served with a choice of [three] sauces.” Teriyaki sauce, cocktail sauce, or caper sauce. The breading is done with Japanese panko. Tofu is described as coming in “blocks.” A recipe and photo of it are given.

5952. **Product Name:** Westbrae Natural Johsen Shoyu Tamari.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1981. September.

Ingredients: Wheat, whole soybeans, salt.

Wt/Vol., Packaging, Price: 12.7 fluid oz glass bottle.

How Stored: Shelf stable.

New Product–Documentation: Ad in *East West Journal*. 1981. Sept. Inside rear cover. “Soy sauce made complicated. Why it takes 18 months to brew Westbrae tamari.”

Ad in *Macromuse*. 1986. Summer. p. 5. “Westbrae’s Johsen Shoyu is the *real* shoyu.”

“Recently, some big Japanese companies that have never brewed soy sauce before have begun to sell in the Natural Food Markets. You may be able to buy some soy sauces for less per tin than Westbrae’s Johsen shoyu.” At Johsen, shoyu is aged for 2 full summers in Japanese cedar kegs.

Photos show: (1) Westbrae tamari and shoyu. (2) Various Westbrae soy sauce products.

5953. *New York Times*. 1981. Kikkoman soy sauce even on catfish? Concern sees many uses. Oct. 10. p. 33.

• **Summary:** Kikkoman is now the No. 1 brand of soy sauce in the United States (with about 40-45% of the U.S. market), ahead of its two main domestic rivals, La Choy (a product of Beatrice Foods) and Chun King (made by the Reynolds Tobacco Co.).

Before Kikkoman arrived in the U.S. market in about 1956, soy sauce was sold primarily as a seasoning for Oriental foods. But since that time, Japan’s largest and best-known maker of soy sauce “has marketed its tart, sweet and salty sauce as all-purpose and all American.”

The result has been truly remarkable. With patience and care, Kikkoman has steadily increased its market share. “Sales in this country have grown an average of 15 to 20 percent a year for the past five years, reaching \$27 million of the \$100 million market in the fiscal year ended March 1981.”

In 1956, when Kikkoman first began to advertise seriously here, the soy sauce market in America amounted to only about \$1 million a year. On 21 Jan. 1972 Kikkoman held the groundbreaking ceremony for its new plant in Walworth, Wisconsin; that year “the annual per capita consumption of soy sauce in the United States was one tablespoon or less.” In Japan today, annual per capita consumption of soy sauce is 340 ounces a year—compared with 5 ounces in the USA—according to Malcolm W. Pennington, a director of Kikkoman’s American production

subsidiary.

Kikkoman introduced a type of soy sauce that was new to most Americans; it was naturally fermented from soybeans and wheat. "Many so-called soy sauce products [such as La Choy and Chun King] are chemically manufactured sauces that use an amino acid base and artificial flavorings."

5954. Shurtleff, William; Aoyagi, Akiko. 1981. History of major U.S. soya research centers. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 24 p. Oct. 12. Unpublished typescript.

• **Summary:** A comprehensive history of the subject.

Contents: Introduction. University of Illinois and INTSOY: Home Economics Department's work (in the 1930's, 1940-1961, and 1974-1981), Food Science Department (1955-1981), International Soybean Program (INTSOY) founded July 1973, large number of talented faculty made the Univ. of Illinois one of the world's top soy research centers. Iowa State University. Cornell University: First work with soy 1883, first soyfoods work in 1927 (soymilk thesis by Y.T. Chiu), one of leading centers of U.S. soyfoods research during World War II (see chapter on Clive and Jeanette McCay), rebirth of interest in soyfoods in late 1950's, 1960 paper on tempeh, soymilk work 1963-1980, other soyfoods studied, arrival of Dr. Van Veen in 1962 (had studied tempeh since 1932, had lived in Indonesia, and had a lifelong interest in tempeh), renewed program of soybean development and production initiated in New York state in 1964. USDA Northern Regional Research Center (NRRC): Originated with 1929 USDA soybean lab in Ohio, 1936 soybean lab in Urbana, IL, transferred to Peoria, IL, 1942, expanded research on food uses of soybeans and soy oil, fermentation division headed by Langlykke, work on soy sauce, life of Dr. A.K. Smith, at NRRC from 1942-1964, arrival of Drs. Watanabe and Shibasaki, Smith one of first American researchers to realize the potential of tofu, work with miso, 1960 arrival of respected Indonesian microbiologist Ko Swan Djien, work on tempeh, NRRC hosted 2 of first major conferences on soy protein foods in 1961 and 1966, sponsorship of overseas contract work, expansion of research in 1960's, soy flour extrusion, Rackis' work with oligosaccharides (flatulence-causing factor in soybeans), life of Dr. C.W. Hesseltine, 1962 arrival of Dr. H.L. Wang at fermentation lab, Mustakas' studies on soymilk, NRRC's interest in soyfoods steadily growing, legitimizes soyfoods to people in U.S. and around the world. INTSOY: Founding, 5 basic objectives, main accomplishments with soybeans, main accomplishments with soyfoods. Address: Lafayette, California. Phone: 415-283-2991.

5955. Hall, Lynn. 1981. Ed Neel: A genius in designing. *Archbold Buckeye (Archbold, Ohio)*. Oct. 21.

• **Summary:** Ed Neel has been with La Choy Food Products for 58 years—since 1923. That year he arrived in Detroit,

having bummed around the country, been a sailor, and done odd jobs. Seven men had recently purchased a business that produced and sold bean sprouts to produce stores throughout Detroit. The sprouts were grown in typical galvanized washtubs. The new owners rented a building on Schoolcraft Road and opened shop. In 1942 La Choy closed shop in Detroit [Michigan]. World War II was under way and Chinese food was not essential to the war effort. Neel and six others moved the business to Archbold, Ohio and started canning tomatoes. A photo shows Ed Neel at his drawing board. Address: Buckeye Staff Writer.

5956. Sass, Lorna J. 1981. More budget-conscious Americans are hitting the soy—its not just sauce. *Chicago Tribune*. Oct. 29. p. N_B19.

• **Summary:** This article first appeared as: Sass, Lorna J. 1981. "Soy foods: Versatile, cheap and on the rise." *New York Times*. Aug. 12. p. C1, C6.

5957. Aidoo, K.E.; Hendry, R.; Wood, B.J.B. 1981. Amyloglucosidase and maltase activities in soy sauce fermentations. *J. of Food Technology* 16(5):543-48. Oct. [22 ref]

• **Summary:** "Despite the problems associated with distinguishing between two enzyme activities in a complex mixture, it seems clear that both are present and that maltase increases in concentration throughout the fermentation whereas amyloglucosidase concentrations declined in fermentations conducted for more than 64 hr." Address: 1. Present address: Dep. of Biological Sciences, Univ. of Science & Technology, Kumasi, Ghana; 2. Dep. of Chemical & Process Engineering; 3. Dep. of Applied Microbiology, Univ. of Strathclyde, Royal College Building, George St., Glasgow G1 1XW, Scotland.

5958. Impoolsup, Attawut; Bhumiratana, Amaret; Flegel, Timothy W. 1981. Isolation of alkaline and neutral proteases from *Aspergillus flavus* var. *columnaris*, a soy sauce koji mold. *Applied and Environmental Microbiology* 42(4):619-28. Oct. [27 ref]

• **Summary:** This variety of *Aspergillus* mold was found to produce two major proteases, one alkaline and one neutral; both appeared in the late phase of fungal growth. These results lead to a recommendation that koji (soybeans covered with mold growth) be transferred to the salt brine in 2 days rather than the traditional 4 to 7 days. This more than doubles the amount of koji that can be produced per unit of time. Address: Dep. of Microbiology, Faculty of Science, Mahidol Univ., Rama VI Road, Bangkok 4, Thailand.

5959. Lima N.V. 1981. Lima natural foods pricelist. Lima Foods, Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium. 12 p. Catalog. 30 cm. [Eng]

• **Summary:** Lima has been making organic, unrefined

foods, without additives, for 20 years. Organic quality is guaranteed. Contents: Whole cereal grains. Stone-ground whole flours (incl. soya flour, 500 gm). Whole pulses (incl. soya, and azuki, each 500 gm). Coffee substitutes (incl. Yannoh with azuki, Dandelio [dandelion root], roasted barley, and chicory). Lima specialties (incl. Kokoh with azuki flour, Seitanpast [Vegetable spread with seitan]). Oriental specialties: Tamari-shoyu (from soya and wheat), Tamari, Hatcho miso, Barley miso, rice miso, instant miso soup (with dried vegetables), Kozou (kuzu), Mebosi (umeboshi), Tekka (natural seasoning with miso). Seaweeds. Unrefined oils. Sea salt. Vegetable protein products: Seitan (vegetable protein concentrate, 150 gm jar), Seitan goulash (seitan with vegetables), Soya filtrate (soyamilk), Tofu (curdled soya filtrate). Concentrated soups (incl. azuki soup). Books (incl. 2 cookbooks by Anette Gevaert). Address: Lima Foods, Edgar Gevaertdreef 10, Sint-Martens-Latem 9830, Belgium.

5960. Miller, Roger W. 1981. The case for moderating sodium consumption. *FDA Consumer*. Oct. p. 9-13. Reprinted in Sourcebook on Food and Nutrition, 3rd ed. 1982. p. 140-43.

5961. Soy Plant (The). 1981. An all-soy deli: Tofu, miso, soymilk, tamari, tempeh (Ad). *Ann Arbor Calendar (Michigan)*. Oct. p. 21.

• **Summary:** At the top of this small ad (2½ by 1.75 inches) is the collective's logo. At the bottom: "Present this ad for a 10% discount on listed items through 10/31/81. Limit one per customer." Address: 211 East Ann St., Ann Arbor, Michigan 48104. Phone: 663-0500.

5962. Gevaert, Pierre. 1981. Re: Pioneering production of miso and soy sauce in Europe. Letter to William Shurtleff at Soyfoods Center, Nov. 19—in reply to inquiry. 1 p.

• **Summary:** Lima Foods first began commercial production of miso and soy sauce in 1959. They stopped in 1966 and began again in early 1981 (3-1-81) at Lima Andiran in France. They also plan to make shoyu there in early 1982. They were the first company in Europe that they know of to make these two products. They now make 1,200 kg/month of barley miso and 800 liters/month of shoyu. All ingredients are organically grown. Address: Lima Foods, Edgar Gevaertdreef 10, Sint-Martens-Latem 9830, Belgium. Phone: 09-52-4176.

5963. Spencer, Colin. 1981. Slip out of the gastronomic strait jacket with a large leek. *Guardian (England)*. Nov. 20. p. 12.

• **Summary:** There are now more brands of naturally fermented soy sauce on the market. "Apart from those called shoyu or tamari, there is a Japanese brand called Kikkoman. All of these make excellent sauces."

A recipe for Cauliflower pie calls for "2 tablespoons

natural fermented soy sauce."

5964. Ching, Frank. 1981. Chinese ask help from La Choy to can fruits, vegetables: Another Beatrice Foods unit, Tropicana, will provide orange juice know-how. *Wall Street Journal*. Nov. 23. p. 31.

• **Summary:** Beatrice Foods Co. of Chicago, Illinois, has formed a joint venture with the Canton municipal government to produce canned fruits and vegetables, plus citrus juices and soft drinks, for both Chinese and export markets. Beatrice owns La Choy, the largest U.S. processor of Oriental foods.

5965. **Product Name:** Seitan.

Manufacturer's Name: Grain Country.

Manufacturer's Address: 3448 30th St., San Diego, California 92104. Phone: 52-667-61005.

Date of Introduction: 1981. November.

How Stored: Refrigerated.

New Product—Documentation: Talk with Ygnacio Beamonte at the East West Center in Ensenada, Baja California, Mexico. 1992. July 13. Ygnacio's brother, Arturo, started making seitan at the East West Center in Ensenada in about 1984. Then he moved to Oregon, then in about 1986-87 moved to the East West Center in San Diego, where he took over as seitan maker from David Jackson (who now lives in Arizona). The East West Center in San Diego no longer exists. The East West Center in San Diego was born out of Roy Steevensz' East West Center in Los Angeles. Ygnacio thinks that initially David Jackson bought his seitan from Roy Steevensz in Los Angeles, then David started making his own seitan at the East West Center in San Diego. Jim Brefield also made seitan to help David.

Talk with David Jackson of Arizona. 1993. Dec. 8. He learned how to make seitan from Roy Steevensz in Los Angeles in about 1978-79. On 2 Oct. 1981 David opened Grain Country in San Diego. He started making seitan there for Thanksgiving, in either Nov. 1981 or Nov. 1982. Soon up to 100 people were coming for Thanksgiving dinners. Soon it was sold at the Grain Country natural- and macrobiotic foods retail store. David was the first seitan maker, then he trained other people to make it—probably starting with Jim Brefield, who was one of David's assistants, who became the next seitan maker. Ygnacio Beamonte did make some seitan with Jim but he never really stayed in San Diego. In 1989 David sold the Grain Country complex in San Diego to a man named Ira Green. He continued to make seitan until he went bankrupt in 1991.

5966. Suzuki, Tsuguyoshi; Okazaki, M.; Kashiwazaki, H.; Moriyama, M.; Takemoto, T-I. 1981. Changing food consumption of Japanese immigrants in the lowland of Bolivia. *Ecology of Food and Nutrition* 11(2):103-16. Nov. [13 ref. Eng]

• **Summary:** During a 3-day period in July and August 1975, dietary records of 34 households of Japanese immigrants in the lowlands of Bolivia were analyzed for the amounts and types of food consumed. The colony of Japanese immigrants, *Colonia San Juan de Yapacaní*, was established in 1955 on the basis of a governmental agreement between Bolivia and Japan. From 1955 until 1974 a total of 297 households, including 1,649 individuals, immigrated into the colony; the majority came during the first ten years. Among the items consumed were soybean products (not including soy sauce; consumed by 79.4% of the households), *tsukudani* (small fish cooked in soy sauce), wakame, nori, and kombu (3 sea vegetables), *furikake* (a seasoning containing nori), and azuki beans. "Among legumes, soybeans occupied the top position even after excluding the consumption of soybean sauce. The usual preparation was miso (soybean paste fermented and salted) and tofu (soybean curd), raw or fried, which the colonists could buy from a tofu shop in the colony."

Adzuki beans were boiled with glutinous rice and served at celebrations. "Immigrants procured the seed from Japan or Brazil and cultivated the beans." Also served was *kintsuba* (a sweet adzuki bean cake). One of the most widely used seasonings was soybean sauce, used in 85.3% of the households. Address: 1. Dep. of Human Ecology, School of Health Sciences, The Univ. of Tokyo, Tokyo, Japan.

5967. Drake, Milan. 1981. Brief history of La Choy Foods (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 2. 1 p. transcript. Followed by a letter.

• **Summary:** La Choy now sells two soy sauces: HVP and fermented. They purchased the fermented from Oriental Show-You Co. 15-20 years ago [i.e., about 1961-66]. He will try to get more exact information if Shurtleff will send him a list of questions.

Esta Keirn (phone 219-248-8742, of Columbia City, Indiana) travels a lot. He was with Oriental Show-You. He trained La Choy's present soy sauce man.

Milan does not know when La Choy first began marketing soy sauce. Show him a copy of 1947 bottle. Dale Pape (operations manager) or Ed Neel (who has been with the company for 55 years) would know. Ed, who is about 80, will answer my questions. One of the original namers of the company when they were in Detroit, Michigan, he is now a consultant and builds new equipment.

La Choy (two words) is the correct spelling.

Beatrice bought La Choy in 1943. Charles Smith bought out Ilhan New, the Smith was killed by lightning. Address: Director, Research and Development, La Choy.

5968. Keirn, Esta. 1981. History of Oriental Show-You Company in Columbia City, Indiana (Interview). *SoyaScan Notes*. Dec. 5. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** The Oriental Show-You Company began

production of Japanese-style fermented soy sauce (shoyu) in Columbia City, Indiana, in 1924. The company had been started in 1918 in Detroit, Michigan, by Shinzo Ohki, a Japanese man, who began by importing shoyu and tea from Japan. In 1922 Mr. Ohki went to Japan to learn the method for making shoyu, then late that year he moved his business to Columbia City and by 1924 was making shoyu, along with mung bean sprouts. Chow Mein noodles, Chop Suey, and Jigg's Corn Beef and Cabbage. The company was quite small, making about 12,000 gallons of shoyu a year; this was sold mostly in the Midwest, and only east of the Mississippi River. In 1932 Mr. Esta Keirn joined the company and soon became production manager. In 1946 the company published a 15-page booklet titled "Oriental Recipes," showing how to use shoyu. In 1963 [sic, 1943] Beatrice Foods (which had sold La Choy HVP soy sauce since the early 1930s) acquired the company and Mr. Keirn stayed on to supervise production of Beatrice's first fermented shoyu. Beatrice still makes a fermented shoyu.

The only other early maker of shoyu that Keirn knows of was a Japanese man in San Francisco who started in about 1945-46. Keirn talked with him, obtained a sample of his shoyu, and analyzed it. Keirn heard rumors of a little Chinese soy sauce producer in New York City but was never able to talk with him or to get a sample of his product. Keirn has no documents, articles, or price lists. Address: 401 Catherine Ave., Columbia City, Indiana 46725. Phone: 219-248-8742.

5969. Drake, Milan. 1981. Re: La Choy soy sauce. Letter to William Shurtleff at Soyfoods Center, Dec. 8. 1 p. + 2 p. of labels and recipes. Typed, with signature on letterhead. Preceded by an interview on Dec. 2.

• **Summary:** 1. Ed Neel says the first soy sauce bottled by La Choy was definitely hydrolyzed. He recalls that they bottled it pretty much as they received it.

2. Ed Neel recalls that Staley and Huron Milling were the original suppliers of HVP to La Choy.

3. La Choy did not manufacture a fermented soy sauce until after they purchased Oriental Show-You Co. in 1963—says Paul Sigo.

4. La Choy now distributes 2 types of soy sauce: La Choy Soy Sauce (made with HVP) and Oriental Soy Sauce (fermented). Of these two, the HVP product accounts for about 85-90% of all soy sauce sales. Labels for both products are enclosed. Ingredients in the HVP sauce are: Water, protein extracts from soy beans, salt, corn syrup, and caramel color. The fermented product also appears to contain some HVP.

Accompanying this typed letter from Milan Drake is a questionnaire from William Shurtleff on Soyfoods Center letterhead dated 2 Dec. 1981. It contains seven questions, with the answers written in by hand.

Milan does not know when La Choy first began making or marketing soy sauce. Ed Neel thinks it was 1922 or

maybe 1923. A document indicates that by 1922 they were importing a soy sauce from China. In Sept. 1944 La Choy soy sauce was advertised in *Soybean Digest*.

La Choy started as follows: Ilhan New (a Korean man) and Charles Smith attended the University of Michigan together. Both felt there was a market for Oriental foods in the area, so they started the company in 1927 in Detroit, but soon expanded. They hired Ed Neel and expanded more. During World War II they were unable to obtain cans, so they moved the company to Archbold, Ohio, then after the war went back to Oriental Foods. Smith bought out Mr. New, then Smith was killed by lightning. Beatrice bought the company in 1943. Address: Director, Research & Development, La Choy Food Products, 901 Stryker Rd., Archbold, Ohio 43502. Phone: 419-445-8015.

5970. Burns, Ken. 1981. Re: George Ohsawa and a brief history of macrobiotics in America. Letter to William Shurtleff at Soyfoods Center, Dec. 9—in reply to inquiry. 7 p. Typed, with signature. [1 ref]

• **Summary:** An excellent, in-depth history by a very knowledgeable source, who occasionally teaches a course in Boston on the history of macrobiotics in the USA. With numerous fond personal recollections and character sketch of Ohsawa. 1959 Dec.—Ohsawa first visited the USA. 1960 Jan.—He published, in mimeograph form, his astonishing book *Zen Macrobiotics* in English in New York City. “Although not in great detail, here he introduced miso, tamari, and tofu to the general public. The first two especially quickly become essential ingredients in the diet of almost all macrobiotic people in the US.

“During January, February, and March [1960] he lectured extensively at the Buddhist Academy in New York City. He returned to the US in July and lectured at the First American Summer Camp on Long Island daily for two months.

“The Second American Summer Camp was held in July and August of 1961. I am not sure whether he was present or not. This was in Wurtsboro, New York. In that year also, thirteen macrobiotic families left New York and moved to Chico, California on his advice. The next year, 1962, they founded the first American macrobiotic food distribution and processing center in this country.

“In 1963, in the summer he came to the US again and lectured in Boston, NYC, and at the Chico Summer Camp.

“In 1964, he lectured at the Big Sur Summer Camp.

“In 1965, he lectured at Mayoro Lodge near Pulga, California.

“In 1966, on April 24th [or 23rd] he died in Japan.

“All in all, George Ohsawa visited this country either five or six times, each time lecturing, and speaking to the people individually without rest. He was ceaselessly active. I have heard many anecdotes concerning him during that period. As best I can determine, his affect on people was

quite simply shattering—they had never seen anything like it.

“According to Madame Ogawa (who spoke in great and loving detail of him at the 1981 French Meadows Summer Camp) he was a very sharp dresser and had quite an eye for beauty in the female of the species. She was so obviously still in love with this ‘terrible man.’

“Jacques DeLangre... never tires of telling about the time when they were descending the mountain after a long and intensely yangizing summer camp. Their car rounded a bend and there!, suddenly!, was a huge patch of luscious juicy *blackberries!* The car as though it had a mind of its own, screeched to a halt, all the doors flew open, and all the passengers were catapulted into the middle of that patch. It would be hard to imagine a clearer, cleaner-cut example of the attraction of yang to yin. Their ecstatic reverie was broken, a few moments later, by the sound of another car coming around the bend. ‘Oh my God, it’s Ohsawa himself; what will he say?’ (In those days people were, understandably, a little naïve in their application of yin and yang.) Well, that second car did just exactly what the first one had done—the screeching halt, the doors flying open, and of a sudden there was George Ohsawa right in the middle of that patch too, crying out in his basso profundo voice, ‘Oh blackberries, they are sooo delicious!’

“That voice—possibly there is the key to understanding Ohsawa’s impact in this country; I didn’t personally meet him; he died about a month after I began macrobiotics in 1966. But I have heard him on many tapes, poorly-recorded as most of them were. And I have spoken to others who did know him personally, and sooner or later they get around to mentioning his voice. Peter Magnusson here in Boston describes it as the kind of voice that rattled the windows. I have done a course here in Boston I call ‘The Healing Power of the Spoken Word,’ and for that course I have listened to all the recordings of the great speakers of this era that I can get my hands on—Kennedy, Churchill, Roosevelt, William Jennings Bryan, John L. Lewis, etc. Probably the best orator in the world today (or was anyway, I haven’t heard him lately) is Fidel Castro. His is a warm, rich, full voice, capable of a startling range of thoroughly human emotions—from the righteous indignation and anger of an oppressed people through endless shades and nuances to a profoundly warm and compassionate voice that might be that of your very best friend. Take that voice in account and you can understand Castro’s success against seemingly insurmountable odds in Cuba. Well, I can tell you of an even better voice—that of Ohsawa. Peter Magnusson goes on to say that when he spoke it seemed as if the very world itself was speaking. As I have said above, his was a profoundly rich, deep voice, ranging from bass to baritone. But at the same time it was very delicate, sensitive, and poised, as ready to go up as down, as ready to go left as right—flexible! But the one quality that his voice had that I have never heard equaled I can sum up with one adjective—Vibrant.

“Probably this is not the kind of material you can use in your book, but I have taken a lot of time here on it anyway. The reason is that all the discussions I have heard about Ohsawa and his impact on this country have centered on what he said and not how he said it. Otherwise, how are we to explain how he was able to inspire so many people, along with Michio and Aveline Kushi, Herman and Cornelia Aihara to literally give up everything and come to a strange land to struggle against apparently insurmountable odds. Because that’s what they did, arriving here penniless, operating on a wing and a prayer so to speak. And it is to them that we must go in the next chapter of this little story.”

Note: People were also attracted to the great sense of happiness, vitality, love of life (*joie de vivre*), and purpose that Ohsawa radiated. Continued. Address: Boston, Massachusetts.

5971. Hoang, Van Chi. 1981. Re: Vietnamese soy sauce, *xi dau*, and *nuoc tuong*. Questions answered on Soyfoods Center letterhead (dated 9 Dec. 1981) and returned to SC. 1 p. Plus 2 enclosures.

• **Summary:** Upon receiving Mr. Hoang’s answers by mail, Shurtleff called him on 6 March 6 1982 to ask for clarification on some points. The two sets of answers are merged below.

Xi dau (pronounced “si zao”) is the Vietnamese term for *siyu* or black soy sauce served mostly in Chinese restaurants in Vietnam. It is made in Vietnam, but only by Chinese, in both North- and South Vietnam. It is exposed to air for many months to make it dark.

Nuoc Tuong (pronounced “Nuc Tung”)—*Nuoc* means “liquid”) is the water in which soybeans are soaked, typically for about 9 days, but sometimes as long as 30 days. This soak water (also called “soybean self-autolysis water”) is removed because otherwise (many believe) it would lower the quality of the finished *Tuong*. The soak water contains some soluble soybean nutrients and is pale yellow to clear in color. The Japanese discard this water, but some Vietnamese add salt and use it for pickling eggplants, etc.

There is no filtered soy sauce in Vietnam. Of the soy “sauces” made in Vietnam, about 60% is *tuong cuda* (ground *jiang*) and 40% is *tuong ban* (not ground; made in the village of *ban*). The origin of these two fermented Vietnamese soy products is unknown, but Mr. Hoang suspects they are of ancient origin. Mahayana Buddhists must be vegetarian. Buddhism went to Vietnam (from India) before it went to China, because Vietnam was an international port, trading with India. In about the 3rd century AD Buddhist monks came to Vietnam and spread Buddhism. They ate tofu and soy sauce.

What percent salt (sodium chloride) exists in your finished *tuong*? 10% in *Tuong Cu Da* for Vietnamese consumers. 6% in *Bodhi Sauce* for those who follow a low-salt diet.

In Vietnam are there any traditional soy sauces that have the liquid separated from the solids like Japanese soy sauce? If so, what are they called? Ans: Yes, *Tuong Ban*; it is usually used for cooking and is made in the *Ban* village.

One of the enclosures is from the International Register of Profiles. Born on 1 Oct. 1915 in Thanh-hoa province in Vietnam, Hoang Van Chi descended from a long line of Confucian scholars. He attended the best universities in Vietnam (1928-1940) earning a Baccalaureate in mathematics and another degree in physics, chemistry, and biology. He studied Oriental philosophies with a critical and non-dogmatic mind. Like his father and grandfather, he persistently opposed the French colonial rule. In 1940 he married Le Han Phan. In 1945 he joined the resistance and served the Ho Chi Minh government in many high offices, including Director of the National Mint. In 1948 he won an award for his brilliant work from Ho Chi Minh. But in 1955 he fled Saigon when the regime turned towards a full Communist dictatorship. He went into voluntary exile in Europe, settling in Paris from 1960-65 where he wrote his book “From Colonialism to Communism.” Address: Bowie, Maryland.

5972. Wood, Brian J.B. 1981. Re: Dr. Yong Fook-Min in Singapore. Soy sauce in Scotland. Letter to William Shurtleff at Soyfoods Center, Dec. 14—in reply to inquiry. 2 p. Typed, with signature on letterhead.

Address: Centre for Industrial Innovation, Univ. of Strathclyde, 100 Montrose St., Glasgow, G4 6 0LZ, Scotland. Phone: 041-552 4400.

5973. Jootla, Susan Elbaum. 1981. Re: Making miso and tofu at home in India. Letter to William Shurtleff at Soyfoods Center, Dec. 15. 2 p. Typed, with signature.

• **Summary:** She and her husband have used up their first batch of homemade white miso and are now consuming a great pot of modified red miso. She thanks William and Akiko Shurtleff for the guidance their *Book of Miso* and *Book of Tofu* have given them in making these soybean products over the past few years.

She gives details of their experiments making tofu and miso 7,000 feet up in India’s western Himalayas. Her husband had been trying unsuccessfully ever since he worked in Indonesia in the 1950s. Finally a friend who worked in a Florida health food store sent them *The Book of Tofu*. Using Epsom salts and an electric blender they succeeded in making good tofu. Susan then wrote an article on making tofu in India for an Indian woman’s magazine, which was published in the spring of 1979. She is working on another longer article.

Having conquered tofu, she turned to miso. The big problem was getting koji starter, which she eventually obtained from Kikkoman in Tokyo.

Susan is now thinking of making tofu commercially

on a small scale to cater to the interest evinced by several boarding houses in town. There are already a few soyamilk producers in India. In India, Susan uses tofu as “a substitute for paneer, which is the fresh cheese from milk, drained and pressed briefly to a compact solid texture. Tofu can be used in curries and pakoras (a very common snack, spicy fritters) in almost the same way as paneer is traditionally prepared, thus decreasing the problem of tofu’s novel taste.

“We have also found that okara can be incorporated into dough for chapaties [chapatis], in equal proportions to the wholewheat flour. When the dough is seasoned with salt and ground cumin and coriander seeds, and baked as a chapati on a cast iron griddle, the resultant thick bread should be attractive for Indian cooks who begin to make tofu but are reluctant to waste the residue.

“As you can see, we are tofu enthusiasts and are trying to spread an appreciation of soyfoods in this country in a small way. So far, texturized soy protein is the only product that seems to have caught on here.” Doubtless, this is because it does not require refrigeration, is not affected by heat or moisture, and is a useful and inexpensive meal stretcher.

Note: As of April 2008, Susan has long practiced Buddhist meditation and is the author of many related books. Google “Susan Elbaum Jootle” and you will see. Address: Jeet Villa, Dalhousie, H.P. [Himchal Pradesh], India.

5974. Earle, Steve. 1981. Re: Origin of the term “tamari” and history of San-Jirushi. Letter to William Shurtleff at Soyfoods Center, Dec. 19. 2 p. Typed, with signature on letterhead. [2 ref]

Address: San-Jirushi Corp., 1 Meisei-dori, Kuwana, Mie 511, Japan. Phone: (0594) 22-3333.

5975. Hughes Markets. 1981. Christmas (Ad). *Los Angeles Times*. Dec. 21. p. I19.

• **Summary:** The section titled “Foods of the Orient” includes: Kikkoman soy sauce, gallon can—\$4.35. Fresh age, Hinode 1.8 oz.—83¢. Kikkoman 10 oz. Tempura Sauce—95¢. JFC soy bean flour 7 oz. Kinako—69¢. Hime black [soy] beans 6.35 oz., Kuromame amani—99¢. Wheat cake [sic, dried frozen tofu] 3.5 oz. Misuzu Koya Dofu—\$1.19.

Also includes: Umeya frozen Mochi. Kokuho rice. Hime rolled kelp—Honporo Maki. Hime dried seaweed—Sushinori [Sushi nori]. Kikkoman sweet cooking sake—Aji Mirin. Ozeki sake. Bamboo tips. Dried gourd strip—Kezuka Kampyo [Kanpyo]. Rice vinegar—Mitsukan Su. Sliced pickled ginger—Miyako Kizami Shoga. Dried mushrooms—Miyako Shiitake. M.S.G.—Asahi Aji.

Note: Hughes now has 21 stores in the greater Los Angeles area—all open 24 hours a day. “We welcome food stamp shoppers.”

5976. Yokotsuka, T. 1981. Re: Earliest known use of the

word *chiang-yu*. Letter to William Shurtleff at Soyfoods Center, Dec. 22. 1 p. Handwritten on letterhead. [1 ref]

KIKKOMAN CORPORATION

339 NODA, NODA-SHI CHIBA-KEN 278, JAPAN
TELEPHONE: 0471(24)1111
TELEX: 2975471 KMAN N J

• **Summary:** “As far as I know the first or earliest references to *chiang-yu* may be in Japan. It is in the *Ekirinbon-setsuyoshu* publicised in 1597 in Japan.” Address: Senior Vice President, Kikkoman Corp., 339 Noda, Noda-shi, Chiba-ken 278, Japan. Phone: 0471 (24) 1111.

5977. Aishima, T. 1981. Glass capillary chromatographic profiles of soy sauce aroma correlated with sensory assessment. *Agricultural and Biological Chemistry* 45(12):2847-53. Dec. [22 ref]
Address: Noda Inst. for Scientific Research, Noda-shi, Chiba 278, Japan.

5978. Hoang, Van Chi. 1981. How to make Tuong (Vietnamese unfiltered, ground soy sauce) (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 1 p. transcript.

• **Summary:** 1. Prepare soybeans: Dehull 10 lb soybeans with a mill and remove hulls with a seed cleaner. Roast the cotyledons at 450°F (232°C) for 15 minutes in any type of roaster. Pressure cook the roasted cotyledons with adequate water at 5 lb pressure for 30 minutes. Transfer the contents of the cooker (beans and water) into a plastic 40 liter (10.6 gallon) container, place in a warm room (80°F or 26.5°C) for 10 days; this enables the soybeans to undergo auto-hydrolysis. Each day skim off any surface foam.

2. Make glutinous rice koji: On the 3rd day of the soybean fermentation, soak 10 lb of glutinous rice overnight. Drain and steam at atmospheric pressure for 30 minutes, then cool to body temperature. Mix koji starter (*Aspergillus oryzae* mold spores propagated on glutinous rice) with water, sprinkle over rice, then drain on a perforated tray. Transfer inoculated rice into shallow wooden trays (each 10 by 15 by 4 inches deep) and place them in a warm koji room (80°F or 26.5°C) for 6 days. Do not stir during this time. Finally the mold-fermented rice koji (*moc*) will be floating in a glucose syrup. Mix the koji with 7.5 lb salt, grind the mixture in a mill, then transfer ground mixture to a plastic vat and leave for 2 days to stop the fermentation.

3. Combine and ferment: Place the fermented soybeans and their water in a Hobart VCM (Vertical Cutter Mixer) and blend until smooth. Mix in the ground salted koji and allow the mixture to stand at room temperature for 3 days. Bottle and cap without heating. Use as a dipping sauce for fresh or fried tofu, or as a pickling medium. In Vietnam, Tuong is also used as a dipping sauce for roast beef, as a cooking sauce for fish, or as a pickling sauce for pork.

Hoang adds: There are less than 200,000 Vietnamese in the USA, and about the same number in France. Traditionally, soy sauce was made and used mostly in North Vietnam. But for the last 30 years (i.e., since about 1951) there has been no soy sauce in North Vietnam due to two factors: (1) The shortage of soybeans and rice; (2) The fact that those who formerly made it were classified as “landlords” by the Communist regime. Today in Vietnam people try to make it using peanut- or cottonseed presscake instead of soybeans. Address: Bowie, Maryland. Phone: (415) 253-1065.

5979. **Product Name:** Tofu.

Manufacturer’s Name: Purist Foods.

Manufacturer’s Address: 4100-A Ed Bluestein St., 105, Austin, TX 78721. Phone: 512-928-0191.

Date of Introduction: 1981. December.

New Product–Documentation: Soyfoods Center Computerized Mailing List. 1981. Dec. 8. Owner: Reed Murray. Talk with Allen Maurer, consultant. 1988. Oct. 12. Purist foods is still in business, run by Reed Murray. Address is now 6014 Techni-Center Dr., Suite 105, Austin, TX 78721. Phone: 512-928-0191. They also make Wheat Roast and Texas-Style Vegetarian Bar-B-Q from Gluten (both with only soy sauce and soy oil), plus White Mountain Premium Bulgarian Yogurt with Live Acidophilus. Purist Foods started as a yogurt company in 1979. They added tofu in 1981, when they bought out a small tofu company in Austin named “Soyfoods Texas.”

5980. Soyfoods Center; Soycrafters Assn. of North America. 1981. Per capita use of soyfoods grows to nearly 9 lbs. in U.S. *Vegetarian Times* No. 52. Dec. p. 6.

• **Summary:** Based on a Sept. 1981 news release copyrighted by the Soyfoods Center and the Soycrafters Assoc. of North America, this summary of a market study gives for each major soyfood product the number of manufacturers in the USA, Canada, and worldwide. The tons/year of raw soybeans used. And (in the USA only) the tons of food produced, wholesale value, retail value, and number of employees.

In the USA, the number of manufacturers, tons of product produced, and retail value in million dollars are as follows for low technology, traditional: Tofu and tofu products (154, 22,700, \$50.4), tempeh (32, 494, \$1.78), soymilk and soymilk products (14, 148,000, \$118.0), soy sauce, shoyu & tamari (15, 54,837, \$203.0), soynuts and soynut butter (12, 2,750, \$4.6), miso (10, 2,000, \$4.8), soy sprouts (5, 360, \$0.25), etc. Subtotals for low-tech (284 manufacturers, 231,305 tons produced, \$392.25 retail value).

For high-technology, modern: Soy flour & grits, defatted (12, 400,000, \$190.4), textured, extruded soy flour (TSP/ TVP) (2, 200,000, \$179.2), soy protein concentrates (3, 45,000, \$56.7), soy protein isolates (3, 45,000, \$126.0),

meat analogs (secondary products) (6, 20,000, \$55,000). Subtotals for high-tech (26 manufacturers, 710,000 tons produced, \$615.6 retail value). Total low and high tech: 310 manufacturers, 941,305 tons produced, and \$1,007.85 million dollars.

Also published in *New Age* (Jan. 1982, p. 17) under the title “Tofu Takes Over.”

5981. **Product Name:** Soyami (Ready-to-Eat Sausage-Shaped Meatless Salami Made from Tempeh; Vacuum Packed).

Manufacturer’s Name: 21st Century Foods.

Manufacturer’s Address: Jamaica Plain, Massachusetts.

Date of Introduction: 1981.

Ingredients: Organic soybeans, whole wheat, sesame seeds, corn oil, tamari, herbs, spices, tempeh starter, vinegar.

Wt/Vol., Packaging, Price: 6 oz cylinder, vacuum packed.

How Stored: Refrigerated.

New Product–Documentation: Labels (two), undated. “Pre-cooked. Ready to Eat Snack or Hors D’Oeuvre.” Spot in Soyfoods. 1983. Summer. p. 52. “One Soyami on Rye, Please.” Ready to eat. Label. 1987. 3.5 by 6 inches. Red and white on yellow-orange. “Made from Homestyle Tempeh. Ready to Eat Snack or Hors D’Oeuvre. Serving Suggestion: Cut into thin slices. Serve warm or cold. Combine with mustard or sauerkraut if desired.” Talk with Rudy Canale. 1988. Sept. 13. One of their earliest products, launched in 1981, this is still a popular item.

5982. Dronne, Yves. 1981. Le problème mondial du soja [The problem of soybean worldwide]. Paris: Institute National de la Recherche Agronomique. [Fre]*

• **Summary:** Gives details on Japanese consumption of industrially processed plant proteins (tons/year of defatted soybean meal equivalent): Unfermented: Tofu 84,200, Dried-frozen tofu 22,400, Other products. including texturized soy protein 87,800. Fermented: Soy sauce 173,000, miso 157,400, natto 55,200. Total: 580,000

Concerning Japanese consumption of new “purified” protein in tons/year. In 1971/1977 total consumption was 27,300/44,000. Of this the amount made from soybeans was 15,900/17,000 and the amount made from wheat gluten was 11,400/27,000. As for the texture, the amount sold in the form of a powder was 17,400/19,600 and the amount sold in textured form was 9,600/24,400.

In 1977, of powdered products, the amount from soybeans was 9,500 (6,000 isolates and 3,500 concentrates) and from gluten 10,100. Of the textured products, the amount from soybeans was 7,500 (6,000 dry extruded, 1,500 moist, and no paste), whereas the amount from gluten was 16,900 (200 dry extruded, 12,000 moist, and 4,700 paste). Address: Paris, France.

5983. **Product Name:** Bible Burger. Tempeh Vegetarian

Treat.

Manufacturer's Name: Garden of Eatin' (Formulator and Distributor).

Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.

Date of Introduction: 1981.

Ingredients: Soy tempeh (organically grown soybeans, water, and tempeh culture), soy sauce, herbs, spices.

Wt/Vol., Packaging, Price: 6 oz (170 gm).

How Stored: Refrigerated or frozen.

New Product–Documentation: Manufacturer's catalog. 1981, dated. Label. 1982, dated. "Steamed, not fried! No oil! No fat! No cholesterol! Tempeh at its best!"

5984. Hattori, Terumitsu. 1981. Re: Answers to questions about the history of shoyu. Letter to William Shurtleff at Soyfoods Center. 4 p.

Address: Kikkoman, San Francisco.

5985. Hoang, Van Chi. 1981. The Vietnamese and their favorite sauces. 7 p. Unpublished manuscript.

• **Summary:** Fish too small to be sold were made into a sauce called *nuoc mam*. Since the climate is much warmer in South Vietnam, fish were more abundant there than in the North. Also, because the *nuoc mam* manufacturing process is the action of an enzyme that exists in the stomach of the fish and the efficiency of that enzymic action depends on the average night temperature, *nuoc mam* produced in the South was of better quality. Unfortunately, neither *nuoc mam* nor soy sauce is produced in either parts of Vietnam. There is no more *nuoc mam* because there are no more fish.

The Vietnamese brand of soy sauce is called *tuong*. *Tuong* production has always been a cottage industry practiced in a few villages. Making koji, or *moc* in Vietnamese was the most difficult and tedious part of the soy sauce manufacturing process. *Tuong* disappeared from existence in North Vietnam after 1955 and in South Vietnam after 1975 due to 3 factors: 1. Shortage of food. 2. Shortage of rice. Since soybeans are considered a luxury because "they do not fill the stomach," peanut or cottonseed presscakes are suggested instead. 3. Manufacturing was limited to a few villages. The professional *tuong*-makers were better off than other villagers. Since manufacturing required a large courtyard, scores of porcelain jars and enough capital to store soybeans and sweet rice for many months, they were classified as exploiters and their houses and belongings were confiscated. Address: Bowie, Maryland.

5986. **Product Name:** [House Mabo-dofu Seasoning Sauce Mix].

Foreign Name: Hausu Maaboo-dôfu no Moto.

Manufacturer's Name: House Shokuhin Kogyo.

Manufacturer's Address: Japan.

Date of Introduction: 1981.

Ingredients: Sugar, sesame oil, spices, soy sauce, lard, starch, oyster sauce, salt, monosodium glutamate, soy bean paste, red pepper, beef extract, citric acid.

Wt/Vol., Packaging, Price: 7 oz (200 gm). In foil packet in paperboard box with full-color photo on cover.

How Stored: Shelf stable.

New Product–Documentation: Label in Japanese.

Distributed in the USA by Nishimoto Trading Co., Los Angeles, CA 90058. Mix diced tofu with this sauce to make the popular Chinese recipe, Mabo-dofu.

5987. **Product Name:** Java Murni Kecap Manis (Sweet Indonesian Soy Sauce).

Manufacturer's Name: Indocon. Div. of Indofoods, Inc.

Manufacturer's Address: Carlsbad, California.

Date of Introduction: 1981.

Ingredients: Fermented soy extract, water, molasses, salt, sesame seed, traditional blend of delicate spices.

Wt/Vol., Packaging, Price: 1 pint (16 fluid oz) bottle.

How Stored: Shelf stable.

New Product–Documentation: Label. 1981, undated.

Black on white. "Made for Java Murni Ricetable Ingredients. No preservatives added. Serving suggestions."

5988. **Product Name:** Java Murni Tempeh Schnitzstick (Seasoned and Breaded Fried Tempeh).

Manufacturer's Name: Indocon. Div. of Indofoods, Inc.

Manufacturer's Address: Carlsbad, California.

Date of Introduction: 1981.

Ingredients: Organic soybeans, organic unhulled [dehulled] sesame seeds, onions, soy sauce, garlic, vinegar, *Rhizopus oligosporus*, water, wheat flour, corn flake crumbs, soy oil.

Wt/Vol., Packaging, Price: 6 oz.

How Stored: Refrigerated.

Nutrition: Calories 72, protein 9 gm, carbohydrates 4.6 gm, fat 3.2 gm.

New Product–Documentation: Label. 1981, undated.

Black on white.

5989. **Product Name:** Tofu?

Manufacturer's Name: Island Style Soybean Products Inc.

Manufacturer's Address: 94-137a Leoleo St. (WAIP), Honolulu, Oahu, Hawaii.

Date of Introduction: 1981.

New Product–Documentation: Honolulu City Directory. 1981. p. 275. Island Style Soybean Products, Inc. 94-137a Leoleo St. (WAIP), Honolulu. The name of the product is not given. Note: By 1984 a company by this same name is making tofu at a different address in Wahiawa.

5990. Java Murni. 1981. Vegetarian Menu. 4509 Adams St., Carlsbad, California.

• **Summary:** Includes many interesting tempeh and tofu dishes. Dec. 1981 ranking of best-sellers: 1. Tempeh treat

(Tempeh braised in Indonesian soy and safflower oil). 2. Keringan tempeh. 3. Satay tempeh. 4. Tempeh kechap. 5. Tempeh malakka. 6. Sambal goreng tempeh.

Note: *Kechap* is Indonesian soy sauce. Address: Carlsbad, California. Phone: 434-4131.

5991. **Product Name:** [Seitan, and Seitan Goulash].

Foreign Name: Seitan, Seitan Goulash.

Manufacturer's Name: Lima Foods (Marketer-Distributor). Made in Belgium by Jonathan P.V.B.A.

Manufacturer's Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

Date of Introduction: 1981.

Ingredients: 11/91. Water, wheat*, soya*, tamari (soyasauce), kombu (seaweed), herbs. * = Organically grown.

Wt/Vol., Packaging, Price: 300 gm (10.5 oz) glass jar. Retail for \$7.65 (11/91, California).

How Stored: Shelf stable; refrigerate after opening.

Nutrition: 15.7% vegetable protein.

New Product–Documentation: Lima N.V. 1981. Oct. Lima Natural Foods Pricelist. Vegetable protein products: Seitan (vegetable protein concentrate, 150 gm jar), Seitan goulash (seitan with vegetables).

Product with Label purchased from Berkeley Natural Grocery Co., California. 1991. Nov. 24. Made in Belgium. Imported in USA by Eden Foods. Label: 10 by 2.75 inches. Gummed paper. Red, dark brown, and yellow on tan. Illustration of yellow ears of wheat. "Vegetable protein preparation. Basic price: 34 German marks per kg. Use in soups together with cooked or stewed vegetables, in salads, on wholemeal bread, or simply fried in the pan. Use the cooking water to make a soup or sauce." Nature et Progres organic certification symbol. Note the high price.

Talk with then letter from Mark Callebert from Lima Foods of Belgium. 1992. April 23 and June 19. Jonathan P.V.B.A. started to make seitan in 1978. Not long thereafter, Lima contacted Jonathan in Belgium concerning seitan. In 1981, Lima began buying seitan from Jonathan, and selling it in bottles under the Lima brand. Mark started to work for Lima Foods on 1 Sept. 1975 and was working at Lima when Lima began selling the seitan made by Jonathan.

Lima acquired Jonathan P.V.B.A. on 22 April 1989. Today Jonathan still makes seitan (and tofu) at a plant in Kapellen, a small village near Antwerp in Belgium. The address is Antwerpsesteenweg 336, 2080–Kapellen, Belgium. Phone: 03/664.58.48.

5992. **Product Name:** [Mitsukan Ma-Bo Tofu Seasoning Mix].

Foreign Name: Mitsukan Ma-Bo Tôfu no Moto.

Manufacturer's Name: Nakano Vinegar Co. Ltd.

Manufacturer's Address: Japan.

Date of Introduction: 1981.

Ingredients: Dehydrated soy sauce, powdered miso, sugar, potato starch, salt, powdered chili paste, dehydrated chicken extract, dehydrated garlic, dehydrated ginger, dehydrated oyster extract, monosodium glutamate (to enhance flavor).

Wt/Vol., Packaging, Price: 1.89 oz (54 gm). 2 foil packets in paperboard box with color photo of recipe on front. \$1.08.

How Stored: Shelf stable.

New Product–Documentation: Label in Japanese. Mix diced tofu with this sauce to make the popular Chinese recipe, Mabo-dofu. Recipe on back.

5993. **Product Name:** Ginger Soy Sauce.

Manufacturer's Name: New England Soy Dairy Inc. Tomsun Foods Inc. (Marketer).

Manufacturer's Address: 305 Wells St., Greenfield, MA 01301.

Date of Introduction: 1981.

New Product–Documentation: Poster. 1981. Introducing Soydairy. Naturally gourmet; Spot in Soyfoods. 1982. Winter. p. 56. "Oriental-style tofu condiments: Ginger soy sauce, five spice powder." Soya Bluebook. 1984. p. 76. Soya Bluebook. 1987. p. 92. Tomsun Foods International. Tomsun Ginger Soy Sauce.

5994. New England Soy Dairy, Inc. 1981. Introducing... Soydairy. Naturally gourmet. Easy-to-use foods with a gourmet flair [Won-ton skins, egg roll wrappers, ginger soy sauce, five-spice powder] (Poster). 305 Wells St., Greenfield, MA 01301. 1 p. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Address: Greenfield, Massachusetts. Phone: 413-772-0746.

5995. **Product Name:** [Nikko-Mame Defatted Soybean Flakes for Shoyu and Miso, Sakae-Mame Soy Flour for Tofu, ProtFlour Soy Flour for Food and Milk Replacer, Nikoprotein High Protein for Food].

Manufacturer's Name: Nihon Koyu Co. Ltd.

Manufacturer's Address: No. 32 Bungocho, Higashi-ku, Osaka, Japan.

Date of Introduction: 1981.

New Product–Documentation: Soya Bluebook. 1981. p. 63.

5996. **Product Name:** [Nikko-Mame {Defatted Soybean Meal for Shoyu and Miso}, and Sakae-Mame {Soybean Meal for Tofu}].

Manufacturer's Name: Nikko Oil Mills Co. Ltd.

Manufacturer's Address: Kanda Ogawamachi 2-12, Chiyoda-ku, Tokyo, Japan.

Date of Introduction: 1981.

New Product–Documentation: Soya Bluebook. 1981. p. 63; 1982. p. 67, 76.

5997. **Product Name:** Tempeh Burger (with Miso).

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: c/o Cleveland Tofu Co, 8021 Euclid Ave., Cleveland, OH 44121.

Date of Introduction: 1981.

Ingredients: Tempeh (organic soybeans, water, *Rhizopus* culture), tamari, barley miso, spring water, corn oil, rice vinegar, spices.

Wt/Vol., Packaging, Price: 8 oz (3 burgers).

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1982. 4.25 inch diameter. Red, green, blue, and yellow on white. Logo of Jack and the Beanstalk. "No cholesterol. All natural. Pan Fry, Bake, Steam, or Grill." Jeff Narten. 1987. "History of North Coast Tempeh and its Products." 4 p. Dec. 7. "Our tempeh burger is our number one product after tempeh. It is unique to my knowledge in that it is a fairly complicated marinade and depends less on tamari than many I've tasted."

5998. **Product Name:** [Soy Sauce].

Manufacturer's Name: Sampyo Foods Co. Ltd.

Manufacturer's Address: 647-2 Chang Dong, Dobong-Ku, Seoul, South Korea.

Date of Introduction: 1981.

New Product–Documentation: Soy Bluebook. 1981. p. 69.

5999. **Product Name:** San-J Tamari (Low Salt).

Manufacturer's Name: San-J International, Inc. (Importer). Made in Japan by San-Jirushi Corp.

Manufacturer's Address: 3236 Blvd., Colonial Heights, VA 23834.

Date of Introduction: 1981.

Ingredients: Whole soybeans, water, sea salt.

Wt/Vol., Packaging, Price: 5.07 fluid oz (150 ml) dispenser, 20 fluid oz (592 ml) plastic bottle.

How Stored: Shelf stable.

New Product–Documentation: San-Jirushi. 1981. "Introducing San-J Tamari" (8-panel leaflet printed with purplish-brown ink on beige paper). A table gives the nutritional composition 100 gm of San-J Tamari—both regular and low-salt. A photo shows the two container sizes.

6000. San-Jirushi International, Inc. 1981. Low salt. High taste. Its a fact. Only San-J tamari lets me reduce salt up to 95% and still serve great tasting meals my family loves (Poster and ad). Colonial Heights, Virginia. 1 p. Back to back, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• **Summary:** "Only San-J is the real tamari. Only San-J Tamari gives you the best of both worlds—low salt and high taste." A large color photo shows a woman, wearing a red bandana and red and black plaid shirt, holding a plate of pasta and vegetables. A small color photo shows 3 different bottles of San-J tamari.

This appeared as a full-page ad (color and black-and-white) in *Natural Foods Merchandiser* from about 1981 to 1984, including in the Jan. 1984 Soyfoods Pavilion special insert (p. 6, unnumbered). Address: Colonial Heights, Virginia.

6001. **Product Name:** Tempeh Salad.

Manufacturer's Name: Soy Plant (The).

Manufacturer's Address: 711 Airport Blvd., Suite #1, Ann Arbor, Michigan 48104. Phone: 313-663-8638.

Date of Introduction: 1981.

Ingredients: Tempeh (organic soybeans, *Rhizopus* culture, vinegar), simmered in shoyu & water, Soynaise (soymilk, oil, vinegar, spices), carrots, celery, green onions, parsley, basil.

Wt/Vol., Packaging, Price: 12 oz. plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Label in Soy Plant scrapbook. 1980. 2.75 by 2.5 inches. Black on white.

6002. **Product Name:** Tofu Veggie Patties: Seasoned and Baked.

Manufacturer's Name: Tofu Shop (The).

Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

Date of Introduction: 1981.

Ingredients: Our own fresh tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari), fresh vegetables (carrots, green onions, parsley), tamari (natural soy sauce made with water, soybeans, wholewheat and salt). Garlic and ginger.

Wt/Vol., Packaging, Price: 10 oz. vacuum packed.

How Stored: Refrigerated.

New Product–Documentation: Three Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1981. Label #1 of 1981. 4 by 2.5 inches. Self adhesive. Metallic gold, red, white, and silver on green. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great in your favorite burger with all the fixins, or as a main dish. or Simple to heat in oven (350°F, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39°." Illustration in a vertical parallelogram shows a tofu shop on stilts near the ocean with a tree arching overhead.

Label #2 of 1992. "Tofu Veggie Patties: 2 Baked." 3 inches diameter. Black, yellow, and white on green. "Crafted from whole organic soybeans. Illustration shows a tofu shop on stilts near the ocean with a tree arching overhead.

Label #3 of Oct. 2002. Dark green and orange-yellow on white. 3 inches diameter. No adhesive. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of protein. Low in saturated fat. Cholesterol free."

6003. **Product Name:** Teya's Chinese Rice and Tofu.

Curried Rice & Tofu. Stuffed Golden Soybean Cakes. Pizza (with whole wheat crust).

Manufacturer's Name: Tumaro's Inc.

Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.

Date of Introduction: 1981.

Ingredients: Chinese Rice & Tofu: Organically grown brown rice, zucchini, baked tofu (soy beans, water, soy bean oil, nigari), water chestnuts, eggplant, peanuts, mushrooms, onion, tamari (soy beans, water, sea salt), sesame oil, garlic, sea salt. Curried Rice & Tofu: above plus curry powder. Stuffed Golden Soy Bean Cakes: Brown rice, deep fried soy bean cakes, sprouted soy beans, zucchini, eggplant, water chestnuts, onion, tamari, sesame oil, garlic, ginger.

Wt/Vol., Packaging, Price: 10 oz.

How Stored: Frozen.

New Product–Documentation: Labels. 1981. 3 by 2 inches. Self adhesive. Chinese Rice & Tofu: Tan on brown. Curried Rice & Tofu: Brown on tan. Stuffed Golden Soy Bean Cakes: Black on red. “No Meat or Meat Derivatives.” Poster. Back to back, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

6004. **Product Name:** Tabouli Salad.

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1981.

Ingredients: Bulgur, filtered water, onions, olive oil, tamari, lemon juice, parsley, mint, garlic, salt.

Wt/Vol., Packaging, Price: 8 oz plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Labels sent by Wildwood on their letterhead. 1983, undated. 2.75 by 1.75 inches. Self adhesive. Black and green on ivory. Silhouette of woods with birds. “Ready to eat Foods, Naturally. Perishable. Keep Refrigerated.”

Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1981, and made at Wildwood's plant in Fairfax. On the front label, the text below the product name reads: “A refreshing combo of bulgur wheat, tomatoes, parsley, lemon and mint.” The ingredients are now: Bulgur wheat, vegetables (tomato, cucumbers, red onion), lemon juice, olive oil, parsley, mint, salt. On the back label, next to the UPC indicia: “Contains no animal products.”

6005. Altman, Nathaniel. 1981. Nathaniel Altman's total vegetarian cooking. New Canaan, Connecticut: Keats Publishing, Inc. 229 p. Index. 18 cm. Series: A Pivot Original Health Book. [180 ref]

• **Summary:** The author was born in 1948. The first page of the book begins: “It's not just spinach. The vegetarian way of eating is incredibly varied, employing such exotic, appealing foods as calcium-rich hijiki, tempeh from Indonesia, and

tofu.”

The glossary (p. 139-44) describes: Lecithin, milk (soy), miso, soybeans, soy grits, sprouts (incl. soy), tamari, tempeh, tofu, and textured vegetable protein (TVP).

Chapter 11, titled “A vegetarian diet can save you money” (p. 146-51) mentions soybeans and soyfoods (incl. soy milk powder, dry tofu [probably dried-frozen tofu], soy sprouts, soy flour, soy sauce, tofu) repeatedly as low-cost sources of protein.

The book has several very interesting appendixes: C. The vegetarian bookshelf (p. 208-10). D. Vegetarian contacts—Some vegetarian societies and publications (p. 211-12). Bibliography by chapter (p. 213-20).

6006. Aoki, Hiroshi. 1981. Misoshiru sanbai kenkô-hô [Three bowls of miso soup daily for good health]. Tokyo: Goma Books. 220 p. Illust. 20 cm. [Jap]

• **Summary:** Miso soups and health recipes. He worked for food companies, including Ajinomoto, for 30 years on development of new soy protein foods. A popularizing book. Discusses Hirayama.

Contents: Preface. Why are miso soups and soyfoods appreciated again now? 1. The many benefits from eating miso soups and soyfoods every day. 2. The Japanese people have forgotten the goodness of miso soups and soyfoods. 3. Healthy soyfoods: From miso to soymilk (miso, natto, shoyu, tofu, deep-fried tofu pouches, dried-frozen tofu, yuba, okara, roasted whole soy flour or kinako, soymilk, soy oil). 4. Miso soups and soybean cooking make a healthy body. Soybean recipes which are suited to people in the younger generation. Mother's favorite recipes are good for health, too. Appendix. Maps of Japan showing areas of miso soups and natto.

6007. Barber, Linda. 1981. Color slides taken during a visit to a shoyu maker in Japan. Kobe, Japan. 1 p. Based on e-mail of 9 May 2012.

• **Summary:** Linda took these color slides in 1981 somewhere in Japan. The factory, whose name she does not remember, was automated and fairly large. They made Daisho-brand shoyu.

(1) Labeled bottles showing the ingredients used in making shoyu: Defatted soybean meal, wheat, salt, and koji starter.

(2) Salt in a concrete storage area.

(3) A large automated koji-making room.

(4-5) Two views (see next page) of a woman working at the plant. She is looking at moromi that has just been run into a pressing sack.

(6) A hydraulic press, slowly pressing out the shoyu, leaving behind residue in the sacks.

(7) Bottles of Daisho shoyu in crates.

Address: Resident Director of Practice House and Oral English Instructor, Kobe College, 4-1 Okadayama, Nishinomiya, Japan.

6008. Bragg, Paul C.; Bragg, Patricia. 1981. *Hi protein vegetarian health recipes: With history and reasons*. Santa Barbara, California: Health Science. 184 p. Illust. No index. 21 cm.

• **Summary:** This book is quite similar to the 1975 edition, however one word in the title has been changed (to vegetarian meatless from meatless), and small changes have been made on several pages following Paul Bragg's

death in Dec. 1976. Nevertheless, the book gives the strong impression that Paul Bragg is still alive. Whereas he used to advocate moderate amounts of meat and fish in the diet, he now advocates a vegetarian diet [which is becoming increasingly popular, especially among young people, in the USA]. On the book's cover these words appear in large bold letters: "Vegetarian. Salt free. Sugar free."

We will discuss here only the changes that have been made in the 1980 edition. The copyright page states that this is the fifth printing. The address of Health Science, the publisher, has changed to Box 7, Santa Barbara, California 93102—from Hot Springs, California.

At the bottom of the next page a message has been added, which starts: "Our sincere blessings to you dear friends, who make out lives so worthwhile and fulfilled by reading our teachings on natural living as our Creator laid down for all of us to follow... Our prayers reach out to you for the best in health and happiness..." Signed Paul C. Bragg and Patricia Bragg.

On the page facing page 1, under the large photo of Bragg, is a different caption: "Paul C. Bragg in Hawaii, where he spends much of his time during the latter years of his vigorous, long life (almost a century!)." Describes how he writes, teaches, and exercise each day. Below that is "An old English Prayer," which begins: "Give us, Lord, a bit of sun, / A bit of work and a bit of fun. / "... Our daily whole grain bread and a bit of nut butter."

On page 66, at the bottom of the full-page ad for Bragg Liquid Aminos, readers are directed to order from a new address: Live Food Products, Box 7, Santa Barbara, CA 93102. "For 8 ounces of Bragg New Super Concentrated Liquid Aminos send \$3.50 which covers postage and handling." Note: In 1975 the price was \$2.99 for 16 ounces of "Bragg Liquid Aminos."

On page 81, an illustration of a pot and vegetables has been replaced by an illustration of Ponce de Leon, with a message about how he searched for the fountain of youth. "If he had only known—it's within us." There is also a new quotation from Patricia Bragg which states: "The more natural food you eat, the more radiant health you will enjoy and you will be better able to promote the higher life of love and brotherhood."

On page 157, the section titled "Sickness is expensive," has been updated (new statistics) and slightly expanded.

On page 160, a new photo, titled "When you are healthy—You are happy!" shows the members of the "Longer Life, Health and Happiness Club" at Fort DeRussy on Waikiki Beach, Honolulu, Hawaii.

The end of the book (after a blank page titled "My favorite recipes") contains: Advertisements: (1) Send for important free health bulletins. (2) Bragg live longer, live stronger self-improvement library (list of 25 books by Bragg, with prices). From the authors. Brief biography of Patricia Bragg, Ph.D., Nutritionist, beauty and health consultant.

Advisor to world leaders, glamorous Hollywood stars, singers, dancers, athletes. Lecturer and author (She says she is the daughter of Paul C. Bragg. An accomplished musician, dancer, tennis player, swimmer, and mountain climber. The youngest woman to ever have been granted a U.S. patent. Graduate of the University of California. Lists her famous clients). Biography of Paul C. Bragg. Address: 1. N.D., Ph.D., Life Extension Specialist; 2. Beauty and diet expert. Both: Santa Barbara, California, and Honolulu, Hawaii.

6009. Brennan, Jennifer. 1981. The original Thai cookbook. New York, NY: Richard Marek Publishers. [xvi] + 318 p. Map. Index. 23 cm.

• **Summary:** Neither soy nor soyfoods are listed in the index or Glossary of this book, except that the Glossary entry for "Fish sauce (*Nam pla*, p. 287) notes that it "is to Thai cooking what soy sauce is to the Chinese and Japanese."

She is the author of *The Original Thai Cookbook*. "She is "Winner of the IACP [International Association of Culinary Professionals] Award for the Best Literary Food Writing." She lived and cooked for 9 years in Thailand and for 19 years in Southeast Asia. Address: Playa Del Ray, southern California.

6010. Chiao, J.S. 1981. Modernization of traditional Chinese fermented foods and beverages. *Advances in Biotechnology* 2:511-16. [13 ref]

• **Summary:** The section titled "Soy sauce brewing with proteinase preparations" notes that in 1976 the Shanghai Institute of Fermentation Science used *Aspergillus oryzae* AS 3.951 to produce the proteinase and succeeded in making soy sauce of medium quality (Shanghai Grain and Oil Industry Co. 1976). The utilization coefficient of proteins reached 75%, but that of amino acid liberation was only 40%, which was 5% less than that of the solid-state process. Furthermore, the color and flavor of the resulting soy sauce were somewhat inferior to those produced by the traditional process. In 1979 the same Institute obtained better results by combining the neutral proteinase of a mutant of AS 3.951, UE 328 (potency 1400), and the acid proteinase of *A. niger* AS 3.50 (potency 300 u/ml) (Shanghai 1979—unpublished "Report on the Study of Soy Sauce Brewing"). The raw materials used (by weight) were soybean flakes 100, wheat 30, bran (probably wheat bran) 20, plus water, salt, and the enzymes UE 328 Proteinase and AS 3.350 proteinase. The fermentation took place at 45°C for 15 days.

The conclusion states that "some of the traditional foods and beverages can be produced in shorter periods with pure cultures, but in most cases, matching the traditional products in flavor requires more fundamental studies." Address: Dep. of Microbiology, Shanghai Inst. of Plant Physiology, Shanghai, China.

6011. Cottrell, Edyth Young. 1981. Mrs. Cottrell's stretching-

the-food-dollar cookbook. Santa Barbara, California: Woodbridge Press. 127 p. Recipe index. 22 cm.

• **Summary:** A natural foods, vegetarian cookbook. Incorporates *Stretching the Food Dollar* and *Supplement to Stretching the Food Dollar*. A color photo on the cover shows the author.

Page 15 discusses soy milk, soy milk powder, soy flour, and nut milk. Many recipes (especially recipes for breads and other baked goods) call for the use of these products. Soy-related recipes include: Basic wheat-soy bread I & II (with soy flour, p. 21-22). Golden triple-rich bread (with soy flour and soy milk, p. 23). Rice-soy bread (with soy flour p. 27). Soy-nut bread (with soy flour and ground cooked soy beans, p. 30). Soy mayonnaise (with soy milk powder, p. 71). Savory soy loaf or patties (with soy sprouts, p. 80). How to sprout soybeans (p. 89). Soy sauce (p. 90). Address: Formerly, Research Nutritionist, Loma Linda Univ., Loma Linda, California; As of March 1993, living in Spokane, Washington.

6012. Dahlen, Martha; Phillipps, Karen. 1981. A further guide to Chinese market vegetables. Hong Kong: South China Morning Post Ltd., Publications Division. xi + 74 p. Illust. 20 x 28 cm. *

• **Summary:** The romanization of names in this book represent the Cantonese pronunciation system of Herklots. Address: Hong Kong.

6013. Gandjar, I. 1981. Soybean fermentation in Indonesia. *Advances in Biotechnology* 2:531-34. [9 ref]

• **Summary:** Discusses various kinds of tempeh, taoco (Indonesian miso), kecap (Indonesian soy sauce), tempe gembus (okara tempeh; sold in every market and village in Central and Eastern Java), oncom tahu (okara onchom), and traditional fermentation processes. Address: Dep. of Biology, Faculty of Mathematics and Natural Sciences, Univ. of Indonesia, Jakarta, Indonesia.

6014. Hashiba, H.; Okuhara, A.; Iguchi, N. 1981. Oxygen-dependent browning of soy sauce and some brewed products. *Progress in Food and Nutrition Science* 5:93-113. (Pergamon Press). [18 ref]

Address: Central Research Laboratories, Kikkoman Shoyu Co. Ltd., Noda-Shi, Chiba-ken, Japan.

6015. Hesseltnine, Clifford W. 1981. Thom Award Address: A microbe's view of fermentation. *Developments in Industrial Microbiology* 22:xv-xvi, 1-18. [21 ref]

• **Summary:** Pages xv to xvi give a brief biography and photo of Dr. Clifford W. Hesseltnine, winner of the tenth Charles Thom Award on 14 Aug. 1980, presented by the Society for Industrial Microbiology. Dr. Hesseltnine knew Dr. Charles Thom and was strongly influenced by him, even though the two men never worked together.

“Dr. Hesseltine’s studies on the taxonomy of the Mucorales have resulted in a classification now in worldwide use... The research of Dr. Hesseltine on mycotoxins is world famous. He has directed the aflatoxin project of the Fermentation Laboratory, NRRC...”

“Dr. Hesseltine’s studies on fermented foods are equally well known. Included in this research has been the use of soybeans and cereals in Oriental fermented foods including tempeh, miso, Chinese cheese, and shoyu.”

Just 100 years ago the first pure cultures of fungi were made by Brefeld, a German, who published his results in 1881. The development of submerged culture of penicillin production began in 1941 at the NRRL. The USA lost its leading role in industrial fermentation early in the 1960s due to weakness in research in many fields. Address: NRRC, Peoria, Illinois.

6016. Hom, Ken; Steiman, Harvey. 1981. Chinese technique: an illustrated guide to the fundamental techniques of Chinese cooking. New York, NY: Simon & Schuster. Wallaby Books. 345 p. Illust. (photos by Willie Kee). Index. 29 cm.

• **Summary:** This “comprehensive, illustrated guide to the art of Chinese cooking provides step-by-step instruction in the basic techniques of Chinese cuisine and more than one hundred traditional recipes.” A full-page photo of Ken Hom faces p. 13, and a biography of both authors appears at the end of the book.

The section on “Ingredients” includes descriptions and a photo of: Bean curd (fresh—Chinese style tends to be firmer than Japanese; “red bean curd,” also known as “red bean curd cheese and preserved bean curd—red” is red fermented tofu. “Two other types of preserved bean curd are wet bean curd and fermented bean cake”). Beans, fermented black [Fermented black beans]. Bean sauce (Brown bean sauce, Brown bean paste; comes in two forms—whole bean and ground bean. Whole is preferred. “Both are very salty and are made from soybeans, flour, and salt”). Hoisin sauce (Duck sauce, Red seasoning sauce. Made from soybean flour, red beans, chili sugar, salt, garlic, and spices). Soy sauce (The two main types are light and dark. Other variations include mushroom soy and shrimp soy. Japanese soy sauce is not a good substitute).

“Shredding ginger” (p. 66): “If the ginger is fresh, it is not necessary to peel it; simply wipe it clean with a damp cloth.”

In the section on “Vegetables” under “Main-ingredient vegetables” we find: Bean curd (p. 89-93): It is an inexpensive source of protein used throughout China. How to deep-fry it. Fried tofu with vegetables and cooked meat. Stuffed bean curd (use “firm Chinese bean curd”).

Soy-related recipes: Cantonese roast duck (with bean sauce, p. 171). Peking duck (with hoisin sauce, p. 176-85). Chinese beef stew (with “2 cubes fermented red bean curd,” p. 217-19). Steamed fish with black beans (with “2

tablespoons fermented black beans,” p. 231-32). Braised Sichuan fish (with dark soy sauce, and “1 tablespoon bean sauce,” p. 233-35). Shrimp in lobster sauce (with fermented black beans and thin soy sauce, p. 261-62). Clams with black beans (with “2 tablespoons fermented black beans, coarsely chopped,” p. 273-74). Sizzling rice soup (with “4 small cakes Chinese bean curd, cubed, rinsed in cold water,” p. 327-28). Address: 1. Chinese cooking school teacher, California; 2. Food and wine writer for *San Francisco Examiner*.

6017. Hua, J.; Wang, I.H.; Chen, S.K.; Hsu, W.H. 1981. Fermented sauce made from black soybean (*inyu*). *Advances in Biotechnology* 2:517-23. [10 ref]

• **Summary:** Inyu is black soybean sauce fermented with the mold *Aspergillus soyae* or *Aspergillus oryzae* N-2. About 30% of the fermented soy sauce consumed in Taiwan in 1973 was inyu, made from whole black soybean koji with no wheat or other grain. After describing the traditional method for making inyu, modern techniques are applied to its fermentation. A flow sheet (p. 520) shows the traditional process. Black soybeans (the sole substrate) are washed, soaked at room temperature for 4-7 hours (7 hours in the coldest weather) and drained. Then they are steamed at 117°C for 30 minutes, then inoculated with the koji mold. The inoculated beans are spread to a depth of about 3 cm in small, flat trays, each about 100 cm in diameter and 5 cm deep. The trays are stacked atop one another but with a gap of 5-15 cm between trays. This gap is larger between trays at the top than between those at the bottom.

The soybean are incubated at room temperature for about 5 days or until they are entirely covered with a mycelium of white mold. Note that heavy sporulation in the koji may result in an off-flavor in the final product and may interfere with water absorption. Therefore these spores must be partially removed before each stage. After being washed with water, NaCl is added to give a final salt content in the washed koji of 25-30% by weight of the original black soybean used. This mixture is put into an earthen vat, which is sealed tightly for an anaerobic fermentation called aging, which takes about 90 days (compared with 180 days for typical soy sauce fermentation). After complete maturation, the mash is pressed, cooked, pasteurized and bottled. The press-cake is used for animal feed. Address: Food Industry Research and Development Inst., Hsinchu, Taiwan 300.

6018. Jaffrey, Madhur. 1981. Madhur Jaffrey’s World-of-the-East vegetarian cookery. New York, NY: Alfred A. Knopf, Inc. 461 p. Illust. by Susan Gaber. Index. 20 x 20 cm. A second edition was published in 1983 in London by J. Cape.

• **Summary:** The Indian woman author of this creative book presents 21 recipes for bean curd (tofu), 7 for tempeh, and some for yuba and miso. Green soy beans with sauce (p. 7). Cabbage with miso (p. 15). Eggplant slices with white miso (p. 22-23). Fresh soy beans, steamed (p. 57). Spinach with

fermented bean curd (p. 59). Stuffed yellow squash (with yuba, p. 62-64). Pecel (Vegetable salad with spicy peanut sauce, plus tofu and tempeh; p. 73-74). Tempura (with tofu; p. 75-77). Soy bean sprouts (how to grow; p. 100). Soy-bean and mung-bean sprouts seasoned with sesame oil (p. 105). Tempeh, Fried tempeh, Fried, preseasoned tempeh, Sambal goreng tempeh kering (Sweet and sour tempeh), Tempeh cooked in coconut milk (p. 108-110). Thai fried rice (with Red Bean Curd or Nam Yee [red fermented tofu]; p. 150-51).

One chapter (p. 160-89) is titled "Soy milk, bean curd, and wheat gluten." Making your own soy milk. Making your own bean curd. Udofu (*Yudofu*, simmering bean curd with seasonings). Bean curd with watercress. Korean-style bean curd in a hot water bath. *Hiya-yakko* (Chilled bean curd). Bean curd with Chinese parsley. Bean curd with broccoli. Cabbage cooked with bean curd. Bean curd with a deliciously spicy sauce. Carrots and beans with bean curd dressing. Bean curd, mushrooms, and peanuts in hoisin sauce. Sautéed bean curd. Tofu dengaku (Toasted bean curd with a miso topping). Fried bean curd cubes, soy-bean sprouts sautéed with fried bean curd. Fried bean curd with a sweet-and-sour sauce. Fried bean curd cakes with a mustard surprise. Inari-zushi ("Bags" of fried bean curd stuffed with sushi rice). Pressed bean curd with cabbage. Salad of pressed bean curd, mung-bean sprouts, and agar-agar. How to make fried and baked wheat gluten balls (plus 5 gluten recipes). Buddha's delight (with yuba and fried bean curd).

Chawanmushi (Steamed savory custards, with tofu; p. 192-94). Omelette with bean curd (p. 198-99). Soy sauce eggs (p. 209). Paneer (milk cheese; p. 237-40). Hot or cold noodles with a soy-sauce dressing (p. 248). Noodles with a hot-and-sour bean sauce (p. 250). Vegetarian mee krob (Crisp noodles with pressed bean curd and eggs, from Thailand, p. 255-56). Noodles with quail eggs, mushrooms, spinach, and yuba (Japan; p. 256-57). Hoppers (yeast pancakes from Sri Lanka). Roti (Flat whole-wheat bread). Delicious stock made with soy-bean sprouts. Clear soup with enok mushrooms, bean curd skins [yuba], and spinach (p. 297). Clear soup with soft bean curd and celery cabbage (p. 298). Miso soup with bean curd (p. 307). Miso soup with carrots and mushrooms (p. 308). Fried, munchable soy beans [soynuts] (p. 321-22). Potato and tempeh patties (p. 339). Dipping sauces (with soy sauce; p. 357-59). Kombu relish (with soy sauce, p. 374). Shoyu daikon (White radish pickled in soy sauce). Ginger quick-pickled soy sauce (p. 375). Aomidaikon (Quick pickled small white radishes, with slightly sweet yellow miso; p. 377-78). Chinese-style jellied bean-curd sweetmeat with a peanut topping (p. 399-400).

General information (p. 418-36; lots on soyfoods, see: bean curd [regular, fried, fermented (Nam Yee), pressed, pressed seasoned], kochu chang [jang], miso, soy-, tempeh, yuba). Sources (of ingredients; p. 437-40). Address: New York City, NY.

6019. Kikkoman Corporation. 1981. Photocopies of Kikkoman labels. Kikaku Senden-bu (Planning and Marketing Dept.), Tokyo, Japan. 10 p. Unpublished manuscript. 28 x 44 cm.

• **Summary:** These photocopies of Kikkoman soy sauce labels were taken from company scrapbooks. Labels are shown from the following years: 1951, 1953, 1955, 1957, 1958, and 1969. Each label contains text in both English and Japanese. The 1951 label reads: "The 'Kikkoman' Shoyu. Brewed by Nodashoyu Co., Ltd. Made in Japan. The 1969 label reads: "The 'Kikkoman' Shoyu. Brewed by Kikkoman Shoyu Co., Ltd. Product of Japan. Address: Tokyo, Japan.

6020. Kikkoman K.K. 1981. Dai 63 ki hôkoku-sho. Showa 55 nen 1 gatsu 1 nichi–Showa 55 nen 12 gatsu 31 nichi [63rd annual financial report. From 1 Jan. 1980 to 31 Dec. 1980]. Tokyo, Japan. 15 p. 19 cm. [Jap]

• **Summary:** Written entirely in Japanese with no photos. Address: Tokyo, Japan.

Inglett, eds. 1981. *The Quality of Foods and Beverages: Chemistry and Technology*. Vol. 1. New York: Academic Press. xvii + 443 p. See p. 61-82. [51 ref] Address: Knox Ingredients Technology.

6022. Marks, Copeland; Soeharjo, Mintari. 1981. *The Indonesian kitchen*. New York, NY: Atheneum. 278 p. Illust. Index. 22 cm. [2 ref]

• **Summary:** "This is to my mind, the best and most easily followed of all the books on Indonesian cooking. And I would certainly rank Indonesian cooking among the greatest on earth." Craig Claiborne, Food Editor, *The New York Times* (rear cover).

Soy related: Spices—"Sweet soy sauce, which you can make at home (see p. 237-38)" (p. 13). Barbecued chicken in sweet soy sauce (*Ayam Panggang kecap*, Tuban, Java, p. 86-87. "Sweet soy sauce [kecap manis], reconstituted from a dark Chinese soy sauce with caramelized sugar and various spices added, must be considered the most popular and universally accepted of Indonesian flavorings"). Beef stew with sweet soy sauce (*Karangmenanci*, Java, p. 98-99).

Vegetarian recipes: Stuffed soybean cake (*Tahu isi*, Jakarta, Java, with "4 Chinese soybean cakes" [tofu], p. 120-21). Eggplant in sweet soy sauce (*Semur terong*, Java, p. 155). Happy heart (*Suki hati*, Java, with 3 Chinese-style soybean cakes [tofu], p. 160-61). Bean cake in mixed spice sauce (*Bumbu rudjak tahu*, Wonosobo, Central Java, with tofu, p. 161-62). Soy bean cake fry (*Tahu kering*, East Java, with "4 Chinese soybean cakes" [tofu], p. 163-64). Fried soybean cake with peanut dressing (*Tahu goreng*, Kediri, East Java, with "4 Chinese soybean cakes," p. 164-65). Fresh

vegetable salad with soybean cake (Asinan, Jakarta, Java, with “2 Chinese soybean cakes [tofu], boiled in water for ten minutes and drained, p. 197-98).

Beef and soybean cake fritters (Perkedel tahu, Java, with “2 Chinese soybean cakes [tofu], mashed, p. 215-16).

Bean cake fritters (Tahu perkedel, Java, with “2 Chinese soybean cakes [tofu], mashed, p. 218-19). Soybean cake omelet (Tahu telur, Java, with “2 Chinese soybean cakes [tofu], cut into 1-inch cubes,” p. 235).

Sweet soy sauce (Kecap manis, all Indonesia, p. 237-38. “The homemade sauce based on this recipe is infinitely superior to the store-bought brands found in Chinese and Southeast Asian food shops.” Ingredients: 2½ cups sugar, 2.75 cups Chinese dark soy sauce, 3 cloves garlic, ½ teaspoon star anise pods, 2 salam leaves, 2 pieces laos, ½ cup water. Do not strain sauce after cooking since all ingredients continue to provide flavor. Makes about 2.75 cups. Keeps for several months refrigerated). Rijsttafel (with sweet soy sauce, p. 256-59). Address: 1. Textile importer, Brooklyn Heights, New York; 2. Central Java, Indonesia.

6023. Mazel, Judy; Shultz, Susan. 1981. The Beverly Hills diet. New York, NY: Macmillan Publishing Co. xxi + 262 p. Index. 22 cm.

• **Summary:** A vegetarian weight-loss book. The authors say beware of Oriental restaurants; they serve MSG and sodium-laden soy sauce (p. 220). Page 237 asks: “Where does flour fit into the Beverly Hills diet?... White flour is the least acceptable because its nutritionless... Forget about soy-flour products. Remember the legume family; they are a miscombination—half protein, half carb—and by their very nature highly indigestible.”

6024. McCallum, Cass. 1981. The real food guide. Vol. 2: Pulses, grains and seeds. Glasgow, Scotland: The Molendinar Press. 196 p. Index. 20 cm.

• **Summary:** The section on “Anti-nutritional factors in pulses” discusses those found in many legumes (such as haemagglutinins, trypsin inhibitors, phytic acid, flatulence factors) and those of importance in specific legumes; for soybeans, only heat-resistant trypsin inhibitors are mentioned. The section on “Basic bean cookery” gives general guidelines and tips (never add salt until beans are cooked tender). A table (p. 54) shows that soybeans require the longest cooking time of any bean listed.

The section titled “A-Z pulses” gives details (incl. the scientific name) concerning many legumes listed alphabetically. Includes adzuki, kura mame [sic, kuro mame = black soybeans] (p. 65), and winged beans. By far the longest section is on soy beans (p. 71-82). Contents: Introduction. Nutritional values. Dried soy bean products: Soy grits, soy coffee, soy flour (full fat, medium fat, fat free), soy nuts, soy milk, soy yolk (a concentrated form of soy flour), textured vegetable protein, soy splits, tofu powder.

Fermented soy bean products: Black beans—fermented, chao, chee-fan, chiang (Chinese miso), Hamanatto, ketjap, koji, meitauza, miso, mame miso, Hatcho miso, kome miso, mugi miso, natto, okara. Soy sauces: Introduction, Chinese soy sauce, ketjap, synthetic sauce, tamari. Sofu [sic, sufu], tahuri, tamari, tao-cho, taokoan or tao koan, taotjo or tao dji [sic, taotjo is Indonesian-style miso; tao dji are Indonesian fermented black soybeans], tempeh, tofu. Tofu from whole beans (homemade recipe). Tofu from powdered [soy] milk.

The part titled “Recipes” (p. 129-92) is divided into three sections. Soy-related recipes in each are listed here: (1) Soups and starters: Iced tofu (p. 134). Miso soup (p. 138). Adzuki bean soup (p. 141). (2) Main dishes: Deep-fried tofu (p. 167). Szechuan bean curd (p. 168). (3) Bread, side dishes, sauces and desserts: Miso lemon sauce (p. 186). Miso ginger sauce (p. 187). Peanut butter (homemade recipe, p. 191).

The rear cover states: “These books fight a war against junk food—and win.” The author is a woman.

Note: This is the earliest English-language document seen (Feb. 2004) that uses the word “tao koan” (or “tao-koan”) to refer to tofu. Address: United Kingdom.

6025. Mogi, Masatoshi. 1981. Miso to gojûnen [Miso and fifty years]. Noda, Japan: Published by the author. 232 p. [Jap]*

Address: Kikkoman Central Research Lab.

6026. Omae, Kinjiro; Tachibana, Yuzuru. 1981. The book of sushi. Tokyo, New York and San Francisco: Kodansha International Ltd. Distributed through Harper & Row. 127 p. Foreword by Jean-Pierre Rampal. Illust (some color; 40 color plates). Index. 27 cm.

• **Summary:** Shôyu (soy sauce) is discussed in depth on pages 99-100. The section titled “Sushi shop vocabulary” (p. 20) states that *murasaki* refers to soy sauce, which is usually called “shoyu.”

The section on “Materials” (p. 56) states that soy sauce is absolutely essential to sushi—as essential as rice, rice vinegar, wasabi (nose-tinglingly sharp when freshly grated), pickled ginger, nori, and tea.

Natto and tofu (p. 49) are mentioned as sushi ingredients. Address: 1. Former chairman, Tokyo Sushi Association, then president of the Federation of Japan Sushi Shops.

6027. Photograph of various types of Chinese and Japanese of soy sauce sold in the San Francisco Bay Area. 1981.

• **Summary:** Back row (left to right; see next page): Superior Soy, Longevity Brand Soy Sauce, Superior Soy, and Westbrae White Tiger Tofu Sauce. The first three brands are Chinese style.

Front row (L-R): Westbrae tamari, illegible, Kikkoman soy sauce in table-top dispenser, illegible. Longevity Brand Soy Sauce.

The Chinese brands were purchased in San Francisco Chinatown by William Shurtleff, who also shot the photo at home on Mountain View Dr. in Lafayette, California.

6028. Sakata, Dai. 1981. *Furushô Masakichi den* [Biography of Masakichi FURUSHO]. Kumamoto, Japan: Aso-sha. 261 p. [Jap]*

• **Summary:** Mr. Furusho was a merchant in Kumamoto, Kyushu, Japan. His father started making shoyu in 1906 (Meiji 39) and received a kunsho award for promoting business.

6029. San-Jirushi International, Inc. 1981. *Introducing to America San-J Tamari, the natural soybean sauce. A superior all-purpose seasoning and flavor enhancer.* Colonial Heights, Virginia: San-Jirushi International. 6 p. Undated. 28 cm.

• **Summary:** Cover: Nine bottles of San-J tamari (small glass and larger plastic) standing in a bed of soybeans against a reddish gold background. "Imported by San-Jirushi International, Inc." Exclusive national sales agent: Diamond Crystal Salt Company (Wilmington, Massachusetts).

Pages: (1) San-J Tamari is different: San-J is the only "genuine tamari." It is "made by traditional, natural fermentation of whole soybeans, water and salt. Its long aging process lasts from 12 to 18 months. No wheat is used." The origin of Japanese tamari and shoyu. "Tamari was popular in Japan by about 1260. In the mid-1600's, brewers began to dilute the traditional soybean-water-salt formula by adding wheat. This simplified and hastened the brewing process and was the origin of today's... shoyu." Natural tamari compared to common soy sauces (6 points). The San-Jirushi Corporation—"is the largest, most famous producers of genuine tamari in the world." The company trademark symbolizes the three large rivers that empty together into the Bay of Ise at Kuwana. The company began to manufacture tamari in 1804.

(2) The ideal meat entree seasoning. San -J Tamari is

essential for Japanese cuisine (sukiyaki, sashimi, sushi, tempura) and other Oriental dishes. With color illustrations. (3) San-J Tamari works flavor wonders for seafood, and salads, soups and sauces. Available in regular and low-salt. (4) Introducing San-J Tamari Teriyaki; a list of ingredients is given. Use for Beef teriyaki, Chicken teriyaki, Fish teriyaki, and Barbecue teriyaki. (5) How natural tamari is made: a centuries-old process in a modern, sanitary plant. "Because natural fermentation is best started in cold weather, Tamari production usually begins in late autumn or early winter." The process is described in detail and illustrated. The moromi is aged in 1200-gallon cedar wood vats in unheated buildings for at least 12 months. Address: Colonial Heights, Virginia.

6030. San-Jirushi International, Inc. 1981. *Introducing San-J tamari.* Colonial Heights, Virginia: San-Jirushi International. 8 p. 26 cm.

• **Summary:** This 8-panel fold-out brochure is printed with purplish-brown ink on beige paper. On the front panel is an illustration (line drawing) of a 150 ml bottle of "San-J Tamari—the natural soybean sauce (TM). Brewed by San-Jirushi Corp., Japan. Founded 1804." Contents: The natural soybean sauce. Made from choice whole soybeans, pure well water, and sea salt. Brewed naturally through the four seasons. Tamari is the traditional soy sauce. San-J Tamari is different: San-J Tamari is real tamari, real tamari is made entirely from soybeans, the first ingredient in San-J Tamari is whole soybeans, the flavor of tamari is due to proteins (which are slow to evaporate during cooking). Why tamari?: San-J Tamari is not only a superior seasoning—it is a natural flavor enhancer, San-J Tamari extends further, San-J Tamari can replace salt, San-Jirushi of Kuwana. An all-purpose seasoning and flavor enhancer: Color illustrations show recipe ideas. Nutrients per 100 grams of San-J Tamari and Tamari (Low Salt). How San-J Tamari is made (each of the 12 steps is illustrated):

"The cooked beans are mashed and shaped by an extruder into tiny balls about 1 inch in diameter called '*miso dama*.' The *miso-dama* are dusted with spores from a special mold called '*koji*' (*Aspergillus oryzae*) and incubated for 48 hours under carefully controlled temperature and humidity in an incubation chamber called the '*muro*.'"

"Matured koji is removed from the '*muro*' and mixed with salt water in large wooden vats to make the fermentive mash called '*moromi*.' The 1200 gallon cedar-wood vats containing '*moromi*' stand in unheated buildings for at least 12 months while the '*moromi*' mellows and matures.

"When fermentation is complete, free-running raw tamari—called '*kibiki*'—is drawn off through spouts at the bottom of the vats. The yielded liquids are filtered and cleared of oils and dregs, then carefully mixed and blended. The blended product is allowed to stand for several weeks while more oils and dregs are removed.

“The remaining mash is then removed from the vats and pressed to yield ‘*assaku*’ tamari.

“Raw tamari is pasteurized at 185° F (85° C) to eliminate all microorganisms and ensure against any further change in the product through fermentation. Pasteurization does not effect valuable enzymes contained in Tamari, and also contributes to its delicate color and flavor. Pasteurized Tamari is transferred to sterilized holding tanks and allowed to stand and clear for two more weeks. Then it is filtered again, bottled, inspected and shipped.” Address: Colonial Heights, Virginia.

6031. Schmidgall-Tellings, A. Ed; Stevens, Alan M. 1981. Contemporary Indonesian-English dictionary: a supplement to the standard Indonesian dictionaries with particular concentration on new words, expressions, and meanings. Chicago, Illinois: Ohio University Press. xv + 388 p. 24 cm. [Ind; Eng]

• **Summary:** Soy-related words (many are missing):

“Bungkil—peanut residue after the oil has been pressed out.

“Kacang hijau—mung beans. Kacang tojin—roasted peanuts with garlic. Note 1. Soybean is not mentioned here.

“Kècap manis—Indonesian sweet soy sauce.” Note 2. Plain Indonesian soy sauce is not mentioned here.

Note 3. Kedelai, kedelé—Not listed.

“Tahu—bean curd. Tahu pong—bean curd cut into small pieces and baked until it pops up. Tahu tempe—a side dish of tahu and tempe.”

Note 4: Tauco—Not listed.

“Témpé—a protein-rich cake of fermented soybeans. témpé bangsa—a small and insignificant nation. témpé pemuda—a good-for-nothing kid. témpé gembos—fermented beancake made from peanut residue.”

The Preface begins: “The form of Malay used in the Indonesian archipelago was already different from peninsular Malay when, on October 28, 1928, a nationwide youth congress held in Jakarta named Bahasa Indonesia, the Indonesian language, as the national language. Since August 17, 1945, when Indonesia declared its independence, the language has changed rapidly, especially in the area of vocabulary.” Address: 1. Freelance translator and author of many books and articles on the Indonesian language; 2. Prof. of Linguistics, Queens College and the Graduate Center, City Univ. of New York.

6032. Shandler, Michael; Shandler, Nina. 1981. The complete guide and cookbook for raising your child as a vegetarian. New York, NY: Schocken Books. xiv + 337 p. Index. 24 cm. [65 ref]

• **Summary:** On p. 22 soybeans and rice are used to illustrate protein complementarity. Fats survival plan (p. 70-71): Describes how to make clarified butter (ghee); it is superior to other fats for frying purposes and is not subject

to the same polymerization as vegetable oils. “Eggs do not constitute a cholesterol risk,” but “soy milk and tofu are... excellent high-protein substitutes for eggs if your children are allergic.” Good sources of protein during pregnancy include beans, grains, tofu, gluten, dairy products, and soy products. Use complementary proteins together. Tofu can be blended into creamy salad dressings.

“Homemade soy milk is deficient in vitamin B-12, vitamin D, and calcium. Commercial soy drinks for infants [infant formulas] are fortified with these and other nutrients but often contain sugar and other detrimental additives” (p. 110).

“After approximately 1 month of eating solid foods, a second series of foods can be introduced to your infant.” These may include puréed tofu or light miso soups (p. 116-17).

Soy-related recipes include: Whole wheat soy flakes (p. 206). Tamari broth with dumplings (and soy flour, p. 216). Nondairy cream of vegetable soup (with tofu, p. 216). Summer cucumber tofu soup (p. 218). Soyburgers (with whole soybeans, p. 222-23). Barbecued tofu sandwiches (p. 226). Tofu cheesie macaroni (p. 232). Tofu noodle casserole. Fried tofu over rice. Tomato tofu lo mien (p. 233-34). Tofu and rice seaweed rolls (p. 236). Pizza (with soy flour and gluten flour, p. 236-37). Creamed spinach with tofu (p. 254). Tamari-glazed “trees” (Broccoli, p. 255). Vegan dips (p. 264-65): Avocado tofu dip. Cucumber tofu dip. Nondairy dressings (p. 271-72): Tofu dressing. Nut and soy milks (p. 311-13): Fortified soy milk. Carob soy milk. Spiced soy milk. Almond milk. Cashew milk. Coconut milk. Tahini milk. Nondairy sandwich fillers (p. 320-21): Soy sandwich “meat” (with whole soybeans and tamari soy sauce). Tofu sandwich spread.

6033. Sing, Phia. 1981. Traditional recipes of Laos: Being the manuscript recipe books of the late Phia Sing, from the Royal Palace at Luang Prabang, reproduced in facsimile and furnished with an English translation, by Phouangphet Vannithone and Boon Song Klausner. London: Prospect Books. Distributed by the University Press of Virginia (Charlottesville). 318 p. See p. 23. Illust. by Thao Soun Vannithone. Map. Index. 24 cm. [30* ref]

• **Summary:** The section titled “Fish sauce and *padek*” states (p. 23): “*Nam pa*, fish sauce, is an ingredient found in almost every recipe [in this cookbook]. Every South-East Asian country has its own fish sauce; *nuoc mam* in Vietnam, *tuk trey* in Cambodia, *nam pla* in Thailand, *ngan-pya-ye* in Burma, and so on. Fish sauce plays the same role in this region as soy sauce in China and Japan. It is prepared by steeping fish in brine for a long time...”

Soy is not mentioned in this book—not even soy sauce (except in the passage quoted above). The illustrations are superb. Phia Sing lived ca. 1898-1967. Address: Laos.

6034. Stobart, Tom; Owen, Millie. 1981. The cook's encyclopedia: Ingredients and processes. New York, NY: Harper & Row, Publishers, Inc. xii + 547 p. Illust. 25 cm. [20 ref]

• **Summary:** Soy related entries include: Bean curd (incl. tofu). Bean-curd cheese [fermented tofu]. Bean paste and bean sauce (incl. Red bean paste) is sweet and made from adzuki beans. Yellow bean paste is made from soybeans and is salty and pungent. "Fermented salted black beans" is made from a black variety of soybeans; these salted black beans can be used to make "black bean sauce" which can be used as a flavoring in fish, lobster, chicken, and pork dishes.

Soybean (incl. soya bean, soja bean, flour {"pork soya links" used in Britain during World War II}, sprouts, soy oil, soy sauce, soymilk, vegetable yogurt [soy yogurt], vegetable cheese [soy cheese], tempeh, bean curd skin [yuba], miso, tamari, soy sauce, soy protein isolate, soy granules or grits, textured plant protein [textured soy protein]). The name in four European languages is given.

Soy sauce or shoyu (It "is said to be one of the ingredients of Worcestershire sauce." Incl. the "very heavy Indonesian *ketjap* {*ketjap manis* or *ketjap benteng*}, which is a type of soy sauce,..."). The name in four European languages is given.

Textured plant protein (a high-protein foodstuff manufactured from plants (soybeans, peanuts, wheat, cottonseed, etc.). "Originally it was aimed at the vegetarian market." Also called "textured vegetable protein" in the USA. Incl. textured soy flour, textured soy protein gel and fibers).

Worcestershire sauce: Begins with a history (starting in 1837) based on the fanciful story so widely known. "Thus was born what is probably the world's best-known and most ubiquitous bottled sauce, one which has become a standard ingredient." Note: How about soy sauce? "The exact formula is secret. Although it is much imitated, nobody seems to be able to get quite the taste of the original."

Also contains entries for adzuki, ketchup ("Javanese *katjap* [ketjap], for example, is a very sweet soy sauce"), peanut (groundnut or monkey nut), pulses, seaweed, sesame seed, tahini.

Note: Millie Owen prepared the American edition of this book. Address: 1. Hassocks, Sussex, England; 2. Northfield, Vermont.

6035. Sunset menus & recipes for vegetarian cooking. 1981. Menlo Park, California: Lane Publishing Co. 96 p. Illust. Index. 28 cm.

• **Summary:** Written and compiled by the editors of Sunset Books and *Sunset Magazine*, this is a lacto-ovo vegetarian cookbook. In 1986 the title was shortened to simply *Vegetarian Cooking*.

Soy-related: Hot & sour soup (with "4 ounces tofu, diced" and "1 tablespoon soy sauce," p. 29). Soybean soup,

bistro style (with "2½ cups cooked soybeans {page 49}," p. 30). Cooking beans, soybeans ("Strong-flavored, near-perfect protein source. Refrigerate while soaking. 3 to 3½ hours," p. 49). Sweet & sour soybeans (with "2½ cups cooked soybeans {page 49}," p. 51). Sesame tofu sticks (with "About 1 pound medium-firm tofu," and "Teriyaki sauce (recipe follows)," p. 59-60). Savory vegetables & tofu, p. 61. Vegetable sauces, Herbed tofu sauce, p. 69. Address: Menlo Park, California. Phone: 415-321-3600.

6036. Wood, B.J.B. 1981. Introduction of new fermented foods into Western culture. *Advances in Biotechnology* 2:467-72. Also in Proceedings of the VIth International Fermentation Symposium; London, Ontario. Academic Press, New York, pp. 467-472. [6 ref]

• **Summary:** Discusses soy sauce, shoyu, miso, tempeh, sake, and soy milk. Address: Dep. of Applied Microbiology, Univ. of Strathclyde, George Street, Glasgow G1 1XW, Scotland.

6037. World of God. 1981. The cookbook for people who love animals. Route 2, Box 98E, Brooksville, Florida 33512. 176 p. Edited by Butterflies. Illust. and cover design by Flowers. Recipe index. 26 cm. Spiral bound. The 4th edition was copyright in 1987. [31 ref]

• **Summary:** The top of the title page reads: "Over 300 totally vegetarian recipes. From beginner to gourmet. No meat. No eggs. No dairy. No honey." At the bottom of the title page is a field of red and orange flowers, with butterflies around them, and a rayed sun overhead against a light yellow background. This is a good, spiral-bound collection of vegan recipes, which are straightforward, appetizing, and nutritious. Special section includes recipes for cat and dog food. The book is interspersed with nice quotes about vegetarianism, veganism, and animal rights from great thinkers such as Longfellow, Emerson, Schopenhauer, John Galsworthy, Jeremy Bentham, Cicero, Herbert M. Shelton, John Ruskin, John Stuart Mill, Tagore, Plutarch, Tolstoy, Cardinal Newman, George Bernard Shaw, Thoreau, St. Francis, Leonardo da Vinci, Harriet Beecher Stowe, Romain Rolland, and Friedrich W. Nietzsche.

The glossary of ingredients lists okara, soy powder, tamari, tofu. "Soy powder [whole soy flour]—Made from cooked soybeans, it contains all the natural oil of the soybean. Used in casseroles, sweets, and for making soy milk. It can also be used as an egg substitute. Use 1 heaping tablespoon soy powder and 2 tablespoons water in place of 1 egg."

Recipes with soyfood terms in the title include: Quick instant soy milk (p. 12). Soy milk. Soy yogurt [non-fermented]. Soy margarine (p. 13). Soy tofu. Scrambled tofu. Tofu cottage cheese (p. 14). Tofu cream cheese (p. 15). Bran muffins (with soymilk, p. 22). Most baked goods include soymilk in place of dairy milk. Miso soup (p. 37). Tofu eggless salad. Okara salad (p. 54). Tofu potato salad (p. 56).

Tomato tofu salad (p. 57). Tofu tahini dressing. Blond miso dressing (p. 67). Orange tamari dressing. Soy mayonnaise (p. 68). Miso spread (p. 69). Hot miso dressing (p. 73). Tahini-tamari sauce (p. 75). Stuffed tomato with soybeans (p. 92). Tofu saute (p. 104). Potatoes with tofu. Noodle tofu (p. 105). Tofu bean-thread saute (p. 106). Matzoh tofu bake (p. 124). Soy burgers (p. 131). Okara cylinders (p. 132). Tofu cheesecake (p. 141). Carob tofu cream pie (p. 143). Recipes for dogs and cats: Okara delight (p. 163). Soybean mash (p. 164). Instant soybean-meal dinner (p. 165).

At the back is a 6-page section titled "The Spirit of Ahimsa" by H. Jay Dinshah, president of the American Vegan Society. It is excerpted from his books "Out of the Jungle" and "Here's Harmlessness." Address: Brooksville, Florida.

6038. Yan, Martin. 1981. The Yan can cook book. Garden City, New York: Doubleday & Company Inc. 355 p. Illust.

• **Summary:** This Chinese cookbook, published in both hardcover and paperback, contains at least 15 recipes using bean curd (tofu), especially in the chapter titled "Bean Curd, Eggs, and Other Protein-Rich Foods" (p. 179-99). Tofu is usually referred to as "soybean curd" or "bean curd." Pages 185-87 contain a recipe for making tofu at home, and give a nutritional comparison of firm bean curd, chicken eggs, ground beef, and cottage cheese. In the chapter "Saucy Dips" is a recipe for "Black Bean Sauce" using "salted black beans" [fermented black soybeans].

The glossary (p. 313-) gives good descriptions of the following soyfoods: Black beans salted, brown soy sauce, Hoisin sauce, Hot bean paste, MSG (monosodium glutamate), soy sauce, bean curd, and soybean sheets dried (yuba).

The author is the star of a popular daily Chinese cooking show named "Yan Can," which he has hosted since 1978. Born and raised in Kwongchow, China, he left China in 1963 and began cooking at the age of 13 as an apprentice in a popular Hong Kong Restaurant (owned by his uncle) and at age 18 he had earned a diploma from the Overseas Institute of Cookery. Arriving in the USA in 1969, he earned a masters degree from the University of California at Davis.

6039. Yepson, Roger B. ed. 1981. Home food systems. Emmaus, Pennsylvania: Rodale Press, Inc. 475 p. Illust. Index. 29 cm. [15 ref]

• **Summary:** Extensive, positive information on soyfoods is contained in the chapters on Grains (and bread, see p. 35), Beans (p. 94-95, 99-115; tofu, tempeh), Sprouting (p. 120, 125, 127), Canning (p. 203), and The Home Dairy (p. 298; soymilk, soy yogurt). Reviews and photos of many soyfoods books are given, with a sample recipe from most.

Pages 298 notes: "Soymilk is low in riboflavin (vitamin B-2), totally lacking in vitamin B-12, and has drastically less calcium than dairy milk. On the other hand, soymilk is

lower in carbohydrates, has 12% fewer calories, 25% less fat, no cholesterol, and contains 15 times more iron than cow's milk." Address: Emmaus, Pennsylvania.

6040. Yokotsuka, Tamotsu; Sasaki, M. 1981. Risks of mycotoxin in fermented foods. *Advances in Biotechnology* 2:461-66. [37 ref. Eng]

• **Summary:** "In the production of Japanese fermented foods such as shoyu, miso, and sake, the major enzyme source is *Aspergillus* molds such as *A. oryzae* and *A. sojae*. Many investigators have failed to find a single aflatoxin producer among the *Aspergillus* molds used for food fermentation. Some cultures produced fluorescent compounds having Rf values resembling those of aflatoxins, further investigations, however, indicated that these compounds were 7 kinds of nontoxic pyrazine compounds including flacacol, isocoumarin compounds, lumichrome, and other compounds than aflatoxins. *Aspergillus* molds were also checked for their production of Aspergillilic acid, Beta-nitropropionic acid, kojic acid, and oxalic acid. Results indicated no possible hazard caused by these compounds in Japanese fermented foods." Address: Kikkoman Corp., Noda-shi, Chiba-ken, Japan.

6041. Young, Mala. 1981. Main dishes. Newton Abbot, Devon, England: David & Charles. 48 p. Illust. No index. 21 cm. Series: Health Food Cooking.

• **Summary:** Page 8 notes that miso and tamari, both fermented soya products, are useful ingredients—as are aduki beans and seaweeds. Soy-related recipes include: Mixed bean and grain stew (with miso and tamari, p. 20). Soya beans and vegetables in miso sauce (p. 22-23). Aduki pâté and salad (p. 24-25). Winter vegetable and miso pie (p. 38).

6042. **Product Name:** [GranoVita Sandwich Spread].

Foreign Name: GranoVita Soja-pikant.

Manufacturer's Name: DE-VAU-GE Gesundheitswerk GmbH.

Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

Date of Introduction: 1981?

Ingredients: Water, vegetable oils and fats, egg protein, soya protein, spices, wheat gluten, glucose, salt, yeast, rolled oats, soya sauce, bread crumbs, onions.

Wt/Vol., Packaging, Price: 80 gm wholesales for DM 2,35 or 200 gm for DM4,55.

New Product—Documentation: Manufacturer's catalog.

1981. May 1. DE-VAU-GE Sortiments-Preisliste. 4 p.

Manufacturer's catalog. 1983. GranoVita. Health-food & natural food from Germany. 6 p. plus 3-page price list. With color photos and ingredients for all products.

6043. Kimlan. 1981? Kimlan soy sauce. Taiwan. 15 p. Undated. [Eng; Chi]

• **Summary:** Page 15 notes: “For over 40 years, Kimlan soy sauce has been the favorite of the Chinese people and now it is fast becoming a favorite the world over... Kimlan, established in 1936, is one of the most experienced soy sauce makers in Taiwan. It has grown to become Taiwan’s most popular soy sauce. As it has grown, production facilities were expanded in 1957, 1967 and 1970. Yet the expansion did not keep up with the demand. Therefore, in 1977, a totally new plant was built at Tao Yuan, Taiwan.” Daily production is now 15,000 kg.

In 1979 Kimlan’s Lightly Salted Soy Sauce was awarded a “Praise of Excellent Company’s New Product” by the Food Science and Technology Academy of Taiwan (ROC). “Of the more than 400 soy sauce makers in Taiwan, Kimlan is the leading seller by far. It has held this position since it was established in 1936.” The company has approximately 300 employees. This company booklet contains many photos. Address: Tao Yuan, Taiwan.

6044. **Product Name:** [Nutana Frikalett/Rissole].

Foreign Name: Nutana Rissole.

Manufacturer’s Name: Nutana Helsekost.

Manufacturer’s Address: Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.

Date of Introduction: 1981?

Ingredients: Soya protein, egg white powder, spices, water.

Gravy: Wheat flour, soya sauce, vegetable bouillon, onions.

Wt/Vol., Packaging, Price: 450 gm can.

How Stored: Shelf stable.

New Product–Documentation: Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. “Ready to serve. Just heat in saucepan. To be served with boiled or mashed potatoes and vegetables.” Labels in Danish, Dutch, and Finnish.

6045. **Product Name:** [Nutana Soya Sausages].

Foreign Name: Nutana Soja-poelser.

Manufacturer’s Name: Nutana Helsekost.

Manufacturer’s Address: Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.

Date of Introduction: 1981?

Ingredients: Water, sunflower oil, textured soya protein, gluten, grape sugar, sea salt, egg white powder, oat flakes, soya sauce, vegetable consistency, spices, vegetable flavouring, smoke flavour, colour (caramel, not ammonized). Water: water, vegetable bouillon.

Wt/Vol., Packaging, Price: 385 gm can, of which 230 gm is sausages.

How Stored: Shelf-stable.

Nutrition: Per 100 gm: Calories 200, protein 13 gm, fat 15 gm, carbohydrate 4 gm.

New Product–Documentation: Manufacturer’s catalog. 1981. Nutana Helsekost. 19 p. Contains a photo of and

detailed information about every product. “For dinner or lunch. Ready to serve. Heat or fry. Serve with bread, potato salad, or mashed potatoes.” Labels in Danish, Dutch, and Finnish.

6046. **Product Name:** [Nutana Soya Pro (With Beef-Like Flavor, or with Chicken-Like Flavor)].

Foreign Name: Nutana Soya Pro (Soja-Oxlett, or Soja-Kylett).

Manufacturer’s Name: Nutana Helsekost.

Manufacturer’s Address: Ringstedvej 531, DK-4632 Bjaeverskov, Denmark.

Date of Introduction: 1981?

Ingredients: Beef-Like: Water, textured soya protein, sunflower oil, wheat flour, egg white powder, yeast extract, soya sauce, grape sugar, sea salt, spices, vegetable aroma.

Wt/Vol., Packaging, Price: 400 gm can, of which 170 gm is Soya Pro. The rest is sauce.

How Stored: Shelf-stable.

Nutrition: Beef-Like: Per 100 gm: Calories 130, protein 12 gm, fat 7 gm, carbohydrate 4 gm.

New Product–Documentation: Manufacturer’s catalog.

1981. Nutana Helsekost. 19 p. Contains a photo of and detailed information about every product. “For dinner. Ready to serve, just heat in a saucepan. Serve with potatoes and vegetables. The sauce may be varied with fried onions, tomatoes, chopped parsley, and mushrooms. Soya Pro can also be dipped in egg and bread-crumbs and fried. Shurtleff. 1981. Overseas Adventist Food Companies. p. 6. “In 1981 Nutana was doing the most advanced work with soy of any Adventist food company outside the U.S. They started in the early 1960s importing spun protein fibers (SPF) from the U.S. Now they import soy fibers spun by DE-VAU-GE in Germany and use them to make a range of meat analogs. Labels in Danish, Dutch, and Finnish.

Alfa-Laval. 1988, June. Soyfoods: Old traditions with new potentials. p. 9. Shows a color photo of the front of the can. The product is now named Nutana Soja-Kylett. On the label is a photo of several round deep-fried cutlets, one cut in half, on a bed of rice.

6047. Iizuka, Hiroshi. 1982. Re: Early history of shoyu. Letter to William Shurtleff at Soyfoods Center, Jan. 8. 2 p. Typed, with signature on letterhead. [1 ref]

• **Summary:** As Dr. Yokotsuka suggested in his letter [of 22 Dec. 1981], the word *chiang-yu* seems most likely to have been used for the first time in Japan. The first reference in Japan [to shoyu or chiang-yu] is generally regarded as the Ekirinhon-setsuyoshu [Ekirinbon]. The best history of shoyu he can think of is the Kikkoman Shoyu-shi (1968). “The best shoyu historian that we know is Mr. Morio Ichiyawa [sic, Ichiyama], the author of the original edition of the above-mentioned book. Mr. Ichiyama used to work for Kikkoman and was long engaged in the compilation of the company’s

history. After having served as the [Noda] City Museum Curator, he leads a retired life in Noda City. He is 85 years old.” Address: Senior Asst. Manager, Planning, International Operations Dep., Kikkoman Corp., 25 Kanda Nishiki-cho 1-chome, Chiyoda-ku, Tokyo 101, Japan. Phone: 03-233-5610.

6048. Sass, Lorna J. 1982. Budget-conscious Americans are hitting the soy—its not just sauce. *Chicago Tribune*. Jan. 21. p. S_A151.

• **Summary:** This article first appeared as: Sass, Lorna J. 1981. “Soy foods: Versatile, cheap and on the rise.” *New York Times*. Aug. 12. p. C1, C6. It first appeared in the *Chicago Tribune* on 29 Oct. 1981 (p. N_B19).

6049. Jaccard, Anne-Marie; Krieger, Verena. 1982. Une graine pour l’an 2000 [A grain for the year 2000]. *Illustré (Lausanne, Switzerland)* No. 4. p. 59-63. Jan. 27. [Fre]

• **Summary:** This grain is the soybean, which is imported in huge quantities from the USA to Europe. The article discusses the soybean plant, tofu, miso, tamari and shoyu, tempeh, homemade soy sprouts, and yuba.

A photo shows Paul Simon, a specialist in macrobiotic food at Lausanne. He makes tofu in the traditional way using nigari, and serves it with tamari and ginger. “Fresh tofu, prepared on the spot, is difficult to find in Switzerland. In the French-speaking cantons of Switzerland, there are only two places: (1) The macrobiotic Center of Lausanne, 7 ruelle de Bourg, and (2) Le Grain d’Or, 7 rue Voltaire, Geneva.” Recently a factory opened at Zurich, and another will open soon at Nyon. In the two macrobiotic restaurants of French-speaking Switzerland (Romandie), tofu is found regularly à la carte: at “The Bio” in Lausanne, and “La Moisson” in Geneva.

6050. **Product Name:** Tofu Sunny Eggless Salad.

Manufacturer’s Name: Ashland Soy Works.

Manufacturer’s Address: 280 Helman St., Ashland, OR 97520. Phone: 503/482-1865.

Date of Introduction: 1982. January.

Ingredients: Tofu, oil, tamari, vinegar, lemon juice, mustard, celery, onion, garlic, spices.

Wt/Vol., Packaging, Price: 16 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1982. 3 by 2.25 inches. Self adhesive. Red on yellow. “No preservatives or additives.” Talk with Diana Muhs. 1988. Feb. 10.

6051. Morinaga, Takamasa. 1982. [Re: On saishikomi or double-fermented shoyu]. Letter to William Shurtleff at Soyfoods Center, Jan.—in reply to inquiry. 2 p. [Jap; eng+]

• **Summary:** Saishikomi shoyu is said to have originated in about 1780 in Yanai city, Yamaguchi prefecture; this is written in the History of Yanai city in Yamaguchi-ken. (Note:

Yamaguchi prefecture is the southwestern-most prefecture on Honshu, Japan’s main island, located just to the north of Kyushu.) Traditionally saishikomi shoyu was produced in the five prefectures in the Chugoku-Chiho of southwestern Honshu: Yamaguchi, Shimane, Hiroshima, Okayama, and Tottori. Recently, however, its has begun to spread throughout Japan.

In the old days, saishikomi shoyu was another name for *Kanro Shoyu*. The latter was a special item (*tokusan-hin*) of Hiroshima and Yamaguchi prefectures, but there is very little documentation for this early product. Later [after World War II] the two names were unified by the Japanese Agricultural Standards (*Nihon Norin Kikaku*).

Generally saishikomi shoyu is used as a “pouring shoyu” (*kake-shoyu*), especially valued on sashimi and sushi. But recently it is also starting to be used as an all-purpose shoyu in cooking.

According to the Japan Agricultural Standards (JAS) there are two types of saishikomi shoyu: *Honjozo* type (traditionally fermented) and *shinshiki-jozo* type (semi-fermented using HVP = *aminosan-eki*). Yamaguchi prefecture produces the largest amount of *Honjozo*. The three largest manufacturers of this product, in descending order of size, are: Yanai Shoyu Ltd., K.K. Sagawa Shoyu-ten, and K.K. Shimaya. K.K. Shimaya produces a “Soft Type” of Saishikomi (1.8% total nitrogen) which is developing a good reputation.

The above-mentioned *shinshiki-jozo* type of saishikomi shoyu is also made in Chugoku-Chiho, but mostly on the northern side, bordering the Japan Sea in Tottori and Shimane prefectures. In addition, Kinoene Shoyu K.K. of Noda city in Chiba prefecture also started to sell this type of saishikomi. They use up to 20% of an ingredient named “sweetness extract (*Umasa Ekisu*).” Address: K.K. Shimaya, Fukukawa 637, Oaza, Shin-Nanyo-shi, Yamaguchi-ken, Japan.

6052. Murphy, P.A. 1982. Phytoestrogen content of processed soybean products. *Food Technology* 36(1):60, 62-64. Jan. [32 ref]

• **Summary:** The phytoestrogens, genistin and daidzin; their agluticones, genistein and daidzein; and coumesterol are the principal isoflavonoid substances found in soybeans. These 5 types of soy phytoestrogens (which are hormones) were separated using HPLC from soybeans, toasted defatted soyflakes, textured soy protein, soy-containing breakfast patties, soy sprouts (germinated for 5 days), tofu, soy isolates (acid precipitated), and fermented soy sauce. There was a general decrease in genistin concentration with additional processing. But there is a significant carryover of soy phytoestrogens into processed soy protein products. Thus soy products have high estrogenic activity. Analysis of phytoestrogens in food mixtures may be a useful technique for estimating soy protein concentration in foods. Address:

Dep. of Food Technology, Iowa State Univ., Ames, Iowa 50011.

6053. **Product Name:** Upcountry Seitan.

Manufacturer's Name: Upcountry.

Manufacturer's Address: Huntington Rd. (P.O. Box 14x), Worthington, MA 01098. Phone: 413-238-5341.

Date of Introduction: 1982. January.

Ingredients: Organic whole wheat flour, water, tamari, cooked with kombu (sea vegetable).

Wt/Vol., Packaging, Price: 1 lb packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.

How Stored: Refrigerated.

Nutrition: Per 4 oz.: Calories 70, protein 15 gm, fat 1 gm. Plus 6% of the RDA for vitamin C, 8% for riboflavin, thiamine, and niacin, and 10% for iron.

New Product–Documentation: Label printed in booklet titled "Cooking with Seitan." 1982. Joan Donovan states that the color was deep red and gold with brown printing. "A high protein natural food. Delicious served as a sandwich or cut for a stew or casserole."

Leaflet (6 panels), about 1982, with a description of seitan and recipes for sandwiches, baked squash with seitan, staple seitan, and seitan with pasta.

R. Leviton. 1983. *Vegetarian Times*. Jan. p. 32-37. Mochi, amazake and seitan: Introducing three new foods from the Orient. "Seitan has found a new home in the U.S. and for Winston and Joan Donovan it has proved to be both a life-sustaining and livelihood providing wholesome food. The Donovans launched their Upcountry Seitan business from their Worthington, Massachusetts, farmhouse in January 1982, largely because Winston had been diagnosed as having an incurable kidney disease which even dialysis couldn't halt. After a consultation at Boston's East/West Center, he adopted a macrobiotic diet featuring seitan and, in the past year, has regained his health and resolved his kidney ailment. For Winston, who drastically changed his diet in his forties, seitan's chief attraction is that it resembles meat enough in taste and texture to satisfy most longings for beef and veal. The entire family is now vegetarian." Describes how the Donovans use high-gluten hard red spring wheat to make 300 lb of seitan strips each 6-day week in their tidy 400 square foot shop. After kneading with water, the elastic gluten is called *kofu*. "The Donovans serve seitan in a variety of ways: deep-fried, fresh in slices, spiced with garlic and fennel, finely chopped and mixed with hummus, or in pita bread accompanied by sauerkraut and mustard." A photo (p. 35) shows Winston and Joan Donovan in their seitan shop with their seitan, both packaged (in the same type of plastic tray or tub used to sell tofu) and on a plate.

Barbara and Leonard Jacobs. 1985. *East West Journal*. Oct. p. 38-39. "Flour power! Cooking with seitan, the delicious natural food from grain." "Upcountry Seitan, begun three and a half years ago [i.e., early 1982] by Win

Donovan, is now owned and operated by Sandy Chianfoni. Sales have increased by 200% over the past two years and Chianfoni is currently making 600 pounds of seitan each week. The kneading and rinsing processes are automated, but the remaining steps are done by hand. Chianfoni has been experimenting with several desserts which use the starch water from the washing process. This starch has the same thickening properties as cornstarch and can be used to prepare custards and puddings... Upcountry Seitan in Lenox, Massachusetts, is the largest manufacturer we located in a recent survey of the industry. It makes 600 pounds each week and distributes through six states." Page 39 shows 3 photos of Upcountry's seitan-making operation.

Barbara and Leonard Jacobs. 1987. *Cooking with Seitan: Delicious Natural Foods from Whole Grains*. Current U.S. seitan manufacturers include Upcountry Seitan in Lenox, Massachusetts, the largest known producer in America. The company is now owned and operated by Wendy Rowe and Sandy Chianfoni. They get a yield of 1.33 (i.e. 90 pounds of flour result in 120 pounds of seitan).

Talk with Sandy Chianfoni of Upcountry Seitan. 1991. Nov. 16. She moved to Boston in 1978 and in about Aug. 1983 she bought Upcountry Seitan from Win Donovan. She started production on 23 Oct. 1983. Win wanted to sell the business because it was growing and he did not want to take it to the next level. He was in good health and he did not yet know that he had cancer. He was in the process of selling his home and moving to Becket, with the Kushi Institute in western Massachusetts. He was planning to take over supervision of the property. He liked starting the business but he did not enjoy the ongoing process of running it. Upcountry was very small at the time Win sold it. Mark Betinis, who worked for him, drove the product to Boston (mostly to Bread & Circus) once a week, then Charley Kendall was distributing it with his own products to the major natural food stores in New York City. He may also have sold a little by UPS. They sold about 36 cases a week on average. He had no walk-in cooler or distributor. In June of this year she moved to a larger factory (P.O. Box 76, Lenox Dale, MA 01242), increasing to 4,700 square feet from 1,000. She wants to increase her volume because she knows the demand is there. Since the starch from her gluten process was clogging up local sewage pipes, she now has to settle out the solids and then have them pumped out. She used to make a pudding with her wheat starch. Launched in 1985, it was named "Cup o' Puddin'" in Maple-Walnut and Almond flavors. It was delicious, but she great difficulty bringing it to a mass-production scale. Now she would like to try to make a drink with it. That is one of the main reasons there are not more gluten makers in existence. There are three countries that export a lot of gluten: Australia, Germany, and the USA.

Talk with Joan Donovan, formerly of Upcountry Seitan. 1991. Nov. 17. Their company had only one commercial

product—the basic seitan. They experimented with a ginger and shiitake mushroom flavor but never really launched it. Upcountry was the first company on the East Coast to package seitan. They got the idea of using tofu tubs from New England Soy Dairy. It was packaged partly immersed in some of the tamari broth to help preserve it and keep it from molding. Initially it was sold as a ½-pound loaf in the package; later it was sold sliced. It was sold refrigerated and a shelf life of about 5 days. Worthington is a very small town. Winston, who was a carpenter, built the home on Huntington Road; they made the seitan in a shop adjoining their home. Charles Kendall now lives in that house. She learned how to make seitan at an informal macrobiotic cooking session, either from Ann Burns or a man named Jim. Her husband had eaten meat and potatoes all his life, so he wanted to tell others that there were alternatives. He died of cancer in 1986. Talk with Joan Donovan. 1991. Dec. 7. She cannot find a copy of the original label.

Label purchased at Berkeley Natural Grocery Co., California 1991. Nov. 5.5 by 4.5 inches. 8 oz molded plastic (high-density polyethylene) tray with heat-sealed, peel-off plastic film lid. Brown, green, and orange on white. Illustration of an orange sun rising over green mountains. See-through area above mountains. “Delicious ready to eat meat substitute. No cholesterol. Higher in protein than tofu. Frozen. Retail for \$2.99. Ingredients: Organic stoneground whole wheat flour, water, tamari, kombu (sea vegetable). Upcountry, Lenoxdale, MA 01242.” Circle K kosher symbol.

Talk with a person in Massachusetts who is very knowledgeable about seitan. 1992. July 2. In recent years, Upcountry has given seitan a bad image. Their seitan tastes like a wet sponge. They don’t develop the gluten well enough.

6054. Westbrae Natural Foods. 1982. Distributor catalog and pricelist. Jan. 1982. Emeryville, California: Westbrae. 16 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in dark blue on a tan background. Address: 4240 Hollis St., Emeryville, California 94608. Phone: (415) 658-7518 (orders).

6055. Wood, Brian J.B. 1982. Soy sauce and miso. *Economic Microbiology* 7:39-86. Jan. A.H. Rose, ed. Fermented Foods. [50 ref]

• **Summary:** Contents: 1. Introduction. 2. The preparation of soy sauce: Introduction, preparation of raw materials (the beans, wheat), mixing, koji, moromi. 3. Of beans, microbes, and miso: Beans, microbes, miso. 4. Trade in soy sauce: Introduction, statistics. Table 1 (p. 64-66) shows exports of soy sauce in 1978, in tonnes (metric tons) from Hong Kong, Korean Republic, Singapore, Japan, and total, to almost every country in the world (with each country’s population in millions), grouped by region as follows:

1. North America: Canada, USA (#1)—Regional total

imports: 6,052.3 tonnes.

2. South and Central America [and Caribbean]: Argentina (#3 in region), Bolivia, Brazil, Chile, Costa Rica, Ecuador, El Salvador, Guatemala, Guyana, Honduras, Mexico (#2), Nicaragua, Panama, Paraguay, Surinam, Venezuela (#1), Granada, Jamaica, Trinidad and Tobago, total. Former Dutch West Indies—Regional total imports: 1,046.4 tonnes.

3. Europe: Austria, Belgium, Czechoslovakia, Denmark, Finland, France (#4 in region), Germany (West #3), Greece, Italy, Netherlands (#2), Norway, Portugal, Spain, Sweden, Switzerland, UK (#1), USSR—Regional total imports: 3,017.7 tonnes.

4. Near and Middle East: Bahrain (#3), Egypt, India, Iran (#2), Iraq, Jordan, Kuwait, Oman, Qatar, Saudi Arabia (#1), United Arab Emirates, Yemen Arab Republic—Regional total imports: 1,193.5 tonnes.

5. Far East and Western Pacific: Brunei, Hong Kong (#3 in region), Indonesia, Japan, Korea (South), Macao, Malaysia (#2), Philippines, Sabah (#1; A state of Malaysia from 1963; Formerly British North Borneo), Sarawak (A state of Malaysia from 1963), Singapore, Taiwan, Thailand—Regional total imports: 3,139.4.

6. Pacific and Australasia: Australia (#1 in region), Cook Islands, Christmas Islands, Fiji, Guam (#2), Nauru, New Caledonia, New Hebrides, New Zealand, Oceania n.c.s. (#3), Papua New Guinea, Portuguese Timor, Samoa and Tonga, Solomon Islands, Tuvalu (Ellis Island), U.S. Oceania—Regional total imports: 1,647.5 tonnes.

Note: This is the earliest document seen (March 2010) concerning soybean products (soy sauce) in Kiribati (Christmas Islands), in Nauru, in Qatar, in Portuguese Timor (later renamed Timor-Leste [East Timor]) or in Tuvalu. This document contains the earliest date seen for soybean products in Kiribati (Christmas Islands), in Nauru, in Qatar, Portuguese Timor, or in Tuvalu (1978); soybeans as such have not yet been reported.

7. Africa: Algeria, Canary Islands, Ethiopia, Gambia, Ghana, Kenya, Libya, Malagasy, Malawi, Mauritius (#2 in region), Nigeria, South Africa (Republic of, #1), Sudan, Réunion Islands (#3), Tanzania, Zaire. Other African countries—Regional total imports: 365.7 tonnes. World total imports: 15,731.5 tonnes, of which 6,192.8 tonnes from Hong Kong, 1,233.5 tonnes from South Korea, 1,713.6 tonnes from Singapore, 6,591.6 tonnes from Japan. The value in pounds sterling and in pounds sterling per tons of soy sauce is given for each exporter.

Other tables show: (2) Soy sauce exports (in tonnes and value) each year from 1976 to 1976 from Hong Kong, South Korea, Singapore, and Japan. A large percentage of Hong Kong’s exports are re-exports (probably from China). (3) Total soy sauce exports from Japan, 1976-1978, by container type, with amount and value. (4) Soy sauce and miso production in Japan every 5 years from 1965 to 1978

(in tonnes). (5) Soy sauce and miso production in Japan for export in 1976, 1977, and 1978. Miso production (in tonnes) averaged about 40% of soy sauce production, and miso exports (in tonnes) averaged about 13% of soy sauce exports. (6) Imports of soy sauce into Hong Kong, Singapore, and the USA from exporting countries in 1978 (with figures for exports from China in 1976 and 1977). (7) Re-exports of soy sauce (made in China) from Hong Kong and Singapore in 1978 to major importing countries worldwide, by region, by country. Small countries that are the destination of this soy sauce include: Honduras, Nicaragua, Panama, Venezuela, Trinidad and Tobago, Former Dutch West Indies [also called Netherlands Antilles; they are part of the Lesser Antilles and consist of two groups of islands in the Caribbean Sea: Curaçao and Bonaire, just off the Venezuelan coast, and Sint Eustatius, Saba and Sint Maarten, located southeast of the Virgin Islands. The islands form an autonomous part of the Kingdom of the Netherlands], Pakistan, Saudi Arabia, United Arab Emirates, Brunei, Sabah, Sarawak, Fiji, Nauru, Oceania (non-U.S.), Oceania (U.S.), Papua, Samoa and Tonga, Solomon Islands, Ghana, Malagasy Republic, Togo. Total from Hong Kong: 2,945.3 tonnes, and from Singapore 109.5 tonnes.

(8) Exports of miso (in tonnes) from South Korea and Japan in 1978 to major importing countries worldwide, by region, by country. The leading importers are: USA (622), Saudi Arabia (353), Singapore (66), Bahrain (64), Netherlands (38), Iran (29), Iraq (29) France (28), German Federal Republic (23), Smaller importers include: Chile, Guyana, Surinam, Bangladesh, Iran, Iraq, Jordan, Kuwait, Qatar, Saudi Arabia, United Arab Emirates, Yemen Arab Republic, Sabah, Fiji, Guam, New Hebrides, Papua New Guinea, Samoa, Solomon Islands, Algeria, Canary Islands, Ghana, Kenya, Libya, Mozambique, South Africa Republic, Zaire.

Note: This is the earliest document seen (June 2007) concerning soybean products (miso) in Qatar. This document contains the earliest date seen for soybean products in Qatar (1978); soybeans as such have not yet been reported.

(9) Exports of miso from South Korea and Japan in 1976, 1977, and 1978 (quantity and value each year; no importing country names are given).

5. Tour of South East Asia: Technical and scientific aspects, trade aspects. 6. Acknowledgments. References

The chapter on Trade states: Soy sauce and soy paste (miso) are traded between all countries of South East Asia. The Korean Republic's exports nearly quadrupled in tonnage. The Kikkoman Company's production facility in Wisconsin produced 21,6000 tonnes of soy sauce in 1978. This was equal to 3 times the total exports from Japan in the same year. Japan's total share of the world soy sauce market remains very healthy. Miso exports are still small in comparison with soy sauce. On a rising market

Japan's exports still only represent 0.2% of its annual miso production; "clearly there is considerable room for expansion here."

Miso is of greater relative importance to Korea than it is to Japan. Among the European countries, Belgium and Holland import the greatest amount of miso on a per capita basis. Spain imports a fair amount of miso. The U.S.A. and Canada had total miso imports totaling about 10% of their soy sauce imports.

"In Thailand, there are about 50 soy sauce factories, the majority of which are small, producing less than 100 kilolitres per year, although it should be noted that most of them also produce soybean paste and soybean cheese [probably tofu]. The total annual consumption of soy sauce in Thailand is estimated at about 6,000 kilolitres (about 7,200 tonnes).

"In Malaysia, there are about 140 soy sauce factories producing in total an estimated 5.5 million gallons of soy sauce per year according to the proprietor of a leading brewery in Kuala Lumpur. This is about 21,000 tonnes per annum" (p. 84). Address: Dep. of Applied Microbiology, Univ., of Strathclyde, Glasgow [Scotland], U.K.

6056. Aros Sojaprodukter. 1982. Tofu & alger den nya maten! [Tofu & sea vegetables, the new foods (Ad)]. *Haelsa*. Feb. 2. [Swe]

• **Summary:** This full-page color ad shows Aros tofu (both in the package and sliced), Morinaga Ever-Fresh Silken Tofu, a tall bottle of "Traditionally Brewed Shoyu Soya Sauce," plus packages of nori, wakame, kombu, and Irish dulse (from Sunwheel). Address: Bergsvagen 1, 190 60 Orsundsbro, Sweden. Phone: 0171/60 456.

6057. Wollner, Joel. 1982. History of Erewhon, macrobiotics, and soyfoods in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 2. 2 p. transcript.

• **Summary:** Evan Root was the first attendant at the Erewhon retail store, below street level at 303-B Newbury Street. He lacquered the walls with Michio. Evan is a great storyteller, very intelligent. The initial store was just one room, about 10 by 20 feet. Very few people came in to buy food, so it was more like a stock room than a store. Some evenings there were lectures there. Redwing Books now occupies that space. Most of the food (a tin of miso, a keg of tamari) was just being sent by the Kushis' friends from Japan as gifts; it didn't go through customs.

The Kushis got nigari and made tofu at home. It was not for sale, but for dinner guests and cooking classes. Joel made some tofu using lemon juice when nigari was not available.

As tofu started to become more popular, Erewhon started to buy it from a tofu maker in Boston's Chinatown. First they just bought and sold that tofu, but before long (in about 1973-74) they convinced him to start making nigari tofu for them. They guaranteed to buy what he made, and

they sold him the nigari at cost. This might have been the first nigari tofu made in USA. A lot of nigari tofu is still made in Boston's Chinatown. Joel thinks the tofu maker was located on Tyler, Street, perhaps Yah Kee. Nigari came in 66 pound sacks from Japan. Erewhon also sold small quantities of nigari in the retail store. Chinatown was Erewhon's main source of tofu until Laughing Grasshopper appeared.

What was the macrobiotic movement's contribution to the history of soyfoods in the United States? Macrobiotic teachers and students talked and wrote about them, ate them, and sold them. They felt soyfoods were an important part of a good diet. They educated people and developed a market for soyfoods. Few Americans had eaten miso and tofu at home before 1966—the year Erewhon started. Macrobiotics were the first Caucasian Americans to really use soyfoods regularly. Before that, soyfoods (except perhaps soy sauce) were just interesting oddities. One could say that the macrobiotic movement introduced soyfoods to America.

As for tofu, Joel thinks that Michio Kushi's students misinterpreted his remarks about tofu being yin. Macrobiotics now eat tofu regularly, 3-4 times a week. There are endless ways to prepare it. It's been years since Joel has heard that tofu is "too yin."

What did *The Book of Tofu* (published in Dec. 1975) do for tofu? It expanded its relevance for the Western diet. Before that book, most of the tofu in the United States was consumed by people of East Asian ancestry.

Charles Kendall played a key role in making and introducing natto, mochi, and amazake to Caucasian Americans. He made these foods in his home and sold them locally. Initially, it was not a formal / legal business. But today his business, Kendall Foods, sells \$500 a week of these three foods. He has been making natto for 4-5 years. He was America's first Caucasian natto maker. Natto was served in macrobiotic restaurants in Boston.

The latest soyfood to hit Boston has been tempeh. It's been a phenomenal success. Macrobiotics are going crazy over it. Thom Leonard has been giving lots of tempeh classes for the past 1½ years. For more than a year, lots of sandwich makers in Boston have been making and selling tempeh sandwiches. Tempeh is made into cutlets, burgers, tempeh mock-tuna salad. Why is it so popular? Because it is rich and meaty in texture and flavor—the opposite of rice. Most macrobiotics crave rich, meaty foods.

Ron Kotzsch is very close to the Kushis. A very unpretentious person with a wonderful sense of humor, he is now teaching in North Carolina. He is friends with Helen and Scott Nearing. He toured China and Japan with John Denver, the singer and songwriter—who did a benefit for Michio's new college.

How does Joes see the future of Erewhon? He thinks the company will focus on manufacturing only. Now is the critical time. He'd give Erewhon a 30-70% chance of survival. Address: Boston, Massachusetts.

6058. Takase, Katsumaro. 1982. Re: History of Higashimaru Shoyu K.K. and light-colored (usukuchi) shoyu. Letter to William Shurtleff at Soyfoods Center, Feb. 5—in reply to inquiry. 1 p. [Jap; eng]

Address: 100-3 Tominaga, Tatsuno-cho, Tatsuno-shi, Hyogo prefecture 679-41, Japan.

6059. Hillyard, Roger. 1982. History of Erewhon, natural foods, and macrobiotics in America. Part I (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 7. 2 p. transcript.

• **Summary:** Roger got involved with macrobiotics in San Francisco in about 1965. He lived in San Francisco, was doing light shows at the Avalon Ballroom, read the book *You are All Sanpaku* [by Sakurazawa Nyoiti (George Ohsawa); English version by William Dufty], and got involved. Also in about 1965, Herman Aihara and Bob Kennedy used to come to town to lecture in a church on Oak Street. Bill Tara and Paul Hawken, who were filmmakers, lived in a warehouse on lower Mission St. described in the *Electric Kool-Aid Acid Test*, by Tom Wolfe (largely about Ken Kesey and the Merry Pranksters). "A little macro scene started. We heard that Boston was macro Mecca."

Roger arrived in Boston in Oct. 1969. Erewhon started when Michio and Aveline Kushi were living in Cambridge, Massachusetts; in their basement they had a little food, which they would sell to people who came to hear Michio lecture. "The food was but a vehicle to the larger teaching. The food is like an asana or yoga posture, but the goal is enlightenment. You can get stuck on the food. That is why Michio had very, very little involvement in Erewhon's food business. His focus was on the philosophy of macrobiotics and spreading it."

The Erewhon store was (at the time) in the basement of today's Redwing Books. Evan Root started the store, but he wanted to get out of it into a restaurant. Paul Hawken took over the sleepy little store. Bill Tara (who was from Santa Cruz) also worked there for a while. The tiny store had few customers, a very limited selection of products, and a little mail order business. Shortly after Roger arrived, the Erewhon store at 342 Newbury Street opened—in Nov. or Dec. 1969. Bruce Macdonald and Jim Docker helped to renovate the new store. The whole thing was called Erewhon Trading Co. In Feb. 1970 Roger started to work in this retail store.

Shortly thereafter, Paul Hawken went to Japan. At that time the only companies importing food from Japan were Chico-San and Infinity Foods in New York; both were macrobiotic. Erewhon bought from them, and then started doing a little wholesaling. After Paul went to Japan, Erewhon started importing directly from Japan. Paul got in touch with Mr. Kazama and helped to get Mitoku into the natural food export business. Kazama was an old friend of

Obiyashi, who was an old friend of Michio Kushi's from Columbia University. Muso was shipping to Chico-San and Infinity. Erewhon imported from Muso and Kazama. Roger thinks Mitoku started in about 1970-71. Before that they sold soccer shoes and cranes. The fact that Paul was in Japan was instrumental in getting Erewhon's imports started.

The Erewhon retail store would sometimes get huge shipments, such as a 40-foot-long truck of rice that filled up the whole Erewhon storeroom. It was something like Kokuho Rose [a brand of short grain brown rice grown by Koda Bros. in Dos Palos, California]; it was not organically grown. There was really no room for it, and no refrigeration. At about this time the Lundberg Brothers in California started growing brown rice organically. At one time a boxcar of 100,000 lb of Lundberg rice arrived, so Erewhon needed more warehouse space. Also involved were Jean Allison (from California) and Wally Gorell (from the San Francisco Calliope Co). In about mid-1970 Erewhon leased a 10,000 square foot warehouse space on the 5th floor of 33 Farnsworth St. [a big brick warehouse] in Boston. The space had a nice milling room. Then the wholesale business took off. Roger left Boston in April 1971. He had been running both the distributing company and the wholesale company, but there was a store manager. The retail store expanded into its back room. Then the wholesale business grew like mad. Orders came from non-macro natural foods stores, from new macro groups, etc.

How did the natural food movement get started? As Roger recalls, it was not started by macros. In about 1966 or 1967 Sunset Natural Foods became New Age Foods, an early natural foods store run by Fred Rohe. The natural food movement sprung out of the new consciousness—the counterculture—as did macrobiotics. The macrobiotic movement fed the natural foods movement. One Erewhon customer was Mr. Natural in Carbondale, Illinois. Although he was not a macro, he bought miso, tamari, rice, etc. There were lots of other non-macro stores like that too. But there were also lots of macro stores. Bill Tara opened a store and macro center on the 14th floor of a downtown building in Chicago; out of that grew Food for Life. Tom Waxman started Essene in Philadelphia, Pennsylvania. These were two mini-Erewhons. Each started as a small retail store, then became a wholesaler. Erewhon provided the model.

Erewhon set up a branch distributor in Canada, which later became Manna Foods, with Gene Newman, a macro. Westbrae was a Berkeley political organization started by Bob Gerner, making granola. Erewhon West was connected with Bruce Macdonald. Bill Tara, with Aveline Kushi's prodding, started the Erewhon store in Los Angeles; it did a little distributing. Bruce Macdonald went to Los Angeles, then Bill Tara left for England—Roger doesn't know why. Erewhon West started growing. Jimmy Silver ran the Big Sanae, which became the Seventh Inn. Roger then went to Texas and in Jan. 1972 he worked with Deaf Smith for

about a year. Later Erewhon West was sold to John Fountain, but really to John Demming—as a separate business from Erewhon.

The Well [a wholesale and distribution company in San Jose, California] was an offshoot of Fred Rohe's New Age Foods, ca. 1969-1970. It was never macrobiotic. Fred sold stock in his business, had 2 stores in San Francisco, then opened a big natural foods store [actually a supermarket] named New Age Natural Foods on California Street in Palo Alto. The whole thing was a fiasco; the Palo Alto store never made money.

Deaf Smith Farms was established as a joint venture between Erewhon and Arrowhead Mills; it never worked out. In April 1971 Bruce Macdonald started a marketing company named Pure & Simple. In March 1972 Roger started working at the Well in San Jose. Bruce went to Green Mountain Grainery in Boulder, Colorado. Gradually The Well became Pure & Simple, and started importing from Mr. Kazama and Muso.

Paul Hawken was the first person to work with farmers to get them to grow grain organically for Erewhon. One of these was Carl Garrich of Lone Pine, Arkansas—after Erewhon moved to 33 Farnsworth Street. Roger did a lot of work with farmers at Arrowhead Mills, but not connected with macrobiotics.

Major macrobiotic wholesale distributors: Erewhon East and West, Laurelbrook (later), Food for Health, Essene, Manna in Canada (later). Llama (later) was not macro.

Macrobiotics played the major, primary role in introducing soyfoods to America. A little was also coming through Japan Foods [San Francisco] and Nishimoto [Trading Co., Los Angeles]. The macros made these foods available, but don't overcredit it; the time was ripe and it just happened. The main contribution of macrobiotics was simply making these foods available and teaching about them. Michio always said that macrobiotics is not just about food and the diet.

"It was frightening when we stopped to think about it. The business was doubling and tripling at a crazy rate." Roger still has his early notes but no accounting books. Continued. Address: California.

6060. Hillyard, Roger. 1982. History of Erewhon, natural foods, and macrobiotics in America. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 7. 2 p. transcript.

• **Summary:** While Roger was in Boston, no tofu was sold at the Erewhon retail store at 342 Newbury St.—since there was no refrigeration and no room. He thinks tofu was introduced after Erewhon got 33 Farnsworth St.

The trickiest question, which has no place in this book, is about work as a disciple / discipline vs. for money / as business. Work can be a spiritual practice (*karma yoga*), and that is how many of the early workers at Erewhon viewed it.

Roger does not know why so many people left Erewhon. Maybe Michio Kushi planned it that way. He does not know why Erewhon went bankrupt; maybe it was because the company was undercapitalized, there was no worker equity, and Michio did not know American business. "Maybe Michio did not care so much. Distributing foods was always a minor focus for Michio."

Other macrobiotic food distributors outside the U.S. were Lima in Belgium (by far the earliest), Harmony and Sunwheel in England, and some company in Italy. Address: California.

6061. David, Elizabeth. 1982. Re: Early references to soy sauce in British publications. Letter to William Shurtleff at Soyfoods Center, Feb. 8. 2 p. Typed, with signature. [4 ref]
• Summary: Elizabeth has a large collection of very early British cookbooks. She cites three (published in 1786, 1821, and 1829) that mention soy sauce. She has never made a study of the early uses and/or sale of soy sauce in England. However "soy must have been reasonably popular by the mid-18th century, since I remember seeing a silver soy label for hanging around a bottle, c. 1740, in the Victoria and Albert Museum." She thinks the best places to find very early references "would be diaries, letters, memoirs and so on, rather than cookery books... There must also be trade references in the East India Company archives. I believe these are now housed in the India Office Library, Orbis House, 197 Blackfriars Road, London, S.E. 1."

By the "end of the 19th century, soy would appear to have taken the place of the walnut, mushroom, and other ketchups which had formerly been the vital ingredients of both home-made and the earlier commercial bottled sauces. As you well know, there were of course various imitation soys on the English market." Address: 24 Halsey St., London SW3, England.

6062. White, Jim. 1982. Carobs brighten dull winter dishes. *Toronto Star (Ontario, Canada)*. Feb. 10. p. C8.

• Summary: Frieda Caplan, the queen of exotic and interesting new fruits and vegetables, and a California food wholesaler, is in Toronto to brighten the dull, cold winter with California sunshine. This year her company hopes to ring up \$10 million in gross sales.

According to Kaplan, trends in the U.S. are towards fresh herbs and tofu, and away from salt.

Nearly half of the 10,000 letters Caplan receives each year come from consumers who want "to know more about tofu, the Orient's soybean cake, and how to use it.

"Tofu is available in many Toronto supermarkets." A 500-gram package of Victor Food Products' tofu, containing four slices packed in water, retails for \$1.19 at A&P.

Karen Kaplan, Frieda's daughter (age 26), who is in charge of developing recipes for the company's line of exotic foods, prefers to treat tofu simply—by broiling it.

Cut slices about 3/4 inch thick, brush with soy or teriyaki sauce, and place beneath the broiler on an oiled pan. Broil until nicely browned and crusty, then turn to brown the other side.

Before broiling the 2nd side, you may want to "top it with a slice of mozzarella cheese (though this works better without the brushed-on sauces). Broil until the cheese is melted."

A photo shows Kaplan tasting a Mexican carob pod. Address: Food editor.

6063. Hayashi, Kazuya. 1982. [Re: Use of enzymes in modern shoyu production in Japan]. Letter to William Shurtleff at Soyfoods Center, Feb. 15. 5 p. Handwritten, without signature. [Jap; eng]

• Summary: Dr. Hayashi specializes in the use of enzymes (especially protease) in shoyu at Kikkoman's Central Research Laboratory. 1. Use of enzymes with shoyu in Japan: The use of added commercial enzymes was approved by the newly revised Japan Agricultural Standard (JAS, 1980). The use of an enzyme-treated solution in "new-type shoyu" [*Shinshiki*] and amino-acids mixed type shoyu was approved. However only a few commercial products in Japan today are actually made with the use of commercial enzymes because (1) the enzymes are too expensive, (2) the effect of the enzymes is not significant since most manufacturers use the "all-koji" method, and (3) in a salt solution of high concentration, the effect of the enzymes is greatly reduced. Examples of actual current use: The Shono Starch Co. Ltd. uses enzymes for making a product named "Umamigen." Corn is treated with an enzyme solution in making shoyu. Kikkoman has a patent on making shoyu using 100% enzyme solution. It calls for the use of yellow koji enzyme (peptidase) and glutaminase. The quality is fine but the product is too expensive. This method is good when the presence of aflatoxins could be a problem. In the future a low-salt, high-temperature digestion method may allow the use of enzymes (cellulase digestion, peptidase digestion).

2. High temperature fermentation method: This research was started in about the 1920s. The research on low-temperature fermentation began in about the 1930s. In the early period, this was called the *sokujo* or "rapid method" of fermentation; the temperature was raised to 30-35°C. The quality was bad due to elution of some key flavor components, and because the glutamic acid content was lower. Also, the environment was not favorable to microbial growth. Use of the low-temperature method produces better quality shoyu. Use salt water (less than 5°C) for starting. For the first 15-30 days, keep at 15°C. After one month, raise the temperature to 25-27°C to complete the fermentation, then maintain at about 20°C. This is suitable for the breakdown of the material by bacteria.

3. Addition of yeasts and lactic acid bacteria to the shoyu fermentation process began around the 1960s.

Only the yeast *Saccharomyces rouxii* is used in practice. *Torulopsis* is for experimental use only. Lactic acid bacteria are not yet adapted to actual production. Use of epoxy-lined tanks is also important.

4. Bansui (using a second pressing of the shoyu): Only a few shoyu makers use this method since the product quality is bad and it cannot be sold. For details, see Kimura 1914.

5. Chemical shoyu: During the Taisho period (1912-1926) and Showa period (1926+) Dr. K. Kurono/Koruna Kanraku at the Fermentation Research Institute did early work. The use of amino acids spread. In the early Showa period Ajinomoto company was a leader under Dr. Hori Shinichi. During the period 1945-55 Mieki, a glutamic acid solution, was produced in large quantities (180,000 kiloliters). Improvement of amino acid solution purification led to cheap but tasty shoyu. Then came new-type (*Shinshiki*) shoyu. Bunzo Rokusho and the Mantetsu [Manchurian Railway] Research Institute did research in the early Showa period. During the period 1945-55 new-type shoyu making became widespread. Defatted soybean meal was digested with a weak acid and wheat koji was added to make shoyu.

6. History of the use of POBB (Para-oxy Butyl Benzoate): 1924—Sabalitscka discovered this food preservative. 1934—Dr. Kurono tested the effect on shoyu. 1937—Its use was approved for use in shoyu by the Japanese government. 1948—Use was approved as a food additive. The effect is great but the solubility is low.

7. Making koji for miso: The use of koji boxes is more popular, but the rotary drum is also used.

8. The future of the shoyu manufacturing process: Treatment of raw material and koji making will be spontaneous and automatic. Use of outdoor fermentation tanks. Continuous pressing. Improve sanitation by using a closed system. Digestion without salt. Liquid fermentation. Automatic control of microorganisms. Introduction of computerized system. Use of new raw materials and new microorganisms. Introduction of the fixed-enzyme method. Use of membrane filtration method. Address: Central Research Lab., Kikkoman, Noda, Japan.

6064. Tallent, W.H. 1982. Shoyu update. *Northern Regional Research Center, Notes from the Director* No. 1493. p. 2-3. Feb. 26.

• **Summary:** “On February 22-23, Drs. H. Hashimoto (manager, quality control) and D. Fukushima (executive vice president and general manager) of Kikkoman Foods, Inc., visited the Center [NRRC]. Their Walworth, Wisconsin, plant, which began producing fermented shoyu in 1973 with a capacity of 2.6 million gallons per year, now has expanded to produce about 5.2 million gallons. Their fermentation is based upon wheat and soybeans. Currently they have about 45% of the soy sauce business in the United States and sales are increasing rapidly.

“Total U.S. sales of soy sauce in 1956 was about 1

million dollars (consumption 15 ml per capita per year); this has now increased to 100 million dollars (148 ml per capita per year). Many years ago we supported yeast genetic work on this fermentation based upon Dr. L.J. Wickerham's (NRRC, retired) demonstration that the shoyu yeast had mating types and that improved strains could be developed in a genetic improvement program.

“Kikkoman now has a whole line of dehydrated products based on shoyu that are used to make instant teriyaki sauce for chicken, beef, and seafood. A relatively new product is a steak sauce that contains applesauce, shoyu, spices, and salt. H.L. Wang and C.W. Hesseltine (FL [Fermentation Lab]) supplied the Kikkoman visitors with information on tempeh and pointed out the similarities of the preparation of this food with their method of producing koji for the shoyu fermentation. Drs. Hashimoto and Fukushima also talked with W.J. Wolf and other Meal Products Research (OC [Oilseed Crops]) members concerning isoflavone analysis, phosphatidyl-choline autoxidation, and nutritional properties of soybean proteins.” Address: Center Director.

6065. Leviton, Richard. 1982. Traditional soy sauce ferments in Maryland. *Soyfoods*. Winter. p. 68-69.

• **Summary:** About Hoang Van Chi and his company Vietnam Food and Drink, founded in June 1979 in Maryland. They make Bodhi Sauce and Tuong Cu-Da. Photos by Leviton show 6 steps in the process of making this Vietnamese soy sauce, including one of Phan and Van Chi Hoang. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6066. **Product Name:** Living Lightly Tempehoni Pizza.

Manufacturer's Name: Pacific Trading Co.

Manufacturer's Address: P.O. Box 40429, San Francisco, CA 94110.

Date of Introduction: 1982. February.

Ingredients: Crust: Whole wheat flour, water, yeast, sesame seeds, salt. Sauce: Tomatoes, onions, carrots, parsley, soy oil, garlic, green pepper, spices. Rennetless mozzarella cheese, Tempehroni (Soybeans, brown rice, water, tempeh culture), shoyu soy sauce, herbs, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Frozen.

New Product—Documentation: Label. “No Preservatives.”

6067. **Product Name:** Living Lightly Sweet & Sour Tempeh (Meatless Chinese Entree).

Manufacturer's Name: Pacific Trading Co.

Manufacturer's Address: San Francisco, California.

Date of Introduction: 1982. February.

Ingredients: Soy & Rice tempeh, water, green pepper, mushrooms, carrots, onions, honey, soy oil, shoyu soy sauce, potato starch, apple cider vinegar, garlic.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Frozen.

New Product–Documentation: Label. “Ready to Eat. For delicious tempeh recipes see *The Book of Tempeh* by Shurtleff & Aoyagi.”

6068. **Product Name:** Living Lightly Savory Broiled Tofu (Vacuum Packed).

Manufacturer’s Name: Pacific Trading Co.

Manufacturer’s Address: P.O. Box 40429, San Francisco, CA 94110.

Date of Introduction: 1982. February.

Ingredients: Tofu (organic), magnesium chloride (nigari), natural soy sauce, herbs and spices.

Wt/Vol., Packaging, Price: 8 oz, vacuum packed.

How Stored: Refrigerated.

Nutrition: Per 4 oz. serving: 180 calories, 17 gm protein, 5 gm carbohydrates, 10 gm fat.

New Product–Documentation: Label. 1982. 2.75 by 4.25 inches (circled top). Plastic. Red and yellow. “Ready to eat. No preservatives.”

6069. **Product Name:** Living Lightly Tempeh Patties (Meatless Burgers: Vacuum Packed).

Manufacturer’s Name: Pacific Trading Co.

Manufacturer’s Address: P.O. Box 40429, San Francisco, CA 94110.

Date of Introduction: 1982. February.

Ingredients: Soy tempeh (made from organic soybeans), natural soy sauce, herbs, spices.

Wt/Vol., Packaging, Price: 6 oz vacuum packed.

How Stored: Frozen or refrigerated.

Nutrition: Per 3 oz.: calories 120, protein 12 gm, sodium 443 mg, carbohydrates 8 gm, fat 4 gm.

New Product–Documentation: Label. Undated. 3.5 inch diameter. Red and blue on white. “Meatless, Ready to eat. Not fried! No cholesterol. Shelf life at 40°F is up to 28 days.”

6070. **Product Name:** Living Lightly Chili Con Tempeh (Meatless Chili).

Manufacturer’s Name: Pacific Trading Co.

Manufacturer’s Address: San Francisco, California.

Date of Introduction: 1982. February.

Ingredients: Pinto beans, soy & rice tempeh, tomato sauce, onions, water, jalapeno peppers, serrano peppers, soy oil, chili powder, spices, sea salt, shoyu soy sauce, garlic powder.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Frozen.

New Product–Documentation: Label. “Ready to Eat. For delicious tempeh recipes see *The Book of Tempeh* by Shurtleff & Aoyagi.”

6071. Pratt, Dan E.; Di Pietro, C.; Porter, W.L.; Giffey, J.W. 1982. Phenolic antioxidants of soy protein hydrolysates. *J. of Food Science* 47(1):24-25, 35. Jan/Feb. [9 ref]

• **Summary:** Many phenolic compounds have been found in soybeans, soy flours, and soy protein concentrates. Soy protein hydrolyzate (SPH) has antioxidant activity. The SPH used in this study was Vi-Zate 115 HVP powder, oil coated, supplied by A.E. Staley Mfg. Co. (Protein Div.), Chicago, Illinois. It was studied to identify the phenolic compounds responsible for this activity. Three isoflavones—genistein, daidzein, and glycitein—were identified in SPH, but no isoflavone glycosides were found. Address: 1. Dep. of Foods & Nutrition, Purdue Univ., West Lafayette, Indiana 47907.

6072. **Product Name:** Missing-Egg Tofu Salad (100% Vegetarian).

Manufacturer’s Name: Redwood Valley Soyfoods Unlimited.

Manufacturer’s Address: P.O. Box 371, Redwood Valley, CA 94570.

Date of Introduction: 1982. February.

Ingredients: Tofu, celery, pickles, safflower oil, lemon juice, shoyu, mustard, curry, garlic, onion, sea salt, honey, lecithin.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Spot in *Whole Foods*.

1982. April. p. 60. “Convenience Soyfoods.” Spot in *Soyfoods*. 1982. Summer. p. 56. “Prepared Tofu Salads and Desserts.” Label. 4 inches diameter. Plastic. 3 color: Red, yellow and blue on white. “Try our other soy foods—Hummous, tofummus, soysage and creamies.” 1 plastic tub top each. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Letter from Richard Rose. 1987. Aug. 29.

6073. Shurtleff, William; Aoyagi, Akiko. 1982. *Tofu & soymilk production: A craft and technical manual*. Lafayette, California: Soyfoods Center. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Feb. 28 cm. [223 ref]

• **Summary:** The contents is identical to that of the original Aug. 1979 edition, but the publisher’s name has changed to Soyfoods Center from New-Age Foods Study Center. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6074. **Product Name:** Marinated Tofu Cutlets.

Manufacturer’s Name: Sooke Soy Foods.

Manufacturer’s Address: Sooke, BC, Canada V0S 1N0.

Date of Introduction: 1982. February.

Ingredients: Tofu (organic soybeans, water, nigari [magnesium chloride—an extract of sea water]), soy sauce, garlic, ginger, cayenne, black pepper.

Wt/Vol., Packaging, Price: 10 oz / 284 gm.

How Stored: Refrigerated.

Nutrition: Per 100 gm: Calories 104, protein 12 gm, carbohydrates 3.4 gm, fat 8.2 gm.

New Product–Documentation: Label. 1988, received.

6 by 4.5 inches. Yellow, green, blue and white on clear plastic film. "Ready to serve—Hot or cold. For snacks, sandwiches, or as a main course. A good source of protein. No preservatives."

6075. *Soyfoods*. 1982. California yuba plant opens. Winter. p. 7.

• **Summary:** "Soyfoods of America's Ken Lee and Lawrence Wu, of Duarte, California, plan to make yuba far more available, visible, and talked about as they launch America's first semi-mechanized (and only) yuba plant.

"The yuba operation, which precedes tofu production in their daily schedule, begins with a low density, low solids soymilk which is pumped automatically across the plant from the tofu line to a series of shallow heating tubs in a 30 foot long stainless steel yuba forming machine. The soymilk is heated and a worker manually lifts off the skins and hangs them on metal drying tiers. Lawrence Wu reports that as many as 22 skins can be obtained from a 2¼ inch basin of soymilk but that as the oil portion is used up, more carbohydrates comprise the yuba and it darkens slightly. Wu's yuba has 51% protein, 20% oil, and 2% lecithin on a dry weight basis. Ken Lee plans to package his yuba semi-moist with a nitrogen flush to increase shelf life, but he's experimenting with vacuum-packing as well. Yuba in its dry form can last up to 2 years at room temperature... Yuba will be positioned in natural foods and supermarket outlets as a sandwich wrapper, eggroll-style, for entrees, as a dry soup mix powder, or as a steamed bologna-like yuba roll flavored with shoyu."

6076. Funcación Tao-Fu. 1982. Proyecto piloto para la produccion e introduccion de los productos derivados de la soya en Quito, Ecuador [Pilot project for the production and introduction of soyfoods to Quito, Ecuador]. Quito, Ecuador. iii + 21 p. March 1. Unpublished manuscript. [Spa]

• **Summary:** Proposal submitted by Richard Jennings and Ismael Janisch. In Feb. 1980 la Fundacion Tao-Fu began its work to introduce soy protein foods to Ecuador. To date, they have developed tofu (seasoned and natural), tempeh, soy yogurt, and soymilk. Address: Casilla 252-A, Quito, Ecuador.

6077. Root, Evan. 1982. Re: History of macrobiotics. Letter to William Shurtleff at Soyfoods Center, March 4—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** "Here is my reply to your questionnaire." Discusses Sanae, Erewhon, Paul Hawken, Michio Kushi. The original Erewhon store started in April 1966 at 303-B Newbury St. Prior to that, some food sales were done from the Kushi's home on a very small scale.

In Oct. 1967, Paul Hawken took over the management of Evan Root moved up the street to commence renovations for Sanae Restaurant. Paul was the main force in expanding

and developing Erewhon in the early days. Prior to him it was mainly a cracker barrel style store where people came in to talk philosophy and swap recipes, whether or not they bought anything.

Sanae opened its doors to the public in Feb. 1968.

In the early days of Erewhon one of the suppliers not to be overlooked is Japan Food Corporation. From them we bought seaweeds, fish flakes, gourd strips, and most importantly from your point of view, Hatcho miso. Chico-San and Infinity Foods were in operation before Erewhon and we got most of the Japanese items from them except for a couple of kegs of miso that Junsei Yamaguchi put up in the Kushi's basement.

I do not know this for a fact, but I have speculated that the early tamari that was available when I first got into macrobiotics in 1964 may have been, in fact, real tamari as I distinctly remember that it was thicker and richer than what became available a little later. Address: Relationships, 39 Harvard St., Brookline, Massachusetts 02146. Phone: 617-739-3300.

6078. Smith, Grant. 1982. The A.E. Staley Company's work with soy sauce (Interview). *SoyaScan Notes*. March 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Staley first put a commercial soy sauce on the market in about 1933-1935. It was not fermented. It was named "Staley Soy Sauce." It was soy sauce, not HVP. The term "fermented" may have occurred in some article because Staley was making lactic acid on the same equipment. In July 1932, they were working on the soy sauce on a lab and plant scale.

This soy sauce was first introduced as a "custom made" product, sold to specific customers, not to the general commercial market. Smith's record of his time are all in the Staley vaults.

Staley got into the separate HVP business when it started making MSG from corn, probably in the 1940s. HVP was a by-product of MSG, left over as mother liquor. Starting in the 1940s (he thinks—check the Staley book) they began to make HVP with the MSG in it, also from other sources besides corn.

Note: Staley launched Zest monosodium glutamate in 1948, made from corn gluten. It was sold in 50- and 100-pound drums to food processors, in 10-pound and 1-pound containers to restaurants and hotels, and in 4-ounce containers to retail customers. The product sold very well initially but was quickly replaced by Accent MSG which was made from a less expensive raw material—beet sugar waste. (Forrestal 1982, p. 195). HVP is not mentioned in the index of Forrestal's book.

Smith has been told not to discuss Staley's relationship with La Choy. He suggests I ask La Choy if they simply rebottled the Staley product or made a completely separate product themselves.

In the early 1950s Vico was a customer of Staley's. Staley acquired them in 1964.

Staley now makes soy sauce only in bulk as a concentrate; the buyer might add water, or he might add some caramel color, corn syrup, and/or citric acid, etc. to make an industrial (not a commercial) soy sauce. Staley now also makes plain HVP liquid, paste, powder, or granulated forms, in both spray dried and vacuum dried forms.

All the European soy sauces are very sweet.

Vico is heavily involved in extracts and in enzymatic fermentation. The two means of protein hydrolysis are acid and enzymatic. Gunther makes enzymatic soybean hydrolysates, but they are lightly hydrolyzed, so they are not really hydrolysates. Some soy sauce is hydrolyzed so that the amino acids are 85% or more in the free amino acid form. Fermented soy sauce is not full converted; it contains more peptides. At the other extreme are Gunther's modified proteins, which are solubilized at up to 1,000 molecular size to obtain whipping properties. They stop the hydrolysis at just the point where it becomes soluble, and they control the molecular size to get certain functionalities—so it is closer to a protein than to a mixture of amino acids.

The use of enzymes in making shoyu: It gives you a lot more control of the process, but it probably also changes the flavor. Browning reactions lead to purines, carcinogens, etc. in minute levels. Smith thinks that the traditional pressing that leads to liquid soy sauce also causes some browning reaction, but he is not sure. Address: A.E. Staley Co, Decatur, Illinois.

6079. Aihara, Herman. 1982. Re: Introducing miso and soy sauce to America. Letter to William Shurtleff at Soyfoods Center, March 15—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** "Miso and 'tamari' were imported in America by Ginza, Inc., managed by H. Aihara, in 1961 in New York City. The brand name was not remembered.

"After 16 families moved to Chico and started Chico-San, Chico-San imported Marushin soy sauce and miso. Ohsawa arranged the manufacture and export in Japan. Ohsawa always supervised and examined the products.

"Ohsawa told us to call natural soy sauce 'tamari'. The reason is, he named natural soy sauce 'Ohsawa Soy Sauce' in Europe and gave its sole agency to someone else. This guy started to import bad soy sauce and called it 'Ohsawa Soy Sauce.' Then, Ohsawa began importing a good one by himself, but could not use the name 'Ohsawa Soy Sauce.' Therefore, he called soy sauce 'tamari.' (A mistake, I think.) Chico-San has been importing the best quality of miso and soy sauce (named 'tamari') even though the cost was higher than other, lower grades." Address: President GOMF, P.O. Box 426, Oroville, California 95965.

6080. Hohn, Jane R. 1982. Re: History of HVP. Letter to

Mr. Milan Drake, Beatrice Foods, La Choy Food Products Co., 901 Stryker St., Archbold, Ohio 43502, March 16. 1 p. Typed, with signature on letterhead.

• **Summary:** "Dear Mr. Drake: It was certainly a pleasure meeting you last week and discussing HVP's. I think we have found suitable answers for your questions about HVP's.

"1. Who made the first HVP and where? Was it Maggi in Switzerland or Ikeda in Japan. Ans: We think China and Japan made the first soy sauce as acid hydrolysates. Fermented soy sauce was made, probably, as far back as 3,000 B.C.

"2. When was HVP commercialized and in what products? Ans: We believe the Chinese and Japanese made acid hydrolyzed HVP prior to 1940. No definite data available on this.

3. When and how was it first used in the U.S.? Ans: Huron Milling Co. made HVP in 1934. Liquid was sold as #6 Sauce for use in soy sauce. Dry powders were sold to the U.S. Government for use in C-Rations during World War II.

"4. When and by whom was it first used in soy sauce? Ans: We think LaChoy used it first in the U.S. #6 liquid was sold for this purpose. The Chinese may have used it prior to this, but again, we don't know for sure." Address: Hercules Incorporated, PFW Div., 33 Sprague Ave., Middletown, New York 10940. Phone: (914) 343-1900.

6081. Rothman, Sandy. 1982. Re: History of work with macrobiotics and soyfoods in America. Focus on Herman and Cornelia Aihara, and Chico-San. Letter to William Shurtleff at Soyfoods Center, March 17. 5 p.

• **Summary:** Also discusses Alcan Yamaguchi, Zen Teahouse, Paradox, Michio Kushi, Musubi, Irma Paule. Address: GOMF, Oroville, California.

6082. Kushi, Michio; Kushi, Aveline. 1982. Re: History of work with macrobiotics and soyfoods in Boston. Letter to William Shurtleff at Soyfoods Center, March 29. 2 p. Typed, without signature on letterhead.

• **Summary:** These are answers (dictated to a typist) to a list of questions sent by William Shurtleff of Soyfoods Center.

1. Why were George Ohsawa's students given Western names? "Right after the second world war, and after the Americans took over Japan, George Ohsawa wanted everyone to speed up their lifestyle. For this reason he gave Western names to his students, taking those names from Western heroes born in the same month. We think that perhaps it was his intention to have them go to America to spread macrobiotics. As a teacher, George Ohsawa adopted the western style of having his students call him by his first name, George. Almost all his students were given new names."

5. Prior to 1959, which macrobiotic teachers were in New York? "Michio Kushi was lecturing and giving seminars in New York at that time, along with other friends."

9. When was the Ohsawa Foundation in New York City established? By whom? “The Ohsawa Foundation was founded in 1960 or 1961, by Michio, Irma Paule and other friends. Michio was the first President of the 2nd Avenue location. The Musubi Restaurant was by Mr. Sato, Alcan Yamaguchi, and Junsei Yamazaki. Irma Paule was later to take over the East West Foundation and set up the 2nd Avenue location.

12. When and where were Michio and Aveline married? They were “married in 1953 in New York. They [first] met in New York but had been corresponding from Japan through George Ohsawa’s study house [Maison Ignoramus?] before that time.

13. Cornellia and Herman [Aihara] were married in New York and had also been corresponding from Japan.

14. What was Musubi in New York City? Musubi “was a restaurant and food store but not a gift shop. They sold miso and shoyu from Japan the George Ohsawa had sent.”

16. When did Michio Kushi start and stop lecturing at Arlington Street Church in Boston? “He started in 1965 and stopped in 1970.

18. When did Michio organize the first East West Institute? “1965.”

19. When did the Kushis move from New York to the Boston area? What prompted this? “In 1963 [sic, March, 1964] Aveline and the children moved to Martha’s Vineyard [an island off the south of Cape Cod in Massachusetts] for 6 months because it was a much better environment for natural living. Michio was still working in New York. In September 1963 [sic, 1964] they moved to Cambridge, Massachusetts with Michio, who at that time stopped all business and put all his efforts toward macrobiotic education. The death of Beth Ann Simon and the FDA crackdown came after Erewhon was established.

20. Erewhon started in the Kushi home in 1963 in Cambridge. In 1965 [sic. April 1966] it was established as a company on Newbury St.

25. When did Sendai Miso Shoyu start making natural shoyu. Who set this up? When did they start to sell it? “Mr. Kazama [of Mitoku] set it up” and would know the answers to the other questions. Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

6083. *Jiba Sanpin Kanren Joho Kensaku Repooto (Market Survey on Production of Goods, by Product Type and Location)*. 1982. Wagakuni shōyu gyōkai to kaigai shijō dōkō [The shoyu industry in Japan and market conditions overseas]. No. 56. 7 p. March. [Jap]

• **Summary:** Gives current production figures for each of 5 types of Japanese soy sauce (koikuchi, usukuchi, tamari, saishikomi, shiro), each of 3 fermentation methods, and each of 3 grades, by prefecture. Plus total production and exports by year. Address: Nihon Boeki Shinkokai Kaigai Keizai Joho Center, Tokyo.

6084. **Product Name:** [Shoyu].

Manufacturer’s Name: Lima-Andiran.

Manufacturer’s Address: Moulin d’Andiran, 47170 Mezin, France.

Date of Introduction: 1982. March.

Wt/Vol., Packaging, Price: 250 ml and 1 liter bottles, and 18 liter can.

How Stored: Shelf stable.

New Product–Documentation: Letter from Pierre Gevaert. 1981. Nov. 19. They plan to start making shoyu on 15 March 1982.

Lima catalogue, price list, and color product brochure. 1989. A color photo shows the Lima shoyu bottle. Three sizes are listed in the catalog.

6085. **Product Name:** Fuju Soy Sauce (Koikuchi Shoyu).

Manufacturer’s Name: Nepal Soya Industries.

Manufacturer’s Address: 9/374 Bhedashing, Jamguthi, Kathmandu, Nepal. Phone: 229130.

Date of Introduction: 1982. March.

Ingredients: Soybean, wheat, salt, water, Japanese Sozai [starter culture].

Wt/Vol., Packaging, Price: 1 liter.

How Stored: Shelf stable.

New Product–Documentation: Letter from Mr. Achutananda Vaidya of Nepal Soya Industries. 1992. Dec. 26. He started making tofu in Kathmandu in 1974. “In 1979-80 I was invited to Japan for 9 months training at the Akita Prefecture Brewing Laboratory. During that time I also learned in detail the processes for making soy sauce, miso, and soyamilk. During that period I also got a chance to read *The Book of Tofu*, *The Book of Miso*, *Miso Production*, and *The Book of Tempeh* all of which helped me very much. I still have all those books. In 1985 I was invited by the Rotarians of Akita-Aomori to return to Japan for 1 month to receive further technical training in making tofu, miso, soy sauce, soyamilk, moyashi (sprouts), koji, fruit fermentations for wine, etc. Today I produce tofu, soy sauce, and miso in my small factory in Kathmandu.” His business card notes: “Food Technology in Brewing from Japan. Products & Suppliers: Tofu (Vita), Soyamilk (Vitabean milk), Soya Curd, Soya Sauce, & Miso.”

Letter from Mr. Achutananda Vaidya of Nepal Soya Industries. 2002. April 12. He started to make this soy sauce in March 1982. A label sent in April 2002 is for “Fuji Soya Sauce (Natural Fermentation).” Red and white on blue.

6086. Quebral, Florenco C. 1982. [Soybeans in] *The Philippines. INTSOY Series No. 22.* p. 166-71. J.B. Sinclair and J.A. Jackobs, eds. Soybean Seed Quality and Stand Establishment (College of Agric., Univ. of Illinois at Urbana-Champaign).

• **Summary:** Contents: Introduction. Cultivar improvement.

Planting. Inoculation and fertilization. Pests and diseases. Intensive cropping. Utilization. Costs and returns. Marketing. Marketing program. Areas that need attention. Cooperating agencies.

“The domestic supply of soybeans has never been sufficient to meet national demands for food, feed, and industrial uses. Total domestic soybean production in 1978 was reported to be 7,099 metric tons. Approximately 176,000 metric tons of soybeans, costing \$30.8 million, were imported.

“To boost domestic production, the government has launched projects like Masaganang Maisan, the white corn and feed grains program, and the National Soybean Development Program...

“Researchers at the University of the Philippines at Los Baños have produced bottled soymilk (Philsoy) using the hot water grind technique... Fermented soybean products, such as soy sauce, soy cheese (tokwa [tofu]), soy paste (miso), soy curds (tahuri [tofu in brine]), and canned salted beans (tausi [fermented black soybeans]) are the most common soybean products used as ingredients in traditional Filipino dishes. A cheese-like product served with sugar syrup (taho) is sold by ambulant peddlers in urban centers.” Address: Prof. of Plant Pathology, College of Agriculture, the Univ. of the Philippines at Los Baños.

6087. Shurtleff, William; Aoyagi, Akiko. 1982. History of the soyfoods movement in North America. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 50 p. March. Unpublished typescript.

• **Summary:** A comprehensive history of the subject. Contents: New image of soyfoods and causes of interest: Good health, nutrition and fatness, weight loss diets, low-cost protein, meatless and vegetarian diets, world hunger, appropriate technology and right livelihood, voluntary simplicity, ecology and conservation, interest in East Asian cultures, spiritual practices, and cuisines.

Allied movements: Macrobiotics, natural foods, Rodale Press, vegetarianism.

Characteristics of the soyfoods movement: Major foods and types of products, comparison of soy protein industry (high tech) and soyfoods industry (low tech), appropriate technology, relevance to the Third World, conclusion.

The Farm in Tennessee. *The Book of Tofu* and Soyfoods Center. Early soyfoods manufacturers. Soyfoods delis and restaurants. Second-generation soyfoods manufacturers and distributors (e.g. Swan Foods in Florida). Tofu kits and equipment. Soyfoods terminology. Founding of the Soycrafters/Soyfoods Association of North America: Richard Leviton. Growth of the Soyfoods Association: First conference, Soyfoods magazine, subsequent conferences, SANA problems, The New Soyfoods Association—Gary Barat and Michael Austin of New York City.

Soyfoods books and booklets. Media coverage.

Growth of the soyfoods industry, including the Soycrafters Apprenticeship Program. Soyfoods Marketer/Distributors: Yellow Bean Trading Co., Garden of Eatin', Jolly Licks. Soyfoods in foodservice institutions. Influence and activities abroad. The future.

Note: This is the earliest document seen (Oct. 2008) that uses the term “Second-generation” in connection with soyfoods to refer to a soyfood product which uses a basic soyfood as its major ingredient. Thus, Tofu Cheesecake, Tempeh Lasagne, and Instant Miso Soup are all commercial “second-generation soyfood products.” If made at home for home use, they would be “second-generation soyfoods.” For some products, the line between basic and second-generation soyfood products is blurred, since some second-generation products that have a long history have come to be thought of as basic. For example: Deep-fried tofu burgers (*ganmodoki*), teriyaki sauce, etc. Address: Lafayette, California. Phone: 415-283-2991.

6088. **Product Name:** Meatless Frozen Entrees with Soy Pepperoni [Ranch Barbecue, Texas Tamale, Texas Burrito, or Pizza Royale].

Manufacturer's Name: Tumaro's Inc.

Manufacturer's Address: Los Angeles, California.

Date of Introduction: 1982. March.

Ingredients: Textured soy protein. Sauce: Tomato paste, honey, apple cider vinegar, water, tamari, arrowroot starch, spices, natural distilled wood smoke.

New Product—Documentation: Food Report (Lehmann). 1982. March. Spot in Soyfoods. 1982. Summer. p. 56.

“Hottest Meal on the Range.” Frozen entrees using tender, beeflike textured soy protein strips, smothered in a tangy Texas-style sauce.

6089. Welters, Sjon. 1982. Re: Recent developments with soyfoods in Europe, and ties with macrobiotics. Letter to William Shurtleff at Soyfoods Center, April 16. 6 p. Typed, with signature on letterhead (photocopy).

• **Summary:** This letter, whose letterhead reads “Manna Natuurlijke Levensmiddelen,” contains names and addresses of many new soyfoods companies, many of them started by people interested in macrobiotics. Names and addresses of the following companies are given: Tofu Denmark (in Valby, run by Per Fruergaard, a macrobiotic), Bernard Storup, Ab & Paulien Schaft (Dutch, setting up a small shop in Baillestavy, France, to make miso, shoyu, natto, and koji), Traditions du Grain (Jean Luc Alonso is setting up a macrobiotic tempeh shop in Ivry France; they will start this summer), Paul Jones (Tofu shop in London), Saskia de Jong (may make miso in Ireland), de Brandnetel (tofu shop in Antwerp, Belgium), Jonathan (makes tofu, ganmo, seitan, mochi in Ekeren, Belgium. Run by J. v. Ponselee), Seven Arrows (Leuven, Belgium; making tofu), Lima Foods (now sell miso made at their plant and farm in France), Witte Wonder (Den Haag,

Netherlands), De Morgenstond (Bakkeveen, Netherlands), Jakso (Heerewarden, Netherlands. Run by Peter Dekker. The first and only shop making tempeh from organic soybeans), Firma Lembekker (Amsterdam), Unimave (Lisbon, Portugal), Jose Parracho (Setubal, Portugal), Swame [sic, Swami] Anand Svadesha (Furth im Wald, West Germany), Bittersuess (Cologne, West Germany. Attn: Thomas Kasas/Karas). Three distributors of soyfoods and natural foods in Germany are YinYang (Berlin), Rapunzel (Heimraadshofe), and Mutter Erde (Werbelen). In Finland: Luonnonruokakauppa AUMA (Helsinki). In Switzerland: Verena Krieger of Sojalade (Engelberg, tofu shop), Hans Rudolph Opplinger (Cham, tofu shop), Marty Halsley (Nyon, tofu & tempeh), Restaurant Sesam (Bern). P. Ton van Oers is a Dutch priest who works in Kananga, Zaire. The natives have grown soya for 10 years and he is thinking of making tofu and soymilk from them.

"In Great Britain the East West Centre is very active in promoting soyfoods. As a part of the Kushi Institute program they have home-scale processing, in which tofu, tempeh, and miso-making are taught by Jon Sandler [Sandifer?]. He is the tempehmaker of the EWC too at Community Health Foundation, 188 Old St., London EC1. In the Netherlands, a great deal of soyfoods promotion is done by the East West Center and Manna. As you probably know, Manna was the first to introduce miso, tamari, shoyu, tempeh, tofu and koji to the larger public and we are still the main promoters of soyfoods as part of a more natural, vegetarian, and economic diet. Manna has been followed by a lot of other distributors of natural and health foods. We have two competitors in the tofu business: Witte Wonder and De Morgenstond.

"At the moment I'm the only teacher giving lectures on homescale miso-, tofu-, tempeh-, shoyu-, tamari-, natto-, and koji-making in the Netherlands. Mainly at the East West Centre and sometimes at different places in the country. People are starting to get interested."

Note: This is the earliest document seen (Jan. 2003) concerning the work of Swami Anand Svadesha of West Germany, and of Thomas Karas of Bittersuess (Cologne, West Germany). Address: Stichting Natuurvoeding Amsterdam, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands. Phone: 020-323977.

6090. Timmins, Tom. 1982. Re: Recent developments at New England Soy Dairy. Questions answered on Soyfoods Center letterhead (dated April 17) and returned to SC. 3 p. Typed, with signature on letterhead.

• **Summary:** The company name was changed to New England Soy Dairy from Laughing Grasshopper in Nov. 1977, at the time of incorporation. The company's Naturally Gourmet program was started in Sept. 1981, when egg roll skins, won ton wrappers, ginger soy sauce, and five-spice powder were launched. In Sept. 1982 bean sprouts, fresh noodles, and new tofu products will be added. In Oct. 1981

the company published a cookbook titled *Soydairy Delights of Tofu*. Sales for 1981 were \$1.25 million. Bongrain was interested in buying the company but they were not willing to pay the required price.

Other new developments: Company expansion into primary markets of Philadelphia, Metro New York, and Boston; secondary markets of Hartford and New Haven (Connecticut), Albany and Buffalo (New York), and Portland (Maine). Company sales people in New England and New York are doing many tofu cooking classes in supermarket chains. There are 3 classes a day and 100-200 people attend each. Tofu production (in lb/week) grew as follows: 8,000 in Jan. 1978, 18,500 in 1979, 24,500 in 1980, 30,000 in 1981, and 40,000 in 1982.

"Our success to this point emerges from a combination of extremely talented and hard-working people focused on specific goals. Our team grows personally as it grows professionally."

Attached are: (1) Four pages of edited manuscript about the history of the company, with 1½ pages of handwritten comments. (2) A graph of the company's tofu production from 1977 to 1982, in 1,000 lb. manufactured per week. Address: Greenfield, Massachusetts.

6091. Hawken, Paul. 1982. History of Erewhon and macrobiotics in America. Part I (Interview). Conducted by William Shurtleff of Soyfoods Center, April 18. 3 p. and 5 p. transcripts.

• **Summary:** Hawken played an important and very innovative role in establishing the natural foods industry in America and in building Erewhon into a major distributor of macrobiotic and natural foods.

Chico-San imported foods from Tokyo CI (Centre Ignoramus); Muso didn't exist at that time.

The Kushis never made tofu or nigari tofu. They were not big tofu eaters, largely because tofu was considered too yin—ridiculous. Then people started craving it, and buying it from Chinatown. But the tofu they bought was not made with nigari.

By the mid-1960s there were roughly 300 to 2,000 people actively involved with macrobiotics in the USA—including Michio Kushi's students, Herman Aihara's students, and those in New York and Boston.

Beth Ann Simon had started using heroin again before she died [on her No. 7 macrobiotic diet]. The family covered it up, blaming Japanese and tamari. But she was not the only one who died. George and Lima Ohsawa's only child died within a year of being born in Tokyo (according to Lima) from excess salt.

Erewhon was started by Aveline Kushi, not by Evan Root. Paul does not know who gave Erewhon its name [it was Aveline Kushi]; of course, it is "Nowhere" scrambled, as in the title of the famous 1872 novel by Samuel Butler about a utopian island divested of machinery. Originally various

people would drive to Pennsylvania to see the Mennonites and Walnut Acres. It was a buying club for students who lived in the Kushi's house in Cambridge, Massachusetts. Foods such as wheat, [whole-wheat] flour, oatmeal. Nothing imported from Japan. It was started with \$500 cash in the basement of the Kushi's house. It backed into being a store since it was cheaper to buy larger quantities. The food was divided up into little bags and a price was written on each. It was sort of a way of buying food for people at the Kushi's house, like Aveline doing her shopping for 10-12 people in the first big macrobiotic study house. It began to outgrow the house and outside students wanted good food. It was never seen as a business or a money-making venture. Good food was so difficult to get in those days.

Another source of good food was Infinity Foods in New York City, started and owned by Howard Rower; they had a warehouse and were wholesaling by mid-1965. Soon Howard was importing miso and tamari (shoyu / soy sauce) from Tokyo CI. "This 'guaranteed' its quasi-medicinal effects. Otherwise it didn't work. It was actually the best food—really." Then Howard started to import directly from the manufacturers of miso and shoyu in Japan: Hatcho miso and Marushima shoyu (whose owner knew Ohsawa intimately). Paul visited Marushima in 1969. Paul thinks Marushima bought their shoyu from other shoyu factories on the island, or maybe they made it in the early days. Paul thinks there is a big difference in taste between shoyu made from whole soybeans and that made from defatted soybean meal (*dasshi daizu*). Paul was suspicious of Marushima shoyu in 1970; he demanded that Muso Shokuhin change to Johsen [Sendai Miso Shoyu] as their source; Johsen has a long history and the owner was also one of Ohsawa's cronies.

Paul left Erewhon in 1973. He went to Japan three times. The first trip was in March 1969, when he set up Mitoku in the natural foods business; before that they were an importer of hockey equipment. Muso was called Osaka CI; neither of those two companies were exporters before that time.

In the early days of the below-ground store in Boston, more of the foods came from Lima Foods in Belgium than from Japan. The miso and shoyu in those days came from Infinity Foods in New York City. They did not carry tofu because there was no refrigeration. None of the food was sent by the Kushis' friends.

In the early days of that store, Evan Root just tended the store, which had sales of about \$20–\$30 a day. The store was Aveline's idea. Evan was Aveline's lover—and not the only one. The store was originally called simply "Erewhon." Paul later added the words "Trading Co." when he incorporated it in the late fall of 1967. Paul and Aveline each owned 50% of the corporation. During its first year as a corporation, sales went from \$1,000/month to \$9,000/month—and not because it was macrobiotic. Erewhon was the first natural food store (as opposed to health food store) in America. It sold no pills.

Many of the customers were not macros; they wanted whole foods. In mid-1968, as Paul was ready to leave Erewhon, someone came into the store and asked: "How do you know the oil is cold-pressed? And how do you know the grains are organically grown? He couldn't answer. So he wrote letters and found out that most were not what they claimed to be. Then Paul decided to use Erewhon to create a true food supply. He went directly to farmers. He didn't trust anyone. The idea was to know where the food came from and to have no middlemen between Erewhon and the producers.

In Oct. 1968 the little Erewhon retail store moved up and across the street to a new location at 342 Newbury Street. At that time they began to sell wholesale and to import from Japan, by correspondence with Mr. Kazama. The first import order from Japan, dated Aug. 1968, was *aka miso* (red rice miso—superb) from Sendai Miso Shoyu and Marushima shoyu. Soon customers who used to drive 400 miles to buy staples from Erewhon started to open their own stores. The natural foods business mushroomed. Erewhon started selling tofu in 1968 at 342 Newbury; they got it from a Chinese tofu maker in Boston. Nigari came in much later, after 1973. Neither Evan nor anyone else wanted to work at or run Erewhon; they all wanted to teach macrobiotics.

Paul was selling whole dry soybeans at that time, but mostly non-macros were eating those soybeans. Erewhon's first supplier, in mid-1968, was a wheat grower in North Dakota. Carl Garrich in Lone Pine, Arkansas, was much later. Paul got his first soybeans from a guy in a boxcar who was an insurance salesman, but who worked one day a week selling soybeans and wheat. Paul also bought soybeans from Deaf Smith County, Texas. Paul knew Frank Ford of Deaf Smith County in the early days. Paul was vice president of Arrowhead Mills before Roger Hillyard even worked for them. He ground his flour in a boxcar.

Paul wrote a long and detailed article about the early history of Erewhon titled "Erewhon: A biography. The view within," published in the Aug. 1973 issue of *East West Journal*. He was upset at the time. It was critical of the Kushis, and Paul explained why he was about to leave Erewhon. Robert Hargrove, editor of the journal, ran it anyway. Since then, Erewhon's history has been sanitized. Continued. Address: California.

6092. Hawken, Paul. 1982. History of Erewhon and macrobiotics in America. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, April 18. 3 p.

• **Summary:** Continued: Erewhon grew rapidly. One year after moving to the new location they had sales of \$35,000 to \$40,000 a month, both wholesale and retail. Paul thinks Erewhon had a retail catalog from 1967 to 1970. Paul was president (until 1973, when he left) and half owner. Then he left for Japan. Before leaving he made a great error, by signing over his half of the stock to the corporation in case something happened to him. It was put in escrow, but he

could never get it back. When Paul left for Japan, Roger Hillyard, Bill Tara, Bruce Macdonald, and Jim Docker were all working for Erewhon. He had hired many or all of them, and everything was in place for takeoff. Erewhon did not get its big brick warehouse until July 1970.

When Paul first went to Japan in the spring of 1969, He traveled with Mr. Kazama of Mitoku, visited many factories, and set up sources. He tried to find out where Tokyo CI and Osaka CI were getting their foods. He was in Japan for about 9 months, from March to December.

When he returned, he opened [sic] Erewhon in Los Angeles; Roger Hillyard was still in charge of Erewhon in Boston. Then he moved to San Francisco and started Organic Merchants with Fred Rohe, and started writing “The Sugar Story,” “The Oil Story,” and other leaflets. His main interest was now in providing accurate information about foods. In mid-1970 Erewhon stopped its mail order catalog and business when it moved into the brick warehouse.

Originally Erewhon West (Los Angeles) and Erewhon Boston were one; about 4 years later they split in two.

When Paul left in 1973, Erewhon was contracting directly with something like 57 farms in 35 states producing organically grown foods, including lots of produce. This program began in 1968, included the Lundberg Brothers (who grew brown rice organically in Northern California), and led to the wholesale business. Paul and Erewhon helped many other natural food companies to get started.

The Natural Food Distributors Association [Organic Merchants] was not successful because it was Paul’s idea and he left. Lack of money and fundraising were secondary. His goal was to see cooperation in the industry.

In conclusion Paul says: “Read the article [in *East West Journal*] and then we should talk again. You’ll have a lot more questions.” He asks Shurtleff to send him a photocopy of the article as well as the final draft of the chapter on the history of macrobiotics (including Erewhon); he’ll be glad to recheck it. Address: California.

6093. Okada, Teizo. 1982. Re: History of Muso Co. Ltd. (Muso Shokuhin) in Japan. Letter to William Shurtleff at Soyfoods Center, April 22. 2 p. [Eng]

• **Summary:** Muso was started in 1959 by Mr. Shuzo Okada, president of the World Macrobiotic Association in Osaka. George Ohsawa was not involved in establishing the company, but he was very much involved in the company’s direction as an Associate. Muso started exporting soyfoods to the West in 1963. The first foods were shipped to Lima N.V. in Belgium. The first soyfoods were shipped to America in 1966, when mugi (barley) miso was shipped to Chico-San Inc. in Chico, California.

Note: Compare this history with that given by Ronald Kotzsch. 1984. “Made in Japan—naturally: Natural foods from the Muso Company are popular worldwide.” *East West Journal*. Dec. p. 14-21. Kotzsch states that Muso was

founded in 1966 and began to export macrobiotic foods from Japan to the West in 1969. Address: Export Dep., Otedori 2-5-1, Higashi-ku, Osaka, Japan. Phone: 06-945-0511.

6094. Endo, Y. 1982. [Re: Yamashin shiro shoyu (clear shoyu)]. Letter to William Shurtleff at Soyfoods Center, April 30—in reply to inquiry. 2 p. Handwritten, with signature on letterhead. [Jap; eng+]

• **Summary:** Shiro shōyu was invented by the people of Mikawa-koku, Shinkawa-machi (presently Aichi-ken / Aichi prefecture, Hekinan-shi), after getting a hint from the seasoning liquid (*uwajiru*) that rises from Kinzanji-miso. The latter is a type of finger lickin’ miso (*namémiso*) which was tasty, light colored and was made about 180 years ago—at the end of the Edo / Tokugawa period, Kansei-Bunka. That area is well known for making tamari (which has a dark color and strong flavor) and red miso (*akamiso*) from the old days. It was probably from necessity that the local people worked to develop a seasoning that brings out the flavor of each food.

Therefore shiro shōyu is a very local product. It is made mainly in Aichi prefecture. At present, the largest manufacturer is Yamashin Shoyu K.K. [the writer’s company].

Shiro shōyu is different from regular Japanese [*koikuchi*] shōyu in that it has less fragrance and a lighter color. Therefore it is used in foods that require a subtle flavor, such as *nimono*, *chawanmushi*, *suimono* (clear soups), noodle dishes, etc. In early times, it was considered to be the best seasoning for enhancing the flavor in the food itself, and was used only in high class restaurants, noodle shops, etc. More recently, it has become popular among regular householders. For Japanese love subtle tastes and the natural colors of foods; this shōyu doesn’t mess up either of these. In Western-style cooking it is good in soups, stews, cabbage rolls, gratin, etc. In Chinese cooking try it in ramen noodles, sweet and sour pork (*subuta*), *happosai*, stir-fried vegetables, etc. In Japanese cooking it is tasty in clear soups, soba (buckwheat noodles), udon noodle broth (*tsuyu*), vegetable cooking, omelets (*tamago yaki*), and *zoni* (meatless soup with mochi and vegetables).

“Although you asked for early documents, we are not aware of any. Nor do we know how shiro shōyu was used in the olden days. In our company we have no old records; they were destroyed by fire. We are very sorry that we cannot help you on that.

“We have heard one interesting story. At the end of the Edo / Tokugawa period, in 1857 (Ansei 4), Townsend Harris, the United States’ ambassador, brought a letter from president James Buchanan [president 1857-1861] and visited Edo Castle to meet with the 13th shogun, Tokugawa Iesada (ruled 1853-1858). In the Willow Room (*yanagi no ma*) of Edo Castle they had a meal and shiro shōyu made by our company was used, under the name of Mikawa Shiro Tamari.

“Instead of answering your individual questions, we

would like to give you this overview. Please excuse us. If you need further details, please let us know.” Address: Yamashin Shoyu K.K., 3-36 Nishiyama-cho, Hekinan-shi, Aichi-ken 447, Japan.

6095. Palucci, Jenó. 1982. Brief history of Chun King soy sauce (Interview). *SoyaScan Notes*. April 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jenó founded Chun King in 1945. The company first began selling ready-made soy sauce in about 1947.

Note: A search of the U.S. Patent and Trademark Office database shows that the “Chun King” trademark (more specifically a “Word Mark”) was first used and first used in commerce on 1 Jan. 1948 and was first registered (by Chun King Corporation, Duluth, Minnesota) on 16 Sept. 1957. The trademark was to be used for “Various canned unitarily packed foods.” A list of these foods is given, and includes “Soya Sauce.” Actually Chun King registered two similar “Word Marks. Both have the word “Chun” written in rounded Oriental-looking letters above the word “King.” Both words are the same height, the same width, and the same “typeface” or design. In one, the words are written in outline letters and in the other in solid black letters.

Chun King never made fermented soy sauce. They bought their nonfermented soy sauce by the barrel from a plant in Toledo, Ohio, run by the Donofrio Brothers, then repackaged it under the Chun King label. He does not remember the company’s name but their technician was a man (perhaps Lou Minor) who had worked for La Choy. This man first got Jenó interested in soy sauce before he started buying from A.E. Staley. In the late 1940s and 1950s Jenó was not aware of any fermented soy sauce being made in the USA; it was all made from HVP. Kikkoman introduced fermented soy sauce to the USA by importing it from Japan.

Jenó thinks Chun King may initially have bought its soy sauce from A.E. Staley Mfg. Co.—but he is not sure. It was shipped by the barrel. Starting in the late 1950s, Jenó bought HVP from Staley and started blending his own soy sauce; he recalls that Staley sold both HVP and blended soy sauce.

When Jenó started selling soy sauce, La Choy had about 60% of the U.S. market and the remaining 40% was divided up among Chinese-, Japanese-, and Korean-American manufacturers. One Polish fellow in Chicago, Illinois, named Ben Gee, was also in the business. In the 1950s it became a battle between La Choy and Chun King, and in the end, when Jenó sold out, Chun King was definitely the market leader. But now La Choy has again taken the lead. Chun King is trying to re-capture the lead with a big ad campaign and a catchy jingle.

Jenó is quite sure that all Chun King soy sauce is presently made in Cambridge, Maryland. The company’s plant used to be in Duluth, Minnesota, but after he sold the company, the Duluth plant was closed, and he bought it back.

Jenó also grew mung bean sprouts; he tried sprouting

soybeans but was not successful. Address: Jenó’s Inc. (Pizza), 525 Lake Ave. South, Duluth, Minnesota 55802. Phone: 218-723-5555.

6096. Chico-San, Inc. 1982. Choice imported natural foods (Ad). *Bestways*. April. p. 65.

• **Summary:** A half-page black-and-white photo shows Lima Ohsawa, wearing a kimono and carrying a tray of Japanese foods, including Lima Soy Sauce. “Top quality natural foods and condiments are imported from Japan under the supervision of Mrs. Lima Ohsawa, Chico-San’s specialist in macrobiotic foods.”

Chico-San imports from Japan include Lima Soy Sauce, soybean puree (miso), mineral-rich mercury-tested seaweeds, azuki beans, black soybeans, barley koji, kuzu, nigari, and tekka. “Soon, a companion for Lima Soy Sauce—Lima Tamari—Wheat Free—Whole soy beans—Rice & zestful—Naturally brewed in wooden casks for about 2 years.” Address: Chico, California 95926.

6097. Jacobs, Leonard. 1982. The Chico-San story: Popularizing rice cakes in America. *East West Journal*. April. p. 58-61.

• **Summary:** A history of Chico-San, including Bob Kennedy. “In 1981 Chico-San and Arden, the two companies who manufacture rice cakes on a national scale, sold approximately 9 million bags of rice cakes to natural foods stores.”

In 1968 “Chico-San was beginning to work on a project which would change the entire course of natural foods in the U.S.” That year, “Bob Kennedy, Chico-San’s president, had begun negotiating with the Lundberg brothers of Wehah Farm in Richvale, California for them to grow totally organic brown rice. The vision of Kennedy and his associates encouraged these farmers to invest considerable time and energy in a very risky project. The Lundbergs were successful, and this success has been an inspiration and incentive for many other large-scale farmers to grow grains organically—a development that has had far-reaching consequences on the health of millions of people.

The story of Chico-San and Bob Kennedy is one of a dedication to quality that is continually renewed and strengthened. But the development of Chico-San was not always so clear. Kennedy was a studio trumpet player in the 1950s, working for the Columbia Broadcasting Company in New York City. ‘I was feeling good and didn’t really have any serious health problems, but around 1960 I heard of a Japanese man who was lecturing on natural health care and Oriental philosophy, and I was interested,’ Kennedy recently said. This man was George Ohsawa, the teacher of macrobiotics, whom Kennedy eventually met at a summer camp in upstate New York in July of 1960. ‘Ohsawa’s message was very inspiring, and a few of us felt compelled to put his ideas into practice immediately,’ Kennedy recalled.

Ohsawa, after a trip to Japan, returned to America near the end of that year and lectured on the possibility of nuclear war as a result of U.S. / Soviet tensions. He warned that New York City could be one of the first cities to be destroyed and advised his students to leave. Several key members of this early group began to search out areas of the country that would be safe from bombs or fallout and that would also be suitable for growing rice.

They finally decided on the town of Chico in the Sacramento Valley in Northern California, an area of fertile farmland, where rice was already being grown. They felt confident that eventually organic brown rice would also grow there. Thus, in October, 1961, thirty-two of these early pioneers left New York City to travel across the country in a caravan of VW buses, vans, and station wagons, to settle in Chico, California. The American pioneering spirit had been reinforced with Ohsawa's spirit of adventure and change—a combination that set them on the path they are still traveling today.

The group was considerably diverse, including five professional trumpeters, a painter, a wood-carver, a Harvard economist, a TV soap opera star, an engineer, and a social worker. Most of these early settlers have since moved on to other things, but not all. Dick Smith, one of the trumpeters, is now vice president of Chico-San and continues to work there, but now with his three children. Kennedy's wife and two of their four children also work with the company. And Herman and Cornelia Aihara, both of whom had been students of Ohsawa in Japan, have remained involved with Chico-San, although their primary interests are in macrobiotic education through lectures and cooking classes.

"But back in 1961 Aihara and Kennedy were the originators of the food company. They decided to call it Chico-San, 'san' being the Japanese word signifying respect. Aihara had contacts in Japan for importing foods such as miso, tamari soy sauce, umeboshi plums, and sea vegetables. They began a small food store in the city of Chico to introduce these products to the local community, which did not, however, buy them. 'Unfortunately, Japanese foods were not what people had in mind when they considered health foods,' Kennedy said. 'The only way we could get any sales was to begin some sort of classes on the value of these foods and macrobiotics in general.' So Kennedy and Aihara began travelling up and down the Coast giving lectures on philosophy and Oriental medicine. However, even with these classes, sales were not justifying the type of products these men were offering.

"The next step was to introduce a small bakery into the back of the store. Keeping true to their macrobiotic ideals, the bread they baked was an unyeasted loaf made from freshly ground whole wheat, and the best quality oil, sea salt, and water available; no sweeteners were added. Again they had put their principles ahead of conventional business practices and bottom line motives, and again they

had created a product with limited immediate demands. So when Ohsawa visited Chico in the summer of 1963 for a lecture series, Kennedy confided in him about the difficulties they were experiencing. Ohsawa laughed at the idea of difficulties standing in the way of ideals and mentioned that a new possibility for a popular food product might be rice cakes. Apparently puffed rice cakes were well-liked in Japan and machines were available to mechanically manufacture them." Continued.

6098. Jacobs, Leonard. 1982. The Chico-San story: Popularizing rice cakes in America (Continued—Part II). *East West Journal*. April. p. 58-61.

• **Summary:** Continued: "By the end of the year, Ohsawa had located an old rice cake machine in Japan and shipped it to Chico. Kennedy had it refurbished and assembled and began the first rice cake manufacturing in America. (Basically, rice cakes are made by soaking rice, adding measured portions into individual molds, heating them under pressure, and then releasing the pressure so they puff uniformly and take on the shape of the mold.) However, this first machine was manually operated and required a strenuous effort to stamp out individual crackers. Since the operation of the machine was sending the employees to the chiropractors more and more frequently, Kennedy redesigned it to operate more automatically. Eventually he created a design which worked fairly easily, and they began selling the rice cakes as quickly as they could manufacture them.

"To ensure the quality of the rice, Kennedy and Aihara started searching for the best rice farmers in the area. Eventually they found a Farmer Koda who was growing a strain of short grain brown rice 200 miles south of Chico [Koda Farms in South Dos Palos]. Although his rice was of excellent quality, he was located in an area of cotton growers who used large quantities of chemicals. Kennedy felt compelled to find another farm which was relatively free of surrounding chemicalized agriculture and which would be willing to experiment with growing completely organic brown rice. In 1968 he signed a contract with the Lundberg's of Wehah Farm [Richvale, California], guaranteeing the purchase of their first organic crop. This was a considerable risk on each side, since at best the farmers felt the yield would be half as much as the conventional crop, and even then the weeds and insects, especially during the paddy stage, would be extremely competitive with the rice. However, the experiment proved successful, and we all have been benefiting ever since. (Other farmers have since begun producing organic brown rice, most notably Farmer Garrich of Lone Pines Farm in Arkansas.)

"Interestingly, with the recession of 1973 and 1974, the price of organic rice increased quite a bit and the demand for organic rice cakes decreased considerably, so Chico-San discontinued the organic rice cakes—selling only organic rice. However, by 1976, they were able to reintroduce the organic

rice cakes and the demand has again been on the up-swing.

By the late '60s/early '70s the FDA began a close scrutiny of the relationships between food companies and educational programs. They would not allow promotion of foods based on educational or health claims. As a result Kennedy and Aihara established the George Ohsawa Macrobiotic Foundation (GOMF) to continue the educational activities separately from the food company. Kennedy became the director of Chico-San, Aihara the director of GOMF. This relationship has proved very productive for both sides as each continues to promote the other. Aihara is still involved in the selection and quality control of the food products, and he gives weekly classes to approximately thirty-five of the seventy-five staff members of Chico-San. Kennedy began to devote himself completely to the development of the food company.

"In addition to enlarging the ware- house space, Kennedy looked for ways to expand and improve the product line. In 1974 he brought Junsei Yamaguchi into the company to begin manufacturing miso and tamari soy sauce according to Chico-San's standards. Chico-San also began to produce yinnie rice syrup, a traditional sweetener Kennedy had discovered on one of his trips to Japan. Yinnie syrup is a whole grain product made from malted wheat and rice and has a much lower concentration of refined sugars than most other malted grain sweeteners such as barley malt or corn syrup. During this time Chico-San had acquired additional rice cake machines purchased from Japan, but Kennedy felt that these machines could be improved. Eventually he developed a completely hydraulic machine which was capable of increasing the supply of rice cakes up to the market demand. Unfortunately, soon after they got the new machine into production, it shorted out, blew up, and caused a fire which totally destroyed the Chico-San warehouse, all the incubating miso and tamari, and the majority of their other products. The founders of Chico-San had escaped the threat of destruction in New York, but over a decade later they witnessed their almost total devastation in California.

"However, by that time the company had developed a strong reputation in the market. In addition, Kennedy was willing to withstand considerable odds and start from scratch. So within a year of the fire (and a loss of \$250,000 beyond the insurance settlement), he began again with a larger warehouse and what he considered to be better rice cake machines. Presently, Chico-San is making rice cakes twenty-four hours a day, seven days a week. It is selling these cakes in the natural foods stores, and has distribution in the supermarkets and (under the label of Landau and Kemach) in the Jewish Kosher foods stores. Kennedy is also attempting to get his rice cakes into the institutional food services, such as hospitals and prisons, but finds this to be very slow. 'The bureaucracies involved are very difficult to work with. But we do have a few public schools in California using rice cakes in the lunch programs,' Kennedy claims.

Although Chico-San never got back into miso and tamari production, it did expand its own product line by increased importing of traditional macro- biotic foods from Japan. These include Lima Soy Sauce (named after George Ohsawa's wife, Lima), miso, barley koji, kuzu, and rice malt vinegar; the sea vegetables hijiki, kombu, wakame, nori, and kanten; nigari (for making tofu); tekka (a condiment rich in iron); umeboshi plums; and the Japanese teas kukicha, mu, and renkon (lotus root). In this country Chico-San makes yinnie syrup, yinnie taffy candies, rice cakes, carob-covered rice cakes, and rice nuggets. Chico-San also publishes the *Chico-San Cookbook*, which was written by Cornelia Aihara. The products sold by Chico-San undergo close scrutiny by Kennedy, Smith, and Herman Aihara. They are very careful about quality control and generally agree about standards. One exception has been the carob-covered rice cakes. It is difficult to solidify the carob without adding some type of refined sweetener. Although they have been experimenting with yinnie syrup, at this point they are using fructose but without consensus within the company as to whether it is a healthful ingredient. Besides the manufacturing company in Chico, Kennedy is planning to reopen the Chico-San retail store. He has also opened up a warehouse and rice cake plant near Trenton, New Jersey and is considering opening up another outside of London [England]. In addition, Kennedy and Aihara went to Japan in early December, 1981, to conclude formal discussions with the Ohsawa C.I. macrobiotic teaching organization in Tokyo, concerning the creation of a distribution company called Ohsawa U.S.A. Lima Ohsawa's sister, Flora, will be in charge of this company which will allow for the increased distribution of many Japanese macrobiotic specialty foods.

6099. Product Name: [Ganmo {Tofu Burger}].

Foreign Name: Ganmo.

Manufacturer's Name: Jonathan P.V.B.A.

Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

Date of Introduction: 1982. April.

Ingredients: Crushed tofu, sesame seeds, vegetables, tamari, fresh herbs and spices, wheat flour.

Wt/Vol., Packaging, Price: Vacuum packed.

How Stored: Refrigerated.

New Product–Documentation: Letter from Sjon Welters.

1982. April 16. "Jonathan is a macrobiotic food company.

They produce a wide assortment of macrobiotic products, such as tofu (3,000 lb/week), ganmo, etc.

Jonathan catalog. 1988. A full-page color plate shows all these products. These are deep-fried tofu burgers. Ingredients are listed (see above).

6100. Leviton, Richard. 1982. A new soy sauce from an old culture. *East West Journal*. April. p. 42-44.

• **Summary:** Hoang Van Chi, a native of Vietnam, makes

Bodhi Sauce or tuong cu-da in Bowie, Maryland. Photos show: (1) Phan and Hoang Van Chi with bottles of both the sauces they make. (2) Hoang checking glutinous rice that has been steaming overnight. (3) Phan and Hoang involved in four steps in the preparation of sweet rice koji. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

6101. San-J. 1982. Some soy sauces are called tamari. But they're not! San-J is the real tamari (Ad). *East West Journal*. April. Rear cover.

• **Summary:** This full-page ad (see next page) is a combination of black-and-white and color. In black-and-white are 5 quarts of so-called tamari under the following brands: Westbrae, Erewhon (2), Llama, and Pure & Simple. In color are 2 bottles of San-J Tamari (wheat free, in 5.7 oz refillable dispenser and 20 oz glass bottle). The text explains that this real tamari is: Made only from soybeans. Mellow, smoother, richer than regular soy sauce. More protein than regular soy sauce. San-J Tamari will enhance any dish. A concentrated, economical product.

6102. Reed, M.H. 1982. Japanese spot bridges East, West. *New York Times*. May 2. p. WC23.

• **Summary:** This is a review of the Japanese restaurant Ichi Riki in Nyack, New York. Recommended dishes include agedofu and salmon teriyaki.

"For instance, it would have been a pity to miss the superb example of agedofu—silken bean curd deep fried to 'meatiness' and flavored with daikon and dashi;..."

6103. Pautz, Jane Abe Cadwell. 1982. Re: Directory of soyfoods manufacturers in Sao Paulo, Brazil, and comments on the availability of these foods. Letter to William Shurtleff at Soyfoods Center, May 29. 3 p. Typed.

• **Summary:** List all known companies in Sao Paulo that make soyfood products. A separate listing is given for each product with the full company name and address. The product categories include: Tofu and tofu products (2 companies). Soymilk (4). Shoyu (3). Sellers of whole dry soybeans (1). Lecithin (1). Soyflour (1; soyflour is available in many stores without a brand name). TSP / TVP (2).

"As you know we have a large Japanese colony here in the country. I am only aware of what is here in Sao Paulo."

"Soynuts are available in health food stores in small unlabeled packages. I have not seen soynut butter. Misso (miso) is plentiful. Soy sprouts are sometimes available in open-air markets along with other Japanese products. They aren't common. Fresh green soybeans [edamame] are also available at certain times of the year in these markets. Of course there is lots of soyoil. I think that Sanbra is one of the big producers or sales company of the beans [soybeans]. In some of the healthfood stores there is a product available called 'carne de soja' (literally "soy meat [textured soy flour]). There is no brand name and I have not experimented

with it."

"I will be working on a book of tofu recipes during this vacation. The publisher wants to publish it yet this year.

"Last year I gave 3 lessons in working with soyfoods at the Nestlé experimental kitchen here in Sao Paulo, and may be working with a new health foods store / restaurant in developing foods. I would like to see them try some typical soy-deli kinds of things. There is a lot of interest here, new stores of 'produtos naturais' [natural food products] and vegetarian restaurants are quite popular." Address: Rua Spinagés 1974 Apto. 61, 01258 Sao Paulo, Brazil.

6104. **Product Name:** Bean Products Japanese-Style Soy Sauce, Bean Products Chinese-Style Soy Sauce.

Manufacturer's Name: Bean Products Ltd.

Manufacturer's Address: 42 Telford Rd., Eastlenziemill Industrial Estate, Cumbernauld, Dunbartonshire G67 2AX, Scotland. Phone: 02367 38310.

Date of Introduction: 1982. May.

New Product—Documentation: Letters from Brian J.B. Wood. 1983. March 16 and 30. "The company was established in April 1982. It is currently producing only soy sauce, but plans to diversify into miso, tofu, etc., as soon as possible. We are trying to produce (a) a Japanese style shoyu to 'wholefood' specifications; (b) a Chinese-style sauce intended mainly for the food manufacturing industry. I say 'trying' because of the difficulty of tying down potential customers to precise specifications."

Letter from Brian J.B. Wood. 1983. April 25. "There is no one person in overall charge... Christopher Corden looks after production; Michael Riddle is finance and office administration; Nigel Patch is sales and also electrical and plant maintenance. We estimate we can produce up to 600 tonnes of soy sauce a year before needing to make substantial changes to the factory.

Display ad by Scottish Development Agency in the *Economist* (London). 1984. June 9. p. 62. "Scotland's answer to Japanese whiskey."

Soya Bluebook. 1986. p. 106; 1987. p. 94.

Interview with Brian J.B. Wood. 1994. April 1-2. In May 1984 the company was sold to Nestlé (for a relatively low price), and it was renamed Nestlé Foods—Cumbernauld.

Note: This is the earliest known commercial soy product made in Scotland.

6105. Kikkoman International. 1982. Market share of U.S. soy sauce market (including teriyaki sauce): Dollar base. San Francisco, California. 3 p. Unpublished manuscript. [1 ref]

• **Summary:** The SAMI (Selling Areas Marketing Inc.) report shows that for U.S. supermarkets in Dec. 1981 the market shares based on dollar sales were Kikkoman 49%, La Choy 32%, Chun King 13%, and Other 6%. In May 1982 these figures were 50%, 32%, 11%, and 7%. In 1979 these figures were 44%, 34%, 16%, and 6%. Thus Kikkoman's gains

SOME SOY SAUCES ARE CALLED TAMARI. BUT THEY'RE NOT!

SAN-J IS THE REAL TAMARI

Made Only from Whole Soybeans

Most products that are labeled tamari in the U.S. are what the Japanese call shoyu, which contains wheat, as well as soybeans, water and salt. Real tamari, like SAN-J, contains no wheat, and is naturally brewed from only soybeans, water and sea salt. If you've been buying tamari for years, it probably wasn't tamari.

Mellower, Smoother, Richer than Regular Soy Sauce

SAN-J TAMARI is brewed in wooden casks over four full seasons, a minimum of twelve months. The end result is an all natural, high-protein soy sauce that is exceptionally smooth and subtle to the taste, as well as having a richer and heartier flavor than regular soy sauce or shoyu.

Try this taste test for yourself — compare a little SAN-J TAMARI with your favorite shoyu. You'll be surprised — there's a real difference — the shoyu will be salty compared with SAN-J TAMARI, which gives you real flavor, not just saltiness.

More Protein than Regular Soy Sauce

Because SAN-J contains only soybeans, it retains much more of the nutritional benefits of the soybean than shoyu which also contains as much as 50% wheat. SAN-J TAMARI contains approximately one third more protein than shoyu and has 18 essential amino acids. It is also rich in enzymes which aid the digestive process, and contains valuable minerals. SAN-J TAMARI is not just a seasoning and a condiment — it's a real food as well.

San-J Tamari will Enhance any Dish

SAN-J TAMARI is unique as a seasoning because it acts in two ways — it adds its own distinctive flavor to your meal, as well as subtly bringing out the existing natural flavors of the ingredients in any dish. It's a natural "flavor enhancer" and seasoning in one. Use it to make soups, casseroles, stews, and salad dressings come alive with flavor. And that's not all! — SAN-J TAMARI is also a perfect condiment. It gives a rich, hearty boost of flavor to any meal. Use it wherever you would use salt — SAN-J gives you more flavor-enhancing properties than salt without the harsh bite of raw salt. It's better for you too! Now you can have hearty-tasting meals without a high sodium content.

A Concentrated, Economical Product

Sure, SAN-J costs more than regular soy sauce — and so it should. But a bottle of SAN-J TAMARI will last a lot longer. The rich, concentrated flavor of SAN-J TAMARI means you will need to use much less of it than of other soy sauces — and it can also be diluted with water without losing its distinctive flavor, a flavor you and your family will love.

SAN-J TAMARI is available in both the 5.07 oz. refillable dispenser and a new, economical 20 oz. glass bottle.

Don't settle for anything less — SAN-J is the REAL TAMARI.

6106. Krieger, Verena. 1982. Die tausend Talente von Tofu [The thousand talents of tofu]. *Natuerlich* 2(5):69-73. May. [Ger]

• **Summary:** An excellent overview, with numerous color photos of recipes, products, and plants. "Tofu found its way to Europe not over the steppes of Asia but through the kitchens of North America, starting with *The Book of Tofu* by Shurtleff and Aoyagi."

Contents: What is tofu? Why tofu? Soya—king of the beans (Switzerland imports 100,000 tonnes of soybeans each year to feed to animals). Tofu and its brothers. Is soy an exotic plant? The most important traditional soyfoods of East Asia: Tofu, miso, soymilk, tamari, shoyu and soy sauce (*sojasauce*), tempeh, soy sprouts (*sojakeime*).

6107. Leviton, Richard. 1982. Discovering Japanese soyfoods. *Vegetarian Times* No. 57. May. p. 60-62, 65. [1 ref]

• **Summary:** Recently Richard Leviton traveled to Japan with a group of Americans to get a firsthand look at the Japanese soyfoods industry. There he got his first look at the fabled neighborhood corner tofu shop. He discusses tofu (the Japanese consume 10 million cakes a day) and tofu manufacturers (large and small), types of tofu include silken tofu (called kinugoshi), fresh soft tofu called momen. "In the typical supermarket we counted as many as 60 different soyfood items (often several brands or product sizes), ranging from fresh miso and tofu to packaged soymilk and shoyu, natto, dried frozen tofu, yuba rolls and kinako powder."

Also: Takatsuka Marugo (a large tofu maker that churns out 100,000 lb/day of tofu), Yuba Han (a traditional yuba shop in Kyoto), Asahimatsu Kori-dofu Co., natto, Hamanatto, soymilk, cooked soybeans with wakame, soy sprouts, kinako powder, packaged green soybeans in the pods, miso (fresh and freeze-dried), Linda Barber (an American home economist who is teaching at Kobe Girl's College in Nishinomiya, and also teaching American-style tofu recipes to Japanese housewives via television and the print media), and Sasa-no-Yuki, a 279-year old restaurant that specializes in tofu cookery.

Photos show: (1) Eleven different tofu dishes in bowls as served at Sasa-no-Yuki restaurant in Tokyo. (2) A man hanging up fresh yuba at Yuba Han. (3) Members of the group seated on tatami mats on the floor around a huge table enjoying dishes served at Sasa-no-Yuki. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

Jap]

• **Summary:** This important Japanese-language article, published each year in the May issue of this periodical, has two parts: (1) A review of the past year's major discoveries and developments in the fields of miso and soy sauce in Japan. (2) A bibliography related to those discoveries and developments. Address: Noda Sangyo Kagaku Kenkyusho.

6109. **Product Name:** [Shoyu].

Foreign Name: Shoyu.

Manufacturer's Name: Sakura-Nakaya, Alimentos Ltda.

Manufacturer's Address: 03446-R Ordinações, 1951, 03446 Sao Paulo, Brazil.

Date of Introduction: 1982. May.

New Product–Documentation: Letter from Jane Cadwell Pautz. 1982. May 29. This company makes shoyu.

6110. Shurtleff, William; Aoyagi, Akiko. 1982. Soyfoods directory and databook. 1st ed. Lafayette, California: Soyfoods Center. 21 p. May. 28 cm. 2nd ed. published in June as Soyfoods Industry: Directory and Databook. 56 p. [24 ref]

• **Summary:** A detailed study of the rapidly emerging soyfoods industry and market. Contains original statistics compiled by the Soyfoods Center through interviews with companies. Contents: 1. Names and addresses of soyfoods manufacturers in the Western world, plus major soymilk, miso, shoyu, and yuba manufacturers in East Asia. 2. Analysis of the soyfoods industry in the U.S. 3. Soyfoods production statistics for America and the West. 4. America's prime soyfoods market regions. 5. The tofu industry in the West: Three-year analysis of the tofu industry in the West. The U.S. Tofu market: overview and outlook. Graph of number of tempeh and tofu manufacturers in the West. North America's twenty largest tofu manufacturers. 6. Analysis of the soymilk industry in the United States. 7. Key institutions working with soyfoods in the West.

Note: This is the first market study published by Shurtleff and Aoyagi. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6111. **Product Name:** [Marutaka Shoyu].

Foreign Name: Marutaka Shoyu.

Manufacturer's Name: Takaki (Masakazu) & Veneslau (R.).

Manufacturer's Address: Bras s/n CP 136, Riberao Pires, Sao Paulo, Brazil.

Date of Introduction: 1982. May.

New Product–Documentation: Letter from Jane Cadwell Pautz. 1982. May 29. This company makes shoyu.

6112. **Product Name:** [Shoyu, and Miso].

Manufacturer's Name: Tozan.

Manufacturer's Address: Bairro Carlos Gomes s/nº,

Campinas (SP), Brazil. Phone: (011) 278-2495 or 5826.

Date of Introduction: 1982. May.

New Product–Documentation: Letter from Jane Cadwell Pautz. 1982. May 29. “The misso is called ‘misso.’”

Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed. p. 255.

Letter from Luiz Simas and Bobbi Joels. 1986. Jan. 7. A large company named Tozan claims to devote part of its production to naturally-fermented miso and shoyu, with no sugar. The same address is given, plus a phone number. Note: A letter to the address above dated 26 May 1989 was returned to Soyfoods Center as undeliverable.

An Internet search (May 2009) shows: Industria Agricola Tozan S/A, Estr. Carlos Gomes, s/n, Campinas, Sao Paulo, Brazil. Phone: (19) 3257-1155.

6113. Arrowhead Mills, Inc. 1982. Price list and order form. Hereford, Texas. 4 p. June 15. 28 cm.

• **Summary:** Printed with light brown ink on white paper. Contents: Whole grains. Beans, seeds and nuts. Cereals, flakes and granolas. Flours and mixes. Packaged grains. Packaged beans, seeds and nuts. Packaged cereals, flakes and granolas. Packaged flours and mixes. Oils—natural unrefined. Nut butters (Peanut butter—creamy or crunchy). Condiments. Magnificent Munchies: Nutrition-bars (Carob Chew, Sesame Chew, or Vanilla Chew). Pastas. Protein powders and yeast. Arrowhead Mills bulk module.

Soy related products—bulk: Soybeans (50 lb). Bulghur-soy grits (50 lb). Soybean flakes (25 lb). Soy flour (roasted, 30 lb).

Soy related products—packaged: Soybeans (12 x 1 lb). Bulghur-soy grits (12 x 20 oz). Soybean flakes (12 x 1 lb). Soy flour, whole (12 x 1½ lb). Soy oil (pint, quart, or 5 gallon). Tamari soy sauce (pint, quart, or 4.7 gallon). Protein powder (12 x 10 oz). Address: Box 2059, Hereford, Deaf Smith County, Texas 79045. Phone: (806) 364-0730.

6114. Wells, Patricia. 1982. Fast food on the fast track: On—or near—Japan’s railroads, box lunches are first-class fare. *New York Times*. June 20. p. XX37.

• **Summary:** “In much of the world, fast food has become a synonym for mediocre, mass-produced fare.” But not so in Japan. The *ekiben* (box lunch for train travelers) has a long tradition of high quality, inexpensive, healthful food. A part of almost every box lunch is a tiny container of soy sauce for seasoning.

One excellent part of this box lunch, “a favorite of Japanese children, is inari zushi, seasoned rice wrapped with fried bean curd or tofu that’s been boiled in a sweet sauce.”

6115. **Product Name:** Tempeh Brothers Tempehburger. Renamed Tempeh Brothers Tempeh Burgers by early 1983.

Manufacturer’s Name: Appropriate Foods, Inc.

Manufacturer’s Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1982. June.

Ingredients: Organic soy tempeh, shoyu, herbs & spices.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1982. June 15. 3 inch diameter. Yellow, red, blue and white. Spot showing label in Soyfoods. Winter. 1983. p. 50. “The Tempeh Burger Takeover. Nationwide at least 7 brands of prepared tempeh burgers are produced.” The label reads “tempeh burgers.” Also in Soyfoods. 1984. Summer. p. 43. Interview with Robert Werz. 1987. Sept. 9.

6116. Bo, Thi-an. 1982. Hishio to shōyu no engen to sono seisan gijutsu ni tsuite. I. [On the origins of chiang and shoyu, and their production technology. I.]. *Nippon Jozo Kyokai Zasshi* (*J. of the Society of Brewing, Japan*) 77(6):365-71. June. [9 ref. Jap; eng]

• **Summary:** This is one of the most interesting and carefully researched articles seen up to this time on this subject. The author (Ho Keian in Japanese), is a Chinese graduate of Iwate University in Japan. He sent this article to the university alumni association on the university’s 80th anniversary. Shoyu has become a world-class seasoning. Even in Moscow they have built plants to produce soy sauce and chiang (miso).

The earliest chiang was made with meat, fish, and shellfish; later, as agriculture advanced, beans and grains were used. The two main types of chiang are (I) those made using flesh as a main ingredient and (II) those made solely from plants. The flesh chiangs can be further subdivided: IA. Those made from animal and bird flesh. IA1. Made without bones (mentioned in the Shih Ching [Classic of Food], the Chou Li [Rituals of the Chou Dynasty, 3rd century B.C.], the Li Chi [Book of Rites, 2nd to 3rd century B.C.], and the I Li); IA2., Made with a large amount of liquid (mentioned in the Chou Li and Li Chi); IA3. Made with flesh and bones (mentioned in the Chou Li, I Li, and Ch’i-min Yao-shu [Essential techniques for the peasantry of Ch’i, written by Chia Ssu-hsieh in A.D. 535]); IB. Made with fish or shellfish, including IB1. Fish chiang (mentioned in the Chou Li, Ch’i-min Yao-shu), and IB2. Fish intestine chiang (mentioned in the Ch’i-min Yao-shu). The non-flesh or vegetable chiangs (II) can be divided into: IIA. Those made with beans including IIA1. Chiang (mentioned in the Chou Li (3rd century B.C.), Lun Yu [Analects of Confucius, after 479 B.C.], Shih Chi [The Historical Record by Ssu-ma Ch’ien, ca. 90 B.C.], and Chi Chiu P’ien [48 to 33 B.C.]). IIA2. Bean (Soybean) chiang (tou-chiang, mentioned in the Ch’i-min Yao-shu). IIA3. Small (Red/Azuki) bean chiang (mentioned in the Nung Sang I Shih Chi Yao [+1314]). IIB. Chiang made from other vegetable materials including: IIB1. Wheat chiang (mentioned in the Shih Ching); IIB2. Wheat flour chiang (mentioned in the Pen-ts’ao Kang-mu [Compendium of Materia Medica, by Li Shih-chen, A.D. 1578-97] and

the Chū Chia Pi Yung Shih Lei Ch'uan Chi [+1301]); IIB3. Coconut chiang (Mentioned in the Ch'i-min Yao-shu); IIB4. Barley chiang (mentioned in the Pen-ts'ao Kang-mu); and IIB5. Mustard chiang (mentioned in the Li Chi and Chih Ching).

It is interesting to note that the earliest meat and fish chiang was made with koji, typically millet koji. Koji is also used today to make some of the fish sauce called Shottsuru in Akita prefecture in Japan. Shottsuru has a 3,000 year history.

The use of the terms "hai" (meat chiang) and "chiang" in the Chou Li imply that some chiang was made from ingredients other than meat. An illustration from the Han dynasty shows a hole in the bottom of a chiang pot for drawing off soy sauce. The *Ssu Min Yüeh Ling* by Ts'ui Shih from the Later Han (25-220 A.D.) uses the term "ch'ang chiang" to refer to refined/filtered soy sauce. The *Ch'i-min Yao-shu* also uses two terms for refined chiang that seem to be referring to types of soy sauce. Thus it seems relatively sure that chiang has a history of about 3,000 years from the Chou dynasty (1122-256 B.C.) and soy sauce has a history of over 2,000 years since the Ch'in (221-206 B.C.) or Han (206 B.C.-A.D. 220). In the literature of the T'ang dynasty it is not rare to use soy sauce for medicinal purposes.

Soy sauce came from chiang, which was made from soybeans and wheat flour or wheat; it is still widely produced today. But from shih (fermented black soybeans) came tamari and kuan-tou soy sauce (kuan-tou is a region in Fukien / Fujian in southeast China). Only soybeans were used to make these types of soy sauce. The first tou-shih (fermented black soybeans) was made from soybeans only, with *Aspergillus oryzae* mold. If salt was added, the product was called hsien tou-shih; if none was added, it was called tan tou-shih. Later they started to use *Mucor* (as in Szechuan tou-shih) or *Rhizopus* mold species. Today most tou-shih is made with *Aspergillus*. This is the ancestor of tamari shoyu and kuan-tou soy sauce. Address: Iwate Daigaku Nôgaku-bu, Sogaku 80 shunen no gosokuji ni kaete; Present address, China.

6117. Chico-San, Inc. 1982. Mail order-Price list. P.O. Box 1004, Chico, CA 95927. 4 p. June. 28 cm.

• **Summary:** Products include: Rice Cakes (6 varieties, with 4 new ones coming soon); all in 3 different packages. Carob coated rice cakes in plain or mint flavors. Yinnies brand products: Taffy, Caramel, or Rice Syrup. Grains, beans, and seeds: Incl. Sweet brown rice, azuki beans, black [soy] beans (the latter two imported from Japan since 1962). Tea. Natural condiments from Japan (some imported since 1962): Lima soy sauce. Mugi (barley) miso. Kome (rice) miso. Rice malt vinegar. Tekka (soy plus). Nigari (for tofu making). Kuzu (wild arrowroot). Salt plums (umeboshi). Sesame oil (dark). Koji, barley. Seaweeds from the Orient: Wakame (curly dulse). Kombu. Hijiki. Kanten (gel). Nori. Household goods: Incl. The Yinnies Brand Rice Syrup Cookbook.

6118. Howe, J.M.; Hoff, J.E. 1982. Plant diversity to support humans in a CELSS ground-based demonstrator. Moffett Field, California: National Aeronautics and Space Administration (NASA). 51 p. June. 28 cm. Report No. NASA CR-166357. [49 ref]

• **Summary:** Prepared under NASA Grant NSG-2401. CELSS stands for "controlled ecological life support systems." Contents: Introduction. Human nutritional requirements in CELSS-GD: Nutrient composition of total plant [vegan] diets (energy, protein, vitamins, minerals), interaction of dietary components, stress. Bioavailability studies of minerals: Rationale (calcium, iron, zinc), experimental procedure (planning of diet, experimental animals), results, experiment IV. Summary. Bibliography of CELSS reports.

Appendix A is a 14-day total vegetarian [vegan] cycle menu. Soy products appear as follows (B = Breakfast, L = Lunch, D = Dinner): Day 1-Sandwich of soy pate (L), soy milk (L&D, 1 cup each). Day 2-Tofu (L, ¼ cup), soy milk (L). Day 3-Soy milk (D). Day 4-Soy milk (B&L). Day 5-Soy milk (B&L), soy burgers (L, 2). Days 6 and 7 = none. Day 8-Soybeans (D, 1 cup). Day 9-Soy milk (B&D), soy bean and winter squash (L, ½ cup each), soy sauce with cooked veggies & brown rice. Day 10-Soy milk (B). Day 11-Soy milk (L). Day 12-Soy meat analogue (D, 3 oz). Address: 1. Dep. of Food and Nutrition; 2. Dep. of Horticulture. Both: Purdue Univ., West Lafayette, Indiana 47907.

6119. Shurtleff, William; Aoyagi, Akiko. 1982. Soyfoods industry: directory and databook. 2nd ed. Lafayette, California: Soyfoods Center. 56 p. June. 28 cm. [24 ref]

• **Summary:** A detailed study of the rapidly emerging soyfoods industry and market. Contains original statistics compiled by the Soyfoods Center through interviews with companies. Contents: 1. Terminology: The many types of soyfoods. I. Traditional low-technology soyfoods. 1A-Nonfermented soyfoods: Fresh green soybeans, whole dry soybeans, soynuts and soynut butter, soy sprouts, whole soy flour & grits, roasted soy flour [kinako] & soy coffee, soymilk and dairylike soymilk products, tofu (eight types), okara or soy pulp, yuba.

1B-Fermented soyfoods: Tempeh, miso, soy sauce, shoyu & tamari, natto & thua-nao, fermented tofu & soymilk, soy nuggets (Hamanatto & tou-ch'ih).

II. Modern soy protein foods: Defatted soy flour, grits & flakes, soy protein concentrates, textured soy protein products, soy protein isolates.

III. Soy oil products: Soy salad oil & cooking oil, soy oil margarine & shortening, soy lecithin.

2. Soyfoods industry directory: Names and addresses of

over 850 soyfoods manufacturers in the Western world, plus major soymilk, miso, shoyu, and yuba manufacturers in East Asia. 3. Analysis of the soyfoods industry in the U.S.

4. Trends in U.S. and world soybean production: Graph of world soybean production (1922-1979) including graphs for the world total, USA, Asia total, and Latin America. Graph of U.S. soybean production, yields, and exports (1924-1979).

5. Analysis of the tofu industry in the West: The U.S. tofu market: overview and outlook. Graph of the number of tofu (and tempeh) manufacturers in the West from 1975 to 1982. Four-year analysis of the tofu industry in the West. Listing of North America's largest tofu manufacturers and their weekly tofu output. Japan's largest tofu manufacturers and their daily output. Favorite tofu, soymilk, and tempeh recipes as served at U.S. soyfoods, delis, cafes, and restaurants, or marketed as ready-to-serve products. Books on tofu published in America.

6. Analysis of the tempeh industry in the West: Graph of number of tempeh manufacturers. Recipes. Listing of North America's largest tempeh manufacturers and their weekly output.

7. Analysis of the worldwide soymilk industry: Analysis of the soymilk industry in the United States. Analysis of the soymilk industry in Japan. Major Japanese soymilk companies and their products.

8. Analysis of the soy sauce / shoyu and miso industries worldwide. Statistics on fermented soyfoods in East Asia. The soy sauce market in the United States (1981). U.S. imports of soy sauce. Graph (1947-1981. Source: U.S. General Imports, Schedule A. Commodity by Country. U.S. Dept. of Commerce, Bureau of Census). U.S. imports of soy sauce. Table (1947-1981. Source: U.S. General Imports, etc. See above). The shoyu / soy sauce market in Japan. Graph. (1886-1980. Includes: Number of manufacturers. Per capita consumption. Shoyu production. Kikkoman's market share (%)). The miso market in Japan. Graph. (1930-1980. Includes: Per capita consumption. Total miso production. Factory production. Number of manufacturers. Home production. Amount of soybeans used). Overview of the miso market in the United States. Miso exports from Japan (1981). Japan's ten largest miso manufacturers and their output.

9. Other: Analysis of the soynuts industry in the U.S. North America's larger soyfoods delis, cafes & restaurants. The soybean crushing industry; overview.

10. Soyfoods terminology and standards (Glossary of soyfoods terms): I. Traditional nonfermented soyfoods: Fresh green soybeans, okara, roasted soy flour (soy coffee, soy chocolate), soybeans, soymilk (soymilk ice cream, soymilk soft serve, frozen soymilk yogurt, soymilk mayonnaise, soy shakes, soy nog, soymilk whipped cream), soynuts, soy sprouts, tofu (regular tofu, deep-fried tofu {deep-fried tofu cutlets called nama-age or atsu-age in Japan, deep-fried

tofu burgers or burger balls, called ganmodoki or hiryozu in Japan, deep fried tofu pouches (called aburage in Japan; the words "deep-fried" may be dropped from the names after the initial usage, and in recipes or on package labels, if desired}), silken tofu {made without separation of curds and whey, called kinugoshi in Japan; modern types, all made with glucono delta-lactone as coagulant, and all known in Japanese as juten-dofu, are packaged lactone silken tofu, bagged lactone silken tofu (fukuro-dofu), sealed lactone silken tofu (buro-dofu), and Ever-Fresh Lactone Silken Tofu (in Tetra-Pak)}, grilled tofu, frozen and dried-frozen tofu. (Note: It is illegal to describe the latter product as "freeze-dried tofu," since freeze-drying is a completely different process), terms associated with making tofu {fresh soy puree, a coagulant or curdling agent, forming box, filter bag or pressing sack, tofu comes in cakes, not blocks}), whole soy flour, flakes and grits, yuba.

II. Traditional fermented soyfoods: Fermented soymilk products (soymilk yogurt {Soy Yogurt, Soyogurt, Soygurt}, acidophilus soymilk, soymilk kefir, viili, piima, buttermilk {Soy Kefir, etc.}), fermented tofu (wine-fermented tofu, brine-fermented tofu), miso (rice miso, barley miso, soybean miso, Chinese soybean chiang), natto (thua-nao from Thailand and kinema from Nepal; all are non-salted), soy nuggets [fermented black soybeans] (Chinese soy nuggets know as shih, tou-ch'ih, tou-shih, or dow-si; savory soy nuggets called Hamanatto in Japan, Daitokuji soy nuggets called Daitokuji natto in Japan, Philippine soy nuggets called tausi or tao-si in the Philippines, Indonesian soy nugget paste called tauco, formerly spelled tao-tjo, Malaysian soy nugget sauce called tao-si), soy sauce (shoyu. The five basic types of Japanese shoyu are: regular shoyu called koikuchi shoyu in Japanese, light-colored shoyu called usukuchi shoyu, tamari shoyu, clear shoyu called shiro shoyu, and rich shoyu called saishikomi shoyu), tempeh, other fermented soyfoods.

III. Soy oil and modern soy protein foods: soy oil, defatted soy flour, flakes and grits, soy protein concentrate, soy protein isolate, textured soy protein products (TSP, TVP is a registered trademark of the Archer Daniels Midland Company and cannot be used as a generic name for this product), meat analogs (foods typically made from spun soy protein fibers to resemble meat, fish, or poultry products).

11. Names of soyfoods around the world: Names of 40 products. Brazilian / Portuguese names. British English names. Chinese names (fermented tofu is Toufu-ju or Sufu). French names, German names. Japanese names. Spanish names.

12. Key institutions working with soyfoods in the West: The Soyfoods Center, Soyfoods Association of North America, INTSOY, American Soybean Association, Bean Machines, Inc., Soycrafters Apprenticeship Program, USDA Northern Regional Research Center, Sojaquelle.

About The Soyfoods Center.

6120. Tamura, Shôzaburo. 1982. Re: History of the Japan National Miso Association. Letter to William Shurtleff at Soyfoods Center, June—in reply to inquiry. 3 p. Handwritten, translation of original letter only. [Jap; eng+]

• **Summary:** The Japan National Miso Association (*Zenkoku Miso Kogyô Kyôdô Kumiai Rengôkai*) was founded on 17 Nov. 1960. Japan's first nationwide miso trade association was founded on 11 Jan. 1940. Its name was *Zenkoku Miso Kogyô Kumiai Rengôkai*. In 1944 [during World War II] it became a controlled company (*Tôsei Gaisha*), and in 1948 its name was changed to *Zenkoku Miso Kogyô Kyôkai*. Finally in 1960 it became the present *Zenkoku Miso Kogyô Kyôdô Kumiai Rengôkai*.

According to Dr. Hideo Ebine, the earliest known article on miso published in a scientific journal was: Kellner, O. [Oskar Johann]; Nagaoka, M.; Kurashima, Y. 1889. "Researches on the manufacture and composition of miso." *Bulletin of the College of Agriculture, Tokyo Imperial University* 1(6):1-24. Dec. Dr. Ebine is head of the Central Miso Research Center, which is in the same building as the miso association.

Concerning statistics on the amount of miso produced in Japan over the past century: There are good statistics on shoyu since it has been taxed nationwide since the Meiji period, but there are no such reliable statistics on miso because it was not taxed, and also because a great deal of miso was made in individual homes in the early days. Address: *Zenkoku Miso Kogyô Kyôdô Kumiai Rengôkai*, Tokyo, Japan.

6121. Tofu Shop (The). 1982. Take-out deli (Menu). 768 18th St., Arcata, CA 95521. 6 panels. Undated. Front and back.

• **Summary:** This 6-panel leaflet and menu is mostly handwritten but partly printed. On the front cover is the logo of a dragon in a circle. "9-6 Monday-Saturday. Hot food served 12-6 daily. In a hurry? Call ahead: 822-7409. Your local soyfoods producer." One panel, titled "Welcome to the tofu shop," states that this is "one of only a handful of traditional-style tofu shops in the Western Hemisphere."

Another titled "Inside our sandwiches" lists the ingredients in each sandwich. Soy-related menu items include: Sandwiches: Tofuburger. Dragonburger. Tofucadoburger. Spinach turnover (with tofu filling). Sesame tofu pocket. Mexican pastry (a mini-burrito filled with spicy tofu). Fuji roll (with rice, [mung] bean sprouts, tofu, and miso). Sushi roll (with nattoh miso filling). Tofu burrito. Salads: Potato-tofu. Tahini-tofu. Desserts. Beverages: Soymilk. Sides: Tamari, olive and lemon. Sesame tofu dressing. Miso onion sauce. Tofu veggie patty. Baked tofu cutlet. Specialty groceries: Tofu, miso, condiments, crackers,

recipes, supplies for tofu and miso making. Address: Arcata, California. Phone: 707-822-7409.

6122. Dominguez de Diez Gutiérrez, Blanca. 1982. Re: Names of soyfoods around the world: Spanish. Form filled out and returned to William Shurtleff at Soyfoods Center, July 9. 1 p. Handwritten. [Eng]

• **Summary:** Gives the names of all the various soyfoods in Spanish. Note: A typed list of these names is published in *Soyfoods Industry and Market: Directory and Databook*, 1985. 5th ed. p. 164.

"Fresh green soybeans—Frijol de soya tierno o ejote de soya. Whole dry soybeans—La soya, Frijol de soya. Black soybeans—Frijol de soya negro. Fresh soy puree—Pure de frijol de soya. Soy sprouts—Germinados de soya. Soynuts—Soya-nuez (nuez means walnuts or pecans), Soya-huate (means peanuts from cacahuate). Oil roasted soynuts—Soya nuez tostada (meaning nut). Dry roasted soynuts—Soya-huate tostado (meaning peanuts). Soynut butter—Mantequilla de soya. Roasted soy flour—Harina de soya tostada (kinako). Soy coffee—Soyafee. Soy chocolate—Soyalate. Soymilk—Leche de soya. Soymilk ice cream—Helado de leche de soya. Soymilk curds—Cuajada de soya, Jocoque de leche de soya. Tofu—Tofu, Queso de soya, Cuajada de soya. Soft tofu—Tofu blando. (Regular) Tofu—Tofu comun. Firm Tofu—Tofu firme. Extra firm tofu—Tofu extra firme. (Deep fried) Tofu cutlets—chuletas de tofu. (Deep fried) Tofu burgers—Hamburguesas o tortitas de tofu. (Deep fried) Tofu pouches—Saquitos de tofu. Silken tofu—Tofu sedoso. Pressed silken tofu—Tofu sedoso prensado. Grilled tofu—Tofu a la parrilla. Dried frozen tofu—Tofu seco congelado. Okara or soy pulp—Okara, pasta de soya, pulpa de soya. Yuba—Yuba. Fermented black soybeans—Palanquetas de soya. Miso or soybean jian—Miso (el). Soy sauce—Salsa de soya. Shoyu—Shoyu (el). Tamari—Tamari. HVP soy sauce—Have not found it. Tempeh—Tempeh (el). Fermented tofu—tofu fermentado. Fermented / cultured soymilk—Leche de soya fermentada. Natto, thua-nao, kinema—Natto (el). Soy oil—aceite de soya. Soy lecithin—Lecitina de soya. Soy flour—Harina de soya. Whole (full fat) soy flour—Harina de soya entera. Defatted soy flour—Harina de soya degasada. Soy grits and flakes—Soya martajada y hojuelas de soya. Cereal-soy blends (CSM, WSB, etc.)—Soyavena (with oatmeal). Soy protein concentrate—Concentrado de proteína de soya. Soy protein isolate—Aislado de soya. Textured soy protein products—Productos de soya texturizada. Textured soy flour, TSF, or TSP—Harina de soya texturizada. Textured soy concentrates—Concentrados de soya texturizada. Textured soy isolate—Aislados de soya texturizada. Spun soy protein fibers—Fibra de proteína hilada de soya. Soy casmar, Soya Cocoa, Coco soya—Beverages made with chocolate or cocoa. Pastisoya—Like spaghetti or noodles of different kinds made with soy flour—commercial products. Vegesoya—Commercial products for soups. Soya mex and Chocosoya—for beverages. Soya pac—Textured soya

like meat, also a commercial product.” Address: Apdo. Postal 226, Jalapa, Veracruz, Mexico.

6123. *India Today*. 1982. Vittal Mallya: Empire builder. July 31. p. 101-02.

6124. Barber, Linda. 1982. Natto: The taste of Japan. *Soyfoods*. Summer p. 70-71.

• **Summary:** “Some people say that the taste of Japan is a bowl of miso soup, but I would have to say it is natto, Japan’s original soyfood. Unlike miso or tofu, natto was discovered in Japan. The story goes that someone wrapped his meal of cooked soybeans in straw (the ‘baggie’ of 1000 years ago), and after a couple of days, unwrapped the bundle and found *Itohiki* natto. These fermented soybeans, held together by slippery filaments, were soon to become the traditional topping to a bowl of rice served at breakfast and dinner to millions of Japanese people.

“Today, natto is made by soaking washed soybeans overnight, then draining and pressure cooking them. After another draining, the beans are inoculated with *Bacillus subtilis* (*Bacillus natto*) while still warm, scooped into perforated plastic bags and wrapped in straw (or they often are sometimes run into styrofoam containers that have holes for air circulation), then incubated at 40–45°C (104–113°F) for about 14–18 hours.

“Care is taken in not letting the natto get too hot. In natural fermentation the beans produce some heat on their own and keeping the temperature below 55°C (121°F) is important. After the 14 hours, the natto is put into cold storage, wrapped with a labeling band, boxed and shipped. One of the charms of natto is that it takes very little space or complicated equipment to manufacture.

“Not only is natto easy to produce, but it has high nutrition going for it too! This soyfood is 17% protein, 60% water, 10% fat, 10% carbohydrates, 2% fiber, 2% ash. As for other nutrients, natto has 0.07 mg vitamin B1, 0.50 mg B2, 1.1 mg niacin, 3.3 mg iron and 90 mg calcium. Also, research has shown that when we compare cooked soybeans with natto, the levels of thiamine, riboflavin and B12 are higher in natto thanks to the fermentation process.

“Yet, some experts say that the most beneficial characteristics of natto can’t be found on a nutrition chart. The wonder of natto lies in its bacterial medicinal qualities. Do the digestive enzymes present in natto prevent or cure digestive diseases? Or is natto only beneficial because it is a good natural food and an excellent source of protein that the body can easily assimilate because of the fermentation process? Without being caught in the medical discussion crossfire, it can be said for sure that natto is a nutritious food that can give any diet a new flavorful zing.

“Many people, even those with adventurous taste buds, find natto as a food quite a challenge. Actually, only about half of the Japanese care for it. Even so, most bars, sushi

shops, and Japanese-style restaurants offer natto as daily fare.

“In Japan, natto is served in many ways. And now, with the rising cost of food, natto has taken on new dimensions. Once served only as a topping for rice or in miso soup, creative Japanese cooks now serve natto sushi, natto spaghetti, natto udon (wide, white wheat noodles), natto omelet, natto gyoza, natto sandwiches, natto tempura, chopped natto with cuttlefish, deep fried natto, natto salad, natto with mochi, and even a liqueur made with natto.

“After getting over my initial ‘gag’ reaction to eating natto, I was pleasantly surprised to find it tasted very much like a strong, rare cheese, I soon began making natto pizza, natto lasagna, and toasted natto sandwiches. At only 25 calories for 100 grams (3½ oz) my mind was turning spins developing recipes for this marvelous slippery stuff.

“Natto lends itself to western-style dishes quite nicely. How about natto fettucini, natto crepes, natto French onion soup, natto tortillas, natto frittata, nattoburgers, baked potatoes with natto topping, fried eggplant with natto, natto egg salad, or natto moussaka? My latest natto creation is Natto Dip: Mix together 2 cups tofu mayonnaise, ½ cup chopped green onions, 1/8 teaspoon pepper, ½ cup chopped parsley, 10 oz. cooked and chopped spinach, ¼ cup natto, and salt (or shoyu) to taste. Serve with crackers or raw vegetables. Superb!

“Once you purchase a carton of natto you can keep a supply going like you do yogurt, but expect to buy a fresh starter every 3 or 4 batches. For home-style natto, boil soaked soybeans, drain and add a cube of purchased natto. Mix, and put into containers. I suggest styrofoam cups, fast food containers, or paper cups. Make sure they are clean and free from any other bacteria. Cover the inoculated beans with clear wrap (make holes with a hot needle for air ventilation). Set the cups, or containers, in a foam ice chest or wrap in a heating pad, or simply use a yogurt maker. Incubate for about 18 hours.

“If at the end of 18 hours your product is grayish in color, and forms a long string (filament) when you touch your finger to the surface, you know you’ve succeeded. Chill the natto, then enjoy it in one of the ways suggested above. You can always have natto on hand as it freezes well too!

“Before you say ‘Naa’ to natto, let me give you some hints that will make natto easy for you to swallow:

“1. The most important is to make sure that the natto you buy is *fresh*. It should be grayish in color with a little odor. When you touch natto, a lone string will form—the longer the better. Natto has a shelf life of about 1 week (I prefer to eat mine the day I buy it). If the natto is bad, it will taste bitter, smell very strong, and may even have mouldy spots or crystals on the surface. Junk it!

2. “Eat it as the Japanese do, in small amounts. The most traditional way is to mix the natto with a raw egg yolk, chopped green onion, mustard and a dash of shoyu. Scoop

a little of this onto your next bowl of rice. I've also had this condiment served in a small dish alongside a cold beer. I'm sure it would make a hit even in Milwaukee!

"3. To get over the natural gooeyness of natto, serve it in foods where you would expect, and want, some 'slip.' Natto acts like melted cheese. How about glueing a taco together with a topping of natto?

"Another type of natto I like is dried natto (*hoshi natto*). Sold as a snack food, this soyfood is very salty in taste, resembles raisins coated with flour, and is unslippery to the touch. Yet, it has a gooey mouthfeel. Enjoy this type with a cup of green tea, or sprinkle a few grains on a bowl of rice. As a break from tradition, chop up a few and use them as a salty seasoning to whatever you cook: soups, stews, casserole baked goods, or even apple pie.

"In reading or talking about natto, one often runs across the kind referred to as *Hamanatto*. Unlike *Itohiki* natto, this 'natto' is made by a different process and uses the bacteria [sic, mold] *Aspergillus oryzae*. Hamanatto originated in China. Nutritionally it is 34% water, 28% protein, 14% fat, 13% carbohydrate, 2% fiber, 10% ash. Calcium is listed as 140 mg, iron 8.3 mg, and sodium as 2,900 mg.

"As you can see from the sodium count, Hamanatto is quite salty and the taste is reminiscent of Hatcho miso. Blackish and chunky, this 'natto' is sometimes referred to as 'Soy Nuggets' [fermented black soybeans], or 'Raisin-like Natto' by some Westerners.

"No matter how you eat it, natto is an intriguing soyfood. This natural, whole food is indeed a taste of Japan, and after 1000 years it's still going strong in a world of fast foods.

"The author, a trained home economist who lived in Japan for many years, has recently returned to her home in Wisconsin."

Photos (taken by Linda Barber in July 1981) show: (1) Natto sold retail, packaged in rice straw. (2) Some natto being lifted, using chopsticks, up from a package of natto. Four photos showing "How natto is made" commercially in Japan. (3) The soybeans are steam cooked. (4) Then inoculated with natto bacteria. (5) Run into containers and incubated 14-18 hours. (6) Then packaged, boxed, and shipped.

Note: This is the earliest document seen (Jan. 2012) that mentions *hoshi natto* ("dried natto"). Address: Japan and Wisconsin.

• **Summary:** Contents: Introduction. Family specialization as the key to success. Beyond the limits of the family. Becoming a corporation.

"The first family in Noda to specialize in shoyu fermentation was known as the Kashiwa household. It was initiated in 1764 when a son of Takanashi Hyozemon, descendant and namesake of the first Takanashi to brew shoyu in Noda in 1661, was adopted into the family of Mogi Shichizaemon of the same town. He was adopted for the express purpose of marrying Shichizaemon's daughter." Two years later after the marriage, "this couple established a separate branch household (a formal legal and religious process) to engage exclusively in the manufacture of shoyu, they unknowingly founded a dynasty which would guide the fortunes of the shoyu industry in Noda and in Japan for the next two centuries. Because it was specialized [in] shoyu fermentation, the Kashiwa household quickly became the largest independent brewer in Noda. Even after 1887 when most of the local brewers, including the Kashiwa house, formed a cartel, the head of the Kashiwa family was normally the chief officer of the cartel association, and in 1917 when eight Mogi and Takanashi families formed a company, the first president of the Noda Shoyu Company, Limited (precursor to the Kikkoman Corporation) was Mogi Shichirōemon, the Fifth, head of the Kashiwa line."

Photos show: Three different techniques for pressing the sauce from fermented mash, around 1923, at Noda, Japan. A forklift truck in the warehouse of the Kikkoman plant in Walworth, Wisconsin.

6127. Leviton, Richard. 1982. American Miso makes a big move down south. *Soyfoods*. Summer. p. 18-22.

• **Summary:** A feature cover story about John and Jan Belleme and their American Miso Co. in North Carolina. Richard Leviton visited the company in April. "Jan and John Belleme are serious about making miso. After a strenuous 8 months apprenticeship in Japan with master misomaker Takamichi Onozaki and a \$300,000 investment in buildings, land, and equipment, the Bellemes began fulltime, large scale miso production at their Rutherfordton, North Carolina, plant in August, 1981."

Situated on 100 acres in the rural southwestern corner of North Carolina, the occupies two buildings, including a 3,400 square foot Butler style metal-frame concrete base structure for miso processing and a smaller 1,000 square foot garage-style building for rice polishing and storage. The Bellemes live in a comfortable farmhouse up the hill, just a 5-minute walk away. Its important to be near the koji room when you are trying to carefully monitor the growth of 1,200 pounds of rice koji in a traditional koji room with no thermostat. The company "has struck a careful balance

between the traditional approach (as with koji, which requires skill and personal attention) and labor-saving mechanization (as with bean washing, soaking, cooking, mixing,” and moving). The company has the capacity to make 500,000 lb/year [226.8 metric tons/year] of miso. They presently make 3,000 to 4,800 lb/week of light and dark misos. A color photo on the cover shows John Belleme making miso with Kaoru Onozaki (Mr. Onozaki’s eldest daughter) and Haruo (his adopted son—since he had no sons of his own).

Minnesota-grown Prize soybeans are mechanically washed, then transported by conveyor into a 200-gallon (400 lb capacity) pressure cooker, which is controlled by a push button. When done, the removable steamer basket inside the cooker is moved by overhead crane and the soybeans are discharged through the bottom onto a large cooling table, where they are spread by shovels then allowed to cool—with the aid of at least one electrical fan. A push button then causes the table to tilt; the beans are then run into an extruder, and ground to a paste, which is later mixed with the handmade koji. “Bellemes’s koji room combines both traditional and automatic features, from manually operated vents to complex humidity and temperature monitors. The koji room is actually two adjoining rooms with a connecting door.”

This excellent article concludes: “For the American Miso Company, the immediate future is replete with energetic plans. The Bellemes will convert their present home into a summer residential center for students interested in studying fermented foods and natural living. Meanwhile John and Jan will build another house for themselves elsewhere on the property. A new plant for packaging prepared miso products is envisioned and there is much talk of shoyu production in a few years. With misomakers as serious about their venture as the Bellemes, the American Miso Company will certainly have a major influence on miso awareness in America.”

Thirteen black-and-white photos show in detail how miso is made at American Miso Co.

A full-page sidebar (p. 22), titled “Roots of the American Miso Company,” tells about the family of Takamichi Onozaki and shows a magnificent half-page black-and-white photo the family—16 members strong.

Talk with Barry Evans, owner of American Miso Co. 2000. July 6. In 1982 the company’s capacity was far less than 500,000 lb/year; there were only eight vats, each of which held about 6,000 lb of miso (which took one year to mature), for a total capacity of about 50,000 lb/year—or roughly one-tenth of what the article says. Moreover Bellemes made much less than 3,000–4,800 pounds of miso per week. Nor did the company make any light miso during the first few years. Address: Colrain, Massachusetts.

6128. **Product Name:** Vegi-Patties (Meatless Burgers).

Manufacturer’s Name: Lifestream Natural Foods Ltd.
Manufacturer’s Address: Richmond, BC, Canada V6V 1J7.

Date of Introduction: 1982. July.

Ingredients: Textured soya flour, wheat gluten, safflower oil, whole wheat bread crumbs, tomato paste, dried vegetables, oat flour, pea flour, tamari, sunflower seeds, sesame seeds, nutritional yeast.

Wt/Vol., Packaging, Price: Four 3-ounce burgers per box.

How Stored: Frozen.

Nutrition: Per 3-oz. pattie: 230 calories, 15 gm protein, 17 gm carbohydrate, 13 gm fat, 485 mg sodium.

New Product–Documentation: Spot in Soyfoods. 1982. Summer. p. 55. “All vegetable meat substitute.” Spot in Adweek East. 1987. April 6. All vegetable meat substitute. Label. 1987 (undated). Box 8.5 by 4.5 by 1 inch. Color illustration of burger on lettuce and tomatoes. “All vegetable meat substitute made with textured soy flour. An exciting new way to cook. Look for recipe ideas on back.” Cheese and Spinach Casserole. Spaghetti Sauce with Vegi-Balls.

6129. **Product Name:** Light Links (Meatless Tofu Hot Dogs with Egg Whites). Renamed Tofu Light Links by 1987.

Manufacturer’s Name: Light Foods Inc.

Manufacturer’s Address: 6144 Bartmer, St. Louis, MO 63133. Phone: 314-721-3960.

Date of Introduction: 1982. July.

Ingredients: Tofu, soy oil, okara, dried egg white, textured soy protein, salt, barley flour, honey, shoyu, locust bean gum, natural spices.

Wt/Vol., Packaging, Price: 16 oz vacuum pack. Ten links per pack.

How Stored: Frozen.

Nutrition: Per 1.6-oz. link: 105 calories, 6.36 gm protein, 7.04 gm fat, 0.59 mg cholesterol.

New Product–Documentation: This pioneering and creative product was introduced at the NNFA convention in New Orleans, Louisiana, July 1982. Food Report (Lehmann). 1982. Aug. The product “Has absolutely no meat, no nitrates, no additives, no preservatives, no artificial coloring and no sugar.” Spot in Soyfoods. 1983. Winter. p. 49. “Tofu Dogs. Possibly the most maturely conceived, expertly produced, and appropriately packaged prepared convenience soyfood on the market.” Label (orange, brown, and yellow on white) reads: “Meatless. A vegetable based product. A food for thought. 99% cholesterol free. Low calories.” Spot in Whole Foods. 1983. Jan. p. 39. “New Tofu Line. Light Foods, Inc. presents a new dimension to soyfoods: Light Links, Light Tofulogna and Light Soysage.

Spot in Soyfoods. 1984. Summer. p. 42. Label. 1988, received. Tofu Light Links. 5.5 inches square. Light and dark purple, beige, and white. Logo of smiling sun in upper left. “A meatless vegetable based product. No cholesterol. Low calories.” Ingredients are now: Tofu, soy oil, water, dried

egg white, textured soy protein (made from soy flour), salt, barley flour, honey, tamari (a natural soy sauce), beet juice, spices, natural extractives of paprika, natural spice oils. Now contains only 76 calories and 6.0 gm of fat per 1.2 oz serving.

6130. Product Name: California Meatless Chili.
Manufacturer's Name: Meatless Foods, Inc.
Manufacturer's Address: Hollywood, California.
Date of Introduction: 1982. July.
Ingredients: Red kidney beans, textured vegetable protein [soy flour], onions, tomatoes, herbs, shoyu, honey.
Wt/Vol., Packaging, Price: 1.5 lb in plastic tub with preprinted film lid.
How Stored: Frozen.
Nutrition: 8 oz. contains 417 calories and 30% of the protein RDA.
New Product–Documentation: Spot in Soyfoods. 1982. Summer. p. 56. “Vegetarian Chili with TVP.”

6131. Product Name: Vegetarian Tofu Pizza.
Manufacturer's Name: Pizza Naturally.
Manufacturer's Address: Blenheim, New Jersey.
Date of Introduction: 1982. July.
Ingredients: Stone ground whole wheat flour, tomatoes, SoyDairy tofu, mushrooms, peppers, shoyu, honey, yeast onion, garlic, oregano, basil, pepper.
Wt/Vol., Packaging, Price: 9-inch pizza weighing 16 oz. Retail for \$2.39.
How Stored: Frozen.
New Product–Documentation: Spot in Soyfoods. 1982. Summer. p. 55. “Frozen Tofu Pizza Introduced.”

6132. Shurtleff, William. 1982. What the Japanese can learn from the American soyfoods industry. Paper presented at Fifth Annual Soyfoods Association of North America (SANA) Conference, University of Washington, Seattle. July 8. 2 p. Unpublished manuscript—outline.
• Summary: Presented to a special meeting of Japanese attendees. Contents: Introduction. Americans’ basic view of soybeans and soyfoods. Nutrition and attitudes toward animal and vegetable proteins. Tofu innovations. Tempeh. Kikkoman. Conclusion. Accompanied a slide show. Address: Co-founder and director, Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6133. Product Name: Baked Tofu.
Manufacturer's Name: Swan Gardens.
Manufacturer's Address: 940 17th St., Miami Beach, FL 33139. Phone: 305-324-8910.
Date of Introduction: 1982. July.
Ingredients: Tofu, soy sauce, spices.
Wt/Vol., Packaging, Price: 8 oz vacuum pack.
How Stored: Refrigerated, 60 day shelf life.

New Product–Documentation: Label, 1984? 2.25 by 3.5 inches. Self adhesive. Black and red on gold. Swan on lotus illustration. “Ready to eat. No Preservatives.” Spot in Soyfoods. 1982. Summer. p. 55. “Vacuum Packed Soysage.” Soyfoods. 1983. Summer. p. 43.

6134. Product Name: New England Tempeh Burgers (By 1984 renamed Lightlife Meatless Tempeh Burgers).
Manufacturer's Name: Tempeh Works (The).
Manufacturer's Address: P.O. Box 870, Greenfield, MA 01302.
Date of Introduction: 1982. July.
Ingredients: Organic soy tempeh, soy sauce, spices.
Wt/Vol., Packaging, Price: 7 oz 2 x 3.5 oz burgers per package.
How Stored: Refrigerated or frozen.
New Product–Documentation: Label. 1983, undated. 3.5 inches square. Brown, yellow and white. Spot in Soyfoods. 1983. Winter. p. 50. “The Tempeh Burger Takeover. Nationwide at least 7 brands of prepared tempeh burgers are produced.” Also 1984. Summer. p. 43. 6136. Hagiwara, Y. Assignor to Japan Natural Food Company Ltd. 1982. Soy sauce from tear grass and process for production thereof. *U.S. Patent* 4,346,114. Aug. 24. 6 p. Application filed 25 Feb. 1981. [3 ref]

6137. Pure Sales. 1982. Some soy sauces are called tamari. But they’re not! San-J is the real tamari (Ad and poster). *East West Journal*. Aug. Inside front cover.
• Summary: This ad is a combination of black-and-white and color. In black-and-white are 5 quarts of so-called tamari under the following brands: Westbrae, Erewhon (2), Llama, and Pure & Simple. In color are 2 bottles of San-J Tamari (wheat free, in 5.7 oz refillable dispenser and 20 oz glass bottle). The text explains that this real tamari is: Made only from soybeans. Mellow, smoother, richer than regular soy sauce. More protein than regular soy sauce. San-J Tamari will enhance any dish. A concentrated, economical product. Address: 250 Newport Center, Newport Beach, California

92660. Phone: (714) 760-1076.

6138. **Product Name:** Tofu Sausage Patties: Seasoned and Baked.

Manufacturer's Name: Tofu Shop (The).

Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

Date of Introduction: 1982. August.

Ingredients: Tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari). Marinated in a sauce of Tamari (a natural soy sauce made with water, soybeans, wholewheat and salt). Unrefined coldpressed Safflower oil, and a blend of eight herbs and spices.

Wt/Vol., Packaging, Price: 8 oz. vacuum packed.

How Stored: Refrigerated.

New Product–Documentation: Label. Received 1988. 4 by 2.5 inches. Self adhesive. Metallic red, blue, gold, and white. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great for breakfast, in a burger, or in your favorite pizza or spaghetti sauce. Simple to heat in oven (350°F, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39°." Matthew Schmit says (March 2009) that the metallic label was first used in 1985.

Two Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1985. Label #1 of 1992. "Tofu Sausage Patties: 4 Seasoned & Baked. 3 inches square. Self adhesive. Black and yellow on red. Illustration shows a tofu shop on stilts near the ocean with a tree arching overhead. Ingredients similar to above, but more organic. * = Grown according to California Natural Foods Act of 1990. "With whole, organic, GMO-free soybeans." Ready to eat or heat. A Perfect snack fresh from the pack."

Label #2 of Oct. 2002. No adhesive. Red and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of protein. Low in saturated fat. Cholesterol free."

Talk with Linda Redfield. 2002. Sept. 23. Linda arrived in Arcata in May 1982 and introduced this recipe to The Tofu Shop; as far as she knows, she developed it. It was probably first sold commercially at The Tofu Shop in about Aug. 1982; there was only one flavor.

6139. Corn Country Whole Foods, Inc. 1982. Fall-winter 1982: New & improved (Catalog). 132 South Market St., Champaign, IL 61820. iv + 26 p. No index. 28 cm.

• **Summary:** The cover of this natural foods, vegetarian catalog is printed on orange paper with brown ink. Corn Country has increased the number of products it distributes, both those under its own Market Street brand and those made by many other companies. Corn Country trucks deliver throughout the Midwest: Freight is free with a minimum order of \$400. Product categories: Refrigerated products.

Bulk foods. Packaged foods. Snacks. Other.

Interesting products: (1) Tofu: Packaged (\$0.82/lb) or bulk (\$80/lb). (2) Market Street bread: Cinnamon raisin and Whole wheat both contain "whole soy flour." (3) Stoneground flours: Soy flour-full fat (OG = Organically Grown) (\$0.42/lb). Corn Country uses old fashioned granite stone mills to keep the temperature low, which "preserves the nutritional value and flavor of the whole grain... Whole soy flour is milled from soybeans which have been heated first to destroy an enzyme which interferes with protein digestion. It is milder tasting compared to the defatted soy flour typically sold commercially." (4) Market Street granolas: Of the 7 varieties, 6 contain small amounts of "soy flour." (5) Beans, peas, and lentils: Soybeans OG (\$0.28/lb). Azuki beans. Chickpeas (Garbanzos). Lentils (green or red). Mung beans. (6) Market Street meals (vegetarian): Nutburger (incl. soy flour). Soyburger (soy flour is main ingredient). (7) Sea vegetables (9 types). (8) Westbrae miso (6 types). (9) Market Street nut butters: Peanut butter ("coarsely ground to retard oil separation"). Almond butter. Sesame tahini. (10) Natural oils: Sesame oil. Safflower oil. (11) Condiments. Nigari (bulk or 5 lb). Umeboshi plums. Shoyu (pints to 4.75 gal tin). Tamari (with dispenser to quarts). (12) Seeds: Alfalfa seeds. Sesame seeds whole brown. Sesame seeds hulled white. Sunflower seeds. Pepitas. (13) Market Street snack nuts: Shoyu almonds. Shoyu suns (sunflower), Shoyu cashew pieces. (14) Soy & corn snacks: Soy nuts salted. Soy nuts unsalted. (15) Market street mixes (unsulfured dried fruits, nuts and seeds): Sweet & shoyu mix (ingreds: Raisins, date pieces, dried bananas, shoyu almonds, shoyu cashews, shoyu sunflower seeds). Flatland mix (incl. unsalted "soynuts" {soybeans, vegetable oil}, fancy cashew pieces, and pumpkin seeds). (16) Health and beauty aids: Dr. Bronner soap (14 types). (17) Literature: 25 Talking Foods pads. (18) Traditional medicinal herb teas (27 types). (19) Celestial Seasonings teas (38 types); (20) Packaging supplies and kitchen help: Tofu kit (\$12.56). Address: Champaign, Illinois. Phone: 217-359-8843.

6140. **Product Name:** [Soya Cubes with Sea Salt, Soy Sauce, or Shoyu].

Foreign Name: Sojawuerfel/Cubes au soja + sel marin 25 St., Sojawuerze/Sauce au soja, Shoyu.

Manufacturer's Name: Morga AG.

Manufacturer's Address: CH-9642 Ebnat-Kappel, Switzerland. Phone: 074 3 19 15.

Date of Introduction: 1982. September

Wt/Vol., Packaging, Price: The soy sauce and the shoyu each come in 1/8 liter and 7/10 liters (or 70 liters? = 7 dl).

How Stored: Shelf stable.

New Product–Documentation: Manufacturer's Catalog. 1982. In a separate letter dated 16 Sept. 1982 the company notes: "Our company started to manufacture soyfoods in 1930. The soyfoods we sell are manufactured in our factory."

6141. **Product Name:** Marinated & Broiled Tofu (Tofu Slices).

Manufacturer's Name: Nasoya Foods.

Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.

Date of Introduction: 1982. September.

Ingredients: Tofu, soy sauce, honey, herbs, spices.

Wt/Vol., Packaging, Price: Semirigid 8 oz vacuum package is opaque, with pre-printed film.

How Stored: Refrigerated.

Nutrition: Per 4 oz.: Calories 180, protein 17 gm, carbohydrate 5 gm, fat 10 gm.

New Product–Documentation: Label. 1983. 4 by 4.5 inches. Self adhesive. Orange, green, yellow and black on white. "High in protein. Serve hot or cold as an entree, sandwich, or high protein snack." Spot in Soyfoods. 1983. Winter. p. 49. "A Slice of Tofu." Summer. p. 52. These are vacuum packed.

Letter from John Paino of Nasoya. 1990. Sept. 25. Bob Bergwall says this product was introduced in Sept. 1982.

6142. Shurtleff, William; Aoyagi, Akiko. comps. 1982. Soyfoods labels, posters & other graphics. Lafayette, California: Soyfoods Center. 185 p. Sept. Illust. No index. 28 cm. 2nd ed. 1984. 6 vols. 685 p. total.

• **Summary:** Contents: 1. Tofu. 2. Other tofu types. 3. Secondary tofu products. 4. Tempeh. 5. Secondary tempeh products. 6. Soymilk. 7. Soymilk products. 8. Soy sauce, shoyu & tamari. 9. Miso. 10. Soynuts. 11. Other soyfoods. 12. Letterheads & business cards. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6143. Ushijima, S.; Hayashi, K.; Murakami, H. 1982. The current taxonomic status of *Aspergillus sojae* used in shoyu fermentation. *Agricultural and Biological Chemistry* 46(9):2365-67. Sept. [11 ref]
Address: 1-2. Central Research Laboratories, Kikkoman Corp., 399 Noda, Noda-shi, Chiba 278, Japan; 3. The Brewing Society of Japan, Takinogawa 2-6, Kita-ku, Tokyo 114, Japan.

6144. Hirabayashi, Satoshi. 1982. Re: Enclosing documents you requested in your letter of July 31. Letter to William Shurtleff at Soyfoods Center, Oct. 1. 3 p. Typed, with signature on letterhead. [1 ref]

• **Summary:** He encloses photocopies of 12 Japanese-language documents that Shurtleff had been unable to find in the USA and requested from Kikkoman. He also cites three documents that were requested but that Kikkoman was unable to find.

Also tells Shurtleff how to obtain a copy of the cookbook *Practical Shoyu Cooking: Delicious Dishes with Japanese Soy Sauce*, by Chu Shinjima and Tamako

Ashihara, It is distributed in the USA by Japan Publications Trading Co., which has offices in San Francisco and New York City. Address: Manager, International Operations Dep., Kikkoman Corp., 25 Kanda Nishiki-cho 1-chome, Chiyoda-ku, Tokyo 101, Japan. Phone: 03-233-5610.

6145. Lo, K.S. 1982. Re: Thank you for sending draft chapter on History of Kikkoman from History of Soybeans and Soyfoods book. Letter to William Shurtleff at Soyfoods Center, Oct. 6. 1 p. Typed, with signature on letterhead.

• **Summary:** K.S. Lo "found the chapter to be most interesting. My wish for wanting to read this particular chapter arises out of your comparison between my Company and Kikkoman. I must say we are much flattered by the comparison as after reading its history, I have to admit that you are comparing a small boy against a giant."

"I congratulate you for having done so much research on the subject... I hope to see your book in print before long." Address: Chairman [and founder], HKSBP Co., Ltd., 41, Heung Yip Rd., Aberdeen, Hong Kong. Phone: 5-528211. Cable address: "Vitasoy".

6146. Noda, F.; Sakasai, T.; Osaki, K.; Akao, T. 1982. [Quick brewing of soy sauce]. *Japanese Patent* 1,120,398. Oct. 28. [Jap]*

• **Summary:** Attempts to shorten the time for soy sauce production have included a quick hydrolysis of raw materials with no or low salt content; another was a process divided into anaerobic lactic acid fermentation, aerobic yeast propagation, and anaerobic alcohol fermentation.

6147. Tallent, W.H. 1982. UJNR Toxic Microorganisms Panel. *Northern Regional Research Center, Notes from the Director* No. 1524. p. 3. Oct. 29.

• **Summary:** The meeting was held at the Food Research Inst., Univ. of Wisconsin, from Oct. 17-22. United States was represented by Dr. C.W. Hesseltine, NRRC. "In scientific sessions, 2½ days were devoted to mycotoxin and bacterial toxins. After a tour of the Biotron on the University of Wisconsin Campus, the panelists visited the Kikkoman plant at Walworth, Wisconsin. This plant in 10 years has doubled in size; it now uses 30,000 acres of soybeans and at least as many acres of wheat in soy sauce (shoyu) production. The operation is controlled by 6 team leaders, who develop consensus decisions with others in their groups. The terms 'foreman' and 'supervisor' are never used. Turnover of employees is only a tenth that of American companies, and absentee figures are only a fifth of that found in industries in the surrounding area. Last year production of shoyu amounted to 5 million gallons in this plant. Shoyu is sold in various quantities, up to 50-gallon drums; these larger quantities are sold to other [food] companies for flavoring purposes.

Note: Lite shoyu is being discussed. This plant supplies

the U.S., Canada, and parts of Europe. The fermentation tanks are 17,000 gallons capacity. Address: Center Director.

6148. Asunaro Eastern Studies Institute. 1982. Natural foods preparation with Sensei Noboru Muramoto (Poster). P.O. Box 2546, Escondido, CA 92025. 1 p.

• **Summary:** Noboru Muramoto, author of *Healing Ourselves*, will be presenting a series of 2 week classes on natural foods preparation at the Asunaro Institute in rural southern California. Students will participate in the preparation of miso, tamari, koji, amasake, mochi, tofu, and tekka. Address: Escondido, California.

6149. Benson, Taylor. 1982. Foodcrafters' market study: The U.S. soy sauce market. Colorado: Foodcrafters. 8 p. Oct. 28 cm. [6 ref]

• **Summary:** Contents: I. Existing domestic markets. Overview of the existing domestic natural foods market. Overview of the existing domestic shoyu and tamari market (sources are cited). II. Market survey results. Background information on the survey. Survey questions and results (1,190 respondents in Oct. 1982 at Pearl Street Market, in Boulder, Colorado, at Rainbow Grocery in Denver, and via a mail-in questionnaire from random natural food consumers around the USA).

1. Have you ever used shoyu? (9.2%), tamari? (70.6%), soy sauce? (12.6%), none of these? (7.6%). 2. How did you first learn of the product? Friend (52.7%). Family (10.9%). 3. What size do you usually purchase? 16 oz (33.6%). 4. Which brand do you purchase? Private label (40.8%). Kikkoman (11.8%). Erewhon (9.1%). 5. If you heard about a new brand that was low in salt and naturally fermented, how likely would you be to try it? Definitely (36.4%). Probably (35.5%). 6. How important are the following items to you when you evaluate your product? Price (#3), company rep., bottle shape, package, label, advertising, aroma (#2), taste (#1). 7. Are you a vegetarian? Yes (33.6%). No (35.3%). Partially (31.3%). What is your age (25-34 = 50.4%). 9. What occupational category describes you best? 10. What is your average annual household income? (Under \$5,000 = 18.5%). 11. Sex? Male (53.8%). Female (46.2%). 12. How many people do you shop for? (1 other = 44.3%; Yourself = 29.5%). 13. How many years of school have you attended? (16 years = 41.6%).

Summary of the market survey results. III Market strategy. Address: Colorado.

6150. **Product Name:** Missing-Egg Salad (Diet Center Formulation).

Manufacturer's Name: Brightsong Light Foods.

Manufacturer's Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.

Date of Introduction: 1982. October.

Ingredients: Organic Brightsong tofu, soy oil, soy sauce,

mustard, spices, citric acid, salt.

Wt/Vol., Packaging, Price: 8 oz in plastic cup.

How Stored: Refrigerated.

New Product–Documentation: Label. 1982, undated. 3 inch diameter. Orange on white. "Non-dairy Salad or Dip. Contains no eggs." Letter from Richard Rose. 1987. Sept. 19. Diet Center is a chain of 2,000 clinics in the U.S. and Canada, somewhat like Weight Watchers. The ingredients differed from regular Missing-Egg Tofu Salad in that the honey and pickles were removed. Brightsong sold both products, but to different markets.

6151. **Product Name:** Lima Real Tamari (Wheat Free).

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 1004, Chico, CA 95927.

Date of Introduction: 1982. October.

New Product–Documentation: Ad in East West Journal. 1982. Oct. p. 27. "Would the real tamari please stand up!?"

6152. Chico-San, Inc. 1982. Would the *real* Tamari please stand up!? (Ad). *New Age Journal* (Boston, Massachusetts). Oct. p. 7.

• **Summary:** Chico-San thanks San-J for exposing the practice of labeling soy sauce as Tamari. Chico-San's Tamari is real! "It contains no wheat and is brewed naturally from only whole soybeans, water and sea salt." Address: P.O. Box 1004, Chico, California 95927.

6153. **Product Name:** Seitan.

Manufacturer's Name: Price Rice / Creative Kitchens.

Manufacturer's Address: Miami, Florida.

Date of Introduction: 1982. October.

Ingredients: Incl. wheat gluten, soy sauce.

How Stored: Refrigerated.

New Product–Documentation: Barbara and Leonard Jacobs. 1985. *East West Journal*. Oct. p. 38-39. "Flour power! Cooking with seitan, the delicious natural food from grain." "Yaron Yemini of Creative Kitchens in Miami has been making seitan for three years. He has seen a fivefold increase in sales during this time and currently makes 120 pounds each week. Yemini produces approximately seventy pounds of cooked seitan from 100 pounds of whole wheat flour. He sells seitan in bulk, packaged, and in a variety of sandwiches, salads, and sauces. [Note: In Nov. 1984 Mary Lee of Price Rice Foods started to share her kitchen (located in Wilton Manners, a city inside Ft. Lauderdale, Florida) with Yaron Yemini. In about March 1985 he bought the business.]

Barbara and Leonard Jacobs. 1987. *Cooking with Seitan: Delicious Natural Foods from Whole Grains*. Current U.S. seitan manufacturers include Creative Kitchens in Miami, Florida.

Talk with Stuart Kerrigan (305-532-5427 Home or Macrobiotic Foundation 305-448-6625; 4349 Sheridan Ave. #2, Miami Beach, FL 33140). 1988. Jan. 29. Price Rice was started in about 1983 in Price, Maryland by Mary Lee Bergman. She made food products in her home; they were distributed by Organic Farms. Then she moved to Wilton Manners, a city inside Ft. Lauderdale, Florida. There Stuart Kerrigan started to work with her in July 1984. In Nov. 1984 Mary started to share her kitchen with Yaron Yemini and in about March 1985 he bought the business. Mary Lee is now in California, married.

Talk with Yaron Yemini. 1988. Feb. 23. He confirms the above dates. Before he bought the business he had an agreement that Mary would produce amazake with him, teaching him how and sharing profits, for 3 months.

Talk with Lenny Jacobs. 1992. May 19. Lenny talked directly with Yaron Yemini [pronounced yuh-ROAN yuh-MEE-nee]. He was in a wheelchair at the time. He broke his back 10-12 years ago in a construction accident. Lenny thinks he is no longer making seitan, but that someone in Florida is.

Talk with Steve Bern of Sprout Delights, a seitan maker in Miami. 1992. July 11. He is quite sure that Yaron Yemini is still alive and making seitan. His sidekick is named Al. Steve guesses that Creative Kitchens makes no more than 100 lb/week. They have two phone numbers: 305-756-7638 and 305-754-1498. Steve is not surprised that they never return phone calls; that's the way they run their business.

Talk with Al of Creative Kitchens and a disciple of Guru Maraji. 1992. July 15. The company still makes seitan on a small scale. Yaron's office number is 305-531-3256.

6154. **Product Name:** Tree of Life Baked Tofu, and Savory Yeast Baked Tofu.

Manufacturer's Name: Tree of Life, Inc. (Distributor).

Manufacturer's Address: St. Augustine, FL 32084.

Date of Introduction: 1982. October.

Ingredients: Organically grown soybeans, purified water, natural Nigari, soy sauce and spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 5 by 4.5 inches. Plastic. Brown, yellow, green and white. Picture of tree (may be logo). "We appreciate your confidence in choosing this Tree of Life product. To ensure your satisfaction we have made certain it contains the freshest, most natural ingredients available." Talk with Donna Detoro at Tree of Life. 1988. Sept. 23. This product was introduced in Oct. 1982.

6155. Nelissen, Tomas. 1982. Re: Jakso and soyfoods in the Netherlands. Letter to William Shurtleff at Soyfoods Center, Nov. 9. 2 p. Typed, with signature on letterhead.

• **Summary:** "Maybe you still remember me from the time we were in Japan; once we met at Kichijoji station, next to

Mitaka station. You tasted my genmai [brown rice] miso at a coffee-bar (next door).

"At this moment I am living in Holland with my wife Yvonne and two children. We set up a farm called Jakso. The whole idea is about becoming self-sufficient from the 30 hectares of land (including 6 hectares of fruit trees), a sourdough bakery, a soyfoods workshop, a futon workshop and educational activities.

"For the three workshops we "cut" the big barn into two halves and made a third floor. We built a very nice wood-burning bakery which produces all kinds of bread, cookies and savorys. The soyfoods workshop makes tempeh and tofu, as well as seitan. Year-round we produce an average of about 1,500 pieces of tempeh a week at 210 grams each, about 50 kg of tofu a day and a little less than 100 kg of seitan.

"We distribute our products all over Holland... in a 100 km circle around the farm. Our future products will be miso, shoyu, amasake and mushrooms. These are the products we studied in Japan for about 4 years...

"There are 12 people working on the farm (plus 7 children)... The meals are on a macrobiotic base." Address: Director, Jakso, St. Natuurlijke Land- en Tuinbouw, Voorne 13, 6624 KL Heerewarden, Netherlands. Phone: 08877-2189.

6156. Aihara, Herman. 1982. History of work with macrobiotics and Chico-San (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 29. 5 p. transcript.

• **Summary:** Oroville is located about 23 miles southeast of Chico, California. Shurtleff visited Herman Aihara at his home with a tape recorder and about 75 questions.

The first East West Institute in New York City was established in about 1960 by Lao Shastri, a woman disciple of George Ohsawa. She studied Sanskrit at Cambridge, and was a distinguished scholar and an authority on the subject. It was her idea to have such an institute. She met Ohsawa in India and he advised her to stop eating sugar. She was in New York City when Ohsawa was there; he stayed at the Riverside Buddhist Academy, a cultural center. She was a very aggressive woman but very quiet, and she wore a sari. She convinced famous people to be directors of the Institute. She lived at what became Herman's house before Herman came to the USA. She died while relatively young, not long after late 1961.

In 1965, about 4 years later, Michel Abehsera, re-opened and activated the East West Institute.

Lima Ohsawa's maiden name was Sanae Tanaka. Her second marriage was to George Ohsawa.

Ohsawa's first name was Nyoichi, not Joichi. Yukikazu was his original first name, written with the same Japanese characters. He just took "Georges" as his French name. Larry Korn says Joichi became "Georges."

The village was named "Hi no Haru." Ron Kotzsch got

it wrong. Herman has heard this 100 times.

The correct spelling of Kaibara's given name is Ekiken, not Ekken.

Herman does not know of Lima Ohsawa's daughter, Fumiko. But he heard that her second child, Mari, died of excess salt.

The system of yin-yang (*in-yo*) was first used by Ohsawa in about 1929 in a book of lectures entitled *Shokuyo Kogi Roku (Lectures on Macrobiotics / Macrobiotic Studies)*; he has a copy at home. He was still working in the Shokuyokai. Ask Hashimoto Masanori, who is doing a lot of research on Ohsawa and early macrobiotic history, at Nippon CI in Tokyo.

Before Ohsawa's first visit to the United States there was a little bit of talk about macrobiotics with Michio Kushi at Michio's apartment, with a few people coming in but no real lectures. So Ohsawa's first series of lectures was the first real transmission of macrobiotics to the USA. Michio and Herman did not know much about macrobiotics before Ohsawa's first visit. Herman studied with Ohsawa in Japan for only 1 month, and Michio had met Ohsawa only 3-4 times. Herman came to the USA to study the helicopter aviation industry, not to teach macrobiotics; he studied at a technical institute in Brooklyn. However Herman read a lot of Ohsawa's books in Japan. So when Herman came to the USA he was personally very interested in macrobiotic philosophy (not so much in the diet, but with no thought of teaching).

Aveline Kushi came to the USA a long-time student of Ohsawa. She believed the diet was very important and she influenced Michio.

After Ohsawa's first series of lectures, Herman got interested in teaching macrobiotics. Why did Ohsawa stay with Harman? Most others were afraid of him. It is not correct to say that Herman was Ohsawa's closest student. Michio was also close because of lots of correspondence he had had with Ohsawa. Ohsawa tried to convince Michio of the value of macrobiotics.

When did Michio change careers? He had been at Columbia University for about 1 year. Then, on his own, he got the idea of working for world government ["a one-worlder"], to promote "one peaceful world. Herman has a draft of Michio's paper on this subject, including publications and schools, by about 1952-53. Michio was in Europe in 1952. Ohsawa said that "One Peaceful World" must include diet. At that point Michio started his serious interest in macrobiotics. Michio was initially involved in business.

In 1955 Azuma, a small gift shop selling Japanese handcrafts, was opened at 802 Lexington Ave. at 62nd St. by Cornelia and Herman Aihara, Michio, and Roland Sato. Michio focused his efforts on this business—not on teaching macrobiotics. In 1956 Michio and Herman started Ginza, a similar gift shop down town at 9 West 8th Street; they did not

include Roland Sato who was very angry at this time. Both of the gift shops were very successful. They were established to impress Takashimaya—a leading department store chain in Japan [see Emerson 1958]—and to prove that a branch of Takashimaya could be successful in New York City.

Michio was an interpreter in the U.S. Dept. of the Interior to guide foreign visitors; he earned \$45 per day. One visitor was the director of Takashimaya, Michio convinced him to start a branch of Takashimaya in New York City. Michio then worked for Takashimaya, and eventually rose to become vice president of the branch.

Musubi was started by Alcan Yamaguchi in the fall of 1960 (not in the late 1950s), near Greenwich Village. Zen Tea House was different; it was also started in 1960, but by an American, after Ohsawa's first lectures. After that, Musubi (another restaurant) was established. Herman did not supply the carpentry (as stated in Shurtleff's draft history of macrobiotics in the USA). Miso and shoyu were served in both restaurants.

At Ginza, starting in 1956, Herman sold a little food; people came to buy food there after Ohsawa's lecture, including miso and shoyu. It was the only place in the USA you could buy macrobiotic foods. It was a back-room operation and the food was imported from Ohsawa Japan. As soon as Ohsawa started lecturing in the U.S. he imported 20 [wooden] kegs of shoyu. It was sold at intermissions and after his lectures.

Junsei Yamazaki first arrived at Chico in 1963, stopped only briefly, then went to New York City that same year. Thus, Yamazaki was not connected with Musubi in 1960, but he did help them starting in 1963, when Michio was managing the shop at a new location. In 1960 Herman sometimes helped Alcan Yamaguchi at Musubi.

The first summer camp on Long Island was about 2 months long, with lectures by Ohsawa only on weekends. Some people stayed during the week. 1,000 to 2,000 people attended.

The Ohsawa Foundation in New York City was founded in 1961 by Michio, Irma Paule, etc. Herman was in Europe at the time. He left for Europe in about Jan/Feb. of 1961 and returned in the fall. Then he was elected president of the Ohsawa Foundation.

Herman's first macrobiotic publication was *Macrobiotic News*, which started in 1960; its maximum circulation was several hundred. It continued until he moved to Chico in 1961, and then was re-continued.

The macrobiotic periodical *Macrobiotic Monthly* was started in Los Angeles in 1965 by Herman and Lou Oles. Its title then changed into the *Macrobiotic*. It ceased publication in 1978. Its maximum circulation was over 1,000.

Publishing at Chico started in 1962. Herman's present periodical is *GOMF News*, which has a circulation of about 650. Concerning books that Herman and Cornelia have written: *Miso and Tamari* has sold about 10,000 copies (lots

through Nutribooks). *Soybean Diet* has sold about 10,000 copies. *The Dô of Cooking* (1972, four seasonal volumes) has sold about 10,000 copies. *The Calendar Cookbook* (1979) has sold about 5,000 copies. The *Chico-San Cookbook* was first published in 1972. But *Zen Cookery* has sold about 50,000 copies.

Attendance at French Meadows summer camps was about 100 to 200. Address: Oroville, California.

6157. Aihara, Herman. 1982. History of work with macrobiotics and Chico-San. Part II (Interview). Conducted by William Shurtleff of Soyfoods Center, Nov. 29. 5 p. transcript.

• **Summary:** Continued: Chico-San imported their first Japanese foods from Herman personally. At that time, there was no Muso and no Nippon CI. Ohsawa Japan (which started in about 1965) was the trading / export company and Nippon CI was devoted to education. Before Muso was “Three Boys,” the “Three L” (*San-L*) company. Ohsawa told them to take charge of exports. Then Mr. Okada took over from them. Osaka was PR and education. “Three L” (which started in about 1962 in Osaka) was whom Chico-San was importing from. George Ohsawa kept a careful watch over what was being exported from Japan. Chico-San later imported from both Muso (Osaka) and Ohsawa Japan (Tokyo). Note: Did Ohsawa have two trading companies? If so, why?

The first edition of *The Book of Judgment* was printed in Japan in about 1956, then revised in 1966. There is no publication date in the book. This book came after *Zen Macrobiotics*. It is actually *The Philosophy of Oriental Medicine* (subtitled *The Book of Judgment*), probably first written in French.

Herman has just started writing a biography of Ohsawa, but he is too busy, so it will not be finished for a long time.

The Ohsawa Foundation in Paris was started by 1956 by George Ohsawa. The Ohsawa Foundation in Tokyo started before 1960. The Ohsawa Foundation in Los Angeles was started in 1965 by Lou Oles, an older Jewish trumpet player. The Ohsawa Foundation of New York was founded in 1961 by Michio Kushi and Irma Paule. The name “GOMF” was coined in 1970.

Herman has a green 8½ by 11 inch edition of *Zen Macrobiotics*. Herman says the date was about 1960. It shows that the Ohsawa Foundation then existed in New York, Paris, Brussels, and Tokyo. It also contains lots of recipes. I copied some pages. Copyright date of the fifth edition was 1966, Ignoramus Press, the Ohsawa Foundation, 1424 N. Curson Ave., Los Angeles.

Michio Kushi was Ohsawa’s senior student in the sense that he came to America first. I should omit the concept that Herman was Ohsawa’s closest associate. Herman and Michio simply have different styles. Michio has broad appeal; he has started a mass movement, and is more businesslike. Herman

appeals to a small group, deeply; he works more with individual students.

Lou and Shayne Oles got involved with macrobiotics during the second summer camp, in 1961. They traveled with the group from New York to Chico. He was a famous trumpet player, worked with Benny Goodman. In California he emphasized publishing more than his trumpet. His first publication was titled *Spiral*; 1-2 issues were published. Then *Macrobiotic Monthly*. After Beth Ann Simon’s death, Chico-San was separated from educational work. Lou Oles went to Los Angeles and that year established the Ohsawa Foundation; he did education and publication. He published three books: *Zen Macrobiotics*, *Book of Judgment*, and *Guidebook for Living*. Jacques DeLangre helped him. Lou died in 1967 of cancer. He got depressed when George Ohsawa died; he started drinking coffee, which may have activated his cancer growth. Shayne continued his work. Lima asked Herman to be president, so he traveled to Los Angeles once a month. In those days they sold lots of *Zen Cookery* books. The Ohsawa Foundation in Los Angeles closed in about 1970.

Yes, Ohsawa was age 72 when he died. He died April 24 (Japan date) in Japan.

The spirallistic multidimensional scale from yin to yang was Peter Milford’s idea, not Herman’s. It is generally a linear scale.

Infinity Foods, founded by Howard Rower, is still in existence. Herman thinks they started in about 1962, and they imported foods from Japan.

Chico-San established only one organic grower—the Lundbergs for rice. The controversy was complicated. The Lundbergs and Bob Kennedy of Chico-San made a contract. Eventually there was a lawsuit between Chico-San and Lundberg [but it was resolved before it went to court]. Herman thinks Lundberg sued Bob Kennedy.

In 1963 Herman went on the lecture circuit with Bob Kennedy as they tried to educate people about the macrobiotic foods that Chico-San was selling.

The first summer camp without Ohsawa was 1967 (or perhaps 1968).

Macromuse is published in Washington, DC, by Michael Rosoff. It started in 1981.

Chico-San was founded in Jan. 1962. In Nov. 1962 Chico-San’s first location (a retail store) opened, downstairs with hearing aid company. It moved upstairs to a different location and opened on 6 March 1962; they had an open house.

In 1973 the Aiharas established the Vega Institute, a residential program for macrobiotic studies in San Francisco. Then in 1974, they moved the Vega Institute and the George Ohsawa Macrobiotic Foundation to Oroville, a town southeast of Chico, where the Aiharas continued their work, together with their students. Herman and Cornelia Aihara moved to Oroville instead of Chico because it was more rural

and because Peter Milbury, a high school teacher in Oroville, knew of some good land. The Ohsawa Foundation in San Francisco bought the land, and then they moved. Herman owns the Vega Institute on Oak Street.

Junsei Yamazaki came to the USA in 1963. Ohsawa told him to help Americans grow brown rice. First he tried in New York, but there was not enough sun. He originally graduated with a degree in fermentation from a major Japanese university, but he then became a rice farmer. Then in New York City he went to work with Michio at Musubi near Takashimaya—for little pay. The Chico group invited him to Chico. He worked on the rice cake machine—again poor pay. Like Herman he also worked with orchids.

In 1971 Herman invited Noboru Muramoto to be on his lecture trip. His first guest was Alcan Yamaguchi in 1970. Herman read Muramoto's articles in a Japanese magazine. He had family problems in Japan and was happy to stay here. Herman was his guarantor, and he became a permanent resident.

Chico-San began baking in March 1962 in an upstairs store; Herman was the first baker.

Herman talked with Michio Kushi this summer. They have a friendly relationship but both are very busy.

Junsei Yamazaki's plans with Chico-San are not clear; he may end up working on his own.

A good Japanese-language biography of George Ohsawa is *Kakumei-ji*, by Matsumoto Ichiro. He interviewed Lima Ohsawa.

Herman likes the term "a macrobiotic" better than "a macro" or "a macrobiotic student / follower."

Cornellia arrived in the U.S. in 1955.

The Ohsawa Foundation did not move from Chico to Los Angeles; it never existed in Chico—only in Los Angeles.

Overview of macrobiotic contribution. Typical Americans overemphasize the importance of protein (even though nutritionists may not agree). Most people who stop eating meat start consuming more dairy products. Macrobiotics avoid dairy products and go straight to grains plus legumes—with little mention of protein.

Mari Metz has a good color photo of Herman and Cornellia together.

Erewhon was hurt by high interest rates and inflation.

In 1960 the handbound book *Zen Macrobiotics* was made in Herman's apartment in New York City. In it Ohsawa used the word "syoyu" [shoyu]. He changed to tamari because when he introduced soy sauce to Europe he initially called it "shoyu." He then gave exclusive distribution rights to a European to distribute Ohsawa's selected shoyu. The man called it "Ohsawa Shoyu," but then in about 1960-61 he started importing low-quality shoyu from Japan and selling it under the same brand name. Ohsawa could do nothing to stop him. That was when Ohsawa started using the word "tamari" to refer to natural shoyu. Herman heard this story directly from George Ohsawa—whose name in Japanese is

pronounced OH-sawa.

Herman says a healthy person may eat 12-16 ounces of tofu a week, but it is not recommended for cancer patients who need a diet that is more yang.

Herman came from Kyushu, moved to Tokyo at age 9. He likes natto. Address: Oroville, California.

6158. Ceres Natural Foods. 1982. Ceres (Ad). *Macrobiotic Journal Origins* (Armdale, Australia) No. 1. Autumn. p. 1 (Inside front cover) and p. 6.

• **Summary:** "Our spacious store is filled with the biggest range of macrobiotic whole foods in Melbourne." A full-page ad states that the store notes that it carries "soysauce" and macrobiotic staples. Address: 116 Chapel St., Windsor, VIC, Australia. Phone: 529-2206.

6159. Kushi, Michio. 1982. *Cancer and heart disease: The macrobiotic approach to degenerative disorders*. Tokyo: Japan Publications, Inc. 224 p. Nov. Illust. Index. 26 cm. [50* ref]

• **Summary:** Contents: Foreword, by Michio Kushi. Foreword by Edward Esko. 1. The macrobiotic approach, by Michio Kushi. 2. Cancer and diet. 3. Diet and heart disease. 4. Macrobiotics, preventive medicine, and society. 5. Case histories. Appendixes: Food policy recommendations for the United States, by Michio Kushi. East West Foundation—Diet and health related activities, 1972-1982. Bibliography.

Many of the subchapters in this book are written by physicians. For example, William P. Castelli, M.D., contributed a 5-page original article titled "Lessons of the Framingham Heart Study." There are also articles by Robert S. Mendelsohn, M.D., Keith Block, M.D., and Christiane Northrup, M.D. Miso, tempeh, natto, tofu, and soy sauce are all discussed as foods that can be used to help in the prevention and cure of these two major diseases. Address: Brookline, Massachusetts.

6160. Leviton, Richard. 1982. Soyfoods come of age. *Vegetarian Times*. Nov. p. 28-29, 31. [1 ref]

• **Summary:** "Soybean based foods made with simple technology are gradually replacing meat in America diets. Originally developed in the Far East, foods like miso, tofu, and tempeh are becoming Westernized as manufacturers add convenient packaging, modern marketing and pizzazz to their soyfoods. Discusses: New tofu marketing techniques, the impact of *The Book of Tofu* by Shurtleff & Aoyagi and other tofu cookbooks, secondary soy products (prepared, convenient soyfoods), Legume, Quong Hop, Garden of Eatin', Edward & Sons, the soy deli, interest in tofu by large American food companies (Del Monte and Kraft).

Includes "A Guide to Soyfoods" the briefly defines miso, soy sauce, texturized soy protein, tofu, and tempeh. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6161. *Manna Bulletin* (Amsterdam, Netherlands). 1982. Fermentatieprodukten essentiële aanvulling op plantaardige dieet [Fermented products, an essential supplement to a vegetarian diet]. 4(3):9-11. Autumn. [Dut]

• **Summary:** Mentions tamari soy sauce (*Tamari-sojasaas*, fermented for 2 years), miso (*Miso-sojapasta*, fermented for 2 years), tempeh, and natto.

6162. Oak Feed. 1982. Catalog and price list. Coconut Grove, Florida. 1 p. Back to back. 36 cm.

• **Summary:** At top of page 1: "Your Japanese connection: Importers and wholesale distributors of macrobiotic foods. Lowest wholesale prices available. Abbreviations: E = Erewhon. M = Mitoku. W = Westbrae. * = New product. Contents: Miso and tamari. Sea vegetables. Tea. Noodles. Condiments. Vinegars, pickles & mirin. Beans. Crackers. Miscellaneous foods. Kitchen utensils. Body care products. Medicinal products.

Miso and tamari: Onozaki miso (11 lb or 44 lb). Tamari-filled dispenser (W). Organic shoyu (Lima Ohsawa). Authentic tamari (4.75 gal. or dispenser). Hatcho miso (M). Soybean mame miso (M). Mugi (barley) miso (unpasteurized). Mugi miso (W). Genmai (brown rice) miso (W). Genmai (brown rice) miso (unpasteurized, 44 lb). Organic brown rice miso (unpasteurized, 22 lb). Kome (white rice) miso (W). Instant miso soup (light or red, M). Soba (buckwheat) miso (M). Natto miso (22 lb or 2.2 lb).

Condiments: Goma muso. Goma muso furikake (M). Tekka. Jinenjo tekka (M). Seitan condiment. Umeboshi. Roasted sesame oil. Black sesame salt. Black tahini.

Also: Barley miso pickles. Aduki beans [azuki]. Black soybeans. Kuzu. Address: 3030 Grand Ave., Coconut Grove, Florida 31333. Phone: (305) 448-7595.

6163. **Product Name:** Real Foods Shoyu.

Manufacturer's Name: Real Foods Pty. Ltd. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 136, Edgecliff, NSW 2027, Australia.

Date of Introduction: 1982. November.

New Product–Documentation: Ad in *The Macrobiotic Journal Origins*. 1982. Autumn. p. 5 and 30. Inside rear cover. "Like a fine wine. Traditional methods produce traditional quality. Real Foods Shoyu (Tamari) is a naturally fermented soy sauce which has been aged in wood for two years." Real Foods is a distributor of traditional, macrobiotic foods with branches in St. Peters, NSW, and in Windson, VIC, Australia.

6164. **Product Name:** Homestyle Natural Tofu "No Eggo" Salad.

Manufacturer's Name: Sonoma Specialty Foods.

Manufacturer's Address: Santa Rosa, CA 95401.

Date of Introduction: 1982. November.

Ingredients: Tofu (organic soybeans, water, nigari), celery, nutritional yeast, soy oil, apple cider vinegar, soy sauce, mustard, natural herbs and spices, sea salt.

Wt/Vol., Packaging, Price: 8 oz plastic deli tub.

How Stored: Refrigerated.

New Product–Documentation: Label. 1983, undated. 3.75 inch diameter. Plastic. Multi-color: Yellow, green, blue, orange, red on white. "Naturally light & delicious. Use on sandwiches, in dips and salads." Spot in *Soyfoods*. 1983. Summer. p. 55. Interview with Benjamin Hills. 1987. Sept. 7. Presently the company's best seller. Talk with Benjamin Hills. 1988. Feb. 19. Says introduced in Nov. 1982.

6165. Cauwenberghe, Marc van. 1982. Re: George Ohsawa's early work with soyfoods from 1956, especially miso and soy sauce. Letter to William Shurtleff at Soyfoods Center, Dec. 2. 5 p. [12 ref]

• **Summary:** The earliest document seen, written by Ohsawa, that mentions miso is the *Guide Pratique de la Medicine Macrobiotique d'Extreme-Orient*, which appeared in 1956. He arranged for miso and soy sauce to be imported to Europe from Japan and he organized the production of miso and soy sauce in France and Belgium in the Lima Foods factory by putting two of his Japanese students, Clim Yoshimi and "Jim" Takanami, to work there. Both are still living in Belgium. Clim's address: c/o Kusa, Sportstraat, 319, 9000 Gent, Belgium. The home-made tofu he sells at his store is known as the best.

Klim wrote a book in Japanese on macrobiotics titled *Shin Shokuryo-ho*, which he translated into English as *Macrobiotics—The biological and physiological foundation of Zen*. It contains recipes using miso, tamari, soy sauce, and tofu. "In 1972 I attended cooking classes by Aveline Kushi where she was teaching tofu making and tofu recipes. In 1974 Michio Kushi gave a month long seminar on natural agriculture and food processing. This included the preparation of tofu and miso. The seminar was published in the series 'Michio Kushi Seminar Reports.'" Address: East West Foundation, 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-734-3853.

6166. Claiborne, Craig. 1982. Q&A. *New York Times*. Dec. 15. p. C16.

• **Summary:** "Q. I am curious to know the exact origin of the word catchup, which is sometimes spelled ketchup, and sometimes catsup. Which spelling do you prefer, and can you tell me the origin?

A. *The New York Times* prefers to spell it ketchup, but the other two spellings are generally accepted. The name is ascribed to various origins by various authors.

"Theodora FitzGibbon in her book 'The Food of the Western World' (Times Books) states that the word may come from the Chinese koe-chiap or ke-tsiap 'which means

the brine of pickled fish.’

‘The Cook’s Encyclopedia,’ by the late Tom Stobart (Harper & Row, 1980) states that the word came into English ‘from the Orient, perhaps from the Malay or Chinese.’

Stobart also wrote: “You find ketjap benteng or ketjap manis in Indonesian recipes and that is a form of sweet soy sauce.”

“‘Cookbooks of the last century about with recipes—oyster ketchup (oysters with white wine, brandy, sherry, shallots and spices), mussel ketchup (mussels and cider), pontac or pontack ketchup (elderberries), Windermere ketchup (mushrooms and horseradish), wolfram ketchup (beer, anchovies and mushrooms).’”

“There are also ketchups made with walnuts, cucumbers, and many other items that caught some cook’s imagination.”

Note 1. This is the earliest document seen (April 2012) in which this interesting and important question is asked.

Note 2. The Indonesian word for “soy sauce” is ketjap / kecap—pronounced exactly like the Western word “ketchup.” We have much evidence showing that Western word was derived from the Indonesian word, however the Indonesian word may have been derived from a Chinese word—the influence of immigrants to Indonesia from southern China’s coastal provinces.

6167. **Product Name:** Skinny Dip, and Spicy Skinny Dip (Tofu-Based Dip with Vitamin B-12).

Manufacturer’s Name: Brightsong Light Foods.

Manufacturer’s Address: 100-A Poultry St. (P.O. Box 2536), Petaluma, CA 94953.

Date of Introduction: 1982. December.

Ingredients: Skinny Dip: Brightsong tofu, soy oil, olives, onion, soy sauce, nutritional yeast, garlic, natural spices, citric acid.

Wt/Vol., Packaging, Price: 7, 8 oz.

How Stored: Refrigerated.

Nutrition: Per 3.5 gm.: Calories 160, protein 11 gm, carbohydrate 5 gm, fat 11 gm.

New Product–Documentation: Label. 1982. 3 inch diameter. Self adhesive. Green on white. Label. 1983, undated. 3 color. Reprinted in Soyfoods Marketing. Label. 1983. 2.5 inch diameter. Plastic tub. Green and blue on white. “Low in calories, fat and salt, a good source of protein, vitamins and minerals, all natural. Use as a dip, salad, spread or...” Lafayette, CA: Soyfoods Center. Spot in Soyfoods. 1984. Summer. p. 42. Letter from Richard Rose. 1987. Aug. 29.

6168. **Product Name:** Eden Tamari: Natural Shoyu.

Manufacturer’s Name: Eden Foods, Inc. (Importer). Made in Japan.

Manufacturer’s Address: Clinton, MI 49236.

Date of Introduction: 1982. December.

New Product–Documentation: Ad in Vegetarian Times.

1982. Dec. p. 24. “What was once a flight of fancy... Natural Soy Sauce (Tamari).” Ad in Soyfoods. 1984. Summer. p.

37. “Just the Best.” This label is confusing; the product is actually natural shoyu, not tamari.

6169. Eden Foods, Inc. 1982. George Ohsawa first introduced “tamari” to North America. The product he gave us was a traditionally brewed SHOYU... (Ad). *East West Journal*. Dec. p. 11. Also in *Vegetarian Times*, Jan. 1983, p. 36.

• **Summary:** “..., made of soybeans, wheat, water & sea salt, fermented for many months and pressed.

“He called it Tamari because he thought that Shoyu was too difficult a word for Westerners to say and because it would differentiate Shoyu from commercial, chemical soy sauces.

“In Japan, Tamari is the by-product of making soybean miso, from soybeans, sea salt, and water. A very small amount of this is made compared to the amount of Shoyu brewed. In Japan, Tamari is most commonly used in food processing while Shoyu is used in cooking and on the table. Both are excellent foods. The original ‘Eden Tamari-Shoyu’ is macrobiotic soy sauce. This is the product Eden has marketed as Tamari since 1967, because George Ohsawa called it ‘Tamari.’

“Recently, real Tamari (Wheat Free) has been imported into the U.S.A. Mr. Ohsawa did not anticipate this. Now there are two products on the market being called Tamari. Shoyu & Tamari”

Note: This is an early macrobiotic effort to distinguish between tamari and shoyu. “Eden offers: Tamari Natural (Shoyu) Soy Sauce and Tamari Wheat Free.” Address: Clinton, Michigan 49236.

6170. Eden Foods, Inc.; Muso Shokuhin. 1982. What was once a flight of fancy... (Ad). *Vegetarian Times*. Dec. p. 24.

• **Summary:** This full-page color ad shows the colorful Muso crane logo flying at the top. Across the bottom in bold letters is written “Eden.” The page is filled with boxes of macrobiotic natural food products imported by Eden from Muso in Japan. These include: Bulk miso, bulk kuzu, ramen, bulk sea vegetables, bancha tea, natural soy sauce (tamari), umeboshi, soba miso, Hacho miso, and vegetable brush. In the background is a landscape of terraced rice paddies. Address: [Clinton, Michigan].

6171. Kim, Kil Hwan. 1982. Kohng, dubu wa kohng nah mul eh kwah hak [The science of soybeans, tofu and soy sprouts]. Seoul, South Korea: Korean Science Foundation. 211 p. Dec. Illust. Index. 21 cm. [200+ ref. Kor]

• **Summary:** Contents: I. Soybeans. Introduction. World soybean production: Areas of production, quantities produced, amount produced in Korea, amount imported to Korea, chemical composition of all soybeans. How to

use soybeans: Foods and processed soybean foods (sauces, tempeh, natto), industrial uses. Nutritional composition of soybeans: Common components, protein and amino acids (protein, essential amino acids, necessary protein intake, necessary amino intake, chemical score, biological value of soybean protein, the need to heat soy protein, the use of soy protein as a protein supplement), soybean oil (components of soybean oil, oil assimilation / absorption), other nutritional components (carbohydrates, vitamins, minerals), references.

II. Tofu. Introduction. Kinds of tofu and production: Soybean curd (production in factories, production at home, instant tofu, kinugoshi tofu, grilled tofu, frozen tofu, how to freeze and dry tofu). Movement of nutritional values during tofu processing: Movement of common nutrients, movement of amino acids. Nutritional components of tofu: Tofu protein, tofu protein as a protein supplement, digestion of tofu, calories in tofu, fat and cholesterol, minerals and vitamins, toxins, *hwe bun* in tofu. Tofu and group meals: School meals in Japan, in America, in Korea. Tofu factories and associations involved with tofu: Member list of food associations in Korea, regular member and extra member list of tofu packaging associations in Japan, directory of tofu shops and factories in North America, in Europe, in other countries, list of companies selling tofu coagulants, list of tofu restaurants in Japan. References.

III. Soy sprouts. Introduction. Production of soy sprouts: Soybean varieties, selecting and washing the soybeans, soaking, watering the sprouts, machines for cultivating soy sprouts, maintenance. Nutritional composition of soy sprouts: Common nutrients, increase of vitamin C during growth, changes in vitamin C during heating, changes in riboflavin during heating. Glossary.

Soybeans arrived in Korea in about 200 B.C. (p. 11). Contains many useful tables. Address: Korea.

6172. **Product Name:** The Bristol Vegetable Burger (Meatless Tofu Burger).

Manufacturer's Name: Cauldron Foods Ltd.

Manufacturer's Address: Sunny Bank, Chapel Lane, Fish Ponds, Bristol 16, England. Phone: (0272) 554780.

Date of Introduction: 1982.

Ingredients: Tofu, brown rice, textured soy flour, tomatoes, shoyu (soybeans, wheat, water, salt), soy oil, herbs and spices, salt, yeast extract, onion extract, garlic.

Wt/Vol., Packaging, Price: 85 and 100 gm.

How Stored: Refrigerated.

New Product–Documentation: Label. 1983. 5.5 by 7 inches and 5.5 by 8.5 inches. Plastic. Green, brown, tan and white. "Pre-cooked–Eat cold, or warm under grill. Low calorie: 172 calories per 100 gm." Poster. 1983, undated. 6 by 8 inches. Red and blue on white. "The Bristol Burger range of natural convenience foods are now available in 3 varieties. Ready cooked. Can be eaten cold or hot. Low calorie and high protein." Richard Leviton. 1983.

Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 26-27. Spot in The Vegan. 1988. Summer. p. 17. "There is a new Vegetable & Tofu Burger from Cauldron Foods."

6173. **Product Name:** The Bristol Chilli Burger (Meatless Tofu Burger).

Manufacturer's Name: Cauldron Foods Ltd.

Manufacturer's Address: Sunny Bank, Chapel Lane, Fish Ponds, Bristol 16, England. Phone: (0272) 554780.

Date of Introduction: 1982.

Ingredients: Tofu, brown rice, textured soy flour, tomatoes, shoyu (soybeans, wheat, salt), soy oil, herbs, chilli spices, salt, yeast extract, onion extract, garlic.

Wt/Vol., Packaging, Price: 85 gm.

How Stored: Refrigerated.

New Product–Documentation: Label. 1983. 5.5 by 8 inches. Plastic. Brown, red, yellow and white. "Low calorie–172 Kcal per 100 gram." Poster. 1983, undated. 6 by 8 inches. Red and blue on white. "The Bristol Burger Range of Natural Convenience Foods are now available in 3 Varieties. Ready Cooked. Can be eaten Cold or Hot. Low Calorie and High Protein." Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 26-27.

6174. **Product Name:** The Bristol Nut Burger (Meatless Tofu Burger).

Manufacturer's Name: Cauldron Foods Ltd.

Manufacturer's Address: Sunny Bank, Chapel Lane, Fish Ponds, Bristol 16, England. Phone: (0272) 554780.

Date of Introduction: 1982.

Ingredients: Tofu, brown rice, textured soy flour, peanuts, shoyu (soybeans, wheat, water, salt), soy oil, salt, hydrolysed vegetable protein, onion extract, citric acid, garlic.

Wt/Vol., Packaging, Price: 85 gm.

How Stored: Refrigerated.

New Product–Documentation: Label. 1983. 5.5 by 7 inches. Plastic. Dark brown, light brown and white. Poster. 1983, undated. 6 by 8 inches. Red and blue on white. "The Bristol Burger Range of Natural Convenience Foods are now available in 3 Varieties. Ready Cooked. Can be eaten Cold or Hot. Low Calorie and High Protein." Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 26-27. This company was built on the burger, which contains TVP (purchased from British Arkady) to add chewiness.

6175. Eden Foods, Inc. 1982. Catalog 1983. 701 Tecumseh Rd., Clinton, MI 49236. 70 p.

• **Summary:** "Founded in July 1967, Eden Foods began as a small retail outlet of macrobiotic foods in Ann Arbor, Michigan." Address: Clinton, Michigan.

6176. Far Pavilions. 1982. Menu. 116 N. Oak Street (Box 69), Telluride, CO 81435.

• **Summary:** The front panel of this 8-panel menu (Green on tan paper) states: "International vegetarian cuisine. Welcome hospitality. Located below the opera house." The menu (which gives no prices) begins: "Our recipes are traditional as well as our own creations, all using pure and natural foods." Gives a definition of tofu and how it is made, then notes: "We make tofu in this traditional way regularly at Far Pavilions. In our kitchens, tofu is prepared in a wide variety of ways to show how this new high-protein, non-dairy food can be included in your menu. We also make regular use of the nutritious by-products of tofu-making: the soymilk and the soy fiber (okara)."

Soy-related menu items include: Soup of the day. Salad (dressings include "tamari sauce"): Mixed vegetable and sprouts with guacamole, full (or half) plate salad with tofu and guacamole. Salad specialties: Tofu and vegetable, okara salad, hummus, tabouli. Daily specials from the wok: Stir-fried tofu, rice, and vegetables, tofu and vegetables, stir-fried okara and vegetables. Stuffed pitas: Grilled tofu and vegetables, guacamole and tofu, falafels. Burgers: Soy burger, tofu burger, okara burger. Burritos: Spicy tofu and rice filling with guacamole. Extras: Fresh tofu, grilled tofu. Smoothies: Carob shake (with banana and sesame). Carob-honey soymilk. Nutritional yeast—20 cents extra. Other refreshments: Hot miso broth (cup). Soy milk. Desserts: Ask us! "For reservations, catering, or take out, call 728-4441." Address: Telluride, Colorado. Phone: 728-4441.

6177. Fruin, W. Mark; Tsunehiko, Yui. comp. 1982. The 200 largest industrial firms in Japan for 1918. Unpublished manuscript. Updating of original 1980 document.

• **Summary:** This table is published in Mark Fruin's book "The Japanese Enterprise System" (1992, Oxford). Address: 1. Prof. of History, California State Univ., Hayward.

6178. **Product Name:** Kimlan Soy Sauce.

Manufacturer's Name: Golden Orchid Ltd. (Importer-Distributor). Made in Taiwan by Kimlan.

Manufacturer's Address: Commerce, CA 90040.

Date of Introduction: 1982.

Ingredients: 1994: Water, soybeans, wheat, salt, sodium benzoate (less than 1/10 of 1% as food preservative).

New Product—Documentation: Barbara Hansen. 1983. Los Angeles Times. Oct. 6. "Specialty sauce exec is his own best customer. Chung not only sells product, he cooks for firm's business luncheons with it." Herman Chung is president of Golden Orchid Ltd., the U.S. arm of Kimlan Foods Co. Ltd. of Taiwan. Kimlan is a major producer of soy sauce and also has a line of specialty sauces including barbecue, steak, teriyaki and sukiyaki sauces that are aimed at the American market.

Sunset Western Grocery News (Menlo Park, CA). 1986.

May. "Kimlan Brings Soy and Teriyaki Sauces to Western U.S." There are more than 300 soy sauce manufacturers in Taiwan and Kimlan is the largest, with 60% of the market. Kimlan Soy Sauce was introduced in Southern California in 1982, and Northern California in 1983. It is a fermented product with up to 30% less salt than most soy sauce.

Quarter ounce foil packet received with an order of takeout food from Uncle Yu's Chinese Restaurant in Lafayette, California. 1994. Jan. 24. In Chinese, Kimlan is pronounced Kinran (Golden Orchid). The product is distributed by Golden Orchid Ltd., Commerce, CA 90040. Made in Taiwan.

6179. **Product Name:** [Kikkoman Instant Shiro Miso Soup (Soybean Paste Soup, White)].

Foreign Name: Shiro Misoshiru.

Manufacturer's Name: Kikkoman Corporation.

Manufacturer's Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1982.

Ingredients: Powdered miso, dried seaweed, wheat gluten, bonito powder, monosodium glutamate, dried green onions, disodium inosinate, disodium guanylate.

Wt/Vol., Packaging, Price: 1.4 oz (40 gm). Foil packed containing 4 individual packets. Each makes 2/3 cup.

How Stored: Shelf stable.

New Product—Documentation: Label. 1982. 5.5 by 7 inches. Plastic packet. Orange, red, brown and green on white. Full color picture of wooden bowl of soup on tray. Foil packets inside are 2.75 by 4 inches. Red, brown and black on white. Bowl of soup on front, instructions on back. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. "Distributed by Kikkoman Corporation, Noda 278, Japan." Text on label in both English and Japanese.

6180. **Product Name:** [Kikkoman Instant Aka Miso Soup (Soybean Paste Soup, Red)].

Foreign Name: Aka Misoshiru.

Manufacturer's Name: Kikkoman Corporation.

Manufacturer's Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1982.

Ingredients: Powdered miso, dried seaweed, wheat gluten, bonito powder, monosodium glutamate, dried green onions, disodium inosinate, disodium guanylate.

Wt/Vol., Packaging, Price: 1.4 oz (40 gm). Foil packet containing 4 individual foil packets. Each makes 2/3 cup.

How Stored: Shelf stable.

New Product—Documentation: Label. 1983. 5.5 by 7 inches. Plastic packet. Red, purple, black and brown on white. Full color picture of wooden bowl of soup on tray. Individual packets are 2.75 by 4 inch foil. Red, brown and black on white. Picture of bowl of soup on front, instructions on back. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. "Distributed by Kikkoman Corporation, Noda 278, Japan." Text on label in both English and

Japanese.

6181. **Product Name:** Kikkoman Sauces [Sukiyaki Sauce, Tonkatsu (Pork Cutlets) Sauce, Sweet & Sour Sauce, Menmi Sauce, Teriyaki Marinade and Sauce, or Tempura Sauce].

Manufacturer's Name: Kikkoman Foods, Inc.

Manufacturer's Address: Walworth, Wisconsin. Or Kikkoman International, Inc., San Francisco.

Date of Introduction: 1982.

Ingredients: Sukiyaki: Soy sauce (water, wheat, soybeans, salt), sugar, wine, water, monosodium glutamate, lactic acid, disodium inosinate, disodium guanylate, sodium benzoate less than 1/10 of 1% as food preservative. Tonkatsu: Corn syrup, applesauce vinegar, water, soy sauce, salt, onion puree, modified food starch, tomato paste, carrot juice concentrate, spices, MSG, caramel, garlic powder.

Wt/Vol., Packaging, Price: 9.5 oz (269 gm), 10 fluid oz (296 ml), 12 oz (340 gm).

How Stored: Shelf stable.

New Product–Documentation: Labels. 1982. Sukiyaki: 8 by 3.75 inches. Paper. Tonkatsu: 3.5 by 3.5 inches, circular top. Paper. White, black, green on burgundy. Memmi: 8 by 3.75 inches. Paper. Orange, black, white, green on yellow. Paper. Sweet & Sour: 7.75 by 3.5 inches. Paper. Black, blue, green, white, yellow and brown on orange. Teriyaki: 8 inches by 3.5 inches. Paper. Black, green, pink, white, on orange. Good Housekeeping seal. Tempura: 8 inches by 3.5 inches. Paper. Orange, black, white, green on gold. Color illustration of products on all labels. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

6182. **Product Name:** Kikkoman Memmi: Soup Base for Noodles.

Foreign Name: Menmi.

Manufacturer's Name: Kikkoman Foods, Inc.

Manufacturer's Address: Walworth, Wisconsin 53184. Or Kikkoman International, Inc., San Francisco.

Date of Introduction: 1982.

Ingredients: Soy sauce (water, wheat, soybeans, salt), sugar, salt, water, bonito extract, monosodium glutamate, disodium inosinate [sic, inosinate], disodium guanylate, succinic acid, vinegar, sodium benzoate less than 1/10 of 1% as a food preservative. Sodium content: 165 mg per ½ teaspoon.

Wt/Vol., Packaging, Price: 10 fl. oz (296 ml).

How Stored: Shelf stable.

New Product–Documentation: Labels, reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Red, black, and white on yellow. 3.5 x 8 inches. Small color photo on front panel.

6183. Maki, Toshio. 1982. Shokuhin oyobi kankyô-chû no N-nitroso kagô-butsu—sono ganryô to bakuro-ryô ni tsuite [N-nitroso compounds in foods and the environment—the

occurrence and exposures]. *Eisei Kagaku (J. of Hygienic Chemistry)* 28(5):249-58. [Jap]*

• **Summary:** Volatile and non-volatile N-nitrosamines were sampled in foods. The highest volatiles were in broiled dried fish, chewing tobacco, niboshi (dried small sardines), and smoked and flavored fish.

0.1 to 0.8 micrograms per kilogram (parts per billion, ppb) of N-nitroso-dimethylamine (NDMA) was detected in miso and shoyu. Similar amounts were also found in other Japanese foods. The author thinks that there is no danger in consuming these foods because of the very small amounts of NDMA, mostly less than 1 ppb.

6184. Mori, S.; Nunomura, N.; Sasaki, M. 1982. Correlation between sensory preference and compounds of Japanese soy sauce flavor (Abstract). In: Abstracts of Papers Presented at the Annual Meeting of the Agricultural Chemical Society of Japan. See p. 36. *

Address: Central Research Labs., Kikkoman Shoyu Co., Noda, Japan.

6185. **Product Name:** Noble Bean Tempeh Soysage (Using Tempeh in Place of the Typical Okara).

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: 18320 Euclid Ave., Cleveland, OH 44112.

Date of Introduction: 1982.

Ingredients: Tempeh with wheat flour, soymilk, oil, tamari, garlic, barley malt, mustard, seasonings.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1982. 4.25 inch diameter. Blue, green, yellow and red on white. Logo of Jack and the Beanstalk. "No cholesterol." Jeff Narten. 1987. "History of North Coast Tempeh and its Products." 4 p. Dec. 7.

6186. Ogi, Masahiro. 1982. Sekai Nippon-shoku taizen. Hato-tachi no sekai senryaku. Nihon shoku o sekai ni hiomeru otokotachi no mune ni aru mono [Japanese foods worldwide. The doves' world strategy. Things in the hearts of men who introduce Japanese foods to the world]. *Bungei Shunju (Literary Arts, Spring and Fall)* No. 1. p. 370-80. New Year's Special Edition. [Jap]

• **Summary:** In addition to Kikkoman, shoyu, and Mark Fruin, discusses pickles, sushi, sake, and instant ramen (Cup O'Noodles).

6187. **Product Name:** Tamari Shoyu: Natural Soy Sauce.

Manufacturer's Name: Pure & Simple, Inc.

Manufacturer's Address: P.O. Box 1235, Corona, CA 91720. Phone: (714) 371-4210.

Date of Introduction: 1982.

Wt/Vol., Packaging, Price: Bottle.

New Product–Documentation: Poster. Ad (full-page color) in *Natural Foods Merchandiser*. 1982. “Bland Aid.” Shows 3 sizes of bottles amidst many other bottled products on shelves: 5 fl. oz, 1 pint, and 1 quart. Each has a round red rising sun in the center against a light gold background. “Tamari” is written against a red background and “Shoyu” against a green one.

6188. Pure & Simple, Inc. 1982. Bland aid (Poster and ad). P.O. Box 1235, Corona, CA 91720. 1 p.

• **Summary:** This full-page color poster and ad (copyrighted 1982) shows various sizes of many products in the Pure & Simple line. Three different sizes of Tamari Shoyu are shown (5, 16, and 36 oz glass bottles), each with a red, green, and gold label. This ad also appeared in 1983 in *Bestways* (Feb., p. 55) and in 1984 in *Natural Foods Merchandiser* (July, p. 89). Address: Corona, California.

6189. **Product Name:** The Original Tofu Salad.

Manufacturer’s Name: Purist Foods.

Manufacturer’s Address: 6014 Techni-Center Dr. Suite 105, Austin, TX 78721. Phone: 512-928-0191.

Date of Introduction: 1982.

Ingredients: Tofu, lemon juice, vinegar, vegetable oil, nutritional yeast, soy sauce, salt, herbs, and spices.

Wt/Vol., Packaging, Price: 16 oz.

How Stored: Refrigerated.

New Product–Documentation: Talk with Allen Maurer, consultant. 1988. Oct. 12. Purist foods is still in business, run by Reed Murray. Label. 1988, received. 3 by 2 inches. Green on white. Leaf vine design on sides.

6190. **Product Name:** Tofu Hot Dip.

Manufacturer’s Name: Purist Foods.

Manufacturer’s Address: 6014 Techni-Center Dr. Suite 105, Austin, TX 78721. Phone: 512-928-0191.

Date of Introduction: 1982.

Ingredients: Tofu, soy oil, picante sauce, vinegar, nutritional yeast, honey, soy sauce, salt, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Talk with Allen Maurer, consultant. 1988. Oct. 12. Purist foods is still in business, run by Reed Murray. Label. 1988, received. 3 by 2 inches. Self adhesive. Green on white. Leaf vine design on sides.

6191. **Product Name:** Tofu Onion Dip.

Manufacturer’s Name: Purist Foods.

Manufacturer’s Address: 6014 Techni-Center Dr. Suite 105, Austin, TX 78721. Phone: 512-928-0191.

Date of Introduction: 1982.

Ingredients: Tofu, soy oil, vinegar, nutritional yeast, honey, soy sauce, salt, and spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Talk with Allen Maurer, consultant. 1988. Oct. 12. Purist foods is still in business, run by Reed Murray. Label. 1988, received. 3 by 2 inches. Green on white. Leaf vine design on sides.

6192. **Product Name:** Soy Sauce.

Manufacturer’s Name: S.E. Rykoff & Co.

Manufacturer’s Address: 737 Terminal St. (Mfg.) and 761 Terminal St. (Dist.), Los Angeles, CA 90021.

Date of Introduction: 1982.

New Product–Documentation: *Soya Bluebook*. 1982. p. 75; 1985.

6193. Song, Puju; Wishnok, J.S.; Tannenbaum, S.R. 1982.

[Determination of volatile nitrosamines in soy sauce].

Zhonghua Yufangyixue Zazhi (Chung-hua Yu Fang I Hsueh Tsa Chih; Chinese J. of Preventive Medicine) 16(3):147-49. (Chem. Abst. 97:108644e). [Chi]*

• **Summary:** Nine commercial soy sauces. purchased at U.S. retail stores, and including representative samples from Hong Kong, China, Thailand, Japan, and Korea, were examined for the possible presence of volatile N-nitroso compounds. All samples contained substances which gave positive responses on a nitrosamine-selective detector (Thermal Energy Analyzer; TEA). These signals, in addition, disappeared or were reduced following ultraviolet irradiation; this behavior is characteristic of nitrosamines. Two of the TEA-positive substances had gas chromatogram retention times and gas-chromatogram-mass spectrometer behavior suggestive of *N-nitrosodimethylamine* and *N-nitrosomorpholine*, respectively. Address: Beijing Medical College, Beijing, China.

6194. **Product Name:** Soyettes (Meatless Soy-based Patties / Burgers).

Manufacturer’s Name: Soy City Foods.

Manufacturer’s Address: 2849 Dundas St. W., Toronto, ONT, M6P 1Y6, Canada.

Date of Introduction: 1982.

Ingredients: Soy mash [okara], oats, rice, cashews, soy oil, sunflower seeds, sesame seeds, tamari, potato starch, herbs, seasoning, spices.

Wt/Vol., Packaging, Price: 350 gm paperboard box containing 4 patties.

How Stored: Frozen.

New Product–Documentation: Interview with Jon Cloud. 1985. Aug. Label sent by Jon Cloud. 1989. May 5. Product was introduced in 1982.

6195. **Product Name:** Soy Vay Chinese Marinade.

Manufacturer’s Name: Soy Vay Enterprises, Inc.

(Marketer-Distributor).

Manufacturer’s Address: Arcata, California 95018.

Phone: 1-800-600-2077.

Date of Introduction: 1982.

Wt/Vol., Packaging, Price: 22 oz. glass bottle.

How Stored: Shelf stable.

New Product–Documentation: Talk with owner of Soy Vay. 1997. June 3. Chinese Marinade was the company's first product, introduced in 1982. At that time the company was located in Arcata, California. They moved to Felton, California, in 1987.

6196. **Product Name:** Tempeh Cutlet / Burger (A Rectangular Burger. Vacuum Packed. By 1986 renamed Tempeh Cutlet).

Manufacturer's Name: Soyfoods Unlimited, Inc.

Manufacturer's Address: 14670 Doolittle Dr., San Leandro, CA 94577.

Date of Introduction: 1982.

Ingredients: Tempeh (made with soybeans organically grown in accordance with section 26569.11 of the California Health and Safety Code and brown rice), natural soy sauce, herbs, spices.

Wt/Vol., Packaging, Price: 7 oz (189 gm). Vacuum packed in poly pouch.

How Stored: Frozen or refrigerated.

Nutrition: Per 3 oz.: Calories 190, protein 9 gm, carbohydrates 6 gm, fat 3 gm, sodium 466 mg.

New Product–Documentation: Label. 1982, undated. 2.75 by 3.75 inches. Blue and red on white with rainbow border. "Not fried. No oil." Leaflet (on cardstock). 8½ by 11 inches. 2 color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Tempeh. Tempeh Cutlet/Burger: A cultured soy product. High in protein. No cholesterol. Good meat substitute.

6197. **Product Name:** Baked Marinated Tofu.

Manufacturer's Name: Summercorn Foods Inc.

Manufacturer's Address: 401 Watson, Fayetteville, AR 72701. Phone: 501-521-9338/164.

Date of Introduction: 1982.

Ingredients: Certified organic soybeans, purified water, natural calcium sulfate, soy sauce, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 3.25 x 2.75 inches. Self adhesive. Brown and green on tan. "High in protein and calcium. No cholesterol. Contact us for detailed nutritional information & menu ideas."

6198. **Product Name:** Soy Sauce.

Manufacturer's Name: Thai Theparos Factory R.O.P.

Manufacturer's Address: 206 M006, Taiban Rd., Samutpragarn, Thailand.

Date of Introduction: 1982.

New Product–Documentation: Soya Bluebook. 1982. p.

76.

6199. **Product Name:** Tofu Cutlets: Marinated and Baked.

Manufacturer's Name: Tofu Shop (The).

Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

Date of Introduction: 1982.

Ingredients: Tofu (water, organic soybeans grown according to Cal. Health Code Sect. 26569.11 and nigari). Marinated in a sauce of Tamari (a natural soy sauce made with water, soybeans, wholewheat and salt). Water, lemon, garlic and kelp.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label of 1985. Received 1988. 4 by 2.5 inches. Self adhesive. Blue, green, gold, and white. "Ready to eat... or reheat, naturally fresh... from our deli. A perfect snack fresh from the pack. Great in your favorite sandwich, diced and sauteed with rice and vegetables, or as a main dish. Simple to heat in oven (350°F, 10 minutes) or frying pan. Perishable, keep refrigerated, 34-39°."

Two Labels (front and back) sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in 1982. Label #1 from Feb. 2002. 3¼ by 2.75 inches. Self adhesive. Blue and orange-yellow on white. A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. Label #2. Larger watercolor illustration. More white in the background. Will be used when the company is certified organic in Oct. 2002.

6200. **Product Name:** [Wei Wong Soy Sauce].

Manufacturer's Name: Wei Wong Fermentation Industrial Co., Ltd.

Manufacturer's Address: 9th Floor, No. 79, Chungshan N. Rd., Sec. 2, Taipei, 104, Taiwan.

Date of Introduction: 1982.

New Product–Documentation: Soya Bluebook. 1982. p. 76.

6201. **Product Name:** Organic Shoyu.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu Co.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1982.

New Product–Documentation: Label, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Soya Bluebook. 1986. p. 105.

6202. **Product Name:** [Yamashin Shiro Shoyu {Clear Soy Sauce}].

Manufacturer's Name: Yamashin Shoyu Co. Ltd.

Manufacturer's Address: Nishiyama-cho 3-36, Hekinan-

shi, Aichi-ken 447, Japan.

Date of Introduction: 1982.

New Product–Documentation: Letter from American Soybean Assoc., Tokyo. 1982. March 25. Yamashin is Japan's largest maker of shiro shoyu.

Corti Brothers website. 2006. July 22. www.cortibros.biz. A color photo shows a bottle of this soy sauce in a clear bottle against a light wood background. The label has black Japanese characters on a white background. The near-black sauce is in a clear bottle. Price: \$6.99 per bottle (360 ml; #6039). Quantity in stock: 0 (zero). "Rarer is the white soy sauce, Shiro Shoyu, made from wheat rather than soy. It is made in central Japan and is used when you do not want to change the color of a dish. It is darkish amber in color. The scent and flavor are lightly smokey, meaty, and very pleasant, but light. This is the soy sauce to use when you want a delicate flavor."

6203. **Product Name:** Yeo's Soy Sauce.

Manufacturer's Name: Yeo Hiap Seng (Malaysia) Berhad. Affiliate of Yeo Hiap Seng, Petaling Jaya.

Manufacturer's Address: 7 Jalan Tandang, P.O. Box 229, Petaling Jaya, Selangor, Malaysia.

Date of Introduction: 1982.

New Product–Documentation: Soy Bluebook. 1982. p. 76; 1986. p. 105.

6204. Adachi, Iwao. 1982. *Nihon shokumotsu bunka no kigen* [Origins of Japanese food culture]. Tokyo: Jiyu Kokuminsha. 470 p. See p. 69-70, 113. [Jap; eng+]

• **Summary:** Kinako (Yayoi period): Also called "mametsuki" in Japanese, kinako is written with characters that mean "yellow soy flour." In the *Wamyosho*, it is called "Daizu-iri" or "Mametsuki." From these expressions we can learn that since ancient times, people have pounded soybeans in a mortar (*usu*). Stone mortars came to Japan during the Nara period (A.D. 710-784) and finally became popular among the people in about the middle of the Edo/Tokugawa period. Kinako was brought to Japan from China through Korea. Kinako is probably mentioned in the *Engi Shiki*. At a certain festival the people served at the altar 5 measures each of magari mochiki and mametsuki, and 10 measures of daizumochiki. These may have been the early names for kinako-mochi and/or azuki mochi.

Tamari: The original form of shoyu was tamari. The by-product of tamari was miso. And the original form of miso was *kuki* [fermented black soybeans], which was a seasoning developed in China. More on the history of *kuki* is given under "miso." The government office (*yakusho*) for miso was built at the imperial court (*kyutei*) in A.D. 701 (Taiho 1). Therefore tamari started there at the same time. In the book *Yamato Honso* (Japanese materia medica) by Ekiken Kaibara, tamari (written with the characters for bean + oil) was mentioned. But on the sign board (*kanban*) of Yuasa

Shoyu (which was started in the Tenshō period, 1573-1592), Tamari Shoyu was written (and "tamari" was written with the single character for "tamaru"). In the *Vocabulary of the language of Japan* (1603; Nippo Jisho) tamari was defined in Portuguese: "Tamari, a very delicious liquid taken from miso which can be used as a seasoning when cooking foods." Furthermore, in the *Oshufushi* (1684) it is written that "The liquid from shoyu is tamari." During the Middle Ages (*chūsei*) in Japan, shoyu was written with the characters for bean + oil, but during the Tenshō period (1573-1592) it came to be written with the single character for "tamaru." Tamari and shoyu were first distinguished during the Kyōhō period (1716-1735). In the Chubu region of central Japan (Chūbu-Chiho; Toyama, Ishikawa, Fukui, Yamanashi, Nagano, Gifu, Shizuoka, and Aichi prefectures) one special kind of miso, which is a by-product of shoyu, is called "tamari-miso."

6205. Aidoo, K.E.; Hendry, R.; Wood, B.J.B. 1982. Solid substrate fermentations. *Advances in Applied Microbiology* 28:201-37. [144 ref]

• **Summary:** Contents: Introduction. History of solid-substrate fermentations: Pre-Pasteur period, post-Pasteur period and current developments. Design considerations and types of solid-state fermentors. Characteristics of solid-state fermentations: Physiological aspects of microbial growth on solid substrates. Advantages and disadvantages of solid-state fermentation. Future developments of solid-state fermentation systems. Conclusions. Address: Biotechnology Unit, Univ. of Strathclyde, Glasgow, Scotland.

6207. Alejandro, Reynaldo G. 1982. *The Philippine cookbook*. New York, NY: Coward, McCann & Geoghegan. 256 p. Illust. Index. 25 cm.

• **Summary:** Tausi [fermented black soybeans] is called for in two recipes: Lapu-lapu with tausi: Grouper with black bean sauce (with "1 tablespoon minced ginger, 4 tablespoons tausi {black beans; sold in Oriental food stores}, p. 141). Alimango sa tausi: Crabs in black bean sauce (with "8-ounce can black bean sauce," p. 149).

Bean curd or tokwa is called for in recipes on 7 pages including p. 19, 33, 140, 141, 163, 167, 187. Page 163: "1 cup diced tokwa or bean curd (sold in Oriental food stores)."

Soy sauce is mentioned on 58 pages, including pages 12, 13, 18, 20, 23, 24, etc. "Adobo" is defined as "cooked in vinegar, soy sauce, and garlic."

The "Glossary" (p. 238-41) includes: Misu—soybean paste. Tausi—black soy beans, salted and fermented. Togue—bean sprout. Tokwa—soy bean cake [tofu]. Address:

Manhattan, New York City, New York.

6208. Aykroyd, Wallace R.; Doughty, Joyce. 1982. Legumes in human nutrition. 2nd ed. Revised by Joyce Doughty and Ann Walker. Rome, Italy: Food and Agriculture Organization of the United Nations (FAO). viii + 152 p. Illust. 28 cm. The original edition was 1964. [293* ref. Eng]

• **Summary:** Contents: Preface. Introduction. History of legumes. Production and consumption. Composition and nutritive value. Methods of processing and cooking. Effects of processing on nutritive value. Toxic substances. Legume proteins. Observations on the value of legumes in human feeding. The place of legumes in human diets. Appendixes. References.

On pages 49-51 are sub-sections on: Traditional fermented soybean products (methods of home preparation are detailed in Appendix 5, p. 120-22): Soy sauce (shoyu), soy paste (miso), tempeh, natto, Hammanatto. Protein separation and other extraction techniques. Soy-milk. Soybean curd (tofu). Modern products from soybeans. Soy flour and grits. Soy protein concentrates. Isolated soy protein.

Under tofu (p. 50): "The curd may also be fermented to make soy-cheeses, which resemble the more highly flavoured European cheeses. These are known in China as *chou tofu*, which means stinking bean curd." See also p. 120, where yuba is mentioned.

Note: This 1982 edition was made by revising the original 1964 edition. Ann Walker is from the Dep. of Food Science, University of Reading. Dr. Wallace Aykroyd died in Feb. 1979 just as he was taking the first steps toward this revision. Address: 1. Dep. of Human Nutrition, London School of Hygiene and Tropical Medicine; Former Director, Nutrition Div., FAO, Rome, Italy.

6209. Blair Island. 1982. Menu. Eugene, Oegon. 1 p. both sides. 24 x 11 cm. Black on yellow.

• **Summary:** This soy deli serves breakfast and lunch. Soy-related products in the breakfast menu include: Tofu pocket (sauteed tofu in a pita pocket). Tofu scrambles (Blair Island style tofu, sauteed onions and cheddar cheese). Tofu breakfasts: "Blair Island style tofu is pressed, then sauteed with seven herbs, spices, and shoyu. Served with sprouts, fresh-baked toast or muffin and a side of sweet and sour tomato sauce. Regular (tofu, sprouts and sauce), or Special (tofu smothered with mushrooms and onions)." Side orders: Cup of tofu. Cashew milk.

Lunch. Tofu tia (tofu with sprouts and sauce wrapped in a corn tortilla). Tofu pocket sandwich. Tempeh tia. Tia special. Buddah burger (tofu-mushroom burger). Temptation (tempeh burger). Tempeh burrito. Bean burrito with tofu sour cream. Salads with tofu sour cream dressing. Tofu cheesecake desserts with different toppings.

Note: This company was in business in Aug. 1979,

located on an island between two branches of the road.

Address: 325 Blair Blvd., Eugene, Oregon 97402. Phone: 683-5117.

6210. Coyle, L. Patrick, Jr. 1982. The world encyclopedia of food. New York, NY: Facts on File, Inc. xv + 790 p. Illust. Index. 28 cm.

• **Summary:** Contains basic information (sometimes interesting, often superficial, with quite a few errors) about some 4,000 foods and beverages, including worldwide staples (potatoes, soybeans, apples), local specialties, delicacies, major brand-name products (Coca-Cola) and oddities (penguin eggs, grasshoppers). With 200 line drawings, 150 black-and-white photos, and 50 color plates.

See entries for soybean (incl. black soybeans, fermented tofu, miso, soybean flour, soybean milk, soybean oil, soy sauce, tempeh; tofu, "white soybeans"), and Worcestershire sauce (which "is said to contain more than 100 ingredients, including soy sauce, vinegar, molasses, chili, anchovies, garlic, shallots, tamarinds, limes and many spices").

Tofu: "A fermented form of this, called stinking tofu, is a favorite snack of the Chinese. It has a pungent smell and is usually deepfried [deep fried] and seasoned with soy sauce, vinegar, mashed garlic or chili paste. The food value is high..." (p. 643).

Note: This is the earliest English-language document seen (Oct. 2011) that contains the term "stinking tofu."

Also has entries for: Almond, chufa, peanut, peanut butter, peanut oil, seaweed (incl. algae, dulse, laver, rock weed / sea wrack, agar-agar, carrageen, kelp), sesame (with illustration of leaves, flower, and pods). Address: Freelance writer, Oceanside, California.

6211. Diamond, Marilyn. 1982. The common sense guide to a new way of eating: The proper foods, combinations and recipes to ensure that you will be a totally healthy person—with love from Marilyn Diamond. Los Angeles (Santa Monica), California: Golden Glow Publishers. ix + 106 p. Illust. Index. 26 cm.

• **Summary:** This near-vegetarian cookbook was Marilyn Diamond's first book on food. The first edition was self published (the Diamonds founded Golden Glow Publishers), shortly after Harvey's first book titled "A case for health." The book is based on the following natural hygiene principles: Drink plenty of fresh fruit and vegetable juices, the key to a cleansing elimination diet. Always drink them, and always eat fruit alone, on an empty stomach. Combine foods properly. Beware of acid-forming foods. Eat high water-content foods. Use only pure, fresh, unrefined ingredients. Raw foods are generally preferred to cooked. Under "The basic salad dressing," page 18 notes that tamari is a "concentrated soy sauce which is quite salty and should be used sparingly." Soy sauce or tamari are used as seasonings in: Tamari salad dressing (p. 39).

Hearty vegetable soup II (p. 47). Wok fried rice (with 2 Tbs tamari or 4 Tbs. soy sauce, p. 75). Broccoli-pea turnovers (p. 92). The beanless burrito (p. 98). No other soyfoods are mentioned.

This is not quite a vegetarian book: Meat and chicken are used sparingly (p. 21-22). Eggs are also used (p. 41-42). There is a nice hippie-like photo of Marilyn on the back. In 1986, after *Fit for Life* was selling extremely well, Warner Publications asked the Diamonds for another book as soon as possible. Warner knew about this cookbook and loved it and thought it would be a very nice little companion to *Fit for Life*. So they purchased the rights and re-released it, with minor revisions by Marilyn (only 5-6 recipes were changed), a new introduction by Harvey, and a new title—*A New Way of Eating*. Address: Venice, California.

6212. Ebine, Hideo. 1982. Fermented soybean foods in Japan. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 41-52. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia.

• **Summary:** Production statistics for miso and natto from 1970-1979 were presented. Miso increased from 552,207 tonnes in 1970 to a peak of 590,137 tones in 1973, followed by a gradual decrease to 567,776 tons in 1979. Natto production increased from 100,000 tonnes in 1970 to 158,000 tonnes in 1979. Statistics on the production of fermented black soybeans (Tera Natto or Hama Natto) are not available, but are roughly estimated at 10,000 tons.

An outline is then given of the chemical composition of the different types of miso and natto as well as their methods of manufacturing. Of the many beneficial characteristics of miso, the following are worthy of note: it has strong antioxidative activity, a strong buffering activity, and a bactericidal like effect against pathogens.

“Natto is one of the typical and popular soybean foods in the Japanese diet. It is classified into 2 major types; one is called Hama Natto which resembles soybean miso in colour and flavour; the other is called itohiki natto. When referred to simply as natto, it generally means itohiki natto. Natto is a unique soybean food, fermented by *Bacillus natto*. The surface of fermented natto is covered with characteristic viscous and slimy substances consisting of *B. natto* cells and polymers of glutamic acid.” Address: Applied Microbiology Div., National Food Research Inst., Ministry of Agriculture, Forestry and Fisheries, Yatabe, Ibaraki-ken, Japan.

6213. Editors of Time-Life Books. 1982. *Dried beans and grains*. Alexandria, Virginia: Time-Life Books, Inc. 176 p. Illust. Index. 28 cm.

• **Summary:** Soy-related recipes include: Stewed bean curd (p. 108). Fried bean curd (p. 108). Mrs. Chen’s bean curd (Ma-po dou-fu, p. 109). Sizzling bean curd with ginger

ankake sauce (p. 109). Bean curd and vegetable tempura (p. 110). Red-cooked pork chops with bean curd (p. 110). Home-style bean curd (p. 110-11). Seafood sizzling rice (San hsien kuo pa) with soy chicken sauce (p. 135). Bean (soy) and chicken stew (p. 159). Split peas with barley (and soy grits, p. 161). Bean curd (p. 165). Address: Alexandria, Virginia.

6214. Eiyo Kaizen Fukyukai. 1982. *Gendai shōyu shō-jiten: Shōyu no chishiki no arekore* [Little encyclopedia of modern shoyu. Various facts about shoyu (Brochure)]. Tokyo: EKF. 19 p. [Jap]
Address: Tokyo.

6215. Gunji, Atsutaka. 1982. *Abunai shokuhin senshū* [One thousand dangerous foods]. Tokyo: National Shuppan. 188 p. [Jap]*

• **Summary:** The section in soy sauce was translated by Jun Makino and published in *Crackerbarrel* (Chico, California). 1983. April. p. 6. As follows: “Most Japanese soy sauce makers depend on inferior quality defatted soybeans for their main ingredients. The suppliers of these defatted soybeans are fertilizer dealers, who also sell them for livestock feed and fertilizer... In order to make an inexpensive product, many soy sauce makers have adopted the dubious practice of buying the waste water by-product of monosodium glutamate manufacturing. This waste water is used in the processing of acid-hydrolyzed soy sauce to improve its poor flavor.

“Japan’s top soy sauce manufacturers produce approximately 380,000 kl [kiloliters] of soy sauce each year, and 170,000 kl of that is chemical soy sauce used in mixture... During 1975 to 1979 some 224 patents on soy sauce manufacturing technology were obtained...” Address: Prof. of Food Technology, Meiwa Women’s College, Japan.

6216. Henderson, Bruce R. 1982. *Oakland organic: A vegan primer*. Albany, New York: Caboose Press. 200 p. Illust. 23 cm. [24 ref]

• **Summary:** This is a book about veganism which contains a few vegan recipes near the back. It focuses on the San Francisco Bay Area and urban areas, and contains extensive information about soybeans and soyfoods, much of it inspired by *Yay Soybeans*, from The Farm in Summertown, Tennessee. As follows: Miso, and Soya-Mineral Bouillon (Dr. Bronner’s) (p. 19). Soy as an alternative protein source (p. 37-43). Soymilk (p. 53-56; Jethro Kloss). More soy (p. 57-61; soy pulp [okara] pudding, soysage, Garden of Eatin’ Soy Jerky (illustration of package), Brightsong Missing Egg Tofu Salad (illustration), soy yogurt (fermented), soy tofu—hard, baked, or fried). Sprouting (p. 67-70; incl. soybeans). Fermented foods (p. 71-74; incl. tempeh, raw tofu). Snacks & quick foods (p. 88-96; incl. Ice Bean—soy ice cream, Ice-C-Bean). Miso and soy sauce (p. 120-21). Soy-related recipes: Baked apples with miso (p. 185-86). Tofu

cheesecake (p. 188-89). Soysage (p. 193). Soy ice bean (p. 195). Note: Bruce Henderson was born in 1946. Address: Oakland, California.

6217. Katzen, Mollie. 1982. The enchanted broccoli forest. Berkeley, California: Ten Speed Press. 307 p. Illust. Index. 27 cm. [1 ref]
Address: Berkeley, California.

6218. Ko Swan Djien. 1982. Indigenous fermented foods. *Economic Microbiology* 7:15-38. A.H. Rose, ed. Fermented Foods. [67 ref]

• **Summary:** Contents: 1. Introduction. 2. Foods fermented by moulds: Roles of the moulds. 3. Foods fermented by bacteria: Fermented vegetable products, fermented fish products, fermented seeds (natto, thua-nao, dagé), fermented starch-rich raw materials (fermented maize products, fermented rice products, fermented cassava), fermented plant juice.

4. Foods fermented by a mixture of moulds and yeasts: Ragi, micro-organisms, fermented starch-rich raw materials.

5. Foods firstly fermented by moulds [as in making koji], followed by a fermentation with a mixture of bacteria and yeasts (the salt-tolerant yeasts are species of *Saccharomyces* and *Torulopsis*; the bacteria are species of *Pediococcus* and *Streptococcus*): Tane koji, soy sauce, other fermented soybean products (tauco {porridge or dry consistency}, miso, hamanatto {which is soft and has a high moisture content}, tou-shih {which has a much lower water content than hamanatto and is therefore not so soft}. These “fermented soybean products are also used as flavouring agents in cooking as well as table condiments or as a side dish”).

6. Specific aspects of fermented foods: Mould species, lactic-acid bacteria, yeasts, salt. 7. Acknowledgement. References.

Concerning soy sauce (p. 30-31): “Japanese *shoyu* is made from equal amounts of soybeans and wheat.” The “raw materials are inoculated with tane koji which contains spores of selected strains of *Aspergillus oryzae* and *A. soyae*. In less sophisticated soysauce factories throughout South East Asia, mould species grow spontaneously on the soybeans by natural contamination from the air and from the bamboo trays on which soybeans of former batches were incubated (Bhumiratana et al., 1980). The moulds involved are species of *Aspergillus*, *Rhizopus*, or *Mucor*. Some Indonesian *kecap* manufacturers inoculated the cooked soybeans with tempe [tempeh] inoculum which contains spores of *Rhizopus oligosporus*.”

Traditional Food Fermentation as Industrial Resources in ASCA Countries. xvii + 259 p. See p. 209-20. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [11 ref]

• **Summary:** Contents: Introduction. Changes in the composition of N-compounds during fermentation. Changes in the protein quality by the fermentation methods. Discussion.

Tables: (1) Per capita daily consumption of fermented foods in Korea in 1970 was as follows: Kimchi (all kinds)

43.7 gm, soybean sauce 23.3 gm, red pepper soybean sauce 13.9, soybean paste 10.4 gm, fermented marine foods 0.6 gm.

(2) Production of fermented soybean foods in Korea, 1971 (in 1,000 metric tons): Soybean sauce: industrial 107, home-made 116, total 223. Soybean paste: industrial 56, home-made 168, total 224. Red pepper soybean paste: industrial 23, home-made 89, total 112.

(3) Retention of the nutrients in soybean during the traditional meju making (%). (4) Chemical score and essential amino acid index (EAAI) of soybean and meju-brine mixtures ripened for 8 months.

(5) The lysine availability of soybean and meju-brine mixtures ripened for 8 months. (6) Effect of 20% protein supplementation with the fermented soybean products on the protein value of the rice diet in the rat feeding.

(7) Comparison of protein conversion rates of soybean fermentation and animal production: Beef 5% (BV {biological value} 74). Milk 23% (BV 85). Egg 24% (BV 99). Home-made meju products 74% (BV 67*). Improved meju products 85% (BV 73*). Asterisk (*) = "Rice protein added with 20% of the product protein.

Figures: (1) Cartoon diagram of the process for making Korean soysauce and miso. (2) Flowsheet of improved method of making meju. (3) Graph of Changes in the content of soluble nitrogen, free amino nitrogen, and amino nitrogen in the total nitrogen of soybean during meju making. (4) Changes in the content (%) of methionine and cystine during cooking, 3-month meju fermentation, and ripening. (5) Changes in the concentration (%) of basic amino acids during cooking, 3-month meju fermentation, and ripening. (6) Changes in the concentration (%) of total amino acid in the crude protein of soybean during the ripening of different types of meju-brine mixture. Address: 1. 6221. Lie, Goan-Hong. 1982. Nutritional aspects of fermented foods in Indonesia: An overview. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 115-30. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [23 ref]
• Summary: Discusses the preparation of tempe, oncom, taucu, kecap, tempe bongkreng (and bongkreng poisoning), tempe gembus (okara tempeh), oncom ampas tahu (okara onchom), soysauce (kecap), and fermented fish products. Tempeh is a good source of vitamin B-12 and of certain antibacterial agents. Certain minor legumes should also be used in preparing these traditional foods.

Table I shows the most important traditional fermented foods in Indonesia, with the name and type of product, organism used, substrate, nature of product (solid, liquid),

and area of production and consumption. Address: Nutrition Unit Diponegoro, National Inst. for Health Research and Development, Ministry of Health, Jakarta, Indonesia.

6222. Mehlman, Felice. 1982. *Phaidon guide to glass*. Oxford, England: Phaidon Press Ltd. 256 p. See p. 146-49. Illust. Index. 23 cm. [60* ref]

• Summary: The section on "Cruets and castors" states (p. 146-49) that cruets are small bottles, usually having a stopper or lid (and sometimes a handle). They are used "for serving condiments (oil, vinegar, lemon juice, etc.) at the dining table. Cruets were imported into England from Venice during the 1660s and 1670s by the Glass Sellers' Company of London, and soon afterwards George Ravenscroft [lived 1618-1681] produced 'diamond cruets,' so called for their distinctive raised network decoration. By the 1690s, many cruets were silver-mounted and hallmarked (usually at the neck). Those made with stands—generally silver, silver plate or wood—rarely show pontil marks, which were removed to prevent bottles from tilting or falling... Some, inscribed with the name of their contents, were made in sets consisting of four or more bottles including 'castors' for dry condiments with perforated metal tops for sprinkling mustard, pepper, salt, [sugar], etc. Between 1750 and 1785, cruets were commonly cut with facets over the neck and shoulders and new forms appeared: pear-shaped, cylindrical with tapering neck (c. 1775), and urn-shaped on a spreading foot (c. 1780) reflecting neo-classical tastes... Other late 18th- and early 19th-century cruets were of 'Bristol blue,' green or other richly coloured glass, frequently gilded, with the name of their contents and usually consisting of oil and vinegar bottles and three castors, in Sheffield plate or wood stands."

A photo (p. 147) shows a "Condiment set of green-tinted glass consisting of six cruets, each gilded, with contents' labels (incl. 'Soy') and geometric motifs on the pinnacle stoppers. The wooden stand is original. English, late 18th century." Address: [England].

6223. Mheen, T.I.; Kwon, T.W.; Lee, C.H. 1982. Traditional fermented food products in Korea. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 63-81. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [13 ref]
• Summary: Discusses and gives a flow sheet and nutritional analysis for the following fermented soybean products: Meju, kochujang (soybean paste with red pepper added), doenjang, kochujang. "According to the available old literatures, the history of soybean cultivation for food uses in the Orient dates back to 4,000–5,000 years ago in China, 2,000 years ago in Korea, and 1,000 years ago in Japan (KIST, 1970; Watanabe et al. 1971)." Address: 1-2. Korea Inst. of Science and Technology, Seoul, Korea; 3. Korea Univ., Seoul, Korea.

6224. Re: Names of soyfoods around the world: French. 1982. Form filled out by William Shurtleff based on sources given below. 1 p. [Eng; Fre]

• **Summary:** Gives the names of the main soyfoods in French. Sources: Bernard Storup; Bau & Debry, of France.

“Soyfoods—Aliments à base de soja.

Fresh green soybeans (edamamé)—Edamamé. Soja frais.

Whole dry soybeans—(haricots de) Soja sec / secs.

Black soybeans -

Fresh soy puree—Purée de soja.

Soy sprouts—Pousses de soja. Soja germe.

Soynuts—Soja grillé. Graines de soja grillées.

Oil roasted soynuts—Graines de soja grillées (à l’huile).

Soja grillé, revenu dans l’huile.

Dry roasted soynuts—Soja grillé à sec. Graines de soja grillées à sec (or sans huile). Haricots de soja, grillés à sec.

Soynut butter—Buerre de soja grillé.

Roasted soy flour—Farine de soja grillé.

Soy coffee—Café de soja.

Soy chocolate—Chocolat de soja.

Soymilk—As of Feb. 2012 only the terms “boisson au soja” or “jus de soja” or “tonyu” (the Japanese word for “soymilk”) can be used legally on commercial soymilk products in France—because of dairy lobby protests. The term “lait de soja” is generally used in cookbooks, books, articles, etc.

Soymilk ice cream -

Soymilk curds -

Tofu (regular)—Tofu or Tofou (le). Note: Many French speakers, who are also soyfoods experts, prefer “Tofou.”

Soft tofu—Tofu mou.

Firm Tofu—Tofu ferme. Extra firm tofu—Tofu très ferme.

(Deep fried) Tofu cutlets—Tranches de tofu frites.

(Deep fried) Tofu burgers—Tofuburgers frits. Burgers de tofu (frits).

(Deep fried) Tofu pouches—Poches de tofu (frites).

Silken tofu—Tofu soyeux.

Pressed silken tofu—Tofu soyeux.

Grilled tofu—Tofu grillé.

Dried frozen tofu—Tofu séché. Tofu déshydraté.

Okara or soy pulp—Okara (l’).

Yuba—Yuba (le).

Dried yuba sticks -

Sweet dried yuba -

Fermented black soybeans -

Miso or soybean jiang—Miso (le).

Soy sauce—Sauce de soja. Sauce soja. Shoyou (le).

Chinese sauces -

Tamari—Tamari (le).

Tempeh—Tempeh (le).

Fermented tofu—Tofu fermenté (au vin).

Fermented soymilk—Lait de soja fermenté.

Natto, thua-nao, kinema—Natto (le).

Soy oil—Huile de soja.

Soy lecithin—Lecithine de soja.

Soy flour—Farine de soja.

Whole (full fat) soy flour—Farine de soja entière.

Defatted soy flour—Farine de soja dégraissée.

Soy grits and flakes—Flocons et granule de soja.

Cereal-soy blends (CSM, WSB, etc.) -

Soy protein concentrate—Protéine de soja concentrée.

Soy protein isolate / Isolated soy protein—Isolat de protéines de soja. Protéine de soja isolée.

Textured soy protein products—Protéines de soja texturées (Produits à base de protéines de soja texturée).

Textured soy flour, TSF, or TSP—Farine de soja texturé.

Textured soy concentrates—Concentrat de soja texturé.

Textured soy isolate—Isolate de soja texturé.

Spun soy protein fibers—Address: Soyinfo Center, Lafayette, California 94549.

6225. Reddy, N.R.; Pierson, M.D.; Sathe, S.K.; Salunkhe, D.K. 1982. Legume-based fermented foods: Their preparation and nutritional quality. *CRC Critical Reviews in Food Science and Nutrition* 17(4):335-70. [125 ref]

• **Summary:** Contents: 1. Introduction. 2. Soy sauce.

3. Tempeh. 4. Meitauza. 5. Miso. 6. Natto. 7. Sufu. 8.

Fermented soybean milk and other fermented legume milk

products. 9. Kenima [sic, kinema]. 10. Oncom (fermented

peanut press cake). 11. Waries. 12. Papadams. 13. Dhokla.

14. Khaman. 15. Idli. 16. Dawadawa. 17. Other legume-

fermented foods. 18. Future of legume-based fermented

foods. References. Nutritional composition is given.

Concerning Dawadawa: Made from the cotyledons of the seeds of the locust bean (*Parkia biglobosa*) it “is also known as ‘kpalugu’ by the Kusasis and Dagombas of northern Ghana, ‘iru’ in Nigeria, ‘kinda’ in Sierra Leone, and ‘netetou’ in Gambia.” It is a protein-rich, “strong-smelling product” that is used as a supplement in soups, stews, porridges, and dumplings. It can be stored without refrigeration for about a year in the tropics. It is eaten in all northern areas of the coastal nations of West Africa: Guinea, Sierra Leone, Liberia, Ivory Coast, Ghana, Togo, Benin, Nigeria, and Cameroun, and in the tier of countries above these including Bissau, Gambia, Senegal, Mali, Upper Volta, Niger, and Chad.

Note 1. Soybeans are not mentioned in connection with dawadawa.

Note 2. The source of the misinformation about “kenima” is Batra and Millner (1976). Address: 1-2. Virginia Polytechnic Inst. and State Univ., Blacksburg, Virginia; 3. Univ. of Arizona, Tucson; 4. Mahatma Phule Agricultural Univ., Rahuri, Maharashtra State, India.

6226. Reed, Gerald. ed. 1982. Prescott & Dunn’s industrial microbiology. 4th ed. Westport, Connecticut: AVI Publishing Co. xii + 884 p. Illust. Index. 23 cm.

• **Summary:** Chapter 12 (p. 492-538; 129 refs.), by H.L. Wang and C.W. Hesseltine, is titled "Oriental Fermented Foods." It discusses: Soy sauce, miso, tempeh, oncom, Hamanatto (known as tou-shih in China, tao-si in the Philippines, and tao-tjo in the East Indies [No! Tao-tjo is Indonesian-style miso]), sufu (also called Chinese cheese or bean cake), natto, idli, ang-kak, fermented fish products (incl. nuoc-mam), absence of mycotoxin in fermented foods, summary. Address: Vice president, Amber Labs, Milwaukee, Wisconsin.

6227. Rose, Anthony H. ed. 1982. Fermented foods. *Economic Microbiology* 7:1-337. (New York: Academic Press, Inc.).

• **Summary:** Includes: 1. History and scientific basic of microbial activity of fermented foods by Anthony H. Rose. 2. Indigenous fermented foods by Ko Swan Djien. 3. Soy sauce and miso by Brian J.B. Wood. Address: School of Biological Sciences, Univ. of Bath, Claverton Down, Bath, BA2 7AY England.

6228. Saono, Jenny K.D.; Baba, T.; Matsuyama, A. 1982. Problems to be assessed for further development of traditional food fermentation in Indonesia. In: S. Saono, F.G. Winarno, and D. Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 189-99. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [6 ref. Eng]

• **Summary:** Contents: Introduction. Tape. Brem wine. Brem cake. Palm wine and vinegar. Oncom. Tauco and kecap. Tempe bongkreng (which can cause fatal food poisoning). Concluding remarks.

Unconventional substrates for tempe, oncom, and kecap include winged beans, mungbeans, cowpeas, leucaena beans, faba beans, jack beans, sesban beans, and string beans. Address: Agricultural Products Processing Pilot Plant Project, JICA-FATEMETA, IPB, Bogor, Indonesia.

6229. Saono, S.; Winarno, F.G.; Karjadi, D. eds. 1982. *Traditional food fermentation as industrial resources in ASCA countries*. Jakarta, Indonesia: Indonesian Institute of Sciences (LIPI). xix + 259 p. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. No index. 28 cm.

• **Summary:** ASCA, the Association for Scientific Cooperation in Asia, was established in 1970. Each of the many interesting papers from this symposium that relates to soya is cited separately. Address: Indonesia.

6230. Sattilaro, Anthony J.; Monte, Tom. 1982. *Recalled by life*. Boston, Massachusetts: Houghton Mifflin Co. x + 223 p. No index. 22cm.

• **Summary:** "Four years ago, Dr. Sattilaro, President of the

Methodist Hospital in Philadelphia, was dying of cancer. Today, after changing his lifestyle [primarily by adopting a macrobiotic diet], prescribed by Michio Kushi, he is totally free of this disease. Before this book was published, his remarkable story appeared in *Life Magazine* and the *Saturday Evening Post*, and he has told his story on television." Address: M.D., Philadelphia.

6231. Sherman, Kay Lynne. comp. 1982. *The Findhorn family cookbook: A vegetarian cookbook which celebrates the wholeness of life*. Boulder, Colorado: Shambhala. Distributed in the U.S. by Random House. 152 p. Illust. Recipe index. 24 cm.

• **Summary:** Originally published in Findhorn, Scotland, by Findhorn Publications. Soy-related recipes include: Tofu whey soup (p. 23; the whey is from homemade tofu). Tofu teriyaki (p. 48). Tofu (marinated and baked, with peanut sauce, p. 65).

There is an entire chapter on tofu (p. 68-76). The method for making tofu is that developed by Jacques Cormier, using rather large equipment to make enough tofu for many people. "If you become intrigued with the art of making tofu, and would like to have more tofu recipes, as well as information about this centuries-old tradition, we highly recommend reading *The Book of Tofu* by William Shurtleff and Akiko Aoyagi (Autumn Press, 1975)." Recipes: Homemade tofu (with 29 photos showing each step in the process at Findhorn's tofu shop). Scrambled tofu (p. 111). On the unnumbered page after p. 75 is an illustration of a tofu forming box for home- or community-scale tofu. Address: Scotland.

6232. Shulman, Martha Rose. 1982. *Fast vegetarian feasts*. New York, NY: The Dial Press. 312 p. Illust. Index. 24 cm.

• **Summary:** This is a book of "delicious healthful meals in under 45 minutes. It is interested in protein complementarity with a low-fat diet. Soyfoods are used extensively. Wherever a heart symbol appears next to a recipe, it is acceptable for low-salt and low-fat dishes. The ingredients section (p. 13-18) discusses and defines soybeans ("the king of beans, as far as nutrients are concerned"), soy flakes, soy grits, miso, and tofu. "Tofu is my mainstay. It is a miracle food." Savorex, Marmite, and Vegex are three different brand names for the same product, a yeast extract that comes in the form of a dark viscous paste." Never cook soybeans in a pressure cooker. They tend to foam and clog the safety valve, which can cause an explosion.

Page 14 states: "Soy flakes: Soybeans that have been cooked, split, and dehydrated. Because they take only 30 minutes to cook and are as high in nutrients as soybeans, they are a perfect high-protein convenience food. Soy flakes can always be substituted in recipes for soybeans.

"Soy grits: Cracked soybeans. These are a nutritious addition to grain dishes (you can cook them along with the

grains), have a nutty texture and taste, and take only 40 minutes to cook—another good convenience food.”

Soy-related recipes include: Tofu mayonnaise (p. 57). Tofu cream sauce. Tofu béchamel (p. 58). Morning tofu spread or evening pudding (p. 59). Roasted soybeans [dry roasted soynuts] (p. 60). Tamari-bouillon broth (p. 62). Instant tamari-bouillon broth (p. 63). Simple miso soup (p. 68-69). Miso soup with buckwheat noodles (p. 70).

One chapter is titled “Grains, legumes, tofu, and vegetables” (p. 91). Easy hiziki [hijiki] and squash dinner with soba and soy (flakes and tamari, p. 101). Brown rice “risotto” with soy flakes. Eggplant stuffed with rice and soy “risotto” or risi e bisi (p. 110). Fried rice and soy grits with vegetables (p. 114). Spicy eggplant miso sauté with bulgur. Purple cabbage, tofu, onions, and winter squash with miso (p. 125-26). Cabbage leaves stuffed with kasha, with creamy tofu sauce (p. 130). Tofu cutlets (p. 131). Chilled tofu with dipping sauces (p. 132). Teriyaki sauce (p. 133). Tahini-tamari sauce. Miso toppings for tofu and grains (adapted from *The Book of Miso*, p. 134-35). Tofu vegetable curry (p. 136). Chinese-style tofu with vegetables and grains (p. 138-39). Tomato sauce with soy grits (p. 205). Tofu tomato sauce. Pasta with tofu cream sauce (p. 209). Pesto with miso (p. 217). Potato, tofu, and tomato tacos (p. 226). Tofu and poblano tacos (p. 228). Green tomato, corn, and tofu tacos (p. 230). Tofu mayonnaise (p. 237). Green tofu dressing (p. 238). Watercress, mushroom, and tofu salad (p. 252). Cottage cheese and tomato salad with miso dressing (p. 256). Tofu noodle kugel (p. 279).

Note: A revised 356-page edition was published in 1986. The author is now living in Paris (May 1985) and there is an added chapter of fish recipes. She has become “a more serious fish cook...” How can a vegetarian book contain a chapter of fish recipes? Address: Paris, France.

6233. Simonds, Nina. 1982. *Classic Chinese cuisine*. Boston, Massachusetts: Houghton Mifflin. xi + 353 p. Illust. Map. Index. 23 cm.

• **Summary:** This is a remarkable book by one who is part “of a new generation of American chefs and food writers.” The Pinyin system of romanization, which was of romanization, “which was officially adopted by the People’s Republic of China in 1979, has been used for most of the Chinese words in this book” (p. vi).

A map of China (facing page 1) shows the individual provinces and the four main culinary schools: northern, western, eastern, and southern—as explained on pages 1-4. Taiwan is considered part of the eastern school. The southern school is comprised of only two provinces: Guangdong (which includes the city of Guangzhou—formerly named Canton) and Guangxi.

Soyfoods are used and discussed liberally throughout this book. The section titled “Condiments, seasonings, and special ingredients” (p. 5-11) gives detailed discussions of

hoisin sauce, oyster sauce, soy sauce (the three grades are light, medium and heavy, with light having a delicate and slightly more subtle flavor than the other varieties), sweet bean sauce (and bean pastes including brown bean paste and yellow bean paste), fermented black beans (and black bean sauce).

The next section, “Selected fresh and pickled vegetables” (p. 11-14) has an entry for bean sprouts (the two main types are sprouted from mung beans {which are green} and soybeans {which are yellow}; soybean sprouts have a stronger flavor and require longer cooking).

Soy related recipes: Beef with noodles in a pot (with “2 cakes bean curd,” p. 76). Cold spicy noodles (with “2 cakes bean curd, about 3 inches square and 1 inch thick,” p. 80).

One chapter, titled “Soybeans and bean curd” (p. 113-29) begins with a charming introduction to “stinky bean curd” (fermented tofu). As evening fell after dinner, luscious scents and fragrances filled the air. Yet there was “a putrid smell that defied classification. What was that baffling, pungent odor, present in every part of the city.” After a bit of research she soon discovered that it came from “stinky bean curd (*chou dou fu*), a favorite snack of the Chinese.” Vendors of this unusual “delicacy ran rampant all over the city with their portable deep deep-fryers. My Chinese surrogate sister and brothers, who were great fans of the stuff, used to race outside, armed with empty bowls and chopsticks, at the sound of the stinky bean curd man’s call. (The smell usually preceded him by two blocks, giving everyone plenty of notice.)” It is “made by fermenting fresh bean curd squares in a brine with assorted spices and pickled vegetables.” The resulting cakes are deep-fried... until golden and eaten with soy sauce, vinegar, mashed garlic, or chili paste.”

The soybean is used to make various Chinese seasonings including soy sauce, hoisin sauce, sweet bean sauce or paste, and hot bean paste. Fresh green soybeans are cooked and served with soy sauce and sesame oil. Whole dry soybeans are fried and eaten as a snack.

“The nutritious properties of the soybean further explain why it is so popular with the health-conscious Chinese.”

Heating soybean milk gives “bean milk sheets (*fu pi*)” [yuba]. Also mentions “bean curd sticks (*fu zu*)” [dried yuba sticks], bean curd sheets (*bai ye*),” and “bean curd noodles (*gan si*).” In terms of consistency, the three basic types of bean curd are soft, medium, and hard (*dou fu gan*). “Bean curd is also fermented in rice wine and spices to make a popular seasoning (*dou fu ru*), which has a “slightly cheeselike flavor.”

Nina concludes the introduction: “As most nutritionists will agree, the soybean and its many by-products are the foods of the future.” Line drawings show: soybeans, bean curd, bean milk sheets, bean curd sheets, bean curd sticks, and bean curd noodles. Recipes in this soy chapter: Meatball and soybean casserole (with “4 cups dry soybeans, p. 116). Sweet soybean milk (How to make at home; the Chinese

equivalent of America's cup of coffee for breakfast, with 2 cups dry soybeans and 1 cup sugar. Typically accompanied by a sesame flat bread {*shao bing*} and a fried cruller {*you tiao*}. Stir-fried soybean sprouts with red-in-snow. Stuffed bean curd rolls (with "8 dried bean curd sheets or bean milk sheets"). Sweet-and-sour fish slices (with "10 dried bean milk sheets"). Eggplant rolls (with "6 dried bean milk sheets"). Buddha's delight (a well-known vegetarian dish, with "2 ounces bean curd sticks"). Cold tossed bean curd and celery shreds (from Sichuan, with "8 cakes bean curd, about 3 inches square and 1 inch thick"). Red-cooked bean curd. Braised bean curd with black mushrooms in oyster sauce (from Sichuan). Stuffed bean curd (from Canton). Ma po bean curd (from Sichuan). Eight-treasure stir-fried vegetables with meat (with "3 cakes bean curd, about 3 inches square and 1 inch thick"). Northern-style bean curd (p. 129).

More soy related recipes: Steamed fish fillets in black bean sauce (with "1 tablespoon fermented black beans, rinsed, drained, and minced," p. 183). Double-cooked pork slices (with "3 cakes bean curd," p. 230). Steamed spareribs in black bean sauce (with "2 tablespoons fermented black beans, rinsed, drained, and coarsely chopped," p. 234). Stuffed peppers in black bean sauce (with "1 tablespoon fermented black beans, rinsed, drained, and minced," p. 272).

One entire chapter is titled "Vegetarian dishes" (p. 279-94). The introduction discusses the Kuantu Temple (a Buddhist-Taoist sanctuary about 1 hour drive from Taipei), and the origin of vegetarian cuisine in China in early Buddhist and Taoist monastery kitchens. Wheat gluten (*mian jin*) and related preparations such as deep-fried wheat gluten balls (*mian jin pao*) steamed wheat gluten chunks (*kao fu*), plus seasonings such as "pickled bean curd (*dou fu ru*)" are often used. Soy related: Broccoli in mock crabmeat sauce (with "1 cake bean curd," p. 285). Vegetarian lion's head (with "4 cakes bean curd," p. 287). Mock goose (with "20 bean milk sheets" [yuba], p. 290-91). Vegetarian eight treasures (with "2 cakes bean curd," p. 291). Wheat gluten (how to make at home from wheat flour, p. 292).

More soy related: Eight-treasure mixed soup pot (with 2 cakes bean curd," p. 310-11). Hot and sour soup (with "2 cakes bean curd," p. 316).

About the author: A photo of Nina Simonds (in Chinese clothing) appears on the inside rear dust jacket. She studied Chinese food and cooking, language and culture, in Taiwan for more than three years (she arrived there at age 19) with Chinese master chefs at the Wei-Chuan school in Taipei, while living with a Chinese family. She subsequently received the Grand Diplôme from La Varenne École de Cuisine in Paris, where she also taught Chinese cooking. "For the past eight years (prior to 1982) she has taught in cooking schools all over the United States and Canada and her articles have appeared in *Gourmet* and *Cuisine* magazines and the *Boston Globe*" (from the inside rear dust jacket). Address: Salem, Massachusetts.

6234. Steinkraus, Keith H. 1982. The indigenous fermented foods. *Nestle Research News* 1980/81. p. 23-28. [19 ref]
• Summary: Contents: Introduction. Classification of indigenous food fermentations. Modern methods of introducing meat textures into vegetable substrates. Indigenous methods for introducing meat-like textures into vegetable substrates. Fermented foods involving development of meat-like flavor. Fermented foods involving an acid fermentation. Fermented foods involving an alcoholic fermentation. Germination (malting). Production of sweet/sour alcoholic pastes from high starch substrates. Leavened bread without the use of wheat. References. Contains many interesting color photos of indigenous fermented foods, some of them soy-based. Address: Prof. of Microbiology and Food Science, Inst. of Food Science, Cornell Univ., Geneva/Ithaca, New York.

Karjadi, eds. 1982. *Traditional Food Fermentation as Industrial Resources in ASCA Countries*. xvii + 259 p. See p. 3-16. Proceedings of a technical seminar, held 9-11 Feb. 1981 at Medan, Indonesia. [30 ref]
• Summary: Contents: Introduction. Production of meat-like flavours from vegetable proteins. Soysauce (Japanese Shoyu) and miso fermentation. Fish/shrimp sauces and pastes. The koji principle. Meat substitutes (analogues). Indonesian tempe kedele: Traditional tempe fermentation, industrial production of tempe. A process for raising the protein content of high starch substrate. Leavened bread-like foods without the use of wheat or rye. Coconut protein as an industrial resource. Summary. Address: Prof. of Microbiology, Inst. of Food Science, Cornell Univ., Geneva, New York 14456.

6237. Stobart, Tom. 1982. Herbs, spices, and flavorings. Woodstock, New York: The Overlook Press. 320 + 8 p. of plates. Illust. (some color). Index. 24 cm.
• Summary: This 1982 edition—though about 60 pages longer than the 1970 edition (which see)—is identical to it in all entries related to soy, except that the entries are on different pages.

About the author: "Tom Stobart, O.B.E. [officer of

the Order of the British Empire], is not only an expert on cookery, but is also a well-known photographer and mountaineer. As a member of the successful Hunt-Hillary expedition in 1953, he filmed *The Conquest of Everest*,... Recently he has directed and photographed the *Master Chefs*, a series of films showing famous dishes being prepared in their local settings.” He has traveled widely. Address: England.

6238. Takara Shuzo K.K. 1982. Shirozake no dentôteki seizô-hô [Re: Traditional method of making shirozake]. Letter to William Shurtleff at Soyfoods Center. 3 p. Handwritten. [Jap]

• **Summary:** Company name with diacritics is: Takara Shûzo K.K. Address: Japan.

6239. Tropp, Barbara. 1982. The modern art of Chinese cooking. New York, NY: William Morrow and Co. 623 p. Illust. Index. 23 cm.

• **Summary:** One of the best and most authoritative books on Chinese food written by a Westerner, who is a Chinese scholar turned Chinese cook, and who lives in San Francisco. Contains an excellent, long “Glossary of Ingredients” (p. 529-81) with extensive information about Chinese foods (plus their names spelled phonetically in Mandarin and Cantonese) including: Hoisin sauce (Mandarin: hai-hsien-jyang; Cantonese: hoi-seem-jyenug. The characters mean “sea-freshness sauce.” She uses a widely distributed brand, Koon Chun, that is jam-like in consistency and on the sweet side). Mock meat (Mandarin: myen-jin; Cantonese: ming-gun. incl. Companion brand Braised Dried Bean Curd, Curried Braised Gluten, Curry Vegetarian Mock Duck, and Longevity brand Curried Mock Abalone). MSG (“Originally made from dried fermented wheat gluten”). Salted black beans (Mandarin: doe-jrr; Cantonese: dao-see; fermented black soybeans. This “popular Chinese seasoning is also known as Chinese black beans, salted beans, fermented black beans, and occasionally ginger black beans.” “Shreds of ginger or orange peel or a dash of five-spice powder occasionally added to season the beans in the final soaking stage.” Barbara prefers salted black beans that are seasoned with ginger and she avoids the kind seasoned with five-spice powder. She uses Mee Chun brand and does *not* wash salted black beans, as is common; it is a practice she has never understood).

A recipe for Hot and sour Hunan chicken (p. 142-43), in the ingredients section titled “Aromatics,” calls for “2 tablespoons Chinese salted black beans (page 561).”

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term “Chinese salted black beans” or the term “ginger black beans” to refer to fermented black soybeans. This term former is also used in recipes for Garlic-stewed sparerib nuggets (p. 203) and Hunan eggplant with spicy meat sauce (p. 293).

Soyfoods: Introduction, soy sauce (Kikkoman soy sauce {Barbara’s everyday favorite}, thin soy sauce, black soy sauce, mushroom soy sauce; good Chinese brands are Superior and Koon Chun). Tofu (fermented tofu {incl. Pepper Bean Cake with hot chili flakes—[*la jiao doufu-ru*]}, fresh tofu, pressed tofu.

“Mushroom soy sauce is a flavored soy sauce, something between thin soy sauce and black soy sauce in saltiness. The brand I like best is Pearl River Bridge, which is made specifically with straw mushrooms and is classified in Chinese as black soy sauce owing to a touch of sugar that is included in the mixture,” p. 569).

Note: This is the earliest document seen (June 2011) that uses the term “ginger black beans” to refer to fermented black soybeans (*douchi*).

Ms. Tropp (see photo on inside rear dust jacket) studied Chinese language, poetry, and art history at Columbia University, Yale, Princeton, and the University of Taiwan. Her two-year sojourn in Taiwan found her living with remarkable Chinese families. On the rear cover is a nice long quotation from James Beard.

• **Summary:** Contents: Introduction. Japanese shoyu: Koikuchi, usukuchi, tamari, shiro, saishikomi, fish-soy, JAS grades. The soysauce produced in other Oriental countries (Korea, Taiwan, Singapore, southern China; Inyu, tamari-style). Miso. Manufacture: Koikuchi shoyu (treatment of raw materials, koji making, mash making

and aging, pressing of the mash, refining), tamari shoyu, miso. Some recent research and technological progress in shoyu and miso manufacturing: Whole and defatted soybeans as raw materials, treatment of raw materials, koji molds, koji making, control of mash, refining (pressing of the mash, pasteurization), product (colour, flavour, flavour components).

Tables: (1) Annual production of 5 different kinds of shoyu in Japan, and total, 1979. (2) Typical composition of 6 different kinds of shoyu (analyzed by Kikkoman Shoyu Co., Ltd., 1978). For each gives: Be (Baume), NaCl, total nitrogen, formol nitrogen, reducing sugars, alcohol %, and pH. (3) Composition of 7 types of typical Japanese miso (Ebine, 1980). (4) NK cooking method of soybeans as compared to the conventional method (Tateno and Umeda, 1955). (5) Chemical analyses of shoyu fermented from soybeans denatured by methanol and by conventional cooking (Yamaguchi, 1954). (6) Analysis of liquid part of shoyu mash after 40 days prepared from defatted soybean meal denatured by ethanol, isopropanol, or NK cooking (Fukushima and Mogi, 1955, 1957). (7) Effect of cooking conditions of soybeans on the enzymatic digestibility of protein (Yokotsuka et al., 1966). (8) Cooling speed and digestibility of protein. (9) Fraction of proteases produced by *Aspergillus sojae* through Sephadex G-100 (Nakadai, 1977). (10) Changes of viable counts of yeast in shoyu mash (Mogi Keitaro et al., 1968).

Figures: (1) Flow sheet—Koikuchi shoyu fermentation. (2) Flow sheet—Miso fermentation. (3) Cross-sectional illustration—Continuous soybean cooker: Screw type and net conveyor type. (4) Temperature change of materials during koji cultivation by the conventional method using wooden trays (Shibuya, 1969). (5) Koji cultivation at 25°C (Haga et al., 1967). (6) Preferable temperature change of the materials during 3-day koji cultivation (Haga et al., 1967). (7) Temperature change of the materials during mechanical koji cultivation with a through-flow system of aeration during 3 days (Shibuya, 1969). (8) Temperature change of the materials during mechanical koji cultivation with a through-flow system of aeration during 4 days (Shibuya, 1969). (9) Koji culturing machines with a through-flow system of aeration: Rectangular type, circular type (batch), circular type (continuous). Address: Kikkoman Corp., Noda-shi, Chiba-ken, Japan.

6243. Chico-San, Inc. 1982? From yesterday comes today's tamari... or, shoyu, shoyu, who's got the shoyu. Chico, California. 10 p. Undated.

• **Summary:** About San-J tamari. Address: Chico, California 95927.

6244. Crosse, Victor M. 1982? The history of Crosse & Blackwell. Croydon, Surrey: C&B. 3 p. Undated.

• **Summary:** This typescript was sent by R.H. Starling on

26 Jan. 1982 with a cover letter responding briefly to five questions from William Shurtleff concerning the history of the company's work with soy products. The first 3 questions were: 1. When did Crosse & Blackwell (C&B) first import soy sauce to England? 2. From which country was that first soy sauce imported? 3. Was C&B the largest importer or was the East India Company?

"Crosse & Blackwell pioneered the importation of products from the Indies and the East, and pickles and spices have long formed an important part of our business. Unfortunately we are unable to answer the questions in your letter as many of our early records were destroyed during World War II."

Crosse & Blackwell traces its origins back to 1706, at No. 11 King Street, Soho, now known as Shaftesbury Avenue. "In that year, on the site of the old Shaftesbury Theatre, a firm by the name of West and Wyatt started trading as 'oilmen' and during the century which followed became renowned for the quality of the pickles, sauces and condiments which they sold mainly to the nobility and gentry of those times."

In 1819 two young boys (who had never met) arrived at the company to serve as apprentices: Edmund Cross and Thomas Blackwell. In 1829 the two boys, who had become great friends, decided (upon the owner's retirement) to take over the business, which they purchased in Jan. 1830. The factory and shop were located at 11 King Street.

The first order from abroad came from India in 1840. Soon the company was making a vast assortment of canned foods. Address: Crosse & Blackwell Ltd., St. George's House, Croydon, Surrey CR9 1NR England. Phone: 01-686-3333.

6245. **Product Name:** Soy Pate.

Manufacturer's Name: Earth Angel Soyfoods.

Manufacturer's Address: 53 Stanley Ave., Mt. Waverley (E. Oakleigh), VIC 3149, Australia. Phone: 544-8020.

Date of Introduction: 1982?

Ingredients: Okara, soymilk, brewer's yeast, tamari, oil, herbs and spices.

Wt/Vol., Packaging, Price: 250 gm.

How Stored: Refrigerated.

New Product—Documentation: Label. 3.5 inches diameter. Paper. Green on white. Illustration of winged pixie between two groups of leaves. "Great on sandwiches, toast, or appetizers. No additives or preservatives. No additives or preservatives. Keep refrigerated."

6246. Fountain, M.S. 1982? Multimarket positioning of natural tamari (Leaflet). Colonial Heights, Virginia. 1 p. Single sided. 28 cm. No. 14. Undated.

Address: San-J International, 3236 Boulevard, Colonial Heights, Virginia 23834.

6247. **Product Name:** Avo-Seitan Sandwich.

Manufacturer's Name: Grain Dance.

Manufacturer's Address: San Francisco, California.

Date of Introduction: 1982?

Ingredients: Incl. whole wheat bread, seitan (Organic hard red winter whole wheat, spring water, tamari [actually shoyu], ginger, and onions), avocados.

New Product–Documentation: Talk with Paul Duchesne of Fairfax, California. 1991. Nov. 19. Ron Harris of Grain Dance definitely made an avocado and seitan sandwich. While Paul's Cauldron Express (started in Jan. 1982) was distributing Ron's seitan, Ron was distributing his own avo-seitan sandwich. Michael Pierce designed the label. The product was on the market for at least a few months. Paul was a bit annoyed that Ron would not let him distribute the sandwiches. For a while, Ron also made delicious Hammentaschers (filled with poppy seeds) and watermelon juice (in the summer). He made these products in order to try to help pay the rent on his space in the Haight-Ashbury district of San Francisco. Those were the only products of which Paul was aware.

6248. Kennedy, J. Robert. 1983. History of Chico-San and macrobiotics in America (Interview). Conducted by William Shurtleff of Soyfoods Center, Jan. 6. 2 p. transcript.

• **Summary:** Rice cake production started in Canada.

The following are not that important: (1) The conflict over Erewhon buying organic brown rice from the Lundbergs. (2) Erewhon taking away Chico-San's New York market (Bob didn't even know this). (3) Lawsuit (that never went to court) between Chico-San and Lundberg.

The initial contract with the Lundbergs to grow brown rice exclusively for Chico-San was risky for Chico-San; they agreed to pay higher prices if the yield was low. Michio and Paul Hawken tried to get the Lundbergs to break the contract. Bob does not know who went to who. Did the Lundbergs go to Erewhon or vice versa? Why did this happen? Problems arose in the third year of the contract. The first year, the Lundbergs grew only 67-70 acres of brown rice, which Chico-San sold by the end of January. The second year, Chico-San also sold all the rice that the Lundbergs grew. The third year was the fire at Chico-San, and Chico-San was unable to sell all the rice they had agreed to sell. Michio came to California with Aveline and they tried to talk the Lundbergs into selling some organic brown rice to Erewhon. But there was no conflict. Michio used to phone Bob Kennedy at nights in those days asking if Erewhon could buy organic brown rice at no profit to Chico-San. Bob said "no." That is not a conflict, and there were no bad feelings.

There was no lawsuit between the Lundbergs and Chico-San—just some litigation prior to what could have been a lawsuit, concerning the third year and the fire. Chico-San was out of business for almost a year because of that fire, and could not sell all the rice they had contracted to sell that

year. The litigation led to changes in the original contract: (1) Chico-San could and would pay for the rice over an extended schedule. (2) The Lundbergs could sell the organic brown rice to other customers.

Why is Chico-San a loner in the natural food industry? They are a manufacturer and importer which uses other distributors; they do not generally distribute themselves—unlike Erewhon. However now they have some big trucks, used to distribute their own products in the San Francisco Bay Area.

Erewhon was able to take away Chico-San's New York market because Erewhon was price cutting; Kennedy refused to cut prices. Also, Erewhon sold direct to some markets, delivering their own products in their own trucks—unlike Chico-San which generally used other distributors. Many other companies besides Erewhon did this too. Most of those companies are gone now, but Chico-San remains!

Whenever Paul Hawken would talk to Bob Kennedy he always seemed to have a chip on his shoulder [a sort of grievance].

Initially Chico-San had an exclusive agreement with Ohsawa. Chico-San broke that in deference to Michio when Aveline set up Erewhon. This is a big, important point that should not be forgotten.

Ohsawa's first lectures in the USA, in early 1960, were at the Buddhist Academy in New York City.

There were two main reasons the group that formed Chico-San left New York and traveled to California: Rice (most important) and nuclear safety. Ohsawa strongly supported the group's efforts. Ohsawa tried to set up Japanese companies to supply Chico-San, but it was difficult. Then Muso Shokuhin [Muso Foods], in Osaka, came into the picture, and Chico-San started to order from them. Then they went back to ordering from Tokyo. There were some problems between the export companies in Tokyo and Osaka. Ohsawa Japan was the export company and Nippon CI was the educational arm.

The amount of miso and shoyu that Chico-San sells today is proprietary [confidential] information. Chico-San is now in serious talks with some manufacturers in Japan.

Chico-San started to make rice syrup in 1972. Bob traveled to Japan twice, visited some *amé* [rice syrup] makers, and got information on quantities, temperatures, etc. It's a fermentation process.

Chico-San expects to have a new rice cake plant in New Jersey in operation by December 1981. The plant will make only rice cakes but Chico-San will store

warehouse some of its Japanese foods in the plant. The next plant after that will be in Canada, then one in Europe after that. If these are successful, Chico-San will add distribution of Japanese products. They will sell both organic brown rice (from the Lundbergs and from Arkansas) and non-organic commercial brown rice—each clearly labeled.

What are Chico-Sans plans concerning miso and shoyu?

In collaboration with Ohsawa Japan, two Japanese makers of miso and shoyu are very interested in coming to the U.S. and helping Chico-San to set up a plant in the U.S. They would provide technical assistance and be part shareholders / investors. Junsei Yamazaki plans to return to the Chico area, possibly this spring. He studied fermentology, so he may be the process overseer.

In 1961 Chico-San received its first imports from Japan, from Tokyo, from George Ohsawa himself. Previously Herman Aihara in New York had ordered these imports from George Ohsawa. He had received 2-3 shipments before Chico-San was incorporated. George Ohsawa encouraged Muso to get started. Three companies tried to get started and folded before Muso took root. Bob will try to find the details (date and products) of Chico-San's first shipment from Muso. Bob also has George Ohsawa's early correspondence.

Bob would like to read the final draft of Shurtleff's History of Macrobiotics. Peter Milbury will look at it too. Address: Chico, California.

6249. Sheraton, Mimi. 1983. Restaurants: Japanese fare for theater nights. *New York Times*. Jan. 14. p. C18.

• **Summary:** This is a review of Sushiko, a Japanese restaurant at 231 West 55th St., between Broadway and Eighth Ave. in New York City. They sell: "fried half-eggplant mellowed with miso sauce, topped with sesame seeds; soybean cakes [tofu] in seaweed soup with vegetables; oshitashi [o-shitashi, o-hitashi], a salad of marinated spinach with soy sauce and crunchy flakes of dried bonito, and natto, winy, fermented soybeans in an egg and scallion sauce."

And "zaru soba, cold buckwheat noodles with soy sauce, horseradish and scallions were refreshing." "Broiled fish, meats and poultry, done teriyaki-style are stringy and less interesting..."

6250. Gevaert, Pierre. 1983. Re: Making miso, tofu, and soy sauce in Europe. Questions answered on Soyfoods Center letterhead (dated 26 Jan. 1983) and returned to SC. 1 p.

• **Summary:** Q1. Are you now making soy sauce (shoyu or tamari) in both Belgium and France? Please give the address and phone numbers of each plant where you are making soy sauce. When did you start making soy sauce in France?

Answer 1. We will finally start making shoyu in April 1982, only in France. At Lima-Andiran, 47170 Mezin, France. Tel. 5365 1002. Lima is presently making miso at their plant in Mezin.

Q2. Do you make miso at your plant at Sint-Martens-Latem? Answer 2. No.

Q3. Are you making tofu, yourselves, anywhere in Europe or is it made for you by other companies? Answer 3. Jonathan at Antwerp, Belgium, makes it for us using our organic soybeans.

Q4. Can you tell me (if it is not a secret) roughly how much of the following in metric tons you produced in 1982?

Answer 4. Soy sauce 0. Miso 5 tons. Tofu 2/3 tons. Address: Lima Foods, Edgar Gevaertdreef 10, Sint-Martens-Latem 9830, Belgium. Phone: 09-52-4176.

6251. Arasaki, Seibin; Arasaki, Teruko. 1983. Vegetables from the sea: Low calorie, high nutrition, to help you look and feel better. Tokyo: Japan Publications. 196 p. Illust. (color plates and line drawings). Index. Jan. 26 cm. [Eng]
• **Summary:** This is probably the best English-language book written about sea vegetables. Contents: Preface. Part I: General information. Introduction. 1. In the human diet: In general, in Japan. 2. Dietary and medical applications: Chemical composition (polysaccharides, proteins, amino acids and peptides, fats and lipids, vitamins, minerals, nutritional value, pigments), flavor and taste (specific Japanese seaweeds as foods), medical applications (antilipemic and blood-cholesterol reducing substances, blood anticoagulants, antitumoral {anti-cancer} effects, antibiotics, toxic compounds, medical uses of alginate), folk medicine, thalassotherapy and algotherapy, longevity. 3. Biology of the algae: Differences, pigment systems, photosynthetic products and storage substances, land and marine vegetation, life-spans and seasonality, generation alterations. 4. Harvesting and farming: General (Monostroma and Enteromorpha), brown algae (Laminariales and Undaria, artificial cultivation), red algae (Porphyra, Eucheuma and Gelidium), freshwater algae. 5. Processing and preserving: General, amanori and aonori, green algae (*Caulerpa*, sea grapes), brown algae (wakame, kombu, arame and hijiki, mozuku), red algae, nostoc freshwater algae, domestic algae. 6. Illustrations of major sea vegetables.

Part II: Cooking with sea vegetables. Kombu (*Laminaria*). Wakame (*Undaria pinnatifida*) and Matsumo (*Anelipus japonicus*). Hijiki (*Hizikia fusiforme*). Arame (*Eisenia bicyclis*). Asakusa nori (*Porphyra tenera*). Tosakanori (*Meristotheca papulosa*). Kanten (*Agar*). Green laver (*Enteromorpha*).

Index of scientific names of sea vegetables. Index of Japanese names of sea vegetables. List of recipes. Address: 1. Prof. and lecturer on Fisheries Botany and Marine Ecology, Univ. of Tokyo and Nihon Univ., Japan; 2. Prof. Kobe-Yamate Women's College, Lab. of Biochemistry.

6252. **Product Name:** Yamaki Organic Miso [Hatcho, Mugi, or Genmai], and Yamaki Organic Soy Sauce.

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 810, Chico, CA 95927.

Date of Introduction: 1983. January.

New Product-Documentation: Crackerbarrel. 1983. Jan. No. 1. p. 1. "Our new line of organic imports. Long awaited soy sauce and miso from organically grown ingredients introduced... The Yamaki Co. [Yamaki Jôzo], owned by Tomio Kitani, contracts directly with family farmers for his

organically grown grains. Yamaki miso is unpasteurized. The organic soy sauce has 16.9% salt.”

Note: The Yamaki Co. is located in Kamiizumi-mura, about 75 miles from Tokyo, Japan.

6253. Kennedy, Robert. 1983. A message from our president [History of Chico-San]. *Crackerbarrel (Chico, California)* 1(1):2. Jan.

• **Summary:** This article, which gives a brief history of Chico-San, Inc., is in the first issue of a new Chico-San newsletter.

“There is a lot of excitement at Chico-San these days. Twenty years have passed since we opened in a little basement room to grind sesame seeds by hand for gomasio [gomashio], and repack bulk shipments of miso and shoyu (then called tamari) from our suppliers in Japan. From that meager beginning, Chico-San has become a leader in many areas of food manufacturing and distribution and has gained annual sales substantially in the millions.

“We are grateful for our achievements and we are proud that the complement of Chico-San employees had the loyalty, talent, tenacity and integrity that it took to bring us to this satisfying twenty-year plateau, I refer to this as a plateau because we are now reorganizing our efforts to put more emphasis on our Japanese imports. These are quality foods, called for in George Ohsawa’s macrobiotic dietary precepts, that are not yet manufactured in this country.

“It was in 1959 that George Ohsawa with Lima Ohsawa first introduced his philosophy of the Far-East and his concepts of diet to the U.S. public. It was in New York City where hundreds of people attended his ‘dinner lectures.’ The food was orchestrated by Lima while George took care of the philosophy and other pertinent subjects.

“It was from these lectures that 32 people collected under the umbrella of Ohsawa’s teachings and moved to Chico, California where they could work together to pass along what they were learning.

“Some of the names—Herman & Cornelia Aihara, Alvin & Nina Bauman. Dick & Penny Smith, Bill & Dorothy Salant, Teal Ames, me and my wife, Betty.

“As we camped on the way from New York to Chico, we had nightly campfire meetings during which time we defined and prioritized our purpose for moving. Everyone agreed that first on our list of priorities would be to set up a food company that would provide the best available products necessary to the macrobiotic dietary instructions of Ohsawa. All of us were working on various degrees of health problems and we knew that our physical and mental betterment would parallel the quality of the food we ate. It was our resolve then that Chico-San, Inc., our new company name, would carry only the best foods available. This has been our policy and it is our responsibility to people who seriously relate good health to good food.

“Chico-San was incorporated in March 1962, and after

Chico-San had been in business a few months the health food industry began seeing food products with foreign-sounding names on its shelves—names such as Tamari—Miso—Kombu—Hijiki—Kuzu—etc. All products first introduced by Chico-San. Later on Chico-San introduced the first organically grown rice to the health food industry, while our rice cakes became one of the industry’s most popular sales items.

“In 1972 Chico-San was consumed by fire of such severe consequences that we were put out of business for almost a year. When we did return it was necessary for us to concentrate on our most popular items. These were items that we manufactured—rice cakes—rice syrup—candies made of rice syrup—these products would give us our best chance to regain solvency because they offered better profit margins.

“We continued to carry the Japanese products because it was our responsibility to those that had come to depend on Chico-San for quality, however by this time there were several companies [including Erewhon] competing for the sale of the Japanese products. Through their price cutting policies a market was created that was not profitable, consequently they had to lower their costs by buying products from dubious sources. Many such companies have since gone bankrupt.

“Twenty years ago when Ohsawa’s macrobiotic diet was new to America it was taken with scepticism but now that there have been many dramatic cures accorded to it, its popularity is gaining by great strides. This makes Chico-San’s responsibility greater than it has ever been because more and more people are being attracted to the Ohsawa regimen.

“Since Chico-San started it has always been the Ohsawas, both Lima and George, who have given Chico-San its quality control regarding the Japanese imports. We have only carried products recommended to us by them and chosen by them for their own use. Since Mr. Ohsawa’s death several years ago Mrs. Ohsawa was given the recognition by people world-wide for being the most knowledgeable person in regard to her husband’s work.

“Chico-San uses Ohsawa Japan, Inc. in Tokyo as its only supplier for its imports, This is a company started by George Ohsawa and now run by Lima Ohsawa’s sister, Flora Tanaka. The very strict supervision of the company and the uncompromising attitude of its employees comes from years of collective study under Ohsawa.

“Jun Makino, a representative to Chico-San, Inc. from Ohsawa Japan, Inc. in Tokyo, has recently joined us in Chico. He is now busily engaged in translating hordes of material being sent to us from Ohsawa Japan. pertaining to macrobiotic foods and how they have traditionally been used.

“This additional information will appear in our newsletters; it will also be included in our pamphlets and catalog as space and time permit.

“Jun will be in charge of our Japanese imports and will

also take over our mail order department.

“Peter Milbury is back with us to help with our expanded efforts. Peter is our operations director, a job designed to assist me as president in the performance of executive duties,

“We have added several others to our complement, so that we can increase our effectiveness as a macrobiotic foods supplier. We’ll introduce them to you in future issues of the newsletter because we would like you to get to know the people that supply your food.

“Our excitement on our 20th anniversary is genuine as we confirm our dedication of 20 years ago. to bring you the best quality available.”

Also includes articles on imports from Japan and winter recipes using miso and soy sauce. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

6254. **Product Name:** Kikkoman Fried Rice Seasoning Mix, Sweet & Sour Sauce Mix, Chow Mein Seasoning Mix, Teriyaki Sauce Mix, or Marinade Mix for Meat.

Manufacturer’s Name: Kikkoman Foods, Inc.

Manufacturer’s Address: Kikkoman International, Inc. San Francisco, California.

Date of Introduction: 1983. January.

Ingredients: Fried Rice Mix: Powdered soy sauce (wheat, soybeans, salt, dextrin), malto-dextrin, wheat starch, torula yeast, dehydrated onion, sugar, hydrolyzed vegetable protein, monosodium glutamate, dehydrated garlic, salt, spices, caramel color, chicken fat (with BHA and citric acid added to help protect flavor), lactose, malic acid, disodium inosinate, disodium guanylate, acetic acid and citric acid.

Wt/Vol., Packaging, Price: 1- to 2.125 oz foil pouch. Retail for \$0.45.

How Stored: Shelf stable.

New Product–Documentation: Products with Labels purchased at Monty’s Food Store in Lafayette, California. 1984. March 16. 4.25 by 5.75 inches. Paper packet. Black, burgundy, brown, yellow, green. On each mix is a color photo of the prepared dish in a lacquered bowl, on a grass mat with chopsticks. “The Kikkoman Touch” is the slogan for the large display. Most products in this line contain ingredients such as MSG, caramel color, disodium inosinate, disodium guanylate, and sugar.

Talk with Mr. Hattori of Kikkoman. 1984. March 27. An earlier version of this product line was launched about 8 years ago. About 18 months ago the original line sold out and the new line was launched in early 1983. Three of the original products were discontinued and three new ones took their place. The package design is new.

6255. Leviton, Richard. 1983. Mochi, amazake and seitan: Introducing three new foods from the Orient. *Vegetarian Times*. Jan. p. 32, 34-35, 37. [2 ref]

• **Summary:** This article begins with a description of each

of these foods, when and where the author was introduced to each, how he enjoyed them and why he thinks they will become part of American vegetarian cuisine.

The first section is titled “Mochi: The pounded rice that puffs.” “Since 1979, Grainaissance, a Berkeley, California company, has been working to popularize mochi, manufacturing over 3000 pounds a week in five flavors and shipping it around the country. Grainaissance proprietor Tony Plotkin began experimenting with mochimaking in 1978 when he produced about sixty pounds a week and sold it through the Rising Sun store [in San Francisco] where he worked. Delighted with the product and sensing its commercial appeal, Tony and his partner, Yuki Aihara [sic, Muramoto] enlarged production in November, 1979, and started deliveries to about a dozen Bay Area stores. At that time mugwort mochi was the most popular... but today Tony’s best sellers are plain, raisin and sesame garlic. Other flavors marketed have included alfalfa and carob-date, and Indian Spice...” Mochi is often seasoned with shoyu. A recipe recommended by Akiko Shurtleff and developed at Tassajara is given; it uses butter, shoyu, honey, and grated ginger root.

The second section, titled “Amazake: The fermented rice you drink” states: “In America, amazake is now produced by at least four companies that sell to natural foods stores. These include Grainaissance in Berkeley, California, and The Bridge in Middletown, Connecticut. Jordan Stearn, The Bridge’s master of grains, who ferments about 70 quarts of amazake weekly, comments, ‘Seitan and amazake are our version of meat and sugar.’” The Bridge was the only company in America making all three of these foods: mochi, amazake, and seitan.

The third section is titled “Seitan: The vegetarian meat from wheat.” “The early history of seitan is shrouded in vagueness, but it is believed that itinerant Chinese Buddhist monks used seitan... Seitan... is actually not an authentic part of Japanese culinary tradition nor is ‘seitan’ a Japanese word, according to Bill Shurtleff. Seitan, rather, as modified *fu*, is the invention of the macrobiotic community. Whatever its origins, seitan has found a new home in the U.S. and for Winston and Joan Donovan it has proved to be both a life-sustaining and livelihood providing wholesome food.

“The Donovans launched their Upcountry Seitan business from their Worthington, Massachusetts, farmhouse in January 1982, largely because Winston had been diagnosed as having an incurable kidney disease which even dialysis couldn’t halt. After a consultation at Boston’s East/West Center, he adopted a macrobiotic diet featuring seitan and, in the past year, has regained his health and resolved his kidney ailment. For Winston, who drastically changed his diet in his forties, seitan’s chief attraction is that it resembles meat enough in taste and texture to satisfy most longings for beef and veal. The entire family is now vegetarian.” Describes how the Donovans use high-gluten hard red spring

wheat to make 300 lb of seitan strips each 6-day week in their tidy 400 square foot shop. After kneading with water, the elastic gluten is called *kofu*. A separate product, named “Tan-pops” were sold several years ago in Boston. They were large fist-sized chunks of seitan, breaded in cornmeal, deep-fried, and sold unwrapped in wicker baskets by the check-out counters of a few natural foods stores in Boston. Photo show: (1) Pieces of deep-fried seitan served on a dish. (2) Winston and Joan Donovan in their seitan shop with their products. (3) Slices of seitan in a frying pan. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6256. Mountain Ark Trading Company. 1983. Catalog—Jan. 1983 [Mail order]. 109 South East St., Fayetteville, AR 72701. 30 p. 27 cm.

• **Summary:** This is a mail order catalog for macrobiotic whole foods, specialty cookware, cookbooks and books on natural healing, futons, furniture, etc. A detailed description of each product is given. The owners of the company are Frank & Phyllis Head, Tom & Toby Monte, Bill & Carol Tims, and Joel & Wendy Wollner.

Concerning seitan and *fu*, we read (p. 34): “Seitan ‘Wheat Meat’ Condiment—Chewy chunks of wheat gluten simmered in a savory broth of shoyu and ginger. Rich, meaty flavor. A very concentrated food: 100% wheat protein. Ready to eat or add to a favorite recipe. How about Seitan and Tofu Stew! Sweet and Sour Seitan! Seitan in Split Pea Soup! \$2.95 per 3.5 oz. jar (not incl. shipping cost). Note: This seitan was made in Japan.

“‘Fu’ Wheat Gluten—Steamed and dried cakes of nutritious wheat gluten, extremely light, simple to serve and easy to digest. Fu’s light chewy texture and subtle wheat flavor adds new life to your cooking—and, with the greatest of ease. Soak briefly and add to your favorite recipe. Goes well with all foods. Soups. Stews. Beans. Vegetables. Sifted wheat fu rings \$1.25 per pkg. of 12. Sifted wheat fu sheets \$1.85 per pkg. of 5. Whole wheat fu rings \$1.75 per pkg. of 12.” Address: Fayetteville, Arkansas. Phone: 501-442-7191.

6257. Walnut Acres. 1983. Organic farming—natural foods [Mail order catalog and price list]. Penns Creek, Pennsylvania 17862. 40 p. Jan/Feb. Illust. Index. 28 cm. [37 ref]

• **Summary:** A large color photo on the cover shows a red barn in the snow, with the caption “Buy direct from the farm—500 acres of chemical free soil.” In 1946 Paul and Betty Keene first fell in love with Walnut Acres. They had just completed four years of study in organic homestead-and-farm schools. Note: It is unclear when they started to do business. They also sell products made by other companies, such as Shiloh Farms, Fearn, and Westbrae. Soy related products: Miso Plus all natural dip mixes. 4-grain cereal (incl. soybeans). Hearty cereal (incl. soya). 12-grain cereal

(incl. soy). Soy grits, organic. Rice pancake mix (with soya flour). Triticale pancake mix (with soya flour). 12-grain pancake mix (with soya flour). Unbleached white pancake mix with soya flour. Wheatless pancake mix with soya flour. Whole wheat and soy pancake mix with soya flour. Cornell flour, with organic soy flour. Soy flour, organic. Instant soy milk powder. Sterling special carob blend (soya carob). 12 grain flour (incl. soya flour). Soya-carob bread mix (with soya flour). Corn muffin mix (with soya flour). Apricot nut quick bread mix (with soya flour). Granola maple quick bread mix (with soya flour). Four Fearn cake mixes (with soy powder). Pro-Nuts (soy-nuts). Soybeans, yellow (25 lb, 5 lb, 3 lb, 1 lb). Tempeh starter. Whole wheat and soy spaghetti. Pea and soybean soup. Miso-Cup red vegetarian soup. Green soybeans (whole dry, canned). Tamari soy sauce (with or without wheat). Comtessa coffee substitute (with soy beans). Celestial Seasonings Breakaway Coffee Substitutes (most have roasted malted barley and barley grains, and roasted chicory root as the main ingredients). Lecithin granules (soya phosphatides). Soy bean lecithin (raw, crude, natural pint). Books. Soya-carob bread. Portrait photos show Paul Keene and Betty Keene.

Also discusses: Gluten flour. Amaranth seeds. Psyllium seed. Sesame seed (raw hulled; raw unhulled; toasted hulled). Adzuki beans. Peanut butter, sesame tahini, and other nut butters. Pita bread. Address: Penns Creek, Pennsylvania. Phone: (717) 837-0601.

6258. Hattori, Terumitsu. 1983. The soy sauce / shoyu industry in the United States (Interview). *SoyaScan Notes*. Feb. 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The production of soy sauce in the United States has been growing (on average) at 7-8% a year since about 1970, and Kikkoman production has been growing at 13% a year during that same period.

Kikkoman presently makes 20,000 kl (kiloliters) a year; estimated total U.S. production (fermented + HVP) is 40,000 kl/year. Imports of soy sauce to the USA are 10,000+ kl/year. Thus in 1982 total US consumption was 50,000 kl (58,750 metric tons) per year. Kikkoman produced about 50% of the soy sauce made in the USA; this was 40% of total U.S. consumption.

In Feb. 1983 U.S. per capita consumption was 216.1 ml = 253.9 gm = 14.65 tablespoons of shoyu.

Conversion figures—Relative density: (1) Regular shoyu: 1.17 to 1.18 (so 1 gallon weighs 9.8 lb). (2) Milder shoyu: 1.13 to 1.14. Usukuchi shoyu (20% salt): 1.19 to 1.20. 1 million gallons = 3.785 million liters = 3.785 kiloliters. 1 kiloliter = 264.18 U.S. gallons = 2,200.6 lbs of water.

Note: Comparing this with miso. In Sept. 1981 total U.S. miso consumption (production + imports) was 1,500 metric tons. This is only 2.5% as much as U.S. soy sauce consumption. So per capital U.S. miso consumption = 6.34 gm/year = 1.1 tablespoons per year. 1 level tablespoon of

miso weighs 17.3 gm. 1 level teaspoon of miso weighs 5.76 gm. 1 tablespoon of regular shoyu weighs 17.33 gm. Address: Kikkoman International Inc., 50 California St. #3600, San Francisco, CA 94111. Phone: 415-956-7750.

6259. Piotrowski, Joyce Dodson. 1983. Chinese barbecue no longer requires torching the hut. *Washington Post*. Feb. 9. p. E1, E16.

• **Summary:** The tradition of Chinese barbecue has an ancient origin. The Chinese invented charcoal, which burns hotter than wood, probably for use barbecuing, using cast-iron cylindrical ovens, with a grate and openings at the bottom for supplying air to the charcoal fire. Any Chinese dish that is cooked in an oven (including Peking duck) can be considered a barbecued dish.

Describes the details of making good Peking duck with its thin crisp skin, moist and fragrant meat, and golden-brown color.

The secret of making delicious barbecued Chinese spareribs and this strips of red roast pork lies in the sauce, which “is a blend of hoisin sauce, soy [sauce], honey, garlic, ginger, and five-spice powder. This sauce is used as both a marinade and a basting liquid, and sometimes even as a sauce to pour over the meat.

“In fact, there are recipes in Chinese cookbooks for dishes such as barbecued bean curd that are not really barbecued but are really stir-fried in barbecue sauce.” For best results, make the barbecue fresh yourself rather than buying a ready-made product.

Note that the word “soy” (used by itself, at this late date) refers to soy sauce.

6260. Milbury, Peter. 1983. Soy sauce and tamari analysis: Meeting with Tomio Kitani of Yamaki Co. Chico, California: Chico-San Inc. 4 p. Feb. 14. Unpublished manuscript.

• **Summary:** Present at this meeting to discuss soy sauce quality were Bob Kennedy, Jun Makino, Peter Milbury (Chico-San), T. Murata (Ohsawa Japan), and Tomio Kitani (Yamaki Co.). There are 2 ways to tell if soy sauce is made by natural fermentation of whole soybeans, or if it is “mixed with acid hydrolyzed defatted soybean meal.” (1) Visit the maker and dip into the moromi. (2) Use a combination of sensorial and laboratory testing. Address: Chico-San Inc., P.O. Box 810, 1264 Humboldt Ave., Chico, California 95927. Phone: 916 891-6271.

6261. Milbury, Peter. 1983. Chico-San, miso, and soy sauce (Interview). *SoyaScan Notes*. Feb. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bob Kennedy thinks that Junsei Yamazaki made a total of 20 barrels of miso from 1965 to 1972. Only 3-4 were in the building that was burned down by the fire at Chico-San. The rest came to maturity and were mixed with imported miso. Mr. Yamazaki also made about 3 barrels of

fermented shoyu (soy sauce) at Chico-San in about 1965. Chico-San feels that SANA (Soyfoods Assoc. of North America) should establish soy sauce terminology, standards, and an analysis program. Importers could help set it up to protect themselves.

Mr. Kitani is Chico-San’s advisor for fermented soyfoods. He is a manufacturer in Japan. Chico-San now has a four-stage plan to make miso and shoyu in Chico. 1. Import bulk miso from Mr. Kitani and let it age in Chico. Adjust the ambient temperature by opening and closing doors and windows. 2. Make miso in Chico using koji imported from Japan under refrigeration. 3. Make koji in Chico. 4. Make shoyu in Chico. Address: Chico-San, Chico, California.

6262. Milbury, Peter. 1983. Junsei Yamazaki’s work with miso and shoyu at Chico-San. Work of Mr. Kitani. (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 17. ½ p. transcript.

• **Summary:** Bob Kennedy thinks Mr. Yamazaki made a total of 20 barrels of miso from 1965 to 1972. Only 3 to 4 were destroyed by the fire. The rest came to maturity and was mixed with imported miso. Mr. Yamazaki also made about 3 barrels of fermented soy sauce at Chico-San—in about 1965.

Peter believes SANA should develop soy sauce terminology, standards, and analysis techniques. Importers would use these to protect themselves.

Mr. Kitani, as manufacturer, is Chico-San’s fermented foods advisor. Chico-San now has a four-stage plan to make miso and shoyu. 1. Import bulk miso from Mr. Kitani and let it age in Chico. Adjust the ambient temperature by opening and closing doors and windows. 2. Make miso in Chico using koji imported from Japan under refrigeration. 3. Make koji in Chico. 4. Make shoyu in Chico. Address: Chico-San Inc., P.O. Box 810, 1264 Humboldt Ave., Chico, California 95927.

6263. Miyashita, Masa. 1983. Re: Soy sauce in Europe. Letter to William Shurtleff at Soyfoods Center, Feb. 21—in reply to inquiry. 2 p. Typed, with signature on letterhead. [Eng]

• **Summary:** There are presently no manufacturers of fermented soy sauce in Europe. The following is an estimate of the amounts and types of soy sauce are consumed in Europe: Japanese fermented 1,800,000 liters; Chinese fermented 1,500,000 to 2,000,000 liters. Indonesian style 1,000,000 to 1,500,000. Chemically made (HVP) or mixed 600,000 liters.

Per capita consumption of all types is about 17 ml/year, and about 5 ml/year for Japanese-style soy sauce. Both figures are far below their corresponding U.S. figures. The main markets are the UK and the Netherlands. Kikkoman’s share of the Japanese soy sauce market in Europe is about 70%. Kikkoman’s sales in terms of volume are growing at about 6% a year. Kikkoman has no immediate plans to build

a shoyu manufacturing plant in Europe. The main emphasis now is on broadly promoting interest in Japanese culture, and more narrowly on Japanese food culture. Address: Kikkoman Trading Europe GmbH, Duisburger Strasse 3, D-4040 Neuss, West Germany. Phone: (02101) 2 20 89.

6264. Nasuno, Seiichi. 1983. Re: N-nitroso compounds and nitrosamines in Japanese fermented soyfoods. Letter to William Shurtleff at Soyfoods Center, Feb. 23—in reply to inquiry. 2 p. Typed, with signature on letterhead. [5 ref. Eng]
• Summary: “We have an official certificate from the National Institute of Health (NIH) of Japan to certify that the regular Kikkoman soy sauce is free from volatile nitrosamines on the basis of the examination of volatile N-nitroso compounds in a soy sauce product performed on January 23, 1978, at the NIH of Japan.

“The test was performed by a Shimadzu gas chromatograph equipped with an alkali-flame ionization detector and minimum detection limit for N-nitrosodimethylamine was 0.1 ng (1 ppb in soy sauce).”

“Nitrosamines are reaction products of nitrite and amines. Very small amounts of nitrite and amines were found in cereals such as rice, wheat and soybeans used as raw materials for miso and shoyu making. Moreover, amino acids in shoyu competitively inhibit nitrosamines formation from nitrite and amines.”

“In conclusion, we feel that the problem of nitrosamines in miso and shoyu is not serious and that miso and shoyu are quite safe in the viewpoint of cancer risks.” Note: Five references are cited in the letter to document each point. Address: Director, Bioscience Lab., Kikkoman Corp., Central Research Laboratories, 399-Noda, Noda-Shi, Chiba-ken, Japan. Phone: 0471-24-1111.

6265. Smith, Grant. 1983. The current soy sauce industry and market in the United States (Interview). Conducted by William Shurtleff of Soyfoods Center, Feb. 23. 2.2 p. transcript.

• Summary: Interpreting U.S. soy sauce statistics is difficult. Early production statistics are probably low and later statistics are probably high due to three possible points of confusion: (1) Are the figures only for soy sauce or for soy sauce plus teriyaki sauce? If they include teriyaki sauce, that would be a terrible distortion since teriyaki sauce contains about 20% soy sauce and 80% other ingredients—such as vinegar, water, seasonings, etc. What percentage of Kikkoman’s total liquid volume is teriyaki sauce and what percentage of teriyaki sauce is shoyu? Kikkoman likes to include teriyaki sauce in their overall numbers to prove that they are number one. Some non-Kikkoman teriyaki sauce is junk. (2) The problem of gallons and pounds in Kikkoman’s output. In the trade journals, the Kikkoman plant was described as having a capacity of 25 million pounds. But 10,000 kiloliters is 2.5 million gallons. The design of their

fermenters suggests 2.5 million gallons annual output. Staley only makes concentrates. (3) SAMI data does not include Kikkoman’s burgeoning foodservice and restaurant business.

Smith thinks that looking only at soy sauce statistics, Kikkoman is no bigger than LaChoy. In Japan, roughly one-third of all soy sauce is nonfermented.

Grant Smith likes Kikkoman soy sauce and uses it in his own cooking. Austin Co. built the plant in Walworth, Wisconsin, to 2.5 million gallons capacity. Address: A.E. Staley Co, Decatur, Illinois.

• Summary: A comprehensive history of the subject. Contents: Introduction. Part I: Kikkoman in Japan. 1600’s-1887: Mogi family starts shoyu (1754-1800), Kikkoman brand registered 1838, Tokyo Shoyu Co. new distributor 1881. The Noda Shoyu Cartel: How formed, bankruptcy of Tokyo Shoyu Co. in the 1880’s, research lab and new technology 1900-09, 1910-1917: Arrival of the railroad in Noda in 1911 revolutionized transportation and provided mass distribution, early switch from water to rail, shoyu factory in Korea, miso sold in Korea and China, damaging competition, final struggle. The Noda Shoyu Co., Ltd., incorporation: Noda Shoyu Company founded 1918, history to 1920, strikes in 1923, reorganization in 1925, the 1930’s and 1940’s. 1947-1981: anti-monopoly hearings in the 1950’s, start of U.S. promotion in 1956, socialism and internationalism in Noda in the 1960’s, total figures for 1980-81, future. Part II: Kikkoman in the West. Introduction: Mostly U.S., the early years (1860’s-1948). Preparing to establish roots (1949-1972): Advertising on U.S. television 1956, Kikkoman International Inc. established in San Francisco 1957, other branches, Leslie Salt Company (Oakland, California) bottled from bulk shipments from Japan (1968), Japan Foods Corp. acquired 1969. 1973-1981: Reasons for establishing first U.S. plant June 1973, new marketing approach to shoyu, 1973 cookbook (*The Kikkoman way of fine eating*, which uses the term “shoyu” throughout the book except in the recipes), two marketing decisions, change of name from shoyu to soy sauce, use of chemical preservative, sales increase to number one by 1976, types of products, the future. Address: Lafayette, California. Phone: 415-283-2991.

6267. **Product Name:** The First Great Tofuburger Mix. **Manufacturer’s Name:** Essential Foods, Inc. (Product Developer-Marketer).

Manufacturer’s Address: P.O. 8462, Emeryville, California. Phone: 314-832-7575.

Date of Introduction: 1983. February.

Ingredients: Sunflower seed meal, soy flour, sesame seed flour, arrowroot, garbanzo flour, sea salt, soy sauce, garlic,

onion, torula yeast, natural herbs & spices.

Wt/Vol., Packaging, Price: 5.3 oz (150 gm) foil packet.

How Stored: Shelf stable.

New Product–Documentation: Label (foil packet).

Undated. 5.5 by 7.5 inches. Orange, blue, red, tan. Color photo of burger on front. Recipes on back for Tofuburgers, Tofuballs or Appetizers, Tofuloaf. Spot in Soyfoods. 1983. Summer. p. 54. The contents of the packet is mixed with 1 lb of tofu to make 6 tofu burgers.

Leaflet. 1983. The First Great Tofuburger Mix. 2 p. Address is 5565 Fremont St., Oakland, CA 94606. Talk with Craig Ramsell. 1989. March 14. This product was discontinued in late 1983, having been replaced by the Lite Chef California Burger. The product was co-packed by another company.

6268. Fruin, W. Mark. 1983. Three centuries of Kikkoman. Growing pains & organizational change. II. *Soyfoods*. Winter. p. 52-55. [1 ref]

Address: Dep. of History, California State Univ., Hayward.

6269. **Product Name:** Light Tofulogna (Cooked Tofu Bologna).

Manufacturer's Name: Light Foods Inc.

Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133.

Date of Introduction: 1983. February.

Ingredients: Organic tofu, okara, soy oil, water, dried egg white, textured soy protein, salt, barley flour, honey, shoyu, locust bean gum, onion and garlic, natural spices, paprika, natural spice oils.

Wt/Vol., Packaging, Price: 12 oz cylinder, plastic wrapped and vacuum packed.

How Stored: Refrigerated.

Nutrition: Per 1.6 oz. slice: Calories 105, protein 6.4 gm, carbohydrates 5.9 gm, fat 7.0 gm, sodium 510 mg, cholesterol 590 mg.

New Product–Documentation: Spot in Whole Foods. 1983. Jan. p. 39. "New Tofu Line. Light Foods, Inc. presents a new dimension to soyfoods: Light Links, Light Tofulogna and Light Soysage. Spot in Soyfoods. 1983. Winter. p. 48; Manufacturer's leaflet. 1983, undated.

Label. 1988 received. Chub-packed in a sausage-style waxed paper tube. 10 by 3 inches. Orange, yellow, and tan. With label printed directly on tube. "Pre-cooked. Meatless. 100% cholesterol free."

6270. **Product Name:** Light Soysage (Meatless Okara-based Sausage).

Manufacturer's Name: Light Foods Inc.

Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133. Phone: 314-721-3960.

Date of Introduction: 1983. February.

Ingredients: Okara (soy pulp), whole wheat flour, soymilk,

nutritional yeast, wheat germ, soy oil, bulgar wheat, shoyu, honey, sesame seeds, herbs & spices.

Wt/Vol., Packaging, Price: 12 oz sausage-like dark reddish brown paperboard tube.

Nutrition: Per 2 oz.: Calories 147, protein 6.3 gm, carbohydrate 16.5 gm, fat 6.1 gm, sodium 292 mg.

New Product–Documentation: Spot in Whole Foods.

1983. Jan. p. 39. "New Tofu Line. Light Foods, Inc. presents a new dimension to soyfoods: Light Links, Light Tofulogna and Light Soysage.

Label. 1988 received. Chub-packed in a pre-printed sausage-style casing. 10 by 3 inches. Orange, yellow, and reddish brown. With label printed directly on tube. "Pre-cooked. Meatless. 100% cholesterol free."

Talk with Bob Davis, founder of Light Foods. 1994. May 7. This product was similar to his first Soysage except that the packaging was different; the Light Soysage was chub packed. Other products in this line that were chub packed were Light Tofulona and Light Loaf. The latter product was never commercialized.

6271. **Product Name:** [Suzi Wan Oriental Foods (Soy Sauce)].

Foreign Name: Soy.

Manufacturer's Name: Master Foods. Div. of the Mars Group.

Manufacturer's Address: Netherlands and France.

Date of Introduction: 1983. February.

Wt/Vol., Packaging, Price: 125 ml. bottles.

New Product–Documentation: Food Report (Lehmann). 1983. Feb. and April. The company's soy sauce is sold in 125 ml bottles for Hfl 2.75.

6273. *Soyfoods*. 1983. Soyfoods mini-boom underway in Europe. Winter. p. 8-9.

• **Summary:** "This year we became aware that the kind of developments that took place in the U.S. in 1977-78 are now taking place in Europe with the sudden increase in the number of soyfoods companies," reports Bill Shurtleff of The Soyfoods Center. 'Historically speaking, this will probably

be the most important event for the soyfoods industry in 1982. Europe is coming on strong and it's a tradition of soyfoods that goes back 130 years that is now being revived.'

"Most of the impetus for soyfoods in Europe apparently stems from the vigor of the macrobiotic community. Per Fruergaard started Tofu Denmark in Valby and has encountered legal problems regarding the use of nigari. In Paris, France, Bernard Storup purchased a Takai tofu system; Ab and Paulien Schaft are setting up a small plant in Baillestavy to make miso, shoyu, natto, and koji; in Ivry, Jean Luc Alonso's macrobiotic center, Traditions du Grain, prepares for tempeh production.

"In the British Isles, Paul Jones' Tofu Shop in London, England, has been active since 1981 while Community Health Foundation, also in London, promotes homescale tofu, tempeh, and misomaking. In Dublin, Ireland, Jane O'Brien gives tofu cooking classes, has published a tofu cookbook and is considering commercial production.

"The macrobiotic movement is strong in Belgium where de Brandnetel, a large Antwerp-based distributor of natural foods, operates a tofu shop in the rear of their retail store. Jonathan Company in Ekeren makes 3000 pounds of tofu weekly, along with seitan, mochi, soups, canned foods, and soymilk. Seven Arrows in Leuven is another small tofu shop in operation in Belgium.

"In the Netherlands Manna was the first company to introduce soyfoods to the public and is now an important promoter. Manna's John Welters (who provided much of this information) lectures on homescale soy processing and reports interest and sales are rising as are the number of magazine articles on soyfoods. Manna itself markets tofu spreads and distributes a joint equipment price list with Takai Company of Japan. Witte Wonder in The Hague makes tofu, as does De Morgenstond in Bakkeveen, while Peter Dekker's Jakso produces tempeh. In Portugal, Unimave promotes soy as part of the macrobiotic diet and makes small amounts of tofu and soymilk; Jose Parracho in Setubal is starting a self-sufficient center involving tofu and tempeh production.

"In Soyen, West Germany, Wolfgang Furth-Kuby, who published *Das Tofu Buch* (by William Shurtleff) in German, is interested in tofu production at his Sojaquelle. Tofu producers are Swame [sic, Swami] Anand Svadesha in Furth-im-Wald, Thomas Kasas [sic, Karas] who installed a tofu system last summer at his Bittersuess [later Soyastern] in Cologne, and Alexander Nabben in Munich.

"In Sweden Tim Ohlund and Ted Nordquist have been operating Aros Sojaprodukter since early 1981 in Örsundsbro using a Takai pressure cooker system and vacuum packaging. In Rimini, Italy, Gilberto Bianchini makes tofu at Community Foods. And Switzerland is the home of four soy companies including Restaurant Sesam in Bern, an active macrobiotic center with homescale tofu and seitan production; Marty Halsey makes tofu in Nyon; Hans Opplinger produces tofu in Chan; and Verena Krieger

operates Sojalade in Luzern (Lucerne).

"Sojalade, whose tofu output at mid-summer 1982 was 1000 pounds weekly, is a company launched mainly on the results of an article Ms. Krieger published ('Yesterday Steak, Tomorrow Tofu') in a Swiss Sunday magazine. Krieger then established her shop to meet the expected tofu demand stirred up by her article. Swiss national television ran a 30 minute feature on soybeans this year in which Krieger made a brief demonstration of 5 tofu dishes. 'Since then tofu has been a favorite child of the media,' she says, adding that tofu appeared in the pages of *Blick*, a mass market newspaper."

Photos show: (1) European representatives at the international Soyfoods Come West conference in Seattle, Washington: Gilberto Bianchini, Marina Casazza (Italy); Joanna White (Switzerland); Kym Olsen (England); Wolfgang Furth-Kuby (W. Germany); Tim Ohlund (Sweden); Roger Kayes (England). (2) Ted Nordquist and Tim Ohlund of Aros Sojaprodukter, Sweden's first tofu company.

• **Summary:** Gives figures for tofu, ganmodoki, natto, other, shoyu, miso, soy oil, and margarine. Tofu consumption is lowest in February and highest in August, followed by July, May, and June. Natto consumption is highest March then February, and lowest in August. Shoyu consumption is highest in July then May, and lowest in January then February. Miso consumption is highest in April then May, and lowest in January. Soy oil consumption is highest in July and lowest in January. Address: Japan.

6275. Welters, Sjon. 1983. Re: Brief history of Stichting Natuurvoeding Amsterdam and Manna Natuurvoeding B.V. (Manna Natural Foods) in the Netherlands. Letter to William Shurtleff at Soyfoods Center, March 2. 2 p. Typed, with signature on letterhead.

• **Summary:** "Manna was started in 1971 by Adelbert and Wieke Nelissen with a few hundred guilders in a small garage where some natural food products were sold. One year later they gave it an official status by founding the Natural Foods Foundation Amsterdam [Stichting Natuurvoeding Amsterdam; this Manna started as a foundation, and Manna was their brand]. Their first store was on Rozenstraat in Amsterdam. Two years later a second store was opened and the first sourdough bakery in Holland opened. The name of the bread became 'Manna.' Soon after this a third and fourth store opened in other parts of Amsterdam while at the end of 1975 the distribution of bread, nutbutters, cereals and miso, tamari, shoyu, and seaweeds began all over the Netherlands. In 1976 it became clear that a warehouse should be rented. Meanwhile

production grew and more and more stores carried Manna products. Again a new Manna store started. In 1977 the warehouse was moved to a bigger place. Another new store opened its doors. We began making tofu and were the first to do so with organic beans and nigari. Also soymilk and seitan were produced. In 1978 sales went steadily up. In 1979 two new stores were opened.

“Meanwhile the East West Center was founded by Adelbert and Wieke, promoting natural foods as part of a healthy and natural way of living. This was a great help for Manna. Two more stores opened in 1980 and 1981. In the beginning of 1982, Manna suffered from bankruptcy and was started one day later as Manna Natural Foods, a holding company mainly owned by the Foundation ‘Manna Natural Foods’ [Manna Natuurvoeding B.V.; B.V., pronounced Bay Fay, is an abbreviation for Besloten Vennootschap, which means a private company with limited liability]. A reorganization was necessary but the promotion and sales of quality natural foods went on.

“In 1983 Manna is going steady and probably will cooperate with other natural foods distributors to form one strong network of farmers, producers, distributors and retailers. The purpose will be to eliminate competition and put more energy into publications and promoting by cooking classes, radio and television programs and education.

“Soyfoods played quite an important role in the history of Manna because it was the soyfoods Manna promoted that made it different from the other health and natural food businesses. Because Manna is based on the macrobiotic view of life, miso, tamari, tofu and so forth were an essential part of the diet of the Manna people.

“Instead of the cheese, milk, yogurt (of which consumption is one of the highest in the Netherlands) we advise soyfoods as a healthy alternative. We did no business in dairy foods. Soyfoods are the number one product to introduce in Netherlands. A great deal of sickness in the Netherlands is caused by the overconsumption of dairy foods, meat and eggs (and other animal products). From this point of view Manna is a unique company in Holland, even in the alternative natural foods business. This difference is a reason of conflict with them. Only by eating a diet which is based mainly on vegetable products such as grains, legumes, soyfoods, seaweeds, fruits and nuts, etc., can a healthy and peaceful world be created. No animals can be mistreated and no land wasted, or misused or destroyed.” Address: Manna, Meeuwenlaan 70, 1021 JK Amsterdam-N, Netherlands.

6276. Wood, Brian J.B. 1983. Re: Sumbo Abiose, Bean Products Ltd. in Scotland, and list of publications. Letter to William Shurtleff at Soyfoods Center, March 16—in reply to inquiry. 1 p. Typed, with signature on letterhead.

• **Summary:** Sumbo Henrietta Abiose is a beautiful and charming Nigerian lady who did her PhD at the University of Strathclyde, with Dr. Wood as her advisor. She is now

lecturing at the Department of Food Science and Technology, University of Ife, Ile-Ife, Nigeria. She did her PhD work while her husband qualified for his Fellowship at the Royal College of Dental Surgeons.

The new factory is: Bean Products Ltd., 42 Telford Road, Cumbernauld, Scotland. It is presently producing only soy sauce. Address: PhD, Reader in Applied Microbiology, Dep. of Bioscience and Biotechnology, Applied Microbiology Div., Univ. of Strathclyde, Royal College Building, 204 George St., Glasgow G1 1XW, Scotland. Phone: 041-552 4400.

• **Summary:** At this Polynesian restaurant, appetizers include Barbecued baby spare ribs Hawaiian: Choice pork ribs marinated in soya ginger and honey.

Another dish (whose name is hidden by the illustration) includes bamboo shoots and “bean curd.”

The main part of the ad is a photo of the menu; superimposed on it is an illustration of a slim Polynesian lady, wearing a lei, riding in a sort of Polynesian canoe—but without outriggers. Address: Hotel Oberoi Towers.

6278. *SoyaScan Notes*. 1983. How to eat natto (Overview). March 22. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** David and Suzanne Greenslade: The only way they ever ate natto in Japan was: Put 1 packet of natto in a bowl. Add 1 raw egg, 1 tablespoon shoyu [Japanese-style soy sauce], and ¼ minced green onion (*negi*). Stir vigorously with chopsticks. Pour over hot rice and eat. OK to mix with the rice. It was served that way all over Japan and in Los Angeles.

Akiko Aoyagi Shurtleff, who was born and raised in Tokyo, never ate natto this way. She added to the natto: *katsuobushi* (shaved, dried, fermented and smoked skipjack tuna {*Katsuwonus pelamis*, sometimes referred to as bonito}, minced green onion, shoyu and Japanese-style mustard {*karashi*}).

In the Japan’s northeast prefectures (*Tôhoku Chihô*) Akiko has heard that some people use sugar instead of soy sauce.

6280. **Product Name:** A Dressing from the Second Kingdom (Tofu Dressing) [Garlic-Dill].

Manufacturer’s Name: Light Foods Inc.

Manufacturer's Address: 6144 Bartmer, St. Louis, MO 63133.

Date of Introduction: 1983. March.

Ingredients: Organic nigari tofu, safflower oil, pure lemon juice, parsley, shoyu, dill, sea salt, garlic.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1983. 3.5 inches diameter. Self adhesive. Green on white. "A Dressing from the Second Kingdom." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

6281. **Product Name:** Ray's Seitan "Wheat Meat," and Ray's Seitan Sandwich (in a Pita Pocket).

Manufacturer's Name: Ray's Seitan.

Manufacturer's Address: 1865 East Ontario St., Philadelphia, PA 19134. Phone: 215-634-3361.

Date of Introduction: 1983. March.

Ingredients: Seitan "Wheat Meat" (12/91): Organic whole wheat flour, wheat gluten, filtered water, natural tamari soy sauce, kombu (sea vegetable).

Wt/Vol., Packaging, Price: Seitan: 6 oz and 12 oz round plastic deli tubs, filled 3/4 full with broth.

How Stored: Refrigerated.

New Product–Documentation: Appropriate Foods, Inc. Eat Appropriately! [Catalog and price list] (Brooklyn, New York). 1987. Feb. "Ray's Seitan Wheat Meat." Talk with Ray Reichel of 1865 E. Ontario St., Philadelphia, Pennsylvania 19134. 1991. Dec. 10. He first started making and selling seitan in March 1983. The only other company that he knows of to make seitan before him was Upcountry. The label says Ray's Natural Foods but its real registered and licensed name is "Ray's Seitan." It is not listed in the phone directory. He makes two seitan products, sells some himself locally, and also sells to a distributor in the Delaware Valley, and a small distributor in New York named "Fill the Basket." It keeps him very busy, and his business has been operating at full capacity for quite a while. He is planning to expand next year but he is unwilling to make any changes that would lower the high quality of his product. The broth for his basic seitan is made only from tamari, kombu seaweed, and water. The sandwich is in a pita pocket with tahini dressing, scallions, and lettuce. The gold foil label for the packaged seitan is much nicer than that on the sandwich.

He was introduced to seitan through his vegetarian diet and macrobiotics; there is an East West Foundation in Philadelphia, but he has never studied in Boston. He got interested in seitan, and since he was unemployed, he learned how to make it from cookbooks by Wendy and Edward Esko titled *Introducing Macrobiotic Cooking* (1979) and *Macrobiotic Cooking for Everyone* (1980). Today his average production of seitan is about 350 lb/week, sometimes reaching 400 lb/week.

Label sent by Ray Reichel. 1991. Dec. 20. 3.5 inch

diameter. Red, gold, and black on orangish-yellow.

Illustration of a bird flying across a rayed gold sun with ears of wheat on both sides. "Delicious meat substitute."

6282. Shurtleff, William; Greenslade, David. 1983. Mahatma Gandhi: Soyfoods pioneer in India. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 2 p. Published in part in Vegetarian Times, June 1983, p. 4. Unpublished manuscript. [5 ref]

• **Summary:** Although it is well known that Mahatma Gandhi revitalized the vegetarian movement in India, it is less well known that he was one of India's first pioneers to introduce soybeans and soyfoods. His work during the 1930s still serves as an inspiration to many Indians, who are today transforming India into one of the world's leading soybean growing and soyfoods using countries.

Gandhi's earliest known mention of soybeans or soyfoods was in the July 1935 issue of *Harijan*, his popular magazine for village uplift. There he referred to a book by Dr. H.V. Tilak called *Balanced Diets*. Dr. Tilak's book was based in an orphanage of over a hundred children, whose diet was made richer in protein and more balanced by the addition of soybeans.

In September 1935, Gandhi reprinted a report on soybeans by the Bombay Health Association. This article listed the nutritional and medicinal values of soybeans and also explained how to make soymilk, soy flour, and soy coffee. The October issue of *Harijan* reported that the kitchens at Gandhi's ashram has introduced experimental rations of soybeans into the communal diet. The same article compared soybeans with eggs, wheat, and ghee. Since the more economical soybeans were rich in protein and oil, Gandhi later ordered reductions in the portions of wheat and ghee and suggested that all beans, other than soy, be omitted altogether.

November's *Harijan* reported that soybeans were being boiled, steamed, and used in soups. The ration of ghee had been stopped and soybean portions increased. Gandhi pointed out that everyone seemed to thrive on the new diet. In the same issue, Gandhi reprinted a leaflet by the Baroda State Food Office describing soybean crop cultivation. By December 1935, *Harijan* reports that soybeans had become a substantial part of the diet at Gandhi's ashram.

The December 1935 and January 1936 issues printed a dozen soyfood recipes, including the techniques for making, "TO-FU," "shoyu-sauce," and "soya bean sprouts," Gandhi said he was particularly fond of the sprouts.

By September 1936 *Harijan* was recommending an exhaustive book on soybeans written by F.S. Kale, an Englishman in charge of the Baroda State Food Service Department. Entitled, *The Soya Bean: Its Value in Dietetics; Cultivation and Uses*, this was the first book on soyfoods published in India. *Harijan* also carried a report on soybean cultivation experiments in the USA and the Soviet Union in

the same issue.

By 1936, after careful consideration of economic, nutritional and medicinal evidence, Gandhi wholeheartedly favored the cultivation and widespread use of soybean in India and his magazine ran lists of prices and of the places where soybeans could be obtained.

We lose track of Gandhi's interest in soyfoods in late 1936. However in 1949 his ideas were republished in *Diet and Diet Reform*, a book which sold thousands of copies. The fact that Gandhi took such an interest in soybeans and soyfoods is a major source of encouragement to the many Indians working in this burgeoning field today. In 1982 India produced 500,000 metric tons of soybeans, making it the world's ninth largest producer, and soyfoods (such as TVP, soymilk, and soy oil) were catching on rapidly in this country where an estimated 50 percent of the population is vegetarian, and another 30 percent eats only a very small amount of meat. Address: Lafayette, California.

6283. *Soyanews (Sri Lanka)*. 1983. Preparing soya sauce. 5(7):2. March.

• **Summary:** "The Bureau of Ceylon Standards is presently engaged in the formulation of a standard specification for Soya Sauce." A flow chart shows how traditional Japanese soya sauce (shoyu) is made. Proportions are given. For more details, see *The Book of Miso*, by Shurtleff and Aoyagi.

6284. Sheraton, Mimi. 1983. Restaurants: Sushi and sashimi, the best in the city. *New York Times*. April 15. p. C1-2.

• **Summary:** This is a review of Hatsuhana, a Japanese restaurant at 17 East 48th St., between Fifth and Madison Ave. in New York City. "Natto, a combination of raw fish with an earthy cheeselike paste of aged soy beans, is wonderful whether you have it with a white-flesh fish, tuna, clams, squid or the most subtly flavored toro—fatty tuna. A sunny yellow vinegar sauce made of lemon juice, bean paste [miso] and sake is the basis of nuta, a salad made with plain or fatty tuna, white fish, clams or squid."

"The eye-opening wasabi horseradish should be mixed into soy sauce before sushi and sashimi are dipped in, and lacy slivers of radish [daikon] add a nice contrast."

• **Summary:** Contents: Introduction. Decreasing sodium intake. Increasing potassium intake: Therapeutic benefits, protective benefits, taste and stability. Fermented sauces. Ion-exchange processes (for reducing sodium): Resin-bed, membrane ion exchange (a counter-current flow membrane device or dialyzer). Two products suggested: 1. High-potassium soy sauce with minimal sodium intended for individuals with advanced hypertension; one disadvantage is its bitter taste. 2. A sauce containing equal amounts of sodium chloride and potassium chloride; it would have the protective value of potassium, would taste as salty as regular soy sauce, and would not require refrigeration. Address: 1-2. USDA Western Regional Research Center, Berkeley (Albany), California.

6287. **Product Name:** Kinmei Soy Sauce, and Kinmei Tamari Soy Sauce (Wheat Free).

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan by Mizoguchi Soy Sauce Inc.

Manufacturer's Address: P.O. Box 810, Chico, CA 95927.

Date of Introduction: 1983. April.

Ingredients: The tamari is completely wheat free.

Wt/Vol., Packaging, Price: 5 oz dispenser, quart, or gallon.

How Stored: Shelf stable.

New Product—Documentation: Crackerbarrel. 1983.

April. Insert. Made by master brewer Hideo Mizoguchi of Mizoguchi Soy Sauce Inc., Honjo, Chiba prefecture, Japan.

6288. **Product Name:** Lima Yamaki-Brand Organic Soy Sauce.

Manufacturer's Name: Chico-San, Inc. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 810, Chico, CA 95927.

Date of Introduction: 1983. April.

Ingredients: Organically grown whole soybeans, whole wheat, sea salt.

Wt/Vol., Packaging, Price: 5 oz dispenser, quart, or gallon.

How Stored: Shelf stable.

New Product—Documentation: Crackerbarrel. 1983. April.

Insert. Made by Mr. Tomio Kitani of Yamaki Miso-Shoyu Co., Japan. Spot in Whole Foods. 1983. June. p. 28. A black-and-white photo shows the 5-oz. bottle. Made entirely from organically-grown ingredients, this soy sauce is made by the Yamaki Company in Japan, brewed and aged naturally for 2 years.

6289. *Crackerbarrel (Chico, California)*. 1983. Are natural soy sauces really natural? Laboratory analysis shows some are not! 1(2):1, 6. April.

• **Summary:** Recent laboratory analyses... States that three of four brands tested contain 0.91-0.98% glycerin. "A natural soy sauce should have a minimum of 1.0% glycerin. If the sample has less than 0.5% glycerin, then it must have been made from defatted soybeans." Two brands contain levulinic

acid (12-17%). Alcohol content ranges from 1.26 to 2.52%.

The four brands of soy sauce commonly sold in American natural foods stores showed the presence of artificial additives in two of them. The tests were performed last November, by the Japan Food Research Laboratories, in Tokyo.

Chico-San pioneered the importation of natural soy sauce over 20 years ago. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

6290. Leviton, Richard. 1983. The Westbrae story. *East West Journal*. April. p. 22-26, 28-29.

• **Summary:** An excellent history of Westbrae Natural Foods. Westbrae was founded in late 1970 by Robert Gerner, Kristin Brun, and Margaret and Bob Ortiz. The foursome secured an abandoned supermarket at 1336 Gilman Street and opened for business in Feb. 1971. Their main products were granola and dried pears. In 1971 Gordon Bennett, finishing a 2-year stint as a conscientious objector, was driving a Goodwill Industries truck in Berkeley while living at Zen Center. He stopped by one day at Westbrae for lunch, asked for a job, and soon found himself hired part time to sweep and move cases. In 1972 they started distributing foods and in the late fall of 1973 the group purchased their Gilman Street store and relocated the warehousing to a new 2,000 square foot building nearby at 1224 10th St., Berkeley, California 94710.

In Feb/March 1974 Gerner (then president and chairman of the board) went to Japan and traveled the country with guide and interpreter William Shurtleff (who was studying tofu in Japan) to search for quality sources of soy sauce, miso, and other traditional Japanese natural foods. About 9 months thereafter Westbrae began to import natural foods from Japan via Mr. Kazama of Mitoku. By late 1974 annual sales had reached \$2 million. Between June and Sept. 1976 the retail store at 1336 Gilman Street was renamed from Westbrae Natural Foods to Gilman Street Gourmet. In September 1977, Westbrae Natural Foods moved its warehouse and offices to Emeryville from Berkeley, into a much larger building. "Today Westbrae is a successful, confident, and growing \$7 million corporation of 25 employees at work in a bustling 50,000 square foot warehouse sandwiched between Oakland and Berkeley in Emeryville, California." Gordon Bennett (whose photo is shown) is president. Over the years the company has had a strong interest in soyfoods. Address: 100 Heath Rd., Colrain, Massachusetts 01340.

6291. Makino, Jun. 1983. Imported from Japan: A visit to the Yamaki Miso-Shoyu Company. *Crackerbarrel (Chico, California)* 1(2):1, 6. April.

• **Summary:** Mr. Tomio Kitani is the company's owner and a third generation master maker of soy sauce and miso. The factory is relatively small. It uses whole soybeans, organically grown locally, and does not pasteurize the miso.

Mr. Kitani's grandfather started the company over 58 years ago. He recommends that miso be aged for more than a year. Chico-San is now importing this miso to America. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

6292. Nakadai, Tadanobu; Aishima, Tetsuo. 1983. [Statistical estimation of key enzymes determining the viscosity and filtration rate of soy [sauce] mash (*moromi*)]. *Nippon Nogeikagaku Kaishi (J. of the Agricultural Chemical Society of Japan)* 57(4):307-11. April. [13 ref. Jap; eng] Address: 1. Central Research Labs., Kikkoman Co.; 2. Noda Inst. of Scientific Research. Both: Noda, Japan.

6293. O'Brien, Jane. 1983. The magic of tofu and other soybean products. Wellingborough, England: Thorsons Publishers Ltd. 128 p. April. Illust. by Niall Morris and Clive Birch. Index. 20 cm. [6 ref]

• **Summary:** Written in large letters at the top of the cover: "The Best of Vegetarian Cooking." Contents. Foreword. Introduction (incl. tempeh, soy flour, miso, tamari). 1. Making your own tofu. 2. A word about the recipes. 3. Recipes. 4. Soymilk. 5. Other soybean products (Okara, gô, yuba, soynuts). 6. Soybeans as beans. 7. Food value of soyfoods. 8. History of the soybean. Further reading.

Jane was a soyfoods pioneer in Ireland. In the Introduction (p. 18-21) Jane explains that "I was frequently ill as a child, and on several occasions I was very near to death's door." Yet as she got older, she grew to enjoy gourmet food and gourmet cooking. The man who became her husband gave her the first book she read on natural foods. "As soon as I became aware that food contributed to the maintenance or destruction of health, I began a lifetime of experimentation. I changed from refined foods to whole foods, gave up eating red meat, studied macrobiotics, so much so that over ten years ago I went to Boston [Massachusetts] with two children under the age of four, and pregnant with a third, to study the subject, and I continued from there to develop my own system." Her husband, an actor, is now quite happy with her cooking, after "an austerity programme involving giving up meat, cutting down on and nearly eliminating dairy food, getting rid of sugar."

"I have been working on creating meals that are increasingly more healthful for over seventeen years now [since 1966], and I find it a fascinating study. It is wonderful to witness the vast improvement in my own health..." Her son Quinn is now 15 years old. Her religion is Baha'i. "In furthering my interest in natural foods, I have given cooking classes in Dublin [Ireland] for over ten years [since 1973], not steadily, but from time to time when there were people interested. In the early days of my cooking classes, I also imported the necessary foods: whole grains, beans, miso and natural soy sauce from suppliers in England as they were not available in shops here in Dublin. There was no other way of getting these foods for my family. During the cooking

classes I sold much of the stock... That led to the beginning of Ireland's first natural food store which I started with my husband's patient assistance, but which we left to someone else for many reasons."

"Several years ago I began to use tofu and soyfoods and to include them in the cooking classes. Because I was so interested in learning more about them, I attended the soyfoods conference held in Illinois in 1980 and the one in Colorado in 1981... I think that I became so excited about tofu, soymilk and soyfoods really because I had long been a lover of puddings, custard, and creamy toppings, often made with dairy foods. However, because I needed to cut down on my use of dairy foods, I had nearly eliminated all of those things from my diet. When I discovered that it was possible, not only to make tofu and soymilk successfully in my own kitchen, but to use it for very accurate substitutions of my childhood favorites which were far more healthful than the things I had eaten as a child, I was thrilled."

Note: On 9 November 1979 Mrs. Jane M. O'Brien (7 Woodside Drive, Rathfarnham, Dublin 14, Ireland), ordered books on tofu, tofu & soymilk production, miso, and tempeh from Shurtleff & Aoyagi at Soyfoods Center in California.

Talk with Jane O'Brien. 1980. July 13. She developed the many recipes in this book using soybeans that she imported from England to Ireland, starting in about 1980.

Letter from Jane O'Brien. 1983. May 28. This book was published in April 1983. "It is presently on sale in England but not yet here in Ireland." Address: 7 Woodside Dr., Rathfarnham, Dublin 14, Ireland.

6294. **Product Name:** Baked Tofu in Teriyaki Sauce.
Manufacturer's Name: San Diego Soy Dairy.
Manufacturer's Address: 2965 5th Ave., San Diego, CA 92103.

Date of Introduction: 1983. April.

Ingredients: Tofu—organically grown soy beans, filtered water, natural nigari, tamari, sesame oil, rice vinegar, barley malt, fresh garlic and ginger, Dr. Bonner's Mineral Bouillon, spices, sesame seeds.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Refrigerated.

New Product—Documentation: Label. 1983. 3.5 by 2 inches. Self adhesive. Brown on white. "Delicious." Talk with Gary Stein. 1989. Feb. 17. He thinks these products were introduced in about April 1983.

6295. Schick, Rabbi Michael. 1983. How Chico miso and soy sauce are made kosher. *Crackerbarrel (Chico, California)* 1(2):4-5. April.

• **Summary:** The author, traveling from San Francisco with Jun Makino (director of imports for Chico-San Inc.), visited Mizoguchi Soy Sauce Inc. in Honjo/Kimitsu, Chiba prefecture, Japan, owned by Mr. Hideo Mizoguchi. The business is over 100 years old. He gives a description of the

process for making miso and shoyu at the plant, illustrated by 3 photos. He then visited Meiji Seifun Co. in Fukuyama/Hiroshima and described the miso process. He certified all products kosher, for import by Chico-San. Address: Chico-San, Inc., P.O. Box 810, Chico, California 95927.

6296. *Soyfoods Monthly (Colrain, Massachusetts)*. 1983. Soyfoods Association rejuvenated at first meeting of new board, new goals. 3(4):1. April.

• **Summary:** "Thirty two industry members attended a 2 hour planning session of the new Soyfoods Association in Anaheim, February 7 and appointed board of directors and officers. Michael Austin was selected the new Executive Director following Richard Leviton's resignation. Board members include: Gary Barat, Legume (President), Yvonne Lo, Vitasoy USA (Vice President), Tom Timmins, New England Soy Dairy (Vice President), Dan Burke, Pacific Soybean (Treasurer), Richard Leviton, *Soyfoods Magazine* (Secretary), Travis Burgeson, Pacific Tempeh; Michael Fountain, SanJi [San-J] Int'l.; Jim Miller, Quong Hop; Jack Mizono, Azumaya; Morris Shriftman, Tree of Life; Robert Tepper, Farm Foods; Shoan Yamauchi, Hinode Tofu Co. An initial pledge of \$12,000 from 14 companies was received at this organizational meeting."

6297. Balsley, Betsy. 1983. Barbecue season in upon us—Light a fire under the chef. Easy-fix recipes are increasingly popular. *Los Angeles Times*. May 26. p. N1, N20, N32.

• **Summary:** A recipe for Indonesian-style sate calls for "3/4 cup ketjap (sweet Indonesian soy sauce [probably ketjap manis])." The accompanying recipe for Peanut sauce (which is spooned over the sates) calls for "4 teaspoons ketjap." Address: Times food editor.

6298. Hesseltine, C.W. 1983. Food fermentation research and development. In: K.T. Achaya, ed. 1983. Proceedings of AHARA 82, First AFST (I) International Conference on Food Science and Technology. See p. 65-67. Held 23-26 May 1982 at Bangalore, India.

• **Summary:** Discusses the amounts of miso, shoyu, and natto produced in Japan. In Korea in 1978 an estimated 51,237 metric tons of soybean paste, 97,830 kiloliters of soy sauce, and 33,525 metric tons of gochujang (hot pepper paste) were produced. Also discusses the amounts of tofu, tempeh, and miso made in the USA. Address: USDA, Peoria, Illinois.

6299. *Manna Bulletin*. 1983. Miso en shoyusnoep [Miso and shoyu sweets]. 5(3):1. May. [Dut]
Address: Meeuwenlaan 70, Amsterdam, Netherlands.

6300. **Product Name:** [Tofu Burgers (Garlic / Herbs, Black & Green Olives, Mushrooms, Provencale with Tomato & Olives, Emmenthal Cheese)].

Foreign Name: Croque Tofou (Ail / Fines Herbes,

Olives Noires et Vertes, Aux Champignons, Provençale, Emmenthal).

Manufacturer's Name: Société Soy.

Manufacturer's Address: Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.

Date of Introduction: 1983. May.

Ingredients: Garlic/Herbs: French-grown soybeans, rolled oats (organically grown), soy sauce, sunflowerseed oil, aromatic herbs.

Wt/Vol., Packaging, Price: 160 gm vacuum pack, 2 croquettes per pack.

How Stored: Refrigerated, 30 day shelf life.

New Product–Documentation: Richard Leviton. 1983. Oct. 16-17. Visit to Societe Soy in Cerny. The company produces 10,000 Tofu Croques (burgers) a week in 6 flavors. They are vacuum packed for a 3 week shelf life, refrigerated. The Labels. 1983, undated. 2.75 inches diameter. Self adhesive. Red and green, brown, yellow or black on white. Flavors include Olives, and Garlic & Fines Herbes. Ad in Le Compas. 1986. March-April. No. 26. p. 32. Letter from Bernard Storup. 1984. March 22. They now make 1,400 kg/week of tofu burgers. Label for Ail-Fines Herbes from about 1986. 3.5 by 6.5 inches. Red, green, yellow, blue, and white. Self adhesive. Address is still Cerny. Letter from Bernard Storup. 1989. March 3. The first 5 varieties were launched in May 1983. Three more were launched in March 1985, which see.

New Labels (for Ail et Fines Herbes, Provençale, Forestiere, Emmenthal). Introduced in Jan. 1989. 3.25 by 5.25 inches. Self adhesive. Green, gold, and one other color on a white background. Beautiful color combinations and design. But the labels are confusing since each says "Léger" at the top but these are different from Croque Tofou Léger. "Mention Nature et Progres logo."

Letter from Bernard Storup. 1990. Dec. 26. Since Jan. 1989 this product has been the same as Dorés de Soja (Tofu Burgers) but with different packaging.

6301. Steinkraus, Keith H.; Cullen, R.E.; Pederson, C.S.; Nellis, L.F.; Gavitt, B.K. eds. 1983. Handbook of indigenous fermented foods. New York, NY: Marcel Dekker. ix + 671 p. May. Illust. Index. 26 cm. Microbiology Series, Vol. 9. [200+ ref]

• **Summary:** Contents: Foreword by E.J. Da Silva. Preface. 1. Indonesian tempeh and related fermentations: Protein-rich vegetarian meat substitutes. 2. Indigenous fermented foods involving an acid fermentation: Preserving and enhancing organoleptic and nutritional qualities of fresh foods.

3. Indigenous fermented foods in which ethanol is a major product: Types and nutritional significance of primitive wines and beers and related alcoholic foods.

4. Indigenous fermented amino acid / peptide sauces and pastes with meatlike flavors (p. 433-571): Introduction.

(A) Soy sauces: Japanese shoyu: Koikuchi, usukuchi,

and tamari; Chinese chiang-yu, by Tamotsu Yokotsuka (p. 437-51). Taiwanese soy sauce, by Liu (p. 451-56). Malaysian soy sauce: Kicap, by Ong, Mercian, Poesponegoro and Tanuwidja (p. 456-61). Indonesian soy sauce: Kecap, by Saono, Poesponegoro and Tanuwidja (p. 461-65). Korean soy sauce, by Chang (incl. homemade kanjang and meju, p. 465-66). Taiwanese black bean sauce: Inyu, by Jan et al. (p. 466-67). Philippine taosi [fermented black soybeans], by Steinkraus (p. 467).

(B) Fermented soybean pastes: Japanese miso, by Ebine, Shurtleff and Aoyagi (p. 468-79). Indonesian tauco, by Saono et al. and Winarno (p. 479-82). Korean Doenjang and kochujang, by Chang, Shurtleff and Aoyagi (p. 482-87).

(C) Fermented fish-shrimp sauces and pastes (p. 487-526).

(D) Fish-soy sauce and fish-soy paste, by Ismail (p. 526-30).

(E) Miscellaneous Oriental fermentations. Japanese natto (itohiki natto), by Hayashi and Ota (p. 530-45). Japanese Hama-natto (hamanatto) and related products (incl. yukiwari natto, p. 545-47). Chinese red rice: Anka (Angkah [ang-kak, angkak]), by Lin, Su and Wang, Sooksan and Gongsakdi, and Pichyangkura (p. 547-53). Chinese sufu, by Su and L.-P. Lin (incl. nyufu, p. 553-61). Note: Chapter 4 contains about 195 references.

5. Mushrooms: Producing single cell (microbial) protein on ligno-cellulosic or other food and agricultural wastes.

6. General papers related to indigenous fermented foods: Contributions of the western world to knowledge of indigenous fermented foods of the orient, the importance of microbial genetics in indigenous food fermentations, new uses for traditional food fermentations, mycotoxin problems in indigenous fermented foods and new methods for mycotoxin analysis.

Less widely known fermented foods include: Idli, dosa/dosai, dhokla (with soy, 131-35), enjera (162), tef/teff (164), wot (165), hopper (173), kishra (175), lambic (179), ogi (with soy, 189-98), mahewu (203), gari (208), dahi (249-57), srikhand and lassi (256-57), laban rayeb, laban zeer, yogurt (257-59; cultured soy yogurt is mentioned on p. 616), liban, mast, mass, taw (260), tairu (with soy, 260-65), kishk or kushuk (267), Metchnikoff (266), trahanas or tarhanas (271-76), rabdi, jalebi (275), koumiss (276), kefir (277-80).

Alcoholic beverages and foods: Honey wine, mead, metheglin (305), tej (306), sugar cane wines, basi, bubod, binubudan (307), palm wine or toddy (315-28), pulque (328-37), kaffir (344), tesguino (352), bouza (357), pito (358), busaa (365) sake (373-79), yakju and takju (379), tape = tapeh (381-400), ragi (381), tapuy (400), lao-chao (402), madhu (406), brem (408), tropical vinegar (410-14), nata (414-20), tea fungus (421), nuoc-mam (516-21).

Reviewed in Scientific American (Nov. 1983, p. 37), and in Bio/Technology (1984. p. 364). Address: Inst. of Food Science, Cornell Univ., Geneva, New York.

6302. Wakabayashi, Keiji; Ochiai, M.; Saito, H.; Tsuda, M.; Suwa, Y.; Nagao, M.; Sugimura, T. 1983. Presence of 1-methyl-1, 2,3,4-tetrahydro- β -carboline -3-carboxylic acid, a precursor of a mutagenic nitroso compound, in soy sauce. *Proceedings of the National Academy of Sciences, USA* 80(10):2912-16. May. [33 ref]

• **Summary:** Japanese-style fermented soy sauce (shoyu) was found to contain precursors of bacterial mutagens. The authors postulated that these substances may be related to the relatively high incidence of stomach cancer in Japan, which is 8-fold higher than that observed in the United States. The model advanced by these researchers holds that nitrite in the gastrointestinal tract (from consumption of vegetables containing nitrate) might react *in vivo* with the mutagen precursors in soy sauce, resulting in generation of one or more carcinogenic nitroso compounds. Address: National Cancer Research Inst., Tsukiji 5-1-1, Chuo-ku, Tokyo 104, Japan.

6303. Yokotsuka, Tamotsu. 1983. Nihon no shōyu [Japanese shoyu]. Paper presented at spring meeting of Nihon Kagaku Kai at Doshisha University, Kyoto, Japan. 6 large-format pages. Handwritten, unpublished manuscript. [Jap] Address: Kikkoman Corp., Noda-shi, Japan.

6304. Mayer, Jean; Goldberg, Jeanne. 1983. Nutrition. *Washington Post*. June 1. p. E4.

• **Summary:** A reader writes to ask about the sodium content of Chinese condiments. Ans: In the April 1983 issue of the *Journal of the American Dietetic Association*, Theresa Chew, a registered dietitian, published statistics (including sodium content) on 14 different condiments commonly used in Chinese cooking. For some condiments, she found considerable variation among brands.

Although Chinese condiments are generally considered to have a very high sodium content, several contained less than 200 milligrams of sodium per teaspoon. They are: sweet bean sauce, hoisin sauce, satay sauce, fermented bean cake [fermented tofu], fermented black beans, and dried shrimp.

6305. Shurtleff, William. 1983. Fly from Beijing to Harbin, capital of Heilongjiang province (June 5) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 9-10. Unpublished manuscript.

• **Summary:** Harbin is in northeast China, situated on the southern bank of the Songhua River. With a population of about 8 million, it is the tenth largest city in China and the center of China's soybean growing areas.

Harbin is originally a Manchu word meaning "a place for drying fishing nets."

We stay at the International Hotel—the best in town.

From the air we can see that northeast China is a vast, vast expanse of flat, fertile land, excellent for farming except for the cold northern latitude. There are few houses or people. The city is dirty and dusty. Mostly brick and mud houses. Looks poor, despite the wealth of natural resources. The Soybean Research Institute is 30 minutes by car/taxi from the International Hotel, where we stayed.

I walk to the nearby Nan-Gan She Chan Market, but there is no sign of soybeans, tofu, etc. Also, no tofu on the hotel menu.

Zhang Guodong is director of the Soybean Institute in Harbin. Wang Jingling (of soybean fame) is now governor of Heilongjiang Province.

Friendship Store: Soy sauce. The best and most expensive soy sauce is superior soy made in Guangzhou (Canton). Ingredients: soybeans, wheat flour, salt, water. 623 mL retails for ¥1.15 at the Friendship Store. It's all called *Jiang You*. The second best soy sauce is *Xiang Zhi* soy, made in Beijing. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6306. Shurtleff, William. 1983. In Harbin (June 6-7) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 10-12. Unpublished manuscript.

• **Summary:** 6:00 a.m. I walk to the local market. See one stall (a mobile cart) selling gelled tofu curds (*doufu-fa*) over which is poured a sweet brown sauce then topped with some diced red chilies and green herbs. Served with deep-fried breadsticks. One other place serves soymilk hot with deep-fried breadsticks. No tofu at all in the market. Some say it is sold only in winter. No other soyfoods seen.

Soymilk terminology: (1) Dou Nai—it sounds more modern than "Dou Jiang." Implies or connotes no beany flavor, is thicker and has a higher protein content. (2) Dou Ru—(Alfa Laval used this) is harder to pronounce.

[Henan Area grows lots of soybeans]: more than Heilongjiang? The money to build soymilk plants in China is partially foreign capital. People and institutions are falling all over each other to help China develop "China Orient Leasing." 50% are Japanese.

Eaton [Eton], A consortium from Cleveland, Ohio, is planning to build a \$50 million oil extraction and protein refining plant in Jiamusi. Oil = extract, refine, make margarine, shortening, etc. Protein = feed, isolate, concentrate, tofu and soymilk production.

Tuesday June 7, 1983 (Harbin): Min-Lite = the Ministry of Light Industry is interested in a soymilk plant. Also, the State Farm Bureau (Bean processing division) and the Soybean Institute is working in breeding (for both protein and oil), diseases, and physiology.

Soymilk Taste Tests in Harbin: Chocolate was vastly the first choice, second was sweetened, third was plain / dairy-

like. They dislike added oil in soymilk and would like to try fruit-flavored soymilk (apple, pineapple). Added fat coats the mouth with a greasy / gummy film. Vitasoy has no added fat.

Dou Ru Fen: Niu Nai Mai Jing. 205 gm. This product consists of a white powder containing 10% cow's milk powder, 40% soymilk powder (spray-dried traditional soymilk, not soy flour), and 50% (!) sugar. 1000 tonnes a year are made, starting in 1978 or 1979. Sold to housewives who use it to make breakfast soymilk. Costs RMB 0.78–0.80 = 70–80 cents. Cow's milk powder is stirred into hot soymilk. The mixture is concentrated and spray dried. Also made in Beijing, but this one is the best quality.

Pure: Soymilk powder is made in Beijing by Beijing Foodstuff Corp. since 1980. Called Doujiang-Fen (Soymilk powder) and also retailed to housewives for breakfast use. It is 50% powdered soymilk and 50% sugar. It is spray dried.

Fresh green soybeans (Maodou = Hairy bean): Mostly eaten by farmers. Also sold in markets. Not packaged or canned. Whole dried soybeans: some canned in China. It is sold in Beijing.

Tofu in Heilongjiang: None is sold during the summer because it spoils easily and people do not like to eat tofu in the summer. A lot is sold in winter.

Soybean use: Of China's 9 million tonnes produced, one man estimates that 80% of soybeans are crushed. The meal is used mainly for feed, but some for tofu, soy sauce, and textured vegetable protein (TVP).

Main uses for foods made with whole soybeans in approximate order: (1) Tofu and kan-dofu. (2) Soymilk. (3) Soy sauce. (4) Miso = Doujiang. (5) Yuba. (6) Fermented tofu.

Main uses for foods made with defatted soybean meal: (1) Tofu. (2) Soy Sauce. (3) Miso. (4) Soymilk.

Soy nuggets [fermented black soybeans] are made only in the south of China. This state farm bureau man estimates that there are 200,000 tofu shops in China, one in every village, but there are no statistics on tofu.

Big tofu factory in Harbin. Ministry of Light Industry people in charge. He does not think as many soybeans will ever be used for soymilk as for tofu.

Many government groups are doing research on soyfoods, such as tofu and soy sauce, but no single group. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6307. Tara, Bill. 1983. Re: Comments on William Shurtleff's "History of Macrobiotics" manuscript. Letter to William Shurtleff at Soyfoods Center, June 9. 2 p. Typed, with signature on letterhead. [1 ref]

• **Summary:** "I would check the reference to Paul Hawken owning 50% of the stock in Erewhon. My reason for this is as follows: During this period of time there were many discussions which took place between myself, Paul, the

Kushi's and others regarding an equitable distribution of stocks in the company to the management. No plan was ever finalized. Paul's desire was 50% for himself. Michio and Aveline were hesitant since that would have meant that future stock participation by management would be severely limited. It was my understanding that the upshot of these discussions was that Aveline would hold the shares in her name in trust until such time that an equitable proposal was put forward by management. In lieu of stock participation, many employees including Paul, myself & Roger Hillyard were given cash bonuses and extensive time off from our work to pursue our own travels and study. (Paul went to Japan under such an arrangement, Roger traveled through the U.S. and I traveled through Europe.)"

"Paul did not 'set-up' Mitoku & Muso. They were already in operation and exporting. Paul did however, cement a good relationship with these companies and make more efficient arrangements for shipping and quality control.

"As per Paul's shock regarding the shares. I can only say as stated above, plus the fact that what you want and what you have are two different things, if the shares had been legally his, they could not have been taken away and Paul could never be accused of having been ignorant of the law in business matters."

"Erewhon in Los Angeles was started by myself and Aveline Kushi. I had moved to Los Angeles to set up a center there immediately after establishing a center in Chicago [Illinois] and getting the shop opened. The shop was opened in 1970 and our original purchase of miso and tamari were made through Chico-San. We later received our first direct shipment from Japan prior to Paul's arrival. I was joined by Bruce Macdonald and we began distribution up the California coast as far north as San Francisco, distributing miso and tamari as well as some Japanese condiments and seaweeds to small co-ops and natural food shops. Our biggest customers were the co-ops in Berkeley and Fred Rohe in San Francisco."

"What can I say regarding Paul's impression of Erewhon in 1970? We were all younger then. My impression was that Erewhon was a very happy place to work at Farnsworth Street. There was a high degree of comradery [camaraderie] and a poor understanding of business. The words arrogant and dogmatic were words often used to describe Paul—rightly or not.

"Bill, I hope these comments are not in any way taken to be disparaging of Paul and his involvement in the natural foods movement. His energy and vitality combined with his sharp business sense was one of the main driving forces behind the wide distribution of Japanese foods. Combined with Michio's educational work, this forged the beginning of the wide acceptance that we are now seeing for many of the traditional food items. It would be sad, I think, to allow Paul's own personal frustrations to overly color what was

an exciting and adventurous experience for all involved.”
Address: The Kushi Institute, P.O. Box 1100, Brookline,
Massachusetts 02147. Phone: (617) 731-0564.

6308. Shurtleff, William. 1983. In Beijing (June 10-11)
(Document part). In: William Shurtleff. 1983. Log of
Soyfoods Research Trip to China and Japan: 29 May to 10
July. Lafayette, California: Soyfoods Center. 117 p. See p.
20-23. Unpublished manuscript.

• **Summary:** Soy sauce, miso, and fermented tofu (*doufu-ru*)
are all sold at one type of store, a pickle shop that sells salted
foods. I visited one of these named *Tien Yuan Jiang Yuen*. A
color photo (above) shows various types of soy sauce sold in
Beijing.

In the market, the sign above the soyfoods section reads
Douzhi Shipin. In this section they sell *fuzhu* (bamboo yuba
[dried yuba sticks]), Doufu-fen (a type of soy flour made
in Beijing), cubes of fried tofu (1 inch on a side, called
doubao).

Note: This is the earliest English-language document
seen (May 2012) that contains the term *doubao*.

In 1949 the East Asiatic Co. (which is owned by rich
Danes) was the leading exporter of soybeans from China.
They started exporting soybeans from China in the 1920s.
When exporting, they had offices in Dalian (Dairen),
Harbin, etc. The company now has about 80,000 employees
worldwide. It is the biggest company in Denmark and the
biggest foreign trading company in China, except for several
Japanese companies such as Marubeni, Nissho Iwai, etc.

June 11, Saturday. Beijing seminar #1 in downstairs

room. Talk with Mr. Chen of the Food and Fermentation
Research Institute. Mr. Chen says the most popular vegetable
oils in China are: 1. Peanut. 2. Soy (not generally refined). 3.
Rapeseed.

Two organizations do research on soyfoods in Beijing:
(1) His Food and Fermentation Research Institute (under
MinLight, the Ministry of Light Industry); three people who
work there are Mr. Chen, Mr. Dai Jiakun, and Mrs. Xu Lin.
(2) Beijing Municipal Food Research Institute; contact Mr.
Dai Xinjun (Dong [East] Zongbu Lane, Beijing).

Four acid tests for the buyer of any soymilk process and
equipment: (1) Equipment cost (fixed). (2) Processing cost
(including labor, energy, water, etc.). (3) Soymilk flavor. (4)
Protein and solids recovery (percentage).

The Chinese name for thin pressed tofu sheets (“1,000
sheets / 1,000 folds) is Qianzhang or Baiyeh.

The best local markets (which have more variety of
produce in the winter) are: Chongwen Vegetable Market
and Xidan Vegetable Market (Chinese characters are given
for both). The Chinese term for “soyfoods” is *dadou shipin*
(“soybean products”).

There is a new Chinese method (in Shanghai) for
continuous pressed tofu sheets.

Commercial soy products made by Mr. Chen’s institute:
(1) Formulated soymilk for infant food. (2) Soy protein
concentrate. (3) Later a modern soymilk plant will use this
to make (1). Plain and sweetened soymilk in glass bottles,
plus fruit (citrus = orange flavor) and malt. There are some
technical problems with using plastics bags as soymilk
containers; they leak and are fairly expensive. Later he will

work on a lactic soymilk drink.

Research on soy sauce: Improved method. Low salt, done in factories in Beijing and Shanghai.

Most soy oil in Beijing is not refined. People like the flavor OK, but they do not know the refined flavor. Rapeseed oil is used mostly in South China. In Beijing, mostly peanut and soy oil; peanut is more expensive and has a higher class image. Rapeseed is the cheapest but people don't like it.

The debate over more meat vs. more protein. Recently Chinese officials have come to understand the problem better. Send him *Diet for a Small Planet*, by Lappé.

In 3-4 months, Mr. Chen will send me an article about soyfoods in China—Tell Ira Leviton.

I visit a bookstore and buy a pinyin dictionary and a book (published last year in Chinese) about tofu. Visit the Forbidden City and a very famous square in central Beijing. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6309. Shurtleff, William. 1983. In Beijing (Monday, June 13) (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 32-33. Unpublished manuscript.

• **Summary:** Some reflections: China has not yet begun to modernize its tofu and miso industries like Japan has.

From Terrence Foley, try to get a list of key people involved with soy in China for our mailing list.

Morning in the Beijing market: A line of 15-20 people. No fresh tofu. Lots of (1) Deep-fried tofu cubes. (2) Tofu noodles/shreds. (3) Scraps of firm tofu that have been simmered in soy sauce (heat and salt extend the shelf life). (4) Deep-fried or simmered tofu "fingers"—1½ by 1½ by 5 inches. (5) Tofu roll made of pressed sheets. Most tofu in the market this morning uses soy sauce simmering or deep-frying to preserve it; there is no refrigeration and no fresh "white" tofu.

Vegetarian delicatessen named Quan Zu Zhai at Ba Mien Tsao near Wang Fujin: At 8:15 a van pulls up and unloads its total contents of buckets and trays of 18 types of meatless meat analogs. They are all Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6310. Kazama, Akiyoshi. 1983. Early years of selling macrobiotic foods to the western world (Interview). *SoyaScan Notes*. June 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mr. Kazama worked for a German export company named Ravenna; he ran their Tokyo branch office, exporting machines, cameras, transistors, etc. That company started in 1959.

He first heard of macrobiotics (before Paul Hawken arrived in Japan) from Mr. Shin Obayashi, a friend of his

from Waseda University. Obayashi and Michio Kushi (from Tokyo Univ.) had won Japanese government scholarships to study in the United States. Both studied at Columbia University. Obayashi is no longer living. Mr. Kushi asked Obayashi to help him find a company in Japan from which Kushi could import Japanese natural foods. Before that, Kushi had to buy such foods from Chico-San at very high prices, like medicine. Mr. Obayashi contacted Mr. Kazama. Mr. Kushi found out the names of Chico-San's sources by reading the Japanese labels on their products. He sent these names to Mr. Kazama, who in turn bought the foods from Chico-San's sources. Evan Root and Paul Hawken suggested that Kushi and Erewhon should buy directly from Japan.

Mr. Kazama was accustomed from his office machines business to taking a low markup, so he charged Erewhon a commission of only 10%. Thus Erewhon got low prices, which was a key to their success. Mr. Kazama shipped the first order to Erewhon 3-4 months before Hawken arrived in Japan. Hawken's brother-in-law, a lawyer, helped provide the funds for opening the first letter of credit. In about 1969 Mr. Kazama established a new company named Mitoku, which he owned. It was independent of Ravenna.

Originally Mr. Kazama had bought his shoyu from Marushima, but Muso objected, saying it was their exclusive source. Muso asked Marushima to stop selling to Kazama, which Marushima did. Kazama then searched the length of Japan to try to find a company that still made shoyu in the traditional way. He finally located Sendai Miso Shoyu. Sasaki Jube, the 7th generation owner, made both traditional and modern shoyu products. He set aside a warehouse for only his traditional products, and insisted that all his brewmasters should master the traditional process first. Sasaki eats brown rice. Mr. Kazama found Sendai by himself and first went there alone. Sendai first sold its existing traditional product to Kazama in about 1970, then they expanded their production by adding on new fermentation rooms as orders increased.

Sendai has a special process for keeping a large amount of shoyu moromi in a huge vat; they then use half of this in each new batch, so that part of each batch is old and part new. Thus the finished product is not clearly 2 years old but maybe an average of 2 summers old. Thus in each bottle, there may be some shoyu that is 3 or 4 years old. Sendai gets very consistent quality. They still use well water, but the maximum amount they can use is limited by the government.

Today Mitoku's biggest customer is Westbrae, followed by Erewhon. Address: President, Mitoku Co., Tokyo, Japan. Phone: 03-201-6706.

6311. Yokotsuka, Tamotsu. 1983. Re: Answers to questions about shoyu and its history. Letter to William Shurtleff at Soyfoods Center, June 26. 4 p. Handwritten, on letterhead. [Jap; eng+]

• **Summary:** A photo shows: Dr. Kazuya Hayashi (left) and Dr. Tamotsu Yokotsuka (right). Address: Kikkoman, Noda, Japan.

6312. Yokotsuka, Tamotsu. 1983. Thoughts on shoyu: Terminology and history (Noda, Japan, June 28-29) (Interview). In: William Shurtleff. 1983. Report on Soyfoods Research Trip to Hong Kong, China, Singapore, and Japan: May 29 to July 10, 1983. Lafayette, California: Soyfoods Center. 117 p. See p. 69-83. Unpublished manuscript. Address: Noda, Japan.

6313. Mayer, Jean; Goldberg, Jeanne. 1983. Nutrition: A good pasta salad need not be hopelessly high in calories. *Washington Post*. June 30. p. L50.

• **Summary:** Another reader writes to ask for more detail about the sodium content of Chinese condiments. Ans: The one brand of brown bean sauce analyzed contained 425 mgs of sodium per teaspoon.

Likewise the sodium content of soy sauce depends much more on the brand than on whether it is a light or a dark sauce. Among the three brands of light soy sauce tested, sodium values ranged from a low of 320 mgs to a high of 445 mgs per teaspoon, while among the dark soy sauces, the five brands tested ranged from a low of 310 mgs to a high of 495 mgs per teaspoon.

6314. **Product Name:** Tofu Delight Tempeh Salad [Curry, or Herb].

Manufacturer's Name: Appropriate Foods, Inc.

Manufacturer's Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1983. June.

Ingredients: Organic tempeh, brown rice, miso, tamari, herbs, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Catalog. 1983. June. In June 1984 changed to New York Soy Deli brand. Label. 1984. June. 1.5 by 3 inches. Black on orange. Distributed from June 1984 to June 1986.

6315. Fogg, John. 1983. Marketing natural tamari in the U.S. *Soyfoods*. Summer. p. 64, 66, 68. Address: Harris & Fogg, Boston.

6316. Fruin, W. Mark. 1983. From philanthropy to paternalism in the Noda soy sauce industry: Pre-corporate and corporate charity in Japan. *Business History Review* 61:168-91. Summer. * Address: Menlo Park, California.

Ger] • **Summary:** Contents: Introduction, nutritional composition, amino acids in soy sauce. Unfermented soy products: Soymilk, tofu (*sojaquark*), aburage, kori-tofu, yuba, kinako. Fermented soy products: Soy sauce, miso (*sojapaste*), tempeh, sufu, natto. Address: Institut fuer Lebensmittelchemie, Hannover Univ., Wunstorfer Str. 14, D-3000 Hannover 91 [West Germany].

6318. **Product Name:** Incredible Vegetable Turnover (with Tofu).

Manufacturer's Name: Laughing Moon Food Company.

Manufacturer's Address: 220 Third Ave., Venice, CA 90291.

Date of Introduction: 1983. June.

Ingredients: Filling: Onion, green pepper, tofu, bean sprouts, peas, potatoes, spices, shoyu. Crust: Whole wheat flour, water, vegetable oil, sea salt.

Wt/Vol., Packaging, Price: 4.5 oz in plastic bag.

How Stored: Frozen.

Nutrition: Per 4.5 oz. turnover: 294 calories, 7 gm protein, 23 gm carbohydrates, 14 gm fat, 44 mg sodium.

New Product–Documentation: Spot in *Soyfoods*. 1983. Summer. p. 54. "Turn Over Tofu."

6319. Milbury, Peter. 1983. Soy sauces: Maybe not so natural. *Soyfoods*. Summer. p. 65, 67, 68.

Address: Operations director, Chico-San Inc., Chico, California.

6320. **Product Name:** Tempeh Burgers.

Manufacturer's Name: Nasoya Foods (Distributor). Made in Greenfield, Mass., by The Tempeh Works.

Manufacturer's Address: Mechanic St. Ext. (P.O. Box 841), Leominster, MA 01453.

Date of Introduction: 1983. June.

Ingredients: Organic soy tempeh, natural soy sauce, herbs, spices.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1983, undated. 4 inches square. Yellow, black, blue, green. “100% natural.” Coupons. 1983. Dated.

6321. **Product Name:** Chili Con Tofu.

Manufacturer’s Name: San Diego Soy Dairy.

Manufacturer’s Address: 2965 5th Ave., San Diego, CA 92103.

Date of Introduction: 1983. June.

Ingredients: Incl. kidney and pinto beans, tofu, a vegetable variety, green chilies, tamari.

Wt/Vol., Packaging, Price: 16 oz deli container.

How Stored: Refrigerated.

New Product–Documentation: Spot in Soyfoods. 1984. Summer. p. 45. “Tofu Ole.” Talk with Gary Stein. 1989. Feb. 17. He thinks this product was introduced in about June 1983.

6322. **Product Name:** San-J Brown Rice Crackers (Seasoned with Tamari) [Teriyaki, Sesame Sunflower, Pumpkin, Vegetable, or Szechuan].

Manufacturer’s Name: San-J International, Inc.

Manufacturer’s Address: 3236 Boulevard, Colonial Heights, VA 23834.

Date of Introduction: 1983. June.

Ingredients: Whole brown rice, various seeds, teriyaki or tamari soy sauce.

Wt/Vol., Packaging, Price: 2.3 to 3.5 oz cellophane bag.

How Stored: Shelf stable.

Nutrition: Per 100 gm.: 376 calories, 7.9 gm protein, 85.7 gm carbohydrates, 690 mg sodium.

New Product–Documentation: Spot in Soyfoods. 1983. Summer. p. 54. These are the traditional senbei of Japan. On package: “Wheat free, made with whole brown rice, no oils—they’re baked. The perfect 100% natural snack.” East West. 1987. Sept. Inside rear cover. “Most Honorable Crunch.”

6323. *Soyfoods*. 1983. The soyfoods industry on display [at Natural Foods Merchandiser Expo in Anaheim, California and Whole Life Times Expo in San Francisco]. Summer. p. 7.

• **Summary:** Sixteen soyfoods companies exhibited at Anaheim to 7,600 paying visitors. “Six soyfoods companies shared an official Soyfoods Association booth, where they retailed their own products and provided liberal tasting samples as well. Participants included Legume Inc. (tofu pizza, tofu lasagna), Farm Foods (Ice Bean, in cones), Quong Hop (tofu burgers, tofu canolli, soymilk), Sonoma Specialty Foods (tofu salads, tofu cheesecakes), Laughing Moon (vegetable tofu turnovers), and San-Jirushi International

(samples of San-J Real Tamari). The Association booth, one of 10 food catering booths at the Expo, was ‘packed solid through the whole show,’ reports Farm Foods’ Robert Pepper.”

“William Shurtleff gave a one hour speech and slide presentation on soyfoods to an enthusiastic audience.”

Other interesting companies include: Pacific Tempeh, Light Foods, Essential Foods, Garden of Eatin’, Living Lightly, Kibun, Westbrae Natural Foods, Edward & Sons, Cedarlane Foods, Morinaga, Worthington Foods.

Interesting products: Light Links tofu “hotdogs,” Ravioli, Tofumale Tamale, Tempehroni Pizza, Chili Con Tempeh, Tempeh Enchilada.

Photos (without captions) show: (1) Danielle Lin of Laughing Moon. (2) Steve Snyder of Hinode. (3) The Morinaga booth, with Mr. Seishiro Ikegami.

6324. **Product Name:** Oregon Country Soysage (Meatless Okara-based Sausage).

Manufacturer’s Name: Surata Soyfoods.

Manufacturer’s Address: 302 Blair Blvd., Eugene, OR 97402. Phone: 503-343-8434.

Date of Introduction: 1983. June.

Ingredients: Okara, organic wheat flour, yeast, oil, tamari, honey, mustard, allspice, pepper, cayenne pepper, fennel, garlic powder, sea salt, oregano.

Wt/Vol., Packaging, Price: 8 oz tub.

How Stored: Refrigerated.

New Product–Documentation: Label, undated. Circular. Green, brown, white, and blue. “100% natural. 100% meatless. Ready to eat, or as patties, pizza garnish, in pasta sauce, scrambled with eggs or tofu, in stuffed mushrooms or peppers.” This was formerly “Devi’s Country Soy Sausage,” made by another nearby company. Surata discontinued the product in Aug. 1989.

6325. **Product Name:** Supreme-Bean Tempeh Burger.

Manufacturer’s Name: Wildwood Natural Foods.

Manufacturer’s Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1983. June.

Ingredients: Tempeh, whole grain bread, lettuce, celery, cucumber, green pepper, onion, tofu dressing (UFO Tofu by Wildwood, safflower oil, mustard, apple cider vinegar, garlic, sea salt), tomato sauce, mustard, tamari, lemon juice, spices, sea salt.

How Stored: Refrigerated.

New Product–Documentation: Soyfoods. 1983. Summer. p. 42-43. Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on white. Silhouette of woods with birds. “Fresh Daily. Ready to eat Foods, Naturally. Perishable. Keep Refrigerated.”

6326. Noda, F.; Sakasai, T.; Osaki, K.; Akao, T. 1983.

[Continuous quick brewing of soy sauce]. *Japanese Patent* 1,159,337. July 25. [Jap]*

• **Summary:** Attempts to shorten the time for soy sauce production have included a quick hydrolysis of raw materials with no or low salt content; another was a process divided into anaerobic lactic acid fermentation, aerobic yeast propagation, and anaerobic alcohol fermentation.

6327. Chico-San, Inc. 1983. America's first macrobiotic food company: What do we mean by first? (Ad). *East West Journal*. July. p. 13. Also in *Whole Foods*, July 1983.

• **Summary:** Chico-San describes itself as "A company built on a philosophy." Address: P.O. Box 810, Chico, California 95927.

6328. Fukushima, Danji. 1983. Fermented soy foods in the United States. *INTSOY Series* No. 25. p. 117-19. B.J. Irwin, J.B. Sinclair, and Wang Jin-ling, eds. *Soybean Research in China and the United States* (College of Agric., Univ. of Illinois at Urbana-Champaign).

• **Summary:** Although chemically hydrolyzed soy sauce is widely consumed, fermented soy sauce has an annual growth rate of 15%. La Choy and Chun King, the two largest producers of chemical soy sauce, are assumed to have a combined annual production of 20,000 kiloliters. Most of the fermented soy sauce is produced by Kikkoman Foods, Inc. and annual production has reached 19,000 kiloliters.

Soy sauce manufacturing consists of three main processes: koji making, brine fermentation, and refining. Major improvements in the soy sauce process are (1) high temperature short time cooking of the soybean flakes to increase the yield, (2) use of an artificial mutant of *Aspergillus sojae* which produces twice as much proteolytic enzyme, (3) use of automatic koji making equipment, and (4) use of *Pediococcus halophilus* and *Saccharomyces rouxii*, and proper temperature control during brine fermentation. Address: Kikkoman Foods, Inc., Walworth, Wisconsin.

6329. Guo, Xiang-ao. 1983. Research on heat denaturation of soy protein after solvent extraction, and traditional Chinese soy foods. *INTSOY Series* No. 25. p. 64-66. B.J. Irwin, J.B. Sinclair, and Wang Jin-ling, eds. *Soybean Research in China and the United States* (College of Agric., Univ. of Illinois at Urbana-Champaign).

• **Summary:** Solvent extracted soybean flakes and meals (moisture content 9.6%) were subjected to 80°C, 90°C, and 100-105°C temperatures for 15 or 20 minutes. The critical temperature for protein denaturation was 80°C. At higher temperatures, solvent-extracted soybean meal was denatured more rapidly than soy flakes. Preparation of the following traditional Chinese soyfoods was described briefly: Soy sprouts (*dou ya*), soybean jiang (*dou jiang*), fermented black soybeans (*dou chi*), soy sauce (*jiang you*), soy beverage (*dou jiang*), tofu (regular and soft, *doufu*), firm tofu (*doufu gan*),

pressed tofu sheets (*doufu yi*), vegetarian chicken (*su ji*), fried tofu (*you-doufu*), fermented tofu (*doufu-lu*), and yuba (*doufu pi*).

Note: This is the earliest English-language document seen (May 2012) that uses the term *doufu pi* (spelled in pinyin) to refer to yuba, which he describes as follows: "Soy beverage is poured into a shallow pan and heated slowly. A protein film forms on the surface. This film is rolled and dried until it resembles bamboo. The taste and composition are similar to textured soy protein. It is a very nourishing food." Address: Zhengzhou Grain College, China.

6330. **Product Name:** [Kikkoman Instant Tofu Miso Soup (Soybean Paste Soup with Tofu)].

Foreign Name: Tōfu Misoshiru.

Manufacturer's Name: Kikkoman Corporation.

Manufacturer's Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1983. July.

Ingredients: Powdered miso, dehydrated tofu, dried seaweed, monosodium glutamate, powdered yeast extract, powdered dried bonito, dehydrated leek.

Wt/Vol., Packaging, Price: 1.5 oz (30 gm). Foil packet containing 3 individual foil packets. Makes 2/3 cup.

How Stored: Shelf stable.

New Product-Documentation: Label. 1983. 5.5 by 7 inches. Plastic packet. Brown, red, green, and yellow on white. Full color picture of wooden bowl of miso soup on tray. Individual foil packets inside are 2.75 by 4 inches. Brown, black and red on white. Picture of bowl of soup on front, instructions on back. Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. "Distributed by Kikkoman Corporation, Noda 278, Japan." Text on label in both English and Japanese.

Note: This is the earliest known commercial soy product that uses dried-frozen tofu as an ingredient.

6331. Norin Suisan-sho, Nosan Engei Kyoku, Hatasaku Shinko-ka. 1983. *Daizu ni kansuru shiryo* [Statistics concerning soybeans]. Tokyo, Japan. 157 p. 26 cm. [Jap]

• **Summary:** This yearly report, published by Japan's Ministry of Agriculture, Forestry, and Fisheries (MAFF), is packed with detailed statistics on soybean production, trade, and utilization in Japan. The table on p. 129 gives statistics on miso production, shipments, and use of raw materials by prefecture and for Japan as a whole. In 1981 Japan produced 575,782 tonnes of miso and shipped 578,610 tonnes. Raw materials used were 14,417 tonnes of domestically grown whole soybeans, 167,539 tonnes of imported whole soybeans, 103,611 tonnes of polished rice, 24,667 tonnes of polished barley, 476 tonnes of defatted soybean meal, 71,325 tonnes of salt, and 96 tonnes of cornmeal (used mainly in Nagano and Hyogo prefectures). The top 5 miso producing prefectures were Nagano (164,510 tonnes; 28.6% of Japan's total), Aichi (54,529), Niigata (38,156), Aomori (28,602),

and Hokkaido (25,908). The source of these statistics is: Shokuryō-cho, Kakō Shokuhin-ka, Kome Mugi Kakō Shokuhin Seisan Dotai, Tokei Chosa.

The table on p. 130 gives similar statistics on shoyu for 1981. In 1981 Japan produced 1,190,618 kiloliters (kl) of shoyu and shipped 1,118,799 kl. Raw materials used were 6,473 tonnes of whole soybeans, 175,205 tonnes of defatted processed soybean meal (*dashi kakō daizu*), 177,407 tonnes of wheat, 204,777 tonnes of salt, and 80,642 kl amino acid liquid (*amino-san*, either purchased or made on site). The top 7 shoyu producing prefectures were Chiba (424,498 kl; 35.7% of Japan's total), Hyogo (203,374), Aichi (59,201 kl), Kagawa (45,430 kl), Fukuoka (36,575 kl), Oita (31,860 kl), Mie (30,354 kl). The source of these statistics is the same as for the miso statistics, above.

The table on p. 132-33 gives statistics on consumption of shoyu (in 100 ml), miso (100 gm), whole soybean foods (yen), tofu (cakes = *cho*), aburagē and ganmodoki (yen), natto (yen), and other soyfoods (yen) from 1963 (Showa 38) to 1981. Under shoyu, miso, and tofu is given the amount of money spent (*kingaku*), the quantity purchased (*sūryō*), and the price. Annual shoyu consumption per household has decreased from 30.5 liters in 1963 to 16.3 liters in 1981. Annual miso consumption per household has decreased from 18.4 kg in 1963 to 12.1 kg in 1981. Tofu consumption per household has remained about constant, with 87.3 cakes in 1963 and 86.9 cakes in 1981. A breakdown is also given for each food by annual household income, with 5 income levels. One grouping is for all households (including those with a retired head of household or on welfare) and the other is only households with at least one working member. In each case, the higher the household income, the greater the consumption. In the case of tofu, for example, households with an annual income of less than 2.65 million yen consumed 76.1 cakes of tofu, while households with an annual income of more than 5.8 million yen consumed 99.3 cakes. Next is a breakdown by age of head of household. Generally, the younger the head of household, the less the consumption. In the case of tofu, households whose head was 24 years or younger consumed 55.5 cakes/year, while households whose head was age 60-64 consumed 95.4 cakes. The source of these statistics is the *Kakei Chosa Nenpo* (*Sōri-fu, Tōkei-kyoku*).

The table on pages 134-35 shows consumption per household by geographical area of the same foods as the previous table. Geographical areas include: all of Japan, all cities, cities with 50,000 or more population (broken down into large, medium, and small), cities with less than 50,000 population, towns and villages (*machi* and *mura*), 14 major regions, and large cities. Note: Statistics by prefecture are not given. In the case of tofu, the highest consumption is cities with less than 50,000 population (92.0 cakes), while the lowest is in medium-sized cities with more than 50,000 population (84.2 cakes). The regions with the highest tofu

consumption are Tohoku (the northeast prefectures; 101.9 cakes) and Chugoku (southwest provinces; 98.1 cakes), while the lowest two are Hokkaido (58.3 cakes) and Okinawa (72.3 cakes). The cities with the highest annual tofu consumption per household are Toyama city (118.9 cakes), Morioka city (118.4), Yamaguchi city (107.9), Matsuyama city (102.9), Fukushima city (102.8), Tokushima city (102.0), Fukui city (100.7). The source of these statistics is the same as for the statistics on p. 132-33.

Tables on pages 136-39 give a detailed nutritional analysis of soybeans and each of 23 soyfoods made in Japan. The following minerals are listed: calcium, phosphorus, iron, sodium, and potassium. Vitamins: A (retinol, carotene, international units), B-1 (thiamine), B-2 (riboflavin), niacin, and C. Soybeans grown in Japan contain, on average, 35.3% protein and 19.0% fat, compared with 33.0% protein and 21.7% fat for soybeans grown in the USA, and 32.8% protein and 19.5% fat for soybeans grown in the China. Address: Tokyo, Japan.

6332. Product Name: To-Neu Natural Soy Beverage.
Manufacturer's Name: San-J International, Inc. (Importer). Made in Japan by Kibun Foods.
Manufacturer's Address: Colonial Heights, Virginia.
Date of Introduction: 1983. July.
Ingredients: Water, soybean, corn oil, honey, lecithin, calcium lactate, carrageenan.
Wt/Vol., Packaging, Price: 6.76 fluid oz (200 ml). Tetra Brik Aseptic carton.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per 6.76 fl oz.: Calories 117, protein 7 gm, carbohydrate 3 gm, fat 9 gm.
New Product-Documentation: Label. 1983. 2.5 by 3.25 inches by 1.5 wide. Paper carton. Orange, yellow, black, and white on green. "A refreshing new beverage made from whole soybeans! In the Orient, 'to-nyu' means 'soymilk.' Kibun TO-NEU is cholesterol free, and contains more protein than ordinary milk. TO-NEU is also rich in vitamin E." Ad in Whole Foods. 1983. July. "To-Neu soy drink is packaged to stay fresh and nutritious for months. The trick is keeping it around that long." Shurtleff & Aoyagi. 1984. Soymilk Industry & Market. p. 46-47. Front label reads: "San-J Kibun TO-NEU Natural Soy Beverage, Non-Dairy." Kibun specified that San-J could only sell the product to the natural and health food trades. Promoted for use as a refreshing drink, as a cereal topping, or in place of milk in sauces, soups, and desserts.

6333. Product Name: Soken Gentle Soy Sauce: Tamari with Less Salt.
Manufacturer's Name: Soken Trading, Inc. (Importer). Made in Japan.
Manufacturer's Address: P.O. Box 1705, Sausalito, CA 94965.

Date of Introduction: 1983. July.

Ingredients: Soybeans, whole wheat, sea salt, water.

Wt/Vol., Packaging, Price: Glass bottles.

How Stored: Shelf stable.

New Product–Documentation: Spot in Whole Foods.

1983. July. p. 52. This product contains only 7% salt (58% less than standard tamari soy sauce). It comes in 5-oz. (easy-pour) and 16 oz bottles. Note: This product has a new label and name. The previous name (1979) was “Soken tamari soy sauces” [Gentle].

6334. Ohsawa, Lima. 1983. “Tamari” ni tsuite [Re: Concerning the word “tamari”]. Letter to Bob Kennedy, President of Chico-san, Inc. in California, Aug. 24. 2 p. Typed, translation of original letter only. [Jap]

• **Summary:** This letter was written to Bob Kennedy in response to his request for information on the origins of the use (actually misuse) of the term “tamari” by George Ohsawa and the macrobiotic movement. The translation is by Akiko Aoyagi of Soyfoods Center.

“In about 1958 or 1959 George Ohsawa gave a lecture at a university in Hamburg, West Germany. The lecture hall was packed with some 400 to 500 people. Among them was a young man whose name I don’t clearly recall (perhaps it was Egel?). He was running an organic school in Germany. After the lecture he came to Mr. Ohsawa and earnestly enquired about various aspects of the Unique Principle.

“At that time there was also some talk about shoyu. As soon as he tasted this shoyu, he registered the word ‘shoyu’ as his own trademark and brand name, so that only he could sell it under this name. We came to know about this later and thought that it was a terrible thing for him to do. We were troubled by his action, for in Germany the law concerning registered trademarks was very strict. Therefore, in Germany, we were unable to call shoyu by its proper name, ‘shoyu.’ Out of sheer necessity, we decided to call shoyu by the name ‘tamari.’ After that, people in Europe started to call shoyu by the name ‘tamari.’

“In Japan we call the liquid from soybean miso by the name ‘tamari shoyu,’ and it has been used in fine restaurants and for high class recipes. It is a type of shoyu.

“After this incident, shoyu came to be called tamari. People overseas started to become familiar with the product and its new name, and they came to be used regularly.” Address: Tokyo, Japan.

6335. Claiborne, Craig; Franey, Pierre. 1983. An Indonesian treat [satays]: Food. *New York Times*. Aug. 28. p. SM54, SM64.

• **Summary:** Satays are an Indonesian version of shish kebab that does not have alternate layers of vegetables and can be made with almost any meat, poultry, or seafood. Easy to prepare, they are often served with a spicy and sweet peanut sauce.

One ingredient used in preparing satays that can be found relatively easily is “ketjap manis,” which “is available in many shops that specialize in Asian foods.” It makes a rich addition to the marinades of certain satays.

The recipe given for Beef satay calls for “2 tablespoons soy sauce, preferably ketjap manis (see note).”

“Note: Ketjap manis is a sweet soy sauce widely used in Indonesian cookery.” It is available at Oriental and Far Eastern markets, including Southeast Asia Food & Trading Company in Manhattan, New York.

The recipe given for Peanut sauce for satays does not call for the use of any kind of ketjap (soy sauce).

6336. Mountain Ark Trading Company. 1983. Catalog—Summer 1983 [Mail order]. 120 South East St., Fayetteville, AR 72701. 30 p. 27 cm.

• **Summary:** This is a mail order catalog for macrobiotic whole foods, specialty cookware, cookbooks and books on natural healing, futons, furniture, etc. The owners of the company are Frank & Phyllis Head, Tom & Toby Monte, Bill & Carol Tims, and Joel & Wendy Wollner.

Concerning seitan and *fu*, we read: “Seitan (wheat gluten)—100% Wheat Protein (“gluten” is the name for wheat protein). (1) Mountain Ark’s seitan—savory wheat gluten cutlets, freshly cooked in small batches; made from Deaf Smith’s organic whole-wheat flour [Arrowhead Mills] and Ozark mountain water; seasoned with tamari, kombu, and ginger. Shipped frozen; customer assumes risk of spoilage April 1 through November 30. 8 oz or 16 oz tub. Price: \$4.75, not including postage. (2) Spicy seitan—as above with cayenne pepper and garlic added for zest, though not overly spicy. 8 oz or 16 oz tub. (3) Seitan condiment—juicy, chewy chunks of very concentrated wheat gluten cooked in Johsen Shoyu; not perishable. 6.35 oz. jar. Price: \$2.95, not including shipping.

Dried wheat gluten cakes (*Fu*)—use like pasta. Sifted wheat gluten jumbo rings (*Kuruma Fu*), Sifted wheat gluten sheets (*Shonai Fu*), Sifted wheat gluten rings (*Zeni Fu*), Whole wheat gluten rings (*Zenryu Fu*).

Talk with Joel Wollner. 1992. July 13. The first two types of seitan were made in Fayetteville by Hans Decoz, from the Netherlands.

Soyfoods Center also owns a Mountain Ark catalog dated Autumn 1983. 36 p. The company now has a toll-free number: 1-800-643-8909. Address: Fayetteville, Arkansas. Phone: 501-442-7191.

6337. Shurtleff, William. 1983. Log of soyfoods research trip to Hong Kong, China, Singapore, and Japan: May 29 to July 10, 1983 (Unpublished report). Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 117 p. Aug. Unpublished manuscript.

• **Summary:** Contents: Hong Kong: K.S. Lo and Vitasoy. May 29 (Sunday)—Plane from Hong Kong to Guangzhou

City (Canton) in Guangdong (Kwantung) province. China: Guangzhou (May 29-30), Zhengzhou, Beijing, Harbin, Beijing #2 (Scurlock, Chen Xi-Hau, Joe Rakosky, Terrence Foley, local markets, vegetarian deli). Singapore: STS and Anders Lindner, Alan Yeo, American Soybean Association (Don Bushman, Sabine Lee, Lars Wiederman).

Japan: Seiyu department store, Kibun, ASA Tokyo (Ms. Kojima), Kanji Tsuchiya, Japan Soymilk Assoc., Sano Rinji, Kikori, Prasad and natural foods, Goro Kanasugi and tempeh, Tsuchiya soymilk #1, Kikkoman at Noda (Yokotsuka #1, Mizunuma, Plant #6 modern, Yokotsuka #2, Goyo Gura, Noda Museum, Noda Library, Mr. Ichiyama), Morinaga, Kikkoman Tokyo, Japan Packaged Tofu Assoc., Natto statistics, Asahimatsu, Natto-tempeh meeting, Mr. Katoh, Nakano Masahiro, Mr. Iitsuka of Kikkoman, Daizu Shokuhin Kaihatsu, Tsuchiya #2, Nagayama, soynuts, oil association, kinako, Ishige, Mr. Mori and soy sprouts, Katoh, Arai-san, Kodansha, Nagayama and kinako, Dr. Nakano #2, Arai shoyu, Tsuchiya #3, Tenmi. Address: Lafayette, California.

6338. Shurtleff, William; Aoyagi, Akiko. 1983. History of soyfoods in China. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 19 p. Aug. Unpublished typescript.

• **Summary:** A comprehensive history of the subject. Contents: Introduction: Soyfoods widely used in all parts of China. Overview of Chinese food and diet. Animal products and soyfoods as protein sources in China. China's great cuisines and soyfoods. General characteristics of Chinese soyfoods industry. Information on soyfoods. Soy trade associations. Attitudes toward technology, modernization, and traditional soyfoods. Private enterprise, bureaucracy, and competing ministries. Availability of soyfoods. Address: Lafayette, California. Phone: 415-283-2991.

6339. Shurtleff, William. 1983. Report on visit to Kikkoman in Noda (Document part). In: William Shurtleff. 1983. Log of Soyfoods Research Trip to China and Japan: 29 May to 10 July. Lafayette, California: Soyfoods Center. 117 p. See p. 67-85. Aug. Unpublished manuscript.

• **Summary:** Discusses: New (1982) 16-minute color film on shoyu. Visit to plant #7 (the biggest, but old) and description of process. Meeting with Drs. Yokotsuka and Hayashi to ask questions and discuss matters of mutual interest related to shoyu.

Shurtleff offers 5 suggestions/ideas to Kikkoman through Dr. Yokotsuka: 1. Start calling their product Kikkoman Shoyu instead of Kikkoman Soy Sauce, to more clearly distinguish it from HVP soy sauce. 2. Introduce a Kikkoman Shoyu product that contains no preservatives, preferably through aseptic bottling. 3. Explain without embarrassment or attempts to conceal that shoyu koji is made with molds, not primarily with yeasts (as Kikkoman now says in their PR literature). 4. Explain without

embarrassment or attempts to conceal why defatted soybean meal is used instead of whole soybeans in making shoyu.

5. Open a traditional shoyu plant, like the *Goyo-Gura*, at Walworth, Wisconsin, use it to make traditional, natural shoyu, sell that shoyu at a profit, and offer tours to visitors. Dr. Yokotsuka says he agrees strongly with all 5 points and has, in fact, been making the same recommendations for 10-20 years.

Before 1960 Dr. Yokotsuka personally thought that shoyu made from whole soybeans was of better quality than that made from defatted soybean meal. A key difference is that whole soybean shoyu has glycerol in it, which improves the flavor. The glycerol test is the key way to distinguish between the two types of shoyu. Later Kikkoman also found that alcohol is a key to shoyu flavor. Kikkoman still uses lots of whole soybeans in making shoyu. Their Tokusen (special) grade uses about 50% shoyu made from whole soybeans. If you compare shoyu aged for 1, 2, or 3 years, the 1-year shoyu has the most volatiles, which are the key to shoyu flavor, and bouquet/aroma (*kaori*). Shoyu made in the traditional way without temperature control shows wide variations in flavor and composition from season to season.

Meeting with T. Mizunuma to ask questions. The head of the Goyo Gura (which is part of plant No. 4) thinks that the shoyu made there is of better quality than that made in most modern plants. The Goyo Gura still provides Japan's imperial household with Kunaicho shoyu, but now the household is required to pay for it. All the ingredients come from Japan. The salt is made by a modern process on the Inland Sea (*Setonai-kai*); it is not from traditional *enden* salt fields. The soybeans are from Hokkaido, the wheat from the Kanto plain. No yeasts are added to the moromi. The result is an excellent, soft and round (*maroyaka*) flavor says Mizunuma. The first JAS standards for shoyu were established in 1950. Factory No. 6 in Noda is more advanced than the Walworth plant since it has a continuous, circular koji plant.

A major problem with using enzymes only for making shoyu is that there is no glutamase in enzymes, so the glutamic acid content of the shoyu is low. It is insoluble in koji hyphae. Using enzymes is very quick and easy, but they are very expensive; now it is much cheaper to make and use koji than to use commercial enzymes. In the future, they may fortify koji with enzymes. Commercially, to get enzymes, they must make koji anyway. With special enzymes, they may use immobilized enzymes (*koteika koso*). Sodium benzoate is the only preservative allowed in shoyu in Japan; in the USA BHA may also be allowed. HVP (amino-san) shoyu is allowed in Japan but very little is made, and that is sold mostly for business use. Not all shoyu contains some fermented shoyu. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6340. Hattori, Terumitsu. 1983. The soy sauce market in

the USA (Interview). Conducted by William Shurtleff of Soyfoods Center, Sept. 19. ½ p. transcript.

• **Summary:** His rough estimate of market shares, including imports, is as follows: Kikkoman 40%. LaChoy 30%. Chunking 12%. Imports from Hong Kong, China, Taiwan, and Korea 9%. Imports from Japan 8%. Other USA HVP soy sauce 1-2%.

The products imported from Taiwan, Korea, and China are about 90% Shinshiki shoyu [a mixture of HVP and fermentation], as judged by levulinic acid assays. He does not know when this started. If levulinic acid is in the shoyu, it contains HVP.

Three types of Pearl River Bridge soy sauce are now being imported to the USA: Light, dark, and mushroom. Only one (the light?) has little or no levulinic acid. In a month, he'll have more accurate data. Address: Kikkoman Marketing & Planning Inc., 50 California St., Suite 3600, San Francisco, CA 94111.

6341. **Product Name:** [Tofu Meatless Slices].

Foreign Name: Tofu-Bratschnitte.

Manufacturer's Name: Albert Hess Tofuhaus Rittersheim.

Manufacturer's Address: Hauptstrasse, D-6719 Rittersheim, West Germany. Phone: 06-352-3473.

Date of Introduction: 1983. September.

Ingredients: Incl. tofu, tamari, sea vegetables, carrots, and herbs.

Wt/Vol., Packaging, Price: 200 gm vacuum pack.

How Stored: Refrigerated.

New Product-Documentation: Form filled out by Albert Hess. 1988. Jan. 25. Leaflet. 1988. They make 300 kg/month. Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in Sept. 1983. Label. 1988, received. 2.5 by 4 inches. Black on orange. Self adhesive.

Label brought by Albert Hess. 1995. March 11. 2.5 by 4 inches. White and purple on yellow. An illustration shows a large personified cake of tofu, with smiling face and arms held out. Ingredients in 1995: Tofu, vegetables, herbs, algae, tamari.

6342. Ito, Kiyoe. 1983. Soy beans as a source of protein in Japan. In: Ajia-Chiku Kokusai Kaseigaku Kaigi Hokoku (Proceedings of the International Asian Conference on Nutrition). See p. 60-61. Held Aug/Sept. 1983. [Eng]

• **Summary:** Rice cultivation began in Japan about 2,000 years ago. Buddhism was imported to Japan from China through Korea, and with it the prohibition against eating meat [of four-legged animals]. "Therefore, the diet and cuisine depended exclusively on rice, bean, vegetables, and fish. Especially, soy beans have been widely used as materials for plant protein foods such as miso (fermented soy bean paste), tofu (bean curd), shoyu (soy sauce), yuba (dried soy milk film) and others." Also describes the increasing westernization of the Japanese diet, especially after World

War II. Address: Tokyo Gakugei Univ., Tokyo, Japan.

6343. Leviton, Richard. 1983. Report on soyfoods research trip across America, September 1983. Colrain, Massachusetts. 8 p. Unpublished typescript.

• **Summary:** Visited or discusses: Grainnaissance (makes amazake and mochi), Brightsong (Dik / Richard Rose), Sonoma Specialty Foods (California), Northern Soy (Rochester, New York), Southwest Soyfoods (Richard Jennings), White Wave (Steve Demos, Boulder, Colorado), Quong Hop & Co. (South San Francisco, California), Modern Fare (Loveland, Ohio), Soyfoods Unlimited (Valerie, Gary and John Robertson, San Leandro, California). Soyfoods Center (Lafayette, California), Soyfoods of America (Doug Fiske and Ken Lee, Los Angeles), Real Foods (Polk St., San Francisco), Tumaros (Los Angeles), Unicorn (Terry Dalton, Florida), Japantown and Rainbow Grocery (San Francisco), Berkeley Natural Grocer and Berkeley Co-op (Bob Gerner, California), Hinode Tofu Co., Edensoy, Farm Foods, New England Soy Dairy, and Nasoya (Leominster, Massachusetts). Legume (Gary & Chandri Barat, New York City), Lotos / Lotus Cafe (Greg Weaver, Rochester, New York).

NRRL (Hesseltine and Wang, Peoria, Illinois): Their work is in mixed starter culture fermentation, vitamin B-12 work. Japanese man from Tokyo to work one year on natto at NRRL, paid by Japanese government. B-12 can withstand some heat during cooking and the percentage of B-12 lost depends on the initial percentage present. Natto research: examine all Japanese publications for review article. Experiment using U.S. soybeans to make natto since the Japanese buy Chinese beans for their thinner seed coat. See what happens to the oil to protein ratio during fermentation. Natto as such has no possibilities in the U.S. as it is a slimy food with a rotten smell; hard to tolerate. There might be vitamin B-12 in natto produced by *Bacillus subtilis*. Koreans have done lots of B-12 research with kimchee and other pickled vegetables. Earl Swain died this summer of a heart attack at age 36. Natto research will help U.S. soybean exports. USDA bureaucrats are making it difficult for Dr. Hesseltine to do natto research. They have 65 objectives, but Dr. Wang's projects don't fit any of them clearly, so they won't mention "food" in their research outlines, just fermentation methods. Secretary of Agriculture John Block [served 1981-86 under President Ronald Regan] says the U.S. needs more ag exports and more basic information about crops uses, so he is in support of this natto research.

Out of business: Michiana Soyfoods, St. Ignatius shop, Sunshine Soy, Heartsong, probably Joy of Soy and a Korean shop in Salt Lake City, Utah.

Concerning soymilk: 10. In Oak Park, Illinois, a natural foods retailer says Edensoy outsells San-J by two to one. (Note: San-J imports "To-Neu Natural Soy Beverage" made in Japan by Kibun). Teenagers buy the carob Edensoy along

with popcorn in the store, and use it as a soft drink. But most retailers say the Eden package [stand-up foil retort pouch] is a disaster; it is impossible to open without scissors, then if you squeeze, it sometimes spills out. San-J [in a Tetra Brik carton] is convenient but the taste is poor and the front graphics are confusing—too many words and images. According to Shurtleff, both are inferior products compared to Japan's best.

22. Concerning Edensoy at the NNFA show in Denver, Colorado: Mike Potter says "it went over great." He sold two container loads right away. People liked the package and the taste. About 4,000 people sampled it and were "generally amazed." The results were as good as they could want; it generated interest and excitement. Now they are setting up the distribution system. Address: 100 Heath Rd., Colrain, Massachusetts 01340. Phone: 413-624-5591.

6344. McDougall, John A.; McDougall, Mary A. 1983. *The McDougall plan*. New Century Publishers Inc., 220 Old New Brunswick Rd., Piscataway, NJ 08854. 340 p. Foreword by Nathan Pritikin (8/83). General index and recipe index. 24 cm. [804* ref]

• **Summary:** This carefully researched and documented book and cookbook argues convincingly in favor of a vegan diet that uses no animal products, that is low in fats, calories, and sodium, and rich in complex carbohydrates. Pages 89-90 give the percentage of calories from fats in various foods under 3 categories: low-fat vegetable foods (incl. oatmeal 16% of calories from fat, apple 9%, broccoli 9%), high-fat vegetable foods (incl. avocados 88% of calories from fat, almonds 82%, peanut butter 77%, sunflower seeds 76%, tofu 53%, soybeans 40%, wheat germ 27%, tempeh 25%), and animal foods (bacon 94%, t-bone steak 82%, frankfurters 80%, cheddar cheese 73%, egg 65%, tuna in oil 64%, milk [whole 3.5% fat] 49%, ice cream 49%, milk low-fat 31%, chicken [light-skinned] 18%, tuna in water 6%, buttermilk 3%, skim milk 2%).

Note: The author, however, argues repeatedly against the use of tofu and tempeh based on the "percentage of calories from fat" concept. His figures are correct but we and many nutritionists feel the basic concept, originally popularized by Nathan Pritikin, overlooks two key points: (1) the percentage of water in the food, and (2) the average serving size.

Page 198, in a section on rich [high fat] plant foods, states that tofu, tempeh, soybeans, textured vegetable protein (TVP), and miso contain excessive fat and most are high in calories. "The rich plant foods may account for a small portion of your daily food (less than 10 percent of your calories per day) but only after you have attained the level of health you are striving for. In general, these foods are more harmful than health-supporting. Never eat these foods if you have problems with your health that remain unsolved. If you begin using this group of foods and find that you are also gaining weight or getting back some of your old ailments,

then stop eating these foods immediately."

Appendix I, p. 322-28 contains a table listing the percentage of calories from protein, fat, and carbohydrates in many foods. It also gives the calorie concentration (in calories per gram) for each food; foods with a low concentration aid in weight-loss programs. Tofu has only 0.72 calories per gram, and soy sprouts only 0.46; both are low. No soyfoods are used in the many recipes in this book.

Note: According to a colleague, John McDougall suffered a stroke at age 19, which led to much of his current interest in diet and health. He is not a Seventh-day Adventist. Address: 1. M.D. Both: Near Kailua Bay, Oahu, Hawaii.

6345. Shurtleff, William; Aoyagi, Akiko. 1983. *The book of miso*. 2nd ed. Berkeley, California: Ten Speed Press. 278 p. Illust. by Akiko Aoyagi Shurtleff. Index. Sept. 28 cm. [223 ref]

• **Summary:** Contents: What is miso? Preface to the second edition. Preface to the first edition. Acknowledgments. Part I. Miso: Savory, High Protein Seasoning. 1. Soybeans, protein and world hunger. 2. Miso as a food. 3. The miracle of fermentation. 4. The varieties of miso: Regular Miso: Rice miso (red / aka, light-yellow / shinshu, mellow red / amakuchi akamiso, mellow beige / amakuchi tanshoku, mellow white / shiro koji, sweet red / edo or edo ama-miso, sweet white / Kyoto shiro miso), barley miso (karakuchi mugi, mellow barley / amakuchi mugi), soybean miso / mame miso (Hatcho miso, soybean miso / mame miso, tamari miso). Special Miso: Finger lickin' miso / Namemiso (Kinzanji miso, moromi miso, hishio, namemiso, natto miso, goto miso), sweet simmered miso / nerimiso. Modern Miso: Akadashi miso, dehydrated or freeze-dried miso, low-salt / high-protein miso.

Part II. Cooking with Miso (400 recipes). 5. Getting started. 6. Recipes from East and West. Part III. The Preparation of Miso. 7. Making miso at home and in communities (incl. Homemade natural shoyu, and Homemade namemiso, p. 184). 8. Japanese farmhouse miso (how to make miso at home). 9. The traditional miso shop. 10. The modern miso factory. Appendixes: A. A history of miso and soybean chiang. B. Other East Asian misos: Chinese chiang, Korean jang and Indonesian Taucho. C. The microbiology and biochemistry of miso fermentation. D. Miso manufacturers in the West. E. People and institutions connected with miso. F. Miso with seafoods, chicken, and meat. G. Measures, weights, and equivalents. H. So you want to study miso in Japan? I. Miso additives. Bibliography [223 references]. Glossary. About the authors (autobiographical). The Soyfoods Center.

In May 1993 a new printing of this book appeared, containing many small changes made by the authors. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6346. Shurtleff, William. 1983. Notes from a phone talk with Richard Leviton concerning his trip across the USA in Sept. 1983 visiting soyfoods companies and giving talks. Lafayette, California. 3 p. Sept. Unpublished manuscript.

• **Summary:** Discusses: Nasoya, New England Soy Dairy (doing radio ads and videos in supers; making 45,000 lb/week of tofu), Hinode tofu, Lotus Cafe, Penguin's (chocolate is their favorite soy ice cream favorite), Northern Soy and Wegman's, Vegetarian Times, Emperor of Japan to give Dr. Clifford Hesseltine a high medal at the end of November, Bob Davis plans to move to Nevada City (California), Kraft bought 15 Okita packaging machines. Richard Jennings, his marriage, Southwest Soyfoods, and chilled water as an alternative to pasteurization; his shop in Ecuador is now closed. Nasoya makes 22,000 lb/week of tofu with no outside money. David Mintz was on Good Morning America talking about Tofutti. The Farm (Summertown, Tennessee) now makes only liquid soymilk, no powder. Tom Leonard and Jim Hemminger are selling tofu to Community Mercantile. Leonard was in Arkansas in 1977, first batch of miso in Dec. 1978. Now makes 500 lb/week. Well Spring is a new miso maker in Colorado. White Wave (Boulder, Colorado) is making 12,000 lb/week of tofu and doing well financially, as new frozen entrees & nut butters, tofu lasagne. Edensoy is outselling SanJ soymilk by 2 to 1. Time magazine Sept. 19 insert. American Dietetic Assoc. will list tofu as a good protein source. Jim Cooley of Lawrence, Kansas. He started making tofu in 1977. Legume Inc.'s new product line out Oct. 5; lists names of each product. Address: P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6347. Shurtleff, William; Aoyagi, Akiko. 1983. Appendix A: A history of miso and soybean chiang [jiang] (Document part). In: William Shurtleff and Akiko Aoyagi. 1983. *The Book of Miso*. 2nd ed. Berkeley, California: Ten Speed Press. 278 p. See p. 214-41. Illust. by Akiko Aoyagi. [223 ref]

• **Summary:** Contents: Introduction: Etymology. Soybean chiang in China: Early Chinese non-soybean chiang, 600-1899. Soybean chiang in Korea and Southeast Asia: Dissemination of chiang from China, Korea, Indonesia, Vietnam, other Southeast Asia.

History of miso in Japan: Introduction, early non-soybean hishios (before AD 700), the Nara period (AD 710-784), the Heian period (AD 794-1160), the Kamakura period (1185-1333). The Muromachi period (1336-1568), the Edo or Tokugawa period (1603-1867). A brief overview of origins. the Meiji and pre-war periods (1867-1939), World War II and the postwar period: Modern times (1940-1983).

History of miso in Europe: Early European references, 1900-1949, 1950-1982.

History of miso in the United States and Canada: Early developments (1896-1929), 1930-1959, growth of interest

in miso (1960-1982; Shibasaki and Hesseltine at the NRRC, Peoria, Illinois, Ichiro Ouchi, the macrobiotic movement, Herman Aihara, George Ohsawa, Miso and Aveline Kushi in Boston, Massachusetts, Noboru Muramoto, George Gearhart, Thom Leonard, Allen Ginsburg and Gary Snyder, Mt. Tamalpias, Tassajara Zen Mountain Center, Miyako Oriental Foods, Kanemasa Miso Co., Ohio Miso Co., Shin-Mei-Do, American Miso Inc., South River Miso Co., Joel Dee and Miso-Cup), miso's future in the West.

Miso in other countries: Israel, India, Latin America (Brazil, Mexico), Africa.

Illustrations: Evolution of Chinese characters. Hideyoshi Toyotomi and a robber on the bridge (Hatcho miso history, p. 219). Making miso-damari (p. 220). Graph of the miso market in Japan (1880-1980) (p. 226). Ohio Miso letterhead and logo (p. 238). U.S. miso imports, production and consumption (1970-1983) (p. 240). Page 219: "The origins of modern shoyu can be traced more clearly to the mid 1200s when the Japanese priest Kakushin returned from China, having learned there the technique for preparing Kinzanji miso. Establishing himself at Kokoku-ji temple near the town of Yuasa..." Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

Address: 1. Kamagaya; 2. Kashiwa; 3. Noda. All: Japan.

6350. Hansen, Barbara. 1983. Specialty sauce exec is his own best customer. Chung not only sells product, he cooks for firm's business luncheons with it [Herman Chung of Golden Orchid Foods & Kimlan Foods Co. of Taiwan]. *Los Angeles Times*. Oct. 6. p. L37, 46.

• **Summary:** Herman Chung is president of Golden Orchid Ltd., the U.S. arm of Kimlan Foods Co. Ltd. of Taiwan. Kimlan is a major producer of soy sauce and also has a line of specialty sauces including barbecue, steak, teriyaki and sukiyaki sauces that are aimed at the American market. Other products such as satay paste and hot bean sauce cater to Chinese tastes. C.K. Chung is president of Kimlan in Taipei. Address: Times staff writer.

6351. Oda, Lorraine. 1983. The Hawaiian Miso & Soy Co. Ltd. Carrying on a family tradition. *Hawaii Herald*. Oct. 7. p. 1, 8, 17.

• **Summary:** William Higa's miso factory now makes 250 tons of Maru-Hi brand Shiro (white) miso and Aka (red)

miso a year, plus 90 tons a year of miso-marinated butterfish (butterfish kasuzuke; black codfish marinated in sake lees). He took over the family business in 1956. William's father, George Taru Higa, started the business in 1936. It moved from North School Street, to Iwilei Rd., then near Vineyard Blvd., before settling in 1946 in the industrial area of Kalihi.

Photos show: (1) The original Yamaju Shoyu & Koji Miso Co. factory in 1938, makers of Shiro Koji Miso and Yamaju Shoyu. Standing by wooden kegs of miso are the founders Henry, Shinyei, and George Taru Higa. The company sign appears clearly over the factory door. Long, dark automobiles from the 1930s are parked at the left and right. (2) William Higa standing inside an air-conditioned warehouse; bags of Iowa soybeans are stacked up to the roof behind him. (3) Five hundred pounds of rice are cooked at a time. (4) Soybeans are washed in a rotating steel cylinder, then soaked in steel barrels. (5) A large machine mixes cooked soybeans with cultured rice (koji) and salt. (6) The mixture is ground to a paste. (7) Women pack and weigh containers of miso. (8) Women prepare butterfish misozuke. Address: Honolulu.

6352. Wakayama, Mary. 1983. The oldest sake factory in the West: From 1908 to 1983. *Hawaii Herald*. Oct. 7. p. 1, 4.

• **Summary:** A history of the Honolulu Japanese Sake Brewing Co. Ltd., which started in 1980 when Tajiro Sumida began making sake in Honolulu for Japanese laborers in Hawaii. Starting more than 25 years ago, under the direction of an expert brewmaster, Takao Nihei, who received the Japan Brewery Association's award for excellence in 1970, the quality of the sake has improved tremendously. Takara Masamune and Musume are Honolulu Sake's foremost sake products. The company also manufactures shoyu (Diamond shoyu, Marumasa Soy Sauce, Island Shoyu, as well as Diamond Teriyaki Sauce), vinegar (Diamond-Su) and mirin (Takara Masamune). A photo shows that "Honolulu Japanese Sake Brewing Co. Ltd." Address: Hawaii.

6353. Brody, Jane E. 1983. Assessing what is good for you and what is not. *New York Times*. Oct. 12. p. C1, C8.

• **Summary:** Those who eat wisely "can expect an improvement in well-being and a decreased risk of developing such diet-related disorders as heart disease, cancer, high blood pressure, and obesity." But "Myths abound in the health food industry and, experts, say, many believers are being hoodwinked."

Discusses: Sweeteners, raw foods, salty seasonings (including miso and soy sauce), granolas, snacks and candies, nuts and seeds (including peanut butter), oils (cold-pressed oils contain more vitamin E but they become rancid more quickly), "health" foods high in fat, yogurt and frozen yogurt, herbal teas, and pastas (including those enriched with soy flour).

"A tablespoon of soy sauce contains about half a

teaspoon of salt. Tamari sauce is hardly less salty than ordinary soy, but Kikkoman makes a reduced-salt soy that has 47 percent less salt than regular soy. Miso, another popular health-food flavoring, contains nearly as much salt as soy sauce. Domestic soy sauce is generally much saltier than imported brands."

6354. **Product Name:** Goldfish Brand Soya Bean Sauce.

Manufacturer's Name: Eastern Food Products.

Manufacturer's Address: 209/4 Union Place, Colombo 2, Sri Lanka.

Date of Introduction: 1983. October.

Ingredients: Soya bean, wheat, sugar, salt.

Wt/Vol., Packaging, Price: 325 ml and 750 ml bottles retail for Rs. 17/50 and 33/00.

How Stored: Shelf stable.

New Product-Documentation: Label. 1988. 3.5 by 3.5 inches. Green, red, yellow, black, and white. Illustration of a goldfish in a circle. Form filled out by Jane Gleason. On 25 March 1988 she talked with Mrs. S. Liu, owner and manager. The company sells about 1,000 to 1,500 bottles/month. They make and private label soy sauce for McSoy Lanka. They buy less than 500 kg/month of soybeans at Rs. 400-450 per 50 kg from the local market. They used to buy from farmers (the beans are cheaper and fresher) but this is now difficult due to civil disturbances. Demand is slowly increasing. Their product is purchased because of its good taste.

6355. Hesseltine, C.W. 1983. The future of fermented foods. *Nutrition Reviews* 41(10):293-301. Oct. [20 ref]

• **Summary:** Contents: Advantages of food fermentation, factors having an adverse effect on the use of fermented foods, nutritional and economic data on some fermented foods, future changes in fermented foods, factors that may lead to growth in the use of fermented foods (scientific interest in fermented foods, prevention of food poisoning, fermentation and increased shelf life, improvement of the physical properties of the product, interest in natural products of plant origin, modification of the substrate, interest in more healthy food, necessity of increased consumption of plant materials as population increases, cultural and religious grounds, and migration of people since World War II). Summary. Contains considerable information on fermented soyfoods. Address: NRRC, Peoria, Illinois.

6356. Pure & Simple, Inc. 1983. Chateau So' (Ad).

Vegetarian Times. Oct. Inside front cover.

• **Summary:** This creative full-page color ad (see next page) compares fine shoyu with fine wine. "It's vintage... So' Tamari Soy Sauce. Of course. And it is just like a fine wine. You can hold it up to the light to judge the complexity of the color. Its rich and clear with luminous red amber depth.

"Swirl it around. See its substance and full body as it clings to the glass. Close your eyes and 'nose' the subtle

CHATEAU SO'

It's vintage.... So' Tamari Soy Sauce.
Of course. And it is just like a fine wine.
You can hold it up to the light to judge
the complexity of the color. It's rich and clear
with luminous red amber depth.

Swirl it around. See its substance
and full body
as it clings
to the glass.
Close your
eyes and
"nose" the

subtle mellow bouquet. The distinc-
tive aroma of mature fruit from
the family Leguminosae. The
nut-like scent of roasted
grain and even a distant
suggestion of the sea.

Now taste it.
This isn't "jug"
soy sauce. Made

from cracked, de-fatted beans and chemical
enforced, artificial fermentation. This is the
good stuff, So' Tamari. Made with selected
whole beans, flame roasted wheat, pure
water and salt from the sea aged in wooden
barrels for two summers. Deep, rich, full-bodied
and delicious.

And like fine wine it enhances
any meal, chicken, fish, meat and
vegetables. So' Tamari makes every-
thing taste better.

Chateau So' Tamari.

Because the soy sauce
remembers too.

From Pure & Simple, Inc.
P.O. Box 1235, Corona
CA 91720.

mellow bouquet. The distinctive aroma of mature fruit from the family Leguminosae. The nut-like scent of roasted grain and even a distant suggestion of the sea. Now taste it. This isn't 'jug' soy sauce. Made from cracked, de-fatted beans and chemical enforced, artificial fermentation. This is the good stuff."

A large photo shows a 1-pint jar of "So' Tamari: Shoyu Natural Soy Sauce."

This ad also appeared in *Bestways* (Feb. 1984, p. 45). Address: P.O. Box 1235, Corona, California 91720.

6357. *Sunset (Menlo Park, California)*. 1983. Tofu pinch-hits for cottage cheese. 170:226. Oct.

• **Summary:** Uses silken tofu in a Tofu luncheon salad recipe, and regular tofu in White tofu with dark dressing (incl. soy sauce). Two photos accompany the recipes.

6358. *Erewhon Mail Order*. 1983. *Erewhon*. Natural foods mail order catalog. Brookline, Massachusetts. 16 p. Nov. 1. Catalog and price list.

• **Summary:** This is a new mail order catalog, whose prices are effective from 1 Nov. 1983. On the front cover is a woodblock print of two wooden barrels, a wooden tub, two sacks of corn, a sheaf of wheat, several ears of corn, and a scythe. *Erewhon* is located at 26 Washington St. in Brookline Village—also the home of *Erewhon Mail Order*. There are retail stores at 342 Newbury St. in Boston and 1731 Massachusetts Ave. in Cambridge. Products grown organically, without chemicals, are marked with the code "OG."

Contents: Whole grains & cereals (incl. *Erewhon* granolas). Flours. Pastas. Beans (incl. azuki beans, black soybeans from Japan, yellow soybeans from Minnesota). Seeds, nuts & dried fruit (incl. alfalfa seeds, sesame seeds, and tamari roasted nuts and seeds). Sea vegetables. Misos and tamari soy sauces. Japanese macrobiotic specialty products. Condiments, vinegars & sauces. Sea salts. *Erewhon* vegetable oils. Baking & home products (incl. koji rice for making amasake and miso, nigari for making tofu, tempeh starter). Sweeteners (Yinni rice syrup, barley malt, maple syrup, clover honey, wildflower honey {unfiltered}). *Erewhon* nut butters (Almond, cashew, peanut, sesame, sunflower). Fruit spreads. Snack foods. Sweets. Perishables (incl. bread, mochi, produce, amazake, tempeh). Beverages. Supplements. Natural cosmetics & body care. Cookware & appliances. Books & publications. Ordering & shipping information. Zone & shipping charts. Address: 236 Washington Street, Brookline, Massachusetts 02146. Phone: 1-800-222-802 or (617) 738-45168.

[92* ref]

• **Summary:** A comprehensive history of the subject.

Contents: Introduction: Acknowledgement of Ron Kotzsch. The roots of macrobiotics: *Yellow Emperor's Classic of Internal Medicine*, Shinto classics, Ekiken Kaibara (1630-1714), Nanboku Mizuno (late 1700's—early 1800's), Sagen Ishizuka (1850-1910), Manabu Nishibata. The life of George Ohsawa (1893-1966): To Paris 1929-36, return to Japan and World War II, Internationalism 1946-53, ran school Centre Ignoramus, "world journey" 1953 to India, Africa, then Paris, started Muso Shokuhin (macrobiotic food company) in Osaka, Japan, in 1959, work in Europe 1956-66, earliest reference seen to soy (miso) in 1956, first visit to New York City Dec. 1959, post-visit institutions, second visit 1960, first American macrobiotic summer camp on Long Island, exodus to Chico, California, Aug. 1961 to escape feared nuclear war, establishment of Chico-San, move of Michio and Aveline Kushi to Boston in 1963, *Zen Cookery* 1963, *Zen Macrobiotics* second edition 1965, growth of the movement, Beth Ann Simon's death blamed on macrobiotics in 1965, response of U.S. Food and Drug Administration is to close N.Y. Ohsawa Foundation, Ohsawa's general macrobiotic teaching, view of Western civilization as one in crisis, with fundamental biological change required to improve it, death in 1966 in Tokyo at age 72 of cardiac failure, seen as sage by his followers, seen as inconsistent crackpot by his critics, work carried on by wife Lima and by his students. Development of macrobiotics in Boston: Kushi's lectures and classes from 1965, early food sales from house, *Erewhon's* start in 1966 and subsequent growth, establishment of organic suppliers in the U.S., first imports from Japan 1968, 1970 natural foods boom, National Food Distributors Association, *East West Journal*, Autumn Press founded in Japan by macrobiotic student from Boston, Boston institutes, centers, and foundations from 1972 on, increasing popularity of soyfoods (tofu, tempeh, and miso) in Boston, *Erewhon* from 1973 to bankruptcy in 1981 and sale to Ronald Rossetti in 1982. Development of macrobiotics in New York City: Void after departure of Aihara group and Kushis, establishment of Infinity Foods in mid-1960's, Michel Abehsera's restaurants, cookbooks, and tour. Development of macrobiotics in California: Influence of Chico-San on natural foods movement to 1970, Lundberg rice 1968-69, Yamazaki miso and shoyu 1970, 1972 fire in Chico-San warehouse, educational activities and institutions, growth of Chico-San, Noboru Muramoto. Nutritional views of macrobiotic diets: General critical attitude from 1965 to 1977, not countered by macrobiotic leaders, scientific studies pro and con, specific critique of the diet, turnaround in attitude since 1977 (*Dietary Goals* published by U.S. Senate's McGovern Committee), Dr. Mendelsohn, Nathan Pritikin, cancer cures and Anthony Sattilaro (1980). Macrobiotics in Europe and Latin America: First European company Lima N.V., other distributors, centers, publications, tours, active

in South America since 1954. A major contribution: Type of overall influence on soyfoods, number of followers in 1981. Address: Lafayette, California. Phone: 415-283-2991.

6360. Shurtleff, William; Aoyagi, Akiko. 1983. George Ohsawa and the macrobiotic movement: Noboru Muramoto (Document part). Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 46 p. See p. 39-40. Nov. 10. 28 cm. Unpublished typescript.

• **Summary:** "In June 1971 Noboru Muramoto emigrated to America from Japan and lived with the Aiharas in San Francisco at GOMF. In Japan he had studied Chinese literature and philosophy at Tohoku University and Kanazawa University, then began his own study and practice of herbal medicine. He had begun studying Ohsawa's writings in 1942, then studied with Ohsawa after 1964, while running a family business cleaning the cotton from futons. In 1973 he gave a series of lectures in New York which were published that year as the popular book, *Healing Ourselves* (Avon/Swan House). Many uses of miso and natural shoyu were given; soybeans and tofu were not recommended in the book, except that tofu was used in making poultice-like 'plasters' for use in healing. In 1974 Muramoto started Rising Sun, a macrobiotic storefront containing the Herb Tea Co. in San Francisco. Here he gave classes on making miso and shoyu. In November 1976 he acquired Top of the World Ranch on 140 acres of land near Glen Ellen, California, and established Asunaro Institute, a residential program of macrobiotic studies. He also published a newsletter 'Asunaro Notes.' At Asunaro he set up a regular shop for making miso and shoyu, complete with a nice koji incubation room. Many unique and American-style misos were developed, including some made with peanuts, garbanzos (chickpeas), azuki beans, and even natto. A number of Americans apprenticed at the miso-shoyu school. A nice article about the school, 'Making Miso in America,' appeared in the *East West Journal* (Lachman 1978). In March 1979 Muramoto displayed his miso and shoyu equipment and samples of his products at the famous New Earth Exposition in San Francisco. He also sold these products at Rising Sun, and some customers swore that they were the best in America."

Note: On 11 Jan. 1976 William Shurtleff attended a class on how to make miso at Rising Sun (Judah Street, San Francisco), given by Noboru Muramoto. Jimmy Udesky was there, as were about 15 other people.

On 19 Sept. 1977 William Shurtleff and Akiko Aoyagi visited Muramoto sensei at his place, Asunaro, in Glen Ellen, California. He makes miso there and teaches miso making. Shurtleff interviews him about his life and history of interest in macrobiotics and soyfoods. We stay overnight and help him the next morning with royalty problems connected with his book *Healing Ourselves*; he is quite sure he is not being paid the royalties due based on his contract with the publisher. Address: Lafayette, California. Phone: 415-283-

2991.

6361. Williams, Dorothy. 1983. The soy saga: a saucy story, some scientific sleuthing. *Illini Week* (University of Illinois, Urbana-Champaign) 3(13):1, 4. Nov. 17.

• **Summary:** Describes how, starting with an unexpected discovery in 1982, Hymowitz and Harlan did the research leading to the discovery that Samuel Bowen introduced the soybean to America in 1765. One day 1982 Jack Harlan, professor of agronomy at the University of Illinois (Urbana-Champaign) was reading the *Early Proceedings of the American Philosophical Society for the Promotion of Useful Knowledge...* (J.P. Leslie, ed. 1884), an organization founded by Benjamin Franklin. While looking for something else, Harlan chanced to read the entry in the minutes for 16 January 1769 acknowledging receipt of a "Sample of Chinese vetches, six bottles of Soy and six pounds of powdered sago presented with a letter from S. Bowen of Georgia."

Harlan's curiosity was piqued. He knew that the earliest date of the introduction of soybeans from China to North America was generally thought to be 1804. Who was this S. Bowen? Why was his name not better known?

Harlan mentioned his accidental discovery to his colleague and former student, Theodore Hymowitz, also a professor of agronomy at the same university. Hymowitz was also intrigued.

They began to work together to find out more about Bowen and try to piece together the story. It took Harlan and Hymowitz a year to fit the pieces together; they did this on the side in addition to their teaching and research work. No one gave them a grant. They did it as a hobby to satisfy their intellectual curiosity.

6362. Drake, Milan. 1983. Re: La Choy soy sauce. Letter to William Shurtleff at Soyfoods Center, Nov. 18. 1 p. Typed, with signature on letterhead.

• **Summary:** "Thank you for your recent compendium of articles on Soy Sauce and for the addition request for membership in the Soy Sauce organization. For your files, however, we are basically a manufacturing plant here in Archbold." Address: Director, Research & Development, La Choy Food Products, 901 Stryker Rd., Archbold, Ohio 43502. Div. of Beatrice Foods Co.

6363. Chiu, Wen-Chau. 1983. Re: Making fermented soy sauce and related products. Letter to William Shurtleff at Soyfoods Center, Nov. 22. 1 p. Typed, with signature on letterhead.

• **Summary:** He fills out a form, answering "Ten Key Questions" concerning American terminology and standards for soy sauce. He agrees with all but one—the definition of "shoyu." He believes that shoyu is the general term for "soy sauce" in Japanese and should not be used to refer only to

fermented soy sauce.

His company (Mandarin Soy Sauce, Inc.) has been making fermented soy sauce (and related products such as Hoisin sauce) since 1977. His company has also imported soy sauce and related products from their parent company, Wan Jia Shan Brewery Co., Ltd., Taiwan. Address: PhD, President, Mandarin Soy Sauce, Inc., 419 North St., Middletown, New York 10940. Phone: 914-343-1505.

6364. *Beijing Daily*. 1983. [Raising the protein recovery rate from soy sauce raw materials has bright prospects: Thoughts of some flavoring industry specialists]. Nov. 26. [Chi; eng+] Address: Beijing.

6365. Baldwin, Marjorie V. 1983. Re: Publications on aflatoxins in miso, soy sauce, and koji. Letter to William Shurtleff at Soyfoods Center, Nov. 27. 2 p. Typed, with signature on letterhead. [4 ref]

• **Summary:** Most of these articles are cited in *Chemical Abstracts*. The earliest one was published in 1977. Address: M.D., Journal of Health & Healing, P.O. Box 109, Wildwood, Georgia 30757.

6366. Aoyagi, Kazuko; Aoyagi, Akiko; Shurtleff, William; Bennett, Gordon. trans. and comp. 1983. Japanese standards for soy sauce ("shoyu"): English-language translation. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549 USA. 14 p. Nov. [1 ref. Eng]

• **Summary:** Contents: Translators introduction: Brief history of shoyu standards in Japan and the USA. 1. Definition of fermentation methods: Basic fermented method (*honjozo hoshiki*), semifermented HVP method (*shinshiki jozo hoshiki*), semifermented HVP and acid HVP mixed method (*aminosaneki kongo hoshiki*), semifermented HVP and enzyme HVP mixed method (*koso shorieki kongo hoshiki*), semifermented HVP-acid & enzyme HVP mixed method (*aminosaneki koso shorieki kongo hoshiki*), semifermented HVP-enzyme & acid HVP mixed method (*koso shorieki aminosaneki kongo hoshiki*). 2. Definition of varieties of shoyu: Regular shoyu (*koikuchi shoyu*), light-colored shoyu (*usukuchi shoyu*), tamari (*tamari shoyu*), double-fermented shoyu (*saishikomi shoyu*), clear shoyu (*shiro shoyu*).

3. Standards for varieties of shoyu: Regular shoyu, light-colored shoyu, tamari, double-fermented shoyu, clear shoyu. 4. Analytical methods: Degree of color, total nitrogen content, soluble solids, alcohol content, direct reducing sugar. 5. Labeling requirements: Items to be listed, particulars for each item listed, prohibited terms.

Brief history: "In 1963 the Japanese Ministry of Agriculture and Forestry (*Norinsho*), with the support of the Japanese Shoyu Association, set the first JAS (Japanese Agricultural Standards) for shoyu. The 1963 JAS shoyu standards were revised in July 1970 with *Norinsho* Notification #974. Companies choosing voluntarily to make

their shoyu to these standards were allowed to print the prestigious JAS mark on their labels. These standards were revised again in 1980.

"In January 1976 in the United States the Federal Supply Service of the General Services Administration established America's first soy sauce standards for use by all federal agencies. The classified all soy sauce into two types: Type I-Soy Sauce (fermented), and Type II-Soy Sauce (non-fermented). These standards were revised on 5 May 1978 as Fed. Spec. EE-S-610G.

"In late 1983 the Japanese shoyu standards were first translated into English and work began to adapt them to American needs and conditions." Address: 1. Albany, California; 2-3. Soyfoods Center, P.O. Box 234, Lafayette, California 94549; 4. Westbrae Natural Foods, P.O. Box 8711, Emeryville, CA 94662.

6367. Chico-San, Inc. 1983. Why does Chico-San pay premium prices for products and ingredients (Ad). *Vegetarian Times*. Nov. p. 31.

• **Summary:** Chico-San describes itself as "A company built on a philosophy"—macrobiotics. "Over the past two decades many macrobiotic food companies have come and gone. We are grateful that we have been able to survive a disastrous fire that wiped out our facilities in 1972, plus a couple of severe recessions. Chico-San is now strong and independent."

"We continue to operate under the belief that it is not enough just to eat brown rice, vegetables and miso soup."

"Some of you may have already seen the first issue of our free newsletter, The Crackerbarrel, which featured articles on subjects ranging from organic miso and soy sauce,... Also included is a message from Lima Ohsawa, and information on processing low-sodium soy sauce (and why it may not be very desirable),..."

The signature of J. Robert Kennedy, President, Chico-San Inc., and the Chico-San logo (a sort of spiral) are shown. Address: P.O. Box 810, Chico, California 95927.

6368. **Product Name:** Tofu Turkee (Meatless Turkey Made with Tofu).

Manufacturer's Name: Garden of Eatin' (Formulator and Distributor).

Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.

Date of Introduction: 1983. November.

Ingredients: Tofu (coagulated with calcium-sulfate), soy sauce, soy oil, vinegar, honey, herbs, hickory smoke.

Wt/Vol., Packaging, Price: 9 oz.

How Stored: Refrigerated.

New Product-Documentation: Label. 1983. 5.5 by 2.75 inches. Paper. Black on tan. "100% Vegetarian." Soyfoods Newsletter. 1984. Jan. p. 1. A firm slab of the tofu is marinated then baked.

6369. **Product Name:** Homemaker Powdered Koji Spore Kits for Miso [Red Rice, Barley, and Soybean], and for Shoyu.

Manufacturer's Name: GEM Cultures.

Manufacturer's Address: 30301 Sherwood Rd., Fort Bragg, CA 95437. Phone: 707-964-2922.

Date of Introduction: 1983. November.

New Product–Documentation: Letter from Betty Stechmeyer of GEM Cultures. 1991. Oct. 18. These basic products were introduced in Nov. 1983. The concentrated spores were extended with organic rice flour to make the starters easier to measure and use.

6370. Hesseltine, C.W. 1983. The safety of shoyu. Paper presented to the Japan Soysauce Brewers' Assoc. meeting. 36 p. Held 29 Nov. 1983, Tokyo. [33 ref]

• **Summary:** Historical background: In 1953, Dr. Hesseltine went from the fermentation industry to the Northern Regional Research Laboratory (Peoria, Illinois) as head of the ARS [Agricultural Research Service] Culture Collection. He had only a faint idea of how shoyu was made and he had never heard of miso, natto, or tofu. Shortly after his arrival, probably in 1953, he received a visit from Prof. Kin-ichiro Sakaguchi of the University of Tokyo, an authority on traditional Japanese fermented foods and one of the founders of the modern fermentation industry in Japan. Records show that in 1953 Dr. Sakaguchi received cultures from the ARS collection. His laboratory trained many students and much of his work was directly related to food fermentations involving soybeans and cereals.

In 1948 Dr. A.K. Smith of the NRRL visited Japan and China and recognized the tremendous amount of soybeans being used as human food. "The Western world had little or no understanding of the importance and use of these foods in the diet of Oriental people. He strongly recommended to anyone who would listen that there should be research on these foods and an exchange of scientists." In 1949 and later in 1958 Dr. Smith published a detailed report of his travels. In late 1958 two eminent Japanese scientists, Dr. Kazuo Shibasaki and Dr. Tokuji Watanabe arrived in Peoria to study traditional soybean foods. Dr. Shibasaki (who later became Professor of Agricultural Chemistry at Tohoku University) worked with Dr. Hesseltine on miso fermentation, and Dr. Watanabe worked with Dr. Smith on tofu.

"Before the year was up I became utterly fascinated with the process of making koji and with the delicious foods that could be made from the lowly soybean. But even broader than these studies on fermented foods was the concept of the solid state fermentation and the enzymes that could be made with this technique. Ever since that year of work with Dr. Shibasaki, I have been interested in fermented foods—not just those used in Japan, but worldwide." Address: NRRC, Peoria, Illinois.

6371. Jackson, Vicki. 1983. Squirrels vegetarian cook book. William Brooks Queensland, 921 Kingsford Smith Drive, Eagle Farm, Brisbane 4007, Queensland, Australia. 143 p. Illust. by Vicki Jackson. Index. Nov. 29 cm. 2nd ed. 1984.

• **Summary:** This hand-lettered cookbook was written for Squirrels Vegetarian Restaurant, Corner Melbourne & Edmonstone Streets, South Brisbane. The owners, Bronwyn Moses and Diana Mitchell, plan to open Squirrels on the Park, a second restaurant at 685 South Dowling St., Moore Park, Sydney, by Sept. 1984.

Soy-related recipes include: Chinese tofu soup (p. 12). Broccoli-pasta salad (with Soyaroni pasta, p. 30). Soyaroni marinaria [marinara?] (p. 52). Saucy soy stew (with cooked soybeans, p. 67). Tofu & peppercorn strudel (p. 79). About tofu (p. 86). Tofu satays with peanut sauce (p. 87). Battered tofu in sweet & sour sauce (p. 88). Tofu & peanut sauce (p. 89). Tofu & veggie curry (p. 90). Tofu & mushroom on spinach pasta (p. 91). Tofu & spinach loaf (p. 92). Tofu Chinese style (p. 93).

About tempeh, by Julie & Michael Joyce (p. 94; "Little did we know in early 1982, when we first ate tempeh made by Cyril & Ellie Cain of Eumundi, Sunshine Coast, that we were soon to become tempeh makers." They supply Squirrels with the tempeh they make). Tempeh chips (p. 96). Tempeh & tomato bake (p. 97). Tempeh sweet & sour (p. 98). Tempeh Indonesian style (p. 99). Tempeh Chinese style (p. 100). Tofu dessert (p. 125). Pages 141-42 describe tamari, tempeh, tofu, and miso. Address: Brisbane, Queensland, Australia.

• **Summary:** Some information in Chapter 1, Appendix A, and many advertisements have been changed. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6374. Shurtleff, William; Bennett, Gordon. 1983. Proposal for a Soy Sauce Council of North America. Lafayette, California: Soyfoods Center. 2 p. Unpublished typescript. 28 cm.

• **Summary:** Contents: Definition. Purpose. Membership. Funding. Communication, proposals, and voting. Initial activities: Standards, soy sauce press release program. Your participation.

"Definition: The Soy Sauce Council of North America (commonly referred to as the "Soy Sauce Council") is an

organization within the Soyfoods Association of North America.” This idea was proposed by the authors, a cover letter, questionnaire (containing 10 questions, mostly related to terminology), and 4-page list of potential members were drafted, and a mailing was done to all potential members. Eleven companies responded to the questionnaire and their responses were tabulated. The respondents were: Chico-San, Erewhon, Granum, Kikkoman-Wisconsin, Kikkoman-International, Mandarin Soy Sauce, Mountain Ark, Pure Sales, San-Jirushi, Westbrae, and Mark Fruin.

But Michael Austin and at least one other leader of the Soyfoods Association did not like the idea, so it was never implemented. Address: 1. Director, Soyfoods Center, Lafayette, California; President, Westbrae Natural Foods.

6375. Product Name: [Soyana Tofu Spreads and Dips (Curry, Carob, Sea Buckthorn/Sour-Cherry [Sanddorn/Argousier], Sesame, and Nutritional Yeast)].

Manufacturer’s Name: Soyana.

Manufacturer’s Address: Postfach 8039, Zurich, Switzerland.

Date of Introduction: 1983. November.

Ingredients: Curry: Incl. tofu, pears, hazelnuts, raisins, tamari, lemon juice, wheat flour, and salt.

Wt/Vol., Packaging, Price: 136 gm thin-walled aluminum tins with peel off lids, pasteurized.

How Stored: 6-month shelf life.

New Product–Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 19, and Part II, p. 16. Soyana also makes several shelf-stable tofu spreads and dips, packaged in tins, pasteurized, with a 6-month shelf life. Done by an outside company. The company has a new sesame-herb spread that tastes like cheese—excellent. The carob with nuts is their best spread. Sanddorn is a small red fruit like a small orange rich in vitamin C.

Talk with Walter Dänzer. 1990. May 30. These products are no longer on the market.

6376. Product Name: [Soyana Soya Lunch {Firm Tofu Marinated in Soy Sauce & Herbs}].

Foreign Name: Soyana Soya Lunch.

Manufacturer’s Name: Soyana.

Manufacturer’s Address: Postfach 8039, Zurich, Switzerland.

Date of Introduction: 1983. November.

Ingredients: Incl. tofu, soy sauce, herbs.

Wt/Vol., Packaging, Price: Vacuum packed.

How Stored: Refrigerated, 14 day shelf life.

New Product–Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 20.

Talk with Walter Dänzer. 1990. May 30. The product called Soyana Soya Lunch in German was introduced in

about 1983.

6377. Product Name: [Urtekram Soy Sauce, and Hatcho Miso].

Manufacturer’s Name: Urtekraemmeren (Importer). Made in Japan.

Manufacturer’s Address: Larsbjoernsstraede 20, DK-1454 Copenhagen, Denmark.

Date of Introduction: 1983. November.

New Product–Documentation: R. Leviton. 1983. Report on trip to Europe with American Soybean Assoc. Oct-Nov. p. 23. On a visit to a natural foods store in Aarhus, Denmark, Urtekram brand soy sauce and Hatcho miso were sold. Urtekram is sold by a large food distributor in Denmark.

6378. Wollner, Joel. 1983. Re: Soy sauce terminology. Letter to William Shurtleff at Soyfoods Center, Dec. 5. 3 p. Typed, with signature on letterhead.

• **Summary:** He fills out a form, answering “Ten Key Questions” concerning American terminology and standards for soy sauce. He answers yes to all the questions, and provides many perceptive comments. “Thanks for taking positive steps to clean up the soy sauce [terminology] mess. It’s a sticky situation with little clarity coming from any sector... I have met very few people who know the difference between Shoyu and Tamari, even in general terms. Everyone has a new idea or a new bottle to tip. The Soy Sauce Council will clean this up if its has the support of the industry, or some disinterested benefactor.”

Joel closes: “I want to offer my help in creating these standards and to leave you with a bit of advice: keep it simple, consistent, and look at it from the eyes of the consumer, then work backwards.” Address: Mountain Ark Trading Co., 109 South East St., Fayetteville, Arkansas 72701. Phone: 501-442-7191.

6379. Hesseltine, C.W. 1983. Awards from the Emperor of Japan and the Japanese Shoyu Association. Nitrosamines and the safety of shoyu (Interview). Conducted by William Shurtleff of Soyfoods Center, Dec. 16. 1 p. transcript. Address: NRRC, Peoria, Illinois.

6380. Hughes Markets. 1983. Merry Christmas! (Ad). *Los Angeles Times*. Dec. 22. p. I30-I131.

• **Summary:** Two full pages of ads. The section titled “Happy holidays from Hughes Markets!” (p. I30) includes: “Fresh Hinode age [deep-fried tofu pouches] 1.5 oz. pkg.—79¢. Kikkoman soy sauce gallon can—\$4.39. Kikkoman Aji Mirin, 10 oz. bottle, sweet cooking sauce—\$1.59. Hime kuromame amani 6.35 oz. can, Black [soy] beans—95¢.”

The section titled “Foods of the Orient holiday specials!” (p. I31) includes: “JFC Kinako 7 oz. pkg. Soy bean flour—69¢... Misuzu koya tofu, 3.5 oz box Wheat cake [sic, Dried frozen tofu]—\$1.15.” Also: “Hime sushinori dried

seaweed, Kikkoman tempura sauce, Su Hiro kombu maki Rolled kelp, Umeya frozen mochi.”

6381. *SoyaScan Notes*. 1983. Soymilk and dairy milk prices in California, December 1983 (Overview). Dec. 28. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** In Lafayette, California, whole fluid cow’s milk retails for \$0.39/pint (1 pint = 16 ounces) and nonfat cow’s milk retails for about \$0.43/quart. Milk is the least expensive popular beverage, less expensive than Coca-Cola, beer, or orange juice. Prices of unflavored fluid soymilks are as follows: Vitasoy, 8.4 oz. Tetra Brik sold to the Asian-American market \$0.35 (which is the equivalent of \$0.67 per pint), Quong Hop Soy Fresh 10.16 oz. Pure Pak carton \$0.59 (\$0.89/pint), Wildwood Yosoy pint plastic bottle \$1.05, Brightsong Honey-Vanilla pint plastic bottle \$1.08, San-J To-Neu 6.76 oz. Tetra Brik \$0.74 (\$1.75/pint), Edensoy 6.0 oz. retort pouch \$0.74 (\$1.97/pint). Vitasoy, the least expensive soymilk, is 1.72 times as expensive as cow’s milk. The average price of the pint equivalents of all 6 U.S. soymilk products mentioned above is \$1.24 a pint (which would be \$2.48/quart). Thus the average soymilk in a typical pack is 3.53 times as expensive as dairy milk per unit volume.

6382. Hughes Markets. 1983. Happy New Year! (Ad). *Los Angeles Times*. Dec. 29. p. J24-25.

• **Summary:** The section titled “Foods of the Orient holiday specials” includes: Kikkoman soy sauce, gallon can—\$4.25. Fresh Hinode age, 1.8 oz.—79¢. Kikkoman 10 oz. JFC soy bean flour 7 oz. Kinako—69¢. Kikkoman Tempura Sauce 10 oz bottle—\$1.09. Hime Kuromame amani, Black [soy] beans—95¢. Misuzu Koya Dofu 3.5 oz. box Wheat cake [sic, Dried frozen tofu]—\$1.15.

Also includes: Frozen Umeya mochi. Shirakiku bamboo tips. Ozeki sake. New crop Kokuho rice. Hime sushinori [Sushi nori] Dried seaweed. Kikkoman Aji mirin—Sweet cooking sake. Mitsukan Su—Rice vinegar. Miyako kizami shoga—Sliced pickled ginger. Miyako shiitake—Dried mushrooms. Tamandi Sushipoko—Sushi seasoning. Kezuka kampyo [kanpyo]—Dried gourd strip. Suhiro Kumsu Maki—Rolled kelp [konbu].

6384. **Product Name:** Erewhon Shoyu Tamari.

Manufacturer’s Name: Erewhon, Inc. (Imported). Made in Japan.

Manufacturer’s Address: Boston, Massachusetts.

Date of Introduction: 1983. December.

New Product—Documentation: Ad in Whole Foods. 1983. Dec. p. 51. “The look is new but the flavor is still aged.” “Our look may be new. But all 150 Erewhon Natural Food products are still made the same quality way.”

Leaflet. 8½ by 11 inches, color. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Ad (full-page, color) in Whole Foods. 1989. Feb. p. 27. “Made in Japan 400 years ago.” Shows chopsticks on a small bowl or shoyu next to two types of sashimi against a black background.

6385. Hymowitz, T.; Harlan, J.R. 1983. Introduction of soybean to North America by Samuel Bowen in 1765.

Economic Botany 37(4):371-79. Dec. [48 ref]

• **Summary:** The soybean, a domesticate of China, was first introduced to North America in 1765 by Samuel Bowen, a seaman employed by the East India Company, who brought soybeans to Savannah, The Colony of Georgia, from China via London. Bowen claimed that he was a prisoner in China for nearly 4 years (probably between 1759 and 1763) and was carried 2,000 miles from place to place through the interior of the country. In 1764 Bowen arrived in Savannah. On 30 March 1765 he married Miss Jeanie (Jane) Spencer, daughter of William Spencer, the Collector of Customs in Savannah. “This gained Samuel Bowen instant respectability.” On 14 May 1765 Bowen purchased a 450-acre tract of land at Thunderbolt, a few miles East of Savannah, from Grey Elliott. His plantation, named “Greenwich,” became the center of his farming and manufacturing enterprises. Bowen also purchased an 84-acre tract of land near this Thunderbolt property from John Mulryn; he called it Macas (Macao) Island.

In the spring of 1765 Bowen did not have land available to sow seeds. Therefore, he asked Henry Yonge, the Surveyor-General of Georgia, to plant soybean seed that he had brought from China. These were the earliest known soybeans grown in North America. From 1766 Mr. Bowen planted soybeans on his own plantation, Greenwich. From these soybeans, Bowen made soy sauce and soy-based vermicelli, which he patented in 1767 and was exporting to England by 1770. Table 1 (p. 377) shows exports of sago, soy sauce (in quart bottles), and vermicelli from Savannah, Georgia (1766-1775). He exported 162 quarts of soy sauce in 1770-1771, 60 quarts in 1772-1773, 36 quarts in 1773-1774, and 800 quarts (200 gallons) in 1774-1775. Bowen’s soy sauce was probably relished in London. In May 1774 he also exported peanuts, sesame seed, and saffras blossoms. Samuel Bowen traveled to London in 1766, returning to Savannah in November. “He must have had a triumphant welcome in Savannah and most certainly his status as an entrepreneur among his fellow Georgians increased, for Samuel Bowen was awarded a gold medal from the Society of Arts, Manufactures, and Commerce and received a present of 200 guineas from King George III.” It was the opinion

of Dr. John Fothergill, the famous English physician and botanist, that the Society should award Mr. Bowen the gold medal based on tests conducted by the Society's agricultural committee. "Samuel Bowen was introduced to King George III by Lord Dartmouth, who was the president of the Board of Trade and a Lord of the Privy Council."

Bowen's exports probably ended or were drastically reduced by the Revolutionary War starting in early 1776. He made two more trips to England in 1769 (to Gosport) and 1774 (to Cowas). Bowen died in 1778, probably shortly before his will was probated on Sept. 12 of that year.

When and how did Samuel Bowen travel to China? On 8 Feb. 1758 he signed on as a seaman on the *Pitt*, headed for the East India Trading Company's factory in Canton, China. At 600 tons, the *Pitt* was the largest ship to sail from England to China since the first ship, the *London*, went to Macao in 1635. After a brief stop at Madras, India, the *Pitt* was accompanied by a two-masted tender, the *Success*, which assisted the *Pitt* through uncharted waters, until it arrived in Canton, China, on 16 April 1759. About two months later, on 13 June 1759, Bowen boarded the *Success*, which sailed north to Ningpo, then on to Tientsin. Also on board was James Flint, an employee of the East India company since 1736, and now the Company's Chinese interpreter. Mr. Flint left the *Success* at Tientsin on 29 July 1759 and returned to Canton via an overland route, arriving about 43 days later, on Sept. 10.

The voyage of the *Success* became a major international incident in both China and England, because the Emperor had prohibited foreigners from trading outside of Canton. James Flint was eventually imprisoned by the Chinese at Macao from Dec. 1759 to Nov. 1762, then banished from China forever by the Emperor Ch'ien-lung. The *Success* was never heard of again. Bowen claimed that he was a prisoner in China for nearly four years and that he was carried 2,000 miles in the interior of China. Bowen returned to London in late 1763. On 10 Nov. 1763 he received £28 and 11d for his services on board the *Pitt*. But six days later, on Nov. 16, he petitioned the Court of Directors of the East India Company to redress a grievance concerning his wages and imprisonment in China. The court ordered that he be paid £19 and 10d more. In total, from 1748 to 1864, Bowen earned about £80 in wages as a seaman for the East India Company from 1758-1764. By contrast, James Flint earned a minimum of £8,500 from 1760-1766. Of Flint's total, £6,500 was in commissions as a supercargo and £2,000 was for the hardships he underwent (primarily imprisonment for almost 3 years) and future opportunities missed because of banishment.

The second soybean introduction to North America was by Benjamin Franklin. In 1770 he sent seeds from London to the botanist John Bartram in Philadelphia, Pennsylvania. This was 5 years after Samuel Bowen's introduction.

Bowen was interested in making a starch powder to

substitute for sago power, which he found so widely used in China. He wrote on 17 Sept. 1766 that in Georgia he had found the vegetable that produced this powder. However Dossie (1768-1771) reveals that Bowen used the root of a vegetable to make a substitute for sago powder, and Bonner (1964) concludes that the sago substitute was made from sweet potatoes [*Ipomoea batatas*].

Note 1. Maps of the area show that Savannah and Thunderbolt are in northwestern Georgia, very near the southern tip of South Carolina and quite near the Atlantic Ocean. Yonge (pronounced Young) probably grew America's first soybeans on Skidaway Island (Hymowitz, pers. comm., 27 May 1989). This island is located about 10 miles southeast of Thunderbolt (which is 8 miles southeast of the center of present-day Savannah), on the coast of the Atlantic Ocean in Georgia, at the confluence of 3 rivers. Both Skidaway Island and Thunderbolt are in Savannah's "coastal low-country area." The Wilmington River runs along the northern side of both Thunderbolt and Skidaway Island. In 1765 and 1766 Skidaway Island and Thunderbolt were both located in Christ Church Parish, Colony of Georgia. The first counties in Georgia were created in 1777; at that time Christ Church Parish became part of Chatham County.

Note 2. This document contains the earliest date seen for soybeans in Georgia, or the thirteen colonies (which later became the United States of America), or the cultivation of soybeans in Georgia, or the USA (spring 1765). Address: Dep. of Agronomy, Univ. of Illinois, Urbana-Champaign, Urbana, Illinois.

6386. Leviton, Richard. 1983. Report on soyfoods research trip across America, Dec. 1983. Colrain, Massachusetts. 2 p. Unpublished typescript.

• **Summary:** Visited or discusses: Northern Soy (Rochester, New York), Legume (New York City), Tofu Time (David Mintz, New York City), New England Soy Dairy (Greenfield, Massachusetts), SanJ (San-Jirushi, Virginia), Quong Hop & Co. (South San Francisco, California), Worthington Foods (Worthington, Ohio), Southwest Soyfoods (Richard Jennings, Santa Fe, New Mexico). Address: 100 Heath Rd., Colrain, Massachusetts 01340. 6387. **Product Name:** Homestyle Tempeh Fiesta (Tempeh & Millet & Veggie Spread or Salad).

Manufacturer's Name: 21st Century Foods Inc.

Manufacturer's Address: 30 Germania St., Jamaica Plain, MA 01230.

Date of Introduction: 1983.

Ingredients: Organic soy tempeh, marinated in tamari, herbs, and spices; cooked organic millet, finely cut carrot, celery, bell pepper, onion, parsley; corn oil, vinegar.

Wt/Vol., Packaging, Price: 12 oz plastic tray with lid.

How Stored: Refrigerated.

New Product-Documentation: Leaflet. 1983. "Tempeh

with a Difference.” Spot in Soyfoods. 1984. Summer. p. 44.
 “A Meal in Itself.” Talk with Rudy Canale. 1988. Sept. 13.
 This is still being made but is now called simply Tempeh
 Fiesta. It was never renamed “Tempeh Spread.”

6388. **Product Name:** [Miso, Shoyu, Koji, and Natto].
Foreign Name: Miso, Shoyu, Koji, Nattô.
Manufacturer's Name: Ab & Paulien Schraft Soyfoods.
Manufacturer's Address: Mas Miquelet, Baillestavy
 66320, France.
Date of Introduction: 1983.

New Product–Documentation: Letter from Sjon Welters.
 1982. April 16. “Two Dutch people, just back from studying
 with Thom Leonard and The Farm (Tennessee) in the States,
 are setting up a small plant to produce miso, shoyu, natto,
 and koji: Ab & Paulien Schraft.”

Shurtleff & Aoyagi. 1983. *The Book of Miso*. 2nd ed.
 p. 255. Letter from Sjon Welters. 1989. July 24. “As far as I
 know, this company never got off the ground.”

6389. **Product Name:** Taboolie with Tofu.
Manufacturer's Name: Bountiful Bean Plant.
Manufacturer's Address: 903 Williamson St., Madison,
 WI 53703. Phone: 608-251-0595.
Date of Introduction: 1983.
Ingredients: Bulgar, tofu, celery, carrots, scallions, parsley,
 vinegar, water, shoyu soy sauce, oil, mint.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: James Lubbe. 1988. March.
 Abbreviated History of the Bountiful Bean. Label. 1985. 3.5
 inch diameter. Self adhesive. Green on white. “Mid-Eastern
 Salad.”

Label sent by Elizabeth Hanson of Bountiful Bean.
 1991. Nov. 12. Same label as above, but company is now
 located in Ridgeway, Wisconsin 53582.

Leaflet sent by Paul Olson, new owner of Bountiful
 Bean Soyfoods. 1993. Nov. 19. The company makes
 Taboolie that contains tofu.

6390. **Product Name:** Sunny Tofu Salad (Eggless Egg
 Salad).
Manufacturer's Name: Bountiful Bean Plant.
Manufacturer's Address: 903 Williamson St., Madison,
 WI 53703. Phone: 608-251-0595.
Date of Introduction: 1983.
Ingredients: Tofu, celery, scallions, green pepper, pimiento,
 shoyu soy sauce, lemon juice, mellow white miso, honey,
 dried parsley turmeric, curry, cumin, cayenne pepper.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: James Lubbe. 1988. March.
 Abbreviated History of the Bountiful Bean. A product
 named simply Sunny was first launched in 1983. Later it was

renamed Sunny Tofu, then Sunny Tofu Salad. Label. 1985.
 3.5 inch diameter. Self adhesive. Maroon on white. “Eggless
 Egg Salad.”

6391. **Product Name:** Tempeh Burger.
Manufacturer's Name: Cricklewood Soyfoods.
Manufacturer's Address: Route 1, Mertztown, PA 19539.
Date of Introduction: 1983.
New Product–Documentation: Ad in CRC Reports. 1987.
 Fall. p. 15. Talk with Karl Krummenoehl. 1988. Jan. 4. This
 is soy tempeh with spices marinated in soy sauce. Launched
 in about 1983.

6392. **Product Name:** Soysage (Meatless Okara-based
 Sausage) [Regular, or Hot & Spicy].
Manufacturer's Name: Golden Soy Foods Inc.
Manufacturer's Address: P.O. Box 495, Athens, OH
 45701.

Date of Introduction: 1983.
Ingredients: Regular: Okara (soy fiber from organic
 soybeans), whole wheat flour, wheat germ, corn oil, shoyu
 (water soybeans, wheat, salt), nutritional yeast, garlic
 powder, molasses, mustard, oregano, fennel seed, sage, salt.
 Hot & Spicy adds red cayenne as the last ingredient.
Wt/Vol., Packaging, Price: 1 lb plastic wrapped.
How Stored: Refrigerated.
Nutrition: Per 1.5 oz.: Calories 120, protein 5 gm,
 carbohydrates 14 gm, fat 5 gm, sodium 29 mg.
New Product–Documentation: News release. “A great
 protein alternative.” Domitz. 1986. Messenger (Athens,
 Ohio). June 1. “Soysage offers a healthful alternative.”
 Ellers. 1986. Plain Dealer (Cleveland, OH). Dec. 21.
 “Vegetarian’s work rooted in low-calorie soy products.”
 Label. 1987. Self adhesive. 3.5 by 8.5 inches. Self adhesive.
 Blue, yellow, and white. Hot & Spicy: Blue, yellow, white
 and pink. “Vegetarian. All Natural. Very Low Sodium. Ready
 to Eat. Slice and fry for breakfast and sandwiches. Use in
 lasagne, spaghetti, chili, tacos, burritos & casseroles.”

6393. **Product Name:** Kikkoman Lite Soy Sauce
 (Moderately Low Sodium).
Manufacturer's Name: Kikkoman Foods, Inc.
Manufacturer's Address: Walworth, Wisconsin 53184.
Date of Introduction: 1983.
Ingredients: Water, wheat, soybeans, salt, lactic acid,
 sodium benzoate: less than 1/10 of 1% as a preservative.
Wt/Vol., Packaging, Price: 0.3 oz single serving packet, or
 5 oz or 10 oz bottles.
How Stored: Shelf stable; refrigerate after opening.
New Product–Documentation: Talk with Danji Fukushima
 of Kikkoman. 1982. June 2. This product is made using
 Kikkoman’s regular shoyu process, then about 40% of the
 salt is removed by electrodialysis.
 Labels. 1983. 8 by 3.5 inches. Paper. Red, black, and

white on green. "Premium quality. Naturally brewed. Since 1630. 40% less salt. 100% original Kikkoman flavor!" 100 mg of sodium per ½ teaspoon serving. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Food Management. 1986. Dec. Contains 40% less sodium than regular soy sauce. Ad in Cooking Light. 1989. Jan/Feb. p. 92. "How to go lite on the salt... 40% less salt."

6394. **Product Name:** Cold Mountain Hoisin Sauce (Bulk).
Manufacturer's Name: Miyako Oriental Foods, Inc.
Manufacturer's Address: 4287 Puente Ave., Baldwin Park, CA 91706.

Date of Introduction: 1983.

New Product–Documentation: Portfolio sent by Terry Shimizu of Miyako Oriental Foods. 1999. Nov. 22. Talk with Terry Shimizu. 1999. Nov. 29. This product was introduced in late 1982 or 1983. It was made for Mutual Trading Co., packaged under the latter's private label, and sold only in bulk to institutions.

6395. **Product Name:** Tofu Dip (Like Eggless Egg Salad).
Manufacturer's Name: Natural Pacific.
Manufacturer's Address: 153 Makaala St., P.O. Box 11001, Hilo, Island of Hawaii, HI 97520. Phone: 808-935-3220.

Date of Introduction: 1983.

Ingredients: Tofu (water, soybean curd precipitated with filtered seawater and/or natural nigari), sunflower seed oil, soy sauce, rice vinegar, onion powder, dill, garlic powder, turmeric, celery salt.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Not listed in any Hawaiian City Directory prior to 1968. Talk with Ty Katibah. 1988.

Feb. 10. Label. 1987. 2.5 by 2.5 inches. Rounded top. Black, yellow and white. "Free from preservatives and artificial additives."

6396. **Product Name:** Teriyaki Tofu.

Manufacturer's Name: Natural Pacific.

Manufacturer's Address: P.O. Box 4352, Hilo, Island of Hawaii, HI 96720. Phone: 808-935-3220.

Date of Introduction: 1983.

Ingredients: Tofu (water, organically grown soybeans, filtered seawater), shoyu, honey, ginger, onion, garlic, spices.

Wt/Vol., Packaging, Price: 3 oz.

How Stored: Refrigerated.

New Product–Documentation: Not listed in any Hawaiian City Directory prior to 1968. Talk with Ty Katibah. 1988. Feb. 10. Labels. Both original and current. Brown and white.

6397. **Product Name:** Baked Tofu: Marinated in Shoyu.

Manufacturer's Name: Palomar Mountain Soyfoods.

Manufacturer's Address: 31405 N. Highway 395, Escondido, CA 92025. Phone: 714-749-2476.

Date of Introduction: 1983.

Wt/Vol., Packaging, Price: In a cottage cheese container with a snap-on lid.

How Stored: Refrigerated.

New Product–Documentation: Talk with Alex Press. 1990. Feb. 28. He started selling this product in 1983. He does not recall the exact name.

6398. **Product Name:** So' Tamari Soy Sauce.

Manufacturer's Name: Pure & Simple, Inc.

Manufacturer's Address: P.O. Box 1235, Corona, CA 91720.

Date of Introduction: 1983.

New Product–Documentation: Poster. Also published in the Feb. 1984 Natural Foods Merchandiser. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Chateau So'. It's vintage... So' Tamari Soy Sauce.

6399. **Product Name:** Gold Lion Soya Sauce; Extra Gold Dragon Soya Bean Sauce.

Manufacturer's Name: R.M.R. Manufacturers.

Manufacturer's Address: 15/3 Edrigodon Mawatha, Nugegoda, Sri Lanka.

Date of Introduction: 1983.

Ingredients: Soya, wheat flour, salt, sugar, preservative.

Wt/Vol., Packaging, Price: Bottled. (1) 725 ml for Rs. 31/50. 325 ml bottle for Rs. 22/50. (2) 325 ml for Rs. 20/-.

How Stored: Shelf stable.

New Product–Documentation: Label. 1987, undated. 3 by 3.5 inches oval. Gummed. White and gold on purple with drawing of dragon and Chinese characters reading "Chinese Soy Sauce." Mr. W.F. Hsu, the owner, says he uses 1,000 kg/month of soybeans but survey person notes that this seems too high unless we recall that the product is also marketed by New Edinburgh products.

6400. **Product Name:** San-J Tamari Teriyaki. Renamed Natural Teriyaki Sauce by 1986.

Manufacturer's Name: San-J International, Inc. (Importer). Made in Japan by San-Jirushi.

Manufacturer's Address: Colonial Heights, VA 23834.

Date of Introduction: 1983.

Ingredients: Tamari, sweet rice wine, water, honey, apple vinegar, rice vinegar, mustard, garlic, ginger, plum juice, xanthan gum, white & black pepper.

Wt/Vol., Packaging, Price: 5, 10, 20 and 61 oz bottles.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1983, undated. 2 labels: 7 by 4.5 inches (61 oz). Paper. Brown and green on yellow. "A teriyaki sauce, marinade, glaze and tenderizer..."

Two labels sent by Misako Binford of San-J International. 2012. May 14. The brown label now reads: "Teriyaki: Stir-Fry & Marinade. Gluten Free. 10 fl. oz. New mildly sweet flavor." One logo on the front panel: "Certified Gluten Free." She notes: 1987 or before. Imported.

6401. **Product Name:** Seitan Wheat Meat Pounder.

Manufacturer's Name: Sheffield Seitan.

Manufacturer's Address: South Wheelock, Vermont.

Date of Introduction: 1983.

Ingredients: Seitan (wheat gluten cooked in a broth of soy sauce, garlic powder, and cayenne).

Wt/Vol., Packaging, Price: 1 lb+.

How Stored: Frozen.

New Product–Documentation: Talk with Leo Denby, owner of Sheffield Seitan. 1998. Feb. 3. This frozen product was introduced in 1983.

6402. Shindo, E. 1983. [Soy sauce imported from Hong Kong]. *Nihon Shoyu Kenkyujo Zasshi (J. of the Japan Soy Sauce Research Inst.)* 9(2):71-72. [Jap]*

• **Summary:** The general composition of five brands of soy sauce imported from Hong Kong, retailing in Japan for 180-350 yen/liter were compared with Kikkoman soy sauce (which retailed in Japan for 500-700 yen/liter). Address: Japan Soy Sauce Research Inst., Tokyo, Japan.

6403. **Product Name:** Tempeh Burger, Hi-Pro Burger (Marinated Tempeh Burger), Tempeh-Tofu Burger.

Manufacturer's Name: Soy Power (Marketer/Distributor). Made in South San Francisco by Quong Hop & Co.

Manufacturer's Address: 2811-A Ocean Park Blvd., Santa Monica, CA 90405.

Date of Introduction: 1983.

Ingredients: Hi-Pro Tempeh Burger: Soy tempeh from organically grown soy beans, shoyu, oleic safflower oil, lemon juice, natural hickory smoke, herbs and spices.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1983. 3 inch diameter. Self adhesive. Dark brown and white on lighter brown. "100% Natural. High in Protein. No Cholesterol. Hi-Pro Tempeh Burgers may be eaten fresh from the pack or steam 6 minutes in a covered pan with 5 tablespoons water sprinkled around burger. Serve in pocket bread, garnished with your favorite burger type trimmings (tomato, alfalfa sprouts, onion, etc.)." Talk with Kevin Cross. 1988. Sept. 22. Introduced in about 1983.

6404. **Product Name:** Soy Vay Veri Veri Teriyaki.

Manufacturer's Name: Soy Vay Enterprises, Inc. (Marketer-Distributor).

Manufacturer's Address: Arcata, California 95018. Phone: 1-800-600-2077.

Date of Introduction: 1983.

Ingredients: Soy sauce (water, wheat, soybeans, salt, sodium benzoate—less than 1 tenth of 1 percent as a preservative), sugar, dried onion, fresh garlic, sesame seeds, sesame oil, soy oil, fresh ginger, garlic powder, onion powder, ginger powder.

Wt/Vol., Packaging, Price: 21 oz. glass bottle. Retail for \$4.29 at Safeway supermarket (1997/05, Lafayette, California).

How Stored: Shelf stable.

New Product–Documentation: Product with Label purchased at Safeway supermarket in Lafayette, California. 1997. May 25. The typeface, product name, and marketing are Yiddish/Jewish but large Chinese characters appear on both sides of the front panel. "A true and original tasting Teriyaki Marinade and Sauce for beef, chicken, fish, stir-fry, vegetables, or whatever else you may dream up. Since 1982.

Shake well before using.”

One side panel states: “For recipes or information write: Soy Vay, P.O. Box 410671, San Francisco, CA 94141-0671. For more unique Soy Vay taste treats, try Island Teriyaki, Chinese Marinade, and Cha-Cha Chinese Chicken Salad Dressing.” The back panel states: “About Soy Vay. Our company came to be when a Jewish boy and a Chinese girl met and began talking about a common interest: cooking. We soon realized that by combining the best of our families’ cooking secrets, we could create new and unique tastes. The result—Soy Vay!

“Our first product, the original Soy Vay Chinese Marinade [1982], quickly gained a large following of fans. Next came Soy Vay Veri Veri Teriyaki.”

Talk with owner of Soy Vay. 1997. June 3. This product was introduced in 1983 in two sizes—7.5 oz and 21 oz. At that time the company was located in Arcata, California. They moved to Felton, California, in 1987.

6405. Product Name: Tempeh-Taco.

Manufacturer’s Name: Soyplant Co-op Inc. (The).

Manufacturer’s Address: 211 East Ann St., Ann Arbor, MI 48104. Phone: (313) 663-8638.

Date of Introduction: 1983.

Ingredients: Tempeh, tomatoes, tomato sauce, soy sauce, peanut oil, sesame oil, garlic, molasses, spices.

Wt/Vol., Packaging, Price: 12 oz.

New Product–Documentation: Label in Soy Plant scrapbook from about 1983. 3 by 2 inches. Red on white. 12 oz.

6406. Product Name: Tempehroni.

Manufacturer’s Name: Soyplant Co-op Inc. (The).

Manufacturer’s Address: 211 East Ann St., Ann Arbor, MI 48104.

Date of Introduction: 1983.

Ingredients: Tempeh, tomatoes, tomato sauce, soy sauce, peanut oil, olive oil, garlic, molasses, spices.

Wt/Vol., Packaging, Price: 12 oz.

New Product–Documentation: Label in Soy Plant scrapbook from about 1983. 3 by 2 inches. Green on white. 12 oz.

6407. Product Name: Westbrae Natural Mild Soy Sauce (Salt Reduced).

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Water, whole soybeans, whole wheat, sea salt.

Wt/Vol., Packaging, Price: 12.7 fluid oz (375 ml).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1983, undated.

3.5 by 8 inches. Color. “Half the Sodium of Regular Shoyu. Most ‘salt reduced’ soy sauces use an ion exchange method to lower their sodium content.” Westbrae removes it mechanically, starting by heating the shoyu at lowered atmospheric pressure until the salt precipitates out. It is then removed by a centrifuge. Label. 1986. 5 by 3.5 inches. Paper. Brown, green, blue, yellow and white. Mt. Fuji logo illustration. “Contains 175 mg sodium per 5.9 gm (1 tsp.) serving, vs. 350 mg for regular shoyu.” Letter from Gordon Bennett. 1987. Oct. Gives year of introduction as 1983.

6408. Product Name: Westbrae Natural Buckwheat Ramen. Instant Asian-Style Buckwheat Noodles & Miso Flavor Broth.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: Whole buckwheat flour, sifted wheat flour, water, sea-salt. Vegetable broth: Powdered soy sauce (soybeans, wheat, sea salt), powdered miso (soybeans, seasalt), dried Kombu seaweed, dried Japanese mushrooms, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.

Wt/Vol., Packaging, Price: 3.1 oz (90 gm).

How Stored: Shelf stable.

Nutrition: Per 45 gm.: Calories 158, protein 5 gm, carbohydrate 32 gm, fat 1 gm.

New Product–Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Orange, brown, white, green, black on yellow. Color picture of bowl of Buckwheat Ramen. Miso Flavor Broth packet. 3 inch square. Foil. Burgundy on silver.

6409. Product Name: Westbrae Natural Seaweed Ramen. Instant Asian-Style Whole-Wheat Noodles & Seaweed Flavor Broth.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA

94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: Whole-wheat flour, sifted wheat flour, salt. Soup: Powdered miso (soybeans, white rice, salt). Powdered soy sauce (soybeans, wheat, seasalt), shiitake mushroom powder, onion powder, dried wakame seaweed, garlic salt, ginger powder, black pepper.

Wt/Vol., Packaging, Price: 3.1 oz (90 gm).

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Orange, white, black, brown, green on blue. Color picture of bowl of Seaweed Ramen.

6410. **Product Name:** Westbrae Natural Miso Ramen.

Instant Asian-Style Whole-Wheat Noodles & Miso Flavor Broth.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: 415-658-7518.

Date of Introduction: 1983.

Ingredients: Asian-style noodles: whole wheat flour, sea salt. Miso broth: Powdered soy sauce, soybeans, wheat, sea salt, powdered miso, dried kombu seaweed, dried Japanese mushroom, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.

Wt/Vol., Packaging, Price: 3.1 oz.

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 9.5 by 6.5 inches. Plastic packet. Orange, purple, white, green brown. Full color picture of bowl of Miso Ramen. Directions with pictures of how-to.

6411. Westbrae Natural Foods. 1983. Tamari vs shoyu (from a company that sells both) (Poster). Emeryville, California. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

Address: Emeryville, California.

6412. **Product Name:** Tempeh Burger.

Manufacturer's Name: White Wave.

Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.

Date of Introduction: 1983.

Ingredients: Soy tempeh (made with cultured soybeans organically grown in accordance with the California Health and Safety Code, section 26569.11), soy sauce, garlic, onion, spices.

New Product–Documentation: Spot in Soyfoods. 1984. Summer. p. 43. Shurtleff & Aoyagi. 1985. History of Tempeh. p. 54. By 1984 this was the company's best-selling tempeh product, followed by frozen soy tempeh, soy & rice tempeh, then 5-grain tempeh. In May 1988 the round Soyfoods Unlimited Meatless Burger was merged into this

product, but using the Soyfoods Unlimited Label with the juicy glazed burger and the two onion rings floating above it. The full title of the new label now reads: White Wave Tempeh Burger. Marinated Soy Tempeh. All the Sizzle... None of the Steak. Ready to eat in 1 minute. Pareve.

6413. **Product Name:** Wildwood Natural Sushi.

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1983.

Ingredients: Organically grown brown rice, carrots, seasonal vegetable (zucchini, cucumber, red or green cabbage, broccoli or scallions), brown rice vinegar, nori sea vegetable, umeboshi plum (salted Japanese plum), ginger, tamari.

How Stored: Refrigerated.

New Product–Documentation: Labels sent by Wildwood on their letterhead. 1983, undated. 2.75 by 1.75 inches. Self adhesive. Black and green on ivory. Silhouette of woods with birds. "Ready to eat Foods, Naturally."

6414. **Product Name:** Hijiki Rice Pie.

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1983.

Ingredients: Brown rice, whole wheat pastry flour, hijiki, shiitake and button mushrooms, unrefined or safflower oil, tamari, ginger, garlic, sea salt.

Wt/Vol., Packaging, Price: 5 oz squares.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Wildwood on their letterhead. 1983, undated. 3 by 2 inches. Self adhesive. Black and green on yellow. Silhouette of woods with birds. "Ready to eat Foods, Naturally. Perishable–Keep refrigerated."

Talk with Billy Bramblett, an owner of Wildwood. 1998. Aug. 8. This delicious product had a whole-wheat crust with a filling based on brown rice. They made it on big baking sheets, then they would cut it into 5-oz squares and wrap it. They sold it hot at the Good Earth.

6415. **Product Name:** Hummus.

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1983.

Ingredients: Garbanzo beans, tahini, tamari, scallions, parsley, apple cider vinegar, olive oil, sea salt, spices.

Wt/Vol., Packaging, Price: 7 oz plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Wildwood on their letterhead. 1983, undated. 2.5 by 1.5 inches. Self

adhesive. Black and green on white. Silhouette of woods with birds. "Ready to Eat Foods. Naturally. Perishable. Keep refrigerated."

6416. Product Name: [Tofu in Sauces (Tamari Sauce, Herb Sauce, or Tomato Sauce)].

Foreign Name: Tofu in Tamarisaus, Kruidensaus, or Tomatensaus.

Manufacturer's Name: Witte Wonder Natural Products B.V.

Manufacturer's Address: Den Haag, Netherlands.

Date of Introduction: 1983.

Wt/Vol., Packaging, Price: Bottles.

New Product–Documentation: Label. 1983. 6 by 1.5 inches. Self adhesive. 2 color: Brown and light green on white. Illustration of product vegetable. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Richard Leviton. 1983. Trip to Europe with American Soybean Assoc. Oct/Nov. Unpublished manuscript. p. 24. The three varieties of marinated tofu were selling very well by Nov. 1983. Tofu in tamari sauce, in spicy sauce, in tomato sauce—very good. Bottled, shelf stable, pasteurized, boiled in the bottles in a giant kettle for 1.5 hours, they keep for 1 year. In all of Holland there are about 500 health food stores. Tofu in tomato sauce: dice sized chunks clumped together in marinade. Not premarinated but flavor soaks in during pasteurization. Not too salty. Weak tomato taste.

6417. Product Name: [Ketjap: Sweet Soy Sauce].

Foreign Name: Ketjap: Zoete Sojasaus.

Manufacturer's Name: Witte Wonder Natural Products B.V.

Manufacturer's Address: Piet Heinstraat 80, 2518 CK Den Haag, Netherlands.

Date of Introduction: 1983.

Ingredients: soybeans, water, corn syrup, salt, and herbs.

Wt/Vol., Packaging, Price: 0.33 liter.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1983. 3 by 4 inches. Dark green and light green on white. Illustration of a soybean plant and of a tofu maker.

6418. Wood, Brian J.B.; Walker, C.A. 1983. Soy sauce—from research project to factory production. *Process Biochemistry* 18:123-28. In *Advances in Fermentation supplement*. * Address: Dep. of Bioscience & Biotechnology, Univ. of Strathclyde, Glasgow, Scotland, UK.

6419. Product Name: Soya Sauce (in 250 ml Tetra Brik).

Manufacturer's Name: Yeo Hiap Seng Ltd.

Manufacturer's Address: 950 Dunearn Rd., Singapore.

Date of Introduction: 1983.

Wt/Vol., Packaging, Price: Tetra Brik aseptic carton.

How Stored: Shelf stable.

New Product–Documentation: Tetra Pak Corp. 1983. Products brochure. p. 25.

6420. Yokotsuka, Tamotsu. 1983. Scale-up of traditional fermentation technology [for shoyu production] (Review). *Korean J. of Applied Microbiology and Bioengineering* 11(4):353-71. [143 ref. Eng] Address: Kikkoman Corp., Noda-shi, Japan.

• **Summary:** The subtitle on the cover reads: 400 simple and savory recipes. Menus and advice on good health. Contents: Introduction. 1. The cereals (see p. 28-31 for instructions for making seitan at home from 500 gm wheat flour, plus 8 seitan recipes). 2. Breads. 3. Legumes: Cooking legumes, lentils, haricots, dry peas, chick-peas, azuki beans, soya. 4. Vegetables. 5. Soups. 6. Animal products. 7. Condiments, aromatics, and sauces (incl. tamari and miso). 8. Desserts. 9. Beverages. 10. 80 menu ideas. 11. Pregnancy and the feeding of young infants. 12. Some natural remedies. Where to buy supplies.

Soy-related recipes include: Making tofu at home (p. 87-91; illustrations and method taken without credit or permission from *The Book of Tofu* by Shurtleff & Aoyagi). Yuba. Grilled tofu (p. 91). Tofu with nuts (*noix*) and miso. Skewered tofu. Tofu salad (p. 92). Tofu with vegetables. Onions with tofu. Okara croquettes. Soymilk with fruits (p. 93). Making tempeh at home (p. 94-95). Tempeh goreng. Tempeh bachem (p. 95). Keripik tempeh (tempeh chips; p. 96). Tempeh croutons (p. 96). Pate of vegetables with tofu (p. 126). Jardinière au tofu (p. 128). Peas with tofu (p. 128). Soy sprouts made from mung beans (p. 129-30).

Pages 191-94 give basic information on the following fermented soya condiments: tamari, miso (Hacho [sic, Hacho] miso, barley miso, rice miso). Pages 278-79

list manufacturers and handlers of various foods used in this book, and pages 280-81 give their addresses: Yellow soybeans: Celnat, Les Sept Marches, Le Seuil, Lima. Miso: Celnat, Lima, Les Sept Marches, Le Seuil, le Bol en Bois, Tenryu. Only Lima and Les Sept Marches manufacture miso in France. Tamari: Celnat, Le Seuil, Les Sept Marches, Lima, le Bol en Bois, Tenryu. Nigari: Le Bol en Bois, Tenryu. Tofu: Le Bol en Bois, Tenryu, Soy. Tempeh: Traditions du Grain, Le Bol en Bois. Tempeh culture: Semailles. Koji: Les Sept Marches, Tenryu, Le Bol en Bois. Amasaké: Traditions du Grain. Soymilk: Celnat, Lima.

A photo on the rear cover shows Aubert, a woman.

Note: This is the earliest French-language document seen that mentions amazake, which it calls "Amasaké." Address: France.

6422. Business Trend Analysts, Inc. 1983. The health and natural food market. Commack, New York: Business Trend Analysts. 199 leaves. 28 cm. [9 ref]

• **Summary:** One section of this study (including pages 108-111) concerns the soyfoods market. It consists largely of statistics compiled by the Soyfoods Center and Soyfoods Association of North America. No permission was obtained from Soyfoods Center to use this information. Address: 2171 Jericho Turnpike, Commack, New York 11725.

6423. Chinese menus: Great meals in minutes. 1983. Alexandria, Virginia: Time-Life Books. 104 p. Illust. (some color). Index. 29 cm.

• **Summary:** These recipes were contributed by nine chefs; a brief biography and photo is given for each. Barbara Tropp and Nina Simonds are among them (p. 4). Contains detailed instructions on the preparation of Chinese food, recipes, and sample menus.

The section titled "Pantry (for this volume) includes: On the shelf—"Black beans, canned or packaged. Chinese fermented black beans, also known as Chinese salted black beans." Hoisin sauce (sweet, soybean based). Oils: Oriental sesame oil, a highly aromatic oil, is for garnishing, not cooking. Always buy Chinese or Japanese brands. Sesame paste. Soy sauce: Extracted from fermented soybeans, comes in light and dark. In the refrigerator—Bean curd or tofu.

Soy related recipes: Bean curd salad with peanuts (p. 65). Steamed sea bass with black bean sauce (which includes "1 tablespoon Chinese fermented black beans," p. 65). Mushroom soy sauce is good to have on hand (p. 71). Crisp chicken strips with black-bean orange sauce (the sauce ingredients include "2 tablespoons Chinese salted black beans," p. 81).

Diced chicken with fermented black beans (p. 87). Stir-fried spinach with fermented bean curd (with "1 small square fermented bean curd, mashed," p. 90).

6424. Dahlen, Martha; Phillipps, Karen. 1983. A popular

guide to Chinese vegetables. New York, NY: Crown Publishers, Inc. x + 113 p. Illust. (color). Index. 29 cm. [2 ref]

• **Summary:** This book was written for non-Chinese in the maze of Hong Kong's street markets; it originally appeared in 1980 and 1981 as two volumes, published in Hong Kong. This is the 1st American edition. The romanization of names in this book represent the Cantonese pronunciation system of Herklots.

The section on "Seasoning sundries" has entries (p. 3-4) for: Light soy sauce (2 Cc = Chinese characters are given) See yau [Note: See = fermented black soybeans] or Sang chau. "This is the best grade of sauce. 'Light' means it is not thick or viscous and has a delicate or fine flavor."

Dark soy sauce (2 Cc) Lo chau. "'Dark' here means thick and of stronger flavor." There are various types, each of which has been fermented with different special ingredients such as mushrooms, ginger, etc. Yet they all stain food black.

Fermented black beans (2 Cc). Dau see [fermented black soybeans]. "These are whole soybeans which have been cooked, salted and fermented." "These beans are one of the most versatile, convenient, economical and flavourful Oriental seasonings. The Cantonese usually mash them with garlic and stir-fry or braise them with pork, beef, shellfish, fish or vegetables, particularly with green and red vegetables for colour.

"General directions for making black bean sauce are as follows: Use approximately twice as much, by volume, of black beans as garlic. Crush the garlic cloves by smashing them with a single blow of a heavy object (flat side of a cleaver) on a cutting board. Remove the papery husk, then put both beans and garlic in a small bowl and mash together, either with a spoon or the butt of the cleaver's handle. Approximately 1 tablespoon of mash will season 1-2 cups of food.

"To cook, add the mash to the hot oil before the ingredients. In a mixture, add the mash just before the last batch of ingredients to be fried, return all the rest to the wok, season with a pinch of sugar and light soy sauce,... Vary the sauce from heavy to light."

The section on "Soybean sprouts" (*Daai dau nga choi*, 4 Cc = large bean sprout vegetable) has an unusual structure. First comes information on soybean sprouts: Appearance, quality, general comments, preparation, cooking. Then a nice color illustration, followed by two recipes using these sprouts. Then come subsections on Bean curd (*Dau fu*, 2 Cc).

Water bean curd (*Seui dau fu*, 3 Cc. "This is the most common, and perhaps most versatile, kind of bean curd." Three recipes).

Wrapped bean curd (*Bo baau dau fu*, 4 Cc. This type is sold from tubs of water rather than from a wooden board. "Each square has been wrapped in cloth, so pieces have rounded edges and cost 2-3 times more than common fresh dau foo. This is the finest, most delicate curd, and is usually

used only for steaming” as in Lo Siu Ping On, a traditional Cantonese dish).

Dry or pressed bean curd (*Dau fu gonn*, 3 Cc [pressed tofu]). This type is firm and therefore “easily sliced or cut into shreds and stir-fried. Two types exist as illustrated; the larger, 3-inch square white one is plain; the smaller, 2-inch square reddish one is lightly coated with 5-spice powder {ng heung fun, 3 Cc}.” One recipe is given).

Deep-fried bean curd (*Dau fu pok*, 3 Cc. These are small cubes or squares about 1 inch on a side. Color illustration. One recipe is given).

Page 81. Recipe for Mushrooms & ribs with black bean sauce. In the section on Lotus root is a recipe (p. 87) for Braised pork and lotus which calls for “Fermented red bean curd” (*Naam yue*, 2 Chinese characters are given).

“Because the ‘naam yue’ tends to preserve the other ingredients, this dish will keep for at least a week in the fridge, and will improve in flavour as it keeps.”

Note: “A combination of equal parts dark and light soy sauce may be substituted for the ‘naam yue,’ but the taste” and texture will be completely different.

On page 106 is a short section on Kudzu (*Fun got*, 2 Cc, with no specific recipes but with suggestions for cooking).

6425. Driver, Christopher. 1983. *The British at table, 1940-1980*. London: Chatto & Windus–The Hogarth Press. xi + 212 p. Illust. Index. 23 cm. [220* + 169 endnotes]

• **Summary:** Chapter 2, titled “The seven lean years,” discusses the period from 1941 to 1947 when food was rationed during World War II in Britain. An excerpt from the diary of Vere Hodgson for 7 May 1944 (p. 16) states: “I have an order with the Dairy for a pound of sausage... of soya bean flour.”

Chapter 6, “Tastes of Britain: the age of choice” includes long discussions (p. 99-107) of the rise of vegetarianism and health / whole foods. Since “the free market in ‘flesh food’ returned to Britain it has been clear that shortages converted fewer people to vegetarianism than abundance does.” “The distinction between vegetarianism and whole food is fine.” Almost all health food restaurants are vegetarian, but not all vegetarian restaurants serve health food. “By 1980, the profession of vegetarianism no longer sounded like the equivalent of wearing sackcloth and ashes.” Also discusses TVP and Worcestershire sauce (p. 99), “plant milk” and single cell proteins (p. 137-38), “TVP (texturised vegetable protein),” “meat extenders or substitutes of this kind, chiefly derived from the soy-bean,” “march up to Soho Chinatown and sit down to a dish of beancurd [tofu] made from the same soybean staple by a cottage industry process ecologically superior to the multi-million pound machinery and vast energy input that western culture tolerates for the sake of making fake steak,” “The first tentative flights of artificial protein may seem a long way from the precious mating calls of contemporary British foodies...” (p. 139).

World population continues to grow, and global food production must grow with it. “At some point not very far along that road, the role played in human diet by comparatively inefficient protein conversion machines such as cows, pigs and chickens, however intensively bred and farmed, would have to be diminished or abandoned. Here and there, the animals concerned would be relegated to agricultural zoos, to be gazed at with wild surmises by people who obtained their nourishment chiefly from the protein output of those industrious worms, bugs, and funguses, appropriately flavored.”

Contains an interesting bibliography and endnotes. Address: England.

6426. Editors of *China Pictorial*, Beijing. 1983.

Chinese cuisine from the master chefs of China. Boston, Massachusetts, and Toronto, Ontario, Canada: Little, Brown and Co. 240 p. Illust. Index. 26 x 24 cm.

• **Summary:** An overview with many color illustrations. The section titled “The ingredients” contains color photos of them plus a glossary that includes Chinese names: Dried bean curd stick, dried bean curd sheets, bean curd fresh gluten, fried gluten (p. 42-43). Soybean paste (salted and fermented), fermented bean curd, soy sauce (p. 47). Qingdou (green soybean), huangdouya (soybean sprouts) (p. 51). Doufu (bean curd, tofu), fuzhu (dried soybean milk [dried yuba sticks]), mianjin (gluten), youpi (dried soybean curd sheets [pressed tofu sheets]), kaofu (wheat gluten / vegetable steak) (p. 52). Jiangyou (soy sauce) (p. 54). Huang jiang (soybean paste, salted and fermented), jiangdoufu (fermented bean curd).

White soup (bai tang, with soybean sprouts, p. 56).

Folk nutrition: “All illnesses originate from what is taken into the mouth.” On this page is a description of the therapeutic properties of: “Soybeans: their flavor is sweet, raw; their character is warm, and when fried [or cooked] it becomes hot...”

A long section on soybeans (p. 74) begins: “They are the pivot-point of Chinese flavor and nutrition.” Includes brief descriptions on how to make soybean milk, bean curd, deep-fried bean curds, “bean curd puffs,” and yuba.

Soy-related recipes: Slab bacon with fermented bean curd (Nanru kouru, with “3 cubes fermented bean curd, p. 113). Sweet bean paste sauce (tiendoujiang, for Peking duck; it is made from “fermented black soybeans,” p. 140). Braised “shark’s fin in white sauce (baipa yuchi, with white soup and soy sauce, p. 199). Mrs. Pockmark’s bean curd (mapo doufu, p. 207). Silkworm cocoon bean curd (canjian doufu, p. 208).

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term “fermented black soybeans” to refer to fermented black soybeans.

There is a section of seven vegetarian recipes (p. 199-205).

6427. Feng, Deyi. 1983. *Jiangyou shicu shengchan jishu* [Soy sauce and vinegar production technology]. Harbin, Heilongjiang, China: Heilongjiang Scientific and Technological Publishing Co. See p. 1-84, 157. Preface by Liang Chengyi, Chairman of the Harbin Province Scientific and Technical Committee. [Chi]

• **Summary:** This book is part of the Food Production Technology Series by the same publisher. Contents: Part I: Soy sauce (jiangyou). 1. Introduction and brief history. 2. Classification: By production and raw materials, by processing methods, by inoculation techniques, by soy sauce color, by physical characteristics of soy sauce. 3. Raw materials: Protein sources, carbohydrate sources, salt water. 4. Production technology: Soy sauce microbiology, principles of soy sauce brewing, flow charts of soy sauce production, types of koji, making koji, inoculation, mash fermentation, heating, using machinery, and prevention of contamination, and sanitation, common types of soy sauce contamination and their prevention. 5. Handling, packaging, economics & standards: Storage or handling, packaging, transportation, quality standards, standards of economic technology. 6. Applications of new technology: Technological research, new production equipment, new types of enzymes, research on liquid koji, inoculants, application of technology for inoculating with new types of enzymes. Part II: Quality control and inspection methods for soy sauce and vinegar. Address: Harbin, Heilongjiang, China.

6428. Flaws, Bob; Wolfe, Honora Lee. 1983. *Prince Wen Hui's cook: Chinese dietary therapy*. Brookline, Massachusetts: Paradigm Publications. v + 201 p. Index. 23 cm. [16 + 25 footnotes]

• **Summary:** The story of Prince Wen and his cook appears in Chuang-Tzu's *Inner Chapters* (trans. G.F. Feng & J. English, New York: Vintage Books, 1974, p. 55). Diet is the third of the Eight Limbs of Classical Chinese Medicine. The other 7 limbs are meditation, exercise, astrology, geomancy, massage, herbology, and acupuncture.

If a man is diagnosed as having a liver imbalance, such as "liver fire blazing upwards," he should consume food and herbs that will sedate, calm, and cool the liver and lower the Yang; foods that raise the Yang, produce internal fire, or aggravate the liver should be avoided.

Page 35 notes that foods that are energetically cool and cold include soy products (such as tofu, tempeh, soymilk). Foods that produce fluid and are damp in nature include soybean and tofu.

In the section titled "Categorization of Foods," a number of individual foods are analyzed in detail, based on characteristics described below: Aduki bean, agar (p. 143), alfalfa, almond, and amasake (fermented glutinous rice) (p. 144), black soybean (p. 148), gluten (seitan, p. 158), kudzu root powder (p. 161), seaweed (p. 179), soybean (p. 181), soybean oil (p. 181), and tofu (p. 185).

Taking tofu, then black soybeans, as examples of the format used. Tofu: Nature: Cool. Flavor: Sweet. Meridian: Lungs, large intestine, stomach. Direction: Descending. Quality: Yin and yang. Elemental quality: Earth. Treatment principles: Tonifies Qi [ch'i] and Blood, clears Heat, sedates Yang, tones Yin, harmonizes the Middle Burner, produces Fluid, lubricates Dryness, counteracts toxins. Commonly used in the treatment of conjunctivitis, chronic amoebic dysentery, diabetes, sulfur poisoning, and alcoholism. Contraindications: spermatorrhea.

Black soybean: Nature: Neutral. Flavor: Sweet. Meridian: spleen and Kidneys. Direction: Ascending. Quality: Yang. Elemental quality: Earth. Treatment principles: Tonifies Qi [ch'i] and Blood, activates the Blood, benefits Water, expels Wind, counteracts toxins. Commonly used in the treatment of edema, Wind Bi (rheumatism), jaundice, beriberi, and spasms.

The remedial recipes are divided into Chinese (p. 96-116) and American (p. 117-35) types. Soy-related recipes include: Lord Buddha's delight casserole (with tofu, p. 88-89). Clams with black bean garlic sauce (with salted black beans [fermented black soybeans], p. 91). Five jewel casserole (with tofu or tempeh, p. 92). Quick braised soybean sprouts (p. 104).

Amasake cheesecake with cherry topping (p. 119). Shepherd's pie with seitan (Gluten meat, p. 122). Ginger seitan beef (p. 122). Seitan veal marsala (p. 129). Aduki bean brownies (p. 133). Dairyless pumpkin pie (with soymilk or cashew milk, p. 135). Many recipes use soy sauce or tamari in their braising liquid. The cookbook also uses meat, poultry, fish, and sugar quite extensively.

6429. Ford, Richard; Andersen, J.; Andersen, S. 1983. *Juel Andersen's sea green primer. A beginner's book of sea weed cookery*. Creative Arts Book Co., 833 Bancroft Way, Berkeley, CA 94710. 64 p. Illust. Index. 23 cm. [13 ref]

• **Summary:** A Glossary (p. 9) includes miso, mochi, tahini, tamari, tempeh, tofu, suribachi. Soy-related recipes: Tempeh (p. 23, 24). Tofu (p. 25, 28, 29, 43).

Sea vegetable chapters: Agar. Arame. Dulse. Hijiki. Kombu. Nori. Wakame. Common sea greens. Address: California.

6430. Fruin, W. Mark. 1983. *Kikkoman: Company, clan and community*. Cambridge, Massachusetts: Harvard University Press. xiv + 358 p. Illust. Index. 24 cm. [230 ref. Eng]

• **Summary:** A superb business history and No. 35 in the series *Harvard Studies on Business History*. Contains 8 illustrations, 16 figures, and 30 tables. All Japanese names are written, Japanese style, with the family name first, followed by the given name.

Contents: Editor's introduction, by Alfred D. Chandler, Jr. Acknowledgments. Introduction (author's). The company began brewing shoyu in 1661 in the town of Noda, 90

minutes by modern train northwest of Tokyo. Phase I: 17th century to 1887. Phase II: 1887 to 1917. Phase III: 1918 to 1946. Phase IV: Postwar democracy.

1. Factories in the fields: Rural-centered industrialization, the origins of shoyu, Noda soy sauce (In 1661 Takanashi Hyozemon XIX began brewing shoyu in Noda), Mogi domination of the market, fermentation technology (preparation of wheat for koji, preparation of brine solution, culturing of the wheat and soybeans, process of fermentation), extraction or pressing (At the end of the Tokugawa period {1867} the standard wooden keg held 9 *shō*, 4.33 gallons, which was said to be the amount of shoyu consumed in one year), production and scheduling, the dual employment system (organization of work, work rules, 1909 wage agreement, hierarchies of work {in front office and factory}), industry and community, farms and factories in 19th century Japan.

2. Clan and cartel in Meiji Japan: Clan and cartel in the Meiji period, government-regulated markets, Noda brewers assert themselves (registration and promotion of the brand-name Kikkoman by Mogi Saheiji, in Japan, Amsterdam, Austria and California), the Noda Shoyu Manufacturers' Association (*Noda Shōyu Jōzō Kumiai*; a cartel formed in 1887 to stabilize price, control supply, and guarantee markets, cartel and costs, the challenge of Suzuki Tōsaburō / Tosaburo), research and development, distribution: the railroad (opened in late April 1911), social change and the cartel (the cost of charity, noneconomic motivation, from philanthropy to paternalism), the transformation of shoyu manufacture in the countryside.

3. From cartel to corporation and beyond ("A corporation requires a nucleus for centralization and coordination"): 1909 to 1918: period of preparation ("in 1914 three shoyu brewers from Choshi in Chiba prefecture had formed the Choshi Shoyu Company." The owners were Hamaguchi Yoshiuemon, Fukai Yoshibe, and Tanaka Genba) (remains of the cartel, the Noda Shoyu Company {began operations on 1 Jan. 1918}), 1918 to 1927: the first decade—process of incorporation (Jinsen Shoyu was a brand brewed in Inchon, Korea) (1918 to 1925: from committees to functional departments {sales committee, research committee}, 1925 to 1927: holding company reorganization), the making of a rural zaibatsu (1925 on).

4. A loyal retainer's farewell (translation of a small, privately published eulogy for Mogi Shichirouemon VI, of the Kashia clan, first president of the Noda Shoyu Co, written in 1929): Shinshima's views on Japanese management, the master as seen by the apprentice (preface, introduction, brief biography, the president's principles and policies, the president as businessman, the president's everyday life, an impressive personality, a man of unquestionable character, ancestor worship, a model of love, on being what you are, accepting fate, the president's personality as revealed in a game of go, people rather than things, the president and wine

{“A proverb says ‘a drinker resembles a cake of tofu: in the beginning it's square and has shape, but it ends up shapeless, formless’}, life as a spiritual exercise, three great men of Kashiwa, is Ito crazy?, called by God, everything is one), editor's postscript.

5. Prelude to turmoil: The murder (of Kimura Junichiro), union activities up to the homicide, traditional wage labor (problems associated with the employment system, “internal contracting”), internal contracting and the Noda Shoyu Company, from homicide to the 1923 strike, reorganization of work design and structure (Jan. 1923).

6. The Noda Strikes: 1923 and 1927-28: Worker discontent rises, the strike of 1923 (negotiation and compromise, memoranda), the 1927-28 dispute (it lasted 218 days; work environment, transportation issues: prelude to the strike, 1927-28: an overview), conclusion: Japanese industrial relations at a crossroad.

7. Corporate maturation: The new paternalism (membership in the new paternalism), paternalism and patriotism, two features of the Japanese employment system, the prewar employment system at the Noda Shoyu Company, the end of an era, the limits of a family firm, a corporate coming of age

8. Democratization and internationalization (In 1964 Noda Shoyu Co. was renamed Kikkoman Shoyu Co., and in 1980 the name was changed again to Kikkoman Corporation): The course of democratization, democratization of the family (the individual replaced the household / family as the locus of legal responsibility. Zaibatsu were dismembered), unionization—within and without the Noda factories (effect of unionization upon the company), company and community after 1962, antitrust and business strategy, background to marketing development), the growth of internationalization (effect of exogenous factors on Kikkoman, development of a new business strategy), internationalization (in June 1957 Kikkoman International Inc. was established), diversification (Manjo brand, Yomohoharu brand, Del Monte brand, Disney brand, Mann's brand, Higeta brand {marketed but not made by Kikkoman}, Ragu brand, Kikko brand, Monet brand). Conclusion. Appendix A. Ie [stem family lineage] and the shoyu industry. B. Scroll from Mogi Fusagoro with preface by Mogi Keizaburo on the founding of a Noda Shoyu brewery, 1872. C. Rules and Regulations of the Noda Shoyu Brewers' Association. D. Noda Shoyu Brewers' Association Income and Expenses, 1888-1918 (yen). E. Property held by Mogi-Takanashi families joining Noda Shoyu Co. Inventory taken November-December 1917. F. New wage and work proposal, Noda Shoyu Company, 1919. Notes. Glossary.

This book was very favorably reviewed by Masaru Udagawa in *Business History Review*. 1986. Spring. p. 169-70.

Concerning the Kikkoman brand (p. 59): In 1838, Mogi Saheji petitioned for and received registration for the

brand name Kikkoman by the central government of Japan. Although this Mogi family has produced other shoyu brands, Kikkoman was the pride of the family, its private label. When written longhand in Japanese characters, the brand is composed of three characters: *ki*, for “tortoise,” meaning good luck and longevity in Chinese and Japanese folklore; *ko* means “first-rate”; and *man* suggests “ten thousand” or forever. *Kikko* also means octagon, so the brand name is often written as an octagon with the character for “ten thousand” or *man* written inside the octagon.

“In 1872 and 1873, shortly after the Meiji Restoration of 1868, Mogi Saheiji entered Kikkoman in two world’s fairs, the first held in Amsterdam and the second in Austria. Kikkoman was awarded a letter of commendation for excellence at the Austrian fair, and following this, Mogi Saheiji redoubled his efforts to promote the brand. In 1877 Kikkoman received a second-place medal at the All-Japan Industry Promotion Fair, and in 1879 it was registered in California as a legally recognized brand name, a move that predated the same legal protection in Japan by six years!”

Prof. Alfred D. Chandler, Jr. of the Harvard Business School worked closely with Fruin as he was researching and writing this book during nearly two years at Harvard. His scholarship, wisdom, friendship, and encouragement contributed greatly. Address: Prof. of History, California State Univ., Hayward.

6431. Fruin, W. Mark. 1983. The origins of shoyu (Document part). In: M. Fruin. 1983. Kikkoman: Company, Clan and Community. Cambridge, MA: Harvard University Press. xiv + 358 p. See p. 14-16. [4 ref]

• **Summary:** “The production of shoyu, one of the traditional products manufactured in the countryside [of Japan], grew enormously during the Tokugawa Period (1603-1867) because of a dramatic increase in its market, primarily urban residents. Whereas before the 17th century only 1 or 2 percent of the Japanese population lived in cities, by 1725 roughly 20 percent did so. The increased demand for shoyu was met primarily through an increase in capacity based on the entrance of new producers and the expansion of established brewers...”

“The forerunner of modern shoyu appears to have been *miso tamari*, the liquid that forms during the process of fermenting rice or soybeans to make a soft, cheeselike product. The most popular and likely story of shoyu’s origins relates how Kakushin, a Japanese Zen priest who had studied at the Kinzanji Temple in China, returned to Japan in the middle of the 13th century and began preparing a type of miso that became a well-known local specialty of Yuasa, the town near Kakushin’s temple in the province of Kii (today’s Wakayama prefecture). By the end of the 13th century the liquid had come to be called tamari and was sold commercially along with the miso. From such beginnings, a great variety of experimentation with the ingredients and

methods of tamari fermentation was launched. Although tamari probably found favor initially in Buddhist monasteries as a condiment for a vegetarian diet, the popularity of tamari-type seasonings was related more to the prevalence of battlefields than of meditation halls during the period of civil wars that raged across Japan from the thirteenth to sixteenth centuries. Soldiers apparently found the versatility and transportability of the seasonings to their liking. Shoyu, which evolved from these tamari seasonings by adding wheat to the fermentation mash, appeared during the 16th century.

“The first soy sauce made in the area of modern Noda was brewed in about 1560 by Iida Ichirobei and respectfully presented as tribute taxes to the local warrior family in the following years. The Iida family, ostensibly fleeing the carnage and confusion of the Onin Wars (1467-1477) in the Home Provinces around Kyoto, arrived in the area of Noda early in the 16th century and by mid-century were engaged, among other pursuits, in the manufacture of tamari, a type of soy sauce that by now was made entirely from soy beans...”

“Iida’s first brew was closer to tamari than shoyu in consistency, taste, and aroma...In Eastern Japan the manufacture of a shoyu rather than tamari soy sauce like Iida’s seems to have originated in or near the town of Choshi at the mouth of the Tone River on the northeastern tip of the Boso Peninsula, which guards the entrance to Tokyo Bay like an extended crab’s claw. The Hamaguchi families of Choshi originated as branch households of the main Hamaguchi house of Hiromura village in Kii, not surprisingly the same province where Kinzanji miso and miso-tamari appeared and where the Hamaguchi of Hiromura were among the earliest commercial brewers of shoyu in Japan.

“The Hamaguchi transplants in Choshi, along with Tanaka Genba and his descendants, began the manufacture of shoyu early in the 17th century. Higeta shoyu was first produced here in 1616, Yamajo in 1630, and Yamasa in 1645.

“It was not until the latter half of the 17th century, however, that Noda followed Choshi in the manufacture of a soy sauce that was closer to shoyu than the thick, dark tamari was. In 1661 Takanashi Hyozemon XIX began brewing shoyu in Noda; using a work force of twenty that included fifteen contract laborers, he produced 3,000 gallons his first year.” Address: Prof. of History, California State Univ., Hayward.

6432. Fujimori, Ikuo. 1983. Daizu. Shizen kindaabukku [Soybeans. Natural children’s book]. Tokyo: Fureberu-kan K.K. 30 p. Illust. by Akira SETO. 26 cm. [Jap]

• **Summary:** A children’s book with superb color illustrations. Shows how to make natto, tofu, and soy sprouts at home. A large color photo (p. 10-11; 2-page spread), titled “All made from soybeans,” shows kinako, miso, shoyu, soymilk, yuba in a bowl of clear soup, ganmodoki, aburage, cooked whole soybeans (*nimamé*), okara sauteed with vegetables, dengaku (made with tofu and miso), and atsu-

ag . Address: Daizu kairyo no dai-ichi ninsha [President, Takeya Miso Co., Nagano, Japan].

6433. Herrmann, Karl. 1983. Exotische Lebensmittel. Inhaltsstoffe und Verwendung [Exotic foods. Ingredients and uses]. Berlin, Heidelberg, & New York: Springer-Verlag. x + 175 p. Illust. 21 cm. See p. 111-19. Sojabohnenprodukte. [18 ref. Ger]

• **Summary:** The chapter on legumes contains brief introductions to soybeans, green vegetable soybeans (*unreife Sojabohnen*), soy sprouts (*Sojabohnensprossen*, *Sojabohnenkeimlinge*), soymilk (*Sojamilch*), tofu (*Tofu*, *Sojaquark*), soy sauce (*Sojasosse*, *Shoyu*), miso (*Miso*, *Sojapaste*), tempeh (*Tempeh*), fermented tofu (*Sufu*, *chinesischer Sojabohnen-K se*), and natto (*Natto*, *fermentierte ganze Sojabohnen*). Tables shows the nutritional composition of tofu, deep-fried tofu pouches (*Aburage*), dried-frozen tofu (*Kori-Tofu*), yuba (*Yuba*), roasted soy flour (*Kinako*), and miso, plus defatted soybean meal (*entfettetes Sojabohnenmehl*; 51% protein), and soybean concentrate (*Sojabohnen Konzentrat*; 64.9% protein). Address: West Germany.

6434. Hesseltine, C.W. 1983. Microbiology of Oriental fermented foods. *Annual Review of Microbiology* 37:575-601. [50 ref]

• **Summary:** Contents: Introduction. Historical account. Importance of mixed cultures. Microorganisms used.

“The Japanese Food Agency, Ministry of Agriculture, Forestry, and Fisheries (1979), gave the following figures for 1979: miso, 567,776 tons; shoyu, 1,252,431 kiloliters; and natto, 158,000 tons. In Korea, 35% of the 442,803 metric tons of soybeans produced is fermented. Indonesia uses about 75,600 tons of soybeans in making tempeh.

“There is considerable ancient writing in Chinese publications about foods made by fermentation, but the first scientific reports are only about 100 years old. From 1878 until the beginning of World War I, there was an explosion of papers and reports dealing with fermented foods and drinks... In general, studies between 1881 and 1914 were devoted to the description of the product and the local name and to the isolation and description of the microorganisms associated with the fermentation. A number of organisms new to science were described and illustrated. Additional information was given on the action of the fungus on the substrate, suggested uses of the fungus in processes that could be exploited in European technology, and a description of the substrate preparation, food use, and native methods of food preparation.

“This period of research ended abruptly with the advent of World War I, as the exchange of students and cooperation between Japan and Germany ceased. Food fermentation studies resumed in the 1950s and today considerable interest exists. This renewed interest stems from the concern with

nutrition, the great enthusiasm for vegetarian and natural foods, the search for less expensive, high-protein foods, the influence of foreign students studying in the West, the need to expand export markets, the need to add products to convenience foods to add zest and flavor, and the interest in the activities of microorganisms used in fermented foods.” Address: NRRC, Peoria, Illinois.

6435. Huebscher-Liechti, Trudy. 1983. Soja Rezepte [Soya recipes]. Ebnat-Kappel, Switzerland: Morga. 36 p. Undated. 15 x 21 cm. [Ger]

• **Summary:** This is a recipe booklet describing how to use soy products produced by Morga. The inside front cover shows and/or describes the following Morga products: Sojamalt (candy bar), sojamalt (can), shoyu, Kleine gruene Sojabohnen (zum Selbstkeimen; Small green soybeans for sprouting), Soja Vollkorn (Pasta products), Vollsoja Flocken (Whole soybean flakes), Soja 50 Mehl (Defatted soybean meal, 50% protein), Gelbe Sojabohnen (Yellow soybeans), Soja-Oel (soy oil). Address: Switzerland.

6436. Jaffrey, Madhur. 1983. Eastern vegetarian cookery. London: Jonathan Cape. xii + 531 p. Illust. by Susan Gaber. Index. 24 cm.

• **Summary:** This is an expanded version of *Madhur Jaffrey's World-of-the-East vegetarian cookery* (1981, New York). The author of this creative book, a woman, was born in British India on 13 Aug. 1933. She first became known as an actress in India, but later found fame as a food writer. She has lived in America for more than 20 years. She presents 21 recipes for bean curd (tofu), 7 for tempeh, and some for yuba and miso. Soy-related recipes include: Aubergine slices with white miso (Japan, p. 4-5). Green beans with soy sauce (Japan, p. 20), Cabbage with miso (Japan, p. 29). Lotus root with soy-sauce dressing (Korea / Japan / Hong Kong, p. 46-47). Yellow pumpkin cooked with soy sauce (Japan, p. 74-75). Fresh soy beans, steamed (China, p. 76, with “fresh green soy beans in their pods”). Yien Koo's Spinach with fermented bean curd (China, p. 78-79). Pecel (Vegetable salad with spicy peanut sauce, plus tofu and tempeh; Indonesia, p. 87). Tempura (with tofu; Japan, p. 89-92). Soy bean sprouts (how to grow, p. 119). Soy-bean and mung-bean sprouts seasoned with sesame oil (Korea, p. 123-24). Tempeh, Fried tempeh, Fried, pre-seasoned tempeh, Sambal goreng tempeh kering (Sweet and sour tempeh), Tempeh cooked in coconut milk (Indonesia, p. 127-30). Thai fried rice (with red fermented tofu, p. 176).

Chapter 4 (p. 187-221), titled “Soy milk, bean curd, and wheat gluten,” contains the following: Introduction to each ingredient. Soy milk (making your own at home). Making your own bean curd. Udofo (Yudofu, simmering bean curd with seasonings, Japan). Bean curd with watercress (Singapore Chinese). Bean curd with fresh coriander (Taiwan). Korean-style bean curd in a hot water bath. *Hiya-*

yakko (Chilled bean curd, Japan). Bean curd with broccoli (Hong Kong). Cabbage cooked with bean curd (Japan). Bean curd with a deliciously spicy sauce (China). Carrots and beans with a bean-curd dressing (Japan). Bean curd, mushrooms, and peanuts in hoisin sauce (Chinese style). Sautéed bean curd (Korea). Tofu dengaku (Toasted bean curd with a miso topping, Japan). Fried bean-curd cubes (Most of East Asia). Soy-bean sprouts sautéed with fried bean curd (China). Fried bean curd with a sweet-and-sour sauce (China). Fried bean curd cakes with a mustard surprise (Japan). Inari-zushi (“Bags” of fried bean curd stuffed with sushi rice, Japan). Pressed bean curd with cabbage (China). Salad of pressed bean curd, mung-bean sprouts, and agar-agar (China). How to make fried and baked wheat-gluten balls. Stew of baked wheat gluten, potato, turnip, carrot, and cabbage rolls (Japan, p. 215). Fried wheat gluten with broccoli, carrot, and mushrooms (China). Fried wheat gluten and potato stew (Indian style). Shredded wheat gluten and Cabbage with fennel seeds (Indian style). Buddha’s delight (A mixed Chinese stew, Hong Kong; with yuba, fried tofu, and fried wheat gluten balls).

Chawanmushi (Steamed savory custards, with tofu; Japan, p. 223-26). Omelette with bean curd (Japan, p. 230-31). Soy-sauce eggs (Thailand / China, p. 245). Paneer (Fresh cheese from cow’s milk; India, p. 277-78). Hot or cold noodles with a soy-sauce dressing (China, p. 288). Noodles with a hot-and-sour bean sauce (China, p. 290). Vegetarian mee krob (Crisp noodles with pressed bean curd and eggs; Thailand, p. 296-97). Noodles with quail eggs, mushrooms, spinach, and yuba (Japan; p. 298-99). Hoppers (yeast pancakes; Sri Lanka, p. 315). Roti (Flat whole-wheat bread; India, p. 320). Delicious stock made with soy-bean sprouts (p. 340). Clear soup with mushrooms, bean curd skins [yuba], and spinach (Japan, p. 346). Clear soup with soft bean curd and Chinese leaves (p. 346). Miso soup with bean curd (Japan, p. 357). Miso soup with carrots and mushrooms (Japan, p. 358). Fried, munchable soy beans [soynuts] (China, p. 373). Potato and tempeh patties (Indonesia, p. 394). Dipping sauces (with soy sauce, p. 414-17, incl. *kochu chang*—Korean soy sauce). Kombu relish (with soy sauce; Japan, p. 435). Shoyu daikon (White radish pickled in soy sauce; Japan, p. 436). Ginger quick-pickled soy sauce (China, p. 436). Aomidaikon (Quick pickled small white radishes, with slightly sweet yellow miso; Japan, p. 438-39). Chinese-style jellied bean-curd sweetmeat with a peanut topping (Singapore, p. 462-63).

General information [like a glossary] (p. 481-506): See: Bean curd (regular, fried, fermented {*fu-ju*, *nam-ye*, *tao-hoo-ye*, red bean curd}, pressed {*doufu kan*}, pressed seasoned {*pai doufu kan*}, dried bean-curd skin or yuba). Beans (azuki, soy). Bean sauce (made from fermented soy beans). Chilli paste with soy bean (and garlic). Hoisin sauce. Miso. Nam yee (see Bean curd, fermented). Nigari. Soy beans, fresh. Soy-bean sprouts. Soy milk. Soy sauce (incl. Japanese,

Chinese dark and light, Japanese usukuchi, Indonesian ketjap manis). Tao Hoo Yee (see Bean curd, fermented). Tempeh. Yuba. Sources (of ingredients; p. 507-10). Address: New York City, NY.

6437. Khader, Vijaya. 1983. Nutritional studies on fermented, germinated and baked soya bean preparations. *J. of Plant Foods* 5(1):31-37. [17 ref]

• **Summary:** Discusses fermented soya milk drink, soy sprouts, and a bread made from soy sprouts. “The nutritional quality and protein efficiency ratio (PER) of shoyu, a fermented soya bean product, fermented soya milk drink, germinated soya bean and germinated soya bean bread were studied. Nutritional quality was determined by chemical analysis and PER by animal feeding studies... Ash content was greatest in germinated soya beans. Trypsin inhibitor activity was markedly reduced on germination.”

Table 2 shows trypsin units inhibited per mg of sample for various soy products on a dry weight basis: Raw soya bean 107.5, germinated soya bean 59.7, fermented shoyu 40.0, fermented soya milk 30.1, germinated soya bean bread 3.0, and modern bread 0.0.

Table 4 shows the PER of various soya bean preparations compared with casein and modern bread (fortified with amino acids and vitamins): Casein 2.46, germinated soya bean 1.55, modern bread 1.45, fermented soya milk 1.33, fermented soya sauce 1.06, germinated soya bread 0.99, and raw soya bean 0.78. Address: Dep. of Food & Nutrition, Vallabh Vidyanagar, Gujarat, and College of Home Science, Khairatabad, Hyderabad-500004, India.

6438. Konishi, Kiyoko. 1983. Japanese cooking for health and fitness. Tokyo: Gakken Co. Ltd. 120 p. Introduction by Susan F. Stirn (U.S. Embassy, Tokyo). Illust. (color photos). No index. 27 cm. Produced in conjunction with Kikkoman. [Eng]

• **Summary:** This attractive book, with many large color photos on glossy paper is crippled by lack of an index. Soy-related recipes include: Miso soups (p. 23, 25). Photos (p. 26) show small packets of Kikkoman’s Instant Miso Soup. The photo of sukiyaki includes a bottle of Kikkoman Sukiyaki Sauce (which contains soy sauce); the Sukiyaki recipe includes “1 block tofu.” A large photo (p. 39) includes a Kikkoman soy sauce dispenser. Grilled salmon with teriyaki sauce (the sauce contains sugar, sake or dry wine, mirin and soy sauce, p. 60). Tempura (the dipping sauce contains dashi, mirin, and soy sauce, p. 64). Salmon-tofu balls (with “1 block tofu,” p. 69). Salad of tuna and wakame with soy sauce dressing (p. 72). Salad of short-necked clams with miso dressing (p. 73). Soybeans cooked with chicken wings (with “10 ounces {300 gm}, or about 2 cups dried soybeans,” p. 85).

The section titled “Tofu and other dishes” (p. 89-97) includes Fresh tofu with condiments (*Hiyayakko*, p. 92;

a photo, p. 90, shows a Kikkoman soy sauce dispenser). Sauteed tofu topped with shrimp and vegetables (p. 92). Tofu sauteed with ground chicken and vegetables (p. 93). Boiled vegetables with tofu dressing (p. 93). A glossary each (hard to use) covers fish and shellfish; vegetables, grains, seaweed varieties, and processed foods; seasonings, spices and seeds. One full-page photo (p. 102) shows processed foods, including: Thin, deep-fried tofu (*abura-age*). Thick, deep-fried tofu (*atsu-age*). Bean curd (*tofu*). A second full-page photo (p. 103) shows seasonings, spices and seeds, including: Five forms of Kikkoman regular soy sauce (*shoyu*)—dispenser, 150 ml glass bottle, 250 ml plastic bottle, and low-salt (green label, 500 and 250 ml). Two varieties of soybean paste (*miso*). Bottles of Kikkoman soup base for noodles and tempura (*memmi* [*menmi*]), sukiyaki sauce, teriyaki sauce, extract of bonito (*katsuo-dashi*), and extract of kelp (*konbu-dashi*). Japanese horseradish (fresh *wasabi*). White sesame seeds, black sesame seeds, and sesame oil (*goma-abura*).

A full page (p. 106) titled “Japanese cooking and soy sauce” discusses: Kikkoman soy sauce—a long history (it was first made in 1630). How does Kikkoman soy sauce gain its flavor, color, taste and aroma. Why is Kikkoman called the “liquid spice”? How to preserve the fine quality of Kikkoman. Address: Tokyo, Japan.

6439. Koshiyama, Ikunori. 1983. Storage proteins of soybean. In: W. Gottschalk and P. Hermann, eds. 1983. Seed Proteins: Biochemistry, Genetics, Nutritive Value. The Hague, Boston, and London: Martinus Nijhoff / Dr. W. Junk. viii + 531 p. See p. 427-50. [104 ref]

• **Summary:** Contents: Introduction. The composition of soybean storage proteins. Isolation and characterization of soybean storage protein components (globulins, ultracentrifugal components or fractions, subunit structure).

“The 11S globulin. Among the ultracentrifugal components, the initial effort of the isolation was done for the 11S component. The partial purification and characterization of the 11S component were first studied by Wolf and coworkers, and the first ultracentrifugal pure isolation was accomplished in 1965 [by Mitsuda, Kusano, and Hasegawa in Japan]... Immediately thereafter, the 7S protein was isolated in ultracentrifugally pure state [by Koshiyama].” Address: Central Research Lab., Kikkoman Shoyu Co., Noda-Shi, Chiba-Ken, Japan.

6440. Kushi, Michio; Jack, Alex. 1983. The cancer prevention diet: Michio Kushi’s nutritional blueprint for the relief and prevention of disease. New York, NY: St. Martin’s Press. xi + 460 p. Index. 22 cm. [32 ref]

• **Summary:** In this book, cancer preventing effects are attributed to miso (p. 50-51, 220-21, 304-06), and to soybeans (p. 51, 154-55, 293, 306). Natto, soymilk, tamari, tempeh, and tofu are also discussed.

Pages 50-51 note: “A ten-year study completed in 1981 by the National Cancer Center of Japan reported that people who ate miso soup daily were 33 percent less likely to contract stomach cancer than those who never ate miso soup. The study also found that miso was effective in preventing heart and liver diseases...”

“Soybeans, a major source of protein in the macrobiotic diet, have been singled out as especially effective in reducing tumors. The active ingredient in soybeans is called a protease inhibitor. Laboratory tests show that soybeans and certain other beans and seeds containing this factor added to the diet prevent the development of breast, stomach, and skin tumors. Whole soybeans and soy products, including miso, tamari soy sauce, tofu, tempeh, and natto are staples of the macrobiotic diet... At St. Luke’s Hospital in Nagasaki, a group of macrobiotic doctors and patients who had survived the atomic bombing on August 9, 1945 subsequently protected themselves against potentially lethal doses of radiation on a diet of brown rice, miso soup, sea vegetables, and sea salt.”

Pages 220-21 contain a long excerpt from the account of Dr. Tatsuichiro Akizuki, director of internal medicine at St. Francis’s Hospital in Nagasaki. He survived the world’s first atomic bomb attack on 9 Aug. 1945. He believed that the main reason that neither he nor any of his co-workers at the hospital suffered or died from radiation was because of their diet, based on miso, brown rice, and sea vegetables.

Pages 293, and 304-06 summarize a number of publications which seem to show that consumption of soybeans, miso, or soymilk may prevent cancer. Pages 391-99 contain soyfoods recipes. Address: Boston, Massachusetts.

6441. Lewallen, Eleanor; Lewallen, John. 1983. Sea vegetable gourmet cookbook and forager’s guide. Mendocino Sea Vegetable Co., P.O. Box 372, Navarro, CA 95463. 32 p. [4 ref]
Address: Navarro, California.

6442. Lin, Ann Chau-Fan. 1983. Chemical and sensory analysis of soy sauce. PhD thesis, University of Georgia. 125 p. Page 1400 in volume 44/05-B of Dissertation Abstracts International. *
Address: Univ. of Georgia.

6443. Migliaccio, Janice Cook. 1983. Follow Your Heart’s vegetarian soup cookbook. Santa Barbara, California: Woodbridge Press. 128 p. Illust. 24 cm.

• **Summary:** Contains more than 50 delicious vegetarian soups developed by the author and other creative soupmakers at Follow Your Heart’s famous natural foods restaurants—and served to more than 1 million customers. Follow Your Heart began in 1970, founded by Michael Besancon, as a small vegetarian lunch counter in the corner of a natural foods

store in Canoga Park, California. In 1973, Follow Your Heart grew to include the store as well. In 1976 it expanded and moved to a much larger store a few blocks away. In Sept. 1982 it opened a second store (without a restaurant) in Santa Barbara, California. Today Follow Your Heart employs about 100 people, all vegetarians. The head store is at 21825 Sherman Way, Canoga Park, California 91303.

The seasonings tamari and Dr. Bronner's "Balanced Protein Seasoning" (p. 17-18) and the "special food items" Bokon Bits, miso, textured vegetable protein (TVP, p. 24-25) are described and used in a number of recipes. Soy-related recipes include: Miso vegetable soup (with miso and tofu, p. 97). Oriental vegetable soup (with tofu and tamari, p. 103-05). Sweet and Sour Oriental Vegetable (with tofu and tamari, p. 120-21). Address: Southern California.

6444. Otsuka, Shigeru. 1983. *Encyclopedia of Japan: Soy sauce*. San Francisco and Tokyo: Kodansha International. See vol. 7, p. 239. [Eng]

• **Summary:** The prototype of soy sauce was *hishio*, a pasty substance made by adding fish to salt; it is known to have been made in the Yayoi period (ca. 300 BC–ca. AD 330). Shoyu as we know it today was first made in Japan during the Muromachi period (1333-1568).

Koikuchi shoyu, the most widely used type, is fermented for a relatively long time and is relatively thick. Usukuchi shoyu is fermented for a shorter time. "The addition of amazake (a sweet rice wine) gives the latter a delicate color, flavor, and aroma, making it suitable for seasoning vegetables, white-fleshed fish, and clear soups."

There are also local varieties and variations of soy sauce. In Akita prefecture, *shottsuru* is made with fish; it is pale yellow and contains no soybeans. In the Nagoya area, light-colored shiro shoyu is made. Since aroma is most important, it is recommended that shoyu be added just before a dish is ready to be served. Also, once the container is opened the flavor and color of shoyu begin to deteriorate, so it should be used quickly. Address: Japan.

6445. Pearson, A.M. 1983. Soy proteins. *Developments in Food Proteins* 2:67-108. Chap. 2. (B.J.F. Hudson, ed. London and Englewood, New Jersey: Applied Science Publishers). [108 ref]

• **Summary:** Contents: Summary. Introduction. Soybean production (worldwide). Structure of the soybean. Chemical composition of the soybean: Soy proteins (solubility, characterization, transformation of the 7S and 11S globulins), biologically active components (enzymes, protease inhibitors, hemagglutinins, goitrogens, estrogens, phytates, oligosaccharides, other substances, allergenic compounds, lysinoalanine). Nutritional value of soy proteins: Protein, vitamins, minerals, energy, soy protein and atherosclerosis. Processing of the soybean: Extraction of oil, processing of soybean meal, edible soy flour and grit production, soy

concentrates and isolates, spun soy proteins, textured soy products. Food uses of soy protein products: Cereal grain foods, dairy-type foods, snack foods and soups, meat, poultry and fish products, Oriental soy proteins (soy sauce, tofu). Address: Prof., Dep. of Food Science & Human Nutrition, Michigan State Univ., East Lansing, Michigan 48827.

6446. Rohé, Fred. 1983. *The complete book of natural foods*. Boulder, Colorado: Shambhala. xvi + 491 p. Illust. Index. 26 cm. [120 ref]

• **Summary:** This book is about "The New American Diet," which is an "omnivarian" diet including some fish and meat. Chapter 14, titled "New and future natural foods," contains a section titled "Soy foods" (p. 162-65) including tofu, tempeh, miso, soy sauce, soy milk, and other soy products (yuba and sufu). The work of William Shurtleff and Aoyagi, and their Soyfoods Center, is mentioned 2-3 times. Toward the back of the book are many soyfoods recipes.

The Prologue tells Rohe's life story and pioneering work with natural foods. In 1964, at the ripe old age of 27, he didn't feel good, didn't look good, and didn't like it—the result of years of smoking, drinking, eating bad food and "burning the candle at both ends." "It was time to do something about it. Adelle Davis became my guru and Thom Hamilton—the health foods store owner who sold me [her book] *Let's Eat Right to Keep Fit* became my mentor." Within a few months he was feeling much better. "So in 1965 I bought a small health food store in the Sunset district of San Francisco." It was named Sunset Health Foods." He discarded most of the dietetic foods on the shelves and replaced them with "old-fashioned groceries—basic stuff, traditional, simple, whole food... What was evolving was a modern version of an old-fashioned grocery store." He would provide information instead of hype, bulk retail foods sold out of barrels, crocks, jars, and drawers instead of packaged products, food instead of food supplements. He renamed the store "New Age Natural Foods."

"My career ended in 1973, after eight years. New Age Natural Foods had served as a model for what were called in those days 'hippie food stores.' It is credited as being the prototype natural foods store, as distinct from a health food store." Since 1973 Fred continued to work in the natural foods industry. In 1979, in his capacity as a consultant, he met the people of Sunburst Farms, who are his collaborators on this book. "Sunburst is the realization of a vision experienced in 1951 by its founder Norm Paulsen, while he was living as a student monk studying yoga at the Self-Realization Fellowship in Los Angeles. He moved to the Santa Barbara area, and while operating a construction business in 1968 established Sunburst Farms as a group of people living communally under spiritual principles on 160 acres of land in the mountains above Santa Barbara. The community-owned business, Sunburst Natural Foods, grew foods organically and flourished. In 1970 they opened a

natural foods retail store in Santa Barbara. The community grew to include a second ranch and a total membership of over 200 people. "The business came to include manufacturing and wholesaling as well as retailing. There are now five Sunburst Farmer's Markets, two of them—in Goleta and Ventura—large, complete, natural foods supermarkets. Sunburst also owns and operates a natural foods restaurant, 'The Farmer and the Fisherman,' 35 miles north of Santa Barbara along the coastal highway." Then Norm envisioned a new direction and everything changed. They traded their 6,000 acre coastal ranch for land in northeastern Nevada totaling over 500,000 acres. "It could hardly have been a more radical change. But the soil is rich in minerals and there is abundant water from artesian wells. They are responding strongly to the challenge of, as they say, 'making the desert bloom as a rose.'"

"Appendix eight: Recommended reading list" (p. 470-78) includes a section titled "Soyfoods."

This book was Re-published in 1986 as *Nature's Kitchen* by Garden Way in Brattleboro, Vermont.

Interview with Fred Rohe. 1988. Nov. 3. Fred bought Sunset Health Foods in 1965 and transformed it into New Age Natural Foods at 1326 Ninth Ave. in San Francisco. Address: 4014 Lincoln Way, San Francisco, California 94122. Phone: 415-564-7024.

6447. Sams, Craig; Sams, Ann. 1983. The brown rice cookbook: A selection of delicious, wholesome recipes. New York and England: Thorsons Publishers Inc. 128 p. Illust. by Clive Birch. Index. 20 cm.

• **Summary:** Page 14 gives a description of soya sauce, shoyu, tamari, and miso. Soy-related recipes include: Miso soup with brown rice (p. 30). Miso sauce (p. 54). Tamari sauce (p. 55). Miso rice (p. 125). Craig Sams has also written a book titled *About Macrobiotics*.

"In the early 1960's many people in Europe and the U.S.A. were attracted to the ideas of Georges Ohsawa, a Japanese who had rediscovered the importance of dietary balance in traditional Eastern medicine." He taught macrobiotics, a dietary system in which brown rice plays a major role. "In the world of pop music the expression 'brown rice sandwiches' was used in association with the musicians who adopted wholefood diets." Then in the mid-1970s came the bran boom with an upsurge of interest in sources of dietary fibre, including brown rice.

Why did brown rice ever lose its once pre-eminent position to white rice? "The answer lies partly in the fact that while white rice will keep almost indefinitely, brown rice should be fresh. It attracts insects once it has been husked, so it needs more care in storage and more attention to efficient distribution." White rice also cooks more quickly.

"Pythagoras would not let his students eat beans because he believed they inhibited the higher intellectual processes. However, it is likely that this was because the prevalent bean

of classical Greece was the fava bean—harmless in itself but with a hard brown skin which, if regularly eaten, can lead to favism, symptoms of which are deterioration of vision and mental faculties."

6448. Sams, Craig. 1983. Macrobiotica: una forma de alimentarse [About macrobiotics: The way of eating]. Madrid, Spain: EDAF. 123 p. 18 cm. [Spa]*

• **Summary:** Translated from the English by Rafael Lassaletta. Also published the same year in Mexico by the same publisher (EDAF Mexicana) with the same number of pages.

• **Summary:** Contents: Introduction. Traditional nonfermented soybean foods. Fermented soybean foods. Tables: (1) Oriental nonfermented soybean foods: Fresh green soybeans, soybean sprouts, soybean milk, protein-lipid film [yuba], soybean curd [tofu], soybean flour (local names: Tou-fen, kinako). (2A) Composition of some indigenous soybean foods, 100 g, edible portion. (2B) Composition of some indigenous soybean foods, 100 g, edible portion. (3) Essential amino acid content of some indigenous soybean foods. (4) Oriental fermented soybean foods. (5) Characteristics of rice miso in relation to fermentation condition. (6) Average composition of soy sauce made from whole soybeans and defatted soybean meal. (7) Composition of various types of miso.

Figures: (1) Flow sheet for the preparation of soybean milk and its related products. (2) Flow sheet for manufacture of soy sauce. (3) Flow sheet for manufacture of miso. (4) Flow sheet for making hamanatto. (5) Flow sheet for preparation of sufu. (6) Flow sheet for tempeh fermentation. (7) Flow sheet for preparation of natto.

Note: Vol. 1 is "Animal products." Vol. 2 is "Plant products," Part A. Vol. 3 is "Plant products," Part B. Address: NRRC, Peoria, Illinois.

6454. Westbrae Natural Foods. 1983. Traditional sushi, the Westbrae way? (Leaflet). 4240 Hollis St., Emeryville, CA 94608. 1 p. Single sided. 28 cm.

• **Summary:** The top half of this glossy color leaflet shows a Japanese-style plate of nori-wrapped sushi (made with brown rice), chopsticks, and a 5-oz jar of Westbrae Natural Wheat-Free Tamari. The text below begins: "Now you can make traditional sushi right at home. Westbrae makes it easy by providing three essential ingredients..." Westbrae Sushi Nori, Westbrae Brown Rice Vinegar, and Westbrae Traditional Tamari. Address: Emeryville, California.

6455. World of God, Inc. 1983. The cookbook for people who love animals. 2nd ed. Umatilla, Florida. 192 p. Edited by Butterflies. Illust. and cover design by Flowers. No index.

26 cm.

• **Summary:** This vegan cookbook is only slightly different from the 1981 edition by the same title, but is 16 pages longer. Recipes with soyfood terms in the title are the same and on the same pages as those in the 1981 edition, except the following recipes added at the back of the book: Avocado-tofu dinner (p. 166). Stuffed avocado with tofu (p. 178). Spaghetti and tofu. Baked macaroni and tofu (p. 180). Tofu omelette (p. 181). Tofu cutlets (p. 182).

The book is interspersed with most of the same nice quotes about vegetarianism, veganism, and animal rights from great thinkers found in the 1981 edition. Address: P.O. Box 1418, Umatilla, Florida 32784.

6456. Yeo Hiap Seng Ltd. 1983. Yeo's quality foods and beverages. Singapore. 25 p. [Eng]

• **Summary:** "Yeo Hiap Seng's heritage dates back to 1900 in China. The Company started operations in Singapore in 1935, as a manufacturer of fine soya sauces." A photo shows the store front at one of its early locations. Many color photos show the company's products, which include the following soyfood products: Soy sprouts, salted black beans, salted yellow beans, hoi sin sauce, crushed yellow bean sauce, black bean sauce, salted soya beans, soy sauces (light or dark), and Yeo's soya bean drink (canned). Most product names are given in English, French, and Chinese. The company has offices (whose address and phone are given) in Singapore, Malaysia, Hong Kong, United Kingdom, USA (San Jose, California), and Canada (Richmond, BC).

Photos from this booklet show: (1) One of the company's early offices—the date and place are not given. (2) Yeo's range of Oriental sauces. (3) Yeo's Eastern condiments.

Photos (by William Shurtleff) show: (4) The company's soy sauce products. (5) Other related soy products. Address: Singapore.

6457. **Product Name:** Pearl River Bridge Superior Soy. **Manufacturer's Name:** Guangzhou Canned Food Industrial Corp.

Manufacturer's Address: Siheng Lu, Yuancun 510655, Guangdong, China.

Date of Introduction: 1983?

Wt/Vol., Packaging, Price: 750 ml bottle.

How Stored: Shelf stable.

New Product–Documentation: Ad. 1983? "Soy, Superior Sauce. Superior Soy." A color photo shows the bottle and label. Talk with Chinese Consulate General in San Francisco. 1991. Sept. 5. Two companies make this product. The other is Guangzhou Foodstuffs Corp., 94 Renmin Nan Lu, Guangzhou.

6458. Isobe, Shosaku. 1983? Konpura shōyu [Konpura shoyu (Leaflet)]. In: Shokuhin Zakki, Mukashi to Ima. No. 19. Undated. [1 ref. Jap]

6459. Kikkoman Corporation. 1983? [All-purpose seasoning. Since 1630. Kikkoman naturally brewed soy sauce. Brewed by Kikkoman Foods, Inc. in the U.S.A. (Brochure)]. 23 p. Undated. No place of publication given. [Jap]

• **Summary:** This color booklet gives an artistic introduction to Kikkoman's many activities and products (both soy and non soy, such as tomato sauces, wines, etc.) Only the rear cover is in English.

6460. **Product Name:** MacSoy Soya Sauce.

Manufacturer's Name: MacSoy Lanka Pvt. Ltd. (Marketer). Made in Sri Lanka by Mrs. Liu of Eastern Food

Products.

Manufacturer's Address: 51 Layards Rd., Colombo 5, Sri Lanka.

Date of Introduction: 1983?

New Product–Documentation: Form filled out by Jane Gleason. On 25 March 1988 she talked with Mr. Davis Philip, the director. "Soy sauce and soya noodles are sold to all income earners." Label. 1983? 3 by 3.75 by 1.5 inch box. Red, brown, orange, and white. "Free of caffeine. A perfect health drink for the whole family. Mac Soy Soya Cafe is a delicious drink. It contains High Protein, Vitamins and Minerals too. Directions for use. Add half a teaspoonful to a cup of boiling water. Add milk and sugar to taste. Ideal as iced cafe. May also be taken as black Cafe. Take regularly for good health. Soya Cafe make a perfect night cap—relieves fatigue and induces sound sleep."

6461. Westbrae Natural Foods. 1984. Distributor catalog No. 1: Jan. 1984. Emeryville, California: Westbrae. 19 p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Page 18: Glossary for new Japanese items, incl. Seaweed chips with miso, Tamari veggie chips, Vegetable chips with miso, Shrimp chips with miso, Sesame salt "gomashio," Umeboshi vinegar, Umeboshi paste, Tororo kombu, Miso ramen, 5-spice ramen (with powdered soy sauce and miso), Curry ramen (with powdered soy sauce and miso), Agar bar, Miso drops (candy, sweetened with natural rice malt).

Page 19: Sunburst product glossary, incl. Peanut butter domes with honey (with soybean oil, soy lecithin), Herb & cheese dressing (with soybean oil and whole soybeans), Honey mustard dressing (with refined soybean oil), Cinnamon apple granola (with soy oil), etc.

Note: The Sunburst community, which began as an intentional spiritual community in the late 1960s, founded and led by Norman Paulsen, was in its prime [in the 1980s] one of the largest shippers of organic products in the United States. Founded near Santa Barbara, California, the Sunburst members believed in a holistic lifestyle based on meditation, living from the land, organic farming, and—to some degree—chastity (Source: Wikipedia, Dec. 2008). Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O.

Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

6462. *Rocky Mountain Jiho*. 1984. Maboroshi no Kikkôman Denver kôjô [The phantom Kikkoman soy sauce plant in Denver]. Jan. 25. p. 4; Feb. 1. [Jap; eng+]

• **Summary:** Some people believe that Shinzaburo Mogi, of Kikkoman, founded an early shoyu plant in Denver. The article guesses that Shinzaburo Mogi wasn't living in Denver all the time. It takes a full year to make naturally fermented shoyu. Therefore he might have delegated the responsibility to another person named Naojiro Tatekawa, who lived in Denver and had a shop named Tatekawa Shoten, which opened in February 1909 (Meiji 42). Tatekawa came from a family of shoyu producers in Hiroshima, Japan. He visited Denver in the summer of 1907 to prepare for opening Tatekawa Shoten. The rumor that Mogi opened a shoyu factory in 1907 (Meiji 40) matches that year. Maybe they knew each other and made a deal. We may never know for sure. In 1897 Shinzaburo Mogi established Yamato Yunyu Kaisha, an import company, in Chicago. He was president. The *Nichibei Nenkan* for 1914 gives the address of Yamato Shokai as 36 S. State St., Chicago. Phone 1863.

Note that there is no listing for Mr. Tatekawa in the Denver (Colorado) City Directories from 1906-1910. Address: P.O. Box 1073, Denver, Colorado 80202. Phone: 295-1848.

6463. Super Center. 1984. Super Center savings (Ad). *Hartford Courant (Connecticut)*. Jan. 29. p. O12-O13.

• **Summary:** The 1st column of the 1st page of this 2-page display ad shows many La Choy canned products, including Chow Mein Noodles, Beef Chow Mein, Chicken Chow Mein, Bamboo Shoots, Bean Sprouts, Fried Rice, Fancy Mixed Chinese Vegetables.

Also shown: La Choy Soy Sauce, and Kikkoman Soy Sauce (10 oz. for 89¢), each in a bottle. Also advertised: La Choy Dinners (\$2.29 each for a 42 oz. bi-pack) incl. Chicken Chow Mein, Beef Chow Mein, Shrimp Chow Mein, Beef-Pepper Oriental Chow Mein.

6464. **Product Name:** Homestyle Tempeh Burgers (Sesame Wheat Tempeh Burger).

Manufacturer's Name: 21st Century Foods Inc.

Manufacturer's Address: 30 Germania St., Jamaica Plain, MA 01230.

Date of Introduction: 1984. January.

Ingredients: Organic soy tempeh, San-J tamari, herbs, spices.

Wt/Vol., Packaging, Price: 7 oz 2 round burger patties, vacuum packed.

How Stored: Refrigerated, 30 day shelf life.

New Product–Documentation: Leaflet from Norbert C. Belanger, General Manager. 1984. Jan. 16. The company

now makes and sells six tempeh products, including Tempeh Burger. Label. Undated. 3 inch diameter. Reddish brown on yellow. Leaflet. 1983. "Tempeh with a Difference."

6465. Chico-San, Inc. 1984. Why does Chico-San bother to import soyfoods? (Ad). *Natural Foods Merchandiser*. Jan. p. 9 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America.

• **Summary:** A 4½ by 7½ inch black-and-white ad. Because the quality of fermented soyfoods made in Japan is considered better. Chico-San's miso-shoyu master is Mr. Tomio Kitani. He uses Japanese soybeans and sea salt rich in minerals. His Nama Shoyu, which takes 4 years to make, is the only unpasteurized soy sauce available in America. It is also the only shoyu with a salt content lowered by techniques not involving extraction or additives. "Taste is the difference."

This ad also appeared in *Macromuse* (1984, Spring, p. 35). Address: Chico, California 95926.

6466. Erewhon, Inc. 1984. Made in Japan 400 years ago (Ad). *Natural Foods Merchandiser*. Jan. p. 3 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America.

• **Summary:** This 8½ by 11 inch ad begins: "To the ancient Japanese shoyu masters, making the finest possible soy sauce was more than just a matter of pride. It was a matter of necessity. Because, in medieval Japan, no one served inferior shoyu to a shogun twice." "Our great taste comes naturally." The full-page color photo shows the tips of two chopsticks on the edge of a small bowl containing shoyu for dipping sauce. Above that are sliced fish and orange fish eggs. In the lower left a bottled labeled (confusingly) "Erewhon Shoyu Tamari." Note: Shoyu and tamari are different types of soy sauce.

6467. *Food Engineering*. 1984. American shoyu: Like pizza, tacos, kielbasa and Danish. 56(1):47. Jan.

6468. Hatch Natural Products. 1984. Catalog and price list. 746 Germanna Highway, Culpepper, VA 22701. 76 p. 28 cm.

• **Summary:** This company distributes natural foods from 48 manufacturers including Arrowhead Mills, Chico-San Inc., Eden Foods Inc., Edward and Sons Trading Co., Fantastic Foods, Great Eastern Sun, Kingdom Foods, Living Farms, Love Natural Foods, Mitoku (Great Eastern Sun), Virginia Soyworks, and Westbrae Natural. The company was founded by Mildred and Ira Hatch; Its history is given on page 1. The ingredients in each product are listed. They carry soybeans (p. 16-17), dinner mixes with TVP (p. 31-32), imported Japanese miso and soy sauce (p. 37-43), soybean oil (from Arrowhead Mills p. 60-61).

Concerning so-called "cold pressed" oils the catalog states: "The words 'cold pressed' on many oil labels is

generally thought to mean that they contain natural oils processed by the low temperature and pressure method discussed above. But this is totally mistaken. The words 'cold pressed' are absolutely meaningless when used as an indication of quality. They have no bearing on how the oil was extracted or at what temperature it was removed. They appear only as a marketing aid which just confuses and misleads the consumer and may be found on oils that are chemically extracted, bleached, and deodorized. Reputable suppliers refuse to use the term on their labels.

"Oils are extracted by two methods: pressure and chemical solvents. Pressing is normally done by what is called an expeller press. Temperatures produced seldom fall below the 140° to 160°F range. Still, the oil produced at these temperatures loses little of its flavor and nutrition."

Concerning soybean oil: "Soy oil's flavor is the strongest of all the oils, and many people find the unrefined product unbearable. Its flavor is best described as fishy or painty and lacks stability." Address: Culpepper, Virginia. Phone: (703) 825-4302.

6469. Ikeda, Kisha. 1984. Neage shoten ni ugoku kotoshi no shōyu gyōkai [Shoyu industry shaken by price increases]. *Sake-ru! Shokuhin Tokei Geppo (Monthly Statistics on Alcohol and Foods)*. Jan. p. 17-24. [Jap]

6470. San-J International, Inc. 1984. Some soy sauces are called tamari. But they're not. San-J is the real tamari (Ad). *Natural Foods Merchandiser*. Jan. p. 7 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion '84. Marketing soyfoods in America.

• **Summary:** A full-page color ad. Four photos show bottles of San-J Tamari, and San-J Tamari and Teriyaki Crackers (wheat free and baked; made with whole brown rice). This ad also appeared the summer issue (p. 7) of *Soyfoods* magazine. Address: Colonial Heights, Virginia 23834.

6471. **Product Name:** Tofu Missing Egg Salad.

Manufacturer's Name: Soycraft.

Manufacturer's Address: P.O. Box 420, Woollahra (near Sydney), NSW 2025, Australia. Phone: (02) 32 0716.

Date of Introduction: 1984. January.

Ingredients: Tofu, fresh vegetables, herbs and spices, shoyu, vegetable oil, mustard, apple cider vinegar, honey, sea salt.

Wt/Vol., Packaging, Price: 200 gm.

New Product–Documentation: Letter and Label sent by Ralph and Volli Henderson, founders of Soycraft. 1984. Jan. 17. The letter is on Klinica letterhead. "We have been so busy that nobody has yet staggered to the printer to collect Soycraft letterheads. I think Volli and her small crew sometimes wish it had never happened..."

"We make tofu, and then use all of our tofu to make secondary products. At the present time we don't think there

is market support for tofu, which would justify another firm in that line of business; it will be a year or two before Australians may wean away from their meat based diets. The local Chinese community makes and uses a lot of tofu, but it is really only the health food shops (about 230 in Sydney) that sell tofu. About 30% of these health food shops are still vitamin supply people and unaware of what it is all about anyway. Our tofu is made via the cauldron method—laborious, tedious, etc. We will consider buying the Takai W30A system towards the end of this year."

Label. 2.5 by 3 inches. Green on white. "All natural ingredients—No preservatives."

6472. Soyfoods Assoc. of America. 1984. Soyfoods Pavilion '84. Marketing soyfoods in America (Ad). *Natural Foods Merchandiser*. Jan. 12-page color advertising insert.

• **Summary:** Contains large color ads by Legume Inc. (6 frozen tofu entrees), Erewhon, Inc. (shoyu tamari), Vitasoy (USA), Inc. (natural and coconut soy drink, sweetened with maple syrup), San-J International, Inc. (tamari, teriyaki sauce, tamari crackers, teriyaki crackers), Tofu-Time, Inc. (Tofutti "nondairy tofu frozen dessert"), Eden Foods, Inc. (Edensoy soy beverage in plain and carob flavors, retort pouch), and Westbrae Natural Foods (natural ramen in 100% whole-wheat, buckwheat, brown rice, mushroom, seaweed, miso, 5-spice, and curry flavors).

Contains black-and-white ads by Westbrae Natural Foods (shoyu, tamari, and soy sauce), Chico-San, Inc. (imported miso and soysauce), Fantastic Foods, Inc. (tofu burger mix), Penguin's, Inc. (dairy-free frozen dessert), Nasoya Foods (Firm Style Tofu, Soft Style Tofu, Marinated & Broiled Tofu, Tofu Burgers, Tempeh, Tempeh Burgers, Tofu Vegi-Dip [Creamy Dill, Soyannaise, Bleu Cheese, Onion, Creamy Garlic], Corn Cakes [Plain with Bran, Blueberry, Cranberry]; Non-soy products in the "Oriental Cuisine" line include Fresh Noodles, Wonton Skins, Egg Roll Wrappers), Hinode Tofu Co. and Azumaya, Inc. ("The #1 and #2 tofu producers in America").

The only article, whose author is not given, is titled "Soyfoods Pavilion debuts at Natural Foods Expo '84." On the front cover of the insert is a list of members of the Soyfoods Association of America (formed in Feb. 1983) that participated in Natural Foods Expo '84. In addition to the advertisers mentioned above, they include: Farm Foods, Laughing Moon Food Co., Paradise Distributors, Inc., Soyfoods Magazine, Tempeh Works, Inc., and White Wave, Inc. Address: 526 East 20th St., New York, NY 10009.

6473. **Product Name:** Furama Tofu Noodles [Spiced, or Plain].

Manufacturer's Name: Soyfoods of America.

Manufacturer's Address: 1091 E. Hamilton Rd., Duarte, CA 91010. Phone: 213-681-5393.

Date of Introduction: 1984. January.

Ingredients: Spiced: Soybeans, water, soy sauce, spices, calcium sulfate.

Wt/Vol., Packaging, Price: 6 oz poly bag.

How Stored: Refrigerated.

New Product–Documentation: Ad in Soyfoods. 1984. Summer. p. 3. “In 8 oz poly bag with 2-week shelf life refrigerated or 6-month shelf life frozen. Available vacuum packed with 6-week shelf life.” Talk with Ken Lee. 1988. Aug. 29. The spiced product was launched in Jan. 1984. But Mrs. Lee recalls the two dates to be Jan. 1985 and July 1985. Labels. 1985. 5.5 by 2.5 inches. Paper.

6474. **Product Name:** Furama Spiced Tofu Loaf.

Manufacturer’s Name: Soyfoods of America.

Manufacturer’s Address: 1091 E. Hamilton Rd., Duarte, CA 91010. Phone: 213-681-5393.

Date of Introduction: 1984. January.

Ingredients: Soybeans, water, soy sauce, spices, calcium sulfate.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Ad in Soyfoods. 1984. Summer. p. 3. “In 8 oz poly bag with 2 week refrigerated shelf life. Soon available vacuum packed with 6-week shelf life.” Talk with Ken Lee. 1988. Aug. 29. This product was launched in Jan. 1984. Mrs. Lee recalls the date to be Jan. 1985. Label. 5.5 by 2 inches. Black on orange paper.

6475. **Product Name:** Leandro’s Meatless Lasagna (Tempeh Blended with Four Cheeses in Whole Wheat Pasta).

Manufacturer’s Name: Soyfoods Unlimited, Inc.

Manufacturer’s Address: 14670 Doolittle Dr., San Leandro, CA 94577.

Date of Introduction: 1984. January.

Ingredients: Sauce: Crushed tomatoes, tempeh, whole wheat lasagna noodles, onion, water, vegetable oil, white wine, honey, garlic soy sauce, black pepper, basil, oregano. Filling: Ricotta cheese, mozzarella cheese, Romano cheese, Parmesan cheese, egg white, parsley flakes, nutmeg.

Wt/Vol., Packaging, Price: 10 oz vacuum pack.

How Stored: Frozen.

New Product–Documentation: Label. 1984, undated. 2.5 by 4.5 inches. Red, green, and white. “Old fashioned goodness. Single serving.” Poster. Two color, with ingredients. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Spot in Soyfoods. 1984. Summer. p. 43-44. Spot in Whole Foods. 1984. May. p. 63. Press release. 1984. 2 p. with photo. Shurtleff & Aoyagi. 1985. History of Tempeh. p. 54.

Letter (e-mail) from Valerie Robertson. 2011. Sept. 21. We had Alioto’s restaurant in San Francisco make our tempeh lasagna. We took them tempeh that had been ground (in a meat mixer) and seasoned. They put it all together (with whole wheat lasagna noodles) and froze it. It was good.

6476. **Product Name:** Tempeh Burgers [Plain, or Bar-B-Q].

Manufacturer’s Name: Turtle Island Soy Dairy.

Manufacturer’s Address: 2017 21st Ave., Forest Grove, OR 97116. Phone: 509-493-2004.

Date of Introduction: 1984. January.

Ingredients: Organic soybeans, well water, soy sauce, herbs, spices, apple cider vinegar, *rhizopus oligosporus*.

Wt/Vol., Packaging, Price: 6 oz package. Retail for \$1.79 (Plain), \$1.89 (Bar-B-Q).

How Stored: Frozen or refrigerated.

New Product–Documentation: Interview with Seth Tibbott of Turtle Island. 1984. Jan. 17. The burgers are sold vacuum packed.

Soya International. 1990. April/June. p. 24. Contact: Seth Tibbott. Address is now P.O. Box 218, Husum, Washington 98623.

Leaflet. 1992. “Discover Turtle Island.” Turtle Island makes 3 types of burgers, with have the registered trademark “Big T Burgers.” They are marinated, not fried, and vacuum packed in resealable bags, two patties per pack. “Eat one/ save one” and still have a handy “Ziploc” bag when all is done. Sold frozen or refrigerated—delicious, ready to eat. Tempeh Burgers are made from the company’s own soy tempeh, simmered to perfection in their own herb soy sauce blend. Great as a quick meal. BarBQ Burgers are cooked through and through with Turtle Island’s own special barbecue sauce to make them jut right for your grill or microwave.

6477. Westbrae Natural. 1984. Soy sauce made complicated (Ad). *Natural Foods Merchandiser*. Jan. p. 5 (unnumbered) of 12-page color advertising insert. Soyfoods Pavilion ‘84. Marketing soyfoods in America.

• **Summary:** This 8½ by 11 inch black-and-white ad begins: “Many people call traditional soy sauce ‘tamari.’ This labeling is illegal in Japan, where this soy sauce can only be called by its correct name, ‘shoyu.’ Some natural food companies avoid the Japanese law by importing *shoyu* and relabeling it as *tamari* in the U.S., where no soy sauce standards exist as yet.” A photo shows 10 Westbrae soy sauce products in various sizes, including: Mild soy sauce. Traditional tamari. Tamari. Traditional shoyu. Organic shoyu. Visit booths 652-656 in the Soyfoods Pavilion.

6478. *Food Chemical News*. 1984. Firm [Kikkoman Foods] objects to casein, protein hydrolysates GRAS exclusion of soy sauce. 25(49):36. Feb. 13. [3 ref]

6479. Steinkraus, Keith H. 1984. Re: Soy sauce in Southeast Asia. Letter to Richard Leviton at Soyfoods Center, Feb. 14. 1 p. Typed, with signature on letterhead.

• **Summary:** “While fish sauces and pastes are predominant in Burma, South Vietnam, Laos, and Cambodia, you will

still find soy sauces being manufactured and consumed on a small scale in the Chinese communities.” Address: New York State Agric. Exp. Station, Dep. of Food Science & Technology, P.O. Box 462, Geneva, NY 14456-0462. Phone: 315-787-2276.

6480. Boyle, J.H. 1984. Humble soy sauce and 300 years of business skill. Review of “Kikkoman: Company, Clan and Community” by Mark Fruin. *Asian Wall Street Journal*. Feb. 22. [1 ref. Eng]

• **Summary:** “‘Kikkoman’ is a model of business history writing. The Japanese knack for accommodating both tradition and modernity in their institutions is well known. This book is an engaging case study of that talent.”

Kikkoman is the first and only traditional Japanese business to succeed internationally—not bad for an enterprise launched 322 years ago in Noda by two farmer-merchants with a few contract laborers. “Kikkoman” has been the corporation’s name for only 20 years. Before that it was a brand name for the leading brand of shoyu made by the company—named Noda Shoyu K.K. Interestingly, this brand was first registered in California in 1879, then six years later, in 1885, it was registered in Japan. Mr. Fruin believes that Keizaburo Mogi, president of Kikkoman from 1962 to 1974, deserves much of the credit for “developing the international outlook and product diversification that has put the company in such a strong market position in recent years.”

Japanese custom does not require that a family business be passed on to an unqualified eldest son. For centuries adoption has been condoned to substitute a promising heir for a natural son lacking in ability. Sons are usually adopted after they are old enough to have demonstrated their talent. Since 1962, two of Kikkoman’s three presidents have been adopted sons. Both had degrees from prestigious universities and were adopted only after completing their academic training. The book shows that just as family and form are intertwined, so are the company and its surrounding community—Noda. Address: Prof. Asian History, California State Univ., Chico, CA.

6481. Kotzsch, Ronald E. 1984. Natural foods pioneer Erewhon: An industry leader’s tough fight to survive. *East West Journal*. Feb. p. 24-29.

• **Summary:** A very well written and accurate history of Erewhon from its founding in 1966, to its declaration of Chapter 11 bankruptcy in the fall of 1981. The company was able to clear its \$3 million indebtedness by paying 11 cents for each dollar owed. In early 1982 “the company was sold by the Kushis to Ron Rossetti, owner of the Nature Food Centres retail chain. Later that year [in July] Rossetti accepted as financial partners Charles T. Verde and Cynthia C. Davis, who became respectively president and vice president of marketing. Since then the operation has been totally in their hands. Erewhon has a production facility at

Natick, Massachusetts.” A photo shows Davis and Verde with 5 Erewhon products.

“The story of Erewhon is a dramatic one. Founded in Boston in 1966 on the thinnest of shoestrings it soon began to grow at a phenomenal rate. By the mid ‘70s it was the most powerful force in the burgeoning natural foods industry, respected as a leader and innovator, with annual sales of over ten million dollars. Several troubled years culminated, however, in 1981 with a petition for protection under the Chapter Eleven ‘bankruptcy’ statute. Only a change in ownership and management prevented the disappearance of the company altogether. Phoenix-like, it has continued but is substantially changed. Erewhon’s history is instructive as well as dramatic. It reveals something basic about the nature of ‘new age’ or idealistic, service-oriented business, and the perils of success, as well as failure, for those who practice it.

“In 1965 Michio and Aveline Kushi, a Japanese couple in their forties, moved to Boston. Their purpose was to teach macrobiotics, the philosophy, way of life, and diet formulated by their mentor, Georges Ohsawa. They rented a house on a side street in North Cambridge. Michio began to lecture in the evenings, and Aveline prepared meals for the lecture guests and gave cooking classes.

“The core of their message was simple. Food is a primary factor in physical health, and also in emotional, psychological, and even spiritual well-being. The key to health and happiness is a proper diet, based on whole cereal grains, beans, and indigenous vegetables and fruits. As Ohsawa had written: ‘Food is the basis of life. If food is good then all else will be good as well.’

“Those who came and were convinced wished, of course, to follow the recommended diet. Its elements however were difficult or impossible to obtain. One could no more buy organically grown brown rice in Boston in 1965, than one could purchase samples of the British crown jewels. So the Kushis ordered extra sacksful of rice, oats, wheat flour, and kegs of miso and tamari, stashed them in their hall closet, and began to sell to students.

“In April, 1966, with the help of young former actor Evan Root, the Kushis rented a small basement store on Newbury Street in Boston. With shelving and counters made from planking and cinder blocks, they began to sell a modest array of whole foods. These were macrobiotic staples, with an occasional jar of sesame or apple butter thrown in for excitement. Root and the Kushis decided to name the store ‘Erewhon’ after the utopia in Samuel Butler’s novel, an imaginary place where people had to take responsibility for their own health and where it was a crime to get sick.

“Erewhon was a company therefore founded not on the profit motive but out of a desire to serve the public. From the outset it had two primary aims: to make available the highest quality natural whole foods, and to educate the public in the importance and proper use of these foods. The store was a natural and necessary extension of the educational activities

of the Kushis, and their hope to effect positive healthful change in individual lives and in the society as a whole. At base, it was a kind of missionary enterprise.

“Root managed the tiny business for about a year, then left to start Boston’s first macrobiotic restaurant. Shortly thereafter, Paul Hawken and Bill Tara arrived from the never-never land of San Francisco’s Haight-Ashbury to study with the Kushis. Bright, energetic, gifted with business sense and intuition and committed to the Kushis and their ideas, the two took over and began to develop Erewhon. They moved the store to a larger, more attractive site, greatly expanded the product offering, and began a mail order department. The business began to take off rapidly—more rapidly perhaps than anyone anticipated or hoped.

“The next decade was a period of headlong and often dizzying growth for Erewhon; It began to manufacture and distribute its own product line. It opened retail outlets in Los Angeles, Hartford, Cambridge, and Brookline. In a short time it had grown into a large, influential and respected corporation. Throughout, it strove to remain true to its ideals of quality and education. Rather than merely responding to consumer demand the company sought to help the public understand the importance of quality food products. It succeeded to a remarkable degree. Erewhon’s most impressive accomplishments were that it:

“+ originated and developed the term and concept of ‘natural foods’ (a direct translation of the Japanese *shizenshoku*) to distinguish its products from the pills and elixirs of the older ‘health food’ industry.

“+ manufactured, or contracted manufacturing, according to strict specifications a product line that set industry standards for purity and quality.

“+ developed new sources of quality commodities. For example, it encouraged a farm in Arkansas to grow organic rice, promising to then buy and market the crop.

“+ established the ‘down-home country store’ ambiance as a model for natural foods stores. The plain wood floors and panelling, the bulk bins and indirect lighting, influenced scores of new businesses.

“+ showed broad ecological and social concern: in its retail outlets it encouraged bulk sales to avoid wasteful packaging; it began to use biodegradable cellophane for its packaged foods; it supported coops and communes through direct wholesale transactions; and it began to distribute to supermarkets in order to reach the general public.

“+ published educational flyers and pamphlets on food and nutrition, and used its packaging to provide information to the consumer.” Continued.

6482. **Product Name:** Tofu.

Manufacturer’s Name: LEASA Investments.

Manufacturer’s Address: 6103 N.W. 6th Ct., Miami, FL 33127. Phone: 305-756-8636.

Date of Introduction: 1984. February.

New Product–Documentation: Soyfoods Center Computerized Mailing List. 1984. Feb. 7. Owners: George Yap and Bob Heartsong.

Talk with Livingston George Yap, founder and owner. 1998. March 11. His official company name is LEASA Industries Company Inc., presently located at 2450 N.W. 76th St., Miami, Florida 33147. Phone: 305-696-0651. LEASA, written with all capital letters, is an acronym formed from the first letter of the first name of each of the people in his family: His first name is Livingston. His wife’s is Einez. His sons are Andrew and Sean, and his daughter is Allison. His ancestry is Chinese. Livingston was born in Jamaica (he still speaks with a Jamaican accent), but his father was born in China. The first food made by his company was bean sprouts. He bought tofu from Swan Foods [sic, Swan Gardens owned by Richard & Jocelyn McIntyre] and from Heartsong Tofu and distributed this tofu with his sprouts. Then in early 1984, when Heartsong Tofu (run by Bob and Toni Heartsong in Miami) went out of business, Livingston bought their equipment; he did not buy their company. He hired Bob Heartsong as his tofu maker and—for the first time—began to make tofu in Feb. 1984. He learned how to make tofu from Bob Heartsong and from the book *Tofu & Soy milk Production* by Shurtleff and Aoyagi. In about 1989 he started to make soy sprouts, but his market for soy sprouts was always small, and he no longer makes soy sprouts. Now he also makes lentil, wheat, azuki, etc.—about ten different types of sprouts. His company focus on the mainstream American market (grocery store chains, foodservice, cruise lines, etc.) much more than the ethnic Chinese market. However at Chinese New Year each year he does a big promotion in supermarkets; this last year he did the promotion with Kikkoman and Winn Dixie. Now people are aware that tofu is good for them and good for menopause, cancer, etc.

6483. Pehanich, M. 1984. Make way for the new Jenō’s. *Prepared Foods*. Feb. p. 56-57, 59, 61-63, 65.

• **Summary:** After founding the Chun King Corp. in 1946 on a loan of \$20,000 from a friend, Jenō started making mung bean sprouts, then created the prepared Oriental foods category. He built Chun King into the biggest Chinese food company in the USA. 20 years later he sold the company to R.J. Reynolds Tobacco Co. Today he is the frozen pizza baron, with sales approaching \$1,000 million. Address: Business editor.

6484. Shim, Chung-shil. 1984. Korean recipes. Seoul, Korea: Seoul International Tourist Publishing Co. 79 p. Feb. Illust. (color photos by Edward B. Adams). Index. 26 cm.

• **Summary:** Recipes include: Five grain rice (*-kok pap*, with ½ cup each red [azuki] beans and black [soy] beans). Rice with soy bean sprouts (*Kong namul pap*). Mixed vegetables on rice (*Pibim pap*, with 100 gm soy bean sprouts, soy sauce,

and red pepper paste). Dumplings (*Mandu kuk*, with 150 gm beancurd [tofu]). Seaweed soup (*Miyok kuk*, with 50 gm brown seaweed {*Miyok*} and 2 tablespoons soy sauce). Soy bean sprout soup (*Kong namul kuk*). Soy bean paste stew (*Toinchang ch'igye* [*doenjang*], with 2 tablespoons soy bean paste and 200 gm beancurd). Beancurd with beef (*Tubu chorim*, plus 3 tablespoons soy sauce). Curd with vegetables (*T'angp'yong Ch'ae*, with 250 gm mung bean curd, 200 gm soy bean sprouts, and 2 tablespoons soy sauce). Bean pancake (*Pindae tok*, with 50 gm soy bean sprouts and 4 tablespoons soy sauce).

Each recipe is accompanied by a large color photo. About the author: She is a publisher, artist, and wife of Edward B. Adams, Headmaster of Seoul International School. She has developed a keen interest in Korean cooking, and has chosen here the simple dishes that are most popular among foreigners. She was educated in California, where she married. A color photo shows Shim Chung-shil. Address: Founder, Seoul International Publishing House.

6485. Shurtleff, William; Aoyagi, Akiko. 1984. Soymilk industry and market: Worldwide and country-by-country analysis. 2 vols. Lafayette, California: Soyfoods Center. Vol. 1, 199 p. Vol. 2, 100 p. Feb. 28 cm. [165 ref]

• **Summary:** A comprehensive overview, worldwide, with extensive historical information. The first study of its type, with many statistics, graphs, and tables. Volume 1 is the market study, and Volume 2 is black-and-white copies of soymilk labels and other graphics. Contents: 1. Introduction. 2. Directory of soymilk manufacturers and related companies worldwide. 3. Definitions and varieties of soymilk. 4. Overview of world soymilk industry and market, and future outlook. 5. United States soymilk industry and market. 6. Japan. 7. Korea. 8. China. 9. Taiwan. 10. Hong Kong. 11. Singapore and Malaysia. 12. Southeast and South Asia: (13. Vietnam. 14. Thailand. 15. Philippines. 16. Indonesia. 17. India. 18. Sri Lanka). 19. Europe (Incl. Plamil Foods in England, Tetra Pak Group in Sweden, Alfa-Laval and John Wilson in Sweden, Danish Turnkey Dairies—DTD and Soya Technology Systems (STS), Alpro/Vandemoortele in Belgium, Nestle, F. de Selliers in Belgium, Dansk Soyakagefabrik in Denmark, Lima Andiran in France, Galactina in Belp, Switzerland, and Semper A.B. in Sweden).

20. Latin America. 21. Africa. 22. History of Vitasoy in Hong Kong. 23. Two modern soymilk manufacturing processes: Marusan and Alfa-Laval. 24. Etymology of the word "soymilk" worldwide. 25. Analysis of ingredients in 49 popular Japanese soymilk products. 26. Bibliography. 27. About the Soyfoods Center. A table on p. 12 gives an overview of world soymilk production in 1983 ranked in descending order of annual per capita consumption. These statistics do not include China (PRC) or soy-based infant formulas, usually made from soy protein isolate. 1. Taiwan, 210 million liters, 11.1 liters/capita, growing at 30% per year.

2. Hong Kong, 39.1 million liters, 7.5 liters/capita, growing at 10% per year. 3. Singapore, 11.2 million liters, 4.7 liters/capita, growing at 15% per year. 4. South Korea, 67.0 million liters, 1.60 liters/capita, growing at 60% per year. 5. Malaysia, 21.4 million liters, 1.53 liters/capita. 6. Japan, 131.8 million liters, 1.10 liters/capita, growing at 101% per year. 7. Thailand, 50.0 million liters, 1.00 liters/capita. 8. USA, 9.6 million liters, 0.04 liters/capita. Total world production: 548.3 million liters.

Page 36 gives an overview of the U.S. market for soy-based infant formulas and adult soymilk. Production of soy-based infant formulas (on a ready to serve basis) in 1983 was as follows: Ross Laboratories made 14,720,000 gallons of Isomil (i). Mead Johnson made 14,080,000 gallons of Prosobee. Loma Linda made 2,240,000 gallons of Soyolac. And Wyeth Labs made 960,000 gallons of Nursoy. Thus 32,000,000 gallons of soy-based infant formula were made in the USA in 1983.

Also in 1983, consumption of soymilk by adults in the USA was as follows: 1,743,000 gallons were made by specialized soymilk manufacturers in the USA (Loma Linda Soyagen 1,000,000 gallons; Worthington Soyamel 670,000 gallons, Miller's Soy (private label) 73,000 gallons). 690,000 gallons were imported (328,000 gallons of Vitasoy by Vitasoy USA, 254,000 gallons of Yeo's by YHS, 50,000 gallons of Edensoy by Eden Foods, 25,000 gallons of President by President, 25,000 gallons of Kibun by Kibun, 8,000 gallons of To-Neu by San-J International). 250,000 gallons were made fresh by tofu companies (45,000 gallons by Mighty Soy, 41,000 gallons by Victor Foods [Scarborough, Ontario, Canada], 39,000 gallons by Quong Hop & Co., 35,000 gallons by Wy Ky, and 90,000 gallons by others).

Yield. 1 ton of raw soybeans yields approximately 4,320 gallons of soymilk. Conversion: 3.785 liters = 1 gallon. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6486. Shurtleff, William; Aoyagi, Akiko. 1984. Brief history of Yeo Hiap Seng Ltd. and the company's work with soymilk worldwide (Document part). In: Shurtleff and Aoyagi. 1984. Soymilk Industry and Market: Worldwide and Country by Country Analysis. Vol. 1. 177 p. See p. 100-02.

• **Summary:** "Soymilk entered the modern age in Singapore in 1954, when Yeo Hiap Seng introduced the first commercial bottled soymilk. The company traces its origins to the year 1900 when the patriarch of the Yeo family, Mr. Yang (in the Amoy dialect, his name was pronounced Yeo Keng Lian) purchased a small company named "Hiap Seng" in the city of Chang-chou (Zhang Zhou), Fukien (Fujian) province, China. "Hiap Seng" means "unite to succeed." Yeo Keng Lian changed the company's name to reflect his family's ownership. He worked as a manufacturer and retailer of fermented soybean seasonings: soy sauce (*jiang-*

you), Chinese-style miso (*dou-jiang*), and fermented tofu (*furu*). All three products were sold from day one under the “Light House” brand.

Note: This is the earliest English-language document seen (Oct. 2011) that uses the word “furu” to refer to fermented tofu.

By working together, the family did succeed. Their soy sauce, fermented in the traditional Chinese way in wooden vats and earthenware jars, was of superior quality and the business prospered. The original plant was located near the center of Chang-chou. In about 1920 a second plant was established in the eastern part of the city, and in the late 1920s a third plant was set up in the southern part of the city. Each of the three fermented soy products were produced in all three plants; the second and third plants also produced some pickled vegetables.

In 1935, during the Japanese invasion of China, when life was difficult and unsettled in Fukien province, Yeo Keng Lian sent his eldest son, Yeo Tian In, to Singapore to investigate possibilities there. The son founded the Yeo Hiap Seng Sauce Factory at 410 Outram Road, Singapore 3. He was joined shortly by the rest of the family. The company continued to make the same three fermented soy products that it had made since 1900 in China. In 1947 the growing business was moved into larger quarters at 950 Dunearn Road, its present location. The move out of China was a wise one, for in 1949 the three Yeo Hiap Seng plants in Fukien were taken over by the Chinese Communists. By the mid-1940s, Yeo’s quality soy sauce was a common sight in Singapore.

In 1950 YHS decided to diversify into canned products, such as chicken curry, fish, and meat. Then in 1954 they launched their first soymilk. Called Beanvit, it was subsequently renamed Yeo’s Soybean Drink. A rather sweet soymilk sold like a soft drink in sterilized bottles, it was marketed in both Singapore and Malaysia, where it was the first product of its type. (Vitasoy was first sold like a soft drink in sterilized bottles in Hong Kong in 1953.) In 1955 the company changed its structure to that of a “Limited” (Ltd.) company. In 1958-59 YHS expanded its soft drink line by bottling favorite traditional Chinese beverages, such as chrysanthemum teas and herb teas. In 1962 YHS began its first export sales to Hong Kong. In 1967 YHS soymilk and teas were first sold in UHT (Ultra High Temperature) aseptic Tetra Pak cartons (tetrahedral/pyramid shaped; 285 ml).

“YHS was the world’s first company to package soymilk in aseptic Tetra Pak cartons, and the first to use Tetra Pak for any beverage in Singapore. (Vitasoy in Hong Kong did not start using Tetra Pak until 1976). Shortly after introducing sweetened soymilk in the tetrahedral pack, YHS launched enriched Vitabean in the same carton. It was fortified with half of the adult Minimum Daily Requirement of most essential vitamins. Sterilization in bottles would have destroyed most of the added vitamins, but the UHT

process did not. In 1974 packaging was changed to Tetra Brik (250 ml), but bottling continued. During the late 1970’s YHS changed its soymilk brand name to Yeo’s. By 1976 Yeo Hiap Seng’s soymilk production had climbed to 50 million bottles and cartons a year, and by 1980 to 75 million (250,000 a day), prompting the company to build a new plant to double its capacity. In 1983 YHS had the biggest share of the Singapore soymilk market (Alan Yeo, personal communication, 1982, 1983).

“Yeo Hiap Seng pioneered soymilk throughout Southeast Asia. In 1959 they opened their first soymilk plant at Kuala Lumpur in Malaysia. By 1984 they had four soymilk plants there at Kuala Lumpur, Johore Baru, Prai, and Kuching. Malaysia, with its 14 million people, was a bigger market than Singapore, with its 2.4 million people. By 1984 YHS had the lion’s share of the Malaysian soymilk market. During the 1970’s, YHS started exporting soymilk to Hong Kong (where they got a small share of the market). In 1979 they began exporting canned soymilk to the USA, where they had offices and a warehouse in San Jose, California. In early 1983 they introduced a low-sugar soymilk to the US. Sales, however, were slow. YHS was not interested in the China market, since they thought that it would be too difficult to get profits out in hard currency. They were franchising their soymilk process and technology in Indonesia, where the product is being marketed under the YHS name. They plan to share in the promotion, too.

Starting in 1974 Yeo Hiap Seng began a new phase of its expansion and diversification by acquiring the Singapore franchises for Pepsi-Cola and Mirinda. These were followed by franchises for Schweppes in 1985 and 7-Up in 1986. In 1985 the company acquired distribution rights for Budweiser beer and in 1987 they branched out into prawn farming.

“The 1981 Annual Report of Yeo Hiap Seng Ltd. shows that this publicly held company was run by Yeo Tian In (Chairman) and Alan Yeo Chee Yeow (Managing Director). From 1977 to 1981, sales of all products grew from \$39.5 to \$95.8 million and pre-tax profits from \$7.1 to \$11.5 million. Their Soft Drinks Division, one of the largest in Singapore, Malaysia, and Hong Kong, provided the main thrust of company growth.” Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6487. Product Name: [La Vie Claire Tofu Burgers (Garlic & Fines Herbes, or Mushrooms)].

Foreign Name: La Vie Claire Galettes de Tofu (Ail et Fines Herbes, Champignons).

Manufacturer’s Name: Société Française d’Alimentation Saine (SFAS) (Marketer). Made in France by Société Soy.

Manufacturer’s Address: B.P. 77, 70 Avenue de la République, 94703, Maisons-Alfort Cedex, France. Phone: 43.78.11.32.

Date of Introduction: 1984. February.

Ingredients: Burgers with Garlic: Tofu (water, soybeans),

oat flakes*, tamari (soy sauce), sunflowerseed oil, garlic 3.8%, spices and aromatics. * = Organically grown.

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Refrigerated.

New Product–Documentation: Label. Received from Bernard Storup of Société Soy. 1989. March. 2.5 by 5.5 inches. Self adhesive. Green and red (or brown for mushroom) on white. “A food preparation based on soya and cereals. Made without artificial colors or preservatives.” Logo of flying bird. Illustration of garlic (or mushrooms) with green herbs against cross-hatch background.

Letter (fax) from Bernard Storup. 1990. March 10. “We made the burgers for ‘La Vie Claire’ under their brand from Feb. 1984 to Oct. 1987. Since that date, they have sold all their burgers (same varieties) under our ‘Soy’ brand name.” The company name is Société Française d’Alimentation Saine (SFAS). They make no soyfoods. They sell those made by Société Soy and soymilk made by Cacoja. In the mushroom burgers, the ingredients are: Tofu (water, soybeans), oat flakes*, mushrooms from Paris 14%, tamari (soy sauce), sunflowerseed oil, garlic 3.8%, spices and aromatics. * = organically grown.

6488. *Soyanews (Sri Lanka)*. 1984. The Indonesian art of making soyafoods. 6(6):4-5, 9. Feb. [1 ref]

• **Summary:** “Recently the UNDP invited the Soyabean Foods Research Centre in Gannoruwa to send a team of food technicians to study the Indonesian experience. They have now returned to Sri Lanka after a two-month study tour which helped to acquaint them with the home and cottage level processing of soyafoods.”

Fermented foods are highly developed and very important in Indonesia. “The only fermented preparation Sri Lankans are perhaps acquainted with is with the making of hoppers, thosai [dosai], and iddli [idli in south India].”

Those who took part in the two-month study course were: Miss Ellen Jayawardene, Miss H.M. Lalitha Padmini, Mrs. J.M.K. Jayaratna, Mrs. K.G.S. Ariyaratna and Mrs. Soma Weerasuriya.

Five large photos show soyfoods being made in Indonesia on a cottage level. The foods are tempeh, tofu, yuba, and soya sauce; one photo shows a shop that makes both tofu and tempeh. At least one person appears in each photo.

6489. Knoblauch, Mark. 1984. Restaurants: Kotobuki’s creative Japanese dishes as pretty as a picture. *Chicago Tribune*. March 4. p. K10.

• **Summary:** This is a review of the Japanese three-star restaurant in Chicago. The restaurant features sushi and sashimi. “*Inari sushi* (\$5.25 for 7 pieces), popular in Japan, doesn’t show up often on this side of the Pacific. This type wraps sushi’s mounds of vinegared rice in pockets of deep-fried bean curd.” It never contains any fish, so some like to

order it with raw tuna as a side dish. An unusual version of teriyaki is pork *miso-zukeyaki*, which is pork marinated in miso, then cooked teriyaki style.

6490. Jenkins, Nancy. 1984. From Vietnam, subtle mix of flavors. *New York Times*. March 21. p. C1.

• **Summary:** Estimates of the Vietnamese population of New York City range from 10,000 to 20,000; all agree that the number is growing. In the last few years at least six Vietnamese restaurants have opened in Lower Manhattan.

Nuoc mam is the fundamental ingredient in Vietnamese cuisine; it is used as a seasoning in almost every dish, taking the place of salt and soy sauce. The best quality nuoc mam comes from Phu Quoc, an island off the south coast of Vietnam.

Another important seasoning is tuong, a sweet bean sauce [made from soybeans]; it can be purchased at a number of grocery shops in Chinatown, such as Hoa Than (218 Canal St.) and Thuan-Nguyen (82 Mulberry St.). When Vietnamese from all over New York City do their weekly shopping on Sunday morning, one of the foods they buy is “soft little cakes of sticky rice with sweet yellow bean paste inside.”

A recipe for Ba-Nam’s nem nuong with Nuoc leo sauce calls for “2 tablespoons tuong” as an ingredient.

Chef Huy’s chicken with lemon grass calls for “1 tablespoon nuoc mam” and “1 tablespoon thick soy sauce” as ingredients.

6491. Hattori, Terumitsu. 1984. Kikkoman second generation sauce products and powdered soy sauce (Interview). Conducted by William Shurtleff of Soyfoods Center, March 27. 2 p. transcript.

• **Summary:** Of Kikkoman’s second generation soy sauce products, teriyaki sauce is by far the best seller. It has been made at Walworth, Wisconsin, from the outset. Other products that sell about 50,000 cases/year of each (quite small) are Kikkoman Sukiyaki Sauce, Tempura Sauce, Menmi Sauce (for noodles), Steak Sauce, and Tonkatsu Sauce (for breaded pork cutlets or other deep-fried foods; it is sold only at Japanese food stores, not at supermarkets). Sweet & Sour (a paste) has small sales. All these products except Steak Sauce and Sweet & Sour were on the market in America in 1976 (when the Walworth plant opened), but at that time most are made in Japan. Now all are made in America. Tempura and Menmi started being made in America in about 1978. Sukiyaki started in America in about 1981. Teriyaki was first launched in Japan about 20 years ago (i.e. 1964).

Kikkoman now makes about 20,000,000 liters/year of shoyu and sauces at Walworth, but 20% of this figure is Teriyaki Sauce, which contains a little more than 50% shoyu.

Concerning powdered soy sauce: This started to be made in Japan about 20 years ago for use in Ramen sold in a bag. Initially it was mainly HVP but the flavor was poor. Lots of

flavor (i.e. ethanol) is lost when shoyu is dried; only 0.3% ethanol is left. Gradually the flavor of powdered shoyu has improved with improvements in the spray drying process and by using a dextrin carrier, which improves flavor. A special type of dextrin is added to the liquid product before spray drying. The new product was first used in Instant Ramen, sold in a separate pack of soup base with other seasonings and spices. Nowadays the product is selling well, but it is still a very small as a percentage of the total, probably less than 0.5% on a solids basis in Japan, and even less in the USA. Total annual production of powdered soy sauce in Japan is 2,000 to 2,500 tonnes and Kikkoman makes about 30% of this. By comparison, 360,000 tonnes of total soy sauce solids are made in Japan each year.

In Japan, the big 3 shoyu makers focus on the consumer retail market. The smaller manufacturers give more attention to industrial food processors. *Shokuryo Shinbun* is a good source of information on this. Address: Kikkoman Marketing & Planning Inc., 50 California St., Suite 3600, San Francisco, CA 94111.

6492. Caty, Thérèse. 1984. Dossier: Le soja [Dossier on soyfoods in France]. *France Dietétique*. Feb/March. p. 24-31. [Fre]

• **Summary:** This extremely interesting article gives an introduction to the various soyfoods, then list all known soyfoods products sold in France, complete with the brand, product name, ingredients, nutritional composition, weight or volume, and packaging. The last half of the paper is a French translation of a paper titled "The American boom in traditional soy products," presented by Richard Leviton on 11 Oct. 1983 at a conference in Parma, Italy.

The following products, manufacturers/marketers (and brands) are listed: 1. Whole soybeans and flour: Lima (Organic soybeans, organic whole soy flour). 2. Textured soya: Charusse, Soyavit. 3. Convenience prepared foods for vegetarians: Pural (Frika Vita, Sojafleisch, Pasta Chuta, Sojavite, Soja Mignon, Sojanelles, Sojanelles épicées), Hera (Croq Meal, Herameal, Végémeal, Potage), Fritini (Aux herbes). 4. Liquid soymilk: Celnat (Soyo), Lima, Pural (Sojlactis), Sapov (Sojal), Provamel (Soya Drink, Soya dessert choco [a pudding, made by Alpro in Belgium]), Naturvit (Soyalet, Soyalet sans sucre). 5. Tofu: Le Bol en Bois (Koya-dofu), Soy (Tofu, Croque Tofu [6 types]). 6. Tempeh: Traditions du Grain. 7. Miso: Celnat (Brown rice miso imported from Japan, Barley miso), Lima (Hatcho miso, barley miso). 8. Soy sauce: Celnat (Shoyou), Lima (Tamari, Tamari Shoyu). Address: France.

6493. Fieldman, Anita. 1984. Spotlight on Westbrae Natural Foods. *Whole Foods*. March. p. 22.

• **Summary:** The company was started in 1970 by Gordon Bennett, Kristin Brun, and a few friends making and distributing granola and fruit juice for San Francisco Bay

Area stores. Today Westbrae is a \$7 million corporation with a line of 150 products in a 50,000 square foot facility in Emeryville, California. Most of the Westbrae labels are designed by San Francisco artist David Gauger. The company deals with about 50 distributors and 1-2 brokers. They do not sell directly to retailers. A photo shows Gordon Bennett.

6494. Hong, E.H.; Kim, S.D.; Hwang, Y.H. 1984. Production and use and research on soybeans in Korea. *Tropical Agriculture Research Series* No. 17. p. 81-93. March. International Symposium on Soybean in the Tropics and Subtropics.

• **Summary:** Abstract. Trends in soybean production: importance of soybeans, area planted, yield, production and import, regional distribution. Trends in supply and consumption: demand and supply, utilization. Methods of cultivation currently applied: cultural practices (planting time, land preparation and planting, fertilizer application, management, harvesting and processing, marketing and procurement, cropping patterns, competitive power), varieties and their distribution, major diseases and pests, problems in farm cultivation. Soybean research and extension service. Government participation in and support for soybean production. Future prospects of soybean production and main constraints. Discussion.

In Korea, soybeans rank third among all food grain crops, in both the area planted and in production, after rice and barley. Soybean "products such as soy paste [doenjang], soy sauce [kanjang], beancurd [tofu] and bean sprouts are the primary side dishes in conventional daily Korean meals." The area planted to soybeans has steadily decreased from about 300,000 acres average in 1967-1971 to only 183,000 acres in 1982.

Tables: (1) Area planted and production of major food crops in Korea. (2) Production, yield and import of soybeans by year in Korea. (3) Regional distribution of soybean production in Korea. (4) Demand and supply of soybeans in Korea. (5) Utilization of soybean in Korea. (6) Regional distribution of soybean planting times in Korea. (7) Results of sample investigation for the application of herbicides on soybean in Korea. (8) change of cropping systems in the central part of Korea. (9) Farm income derived from major summer crops in Korea. (10) Characteristics of main soybean varieties currently recommended and their geographical distribution in Korea. (11) Research institutions, location and number researchers related to soybeans in Korea. (12) Amounts, area planted, and production for every class of soybean seeds in Korea in 1982. (11) research institutions, location and number of researchers related to soybeans in Korea. (12) Amounts, area planted, and production for every class of soybean seeds in Korea in 1982. (13) The amount and purchasing prices of soybean by the government and the prices of imported soybeans by year in Korea. Figures: (1)

Marketing channels for soybean in Korea. (2) Flow chart of soybean research and extension services in Korea. Address: Crop Exp. Station, Office of Rural Development, Suwon 170, South Korea.

6495. Konno, S. 1984. Soybean production in Japan. *Tropical Agriculture Research Series* No. 17. p. 95-102. March. International Symposium on Soybean in the Tropics and Subtropics.

• **Summary:** Abstract. Trend in soybean production. Trends in supply and consumption of soybeans. Methods of cultivation currently applied in Japan. Soybean research and extension. Government participation in and support of soybean production. Future prospects of soybean production and main constraints. Discussion. Tables: (1) Production and trade of soybeans in Japan. (2) Soybean consumption in Japan. (3) Varieties registered during the last decade. Figures: (1) Soybean production by region in Japan (1983). (2) Planting and harvesting time of soybean in Japan. 6496. Mogi, Ken. 1984. The history of shoyu (soy sauce) brewing in the United States. The story of the Oriental Show-You Company. San Francisco, California: Kikkoman. 3 p. March. Unpublished manuscript. Combined with a subsequent interview of Ken Mogi by W. Shurtleff on 20 April 1984.

• **Summary:** “Early in this century, Mr. Shinzaburo Mogi, one of the Mogi family’s ancestors, tried to make shoyu in America. Mr. Mogi was born in 1872 and later came to America in about 1892. He studied at college in Maryland but had an eye problem so he gave up studying and returned to Japan. In 1904, the year his daughter Katsuko was born, he was in Toronto selling Japanese bicycles, involved in a trading business unconnected to Kikkoman. According to the memory of Mr. Tsuneo Tanba, who worked with Mr. Mogi very closely (and later told his story to Morio Ichiyama, Kikkoman historian), Mr. Mogi managed a shoyu plant in Denver, Colorado, in 1907; it was not successful. Later, he had some contact with a shoyu project in Toronto, Ontario, Canada. Though I traveled to Denver, I could not get any information on this.”

Note: On 7 Feb. 2005 Ken Mogi wrote William Shurtleff at Soyfoods Center (in response to some questions about the existence of the Denver soy sauce plant): “I talked with Komiya. Mr. Shinzaburo Mogi had the New Testament reading meeting with 5-6 people during lunch break when Mr. S. Mogi was living in Noda [Japan] during World War II. Mr. Komiya told me that he remembered that Mr. S. Mogi mentioned the Denver story.” However Ken Mogi does not know (1) if S. Mogi ever wrote anything about a soy

sauce plant in Denver, (2) when and where S. Mogi told this story to Mr. Tanba, and (3) when and where Mr. Tanba told Mr. Ichiyama about S. Mogi’s supposed soy sauce plant in Denver. Ken Mogi encloses a photo of Mr. Shinzaburo Mogi at about age 30.

Mr. Mogi’s daughter, Mrs. Katsuko Yoshida, who is living in Tokyo, does not remember anything about Denver or her father starting a soy sauce plant in Denver. However she did tell me the story about “Oriental Shoyu” in Indiana.

Katsuko lived in Chicago with her parents in the 1920’s (maybe 1920-1926). Mr. Mogi worked for Yamato Shokai, selling Japanese silks. They found the product “Oriental Shoyu” in the market and were very much impressed. They visited the plant in Indiana and later Mr. Mogi became a stockholder in that company.

Mr. Esta Keirn started employment with the Oriental Show-You Co. on 28 Oct. 1932 as a [mung] bean sprout washer. He continued until 1 Nov. 1961, when the company was sold to Beatrice Foods Inc. and turned over to La Choy Food Products. Mr. Keirn worked for La Choy for 8 years. He never met Mr. Mogi but he heard several things about him from Mr. Ohki.

Shinzo Ohki, the founder of the company and one of 8 children, was born in 1884 in Kamakura, Japan. He immigrated to the USA in 1901, landing in Seattle, Washington. Eventually he ended up in Columbia City, Indiana, where he graduated from high school. He then graduated from college in New York City. Upon graduation he started in business as a tea merchant in Detroit. To expand his line, he imported soy sauce in small wooden kegs from Japan. This he bottled and sold along with his tea. He could not expand his tea business but the soy sauce business kept growing.

Wishing to expand by adding other products to his line, he returned to Columbia City, took in a partner to gain capital, and set up in a vacant canning plant (Vance Canning Co.). This is when he incorporated and took the name of Oriental Show-You Company, Inc. Then, in 1917, Mr. Ohki went to Japan to obtain the formula (and also a wife) and some instruction in making soy sauce so he could manufacture his own. Upon coming back to Columbia City, Indiana, he enlisted the help of someone from the USDA to work out the koji culture. Fermentation was set up in large wooden beer vats. Equal parts soybeans, wheat, and salt were aged for 24 months, then pressed and bottled. According to Mr. Keirn, the company produced as much as 30,000 gallons of shoyu in one year. The plant in Columbia City was vacant for some time and now most of it has been torn down, but the adjacent adobe and brick buildings are still standing.

Note 1. Much of this story was published in the Japanese-language newspaper *Rocky Mountain Jiho* (Denver, Colorado), 25 Jan. 1984. p. 4.

Kenzaburo’s great grandfather was the first president of Noda Shoyu K.K. (today’s Kikkoman). Shinzaburo Mogi

was the latter's brother.

Note 2. The story was also written by Marilee Kreps in about 1984 under the title "Shoyu pride: Columbia City's soy sauce factory one of many in the United States." The name of the newspaper, which was published in Columbia City, Indiana, is now known—nor is the date or page. It states: "Until 1962 the company, located on Factory Avenue, was a thriving business in this town, and contrary to what some believe, it was [named] the 'Shoyu Company,' not the 'Show-You Company.'" The Oriental Shoyu Company was established in 1917 by Shinzo Ohki in Columbia City. The factory was closed in 1961.

Note 3. On 7 Feb. 2005 Kenzaburo Mogi IV of Kikkoman, Japan, sent William Shurtleff a hand-drawn map showing the location of the four buildings that were part of the Oriental Show-You Company in Columbia City, Indiana. They were located between the railroad track and Factory Avenue, near Line street. These photos show: (1) The office building. (2) The printing and boiler shop building. (3) The remains of the soy sauce plant, with hand-drawn arrows pointing the areas on the cement floor used for the moromi tank, koji making, and pressing. (4) Close-up of the cement base of the moromi tank. (5) Close-up of the space on the cement floor, between the moromi tank and outside wall, where the heater was. (6) Close-up of the area used for pressing (*assaku*) the soy sauce from the moromi. (7) Mr. Esta Keirn standing in a grassy field in front of the chow mein building, which once shared a wall with the soy sauce plant. (8) Granite tombstone of the founder, Shinzo Ohki (1883-1967) and his wife, Taka (1889-1963). (9) Mr. Esta Keirn. Address: Kikkoman Marketing and Planning Inc., P.O. Box 784, San Francisco, California 94101.

(5) Flow sheet of soy milk preparation. (6) Manufacture of vegetable protein products. Address: National Food Research Inst., Yatabe, Tsukuba, Ibaraki 305, Japan.

6499. Somaatmadja, Sadikin. 1984. Development of soybean culture in Indonesia. *Tropical Agriculture Research Series* No. 17. p. 23-36. March. International Symposium on Soybean in the Tropics and Subtropics. [3 ref]

• **Summary:** Contents: Abstract. Area and production: Share in national food production, national soybean production, producing centers, soybean area. Supply and demand situation: Export and import, future demand and production, utilization. Methods of cultivation: Cropping system, cultivation, pests, diseases and other problems. Research and CRIFC: Research program and activities. Support for soybean production. Further prospects and main constraints. Discussion (questions and answers).

Utilization (p. 28): "1. Side-dish with rice: Tempe (fermented soybean cake), tahu (soybean cake), taucu (soybean paste), tauge (soybean sprout), kecap (soy sauce) and goreng kedelai (fried soybeans). Of these, tempe and tahu are very important in the diet of the people.

"2. Snacks: Roasted soybeans, kerupuk tahu (tahu chips), boiled young soybean pods" [edamame].

Tables: (1) Annual average soybean production during and before PELITA (Five-year development plan, 1964-1981). (2) Soybean production in the last six years, 1977-1982 (East Java, Yogyakarta, Lampung, Central Java, Nusa Tenggara Barat {NTB}, West Java). (3) Soybean production in six [major soybean producing] provinces, 1988-1981. (4) Soybean production in four additional centers, 1977-1981 (D.I. Aceh, N. Sulawesi, Bali, S. Sulawesi). (5) Soybean harvested area, yield and production in sawah (rice fields) and tegalan (dry land), 1979-1981. (6) Export and import of soybean, 1969-1982 (Indonesia was a small exporter until 1977 when exports stopped; imports over 100,000 tonnes began in 1976, and by 1982 had risen to 476,000 tonnes). (7) The estimated demand for soybean and production target, 1983-1988 (Source: Directorate General of Food Crops). (8) The important insects of soybean. (9) Improved soybean varieties. (10) Packages of technology in the intensification and areal [area] expansion programs.

Graphs: (1) Demand, production, and import of soybeans, 1978-1982. (2) Target of soybean area, 1983-1988

(tegalan field area is expected to rise rapidly; sawah field area will stabilize starting in 1985). A map of Indonesia (p. 31) shows seven research institutes under the Central Research Institute for Food Crops (CRIFC). They are located in Bogor, Sukamandi, and Lembang (W. Java), Sukarami (W. Sumatra), Banjarmasin (S. Kalimantan), Maros (S. Sulawesi), and Malang (E. Java). Address: Central Research Inst. of Food Crops, JL Merdeka 99, Bogor, Indonesia.

6500. Suzuki, Steven. 1984. Pacific Rim potential for edible soybeans. In: Ontario Soya-Bean Growers' Marketing Board. ed. 1984. Ontario Soybean Symposium. Chatham, Ontario, Canada: OSGMB. 319 p. See p. 224-41.

• **Summary:** Soybeans were first exported from Canada about 12 years ago when a Japanese house approached the Ontario Soybean Grower's Marketing Board for a trial shipment to Japan. The trial worked out very well and in a short time Ontario's soybean exports became a multi-million dollar business. Ontario soybeans are very clean, the quality is comparable to Japanese and Chinese soybeans, and the supply is consistent. However the price is high in relation to Chinese and U.S. soybeans. As a result, Ontario soybeans are sold in high-priced markets, as for making premium quality miso or soyamilk. The supply of Chinese soybeans is irregular. Address: Manager, Grain Trading Section, Okura & Co. America Ltd., New York, NY.

6501. Wang, Hwa L. 1984. Tofu and tempeh as potential protein sources in the Western diet. *J. of the American Oil Chemists' Society* 61(3):528-34. March. [22 ref]

• **Summary:** Contents: Abstract (uses the word "soybean foods" several times). Introduction. Traditional soybean foods. Trends in market growth for tofu and tempeh (based on statistics gathered by Shurtleff & Aoyagi of The Soyfoods Center in California, 1983). Tofu. Tempeh.

Traditional soybean foods can be classified as either nonfermented or fermented. Tables show: (1) Oriental nonfermented soybean foods (gives food name, local names, description, uses): Fresh green soybeans (local names: mao-tou, edamame). Soybean sprouts (huang-tou-ya, daizu no moyashi). Soybean milk (tou-chiang). Protein-lipid film (tou-fu-pi, yuba). Soybean curd (tofu, tou-fu, tubu, tahoo, touhu, tau-foo, dou-fu, dau-fu). Soybean flour (tou-fen, kinako) (Wang 1983).

(2) Oriental fermented soybean foods (gives food name, local names, microorganisms used, substrate, nature of product): Soy sauce (local names: chiang-yu, shoyu, toyo, kanjang, ketjap, see-ju). Miso (chiang, doenjang, soybean paste). Hamanatto [fermented black soybeans] (tou-shih, tao-si, tao-tjo [sic]). Sufu (fu-ru, fu-ju, tou-fu-ju, bean cake, Chinese cheese). Tempeh (tempeh kedelee). Natto.

(3) Tofu industry in the United States (No. of manufacturers and annual production in 1975, 1979, 1981, 1982, and 1983).

(4) Soybean solids and proteins in soybean soak water as affected by soaking conditions (temperature vs. time; Lowry protein / Lowry's protein). (5) Ratio of protein to oil content of tofu and soy milk as affected by protein content of soybeans (for different soybean varieties; the highest ratios come from the varieties Wase-Kogane, Vinton, Toyosuzu, and Coles).

Figures: (1) Flow diagram for the preparation of tofu. (2) Graph: In vitro digestibility of soybean milk as affected by the duration of boiling. Best digestibility is 12-14 minutes. (3) Four graphs: Relationship of concentration and type of coagulant to the yield of tofu. Coagulants are calcium sulfate, calcium chloride, magnesium sulfate, and magnesium chloride. The 4 graphs are: Gross weight of tofu. Moisture content. Total solids recovery. Nitrogen recovery. Calcium sulfate gives the highest values on all four graphs. (4) Four graphs: Relationship of concentration and type of coagulant to the texture characteristics of tofu. Same coagulants. The four graphs are: Hardness. Brittleness. Cohesiveness. Elasticity. (5) Flow diagram for tempeh fermentation. Address: NRRC, ARS, USDA, Peoria, Illinois 61604.

• **Summary:** Soybean exports from Ontario have expanded dramatically during the past 10 years; in 1982 they reached a high of 132,000 tonnes worth \$44 million. The East Asian market including Japan, Korea, Hong Kong, and Malaysia accounted for 81% of Ontario's export soybean sales in 1983, with an additional 8% going to Europe. The main buyers in 1982 were: Japan 47,414 tonnes, Netherlands 19,545 tonnes, Singapore 18,039 tonnes, Indonesia 16,652 tonnes, Hong Kong 15,234 tonnes.

Most of these soybeans are sold for human consumption. "For example, one of Sweden's foremost pharmaceutical manufacturers has in the past years been that country's largest single importer of Canadian soybeans. Taking about 3,000 tons annually, this company produced a patented intravenous nourishment called Intralipid." Tiny soybeans (5 mm diameter or less) are used to make bean sprouts and natto. For soybean exports, freight constitutes an average 21% of the net delivered cost to the buyer in his country. They are shipped in bagged or bulk (20 or 40 foot) containers. The main focus of breeding should be to develop varieties that do not carry a common bitterness or beany flavor. Address: Grain Manager, King Grain, Chatham, ONT, Canada.

6504. Wood, Brian J.B. 1984. Re: Bean Products Ltd. in Scotland. Letter to Richard Leviton at Soyfoods Magazine, Encinitas, California, April 9. 1 p. Typed, with signature on letterhead.

• **Summary:** “Bean Products Ltd. is now wholly owned by British Vinegars Ltd. [a division of Nestlé] and I have no part of it, I am sorry to say... We had one factory at 42 Telford Road, Lenziemill, Cumbernauld. The telephone number is Cumbernauld 0236 738310. Mr. Christopher Corden will be able to tell you if a visit can be arranged. A company called Soyco, based somewhere in London, is also making soy sauce. The authentic and original Worcester Sauce is made by Lea and Perrins Ltd. in Worcester; they belong to the Imperial Tobacco Co. via H.P. Sauce Ltd.” Address: Reader in Applied Microbiology, Dep. of Bioscience and Biotechnology, Applied Microbiology Div., Univ. of Strathclyde, Royal College Building, 204 George St., Glasgow G1 1XW, Scotland. Phone: 041-552 4400.

6505. Hesseltine, C.W. 1984. Re: NRRL history and culture collection. Dr. Church, Dr. Raper, and Dr. Thom. Letter to William Shurtleff at Soyfoods Center, April 10. 1 p. Typed, with signature on letterhead.

• **Summary:** “In 1984 the NRRL culture collection contained 77,000 strains of molds, yeasts, and bacteria. It was staffed by 6 full-time curators,” of which two maintained the mold collection.

According to Dr. Raper, Dr. Church left USDA and went to a small college in Urbana, Ohio. Dr. Raper also provided a number of accounts about Dr. Thom.

“You might be interested to know that we have Dr. Thom’s original notebooks and his entries of the *Aspergilli* and *Penicillia*. I also rescued a drawerfull of correspondence on soy food going back into the 20’s and perhaps earlier about miso, shoyu, and other soy foods. For instance, there is one folder with nothing but Japanese and Chinese labels of soy foods.” Address: Chief, Fermentation Lab., USDA/NRRC, Peoria, Illinois.

6506. Leviton, Richard. 1984. Re: Decision not to continue as a partner with Doug Fiske in Soyfoods magazine. Letter to Doug Fiske in Encinitas, California, April 13. 2 p. Typed, without signature (carbon copy).

• **Summary:** Leviton has lost interest in the magazine but is still interested in a book he is writing on soy sauce (with William Shurtleff and Mark Fruin), new writing assignments for *East West*, and a consulting-writing project with Soyfoods Unlimited—all of which provide solid income. He apologizes to Fiske for leaving him stranded and offers to give Fiske the magazine if Fiske will assume all past debts. Paul Obis of *Vegetarian Times* has expressed interest in buying the magazine if Fiske wants to sell it. Last fall Leviton took his second trip to England and is thinking of

returning to England to write about King Arthur.

6507. Fruin, W. Mark. 1984. Recent developments at Kikkoman (Interview). Conducted by William Shurtleff of Soyfoods Center, April 20. 1 p. transcript.

• **Summary:** Up until 1982, sales of Kikkoman shoyu in the USA had been growing at the rate of 10-15% a year. That year it slowed to only 2-3% a year due to two factors: A downturn in the economy and concern over sodium consumption. So the company began to import, then to make their mild (reduced salt) soy sauce, but they have not been promoting it much. Address: Palo Alto, California.

6508. Cusumano, Camille. 1984. Tofu, tempeh, & other soy delights: Enjoying traditional Oriental soyfoods in American-style cuisine. Emmaus, Pennsylvania: Rodale Press. x + 261 p. Illust. Index. April. 23 x 20 cm.

• **Summary:** Each chapter on a specific food describes (with illustrations and nutritional information) how to prepare that food at home, followed by many recipes. Contents: 1. The coming age of soyfoods cuisine. 2. Tofu 3. Tempeh. 4. Soymilk. 5. Japanese soyfoods. 6. Whole dry soybeans. 7. Fresh green soybeans. 8. Soy sprouts. 9. Soy flour and soy grits. 10. Soy sauces. 11. The soyfoods pantry.

Scattered throughout the books are 1-page descriptions of various American soyfoods companies, each accompanied by a black-and-white photo. Photos show: Greg Weaver and two other workers at The Lotus Cafe, Rochester, New York (p. 83). Sharon Rose of Brightsong Light Foods, Petaluma, California (p. 142). Steve and Sara Yurman of The Soy Shop, Atlanta, Georgia (p. 169). A craftsman cutting tofu at Tomsun Foods, Greenfield, Massachusetts (p. 195). Toby Alves of Blair Island Natural Foods Restaurant, Eugene, Oregon. A worker making brown rice and tofu sandwiches at Wildwood Natural Foods, Fairfax, California (p. 235). The company is owned by Bill Bramblett, Paul Orbuch, and Frank Rosenmayer.

Note: As of Sept. 1989 some 25,688 copies of this book had been sold by Rodale Press. It was sold out and will not be reprinted. Address: Rodale Press, Emmaus, Pennsylvania.

6509. Jacobs, Susan. 1984. The Cultured Club. Fantastic fermented foods. *Vegetarian Times*. April. p. 44-45, 47-48.

• **Summary:** Includes a brief introduction to tempeh, fermented tofu, miso, natto, and tamari soy sauce.

6510. Rosoff, Peggy. 1984. Tamari and shoyu: Twin foods with a single heritage. *MacroMUSE*. Spring. p. 8-9. [4 ref] Address: Rockville, Maryland.

6511. Shurtleff, William; Aoyagi, Akiko. 1984. Soyfoods industry and market: Directory and databook 1984. 4th ed. Lafayette, California: Soyfoods Center. 203 p. April. 28 cm. [325 ref]

• **Summary:** Traditional soyfoods, which include tofu, tempeh, soymilk, miso, soy sprouts, soynuts and soy sauce accounted for \$465 million in annual domestic retail sales. High-tech, modern soy protein foods, which include soy flour and grits, soy protein isolates and concentrates, extrusion textured soy flour and meat analogs, totaled \$501 million. When the two sectors are tallied together, Americans spent \$966 million in 1984 for soyfoods... not including soy oil or exported products. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6512. **Product Name:** [Marinated Tofu: Pressed soy protein in a seasoned marinade].

Foreign Name: Tofu Mariniert (gepresstes Sojaeiweiss in pikanter Marinade).

Manufacturer's Name: Sojarei Ebner-Prosl.

Manufacturer's Address: Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.

Date of Introduction: 1984. April.

Ingredients: Soybeans (from controlled cultivation), water, tamari (natural soy sauce), herbs, spices.

How Stored: Refrigerated.

New Product–Documentation: Brochure sent by Sojarei Ebner-Prosl. 1989. Oct. 12. "Fresh products." Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 1.75 by 3.75 inches. For frying, baking, or grilling in soups, sauces or sandwiches. Made purely from plants (rein pflanzlich), of high quality. Without chemical preservatives, artificial colorings or flavorings. Logo is a green soybean plant against a white circular background. The term "aus kontrolliertem Anbau" (from controlled cultivation) refers to a loosely defined type of organically grown crop.

In the company's Jan. 1989 catalog this product is called Tofu Mariniert, is precooked, and sells retail in 150 gm, or 1,000 gm, weights. Each piece weighs about 80 gm. It is also sold to food processors in 1 kg, 30 kg, 60 kg, 100 kg, and 200 kg weights.

6513. Fruin, W. Mark. 1984. History of Higeta Shoyu Co. 4060 Amaranta Dr., Palo Alto, CA 94306. 4 p. May 15. Unpublished manuscript.

• **Summary:** Higeta shoyu is one of the oldest brands of soy sauce in Eastern Japan, tracing its history back to the Hamaguchi brothers who migrated at the beginning of the 17th century from Hiromura in Wakayama prefecture (across the river from Yuasa, the birthplace of shoyu in Japan) to Choshi on the eastern tip of the Miura Peninsula, which curves around the top of Tokyo Bay. The Black Current, which runs northward from Wakayama to Choshi, carried the Hamaguchi brothers' ships. They had the foresight to transport shoyu from its place of origin in western Japan to the newly opened vistas in the 17th century of Tokyo and the Kanto plain hinterland.

Around 1615 the elder of the two Hamaguchi brothers established Hiroya, a food distribution company in Tokyo (then Edo), while the younger brother ventured into the manufacture of Yamasa shoyu. For the next several centuries, Yamasa was noted as a good but local shoyu, indistinguishable from other local brands except for the access to the Tokyo market, which it enjoyed through Hiroya.

In 1914 the elder Hamaguchi joined with two other Choshi families, Tanaka Genba and Fukui Kichibei, to form the Higeta Shoyu Co. Ltd. Each family continued to produce their own brands of shoyu but around 1925 Higeta, which had been Tanaka Genba's brand, became the sole company brand. An ambitious plan of expansion of expansion was drafted to leapfrog Higeta over Yamasa its local rival. But Higeta became overextended and in 1937 Kikkoman stepped in and purchased 80% of Higeta's outstanding shares.

As Higeta was brought into the fold of Kikkoman companies, the involvement of the original investors changed. Tanaka Genba gradually withdrew. The Fukui family remained active in the company until the 1970s, but then they too withdrew. Only the elder branch of the Hamaguchi has stayed with the firm throughout the postwar era, and they now constitute the firm's top management and own some 30 percent of the company stock; the Mogi-Takanashi families from Kikkoman control another 20 percent (Kikkoman had to divest itself of Higeta during the economic deconcentration programs of the Allied Occupation of Japan); the wider Hamaguchi family claims another 20 percent, with the remaining shares widely scattered.

Higeta differs noticeably from the other major shoyu companies in Japan. Most importantly, since 1966 it has relied entirely on Kikkoman for its marketing, concentrating its energies instead on manufacturing. This has saved Higeta the expense of trying to establish its name as a national brand. It spends less than 3 percent of its sales on advertising, and most of this is directed toward institutional sales, where Higeta is strong. It dominates the market for shoyu in noodle shops in Tokyo, for example, claiming 80 percent of soba and udon shops. Overall, about 65 percent of sales go to such institutional customers and 35 percent of the home market.

Because Higeta has relied on Kikkoman for its marketing since 1966, most of its line of minor products, like miso and sauce, have nearly disappeared through the lack of an independent marketing effort. In fact, 90 percent of its sales come from the sale of shoyu, and 90 percent of the shoyu it makes is koi-kuchi [koikuchi] or Eastern style shoyu. In short, Higeta is a single-product company.

But the single-mindedness of Higeta is its strength. It leads Japan in shoyu production know-how. Higeta, for example, in cooperation with Hitachi Ltd. was the first maker to automate the koji culturing step of production, reducing

the labor force required for this stage from 250 to 30 people. Indeed, Higeta, because of these strengths, is the third largest maker in Japan with 7 percent of the total production, even though the Higeta brand is only the fourth largest selling shoyu in Japan. This difference is explained by the fact that Higeta's production excellence is so well established than many firms buy filtered but unrefined shoyu from Higeta to brand as their own product.

Higeta's manufacturing superiority comes from the concentration of all of its production and brewing know-how in just one plant in Choshi since 1973. The highly efficient design of this factory means that Higeta has the lowest operation costs of any company in the industry and even Kikkoman is not above buying shoyu from Higeta to sell as its own. Nevertheless, the lack of marketing muscle means that most Japanese only sample Higeta in their favorite noodle shops.

Higeta is known among afficiandos for its quality. This is derived from a combination of color, aroma, and taste which is unique among large mass producers of shoyu. Address: Palo Alto, California. Phone: 415-858-2226 or 327-0857.

6514. **Product Name:** [Smoked Tofu].

Foreign Name: Tofu–Geraeuchert.

Manufacturer's Name: Albert Hess Tofuhaus Rittersheim.

Manufacturer's Address: Hauptstrasse, D-6719 Rittersheim, West Germany. Phone: 06351-43718.

Date of Introduction: 1984. May.

Ingredients: Tofu, soy sauce, sea salt.

Wt/Vol., Packaging, Price: 250 gm vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Form filled out by Albert Hess. 1988. Jan. 25. Production began June 1983. He makes 1,000 kg/month of the smoked tofu. Leaflet. 1988. "Tofu is marinated for about 8 hours in soy sauce ("Shoyusauce") and then cold smoked for 12 hours. For smoking, we use only natural beech wood and herbs." Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in May 1984. Label. 1988, received. 2.5 by 3.5 inches. Self adhesive. Black on green.

Label brought by Albert Hess of Albert's Tofuhaus. 1995. March 11. 2.5 by 4 inches. White and black on green. An illustration shows a large personified cake of tofu, with smiling face and arms held out.

6515. *Campus News (National University of Singapore)*. 1984. Soy sauce success on campus. No. 27. p. 1. May.

• **Summary:** Dr. Yong Fook Min of the National University of Singapore Department of Biochemistry has developed a new process for making high-quality soy sauce in only 9 days—rather than the typical 90 days. It will soon be tested on a pilot plant production scale.

6516. Fruin, W. Mark. 1984. History of Yamasa Shoyu Co. 4060 Amaranta Dr., Palo Alto, CA 94306. 4 p. Unpublished manuscript.

• **Summary:** Yamasa is the second largest shoyu producer in Japan [after Kikkoman] and one of the oldest in Eastern Japan, having been established in 1645 [sic]. It is located in Choshi, the fishing village at the eastern tip of the Miura Peninsula, where Higeta Shoyu is likewise headquartered.

Note: The Hamaguchi family, originally from Kishu (today's Wakayama prefecture), started making Yamasa brand shoyu in Choshi in 1845. But not until 1928 was a company established or incorporated as Yamasa Shoyu Inc. (Source: *Shashi: Choshi Shoyu* (1972)).

Along with Higeta and Kikkoman (located in the city of Noda), Yamasa is one of the big three producers of shoyu in Chiba prefecture in Eastern Japan. Indeed, Higeta and Yamasa were founded by brothers who migrated to Choshi from Hiromura in Wakayama prefecture. One brother, the elder Hamaguchi, went into the food distribution business in Tokyo, opening an enterprise which continues today under the name of Hiroya. The younger brother began to make shoyu—among other endeavors; and that was the start of Yamasa Shoyu.

Yamasa's leadership in the shoyu industry was established early. In 1895, it founded a research laboratory for the study of mechanical and chemical improvements to the process of shoyu fermentation. This may have been the first industrial research laboratory in Japan. At the turn of the 20th century, Gihei Hamaguchi, then the eldest son of the principal owner of Yamasa and himself president of the company at a later time, traveled to England to study chemistry and fermentation technology. Address: Palo Alto, California. Phone: 415-858-2226 or 327-0857.

6517. Fruin, W. Mark. 1984. History of Marukin Shoyu Company. 4060 Amaranta Dr., Palo Alto, CA 94306. 5 p. Unpublished manuscript.

• **Summary:** Marukin is the smallest of the Big-5 shoyu makers in Japan, with about 3-4% of the market. It is best known for its location on the island of Shodoshima, in the inland sea. In 1809 Takahashi Bunueemon was the first of many to make shoyu on Shodoshima, inaugurating a local industry that boasted 400 producers by 1878. In fact, Takanashi was not the first but only the first for whom records of his shoyu brewing activities survive.

Marukin was the first joint stock company in Japan established for the purpose of making shoyu. This occurred in 1907 when 165 investors put up 300,000 yen in assets. Most of these investors were shoyu makers themselves, so that Marukin has had a strong communal flavor from the start as the largest amalgamated shoyu maker on Shodoshima island.

Although located in Western Japan and not too far from

the Higashi Maru Shoyu Company, Marukin has always been a koi-kuchi [koikuchi] or dark-colored shoyu maker. The techniques of shoyu manufacture were learned, it is said, directly from Yuasa, the seaport in Wakayama prefecture which was the birthplace of shoyu. In all likelihood, the traffic in men and materials to and from Shodoshima during the late sixteenth century, when Osaka Castle was being built, provided the opportunity for learning shoyu manufacturing. By boat, Shodoshima is only a half-day's sail from Yuasa.

Once the techniques of shoyu production were established on Shodoshima, production and producers increased rapidly. From a relatively late start in the early nineteenth century, shoyu producers jumped to 400 in a hundred years and production climbed to rank Shodoshima as one of the major manufacturing sites in Japan. But with so many small makers in competition with one another, the industry was in disorder. Prices were not fixed, quality was poor, shipping schedules were not reliable, and branding was not dependable.

It was at this juncture that Marukin Shoyu was formed in 1907. With the establishment of a joint stock company, a rationalization and regularization of shoyu manufacturing could occur.

In 1905, a shoyu research laboratory was founded by Kinoshita Chujiro who would become President of the Marukin Shoyu Company when it was established two years later. Kagawa prefecture likewise opened a shoyu research facility in 1910.

In 1916, the two research institutes merged, thereby raising the quality of information concerning shoyu manufacturing to all interested parties. By 1930, Marukin Shoyu was being sold in Tokyo and Eastern Japan heralding its transformation from a local to a national manufacturer. In 1934 and again in 1962, three and then four smaller makers were bought up by Marukin Shoyu which aimed to consolidate its position as the fifth largest shoyu maker in Japan both by internal expansion as well as by the acquisition of other shoyu plants.

Even today, some 80 percent of Marukin Shoyu is carried to market by ship. The company owns and leases a fleet of 11-ton freighters which ply the Inland Sea and the coastal waters of Japan. Address: Palo Alto, California. Phone: 415-858-2226 or 327-0857.

6518. Fruin, W. Mark. 1984. History of Higashimaru Shoyu. 4060 Amaranta Dr., Palo Alto, CA 94306. 5 p. Unpublished manuscript.

• **Summary:** Higashimaru is known in Japan as the major manufacturer of usukuchi or light-colored shoyu, which is also saltier than regular (koikuchi or dark-colored) shoyu. Light-colored shoyu is associated with Western Japan where it is widely used in the cuisine of Osaka and Kyoto, to season the popular white fish and fresh vegetables. As of 1984 some

80% of light-colored shoyu is sold in Western Japan, yet light-colored shoyu accounts for only about 13% of total shoyu sales in Japan.

Higashimaru is located in Tatsuno City, a castle town situated astride the Ibo River in Hyogo prefecture. Because of the favorable inland climate found near Tatsuno and because of the purity of the Ibo River waters, Tatsuno has long been famous for the manufacture of sake as well as shoyu. Indeed sake seems to have been Tatsuno's principal product during the 16th and 17th centuries, but at Nada City near Kobe on the Inland Sea became the leading center for sake brewing, Tatsuno gradually came to specialize in shoyu production.

Shoyu was first made in Tatsuno in about 1567 and by the late 17th century there were more than 100 shoyu makers in the castle town. Many have disappeared. Three of the most successful from among so many at the start of the 20th century were the Asai, Kataoka, and Nakahara households.

These three families joined in 1942 in a partnership to make shoyu. In 1949 they consolidated their efforts behind one brand, Higashimaru, which was formerly the Asai family's brand. Before the Asai family had taken over Higashimaru Shoyu in the mid-1800s, this shoyu had been made by the Lord of Tatsuno, the Daimyo Wakizaka. He had been transferred to Tatsuno in 1672 and was the only aristocrat known to be the founder of a shoyu company in operation today.

Somewhat after the time when Lord Wakizaka established a shoyu plant in Tatsuno, another local entrepreneur—it is not known who—added a step to the shoyu manufacturing process in Tatsuno that remains today one of the most distinctive steps of Higashimaru Shoyu. Around 1809, a sweet sake called amazake, a nonalcoholic rice wine, began to be added to the fermented shoyu (*kiage shoyu*) just before it passed to the pressing and pasteurization stages of production. Address: Palo Alto, California.

6519. **Product Name:** Live Soy Sauce, Live Miso, Barley (Mugi) Miso, Hacho (Soybean) Miso, Chick Pea Miso, Pea Miso, Peanut Miso, White Miso.

Manufacturer's Name: Great Life Products.

Manufacturer's Address: P.O. Box 2546, Escondido, CA 92025.

Date of Introduction: 1984. May.

Ingredients: Chick peas, rice koji, natural sea salt, soybeans (optional).

Wt/Vol., Packaging, Price: 1 lb plastic bags.

How Stored: Refrigerated preferably.

New Product—Documentation: Great Life Products catalog. 1984. May. * Limited editions (aged six months and over): Chick Pea Miso (chick peas, rice koji), Pea Miso (split peas, barley koji), Peanut miso (whole peanuts, barley koji), white miso (small navy beans, rice koji). * These misos sell out fast—Quantities are limited.

Talk with Lino Stanchich. 2002. Sept. 11. See interview.

6520. Great Life Products. 1984. Great Life Products (Mail order catalog). P.O. Box 2546, Escondido, CA 92025. 4 p. 28 cm.

• **Summary:** Dark blue ink on light gray paper. Describes and gives weights and prices for the following products: Muramoto seasalt (from the unpolluted Pacific Ocean of Baja, California). Umeboshi. Umeboshi juice (umezu, ume-vinegar). Chiso condiment. Live soy sauce. Live miso. Barley (mugi) miso. Hacho (soybean) miso. * Limited editions (aged six months and over): Chick Pea Miso (chick peas, rice koji), Pea Miso (split peas, barley koji), Peanut miso (whole peanuts, barley koji), white miso (small navy beans, rice koji). * These misos sell out fast—Quantities are limited. Energy tea (Genkito). Address: P.O. Box 2546, Escondido, California 92025. Phone: (619) 743-6890.

6521. **Product Name:** Seitan Cutlets [Plain, or With Herbs], Seitan Wheat Balls.

Manufacturer's Name: Maritime Foods.

Manufacturer's Address: Portland, Maine.

Date of Introduction: 1984. May.

Ingredients: Wheat gluten.

Wt/Vol., Packaging, Price: Ziploc plastic bag.

How Stored: Refrigerated.

New Product–Documentation: Barbara and Leonard Jacobs. 1987. *Cooking with Seitan: Delicious Natural Foods from Whole Grains*. Current U.S. seitan manufacturers include Maritime Foods in Portland, Maine. Rosemary Whittaker is currently producing 50 pounds of seitan each week. Practically all of this seitan is sold in the Portland market. She also makes fresh soymilk. She uses local Maine kombu in the seitan and grinds the flour fresh for each batch. “Rosemary has been experimenting with various alternatives to chunk seitan. This company also supplies seitan ‘wheat balls’ and ‘prepared breaded-cutlets.’”

Talk with Rosemary Whittaker. 1991. Nov. 17. She and her husband Dwight started Maritime Foods in the spring of 1984. Their daughter, Emily, was born in November of that year. Their first product was soymilk. She learned how to make seitan at the Kushi Institute. They started making seitan (primarily in a cutlet form) shortly after the soymilk was launched, then they launched the balls or chunks, all during 1984 before Emily was born. The seitan was a great product. The best-selling product was the cutlets, made as follows: Cut off balls of raw wheat gluten. Use a rolling pin to quickly roll them out ¼ inch thick. Simmer these in either one of two broths: (1) the standard seitan broth containing water, tamari, kombu, and ginger; or (2) this broth plus garlic and herbs. The finished cutlets were packed in plastic Ziploc bags with a self-adhesive label. The company never made any breaded cutlets or deep-fried cutlets. They discontinued the business in about 1987, because they could

not find a refrigerated distributor for their soymilk, because Dwight (a food scientist) had a stroke and she had 2 babies.

6522. **Product Name:** Falafels (Spicy Mideastern Patties).

Manufacturer's Name: Soy City Foods.

Manufacturer's Address: 2847 Dundas St. West, Toronto, ONT, M6P 1Y6, Canada. Phone: 416-762-1257.

Date of Introduction: 1984. May.

Ingredients: Soy mash [okara], chick peas, millet, sesame seeds, tamari, soy oil, potato starch, spices, seasonings.

Wt/Vol., Packaging, Price: 350 gm box.

How Stored: Frozen.

Nutrition: Per 100 gm: Protein 7.6 gm, carbohydrates 18.4 gm, fat 15.1 gm, calories 240.

New Product–Documentation: Label. Received 1988, Aug. 8.5 by 4.5 by 2 inches. Printed on stiff paper box. Orange and black on yellow with color illustration of an oasis plus camels, tent, and palms. Text and recipes in English and French. “Ready for the oven. Heat and serve.” On side panel: “Health is the most precious thing you have. Sustain it by eating good food.” Recipe on back for Traditional Falafel Sandwich. Letter from Jon Cloud: Introduced in the spring of 1984. Later he said it started in 1983.

6523. Claiborne, Craig. 1984. Q&A. *New York Times*. June 6. p. C6.

• **Summary:** Q. A reader recently read a novel about Victorian England and a relish or condiment named “Windermere catchup” was mentioned. “Are you familiar with this?”

A. Yes. It was a type of mushroom ketchup made with or flavored with horseradish.

“The Malaysians claim the original [ketchup] was theirs and ketjap manis [sweet Indonesian soy sauce], used throughout Indonesia, is available in specialty food shops all over the world.” Today, the “most famous ketchup is, of course, tomato ketchup.” Address: Food editor, the Times.

6524. Shurtleff, William; Aoyagi, Akiko. 1984. History of soy sauce, shoyu, and tamari. Soyfoods Center, P.O. Box 234, Lafayette, CA 94549. 118 p. June 6. Unpublished typescript.

• **Summary:** A comprehensive history of the subject. Contents: What is soy sauce? Etymology. World overview. Part I: History of soy sauce in China and Taiwan. Early Chinese soy sauces (shih-you and jiangyou). The 1800's. 1900-1948. 1949-1980's (People's Republic of China). Taiwan. Hong Kong. Part II: History of soy sauce in Southeast Asia and Korea. Dissemination and common characteristics. Association of Southeast Asian Nations (ASEAN)—general. Philippines (1912-). Thailand (1974-). Malaysia (1970-). Singapore. Indonesia. Vietnam. Korea. Part III: History of shoyu in Japan. Hishio (jiang), tamari, and other forerunners of shoyu (700-1600). The development

of shoyu (1500-1700). Standardization of the shoyu formula (1716-1867). The rise of shoyu in Japan (1750-1867). Overview of origins. Shoyu during the Meiji period (1868-1911). Shoyu from 1912-1945. The postwar period and modern times (1945-1981). Part IV: History of soy sauce in Europe. Part V: History of soy sauce in Australasia and the Pacific. Part VI: History of soy sauce in the United States. Part VII: History of soy sauce in Latin America, Africa, the Indian Subcontinent, and the Middle East.

The period during World War I was one of consolidation for the shoyu industry. In 1914 three of the larger manufacturers at Choshi (Higeta, Jigamisa, and Kagidai) merged to become Choshi Shoyu Co. Ltd. In 1917 eight (later nine) major manufacturers in Noda, all related by descent or marriage, withdrew from the Noda cartel and joined to form a corporation, the Noda Shoyu Company, Ltd., which later became Kikkoman Inc. The company began operations on 1 January 1918, and quickly modernized its entire organization. In 1925 it restructured itself by amalgamating four related companies under the control of a holding company, thus greatly increasing its capital and scope. In 1918 Choshi Shoyu Co. changed from a limited partnership to a stock corporation and adopted a common trademark, Higeta. The Hamaguchi family, originally from Kishu, which ran Yamasa in Choshi, chose not to join the Choshi Shoyu Co. Rather, in 1928 they incorporated as the Yamasa Shoyu Co., Inc. Address: Lafayette, California. Phone: 415-283-2991.

6525. Scottish Development Agency. 1984. Display ad: Scotland's answer to Japanese whiskey (Ad). *Economist* (London). June 9. p. 62. Issue 7345.

• **Summary:** "Tartan soy sauce. A natural product that tastes as good as the finest Japanese equivalent.

"But it takes four weeks to ferment instead of three years and is very competitively priced.

"It used to be the Scots who came up with the innovation, and the Japanese with the development.

"And the profit. (Look what they've done with our 2-stroke engine, let alone our television.)

"But we've been getting our act together. Invention and development and manufacture.

"Scotland's eight universities and 55 technical colleges now work so closely with industry that almost everything they innovate goes into production."

"Strathclyde University have 50% of the equity."

Across the top of the ad, above the title, we read: "The world's fastest fermenting soy sauce developed by Dr. Brian Wood at the Biosciences Department of Strathclyde University and first produced in 1982 by Bean Products Limited of Cumbernauld."

Note: The brand-name of the soy sauce was apparently not "Tartan soy sauce." Address: 17 Cockspur St., London, SW1Y 5BL. Phone: Freefone Scotland.

6526. **Product Name:** Vegetarian Paté (Made with Tempeh).

Manufacturer's Name: 21st Century Foods Inc.

Manufacturer's Address: 30A Germania St., Jamaica Plain, MA 02130. Phone: 617-522-7595.

Date of Introduction: 1984. June.

Ingredients: Organic soy tempeh, sesame tahini, carrots, parsley, onions, lemon juice, olive oil, garlic, tamari, sea salt.

Wt/Vol., Packaging, Price: 6 oz glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product-Documentation: Label. 1987, undated. 4 by 2 inches. Red and black on white. "Ready to eat. Gourmet. Organic." Posner. 1987. 21st Century Whole Foods Cook Book. Inside rear cover. Talk with Rudy Canale. 1988. Sept. 13. The invoice for printing the labels for this product is dated June 1984.

6527. **Product Name:** New York Soy Deli Tofu Spread.

Manufacturer's Name: Appropriate Foods, Inc.

Manufacturer's Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1984. June.

Ingredients: Organic tofu, onion, umeboshi [salt plum], tahini, tamari, herbs.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated.

New Product-Documentation: Label. 1984. New York Soy Deli Brand. 1.5 by 3 inches. Black on blue. Interview with Robert Werz. 1987. Sept. 9.

6528. Beuchat, Larry R. 1984. Fermented soybean foods. *Food Technology* 38(6):64-70. June. [31 ref]

• **Summary:** Discusses soy sauce, miso, and tempeh, and gives details of their fermentation processes. Address: Prof., Dep. of Food Science, Univ. of Georgia, Agric. Exp. Station, Experiment, GA 30212, USA.

6529. Dai, Yautian. 1984. [Study of iron fortification of Chinese soy sauce. I. A preliminary study of ferrous sulphate fortified Chinese soy sauce]. *Ying Yang Hsueh Pao (Acta Nutrimenta Sinica)* 6(2):149-53. June. [7 ref. Chi; eng]

• **Summary:** Soy sauce, which is a widely consumed condiment in China, could be an ideal vehicle for iron fortification. "Iron, as ferrous sulphate, added to Chinese soy sauce (Seagull brand, produced in Shanghai), in concentration up to 75-100mg/dl, had a good solubility throughout an observation period of 16 weeks. There were no significant changes in pH, iron content and no detectable changes in organoleptic characteristics." Address: Dep. of Nutrition and Food Hygiene, Faculty of Public Health, Beijing Medical College, Beijing, China; Food Detection Research Inst. of Commerce, Beijing, China.

6530. **Product Name:** Shoyu, and tamari.

Manufacturer's Name: Soy Source (Distributor). Made in America.

Manufacturer's Address: P.O. Box 334, Franklin Square, Long Island, NY 11010.

Date of Introduction: 1984. June.

New Product–Documentation: Labels. 1984. June 15. 3.5 by 8 inches. Shoyu is red and black on yellow. Tamari is red and black on grey. “The finest American made soy sauce.” At top of label in Japanese characters: “Daizu no moto.” Spot in Cook’s magazine. 1985. July/Aug. Soya Bluebook. 1986. p. 105. “The Soy Source Soy Sauce.” Gives address as 137 New Hyde Park Rd., Franklin Square, New York.

6531. **Product Name:** BBQ Tofu.

Manufacturer's Name: Swan Gardens.

Manufacturer's Address: Miami, Florida 33127.

Date of Introduction: 1984. June.

Ingredients: Tofu, tomato sauce, honey, onion, mustard, nutritional yeast, molasses, soy oil, soy sauce, herbs and spices.

Wt/Vol., Packaging, Price: 10 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1983. 3 by 4 inches. Self adhesive. Red, black, and white on silver. Swan surrounded by flowers and lotus illustration. “No preservatives.” Appropriate Foods Catalog. 1984. Summer.

6532. **Product Name:** Yeasted Baked Tofu.

Manufacturer's Name: Swan Gardens.

Manufacturer's Address: Miami, Florida.

Date of Introduction: 1984. June.

Ingredients: Tofu, nutritional yeast, soy sauce, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1984. 2.5 by 3.75 inches. Self adhesive. Red, green, black, and white on tan. Swan surrounded by flowers and lotus illustration. “No preservatives.” Address on label: Swan Gardens, Inc., Decatur, Georgia 30030. Appropriate Foods Catalog. 1984. Summer.

6533. Watanabe, Tokuji; Kishi, Asako. 1984. The book of soybeans: Nature’s miracle protein. New York, NY: Japan Publications. 191 p. June. Illust. General index. Recipe index. 26 cm. [21 ref]

• **Summary:** Contents: Introduction. Part 1. General information: 1. Characteristic traits: Agronomic and other biological characteristics, physical properties, chemical properties, soybean protein, properties of soybeans as food material. 2. Current ways of using and processing soybeans: Throughout the world, traditional ways of using and processing, new soybean food products. 3. Tofu and other nonfermented soybean food products: Tofu, deep-fried

tofu, dried-frozen tofu, soy milk, yuba, roasted soy flour (kinako), soybean sprouts. 4. Miso and other fermented soybean products: Miso, natto, Hama-natto (tera-nattô), soy sauce, sufu, tempeh. 5. Other ways of eating soybeans—Simple traditional Japanese foods: Parched soybeans, boiled soybeans (*budo-mame*; *hitasahi mame*), beaten and mashed [or ground] soybeans (*go*, or (from edamamé) *zunda* or *jinda*), molded soybean mash (*jinta-dôfu*), molded mashed soybeans and rice flour (*shitogi*), soybean soybean-mash paste. 6. New soybean protein products.

Note 1. This is the earliest document seen (Nov. 2008) that mentions *zunda*. The text (p. 84) reads: “When fresh green soybeans (edamame) are used in cooking, they are boiled for from ten to twenty minutes; ground; and flavored with salt, sugar, and soy sauce. The resulting dish is called *zunda* or *jinda*.”

Note 2. *Zunda* is a healthy and tasty snack or treat made from mashed edamamé. It is sweet, rich in protein, high in fiber and emerald green. It is said to have originated hundreds of years ago in Japan in Miyagi prefecture. In and around Sendai (capital of Miyagi prefecture) one can find many shops and booths that sell *zunda* cakes, *zunda* mochi treats, and *zunda* shakes, all made from edamamé (green vegetable soybeans). One well-known company in Japan that markets delicious *zunda* products is Zunda Saryo.

Part 2. Cooking with soybean food products: Tofu, yaki-dofu, kori-dofu, nama-age, abura-age, gammodoki, yuba, natto, miso, soy milk, soybeans, bean sprouts. Afterword. Bibliography.

In the chapter on tofu, pages 43-44 discuss *okara* or *unohana* (the residue remaining after soy milk production); a photo shows it in a glass bowl. “Though it formerly appeared on many Japanese tables seasoned and cooked with vegetables, today it is most often fed to animals. As the number of animals raised in urban and suburban areas decreases, however, tofu manufacturers are finding it harder to dispose of residue.”

Page 99 notes of tofu: “At a certain temple in Kyoto is a plaque bearing the following inscription, which, while comparing this food to religious faith, clearly shows the esteem in which the Japanese people hold tofu. ‘Religious faith should be like tofu: it is good under any circumstances. It is good boiled, grilled, or fried. Raw, chilled, served with soy sauce and other seasonings, it is good with steamed rice. Simmered in hot water and flavored, it is good with sake. Because it is soft, old people and sick people welcome it, but children and young people like it too. Men like it, women like it; poor and rich both like it. Though common, it has elegance enough to find a place in the upper class.’

“It cuts clean and well for use in clear broths. It is good in the meatless diets of religious training. It can be crushed for use in miso soup. It is used all the time and in all seasons. It is inexpensive yet numbered among the delicious treats. It is welcomed everywhere, in mountains as well as in big

cities. It is well received at dinners for dignitaries and guests yet is convenient enough for college students who do their own cooking. Women especially should be like tofu. The mature and cultivated person should be tender, yet firm, like tofu. Though apparently tasteless, it is delicious. Though apparently ordinary, it is extraordinary.”

Other ways of eating soybeans (p. 83-84): (1) Parched—”Parched gently in unglazed ceramic dishes made for the purpose,” then tossed by people at Setsubun in February around their houses as they chant “Demon out! Good luck in!” Then they pick up the beans and eat them. Parched soybeans are included in some varieties of *mochi* (glutinous rice cake) and in *okoshi* a confection made of puffed rice bound together with sugar syrup. In the past they were eaten with salt, miso, or soy sauce.”

Note: In the USA, parched soybeans are called “dry roasted soynuts.”

Tables show: (1) World production of soybeans (1977-1982). (2) Price trends in dollars per ton for wheat, soybeans, and corn (1970-1981). (3) Soybean yields in the USA and Japan (1974-1981). (4) Chemical composition of soyfoods: Tofu, abura-agè, kôri-dôfu, yuba, kinako, soybean sprouts, nattô, miso (dark yellow), soy sauce (common), soybean (Japanese). (5) Statistics on production of modern soybean products in Japan (1975-1981). (6) Annual production and prices of modern soy protein products in the USA (May 1983).

Japan once produced a million tonnes (metric tons) of soybeans annually. This figure decreased dramatically during World War II. After the war, as soybean imports from the United States steadily increased, Japan’s domestic crop gradually fell to the level of no more than 100,000 tonnes. In 1977 it was 111,000 tonnes, yet by 1982 it had jumped to 226,000 tonnes as rice acreage was reduced.

All photos are black and white. Figures show: (2) Line drawing of soybean plant with flowers and leaves. (2) Cross section of soybean seed-coat and cotyledon. (3) Graph of protein solubility (NSI) of defatted soybean meal at different pH values. (4) Graph of protein solubility (NSI) of defatted soybean meal at different concentrations of calcium chloride. (5) Graph of relationship between time and temperature of soaking soybeans in water (colder water temperature requires longer soak time). (6) Flow sheet for making regular tofu. (7) Photo of regular (*momen*) “cotton tofu.” (8) Line drawing of grinder (horizontal type) used with soaked soybeans when making tofu. (9) Photo of continuous filter for soy-milk preparation. (10) Photo of small-scale soy-milk processing plant. (11) Line drawing of molding box [forming boxes with lids] for making regular tofu. (12) Photo of yaki-dofu [grilled tofu]. (13) Photo of okara in a glass cup. (14) Line drawing of molding box [forming box] for silken tofu. (15) Photo of silken tofu. (16) Flow sheet for packaged tofu production [GDL]. (17) Photo of packaged tofu in package. (18) Flow diagram of large-scale process for making tofu and abura-agè

with 26 pieces of equipment labeled. (20) Flow diagram of continuous process for making packaged tofu [GDL]. (21) Photo of 2 pieces of abura-agè. (22) Photo of deep fryer for making abura-agè. (23) Photo of nama-agè [deep fried tofu cutlet]. (24) Photo of two types of ganmodoki. (25) Line drawing for tofu kneader for ganmodoki production. (26) Photo of kôri-dofu [dried frozen tofu]. (27) Flow sheet for making dried-frozen tofu. (28) Flow diagram of process for making large-scale dried-frozen tofu. (29) Photo of aseptic carton and glass of soy milk. (30) Flow sheet for making aseptically packaged soy milk. (31) Photo of 5 different forms of dried yuba. (32) Photo of kinako in two clear glass bowls. (33) Photo of soybean sprouts in a woven bamboo basket. (34) Flow sheet for making miso. (35) Three different types and colors of miso on 3 bamboo rice paddles (*shamoji*). (36) Line drawing of cut-away view of traditional pressure cooker (*koshiki*) for rice cooking. (37) Diagram of continuous rice cooker with 7 parts labeled. (38) Line drawing of *Aspergillus oryzae* with conidia (spores), sterigmata, and mycelium labeled. (39) Photo of pieces of koji. (40) Diagram of modern fermentation room for making koji. (41) Cut-away view of miso fermenting in a wooden vat with stone weights above vinyl film on top. (42) Line drawing of a mashing machine for miso. (43) Photo of natto in rice straw wrapper and polystyrene tray. (44) Cross sectional view of pressure cooker for soybeans. (45) Line drawing of rotating mixer to combine cooked soybeans with pure-cultured *Bacillus natto*. (46) Photo of soy sauce table dispenser. (47) Flow sheet for making Japanese soy sauce (shoyu). (48) Transparent view of crusher (roller) for roasted wheat in making soy sauce. (49) Photo of modern stainless steel fermentation tanks / vats (indoors). (50) Photo of a jar and a cup of sufu [fermented tofu]. (51) Diagram showing relationships between modern soy protein foods.

Note: Surprisingly, edamamé, one of the most popular soyfoods in Japan, is mentioned only once, in passing (p. 84) in this book.

Photos on the rear cover show Tokuji Watanabe and Asako Kishi. A brief biography of each is given.

Tokuji Watanabe: Born in 1917 in Tokyo, he graduated from the Faculty of Agriculture of Tokyo University in 1941, with Doctor of Agriculture. In 1945 he entered the National Food Research Institute (NFRI), of which he became director in 1971. In 1977 he resigned that position and became a professor at the Kyoritsu Women’s University, where he now teaches. Address: 1. D. Agr., Kyoritsu Women’s Univ., Tokyo.

6535. Fruin, W. Mark. 1984. History of Yuasa Shoyu and Tezukuri Shoyu Co. 4060 Amaranta Dr., Palo Alto, CA 94306. 3 p. Unpublished manuscript.

• **Summary:** Yuasa was the birthplace of shoyu in Japan and the first major center of shoyu production. Today only one company, Tezukuri Shoyu, makes soy sauce in a town where 150 years ago more than 10% of the population were shoyu makers. Tsuneo Kanno, now head of the company, is the fifth generation of Tezukuri Shoyu brewers in Yuasa. He explained the decline of the soy sauce industry in this town in the following way: "Shoyu brewers remained too small too long, and they failed to pay attention to marketing. Even as recently as 1952, there were 23 shoyu makers in Yuasa, but now there is only me." In 1954 he was called back from Waseda University to take over the family business. "With a labor force of 10, 3 family members and 7 paid workers, Kanno produced 149 kiloliters of shoyu in 1983. Most of this, 110 kiloliters, was made from whole soybeans grown in Mimasa, near Okayama City. The wheat was also locally grown in Shiga. Only the salt was imported."

"Today all that is left of the birthplace of shoyu in Japan are Tezukuri Shoyu and a small museum. In 1983, Kanno opened the only museum in Japan devoted exclusively to the history of shoyu. About 100 visitors a month come to the museum to see, among other things, the foot-driven, wooden wheat-cracking machine used 150 years ago and to sample Kanno's Tezukuri Shoyu." Address: Palo Alto, California. Phone: 415-858-2226 or 327-0857.

6536. **Product Name:** Yamaki Organic Shoyu.

Manufacturer's Name: Mountain Ark (Importer). Made in Japan.

Manufacturer's Address: 120 South East St., Fayetteville, AR 72701.

Date of Introduction: 1984. July.

Wt/Vol., Packaging, Price: Glass bottle.

New Product–Documentation: Summer Flyer. 1984. June/July. p. 2. "Aged 2 years, unpasteurized. 16 or 32 oz bottle."

6537. **Product Name:** Yamaki Organic Nama Shoyu. Twice Fermented.

Manufacturer's Name: Mountain Ark (Importer). Made in Japan.

Manufacturer's Address: 120 South East St., Fayetteville, AR 72701.

Date of Introduction: 1984. July.

Wt/Vol., Packaging, Price: Glass bottle.

New Product–Documentation: Summer Flyer. 1984. June/July. p. 2. "Aged 4 years, unpasteurized. 16 or 32 oz bottle."

6538. *Natural Foods Merchandiser*. 1984. Macrobiotics: Varied trends boost sales. July. p. 1, 85-86, 88, 90, 93-94.

• **Summary:** There is a definite upward trend in sales of macrobiotic foods. Macrobiotics is both a diet and a philosophy. "The basic foods are whole grains, miso, soy sauce, tofu, seaweed, pasta, fresh vegetables, and various types of pickled vegetables. Dairy products, honey, and most animal foods are not used or are used minimally."

6539. Nunomura, N.; Sasaki, M.; Yokotsuka, T. 1984. Shoyu (soy sauce) flavor components: Neutral fraction. *Agricultural and Biological Chemistry* 48(7):1753-62. July. [14 ref]
Address: Soy Sauce Research Lab., Kikkoman Corp., 399 Noda, Noda-shi, Chiba 278, Japan.

6540. *Progressive Grocer*. 1984. New items make sauce sales slimmer. July. p. 157-58.

• **Summary:** In 1983 supermarket sales of soy and teriyaki sauce were \$45.40 million (gross profit: \$11.76 million), accounting for 2.61% of the sauce category sales (2.81% of category gross profits; the average retail gross profit margin is 25.9%). The best-selling sauce types are spaghetti sauce (27.77% of the category), ketchup (16.23%), meat sauce (14.38%), dry mixes and seasonings (10.68%), and Mexican sauces (7.84%).

6541. **Product Name:** Homestyle Tofu "No Egg" Salad.

Manufacturer's Name: Sonoma Specialty Foods.

Manufacturer's Address: 2317 Bluebell Dr., Santa Rosa, CA 95403. Phone: 707-525-8822.

Date of Introduction: 1984. July.

Ingredients: Tofu (organic soybeans*, water, nigari), soy oil, soy milk, celery, relish, tamari, mustard, vinegar, nutritional yeast, natural herbs and spices, sea salt, and honey. * Grown in accordance with CA H&S Code 26569.11.

Wt/Vol., Packaging, Price: 8 oz or 15 oz plastic tub.

How Stored: Refrigerated.

Nutrition: Per 2.66 oz.: Calories 105, protein 8.1 gm, carbohydrates 1 gm, fat 6.5 gm, fiber 1.3 gm, sodium 0.80 gm, cholesterol 0.

New Product–Documentation: Label. 1987. 4.5 inches

diameter. Black, green and yellow on white plastic lid. 15 oz. "Improved! Non-Dairy. Cholesterol Free. Ready to Eat on Sandwiches, as a Dip & in Salads. Natural. No Preservatives. Nutritious. Delicious. Kosher." Illustration of a cottage in front of a picket fence.

6542. Hansen, Barbara. 1984. Satay's nod to the games: Let's eat out. *Los Angeles Times*. Aug. 2. p. I29.

• **Summary:** The spirit of the Olympic Games in Los Angeles has even touched an Indonesian restaurant in Alhambra. "Through Aug. 31 the Indonesia Satay House [208 E. Valley Blvd.] will serve all customers a dish of *cendol* (pronounced chendol) in recognition of the Games."

Under new management, the restaurant's menu has a Sumatran flavor, which means the dishes are less sweet than in Java.

The chicken dishes are memorable; "*ayam panggang kecap* is chicken mildly seasoned with sweet Indonesian soy sauce [perhaps kecap manis?].

The Javanese *ketoprak* contains "puffy squares of fried tofu and crumbled *krupuk* (Indonesian style chips)."

"*Tahu goreng* (fried tofu) features crisp, fried tofu blocks propped up against a mixture of shredded lettuce and bean sprouts. This arrangement is sprinkled with chopped toasted peanuts and seasoned with a sweet soy sauce dressing."

6546. **Product Name:** Angostura Soy Sauce. Low Sodium. **Manufacturer's Name:** Angostura International Ltd. (USA Div.).

Manufacturer's Address: Ramsey, New Jersey.

Date of Introduction: 1984. August.

New Product–Documentation: Spot in Specialty Food

Marketing. 1984. Aug. The soy sauce has 62% less sodium than regular soy sauce and the Worcestershire has 72% less sodium than its regular counterpart. The company is 160 years old.

Spot in *NFM's New Product Review*. 1998. Fall. p. 12. Angostura Naturals Soy, Teriyaki, and Worcestershire Sauces. Lower sodium than competing brands and Kosher Certified.

6547. **Product Name:** Angostura Worcestershire Sauce. Very Low Sodium (Vegetarian).

Manufacturer's Name: Angostura International Ltd. (USA Div.).

Manufacturer's Address: Ramsey, New Jersey.

Date of Introduction: 1984. August.

Ingredients: Vinegar, water, molasses, corn syrup, sugar, natural and artificial flavors (not derived from animals), salt.

Wt/Vol., Packaging, Price: Bottle.

How Stored: Shelf stable.

New Product–Documentation: Spot in Specialty Foods Marketing. 1984. Aug. The soy sauce has 62% less sodium than regular soy sauce and the Worcestershire has 72% less sodium than its regular counterpart. The company is 160 years old.

Letter in *Vegetarian Times*. 1991. Dec. p. 10. "Vegetarian Worcestershire." Jane M. Clark of Hollis Center, Maine, states: "After a diligent two-year search I found a commercial vegetarian worcestershire sauce made by Angostura. I wrote to the company, which confirmed that this product is totally free of anchovies and other animal products." It is available in "the major supermarket chain in the Northeast."

Talk with Carol Wiley at *Vegetarian Times*. 1991. Nov. 21. The USA Division has moved to: 1745 Elizabeth Ave., Cranford (Rahway), New Jersey 07065. Phone: 908-272-2200. The label is light brown, and only the "very low sodium" variety is available. The company also makes Angostura Aromatic Bitters. Note that no soy sauce is used as an ingredient.

Talk with Angostura International in Cranford. 1991. Nov. 27. Worldwide, this product was first made in Cranford, New Jersey, in 1984. The company also makes a lime juice, a grenadine syrup, and a bloody mary seasoning in Cranford. The Angostura Aromatic Bitters are made in Trinidad, but bottled in New Jersey. Other divisions are in Canada and Trinidad. The company's main business is distilling/making rum; they are one of the largest manufacturers of rum in the world. The company is 166 years old (founded 1824) and its first product was Angostura Aromatic Bitters, which is a secret combination of herbs and spices, water and alcohol, that is used as a flavor enhancer in alcoholic beverages. For years, a couple of dashes have been added to the Manhattan, Old Fashioned, Champaign Cocktail, etc. The famous bitters were developed from plants in the town

of Angostura (probably Colombia) by one Dr. Siegert, who was a physician in the army of Simon Bolivar (lived 1783-1830) in the 1820s. They were found to contain medicinal/therapeutic properties; to cure hiccups in 30 seconds, put some biters on a wedge of lemon and suck the lemon. In the mid-1800s the company moved to Trinidad, when the political situation in South America got to "hot." The bitters are "the oldest imported item continuously sold in America," where they have been sold for 110 years (since about 1881). It is also one of the few U.S. products (along with Coca-Cola, Hershey chocolate, Ivory soap) that has lasted more than 100 years. Indeed, the product contains no anchovies or other animal products.

6548. Eden Foods, Inc. 1984. Just the best [Edensoy, Eden tamari, brown-rice miso, barley miso] (Ad). *Soyfoods*. Summer. p. 37.
Address: Clinton, Michigan 49236.

6549. Finley, David; Goldberg, Ray. 1984. Kikkoman Corporation. Unpublished Harvard Business School Report. 33 p. No. 9-585-102. [10 ref]

• **Summary:** A ten year update on the original 1974 Harvard Case Study of Kikkoman and one of the best insights available into Kikkoman's history and operations (although some of the data has been disguised for competitive reasons). Kikkoman sales in 1982 were about \$547 million.

Contents: Early diversification—The wine industry. Company history. Soy sauce production. The soy sauce industry. Structural change. Kikkoman strategy. Expanding soy sauce sales in Japan. Diversifying into other food products (Kikko Foods was established in 1961). Development of the U.S. market. New businesses (Restaurant, health food, and leisure). Technological innovation. Final considerations.

Exhibits. 1. 30 top Japanese food companies in FY (Fiscal Year) 1982, with sales. (1) Kirin Brewery, (2) Suntory, (5) Yuki-jirishi / Snow Brand Milk Products, (6) Ajinomoto, (8) Meiji Milk Products, (9) Nisshin Flour Milling, (10) Morinaga Milk, (19) Showa Sangyo, (20) Nisshin Oil, (23) House Food, (25) Kikkoman.

3. Quantity of soy sauce produced and market share of major Japanese manufacturers. 1982 soy sauce market share was Kikkoman 30.4%, Yamasa 8.9%, Higashimaru 4.6%, Higeta 3.0%, and Marukin 2.5%. Thus the top 5 had 49.4% of the market. 5. Change in per capita food intake (1975-79). 6. Kikkoman financial data. 8. List of main products. 9. World per capita wine consumption by country. France is tops with 90 liters/person/year. 11. Growth through diversification. In 1964 soy sauce accounted for 87% of Kikkoman's sales, in 1983 for 59%. 12. 1980 Asian population of the U.S. by state. Total: California 1,253,987. Hawaii 583,660. New York 310,531. Illinois 159,551. Texas 120,306. New Jersey 103,842. Washington state 102,503.

Oriental immigrants to the USA 1972-81. Total. 1,794,682. From Philippines 375,517. Korea 290,322. Vietnam 233,274. China and Taiwan 213,908. Address: 1. Research Associate; Prof., Harvard Business School, Boston, Massachusetts 02163.

6550. Fiske, Doug. 1984. Soyfoods in the supers [supermarkets]. *Soyfoods*. Summer. p. 18-23.

• **Summary:** Gives an in-depth look at the marketing strategies of Legume Inc., Tomsun Foods, Eden Foods, Vitasoy, Tempehworks, Nasoya, Eden Foods, Soyfoods of America (Furama and Naturespring brands), White Wave, Hinode Tofu Co., Tofu Time (Tofutti), and Nasoya.

Eden Foods of Clinton, Michigan, has been involved with natural foods for 15 years, but only within the past year have they been able to establish a beachhead in supermarkets with their miso, soymilk, and soy sauce products. They are presently selling through 5 chains representing about 50 individual stores. Supermarket sales now account for about 10% of their \$7.5 million yearly sales.

6551. *Food Engineering*. 1984. Vegetable proteins: Topics from nutrition to cancer prevention to dietary fiber were presented by soy protein suppliers at the IFT [Institute of Food Technologists] show. 56(8):116, 119. Aug.

• **Summary:** A.E. Staley makes Textured Procon, textured soy protein concentrates. Central Soya makes Response, structured soy concentrate. Cargill makes Textratein, textured soy flours in 3 particle sizes used as partial ground meat replacers. "Among the ingredients from Kikkoman International were dehydrated miso and dehydrated tofu from soy, and dehydrated HVP (hydrolyzed vegetable protein) from soybean meal and corn gluten." Hercules highlighted its standard and Luxor lines of HVPs for mild and beef-like flavors, and its capacity to customize HVPs to customer need. A brief summary is given of research indicating that miso may prevent cancer.

6552. House, S.L. 1984. Spotlight: Institutional foodservice. Alive Polarity, Murrieta, California. *Soyfoods*. Summer. p. 6.

• **Summary:** "Northeast of San Diego and southeast of Los Angeles lies a peaceful place where people can go for a day, a week, a month to experience spiritual renewal and better health practices. Among other diverse activities, Alive Polarity's Murrieta Hot Springs offers mudbaths, marriage counseling and superb vegetarian cooking."

"The lacto-vegetarian diet offered at Alive Polarity emphasizes purifying, health-building and gourmet dishes. Soyfoods make up a large part of the menu.

"More than 50 percent of our meals contain soy products," says Breese English, kitchen manager. Tofu is by far the soyfood used most often because it's so receptive; it adds little flavor of its own yet takes on the flavor of ingredients used with it. 'I'd say we consume at least 70

pounds a day.”

“Alive Polarity’s restaurant serves breakfast, lunch and dinner buffet style, totaling about 1000 meals daily.”

“While tofu is a primary ingredient in many of the recipes, other soy products are used extensively as well. Bragg’s Liquid Aminos and tempeh are two products that have found a place in Alive Polarity’s kitchen.

“Bragg’s is a liquid mineral soy bouillon often used instead of soy sauce or tamari. Its slightly less salty flavor had made it a popular item for the cooks as Mary Ann Beauchamp attests. ‘I use it in almost everything, sauces, salad dressings, soups.’ About 25 gallons of Bragg’s Liquid Aminos are consumed weekly.

“Tempeh is the third most popular soy product used. Tempeh is a complete protein food with a texture that lends itself to hearty foods and entrees. Used in place of hamburger for summer barbecues, tempeh burgers are very popular. The kitchen staff estimates they use about 400 tempeh patties a week.

“Two soyfoods recently introduced at Alive Polarity include soymilk and Tofutti. Given that almost 20 gallons of soymilk are consumed weekly, it appears it’s already gained acceptance among the clientele.”

“Mary Ann Beauchamp, whose mother is Japanese explains, ‘My mother is amazed with the things we do with tofu. The Japanese use tofu in traditional ways for specific purposes. I don’t feel that they experiment or work with it as we do.’ For example, Beauchamp explains a favorite recipe, Tofu Tidbits. ‘You take cubes of tofu and bread them in a mixture of flour, nutritional yeast, herbs and spices. Then layer the cubes in a pan with a small amount of oil. Bake for an hour at 500°. Serve with tartar sauce and lemon wedges, it’s fantastic. People just love it.’”

A photo shows the staff: Jane Buck, Breese English, Mary Ann Beauchamp, and Diane Luzzi. Contains a “favorite recipe” for Tofu french toast.

6553. Inamori, Kazuo; Miyauchi, K.; Uchida, K.; Yoshino, H. 1984. Shōyu moromi no hakkō biseibutsu ni kansuru kenkyū. I. Shōyu nyūsan-kin to kobo no sōgo sayo [Microorganisms involved in shoyu moromi fermentation. I. Interaction between *Pediococcus halophilus* and *Saccharomyces rouxii*]. *Nippon Nogeikagaku Kaishi (J. of the Agricultural Chemical Society of Japan)* 58(8):771-77. Aug. [20 ref. Jap; eng]

• **Summary:** The effect of oxygen supply, initial pH, and inoculum quantity on growth and fermentative ability of *Pediococcus halophilus* and *Saccharomyces rouxii* isolated from shoyu moromi (Japanese soy sauce mash) was studied. Also the interaction of the two organisms in static cultures under aerobic and anaerobic conditions was studied. The major medium used was shoyu koji extract. In mixed culture, at an initial pH of 6.0, growth and lactic acid production of *P. halophilus* was inhibited by *S. rouxii*

under aerobic conditions; growth of *S. rouxii* and alcoholic fermentation was inhibited by *P. halophilus* under anaerobic conditions. At an initial pH of 5.6, growth of *P. halophilus* declined, regardless of aeration conditions. Similar results were obtained using shoyu moromi medium instead of koji extract medium. Results may be directly applied to moromi fermentation during shoyu production. Address: Research Labs., Yamasa Shoyu Co., Choshi, Chiba-ken 288, Japan.

6554. **Product Name:** Tofu Bagel Link (A Tofu Hot Dog in a Whole Wheat Bagel).

Manufacturer’s Name: Light Foods Inc.

Manufacturer’s Address: St. Louis, MO 63017.

Date of Introduction: 1984. August.

Ingredients: Tofu Light Link, tofu, soy oil, water, dried egg white, textured soy protein, salt, barley flour, honey, tamari, spices, natural extracts of paprika, natural spice oils. Whole wheat bagel: High gluten flour, whole wheat flour, bran, honey, salt, yeast.

Wt/Vol., Packaging, Price: 5 oz.

How Stored: Frozen.

New Product–Documentation: Food Report (Lehmann).

1984. Aug. Friedman. 1985. Adweek East. Dec. 9; Poster.

5 oz. Frozen. Label. 1988. 6 by 2.5 inches. Blue, beige, and white. “Real tofu.”

6555. *Soyanews (Sri Lanka)*. 1984. Soy sauce—A new home industry [in Sri Lanka]. 6(12):1-2. Aug.

• **Summary:** “An experiment on making soya sauce as a home industry has just been concluded at the Soyabean Foods Research Centre in Gannoruwa. The manager of the SFRC, Mr. T.W.D. Siriwardena, said that the trial was a success. The first trial yielded 7,000 litres of soya sauce.

“Though Soya Sauce is a popular item with Sri Lankans it has always been manufactured by the small Chinese community in Sri Lanka with imported beans when soya was not cultivated in Sri Lanka. This is the first time the product has been made outside the Chinese community.”

No wheat flour was used in making this soya sauce. The formula used to make this soya sauce was the same as that used in Indonesia, where, too, the starter and expertise were obtained. The fermentation period was three months, at the end of which the soya beans, steeped in brine, were pressed to obtain the liquid sauce.

The main goal of the experiment was to encourage the making of soya sauce as a cottage industry in Sri Lanka. No costly equipment is required and “the technology adopted is appropriate to conditions in Sri Lanka.

“The first batch of soya sauce prepared at Gannoruwa will be made available to the public through a firm in Colombo which has undertaken the retail marketing of the sauce. The know-how and expertise on the making of soya sauce will be made available by the SFRC to those willing to undertake the preparation of sauce as a cottage industry.”

Large photos show: (1) A person standing by one of eight large, square concrete tanks in which the 7,000 litres of soya sauce was made. (2) Several people within the enclosed complex where the sauce was made.

6560. **Product Name:** Smoky Mountain Sizzlin’—“More than a barbecue sauce!”

Manufacturer’s Name: American Natural Foods, Inc.

Manufacturer’s Address: P.O. Box Box 2321, Chapel Hill, NC 27514.

Date of Introduction: 1984. September.

Ingredients: Tomato paste, apple cider vinegar, pure water, red miso, peanut oil, tamari soy sauce (soybeans, water, sea salt), honey, molasses, garlic juice, onion juice, umesu (Japanese plum vinegar), natural herbs and spices, toasted sesame oil, tamarind, natural hickory smoke, natural seaweed extract.

Wt/Vol., Packaging, Price: 18 fluid oz (540 ml) glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1984, dated. 10.25 by 2.5 inches. Paper. Yellow, green, red and white on black background. “All natural. For bastin’, grillin’ and table use. Made with miso.” Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center. Ad in *Vegetarian Times*. 1985. June. “You’re gonna’ love that Smoky Mountain twang.”

6561. **Product Name:** New York Soy Deli Tofu Ricotta.

Manufacturer’s Name: Appropriate Foods, Inc.

Manufacturer’s Address: 137 New Hyde Park Rd., Franklin Square, Long Island, NY 11010.

Date of Introduction: 1984. September.

Ingredients: Organic tofu, tahini, miso, umeboshi vinegar, tamari, herbs.

Wt/Vol., Packaging, Price: 7 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1984. New York Soy Deli Brand. 1.5 by 3 inches. Brown on yellow. Interview with Robert Werz. 1987. Sept. 9.

6562. **Product Name:** Oregon Baked Tofu, and Curry Baked Tofu.

Manufacturer’s Name: Ashland Soy Works.

Manufacturer’s Address: 280 Helman St., Ashland, OR 97520. Phone: 503-482-1865.

Date of Introduction: 1984. September.

Ingredients: Oregon: Tofu (water, organically grown soybeans, natural magnesium chloride or nigari: a derivative of seawater), soy sauce, oil, garlic, honey, spices. Curry: Tofu, soy sauce, oil, peanut butter, honey, onion powder, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 4 by 3 inches. Self adhesive. Orange or yellow and brown on white. Talk

6563. Berry, Linden. 1984. The soy of cooking. *Women's Sports* 6:40-41. Sept.

• **Summary:** A brief introduction, without recipes, to tofu, tempeh, miso, and shoyu. "You don't have to be a vegetarian to eat and enjoy soy foods... Look for cookbooks with recipes for using these soy foods at your local bookstore. There are lots of delicious and healthful alternatives to meat that await you."

6564. **Product Name:** [Tempeh Burger–Deep-fried].

Foreign Name: Tempeh-Burger–Frittiert.

Manufacturer's Name: Byodo Naturkost.

Manufacturer's Address: Thalkirchenstr. 57, D-8000 Munich, West Germany. Phone: (089) 16 85 70.

Date of Introduction: 1984. September.

Ingredients: Soybeans, water, vegetables (Carrots, zucchini, soy sprouts) in varying proportions by weight, whole oats, whole wheat, brown rice, sesame seeds, sunflower seeds, spices, soy sauce (shoyu), sea salt, vinegar, beneficial mold culture (Edelpilzkultur) *Rhizopus oligosporus*. Ingredients predominantly organically grown.

Wt/Vol., Packaging, Price: 130 gm plastic bag.

How Stored: Refrigerated.

New Product–Documentation: Letter from Anthony Marrese. 1990. March 22. Based on a March 21 interview with Bernd Steyer, tempeh production manager and builder of their first tempeh incubator in 1984, when they started to make their own tempeh. Present production is said to be 50 kg/week of tempeh plus 500 burgers/week.

Bernd Drosihn. 1989. Tempeh: Ein traditionelles Nahrungsmittel mit Zukunft [Tempeh: A traditional food with a future]. p. 38. Says the company makes fresh tempeh from whole soybeans, tempeh burgers, and tempeh chips. A source of tempeh starter.

Letter (fax) from Harry Whitford. 1990. May 11. "We started making Tempeh Burgers (Tempehbürgers) later that fall (1984) after we realized we couldn't keep the company going only on tempeh."

Label sent by Anthony Marrese. 1990. April 15. 5 by 2.25 inches. Green on yellow, printed on front and back of plastic bag. "A nutritional soya specialty (Eine vollwertige Soja-Spezialität). Store at 4-8°C."

6565. Chan, Fred. 1984. General uses of soybeans in Hong Kong and competition from Chinese soybeans. In: Ontario Ministry of Agriculture and Food, Market Development Branch. 1984. Workshop on Export Markets for Ontario Soybeans: Edited Proceedings. 45 p. See p. 15-17. Held 5 Sept. 1984 at Wheels Motor Inn, Chatham, ONT, Canada. 28 cm.

• **Summary:** Tofu: The two major types of tofu in Hong Kong are soft tofu (which is displayed in water to maintain

its form) and mild tofu (which is firmer, is displayed on wooden planks, and is the most common type). Chinese soybeans are preferred to Canadian soybeans because after a maximum of 5 hours on display in the open market, water will start to weep from the tofu made from Canadian soybeans. In 1983, about 6,000 tonnes of imported soybeans were used to make tofu in Hong Kong; this was about 33% of the total soybeans imported.

Bean curd sheets and bean curd sticks [yuba] are very common snacks and dishes in Hong Kong. "Canadian soybeans have an advantage in this market because they produce whiter soymilk which in turn will produce whiter colour products. However, the bigger size of the Chinese soybean results in a higher yield... Manufacturers will normally mix 60% of Canadian soybeans with 40% of Chinese soybeans in order to achieve a higher output of whiter sheets... Total utilization was around 4,000 tonnes in 1983, with Canadian soybeans representing 78%.

Soy sauce and bean paste: The market is dominated by Chinese soybeans because bigger beans produce more sauce and paste. In 1983 approximately 6,000 tons of soybeans were used to make soy sauce and bean paste, with Chinese soybeans representing 75%, Vietnamese 14%, and Canadian 11%.

Soymilk: In 1983 about 1,800 tonnes of soybeans were used to make soymilk in Hong Kong, mostly by Vitasoy. Chinese and Canadian soybeans each share about 50% of the market.

Discusses various reasons that Chinese soybeans are very competitive in Hong Kong. The Chinese Oil, Cereal and Foodstuff Company in Hong Kong has an office in Hong Kong. Under this national organization are two agents specializing in Chinese soybeans. Transport time from China to Hong Kong is 7 days versus 32 days from Canada. Address: Director, Chung Hing Co., Hong Kong.

6566. Chen, Steve. 1984. Soyfoods in the Far East and USA: Products, markets, trends. In: American Soybean Assoc., ed. 1984. First European Soyfoods Workshop, Proceedings. Brussels, Belgium: ASA. 36 p. See p. C1-C38. Held Sept. 27-28 at Amsterdam, Netherlands. [11 ref]

• **Summary:** Contents: Summary. 1. Introduction: Ten reasons why soybeans will be a key protein source for the future. 1. Soyfood products. A. Non-fermented soyfoods: Fresh green soybeans, soybean sprouts, soynuts, soymilk, soy flour, yuba or soy protein film, tofu. B. Fermented soyfoods: Soy sauce, miso, tempeh, natto, fermented tofu, fermented black soybeans (tou-shih, hamanatto). 3. Soyfoods markets and trends in the Far East: Taiwan, China, Japan, South Korea, Indonesia, Malaysia, Singapore, Thailand, Philippines. 4. Soyfoods markets and trends in the U.S. 5. References. Plus 15 tables and 8 figures.

"It is our [American Soybean Association's] strong intention that marketing and consumption of soy protein

should not in any way deter the expansion of the production and sale of as much animal protein as the world can be expected to produce in the years ahead. Soy protein foods are being intentionally brought to the market to complement and not necessarily to replace animal protein products.”

“Taiwan imported 1.41 million tonnes (metric tons) of soybeans in 1983 and used about 250,000 tonnes as soyfoods for direct human consumption, which made Taiwan one of the highest in per capita consumption of soyfoods (13.2 kg or 29 lb) in the world. In the past 10 years (1974-1983), the consumption of traditional soyfoods showed an average increase of 3% per year as compared to 12% and 8.1% for poultry and soy oil, respectively. The market for packaged soymilk, soy pudding and tofu has also been expanding rapidly in recent years in Taiwan.” Table 7 shows the production of soymilk in Taiwan, which grew from 103,600 tonnes in 1974 to 210,000 tonnes in 1983, for an average growth rate of 8.2% a year.

China produces about 9 million tones of soybeans a year, and about half of these are consumed as soyfoods, giving a per capita consumption of 4.5 kg of soyfoods. “An improvement in the general economy and soyfood technology and equipment will bring a sharp increase in soybean demand and more soyfoods consumption.”

In South Korea soymilk consumption has increased more than seven-fold in the last 4 years. Currently about 10,000 tonnes of soybeans are used to make 70,000 tonnes of soymilk. “It is projected that soymilk production in Korea will double in 1984 as compared to the previous year.”

Indonesia continues to be Southeast Asia’s largest consumer of soybeans as food. In 1982/83 soybean consumption was 6.7 kg per capita. Indonesia consumes about 1 million tonnes of soybeans annually, 60-65% of them in the form of tofu and 35 to 40% as tempeh.

Malaysia consumes only about 30,000 tonnes of soybeans per year as food. In Singapore, more than 75% of the population of 2.5 million are Chinese. Therefore tofu, soysauce, and soymilk are the predominant traditional soyfoods consumed.

Thailand consumes about 40,000 tonnes of soybeans a year as food, mainly in the form of tofu. The Philippines uses only 5,000 tonnes of soybeans annually for food, mainly as tofu.

To summarize (Table 6), annual per capita consumption of soybeans in various East Asian countries, in descending order of the amount consumed, is as follows: Taiwan 13.2 kg (population 19 million); Japan 8.3 kg (population 120 million); South Korea 7.5 kg (population 40 million); Indonesia 6.7 kg (population 150 million); Singapore 6.25 kg (population 2.4 million); China 4.5 kg (population 1,000 million); Malaysia 2.1 kg (population 14 million); Thailand 0.8 kg (population 50 million); Philippines 0.3 kg (population 15 million). Address: Director, American Soybean Assoc., Room 603, Kwang-Wu Building, No. 386,

Tun Hua South Road, Taipei, Taiwan.

6567. Dai, Yautian. 1984. [Study of iron fortification of Chinese soy sauce. II. The iron absorption of iron fortified Chinese soy sauce]. *Ying Yang Hsueh Pao (Acta Nutrimenta Sinica)* 6(3):231-39. Sept. [27 ref. Chi; eng]

• **Summary:** “Iron absorption was studied in 31 healthy adult volunteers using extrinsic tags of Fe-55 and Fe-59. Geometric mean absorption from unfortified Chinese Soy Sauce (Seagull brand, produced in Shanghai) with iron contents 15.8 mg Fe/dl was 6.95%. Absorption from iron fortified soy sauce (121 mg Fe/dl) decreased to 4.36%. Absorption from the fortified product almost doubled (8.35%) with the addition of ascorbic acid (2 moles/1 mole Fe). 7.5 ml of fortified soy sauce (75mg Fe/dl) were added to meal containing potatoes, cabbage, green beans and rice, with a total iron content of 8.9 mg. Iron absorption from this meal was 5.65%, or 0.5 mg. The addition of 100g of pork meat increased nonheme iron absorption to 9.67% (1.08 mg). Green tea drunk after the meal decreased absorption to 3.07% (0.27 mg).

“Iron fortified Chinese Soy Sauce consumed with vegetable meals could favor very significantly to meet the iron requirement of the general population in China. Addition of ascorbic acid to fortified soy sauce would further increase its iron bioavailability. Known enhancer (pork meat) and inhibitor (green tea) of non-heme iron absorption will modify in a predictable way of iron bioavailability from vegetable meals containing iron fortified soy sauce.” Address: Dep. of Nutrition and Food Hygiene, Beijing Medical College, Beijing, China; Food Detection Research Inst. of Commerce, Beijing, China.

6568. Kooij, J.A. van; de Boer, E. 1984. Microbiological aspects of soyfoods. In: American Soybean Assoc., ed. 1984. First European Soyfoods Workshop, Proceedings. Brussels, Belgium: ASA. 131 p. See p. 11-115. Held Sept. 27-28 at Amsterdam, Netherlands. [20 ref]

• **Summary:** “To learn more about the microbiological quality and safety of tempeh and tofu a survey was carried out by the working party ‘Fungi in Foods’ in the summer and autumn of 1983. The products were sampled in stores, restaurants and production places throughout the Netherlands and analyzed by using standard microbiological procedures...

In 110 samples of tempeh: “About 10% of the samples contained *Staphylococcus aureus* and *Bacillus cereus* in numbers which may cause food intoxication. However, the *S. aureus* strains isolated in this survey proved to be non-enterotoxigenic. *Yersinia enterocolitica* (non-pathogenic serotypes) was found in 6 samples. *Salmonella* was not isolated from any of the samples tested...

“In 154 samples of tofu: 2.1% had more than 100 counts/gm of *Staphylococcus aureus*; 11.2% had more than 100 counts/gm of *Bacillus cereus*. And 36.3% had more

than 100 counts/gm of *Escherichia coli*. “About 95% of the samples appeared to have an aerobic count over 1,000,000 colony forming units (cfu) per gram. This means that there is a very great proliferation of bacteria after the production, for immediately after the production the aerobic plate count is usually below 10,000 cfu/g. This indicates that the tofu had been stored improperly or for too long. The average pH of tofu immediately after production was about 6.5, but at the time of sampling it averaged 5.2. But 5% of the samples had a pH of less than 4.5, and 16% has a pH of 4.5 to 4.9. These low pH values indicate sour/acidic products caused by large numbers of lactic acid bacteria. “In 0.7% of the tofu samples *Bacillus cereus* and *Staphylococcus aureus* were present in numbers that may cause food intoxication. The presence of *B. cereus* was probably caused by an outgrowth of the spores which survived the heat treatment. This indicates that the tofu must have been stored at too high a temperature during a long period (12–48 hours).

“The presence of *S. aureus* can be explained by a bad hygienic practice during production, after the heat treatment step. *Salmonella* was not found in any of the tofu samples.” Address: Food Inspection Services, Netherlands.

6569. Loh, Michael. 1984. An overview of export markets for edible soybeans. In: Ontario Ministry of Agriculture and Food, Market Development Branch. 1984. Workshop on Export Markets for Ontario Soybeans: Edited Proceedings. 45 p. See p. 1-9. Held 5 Sept. 1984 at Wheels Motor Inn, Chatham, ONT, Canada. 28 cm.

• **Summary:** “Ontario first exported edible soybeans in 1972 and over 12 years have built it into a \$40 million business. 1981 was our best year when exports totalled \$46 million... The bulk of Ontario’s soybean exports are sold to the Far East [East Asia]—Japan (\$8 million in 1983), Singapore (\$6 million), Hong Kong (\$3.5 million), Malaysia (\$1 million), Indonesia, and Korea.” In these countries soybeans are consumed in the daily diet of the people. In Japan, for example, they are made into miso, tofu, natto, soymilk and shoyu. Korea also makes soy sprouts, Indonesia makes tempeh, and Singapore, Malaysia, and Hong Kong make dried yuba. In addition, sales to the Netherlands, United Kingdom, and France are quite significant.

Concerning Ontario’s market share of soybean imports for food use: Japan imports 877,300 tonnes, of which 27,000 tonnes or 3.1% is from Ontario. Singapore and Malaysia import 36,000 tonnes, of which 20,000 tonnes or 55.0% is from Ontario. Hong Kong imports 20,000 tonnes, of which 10,000 tonnes or 50.0% is from Ontario.

Japan’s sources of its 877,300 tonnes of imported soybeans are as follows: USA 570,000 tonnes (65%), China 280,000 (32%), Canada 27,000, South America 300.

Japan uses its 877,300 tonnes of imported soybeans as follows: tofu 485,000 tonnes (55.3%), miso 180,000, natto 185,000, soymilk 25,000, cooked soybeans 10,000, shoyu

6,500, other 85,800. Within these figures, Ontario’s soybeans are used as follows: Miso 20,000 tonnes (11.1% of the total), natto 5,000 tonnes (5.9%), and tofu 2,000 tonnes (0.4%). Address: Export Development Specialist, Ontario Ministry of Agriculture and Food, Toronto, Canada.

6570. *Soyanews (Sri Lanka)*. 1984. Wider sales network for soya. 7(1):1. Sept.

• **Summary:** “A regular supply of soya products will be ensured to residents of Colombo and the suburbs beginning from this month. This service will be provided by Forbes Distributors (Pvt) Ltd., a subsidiary of Forbes and Walker, which has been retailing soya products at its shop Lankasoy in Darley Road, Colombo, for some time now.

“The chairman of Forbes Distributors is Mr. R.S. Wijesekara who has been keenly interested in the popularisation of soya foods. Mr. Wijesekara took the initiative to introduce Sri Lankans to soya meat [soyameat] which is now a popular item of food in many homes. He is chairman of the Raja Rata Food Grains Processing Co., makers of Raja Soya, now widely used as a substitute for coconut milk.

“Forbes Distributors have two vans at their disposal and these will serve many retail points in the city and suburbs. Among the items that are available for distribution are Soyabev, a substitute for coffee and the first of the soya products that Mr. Wijesekara introduced to the public, Raja Soya and soya noodles which has been found to be better than ordinary noodles.”

Also: Soya sauce, soya flakes, soya devilled nuts, soya oil, soya meat, and “a new product—Mealmaker, which is a spiced and flavoured soya meat.” This company will soon be distributing dried tempeh.

“Forbes Distributors have their office at 29 Braybrooke Place and their stores at 40 First Cross Street, Borupana, Ratmalana.”

Photos show: (1) A F&W Lankasoy van. (2) Front panel of a package of Mealmaker.

6571. Claiborne, Craig; Franey, Pierre. 1984. Food: Seppi Renggli, the masterful chef of the Four Seasons in New York, celebrates the restaurant’s first quarter century... *New York Times*. Oct. 14. p. SM77-78.

• **Summary:** When this restaurant opened 25 years ago, it “was said to be the world’s costliest restaurant, taking more than \$4.5 million to create.” It has long been considered one of the very finest restaurants in Manhattan (New York City).

The recipe for Seppi Renggli’s fruit salad calls for “2 teaspoons ketjap manis (a sweetened soy sauce, available where fine imported Oriental foods are sold).”

6572. Welters, Sjon. 1984. Early history of tempeh in the Netherlands (Interview). *SoyaScan Notes*. Oct. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Cees van Rest, a friend of Sjon's and the owner and president of Wittewonder, visited Mrs. Duson, owner of ENTI, and asked her the list of questions Shurtleff had written her twice but she did not answer.

Note: Firma ENTI was founded in about 1946-1948.

A Dutch couple whose last name was Wedding lived in Indonesia and made tempeh there. They took a 100 year old culture to Holland in a wooden box, along with their tempeh recipe. In Holland they started to make tempeh on a home scale for friends and relatives. They kept the culture going and used it to inoculate Indonesian soybeans with the help of blankets and lamps. It gradually grew into a commercial operation.

The business did well and by the early 1970s they were making 2,000 lb/day of tempeh. Mrs. Duson bought the company in about 1974. Apparently (?) the couple was growing old.

ENTI went out of business in January 1984 and the original Indonesian culture was deliberately destroyed. They sold all the equipment to a used equipment dealer, rather than to a person to continue the business.

Firma Lembeker is now the oldest existing tempeh company in Holland—approximately 25 years old.

Prospects for the future of tempeh in Holland look bad. Mrs. Duson felt extremely sad; she didn't think the health food industry would take over sales of the tempeh for lack of tradition and craftsmanship. She is older. Sjon says the Indonesians in Holland are no longer prospering. After World War II they were prospering with tofu and tempeh. But that stopped in the 1970s, in part because of cultural assimilation. Their population in Holland is diminishing, as some went back to independent Indonesia. Ketjap [soy sauce] is still very popular in Holland.

Sjon knows another company that has just started to make tempeh, and is now making 1,500 lb/week. He thinks it is the best quality he has seen. It is sponsored by a multinational—but Sjon cannot say who it is. Address: Netherlands.

6573. *J. of the American Oil Chemists' Society*. 1984. China cuts oilseed acreage. 61(10):1521. Oct.

• **Summary:** "China is shifting acreage from oilseed crops to grains, which will mean increased Chinese vegetable oil imports during the coming season and declining exports, according to *Oil World*, the German weekly fats and oils trade publication...

"China's ministry of agriculture has released statistics on 1983 production showing soybean production at 9.76 million tonnes, cottonseed at 9.27 million tonnes, rapeseed at 4.29 million tonnes and peanuts 3.9 million tonnes. Forecasts for those same crops for 1984 are 9.5 million tonnes, 8.95 million tonnes, 4.6 million tonnes and 3.96 million tonnes, respectively.

"A USDA report from China reports a Chinese

newspaper claimed China has become the world's leading exporter of soy sauce with 1983 sales of 27,500 tonnes valued at \$10.5 million shipped to more than 50 nations."

6574. Macrobiotic Wholesale Co. (The). 1984. Catalog and price list [Mail order]. 92 McIntosh Road, Asheville, NC 28806. 63 p. 28 cm.

• **Summary:** The catalog, effective 15 Oct. 1984, contains 450 new products from 15 new vendors, plus 73 new books. The president of the company is Don DeBona. Soy-related products include miso, shoyu, tamari, nigari, kinako, natto and koji spores, black soy beans, tekka, Ah Soy soy drink (soymilk), and amasake.

One of the many suppliers is The Mitoku Co. Ltd., which "was founded in Tokyo [Japan] in 1968 by Mr. Kazama at the express behest of Michio and Aveline Kushi. In fact, the company was named after MI-chio and TO-moko (Aveline's real name; Aveline was given her name by George Ohsawa) KU-shi." Address: Asheville, North Carolina. Phone: 800/438-4730 or 704/655-1056.

6575. *J. of the American Oil Chemists' Society*. 1984. Soyfoods entering mainstream U.S. diet. 61(12):1800-02, 1804. Dec. [1 ref]

• **Summary:** One relegated mainly to small natural foods outlets, soyfoods are now found in regular supermarket chains throughout the USA. The most widely available are soy sauce and tofu. Contains a discussion of the soyfoods market in the USA. One of the most popular new products is Tofutti, a non-dairy frozen dessert.

6576. Kotzsch, Ronald E. 1984. Made in Japan—naturally: Natural foods from the Muso Company are popular worldwide. *East West Journal*. Dec. p. 14-21.

• **Summary:** "Muso was founded in 1966 as a macrobiotic food company, aiming to provide the highest quality traditional Japanese foods. It is now the oldest and largest macrobiotic food concern in Japan. Within the natural foods movement in the country it is one of the top three firms. Also, since 1969, it has been a major exporter of macrobiotic foods. With its Tokyo-based competitors the Mitoku Company and Ohsawa Japan, it dominates the large and growing international trade in Japanese foods."

Shuzo Okada, one of George Ohsawa's earliest and most devoted disciples, was the son of a family of Osaka textile merchants. After Ohsawa's death in 1966, Okada invested \$3,000 to establish Muso Shokuhin in Osaka, with his eldest son Teizo as director. Yuko Okada, the second eldest Okada son, was head of the export division; he had spent 6 years living in Boston, mostly working for Erewhon. Initially the company was located in Fukusenji, a dilapidated Buddhist temple.

Today "the company has gross annual sales of over \$25 million and employs over 120 people. In addition to the

Osaka headquarters, built at a cost of over \$1 million, it has an 18,000-square-foot production and warehouse facility in Osaka, as well as branch offices in six other cities. It wholesales over 1,800 products in the domestic market... Muso has accounts with nearly half of Japan's 3,400 natural food outlets. In addition, it has developed a rapidly growing franchise chain of fifty-two stores, mostly in the Kansai area...

"About \$5 million a year comes from international sales... Growth in the international sector has been steady despite the blow of the 1981 Erewhon bankruptcy. (Muso had credits of about \$200,000 when its chief customer failed, and lost over \$150,000 of that.) Muso, which is now owned by more than fifty investors, was able to survive the shock. Muso exports about 270 different products...

"At present a runaway best seller is a soybean drink made of soybeans, pearl barley, kombu sea vegetable, and malt sweetener. Marketed in North America as Edensoy it has proven an excellent dairy substitute."

There follows a description of the Nanki Umeboshi Co., Muso's principal supplier, and then of the Kanemitsu Miso Co. (in Fuchu City, Hiroshima prefecture) which has been in business for 300 years. "While it once made sake and soy sauce as well, it now produces only miso—1,300 tons a year." There are now some 2,000 miso makers in Japan and Kanemitsu is one of only 200 which produce more than 1,000 tons annually. It is one of a very few which produce miso according to traditional methods... It is aged in natural temperatures for two years, run through a masher, then packed in either 40-pound wooden kegs or 1-pound plastic pouches. "All the miso going into the pouches is pasteurized by 84°C heat. If it were not, gases produced by the continuing fermentation would burst the bags. Kegs may or may not be pasteurized."

Photos show Yuko Okada.

6577. *SoyaScan Notes*. 1984. Chronology of events during 1984 concerning *Soyfoods* magazine, Doug Fiske, Richard Leviton, and William Shurtleff (Overview). Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 30—Fiske, owner of *Soyfoods* magazine in Encinitas, California, writes William Shurtleff of Soyfoods Center. This letter is written on a new *Soyfoods* letterhead with a new matching envelope.

Feb. 15—Fiske mails a letter to "Dear Reader," the many people receiving *Soyfoods* magazine free of charge. "In the face of the economic realities of magazine publishing, *Soyfoods* is converting its circulation from mostly free to mostly paid... On January 1, 1984 a one-year subscription to soyfoods went from \$15 to \$20." But, by responding now, you can save \$5.00 on your subscription. A coupon is enclosed.

April 13—Leviton writes Fiske to explain that he does not want to continue working with *Soyfoods* magazine. He

finds his soy sauce book project stimulating.

March—Fiske writes subscribers apologizing for the delay in publishing. Issue No. 10 is scheduled to be published June 29, 1984.

April 17—Gary Barat, president of the Soyfoods Association, writes a letter on his Legume letterhead to all Soyfoods Association members, urging them to take advantage (as he plans to) "of the Ad / Cover Proposal / Editorial proposal which Doug Fiske of *Soyfoods Magazine* outlines in his enclosed letter... Six of our members have already committed to the cover;..."

April 19—Fiske sends a letter to soyfoods producers asking for help with the magazine, and a sheet of mechanical specs and advertising rates.

May 7—Fiske sends Shurtleff a check to cover the cost of making 422 ads, changes, and deletes to the magazine's mailing list. Also his edited version of an article on tempeh in Japan.

June 11—Shurtleff writes Leviton in Glastonbury / Avalon, England, asking if he would be willing (as a consultant) to visit a tofu plant near London.

Aug. 17—Fiske writes Shurtleff 2 letters concerning details of publishing *Soyfoods* magazine, and responding to Shurtleff's comments on the last issue (full-color cover published summer 1984).

Sept. 5—Leviton writes Shurtleff from Somerset, England; responds to questions written him by Mark Fruin concerning the seriousness of his commitment to writing the soy sauce book with Shurtleff and Fruin. He will honor his agreement but is disappointed that a publisher for the book has not yet been found.

Oct.—Fiske writes a letter to readers (300-350 domestic producers), encouraging them to advertise and enclosing rates. Sends a personal, handwritten letter to Shurtleff with the form letter.

Oct. 21—Shurtleff writes Fiske concerning the annual Soyfoods Year in Review he has written jointly with Leviton for the past 3 years.

Nov. 4—Fiske writes Shurtleff. A small publishing company nearby has shown interest in *Soyfoods* magazine. They want numbers. Doug is cautiously optimistic.

Nov. 28—Leviton writes Shurtleff from Massachusetts. He is back in the USA for a few months and will be in California to visit in December and January. He has finished his book (not related to soy), 1250 pages. He is pleased with it, and will send the manuscript to a literary agent in New York City next week. He will pick up his boxes of personal belongings in the Shurtleffs' garage when he visits.

6578. **Product Name:** The Works. SuperNatural Condiment.

Manufacturer's Name: American Natural Foods, Inc.

Manufacturer's Address: Box 2321, Chapel Hill, NC 27514.

Date of Introduction: 1984.

Ingredients: Fresh onions, tomato paste, pure water, red miso, honey, garlic juice, celery juice, umesu (Japanese plum vinegar), tamari (whole soybeans, water, sea salt), natural herbs and spices, mustard, arrowroot powder, natural seaweed extract.

Wt/Vol., Packaging, Price: 12 oz (336 gm) jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1984, dated. 8 by 4 inches. Paper. Red, blue, yellow, white on burgundy. Picture of wizard with staff. “New. Made with miso. Give ‘em The Works... an all natural wonder. Everything you want on it—is in it! It’s all you need to make historic hot dogs, brilliant burgers, spectacular sandwiches, outrageous omelets, terrific tempeh and fantastic fries!” Signed by Wizard Baldour. Label. 1985, dated. 8.25 by 4 inches. Paper. Red, yellow, black, and white on navy blue. Hamburger looking illustration. “New. For hot dogs, burgers, tacos, omelets and lots more! Made with miso.” Reprinted in *Soyfoods Marketing*. Lafayette, CA: Soyfoods Center.

6579. *AOK Magazin (Germany)*. 1984. Soja: (2) ein Tausendsassa! [Soya: The bean of a thousand forms!]. 25(4):15. [Ger]

• **Summary:** A brief introduction to the many foods made from the soybean, including soy sauce, soymilk, tofu, and miso. Note: This is the major health insurance magazine in Germany, with a huge circulation.

6580. **Product Name:** Tasty Tofu (Herb Tofu–Marinated and Baked).

Manufacturer’s Name: Bountiful Bean Plant. Baked at Nature’s Bakery.

Manufacturer’s Address: 2049 1/2 Atwood Ave., Madison, WI 53704.

Date of Introduction: 1984.

Ingredients: Herb Tofu (water, organic soybeans, calcium sulfate, magnesium chloride, herbs and spices), baked with shoyu soy sauce and oil at Nature’s Bakery.

Wt/Vol., Packaging, Price: 4 oz. or 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Interview with Deborah Bachmann. 1987. Dec. 29. This is an herb tofu that is marinated with shoyu, baked, and vacuum packed. It is ready to eat. Ad. 1987. Spring. “Whee! Pop me into your toaster. Ready to eat. Serve Tasty Tofu hot or cold for snacks, hors d’oeuvres, in salads, sandwiches, or cubed in stir fries.” Label. 1985. 4 by 3.25 inches. Self adhesive. Maroon and green on white. “Ready to eat. Serve Tasty Tofu hot or cold for snacks, sandwiches, salads, hors d’oeuvres, or as a main course. No preservatives. Pareve.”

Labels sent by Elizabeth Hanson of Bountiful Bean. 1991. Nov. 12. 4 oz. and 8 oz. Same labels as above, but company is now located in Ridgeway, Wisconsin 53582.

Leaflet sent by Paul Olson, new owner of Bountiful Bean Soyfoods. 1993. Nov. 19. “Tasty Tofu: This handy snack is simply our Herb Tofu block, pressed, basted with shoyu soy sauce, and baked in a medium oven for two hours.”

6581. **Product Name:** Hummus with Tofu.

Manufacturer’s Name: Bountiful Bean Plant.

Manufacturer’s Address: 2049 1/2 Atwood Ave., Madison, WI 53704.

Date of Introduction: 1984.

Ingredients: Garbanzo beans, tofu, lemon juice, tahini, shoyu soy sauce, parsley, garlic.

Wt/Vol., Packaging, Price: 8 oz. or 12 oz.

How Stored: Refrigerated.

New Product–Documentation: Interview with Deborah Bachmann. 1987. Dec. 29. Ad. 1986-87. 3 by 5 inches. “Our favorite dip! Dip and sandwich spread.” Label. 1985. 3.5 inch diameter. Self adhesive. Blue on white. “Chip dip & sandwich spread.”

Label sent by Elizabeth Hanson of Bountiful Bean. 1991. Nov. 12. Same label as above, but company is now located in Ridgeway, Wisconsin 53582.

Leaflet sent by Paul Olson, new owner of Bountiful Bean Soyfoods. 1993. Nov. 19. The company’s Hummus still contains tofu and soy sauce.

6582. **Product Name:** Tofu Skinny Dip (with Dill).

Manufacturer’s Name: Bountiful Bean Plant.

Manufacturer’s Address: 2049 1/2 Atwood Ave., Madison, WI 53704.

Date of Introduction: 1984.

Ingredients: Tofu, lemon juice, mellow white miso, shoyu soy sauce, garlic powder, dill weed, onion powder, dry mustard, dried chives, celery seed.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Interview with Deborah Bachmann. 1987. Dec. 29. James Lubbe. 1988. March. Abbreviated History of the Bountiful Bean. Label. 1985. 3.5 inches diameter. Self adhesive. Light blue on white. “Non-dairy dip and dressing.”

6583. Branthaver, Beth. 1984. Report on visits to tofu and soy sauce plants in Beijing, China, Jan. 7. Beijing, China: American Soybean Assoc. 4 p. Unpublished typescript. [Eng]

• **Summary:** At this medium-sized plant (5,88 square meters, 270 employees) the raw material is 60% defatted soybean meal and 40% wheat starch. The fermentation takes 25 days at 48-49°C. Four grades of soy sauce are produced. Address: Beijing, China.

6584. **Product Name:** Chilli Style Tofu Burgers.

Manufacturer’s Name: Cauldron Foods Ltd.

Manufacturer's Address: 4, Conduit Place, Lower Ashley Rd., St. Paul's, Bristol BS2 9RL, England.

Date of Introduction: 1984.

Ingredients: Tofu (Soybean curd), brown rice, textured soy flour, tomato puree, shoyu (soybeans, wheat, water, salt), herbs, chilli [chili] spices, sea salt, soy oil, yeast extract, onion, extract, dried garlic, citric acid.

Wt/Vol., Packaging, Price: 150 gm poly bag, 2 burgers per bag.

How Stored: Refrigerated.

Nutrition: Per 100 gm: Calories 209, protein 15.95 gm, fat 12.05 gm, carbohydrates 6.6 gm.

New Product–Documentation: Label. 1986, code dated. Red, yellow, brown and white. "Pre-Cooked–Eat cold or warm under grill. Contains no meat, dairy products or artificial additives."

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in 1984. It is basically the same thing as the original Bristol Chilli Burger launched in 1982.

Label for "2 Chilli Flavour Tofu Burgers" sent by David Greenslade. 1994. Oct.

6585. **Product Name:** Tofu Burgers [Savoury, Peanut, Nut, or Chilli].

Manufacturer's Name: Cauldron Foods Ltd.

Manufacturer's Address: 4, Conduit Place, Lower Ashley Rd., St. Paul's, Bristol BS2 9RL, England.

Date of Introduction: 1984.

Ingredients: Savoury: Tofu (soya bean curd), brown rice, water, textured soy flour, tomato puree, shoyu (soya beans, wheat, salt, water), herbs, sea salt, soya oil, yeast extract, dried onion, dried garlic, citric acid.

Wt/Vol., Packaging, Price: 150 gm paperboard box, two vacuum packed burgers per box. Retail for 60 pence.

How Stored: Refrigerated or frozen. Do not refreeze.

Nutrition: Per 100 gm.: calories 200, protein 17 gm, fat 11 gm, carbohydrate 7 gm.

New Product–Documentation: Label. 1986, code dated. Paperboard box. Brown, green, red and black on white. "Just heat to eat. Contains no meat, dairy products, or artificial additives. Do not freeze." New label. 1989, sent by Philip Marshall. Address is now 149 South Liberty Lane, Bristol BS3 2TL. Package bears the green "V" symbol "Suitable for vegetarians."

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in 1984.

6586. **Product Name:** Clearspring Sakae Organic Shoyu, and Wheat-Free Mansan Tamari.

Manufacturer's Name: Clearspring Natural Grocer (Importer). Made in Japan.

Manufacturer's Address: 196 Old St., London EC1V 9BP, England. Phone: 01-250 1708.

Date of Introduction: 1984.

New Product–Documentation: Simon Bailey. 1988.

Natural Choice. Aug. 15. "Soya-Based Products." A photo shows the Labels. "Traditional Soya Sauce. The perfect seasoning for savoury dishes." CSP form filled out by Simon Bailey. 1988. Sept. 28. Gives date of introduction as 1984. Formerly sold under the Sunwheel label (1974). Sold to Clearspring in 1984. Peter Bradford is proprietor. The company is an importer, wholesaler and retailer of high-quality Japanese shoyu, tamari, miso, koya-dofu and macrobiotic specialties. Japanese agent is Mitoku. Various Japanese manufacturers. Letter from Simon Bailey. 1988. Oct. 10. In 1984 the old Sunwheel company on Orpheus Street closed. The brand name Sunwheel was sold, along with some higher turnover products, to Granary, which sold it in turn to Northumbrian in 1987. This brand includes shoyu, tamari, and miso that are sold to the mainstream health food trade. Clearspring, Peter Bradford's present business, agreed not to compete with the Sunwheel range, but continued to import high quality tamari, shoyu and miso for their own label, some of which he had formerly imported as the original Sunwheel company. These are available mostly in independent natural food and macrobiotic stores. Note: Mansan tamari is also imported by Great Eastern Sun in the USA.

6587. Fruin, W. Mark. 1984. Kikkoman during the latter half of the twentieth century. 8 p. Unpublished manuscript.

• **Summary:** Kikkoman is the world's largest manufacturer of soyfoods, the leading maker of shoyu in Japan, and one of the most diversified and internationally-minded of Japanese food and beverage companies. Kikkoman has assumed its leadership in these areas relatively recently, only since the 1950s. Before World War II, Kikkoman (known then as Noda Shoyu Co.) was not able to garner more than about 10% of the shoyu market in Japan. "The incentive to invest in new production capacity came from the Occupation policy of disbanding producer cooperatives; Kikkoman's growth had been limited by a network of interlocking market sharing agreements among the major shoyu producers, but once Occupation authorities removed these barriers, Kikkoman was free to grow as large as it could." Address: Menlo Park, California.

6588. Hesseltine, C.W. 1984. Fermented foods in the Orient with emphasis on soy sauce. *Nihon Shoyu Kenkyujo Zasshi (J. of Japan Soy Sauce Research Inst.)* 10(3):69-92. [39 ref. Eng; Jap]
Address: NRRC, Peoria, Illinois.

6589. Jones, Russell. 1984. Loan-words in Indonesian. *Nusa (Jakarta, Indonesia)* 19:vi-ix, 1-38. [2 ref]*

• **Summary:** Soybean sprouts are known in Indonesian as *taoge* from Hokkien *tâu* 'beans' and *gê* 'sprout.' For soya bean sauce Indonesian uses *taocio* from Hokkien *tâu-chiu*

'a thick salt sauce made from pulse.' An interesting example is the word for 'bean curd' *tahu*; this is from Hokkien *tâu-hû* 'bean-curd shaped, but not yet pressed,' and we should expect the word to appear in Indonesian (as it does in Malay) as *tauhu*; now the word happens to be one of the earliest of the foreign loans recorded in an Indonesian language, occurring in a list of words served at a banquet mentioned in an Old Javanese inscription of the 10th century (The Watu Kura A [Watukura] inscription, plate 5A, lines 4-5, see Antoinette M. Jones 1976, p. 90-91) indicating the antiquity of its adoption and suggesting that the Indonesian form comes via the old Javanese, which is also *tahu*. Address: Dep. of South East Asia and the Islands, School of Oriental and African Studies, Univ. of London, Malet St., London WC1E 7HP, England. Phone: 01-637-2388.

6590. Product Name: Local Tofu Salad (With Tahini).
Manufacturer's Name: Local Tofu.
Manufacturer's Address: 307 Route 59, West Nyack, NY 10994. Phone: 914-358-2309.
Date of Introduction: 1984.
Ingredients: Local Tofu, tahini, safflower oil, tamari sauce, umeboshi paste, lemon juice, carrot, onion, celery.
Wt/Vol., Packaging, Price: 8 oz.
How Stored: Refrigerated.
New Product–Documentation: Talk with Sam Weinreb. 1987. Dec. 29. Company started in 1979-80. Label. 1987. 3 by 1.6 inches. Purple on white. This product was first made in West Nyack, New York 10994.

6591. Product Name: Wan Ja Shan Soy Sauce, and Mandarin Chef Soy Sauce.
Manufacturer's Name: Mandarin Soy Sauce, Inc.
Manufacturer's Address: 419 North St., Middletown, NY 10940.
Date of Introduction: 1984.
New Product–Documentation: Soya Bluebook. 1984. p. 75. Soya Bluebook Plus. 1997. The company is now named Wan Jia Shian Brewery Company Ltd. They make soy sauce in Taipei, Taiwan, and also export it. There is no listing for a company in the USA.

6592. Product Name: [Tempeh Spread with Garlic].
Foreign Name: Tartiner au Tempeh (Ail).
Manufacturer's Name: Noble Bean.
Manufacturer's Address: Toronto, ONT, Canada.
Date of Introduction: 1984.
Ingredients: Organic soy tempeh, tamari, spring water, garlic, chives, soy oil.
Wt/Vol., Packaging, Price: 227 gm.
How Stored: Refrigerated.
New Product–Documentation: Label. 1985, undated. 3.5 inches in diameter. Orange and green on white. "Fresh-Delicious-Nutritious. Great for sandwiches or on crackers.

All natural. Ready to eat." Letter from Allan Brown. 1985. Aug. 7. 8 oz for \$1.95. Letter (fax) from Allan Brown. 1998. Jan. 21. This Garlic Tempeh Spread was first sold in 1984, and continued being sold until 1986.

6593. Product Name: Menu Magic Soy Sauce.
Manufacturer's Name: North American Laboratory Co. Inc.
Manufacturer's Address: 1717 W. 10th St., Indianapolis, IN 46222.
Date of Introduction: 1984.
New Product–Documentation: Soya Bluebook. 1984. p. 76; 1985. p. 99. Company is now: Menu Magic Foods. Division of North American Laboratory Inc.

6594. Nunomura, N.; Sasaki, M. 1984. Comparison in flavor compounds between Japanese shoyu and the sauces in other countries (Abstract). In: Abstracts of Papers Presented at the Annual Meeting of the Agricultural Chemical Society of Japan. See p. 129. *
Address: Central Research Labs., Kikkoman Shoyu Co., Noda, Japan.

6595. Product Name: Tofu Tamales [Green Chili, or Red Chili].
Manufacturer's Name: Southwest Soy Foods.
Manufacturer's Address: 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.
Date of Introduction: 1984.
Ingredients: Corn, organic tofu (soybeans, water, calcium sulfate—a natural mineral), green or red chili, wheat berries, safflower oil, tamari (water, soybeans, salt), spices, salt, baking powder, lime.
Wt/Vol., Packaging, Price: 20 oz plastic vacuum pouch contains 6 tamales, 8 inches square. Retail for \$2.00 (9/90, New Mexico).
How Stored: Frozen or refrigerated.
New Product–Documentation: Talk with Richard Jennings. 1987. Dec. 28. Gave date of introduction. Labels brought by Richard Jennings. 1990. Sept. 20. 3.5 by 3 inches. Self adhesive. Green or red on yellow. Illustration of corn with leaves. "Real Fast Foods. Steam for 15 minutes. Bake covered for 12 minutes at 350°F. Microwave for 6 minutes." Later version has a UPC indicia.

6596. Product Name: Tempeh Burger/Cutlet, Mild Italian Soysage.
Manufacturer's Name: Swan Gardens, Inc.
Manufacturer's Address: 1111 N.W. 22nd., Miami, FL 33127.
Date of Introduction: 1984.
Ingredients: Tempeh (cultured soybeans), purified water, soy sauce, herbs.
Wt/Vol., Packaging, Price: 8 oz. Burger/Cutlet retails for

\$1.11. Soysage retails for \$0.79.

How Stored: Refrigerated or frozen.

New Product–Documentation: Labels. 1984, undated. 3 by 4 inches. Red, white, blue, yellow, and black. “Fast food. Easily cooked. No preservatives. All natural.”

6597. Westbrae Natural Foods. 1984. Westbrae Natural–Traditional foods of Japan (Poster). P.O. Box 8711., Emeryville, CA 94662. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• **Summary:** This is a color photo of a large beige metal display rack with six shelves holding products including the following: (1) Samurai snacks, soup plum drops. (2) Tamari brown-rice wafers, Tamari brown-rice crackers. (3) Miso ramen, Instant miso soup. (4) Organic shoyu, tamari, mild soy sauce, Johsen tamari shoyu, Tofu sauce. (5) Kukicha (tea), Umeboshi (salt plums), Shiitake mushrooms, Agar flakes, Kuzu, Miso (in plastic bags; brown rice, red, barley, Hatcho). (6) Seaweeds (Wakame, kombu, hijiki, nori, sushi nori), Jinenjo soba, Somen, Brown rice noodles. At the top is the banner featuring the head of a samurai. One accompanying leaflet (printed black on white) is titled “Westbrae Natural product inventory. 4-foot Japanese foods section.” A second leaflet titled “‘Ichi-Ban’ Westbrae Natural–No. 1 supplier of macrobiotic food in the U.S.” lists the products by category. In the upper left corner are the Japanese characters for “Ichi-Ban” above a line drawing of Mt. Fuji. Address: Emeryville, California.

6598. Asunaro Eastern Studies Institute. 1984. Natural healing and foods preparation: 1984-85 (Leaflet). Escondido, California. 2 p. Front and back.

• **Summary:** Black lettering on orange paper. Classes will be taught by Noboru Muramoto, author of *Healing Ourselves*. “Asunaro is a non-profit educational organization established in 1976. Its purpose is to provide a means by which many people can understand and learn traditional oriental culture.” Address: 145 W. El Norte Pkwy, Escondido, California 92026. Phone: (619) 743-6890.

6599. Atlas, Nava. 1984. Vegetariana: A rich harvest of wit, lore and recipes. Garden City, New York: The Dial Press, Doubleday & Company, Inc. 196 p. Illust. by Nava Atlas. 23 cm. [62 ref]

• **Summary:** A vegetarian cookbook scattered with quotes on vegetarianism and historical anecdotes. Filled with lovely, creative illustrations.

Soy-related recipes include: Chinese vegetable miso soup (p. 29). White bean dip (with soybeans, p. 50 & 179). Peanut sauce (with soy sauce or tamari, p. 52). Tofu “mayonnaise” (p. 52). Tofu sesame dressing or sauce (p. 53). Eggs and tofu in peanut sauce (p. 62). Peanut rice and tofu (p. 81). Mushrooms and tofu in wine (p. 119). Stir-fried vegetables with tofu (p. 132). Address: New Paltz, New

York.

6600. Bhumiratana, Amara. 1984. ASEAN Protein Project, 1974-1984. Bangkok, Thailand: ASEAN Subcommittee on Protein. 111 p. Illust. 29 cm. [Eng]

• **Summary:** The ASEAN nations are Indonesia, Malaysia, the Philippines, Singapore, and Thailand. Contents: 1. Malnutrition problems in ASEAN countries (incl. Soy-based products as a solution to malnutrition). 2. Administration of the ASEAN Protein Project. 3. Objectives. 4. Methodology. 5. Results of ASEAN member country research: Soy products developed (high-protein, low-cost foods for infants and children, soy milk and soy milk powder, full-fat soy flour), fermentation products developed (tempe: from shophouse business to modern factory, oncom chips and flour, soy sauce, the ASEAN culture collection), other related projects, exchange of information (incl. details on the 15 ASEAN protein workshops held between July 1975 and Oct. 1984, and the publications resulting from each). 6. New ASEAN projects. 7. Conclusion.

This book, which contains many color photos and focuses on soybeans, describes one of the most successful ASEAN programs, emphasizing cooperation among the ASEAN nations in an attempt to solve the problem of malnutrition common to the region. The project, conceived in Aug. 1971, receives major funding and technical assistance from the Australian government. In May 1978 the ASEAN Full-Fat Soy Flour (FFSF) Factory in Chiang Rai, Thailand, was completely installed and has been producing continuously since then. It has a capacity of 100 tons/month. Numerous photos of the facility are shown. A pilot plant has produced up to 50 tons/month of Kaset Infant Food, which has been well accepted in 573 health centers throughout Thailand and is being evaluated in other ASEAN countries. A photo of the package (plastic bag) is shown. Address: Bangkok, Thailand.

6601. Bloodroot Collective; Beaven, Betsey; Furie, Noel; Miriam, Selma. 1984. The second seasonal political palate: A feminist vegetarian cookbook. Bridgeport, Connecticut: Sanguinara Publishing. xli + 242 p. Illust. Index. 23 cm. [35 ref]

• **Summary:** An excellent book and cookbook with a crystal clear explanation of why feminists should also be ethical vegetarians. The “Prefatory material” includes sections on “Feminism in the eighties,” “Ethical vegetarianism,” “Soyfoods,” and “On collectivity and work.”

The glossary includes brown rice, hoisin, koji, queso blanco, shiro miso, shoyu (the correct name for tamari), tahini, and tofu.

The index contains 27 entries for tofu, 19 for miso, 10 for tempeh, 4 for soymilk, and 1 each for okara and soysage. Address: 85 Ferris St., Bridgeport, Connecticut 06605. Phone: 203-576-9168.

6602. Brennan, Jennifer. 1984. *The cuisines of Asia: nine great oriental cuisines by technique*. New York, NY: St. Martin's Press. ix + 542 p. Illust. (line drawings). Index. 24 cm.

• **Summary:** The “Nine great Oriental cuisines” are those of “China, India, Indonesia, Japan, Korea, Malaysia, The Philippines, Thailand, Vietnam” (as stated on the book's cover). The book contains many recipes, yet it is largely organized into chapters by cooking techniques: barbecuing, steaming, stir-frying / using a wok, deep-frying, etc.

The chapter on “Japan” discusses soybeans, miso, tofu, and shoyu on pages 44-45. Soyfoods are said to be the 2nd largest source of protein in the Japanese diet.

The section on “Soybeans” (p. 97-104) includes a discussion of the names of various soyfoods in different Asian languages and countries. For example: “The basic bean curd is called *tau-fu* in Cantonese, *tau-hu* in Hokkien, and *tofu* in Japanese.” Or consider this (p. 99): “During the basic process of making bean curd, at the stage where the bean and water mixture is boiled, a skin or residue forms on the top. This skin [yuba] is skimmed off and dried. It is commercially available in sheets... and in the form of sticks that bear the picturesque name of ‘second bamboo’ [dried yuba sticks] in Chinese, meaning that they are the second residue from the curd.”

There follows a 3-page table titled “Soybean products” (p. 101-03) which has four columns: Description, Chinese name [Cantonese], Japanese name, comments.

Note: Before proceeding, we believe that the design of this table is fundamentally flawed. (1) Why are the names of the basic soyfoods not given in the other languages with which this book is concerned, including Mandarin Chinese, Korean, Indonesian, Vietnamese, Filipino, etc.? (3) Why is no English name given for each basic soyfood product? Sometimes the description is the English name, yet that name is rarely the name a person would use if they were selling the product in an English-speaking country. (3) Why are so many common “soybean products” omitted from this table, such as the various basic other types of Japanese miso and of Japanese shoyu (besides koikuchi shoyu), fermented black soybeans (douchi, dow see), soymilk, soy sprouts, roasted soy flour, whole soy flour, soybean oil, textured vegetable protein, etc. These problems are easily solved with alternate table designs. For example, have one table for each language, with the name of each soyfood product given first in English and then in the language of that country. Put the description and comments in a glossary to avoid repetition. Or, have a glossary entry for each soyfood, with the English name, description, comments.

The table is divided into four basic types of soybean products. After each, we will give the Cantonese name and then the Japanese name, and we will indicate disagreements using [sic]. NL = Not listed.

(1) Bean curd: Tau fu fu [sic] = kinugoshi tofu. Tau fu = momen tofu. NL = yaki tofu [sic, yaki-dofu]. NL = koya tofu or kori tofu [sic, koya-dofu or kori-dofu]. Tau fu pok = abura age. Fu chu = yuba [sic, fu chu is dried yuba sticks. Yuba in Mandarin is doufu pi]. fu joke [sic, fu jook] (bean curd sticks) = NL. Tim joke [sic, tiem jook] (sweet bean curd sticks) = NL. tau fu kon [Mandarin: doufu gan; pressed tofu].

(2) Soy sauce: Light = chan ch'an or sang chu = usu kuchi shoyu [sic, not the same]. Dark, medium = see yu chan yan = shoyu [sic, see yu is soy nugget sauce, not made in Japan. Japanese shoyu is not traditionally made in China]. Dark, heavy, sweet = chu yan = NL.

(3) Fermented bean pastes and cheeses. Black bean paste = dau see tau ch'ih = NL. Sweet, white bean paste = NL = shiro miso. White soy cheese [fermented tofu, should be classified under tofu] = pai doufu-ru or foo yee or foo yu = NL. Red soybean paste = NL = aka miso. Red soy cheese or spiced red bean curd = hung doufu-ru or nom yee or nam yu.

(3) Miscellaneous soybean productions. Soy jam = yun shi jeung = NL. Whole fermented soybeans = NL = nato [sic, natto]. Red bean sauce = saang see jeung = NL. Soybeans and malted rice = NL = moromi miso. Hoisin sauce = hoisin = NL.

In the “Basic recipes” section is a recipe for Indonesian dark sweet soy sauce (*ketjap manis*).

The Glossary (p. 499-515) contains the following soy-related entries: “Bean Curd (*tofu*, Japanese; *tao foo*, Chinese; *tahu*, Indonesian and Thai; *tokwa*, Philippines): A curdled, soft, cheeselike preparation made from soybean milk. Used as a source of protein in Asian cooking. Available loose or in packages.”

Bean paste, red sweet [from azuki beans]. “Substitute Chinese sweet red bean paste, p. 132.”

Bean paste, yellow (Chinese).

“Beans, black salted fermented. (Called dow see in Chinese) These are very salty soybeans, sold in cans in Chinese markets. Used with garlic as a flavoring for fish and pork dishes. substitute: Soybeans, cooked until soft and seasoned with plenty of soy sauce.”

Bean sprouts: Usually refers to mung bean sprouts, “although alfalfa and soybean sprouts are also used.”

Hoisin sauce: Soybeans are a major ingredient, along with garlic, chili peppers, and various other spices and ingredients.

Miso. Oyster sauce: “A Chinese sauce, made from oysters cooked in soy sauce and brine.” Used as a seasoning with cooked foods and as a table sauce. See recipe p. 146.

Red bean sauce: “A strong table sauce made from mashed soybeans.” Available in cans from Chinese stores.

Soy sauce

Also contains entries for: Kombu. Monosodium glutamate (MSG; “I do not use it nor do I recommend its use”). Mung beans.

The index contains 28 entries for soybean, 22 for soy

sauce, 14 for miso, 6 for bean paste, oyster sauce, teriyaki, 4 for bean curd—deep fried, hoisin sauce, vegetarian dishes, 2 for ketjap, and 1 each for beans—black salted fermented, bean curd—fermented, jam—soy, jang (see miso), milk—soybean, ragi, shoyu (see soy sauce), soybean oil, sukiyaki, tahu, tau-fu or tau-hu (see bean curd), tempe [tempeh], textured vegetable protein (TVP), tofu (see bean curd), tou shih [soy nuggets],

About the author (from the rear cover): “Jennifer Brennan grew up in Pakistan and India and has spent many years in Southeast Asia. She is the author of *The Original Thai Cookbook*.” She is “Winner of the IACP [International Association of Culinary Professionals] Award for the Best Literary Food Writing.”

6603. Chan, Anita; Madsen, Richard; Unger, Jonathan. 1984. *Chen Village: the recent history of a peasant community in Mao's China*. Berkeley and Los Angeles, California: University of California Press. viii + 293 p. Illust. Index. 22 cm. [20 ref]

• **Summary:** *Chen Village* opens a fascinating window on the two eventful decades (from early 1960s to early 1980s) that transformed the countryside of China—and one village in South China. Based on detailed interviews with 26 villagers now living in Hong Kong.

Page 14: “The monotony of their starch diet was lightened only by bits of tiny salt-dried fish, pickles, fermented bean curd, and fermented black beans, the kind of strong tasting condiments that in small amounts could go a long way on rice or in gruel.”

Page 105: The peasants used soy sauce with their rice. Address: 1. Sociologist and Research Fellow, Center for East Asian Studies.

6604. Clergeaud, Chantal; Clergeaud, Lionel. 1984. *Mystères et secrets du soja* [Mysteries and secrets of soya]. Paris: Editions La Vie Claire. 134 p. Illust. 21 cm. [Fre]

• **Summary:** Contents: 1. A little history, the properties of soya, soybean culture, soya and animal feeding, recipes based on whole soybeans (*fèves de soja*). 2. Soy flour, soy proteins, recipes based on soy flour and soy proteins. 3. Soy sprouts, recipes based on soy sprouts. 4. Soy oil, recipes based on soy oil. 5. Soymilk, recipes based on soymilk. 6. Tofu, recipes based on tofu. 7. Fermented soy products: miso, recipes based on miso, tamari, tamari-shoyu, recipes based on tamari and tamari shoyu, tempeh, recipes based on tempeh. 8. Other [fermented] soy-based products consumed in the world: Chee fan (fermented tofu), Hamanatto, ketjap (Indonesian soy sauce), Meitauza (fermented okara tempeh), Sufu (fermented tofu). Address: Naturopathes—Ostéopathes, France.

6605. **Product Name:** Eden Double Brewed Shoyu: Soy Sauce (Low Salt).

Manufacturer's Name: Eden Foods, Inc. (Marketer-Distributor). Made in Japan.

Manufacturer's Address: 701 Tecumseh Rd., Clinton, MI 49236. Phone: 800-248-0301 or 313-973-9400.

Date of Introduction: 1984. January.

Wt/Vol., Packaging, Price: 10 fluid oz bottle.

How Stored: Shelf stable.

New Product—Documentation: Bottle seen at Open Sesame in Lafayette, California. 1991. Feb. 16.

Talk with Michael Potter, Chairman of Eden Foods.

1993. Oct. 31. This product was made in Japan by Mr.

Okada, who was a different person from that family that runs the Muso Co.

6606. GEM Cultures. 1984. *Food cultures from around the world / and more* [Mail order catalog]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 4 p. [4 ref]

• **Summary:** Contents: 1. Powdered cultures for soy crafters: Powdered starter cultures for tempeh, miso, amazake, shoyu, and tamari. In home and commercial sizes. Rice koji. 2. Koji starter kits. 2. Fresh self-renewing cultures: Viili starter, sourdough starter, kefir grains, natto starter, living tempeh starter. 3. Coagulants for tofu making (nigari, Terra Alba calcium sulfate in 1 lb or 5 lb bags).

4. Some helpful books. 5. Sea vegetables from the Mendocino Sea Vegetable Co. Our purpose. How to order. Address: Fort Bragg, California. Phone: 707-964-2922.

6607. Gerras, Charles. ed. 1984. *Rodale's basic natural foods cookbook*. Emmaus, Pennsylvania: Rodale Press. xi + 899 p. Illust. Index. 24 x 20 cm.

• **Summary:** This book, containing over 1,500 recipes, does not use salt or white sugar, but does use meats, poultry, and fish. It was also published by Simon & Schuster as “A Fireside Book.” It contains extensive information on and many recipes for soyfoods, including whole dry soybeans, tofu, soy ice cream, soy flour and grits, miso, soymilk, soy oil, okara (soy pulp), soy sauce, tamari, and soy sprouts. Address: Pennsylvania.

6608. Greenwood, Sadja. 1984. *Menopause, naturally: Preparing for the second half of life*. San Francisco, and Volcano, California: Volcano Press. 201 p. Illust. by Marcia Quackenbush. 23 cm. [36 ref]

• **Summary:** This is a pioneering, wonderful book on menopause. Chapter 10, titled “Estrogen replacement therapy: The pros, cons, and unknowns” states (p. 89) that when estrogen was first isolated in the 1920s, it was used for women who had lost their ovaries through surgery and for women with severe problems after natural menopause. “However, its use was not widespread until the 1960s, when a book entitled *Feminine Forever*, by Robert Wilson, popularized estrogen use for all women who wanted to retard aging and retain their feminine allure. The use of ‘estrogen

replacement therapy,' or ERT, spread widely among middle- and upper-class women treated by private physicians."

Chapter 15, titled "Nutrition: All about eating and drinking" (p. 147-76) advocates a diet low in meat and high in whole grains, beans, vegetables, and fruits. Beans are excellent foods; they are high in protein, low in fat, and a good source of fiber. If gas is a problem, cook the beans well and serve small portions. "Fresh green beans and peas, bean sprouts, and soybean foods like tofu rarely give you gas." An illustration (line drawing) shows sacks and boxes of various types of beans (not including soybeans) and a cake of tofu. People who get much of their protein from beans and grains are also helping to make most efficient use of world food resources—an idea developed in *Diet for a Small Planet*. Sprouts are a delicious food, high in nutrients. Anyone can make bean sprouts in the kitchen from lentils, aduki beans, mung beans, etc. Sea vegetables are excellent; avoid canned veggies.

Concerning meat fish and poultry: Try to cut back, replacing them with a combination of whole grains and beans—which provides high-quality protein without added fat. "You can eliminate entirely and be healthy! Vegetarians have good health records, with lower rates of heart disease and cancer than meat-eaters." Nonfat or low-fat milk, yogurt, and cheese are good foods for mid-life women because of they are high in calcium. But some adults lack the ability to digest milk sugar (lactose), and experience cramping, gas, and diarrhea after consuming milk products. "Soy 'milk' can be used, especially in cooking, as a milk substitute." A table shows common foods that are high in calcium, including "tofu (soybean curd)." 4 oz. contains 150 mg of calcium. Note: This is the earliest English-language document seen (Oct. 2003) that contains the term "Soy 'milk.'"

Cut down on fats, sugar, salt, alcohol, and caffeine. A table titled "Suggestions for healthy breakfast foods" (p. 171) includes "Tofu (bean curd): Eat steamed, scrambled, or grilled with onions, curry, soy sauce, or other flavorings." Tofu is high in calcium. Suggestions for a healthy lunch include mashed tofu as a filling in sandwiches made from whole grain bread. Suggestions for healthy snack foods include slices of raw vegetables with tofu or cottage-cheese dip. Suggestions for a healthy dinner (p. 173) include brown rice with stir-fried vegetables and tofu. On p. 175 are recipe suggestions for Stir-fried vegetable dishes with tofu, meat, or fish.

On the rear cover is a photo of Sadjia Greenwood, M.D., M.P.H., and a biographical sketch. She is age 53, "mother of two grown sons, a vegetarian, a slow jogger, looking for the truths about life and the joy in every day." A general practitioner, she has long been associated with women's health programs. "She is Medical Director of Min An Health Center, which utilizes Eastern and Western medical treatments, and is Assistant Clinical Professor at the University of California Medical Center, San Francisco."

Note: In 1984 the phytochemicals in soybeans and their possible benefits for menopause were largely unknown.

Note: This is the earliest document seen (Sept. 1999) in which soy is mentioned in connection with relief of menopausal symptoms. Address: M.D., MPH, San Francisco, California.

6609. Hapgood, Fred. 1984. Log of soyfoods research in Japan, Sri Lanka, and China, Oct/Nov., for *National Geographic* magazine (Log—unpublished). 85 p. Unpublished log.

• **Summary:** Fred was researching an article about the soybean for *National Geographic* magazine. This handwritten log is filed in Soyinfo Center file cabinets by country keyword. Thus, the portion concerning Sri Lanka (p. 13-43, 57-64) is filed with the documents concerning South Asia (AsSo) in 1984. The first person he met in Sri Lanka was Mr. S. Pathiravitana, editor, *Soyanews*.

6610. Kagaku Gijutsu-cho, Shigen Chosa-kai (Science & Technology Bureau). 1984. Shitei shokuhin seibun hyô [Standard tables of food composition in Japan. 4th ed.]. Tokyo. 370 p. Introduction by R. Kagawa, Joshi Eiyo Daigaku. 28 cm. [Jap; Eng]

• **Summary:** Pages 76-80 gives a nutritional analysis of the following Japanese soyfoods: Soybeans: whole domestic (dry, or boiled), USA whole dry, Chinese whole dry. Green immature: raw, or boiled. Soybean sprouts: raw, or boiled. Defatted soybeans: whole, or dehulled. Kinako (roasted, ground soybeans). Budô-mame. Tofu: regular (momen), silken (kinugoshi), soft, packed, Okinawa tofu, grilled (yaki-dofu), nama-agé (deep-fried tofu cutlets), abura-agé (deep-fried tofu pouches), ganmodoki, kori-dofu, Tofu chikuwa (steamed, or roasted). Natto: Itohiki natto, goto-natto, tera-natto (fermented black soybeans). Miso: Rice koji miso (ama miso, light yellow miso, dark yellow miso), barley koji miso, soybean koji miso, dried miso, kinzanji miso, hishio miso. Okara. Soymilk: regular, reconstituted, soft drinks. Yuba: Fresh, or dried.

Page 254 gives the amino acid composition of soybeans, tofu, dried frozen tofu, yuba, okara, natto, and 3 types of miso. Address: Japan.

6611. Kikkoman. 1984. Kikkoman (Singapore) PTE. LTD. (Brochure). Tokyo: Kikkoman Corp. 9 p. [Eng]

• **Summary:** Construction of this plant began in Aug. 1983. "The completion of the facility in July 1984 was celebrated with a push-button ceremony to signal the beginning of Kikkoman Soy Sauce production in Singapore." The plant cost \$14 million to build. The grand opening of the Kikkoman shoyu plant in Singapore was on 21 Nov. 1984. Located at 7 Senoco Crescent, Singapore 2775, the plant has a production capacity of 3,000,000 liters a year, an area of 18,000 square meters, and 40 employees. Address: Tokyo.

• **Summary:** Contents: Introduction. Species used for fermentation. Natural inoculation. Traditional starters: Chinese yeast, tane koji, tempe inoculum. Fermented foods and mycotoxins. Roles of the moulds: Synthesis of enzymes, mould growth, synthesis of colouring compounds, protection of the product. Conclusion. Address: Bandung Inst. of Technology, Indonesia, and Agricultural Univ., Wageningen, Netherlands. Present address: Tarthorst 333, 6708 HL Wageningen, The Netherlands.

6613. Kurz, Marey. 1984. *Soja in der Vollwertkueche: Rat und Rezept-Ideen zum Kochen und Backen mit allen Soja-Varianten: Bohnen, Mehl, Milch, Sauce, Tofu und Miso. Das erste komplette Soja-Kochbuch* [Soya in whole-foods cookery: Advice and recipe ideas for cooking and baking with all the varieties of soya: Beans, flour, milk, sauce, tofu and miso. The first complete soya cookbook]. Munich, West Germany: Graefe und Unzer GmbH. 102 p. Illust. Index. 20 cm. [11 ref. Ger]
Address: West Germany.

6614. Rosengarten, Frederic, Jr. 1984. *The book of edible nuts*. New York, NY: Walker and Company. xxv + 384 p. See p. 324-27. Illust. Index. 26 cm. [330* ref]

• **Summary:** The chapter titled "Soybeans" (p. 324-27) contains a brief discussion of soybean oil, soybean meal, tofu, miso, tempeh, and soy sauce, plus more detailed information on soynuts, which are attractive nut substitutes. Soynuts are whole soybeans that have been processed to look and taste like nuts, and be used like nuts. With a crunchy texture and no cholesterol, they have more than twice the protein content of most tree nuts and are relatively inexpensive. The author explains that large-seeded vegetable-type soybeans are used for soynuts. He describes how they are processed and the different flavors and brands that are available.

One major reason for the vast increase in soybean production in the USA is the ease with which the crop can be fully mechanized. Address: Associate in Economic Botany, Botanical Museum, Harvard Univ. [Massachusetts].

6615. Saito, Akio. 1984. [Chronology of soybeans in Japan, 1970 to 1984] (Document part). In: Akio Saito. 1985. *Daizu Geppo* (Soybean Monthly News). Feb. p. 16-18. [Jap]

• **Summary:** 1970–Soybean cultivation area in Japan drops to 95,500 ha, falling below 100,000 ha for the first time. Soybean cultivation area in Japan is nearly 10% of total cultivation area for all crops.

1970–Soybean imports rise to 3,243,790 tonnes, passing 3 million tonnes for the first time.

1972–Production of defatted soybean meal reaches 2,035,000 tonnes, topping 2 million tonnes for the first time. Production has risen 2.8 fold during the past decade.

1972–Production of deep-fried tofu pouches (*aburage*) reaches 200,000 tonnes.

1973–Soybean imports reach 3,635,000 tonnes, up 7% over last year despite U.S. export regulations.

1973–Some 2,740,000 tonnes of soybeans, representing about 80% of all soybeans in Japan, are crushed to make soy oil. 1973 Jan. 27–An extraordinary Cabinet meeting is held and the decision is made to import soybeans from the USA urgently. The price of soybeans in late 1972 was 3,000 yen per 60 kg sack but now it has become very difficult to get them even if you pay 15,000 yen per 60 kg. Soybeans are called "yellow diamonds."

1973 June 27–President Richard Nixon sets new regulations for U.S. soybean exports. These give the Japanese tofu, miso, and soy oil industries a big "shock."

1973 July 6–The Japanese government passes a new law that forbids soybean brokers or sellers in Japan from buying up and selling at inflated prices 16 important items—including soybeans.

1973 July 12–The Japanese Department of Commerce announces that it permits the export of soybeans for special food uses, such as tofu and high-quality misos, which were planted under previous contracts.

1973 Sept. 7–The U.S. Department of Agriculture removes all regulations that concern exports of agricultural products.

1973 Oct. 17–OPEC nations decide to regulate the production and supply of crude petroleum. This leads to huge price increases in petroleum products—known in Japan as the "oil shock." Japanese buy up toilet paper and wash detergents causing much confusion.

1974–Good quality miso now retails on average for 251 yen/kg, up 22.4% from last year. The average retail price of shoyu in Tokyo is 434 yen for 3 liters, up 33.5% from last year.

1974 Feb.–The Japanese Ministry of Agriculture and Forestry asks manufacturers of tofu, natto, deep-fried tofu pouches, and dried-frozen tofu to reduce the retail prices of their products to the levels they were at in November 1973.

1974 July 30–In order to get rid of AF2 (a preservative widely used in tofu), the City of Tokyo decides to make a public announcement of all foods which may contain AF2 and announces that food inspections will start immediately, on August 1.

1974 Aug.–The Japanese Ministry of Public Welfare forbids the usage of AF2.

1974 Oct.–The JAS food certification system, formerly applied to widely distributed foods, is applied to tofu, natto, konnyaku, etc., which are foods that are distributed over a

small area.

1975—The typical price of Tofu in Tokyo is 60-70 yen per 300 gm. Yet in supermarkets it averages 50 yen, and some sell it for as little as 25 yen.

1976—Soybean production in Japan drops to 109,500 tonnes, the lowest level since 1878 when production statistics started to be recorded.

1978—The soybean cultivation area reaches 127,000 ha, topping 100,000 ha for the first time in 9 years.

1978—Soybean imports rise to 4,260,000 tonnes, topping 4 million tonnes for the first time. This is 4.5 times as much soybean imports as 20 years ago.

1978 Aug.—Unbranded generic foods, such as shoyu, miso, and salad oil, start to be sold. They retail for about 30% less than major branded products.

1979—Tofu production continues to rise, reaching 1,114,000 tonnes, an topping 1.1 million tonnes for the first time.

1980—Production of natto reaches 153,000 tonnes, up 33% compared with 10 years ago (when it was 115,000 tonnes).

1981—The area occupied by registered soybean varieties rises to more than 60% of total soybean area.

1981 Per capita consumption of miso drops below 6 kg/year to 5.9 kg/year, down 30% compared with 20 years ago (when it was 8.4 kg) This is a reflection of the health food movement in Japan.

1981 Sept.—Dr. Hirayama of the National Cancer Center announces that miso soup has some effect on lowering the death rate from stomach cancer, stroke, and sclerosis of the liver.

1981 Nov.—The Ministry of Agriculture and Forestry announces JAS (Japanese Agricultural Standards) for soymilk. The soymilk boom starts. The total yen value of the soymilk by all major Japanese manufacturers is 5,000 million yen.

1982—There are now 77 registered varieties of soybeans cultivated in Japan. Two of these (Norin 1-go and Norin 5-go) have a Norin [Ministry of Agriculture] number, and 25 have various place names.

1982—Production of soybeans in Japan this year is 226,300 tonnes, and soybean imports are 4,344,000 tonnes—which is only 5% self sufficiency.

1982—Per capita consumption of soy oil rises to 5.1 kg, topping 5 kg for the first time. It is 3 times higher than it was 3 years ago.

1982—Production of defatted soybean meal reaches 2,800,000 tonnes—up 38% over the last 10 years.

1983—Production of soymilk in Japan rises to 116,724 tonnes, topping 100,000 tonnes for the first time. It has risen 71% during the past year.

1983—Per capita consumption of soybeans in Japan is 5.8 kg, up 3.6% during the past year.

1984—The use of soymilk as a beverage is declining in

Japan. The movement to use more soymilk as an ingredient in foods (such as noodles, breads, ice creams, and creamy soups) is becoming more active.

1984—Soybean yields in Japan reach 1,770 kg/ha, an all-time record. The old record was 1,540 kg/ha in 1982. Address: Norin Suisansho, Tokei Johobu, Norin Tokeika Kacho Hosa.

6616. Samson, Robert A.; Hoekstra, E.S.; Oorschot, C.A.N. eds. 1984. Introduction to food-borne fungi. 2nd ed. Baarn, Netherlands: Centraalbureau voor Schimmelcultures. 248 p. Index. 30 cm. [164* ref]

• **Summary:** Contents: Introduction. 1. Identification: Zygomycetes, Ascomycetes (*Aspergillus*), Deuteromycetes (*Monascus*, *Mucor*, *Rhizopus*), Yeasts, References. 2. The detection and quantification of fungi in food, by B.J. Hartog. 3. Fungal growth on foodstuffs related to mycotoxin contamination, by M.D. Northolt & P.S.S. Soentoro. 4. Mycotoxins, sampling and chemical detection, by H.P. Van Egmond. 5. Heat resistance of yeast cells and fungal spores, by W.I. Baggerman. 6. Food preservatives, by E. De Boer. 7. Fermentation of foods by moulds, by Ko Swan Djien. Appendix. Glossary of used mycological terms. Special literature on food mycology. Index of the taxa described in chapter 1. In the Identification chapter, details and good illustrations (line drawings) and photos are given for the genera of molds used with soyfoods mentioned above. Address: Netherlands.

6617. Shurtleff, William; Aoyagi, Akiko. comps. 1984. Soyfoods labels, posters & other graphics: 5. Miso and soy sauce. Lafayette, California: Soyfoods Center. 164 p. 28 cm.

• **Summary:** This book is a collection of black-and-white photocopies of materials ranging in date from 1975 to 1984. The books in this series, each a unique collection of graphic materials, are designed for a number of purposes: (1) To serve as a source of ideas, ingredients, inspiration, legal specifications, and basic guidelines for companies in the process of designing graphics for their own soyfoods company. (2) To document the tremendous diversity of soyfoods products and ways of introducing them to the public. (3) To document, through this, the rise and history of the soyfoods industry and market in the Western World.

Contents: Miso. Second generation miso products. Soy sauce, shoyu & tamari. Second generation soy sauce products. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6618. Steinkraus, K.H. 1984. Solid-state (solid-substrate) food/beverage fermentations involving fungi. *Acta Biotechnologica* 4(2):83-88. [13 ref]

• **Summary:** Contents: Summary. Introduction. Oriental food fermentation: Tempeh, miso, soy sauce, tape ketan. Address: Inst. of Food Science, Cornell Univ., Geneva, New York

14456.

6619. Wood, B.J.B. 1984. Progress in soy sauce and related fermentations. *Progress in Industrial Microbiology* 19:373-409. M.E. Bushell, ed. Modern Applications for Traditional Biotechnologies. [100 ref]

• **Summary:** Contents: Introduction. Soy sauce: Introduction, raw materials and koji, the *unami* taste, defatted soybean meal, microbiological considerations, moromi stage of fermentation, refining of and properties of shoyu, patents, work with Japan. Miso. Tempeh. Conclusions.

Tables show: (1) Glossary of terms used in soy sauce and similar fermentations: *Koji*, *miso* (*hatcho*, *mame*, *mugi*, *genmai*, *kome*), *moromi*, *shoyu* (*koikuchi*, *usukuchi*, *tamari*, *shiro*, *saishikomi*), *tamari*, *teriyaki*. (2) Recently published national standards for soy sauce, miso, etc. (cites 8 standards, 5 from Taiwan and 1 each from Thailand, Malaysia and USA). (3) Recent patents relating to shoyu and miso production and processing: Japanese 1980 shoyu (13 patents), Japanese 1981 shoyu (11), USA 1979 (2), USA 1980 (2), Japanese 1979-1981 miso (8), USA tempeh 1979-1980 (3 patents). (4) Japanese journal titles and their English translations (11 journal frequently cited in FSTA—Food Science and Technology Abstracts). Address: Applied Microbiology Div., Dep. of Bioscience and Biotechnol, Univ. of Strathclyde, Glasgow, G1 1XW, Scotland.

6620. Wu, Olivia. 1984. Grand wok cookbook. Woodbury, New York, London, Toronto, Sydney: Barron's. vi + 218 p. Plus 36 unnumbered pages of color plates. Illust. (color). Index. 25 cm.

• **Summary:** The section titled "Ingredients" (p. 25-37) includes: Soy sauce: "The French translate this term with more success: *essence de soja*. There's nothing about this extract of soy beans that is remotely like a sauce." "Dark soy is sometimes labeled 'mushroom soy sauce' or 'shrimp soy sauce' because additional flavors are added to it. These flavors are subtle... Finally there is an extremely thick and dark soy sauce, sold as 'double-dark soy sauce' or 'thick soy sauce'" (p. 28-29).

Note: This is the earliest (and only) document seen (April 2012) that contains the term "shrimp soy sauce" or the French term *essence de soja*.

"Tofu: Also called bean curd,..." Use only fresh tofu. Bean sauce, which contains naturally fermented soybeans, is known as miso in Japan. Hoisin sauce is also a bean-based sauce. Oyster sauce (which in French is called *essence des huîtres*, or "essence of oysters").

Soy related recipes include: Miso omelette (p. 79). Tofu and bean sprouts with spicy peanut sauce (p. 160). Crabmeat over tofu (p. 171).

Note: Concerning "essence de soja," it is not listed in our *Cassell's French Dictionary* (1978) under "essence" or "soja." A Google search for the term *essence de soja*

(15 July 2011) gets about 259 results, some of which are duplicates. Here are some examples: (1) On the menu of the Eiffel Tower restaurant in Las Vegas, under "A La Carte Menu—Fish, Seafood" is "Loin of Ahi Tuna." The French-language description of the dish includes "Essence de Soja et d'Agrumes" [citrus fruit]. (2) A website selling "Soja Coffee" in cartons of 100 states (in French): *La base de notre 'Soja Coffee' est un grain pur arabica enrichi d'un extrait de soja. Découvrez l'alliance du café occidental et de l'essence de soja, plante traditionnelle en Asie*. The sense used here does not seem to refer to soy sauce, but to soy coffee (powdered or spray dried). (3) The restaurant "Le Divin Caprice" in Brussels / Bruxelles, Belgium, offers *Essence de Soja & Miel d'Acacia*. (4) The Restaurant "Le Sarment de Vigne" offers one dish which contains an unspecified amount of "essence de Soja." Address: Cooking instructor, born in Shanghai.

6621. **Product Name:** Powdered Shoyu, and Powdered Tamari.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 3236 Boulevard, Colonial Heights, VA 23834.

Date of Introduction: 1984?

Ingredients: Soybeans, salt, water (No wheat).

Wt/Vol., Packaging, Price: 44 lb (22 kg) metal cans.

How Stored: Shelf stable.

New Product—Documentation: Letter (fax) from Norio Kushi. 1995. May 1. Steve Zoller says that San-J sells a powdered soy sauce which is made for them from their non-organic (soy meal) soy sauce. The product is spray dried and is coated with maltodextrin, which comprises 25% of the finished product.

Talk with Steve Zoller, vice-president and general manager of San-J. 1995. May 1. They make both powdered shoyu and powdered tamari.

6622. **Product Name:** [Tofu Spread].

Foreign Name: Tofu Pastete.

Manufacturer's Name: Svadesha R. Urban.

Manufacturer's Address: Das Werkhaus, Leonrodstr. 19, D-8000 Munich 19, West Germany. Phone: 089 / 93 90 05.

Date of Introduction: 1984?

Ingredients: Tofu*, fresh Egerlinge mushrooms, olive oil*, wheat*, carrots*, shoyu*, arrowroot, balsam vinegar, finely minced vegetables, sea salt. * = Organically grown (aus kontrolliert biologischem Anbau).

Wt/Vol., Packaging, Price: 150 gm.

How Stored: Refrigerated.

New Product—Documentation: Label sent by Anthony Marrese. 1990. March 22. 4 by 1.5 inches. Green on white. Logo of sun behind breaking wave. The company's brochure titled "Svadesha Tofurei" states: "As simple as herb tofu, so varied are the ingredients and so extravagant and lavish is the

production of these Pastete. A dough is prepared from tofu, fresh carrots and onions, organic olive oil, shoyu, balsam vinegar, and a unique mixture of fine vegetables. Pastry forms are filled with this dough and boiled in water.” Talk with Svadesha R. Urban, company founder. 1990. June 13. This product was introduced on Leonrodstr. in Munich. After moving to Ostpreussenstr., he introduced new versions of the product, one with herbs and one with tempeh.

6623. Product Name: Tamari Brown Rice Crackers, Tamari Brown Rice Wafers, Tamari-Veg Chips.

Manufacturer’s Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer’s Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1984?

New Product–Documentation: Catalog. 1984.

6624. Fukushima, Danji. 1985. Fermented vegetable protein and related foods of Japan and China. *Food Reviews International* 1(1):149-209. [99 ref]

• **Summary:** Introduction. Historical aspects of soy sauce and miso. General description of fermented vegetable protein foods: Soy sauce (varieties, manufacturing, flavor components and quality evaluation), miso, natto, sufu (fermented product of tofu), fermented soy milk. Microbiology, biochemistry and nutrition: Role of koji as enzyme source (unique sources of enzymes, peptidases in koji, role of proteinases and peptidases in koji during protein digestion, role of glutaminase in koji in formation of glutamic acid during protein digestion), effect of heat treatment of soybean proteins on their digestibility and nutritive value (enzyme digestibility and yield of soy sauce, enzyme digestibility and nutritive value of protein), basic mechanisms for protein coagulation, microorganisms during brine fermentation in soy sauce and miso (change of microflora during brine fermentation, properties of *P. halophilus*, properties of *S. rouxii*, properties of *Torulopsis* species), nutritive value, safety and anticarcinogenicity of fermented foods. Future of traditional vegetable protein foods made through fermentation. References. Address: Food Science Research Lab., Kikkoman Corp., Noda-shi, Chiba-ken, Japan.

6625. Judoamidjojo, R. Muljono; Itoh, T.; Tomomatsu, A.; Matsuyama, A. 1985. The analytical study on “kecap” [kechap]—an Indonesian soy sauce. *Nippon Shokuhin Kogyo Gakkaishi (J. of the Japanese Society for Food Science and Technology)* 32(1):67-73. Jan. [8 ref. Eng; jap]

• **Summary:** “Kecap is a major seasoning or condiment in Indonesia which is made from fermented soybean. The commercial products are classified as ‘common,’ ‘sweet,’ ‘salty’ and ‘viscous.’ The composition of kecap varieties was characterized by their high sugar contents (40.51-65.45%)

except the salty varieties (3.84-19.36%). The sugar contents were mostly sucrose, glucose and fructose and were derived from the sweetening agent added, i.e. palm sugar, cane sugar or molasses.”

“In 1980, the national production of kecap in Indonesia could be estimated about 18,000-20,000 kl.” A detailed description is given of the process for making kecap. Address: 1&4. AP4 Project, Faculty of Agricultural Engineering and Technology, Bogor Agricultural Univ., Darmaga, Bogor, Indonesia; 2. Faculty of Agriculture, Tohoku Univ. Tsutsumidori-Amamiyacho, Sendai 980; 3. Japan International Cooperation Agency, Ichigaya Honmuracho 42, Shinjuku-ku, Tokyo 162.

6626. Product Name: [Vegetable Terrine with Tofu].

Foreign Name: Terrine Végétale: Tofu.

Manufacturer’s Name: La Maison du Tofu.

Manufacturer’s Address: Hameau de la Magdeleine, 69770 Montrottier, France. Phone: 74.70.11.38.

Date of Introduction: 1985. January.

Ingredients: Soya*, rolled oats*, sesame puree, onions*, parsley*, soy sauce, salt, nutmeg, carrots. * = Organically grown.

Wt/Vol., Packaging, Price: 160 gm.

How Stored: Refrigerated.

New Product–Documentation: Form filled out by Patrick Wintzer for Anthony Marrese. 1989. Nov. This company began production of two tofu products in Jan. 1985. They now make 120 kg/month of this product.

Label. 1989. Orange on white. The logo is a rayed sun rising behind a house and mountains.

Note: *Webster’s Dictionary* defines terrine (a French term first used in about 1706) as “a mixture of chopped meat, fish, or vegetables cooked and served in a terrine.”

6627. Saito, Akio. 1985. Daizu bunka-shi nenpyô [Chronology of soybeans, 122 B.C. to 1984]. *Daizu Geppo (Soybean Monthly News)*. Jan. p. 12-16; Feb. p. 10-18. 28 cm. [Jap; eng+]

• **Summary:** This very interesting, well-researched, and detailed chronology, which is full of new information, focuses on the development of soybeans and soyfoods in Japan. We have divided the contents of the chronology into 9 separate records; the date of each corresponds to the last year in that part of the chronology: 1292, 1599, 1699, 1868, 1899, 1926, 1949, 1969, and 1984. Address: Norin Suisansho, Tokei Johobu, Norin Tokeika Kacho Hosa.

6628. Hatsuhana. 1985. Hasuhana (Ad). *New York Times*. Feb. 10. p. 735.

• **Summary:** A half-page ad for this Japanese restaurant at 17 East 48th St. Most of the ad is devoted to the menu, which is divided into appetizers and entrees. Appetizers include: “Soy bean [miso] soup. Geso yaki, broiled squid feet with butter,

salt or soy bean paste / miso. Hiya yakko, cold soy bean curd [tofu]. Oshitashi [O-shitashi, O-hitashi], spinach prepared in a delicate sesame and soy sauce. Toro natto, chopped fatty tuna with aged soy beans in a cup.

Many of the entrees are nori-wrapped sushi.

6629. *Asahi Shinbun*. 1985. Nihon no daizu kakôgaku manabu. Nepaaru no Baideya-san. Kuni de gijutsu ikashitai. Kyô jôkyô. Hirogaru kaigai kyôryoku no wa [Mr. Vaidya of Nepal is studying soybean processing in Japan. Hoping to use the techniques at home, he arrived today in Tokyo, expanding international cooperation]. Feb. 14. [Jap]

• **Summary:** Mr. Vaidya was invited by the Rotary Club to come to Japan to learn how to make soyfoods. He will be learning about tofu, miso, and shoyu. A photo shows Mr. Vaidya making tofu at Senhachi [Senpachi?] tofu shop at Yajima-cho, Yamadera, Japan. Address: Japan.

6630. **Product Name:** [Natural Tofu, Herb Tofu, Smoked Tofu, Dried-frozen Tofu, Tofu with Toasted Nori, Seitan in Soy Sauce].

Foreign Name: Tofu Natur, Kraeuter-Tofu, Raeucher Tofu, Tofu-gefriergetrocknet, Tofu mit geroesteter Nori-Alge, Seitan in Sojasauce.

Manufacturer's Name: Geestland.

Manufacturer's Address: Burgermeisterschmidt Str. 212, D-2850 Bremerhaven, West Germany. Phone: (0471) 2 60 20.

Date of Introduction: 1985. February.

Ingredients: Natural Tofu: Water, soybeans*, nigari (MgCl). * = Organically grown.

Wt/Vol., Packaging, Price: 250 gm poly bag. Retails for DM 2.60.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Anthony Marrese. 1989. Nov. 5 by 2 inches. Dark green, yellow, black, and light green on white. "Natural food and macrobiotic from organic agriculture. 100% vegetarian (*vegetabil*). Other tofu specialties from our house:..." An illustration of a green and yellow framed house is next to a round yin-yang (*t'ai chi*) symbol.

Talk with the founder and present owner of Geestland, Paul E. Bremer. 1990. April 25. The company was founded in Feb. 1985. It started in a natural food shop (*Bioladen*) at Burgermeisterschmidt Strasse 212, D-2850 Bremerhaven. There were four products from the beginning, as shown above. About 2 years ago the company moved to: Friedrichstrasse 19, D-2850 Bremerhaven.

Their smoked tofu is made by a special process. Ordinarily, smoking foods imparts benzopyrene (a chemical carcinogen), but they have developed a special smoking process after which no detectable benzopyrene can be found in the tofu.

6631. **Product Name:** Granose Soya-Franks: Vegetarian Soya-Sausages.

Manufacturer's Name: Granose Foods Ltd. (Distributor). Made in West Germany by DE-VAU-GE.

Manufacturer's Address: Stanborough Park, Watford, Herts., WD2 6JR, England.

Date of Introduction: 1985. February.

Ingredients: Water, vegetable oils, onions, egg protein, wheat protein, soya protein, spices, seasonings, salt, gelling agent (guar gum, carob gum), wheat flour, glucose, apples, smoke flavour, oat-flakes, breadcrumbs, herbs, milk protein, soya sauce.

Wt/Vol., Packaging, Price: 200 gm cellophane wrapped pack. Retails for £1.06.

How Stored: Refrigerated or frozen.

Nutrition: Per 100 gm.: Calories 272.

New Product–Documentation: Food Report (Lehmann). 1985. Feb. The company says that these are just the first of some 20 new products planned for introduction this year.

Form filled out by Granose Foods Ltd. 1990. June 13. States that the product, made by DE-VAU-GE, was introduced in Feb. 1985.

Label sent by Granose. 1990. July 11. 2 by 5.5 inches. Red, brown, green, yellow, and black on white.

6632. Kikkoman International Inc. 1985. Analysis of Kikkoman Instant Soups. 50 California St., Suite 3600, San Francisco, CA 94111. 1 p. Unpublished manuscript. [1 ref]

• **Summary:** Gives a complete nutritional analysis for four packaged miso soups (aka miso, shiro miso, tofu, wakame), and Osuimono. They have a moisture content of 2.1–4.4%. Protein is 11.5–23.9%. Typically 10 gm of the dry soup is mixed with 2/3 cup water. Address: San Francisco, California. Phone: 415-956-7750.

6633. Langley-Danysz, Pernette. 1985. L'entrée discrète du soja en Europe [The discreet / cautious entry of soya into Europe]. *Revue Laitiere Francaise* No. 438. p. 16-20. Feb. [Fre]

• **Summary:** An illustration on the cover shows an American cowboy-like man, wearing a cowboy hat and cowboy boots, smoking a cigarette, and carrying a briefcase on which is written ASA. He appears to be emerging from a garbage can labeled "soya" and from his briefcase are flying several cartons of soymilk. The article begins: "Two soy products, milk and tofu, were at the center of a conference organized in September 1984 at Amsterdam [Netherlands] by the American Soybean Association (ASA)."

Gives data on the chemical composition and nutritive value of soy beverages, soymilks, and tofu. Discusses the products recently introduced in Europe. Consumption of soy products in the E.E.C., principally as soy protein concentrates or isolates, has never exceeded 40,000 tonnes/year. Consumption of traditional East Asian soyfoods such as

tempeh, miso, sufu, and soy sauce, is still low in Europe, but consumption of tofu and soymilk is growing significantly. Nutritional composition of cow's milk and soymilk are compared, and various commercial soy products are discussed.

Soy ice creams (including Ice Bean and Tofutti) are discussed in detail on page 19, col. 1. The pioneer of these soy ice creams (*ces ice cream au soja*), named Ice Bean, was developed by Farm Foods in Tennessee. Today there are a dozen other brands of tofu ice cream (*glaces au tofu*). One of these ice creames (*ces crèmes glacées*), Tofutti, made by the company Tofu Time and presented at SIAL in 1984, took the first place last fall on the hit parade of dairy products from the United States." Note: This is the earliest French-language document seen (March 2007) that mentions soy ice cream which it calls *ice cream au soja*, or *glaces au tofu*, or *crèmes glacées*.

Photos show the following products, each in a Tetra Brik carton: Nestle Bonus Soya Bean Milk, Plamil Soya Milk Concentrated, Morinaga Ever-Fresh Silken Tofu, Yeo's Soya Bean Drink, Alpro Soya Drink. Address: France.

6634. Product Name: [Smoked Tofu (Lightly Smoked)].

Foreign Name: Tofu Geraeuchert (Zart Geraeuchert).

Manufacturer's Name: Sojarei Ebner-Prosl.

Manufacturer's Address: Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.

Date of Introduction: 1985. February.

Ingredients: Soybeans (from controlled cultivation), water, tamari (natural soy sauce), herbs, spices.

How Stored: Refrigerated.

New Product–Documentation: Brochure sent by Sojarei Ebner-Prosl. 1989. Oct. 12. "Fresh products." Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 1.75 by 3.75 inches. For frying, baking, or grilling in soups, sauces or sandwiches. Made purely from plants (rein pflanzlich), of high quality. Without chemical preservatives, artificial colorings or flavorings. Logo is a green soybean plant against a white circular background.

In the company's Jan. 1989 catalog this product is called Tofu Geräuchert, is precooked, and sells retail in 150 gm, or 1,000 gm, weights. Each piece weighs about 80 gm. It is also sold to food processors in 1 kg, 30 kg, 60 kg, 100 kg, and 200 kg weights.

6635. Byrne, Maureen. 1985. The future for soyfoods. The first European Soyfoods Workshop was held in Amsterdam by the American Soybean Association, and papers covered subjects from marketing to microbiological standards. *Food Manufacture (London)* 60(3):49, 51, 53. March.

• **Summary:** This workshop was held on 27-28 Sept. 1984 at the Krasnapolski Hotel, Amsterdam, the Netherlands—organized by the American Soybean Association. Gives a brief summary of each paper presented.

Contains an interesting full-page table (p. 51) in which Oriental soyfoods are classified into two types: Non-fermented and fermented. For each non-fermented food is given the local names, description, and uses. The non-fermented soyfoods are: Fresh green soybeans, soybean sprouts (huang tou ya, Chinese), soynuts (hueh huang tou, Chinese; iri-mame, Japanese), soymilk (tou Chiang or tounai, Chinese; tonyu, Japanese; kongkuk, Korean), soy flour (huang tou fen, Chinese), soy protein-lipid film (yuba, tou-fu-pi), soybean curd (tofu).

For each fermented soyfood is given the local names, organisms used, description, and uses.

The fermented soyfoods are: Soy sauce, miso, tempeh, natto, fermented tofu, and fermented black soybeans.

Soy sauce includes Chiang-yu from China, shoyu from Japan, ketjap from Indonesia, kanjang from Korea, toyo and see-ieu from Southeast Asia.

Fermented black soybeans include tau-shih from China, tao-si from the Philippines, tau-cheo from Malaysia, tauco from Indonesia, and Hamanatto from Japan.

6636. Product Name: [Tofu Tidbits {Tofu Burger Pieces}].

Foreign Name: Tofu Happen.

Manufacturer's Name: Christian Nagel Tofumanufaktur.

Manufacturer's Address: Oelkersallee 14a, D-2000 Hamburg 50, West Germany. Phone: 040/89 49 37.

Date of Introduction: 1985. March.

Ingredients: Tofu, rice, onions, carrots (Moehren), wheat groats (coarsely ground meal; Weizenschrot), soy sauce* (Sojasauce*), arrowroot flour (Pfeilwurzelmehl), sea salt (Meersalz) * = Not organically grown (aus nicht biolg. Anbau.).

Wt/Vol., Packaging, Price: 70 gm.

How Stored: Refrigerated.

New Product–Documentation: Label. 1988. 4 by 3 inches. Black on brown. Handwritten. The company also makes Seitan, for which a label was sent. 250 gm.

6637. Product Name: [Seitan].

Foreign Name: Seitan.

Manufacturer's Name: Christian Nagel Tofumanufaktur.

Manufacturer's Address: Oelkersallee 14a, D-2000 Hamburg 50, West Germany. Phone: 040/89 49 37.

Date of Introduction: 1985. March.

Ingredients: Organic wheat flour [kontr. biolog.], soy sauce, ginger [ingwer], kombu.

Wt/Vol., Packaging, Price: 250 gm.

How Stored: Refrigerated.

New Product–Documentation: Label. 1988. 4 by 3 inches. Black on brown. Handwritten. Illustration of a soybean plant with pods!

6638. Public Sector Consultants, Inc. 1985. The potential for expanding the Michigan soyfoods industry. In: 1985. The

Potential of Food Processing for Economic Development in Michigan. PCS, Knapp's Centre, 300 S. Washington Square #401, Lansing, MI 48933. See p. III-45 to III-67. 28 cm. [47 ref]

• **Summary:** Michigan soyfoods manufacturers include Michigan Soy Products (Royal Oak; Tofu, soymilk; 1,650 lb/week of tofu), Oryana Soy Shop (Traverse City; Cooperative. Tofu, tempeh, soysage; 275 lb/week of tofu), The Soyplant (Ann Arbor; Cooperative. Tofu, tempeh, tempeh burgers, soymilk, dofugan, soysage; 7,500 to 10,000 lb/week of tofu), INARI Ltd. (Mason; Soynuts), Michigan Farm (Bitely; Miso), Hercules, Inc. (Harbor Beach; HVP), Eden Foods (soymilk importer, which hopes to build a soymilk plant in Michigan), and Midwest Natural Foods (Ann Arbor).

"Hercules produces nonfermented soy sauce [HVP] and sells its product to large final producers, such as La Choy and Beatrice Foods, located outside Michigan for sale under their labels." This report was prepared for the Michigan Dept. of Agriculture. March 15. Address: Lansing, Michigan.

The degradation of added kojic acid during soy sauce fermentation]. *Shokuhin Sogo Kenkyujo Kenkyu Hokoku (Report of the National Food Research Institute)* No. 46. p. 342-47. March. [12 ref. Jap; eng]

Address: National Food Research Inst. (Shokuhin Sogo Kenkyujo), Kannon-dai 2-1-2, Yatabe-machi, Tsukuba-gun, Ibaraki-ken 305, Japan.

6640. **Product Name:** [Tofu Burgers (Leek / Ginger, Basque Corn & Pepper, With Sea Vegetables)].

Foreign Name: Croque Tofou (Poireau / Gingembre, Basquaise, Océane).

Manufacturer's Name: Société Soy.

Manufacturer's Address: Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.

Date of Introduction: 1985. March.

Ingredients: With Sea Vegetables: French-grown soybeans, rolled oats (organically grown), British sea vegetables, shrimps, soy sauce, sunflowerseed oil, spices.

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Refrigerated.

Nutrition: Per 100 gm: Protein 14.8%, lipids 11.9%, carbohydrates 4.8%, calories 185.

New Product–Documentation: Letter from Bernard Storup. 1989. March 3. These 3 varieties were launched in March 1985 and discontinued in Sept. 1988. Label for Océane. 3.25 by 6.5 inches. Red, yellow, blue, green, and brown. Written in French, German, and Italian. Impressionistic drawing of sea vegetables. Contains 2 croquettes. Address is still Cerny.

6641. Steinkraus, K.H.; Ayres, R.; Olek, A.; Farr, D. 1985. Factors influencing permeability of the cell membrane of the osmotolerant yeast *Saccharomyces rouxii* grown in the presence and absence of 18% NaCl. I. *International J. of Food Microbiology* 1(5):291-99. March. [31 ref]

• **Summary:** *Saccharomyces rouxii* is an essential microorganism in the high salt fermentations Chinese soy sauce, and Japanese shoyu and miso. It can grow and metabolize at high osmotic pressures. "Its ability to produce ethanol, glycerol and concentrate amino acid in high salt contributes to the desirable meat-like flavors of soy sauce and miso." Address: 1-3. Inst. of Food Science, Cornell Univ., Geneva, New York.

Address: Singapore.

6643. **Product Name:** Ed & Andy's Original Tofu Teriyaki.

Manufacturer's Name: Walker and Wilks Tofoods.

Manufacturer's Address: P.O. Box 3763, Silver Spring, MD 20901.

Date of Introduction: 1985. March.

Wt/Vol., Packaging, Price: \$3.98 in California.

How Stored: Shelf stable.

New Product–Documentation: Ad in Health Foods Business. 1985. Dec. p. 39. "Get something hot in your freezer: Ed & Andy's Original Tofu Teriyaki." Label. 5 by 7 inches. Full color with photo. Przybyla. 1987. Food Engineering. April. p. 74. "First introduced in 1985."

6644. Forman, Gail. 1985. First came the egg: Recipe's to answer Easter's dilemma. *Washington Post*. April 3. p. E1, E14, E16.

• **Summary:** In the West, people generally eat eggs for breakfast, using only very few recipes. But in Asia, they are used with great robust diversity and imagination.

"The Javanese omelet is concocted of eggs fried with onions and chilies and seasoned with sweet, thick Javanese soy sauce called *ketjap manis* or *ketjap benteng*."

Chawan-mushi (Japanese savory egg custard) calls for "1 tablespoon, plus 1 teaspoon [i.e., 4 teaspoons] Japanese soy sauce."

6645. Jones, Terril. 1985. The Pacific Rim. *Los Angeles Times*. April 19. p. OC C3.

• **Summary:** Although the USA is the world leader in serious biotechnology, Japan is now making a serious effort to become the most serious competitor and eventually take the lead. Biotechnology describes the new techniques, developed in the 1970s, to manipulate genes and proteins. For centuries, Japan has been skilled in fermentation technology, a vital

process in biotechnology.

“Importance of fermentation: According to the Ministry of International Trade and Industry (MITI), Japan in 1983 had 2,600 breweries [of alcoholic beverages such as sake and beer], 1,187 *miso* bean paste companies, and 2,927 soy sauce manufacturers—more than 7,400 enterprises using fermentation.”

The larger companies are in an excellent position to diversify into sophisticated areas of biotechnology. Yamasa Soy Sauce, founded in 1645, “has been able to produce beta interferon by using antibodies—proteins that adhere only to certain substances—that are specific for beta interferon, causing the interferon to precipitate out of solution. Yamasa is the world’s first company to make and market these antibodies.

MITI’s budget for biotech in fiscal 1985 is \$4.23 billion yen (\$17 million), up 18% from 1984 and up 40% from fiscal 1983.

6646. Chico-San, Inc. 1985. Why does Chico-San pay premium prices for products and ingredients (Ad). *East West Journal*. April. 4 p. Inserted after p. 50.

• **Summary:** A 4-page glossy color advertising supplement, inserted after page 50. Chico-San describes itself as “A company built on a philosophy.” Color photos show: (1) Chico-San’s new label designs for their Organic Shoyu, Nama Shoyu (organic, unpasteurized), and Natural Shoyu. (2) Chico-San Rice Cakes. A black and white portrait photo shows J. Robert Kennedy, President, Chico-San, Inc. Address: P.O. Box 810, Chico, California 95927.

6647. Estella, Mary. 1985. Natural foods cookbook: Vegetarian dairy-free cuisine. Briarcliff Manor, NY, and Tokyo: Japan Publications. 250 p. April. Color plates. Index. 26 cm. [22 ref]

• **Summary:** This macrobiotic cookbook, though free of dairy products, uses fish in many recipes. In the chapter titled “Getting Started” there is a section on “Soy Foods” (p. 26-27) which begins by stating that “Soybeans, the king of beans, are ironically not often eaten as whole beans, but instead are processed into miso, shoyu, tofu, tamari, and tempeh.” Each of these foods are discussed briefly. Three types of soy sauce are defined: Shoyu, tamari, and commercial soy sauce (which is said to be artificially colored and processed). Chapter 7, titled “Whole grains, beans, tofu and tempeh” contains 7 tofu and 7 tempeh recipes. There are a large number of soy-related recipes throughout the book, including those using miso, black soybeans, and tamari.

6648. Shurtleff, William; Aoyagi, Akiko. 1985. Soyfoods industry and market: Directory and databook 1985. 5th ed. Lafayette, California: Soyfoods Center. 220 p. Index. April. 28 cm. Updated every 1-3 years with a bibliographic supplement. [360 ref]

• **Summary:** Contents: 1. Introduction. 2. Directory of soyfoods manufacturers. 3. Directory of soyfoods support industry: Goods & services. 4. The many types of soyfoods. 5. Historical: Historically most important books and serials, earliest references to individual soyfoods. 6. Year in review. 7. Soyfoods industry and market in the U.S. 8. Statistics on fermented soyfoods in East Asia. 16. Soyfoods in restaurants, delis & cafeterias. 17. Soybean crushing industry in the U.S. 18. Soy oil industry and market in the U.S. 19. Soy flour and cereal-soy blends industry and market worldwide. 20. Modern soy protein products industry and market in the U.S. 21. Soyfoods terminology and standards. 22. Names of soyfoods in major foreign languages (incl. Chinese / pinyin; Hoisin sauce = haixian jiang). 23. Soybean production worldwide and country-by-country. 24. Key institutions working with soyfoods worldwide. 25. Measures, weights, and equivalents. 26. About the Soyfoods Center & soyfoods consulting services. 27. Bibliography.

In February 1977 a Gallup poll in America showed a remarkable shift in the public’s awareness of and attitudes toward soyfoods. The sampling of 1,543 adults across the nation found that: 33% believe that soybeans will be the most important source of protein in the future—ahead of fish at 24% and meat at 21%. 55% believe that “soy products have a nutritional value equal or superior to that of meat.” 54% reported that they “had eaten foods containing soy protein as a prime ingredient within the past 12 months.” Younger age groups living in large cities and those with college or university educations had the most favorable attitudes toward soy protein, indicating that support for soyfoods is likely to grow in the future. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

See p. 97-113. Held 15-16 April 1985 in Jakarta. [7 ref. Ind]

• **Summary:** This article contains the following graphs: Soybean exports from Indonesia (1977-82); Soybean imports to Indonesia (1978-82); Production and consumption of soybeans and soyfoods in Indonesia (1971-82; soyfoods given for only 1978 and 1980); Per-capita consumption of soybeans, tofu, tempeh, and soy sauce (kecap) by

province and total, 1978 and 1980. In 1980 the figures for Indonesia as a whole were soybeans 0.16 kg per capita, tofu 4.66 kg, tempeh 4.87 kg, soy sauce 1.61 bottles. The average consumption of tempeh for Indonesia as a whole was 11.6 grams/person/day in 1978 and 13.3 gm in 1980. Source: Central Bureau of Statistics. Address: Dr., Lembaga Demografi—UI.

6650. Mori, H. 1985. Shôwa 57 nendo ni okeru shôyu, miso no kenkyû gyôseki [Review of annual achievements in shoyu and miso research]. *Nippon Jozo Kyokai Zasshi* (*J. of the Society of Brewing, Japan*) 78(5):328-59. [766 ref. Jap]

• **Summary:** This important Japanese-language article, published each year in the May issue of this periodical, has two parts: (1) A review of the past year's major discoveries and developments in the fields of miso and soy sauce in Japan. (2) A bibliography related to those discoveries and developments. Address: Noda Sangyo Kagaku Kenkyusho.

6651. American Natural Foods. 1985. You're gonna' love that Smoky Mountain twang (Ad). *Vegetarian Times*. June. Inside rear cover.

• **Summary:** This is a full-page color ad (copyright 1984) for Smoky Mountain Sizzlin', an all-natural barbecue sauce. The left half shows the large glass bottle and label, with the Great Smoky Mountains in the background. The right half of the ad talks (in colorful Appalachian hillbilly style) about the origins of barbecue, and the product. "Probably the best barbecue in America comes from the Great Smoky Mountains. Ever since the Cherokee ladies were gracious enough to teach the new settlers their cookin' secrets, there's been some all-mighty sweet smoke mixin' down along the hollows with the mist and the mountain laurel. That's what new Smoky Mountain Sizzlin's all about. Mixin' sweet smells, good times and powerful fine eatin'."

This sauce is "made from real special things—Red ripe tomatoes, virgin peanut oil, molasses, and a secret bunch of natural herbs and spices. And apple cider vinegar and red miso, both made and wood aged right here in the Great Smokies. It's all natural and all mighty delicious." Note: The fourth ingredient is red miso (made in North Carolina) and the sixth is tamari soy sauce. Address: Suite 21 The Courtyard, Chapel Hill, North Carolina 27514. Phone: (919) 929-0113.

6652. Kushi, Aveline; Jack, Alex. 1985. Aveline Kushi's complete guide to macrobiotic cooking: For health, harmony, and peace. New York, NY: Warner Books. xvii + 414 p. June. Illust. Index. 23 cm. [36 ref]

• **Summary:** Index entries include: Miso 61, Tofu 50, Tamari 19, Tempeh 17, Whole dry soybeans 6, Natto 3, Soymilk 3, Yuba 1. This book calls ganmodoki "Tofu Croquettes" and further states that "*Gan* means 'crane' and *modoki* means 'looks like.' " Among the 31 chapters are ones titled Beans

(incl. basic black soybeans, and brown rice with black soybeans); Tofu, Tempeh, and Natto (including yuba); Sea Vegetables; Condiments and Garnishes (incl. miso), and Fish and Seafood.

Under "Black Soybeans" (p. 257) we read: "These nice shiny beans are also called Japanese black beans. They have a strong, delicious taste. Their juice is said to make the voice clear and beautiful. Throughout Japan, mothers prepare their children for music tests and singing lessons with this dish. Black soybeans are also used medicinally to help discharge animal toxins from the body." Note: This is the earliest macrobiotic cookbook seen that uses the term "Black soybeans" in a recipe title. All previous macrobiotic cookbooks called them "Black beans."

Contains recipes for homemade tofu, tempeh, and natto. Address: Brookline, Massachusetts.

6653. **Product Name:** [Tofu Spreads (With Vegetables, Seitan, Green Rye, or Tuna fish)].

Foreign Name: Tofu Aufstrich (Brot aufstrich aus Tofu und Gemuese), Pasetta (Tofu und Seitan), Gruenkern Pastete (Tofu und Gruenkern), Tarree (Tofu und Thunfisch).

Manufacturer's Name: Sojvita Produktions GmbH.

Manufacturer's Address: Hauptplatz 1, 2493 Lichtenwoerth, Austria. Phone: 02622/75494.

Date of Introduction: 1985. June.

Ingredients: 1. Tofu, parsley, celery, soy sauce, onions, vegetable oil, spices (Gewuerze), starch, lecithin. 2. Tofu, seitan (wheat gluten), soy sauce, vegetable oil, spices (Gewuerze), starch, lecithin.

Wt/Vol., Packaging, Price: 180 gm.

How Stored: Refrigerated.

New Product—Documentation: Letter from Norbert Brunthaler. 1988. Jan. 4. Gives date of introduction as September 1986. Label. 1987. 9.25 by 1.25 inches. Dark green, light green, orange, and black on white.

6654. **Product Name:** Tempeh Burgers, and Tofu Burgers.

Manufacturer's Name: Sooke Soy Foods Ltd.

Manufacturer's Address: 2625 Otter Point Rd., R.R. 2, Sooke, Vancouver Island, BC, V0S 1N0, Canada. Phone: 642-3263.

Date of Introduction: 1985. June.

Ingredients: Tofu (or tempeh), natural soy sauce, herbs and spices.

Wt/Vol., Packaging, Price: Tofu: 8 oz. Tempeh: 6 oz.

How Stored: Refrigerated.

New Product—Documentation: Labels. 1985. 3 inch diameter. Self adhesive. Brown (Tofu) or Green (Tempeh) on beige. "Ready to serve, or steam for 5 minutes. Meatless."

6655. **Product Name:** Westbrae Natural Tofu Ramen. Instant Asian-Style Whole-Wheat Noodles & Miso Flavor Broth.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1985. June.

Ingredients: Asian style noodles: whole wheat flour, sifted wheat flour, and sea salt. Vegetable broth: powdered shoyu (soybeans, wheat and sea salt), dried tofu (soybeans, nigari bitter), shiitake mushroom powder, kombu seaweed powder, sea salt, dried onion, garlic, white pepper, dried ginger, green onion.

Wt/Vol., Packaging, Price: 3.1 oz (90 gm).

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 10 by 7 inches. Plastic. Red, green, white, brown on yellow. Color picture of bowl of Tofu Ramen.

6656. Willan, Anne. 1985. The spice is right: Feasting on Indonesian ingenuity. *Washington Post*. July 28. p. G1, G4.

• **Summary:** Last year the writer discovered that Indonesia is “a land of extraordinarily good food. She gives the menu of an Indonesian feast for 12. The recipes do not use hard-to-find Indonesian flavorings and spices. However, “Indonesian soy sauce, for which regular dark soy sauce can be substituted, was used”—in part because it is fairly widely available.

The recipe for Coconut with peanuts (Serundeng) calls for “1 teaspoon Indonesian soy sauce.” Address: Special to the Post.

6657. **Product Name:** Naturally Delicious Fried Rice Sandwich (With Tofu).

Manufacturer's Name: Naturally Delicious.

Manufacturer's Address: Asheville, North Carolina. Phone: 704-253-7656.

Date of Introduction: 1985. July.

Ingredients: Organic brown rice fried with scallions and soy sauce, wrapped in a whole wheat tortilla with steamed organic carrots, alfalfa sprouts, miso tahini sauce, tofu, green leaf lettuce.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Unrefrigerated and perishable.

New Product–Documentation: Label sent by Paul Duchesne. 1989. Aug. 11. Handwritten “Naturally delicious. Made fresh today. To eat; peel back wrapper from one end.” Talk with Paul Duchesne. 1989. Aug. Barbara Svenning originally learned how to make this sandwich from Paul. She made it at the Natural Cafe in Santa Fe, New Mexico, with her husband Marty Roth. When she separated from Marty, she moved to Asheville, North Carolina, where Jack Garvey (a former husband) and her children were living. She made a line of at least 28 Fried Rice Sandwiches (many of which contain tofu) and whole meals, which she sold at various places.

Talk with Dinner for the Earth. 1989. Aug. 15. This is a natural food store and deli that has been in business for 13 years and has sold Barbara's line of sandwiches for 3-4 years. In April 1989 Barbara Svenning became manager of the Deli at Dinner for the Earth (160 Broadway St. Phone: 704-253-7656). She lives in Black Mountain, North Carolina.

Talk with Barbara Svenning. 1989. Aug. 21 and 23. It was a coincidence that Great Eastern Sun was established in Asheville. Barry Evans was partners with Sandy Pukel and Michio Kushi. They had a miso factory [American Miso Co.] in North Carolina and they wanted to establish GES near it. Marty suggested Asheville, since it was a good location and he could live their near his wife's children (Jack Garvey lived in Asheville). Barbara did not make her brown rice and tofu sandwiches while Marty was working at Great Eastern Sun. After Marty Roth had set up Great Eastern Sun in Asheville, North Carolina, he continued to live in nearby Black Mountain but worked for Chico-San for a while and set up the Ohsawa America mail order program for Bob Kennedy. Then he began working for Westbrae in California, where he and Barbara and her son relocated. After 2 years, in July 1985, when her son was age 3, she left Marty Roth (they had never been married), and returned by herself to Asheville, North Carolina to be with her two other children. In Asheville, she established a new company named Naturally Delicious. She ran it out of some else's kitchen and sold 12-15 sandwiches a day at only one store, Nothing But Natural, which promised to tell any health inspectors that the sandwich was made in their kitchen. During that time another woman, Barbara Hoffman, who now lives in Israel, sort of took over the sandwich business. When Nothing But Natural went out of business, she moved to Black Mountain (where she still lives), got her own kitchen, and sold the sandwich exclusively to Dinner for the Earth, where she now runs the deli. Yet she still owns the brown rice sandwich business. She makes them at home and sells them to Dinner for the Earth. “It's still my little baby, still an underground business. I make about 15 fresh each day and they are different every day. Only the chapati, fried rice, and lettuce are the same. I make a Mexican, and Indonesian, a Chinese, etc. Not all contain tofu. Sometimes its a tofu sauce, or barbecued or baked tofu. I guarantee the sale and take back any not sold that day. There is a profit of about \$1 each. I also make another nice wheat-free tofu sandwich called Barbecued Tofu on Millet. It's on square slices of millet bread. It started it about 6 months ago.”

6658. *Progressive Grocer*. 1985. How chunky can you get? 64(7):219-20. July.

• **Summary:** In 1984 supermarket sales of soy and teriyaki sauce were \$49.15 million (gross profit: \$12.58 million), accounting for 2.71% of the sauce category sales (2.99% of category gross profits; the average retail gross profit

margin is 25.6%) and with sales up 8.26% over 1983. The best-selling sauce types are spaghetti sauce (28.36% of the category), catsup (15.49%), meat sauce (14.15%), and dry mixes and seasonings (10.79%).

6659. Westbrae Natural Foods. 1985. Distributor catalog, FOB pricing: Aug. 1, 1985. Emeryville, California: Westbrae. iv + 11 + [7] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-11 are a computer-printed price list, and the last 7 are a product glossary. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

• **Summary:** On the cover, the lettering is in black on an orange background. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (800) 621-0851.

6661. Willan, Anne. 1985. The challenge of creating an Indonesian feast to feed an even dozen. *Los Angeles Times*. Aug. 1. p. OC_40 or SD_40 or SE40 or SG40 or WS40.

• **Summary:** This article is basically the same as the one by the same author that appeared in the *Washington Post* on July 28 (p. G1).

The recipe for Toasted coconut with peanuts (Serundeng) calls for "1 teaspoon Indonesian soy sauce." Address: Special to the Post.

6662. Barrett, Clare. 1985. A practical guide to soyfoods. *Vegetarian Times*. Aug. p. 33-40. No. 96. [14 ref]

• **Summary:** An overview of fresh green soybeans, whole dry soybeans, soynuts, soy sprouts, soy flour & soy grits, soy oil, soy protein isolates, soymilk, okara, tofu, tempeh, soy sauces, miso, natto. Concludes with a list of 14 recommended books on soyfoods.

6663. Eckett, Alison. 1985. Beating the protein crunch: A growing number of people are discovering the range of soyfoods, both traditional and modern, that can be made from this bean. *Food Processing (UK)* 54(8):25-28. Aug.

• **Summary:** "The term 'soyfoods' is a recent generic expression that has been used to describe the complete range of soy products prepared for human consumption. It covers both high technology, modern products such as soy [protein] fibres, concentrates and isolates which are mainly used as ingredients by food manufacturers... and includes the traditional low technology products of soymilk, soy sauce, miso, natto, tofu, tempeh and soy sprouts that have formed part of the staple diet in East Asia for thousands of years."

Soyfoods are divided into non-fermented and fermented. Photos show: (1) Miso Dip (front of two packages). (2) Cubes of tofu under water. (3) Nasoya Tofu Vegi-Dip. (4) Sliced cakes of tempeh. (5) The front of four tempeh packages, made by The Tempeh Works. (5) White Wave tempeh, a tempeh burger, and a promotional piece. (6) A box of Tofu Lasagna, made by Legume, Inc. (7) The front of a package of "6 All Natural Vanilla Ice Bean Sandwiches," made from Ice Bean by Farm Foods.

6664. **Product Name:** Premier Japan Shoyu Marinade. **Manufacturer's Name:** Edward & Sons Trading Co. (Importer). Made in Japan. **Manufacturer's Address:** P.O. Box 3150, Union, NJ 07083.

Date of Introduction: 1985. August.

6669. Hesseltine, C.W. 1985. Fungi, people, and soybeans. *Mycologia* 77(4):505-25. July/Aug. [92 ref]

• **Summary:** In this Mycological Society of America Annual Lecture, presented on 7 Aug. 1984 at Colorado State University (Fort Collins, Colorado), Dr. Hesseltine gives a nice history of the research conducted by him and others at the Northern Regional Research Center (NRRC) on Asian soybean fermentations, including fermented tofu (Frank Meyer, early USDA plant explorer, in a letter dated 21 Nov. 1916, states: "Parcel No. 125c contains first quality Chinese soybean cheese: please taste a little on the point of a knife; it is extremely appetizing."), sufu, shoyu, miso, tempeh, Chinese black beans (fermented black soybeans), natto, and "the use of lactic acid bacteria to produce a yogurt product from soybeans." He also studied non-fermented tofu.

Dr. Hesseltine pays a nice tribute to the work of Dr. A.K. Smith of the NRRC (p. 506-07). After his trip to East Asia shortly after World War II, Dr. Smith (a protein chemist) made great efforts to promote cooperation between the USDA, particularly the NRRC, and Japan in conducting research to understand how our exported soybeans were used for food. He had the foresight to recognize the importance of studying soybeans used in such huge quantities for processing into human food. Dr. Smith was instrumental in arranging for two Japanese scientists (Dr. Tokuji Watanabe and Dr. Kazuo Shibasaki) to come to the NRRC to do research on tofu and miso. "This really began a new era of research on use of Oriental methods to produce foods from soybeans" (p. 507).

"My first real involvement in fermentation of soybeans was the arrival [in Oct. 1958] of Professor K. Shibasaki of Tohoku University to study the miso fermentation. He was sponsored by the American Soybean Association and USDA's Foreign Agricultural Service. When he arrived, I was told that since I was curator of the mold collection and since the *Aspergillus oryzae* strains used in the miso process were in my charge, I would be the person he would work with. I had no background and no interest in soybean fermentations, but this was a fortuitous happening because it acquainted me with Oriental food fermentations. All my background was in conventional liquid agitated pure culture fermentation. The miso fermentation introduced me to two new concepts in fermentation: (1) solid state fermentation, and (2) use of mixed pure culture inoculum" (p. 510).

"Probably my interest in fermented foods would have abated had it not been for the acceptance of Mr. Ko Swan Djien of Indonesia, who came to us in 1960 for practical training. In my first discussion with him, we talked about the kind of work he would do. Since I knew that a fermentation was conducted in Indonesia using soybeans and reportedly the fermentation organism was a species of *Rhizopus*, I asked him if he was familiar with the product; his answer was yes, that he often ate it, but he knew nothing about how the fermentation was conducted. It was decided that during

his 6 months at Peoria this might be an interesting subject to study, especially since he could obtain samples of the tempeh cake from his wife, who was in Java and could tell good tempeh from bad. Dried samples were quickly obtained; from these cakes, four species of *Rhizopus* were isolated" (p. 514-15). Eventually many strains of *Rhizopus* were isolated and investigations showed that *Rhizopus oligosporus* strain NRRL 2710 produced especially good tempeh.

Photos (see next page) show four famous Japanese scientists who studied fermented foods: (1) Prof. Teizo Takahashi. (2) Ryoji Nakazawa. (3) Kin-ichiro Sakaguchi. (4) Kendo Saito. Address: NRRC, ARS/USDA, Peoria, Illinois.

6670. *Natural Foods Merchandiser*. 1985. New products, changing diets propel soyfood sales. Aug. p. 1, 39-40, 42-44.

• **Summary:** "The soyfoods revolution is being fueled by several powerful trends... Many consumers are attracted to soyfoods because they are an excellent no-cholesterol 'replacement' for meat and dairy products. Soyfoods are also growing with the rising tide of macrobiotics, which promotes the use of various soy products. And there are now enough soyfoods on the market to create synergy within the category: consumers buying soymilk try tofu, and go from tofu to tempeh.

"Tofu is by far the best-selling product in the soyfoods category, according to figures provided by the Soyfoods Association [and Soyfoods Center]. An estimated \$60 million worth of tofu is produced and sold in the U.S. annually, while frozen tofu desserts, entrees, and prepared products account for approximately \$25 million. Soymilk sales have jumped from near zero a few years ago to \$10 million today, while tempeh is an emerging growth category at 5 million in yearly sales." All of the retailers interviewed by NFM indicated that the soymilk category is experiencing major growth. Most of the growth has been in six-ounce aseptic individual serving packages supplied by such companies as Westbrae, Ah Soy, Vitasoy and Eden. Health Valley's Soy Moo has recently been repackaged in a 8.45-ounce package.

"Tempehworks produces approximately 7,000 pounds of tempeh a week during peak months, including that used in its processed tempeh products, such as Fakin' Bacon, New York Style Strami and Kansas City Barbecue."

Includes "A directory [sic, glossary] of soyfoods terminology" that defines tofu, tempeh, soybean, miso, soymilk, shoyu/tamari, TVP or TSP, soy protein isolate, defatted soy flour, and "secondary" soyfoods products.

6672. Ohsawa-America. 1985. Chico-San sells products line (Ad). *East West Journal* 15(9):33. Aug.

• **Summary:** A full-page ad. "Ohsawa-America, a newly formed macrobiotic food company, has recently purchased the Ohsawa-Japan products line from Chico-San, a division of H.J. Heinz, Inc." The ad/letter is signed "... in the spirit of Ohsawa, Herman Aihara, Bob Kennedy, Marty Roth, Joel Wollner."

The mail order catalog and price list, printed in tiny letters on this same page, includes 4 types of soy sauce, 5 types of miso, 3 miso condiments, 3 types of koji, and 6 seaweeds.

This ad also appeared in the Sept. 1985 issue (p. 4) of this magazine. Address: P.O. Box 12717, Northgate Station, San Rafael, California 94913-2717. Phone: 415-492-8110.

6673. **Product Name:** Sunrise Vegetarian Quarterpound Burgers (Made from Tofu or Soya Proteins) [Tandoori, Herbs & Spices, Tofu, or Mexican Chili].

Manufacturer's Name: Soya Health Foods, Ltd.

Manufacturer's Address: Unit 4, Guinness Rd., Trafford Park, Manchester M17 1UA, England.

Date of Introduction: 1985. August.

Ingredients: Herbs & Spices: Okara (soya fibre and protein), textured soya flour, hydrogenated vegetable oil, wholewheat rusk, soya flour, modified starch, stabiliser (of vegetable origin), hydrolysed vegetable protein, mixed vegetables, mixed herbs, mixed spices, tamari.

Wt/Vol., Packaging, Price: 1 lb paperboard box.

How Stored: Frozen.

Nutrition: Per 100 gm: Protein 11 gm, fat 14 gm, carbohydrate 12.6 gm, dietary fibre 5.2 gm.

New Product–Documentation: Natural Food Trader (UK). 1985. Sept. p. 25. The burgers are quarter pounders that come 4 in a pack. Michael Cole is director of this company. Poster. Sunrise–Be good to yourself! A photo shows a burger box.

Label. 1988. Paperboard box. 9 by 4.5 by 1.5 inches. Full color in red, green, and brown. Photo on front of open-face burger. "Free from animal fats. No artificial colours. Low in salt and high in fibre. No animal has suffered in the making of this product." Other products available from Soya Health Foods: Sunrise Soya Milk, Soya Milk Yogurt, Soya Ice Dream in 1 litre tubs.

6674. Staudt, Joe. 1985. La Choy. *Horizons (Beatrice Grocery Group)*. Summer. p. 1-7.

• **Summary:** In 1920 Wally Smith and Ilhan New, two friends from the University of Michigan, founded La Choy Foods in Detroit. Their first product was [mung] bean sprouts. In 1922 the business was incorporated as La Choy Food Products. The first La Choy-owned plant was built in Detroit in 1937. The Archbold, Ohio plant was built on its present site in

1942. The Company's long association with Beatrice started in 1943, when La Choy was bought by the Chicago-based company and became Beatrice's first non-dairy operation. The article does not state when La Choy introduced soy sauce. But in 1945 it came off the bottling line at 30 bottles/minutes; today it is 250 bottles/minutes. La Choy, which translates to "good vegetables," is and has been for some time the world's undisputed leader in Oriental foods. Address: Fullerton, California.

6675. *Whole Foods*. 1985. Source book 1985-86. 8(8):1-136. Aug. Illust. Index. 28 cm.

• **Summary:** This is the 5th edition of this directory.

Contents: Publisher's page. NewsLinks Wholesalers / distributors: Alphabetical address directory. Wholesalers / distributors: Geographical directory. Product directories: A list of product manufacturers: Foods (p. 33-48—soy-related categories include: Bean products, beans, coffee substitutes, cultures, ice cream, macrobiotic, milk, miso, sauces, soy products, soy sauce, tamari, tempeh, tofu), vitamins and supplements, cosmetics & personal care, herbs. Trade name index: An alphabetical listing of products by their brand or trade names. Brokers. Publishers. Associations. Alphabetical listing of manufacturers / importers. Advertisers' index.

Note: The listings related to soy products are full of errors. This Source Book contains many interesting ads. Whole Foods claims prominently and repeatedly to have the largest circulation in the natural foods industry. Address: South Plainfield, New Jersey.

6676. Ostman, Eleanor. 1985. Public acquires a taste for tofu. Soybeans give business more than just desserts [Lee L. Lee, Tofulicious, and Eastern Foods Corp.]. *Morning Pioneer News Dispatch (St. Paul, Minnesota)*. Sept. 15. p. 1G, 3G.

• **Summary:** Korean-born Lee L. Lee graduated in physics from Seoul National University and came to the Univ. of Minnesota to study accounting. He stayed to work for 11 years at Control Data Corporation's international accounting division, the last 5 as its manager. "He was clearly ahead of demand in 1978 when he started producing tofu in a tiny rented warehouse in Roseville [Minnesota]." During his years at CDC "he was also making tofu for First Oriental Foods in St. Paul, ultimately buying that company in 1982. His Eastern Foods Corp. began producing tofu part time a year before he left Control Data, with the assistance of venture capital investment from his former employer." CDC owns 30% of Eastern Foods. In 1979 he built his current quarters at 3235 E. Hennepin Ave.

"Though he kept producing tofu over the years while two other local competitors started and folded, Lee says he knew that 'I couldn't live and die with just one product.' His company began manufacturing won ton skins and egg roll wrappers. 'Within 18 months, we dominated the entire Midwest market for the skins,' said Lee.

“In tofu, we are the leader in Minnesota, Wisconsin, Iowa, Michigan and Illinois. Our sales were growing 10 to 15 percent annually, but the base was so small to being with. The Minnesota market uses 300 cases of tofu a week; that’s under \$10,000 a month.’ Total production weekly of tofu, skins and related products is up to 36,000 pounds weekly...

“Steve Schellhaass, formerly with Safeway Stores, was hired last year as vice president of manufacturing and product development, with a directive to find ‘value-added’ uses for tofu and the skins. Tofulicious is one result and Tofruit, resembling yogurt with fruit, is another. Available in health food stores, it soon may be released to regular retail channels under a co-packing arrangement. The company also has tofu salad dressing ready...

“Lee plans to make Eastern Foods a national company in 1986 and perhaps to go public in 1987. To speed national distribution, his company has contracted with JFC International, the distribution arm of Kikkoman soy sauce and the largest Oriental specialty distributor in the country.”

A photo shows Lee L. Lee, founder and president of Eastern Foods Corp., holding a pint of Tofulicious. Address: Minnesota.

6677. *Cultivar*. 1985. Le soja en alimentation humaine [Soya in human nutrition]. No. 186. p. 77-78. Sept. [Fre]

• **Summary:** A brief introduction to tofu, soymilk, soy sauce, tempeh, miso, soy flour, soy protein isolates, and concentrates. Address: France.

6678. Fruin, W. Mark. 1985. Soy sauce from A to Z: The beginning and the end of shoyu? *Japan Society Newsletter*. Aug/Sept. p. 5-7.

Address: Prof. of History, California State Univ., Hayward.

• **Summary:** At the bottom of this full-page color ad is a brush next to a bottle of Kikkoman Teriyaki Baste & Glaze. Above it are four horizontal rows of cooked foods: Steak, fish, meat loaf, and chicken legs.

6680. Kotzsch, Ronald E. 1985. *Macrobiotics: Yesterday and today*. Tokyo and New York: Japan Publications Inc. 292 p. Sept. Illust. Index. 26 cm. [144* ref]

• **Summary:** The best and most objective book available to date (April 2011) on the origins and history of macrobiotics, worldwide. Includes detailed information on central ideas and practices of macrobiotics, its leaders, organizations, applications, and aspirations. Carefully researched and well written.

Contents: 1. Ekken Kaibara: The grandfather of macrobiotics. 2. Sagen Ishizuka: The founder of modern macrobiotics. 3. George Ohsawa: The early years (1893-

1929; Yukikazu Sakurazawa, later known as George Ohsawa was born on 18 Oct. 1893 in a western suburb of Kyoto, Japan, the family’s eldest child). 4. George Ohsawa: The first sojourn in the west (1929-1936). 5. George Ohsawa: Return to Japan in crisis (1936-1939).

Photographic interlude for *Macrobiotics Yesterday*. Illustration (line drawing) of Ekken Kaibara. Photos of Ishizuka, Nishibata, Ohsawa’s parents, George Ohsawa (many from 1901-1966). 6. George Ohsawa: The war years (1940-1945). 7. George Ohsawa: Hope for a new Japan and a new world (1945-1953). 8. George Ohsawa: The world journey of the penniless samurai (1953-1966; George and Lima visited India [Nov. 1953-July 1955]; Africa [Aug. 1955-Feb. 1956, incl. Kenya, and 3½ months with Albert Schweitzer at Lambarene, Gabon]; Paris, France and Brussels, Belgium; New York City, USA [late 1959-Oct. 1961]; France [around 1961 he met Louis Kervran]; Tokyo [most of 1963-64]; Vietnam 1965; Tokyo, where he died on 23 April 1966 [24 April Japan time], probably of filarial parasites contracted in Lambarene, and smoking). 9. George Ohsawa: The man and the legacy. 10. After the master: Part one: America.

Photographic interlude for *Macrobiotics Today*. Photos are given of Toshi Kawaguchi, Michi Ogawa, Hiroshi Maruyama, Kaoru Yoshimi, Francoise Riviere, Cecile Levin, Dr. Kikuo Chishima, Dr. Moriyasu Ushio, Michio and Aveline Kushi, Herman and Cornelia Aihara, the Kushis, Aiharas, and Shizuko Yamamoto, William Dufty, Bill Tara, Aveline Kushi and Wendy Esko, Alex Jack, Dr. Marc van Cauwenberghe, Edward Esko, Murray Snyder, Noboru Muramoto, Jacques and Yvette de Langre [DeLangre], Jerome Carty, Duncan Sim, Lima Ohsawa, Shuzo Okada, Hideo Ohmori, First European Congress of Macrobiotics in London, Nov. 1978, Lenk summer camp, Switzerland, July 1984, Jan Lansloot, Peter Doggen, Rik Vermuyten, Georges Van Wesenbeeck, Roland Keijser, Mayli Lao Shun, Tomio Kikuchi (in Brazil).

11. After the master: Part two: Japan. 12. After the master: Part three: Europe and elsewhere. 13. The gospel according to Kushi. 14. Macrobiotics in western culture. 15. Prospects for the future. Bibliography.

The author, an excellent historian and writer, with a delightful sense of humor and light touch, began his study and practice of macrobiotics under Michio Kushi in Boston in Jan. 1967. A photo of Ronald E. Kotzsch appears on the rear cover. This book is based on his doctoral dissertation titled “Georges Ohsawa and the Japanese Religious Tradition,” submitted on 1 April 1981 for a PhD degree in History of Religions from Harvard University. Pages 185-86 discuss briefly the role of the macrobiotic movement in introducing soyfoods (especially miso, shoyu, and tofu) and natural foods to America. Address: PhD, Hanover, New Hampshire; The New North Church, Hingham, Massachusetts (18 Mar 1985).

6681. **Product Name:** Vegetarian Gourmet Traditional Pot Pie with Tempeh.

Manufacturer's Name: Soy Source (Kenish, Inc.).
Appropriate Foods Inc.

Manufacturer's Address: 137 New Hyde Park Rd.,
Franklin Square, Long Island, NY 11010.

Date of Introduction: 1985. September.

Ingredients: Water, whole wheat flour, durum wheat semolina, unbleached wheat flour, tempeh, mixed vegetables (carrots, peas, potatoes, onions, stringbeans, lima beans, okra), soy oil, tamari, herbs, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Frozen.

New Product–Documentation: Label. 1985. Sept. 3 by 3.5 inches. Self adhesive. Black on orange. Interview with Robert Werz. 1987. Sept. 9.

6682. **Product Name:** Croissant Cuisine: Tofu Mexicana (Whole Wheat Stuffed Croissants).

Manufacturer's Name: Tumaro's Inc.

Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.

Date of Introduction: 1985. September.

Ingredients: Tofu, tomatoes, bell peppers, onions, celery, corn, serrano chilies, tamari, corn oil, spices, sea salt.

Wt/Vol., Packaging, Price: 6 x 6.5 oz.

New Product–Documentation: BLRF. 1985. Sept. Leaflet. 1987, undated. 8½ by 11 inches. Blue on beige. "A brand new line. Delicious! Unique! Exciting!"

6683. *Republic (Fairfield, California)*. 1985. Tofu makes hi protein smoothie. Oct. 9.

• **Summary:** A delicious smoothie, containing no eggs or milk, can be made with "smooth and creamy shelf-stable Kikkoman Tofu." The recipe is given. For more recipes "send a stamped, self-addressed envelope to: 'The Joy of Tofu,' Kikkoman International Inc., P.O. Box 784, San Francisco, California 94101."

6684. Luong, James V.T. 1985. Re: Soy sauce production in London. Letter to William Shurtleff at Soyfoods Center, Oct. 25. 1 p. Handwritten.

• **Summary:** "Since I'm engaged in shoyu (or soy sauce) production, I'd like to find some practical information on this particular aspect of soybean processing." Address: 20 Bentham Court, Essex Road, London, N1 3AA, England.

6685. *China Daily*. 1985. Soy sauce city sees way to earn bucks. Oct. 29. [Eng]

• **Summary:** "When people in China think of the best soy sauce they think of Guangdong Province. And Foshan City is the province's top soy sauce producer... Last year the city exported 14,600 tons of sauce, raking in more than \$5

million." Of the 9 soy sauce factories in the province, 4 are in Foshan. "The Pearl River Soy Sauce Factory, the largest of its kind in the province, produced more than 12,000 tons of super soy sauce last year..."

6686. Jacobs, Barbara; Jacobs, Leonard. 1985. Flour power! Cooking with seitan, the delicious natural food from grain. *East West Journal*. Oct. p. 38-44. [1 ref]

• **Summary:** This excellent, pioneering, in-depth article on wheat gluten and seitan was excerpted from the Jacobs' forthcoming book *Cooking with Seitan*, which was not published until May 1987. The article discusses the history of seitan in East Asia and America, the seitan industry and market in America and major manufacturers, the nutritional value and cost compared with other protein sources, and how to make seitan at home. It also gives four recipes.

In the USA about 2,500 lb of seitan are made commercially each week, or about 125,000 lb/year. The largest manufacturer, Upcountry Seitan (in Lenox, Massachusetts, started 3½ years ago by Win Donovan, and now owned and operated by Sandy Chianfoni) makes 600 lb/week of seitan. Ron Harris of Grain Dance Company in San Francisco has been making seitan for the past 8 years (i.e. since about 1977) and is currently selling 250 lb/week. Michael Vitti of Rising Tide Natural Market in Long Island, New York, has been making seitan commercially for 6 years (i.e. since about 1979). Yaron Yemini of Creative Kitchens in Miami, Florida, has been making seitan for 3 years (i.e. since about 1982). He now makes about 120 lb/week.

Barbara Jacobs first tasted seitan about 16 years ago (i.e. in about 1969). "Seitan was introduced to the U.S. natural foods industry about sixteen years ago when a Japanese variety, shrink-wrapped and quite dry and salty, was first imported. There had been several other varieties available from vegetarian groups, primarily the Seventh Day Adventists and the Mormons. Chinese restaurants [in America] have also been preparing wheat gluten for many years. The Chinese call it *mien ching*, or *yu mien ching*. Chinese restaurants often refer to it as 'Buddha Food,' claiming that it was developed by Buddhist monks as a meat substitute. There is also a dried wheat gluten available in Oriental food markets called *fu* by the Japanese and *k'ao fu* or *kofu* by the Chinese." Address: Massachusetts.

6687. Osaki, K.; Okamoto, Y.; Akao, T.; Nagata, S.; Takamatsu, H. 1985. Fermentation of soy sauce with immobilized whole cells. *J. of Food Science* 50(5):1289-92. Sept/Oct. [9 ref]

• **Summary:** Soy sauce was produced continuously for 80 days in 280 liter column-type reactors containing immobilized whole cells of *Pediococcus halophilus*, *Saccharomyces rouxii*, and *Torulopsis versatilis* entrapped in calcium alginate gels. The divided lactic acid and alcohol fermentation by viable cells of three kinds with feed solution

obtained from enzymatic hydrolyzate of koji and defatted soybean meal proceeded in shorter time than a complex fermentation of moromi (soy sauce mash) in the slurry state. The refined products fermented by this process had good taste and flavor, and were close to the conventional soy sauce with respect to organic acid and aroma components. Address: 1-4. Food Engineering Lab., Kikkoman Corp., 339 Noda, Noda-shi, Chiba 278, Japan; 5. Soy Sauce Research Lab., Kikkoman Corp.

6688. **Product Name:** [Tofu Burgers].

Foreign Name: Tofu–Bratlinge.

Manufacturer's Name: Tofuhaus Tiefenthal.

Manufacturer's Address: Hauptstrasse, D-6719 Tiefenthal, West Germany. Phone: 06351-43718.

Date of Introduction: 1985. October.

Ingredients: Tofu, okara, brown rice, whole wheat flour, vegetables, sesame, flaxseeds, soy sauce, sea salt, and spices.

Wt/Vol., Packaging, Price: 2 pieces per 150 gm vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Leaflet. 1988. The ingredients are freshly prepared, fried, and packed after cooling. They make 5,000 to 7,000 pieces/month. Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in July 1986. Label. 1988, received. 5.5 by 4.25 inches. Black on tan.

Label brought by Albert Hess. 1995. March 11. 2.5 by 4 inches. White and green on orange. An illustration shows a large personified cake of tofu, with smiling face and arms held out. The product name is now simply “Tofu Bratlinge.”

6689. **Product Name:** [Tofu “Croquettes”].

Foreign Name: Tofu–Krocketten.

Manufacturer's Name: Tofuhaus Tiefenthal.

Manufacturer's Address: Hauptstrasse, D-6719 Tiefenthal, West Germany. Phone: 06351-43718.

Date of Introduction: 1985. October.

Ingredients: Tofu, okara, brown rice, whole wheat flour, vegetables, sesame, flaxseeds, soy sauce, sea salt, and spices.

Wt/Vol., Packaging, Price: 2 pieces per 150 gm vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Talk with Albert Hess of Albert's Tofuhaus. 1995. March 12.

6690. Whitman, Joan. comp. 1985. Craig Claiborne's *The New York Times* food encyclopedia. New York, NY: Times Books (div. of Random House). 496 p. Illust. (line drawings). 25 x 20 cm. [120* ref]

• **Summary:** The soy-related entries are as follows: Kecap (ketjap, p. 237): The Indonesian name for soy sauce in its basic form. “Kecap, with its broad uses in Indonesia, became simply ‘table sauce’ to English-speaking foreigners.

By extension, ketchup became the national table sauce in America. See *also* Ketchup.”

Ketchup (p. 238): *The New York Times* prefers to spell it ketchup, but catchup and catsup are generally accepted. The late Tom Stobart, in his *The Cook's Encyclopedia*, says that the word came into English ‘from the Orient, perhaps from the Malay or Chinese.’

“‘You find ketjap benteng or ketjap manis in Indonesian recipes and that is a form of sweet soy sauce,’ he wrote. ‘Cookbooks of the last century abound with recipes—oyster ketchup (oysters with white wine, brandy, sherry, shallots and spices), mussel ketchup (mussels and cider), pontac or pontack ketchup (elderberries), Windermere ketchup (mushrooms and horseradish), wolfram ketchup (beer, anchovies and mushrooms).’

“There are also ketchups made with walnuts, cucumbers, and many other items that caught some cook's imagination.

“A New Jersey man wrote to me that ‘catchup is a Chinese invention and is still called in Cantonese *fan-kei cheop*. *Fan-kei* is the name for tomato, literally “foreign vine-vegetable” and *cheop* is juice as in *chang-cheop* (orange juice). The truncated word *kei-cheop* or catchup is obtained by dropping *fan*.

Soy Sauce (p. 419-20): Among Chinese soy sauces, dark/black soy sauce is thicker than thin/light because the former contains molasses.

Tofu (p. 451-52): There are said to be 7 kinds of tofu in Japan. “The best book on tofu making I know is *The Book of Tofu*, by William Shurtleff and Akiko Aoyagi. Published in paperback, it contains not only detailed instructions but also five hundred recipes.” Note: This book is also listed in the bibliography.

Worcestershire Sauce (p. 483-86): Contains an extensive discussion of the history of Worcestershire sauce. “There are certain names in the world of wine and food that are inextricably linked... indelibly inscribed on the gastronomic roster is Lea and Perrins, makers of the original Worcestershire sauce, ‘the original and genuine, from the recipe of a nobleman in the county,’ as it reads on the label. The county in question, of course, is Worcestershire, England. The label does not reveal the name of the nobleman nor to this day will the producers of the sauce reveal it.

“The saga of the sauce dates back to the first years of the 1800s, when the governor general of Bengal returned from his post to his native England. He had in his possession a formula for a sauce that had been created in India. One that he had relished at his table and offered to his guests.

“At that time there were two chemists in the English Midlands named John Lea and William Perrins, partners in a then novel enterprise, a ‘chain’ of chemists shops. Their association had begun in the 1820s. Their main office was in the town of Worcester, in the shire, or county, of the same name.

“The governor general took the recipe to Mr. Lea

and Mr. Perrins with a request that they try to reproduce it as closely as possible. The story goes that the chemists produced a concoction that was to their noses and tastes unpalatable. They stored it in the cellar and forgot it.

"Months, perhaps years, later they sampled it once more and found it not only acceptable but haunting in its flavor. Within a short while they were bottling the stuff, and it is a matter of genuine historical record that, without any kind of advertising as it is known today, in a few short years the Worcestershire sauce of Mr. Lea and Mr. Perrins was known and coveted in kitchens throughout the world...

"The incredible haste with which the fame of Worcestershire sauce spread is generally credited to the fact that the manufacturers loaded cases of the sauce on all the ocean liners that plied in and out of English waters. The stewards of the ocean-going liners were 'encouraged' with a few shillings here, a few pounds there, to offer the sauce to the passengers."

Today Lea & Perrins sauce is made at Fair Lawn, New Jersey.

Note: This is the earliest English-language document seen (Jan. 2006) that contains the term "mussel ketchup."

About the author: A portrait photo on the inside rear dust jacket shows Craig Claiborne, who was born in Sunflower, Mississippi, and now resides in East Hampton—at the eastern end of the south shore of Long Island, Suffolk County, New York. Address: East Hampton, New York.

6691. Jenkins, Nancy Harmon. 1985. In pursuit of the perfect ingredient: Food shops. *New York Times*. Nov. 3. p. SMA8.

• **Summary:** When exploring New York's ethnic food markets one is bound to find surprises and new, delicious foods and ingredients. The section titled "Chinese" notes that Kam Man Food (200 Canal St., in Chinatown—south central Manhattan, New York City) "offers a choice of Chinese teas, preserved vegetables and bottled condiments including red, black, and yellow bean pastes, fish and shrimp sauce and hoi sin [hoisin] sauce.

Note: Red bean paste is typically made from azuki beans. Black bean paste and yellow bean paste are typically made from soybeans.

6692. Paskalev, Rosen L. 1985. Re: Work with soybeans and soyfoods in Bulgaria. Letter to William Shurtleff at Soyfoods Center, Nov. 8—in reply to inquiry. 4 p. Handwritten. [Eng]

• **Summary:** Dr. Paskalev is establishing a medical book review center in the Central Institute for Scientific Information (ZINTI), where he works. He is also a regular reviewer in the ABC weekly newspaper and the medical ZDRAVE. He has received degrees in engineering and medicine, and is interested in learning more about soyfoods. "The work on soyfoods is in its embryonic stage in Bulgaria. Some experiments have been conducted at the Central Institute for Nutrition in Sofia and Plovdiv. Soya flour was

used to partially replace chocolate in some candies, but because of some technological mistakes, the commercial products are not yet being produced in this way. Soya flour is being added widely by our sausage industry. But other soya foods, even the soya sauces, tamari, and miso are completely unknown to the general consumer.

"But in 1931-37 our famous biochemist, Prof. Assen Zlatarov had a lot of publications in the field of nutrition, written in German and French. He was an active promoter of soyafoods but after his sudden death there was a long period of inactivity. His scientific publications are mostly in German, but he wrote quite a few popular articles about soya as the protein source of the future. I will be glad to compile a bibliography for you on soya in Bulgaria in exchange for copies of books, which I will send to be reviewed in publications here."

In the Soviet Union, soya beans are grown mostly in the Far Eastern regions [Russian Far East], the Ukraine, Moldavia, and the northern Caucasus. Soya bean oil finds industrial uses in soaps, paints, lacquers, and margarine; the protein from defatted meal is used to make some plastics. In the USSR soybeans are used as a coffee substitute, and the flour is added to some kinds of biscuits and similar baked goods.

Romania was the leader among eastern European countries from 1924-26 in soybean production and average yield. An institute was opened in Bucharest (Fundula) to research and develop soybeans. In the USSR, Czechoslovakia, and Bulgaria there are research centers working to increase soybean yields. In Bulgaria, between 1971 and 1977, the average yield rose from 91.3 kg to 220 kg/10 are, and the maximum yield hit 317 in 1976.

Note: According to *Soya Bluebook*, production in Bulgaria rose from 18,000 tonnes (metric tons) grown on 25,000 ha in 1974/75, to 160,000 tonnes grown on 100,000 ha in 1979/80. In the latter year, Bulgaria was third among eastern European countries in soybean production after the USSR (600,000 tonnes) and Romania (250,000 tonnes). A map of eastern Europe shows that Bulgaria, which borders on Greece in the south and Romania in the north, is the southernmost eastern European country (42-44° north latitude)—except for Albania and several southerly Soviet republics. Its southern border lies at about the same latitude as the southern border of New York, Michigan, and Wisconsin. Southern Yugoslavia (i.e. Macedonia) is at about the same latitude as southern Bulgaria, and thus is also at a favorable latitude for soybean production. Address: Tsar Shishman 23, 1000 Sofia, Bulgaria.

6693. Francese, Peter. 1985. More will give thanks with tofu. *Detroit Free Press*. Nov. 17. [1 ref]

• **Summary:** This Thanksgiving, some imaginative vegetarian cooks will mold their tofu in the shape of a turkey. Since 1979, retail sales of tofu and other soy foods (including

soy sauce) have increased nearly fivefold in the USA, from about \$41 million in that year to \$104 million in 1981, rising to about \$200 million in 1984—according to Business Trends Analysts (Commack, New York).

A graph from American Demographics shows “soy food sales” from 1979 to 1984. Address: Michigan.

6694. Bush, Larry C. 1985. Fermented foods: Tasty toner uppers. *Total Health (California)*. Nev. p. 40-41.

• **Summary:** An overview with a large color photo showing packages of: Miso-Cup, Westbrae Natural Shoyu, Westbrae Natural Johsen Double-Brewed Shoyu, Westbrae Natural Traditional Tamari Soy Sauce, Westbrae Natural Instant Miso Soup, Westbrae Natural Mild Soy Sauce, Erewhon Shoyu Tamari, Erewhon Hatcho Miso, Premier Japan Rice Miso, Premier Japan Mugi Miso, Premier Japan Takuan, Premier Japan Umeboshi, and Premier Japan Pickled Ginger.

6695. **Product Name:** Island Spring Tofu Burgers [Oriental Style, Italian Style, or Mexican Style].

Manufacturer's Name: Island Spring, Inc.

Manufacturer's Address: P.O. Box 747, Vashon, WA 98070.

Date of Introduction: 1985. November.

Ingredients: Oriental Style: Tofu (soybeans grown without chemical pesticides or fertilizers; water; bittern or nigari, an extract of seawater; natural calcium sulfate, traditional Chinese ingredient); highfiber tofu (as stated previously, plus soybean fiber); rolled oats; sesame seed; carrot; onion; green onion; soy sauce; ginger; corn oil.

Wt/Vol., Packaging, Price: Two 3-oz (170 gm) burgers per vacuum pack. 16 units per case.

How Stored: Refrigerated or frozen.

Nutrition: Per 3 oz: Calories 210, protein 11 gm, fat 12 gm, carbohydrates 15 gm, sodium 300 mg.

New Product–Documentation: Product Alert. 1986.

March. Beachcomber (Vashon, Washington). 1986. Nov. 26. Talk with Yvonne Kuperberg of Island Spring. 1988. June 2. The product was introduced in November 1985 and vacuum packed. Label. 3.5 inches diameter. Self adhesive. Purple, black, yellow, red and green. Illustration of the moon rising over the hills behind a lake or sound. “A Fitness Food from the Pacific Northwest, USA.”

6696. Jackson, Vicki. 1985. Squirrels vegetarian cook book no. 2. Oneness Life Press, Elizabeth St., Brisbane, Queensland, Australia. 156 p. Illust. by Vicki Jackson. Index. Nov. 29 cm.

• **Summary:** This hand-lettered cookbook was written for Squirrels Restaurant, 190 Melbourne St., West End (Brisbane) 4141, which has been open for more than 3 years. The first vegetarian cookbook from this restaurant was published in Nov. 1983.

Soy-related recipes include: Miso & green vegetable

soup (p. 8). Tempeh & beanshoot (p. 42). Lemongrass and tofu curry (p. 87). Tempeh kebabs (p. 94). Tempeh burgundy (p. 95). Tempeh & coconut sauce (p. 96). About tofu (p. 97-98). Tofu & Spinach pie (p. 98). Tofu teriyaki & fried rice (p. 99). Tofu à la king (p. 100). Tofu stroganoff (p. 101). Tofu chow mein (p. 102). Tofu nuggets in chick pea batter (p. 103). 6697. **Product Name:** Kikkoman Tofu: Soybean Curd.

Manufacturer's Name: Kikkoman International, Inc. (Importer). Made in Japan by Kikkoman Corp.

Manufacturer's Address: San Francisco, CA 94111.

Date of Introduction: 1985. November.

Ingredients: Water, soybeans, glucono delta lactone, emulsifier E471 [monoglycerides?].

Wt/Vol., Packaging, Price: 10.5 oz foil pouch, inside a paperboard box. Pasteurized. Retail for \$0.79.

How Stored: Shelf stable.

Nutrition: Per 100 gm: Calories 69, protein 6 gm, carbohydrate 1 gm, fat 5 gm, sodium 2 mg.

New Product–Documentation: Label. 1985. 5.75 by 3 by 1.25 inches wide. Paper. Black, orange, green, tan on cream. “68 Calories per serving. No Preservatives. Keep in Cool Place—Do Not Freeze.” Photo of Japanese-Style stir fry dish with chopsticks on front panel. Recipe on back for Tofu With Chicken. An innovative shelf-stable retorted tofu. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Packaging magazine. 1986. Jan. p. 12. “American-style Tofu Pack.”

6698. **Product Name:** Kikkoman Tofu: Soft Soybean Curd [Kinugoshi].

Manufacturer's Name: Kikkoman International, Inc. (Importer). Made in Japan by Kikkoman Corp.

Manufacturer's Address: San Francisco, CA 94111.

Date of Introduction: 1985. November.

Ingredients: Water, soybeans, glucono delta lactone, emulsifier—E471 [monoglycerides?].

Wt/Vol., Packaging, Price: 10.5 oz (297 gm) foil retort pouch inside a paperboard box.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 100 gm: Calories 57, protein 5 gm, carbohydrate 1 gm, fat 4 gm, sodium 2 mg.

New Product–Documentation: Label. 1985. “No Preservatives. Keep in Cool Place—Do Not Freeze.” Photo of Japanese-Style Chilled Tofu in bowl on front panel. Recipe on back for Chilled Tofu (Hiyayakko).

Package with Label sent by Dr. Walter Wolf of Peoria, Illinois. 2000. Aug. 5. The “use-by” date is 12 Dec. 1994. 6 by 3 by 1¼ inches. Blue, green, black, and orange on white and blue. Photo of Chilled Tofu cut into 8 pieces on a rectangular bowl with fern design, and the tip of a small

fern frond atop the tofu. "High protein. No cholesterol. No preservatives. Sodium free." On the back are recipes for: Creamy corn soup. Tuna-tofu spread. Made by Kikkoman Corp. in Japan. Ingredients: Water, glucono delta lactone, and calcium chloride (coagulating agents).

6699. Product Name: Soup 'n Savor, Miso-Brown Rice Soup Mix [Hearty Miso-Vegetable, Miso-Onion, or Pilaf Dinner (Quick Brown Rice with Miso and Vegetables)].

Manufacturer's Name: Lundberg Family Farms.

Manufacturer's Address: P.O. Box 369, Richvale, CA 95974.

Date of Introduction: 1985. November.

Ingredients: Miso-Onion: Steamed, flaked long grain brown rice, dehydrated onions, miso (soybeans, salt, water), soy sauce (soybeans, wheat, salt, water), garlic powder.

Wt/Vol., Packaging, Price: Two foil packets in paperboard box.

How Stored: Shelf stable.

New Product–Documentation: Labels. 1985, undated. 1 box each. 3.5 by 5 inches, color. "Quick! Twin pack! Cooks in 5 minutes. All natural ingredients." Spot in Food Distributors Magazine. 1985. Nov. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. Ad in Natural Foods Merchandiser. 1987. Dec. p. 25. "Soup'n Savor (Miso-Onion, and Miso Vegetable)."

6700. Nihei, Takao. 1985. Zoku: Hawai ni okeru Nihon-shu no rekishi. Hawai kanyaku imin hyaku-nen ni yosete [A history of Japanese sake in Hawaii. On the hundredth anniversary of Japanese immigration to Hawaii]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 80(11):786-89. Nov.; 80(12):838-842. Dec. [33 ref. Jap]
• Summary: In 1868, the first year of the Meiji Period, the first 153 Japanese immigrants arrived in Hawaii on board the three-masted sailing ship Scioto (Saioto-go). They brought with them miso and shoyu. During the 1880s, because of the shortage of laborers to harvest sugar cane, the governments of Japan and Hawaii signed a contract allowing Japanese to immigrate to Hawaii. The first boatload of 944 Japanese arrived on 8 Feb. 1885. These two groups and their descendants introduced sake and soyfoods to Hawaiian culture. A photo shows the "Honolulu Japanese Sake Brewing Co." in 1908.

Note: This document contains the earliest date seen for soybean products (miso and shoyu) in Hawaii (1868); soybeans as such had not yet been reported by that date. Address: Honolulu Shuzo Seihyo Gaisha.

6701. Ozora, Colleen. 1985. Of Granum and macrobiotics: A visit with Blake Rankin. *Macrobiotics Today (Oroville, California)*. Nov. p. 3-7.

• Summary: In 1969, while a student at UCLA, Blake Rankin came in contact with Erewhon–Los Angeles. After

graduation from UCLA he and several friends set up a small health food store in Victoria, BC, Canada. Then he spent 3 months in Boston living in a Kushi study house and working in an Erewhon warehouse. Back in Seattle, he worked at Spiral Foods, an offshoot of Chico-San. Shortly after that he and George Gearhart, the proprietor, closed the store and in 1972 opened a wholesale company, Janus Foods. It was successful. [Note: Miso and shoyu, imported from Japan, were among the company's best-selling products.] After 2 years Rankin left and went to Japan for 6 months, where he traveled with Mitoku and Muso. Mr. Kazama, a friend of Aveline Kushi's brother, had not been in the food business before starting Mitoku. Then he went to Nepal and India on a spiritual search. In late 1973 he returned to Seattle and worked for Janus. Then he returned to Japan where he worked for Mitoku and studied calligraphy. In Japan he met his future wife, Yoko. Returning to Seattle, Rankin started Granum in 1981 as a distributor and importer for Mitoku products from Japan. Now the import company has a small retail store and a 10,000 square foot warehouse. Expected 1985 gross is more than \$500,000.

This article contains numerous photos of Blake and Yoko Rankin, and their two children. Address: GOMF, Box 426, Oroville, California 95965.

6702. **Product Name:** Ed & Andy's Original Sweet and Sour Tofu.

Manufacturer's Name: Walker and Wilks Tofoods.

Manufacturer's Address: P.O. Box 3763, Silver Spring, MD 20901.

Date of Introduction: 1985. November.

New Product–Documentation: Label. 1986, undated. 5 by 7 inches. Full color with photo. Przybyla. 1987. Food Engineering. April. p. 74. "First introduced in 1985."

6703. **Product Name:** Ed & Andy's Original Bar-B-Q Tofu.

Manufacturer's Name: Walker and Wilks Tofoods.

Manufacturer's Address: P.O. Box 3763, Silver Spring, MD 20901.

Date of Introduction: 1985. November.

New Product–Documentation: Label. 1986, undated. 5 by 7 inches. Full color with photo. Przybyla. 1987. Food Engineering. April. p. 74. "First introduced in 1985." Talk with Andy Wilks. 1987. Dec. 10. The reformulated version of this was the best seller of their three products, best received in Southern California and Arizona.

6704. Friedman, Martin. 1985. New entries crowd health food market: Even more tofu desserts and frozen entrees. *Adweek East (New York)*. Dec. 9.

• Summary: Discusses various new products. As "reports of weakening sales of frozen tofu desserts are filtering in, there were a half-dozen new tofu dessert items that were being confidently introduced to the health food market."

“Tofu items are becoming so popular that they have a section of their own at health food shows. Legume’s success with frozen entrees is spawning such imitators as Walker & Wilks Tofoods (sweet and sour, Bar-B-Q and teriyaki) and Lamp Lite Natural Foods’ six Italian tofu entrees... Harvest Earth Foods offers Tempeh Delites, fully cooked cutlets and sticks that are made from cultured organic soybeans; and Light Foods sampled Light Links (tofu hot dogs) and Tofu Bagel Links. In the frozen dessert arena, Tofu Today presented Tofruzen, while Tofreezi was sampled by Melta [sic, Metta] Tofu Products. Other new low-calorie and low-cholesterol desserts promoted were Imagine Foods’ Rice Dream and Nouvelle Sorbet.”

6705. Gorman, John. 1985. Pillsbury snaps up Jenó’s to control frozen pizza market. *Chicago Tribune*. Dec. 10. p. B6.

• **Summary:** On Monday, Pillsbury Co. announced that it had acquired substantially all operating assets of Jenó’s Inc. (founded in 1967 by Jenó Paulucci; now based in Casselberry, Florida), the frozen pizza and snack foods company. Jenó’s has annual sales of about 175 million.

“This is the second time Paulucci has built a company and sold it to a conglomerate. He founded Chun King with \$2,500 in 1944 and sold it in 1966 to R.J. Reynolds Tobacco Co. for \$63 million.”

6706. Sokolov, Raymond. 1985. Soy, most useful bean: In disguised forms, its use grows in U.S. *Detroit News*. Dec. 13. p. A-1, A-20.

• **Summary:** First came soy-based margarine, then soybean oil—which now surpasses corn oil and peanut oil in sales. Then tofu, a soybean curd, began to show up in supermarkets. The latest soy-based product is Tofutti, a trendy alternative to ice cream.

Business Trends Analysts reports that retail sales of soy foods (including the familiar soy sauce) have jumped nearly fivefold since 1979. They exceeded \$200 million last year. A body of “evangelical literature has sprung up to educate a carnivorous populace in the mysteries of tofu.” *The Book of Tofu*, by William Shurtleff and Akiko Aoyagi, had sold 340,000 copies when Ten Speed Press in Berkeley published a 2nd edition in 1983.

Photos show two workers at The Soy Plant in Ann Arbor: (1) Mark Ducharme cutting tofu. (2) Geoffrey Beck stirring soy milk. Address: Michigan.

6707. Mogi, Yuzaburo. 1985. The conduct of international business: One company’s credo—Kikkoman, soy sauce and the US market. *Columbia J. of World Business* 20(4):93-94. 20th Anniv. Issue. Winter, 1985.

• **Summary:** In Japan, marketing depends more on personal relations than it does in America. Kikkoman tries to be a good neighbor by localizing its operations. It has a firm

commitment to employ as many local people as possible, participate in local activities, avoid the so-called “Japanese village” by advising its people from Japan not to live together but to spread out and live among Americans, to do business with American rather than Japanese companies, and to delegate most authority to local management. Address: Managing Director, Kikkoman Corp., Tokyo.

6708. *SoyaScan Notes*. 1985. Chronology of events during 1985 concerning *Soyfoods* magazine, Doug Fiske, Paul Obis, and William Shurtleff (Overview). Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 8—Richard “Ira” Leviton visits Soyfoods Center and announces that he had decided to discontinue all involvement with soyfoods and the soy sauce book project. He plans to live in England and to write books about King Arthur, geomancy, etc.

Feb. 8—Doug Fiske writes Shurtleff. He had a long conversation with Paul Obis this morning about Paul’s interest in buying *Soyfoods* magazine. Fiske writes “I am cautiously optimistic. I hope it works out. Seems good for all parties and for the industry.”

March 22—Paul Obis writes Fiske a 5-page letter (typed, single spaced) that begins: “My decision to buy, or not to buy, *Soyfoods* [magazine] has not been an easy one.” He discusses each of his concerns.

March 30—Obis writes Fiske a short letter on *Vegetarian Times* letterhead. “Thanks for your letter. My offer was about the best I could make, given my analysis. I do, in all honesty, wish you well in finding another buyer or backer.”

April 1—Fiske and Shurtleff talk by phone about what to do next. Doug wants to cash out, to keep \$1,500 in the bank and \$2,000 in cash.

April 1—Paul Obis writes Shurtleff a 1-page letter on *Vegetarian Times* letterhead explaining that his letter to Fiske was prompted, in part, by the letter (enclosed) which he received from Fred Rogers, who was Paul’s backer. He says Fiske turned down Paul’s offer to buy *Soyfoods* magazine.

April 9—Paul Obis writes Fiske a 1-page letter on Family Syndications letterhead. He agrees to purchase *Soyfoods* magazine for \$1,000 cash and sends a \$100 advance.

April 19—Paul Obis and Fred Rogers visit Soyfoods Center. That evening Shurtleff writes Obis a letter of thanks, but raises two issues about articles he wrote for *Vegetarian Times*.

April 21—Fiske writes Shurtleff that Paul and Fred came yesterday for discussions and to pick up materials. Everything went well.

April 24—Obis writes Shurtleff in response to two issues raised by Shurtleff (Gandhi article and Tofutti article for *Vegetarian Times*). Paul always tried to operate as aboveboard and forthrightly as possible. He notes that we will be working together more closely than ever before [on *Soyfoods* magazine] and he’d like our relationship to be as

harmonious as possible. We have important work to do.

June 14—Shurtleff sends Obis a “Chronology of the Development of U.S. Tofu Standards,” which they discussed by phone and which Obis asked to see, “for publication in the next issue of *Soyfoods* magazine.” He notes that Obis went to the Soyfoods Association meeting in Las Vegas and requested that they resubscribe to the soyfoods clipping service. Shurtleff asks: “When do you think the first issue of *Soyfoods* will be published?”

July 9—Obis writes Shurtleff (on *Soyfoods* letterhead) that after he purchased *Soyfoods* magazine he was offered the opportunity to purchase *Vegetarian Times* as well. He had not expected this.

July 27—Obis and Shurtleff talk by phone. Obis bought *Soyfoods* magazine on July 26. He has wrestled for a long time with the problems of trying to own and publish two magazines. His first goal is to serve God’s will. He hopes to have his first issue of *Soyfoods* magazine published as soon as possible.

Nov. 2—Obis writes Shurtleff a 1-page letter on *Vegetarian Times* letterhead. Apparently Shurtleff disagreed strongly with Obis’s decision to buy *Vegetarian Times* but Obis feels his decision was the right one. Publishing two magazines requires less than twice as much work as publishing one, and Obis has always felt that *VT* and *Soyfoods* would make a good combination.

Nov. 4—Obis writes Shurtleff a 1-page letter on *Soyfoods* letterhead. He encloses a check for \$95 for the magazine’s 50% share of the computerized mailing list’s maintenance charges from June 1984 to Dec. 1985.

Dec. 9—Fiske writes Shurtleff on San Diego State University, Dept. of Journalism, letterhead. First to say “Howdy” after being out of touch since sale of *Soyfoods* magazine. He is looking into the possibility of pursuing a doctorate in journalism / mass communication.

Dec. 19—Obis writes Shurtleff on *VT* letterhead. “Just to let you know what’s happening on *Soyfoods*, I have yet to make a final decision, however the amount of tangible support I have received so far really makes me question the whole thing.” He has been disappointed by Shurtleff, Gary Barat, and a woman who was supposed to write (and get paid for) an article on “Advertising and Marketing.” Note: Paul Obis never published any issues of *Soyfoods* magazine.

6709. Staley Continental, Inc. 1985. Annual report. One Continental Towers, 1701 Golf Road, Rolling Meadows, IL 60008. 51 p. 28 cm.

• **Summary:** “Staley Continental Inc. is a diversified corn refiner and foodservice distributor. It was established in February 1985 from the reorganization of the A.E. Staley Manufacturing Co.” In Nov. 1984 A.E. Staley acquired CFS Continental, Inc., one of the nation’s foremost food distributors. On 11 Jan. 1985 A.E. Staley sold off its soybean milling business for approximately \$84 million in cash. The

working capital employed in the business was not included in the sale and was liquidated through customary business channels. The net book value of the assets sold and the related working capital, reflected in the balance sheet at 30 Sept. 1984 were approximately \$81 million and \$47 million respectively. In Feb. 1985 Staley Continental, Inc. was created as a holding company for the two organizations.

“In October 1985, the company finalized plans to divest its soy protein concentrate business. The company will retain two other soy protein-based food ingredient lines—the Gunther Products soy protein whipping agents and the Vico Products hydrolyzed vegetable proteins. The Vico line, in particular, has had a positive performance record in recent years. Sales for its flavor enhancer products increased in 1985. Sales of Vico soy sauce also were strong, reflecting the popularity of Oriental cuisine in this country. In November, plans were announced to install new vacuum drying equipment in Decatur for increased production of Vico Products.”

In 1985 net sales were \$2,707.8 million, more than double the sales of \$1,306.7 million in 1984. Earnings from continuing operations in 1985 were \$25.7 million, down from \$49.1 million in 1984. Address: Rolling Meadows, Illinois. Phone: (312) 981-1696.

6710. **Product Name:** [Soy Sauce, and Vico Meat Analogs].

Manufacturer’s Name: FA. L.I. Frank: Frank Soya.

Manufacturer’s Address: Oude Rijkstraatweg 36, P.O. Box 36, 7390 AA Twello, Netherlands.

Date of Introduction: 1985.

New Product—Documentation: Soya Bluebook. 1985. p. 82, 99. Note: Vico seasonings are made by A.E. Staley in Illinois.

6711. **Product Name:** [Seasoned Tofu (Gourmet Diced with Soy Sauce & Spices, Provencale with Herbs, and Jardiniere with Vegetables)].

Foreign Name: Tofu Gourmet, Tofu Provençale, Tofu Jardinière.

Manufacturer’s Name: Galactina Ltd.

Manufacturer’s Address: Birkenweij 1-6, CH-3123 Belp, Switzerland.

Date of Introduction: 1985.

Ingredients: Provencale: Herbs from Provence, soysauce, seasonings, and salt.

Wt/Vol., Packaging, Price: 250 gm (8.8 oz) packed in water in molded plastic tray with heat-seal film top and full-color front panel photo. In 1987, 1 kg package for catering.

How Stored: Refrigerated, 6 week shelf life.

Nutrition: Provencale: Protein 11.5%, 6.5% fat, 2.5% carbohydrate. 114 calories/100 gm.

New Product—Documentation: Soyfoods (ESFA). 1987. Jan. “Galactina ready to eat salads. Tofu Nature, Tofu Gourmet, Tofu Provençale, Tofu Jardinière. All these can

be eaten hot or cold.” Soya Bluebook. 1986. p. 108; 1987. p. 97. Leaflet. 1987. “Es sprach schon immer viel für Tofu. Jetzt gibt es vier gute Gruende mehr, ihn auch zu geniessen.” A stunning color brochure of four tofu packages showing some of the best graphics seen up to this time. In German and French. Letter from Peter Speck. 1988. March 11. “We started 1985 with four tofu varieties, natural tofu as well as three flavored tofus. In 1987 we introduced the same products in 1 kg packages for catering, plus a tofu spread.”

6722. **Product Name:** Kecap Maya (Indonesian Style Sweet Soy Sauce).

Manufacturer's Name: P.T. Inkenas Agung.

Manufacturer's Address: Pulo Kambing 11, 20 Kawasan Industrial Estate Pulogadung, Jakarta-Timur, Indonesia.

Date of Introduction: 1985.

New Product–Documentation: Soya Bluebook. 1985. p. 99; 1986. p. 105.

6723. **Product Name:** Wheat Meat Balls.

Manufacturer's Name: Sheffield Seitan.

Manufacturer's Address: South Wheelock, Vermont.

Date of Introduction: 1985.

Ingredients: Seitan (wheat gluten cooked in a broth of soy sauce, garlic powder, and cayenne).

Wt/Vol., Packaging, Price: 1 lb+.

How Stored: Frozen.

New Product–Documentation: Talk with Leo Denby,

owner of Sheffield Seitan. 1998. Feb. 3. This frozen product was introduced in 1985. The balls were about 1 inch in diameter and weighed about ½ ounce each. But it was too labor intensive to try to roll all the little balls then cook them in broth—so they dropped the idea.

6724. Shinji, E.; Inoue, S. 1985. [Preventing mold in low-salt soy sauce]. *Nihon Shoyu Kenkyujo Zasshi (J. of the Japan Soy Sauce Research Inst.)* 11(6):240-41. [3 ref. Jap]*

6725. **Product Name:** Tofu Burrito Filling with Red Chile.
Manufacturer's Name: Southwest Soy Foods.
Manufacturer's Address: 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.
Date of Introduction: 1985.

Ingredients: Potatoes, tofu, onions, red chile, water, shoyu, safflower oil, spices.

Wt/Vol., Packaging, Price: 2 lb pack. Retail for \$2.40 (9/90, New Mexico).

How Stored: Frozen.

New Product–Documentation: Talk with Richard Jennings. 1987. Dec. 28. Gave date of introduction. This product is sold only to foodservice organizations.

6726. **Product Name:** Soya Sauce.

Manufacturer's Name: Soya Foods Research Centre. Sri Lanka Dept. of Agriculture.

Manufacturer's Address: P.O. Box 53, Peradeniya, Sri Lanka.

Date of Introduction: 1985.

Ingredients: Fermented soya beans, rice, salt, sugar.

Wt/Vol., Packaging, Price: 350 ml plastic bottle retails for Rs. 14/50 (Plenty). Or a 325 ml bottle retails for Rs. 12/50 (Soya Foods Research Centre).

How Stored: Shelf stable.

Nutrition: 6% protein.

New Product–Documentation: Label. 1988. 4 by 1 inch. Purple on white paper. "Soya Sauce. Tasty substitute for salt. Add 1-2 tablespoons soya sauce to meat, fish, egg, vegetable dishes. Delicious in fried rice and noodle dishes." Form filled out by Jane Gleason. On 23 March 1988 she met with Mr. H.G. Jayatissa, Project Manager, Plenty Soya Food Centre. On 25 April 1988 she met with Mrs. K.G.S. Ariyaratne, Agriculture Instructor.

6727. **Product Name:** Meatless Burger. Marinated Soy Tempeh.

Manufacturer's Name: Soyfoods Unlimited, Inc.

Manufacturer's Address: 14670 Doolittle Dr., San Leandro, CA 94577.

Date of Introduction: 1985.

Ingredients: Soy tempeh (made with cultured soybeans organically grown in accordance with the California Health and Safety Code, Section 26569.11), soy sauce, garlic, onion,

and spices.

Wt/Vol., Packaging, Price: 6 oz vacuum packed.

How Stored: Frozen or refrigerated.

New Product–Documentation: Label. Undated. "All the Sizzle... None of the steak. Ready to eat in 3 minutes." This product, introduced in September 1981, was originally called "Tempeh Burgers."

6728. **Product Name:** Lankasoy Soya Bean Sauce.

Manufacturer's Name: Spices & Essences (Ceylon) Ltd. Forbes & Walker Group (Marketer).

Manufacturer's Address: 29 Braybrooke St., Colombo 2, Sri Lanka.

Date of Introduction: 1985.

Ingredients: (Not on label).

Wt/Vol., Packaging, Price: 325 ml bottle or 650 ml bottle, retail for Rs. 17/- and Rs. 30/50.

How Stored: Shelf stable.

Nutrition: 7.59% protein.

New Product–Documentation: Form filled out by Jane Gleason. Based on meeting with Mr. Wilfred Kurukulasunya, Executive Director, 27 April 1988. Label. 1987. 3 by 3.75 inch paper glue on. Red, gold, green, and white. "Gold Label."

6729. **Product Name:** Westbrae Natural Johsen Double-Brewed Shoyu.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1985.

Ingredients: Water, whole soybeans, whole wheat, sea salt.

Wt/Vol., Packaging, Price: 5 fluid oz (146 ml).

New Product–Documentation: Bush, Larry C. 1985.

"Fermented foods: Tasty toner uppers." *Total Health*. Nov. p. 40. A color photo (see next page) shows the small bottle.

Label. 1986, undated. 6.5 by 3.5 inches. Paper. Orange, brown, blue, green, yellow and white. "Unique '4 year' flavor. Westbrae exclusive 1984 pressing. Brewed once... then brewed again. 30% less salt than regular shoyu."

6730. **Product Name:** Westbrae Natural Teriyaki Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1985.

Ingredients: Johsen Shoyu and double-brewed shoyu (water, soybeans, wheat, salt), Sendai red miso (soybeans, rice, water, salt), rice vinegar, apple juice, tomato puree, Mirin (water, rice), rice malt (rice, malted barley), onions, black pepper, garlic, ginger, allspice, red pepper, natural gum stabilizers (tragacanth, xanthan).

Wt/Vol., Packaging, Price: 12.7 fluid oz (375 ml).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Label. 1986, undated. 5 by 3.5 inches. Paper. Orange, white, blue, green, black. Mt. Fuji logo. “Westbrae’s Teriyaki Sauce is thick, so it can be used

American-style like barbecue sauce or catsup.”

6731. **Product Name:** [Eden Soja-Fertiggerichte (Meat Analogs, and Soy Sauce)].

Manufacturer’s Name: Westdeutsche Nahrungsmittel-Werke GmbH.

Manufacturer’s Address: Muschenerstrasse 8, Postfach 1150, 4518 Bad Laer 1, West Germany.

Date of Introduction: 1985.

New Product–Documentation: Soya Bluebook. 1985. p. 82, 99; 1986. p. 92. “Eden meat analogs.”

6732. Yasui, T.; Shikata, H.; Ishigami, Y.; Ishikawa, H. 1985. [Controlling the color of light-colored soy sauce. II. Dark coloration of hydrolysate from wheat under shaking conditions]. *Nihon Shoyu Kenkyujo Zasshi (J. of the Japan Soy Sauce Research Inst.)* 11(3):104-08. [7 ref. Jap]*
Address: Higashimaru Shoyu K.K., Japan.

6733. Andoh, Elizabeth. 1985. An American taste of Japan. New York, NY: William Morrow and Co. 334 p. + [8] pages of color plates. Illust. by Susan Blubaugh. Color photos by Aaron Rezny. Index. 25 cm.

• **Summary:** This is a beautiful, remarkable book by a perfectionist with an intensely curious mind, a woman who really understands (is indeed an authority on) Japanese foods, cookery, language and culture. The illustrations and photos are likewise exquisite.

Contents: A note on the romanization and pronunciation of Japanese. Acknowledgments. An introduction to cross-cultural cooking (including a brief autobiography). At the market, in the kitchen (“A guide to buying and storing

Japanese foodstuffs and equipment, plus an explanation of certain Japanese cooking terms and techniques”). The recipes: Soups, appetizers, sushi (in the lingo of the sushi bar, rice is known as *shari* and soy sauce as *murasaki*—literally “purple”), main dishes, side dishes, desserts. Setting the cross-cultural table. Photography credits. Mail-order and shopping guide.

Soyfoods [and sea vegetables] are so abundantly represented that we will only refer the reader to the glossary plus (“At the market, in the kitchen,” p. 19-44) and index. In the glossary: Abura agé (fried bean curd). Ao nori (sea herb flakes). Kanten (agar). Kombu (kelp). Miso (fermented bean paste). Miso shiru (also called *omi-otsuke* [a woman’s word]). Neri miso (glossy bean-paste sauce). Nori (laver). Soy sauce (The subtle, full-bodied aroma of soy sauce “does fade after several months. Keep opened bottles tightly capped on a dark shelf in your kitchen”). Tofu (bean curd; kinugoshi, momen, yaki-dofu). Usukuchi shoyu. Yaki-zushi nori.

An American who traveled to Japan in 1966 to study Japanese, Andoh married (in 1969) into the Japanese family she visited there. She enrolled in a class at the Yanagihara School of Classical Japanese Cooking, where she studied for six years.

Each recipe has two titles: (1) A long, descriptive title in English with large, bold typeface and title-style capitalization. (2) Under a hairline, the actual Japanese title, in regular capital letters. The modern Hepburn system of romanization is used throughout the book, so that diacritical marks are used consistently with the appropriate words. Page 52: “Light Bean Soup with Slender White Mushrooms and Bean Curd: Enokidaké no Miso Shiru.” Page 183: “Bean Curd Tempura with Spicy Scallion Sauce: Agé Dashi-Dôfu.”

Note: Use of the terms “bean curd” and “bean sauce” (instead of the now more widely used “tofu” and “miso”) in recipe titles, text, and index makes these parts of the book seem slightly imperfect. Address: Japan.

6734. Aubert, Claude. 1985. Les aliments fermentés traditionnels: Une richesse méconnue [Traditional fermented foods: An unrecognized richness]. Paris: Terre Vivante. 261 p. Index. 21 cm. Series: Collection les Vrais Aliments d’Aujourd’hui et de Demain. [173* ref. Fre]

• **Summary:** The author gives good, brief introductions to the fermented soyfoods tempeh, miso, miso pickles, shoyu, tamari, sufu, natto, soy idli, and hamanatto. Related foods that are also discussed include koji, amazake (amasaké), and ontjom. See especially chapter VII: The fermentation of legumes (p. 73-78). Part IV (p. 153-216) is a dictionary of fermented foods and beverages, in which they are listed alphabetically; basic information and references for each are given. Instructions are given for preparing many of these foods on a home scale, and for some foods (such as tempeh) even recipes are given (fried tempeh, tempeh goreng). The

book contains many beautiful illustrations and an excellent bibliography. The author acknowledges his extensive use of the material in *Handbook of Indigenous Fermented Foods* (1983) edited by K.H. Steinkraus. Address: Ingénieur agronome de formation, France.

Menlo Park, California: Benjamin / Cummings Pub. Co., Advanced Book Program. xviii + 573 p. See p. 359-406. Chap. 12. 25 cm. [232* ref]

• **Summary:** This article is so clearly written that even a beginner can understand it. Contents: Introduction. Some systematics for the nonmycologist: What is systematics? (classification, nomenclature, identification), what is a fungus? (general overview). The genus *Aspergillus*: Morphology, sexual stages (teleomorphs). Genetics: Introduction to *A. nidulans*, the parasexual cycle. Economic aspects: Secondary metabolites, *Aspergillus* metabolites used in food processing, Oriental food fermentations (soy sauce, sake, miso, koji). Conclusion.

Table 12.1 (p. 360) lists “Historical landmarks in mycology and biotechnology involving the genus *Aspergillus*.” 1729—P.A. Micheli: Publication of *Nova plantarum genera*, name *Aspergillus* given to group of molds with characteristic spore head. 1827—J. Schilling: First continuous observation of the growth of a fungus from spore to spore, *A. glaucus*. 1854—A. deBary: First association of a perfect state (*Eurotium herbariorum*) and an imperfect state (*A. glaucus*). 1867—P. Van Tieghem: First to establish importance of Aspergilli in biochemical field with identification of *A. niger* in gallic acid fermentation. 1869—J. Raulin: First defined medium for a microorganism *A. niger*. 1894—J. Takamine: First patent for a commercial enzyme from fungus, “Takadiastase” from *A. flavus-oryzae*. 1917—J.N. Currie: Commercial citric acid production from *A. niger* demonstrated as feasible. 1952—J.A. Roper: Parasexual cycle discovered in *A. nidulans*. 1961—Sergeant et al.: Identification of *A. flavus* as mold association with Turkey-X disease; “mycotoxin revolution” begins. The name “aflatoxin” was given in 1962. 1983—Ballance et al.: Transformation system described in *A. nidulans*, the second transformation system elucidated for a mold. Table 12.3 (p. 378-79) is a “Glossary of morphological terms encountered in descriptions of the Aspergilli.”

Table 12.6 (p. 392) lists “*Aspergillus*-derived metabolites used in food processing” (after Beuchat 1978, *Food & Beverage Mycology*, see p. 368-96). These fall into three broad categories: Acids, enzymes, and miscellaneous. Acids: Citric acid, from *A. niger*, is used in soft drinks, dairy products, jams, jellies, candies, frozen foods, fats and canned goods. Gluconic acid, from *A. niger*, is used in baking powder, bread mixes, desserts, bottle-washing formulations.

Itaconic acid, from *A. itaconicus* or *A. terreus* is used in shortenings, or resin coatings in contact with food. Malic acid, from various *Aspergillus* species is used in beverages, jam, jellies, syrups, candy, and sour dough. Oxalic, from *A. niger*, is used in hydrolysis of starch to glucose. Tartaric acid, from *A. niger* or *A. griseus* is used in carbonated beverages, desserts, jellies.

Enzymes: α -amylase, from *A. oryzae* or *A. niger* is used in corn syrup, dextrose, baking, food dextrins, chocolate syrups. Glucoamylase, from *A. awamori* or *A. niger* is used in dextrose, dextrose syrup, baking. Glucose oxidase or catalase, from *A. niger* is used in powdered egg products, brewing, wines, mayonnaise. Lactase, from *A. niger* is used in dairy products. Naringinase, from *A. niger* is used in debittering grapefruit juice. Pectinase, from *A. niger* is used in clarifying fruit juice and wine. Protease, from *A. oryzae* is used in tenderizing meat, soy sauce, brewing, baking.

Miscellaneous: Mannitol, from *A. candidus* is used as a bulking agent, or humectant.

Illustrations show: (1) "Schematic representation of an *Aspergillus* conidial apparatus" showing metula (primary sterigmata), conidia, vesicle, phialide (secondary sterigmata), conidiophore, and foot cell (p. 377). Address: Prof., Dep. of Biology, Biology, Tulane Univ., New Orleans, Louisiana 70118.

• **Summary:** Contains a discussion of popular fermented soyfoods, including soy sauce, tempeh, and miso.

6737. Bradford, Peter; Bradford, Montse. 1985. Cooking with sea vegetables: A collection of naturally delicious dishes using to the full the bountiful harvest of the oceans. Wellingborough & New York: Thorsons Publishing Group. 144 p. Illust. by Sue Reid. Index. 22 cm. [8 ref]

• **Summary:** The Bradfords have spent considerable time studying food in Japan and are especially well qualified to present this vegan, macrobiotic cookbook. It contains definitions of and/or recipes for using tofu, tempeh, miso, natto ("The taste of these sticky fermented soya beans is either loved or hated. It is somewhat like a very ripe cheese"), shoyu (soy sauce), and seitan. Address: UK.

6738. Brown, Edward Espe. 1985. The Tassajara recipe book: Favorites of the guest season. Boston & London: Shambhala. xviii + 225 p. Foreword by Alice Waters of Chez Panice restaurant in Berkeley. Index. 23 cm.

• **Summary:** In the tradition of the bestselling *Tassajara Bread Book* and *Tassajara Cooking*, Ed Brown has compiled a new collection of gourmet vegetarian recipes from the

kitchens of the well-known Tassajara Zen Mountain Center near Carmel, California. This cookbook contains 12 tofu recipes (mostly entrees; all use firm rather than soft tofu, which has been drained and pressed), 2 soybean recipes, and 1 one miso recipe: Eggs, scrambled tofu, and our latest granola (p. 23). Scrambled tofu (p. 30). Soups & stocks (p. 49). Soy vegetable soup (p. 65). Oriental stock (p. 67; includes tamari. May include soybean sprouts). Tartar sauce with fresh basil (p. 96; for Tofu cutlets). Sesame soybeans (p. 111). Tofu cabbage grill (p. 112). Tofu entrees (p. 139; introduction to tofu and its preparation). Tofu marinade (p. 141). Grilled marinated tofu (p. 142-43). Tofu cutlets (p. 144-45). Tofu teriyaki (p. 146-47). Eleanor's tofu gumbo (p. 148-49). Tofu miso stew (p. 150-52). Alaskan tofu (p. 153-54). Mushroom tofu stroganoff (p. 155-56).

6739. Bull, S.M.; Yong, F.M.; Wong, H.A. 1985. The production of aroma by *Aspergillus oryzae* during the preparation of soy sauce koji. *Food Chemistry* 17(4):251-64. [14 ref]

Address: Dep. of Biochemistry, National Univ. of Singapore, Lower Kent Ridge, Singapore 0511.

6740. Diamond, Harvey; Diamond, Marilyn. 1985. Fit for life. New York, NY: Warner Books. xiv + 341 p. Index. 24 cm. Paperback edition published Feb. 1987. 316 p. [204* ref]

• **Summary:** Contents: Part I—The principles. Introduction. 1. Diets don't work. 2. Natural hygiene. 3. The natural body cycles. 4. The theory of metabolic imbalance. 5. The principle of high-water-content food. 6. The principle of proper food combining. 7. The principle of correct fruit consumption. 8. The theory of detoxification. 9. Protein. 10. Dairy products. 11. Exercise. 12. You are what you think you are. 13. The most frequently asked questions. Part II—The program. Introduction. 1. Breakfast. 2. Fresh juices. 3. The energy ladder. 4. The *Fit for Life* shopping list. 5. The main-course salad. 6. Life-style guidelines. A four-week example of the fitness life-style. In conclusion. Bibliography.

The only references to soy or soyfoods in the index are: Miso (p. 175; Cold Mountain, Eden, Westbrae), Soy sauce and Tamari sauce (p. 176; low-sodium—Eden, Soken, Westbrae). The text mentions Tofu Sauce (Westbrae). The authors (who live in semi-tropical Los Angeles) advocate high consumption of fruit, and are apparently unaware of tofu and tempeh. The book is near vegetarian but includes the use of fish, seafood, chicken, and turkey (p. 173-74, 237). It advises against the use of dairy products.

The paperback edition announces: "America's all-time #1 health and diet book! Over 3 million copies in print!" Address: Pasadena, California.

6741. Duke, James A.; Ayensu, Edward E. 1985. Medicinal plants of China. 2 vols. Algonac, Michigan: Reference Publications, Inc. 705 p. Introduction by Edward S. Ayensu.

24 cm. Medicinal index (by disease). Common names index. Index to species. No. 4 in the series "Medicinal Plants of the World." [234* ref]

• **Summary:** The plants are grouped by family. Two families are tied for containing the largest number of medicinal species: Leguminosae (Fabaceae) and Compositae (Asteraceae) each have 354 species. The soybean (*Glycine max*) is discussed on p. 326-27. "Uses: Leaf: Bruised leaves applied to snakebite. Flower: Used in blindness and opacity of the cornea. Stem: Ashes of stalks applied to granular hemorrhoids or fungus growths on the anus. Fruit: Green hulls chewed to a pulp and applied to corneal and smallpox ulcers. Seed: Chinese herbals suggest that soybean is specific for proper functioning of bowels, heart, kidney, liver and stomach; antidote to *Aconitum* and *Croton*. Root: Decoction astringent. Plant: Bean sprouts ('Ta tou huang chuen') are considered constructive, laxative, resolvent, to help in alopecia [hair loss, baldness], ascites, and rheumatism.

"A salty relish 'Hsien-shih' [salted fermented black soybeans] is made by soaking the beans in water for three days, spreading them to ferment, with salt, ginger, peppers, orange peel, thyme, fennel, and apricot kernels, sealed in an earthen jar, and placed in the sun for one month. This relish is said to be used for ague, bone diseases, chills, colds, cold feet, colic, dogbite, difficulty in breathing, dysentery, fever, headache, marasmus, melancholy, nausea, poisons, and ulcer. Bean ferment (tou huang) is used for rheumatism, especially of the knees. It is chewed to a paste and applied to eczema. Bean curd (tou fu) is prescribed in drunkenness, dysentery, ophthalmia, or swellings. Soy sauce ('Chiang,' 'Chiang yu,' 'Shih yu') is applied to burns, eczema, leprosy, scalds, and sores, and is considered useful in preventing abortion and the hematuria of pregnancy.

"Chemistry: Sitosterol, an anticancer active, replaces diosgenin in some hypotensive drugs. Stigmasterol used to be employed for stiffness. Lecithin derived from soybean may function as a vasodepressor and a lipotropic agent. Soybean oil, with unsaturated fatty acid, is recommended for hypercholesteremia."

The adzuki bean (*Phaseolus vulgaris*) is discussed on p. 336-37, and kudzu (*Pueraria lobata*) on p. 339-40. Address: 1. USDA Germplasm Services Lab., ARS B-001 R-133, Beltsville, Maryland 20705.

6742. Hirano, Masaaki. 1985. *Shōyu miso no bunkashi* [A cultural history of shoyu and miso]. Tokyo: Tokyo Shobosha. 346 p. Illust. 22 cm. Series: *Shoku no fuzoku minzoku meicho shusei*, No. 7. [20+ ref. Jap]*

• **Summary:** A history of miso, miso cookery, shoyu, and shoyu cookery. "Tsuketari shoyu miso bunken shiryō shusei" (p. 297-346). Masaaki Hirano was born in 1931. Address: Japan.

6743. Hsiung, Deh-Ta. 1985. *Chinese vegetarian cooking*.

London: The Apple Press; Secaucus, New Jersey: Chartwell Books. 128 p. Illust. (color). 29 cm.

• **Summary:** Every page of this excellent book is in full color on glossy paper, loaded with color photos. Contains over 70 recipes. Contents: Introduction: History of Chinese vegetarian cooking, essential tools and utensils, basic techniques and cooking methods, regional cooking styles (northern, eastern, western, and southern groups), special ingredients and seasonings (with a photo of each), how to plan your menu. Cold dishes. Soups. Quick stir-fried dishes. Braised & steamed dishes. Rice, noodles & sweets.

History (p. 8): "Vegetarian cooking has a long history in China," and Chinese have traditionally been highly aware of it because of their deep interest in the connection "between food and health, whether physical or spiritual." Chinese Buddhists are vegetarians because they abhor the killing of all living creatures.

"Until quite recently, many people believed that vegetarian cooking in China originated in the Buddhist temples, and that it was first introduced into China with Buddhism from India during the reign of the Han emperor Ming (AD 58-75)." However scholars in China have now found that the earliest known mention of vegetarianism on record was during the Zhou Dynasty (beginning ca 1028 B.C.). Other "references also exist in ancient texts all pre-dating the introduction of Buddhism into China by several hundred years."

"It is generally agreed that the development of vegetarianism in China owed more to the introduction of many foreign fruits and vegetables during the Han Dynasty (206 BC–AD 222) than to Buddhism. Many Chinese vegetarians were influenced by the indigenous philosophy of Taoism, which developed the hygienic and nutritional science of food closely related to the basic yin-yang principles. The appearance of bean curd (tofu)—also during the Han dynasty—and many other soy bean products, together with the discovery of making gluten from dough, helped to enrich and further diversify the vegetarian diet."

It is interesting and important to note "that despite their continual introduction, milk and dairy products are, to date, not prominent in Chinese cuisine. Therefore, unlike their counterparts in the West, Chinese vegetarians will not use butter, cheese, or milk in their cooking, and a true Buddhist will eat neither eggs nor fish." However this book uses eggs (p. 33, 40, 64, 78 etc.).

"One of the best known poets of the Southern Song period, Lu You (1125-1210; W.-G. Lu Yu) was a noted vegetarian. He lived to the ripe old age of 86.

The section on ingredients (p. 13-14) includes concise descriptions of: Bean curd (tofu). Gluten. Red bean paste (also called "sweetened red bean paste," p. 124) [azuki, sweet]. Salted black beans [fermented black soybeans]. Sesame seed oil. Soy sauce ("Use Light Soy Sauce which has more flavour and does not discolour the food as much

as the Dark or Rich Soy Sauce”). Sweet bean paste or Hoi Sin sauce (Made from soy bean sauce...). Yellow bean sauce (“This thick sauce is made from crushed yellow [soy] beans, flour and salt”). Photos here show (p. 15, 19): (1) Dried bean curd skins [yuba]. (2) Six squares of tofu on a rectangular wooden cutting board, and many cubes of deep-fried tofu on a sieve [for deep frying]. A can of “Black beans with ginger” under the label Yang Jiang Preserved Beans with Ginger.” With very few exceptions, the Chinese drink neither water nor tea during the meal; they drink soup instead. A surprisingly large percentage of the recipes in this book call for “bean curd (tofu).”

Soy related recipes: Five spice bean curd (tofu) (with “4 cakes bean curd,” p. 34). Hot and sour soup (p. 42). Spinach and bean curd (tofu) soup (p. 43). Deep fried bean curd (tofu) and wood (tree) ear soup (with 50 gm / 2 oz deep-fried bean curd or 1 cake fresh bean curd (tofu), p. 48-49). Dried bean curd (tofu) skin and vermicelli soup (with 15 gm / ½ oz dried bean curd skin [yuba], p. 50-51). Bean curd (tofu) with mushrooms (quick stir fried, p. 68). Stir-fried spinach and bean curd (tofu) (p. 70). Vegetarian chop suey (with tofu, p. 81). Chinese cabbage casserole (with deep-fried or fresh tofu, p. 82, 84). ‘Buddha’s delight—Eight treasures of Chinese vegetables (with 15 gm / ½ oz dried bean curd (tofu) skin sticks [dried yuba sticks], p. 92-93). Fried gluten (Mianjin, homemade, starting with 2 lb flour, p. 95). Kao fu—Sewed gluten in sweet bean sauce (with 1 tablespoon sweet bean paste or hoi sin sauce, p. 96). Casserole of vegetables (with 1 cake bean curd (tofu), p. 97). Fu-yung bean curd (tofu) (with 1 cake bean curd (tofu), 4 egg whites, and 50 ml / 2 fl oz milk, p. 98-99; Fu yang usually means omelette, but literally means scrambled eggs). Sichuan bean curd (tofu) (with 3 cakes bean curd and 1 teaspoon salted black beans, p. 100-01). San shian—‘The tree delicacies’ (with 275 gm / 10 oz fried gluten or deep-fried bean curd, p. 104-05). Braised ‘three precious jewels’ (with 2 cakes bean curd (tofu), p. 106-07). Vegetarian ‘lion’s head’ casserole (with 4 cakes bean curd and 100 gm / 4 oz fried gluten, p. 108-09). Shanghai vegetable casserole (with 2 cakes bean curd (tofu) or 50 gm / 2 oz deep-fried bean curd, p. 110-11. “For some reason, the best vegetarian restaurants in China are found in Shanghai...”).

“Rice and noodles provide the bulk of the Chinese meal. The best plain boiled rice is obtained by using only the long grain [white] rice known as patna.” Photos show that many dishes are served with a small bowl of white rice. Chow mein—Fried noodles (with 25 gm / 1 oz dried bean curd skin sticks, p. 119). Vegetarian spring rolls (handmade using 1 pack of 20 frozen spring roll skins, p. 122-23).

Note: Many, if not most, recipes call for soy sauce—either light, dark, or both.

About the author (inside rear dust jacket): “Deh-ta Hsiung is a native Chinese who gained his knowledge of Chinese cooking directly from some of the great Chinese

chefs. He has made several television and radio appearances in connection with his expertise on Chinese foods and now writes widely on the subject and teaches at Kenneth Lo’s Chinese Cookery School [in London].

From Gareth Jones’ Food blog (posted 9 Feb. 2011) titled “‘Kung Hay Fat Choy’ Deh-Ta Hsiung.” “Cooking Chinese food at home—complete with wok, steamer and all—took off in the early 1980s. Deh-Ta was at the spearhead of the movement, along with Ken Lo and Chef But from the Ken Lo Cook School. His Chinese Regional Cooking was published in 1979 and was out of print before it got to take off.” “Eating Chinese home cooking, for me, is far superior to most restaurant food—dim-sum excluded.”

6744. Hume, D.J.; Shanmugasundaram, S.; Beversdorf, W.D. 1985. Soyabean (*Glycine max* (L.) Merrill). In: R.J. Summerfield and E.H. Roberts, eds. 1985. Grain Legume Crops. London: Collins. xvi + 859 p. See p. 391-432. Illust. Index. 24 cm. [192 ref]

• **Summary:** Contents: Introduction: History, current status and future projections. Principal economic yield and uses of crop products. Principal farming systems. Botanical and agronomic features: Symbiotic nitrogen fixation potential. Principal limitations to production and yield: Developing countries, developed countries. Fertiliser requirements. Quality of seed constituents. Germplasm resources. Principal breeding strategies: Adaptation to new geographic areas, breeding methodology, breeding objectives, seed quality, pest and disease tolerances, current trends in soyabean breeding. Avenues of communication among researchers (INTSOY, AVRDC, IITA, FAO). Prospects for larger and more stable yields.

Tables: (1) Area (1000 ha), yield (kg per ha), and production (1000 tonnes) of soyabeans from 1969-71 to 1982. (2) Maturity durations and productivity potentials of soyabeans in selected countries. (3) *Glycine* species collections around the world. (4) Sources of resistance among soyabeans to selected insect pests. (5) Sources of resistance among soyabeans to selected diseases.

Table 9 shows that there are soybean germplasm collections in 15 countries. This table has 4 columns: Country, location (city), curator, and number of accessions. AVRDC in Taiwan has the largest germplasm collection in one location (10,400 accessions, Tainan), followed by USA (9,648, Illinois and Mississippi), India (4,000, Pantnagar; 1,800 Amravati), Japan (3,541, Tsukuba; 200, Morioka), USSR (3,000, Leningrad), China (3,000 Jilin; 3,000 Hubei; 2,930 Shadong [sic, Shandong {W.-G. Shantung}]; 2,500 Beijing; 960 Heilungjiang [Heilongjiang]). Also: Australia 400, France 500, Nigeria 1,300, Indonesia 600, South Korea 2,833, North Korea 300, South Africa 600, Sweden 1,200, and Thailand 1,686. Address: 1&3. Univ. of Guelph, Dep. of Crop Science, Guelph, Ontario N1G 2W1, Canada; 2. Asian Vegetable Research and Development Centre (AVRDC), PO

Box 42, Shanhua, Tainan 741, Taiwan, Republic of China.

6745. Kushi, Aveline; Esko, Wendy. 1985. The changing seasons macrobiotic cookbook. Wayne, New Jersey: Avery Publishing Group, Inc. xii + 265 p. Illust. Index. 28 cm. [43 ref]

• **Summary:** The recipes are arranged by the four seasons. The index contains 43 entries for miso, 39 for tofu, 35 for tamari, 18 each for seitan and tempeh, 3 for natto, and 1 each for Japanese black [soy] beans, and for soybeans (dry).

Also contains entries for amazake, amazake pudding, azuki beans, brown rice, hiziki [hijiki], kuzu, mochi, and sea vegetables. Address: Brookline, Massachusetts.

6746. Lo, Kenneth H.C. 1985. New Chinese cooking school. Tucson, Arizona: HP Books. 288 p. Illust. Index. 28 cm.

• **Summary:** On the cover, below the title we read: "An illustrated course in contemporary Chinese cuisine." A gorgeous book, packed with superb color photos on glossy paper. One chapter (p. 98-115), titled "Bean curd and eggs," contains many tofu recipes. Other tofu recipes are scattered throughout the book.

The section titled "Soy beans and bean-based products" (p. 26) gives brief definitions of: Bean curd [tofu], bean curd cheese [fermented tofu], bean curd skin [yuba], salted black beans [fermented black soybeans] ("Cooked, salted and fermented whole soy beans. Mash them with other ingredients or mix into dishes for color" and rich, earthy, piquant flavor), Sichuan chili paste (yellow soy bean paste mixed with dried chilies and their seeds, sugar, and garlic), soy bean paste (crushed soy beans mixed with sugar, salt, and chili), sweet bean paste (made from cooked, puréed, sweetened red beans [azuki]), and yellow bean paste (made of fermented, salted puréed yellow [soy] beans with salt, flour and water). Also contains recipes for: Bean-curd cheese [fermented tofu], p. 88, 89. Bean curd skin [yuba] (p. 200, with color photo of "dried bean curd skin" on p. 18).

Recipes and photos for "salted black beans" [fermented black soybeans] or black bean sauce are: Steamed scallops with black bean sauce (p. 132, 138). Quick-fried crab in black bean sauce (p. 144). Cantonese steamed spareribs with black beans (p. 186, 188). Sliced beef in black bean and chili sauce (p. 201). Ho-fen noodles with beef in black bean sauce (p. 270, 273). Soy sauce is used in recipes throughout the book.

A color photo on the rear dust jacket cover shows Kenneth Lo. His biography, on the inside rear dust jacket, states that he is acknowledged the world over as an authority on Chinese food, and is a graduate of both Peking and Cambridge universities. He is also the founder of one of London's best-known Chinese restaurants.

6747. Lotong, Napha. 1985. Koji. In: B.J.B. Wood, ed. 1985. Microbiology of Fermented Foods. Vol. 1. Essex, England:

Elsevier Science Publishing Co. xx + 371 + 14 p. See p. 237-70. [180 ref]

• **Summary:** Definition and scope. Soybean koji: Raw materials, koji preparation, koji enzymes, application of soybean koji. Rice and similar products: Mould enzymes used in the fermentation of alcohol containing foods and beverages, miso rice koji. Seed inocula: Tane koji, production of seed inocula for soybean koji in South-east Asia, dry starter cakes, spore mass produced on rice adhering to inside surfaces of flasks. Conclusion. Address: Dep. of Microbiology, Kasetsart Univ., Bangkok, Thailand.

6748. McConnaughey, Evelyn. 1985. Sea vegetables: Harvesting guide & cookbook. Naturegraph Publishers, Inc., P.O. Box 1075, Happy Camp, California 96039. xi + 240 p. Illust. Index. 22 cm. [53* ref]

• **Summary:** An excellent book by an expert on the subject, with years of experience. Sea vegetables: *Alaria* (wakame). *Analipus japonicus* (fir needle; matsumo in Japan). *Cystoseira* (chain bladder). *Desmarestia* (color changer). *Egregia menziesii* (feather boa). *Gracilaria* (ogo). *Halosaccion* (sea sac; add to soup and stir fries). *Laminaria* (kelp; kombu in Japan). *Macrocystis* (giant kelp). *Nereocystis* (bull kelp or bullwhip kelp). *Pelvetiopsis* (stir fry seaweed) and *Fucus*. *Pleuroficus* (sea spatula). *Polyneura* (use in soups and as a garnish). *Porphyra* (nori). *Postelsia* (sea palm). *Sargassum* (add to soups). Other sea vegetables. Commercial and imported sea vegetables. Note: Some recipe titles contain the word "vegetarian," but some also use meat.

Soy-related recipes: Frozen tofu (p. 85). Miso (p. 93). Soybeans (p. 205). Tempeh (p. 71, 72, 81, 82, 92, 94, 96, 155, 179, 205). Tofu (p. 72, 78, 93, 147, 151, 155, 171, 206, 207, 208).

Contains many excellent illustrations (line drawings by Wendy Lou Manley) and photos. Address: Oregon.

6749. McDougall, Mary A. 1985. The McDougall health-supporting cookbook. Vol. 1. Piscataway, New Jersey: New Century Publishers. v + 122 p. Index. 23 cm.

• **Summary:** This is a vegan cookbook whose 250 original recipes are designed to support The McDougall Plan, which is a diet low in fat and sodium, high in complex carbohydrates. Since soyfoods are relatively high in fat, they are used sparingly and the recipes are marked by a symbol of a crown. Soy-related recipes include: No gluten bread (with 2 cups defatted soy flour, p. 7). Rice-soy bread (gluten-free) (p. 7). Easy corn bread or muffins (gluten-free) (p. 7-8). Puffs (gluten-free) (p. 8). Carrot corn bread (gluten-free) (p. 8). Plain & simple corn bread (gluten free, p. 9). Tofu-garlic dressing (p. 12). Tofu chili dip (p. 16). Curried tofu dip (p. 16). Best tofu mayonnaise (p. 16-17). Tofu mayonnaise (p. 17). Tofu "TVP" (using frozen tofu, p. 17). Tamari sauce (p. 37). Azuki rice (p. 62). Tofu and vegetables with rice (p. 67). Mu shui tofu (p. 78). TVP sloppy joes (p. 89). Smoothies

(non-soy, p. 27; using regular or frozen bananas, apple juice or water, and other frozen or fresh fruits). Tofu cheesecake (p. 108). Apricot tofu pie (p. 108-09). A portrait photo on the rear cover shows Mary McDougall.

Note 1. Not long after this book was published, New Century Publishers changed its name to New Win Publishing, Inc. and moved to Clinton, New Jersey. As of 2000 this book is published by Putnam/Penguin.

Note 2. This is the earliest English-language document seen (Feb. 2005) that contains the term “gluten-free” (or “gluten free”). Address: P.O. 14039, Santa Rosa, California 95402.

6750. Nabben, Alexander. 1985. Soja-Kueche: Vielseitig und gesund [Soya cookery: Versatile and healthful]. Schaaheim, West Germany: Pala Verlag. 144 p. Illust. Index. 21 cm. [Ger]

• **Summary:** Contents: Soya, the wonderbean (*die Wunderbohne*). A cultural history of the soybean. A little soybean botany. Soya is versatile. The world market and world hunger. Health through proper nutrition and diet. Product types and buying tips. Recipes. About the author (autobiographical, with photo; he was born in 1953 in Viersen. Since 1978 he has worked in a whole-grain bakery, a soya kitchen, and in a vegetarian restaurant in Munich).

This vegan cookbook contains a large number of tofu and tempeh recipes, as well as recipes for most of the other types of soyfoods. Note the following German terms: *Ganze Sojabohnen* (*getrocknete gelbe Sojabohnen*) = whole dry soybeans. *Vollsojamehl* = Whole soy flour. *Sojasauce* = soy sauce. *Miso* (*Sojapaste*) = miso. *Okara* (*Sojakleie*) = okara. *Tofu* (*Sojaquark oder -käse*) = tofu. *Tempeh* (*Soja-“Brie”*) = Tempeh.

On the last page of the book (p. 144) is an advertisement for Morgenland Naturkost, located at: Auf dem Anger 2, 3410 Northeim 19, West Germany. Phone: 05551-64592. They offer tofu and tofu dishes, seitan and seitan products, and utensils for the production of tofu and tempeh.

Apparently a second edition or printing appeared in 1988 (ISBN 3-923176-35-x). Address: Morgenland Naturkost, Auf dem Anger 2, 3440 Northeim 19, West Germany.

6751. Noh, Chin-hwa. 1985. Traditional Korean cooking: Snacks & basic side dishes. Elizabeth, New Jersey; Seoul Korea: Hollym Corporation. 78 p. Illust. (color). Index (general). Index of Korean recipe titles. 27 cm. [Eng; kor]

• **Summary:** This is an excellent cookbook of authentic Korean recipes, each with its Korean name (romanized and in Korean characters). Each recipe is accompanied by numerous useful color photos. The front matter contains an Introduction, Preparation tips, and 2 pages about the healthy Korean diet. Soy related recipes include: Soft bean curd soup (*Sundubutchigae*, p. 10). Seasoned fermented

soybean soup (*Ch’onggukchangtchigae*, with 1 cake bean curd and 6-8 tablespoons seasoned fermented soybeans, p. 11 [ch’onggukchang is Korean style natto]). Royal soybean paste soup (*Kungjungdoenjangtchigae*, with 2 tablespoons soybean paste [Korean miso], p. 12). Bean curd casserole (*Tubu Chon-gol*, p. 13). Wrapped bean curd (*Tubussamtchim*, p. 15). Stuffed bean curd (*Tubusobagi*, p. 16). Steamed bean curd (*Tubuson*, p. 16-17). Bean curd in soy sauce (*Tubut’wigimjorim*, p. 18). Salted bean curd and beef (*Tubu Soemgogijorim*, p. 18). Salted beans (*K’ongjorim*, with 1 cup black beans plus soy sauce, sugar, sesame seeds, and sesame oil, p. 19). Cold cooked bean curd (*Tubu Naengch’ae*, p. 22). Bean sprout rice (*K’ongnamulpap*, with 2/3 lb. [soy] bean sprouts, p. 24). Dried radish strips in soy sauce (*Muumallaengijangatchi*, p. 54). Cucumbers in soy sauce (*Oijangatchi*, p. 55). Sesame leaves in soy sauce (*Kkaennipchangatchi*, p. 56). Todok in red sauce (*Todokchangatchi*, with 1 cup soy sauce, p. 56). Fermented soybean lumps (*Meju*, with 18 lb. dried yellow soybeans, p. 62-63). Soy sauce (*Kanjang*, homemade, p. 62-63). Soybean paste (*Toenjang*, homemade, p. 63). Red pepper paste (*Koch’ujang*, homemade, with 2 lb. fermented soybean powder, 6 lb glutinous rice powder, p. 64).

Note 1. This is the earliest English-language document seen (Jan. 2012) that uses the word “ch’onggukchang” to refer to Korean-style natto.

Note 2. This is the earliest English-language document seen (March 2009) that uses the word “Toenjang” to refer to Korean-style soybean paste (miso), or the word “Koch’ujang” to refer to Korean-style fermented red pepper and soybean paste (miso).

The useful Glossary (p. 73-75) contains definitions of: Bean curd (*tubu*). Beans, incl. yellow soybeans (*huink’ong*) which are used to make [soybean] sprouts (*k’ongnamul*), bean curd (*tubu*), soft bean curd (*sundubu*), bean paste (*toenjang*), fermented soybeans for making soy sauce (*meju*), seasoned fermented soybeans (*ch’onggukchang* [Korean natto]), soybean flour (*k’ongkaru*), soy sauce (*kanjang*).

Brown soybeans (*pamk’ong*—literally “chestnut beans”) are a chestnut brown color and have a smooth chestnut-like texture when cooked.

Black soybeans (*komunk’ong*) are served as a side dish.

Mung beans (*noktu*), used to make mung bean sprouts (*sukchu namul*), etc. Red kidney beans [*azuki*] (*kangnamk’ong*).

Bean sprouts (*k’ongnamul*) may be grown at home or purchased in the vegetable section of most grocery stores. The large sprouts are from the yellow soybean; the smaller, more delicate sprouts are from the green mung bean.

“Soybean paste (*toenjang*) is a thick brown paste made from a mixture of mashed fermented soybean lumps [soybean koji] (left from making the soy sauce), powdered red pepper seeds and salt. It is used as a thickener for soups and stews and will keep well in the refrigerator.

“Soy sauce (*kanjang*) is a brownish-black salty liquid made by cooking fermented soybean cakes with water and salt. Each household in Korea used to make their own soy sauce in the spring; some still do. These are mild and add good flavor to most any food.” Soy sauce is used in cooking and at the table. Japanese “soy sauce is less salty but sweeter than Korean soy sauce.

“Sweet red beans (*p’at*) are small and round and used widely in Korean confections. When cooked and mashed they are sweet and soft textured. This sweet bean puree [Japanese *an*] is used as filling in rice cakes [mochi] and also now in donuts and rolls.”

The Glossary also mentions laver (*kim*), a sea vegetable called “nori” in Japan, that is widely used in recipes in this book. No other sea vegetables are mentioned. Address: Munhwa Cooking School.

6752. Noh, Chin-hwa. 1985. Practical Korean cooking. Elizabeth, New Jersey; Seoul Korea: Hollym International Corporation. 214 p. Illust. (color). Index. 27 cm.

• **Summary:** Although this cookbook of authentic Korean recipes contains more than twice as many pages as the author’s *Traditional Korean Cooking* (214 vs. 78), many of the recipes and photos are identical, as is the front matter: Introduction, Preparation tips, and The Korean Diet. This book contains many more meat dishes.

Most of the soy-related recipes are the same, except there are many new recipes in which “soy sauce” is included in the title; many also contain meat. A complete list of these is given in the Index under “soy sauce.” For example: Beef and bamboo shoot in soy sauce (p. 42). Chicken in soy sauce (p. 45). Deep-fried chicken in soy sauce (p. 46). Abalones in soy sauce (p. 104).

The following are recipes for basic soyfoods with many color photos—Page 196: Fermented soybean lumps (*meju*; soybean koji). Pages 196-97: Soy sauce (*kanjang*). Page 197: Soybean paste (*toenjang*). Page 198: Red pepper paste (*koch’ujang*). Address: Munhwa Cooking School.

6753. Odo, Franklin; Sinoto, Kazuko. 1985. *Zusetsu Hawai Nihonjin-shi 1885-1924* [A pictorial history of the Japanese in Hawaii, 1885-1924]. Hawaii Immigrant Heritage Preservation Center, Dept. of Anthropology, Bernice Pauahi Bishop Museum, 1525 Bernice St., P.O. Box 19000A, Honolulu, Hawaii 96817-0916. See p. 166. [Jap; Eng]

• **Summary:** Commemorating the centennial of the first arrival of government contracted Japanese laborers in Hawaii. Note that both English-language and Japanese-language editions of this book were published. Throughout the English-language edition, the word Hawaii is spelled “Hawai’i.”

A photo (p. 166) shows the inside of the Hawaii Shoyu Co. (Hawaii Shoyu Kaisha) on King Street in Palama, Honolulu, taken in about 1914. The caption reads: “The

Japanese is Hawaii depended upon shoyu imported from Japan until Nobuyuki Yamashiro started making shoyu in 1904. His company was established as Hawaii Shoyu Co. in 1906. American Shoyu Co. was established in Honolulu in 1912.

The same page shows a 1906 advertisement for Takakuwa Store, Nu’uanu, Honolulu, reprinted from *Hawaii Shinpo*, 1906. The store sells shoyu. Address: Hawaii.

6754. Richie, Donald. 1985. A taste of Japan: food fact and fable. What the people eat. Customs and etiquette. Tokyo, New York, San Francisco: Kodansha International. 112 p. Illust. (some color photos). Index. 27 cm.

• **Summary:** This book contains a nice chapter titled “Tofu” (p. 34-41) in which the different types are described including *momengoshi-dofu* (“cotton” tofu) and *kinugoshi-dofu* (“silk” tofu). It also discusses *okara*, noting: “Now mainly used as livestock feed, it once also nourished one of Japan’s greatest scholars. Arai Hakuseki, who lived during the Edo period (1615-1868), proudly related that in his impoverished student days he lived almost entirely on *okara* and that in gratitude he later, rich and famous, gave large sums of money to his charitable tofu maker.”

On pages 38-39 are color photos of: “(1) Atsu-age. (2) Koya-dofu. (3) Ganmodoki. (4) Unohana or *okara*. In Kyoto, this humble food is rounded into balls and sold. (5) *Yudofu* course in a Kyoto restaurant. The course includes yuba tempura, simmered *hiryo* (known as ganmodoki in the Kanto [Tokyo] area) and *goma* (sesame) tofu. (6) Aburage (two sizes).

Even today, Chinese and Japanese view tofu in very different ways: “... Chinese cooking tends to regard tofu as an additive, as something which enhances something else. The Japanese, on the other hand, relish the taste of tofu itself...” for example as *Hiyayakko* [chilled tofu; summer] or *Yudofu* [simmering tofu; winter]. Each is seasoned with soy sauce or a soy-based dipping sauce. The names of various popular Japanese tofu recipes are given (p. 40).

“Freeze-dried tofu” is said to have originated one cold night in a temple at the summit of Mount Koya [*Kôya-san*] when a forgetful acolyte left the tofu offering of the day on the altar. The next morning it was found frozen. It was also found that this tofu had a completely different texture from ordinary tofu and it could be kept for a long dried since it contained very little water. This tofu has at least four different names: (1) Koya-dofu. (2) Misuzu-dofu. (3) Shimi-dofu. (4) Kori-dofu.

Note 1. This is the earliest English-language document seen (May 2012) that contains the term *shimi-dofu* (written as two words, regardless of hyphenation, without diacritics).

A large illustration (p. 40-41) shows tofu being made from the *Kinsei Shokuhin Zukushi Ekotoba* (1805). The basic process has not changed to this day.

The copyright page notes: “The text of this book is

based on a series of articles that appeared in *Winds* magazine, 1981-83.” “In this book, all twentieth-century Japanese names appear in Western order, and all earlier names appear in traditional order, surname first.”

Note 2. There are also chapters on sushi, sukiyaki, tempura, menrui (noodles), onigiri, mochi, tsukemono (pickles), okashi (Japanese sweets, confections). Saké. Ocha (tea). Address: Japan.

6755. Richter, Dr. Joachim; Torre, Ursula della; Richter, Nora. eds. 1985. *Tofu Kochbuch* [Tofu cookbook]. Verlag Dr. Richter GmbH, D-8000 Munich 82, West Germany. 72 p. Illust. No index. 20 cm. [Ger]

• **Summary:** Contains numerous full-page color photos and over 100 tofu recipes and preparation tips. Nora Richter developed and tested the recipes in cooperation with DE-VAU-GE Gesundheitswerk / granoVita. The tofu was made by Tofu Kost-Werk TKW GmbH in 4724 Wadersloh 3, Germany (which now also sells the book).

Contents: Tofu, a delicacy for 2000 years. What one should know about tofu. Varieties of tofu. Buying tips. Cooking tips. The ABCs of tofu preparation. Little recipes for getting to know tofu. Fried tofu (Gebratener tofu). Tofuletten. Salads. Salad dressings. Tofu sauces and dips. Soups and hot-pots. Tofu for stuffing/filling. Tofu dumplings and meat balls (*Nocken, Klopse und Klösse*). Souffles and gratins. Classical tofu recipes from East Asia. Desserts, baked goods, cakes, pastries, and tarts. Address: Munich, West Germany.

6756. Salunkhe, D.K.; Kadam, S.S.; Chavan, J.K. 1985. *Postharvest biotechnology of food legumes*. Boca Raton, Florida: CRC Press. 160 p. Illust. Index. 26 cm. [25 soy ref]

• **Summary:** Contents. 1. Introduction. 2. Seed structure, production, and distribution (Soybean, p. 8-10, 17-18). 3. Chemical composition. 4. Nature and causes of losses. 5. Harvesting, threshing, and drying (Soybean, p. 69-70). 6. Storage. 7. Processing and utilization (Soyfoods, p. 121-36). 8. Food legumes in protein crisis.

Chapter 7, “Processing and utilization,” discusses tofu, tempeh, soy flour, soymilk, miso, shoyu, natto, Hamanatto, and cereal-soy blends. Address: 1. Vice-Chancellor; 2. Prof. of Food Science & Technology; 3. Asst. Food Science & Technol. All: Mahatma Phule Agricultural Univ., Rahuri, Maharashtra State, India.

6757. Scott, David. 1985. *Protein-balanced vegetarian cookery*. London: Rider Books, Century Hutchinson Ltd. 183 p. Illust. (by Steve Hardstaff). Index. 24 cm. [31* ref]

• **Summary:** This book was originally published in 1980, and the latest reference in the bibliography is 1978. A second edition was published in 1985, then a 1987 edition was published in the USA by CRCS Publications, P.O. Box 20850, Reno, Nevada 89515. The author has a poor

knowledge of soyfoods, and makes little mention or use of them in this book. He refers to tofu as “beancurd,” has a recipe for “Beancurd Burgers,” mentions miso and a Miso-Tahini Spread, soy sauce, plus an Sunflower Seed, Soya Bean and Almond Casserole. Pages 160-61, information about soya beans, contains many errors.

6758. Shurtleff, William; Aoyagi, Akiko. comps. 1985. *Computerized bibliography on soy sauce, shoyu and tamari*. Lafayette, California: Soyfoods Center. 67 + 12 p. Unpublished. No index. 28 cm. [749 ref]

• **Summary:** The body of this book consists of bibliographic records sorted alphabetically by author, printed on a dot-matrix printer. None of the records has a summary or abstract. The last 12 pages consist of 130 early records (770 B.C. to 1903) sorted chronologically. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

6759. *SoyaScan Notes*. 1985. *Chronology of Lea & Perrins Worcestershire Sauce*. 13 May 1994. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** This chronology is a revised and expanded version of one published in an unknown UK airline magazine, found in one of the Lea & Perrins historical scrapbooks (Fair Lawn, New Jersey). We offer no guarantee of its accuracy.

1823 Jan. 1—Mr. William Perrins and Mr. John Wheeley Lea form a partnership to carry on the chemists and druggists business at 68 Broad Street, Worcester, England (located about 25 miles southwest of Birmingham). 1835—Lord Sandys, the former governor general of Bengal, gives recipe to Mr. Lea and Mr. Perrins in Worcester, England.

1837—Lea & Perrins sauce first sold commercially.

1842—636 bottles sold.

1845—Factory set up in Bank Street, Worcester.

1849—Arrangements made for exports to New York.

The exclusive U.S. agent was John Duncan & Sons, a small firm which imported liquors and wines from Europe, and preserves, jams, and jellies from England.

1852—Annual sales reach 30,000 bottles.

1853—Lea & Perrins Worcestershire Sauce is awarded a medal at the New York Exhibition of the Industry of All Nations.

1897—New (present) factory built in the Midland Road, Worcester.

1902—Bottling begins in New York.

1906—The High Court of Justice in Britain decrees that no firm other Lea & Perrins be allowed to call their Worcestershire Sauce “the Original” or “the Genuine.” This helps deals with upstarts and imitations.

1910—U.S. Bottlers (Duncans) move to West Street. Lea & Perrins (Inc.) of America.

1930—Lea & Perrins U.K. merge with H.P. Sauce

Limited. John Duncan's Sons becomes Lea & Perrins Inc.

1931—Worcestershire Sauce manufacture begins in Australia.

1931—Lea & Perrins Inc. is incorporated into H.P. Sauce Ltd.

1940—Bottling of Lea & Perrins moves to Tower Road, Birmingham, during World War II.

1946. manufacture begins again in Worcester.

1967—H.P. Sauce / Lea & Perrins acquired by Imperial Tobacco Co.

1985—Imperial Tobacco increases its control to 100%. Lea & Perrins International formed representing Lea & Perrins, H.P. Foods and Golden Wonder abroad.

1986 April—Hanson Trust assumes control of Imperial Foods / Lea & Perrins.

1988—Lea & Perrins is acquired by BSN Groupe of Paris, France.

Note: 1994 July—BSN Groupe changed that name to Groupe Danone.

Today, in addition to its Original Worcestershire, Lea & Perrins produces Lea & Perrins Steak Sauce, Lea & Perrins White Wine Sauce (for chicken, fish, or lighter foods), and Lea & Perrins Barbecue Sauce.

6760. The first macrobiotic cookbook: Formerly *Zen Cookery*. Revised edition. 1985. Oroville, California: George Ohsawa Macrobiotic Foundation. 134 p. Topical index. General index. 22 cm. Copyright 1984, 1985 [11 ref]

• **Summary:** Edited by Cornelia and Herman Aihara, this is a revised and expanded edition of *Zen Cookery*, which was first published in 1964 by the Ohsawa Foundation of Chico, California. "Includes 296 recipes updated for the 1980's." Each recipe is numbered and the numbers are almost the same as in the original edition though some of the names have been changed slightly, and ingredients have been adjusted. Much less salt has been used.

There is an interesting preface followed by 4 pages of photos titled "Recollections of the early 1960s"—related to Chico-San, Inc. and followers of macrobiotics.

Contents: Preface. Photo recollections. 1. Grains. 2. Noodles. 3. Vegetables. 4. Beans and sea vegetables. 5. Soups. 6. Sauces. 7. Salads and pickles. 8. Special dishes. 9. Miso and soy sauce dishes. 10. Breads and snacks. 11. Desserts. 12. Beverages. Seasonings. Cutting styles. Glossary.

"Soon after George Ohsawa came to the United States as a missionary of macrobiotics in 1959, he published *Zen Macrobiotics* in 1960. This book in its original form included recipes for macrobiotic cooking. Although the number of macrobiotic students increased rapidly because of his interesting lectures and charisma, the much needed editing of the recipes for clearer instructions and measurements was not realized until later.

"In 1961, on Ohsawa's advice, thirteen macrobiotic

families, numbering thirty-six [sic, 34] people, left New York City and moved to a small town in Northern California named Chico. The following year, all the adult members of the group started the first macrobiotic food distributing company, Chico-San, Inc.

"Since nobody on the West Coast had heard of macrobiotic foods, one of the first jobs for the Chico-San founders was educating people in the macrobiotic philosophy, diet and cooking. A committee for the teaching of macrobiotic cooking was formed by the women of the group who began by separating the cooking section from *Zen Macrobiotics* and gathering recipes among themselves. Thus, Chico-San, under the name of the Ohsawa Foundation of Chico, published the first macrobiotic cookbook, *Zen Cookery*, in 1964.

"The book sold very well for eleven years. It was out of print from 1975 until 1984, when the George Ohsawa Macrobiotic Foundation published the book under its new title, *The First Macrobiotic Cookbook*. The 1985 edition has been completely revised and corrected; however, the original outline and numbering system have been retained."

The photos have these captions: "(1) Bill Salant, Al Bauman [both standing by a car], and Herman Aihara (not in picture) stop for refreshment on their exploration of the Sacramento Valley area prior to the cross country move. (2) On the road, Cornelia Aihara preparing breakfast for 36 hungry people at a scenic spot near Lincoln, Nebraska, on the way to California. (3) CBS News is on hand to greet the travelers upon their arrival in Chico. Later a 'Welcome to Chico' dinner was sponsored by the town. (4) Joanne Hirsch (left) with Teal Nichols (center), editor of the first edition of *Zen Cookery* [both are seated at a formal dining table with several other people]. (5) Shayne Oles, editor of *The New Zen Cookery*, with husband Lou (left) and Junsei Yamazaki.

"(6) Jacques deLangre, Tommy Nakayama, Lou Oles, and Bob Kennedy relaxing in front of Herman and Cornelia Aihara's home [in Chico]. (7) Herman Aihara rings up a sale at the first 'Chico-San'—the tailgate of his car. (8) Irv Hirsh getting a workout on the first rice cake machine (modified) in the United States. (9) Construction underway on a koji room at the Chico-San facility in Chico. (10) Bob Kennedy (right), president of Chico-San at its sale in 1985, standing in front of a new shipment of organic rice. (11) Meal time at the premier Chico picnic; still held annually at Hooker Oak Park. (12) Herman and Cornelia Aihara, hosting the 1964 New Year's Day celebration." Address: George Ohsawa Macrobiotic Foundation, 1511 Robinson St., Oroville, California 95965.

• **Summary:** “From the National Public Television Series ‘Yan Can Cook,’ now in its sixth season, with 560 shows he has hosted since 1978. One of the show’s sponsors is Kikkoman. The recipes in this book are divided by geographical region. ‘The best way to grasp the diversity of China’s cuisine is to consider the land as divided into four major culinary regions [north, south, east, and west], each boasting its own cultural identity. Contents: Introduction. Canton. Szechuan and Hunan. Peking. Shanghai. Nouvelle cuisine.

On pages 8-9 is a gorgeous color photo (2-page spread) showing all the foods and seasonings described in the “Glossary” that follows (p. 11-15). On page 10 is the numbered “key” to the names of items shown on pages 8-9. These include:

Bean curd (“Also known as ‘tofu.’ Types include: dried [yuba] {in sheets or sticks}; fermented {either red or white and fermented in rice wine}; fresh {in cakes or blocks}; and fried {in small pouches or cubes}. See also p. 79.”) Bean paste, sweet (“Sweetened fermented soy bean paste used as a seasoning in many Szechuan and Hunan dishes”). Bean sauce, brown (“Also referred to as yellow bean sauce. Thick sauce made from fermented soy beans”). Bean sprouts (“Tender sprouts from mung beans or soy beans”). Black beans, fermented (“Small, fermented black [soy] beans with pungent aroma and salty taste. Used in Cantonese-style dishes. Sold canned or bulk in plastic bags... Rinse before using”). Hoisin sauce (“Dark brown, thick sauce with a sweet, spicy flavor; made from fermented soy beans, flour,

vinegar, sugar, garlic, and spices”). MSG (“... not called for in this book”). Soy sauce. Tofu (“See Bean curd”).

A recipe for “Black bean sauce” (p. 32) calls for “¼ cup fermented black beans,” 2 tablespoons vegetable oil, 3 cloves minced garlic, 3 tablespoons dry sherry, 2 tablespoons dark soy sauce, 1 tablespoon brown sugar, and 2 teaspoons sesame oil. It is made in a wok.

Contains 9 recipes for tofu (the term now preferred by the author to “bean curd,” though he uses both). These include: Crabmeat & bean curd soup (with “1 package {about 1 pound} soft tofu {bean curd}, drained and cut into ½-inch cubes,” p. 47). Szechwan preserved vegetables with tomato (with “1 package {about 1 pound} firm tofu {bean curd}, drained,” p. 77). Vegetarian tofu casserole (with “2 tablespoons fermented bean curd, mashed” and “8 ounces pressed bean curd, cut into thin slices,” p. 80). Pressed bean curd with beef (with “1 package {7 ounces} pressed soy bean cake, cut into thin slices,” p. 89). Peking pork & mushroom soup (with ½ package firm tofu, p. 108). Tofu & green bean salad (with “1 package {about 1 pound} firm tofu {bean curd}, drained,” p. 136, photo p. 151). Shanghai fish soup (with ½ package firm tofu, p. 137). Bean curd family style (with 1 package firm tofu, p. 141). Vegetarian bean curd roll (with “6 dried bean curd [yuba] sheets,” p. 155). “Red fermented bean curd” is mentioned on page 10 (no. 48 in list) and as an optional ingredient (“for more exotic flavor”) in a recipe for Chinese BBQ pork (p. 38).

On page 79 is a description of the many uses of the soybean, including dark/thick and light/thin soy sauce, tofu (fresh bean curd), deep-fried bean curd, dried bean curd sheets or sticks (yuba), and fermented bean curd [fermented tofu] in red and white versions.

“Dark soy sauce has a heavier consistency and is somewhat sweeter. Its dark color imparts a reddish-brown hue to the foods cooked in it, so it is used in ‘red-cooked’ dishes. Light soy is an all-purpose soy sauce often used in marinades and in stir-fry dishes.” Address: Yan Can & Company, Inc., P.O. Box 4755, Foster City, California 94404.

Address: American Soybean Assoc., Taiwan.

6766. Yokotsuka, Tamotsu. 1985. *Fermented protein foods in the Orient, with emphasis on shoyu and miso in Japan*. In: B.J.B. Wood, ed. 1985. *Microbiology of Fermented Foods*. Vol. 1. Essex, England: Elsevier Science Publishing Co. xx + 371 + 14 p. See p. 197-247. [146 ref]

• **Summary:** This book chapter is very similar to Yokotsuka (1982), “Industrial application of proteinous fermented foods.” However it contains some new, additional, and

very interesting information, especially concerning history, on pages 198-209 as follows: Introductory definitions of enzymatic hydrolysis, *Aspergillus* molds, miso (whose per capita consumption in Japan is about half that of shoyu by weight), saké, mirin, amasaké. Table 1 shows “Per capita annual consumption of fermented foods prepared from *Aspergillus* moulds in Japan (1981).” Shoyu 10.1 litres. Miso 4.9 kg, sake 12.3 litres, mirin 0.6 litres, shochu 2.2 litres, rice vinegar 0.25 litres, (vinegar) 2.5 litres. Note: Beer 39.5 litres. Whiskey and other foreign alcoholic beverages 3.7 litres. Japanese population 117.85 million on 1 Oct. 1981.

Introduction (p. 197): There is a basic difference between the saccharification process used in Western countries and that of East Asia. In the West, the amylolytic enzymes that break down / hydrolyze starches into sugars are derived from malt, whereas in East Asia *Aspergillus* and *Rhizopus* molds have long been used as the source of these enzymes.

History: History of fermented proteinous foods in China: Chu (koji), chiang, shi or tou-shi [fermented black soybeans], chiang-yu (soysauce), shi-tche (the extracted juice of fermented black soybeans). History of shoyu and miso in Japan: Hishio, sho, soya or soy, miso or misho, tamari, miso-damari, tare-miso and usudare, shoyu, miso of today.

Shu [Qu; koji] was first mentioned in the *Shu-Ching* [pinyin: *Shujing*] written 3,000 years ago during the Chou [Zhou] dynasty (1121-256 BC), which stated that chu is essential for making alcoholic beverages. Two different colors of chu were described: yellow and white. “The most popular one, which had a yellow colour indicating perhaps *Aspergillus oryzae*, was called yellow robe. The white one is presumed to be *Rhizopus* or *Mucor* and was called white robe.” Originally, chu was made in granular form and called *san-chu*. But by about AD 947-79 chu was developed in cake form called *ping-chu*.

Page 205: The difference between tamari, miso-damari, tare-miso, and usudare was not always clear, however in early documents they generally refer to the liquid obtained during the fermentation of miso or *sho* [*hishio*]. “Literally, Tamari or Miso-damari, or Tare-miso” means the liquid separated from the top of miso. “or drained off from the bottom of the kegs in which the miso or sho was stored, or filtered into a bamboo cage which is put into miso or sho. But according to such books as the *Honcho-bunsho* (AD 1487), *Shijoryu-hochosho* (AD 1489) and others (AD 1504, 1537), Tare-miso or Usudare seems to have been the name for the liquid drained off or press-filtered from the boiled mixture of miso or *sho* [*hishio*] and salt water.” But the word *shoyu* (written with the same characters as *chiang-yu* [*jiangyou*] in Chinese) did not appear in any of these books.

Shoyu: The word “shoyu,” written with the same Chinese characters with which it is written today [these characters are pronounced *chiang-yu* / *jiangyou*, and mean “soy sauce”] in Chinese, first appeared in the *Ekirinbon*

Setsuyoshu (AD 1598). The word shoyu literally meant the liquid obtained from *sho* / *hishio*. However, to confuse matters, the liquid obtained from miso or tamari (soybean koji fermented in salt water) was also called “shoyu” in these early days. Moreover, in the book *Yoshu-fushi* (AD 1686) shoyu was defined as *shi-ju* (*shi-tche* in Chinese), the liquid obtained from salted, fermented black soybeans. In yet another book, shoyu was defined as wheat sho. All these descriptions suggest that the word “shoyu” had a broad meaning in the beginning, and only later acquired the more specific meaning it has today—the liquid obtained from the mash [moromi] in which a moulded mixture of soybeans and wheat or barley was fermented in water in the presence of salt water with a high salt concentration. This gradually became clearly differentiated from tamari or a shi-tche like product made almost entirely from soybeans [plus salt and water].

During Japan’s Edo period (1603-1867), great progress was made in the technology of making shoyu, and the scale of its production was enlarged. Many books from this period describe the manufacture of shoyu: *Ryori monogatari yoroze kikigaku* (1643), *Yoshufushi* (1686), *Honcho shokukan* (1692), *Wakan sansaizue* (1715), *Mankin sangyo bukuri* (1731), *Zoshu seiho* (1716), *Sake shoyu denjuki* (1785), and *Koeki Kokusanko* (1844).

The following is a summary of what these books say about how typical Japanese shoyu (*koikuchi shoyu*) was made at that time—about 300 years ago. As basic raw materials use 1 part soybeans and one part wheat kernels or dehulled barley. Gradually it was recognized that wheat gave better quality shoyu than barley. Soak the soybeans, then boil them. Roast the wheat kernels or barley, then crack into pieces. Mix the two main ingredients well, then place them between straw mats or in wooden trays where they will be naturally inoculated and, after 2-3 days, cultured with molds. The mold cultured materials were called *koji*, a word written with the same character as its Chinese counterpart, *chu* / *qu*. Judge the quality of the finished koji by its color: white, yellow or brown are good, while blue or black are bad. This suggests that *Aspergillus oryzae* or *Aspergillus sojae* were already recognized as the best molds for making shoyu. Set aside a small portion of good koji to use as a starter culture for making the next batch of koji.

To make the moromi mash: Mix the koji made from a mixture of 1 part whole dry soybeans and 1 part wheat kernels with 2.2 parts of water and 1.1 parts of salt. Store this mash for about 70 days in summer or 100 days in winter. Summer was thought to be the best season for making koji and moromi. Amazake was sometimes added to the shoyu mash to add natural sweetness to the salty taste.

The total population of Japan at that time was about 30 million; of these about 1.2 million lived in Edo (today’s Tokyo) and these Edo dwellers consumed much more shoyu per person per year than is the case today. One typical

wooden keg of shoyu at that time contained 14.4 liters [3.80 gallons or 15.22 quarts] which was said to be enough to last one person one year (*Chohoroku* 1856, from *Shoyu-monogatari*, p. 5, written by N. Matsumoto, published by Kikkoman Shoyu Co. Ltd., 1976).

The two main centers of shoyu production in Japan were in Noda city and Choshi city, both of which were not far from Edo / Tokyo. Shoyu manufacture began in Noda and Choshi in 1561 and 1616, respectively. About 1.6 million kegs of shoyu were consumed in Edo, of which 1.5 million kegs were transported from the above two cities and the 0.1 million from places in Japan southwest of Tokyo, mainly Kishu [Wakayama prefecture], Tatsuno [a city in Hyogo prefecture, where light-colored shoyu {usukuchi shoyu} was invented in 1666], and Shodo-shima [an island in Kagawa prefecture in the Inland Sea of Japan]. Address: Kikkoman Corporation, Noda-shi, Chiba-ken, Japan.

6767. Product Name: Hime Brand Inarizushi-no-Moto: Prepared Fried Bean Curd.

Manufacturer's Name: JFC International Inc. (Importer). Made in Japan.

Manufacturer's Address: S. San Francisco, CA 94080.

Date of Introduction: 1985?

Ingredients: Bean-curd (Soy beans, water, calcium sulphate), soybean oil, soy sauce (water, soybeans, wheat, salt), sugar, monosodium glutamate.

Wt/Vol., Packaging, Price: 10 oz (284 gm).

New Product–Documentation: Label (Can). 3 inches high, 3 inches diameter. Color photo of Inari-zushi (Tofu pouches stuffed with vinegared rice) on front. Includes directions for making 15-17 pouches.

6768. Lea & Perrins. 1985? A recipe collection from Lea & Perrins. Fair Lawn, New Jersey: Lea & Perrins. 36 p. Undated. Illust. (color). No index. 22 cm.

• **Summary:** A booklet of recipes that call for Lea & Perrins' Worcestershire Sauce. Printed in color on glossy paper. Contents: Happy hour snacks. Brunch. After work dinners. Weekend. Seasonal specialties. Address: 15-01 Pollitt Drive, Fair Lawn, New Jersey 07410.

6769. Product Name: Che Lun Soy Sauce.

Manufacturer's Name: United Breweries International (UK) Ltd.

Manufacturer's Address: 17-21 Sunbeam Road, Royal Park, London NW10 6JP, England.

Date of Introduction: 1985?

Ingredients: Soya bean extract, wheat flour, salt, sugar, caramel.

Wt/Vol., Packaging, Price: 7 gm foil pouch sample, 5.28 fluid oz (150 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1982. 5.75 by 3

inches. Red and green on gold. Chinese lion illustration. Foil pouches. 2 by 3.5 inches. White and green on gold. Chinese lion illustration. Label. 1986, undated. "Rich, superior. Naturally brewed."

6770. Simas, Luiz; Joels, Bobbi. 1986. Re: Miso, tempeh, shoyu, and macrobiotics in Brazil. Letter to William Shurtleff at Soyfoods Center, Jan. 7. 2 p. Typed, with signature on letterhead. [Eng]

• **Summary:** "When we returned to Brazil from the USA in Nov. 1981, we decided to hold a series of classes on natural foods processing, including a class on making tempeh at home. (Tempeh was completely unknown around here at that time.) We also began to make tempeh for our own consumption, but ended up setting up a small shop in our apartment. Because of the limited space, our tempeh production never went beyond 50 pounds per month, in spite of the large demand. So after a year or so, as we had originally planned, we handed the business over to a couple of friends who, unfortunately, for many reasons, were not able to continue tempeh production.

"However there is now another group of people making and selling tempeh here in Rio: Jurema and Mariá Paulinho, Rua Raimundo Correia, 27, apt. 504, 22.040 Rio de Janeiro (RJ), Brazil. Phone: (021) 237-7897. We will always be available for providing any kind of information about or classes on tempeh. One of our dreams is to see tempeh introduced in Brazil's tropical northeast, where an incubator would not be necessary.

"At present we are involved in setting up miso and koji production in our house in the mountains of Minas Gerais for the coming year (1986). It's an old dream, but it looks like it will finally come true. At first it will be a small-scale farm-house style production.

"Miso and shoyu, as well as tofu, are soy products with a long history in Brazil, mainly due to the large number of Japanese immigrants in Sao Paulo. There are many shops there and some here in Rio which sell Oriental products, including miso, shoyu, tofu and natto. Nevertheless, they are usually semi-industrialized and include sugar, preservatives, etc. among the ingredients.

"Production and consumption of quality miso, shoyu, tofu and natto only began with the arrival of Tomio Kikuchi, a student of George Ohsawa's and one of the first people to introduce macrobiotics to Brazil. Until today the best known good quality miso and shoyu are the miso and shoyu distributed by Kikuchi's Instituto Princípio Unico. There are, however, other good misos as well.

"Instituto Princípio Unico, Sao Paulo (SP); Arma-Zen Produtos Naturais Ltda., Rio de Janeiro (RJ); Terrazul, Nova Friburgo (RJ).

"We're sure there are many, many small producers of quality miso and shoyu all over Brazil, but we don't know their addresses. There is also a large company which claims

to devote part of its production to naturally-fermented miso and shoyu, with no sugar. The company's name is Tozan. Their factory address is: Bairro Carlos Gomes s/nº, Campinas (SP); phones: (011) 278-2495 or (011) 278-5826.

"There are also two individuals who have a lot of experience in making miso and koji at home. They are available to provide information as well. They are: Dr. Sakae Maki, Praia de Botafogo, 428, s/304, Rio de Janeiro (RJ), phone: (021) 266-0503; Edson Hiroshi Seó, Fazenda Escola, 45.260 Poçoas (BA), phone: (073) 431-1108.

"We will continue to give classes on making homemade miso here in Rio, and we plan on eventually turning our small miso shop in the mountains into a school. We will always be available for any type of assistance or information concerning soy products.

"Several years ago the Brazilian Government tried to introduce soybeans in the public's diet. It was a complete fiasco, mainly because of the lack of information on the part of the authorities. They simply tried to introduce soybeans as a substitute for the traditional black (turtle) beans, and soy milk as a substitute for cow's milk. It didn't work." Address: Rio de Janeiro, Brazil.

6771. La Choy. 1986. La Choy Kung Food Theatre. Transcript of 30-second anti-Kikkoman TV spot. First aired on Jan. 20. Unpublished manuscript.

6772. **Product Name:** Tofu Loaf.

Manufacturer's Name: Ashland Soy Works.

Manufacturer's Address: 280 Helman St., Ashland, OR 97520.

Date of Introduction: 1986. January.

Ingredients: Tofu, okara (soyfiber), oats, soymilk, onion, carrot, tamari, soy oil, nutritional yeast, spice.

Wt/Vol., Packaging, Price: 14 oz.

New Product–Documentation: Label. 1986. 4 by 2.5 inches. Red on white. "Slice & eat or fry or heat. Sprinkle in soups & salads. Makes great sandwiches too." Talk with Diana Muhs. 1988. Feb. 10.

6773. **Product Name:** [Tempeh Vegetarian Pâté (Natural, or with Olives)].

Foreign Name: Pâté végétale à tartiner au Tempé, Pâté végétale à tartiner aux olives et Tempé.

Manufacturer's Name: Athanor.

Manufacturer's Address: 4, rue Toiras, 34000 Montpellier, France. Phone: 67.87.0608.

Date of Introduction: 1986. January.

Ingredients: With Olives: Tempeh, brown rice, onions, green olives, soy sauce, soy oil (4%), natural aromas and binders, sea salt.

Wt/Vol., Packaging, Price: 120 gm glass jar with Crown-type cap (removable with bottle opener). FOB price 7.05 FF.

How Stored: Shelf stable for 3 years; refrigerate after

opening.

Nutrition: With Olives: Moisture 73.3%, lipids [oils/fats] 8.7%, protein 8.6%, carbohydrates 6.0%, total Nitrogen 1.3%, iron 2 mg/100 gm, magnesium 50 mg/100 gm, calcium 131 mg/100 gm, energy 202 calories/100 gm.

New Product–Documentation: Labels. Received 1988.

May. 5 by 1 inch. Green or brown on beige. "Rich in protein. No cholesterol. Best if consumed within 3 years of date printed on lid." Soyfoods Center product evaluation. 1988. May. Nothing special. This lid is very difficult to remove without a bottle opener, a device no longer widely available in America.

6774. **Product Name:** [Tofu Burger–Deep-fried].

Foreign Name: Tofu-Burger–Frittirt.

Manufacturer's Name: Byodo Naturkost GmbH.

Manufacturer's Address: Hirschbergstr. 9, D-8000 Munich 19, West Germany. Phone: (089) 16 85 70.

Date of Introduction: 1986. January.

Ingredients: Soybeans, water, vegetables (Carrots, zucchini, soy sprouts) in varying proportions by weight, whole oats, whole wheat, brown rice, sesame seeds, sunflower seeds, spices, soy sauce (shoyu), sea salt, nigari coagulant (traditional Japanese). Ingredients predominantly organically grown.

Wt/Vol., Packaging, Price: 130 gm plastic bag.

How Stored: Refrigerated.

New Product–Documentation: Letter from Anthony Marrese. 1990. March 22. Based on a March 21 interview with Bernd Steyer. The company started in 1984, when they started to make their own tempeh. Letter (fax) from Harry Whitford. 1990. May 11. "In the fall of 1985 we started making our own tofu after a scandal: We had been buying tofu from Sapia to make our burgers for the Munich market. But he bought conventionally grown beans and sold the tofu as bio [organic]!"

Label sent by Anthony Marrese. 1990. April 15. 5 by 2.25 inches. Green on yellow, printed on front and back of plastic bag. "A nutritional soya specialty (Eine vollwertige Soja-Spezialität). Store at 4-8°C."

6775. **Product Name:** Tofu Biscuit Delight (Sandwich Filled with Seasoned Broiled Tofu).

Manufacturer's Name: Green World, Inc.

Manufacturer's Address: 7825 Federal Way, Boise, ID 83706. Phone: 208-344-4743 (or 343-3967).

Date of Introduction: 1986. January.

New Product–Documentation: Interview with James Herrington. 1987. Dec. 30. Tofu is brushed with or marinated in soy sauce, then broiled, and placed in a sliced tofu biscuit. The building has a new address but its location has not changed. James is still in his late teens.

6776. Kotzsch, Ronald E. 1986. Japan's natural foods

pioneer: Mitoku's success is due to its network of quality suppliers. *East West Journal*. Jan. p. 18, 20-25.

• **Summary:** Mitoku "has been and (at present) remains the larger of the two main exporters of natural foods from Japan. With its chief competitor, Muso Shokuhin (see Sept. 1984 EWJ), it shares the bulk of a \$14-million-a-year market for superior Japanese food products.

"The central office of Mitoku is located in the prestigious Marunouchi building, in front of Tokyo Central Station... There is a staff of six Japanese and two foreigners (Christopher Dawson, a new Zealander, and Robbie Swinnerton, an Englishman)...

"The founder, sole owner, and guiding spirit of Mitoku is Akiyoshi Kazama, now fifty-five years old... A graduate of Waseda University in Tokyo, Kazama was selected in 1956 to study business in the United States... He became the first Japanese national to serve in the American Army following World War II. After two years as an American G.I. in Korea and Japan, Kazama returned to Japan and settled in Tokyo. He became an import-export agent for a German company dealing in opticals and electronics. Then in 1967 he got involved in the emerging natural foods business...

"At the time the newly formed Erewhon Trading Company of Boston was trying to import foods directly from Japan. Its owner, macrobiotic teacher Michio Kushi, was introduced to Kazama by letter through a mutual friend. Kazama agreed to use his trade expertise to ship \$3,000 worth of high-quality Japanese foods, selected by Kushi, to Boston...

"In 1969 Kazama formed a separate company to handle steadily increasing shipments, and called it Mitoku. Through the 1970s Mitoku continued to grow. It remained the principal supplier of Erewhon, which had become a leader of America's natural foods industry. Also, it played an important role in the development of other companies such as Janus, Laurelbrook, and Oak Feed... The company moved into the European market as well, becoming a major supplier of Lima of Belgium, Sunwheel of England, and other major distributors...

"When in the fall of 1981 Erewhon finally collapsed, Mitoku was its largest creditor and took a \$300,000 loss. Erewhon's demise nearly destroyed Mitoku... Mitoku has become a major supplier to Westbrae, Great Eastern Sun, Tree of Life, and the reborn Erewhon, all vigorous American firms...

"Over the last five years, Mitoku's annual sales have grown at about 20 percent a year. During the 1984-85 fiscal year gross sales were about \$7.5 million. During that period Mitoku bought some 300 food products from eighty-three producers... It sold to fifty-six customers around the world, including ten in North America and about thirty in Europe...

"Just this past month, Mitoku has introduced a line of especially high quality products under its own label."

The author and Mr. Kazama visited a number of

Mitoku's suppliers. Descriptions are given of Mansan Company Ltd. (making tamari and soybean miso since 1895), Sendai Miso Shoyu Co. Ltd. (the Sasaki family which runs the company started making miso in 1853), Fukaya Honten Shoyu (a small maker of organic shoyu).

[Fre] • **Summary:** A brief introduction to tempeh, miso, tamari, tofu, soymilk, and soy flour from a macrobiotic viewpoint. One recipe is given, from the forthcoming French-language book, *Mysteries and Secrets of Soya*, by C. and L. Clergeaud. Address: France.

6780. **Product Name:** [Deep-Fried Tofu with Nuts].

Foreign Name: Nuss-Tofu, fritirti.

Manufacturer's Name: Sojatopf. Renamed Soto in April 1989.

Manufacturer's Address: Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.

Date of Introduction: 1986. January.

Ingredients: Incl. tofu, hazelnuts, tamari.

Wt/Vol., Packaging, Price: 200 gm vacuum pack.

New Product-Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. Tofu with hazelnut pieces pressed into it is marinated in tamari, then deep-fried. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

6782. *Australian Dairy Foods*. 1986. "Tofutti" takes off in Australia. Feb. p. 84.

• **Summary:** Distributor with sole Australian franchise for Tofutti is David Grossbaum of Shoyu Natural Foods in Melbourne. Photos show: (1) Dale Code and David Grossbaum making soft serve Tofutti. (2) "Some of the soy foods now being marketed in capital city health food shops:" Earth Angel Soyoghurt (tub), Pureharvest Soy Drink (two sizes, Vanilla, Tetra Brik), Soypreme natural soymilk in a

Pure-Pak carton made near Melbourne, and Bonsoy soymilk (Barley Malt flavor in a Tetra Brik carton) imported from Japan. Address: Australia.

6783. Rocheman, Marc. 1986. Les aliments fermentés dérivés du soja [Fermented foods derived from soya]. *Biofutur* No. 43. p. 34-42. Feb. [8 ref. Fre]

• **Summary:** Gives the composition and nutritive value of various soy products: tofu, fermented tofu (sufu), miso, natto, shoyu, and tempeh. Describes the possibilities for use of koji, as a source of proteases and peptidases, in the production of these fermented foods.

6784. San-J International, Inc. 1986. Seasoned by experience. Traditionally brewed shoyu soy sauce, tamari wheat-free soy sauce, all-purpose teriyaki seasoning & marinade (Ad). *East West Journal*. Feb. Inside rear cover.

• **Summary:** Ad copyright 1985 (see next page). Shows the new labels for tamari, shoyu, and teriyaki seasoning and marinade in full color. "When the Sato family founded San-Jirushi in 1804, the traditional recipe for tamari was already over 500 years old. Today, seven generations later, San-J still faithfully follows the same exacting art of natural brewing. Leaflet. 1985. "Seasoned by Experience." "Although there are nearly 3,000 shoyu manufacturers in Japan, there are less than 20 companies still producing genuine wheat-free Tamari soy sauce."

"The proud San-Jirushi logo was inspired by the Sato Family's history in shipping. Three horizontal lines represent the three great rivers of Kiso, Ibi, and Nagara, which flow to the nearby Bay of Ise.

"Every year the All Japan Association of Shoyu Brewers holds exhibitions for soy product manufacturers. And each year San-Jirushi is recognized for its superior quality." Address: Colonial Heights, Virginia.

6785. **Product Name:** Laufer's Gourmet Tofu Red Chili.

Manufacturer's Name: Tumaro's Inc.

Manufacturer's Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.

Date of Introduction: 1986. February.

Ingredients: Tomatoes, water, tofu, red beans, corn, onions, bell pepper, carrots, mushrooms, chili powder, celery, garlic, cumin, tamari, corn oil.

Wt/Vol., Packaging, Price: 11 oz.

Nutrition: Per 11 oz.: Calories 260, protein 18 gm, carbohydrates 24 gm, fat 11 gm, sodium 421 gm.

New Product–Documentation: Leaflet. 1986, undated. 8½ by 11 inches. Black on beige. "The complete line of homemade chili entrees. No meat. No preservatives. Nothing artificial." Food Report (Lehmann). 1986. Feb.

6786. Wood, Marcia. 1986. Low-salt soy sauce tastes just as good. *Agricultural Research* 34(2):5. Feb. Summarized in

Journal of the American Dietetic Assoc., May, 1986.

• **Summary:** A new process for removing 50% of the sodium content of soy sauce and other "high-salt fermented liquids,... including oriental fish sauce and tamari sauce" according to USDA's Agricultural Research Service in Albany, California. In the process, potassium is increased as much as five times. The recommended ratio of the minerals potassium and sodium is about 2:1, but many people consume too much sodium in relation to potassium. High salt intake has been linked to high blood pressure (hypertension), a condition that affects one out of every 5 Americans over age 25. Imbalances in the body's potassium to sodium ratio may contribute further to this condition. Address: Albany, California.

6787. Norman, Bill. 1986. Chinese to begin building Joliet plant. *Journal (Kankakee, Illinois)*. March 26.

• **Summary:** "The People's Republic of China will begin building its first manufacturing facility in the United States next month when construction begins on 'Cathay Foods, Inc.' at Joliet, Illinois." The new firm will make soy sauce and tofu.

6788. USDA Office of Information. 1986. Salt reduced in soy sauce (News release). USDA News Division, Room 404-A, Washington, DC 20250. 2 p. March 31.

• **Summary:** Salt can be reduced by 50% in soy sauce without changing its flavor, using a new process developed by USDA scientists. According to Wayne Camirand, a chemist with USDA's Agricultural Research Service (ARS) in Albany, California, the patented process, using a cation exchange membrane or Donnan dialysis, takes sodium from the sauce and replaces it with potassium. People should generally consume about twice as much potassium as sodium. Address: Camirand: Western Research Center, Albany, California. Phone: 415-486-3665.

6789. Ariyaratana, K.G.S. (Mrs.). 1986. How to make soy sauce. *Soyanews (Sri Lanka)* 8(1):5-6. Jan/March.

• **Summary:** A general description, probably based on the Indonesian process, without any scale or ingredient quantities given. The mixed culture (*Rhizopus oligosporus* and *Aspergillus oryzae*) is mixed (on bamboo trays) with 10% roasted rice flour or wheat flour. A cottage industry is probably intended. Address: Agricultural Instructress.

6790. **Product Name:** The Soy Deli Pacific Tempeh Burger [Original, or Marinated].

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1986. March.

Ingredients: Marinated: Organic soy tempeh, water, shoyu (natural soy sauce), lemon juice, natural herbs and spices,

SEASONED BY EXPERIENCE

When the Sato family founded San-Jirushi in 1804, the traditional recipe for tamari was already over 500 years old. Today, seven generations later, San-J still faithfully follows the same exacting art of natural brewing. Taste the time-honored flavor of San-J wheat-free Tamari, Shoyu and Teriyaki Sauce and trust the experience of Japan's finest.

© 1985, San-J International. (800) 446-5500

EST. **SAN-J** 1804

Printed in Ja

safflower oil.

Wt/Vol., Packaging, Price: 7 oz (199 gm) vacuum pack.

How Stored: Refrigerated.

Nutrition: Marinated: Per 3.5 oz. Calories 247, protein 18 gm, carbohydrates 12.1 gm, fats 13.75 gm, sodium 13 gm, vitamin B-12 2.2 mg.

New Product–Documentation: Labels for both. 1987. 3.5 inches diameter. Front and back. Front is full color, with orange, yellow and red lettering. Photo of a round burger with onions rings on top, on mushrooms, lettuce and tomato. “Pop ‘n Serve. Meatless. Delicious. High Protein. No Cholesterol. Good food in minutes.”

6791. Tomlinson, Patte; Tomlinson, Peter. 1986. Cruets. *Hobstar (The) (American Cut Glass Association)* 8(5):9-10. March.

• **Summary:** Gives good definitions and descriptions related to cruets. Soy is not mentioned. The authors state that Cruet or Cruet Bottle is derived from the Dutch “Kruicke,” and is sometimes spelled “crewet. However *Merriam-Webster’s Collegiate Dictionary* (1998) says that cruet (a word first used in the 14th century) is derived from Middle English, from Anglo-French, the diminutive of Old French *crue*, of Germanic origin; akin to Old English *crûce*.

Cruets usually have a lip or spout, a handle, and a stopper or lid. Most were used for serving liquid condiments, such as oil and vinegar (also lemon juice, garlic juice, etc.) at the table, or to hold wine or water at altar service.

Caster bottles were cruets made to be set in stands or frame; they did not have handles and were much narrower overall. Cruets with a pierced cover were used for dry ingredients such as salt, pepper, dry mustard, sugar, etc. and were called “casters” or “castors.”

“Bottle labels were either painted or engraved with the name of the intended contents on the surface of the bottle or decanter.”

“Bottle tickets were small plaques suspended by a chain around the neck of a bottle or decanter.” Bottle labels became less common as bottle tickets became popular. Address: Cleveland [Ohio].

6792. Lee, Karen; Branyon, Alexandra. 1986. Food: The sauce is the thing. *New York Times*. April 6. p. 318-19.

• **Summary:** This article about Chinese sauces states: “The staples that require no refrigeration are fermented (salted) black beans, vinegar, and dark soy sauce.”

“The pungency of black bean sauce” offers many savory possibilities when stir frying meat, poultry, fish or seafood (such as shrimp, scallops, lobster and crab).

The recipe for “Steamed whole fish with black bean sauce” calls for “1 recipe for black bean sauce (see below).” This detailed recipe for “Fermented black bean sauce” calls for “2 tablespoons fermented black beans, minced” plus 1 teaspoon each minced fresh ginger and minced garlic. All

ingredients are stir-fried in a wok, yielding enough sauce to season one pound of meat, fish, or poultry.

6793. Forman, Gail. 1986. The foreign exchange: A recipe for learning English from the world’s worth of cuisines. *Washington Post*. April 27. p. K1, K4-K5.

• **Summary:** The writer is a professor in the English as a Second Language program at Montgomery College, Rockville, Maryland. For their first essay in English, she asks her students: “‘Suppose I were visiting your native land—what dish would you tell me to be sure not to miss?’” She is looking for a description or story, not a recipe.

However recipes are given at the end of the article. The recipe for Indonesian nasi goreng [fried rice] calls for “4 tablespoons Javanese soy sauce (or Chinese soy sauce) combined with ¼ teaspoon brown sugar.” Address: Special to the Post.

6794. Belleme, John; Belleme, Jan. 1986. Japanese foods. *Vegetarian Times*. April. p. 40-42, 49, 59.

• **Summary:** Adapted with permission from the book *Cooking with Japanese foods: A guide to the traditional natural foods of Japan*. Contains long sections on miso, shoyu, tamari, umeboshi, shiitake, and sea vegetables. Address: Rutherfordton, North Carolina.

6795. **Product Name:** [Shoyu, Tamari, and Miso (Barley, or Rice)].

Manufacturer’s Name: Celnat (Importer). Made in Japan. **Manufacturer’s Address:** Z.I. de Blavozy-Saint-Germain, 43700 Blavozy, France. Phone: 71.03.04.14.

Date of Introduction: 1986. April.

6796. Celnat. 1986. Une large gamme d’aliments de base [A large line of basic foods]. *Compas (Le) (France)* No. 26. p. 36. March/April. [Fre]

• **Summary:** A choice of proteins: A line of legumes. Shoyu, tamari, and miso made from soya. Soyo brand soymilk, 100% non dairy (végétal) without added sugar. Wheat gluten flour for making seitan. Whole grains. A large line of macrobiotic specialties. Futons.

Most of Celnat’s cereal and legume products bear the CINAB logo meaning organically grown as certified by the Comité Interprofessionnel National de l’Agriculture Biologique. Address: Z.I. Blavozy–St. Germain, 43700 Brives-Charensac, France. Phone: 71.03.04.14.

6797. **Product Name:** [Marusan Tempeh & Shrimp Crackers].

Foreign Name: Marusan Tenpe Ebi Senbei.

Manufacturer’s Name: Marusan-Ai Co., Ltd.

Manufacturer’s Address: Aza-Arashita, 1 Jungi-cho,

Okazaki city, Aichi prefecture 444-21, Japan.

Date of Introduction: 1986. April.

Ingredients: Potato powder, sweet potato powder, tempeh, shrimp, kombu (seaweed), shoyu (soy sauce).

Wt/Vol., Packaging, Price: Poly bag, with window.

How Stored: Shelf stable.

Nutrition: Per 100 gm: Moisture 4.4%, protein 6.5%, fat 0.9%, carbohydrates 83.5%, ash 4.7%, calories 368, calcium 193 mg, iron 2.9 mg.

New Product–Documentation: Label. 1986, undated. 4.5 by 9.5 inches. Red, dark brown, and orange on white. Contains 10 crackers.

6798. **Product Name:** Meridian Shoyu, and Tamari.

Manufacturer's Name: Meridian Foods Ltd. (Importer). Made in Japan.

Manufacturer's Address: Corwen, Clywd, LL21 9RR, Wales, UK. Phone: 0490 3151.

Date of Introduction: 1986. April.

Wt/Vol., Packaging, Price: 500 ml plastic bottles with twist-off lid.

How Stored: Shelf stable.

New Product–Documentation: Simon Bailey. 1988. Natural Choice. Aug. 15. "Soya-Based Products." A photo shows the Labels. Each has an illustration on the front panel. The tamari shows Mt. Fuji and the ocean, the teriyaki a soybean plant, and the shoyu some Japanese-style trees. CSP form filled out by Simon Bailey. 1988. Sept. 28. Shoyu & tamari were formerly sold under the Jedwells' brand.

6799. *Prepared Foods*. 1986. Less salt without sacrificing flavor. April. p. 110.

6800. **Product Name:** [Light Tofu Burgers {Low-fat, Cooked without Oil} (Italian-Style, Chinese-Style, and Breaded)].

Foreign Name: Croque Tofu Léger: Galettes Fraiches de Soja (Italienne, Chinoise, Gratinée).

Manufacturer's Name: Société Soy.

Manufacturer's Address: Plateau de l'Ardennais, 91590 Cerny, France. Phone: (6) 457.52.01.

Date of Introduction: 1986. April.

Ingredients: Garlic and Fines Herbs: Tofu (water and soybeans*), rolled oats*, soy sauce, garlic and fines herbs (3.4%), sunflowerseed oil, spices. * = Organically grown (issus d'agriculture biologique).

Wt/Vol., Packaging, Price: 2 x 100 gm patties.

How Stored: Refrigerated.

Nutrition: Per 100 gm: Protein 15.4 gm, lipids 9.6 gm, carbohydrates 7.8 gm, calories 179.

New Product–Documentation: Labels sent by Bernard. April 1989. Croque Tofu Léger. 4 by 7.75 inches. Red, brown, and green on white. Printed on poly bag. Nature et Progres logo. Text in French and Dutch. Two burgers

are vacuum packed side by side behind the one label.

"Reheat at low heat without oil in an oven or frying pan." A simple illustration (line drawing) on front the panel shows vegetables.

Letter from Bernard Storup of Société Soy. 1990. June 6. Tof'in was introduced first (in 1986) and Croque Tofu Léger came second (Feb. 1987). They are the same product but the packaging for each was different.

6801. **Product Name:** [Tof'in Tofu Burgers {Precooked without Oil} (Garlic and Fines Herbes, Provençale with Tomato & Onions, or Forest Mushrooms)].

Foreign Name: Tof'in (Ail/Fines Herbes, Provençale, Forestière).

Manufacturer's Name: Société Soy.

Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

Date of Introduction: 1986. April.

Wt/Vol., Packaging, Price: 2 x 100 gm cakes in vacuum pack.

How Stored: Refrigerated, 28 day shelf life at 4°C.

Nutrition: Per 100 gm.: Protein 11.6 gm, fat 8.8 gm, carbohydrates 8.1 gm, calories 158.

New Product–Documentation: Soyfoods (ESFA), 1987. Jan. "Launched at SIAL (Oct. 1986). Tofu cakes, precooked without oil, containing different vegetables, spices, and seasonings. Must be heated before serving, and can be included in snacks or the main meal instead of animal proteins. The three flavors are Garlic & Herbs, Provençale, and with Mushrooms.

Letter from Bernard Storup. 1989. March 3. Tof'in (low fat tofu burgers, cooked without fat) in 3 flavors (Garlic & Fines Herbes, Provençale, and Forestière) were introduced in April 1986 and discontinued in March 1988. Three other flavors (Italienne, Chinoise, and Gratinée) were introduced in Sept. 1988, which see.

Letter from Bernard Storup of Société Soy. 1990. June 6. Tof'in was introduced first (in 1986) and Croque Tofu (deep-fried burgers) came second (Feb. 1987). They are the same product but the packaging for each was different.

Talk with Bernard Storup. 1990. June 13. Tof'in (pronounced toe-FEEN) was packaged for supermarkets. It was the same as Croque Tofou, but not the same as Croque Tofou Léger, which came in Italienne, Chinoise, and Gratinée flavors. Tof'in was discontinued about 2 years ago. Then 18 months later the company launched, for supermarkets, a product named Dorés de Soja, which is the same as Tof'in (i.e. deep-fried).

Letter from Bernard Storup. 1990. Dec. 26. This product was not deep-fried. It was prepared without fat.

6802. Soppe, Fennie. 1986. Jonathan, Histoire d'un boucher reconverti. Interview de Jos Van De Ponsseele [Jonathan. History of a reconverted butcher. Interview with Jos Van De

Ponselee]. *Compas (Le) (France)* No. 26. p. 14-16. March/April. [Fre]

• **Summary:** It all began in 1974, when Jos's wife had serious health problems. There were suspicions of lung cancer. She went to Switzerland for care, and had a fever of 38-40°C for 6 months without improvement. One day someone gave them a small book about natural foods. She then began to eat macrobiotically and her fever disappeared after 3 months.

At the beginning, this diet was not at all attractive. The food was very poor, and Jos began to ask himself questions and to read books on the subject. He learned that it wasn't a bad diet at all. Not wanting to have to prepare two types of food, he started to eat the same diet as his wife. His health did not improve much, but he found he had the capacity to work much more, and a need for less sleep. His days started at 6:00 A.M. and ended between 11:00 P.M. and midnight.

Upon seeing the results, he began to think and live differently. In the long run, the work at the butcher shop worried him. He no longer ate meat, but he was still selling it. That wasn't logical. He then decided to sell organic meat products at the butcher shop, and they sold very well. However that was a form of hypocrisy.

You must understand that at that time, macrobiotic people in the area were very fanatical. Meat was considered bad, in fact a poison. A more moderate viewpoint was needed; a bit of meat in itself is not bad, but its consumption in large quantities can present problems.

Jos opened two natural food shops in succession, and they were a success in part because he had experience in running a business. He tried to sell his butcher shop, which was very large. Through his new shops he met people who wanted to stop eating animal proteins, but they knew of no replacement. Neither tofu nor seitan nor hardly any other beans were available at that time. This made it hard for a person to change his or her diet.

Jos attended a seminar conducted by Michio Kushi at Drogen. They talked about these problems. Michio spoke to Jos about miso and tamari, and advised him to come to Boston, Massachusetts, where he could learn and see everything. He did. Indeed miso and tamari were available, but they were made overseas. He was somewhat deceived in the early days. Most of the products came from Japan. During the same period he worked at the famous restaurant The Seventh Inn. He became friends with Japanese and they worked together making seitan. Finally, he started commercial production with two Americans.

Tofu was very well known, but it was made in [Boston's] Chinatown. The Chinese did not want to show others how to make it, but they were allowed to look. This interested him very much.

Upon returning to Belgium, after his studies in Boston, Jos began commercial production of seitan. At the beginning people were very closed. They thought that one should consume only beans. Their fanaticism seemed very natural

to them, but that made it very difficult for Jos to survive economically by making only seitan. He started by producing 500 gm a week of seitan for Souen, a macrobiotic restaurant in Gent [Gand]. He urged the restaurant to serve seitan to each customer in a familiar form. That was successful. After several months, the natural food stores began to order seitan from him; that was his goal. Finally he began the production of fresh organic tofu. He encountered new opposition when he suggesting sterilizing the tofu, which would cause loss of vitamin C, etc.

People got to know seitan but grew tired of it, so now he has the seitan burger between two buns, with onion and lettuce. They are also thinking about introducing seitan brochettes and seitan in sauces. The starch left over from making large quantities is used in making soups, spreads for bread, goulash, etc.

How did his customers react initially to all this? They thought he was crazy—in 3 ways. (1) They thought macrobiotics was folly; (2) Who but a fool would sell a butcher shop that was doing so well, employed 16 persons, and was the first to sell organic meat with great success. They thought that America had made him lose his head; (3) They thought artificial meat was absurd and would not sell. But these people have changed their opinions as things have developed.

His best invention is seitan sold sterilized in jars; it is now a very successful product. He is also very proud of his tofu burgers (*les beignets, les ganmos*; made from tofu, sesame seeds, onions, mushrooms, and arrowroot), his sauces, and his mushroom tarts. Neither his soy croquettes nor his carob products sell well. His basic products are seitan, tofu, and mochi (made according to a traditional Japanese recipe). The company will soon focus more on exporting its products, especially to Germany, followed by France (starting in 1987) and Austria. He has created a company in France named Jonathan France (La Comba 24620, Les Eyzies. Phone 53.06.94.68), directed by Frenchmen, because it is very difficult to export to France; he has been trying for 2 years.

Black-and-white photos show: (1) A portrait shows Jonathan, with a large beard, rimless glasses, and thinning hair. (2) Twenty-three of his sterilized products in jars, which have a shelf-life of 2 years. Among these are Sojapastei, Sojaboont Jes, Azukiboont [Azuki bean] Jes, Brown Rice Casserole with Seitan, and Tofu Salade. The company is studying a tempeh spread for bread. The company now has 16 employees, including 3 in stores and a representative. Most of the employees like this food. Not all are macrobiotic but most have changed their diet, usually without fanaticism.

The company's name Jonathan comes from the name of the book *Jonathan Livingston Seagull* (Jonathan Le Goëland), about a seagull who wants to live differently. Jos believes that vegetable proteins can play an important role in world hunger. His dream, which he hopes to realize, is to

establish small food companies in Zaire, Rwanda, and all of southern Africa. "For example, a small tofu machine can produce 800 to 1,000 cakes of tofu/day. I would like these people in poor countries to be able to make tofu themselves."

Jos is not a vegetarian. He still likes meat and eats it in small quantities, often fish or organic meat. He has 3 children. Address: Pays-Bas (Netherlands).

6803. Farrington, Sharon. 1986. Grilling with an Asian accent: Exotic flavors go beyond barbecue. *Washington Post*. May 25. p. K1.

• **Summary:** Many Americans now prefer the word "grill" to the word "barbecue." Teriyaki and Yakitori from Japan are both grilled favorites among many Americans; in Japan they are grilled on the small, efficient hibachi.

A recipe for "Dow see pai quat (Twice-cooked Cantonese spareribs in black bean sauce)" has ingredients that include: "¼ cup soy sauce,... 2 tablespoons fermented black beans, 1 tablespoon ginger root, grated, 1 tablespoon garlic, minced,..." Grill over hot coals.

6804. **Product Name:** Sushi Chef Sesame Soy Salad Dressing.

Manufacturer's Name: Baycliff Company, Inc.

Manufacturer's Address: 242 East 72nd St., New York, NY 10021. Phone: 212-772-6078.

Date of Introduction: 1986. May.

Wt/Vol., Packaging, Price: 10 oz glass bottles.

How Stored: Shelf stable.

New Product–Documentation: Spot and photo in Food Industry Advisor (Harrisburg, Pennsylvania). 1986. May. Label reads: "100% natural, Japanese Style." Also serves as a dipping sauce, base for sauces, and a marinade.

6805. **Product Name:** [Tofu Stew].

Foreign Name: Tofu-Blanquette.

Manufacturer's Name: Jonathan P.V.B.A.

Manufacturer's Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

Date of Introduction: 1986. May.

Ingredients: Tofu (soya-proteins)*, peas*, onions*, carrots*, mushrooms, celery*, seaweed. Sauce: Soya milk*, water, wheat meal*, vegetable fats, soya sauce, seasoning spices. * = biological crop.

Wt/Vol., Packaging, Price: 300 gm.

Nutrition: Minerals 1.4%, vegetable proteins 6.3%, vegetable fats 3.52%, carbohydrates 5%. 76.9 calories (Kcal) per 100 gm.

New Product–Documentation: Label. Received 1988. 6.25 by 5.25 inches. Card stock. Color photo of tofu cubes stewing with various vegetables with item name in white on orange. "Vegetable product." Form filled out by Jos van de Ponsele. 1989. Jan. 11. This product was introduced in May 1986.

6806. Perez, Oswaldo. 1986. La soya en la alimentacion humana [Soya in human nutrition]. *La Era Agricola (Merida, Venezuela)* No. 0. May. p. 14-15. [1 ref. Spa]

• **Summary:** Shows how soya makes most efficient use of the earth's ability to produce protein. Address: Granja Tierra Nueva, Aldea San Luis, La Azulita, C.P. 5102, Estado Merida, Venezuela.

6807. *Sunset Western Grocery News (Menlo Park, California)*. 1986. Kimlan brings soy and teriyaki sauces to Western U.S. May.

• **Summary:** On the island of Taiwan, there are more than 300 makers of soy sauce and Kimlan is No. 1, with about a 60% market share. Kimlan distributes its soy and teriyaki sauces into parts of the Western United States. In 1982, Kimlan soy sauce was introduced into Southern California, then into Northern California in 1983. In the USA, Kimlan's name is Golden Orchid.

6808. Belleme, Jan; Belleme, John. 1986. Cooking with Japanese foods: A guide to the traditional natural foods of Japan. East West Health Books, 17 Station St., Brookline, MA 02146. xi + 220 p. Illust. Index. 25 cm. [45 ref]

• **Summary:** A good study from a macrobiotic viewpoint, with more than 200 macrobiotic recipes. The authors studied in Japan and speak Japanese. Contents: Foreword. Acknowledgements. Introduction. Fermented Foods: miso, shoyu, tamari, brown rice vinegar, sake, mirin, koji, amazake, pickles, umeboshi, ume su, medicinal teas, ume extract, bonito flakes, natto. Noodles: cooking noodles, udon, soba, somen, clear noodles. Grains, incl. rice, mochi, seitan, fu gluten cakes, hato mugi [*hatomugi*] (Job's tears), rice syrup, rice bran. Vegetables: shiitake, daikon, Hokkaido pumpkin, Chinese cabbage, burdock, jinenjo, lotus root. Sea vegetables: kombu, nori, wakame, hijiki and arame, kanten (agar). Beans: azuki beans, black soybeans, tofu. Condiments: kuzu, dark (toasted) sesame oil, goma (sesame seeds), tekka, shiso momiji (shiso leaf condiment), wasabi. Teas. Cooking utensils. Appendix: Composing meals, pronunciation guide, suppliers. Bibliography.

Amazake (p. 39-45). Contains a ½ page description plus good instructions for making basic amazake (thick "pudding" and thinner beverage), both from glutinous ("sweet") rice. Also recipes for Vanilla Amazake Pudding, Amazake Cream Puffs, Neapolitan Parfait, Carob Amazake Brownies, Bob's Coconut Amazake Macaroons, Amazake Bread (yeasted), and Unyeasted Amazake Bread. Perhaps the most lengthy information on amazake available in English up to this time.

Hato mugi ("Job's tears," p. 93) "resembles barley, but it is actually a member of the rice family. An easily digestible whole grain with only the tough outer husk removed, hato mugi contains less vitamin B-1 than brown rice but approximately twice as much protein, iron, vitamin

B-2, fat, and slightly more calcium.” It has long been used in China and Japan as a medicinal food, “for strengthening the stomach, purifying the blood, and restoring health. Since it is so effective in helping the body to discharge toxins, people who are sick and weak, and women who are pregnant, nursing a baby, or menstruating should eat it sparingly.” Address: Rutherfordton, North Carolina.

6809. Kim, Hyung-Soo; Kim, Ze-Uook. 1986. [A study on the manufacturing of soysauce by the use of milled barley]. *Han’guk Nonghwa Hakhoe Chi (J. of the Korean Agricultural Chemical Society)* 29(2):107-15. June. [31 ref. Kor; eng]

• **Summary:** Investigated changes in and quality of soy sauce made by a new method, using a vinyl tent instead of a koji room and replacing the wheat in the koji with milled barley. Address: Dep. of Food Science & Technology, College of Agriculture, Seoul National Univ., Suwon, South Korea.

6810. **Product Name:** Light Tofu Browners, Sausage Style (Meatless Sausage).

Manufacturer’s Name: Light Foods Inc.

Manufacturer’s Address: St. Louis, MO 63017.

Date of Introduction: 1986. June.

Ingredients: Water, tofu, TVP (textured vegetable protein), soyoil, egg whites, salt, natural herbs and spices, honey, tamari, wheat gluten, malt powder.

New Product–Documentation: Poster. 1986. “No cholesterol, no MSG, no sugar, no meat.” Spot in Natural Foods Merchandiser. 1987. March. p. 99. Adweek East. 1987. April 6. Soya Newsletter. 1988. Sept/Dec. A new smaller size, (8 links in a 12-oz. package) was introduced in late 1988. Address is now 613c Broadmoor, St. Louis, Missouri 63107. Ingredients include water, tofu, TVP, soy oil, salt, honey, soy isolate, malt powder, and natural herbs and spices.

6811. Owen, Sri. 1986. Indonesian food and cookery. 2nd edition, revised and enlarged. Prospect Books, 45 Lamont Rd., London SW10 0HU. 268 p. First edition was 1976. Illust. by Thao Soun. Index. 23 cm. [20 ref]

• **Summary:** In the chapter titled “Essential ingredients” are sections on “Kecap or soya sauce” (p. 42-43) and tauco (p. 44). Also contains a chapter titled “Tahu and tempeh” (p. 216-28) with good information and recipes on tofu and tempeh. Address: Mustika Rasa, 96 High St., Wimbledon Village, London SW19 5EG. Phone: 01-946-7649.

6812. **Product Name:** [Okara Burger].

Foreign Name: Okaraburger.

Manufacturer’s Name: Sojatopf. Renamed Soto in April 1989.

Manufacturer’s Address: Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.

Date of Introduction: 1986. June.

Ingredients: Incl. okara, tofu, hazelnuts, tamari.

Wt/Vol., Packaging, Price: 80 gm vacuum pack.

New Product–Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

6813. Westbrae Natural Foods. 1986. If all you want to do is save a few pennies on your soy sauce, don’t bother reading this [about Johsen Shoyu] (Poster). P.O. Box 8711., Emeryville, CA 94662. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

• **Summary:** Johsen is made with whole soybeans and aged for two full brewing years. Address: Emeryville, California.

6814. Troy, John. 1986. Update on work with American Natural Foods and miso (Interview). *SoyaScan Notes*. July 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John is now \$150,000 in debt. The natural foods market was much smaller than he had thought and than market studies indicated. There are only 200 good and fairly big natural foods stores in the USA. The biggest ones are: Bread and Circus, Alfalfa’s, Mrs. Gooch’s, Whole Foods in Texas, and Blue Bonnets in Texas.

John’s products are now in 1,700 Kroger’s stores. His three best-sellers are: (1) Miso Mustard, (2) Hot Stuff, and (3) Miso Sauce (a new product for chicken, with tahini and tamari). Address: North Carolina.

6815. American Soybean Association. 1986. Soya Bluebook ‘86. St. Louis, Missouri: American Soybean Assoc. 278 p. July. Index (bold face type indicates advertiser). 22 cm.

• **Summary:** Contents: Index of advertisers (p. 4). Soybeans: Your profit opportunity, by Dr. Kenneth L. Bader, CEO, ASA (p. 5). Organizations (by country, within each country alphabetically): For each gives the name, address, contact person, year founded, number of members, objectives and activities, publications. Countries are: USA, Australia, Austria, Bangladesh, Belgium, Brazil, Canada, England, Germany (Federal Republic of), Finland, France, Hungary, India, Indonesia, Italy, Ivory Coast, Japan, Malaysia, Mexico, Netherlands, Norway, Philippines, Portugal, Senegal, Spain, Sweden, Taiwan, Turkey, Yugoslavia, Zaire, Zimbabwe. U.S. agricultural education, research & extension (by state; mainly state agricultural / land-grant colleges), ASA international offices and world regions (colored world map and photo of each country director), government trading agencies.

Soy directory: Oil extraction plants / refineries (alphabetically by state in USA, then by country), soyfoods / edible soy products manufacturers (lecithin, soy flour, soy grits, soy protein concentrates & isolates, textured soy

protein, binders, extenders, simulated meat products, soy oil products {margarine, shortening, cooking / salad oil, salad dressings}, soyfoods-beverages [soymilk], frozen desserts, soy sauce, tempeh, tofu, whole soybean snacks {soynuts}, other soy-based foods), within each product by country, producers of soy products for industrial manufacturers (by products, etc.): Industrial lecithin, industrial soy flour / soy protein, industrial soy oil, soy sterols and tocopherols, soybean fatty acids.

Soybean manufacturing support industries: Manufacturing equipment & supplies, soybean processing equipment & supplies, manufacturing services. Marketing and auxiliary services: Brokers, financial services, forwarding agents, marketing consultants, trading companies, transportation, warehousing-export / import.

Soy statistics (tables & graphs): Soya conversions [weights & measures], metric conversions, temperature conversions. U.S. soybean planting and harvesting dates (by state). U.S. soybean acreage, yield and production, 1925-1985 (by year). U.S. soybean planted acreage by state (1970-1985). U.S. soybean harvested acreage by state (1970-1985). U.S. soybean yield by state (1970-1985). U.S. soybean production by state (1970-1985). U.S. soybean production major crops (1920-1985): One graph each for soybeans, corn, wheat, and cotton. U.S. harvested acreage of major crops (1920-1985): One graph each for the big 4. U.S. yield per acre of major crops (1920-1985): One graph each for the big 4. Argentine soybean area, yield and production by province (1975-1986). Brazilian soybean area, yield and production by province (1975-1986). Canadian soybean production: Acreage, yield, production, farm price and value (1950-51-1984-85). Canadian soybean production and utilization (1950-1984, year beginning Aug. 1): Production, imports, supplies, exports of beans, processed for oil and meal, soy oil produced, soybean oilcake produced. World soybean production: Area and production in specified countries and the world total (1980/81-1985/86). Soybean production by major countries (one graph, 1925-1985): U.S., Brazil, PRC [China], Argentina. Share of world soybean production [percentage] by major countries (one graph, 1925-1985): Big 4. Soybean acreage by major countries (one graph, 1925-1985): Big 4. Share of world soybean acreage [percentage] by major countries (one graph, 1925-1985): Big 4. U.S. soybeans: Supply, disposition, acreage, yield and price (1970-1986). Soybean usage in the U.S. for crush and exports (one graph, 1925-1985, million bushels). U.S. soybean exports: Percent of total usage (one graph, 1925-1985). Argentine soybeans and products (oil and meal): Supply and disposition (1975/76-1986/87). Brazilian soybeans and products (oil and meal): Supply and disposition (1975/76-1986/87). Prices of U.S. soybeans, No. 1 yellow: Average price per bushel, Illinois country shipping points (by year and month, 1950-1984, dollars). Prices of U.S. soybeans received by farmers: Average price per bushel

(by year and month, 1950-1984, dollars). U.S. soybean price support operations (1945-1985, incl. CCC). U.S. soybean crop value: U.S. and major producing states (1925-1985): Illinois, Iowa, Indiana, Ohio, Missouri, Minnesota, Arkansas. Fold-out color map of U.S. soybean acreage by county. U.S. farm marketings of soybeans: Percent of open market farm sales by month (1975/76-1984/85). Map of U.S. soybean processing plants. Value of U.S. soybean products per bushel and crush margin (1950-1984): Soy oil, soybean meal, soybean price (received by farmers, No. 1 yellow Illinois), margin (ditto). U.S. soybean meal: Prices paid by farmers-44% protein, dollars per 100 lbs, by year and month (1950-1984). U.S. soybean meal: Average wholesale price-44% protein, dollars per ton, bulk Decatur, Illinois, by year and month (1950-1984). U.S. soybean meal: Beginning stocks, production, exports and domestic disappearance, by year and month, thousand short tons (1978/79-1984/85). U.S. soybean cake and meals: Supply, disposition and price (1977-1985): Soybean, cottonseed, linseed, peanut. Major world protein meals: Supply and utilization (1981/82-1985/86; Production, exports, imports, consumption, ending stocks): Soybean, cottonseed, rapeseed, sunflowerseed, fish, peanut, copra, linseed, palm kernel. World major oilseeds: Supply and utilization (1981/82-1985/86). World major vegetable and marine oils: Supply and utilization (1981/82-1985/86). Prices of U.S. soybean oil: Soy oil, domestic crude, average cents per pound in tank cars at Midwestern mills, by year and month (1950/51-1984/85). U.S. soybean utilization, by year (1960-1984): Food-Shortening, margarine, cooking and salad oils, other edible, total. Nonfood-Paint and varnish, resins and plastics, fatty acids, other inedible (incl. soap), total. Total domestic utilization. U.S. soybean oil value as percent of total soybean value (1930-1985). Note: Peaked at about 55% in 1930, fell to about 32% in 1980-81. U.S. soybean oil: Supply, disposition and price (1960-1985). U.S. edible fats and oils: Supply and disappearance (1978-1985): Coconut, corn, cottonseed, lard, palm, peanut, soybean, sunflower, tallow (edible). U.S. exports of soybeans, by year and month (1953-1984). U.S. soybean exports by port and country of destination (Sept. 1984-Aug. 1985): Ports are-St. Lawrence Seaway, Lakes, Atlantic, Gulf (by far the largest), Pacific, Interior. U.S. exports: Soybeans-Volume of exports by country of destination (in metric tons) and total value (1981-1985). U.S. exports: Soybean oil-Volume of exports by country of destination (in metric tons) and total value (1981-1985). U.S. exports: Soybean oilseed cake and meal-Volume of exports by country of destination (in metric tons) and total value (1981-1985). Map of U.S. soybean exports by port areas: Sept. 1984-Aug. 1985 (1,000 bushels). U.S. exports of soybean, cottonseed and sunflowerseed oils: U.S. commercial and P.L. 480 exports-Volume of exports by region and country of destination (in metric tons) and total value (1979/80-1984/85; year beginning in

October). U.S. exports: Soybean oil—P.L. 480, Title I and III, volume (in metric tons) and value (in \$1,000) by country of destination (FY 1981–1985). U.S. exports of soybean and cottonseed oils: U.S. commercial and P.L. 480 exports (1950–1984, million lbs; incl. P.L. 480 as a percentage of the whole). Brazilian exports of soybeans and products to major countries (1,000 metric tons; 1976–1984). Graph of soybean & product exports by major countries (U.S., Brazil, Argentina) (soybean equivalent; 1970–1985). Graph of world share of soybean & product exports by major countries (U.S., Brazil, Argentina) (1970–1985). Note: U.S. share has fallen from 95% in 1970 to about 50% in 1984.

Glossary: General terms, soy protein terms. Standards & specifications: NSPA, Association of American Feed Control Officials (AAFCO), USDA (definitions and grades). Index. Address: P.O. Box 27300, St. Louis, Missouri 63141.

6816. **Product Name:** [Tofu Croquettes].

Foreign Name: Tofu-Kroketten.

Manufacturer's Name: Christian Nagel Tofumanufaktur.

Manufacturer's Address: Oelkersallee 14a, D-2000 Hamburg 50, West Germany. Phone: 040/89 49 37.

Date of Introduction: 1986. July.

Ingredients: Tofu*, millet (Hirse)*, onions*, nori, soy sauce (Sojasauce), rolled oats (Haferflocken)*. * = Organically grown (aus kontrol. biolg. Anbau).

How Stored: Refrigerated.

New Product–Documentation: Form filled out by Christian Nagel. 1988. Product introduced July 1986. They now make 120–160 kg/month. Label. 1988. 4 by 3 inches. Black on beige. Handwritten.

6817. Cox, Peter. 1986. Why you don't need meat. Wellingborough, England: Thorson's Publishing Group. 240 p. July. Illust. 20 cm. *

• **Summary:** A convincing, health oriented popularization of the case against meat. Tofu, tempeh, and tamari are mentioned in the nutritional tables. Cox, who was the first chief executive of the Vegetarian Society of the United Kingdom, is very familiar with both the scientific and popular literature on the subject.

Thorsons states in an ad: "There is mounting scientific proof that the meat we eat today actually *causes* heart disease, cancer, obesity and other degenerative diseases. The author exposes the black market in animal growth hormones, looks at the unregulated use of antibiotics in animal feed, and shows why a meat-oriented diet can actually be nutritionally deficient."

Note: According to Vegetarian Times (Sept. 1987, p. 35), this book "has become a best seller in the U.K. and was selected by the Booksellers' Association of Great Britain as 'best paperback non-fiction campaign.'" See this issue of VT for more on Cox, Chrissie Hynde, and Reprieve! Address: England.

6818. Donegan, Priscilla. 1986. Spaghetti sauce pours it on: The sauce pot overflowed last year with hot sales in the spaghetti and Mexican categories. *Progressive Grocer* 65(7):144–45. July.

• **Summary:** In 1985 supermarket sales of soy and teriyaki sauce were \$51.60 million (gross profit: \$14.19 million), accounting for 2.60% of the sauce category sales (3.12% of category gross profits; the average retail gross profit margin is 27.5%) and with sales up 4.98% over 1984. The best-selling sauce types are spaghetti sauce (28.70% of the category), ketchup (14.90%), meat sauce (13.48%), and dry mixes and seasonings (10.88%).

6819. *Japanscan: Food Industry Bulletin*. 1986. Solid state fermentations: Three companies in Japan have jointly developed a bioreactor to produce soy sauce. 4(7):3–4. July. *

6820. *Natural Foods Merchandiser*. 1986. 7th Annual Natural Foods Merchandiser merchandising awards. July. p. 42–43, 45.

• **Summary:** Soyfoods won the following awards: Gold: San-J Tamari (wheat-free soy sauce) and Shoyu; Silver: Fantastic Foods' Tofu Scrambler & Tofu Burger, Westbrae Natural miso soups; Honorable mention: Walker & Wilks Tofoods frozen entrees, White Wave boxed tofu. Color photos show each.

6821. **Product Name:** San-J Traditionally Brewed Shoyu.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: Colonial Heights, VA 23834.

Date of Introduction: 1986. July.

New Product–Documentation: Natural Foods Merchandiser. 1986. July. p. 42. Gold medalist in 7th Annual Natural Foods Merchandiser merchandising awards.

6822. Spencer, Colin. 1986. Tofu is like a blank sheet of paper on which you write. *Guardian (England)*. Aug. 8. p. 14.

• **Summary:** The article begins: "Tofu is soy bean curd. There are now many brands on sale,..." Morinaga makes a silken tofu from Japan; it can be stored outside the refrigerator. Another fairly soft tofu from Japan is made by Kikkoman. "The definitive book on the subject has long been *The Book of Tofu* by William Shurtleff and Akiko Aoyagi."

6823. *Economist (London)*. 1986. The Yong recipe. Food flavors. Aug. 16. p. 58.

• **Summary:** Dr. Leslie Yong is a biochemist at the National University of Singapore. Having invented a speedier way to make soy sauce, he is trying to make fungi turn out food flavors. He was able to cut the soy sauce fermentation time for 90 days to 9 days by altering the enzymes and yeasts, temperature and pH in the moromi. He has sold his technique

to Chuen Cheong Industries, a soy sauce manufacturer in Singapore. Address: Biochemist, National Univ., Singapore.

6824. Boon-Long, Narudom. 1986. Traditional technologies of Thailand: Traditional fermented food products. In: V.H. Potty, et al. eds. 1986. Traditional Foods: Some Products and Technologies. 292 p. See p. 114-33. Aug. Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India. [23 ref]

• **Summary:** "Products such as soy sauce, soy paste (*Tao-Jeow*), fermented soybean curd [*Sufu*] and *Thua-nao* constitute the major traditional fermented foods [of Thailand]. The first three are common throughout the country. *Thua-nao* is popular in northern Thailand." Flowcharts and details are given concerning the production of each of these products. Address: Dep. of Food Science & Technology, Kasetsart Univ., Bangkok, Thailand.

6825. *Food Engineering*. 1986. Reduction of cholesterol achieved in tofu meats. 58(7):61-62. Aug.

• **Summary:** Walker and Wilks of Tofoods Co. are making Bar-B-Q Tofu, Sweet and Sour Tofu, and Tofu Teriyaki, frozen entrees having a shelf life of 9-12 months. These meat replacers are discussed with respect to the growing popularity of tofu entrees, in part for health reasons. To overcome the problems of the binding capabilities of tofu, basic mixtures of 35-50% tofu and 20% meat are recommended.

Other popular uses of tofu include salad dressings (see *Food Engineering*, Nov. 1985, p. 58) and as an egg substitute. Last fall, Fantastic Foods (Novato, California) introduced Tofu Scrambler Mix. The cook adds the mixture to fresh tofu, then cooks it for a few minutes. The result resembles scrambled eggs.

A photo (courtesy of Advanced Food Systems) shows products made by combining meat and tofu with other ingredients.

6826. Ho, C.C.; Ten, S.K.; Chuah, B.H.; Lee, G.S.; Kok, C.H.; Chen, Y.F. 1986. Microbiology of traditional fermented food in Malaysia and surrounding countries. In: V.H. Potty, et al. eds. 1986. Traditional Foods: Some Products and Technologies. 292 p. See p. 134-35. Aug. Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India.

• **Summary:** "Soy sauce, tempeh, onjom, tapai and ubi are the fermented foods on which laboratory studies and extensive field work have been carried out in Malaysia. Tempeh and tapai are traditional fermented foods of Malaya and also the Indonesians. Soy sauce manufacture is the

largest fermentation industry in Malaysia, technology for which was introduced by the Chinese...

"Offensive odour development in the fermentation process results in spoilage of tempeh and tapai. *Bacillus subtilis* causes this problem. A strain of *B. subtilis* (H4052) has been isolated. It has been found that it inhibits the growth of *Rhizopus oligosporus* and *R. oryzae* through the likely production of antimycotic antibiotics." Address: Univ. of Malaya, Kuala Lumpur, Malaysia.

See p. 178-90. Aug. Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India. [14 ref]

• **Summary:** The traditional Korean soybean fermentation technique is unique. Soybean is the only ingredient used, and sauce and paste are made simultaneously. In the first step of the fermentation, meju is made from cooked and mashed soybean balls, which contain no salt. Molds, mainly *Aspergillus oryzae*, grow on the surface of a meju ball, and bacteria, mainly *E. [sic, Bacillus] subtilis*, inhabit the inside of the ball. One part of meju, one part of salt, and 4 parts of water are mixed in earthen jars, and ripened for several months. The supernatant dark brown liquid of meju-brine mixture is soybean sauce and the brownish solid residue is soybean paste.

Kochujang, a mixture of fermented soybean paste and ground red pepper, is a unique food product available only in Korea; it reflects the hot spice preference of its people. It is prepared by mixing ground meju powder with steamed cereal flour, red pepper, salt and water and allowing further fermentation and ripening of the mixture in earthen jars for several months. Flowcharts are given for soy sauce, soy paste, and kochujang.

Under "Recent developments" (p. 187), the development of improved meju and meju-brine are discussed. Address: Dep. of Food Technology, Korea Univ., Seoul, Korea.

6828. Nielsen Marketing Research. 1986. Nielsen warehouse shipment service market snapshot: Total soya sauce (52 weeks to Aug. 30, 1986). 1 p. Unpublished manuscript.

• **Summary:** In the year prior to 30 Aug. 1986 shipments of soy sauce in Canada (excluding Yukon and Northwest Territories) were 493,100 imperial gallons, worth \$8,916,000 at the retail level. Of this total, 64.6% by volume was sold in eastern Canada (Maritimes, Quebec, and Ontario), and 35.4% was sold in western Canada (Manitoba, Saskatchewan, Alberta, and British Columbia). Address: Canada.

6829. **Product Name:** Tempeh Burger.

Manufacturer's Name: Nutrisoy Pty. Ltd.

Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.

Date of Introduction: 1986. August.

Ingredients: Organic soybeans, water, soy sauce, sunflower oil, cider vinegar, spices, herbs, and culture (*Rhizopus oligosporus*). "Black spots are normal sporulation and do not indicate spoilage."

Wt/Vol., Packaging, Price: 200 gm in plastic bag.

How Stored: Refrigerated.

New Product–Documentation: Label with date sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling this product in Aug. 1986. Orange, green, yellow, black and white on red. "Sandwich filling. Ready to serve, hot or cold."

6830. Shurtleff, William. 1986. Safety of fermented foods (Letter to the editor). *Vegetarian Times*. Aug. p. 4.

• **Summary:** "I am concerned about the safety of eating tempeh and other fermented products. Rumor has it that these molds are potential carcinogens, but no one I know can cite the source of the data claiming it's dangerous. Please address this issue.—Nancy Lampka Simpson, Amherst, New York 14226.

"Editors Note: Bill Shurtleff, director of The Soyfoods Center and author of *The Book of Tempeh* writes this response:

"The Soyfoods Center has the world's largest computerized database of information about soyfoods, listing more than 13,700 publications. Of these, 590 are about tempeh. Not one of these publications even suggests a possible link between soy tempeh or the tempeh molds (*Rhizopus* species) and cancer

"It has been well known since the early 1960s that several of the *Aspergillus* molds (especially *Aspergillus flavus*) produce aflatoxins, which are potent carcinogens. There are numerous reports in the literature of aflatoxins being produced on poorly handled peanuts, especially in tropical countries. A fermented peanut product from Indonesia called *onchom* has been shown, in some cases, to contain aflatoxins.

"Because the molds used to produce soy sauce and miso (*Aspergillus oryzae* and *A. soyae*) are of the same genus as *Aspergillus flavus*, a tremendous amount of research has been conducted worldwide over the past 20 years to see if aflatoxins are produced in soy sauce or miso. A vast body of literature shows that not in a single instance have aflatoxins been found in any commercial product.

"In conclusion, thousands of years of daily use and many decades of testing by microbiologists have shown fermented soyfoods to be completely safe." Address: Director, The Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

6831. Steinkraus, Keith H. 1986. Industrialization of indigenous fermented food fermentations. In: V.H. Potty, et al. eds. 1986. *Traditional Foods: Some Products and Technologies*. 292 p. See p. 201-08. Aug. Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India. [7 ref]

• **Summary:** Contents: Introduction (ways of classifying traditional foods). Structural characteristics of traditional food industries in Japan. Traditional food processing technologies. Problems and reevaluation of traditional foods. New food processing technologies applied to traditional foods. Technologies applicable to traditional foods. Assessment in modernization of traditional food production. Some activities related to traditional foods. Conclusion.

Traditional foods can be classified as staple or non-staple, fresh or processed (processing technologies include fermentation [e.g. miso, soy sauce, natto], salting, acidifying, drying after freezing [kori-tofu], sun-drying, fractionation [tofu], fabrication [ganmodoki], simulation of animal foods [soy milk, ganmodoki, su-ho-tai made from yuba in China]), animal or vegetable origin, and region or national production.

In Japan, rice consumption is decreasing year after year. It is thus not surprising that consumption of traditional foods closely associated with rice production are also decreasing. The reevaluation of traditional foods and their advantages and disadvantages are discussed. New food processing and packaging technologies are being applied to traditional foods, including tofu, miso, natto, and koji. Recently a method has been found to extend the shelf life of natto beyond the traditional 1-2 day period. Miso has been freeze-dried.

"Another application of a new process for the traditional foods is the emulsion curd which is a semi-solid mixture

with definite proportion of soybean protein, oil and water. It keeps its form without flow. Even the dried or frozen product recovers its original texture by hydration or thawing. Therefore, it is used as a substitute in dried or frozen *Tofu*. Regular *Tofu* cannot recover its texture once it is frozen or dried...

Miso can be enriched with vitamin B-2 and calcium, and its salt content lowered. Since 1980 the Laboratory of Food Science at Kyoritsu Women's University has been conducting a research survey on traditional foods and dishes in Japan in cooperation with the Cooking Research Laboratory. "This project consists of three components: (a) survey of the present status of traditional foods on local basis at respective regions by visiting prefectural research organisations—universities and colleges; (b) sending questionnaires to students for seeking information on the position of the traditional foods in the dietary patterns of individual homes and also to obtain their comments on the future prospects of the local traditional foods; (c) and documentation regarding local traditional foods, followed by classification according to preparation or cooking method for analysis. On the basis of the collected data, the relationship between each local traditional food and its natural, cultural and historical background has been studied and published in the university's journals. More efforts are being made to identify the reasons as to why and how some traditional foods have survived in certain regions, while the others have disappeared or reached the verge of extinction.

"Another related activity is the one carried out by Ajinomoto Company, a major food manufacturer in Japan, which has got the modern audio-visual media, video-tapes and 36 mm-films. Their team has been documenting the processing of some selected traditional foods like *Tofu*, *Yuba*, *Fu* and such other foods as demonstrated by professionals by using the old traditional methods and facilities. This would help in the documentation of traditional technologies before they disappear in the event of modernisation of such foods. Such tapes and films have been made available by the company...

"Traditional foods, especially those of plant origin, are prepared by such complex multi-step processes as to be called 'products of human wisdom.' Therefore there is so much to learn from such products if serious attention be paid. Indeed they have great potential for developing new food industries." Address: Kyoritsu Women's Univ., Tokyo, Japan.

6834. Winarno, F.G. 1986. Traditional technologies of Indonesia with special attention to fermented foods. In: V.H. Potty, et al. eds. 1986. *Traditional Foods: Some Products and Technologies*. 292 p. See p. 136-47. Aug. Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India. [24 ref]

• **Summary:** Contents: Introduction. Tempe. Oncom. Tauco and soy sauce. Tape (tapeh) and its products. Brem wine. Brem cake. Terasi. Salted eggs and pindang. Pindang (made from salted fish). Address: Food Technology Development Centre, Bogor Agricultural Univ., Indonesia.

6835. Yin, Zong Lun. 1986. Development and industrialization of traditional food production in China. In: V.H. Potty, et al. eds. 1986. *Traditional Foods: Some Products and Technologies*. 292 p. See p. 191-200. Aug. Presented at the UN University Workshop on "Traditional Food Technologies: Their Development and Integrated Utilisation with Emerging Technologies." Held June 1983 at CFTRI, Mysore, India.

• **Summary:** Under "Oilseeds, Soy products," the author discusses soymilk, soybean curds (tofu; soft tofu is popular in south China and hard tofu in North China), fried bean curd, smoked bean curd, "stink" flavoured bean curd, soymilk skin sheet [yuba], dried soymilk skin sticks [dried yuba sticks], fermented bean curd or soy cheese, and soybean powder.

Under "Condiments," soy sauce is discussed. Note: This is the earliest English-language document seen (Oct. 2008) that uses the term "soymilk skin" or "soymilk skin sheet" to refer to yuba, or that uses the term "dried soymilk skin sticks" to refer to dried yuba sticks. "These products form an important part in a vegetarian's diet and are used in conjunction with other ingredients to prepare imitation meat and fish like products for vegetarian dishes" (p. 194).

"Soymilk is a very popular breakfast beverage. In order to supplement milk supplies and also meet the special needs of those who, for some reason cannot drink milk, processing factories have been set up with relatively large-scale production capacities for soymilk. With the same distribution pattern as milk, soymilk is supplied to various catering departments, schools, kindergartens, nurseries and families. The process employed for soymilk ensures destruction of trypsin inhibitor and effective deodorization to reduce the unpleasant bean-taste...

"Fermented bean curd or soy cheese can be produced by the fermentation of bean curd. The fermented bean curd may differ in shape (square bits, cubes), colour (white, red), flavor and smell; the products can also be steeped in seasoned rice wine or preserved with drags of rice wine. Sometimes they contain added pepper, rose leaves or shrimp spawn. The traditional production procedure is very subtle. The aging process requires high levels of skill and experience. The product is liable to break down and careful handling is needed. Presently, a new type of fermented bean curd in the form of paste which is more amenable to handling and packaging, and consuming has appeared on the market. However, this product does not conform to Chinese traditional eating habit and is, therefore, now [not?] widely accepted, either for nutritional value or flavour. Soy cheese

has a great potential for development...

"In several baby food recipes, soybean constitutes an important source of protein. The well known milk substitute 5410 formulated during the 1950s contained soybean powder as the main ingredient. Formula 5410 has proved to be a success in terms of its nutritional value. It has become the basic recipe for many milk substitutes. Some factories use spray drying process to produce instant blended milk powder consisting of soymilk, milk and other ingredients; they have gained some technological and financial benefits. In recent years, there has been a continuous flow of such products into the market.

"Based on previous research efforts, and in conformity with China's present situation, work is being done to develop an oil-containing concentrated soy protein. The techniques involved have certain positive characteristics. The end product can be a liquid for direct use as a food ingredient or a spray-dried powder for the formulation of dry-mixes." Address: Research Inst. of Light Industry, Beijing, People's Republic of China.

6836. Westbrae Natural Foods. 1986. Distributor catalog, Northeast delivered pricing: Sept. 1, 1986. Emeryville, California: Westbrae. iv + 17 + [13] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a light blue background. Pages i-iv are general information, 1-9 are a computer-printed price list, and 11-17 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) including the following Westbrae products: (1) Malted's (2 new flavors—Java and Almond. No caffeine (c) 1984). (2) Malted's: "The Cadillac of soydrinks" (Q&A). June 1986. (3) The uncommon ramen—whole wheat, 12 flavors in all. (4) Instant vegetable miso soup. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

6837. Johnstone, Bob. 1986. Japan turns soy sauce into biotechnology: Manufacturers of soy sauce are among Japan's oldest, most established firms. But a long tradition has not made them slow to exploit the latest science and technology. *New Scientist* 111(1524):38-40. Sept. 4. [1 ref]

• **Summary:** With soy sauce (shoyu) sales sluggish in Japan, its manufacturers have been quick to use their traditional skills to diversify into new fields; they now make monoclonal antibodies and even contraceptives. The 120 million inhabitants of Japan consume, on average, 10 liters/year of shoyu.

Although there are more than 2,500 makers of shoyu in Japan, most of them are small family businesses. Half of the country's output comes from just 5 companies, of which the largest are Kikkoman Corp., which has 30% of the market, and Yamasa Shoyu, which has 10%.

Kikkoman has a strong focus on research, employing

350 researchers or about 10% of its total workforce; one-third of these are involved in basic research. Whereas the Japanese food industry spends 0.5% of sales on R&D, Kikkoman spends 2%—or 4 times as much. Yamasa, which employs 70 researchers, gets 10% of its income from selling biochemicals for research. Until about 30 years ago, shoyu took a year or more to ferment and only 60% of the protein in the soybeans ended up in the final product. Researchers using modern microbiology and protein chemistry have reduced the time to as little as 6 months and the conversion rate 90%.

Major innovations have been year-round temperature control to reduce the time, continuous even cooking using a screw process, and breeding better strains of *Aspergillus* mold using "cell fusion"—a process (in the late 1970s) by which researchers "peel off the cell walls of the organism and then induce the naked 'protoplasts' to fuse." During this research, Kikkoman scientists discovered an enzyme, pectorinase, useful in cell fusion. Kikkoman now sells this enzyme worldwide, and "claims to be the first to have succeeded in producing a higher plant [a hybrid citrus tree] by cell fusion." "Now companies are thinking of genetically engineering microorganisms to enhance yields."

Sidebar 1, titled "Mouldy origins of Japan's favorite condiment," notes that 800 years ago a Japanese monk named Kakushin, who studied Buddhism in China, brought shoyu back to Japan—where the humid climate encourages the growth of the molds to make koji and thus the fermentation process. Yamasa's shoyu plant at Choshi, a seaside town at the tip of a part of Japan that juts out into the Pacific Ocean east of Tokyo, is especially good for fermentation. Off its coast the warm Kuroshio current from the south meets cold currents coming down from the north, "creating a moist atmosphere all year round." Kikkoman and Yamasa each grow their own *Aspergillus oryzae* molds for making koji, and the differences between them are apparent under a microscope. Kikkoman's spores appear short and fat, while Yamasa's are long and lean. "Originally shoyu was made from soya beans alone. Later wheat was added to make the seasoning sweetener"—when the wheat starch is converted to sugar. A description of the 8-month fermentation process follows. The resulting shoyu contains about 3% ethanol; in Great Britain it is classified as a type of alcohol and taxed accordingly!

Sidebar 2, titled "Bioreactors cannot yet fool the human palate," begins with a Chinese proverb: "It takes a long time to make something taste good." Kikkoman began experiments with bioreactors in 1981. In 1984 it succeeded in running one for 80 days. Along with 40 other companies, Kikkoman is participating in the bioreactor project, founded 2 years ago by the Ministry of Agriculture. Kikkoman built a bioreactor that could make shoyu in just 2 weeks. Its design and function are described. Yet the end product was not as tasty as regular shoyu that is fermented slowly. However

work on this new process continues; it lends itself well to simpler applications, such as making alcohol or sugar.

A long section tells the remarkable story of how Yamasa, Japan's second largest of shoyu, became involved in biotechnology. "It began in 1953, when Akira Kuninaka joined the company." He isolated inosinic acid, the main flavor compound in dried bonito flakes (*katsuobushi*), which are one of the three main sources of flavor in Japanese cooking (along with dried shiitake mushrooms and kombu). He then discovered that a tiny quantity of inosinic acid multiplies the flavor intensity of monosodium glutamate (MSG) by a factor of five or more. Today Yamasa is a major supplier, worldwide, of nucleotides, enzymes, reagents for the synthesis of DNA, and monoclonal antibodies. Kuninaka believes that Yamasa's success in the field of pharmaceuticals derives directly from the company's long experience of making shoyu with *Aspergillus* molds. "As his old professor at Tokyo University used to tell him, 'Microorganisms will produce anything for you—if you know how to ask them.'"

Photos show: (1) A Japanese woman working behind a line bottling Yamasa Shoyu in 1-liter plastic bottles. (2) Moromi being pressed with hydraulic presses. (3) A circular bottling line. (4) A scientist in a laboratory.

6838. Arocena, Javier. 1986. Re: Brief history of the soyfoods company Zuaizto in Spain. Letter to William Shurtleff at Soyfoods Center, Sept. 10. 2 p. Typed, without signature on letterhead. [Eng]

• **Summary:** "I've been working for the last 4 years making tofu, seitan, and tempeh, in a craftsman way, in the North of Spain, in the Basque country. Unfortunately in all of Spain we are only two people making those kind of products, even if slowly, slowly, people are asking us more and more for them every day. I have graduated in biology, and so have a background in what I am doing. I've really found myself useful for the rest of the world, and enjoy my life and work... I'd like to ask if there is any possibility of working for a short time (a summer or a month) in a place where I could learn how to make miso, tamari, natto, sufu, and soynuts." Address: Zuaizto, Correria, 39-01001 Vitoria-Gasteiz, Spain. Phone: 945/28 86 30.

6840. Abdul Rahman, Hussein. 1986. An update in the manufacturing of traditional fermented and non fermented soyfoods in Malaysia. In: F.G. Winarno, ed. 1986. International Soyfoods Symposium. xiv + 403 p. See p. 59-73. Held 16-18 Sept. 1986 in Jogjakarta, Indonesia. [38 ref]

• **Summary:** Contents: Abstracts. Introduction. Present status of soybean utilization in Malaysia. Manufacture of traditional fermented soyfood in Malaysia. Manufacture of traditional non-fermented soyfood in Malaysia. Research and development of soyfood in Malaysia. Conclusion. Address: Extension Services, Food Technology Div., Malaysian Agricultural R&D Inst., P.O. Box 202, Serdang, Selangor, Malaysia.

6841. Ando, Seiichi. 1986. Kinsei toshi-shi no kenkyū [A study of city history in the Edo Period]. Tokyo: Seibun-do. [Jap]*

• **Summary:** Ando's most detailed publication on shoyu is given in the chapter titled "Kishu Yuasa shoyu no seisan to ryutsu [Production and distribution of Yuasa shoyu from Kishu]" (p. 301-12). Address: Osaka Sangyo Daigaku, Osaka, Japan.

6842. Benk, Erich. 1986. Ueber die Sojabohne und aus ihr hergestellte Lebensmittel [Soybeans and soybean products]. *Industrielle Obst- und Gemueseeverwertung* 71(9):390-91. Sept. [9 ref. Ger]

• **Summary:** Soybeans and their products are discussed briefly, including their composition, manufacture, and uses. Products mentioned are green vegetable soybeans (unreife Sojabohnen), whole dry soybeans, soy protein, soy oil, lecithin, defatted soy flour, soy protein concentrate, soy nuts, soy sprouts, soymilk (Sojamilch), tofu (Sojaquark), soy sauce (Sojasosse), and fermented tofu (Sojabohnen-Käse, sufu). The application of German dairy product laws to soyfoods is discussed. Address: Chemiedirektor a. D., Beratender Lebensmittelchemiker, Robert-Steiger-Str. 110, 8909 Krumbach, Germany.

6843. Fukushima, Danji. 1986. New development in the process of traditional soyfoods in Japan. In: F.G. Winarno, ed. 1986. International Soyfoods Symposium. xiv + 403 p. See p. 21-57. Held 16-18 Sept. 1986 in Jogjakarta, Indonesia. [22 ref]

• **Summary:** Contents: Abstract. Soy milk. Tofu. Soy sauce. Miso. Natto.

Table 1 (p. 28) shows changes in the size of the soymilk market in Japan from 1979 to 1985. For each year there are statistics for the amount of soymilk sold (in kiloliters), the ratio of that amount to the amount sold during the previous year, the total retail value in yen, the ratio of the retail value that year to the value the previous year, and the ratio of the retail value that year to the value in 1979. The amount of soymilk sold in million liters is as follows: 1979-6.5 million liters. 1980-12.0. 1981-25.2. 1982-54.3. 1983-111.5. 1984-84.013. 1986-55.354.

Also contains a detailed analyses of the off-flavors in soymilk. These off flavors are brought about through the hydrolysis of the glycosides by the Beta-glycosidase

contained in soybeans. Contains 46 figures, including many photos, flowcharts, and equipment designs. Address: Food Research Inst., Kikkoman Co. Ltd., 339 Noda, Noda City, Chiba prefecture, Japan.

6844. Fukushima, Danji. 1986. Preservation of traditional soy products. In: F.G. Winarno, ed. 1986. International Soyfoods Symposium. xiv + 403 p. See p. 267-93. Held 16-18 Sept. 1986 in Jogjakarta, Indonesia. [25 ref]

• **Summary:** Contents: Abstracts. Soy sauce and miso. Soy milk, tofu, and their related products. References. Address: Food Research Inst., Kikkoman Co. Ltd., 339 Noda, Noda City, Chiba prefecture, Japan.

6845. Robertson, Laurel; Flinders, Carol; Ruppenthal, Brian. 1986. The new Laurel's kitchen: A handbook for vegetarian nutrition and cookery. Berkeley, California: Ten Speed Press. 512 p. Foreword by Sheldon Margen, M.D. Professor of Public Health Nutrition. University of California, Berkeley. Illust. Index. 23 cm. Original ed. published Sept. 1976. [234* ref]

• **Summary:** Contents: Preface (by Laurel). Introduction: The work at hand (Carol Flinders). Recipes and menus (includes 500 recipes): Bread, breakfast, lunch, dinner, salads, soups, vegetables, sauces & such, heartier dishes, grains & beans, desserts, menus. A handbook of nutrition: Introduction: The search for an optimal diet (Brian Ruppenthal), The New Laurel's Kitchen food guide. Special concerns: Pregnancy, infancy & early childhood, controlling your weight, nutrition in later years, sports (athletic activities), the vegan diet, diet against disease. The nutrients: The energy-yielding nutrients, vitamins & minerals, food processing, conserving nutrients in the kitchen, suggestions for further reading, recommended dietary allowances, nutrient composition of foods. Address: Blue Mountain Center of Meditation, Petaluma, California.

6846. Winarno, F.G. 1986. Traditional fermented soyfoods. In: F.G. Winarno, ed. 1986. International Soyfoods Symposium. xiv + 403 p. See p. 3-19. Held 16-18 Sept. 1986 in Jogjakarta, Indonesia. [36 ref]

• **Summary:** Contents: Introduction. Tempe. Some tempe products. Flavor and color of tempe. Tempe and wholesomeness. Tauco. Kecap (soy sauce).

"Tempe was formerly considered an inferior food in part because of its costs, compared to other protein foods such as meats, fish and eggs. Over the last 15 years the attitude towards tempe has changed. Today, more attention has been given to tempe because it is an inexpensive source of proteins, vitamins and calories. The total annual production of Indonesian tempe is about 500,000 tons. However, tempe production is still a household art. Most of the 41,000 small cottage industries that make fresh tempe daily are family run and employ about 128,000 workers. Each small cottage industry employs about 3 workers, and uses approximately

11 pounds (5 kg) of dry soybeans per day to produce 21 pounds (10 kg) of fresh tempe. The larger cottage industries employ 10 to 20 workers and use 600 to 1,000 pounds (500 kg) of dry soybeans per day to produce tempe. The average retail price of tempe is about US \$0.25 per kg in 1985."

Figures: 1. Usar made using traditional Hibiscus leaves. 2. Flow sheet: Indonesian tempe process. 3. Material balances in pilot plant process for production of tempe. 4. Flow sheet of tauco processing. 5. Flow sheet of kecap processing. Address: Food Technology Development Center, Bogor Agricultural Univ., P.O. Box 61, Bogor, Indonesia.

6847. Wood, Brian J.B. 1986. List of publications: 1961-1985. 3 p. Unpublished manuscript. [24 ref]

• **Summary:** Dr. Wood is probably Scotland's leading authority on fermented soyfoods. He has published many papers (especially on lactobacilli and industrial fermentations, but also on tyrosinase) and edited several books on these foods, guided many PhD students, and in May 1982 started Scotland's first company that makes fermented soy sauce (in Cumbernauld). Address: Dep. of Applied Microbiology, Univ. of Strathclyde, Glasgow, Scotland, UK.

• **Summary:** Note: Talk with Kikkoman. 1988. Aug. 29. Construction on the plant has not yet started.

6849. Fangauf, K.W. 1986. Bedeutung der Sojabohne und Sojaprodukte fuer die Welternahrung [Significance of the soybean and soya products for world nutrition]. *Schriftenreihe aus de Fachgebiet Getreidetechnologie* No. 8. p. 9-23. Sojaprodukte: Herstellung und Verwendung. [15 ref. Ger]

• **Summary:** Discusses history of the soybean, cultivation and composition, the world industry for soybean production, consumption, and products, world production of soy oil and competing oils, trends in the use of soy products (incl. soymilk and soymilk products, soy sauce, tofu, miso, and tempeh; table based on Shurtleff & Aoyagi 1983), results of Hamburg poll (American Soybean Assoc. 1982) on attitudes of German consumers toward qualities and use of soya (e.g., price, nutritional value, good protein source, versatile, healthful, recommended by a doctor, good for young people), conclusion. Address: American Soybean Assoc., Hamburg, West Germany.

6850. **Product Name:** Spicy Tempeh Chili.

Manufacturer's Name: Hain Pure Foods.

Manufacturer's Address: Los Angeles, Calif.

Date of Introduction: 1986. October.

Ingredients: Incl. Tempeh, soy sauce.

Wt/Vol., Packaging, Price: 15 oz can. \$1.69.

How Stored: Shelf stable.

New Product–Documentation: Interview with Lonnie Stromnes. 1987. Sept. 3. He helped Hain develop the product. Hain was owned by Ogden for 4-5 years. Now it is owned by Pet of St. Louis, Missouri, a huge conglomerate.

6851. Kotsch, R.E. 1986. The pioneering spirit of Ohsawa-Japan: Japan's first macrobiotic company puts principles before profits. *East West*. Oct. p. 72, 74-75.

• **Summary:** In 1953 George Ohsawa "left Japan to teach the principles of macrobiotics in other lands. Several years later, after sojourns in India, Africa, Europe, and America, he returned to his homeland for a visit. When he saw that it had become almost impossible to procure traditional-quality foods in his own country, he urged some of his followers to become involved in farming and in food processing. He encouraged others to set up a company that would seek out existing producers of high-quality items and market their products in Japan and abroad. Thus was born Ohsawa-Japan, staffed by loyal disciples of Ohsawa and headed by his sister-in-law Flora Tanaka.

"From its inception Ohsawa-Japan was a company rich in ideals and slim in capital. As Yoshi Nanabayashi, its export manager, told me, 'We have always been, above all, a macrobiotic company. So our first concern has been to distribute only the highest-quality food, made according to strict standards. Considerations of cost and profit have always been secondary. Mr. Ohsawa taught that proper food is the key to the health and happiness of humanity. Our main aim has been to promote the health of individuals and of society, not to make a lot of money. And,' he added with a laugh, 'we have been fairly successful.'"

What the Tokyo-based company lacks in professionalism it makes up for in dedication to its ideals. From several score of traditional Japanese food producers (mostly small and family-run) around Japan, it gathers more than 100 products (including miso from Yamaki Miso Co., shoyu, and tamari), packages them, and distributes them to the small but strong network of macrobiotic stores and centers throughout Japan.

For years Ohsawa-Japan's "exclusive North American distributor was Chico-San, the natural foods company located in Chico, California. In 1984 Chico-San, which had thrived on its rice cake business, was sold to the H.J. Heinz Corporation. Six months later the import rights to the Ohsawa-Japan products were sold back to Chico-San's original owners, Herman Aihara and Bob Kennedy. At that point a new company, Ohsawa America, was set up to import and distribute the products of Ohsawa-Japan. Today that company, based in Chico, handles about seventy basic Japanese macrobiotic items...

"The main difficulty facing Ohsawa America is the high prices it must ask for its products. The cost of living

in Japan is one of the steepest in the world... In addition, the value of the yen has increased dramatically." Lane Seiger is operations manager of Ohsawa America. As Joel Wollner notes, "Like Ohsawa-Japan, Ohsawa America is a philosophy-driven company." Address: Staff.

6852. Mori, Shôzô; Sasaki, M.; Nonomura, N. 1986. Amerika shijo shôyu no kannô hyôka-taki hinshitsu no tokuchô [Organoleptic quality of soy sauce on the American market]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 81(10):701-06. Oct. [14 ref. Jap] Address: Kikkoman Jôzô Kagaku Kenkyû-jo.

6853. **Product Name:** Shree Akita Miso, Akadashi Miso. Renamed Akita Miso.

Manufacturer's Name: Nepal Soya Industries.

Manufacturer's Address: 9/374 Bhedashing, Jamguthi, Kathmandu, Nepal. Phone: 229130.

Date of Introduction: 1986. October.

Ingredients: Akita miso: Soybean, rice, koji starter, water, salt.

Wt/Vol., Packaging, Price: 1 kg plastic bag.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Letter from Mr. Achutananda Vaidya of Nepal Soya Industries. 1992. Dec. 26. He started making tofu in Kathmandu in 1974. "In 1979-80 I was invited to Japan for 9 months training at the Akita Prefecture Brewing Laboratory. During that time I also learned in detail the processes for making soy sauce, miso, and soyamilk. During that period I also got a chance to read *The Book of Tofu*, *The Book of Miso*, *Miso Production*, and *The Book of Tempeh* all of which helped me very much. I still have all those books. In 1985 I was invited by the Rotarians of Akita-Aomori to return to Japan for 1 month to receive further technical training in making tofu, miso, soy sauce, soyamilk, moyashi (sprouts), koji, fruit fermentations for wine, etc. Today I produce tofu, soy sauce, and miso in my small factory in Kathmandu." His business card notes: "Food Technology in Brewing from Japan. Products & Suppliers: Tofu (Vita), Soyamilk (Vitabean milk), Soya Curd, Soya Sauce, & Miso."

Letter from Mr. Achutananda Vaidya of Nepal Soya Industries. 2002. April 12. He started to make this miso and to sell it in Japanese hotels and restaurants. It is now named Akita Miso. A label sent in April 2002 is for "Akita-Miso: Naturally fermented..."

6854. **Product Name:** Lemon Broil Tempeh.

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.

Date of Introduction: 1986. October.

Ingredients: Soy rice tempeh (cultured soybeans, water, brown rice), olive oil, soy oil, soy sauce, concentrated lemon

juice, granulated garlic, onion powder.

Wt/Vol., Packaging, Price: 6 oz. Plastic wrapped.

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1986. 3 inches square. Yellow and white on blue background. “Great on Sandwiches or Add to Stir Fry or Grill on Barbecue. Heat and serve. Pareve.” Soyfoods Center product evaluation. Delicious! Interview with Lonnie Stromnes. 1987. Aug. 31. New Label. 1989. April. Ingredients: Soy Rice Tempeh, olive oil, soy oil, soy sauce, concentrated lemon juice, granulated garlic, onion powder.

6855. Seminar on Traditional Foods and Their Processing in Japan. 1986. Tokyo: NODAI Research Institute, Tokyo Univ. of Agriculture. 4 p. Held on 13-25 Nov. 1986 at Tokyo University of Agriculture, Tokyo, Japan. [Ger]

• **Summary:** This document, which is an announcement of the seminar, contains two parts: (1) The 1-page introductory letter (28 cm), and (2) The 3-page Agenda (26 cm). The proceedings were published in 1987, edited by Fujiharu Yanagida.

The Agenda gives the opening session (Room A): Chairman I. Uritani. 11:00–11:30. Opening address by the chairman of organizing committee, Dr. Izuru Yamamoto, Director, Nodai Research Inst. Welcoming address by Dr. Takao Suzuki, President, Tokyo University of Agriculture. Address by representative of Japan Society for the Promotion of Science. (JSPS). Address by the president of the Society for Agricultural Education–Research Development Abroad (SAEDA), Dr. Jiro Sugi, Emeritus Professor, Tokyo Univ. of Agriculture.

11:30–11:45. Keynote address, Dr. Hiroyasu Fukuba, Professor, Ochanomizu University.

The following soy-related papers, which were published in the 1987 proceedings, are cited separately: Onchom, by Dedi Fardiaz. Miso, by Hisao Yoshii. Tofu, by Tokuji Watanabe. Indigenous fermented foods in Nepal, by Tika Karki. Improvement in traditional soy sauce fermentation, by Sri Hartadi. Address: Tokyo, Japan.

6856. Barrett, Mariclare. 1986. The cook’s glossary of soyfoods. *Vegetarian Times*. Nov. p. 28-35. [10 ref]

• **Summary:** Gives good definitions, with a full-page color illustration by Emily Soltanoff, of: Soybeans, soynuts, soy flour and grits, soy oil, textured vegetable protein, soymilk, okara (“the pulp that remains after the soymilk has been strained”), soy yogurt and soy cheese, tofu, fermented soyfoods, tempeh, miso, natto, soy sauce.

The article begins: “For 60 seconds on a national television commercial, a small, round soybean rolls past a lineup of infant formula, bread, pizza, chili, salad dressing, ice cream [Tofutti], soymilk and cubes of tofu; meanwhile the narrator intones, ‘The newest development in nutrition is actually one of the oldest foods known to man.’ Through

advertising, the concept of soyfoods is brought home to millions of Americans by the soy giant, Archer-Daniels-Midland Company.” Address: Staff.

6857. Dawson, Barbara M. 1986. Vegetarian spa resorts to innovative purchasing. Murrieta Hot Spring’s typical weekly grocery order might include 1,000 pounds of tofu. *Restaurants & Institutions (Des Plaines, Illinois)*. Nov. p. 172.

• **Summary:** In a 6-month period, Murrieta purchased 23,400 pounds of tofu, or 130 lb/day. The San Diego Soy Dairy sells 4,500 lb of tofu a week, 25% of it to Murrieta. Popular dishes include tofu links (hot dogs) marinated in almond oil, liquid aminos, ketchup and mustard, and grilled on the barbecue. Breakfast features a scrambled tofu dish blend in with almond oil.

Note: As of Aug. 1991 Murrieta Hot Springs is closed and a mess, with broken windows, no owner, and facing receivership.

6858. **Product Name:** [Kikkoman Instant Wakame Soup (Seaweed Soup with Miso)].

Manufacturer’s Name: Kikkoman Corporation.

Manufacturer’s Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1986. November.

New Product–Documentation: Spot in Food & Beverage Marketing. 1986. Nov. p. 12, 60.

6859. McMath, Bob. 1986. Hot products: Japanese foods ‘stir’ up interest. *Food & Beverage Marketing*. Nov. p. 12, 60.

• **Summary:** Soyfoods included in the Kikkoman instant soup mix line are Osuimono (Japanese Clear Broth), Aka Miso Soup (Soybean Paste Soup–red), Shiro Miso Soup (Soybean Paste Soup–white), Tofu Miso Soup, and Wakame Soup (Seaweed Soup, a color photo of which is shown). Each packet contains 3-4 individual servings and retails for \$1.19 to \$1.39.

6860. **Product Name:** Tofu-Turkey, Traditional Stuffing, Pumpkin-Tofu Pie.

Manufacturer’s Name: Tofu Shop Delicatessen (The).

Manufacturer’s Address: Arcata, California. Phone: 822-7490.

Date of Introduction: 1986. November.

Ingredients: Tofu (soybeans, water, nigari). Stuffing: Wholewheat seasoned croutons, parsley, celery, onions, mushrooms, carrots, tofu, miso, okara, soy margarine, tamari, sage, paprika, basil. Basting: Tamari, soy margarine, garlic, onions, sage.

New Product–Documentation: Leaflet (28 cm, single sided) sent by Matthew Schmit. 1986. Handwritten, with an illustration of The Tofu Shop, on pillars and with a tree growing overhead, at the edge of the ocean. “Tofu-Turkey:

Deli 5 lb. 'birds' made from the freshest tofu, fully stuffed, basted, and baked. Tastes like the real thing and the leftovers are delicious. No animal products. Price—\$12.95, with \$5.00 non-refundable deposit. Pre-order.

"Traditional stuffing: All natural with whole-wheat croutons, mushrooms, tofu trimmings and select veggies and spices. Price—\$1.75 / qt. Pre-order.

"Pumpkin tofu pie: Large 9" pie serves eight. A delicious dessert with whole wheat crust, free of dairy and eggs. Price—\$5.75. Pre-order.

Ordering & pick-ups: Order deadline: Mon. Nov. 19. All pick-ups: Wed. Nov. 21.

"This year. Save the bird & eat it, too!"

See similar, but more professional. leaflets from 1987, 1988, 1989, and 1990.

6861. Product Name: Seitan.

Manufacturer's Name: Traditional Foods Cooperative.

Manufacturer's Address: Route 1, Gays Mills, WI 54631. Phone: 608-735-4711.

Date of Introduction: 1986. November.

Ingredients: High-protein wheat flour, water, tamari soy sauce, and ginger.

Wt/Vol., Packaging, Price: 5 lb bulk bag in a box, or 10 oz round plastic deli tub.

How Stored: Refrigerated.

New Product—Documentation: Talk with Crick Haltom. 1991 Nov. 23. In about Feb. 1991 he lost 20-25% of his seitan sales to a company [Traditional Foods] in Wisconsin that started out making tempeh, then started making seitan. The tempeh company, a cooperative, had a close, strong connection with North Farm, a cooperatively owned distributor in Madison; North Farm distributed Crick's seitan in the area. The people who made the tempeh and seitan were members of the cooperative, so North Farm dropped Crick's seitan and took on the seitan made in Madison. Most of Crick's seitan in that area was sold to one account, Blind Faith, a large vegetarian restaurant in north Chicago. Crick never saw any of the seitan or tempeh made in Wisconsin. Phone number of North Farm Cooperative: 608-241-2667.

Talk with Liz Coleman of Traditional Foods. 1991. Nov. 25. This company was started as a home business by Bob Mandel and Cindy Wiar. Bob Ribbens has been with the cooperative since it started. They now seitan and miso. Mary Ruth is the seitan production manager and a member of the cooperative. The company is now located in a bakery at P.O. Box 92 (Corner of Grove and North Railroad Streets), Gays Mills, WI 54631. Phone: 608-735-4711.

Talk with Mary Ruth, seitan maker at Traditional Foods. 1991. Nov. 25. The people who started the business named Traditional Foods, Bob and Cindy, started making and selling tempeh and tofu out of their home (located just outside of Gays Mills) in about 1984. They only sold the foods through their local co-op, The Kickapoo Exchange, in

the little rural town of Gays Mills. In April 1989 Traditional Foods was formally incorporated into a cooperative (a legal form of corporation in Wisconsin) with the same name. Bob and Cindy put up a sign at the local co-op (where Cindy was manager) inviting interested people to a meeting; a group of co-op members formed and began to have meetings. New people joined the group and new money was raised. Bob and Cindy became members of the cooperative (they did not sell any of their assets to the cooperative). Then, in Sept. 1989, the group found and bought a local commercial bakery named Wheat Heart Bakery, and moved the business out of Bob and Cindy's home into the bakery. The bakery contained some machinery that could be used for making seitan. Before this time, tempeh and tofu had been discontinued. Bob continued to work at the co-op one day a week making koji. They now make just one seitan product, frozen in a 10-ounce plastic container. Production is now about 240 lb/month (full capacity for their present equipment), but they have just gotten a grant for new equipment and hope to expand to 300 lb/month.

It is a struggle to make the business succeed. North Farm Cooperative is the major distributor for their little co-op in Gays Mills, which is located several hours from Madison, Wisconsin, the headquarters of North Farm. All members of Traditional Foods are members of the local co-op, which is a member of North Farm cooperative system. Traditional Foods also buys some its raw materials from North Farm. The company is now located in a bakery at P.O. Box 92 (Corner of Grove and North Railroad Streets), Gays Mills, WI 54631. Phone: 608-735-4711.

Talk with Cindy Wiar. 1991. Nov. 25 and 28, then 1992. Jan. 12. She and Bob started in about April 1984 making tofu at their home located on Route 1 outside of Gays Mills. They didn't have a phone, and they had no business name until the fall of 1986, when they started making tempeh and seitan. At that time they started calling their business "Traditional Foods" but it was not official or incorporated. Bob learned how to make seitan from cooking classes given by Cornelia Aihara, and Cindy learned from macrobiotic cookbooks. They started to make seitan for themselves and friends starting in about 1984 but they did not start to sell it until the fall of 1986, shortly after they started to sell tempeh. They produced only a small amount of seitan and sold it intermittently at one co-op in Madison, Wisconsin. Since they were already delivering their tempeh to this co-op, they figured they might as well also take in seitan. Seitan chunks were sold (without liquid) in a small heat-sealed plastic bag, inside another heat sealed plastic bag. They phased out tofu and tempeh in the summer of 1989, after the new cooperative had been formed, because of their very low profit margins and time pressures to make the more profitable seitan and miso—which were being sold to warehouses and larger places.

Cindy is no longer associated with Traditional Foods;

Bob works there 1 day a week making koji. After Bob passes on his knowledge of making koji, he plans to leave too. He now works the rest of the time on other people's farms. It was their dream to form a cooperative making these foods, but it didn't work out. The quality of the foods declined and the other members of the cooperative often just wanted a job, rather wanting to be owners of the business. There were endless problems and meetings. Cindy and Bob were put in a position of being the bosses, which they didn't want to be. By the summer of 1991 they realized they wanted to get out—but it still hurts.

Talk with Cheryl Coleman, one of the seitan makers at Traditional Foods, who lives in Gays Mills. 1992. Jan. 10. The company makes four 20-lb batches of seitan a day, 3 days a week, or 240 lb/week of seitan. The seitan is made entirely by hand and is the money maker for the business. They sell it in a 5-lb bulk bag inside a box, or in a 10 oz deli tub. The seitan is formed into small balls or buns by hand, pressed pretty tightly to expel the air, then cooked in a tamari and ginger broth.

Talk with Bob Mandel. 1992. Jan. 11. In the fall of 1986 he and Cindy started to make and sell seitan and tempeh from their home in Gays Mills. They also sold a little tempeh and seitan in Madison, which is a college town with a lot of health food stores. In Dec. 1988 there was meeting called to establish a co-op. In April 1989 they incorporated as a co-operative. In Aug. 1989 they purchased a commercial bakery. The original plan was to start making tempeh (to get initial cash flow) in the new building, and to develop a line of miso products. The first misos that were later sold started to be made in the fall of 1989. But the person who was supposed to make the tempeh was never able to—so they found themselves in a bind. Therefore in about Feb. 1990 they started to make seitan again. Real sales of the mellow miso and natto began in early 1990. To get things started, Traditional Foods sold their products to the co-ops in Madison. The co-ops asked North Farm Co-op (a natural foods wholesaler and distributor) to start distributing Traditional Foods products; North Farm became Traditional Foods' first distributor in Feb. 1990—distributing to co-ops, other retail stores, and buying clubs. Soon Blooming Prairie was also distributing Traditional Foods' products, especially west of the Mississippi to buying clubs. In Feb. 1990. Today the company makes seitan (packaged and in bulk) and 3 types of miso.

Crick Haltom and Great Lakes Grainfoods went out of business because of Blind Faith, a big restaurant in Chicago, not because of North Farm Co-op. Blind Faith features seitan on their menu and they use a lot of it. Blind Faith bought Crick's seitan through Rainbow, a non-co-op distributor in Chicago. But Blind Faith wanted to use Traditional Foods' seitan so Rainbow decided to distribute both brands. At that point Crick decided to stop making seitan.

Talk with Bob Ribbens, owner of Earth Fire Products

Co. (formerly Traditional Foods Cooperative). 1995. Nov. 1. Bob thinks that the date of Nov. 1986 is too early for seitan; he thinks the introduction date should be 1989. He never saw tempeh on sale in the community before 1989. In 1989 they decided to stop making tofu and tempeh commercially, and to switch to making seitan and miso.

6862. Hughes Markets. 1986. Merry Christmas! (Ad). *Los Angeles Times*. Dec. 21. p. I20-21.

• **Summary:** The section titled "Foods of the Orient holiday specials" includes: Kikkoman soy sauce, gallon can—\$4.99. Hinoichi age 1.5 oz pg. 79¢. Misuzu Koya Dofu 3.5 oz. box Wheat cake [sic, Dried frozen tofu]—\$1.55. Shirakiku kuro mame, Black [soy] beans—85¢.

Also includes: Frozen Umeya mochi. Fresh gobo. Shirakiku bamboo tips. Ozeki sake. Kokuho rice. Miyako kizami shoga—Sliced pickled ginger. Miyako shiitake—Dried mushrooms. Kezuka kampyo [kanpyo]—Dried gourd strip. Shehiro kombu maki—Rolled kelp [konbu].

6863. Belleme, Jan. 1986. The three flavors of Japanese cuisine: Dashi, shoyu, and mirin are the keys to this ancient culinary tradition. *East West*. Dec. p. 14, 16-21.

• **Summary:** With recipes.

6864. Gauger & Silva, Inc. 1986. San-J International (News release). 129 Hyde St., San Francisco, CA 94102. 2 p. Dec.

• **Summary:** San-J, the world's largest brewer of tamari, is implementing a comprehensive new marketing plan under the direction of John Perelman, Marketing Director and National Sales Manager. The products have a new image and look. Natural Foods Merchandiser awarded San-J a gold medal this year for their design. The new packaging is being supported by print advertising, shelf talkers, carton cards, and hangtags. The company will also be making shoyu in America, and introducing Szechuan Sauce. Address: San Francisco, California.

6865. Haytowitz, David B.; Matthews, Ruth H. 1986.

Composition of foods: Legumes and legume products. Raw, processed, prepared. *USDA Human Nutrition Information Service, Agriculture Handbook* No. 8-16. 156 p. Dec. See p. 126-152. By Nutrition Monitoring Division. [29 ref]

• **Summary:** Data are presented for 133 legumes and legume products. Of these, only 53 were included in *USDA Agriculture Handbook* No. 8, published in 1963. The following soy-based foods are included: Simulated meat products (bacon, meat extender, and sausage), raw soybeans, cooked boiled soybeans, roasted soybeans, dry-roasted soybeans, soybean products: miso, natto, tempeh, full-fat soy flour (raw, and roasted), defatted soy flour, low-fat soy flour, defatted raw soy meal, fluid soy milk, soy protein concentrate, soy protein isolate, soy sauce (shoyu, tamari, and HVP), raw tofu (firm {p. 147}, regular, dried-frozen/

koyadofu, and fried) [Note 1. Tofu is called “tofu” and at “Soybean curd” it says, see “tofu.” Note 2. Footnote 2 states that the calcium content of tofu curded with calcium sulfate is 683 mg/100 gm, compared with 205 mg/100 gm for tofu curded with nigari. As of May 1997 Soyfoods Center believes that both these values are far too high; the two figures should be about 159 mg/100 gm (range 128-168) and 45 mg/100 gm respectively], okara, salted and fermented tofu (fuyu).

For each food the following information and number of values are given: Vertically: Proximate (7 values), Minerals (9), Vitamins (9), Lipids (Fatty Acids [Saturated (9), Monounsaturated (5), Polyunsaturated (7)], Cholesterol, Phytosterols), Amino acids (18). Horizontally: Amount in 100 gm edible portion (mean, standard error, number of samples), amount in edible portion of common measures of food (e.g. ½ cup or 1 cup), amount in edible portion of 1 lb of food as purchased.

Minerals include calcium, iron, magnesium, phosphorous, potassium, sodium, zinc, copper, and manganese (not aluminum).

Vitamins include ascorbic acid, thiamin, riboflavin, niacin, pantothenic acid, vitamin B-6, folacin, vitamin B-12, vitamin A.

Amino acids include tryptophan, threonine, isoleucine, leucine, lysine, methionine, cystine, phenylalanine, tyrosine, valine, arginine, histidine, alanine, aspartic acid, glutamic acid, glycine, proline, and serine.

For Adzuki beans (raw, cooked boiled, canned sweetened, and Yokan {yōkan–sugar-sweetened confection}) see p. 24-27.

For peanuts (all types raw, cooked boiled, oil-roasted, dry-roasted, Spanish raw, Spanish oil-roasted, Valencia raw, Valencia oil-roasted, Virginia raw, Valencia oil-roasted) see p. 109-18. For peanut butter (chunk style, smooth style), defatted peanut, and low-fat peanut flour, see p. 119-22. Address: USDA Human Nutrition Information Service.

• **Summary:** A general review, including many fermented foods not containing soy. Address: Dep. of Agriculture, Tokyo Univ. of Agriculture.

6867. Yoshida, Shuji. 1986. Minzokugaku kara mita muen hakkô daizu to sono shûhen [The origin of non-salted fermented soybeans from the viewpoint of ethnology]. In: Kô Aida, et al. eds. 1986. Proceedings of the Asian Symposium on Non-Salted Soybean Fermentation. Japan: Takeshima Shigeru. 319 p. See p. 166-78. Held July 1985 at Tsukuba,

Japan. English-language summary in Symposium Abstracts, p. 62-62. [20 ref. Jap]

• **Summary:** “Two of the earliest kinds of fermented soybeans were *shì* and *dòu-jiàng*. The former antedates the latter, because *shì* can be traced to the Han Dynasty (206 BC-A.D. 200), whereas *dòu-jiàng* does not emerge until the description in *Qimin Yaoshu* (A.D. 536-550). Good descriptions of *shì* and *dòu-jiàng* are given in *Qimin Yaoshu*. *Shì* is made as follows: A yellow mold is permitted to grow on boiled beans, which are then washed and wetted, after which they are fermented in a cellar for 10-12 days. *Shì* was eaten as a condiment.

“However, *shì* as a food would have appeared prior to *shì* as a condiment. *Sake* which was made from grain through mold fermentation, was originally not for drinking, but rather for eating. Such a primitive *Sake* is still used in Yunnan. I suppose that a primitive *shì* also was eaten, and that the place of origin of *shì* was South China, according to the description in *Bencao Gangmu* (*shì* was commonly made in South China), and *Bówùzhì* (*shì* was exotic).

“*Dòu-jiàng*, which may have been first mentioned in *Bencao Gangmu* (1596), was a simple mold bean and was technologically more primitive than *shì*, although the existence of *dòu-jiàng* or a similar substance cannot be traced in the literature before *Qimin Yaoshu*. It seems that the first product of fermented beans would be *dòu-jiàng*, or a similar substance, and that its making would have been influenced by *sake* production. Later, *shì* as a food would have appeared and then *shì* as a condiment was produced, as we see from the *Qimin Yaoshu*.

“On the other hand, *dòu-jiàng* was developed from *ròu-jiàng*, preserved meat... *Natto*, *kinema* and *tempeh* would be identified as a substance similar to *dòu-jiàng*, which was a primitive fermented soybean product. Boiled beans became *dòu-jiàng* if they were covered by *Imperata cylindrica* grass, *kinema* if covered by certain leaves, *tempeh* if covered by leaves of *Hibiscus tiliaceus* or banana leaves, and *natto* if covered by rice straw.

“We know that various kinds of plants are used for making *sake* or mold bran. The species used varies by place. Fermented soybeans occur within the *sake*-making area and only at the margin of the distribution. That means several new fermented soybean products like *shì* and *dòu-jiàng* were made in the center of the fermented soybean distribution, and the area gradually expanded toward the margins. They were accepted in areas close to the center, but the most primitive forms would have remained only in the marginal places, where new ones were not accepted.”

A large chart (p. 169) shows the relatives and development of fermented black soybeans (*shì*); it includes the names of various unsalted fermented soyfoods and soy condiments (with their geographical area in parentheses). Relatives (fermented soyfoods made from yellow soybeans): Akuni (Sema Naga, in the Himalayas in northeast India),

kinema (Limbu, in eastern Nepal), pe-bout (Shan, in eastern Burma), itohiki natto (Japan), and tempeh (Indonesia). Stage 1. Itohiki natto became Chon Kujjang [perhaps *chungkuk jang*, Korean-style natto] of the Zhanguo Warring States period (475-221 BC) in China. Stage 2A: Unsalted fermented black soybeans were originally used as a food, rather than as a seasoning. To these unsalted fermented black soybeans, koji was added to create homemade unsalted fermented black soybeans (*doushi*, of China), Stage 2B: Salt was added to the unsalted fermented black soybeans to make various salted foods (each with a firm texture like raisins): Daitokuji natto (Japan; with wheat flour added), *pe-ngapi* (upper Burma), and *seang* (Cambodia). Stage 3. Unsalted fermented black soybeans (*doushi*) developed into closely related danshi. Koji was added to danshi to make *rul-kre* (of Bhutan). Cooked soybeans were shaped into balls and fermented naturally to make miso-dama ("unsalted miso balls" [meju], Korea and Japan). Then salt was added to the miso-dama to make various seasonings (each with a consistency like applesauce or paste / miso): Korean soybean jang (*doen jang*), Korean soy sauce (*kan jang*), or soybean miso (*mamé miso*, Hatcho miso, Japan). Stage 4. Salt was added to unsalted fermented black soybeans (*shi*) to make salted fermented black soybeans, from which developed inyu (a fermented soy sauce made with black soy beans, in Taiwan), *inshi* (meaning unclear, of Taiwan), and taucho (*tauco*, of Indonesia). Stage 5. Koji was added to salted fermented black soybeans to make *shi* for food use, and *doushi* (of Sichuan, China). Stage 6. Flour was added to salted fermented black soybeans to make red pepper jang (*kochu jang*, Korea) and spicy fermented black soybeans (*doubanshi*, China).

Note: This chart may be easier to understand when viewed in chart form, however the logic and some of the products seem a bit unclear. It is also unclear which products are fermented with bacteria (like natto). Soyfoods Center has an English-language translation of this chart. Address: National Museum of Ethnology, Osaka (Kokuritsu Minzokugaku Hakubutsukan).

6869. **Product Name:** [Hydrolyzed Vegetable Protein {HVP}].
Manufacturer's Name: Champlain Industries Ltd.
Manufacturer's Address: 176 Principal Rd., Stanbridge Station, QUE, Canada. Main office: Mississauga, ONT, Canada.
Date of Introduction: 1986.
New Product–Documentation: Soya Bluebook. 1986. p.

89.

6870. **Product Name:** Full of Beans Soy Sauce.
Manufacturer's Name: Full of Beans Soyfoods.
Manufacturer's Address: 96-97 High St., Lewes, East Sussex, BN7 1XH, England.
Date of Introduction: 1986.
New Product–Documentation: Soya Bluebook. 1986. p. 105; 1987. p. 94. Another address: Castle Precincts, Castle Ditch Lane, Lewes.

6871. **Product Name:** Tofu Dill Salad Dressing.
Manufacturer's Name: Golden Soy Foods Inc.
Manufacturer's Address: P.O. Box 495, Athens, OH 45701.
Date of Introduction: 1986.
Ingredients: Tofu, soy oil, vinegar, shoyu, water, honey, dill, onion powder, black pepper, garlic powder.
Wt/Vol., Packaging, Price: 1 pint glass jar.
How Stored: Shelf stable; refrigerate after opening.
Nutrition: Per tablespoon (17 gm): Calories 40, protein 1 gm, carbohydrates < 1 gm, fat 4 gm, sodium 135 mg.
New Product–Documentation: Label. 1987. 10 by 2.5 inches. Blue, green, yellow, and white. "Dairy and Cholesterol Free. Delicious Dip for Vegetables or Chips. All Natural. Low Sodium." News release. This was apparently the company's first product.

6872. **Product Name:** HVP, and Luxor (Hydrolyzed Vegetable Proteins).
Manufacturer's Name: Hercules Inc., PFW Div.
Manufacturer's Address: 33 Sprague Ave., Middletown, NY 10940. Other location: Harbor Beach, Michigan.
Date of Introduction: 1986.
New Product–Documentation: Soya Bluebook. 1986. p. 89. Note that this company is in the same town as Mandarin Soy Sauce Inc.

6873. Hosotani, K.; Mori, M. 1986. [Propionic acid contents in foods]. *Nippon Eiyo Shokuryo Gakkaishi (J. of the Japanese Society of Nutrition and Food Science)* 39(3):231-33. [6 ref. Jap; eng]*

• **Summary:** Webster's Dictionary defines propionic acid (a term first used in 1850) as "a liquid sharp-odored fatty acid $C_3H_6O_2$ found in milk and distillates of wood, coal, and petroleum." It is also produced as a metabolite of microorganisms. The propionic acid content of miso was 2-5 mg/kg and of soy sauce was 2.7-6.0 mg/kg. This compared with 5-9 mg/kg for dairy milk. Address: Dep. of Home Economics, Wakayama Univ., Wakayama 640, Japan.

6874. **Product Name:** [Tofu Burger, Tofu Felafel, and Tofu Schnitzel].
Manufacturer's Name: Jerusalem Tofu.

Manufacturer's Address: Moshav Orah, Jerusalem 90880, Israel. Phone: 02-413-809.

Date of Introduction: 1986.

New Product–Documentation: Talk with Susan Ergas. 1989. May 1. The products were introduced in the order shown above. The Tofu Schnitzel was made from frozen tofu, but it was discontinued because she couldn't get kosher soy sauce that satisfied the rabbi.

6875. **Product Name:** [Lima Tempeh in Shoyu].

Foreign Name: Lima Tempeh Shoyu.

Manufacturer's Name: Lima Foods (Marketer). Made from Tempeh made in Belgium by Jonathan.

Manufacturer's Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

Date of Introduction: 1986.

Ingredients: Tempeh-Shoyu: Organically grown soybeans, water, and tempeh culture-starter. Packed in water with shoyu and herbs.

Wt/Vol., Packaging, Price: 200 gm of product in a 340 gm glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Leaflet. 1986. Lima Natural Gourmet Recipes from Europe. Contains a color photo of all products. Label reads: "Tempeh in soy sauce with ..." Eden Foods catalog. 1987. Nov. p. 18. "Lima tempeh is a Flemish country version of the traditional Indonesian delicacy."

Lima catalogue, price list, and color product brochure. 1989. Shows a color photo of a 200 gm jar labeled Tempeh.

Label sent by Anthony Marrese. 1990. March 22. 7.75 by 2.25 inches. Light green, orange brown, and dark brown on beige. CINAB organic certification symbol. Nature et Progres organic certification symbol. "Fermentation of organically grown soybeans. Use: Baked or fried, with vegetables, whole rice, spaghetti, in soup or on pizza. The black spots are due to the natural fermentation."

6876. **Product Name:** [Lima Tempeh].

Foreign Name: Lima Tempeh Nature.

Manufacturer's Name: Lima Foods (Marketer). Made in Belgium by Jonathan.

Manufacturer's Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

Date of Introduction: 1986.

Ingredients: Organically grown soybeans, and tempeh culture-starter.

Wt/Vol., Packaging, Price: 200 gm / 7 oz glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Leaflet. 1986. Lima Natural Gourmet Recipes from Europe. Contains a color photo of all products. Label reads: "Tempeh in soy sauce with ..." Eden Foods catalog. 1987. Nov. p. 18. "Lima tempeh is a Flemish country version of the traditional Indonesian delicacy."

Lima catalogue, price list, and color product brochure.

1989. Shows a color photo of a 200 gm jar labeled Tempeh.

6877. **Product Name:** Soysage. A Spicy Vegetarian Soy Pate.

Manufacturer's Name: Local Tofu.

Manufacturer's Address: 307 Route 59, West Nyack, NY 10994. Phone: 914-358-2309.

Date of Introduction: 1986.

Ingredients: Soy pulp and soymilk from farm verified organically grown soybeans, whole cornmeal, whole wheat flour, nutritional yeast, wheat germ, safflower oil, tamari sauce, herbs and spices.

Wt/Vol., Packaging, Price: 16 oz.

How Stored: Refrigerated.

New Product–Documentation: Talk with Sam Weinreb. 1987. Dec. 29. Label. 1987. 3.25 inch diameter. Orange or red and blue. "Mold into non-meat balls, scramble with eggs, slice-heat-eat, pre-cooked, refrigerate or freeze, spread on bread, use in lasagna, sprinkle on pizza." Sam learned this from a Scotch tofu maker, Sian McLean, in Nova Scotia, Canada.

6878. *Marches Exterieurs de Divers Produits*

Alimentaires. 1986. Grande Bretagne: Le marché des sauces en bocaux en 1985 [Great Britain: The market for bottled sauces in 1985]. No. 8-9. p. 23-27. [Fre]*

• **Summary:** A study of the rate of consumption of various table sauces (including ketchup, brown sauce, and soy sauce), condiment sauces (mustard), salad dressings, and sweetened sauces.

6879. **Product Name:** Soy Sauce.

Manufacturer's Name: Mata Food Industries Ltd. Subsidiary of Koor Foods Ltd.

Manufacturer's Address: P.O. Box 160, Hadera, Israel.

Date of Introduction: 1986.

New Product–Documentation: Soya Bluebook. 1986. p. 105.

6880. **Product Name:** [Marinated Tempeh Cutlets].

Foreign Name: Tempeh Bratling Mariniert.

Manufacturer's Name: Natuerliche Lebensmittel. Paul Stuart Zacharowicz.

Manufacturer's Address: Staudgasse 70, A-1180 Vienna, Austria. Phone: 0222/48 50 03.

Date of Introduction: 1986.

Ingredients: Fried (gebratenes) tempeh marinated in soy sauce, spices/seasonings.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 5.5 x 4 inches. Black, gold, and red on white card stock. "Keep refrigerated. Can also be frozen. Tempeh cutlets are ready to serve (tellerfertig), cold as a snack or warm as a main course. Contains no chemical colorings or preservatives."

6881. **Product Name:** [Marinated Soy Tempeh].

Foreign Name: Soja Tempeh Mariniert.

Manufacturer's Name: Natuerliche Lebensmittel. Paul Stuart Zacharowicz.

Manufacturer's Address: Staudgasse 70, A-1180 Vienna, Austria. Phone: 0222/48 50 03.

Date of Introduction: 1986.

Ingredients: Tempeh marinated in soy sauce.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 5.5 x 4 inches. Black, gold, and red on white card stock. "Keep refrigerated. Can also be frozen. Marinated tempeh is well suited for frying, baking, steaming, smoking, or grilling. Tastes excellent with vegetable and grains, or cold on bread. Contains no chemical colorings or preservatives."

6882. **Product Name:** Noble Bean Tempeh Chili.

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: 18320 Euclid Ave., Cleveland, OH 44112.

Date of Introduction: 1986.

Ingredients: Tempeh, tomato sauce, kidney beans, water, tomatoes, whole wheat flour, onion, green pepper, tamari, sesame oil, parsley, garlic, spices.

Wt/Vol., Packaging, Price: 16 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 4.25 inches diameter, self adhesive. Blue, green, yellow, and red on white, with logo of Jack and the Beanstalk. "No Cholesterol." Jeff Narten. 1987. "History of North Coast Tempeh and its Products." 4 p. Dec. 7.

6883. **Product Name:** Noble Bean Swedish Tempeh Balls.

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: 18320 Euclid Ave., Cleveland, OH 44112.

Date of Introduction: 1986.

Ingredients: Tempeh, whole wheat flour, vegetable soup stock, soymilk, corn oil, onion, tamari, parsley, spices.

Wt/Vol., Packaging, Price: 16 oz.

New Product–Documentation: Label. 1987. Ink stamp. Jeff Narten. 1987. "History of North Coast Tempeh and its Products." 4 p. Dec. 7.

6884. **Product Name:** Soy Sauces: Yamaki Organic Nama Shoyu (aged 4 years and unpasteurized), Yamaki Organic Two Year Shoyu, Lima Natural Shoyu and Tamari, Suyamo Sweet Shoyu and Tamari, Koji (Brown Rice, White Rice, or Barley).

Manufacturer's Name: Ohsawa America (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 3608, Chico, CA 95927.

Date of Introduction: 1986.

6886. **Product Name:** The Soy Deli Baked Savory Tofu.

Renamed Savory Baked Tofu by 1999.

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1986.

Ingredients: Water, organic soybeans (grown in accordance with California Health and Safety Code 26569-11), tamari soy sauce (water, soybeans, wheat, salt), spices, magnesium chloride (nigari, a natural mineral).

Wt/Vol., Packaging, Price: 7 oz vacuum packed.

How Stored: Refrigerated.

Nutrition: Per 3.5 oz.: Calories 193, protein 23 gm, carbohydrate 5 gm, fat 9 gm.

New Product–Documentation: Leaflet. 1986. 8½ by 11 inches, color. "There is Quality & Variety after 80!" Shows all products. Label. 1986? 5 by 3 inches. Self adhesive. Brown and orange on beige. The Soy Deli brand. "High in complete protein. No cholesterol."

Product (Savory Baked Tofu) with Label purchased at Safeway supermarket in Lafayette, California. 2000. April 16. The 6 oz vacuum pack retails for \$3.49. Label (copyright 1999) is orange, green, and black on white. Front panel: "Hand crafted by tofumasters since 1906. All

natural. Risk of Heart Disease may be reduced with a daily diet low in saturated fat and cholesterol, containing 25 gm of soy protein. This product contains 25 gm of soy protein per serving. Made with organic soybeans.” Top of back panel: “50 mg of isoflavones per serving.” Main ingredients: Nigari tofu (Water, whole organic soybeans*, magnesium chloride**), tamari (water, soybeans, salt, alcohol, wheat), spices, granulated garlic, granulated onion. * = Grown and processed in accordance with the California Organic Foods Act of 1990. ** Nigari, a natural component of sea water, primarily magnesium chloride.

6887. Product Name: The Soy Deli Baked Five-Spice Tofu.

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1986.

Ingredients: Water, organic soybeans, tamari soy sauce (water, soybeans, wheat, salt), spices, magnesium chloride (nigari, a natural mineral).

Wt/Vol., Packaging, Price: 7 oz, vacuum packed.

How Stored: Refrigerated.

Nutrition: Per 3.5 oz.: Calories 193, protein 23 gm, carbohydrate 5 gm, fat 9 gm.

New Product–Documentation: Leaflet. 1986. 8½ by 11 inches, color. “There is Quality & Variety after 80!” Shows all products. Label. 1986? 5 by 3 inches. Self adhesive. Brown and dark blue on beige. The Soy Deli brand. “High in complete protein. No cholesterol.”

Product with Label purchased at Open Sesame in Lafayette, California. 1995. March 11. Now 6 oz. “Low fat. Cholesterol free. High in complete protein.”

6888. Sasahara, H.; Ando, T. 1986. [Studies on lactic acid bacteria in soy sauce. I. Screening of lactic acid bacteria in soy sauce mash]. *Kagawa Prefectural Fermentation and Food Experiment Station, Annual Report No. 79*. p. 1-6. [18 ref. Jap]*

• **Summary:** *Pediococci* were among the lactic acid bacteria screened. Address: Kagawa Prefectural Fermentation and Food Experiment Station, Kagawa, Japan.

6889. Product Name: Seitan Wheat Meat Pieces.

Manufacturer's Name: Sheffield Seitan.

Manufacturer's Address: South Wheelock, Vermont.

Date of Introduction: 1986.

Ingredients: Seitan (wheat gluten cooked in a broth of soy sauce, garlic powder, and cayenne).

Wt/Vol., Packaging, Price: 1 lb+.

How Stored: Frozen.

New Product–Documentation: Talk with Leo Denby, owner of Sheffield Seitan. 1998. Feb. 3. These are 3-ounce patties which have been cut into finger strips. Also includes scraps.

6890. Product Name: Bar-B-Q Tempeh Burgers.

Manufacturer's Name: Southwest Soy Foods.

Manufacturer's Address: 2889 Trades West Rd., Santa Fe, NM 87501. Phone: 505-471-8979.

Date of Introduction: 1986.

Ingredients: Tempeh (pulp [okara] from organically grown soybeans, rolled oats, bulghur, sunflower seeds, vinegar, *Rhizopus oligosporus* culture), water, tomato paste, molasses, tamari (water, soybeans, salt), vinegar, safflower oil, herbs, spices, natural smoke flavor.

Wt/Vol., Packaging, Price: 10 oz.

How Stored: Frozen or refrigerated.

New Product–Documentation: Talk with Richard Jennings of Southwest Soyfoods. 1990. Aug. 2. This was an unfried, square tempeh burger, launched in about 1986, and marinated in a barbecue sauce. The tempeh was fermented in trays. Richard made a roll with many spikes protruding (sort of like a lawn aerator), which he would roll across the tempeh to perforate it in many places to facilitate absorption of the thick marinade. After being marinated, it was baked, cut, packaged, and frozen. It was introduced at the same time as Sloppy Mo; the broken pieces and scrap tempeh from the burgers were used in the Sloppy Mo/Jo.

6891. Sung, S.K.; Lee, C.M.; Young, J.D.; Chen, C.N. 1986. High levels of tyramine in some Chinese foodstuffs. *Human Psychopharmacology* 1(2):103-07. [17 ref]*

• **Summary:** Tyramine was assayed by high pressure liquid chromatography (HPLC) in 9 common Chinese foods including soy sauce, fermented soybean, fermented bean curd, red fermented bean curd, chili soybean paste, soybean paste, and preserved vegetables. Contents were highest in fermented soybean and fermented bean curd. Results are discussed in terms of hypertensive risk for patients taking monoamine oxidase inhibitors.

Note: *Webster's Dictionary* defines tyramine (derived from tyrosine + amine) as “a phenolic amine $C_8H_{11}NO$ that has a sympathomimetic action and is derived from tyrosine.” It defines sympathomimetic as “simulating sympathetic nervous action in physiological effect.” Address: Dep. of Psychiatry, Chinese Univ. of Hong Kong, Shatin, N.T., Hong Kong.

Reduction of severity of heat sterilization as affecting shoyu pickles]. *Aichi-ken Shokuhin Kogyo Shikenjo Nenpo (Annual Reports of the Food Research Institute, Aichi Prefecture)* No. 27. p. 74-77. [Jap]*

Address: Food Research Inst. of Aichi Prefecture Government, Aichi, Japan.

6893. Product Name: [Tofu Curry Pâté, Tamari Pâté, and

Walnut/Prune Pâté, Smoked Tofu].

Foreign Name: Karry Paté, Tamari Paté, Valnoed/Sveske Paté.

Manufacturer's Name: Thomas Tempeh.

Manufacturer's Address: Soendergade 2, DK-4340 Toelloese, Denmark.

Date of Introduction: 1986.

New Product–Documentation: Talk with Thomas Andersen, founder of Thomas Tempeh. 1990. May 24. On 1 Jan. 1986 he moved the business to Soendergade 2 in the city of Toelloese, Denmark. The business was still named Thomas Tempeh. He quickly added Tofu Pâtés and Smoked Tofu to his product line.

6894. **Product Name:** Westbrae Natural Shoyu. Traditional Soy Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Water, whole soybeans, whole wheat, salt.

Wt/Vol., Packaging, Price: 16 fluid oz (437 ml), 32 fluid oz (.95 L).

How Stored: Store in a cool, dark place.

New Product–Documentation: Label. 1986, undated. 8 by 3.5 inches. 10 by 4.5 inches (32 fl oz). Paper. Orange, blue, brown, yellow, green, white. "Formerly Known as 'Tamari.' The words 'tamari,' 'shoyu' (sho-yu), and 'soy sauce' are often used to describe the same product." Gives a brief history of tamari, shoyu, and modern soy sauce.

6895. **Product Name:** Westbrae Natural Organic Shoyu. Naturally Brewed Soy Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Well water, organically grown whole soybeans, organically grown whole-wheat, sea salt.

Wt/Vol., Packaging, Price: 16 fluid oz (1 pint), 473 ml.

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 8 by 3.5 inches. Paper. Black, gold, orange, green, yellow, white. Japanese village, Mt. Fuji in background. "Westbrae Natural Organic Shoyu is produced exclusively by a religious community in Japan, who apply the strictest standards of quality to every aspect of its manufacture. Aged for 2 summers in cedar wood barrels, it literally is hand-made in very limited quantities, according to the most traditional methods, using pure well water and sun-evaporated sea salt..."

6896. **Product Name:** Westbrae Natural Tofu Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Johsen Shoyu (water, soybeans, wheat, salt), malt syrup (corn, sprouted barley, water), cider vinegar, honey, sesame oil, natural gum stabilizers (tragacanth, xanthan), ginger, cayenne.

Wt/Vol., Packaging, Price: 12.7 fluid oz (375 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 5 by 3.5 inches. Paper. Brown, tan, blue, green, black and white. Mt. Fuji logo illustration. Meant to be used as a seasoning for tofu.

6897. **Product Name:** Westbrae Natural Traditional Tamari

Soy Sauce.

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Whole soybeans (57%), water (28%), sea salt (12%), mirin (2%), koji (cultured barley flour) less than one percent.

Wt/Vol., Packaging, Price: 5 fluid oz (147 ml), 16 fluid oz (1 pint, 437 ml), or 32 fluid oz (1 quart, 946 ml). Glass bottles.

How Stored: Shelf stable.

Nutrition: Per 1 tbs.: Calories 18, protein 2 gm, carbohydrate 2 gm, fat 0 gm.

New Product–Documentation: Label. 1986, undated. 6.75 by 3.75 inches (5 fl oz). 8 by 3.5 inches (16 fl oz). 10 by 4.5 inches (32 fl oz). Paper. Blue, green, red, tan, white. Mt. Fuji logo illustration. "Wheat Free. Deep, Rich Flavor." Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center.

6898. **Product Name:** Westbrae Natural Organic Tamari (Wheat Free Soy Sauce with Mirin).

Manufacturer's Name: Westbrae Natural Foods (Importer). Made in Japan.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1986.

Ingredients: Organic tamari (organically grown whole soybeans, water, sea salt), mirin (cultured rice, water).

Wt/Vol., Packaging, Price: 5 fluid oz (147 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1986, undated. 6.5

by 3.5 inches. Paper. Gold, yellow, blue, green, orange, white. Mt. Fuji logo illustration. "For Sushi. Deeper... darker... richer taste than regular soy sauce. Perfect for dipping sushi... bring it to your favorite sushi bar. Wheat free... aged in cedar kegs for over 1 year."

6899. **Product Name:** Teriyaki Baked Tofu (Organic).

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1986.

Ingredients: 1998: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride, a natural firming agent}), soy sauce, rice vinegar, tomato paste, rice wine, fruitrim (fruit juice, natural grain dextrins), brown rice syrup, garlic ginger, garlic powder, safflower oil, ginger powder, arrowroot.

Wt/Vol., Packaging, Price: 6.0 oz. Retail for \$1.99.

How Stored: Refrigerated.

New Product–Documentation: Wildwood Natural Foods price list. 1995. Jan. 9.

Original Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1989.

6900. Bickerton, Leonard Marshall. 1986. Eighteenth century English drinking glasses: An illustrated guide. 2nd rev. ed. Woodbridge, Suffolk, England: Antique Collectors' Club. 431 p. Illust. [883* ref]

• **Summary:** Contains hundreds of beautiful photographs, and excellent history of drinking glasses, plus a superb bibliography and index. The antique collectors club was founded in 1966 and quickly grew to a 5 figure membership

worldwide. It publishes *Antique Collecting* magazine. Website: www.antiquecc.com. Address: [England].

6901. Bray, Francesca. 1986. *The rice economies: technology and development in Asian societies*. Oxford, UK; New York, NY: Blackwell. xvii + 254 p. Illust. Maps. Index. 24 cm. Reissued in 1994 by University of California Press. [372* ref]

• **Summary:** The methodology of European history has been profoundly influenced by the growth of capitalism, but it is doubtful if this same methodology can be applied to other parts of the world.

Rice is the staple food of almost half the world's population, second only to wheat in importance.

Traditionally the poor of Asia garnished their rice with soy products, fish sauce and vegetables, to make a healthy but inexpensive diet (p. 13).

Rice fields generally planted with a second crop (such as soybeans) generally give higher yields each season than those which are merely single-cropped—thanks to the additional added nitrogen or additional plowing. In Northern Thailand, for example, landowners will often lend their rice fields in the dry season to landless peasants to grow soybeans of groundnuts (p. 16).

"The cultivation of two crops of rice followed by third crop of maize, potatoes, soy, tobacco or vegetables is now widespread in Taiwan."

In 1977 in the People's Republic of China, 45% of the total food grain production was rice and 14% was wheat. "The total figure also includes coarse grains such as millets, sorghum and barley, soybeans, tubers and maize, some of which would be used as animal feed rather than directly for human consumption" (p. 218).

6902. Chang, Wonona W.; Chang, Irving B.; Kutscher, Austin H.; Kutscher, Lillian G. 1986. *Chinese dessert, dim sum & snack cookbook*. New York, NY: Sterling Publishing Co., Inc. 160 p. Illust. (color photos). Index. 26 cm.

• **Summary:** "Many of the dessert recipes in this book have been prized as family treasures for generations and are authentic; others have been adapted to the Chinese cuisine by the addition of oriental ingredients..." (p. 7).

The "Guide to ingredients" has interesting entries for "Bean curd or tofu (*dow foo*)" and "Bean filling, sweet (*Cantonese: dow sa*) (*Mandarin: do sa*)" ("Color: red {kidney beans [azuki]}, green {mung beans}. Available form: canned. When available: most commonly at Chinese New Year. Where purchased: Chinese bakery or grocery," p. 13), and for "Hoisin sauce (Red seasoning sauce) (*hoy sin joing*) (*hai hsien jiang*)" (p. 16).

Desserts: Doughnut slices with Chinese flavors (with "sweet bean paste" [probably *an*], made with azuki beans, p. 33). Glutinous (sweet) rice cake (with "1 lb. black bean paste (*dow sa*)", p. 33). Fried bean paste pancake (with "4 oz. bean

paste," p. 40). Lychee peach tofu cooler (with "8 oz. tofu," p. 56). Soybean milk (homemade recipe with "1 cup soybeans," p. 58). Red bean paste ice cream (with "1 cup sweetened red bean paste" [azuki], p. 64). Lychee tofu custard (with "8 oz. tofu," p. 91). Strawberry tofu pudding (with "6 oz. chilled tofu," p. 91). Peach tofu custard (with "8 oz. tofu," p. 93). Mandarin oranges with tofu (with "6 oz. Chinese-style tofu," p. 93). Ginger sweet red bean dessert / spread (with "½ cup sweet bean paste" [azuki], p. 106). Orange tofu icing (with "12 oz. tofu," p. 107). Sweet red bean dessert sauce (with "½ cup sweetened red bean paste" [azuki], p. 110).

Dim sum and snacks: New Year dumplings with sweet black bean paste (with "½ cup sweet black bean paste (*dow sa*)", p. 113). Bean paste sesame balls (with "sweet black bean paste," p. 118). Dow sa won ton ("Prepare the same as Fried Won Tons {p. 139} except use *dow sa* (black bean paste) as a filling... Dow sa is available at Chinese bakery shops, p. 140).

About the authors (p. 146). Address: 1-2. Morristown, New Jersey; 3-4. Scarsdale, New York.

6903. Chiao, J.S. 1986. Modernization of traditional Chinese fermented foods and beverages. *Mycologia Memoir* No. 11. p. 37-53. Chap. 3. (C.W. Hesseltine and Hwa L. Wang, eds. *Indigenous Fermented Food of Non-Western Origin*. Berlin & Stuttgart: J. Cramer). [22 ref]

• **Summary:** Published in 1981 in *Advances in Biotechnology* 2:511-16. Contents: Introduction. Varieties of traditional Chinese fermented foods and beverages: Soy products include: Soy sauce (4-6 month fermentation), soy sauce by Gun-tou method (no wheat is used, 1 year fermentation, new batch concentrated for 1-2 months under the sun), soy paste, sufu, red sufu (with qu = chu = Chinese-style koji added), tou-si (made from black soybeans and salt, fermented with *Aspergillus oryzae* for 10-12 days). There are also many white spirit fermentations. "Wine was made in China as far back as 4,000 years, and white spirits made their appearance in the 13th century. Li-shi-zheng of the Ming Dynasty gave a description of the distillation process in detail in his famous Ben-Chao-Gong-Mu. Nowadays the alcohol content ranges from 40-65%.

In 1970 the San-jia Starch Factory in I-Chang, Hupeh, used liquid proteinase for a new soy sauce process using the waste water from starch processing, thus simplifying the ordinary soy sauce process. But this product was inferior in color, taste, and flavor to regular soy sauce made by a solid substrate fermentation. In 1976 and 1979 the Experimental Plant of the Shanghai Grain and Oil Industry Co., by selecting mutant strains of *Aspergillus oryzae* having high proteinase potency, was able to get an improved soy sauce (though still not as flavorful as regular soy sauce) using the liquid proteinase process. A flowchart of this soy sauce is shown. Address: Dep. of Microbiology, Shanghai Inst. of Plant Physiology, Academia Sinica, Shanghai, China.

6904. Colbin, Annemarie. 1986. *Food and healing*. New York, NY: Ballantine Books. 351 p. Foreword by Robert S. Mendelsohn, M.D. Index. 23 cm. [207* ref]

• **Summary:** A very interesting, wholistic look at food trips and philosophies—with a preference for macrobiotics. Discusses miso, natto, tempeh, and tofu. Pages 169-72 discuss beans, including soybeans. Beans are said to be contractive, acid-forming, warming, and a buildup food. “Folklore has it that appreciable quantities of soybeans and their products, especially tofu, can lower, or cool, sexual energy. Research done at the universities of Illinois and Kansas has shown that soybeans may interfere with the absorption of zinc. As zinc is one of the minerals most strongly associated with the healthy functioning of the sex glands, this bit of folk wisdom appears realistic.”

Chapter 12, titled “Food as Medicine,” discusses healing foods and tells how to prepare them, including miso soup (p. 253; contractive, alkalinizing, warming, breakdown). Miso soup is considered a good food to help cure the common cold, to neutralize the negative effects of excess sugar consumption, and to combat problems of inflammation of the digestive tract (ulcers, colitis, spastic colon, etc.); ulcers are problems of excess acidity.

Chapter 14, titled “The Effects of Food on Sex,” notes that “Scientific studies have found that individual foodstuffs have an effect on sexuality via their chemical constituents... soybeans (including tofu) contain traces of antithyroid factors; as the thyroid regulates sexual desire, activity, and fertility, when consumed in large enough quantities these foods could possibly inhibit sexuality by lowering thyroid energy. Oriental folk rumor, which I’ve been unable to verify, has it that tofu ‘cools the sex organs’ and is used by monks for the specific purpose of aiding them in maintaining celibacy. In this light, it’s interesting to note that the traditional Japanese diet, high in thyroid-depressing soybean products, also contains appreciable amounts of seaweeds, rich in thyroid-stimulating iodine.”

In the Foreword, Dr. Mendelsohn writes: “Coming from a background of modern medicine, I, as well as hundreds of thousands of other M.D.s, was carefully educated in nutritional ignorance—indeed in disdain for food. The hospital ‘dietician’ was not—and is not even today—a teacher of physicians. The dietician’s traditional purpose in life has always been to serve as a ‘referral’ for a patient who bothered the physician with too many questions about food. The very title of this book *Food and Healing* represents a joining of two concepts that most doctors regard as unrelated.”

A photo (p. 351) shows Annemarie, who was born in Holland and brought up in Argentina on a European vegetarian diet. After her arrival in the United States in 1961, she was introduced to macrobiotics. She lives in New York City with her two daughters, and directs the Natural Gourmet

Cookery School there. Address: 365 West End Ave., New York City, NY 10024. Phone: 212-580-7121.

6905. Committee for Soybean (The). 1986. *The Philippines recommends for soybeans*. Los Baños, Laguna, Philippines: Philippine Council for Agriculture and Resources Research and Development. 111 p. Technical Bulletin Series No. 14A. Revision of 1976 edition. [51 ref. Eng]

• **Summary:** Written by The Soybean Committee (Dr. Florendo C. Quebral, a plant pathologist at UPLB, chairman), this work focuses on recent technologies for soybean production. A foreword by Ramon V. Valmayor, Executive Director of PCARRD, notes: “The importance of soybean has been stressed continuously. To encourage its widespread production, the Ministry of Agriculture and Food (MAF) launched the Soybean Production Program in Mindanao. Likewise, PCARRD initiated and coordinated the implementation of Soybean Pilot Production Project in 1983 to demonstrate the feasibility of growing soybean profitably in Luzon.”

Contents: Foreword. Acknowledgments. The Soybean Committee. Introduction. Production management. Marketing. Soybean cropping system. Crop protection. Seed production. Processing and utilization: Raw materials for industry, soybean as food. References. Appendixes. List of tables. Lists of figures.

Table 1 shows soybean production in the Philippines from 1974 to 1985. Area in hectares grew from 2,780 ha in 1974 to a peak of 11,250 ha in 1976 and was 8,479 ha in 1985. Production grew from 2,214 tonnes in 1974 to a peak of 11,466 tonnes in 1982 and was 8,430 tonnes in 1985. Yield grew from 0.80 tonnes/ha in 1974 to a peak of 1.05 in 1982 and was 0.99 in 1985. Local production does not begin to supply local demand. In 1984 380,691 tonnes of soybeans and products were imported. Most of the imports were soybean meal.

Table 2 shows imports and exports of tausi (salted, fermented soybeans), oil cake (huge imports), soy sauce (large exports), soy oil (refined; large imports), soybean paste, tahu (soymilk curds, often sold topped with a little brown sugar), bean cheese (tokwa [tofu]), hypoallergenic soy food, crude soy oil. Page 50 shows all current uses of soybeans in the Philippines, and p. 51 gives the nutritional composition of Philippine soyfoods. Note the terms Geerligs cheese (Tahu; 92.7% moisture and 2.9% protein), Soybean curd (Tahuri; 61.3% moisture and 11.4% protein), Fermented soybean cheese (Tausi; 51.5% moisture and 13.8% protein), and Soybean cheese (Tokwa; 77.0% moisture and 12.9% protein).

Recipes are given for preparing soy sauce, miso, tahu (soymilk curds), tokwa (soybean cheese, or firm tofu), tao-si (salted, fermented soybeans [fermented black soybeans]), soybean milk, and soybean coffee. Descriptions are given for sufu, tempeh, soy flour and grits, soy protein concentrates

and isolates.

Note: In the section on nutritional composition, two words are incorrectly defined. The term “Tahuri” actually refers to tofu in brine, and “tausi” refers to salted, fermented soybeans. Address: PCARR.

6906. Frost, G.M. 1986. Commercial production of enzymes. *Developments in Food Proteins* 4:57-134. Chap. 3. (B.J.F. Hudson, ed. London and Englewood, New Jersey: Applied Science Publishers). [197* ref]

• **Summary:** The production of isolated enzymes on an industrial scale began less than 100 years ago. However the action of enzymes (fermentation) for changing and preserving foods has been exploited for thousands of years. Many traditional fermentations involve digestion by extracellular enzymes prior to fermentation by whole organisms. Enzymes are sold mainly to the food, beverage, and detergent industries. The present world market is valued at approximately £200 million. Most applications now involve hydrolytic enzymes, but future growth of other types seems probable. Most commercial enzymes are made by submerged cultivation of highly developed strains of microorganisms using specially optimized processes. Industrial enzymes, though rarely highly purified, are manufactured to exacting microbiological specifications. Enzymes for diagnostic and pharmaceutical use require more sophisticated purification methods.

The first artificial use of an enzyme was probably the addition of calf stomach extract to milk to cause coagulation when making cheese. In the West, the main use of fermentation is in making alcoholic beverages—wine, beer, etc. In East Asia, traditional fermentations are more concerned with improving the nutritional value, flavor, and texture of various foods—such as tempeh.

During the past century Asian and Western applications have been merged. For example, in 1894 Takamine in Japan used *Aspergillus oryzae*, the main organism in the soy sauce fermentation, to make Takadiastase, “an amylolytic enzyme which was first used for human consumption as a digestive aid.” Takamine also established a business in the USA and new applications for his enzymes were found. His company still exists (though under a different name) and is still marketing essentially the same enzyme preparations.

Includes a long section on “Enzymes used in food.” Address: John & E. Sturge Ltd., Selby, North Yorkshire, UK.

6907. Furuta, Kenji. 1986. Shoyu making in Japan. *Farming Japan* 20(2):58-61. Special issue: Processed foods of soybeans. [Eng]

• **Summary:** “From April 1980 to April 1982, I stayed in Nepal as a member of the Japan Overseas Cooperation Volunteers (JOCV). In these months, I was engaged in the study, trial production and diffusion of processed foods at the country’s Central Food Research Laboratory, Food Research

Section.

“Soon after I arrived at my post, I began studies on shoyu production. In my office at the Laboratory, there was a staffer named Baidya [sic, Achutananda Vaidya]. Mr. Baidya had just returned from Japan, where he received training, chiefly on the production of miso (soybean paste) and shoyu (soy), at the Prefectural Experiment Station of Shoyu and Miso in Akita for about nine months. He was much interested in the processing of soybeans; he had learned the technique of making tofu (bean curd) from my predecessor and operated a business for making and selling tofu. He was very eager to adapt the technique he learned in Japan to the situation in Nepal and to introduce it to his country. I felt sympathy with his enthusiasm and decided to cooperate with him.

“There were three types of soybeans, whose appearance differed from one another, found in Nepali markets: white, brown and black and small-grained ones... These soybeans are planted on footpaths between rice and dry fields or on fields alternately with corn. Nepalis eat several kinds of beans, but as to soybeans, they take them roasted with corn only between meals.”

In July 1980 the author and Mr. Vaidya began experimental production of soy sauce in Nepal using 4 different methods. The best results were obtained using hand-made koji and whole soybeans. The resulting shoyu was very favorably received. Soon they increased the scale of their experiment so that they could make about 100 liters of shoyu per batch.

They also conducted a survey to try to estimate the demand for shoyu in Nepal. Some of the Japanese and Chinese restaurants in Kathmandu used soy sauce imported from Japan or India. Indian soy sauce tastes entirely different from Japanese shoyu; it is probably unfermented HVP soy sauce. When asked to try Japanese-made shoyu, restaurant owners always preferred it to Indian-made soy sauce. From their survey they estimated that there was a demand for at least 20,000 liters of shoyu per year in Nepal—the actual demand, they felt, might be several times or even many times this amount.

“A Nepali, who heard of our shoyu making experiment, visited us to see the work. This man later wrote a letter to me and said that he began a shoyu making business on a small scale. I helped my Nepali friend making shoyu in Pokra. He owns a hotel there, a tourist resort about 110 kilometers west of Kathmandu. And after one year since then (I had returned home already) Mr. Baidya helped him with the final process of shoyu making in my place.” In March 1985 Mr. Vaidya came to Japan, invited by the Rotary Club in Akita and Aomori, to receive further training in soybean processing. The author and Mr. Baidya met in Japan and renewed their friendship. Address: Ex-member of the Japan Overseas Cooperation Volunteers (JOCV).

6908. Gandjar, Indrawati. 1986. Soybean fermentation and other tempe products in Indonesia. *Mycologia Memoir* No. 11. p. 55-66. Chap. 4. (C.W. Hesseltine and Hwa L. Wang, eds. Indigenous Fermented Food of Non-Western Origin. Berlin & Stuttgart: J. Cramer.) Previously published in 1981 in USDA Miscellaneous Publication FL-MS-333. [14 ref]
• Summary: Contents: Introduction. Kecap (Indonesian soy sauce). Taoco (Indonesian chiang, a yellowish-brown porridge that is very popular in Western Java). Soybean tempe (*tempe kedelai*). Tempe gembus (okara tempe). Non-soybean tempe—made from velvet beans (*tempe benguk*), jack beans (*tempe koro pedang*), winged bean (*tempe kecipir*), pigeon pea (*tempe gude*), wild tamarind (*tempe lamtoro*), peanut presscake (*tempe bungkil kacang*), and coconut presscake (*tempe bongkrek*).

“Tempe is an important source of protein in the Indonesian diet. At present the intake of soybean tempe per person per day is within the range of 40 to 50 g while the recommendation is 100 g per person per day... The awareness of the people that soybean tempe is nutritious results in a higher demand of this product. In the city of Jakarta, about 6000 tonnes of soybeans are processed monthly; 2500 tonnes for soybean tempe [tempeh], and 3500 tonnes for tahu [tofu].”

Table VI shows the nutritional composition of some leguminous seeds and tempe products. Table VII shows the amino acid content of the seeds and the tempeh of 4 non-soybean legumes. Address: Dep. of Biology, Faculty of Mathematics and Natural Sciences, Univ. of Indonesia, Jakarta, Indonesia.

6909. Goddard, Susan. 1986. Focus on soya. Hove, E. Sussex, England: Wayland (Publishers) Ltd. 48 p. Illust. Index. 21 x 22 cm. Series: Focus on Resources. [3 ref]
• Summary: This is a brief introduction to the subject with many color photos. Contents: 1. The importance of soya. 2. The beginnings of soya. 3. Where soya beans are grown. 4. The beginnings of soya processing. 5. The soya plant. 6. Planting. 7. Harvesting. 8. Threshing and storage. 9. At the processing plant. 10. Extracting and refining the oil. 11. Making margarine. 12. Animal feed. 13. Soya protein products. 14. Textured vegetable protein. 15. Other soya products. 16. The nutritional importance of soya. 18. Soya as a world commodity. 19. The future. Facts and figures. Glossary. Books to read. Sources of further information.

• Summary: Contains 18 chapters by various authors. Each chapter that mentions soy is cited separately. Address: NRRC, Peoria, Illinois.

6911. Hesseltine, C.W. 1986. Microorganisms involved in food fermentations in tropical Asia. In: Susono Saono and F.G. Winarno, eds. 1986. Proceedings of International Symposium on Microbiological Aspects of Food Storage, Processing and Fermentation in Tropical Asia. x + 344 p. See p. 189-204. Held 10-13 Dec. 1979 at Cisarua, Bogor, Indonesia. Illust. 24 cm. [18 ref]

• Summary: Three pioneers of the taxonomy of molds used in fermented foods were Drs. R. Nakazawa, K. Saito, and C. Thom. Fermentations can be classified as Homofermentations (only one species of microorganism is necessary to produce the product; e.g. natto, onchom, tempeh, fermented tofu), Heterofermentations (more than one is required; e.g. Chinese yeast, or ragi), Homomultifermentations (two or more strains of the same species are used together; e.g. miso, shoyu, soy yogurt).

Tables show: (1) Representative strains of cultures in Oriental food fermentations: Miso—*Aspergillus oryzae*, *A. sojae*, *Saccharomyces rouxii*, *Pediococcus halophilus*. Tempeh—*Rhizopus oligosporus*. Sufu—*Actinomucor elegans*, *Mucor dispersus*. Address: NRRC, Peoria, Illinois.

6912. Hesseltine, C.W.; Wang, Hwa L. 1986. Food fermentation research and development. *Mycologia Memoir* No. 11. p. 9-22. Chap. 1. (C.W. Hesseltine and Hwa L. Wang, eds. Indigenous Fermented Food of Non-Western Origin. Berlin & Stuttgart: J. Cramer). [13 ref]

• **Summary:** The following fermented soyfoods are discussed: Miso, shoyu, natto, hamanatto, sufu, tamari, ontjom, tempeh. Address: USDA/NRRC, 1815 N. University St., Peoria, Illinois 61604.

6913. Hesseltine, C.W. 1986. Future of fermented foods. *Mycologia Memoir* No. 11. p. 303-16. Chap. 17. (C.W. Hesseltine and Hwa L. Wang, eds. *Indigenous Fermented Food of Non-Western Origin*. Berlin & Stuttgart: J. Cramer.) Previously published in 1981 in USDA Miscellaneous Publication FL-MS-333. [11 ref]

• **Summary:** Contents: Introduction. Positive factors for increased use of fermented foods. Trends in production of fermented foods. Factors that may effect the wider use of fermented foods in the West. Literature cited. Address: USDA/NRRC, 1815 N. University St., Peoria, Illinois 61604.

6914. Hunt, Janet. 1986. *The compassionate gourmet: The best of international vegan cuisine*. Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. 160 p. Illust. Index. 22 cm.

• **Summary:** An excellent vegan cookbook, written for animal lovers. Soy-related recipes include: Avocado tofu pâté (p. 31). Celery miso pâté (p. 36). French bean salad with tofu dressing (p. 66). Tofu curry (Thailand; p. 74). Tofu and vegetable pakora (p. 86). Tofu layered casserole (p. 96). Tomato flan with tofu (p. 104). Tofu Lemon flan (p. 137). Yogurt dessert (made with cultured soya milk, p. 140). Rhubarb fool (dessert in soya milk, p. 141). Maple pancakes (with soya flour, p. 149). Walnut tofu balls (p. 156).

At least one recipe uses Holbrook's Worcester Sauce—a Worcestershire-type sauce without animal products. Many recipes call for soy sauce or soya milk, and some for canned soy or nut "sausage." Page 9 lists a number of special ingredients including Direct Foods Protoveg (soya "meat"), Infinity Foods (distributors [in Brighton, at Sussex University]) Soya mayonnaise, Lotus Foods TVP (soya "meats" in a varieties of forms and flavors), Plamil concentrated soya milk (use diluted as a milk, undiluted as a cream), and Tomor Margarine (the author's favorite of the many vegan margarines now available in the UK). In all recipes, each ingredient is listed twice in side-by-side columns: once in its Imperial (metric) form and once in its American form, e.g. 385 ml soya milk, 1 1/3 cup soya milk. A number of recipes call for the use of alcohol (whiskey, brandy, etc.). The author has written at least 14 other books on vegetarian or wholefood cookery. Address: England.

6915. Kikkoman K.K. 1986. Dai 68 ki hôkoku-sho. Showa 60 nen 1 gatsu 1 nichi—Showa 60 nen 12 gatsu 31 nichi [68th annual financial report. From 1 Jan. 1985 to 31 Dec. 1985]. Tokyo, Japan. 15 p. 19 cm. [Jap]

• **Summary:** Written entirely in Japanese with no photos.

Address: Tokyo, Japan.

6916. Kondo, Sonoko; Stoumen, Lou. 1986. *The poetical pursuit of food: Japanese recipes for American cooks*. New York, NY: Clarkson N. Potter. 296 p. Illust. by Etienne Delessert. Index. 25 cm.

• **Summary:** A very artistic, attractive, and authentic book with superb (imaginative and lyrical) illustrations. The section titled "Staple foods you will need" (p. 17-20) discusses soy sauce, konbu and nori seaweeds, sesame seed paste (*atari-goma*; "Most Americans may be more familiar with the Middle Eastern version called tahini paste... Used in making salad dressings and dips"), miso, and sesame seeds. Soy-related recipes include: Grilled tofu with miso (Dengaku; p. 37). Sesame tofu (p. 38; no soy). Tuna sashimi and green onions with miso (p. 40). Daikon radish with lemon miso (p. 42). Cauliflower florets with miso (p. 42). Basic miso soup (p. 51). Clam miso soup (p. 51). Daikon radish miso soup (p. 52). Vegetable and chicken miso soup (p. 52). Tofu and wakame seaweed suimono (p. 53). Fried rice with tofu and vegetables (p. 89).

Chapter 7, titled "Tofu & egg dishes" includes (p. 103-17): Tofu in Kamakura. Description of different types of tofu: Silken, firm, grilled, pouches, deep-fried, fritters (*ganmodoki*), freeze-dried (*koya-dofu*), how to press tofu. Chilled tofu with ginger sauce. Braised koya-dofu with pea pods. Cold-day tofu. Vegetarian "chicken" tofu (with frozen tofu). Dragon's head (*hiryo-uzu*). Tofu from the sea (*Kenchin-mushi*). Tofu gratinée. Stuffed tofu. Scrambled tofu. Tofu treasure bags. Vegetarian "burger." Egg tofu delight (*tamago-dofu*; no soy).

Beans for breakfast (*natto*; p. 125). Braised konbu seaweed, soybeans, and konnyaku (p. 128). Hijiki seaweed with tofu (p. 129). Stuffed tofu sushi (*Inari-zushi*; p. 157). Snapper tempura with asparagus and miso (p. 174). Marinated cod in miso sauce (p. 179). Seaweed, chicken, and vegetables with creamy miso (p. 185). Steak miso (p. 190). Sukiyaki (p. 206). Shabu shabu (p. 208). Vegetarian nabe (with tofu, p. 211). Sea and mountain (with miso sauce, p. 212-23). Winter nabe (with tofu, p. 214). Udon-suki (with tofu, p. 216). Tofu apple cake (p. 244). Chapter 15 (p. 260-71) is menu plans, by season and time of day.

The glossary (p. 272-82) includes: Agar-agar, azuki beans, konbu seaweed, kuzu, miso paste, nori seaweed, rice cakes (*mochi*), sesame seed oil, sesame seeds, soybeans—fermented (*natto*), soy sauce, tofu, tonkatsu sauce (with dark soy sauce), wakame seaweed. Address: Los Angeles, California.

6917. Lu, Henry C. 1986. *Chinese system of food cures: Prevention & remedies*. New York, NY: Sterling Publishing Co., Inc. 192 p. Index. 23 cm. [11 ref]

• **Summary:** Chapter 7, titled "Legumes, grains, oils and seeds," discusses the following: Small red bean (adzuki

bean): Edema, beriberi, jaundice, diarrhea, discharge of blood from anus, carbuncle swelling, mumps, cirrhotic ascites (p. 107). Bean curd (tofu): Pink eyes, diabetes, periodic diarrhea, sulfur poisoning (p. 111). Yellow soybean: Malnutrition in children, diarrhea, abdominal swelling, underweight, getosis (p. 111). Black soybean: Edema, beriberi, jaundice, rheumatism, muscular cramps, lockjaw, drug poisoning. Soybean oil: Gastric ulcer, duodenal ulcer, intestinal obstruction. Soy sauce: Promotes digestion (p. 112).

Note: Although he was born in Taiwan, Dr. Lu was quite skeptical of traditional Chinese medicine. But during this twenties he developed an ailment that resisted every form of Western medical treatment. In desperation, he traveled to Taiwan and Hong Kong to consult with Chinese specialists. The results changed his life. A traditional Chinese doctor cured him in a few months. Dr. Liu already held a PhD in education and philosophy from the University of Alberta. But at age 32 he decided to change his field. He began by translating the *Nei Jing (Yellow Emperor's Classic of Internal Medicine)* into English. He went on to translate 25 other Chinese medical books into English, including 7 books on acupuncture that are now listed as required texts by the Board of Acupuncture examiners. In 1972 he began practicing traditional Chinese medicine and acupuncture. In 1986 he founded the Academy of Oriental Heritage (in Vancouver, British Columbia), which now (1999) has 15 full-time teachers and more than 100 students. Address: Academy of Oriental Heritage, P.O. Box 35057, Station E, Vancouver, BC V6M 4G1, Canada.

6918. McCarty, Meredith. 1986. American macrobiotic cuisine. Turning Point Publications, 1122 M Street, Eureka, CA 95501-2442. 110 p. Illust. Index. 28 cm. [6 ref]

• **Summary:** Page 7 and Chapter 7, titled "Beans and Soyfoods," give basic descriptions of tempeh, miso, soy sauce, soymilk, and tofu. Recipes include Summer's Mixed Vegetable Quiche (with tofu), Tofu Egg Foo Young, and Baked Tempeh with Lemon-Mustard Sauce. Tofu recipes elsewhere in the book include Green Goddess Dressing, Nutty Noodle Bake, Pasta Patricio, and Sour Cream. Also contains information on sea vegetables. Address: Eureka, California. Phone: 707-445-2290.

6919. McDougall, Mary A. 1986. The McDougall health-supporting cookbook. Vol. 2. Piscataway, New Jersey: New Century Publishers. iii + 157 p. Index. 23 cm.

• **Summary:** This is a vegan cookbook whose 250 original recipes are designed to support The McDougall Plan, which is a diet low in fat and sodium, high in complex carbohydrates. Since soyfoods are relatively high in fat, they are used sparingly and the recipes are marked by a symbol of a crown. Low sodium soy sauce is used in many recipes. Soy-related recipes include: Scrambled tofu (p. 2-3). Tofu

salad dressing (p. 7-8). Dijon tofu dip (p. 9). Onion soup dip (with tofu, p. 9). Dilly tofu dip (p. 9-10). Miso soup (p. 39). Creamed tofu soup (p. 41). Tempeh Creole (p. 62-63). Rice-tofu stuffing mix (p. 88). Tempeh and grain casserole (p. 91). Tofu loaf (p. 96-97). Baked tofu cubes (p. 97-98). Spinach-tofu burgers (p. 99-100). Where's the meat loaf? (with tofu, p. 101-02). Oat burgers (with tofu, p. 102-03). TVP stuffing mix (p. 109). Okara cookies (p. 126). Tofu banana pudding (p. 132). The section titled "Update on ingredients" (p. 133-35) includes a description of: Worcestershire sauce (Sharwood's—natural and without anchovies), umeboshi plum sauce, tamari or soy sauce, okara, tempeh, kombu, and tahini. A portrait photo on the rear cover shows Mary McDougall.

Note: Not long after this book was published, New Century Publishers changed its name to New Win Publishing, Inc. and moved to Clinton, New Jersey. As of 2000 this book is published by Putnam/Penguin. Address: P.O. 14039, Santa Rosa, California 95402.

6920. Miyashiro, R. 1986. [Bacterial spoilage of foods soaked in condiments]. *Kagawa Prefectural Fermentation and Food Experiment Station, Annual Report* No. 79. p. 39-46. [4 ref. Jap]*

• **Summary:** For example, shellfish were soaked in soy sauce. Address: Kagawa Prefectural Fermentation and Food Experiment Station, Kagawa, Japan.

6921. Nagao, Minako; Wakabayashi, K.; Fujita, Y.; et al. 1986. Nitrosatable precursors of mutagens in vegetables and soy sauce. In: Yuzo Hayashi, et al., eds. 1986. Diet, Nutrition and Cancer: Proceedings of the 16th International Symposium of the Princess Takamatsu Cancer Research Fund, Tokyo, 1985. Tokyo: Japan Scientific Societies Press; Utrecht, Netherlands: VNU Science Press. xvi + 345 p. See p. 77-86. [44 ref]

• **Summary:** "Nitrosatable precursors of mutagens that show mutagenicity to *Salmonella typhimurium* TA100 without S9 mix after treatment with nitrite at pH 3 were found in various foods... The mutagenicity of soy sauce towards *Escherichia coli* WP2 *uvrA*/pKM101 is partly explained by 1-methyl-1,2,3,4-tetrahydro-Beta-carboline-3-carboxylic acid (MTCA) and tyramine reported previously. Oral administration of soy sauce and nitrite to male Fischer 344 rats for 2 years induced basal cell proliferation of the forestomach and intestinal metaplasia of the glandular stomach, but did not induce cancers in any organ." Address: Carcinogenesis Div., National Cancer Center Research Inst., Tokyo 104, Japan.

6922. Nagao, M.; Wakabayashi, K.; Fujita, Y.; Tahira, T.; Ochiai, M.; Sugimura, T. 1986. Mutagenic compounds in soy sauce, Chinese cabbage, coffee, and herbal teas. *Progress in Clinical and Biological Research* 206:55-62. [13 ref] Address: Section of Prevention of Carcinogenesis, National Cancer Research Inst., Tsukiji 5-1-1, Chuo-ku, Tokyo 104,

Japan.

6923. Nix, Janeth Johnson, ed. 1986. *Sunset vegetarian cooking*. Menlo Park, California: Lane Publishing Co. 96 p. Illust. Index. 28 cm.

• **Summary:** Written and compiled by the editors of *Sunset Books* and *Sunset Magazine*, this attractive and inviting lacto-ovo vegetarian cookbook was first published in 1981 under the titled *Menus and Recipes for Vegetarian Cooking*, edited by David E. Clark. It contains over 185 tempting recipes plus many superb full-page color photos, and illustrations (line drawings) by Kathy Parkinson of various vegetables. The subtitle on the cover only reads: "Nutritious recipes with flavor and imagination."

Chapter 1, titled "Going Vegetarian," gives a good introduction to the subject. It begins: "We've heard many reasons for going vegetarian. Some people are just looking for a change of pace from meat and potatoes. Some want to save money. Some want the health advantages of a low-cholesterol, high-fiber diet. Other have religious or philosophical reasons for not eating meat. And there are also those who want to do something about the global food problem."

"But whether you want to save money, save your heart, save animals, or save the world from food shortage, you'll need good recipes that sustain your interest in going vegetarian. And good recipes are the heart of this vegetarian cook book."

In answer to the question "Don't I need meat for protein?" it responds: "No. By weight, soybeans and cheese are better sources of protein than meat and fish. In terms of protein quality, eggs and milk rank above meat. By combining grains and legumes, you can create a protein of higher quality than meat or fish." The theme of combining proteins from complementary sources to increase protein quality is emphasized. Soybeans are said to have the best quality protein of any food from the plant kingdom, providing "virtually complete protein" with "no limiting amino acid"—a "near-perfect protein source." (p. 9-10, 49).

In a table titled "Nutrition-packed Foods" the following soy-related foods are listed as good sources: Soybeans for thiamin (vitamin B-1), niacin, vitamin B-6, folacin, calcium, and iron. Tofu for niacin and calcium.

Soy-related recipes include: Soybean soup, bistro style (p. 30). Vegetarian Joe (Like sloppy Joe, with tofu, p. 44). Cooking beans (incl. soybeans, p. 49; "Refrigerate while soaking, boil for 3 to 3½ hours." Adding salt to the soak water is said to help beans absorb water evenly). Sweet & sour soybeans (p. 51). Sesame tofu sticks (in teriyaki sauce, p. 59). Savory vegetables and tofu (p. 61). Herbed tofu sauce (p. 69). Address: Menlo Park, California. Phone: 415-321-3600.

6924. Nunomura, N.; Sasaki, M. 1986. Soy sauce. In:

N.R. Reddy, M.D. Pierson, and D.K. Salunkhe, eds. 1986. *Legume-Based Fermented Foods*. Boca Raton, FL: CRC Press. [viii] + 254 p. See p. 5-46. Chap. 2. [111 ref]

• **Summary:** Contents: Introduction. Types of soy sauce. Preparation of shoyu: Raw materials, preparation (treatment of raw materials, koji making, mash [moromi] production and aging, pressing, refining and pasteurization), production of chemical and semichemical shoyu. Composition: Chemical composition, flavor compounds (Japanese shoyu flavor components, oxidative products of HEMF, flavor components of koji, matured mash, and shoyu oil, quantitative analysis of flavor compounds, change in flavor components during pasteurization, flavor components of various soy sauces in the world), organoleptic quality. Safety: Mycotoxins, long term effects of shoyu consumption, mutagens. Conclusions.

HEMF is 4-hydroxy-2 (or 5)-ethyl-5 (or 2)-methyl-3(2H)-furanone. First isolated in 1976, it possesses a shoyu-like and a strong caramel-like flavor. The addition of 0.1 ppm of HEMF to shoyu makes the taste milder.

Table 5 lists the 271 flavor components that have been found in Japanese shoyu to date. They include 37 hydrocarbons, 30 alcohols, 41 esters, 15 aldehydes, 5 acetals, 17 ketones, 24 acids, 16 furans, 4 lactones, 4 furanones, 5 pyrones, 25 pyrazines, 7 pyridines, 6 miscellaneous nitrogen compounds, 11 sulfur compounds, 3 thiazoles, 3 terpenes, and 2 miscellaneous compounds. Address: Soy Sauce Science Research Lab., Kikkoman Corp., Noda, Chiba, Japan.

6925. Pierson, M.D.; Reddy, N.R.; Odunfa, S.A. 1986. Other legume-based fermented foods. In: N.R. Reddy, M.D. Pierson, and D.K. Salunkhe, eds. 1986. *Legume-Based Fermented Foods*. Boca Raton, FL: CRC Press. [viii] + 254 p. See p. 219-31. Chap. 13. [43 ref]

• **Summary:** Contents: Introduction. Ugba. Inyu and Kecap. Waries. Kenima. Meitauza. Philippine Tao-si. Fermented cowpeas and chickpeas.

Inyu (p. 225-26) is a fermented black soybean sauce made in Taiwan, mainland China, Hongkong, and other places with large Chinese populations. Inyu differs from soy sauce in that the flavor become more intense after cooking. A flow diagram for the preparation of Inyu shows that no wheat is used in making it.

Kecap (p. 226-27) is Indonesian soy sauce. The two types are *kecap manis* (which has a sweet flavor) and *kecap asin* (which has a salty flavor). The preparation of kecap and kecap manis are described. Kecap is classified into three grades by quality: (1) Contains more than 6% protein. (2) Contains 4-6% protein. (3) Contains 2-4% protein.

Tao-si is a fermented food made from soybeans in the Philippines. To make tao-si, soybeans are first soaked overnight at room temperature. The beans are then boiled for 1 hour, drained, and cooled. At room temperature, the

soybeans are coated with either raw or roasted wheat flour and inoculated with *Aspergillus oryzae*, a mold. The beans are then spread on bamboo trays, covered with banana leaves, and incubated for 2-3 days in a warm place until the soybeans are overgrown with a mycelium of white mold. The mold-covered soybeans are immersed in a brine solution (18% w/v = 18 gm of salt per 100 cc of water) and heated to boiling to prevent further mold growth and to inactivate enzymes.

Note: Unlike most fermented black soybeans, tao-si does not undergo two sequential fermentations. Address: 1-2. Dep. of Food Science and Technology, Virginia Polytechnic Inst. and State Univ., Blacksburg, VA; 3. Dep. of Botany, Univ. of Ibadan, Ibadan, Nigeria.

6926. Rachim, Abdul. 1986. Indonesia: Notes on the soybean food industry under producers' co-operatives in Indonesia. CGPRT No. 4. p. 244-54. Includes 7 tables and figures.

• **Summary:** Contents: Background. Indonesian soybean foods. Fermented products: Tempe, oncom, tauco, kecap. Non-fermented products: Tofu, soymilk. Function and role of Kopti (and BULOG). Traditional processing industry: Current situation of small-scale home industry, further studies on the food industry / marketing system.

The Food Balance Sheets of the Central Bureau of Statistics show that 90% of Indonesia's soybeans are used for food. Most of the human consumption is in the form of a variety of popular processed foods: tempe, tahu (tofu), tauco, and a number of other less popular foods: soybean sprouts (tauge), sere in Bali, yuba, soybean milk, fried soybeans (eaten as a snack), beans boiled in the pod (also a snack), and the beans cooked as a vegetable or as an ingredient in soups. Only one factory (Sari Hasuda, in Yogyakarta) produces soybean milk. It is enriched with nonfat dried milk, vitamins, and minerals.

To coordinate and improve the economic viability of the small tofu and tempeh producers, a cooperative system, called Kopti (*Koperasi Produsen Tempe dan Tahu Indonesia*; Indonesian Tempe / Tofu Processors' Co-operative) was founded in 1979. The main function of Kopti is to procure and distribute soybeans to its members, the number of which has increased from 25 in 1980 to 286 in May 1985. It handles about 407,160 tons/year. The purchase price of soybeans is as follows (Rupiah/kg): From USA 415, from China 425, from Indonesian farmers 475-80. Certificate [certified] seeds cost 550-75.

Tofu, tempe, kecap, tauco and oncom processing is primarily done in small factories. 3 studies have been made on the size of these factories and the quantities they process: as part of the 1974 Industrial Census of the Central Bureau of Statistics (CBS); by Winarno, et al., in 1976; and by the study team on Soybean Commodity System (SCS) in the Garut area of West Java in 1984. The findings of these 3 studies are presented in Table 2.

"We should be cautious in comparing their results, however, because of biases in the collection of the information. The CBS study, for instance, was part of an industrial census, which divided processors into two categories: small-scale industries (5-19 labourers), and home factories (1-4 labourers, some of whom may be family members). However, there may also be wide variations in the industry in different parts of the country.

"Despite these limitations, it seems that the volume of soybean processed by each unit has increased appreciably, probably reflecting a favorable growth of the industry. Yet the number of labourers per unit has remained small, and is probably diminishing. This may be because of the use of mechanical crushers or dehullers for both tempe and tofu productions." Address: Research Asst., ESCAP CGPRT Centre, Bogor, Indonesia.

• **Summary:** An overview with information on nutrition and processing of fermented soyfoods. Contents: 1. Introduction. 2. Soy sauce. 3. Miso. 4. Sufu. 5. Natto. 6. Tempe. 7. Fermented soybean milk and other fermented legume milk products. 8. Oncom (fermented peanut press cake). 9. Idli. 10. Dhokla and Khaman. 11. Dawadawa. 12. Papads. 13. Other legume-based fermented foods (Inyu, kecap, kenima, meitauza, Philippine tao-si). 14. Future of legume-based fermented foods. Address: 1-2. Dep. of Food Science & Technol., Virginia Polytechnic Inst. and State Univ., Blacksburg, VA; 3. Vice-Chancellor, Mahatma Phule Agricultural Univ., Rahuri, Maharashtra State, India.

6928. Reddy, N.R.; Pierson, M.D.; Salunkhe, D.K. 1986. Introduction. In: N.R. Reddy, M.D. Pierson, and D.K. Salunkhe, eds. 1986. Legume-Based Fermented Foods. Boca Raton, FL: CRC Press. [viii] + 254 p. See p. 1-3. Chap. 1. [5 ref]

• **Summary:** Contents: A two-page table titled "Legume-based fermented foods," which summarizes all foods discussed in this book, has 5 columns: Name of food, substrate, microorganisms involved, use of food, and areas (where made and used). For example. Natto: Soybeans. *Bacillus natto*. Cake as a meat substitute [sic, it is neither in cake form nor serves as a meat substitute]. Japan (northern part).

Note: Kenima should be spelled "Kinema." "Kecap" is not a different seasoning from "ketjap." Both refer to Indonesian soy sauce; the latter is simply the old spelling. Address: 1-2. Dep. of Food Science and Technology, Virginia Polytechnic Inst. and State Univ., Blacksburg, VA.

6929. Sathe, S.K.; Reddy, N.R.; Pierson, M.D. 1986. Future of legume-based fermented foods. In: N.R. Reddy, M.D.

• **Summary:** Fermentation is one of the oldest known processes for preserving foods. Most of the legume-based fermented foods used in the Western world (such as soy sauce, miso, and tempeh) have been introduced by immigrants from Asia. These foods are now becoming popular in the Western hemisphere. Generally the future of legume based fermented foods looks bright. Address: 1. Dep. of Foods and Nutrition, Purdue Univ., West Lafayette, Indiana; 2-3. Dep. of Food Science and Technology, Virginia Polytechnic Inst. and State Univ., Blacksburg, VA.

6930. Stidham, Martin. 1986. *The fragrant vegetable: Simple vegetarian delicacies from the Chinese*. Los Angeles, California: Jeremy P. Tarcher, Inc. x + 224 p. Illust. Index. 24 cm.

• **Summary:** Chapter 3 (p. 57-84), titled “‘Meat without bones’—Tofu,” contains 3 preparatory techniques and 16 recipes. Chapter 4 (p. 85-98), titled “More ‘meat without bones’—Pressed tofu,” contains two basic recipes for pressed and spiced pressed tofu plus 9 additional recipes. “The highly odiferous ‘stinking’ tofu (*chou doufu*) is made by fermenting tofu or pressed tofu, or allowing it to grow moldy, then deep-frying it. Usually eaten with a hot sauce, this is available at movable carts...” (p. 58).

“The dense cakes are fermented to become tofu ‘cheese’ (see Chapter 1) as well as ‘stinking’ tofu...”

Chapter 5 (p. 99-126) titled “‘Duck,’ ‘chicken,’ and other specialties,” first discusses the basic ingredients in making these traditional meatlike products (Bean curd sheet [pressed tofu sheets], bean curd skin [yuba], and bean curd sheet noodles), then gives numerous recipes, many containing soy. Chapters on fried gluten, soups, and fruit and nut desserts follow. Soy sauce, “green soybeans” [green vegetable soybeans], soymilk, soy sprouts, and soy-pickled cucumbers are also mentioned.

The author, a graduate of Northwestern University, lived in East Asia for over 10 years, first as a student at National Taiwan Univ. in the Graduate Inst. of Chinese Literature, and later as a translator of short stories, poetry, and novels. “A long-standing interest in the cuisines of the region, especially vegetarian, has taken him into home, restaurant, and temple kitchens. He has studied privately with instructors from the area’s well-known cooking schools, including Wei-Chuan and Pei Mei’s, besides being tutored in special techniques by tofu makers and manufacturers of other Chinese specialty food items.”

6931. Takahashi, Kuwako. 1986. *The joy of Japanese cooking*. Tokyo: Shufunotomo Company, Ltd. 311 p. Illust. (some color photos). Index. 27 cm.

• **Summary:** An excellent book with especially good

descriptions of Japanese ingredients. Contents: Dedication. Foreword. Introduction. Part I. Japanese ingredients. Seasonings in Japanese cooking. Utensils and equipment. Tableware. Measurements and equivalents. Basic techniques: Making soup stock (*dashi*), cooking rice, preparing fish, boning chicken, cutting vegetables, broiling, poaching, steaming.

Part II. Seafood. Chicken. Eggs. Beef. Pork. *Tofu* (bean curd). Vegetables, dried and manufactured foods.

Part III. Appetizers (*zensai*). Soups. Salads (*aemono*). Casseroles (*nabemono*). Rice. Pickles. Desserts and Japanese sweets.

Part IV. Menu planning. Sample menus with preparation schedules. Part V. Making tea. Serving sake.

A color photo (p. 15) shows six different soyfoods made from soymilk: 1. Deep-fried soybean puffs (*age* or *aburage*). 2. Fried tofu cutlet (*atsu-age* or *nama-age*). 3. Tofu patties (*ganmodoki*). 4. Soymilk film, dried (*yuba*). 5. Bean curd cake (*tofu*). 6. Freeze-dried tofu (*Kôya dofu*).

The section titled “Japanese ingredients” (a superb glossary, with many entries accompanied by an illustration {line drawing}, p. 17-32) includes: Bean curd cake (*tofu*), incl. regular tofu (*momen dofu*), soft tofu (*kinugoshi dofu*), Ever-Fresh Silken Tofu (aseptically packaged), instant tofu, firm tofu (Chinese style). Tofu products: Deep-fried soybean puffs (*agê* or *aburage*), fried tofu cutlet (*atsu agê* or *name agê*), freeze-dried tofu (*Kôya dofu*), grilled tofu (*yaki dofu*), tofu patties (*ganmodoki*). Beans: Red beans, dried (*azuki*), soybeans, dried (*daizu*), soybeans, fresh (*eda mame*). Bean pastes: Bean paste, fermented (*miso*), sweet bean paste (*azuki an*). Soymilk film, dried (*yuba*). Soy sauce (*shoyu*).

The glossary also discusses: Horseradish, Japanese (*wasabi*), konnyaku, kombu, umeboshi, kabocha, daikon (4 forms), glutinous rice (*mochi gome*), red bean rice (*sekihan*), pounded rice cake (*mochi*), rice wine lees (*sakekasu*), rice wine lees pickles (*narazuke*), perilla (*shiso*), seaweeds (*hijiki*, *nori*, *yakinori*, *small sized nori*, *wakame*, *ao nori*), sesame seeds (*goma*), sweet rice wine for cooking (*mirin*), wheat gluten cake (*fu*, incl. *nama fu*, *yaki fu*, and *matsutake fu*).

The section titled “Seasonings in Japanese cooking” (another superb glossary, p. 33-37) discusses: Soy sauce, incl. Regular soy sauce (*koikuchi shôyu*), light soy sauce (*usukuchi shôyu*), tamari soy sauce (darker and thicker, made from fermented soybean and brine in the Nagoya area. “It is not saltier than regular soy sauce but has a richer flavor, thicker taste, and some people prefer tamari as the dipping sauce for sashimi... Note: In the USA the name ‘tamari’ is mistakenly used for natural soy sauce which is not tamari”), white soy sauce (*shiro shôyu*), milder soy sauce (contains less salt). A table showing the nutritional composition of five different types of Japanese soy sauce is given. Combinations of soy sauce and mirin: Teriyaki. Miso (incl. *kome miso*, *mugi miso*, *mame miso*, mixing of miso types).

Use the good index to see how each of the ingredients

mentioned above are used in recipes.

A good biography of the author is appears in the Foreword and on the inside rear dust jacket (with portrait photo). The author was also very active in introducing ikebana (Japanese flower arranging) to the Bay Area and the USA. Address: Japan and Berkeley, California.

6932. Tsuji, Shizuo; Hata, Koichiro. 1986. Practical Japanese cooking: Easy and elegant. Tokyo, New York & San Francisco: Kodansha International. 151 p. Illust. (color photos by Yoshikatsu Saeki). Index. 31 cm.

• **Summary:** A beautiful, elegant book. M.F.K. Fisher says of this book (rear dust jacket): “The recipes are clear and easy to follow, and the illustrations are especially delightful, truly top high-style Japanese simplicity. Messrs. Tsuji and Hata have given us the best of the old and the new.”

The Preface, by Shizuo Tsuji (born in 1948) notes that the many-faceted Japanese “cooking tradition relies heavily on two primary ingredients—delicate bonito stock (*dashi*) and, not unexpectedly, soy sauce. Most, if not all, dishes call for one or both.” The recipes generally call for either “dark soy sauce” [*koikuchi*] or “light soy sauce” [*usukuchi*].

Soy related: Squid and asparagus with mustard miso sauce (... *karashi su miso ae*, with “5 Tbsps nonsweet white miso paste,” p. 19). Tofu, pork, and vegetable soup (*Kenchin jiru*, with “1 block regular {‘cotton’} tofu, about 10 oz {300 gm}, p. 24). Pureed corn soup (with “2 Tbsps nonsweet white miso paste,” p. 24). Miso soup with pork and vegetables (*Buta jiru*, p. 25). Yellowtail teriyaki (*Buri teriyaki*, p. 35). Simmered mackerel in miso (*Saba miso-ni*, p. 37). Tofu as a possible ingredient (p. 38). Deep-fried trout in vegetable sauce (Tofu can be added to the sauce to give the dish more volume, or tofu can easily be substituted for the trout, p. 39). Stuffed spiny lobster (“In place of egg, softened miso can be used in the filling,” p. 40-41). Squid teriyaki (*Ika teriyaki*; the teriyaki sauce includes mirin, sake, dark soy sauce, and tamari soy sauce, p. 44). Shrimp and leeks with mustard-miso sauce (... *karashi-su-miso kake*, p. 48). Grilled beef (with tamari soy sauce in Lemon-soy dipping sauce {*Ponzu*}, and dark soy sauce in sesame dipping sauce, p. 50-51). Grilled beef with miso (*Gyuniku miso-yaki*, with “4 Tbsps Red Miso Sauce {p. 85},” p. 54). Nagasaki-style braised pork (*Buta kaku-ni*, with “1 cup {250 gm} unpacked okara {tofu pulp} or milk, optional,” p. 58).

The section titled “Tofu” includes: Simmered tofu (*Yudofu*, with “2 blocks tofu, about 20 oz {600 gm} total,” p. 71). Night-dried tofu with chicken sauce (*Ichiya-dofu tori soboro ankake*; regular tofu is allowed to freeze overnight to give it a different texture, p. 72). Simmered tofu dumplings (*Ganmodoki uma-ni*, p. 73-74). Deep-fried tofu (*Agedashi-dofu*, p. 75). Scrambled tofu (*Iri-dofu*, p. 76). White salad (*Shira-ae*, p. 77). Tofu sandwiches (*Tofu hakata-ni*, p. 78-79). Tofu hamburger steak (with miso, p. 80). Freeze-dried tofu with egg (*Koya-dofu tama-jime*, p. 81).

Grilled eggplant (*Taki-nasu*, with Soy-ginger sauce, p. 84). Deep-fried eggplant with miso sauce (*Nasu dengaku*, with Red Miso Sauce, p. 85). Turnip with ginger-miso sauce (*Furo-fuki kabura*, with 1 cup Red Miso Sauce, p. 88). Chinese cabbage and deep-fried tofu (*Hakusai usage uma-ni*, with “4 pieces thin deep-fried tofu {*usage*}, about 3 oz (80 gm) total,” p. 90). Deep-fried and simmered acorn squash (*Eikon sukasshu no age-ni*, with “2 blocks thick deep-fried tofu {*atsusage*}, about 5 oz {150 gm} total,” p. 93). Simmered soybeans (*Nimame*, with “1 cup {120 gm} dried soybeans,” “The real secret... is to allow the beans a long pre-soak before beginning to cook,” p. 94). Vegetables with white sesame dressing (*Goshiki yasai gomashirasu-ae*, with 1 block regular tofu, p. 96). Mixed rice (*Kayaku gohan*, has “thin deep-fried tofu” as an alternative ingredient, p. 100). Scattered sushi (*Bara sushi*, with “1 cake freeze-dried tofu {*Koya-dofu*}, about ½ oz {15 gm},” and “2 Tbsp dark soy sauce,” p. 106-07). Thick roll sushi (*Futo-maki-zushi*, with “2 cakes freeze-dried tofu {*Koya-dofu*}, about 1 oz {30 gm} total,” p. 113). Inari sushi (*Inari-zushi*, with “10 pieces thin deep-fried tofu {*usage*}, each about 3 inches {8 cm} square, p. 114-15). Udon noodles with deep-fried tofu (*Kitsune udon*, with 4 pieces thin deep-fried tofu, p. 120). Sukiyaki (“... actually only appeared on the horizon of Japanese cuisine some one hundred years ago,” with “½ block regular {‘cotton’} tofu,” p. 122-23). Oden stew (*Oden nabe*, with “4 blocks thick deep-fried tofu,” p. 124-25). Seafood pot (*Yose nabe*, with 1 block regular tofu,” p. 126-27). Deep-fried mixed kebabs (*Kushi-katsu*, with 1/3 cup Worcestershire sauce in the Dipping sauce, p. 132-33).

The section titled “Ingredients” (p. 144-49) has a photo and excellent description for each entry, including: Ginger (fresh). Ginger (red vinegared). Ginger (sweet vinegared). Green seaweed flakes (*ao-nori*). Hot yellow mustard (*karashi*). Kelp (*konbu*). Kelp (salted) (*shio-konbu*). Mirin. Miso paste (Sweet white miso, nonsweet white miso, red miso). Nori seaweed. Pickled plums (*umeboshi*). Rice cakes (*mochi*). Rice vinegar. Saké. Sesame seeds (white, black, or brown). Seven-spice pepper. Shiitake mushrooms. Shiso leaves. Soba noodles. Somen noodles. Soybeans (fresh young) (*edamame*). Soy sauce (dark, light, tamari). Tofu (freeze-dried) (*Koya-dofu*, *kori-dofu*, or *shimi-dofu*). Tofu (fresh). Tofu (thick deep-fried). Tofu (thin deep-fried). Udon noodles. Wakame seaweed. Wasabi horseradish (“has a tingling hotness that goes straight to the nose”).

About the authors (inside rear dust jacket, with small color portrait photos of each): “Shizuo Tsuji is president of the Ecole Technique Hôtelière Tsuji, the largest culinary school in Japan. It comprises three divisions, whose total enrollment currently exceeds three thousand. At the main school, which offers intensive courses in Japanese, French, Italian, and Chinese cooking, aspiring chefs receive the training necessary to become professionals. At the Ecole Supérieure de Pâtisserie Tsuji students may perfect their

confectionery techniques. The Centre de Perfectionnement in Liergues, France, accepts those desirous of completing their education with firsthand experience in Europe.” All classes are conducted in Japanese. He is author of the classic book *Japanese Cooking: A Simple Art* (1980, in English). Address: Tsuji Professional Culinary Inst., Osaka, Japan.

6933. Wang, H.L.; Fang, S.F. 1986. History of Chinese fermented foods. *Mycologia Memoir* No. 11. p. 23-35. Chap. 2. (C.W. Hesseltine and Hwa L. Wang, eds. *Indigenous Fermented Food of Non-Western Origin*. Berlin & Stuttgart: J. Cramer.) Not previously published in 1981 in USDA Miscellaneous Publication FL-MS-333. [6 ref]

• **Summary:** Discusses the early history of numerous types of chu [ch'ü, qu] (similar to koji, with a substrate of wheat, barley, millet, and/or rice), Chiang [jiang] (salted sauce), shi or tou-shi (fermented beans) [fermented black soybeans], Chiang-you, tou-yu and shi-tche (the liquid from shi [fermented black soybean sauce]; “It is a very dark but clear liquid and was the most popular seasoning in the sixth century”), tou-fu-ru (fermented tofu or sufu), La-pa-tou (Mucor fermented beans), Mei-tou-tcha (Meitauza, fermented okara), tsu (vinegar), yan-tsai (salted vegetables).

The three main sources of early information on fermented soyfoods are: (1) *Shih chi* [pinyin: *Shiji* by Sima Qian] (90 B.C., historical record). (2) *Ch'i-min yao-shu* [pinyin: *Qimin yaoshu*, by Jia Sixie, AD 544, “Important arts for the people’s welfare”] (+6th century agricultural encyclopedia). (3) *Pen-ts'ao kang-mu* [pinyin: *Bencao gangmu*, by Li Shizhen, AD 1596, “The great pharmacopoeia”] (16th century botanical encyclopedia).

Concerning shi or tou-shi [fermented black soybeans]: The first written record “appeared in the *Shi-chi* (the historical records) written by Szuma Chien in the second century B.C., which stated that shi was sold next to salt, indicating shi was already a popular food seasoning.” In the *Qimin yaoshu* (6th century AD) the method of preparing shi is described in detail. Temperature is said to be the most important factor in making shi, and June was found to be the best month for preparing this fermented seasoning. A detailed description of the process is given.

The *Bencao gangmu* (16th century AD) described many types of shi made at different localities, and gave the medicinal use of each.

“In more recent times, shi can be classified into three general types.” (1) *Aspergillus oryzae* mold type, which is the traditional type, also known as tou-shi [douchi], and is the most common type, prepared as described above, but using pure cultures of *Aspergillus oryzae*. Today the fermentation is carried out at 25°C in wooden barrels. “In some areas, the washed, molded beans are mixed with 16-18% salt and fermented at 35°C for 30 days.” (2) *Mucor* mold type, which is usually made in Szechuan in wooden trays. The process is described. The mold is *Mucor*

racemosus Fresenius. (3) *Bacillus* bacteria type, called shui-tou-shi [pinyin: shui-dou-chi], is probably the same product as natto in Japan [except that it is salted]. To make shui-tou-shi: Clean, soak, and boil soybeans until soft. Place in a cloth bag and cover with straw [an excellent natural source of *B. subtilis*]. After incubation for 1-2 days at 25-30°C the soybeans will be covered with viscous substances. The quality of the product is ascertained by the stickiness of the beans. Mix the sticky soybeans with minced ginger and salt, then pack tightly into jars, and age for one week. They are now ready to consume. “The organism responsible for this fermentation has been identified as *Bacillus* species.”

Note 1. Is the third type salted? Salt is apparently added after the 1st fermentation and before the 2nd. Thus, it would seem to be an intermediate form between douchi / tou-shi (fermented black soybeans, salted) and natto (unsalted). If it is not salted, it would seem to be Chinese natto.

Note 2. This is the only document seen (Jan. 2012) that mentions either shui-tou-shi or shui-dou-chi. Address: 1. USDA/NRRC, 1815 N. University St., Peoria, Illinois 61604; 2. Inst. of Microbiology, Academia Sinica, Beijing, China.

6934. Wang, H.L.; Hesseltine, C.W. 1986. Glossary of indigenous fermented foods. *Mycologia Memoir* No. 11. p. 317-44. Chap. 18. (C.W. Hesseltine and Hwa L. Wang, eds. *Indigenous Fermented Food of Non-Western Origin*. Berlin & Stuttgart: J. Cramer). [29 ref]

• **Summary:** The section titled “Fermented Legume Products” defines chao (Vietnamese fermented tofu), Chiang-chu (Chinese koji), ch'ou-toufu and ch'ou-toufu-ru (fermented tofu), Damsuejang and doenjang (Korean miso), furu, sufu, hon-fan or red sufu (fermented tofu), in-shi (“Fermented black soybeans from China”), in-yu (Type of Chinese soy sauce made from black soybeans), kanjang (Korean soy sauce), kenima [sic, kinema], ketjap or kecap (Indonesian soy sauce from black soybeans), meitauza or mei-tou-tcha (fermented okara), meju (maiju or maeju; Korean soybean koji), natto, oncom (onchom or oncom), see-ieu (see-iew; Thai soy sauce made from whole soybeans); soy sauce, soybean paste, tahuri (tahuli; Filipino fermented tofu. See sufu), tao-chieo (tao-jiao; Thai miso), taohu-yi (Fermented tofu from Thailand. See sufu), taokoan, tempe (many types), thua-kab (dry thua-nao), thua-merk (wet and cooked thua-nao), thua-nao (Thai natto), tosufu (see sufu), toufu-ru (fermented tofu), tsue-fan (tsui-fan, chee fan; fermented tofu).

Note 1. This is the earliest English-language document seen (Nov. 2011) that contains the term “Fermented black soybeans from China,” or that uses these terms to refer to *in-shi*.

Under “Fermented Cereal-Legume Products” we find: Chiang, Chiang-yu (chau-yu, Chinese soy sauce), fermented soybeans (fermented black soybeans), hamanatto, kochujang

(kochu chang), miso, shoyu, tamari, taotjo (tao-tjo, tao dji; Fermented soybeans from Indonesia or Thailand [sic, No! *Tao-tjo* is Indonesian-style miso and *tao dji* are Indonesian fermented black soybeans]), tao-tjung or tou-chiang (chiang), tao-yu (tou-yu; Chinese soy sauce), tauco (taocho, taoco, tauchō; Indonesian miso), tou-pan-chiang (Chinese fava bean miso), tou-shi (toushih; Chinese fermented black soybeans), toyo (Filipino soy sauce). Note 2. This is the earliest English-language document seen (March 2009) that uses the word “taocho” to refer to Indonesian-style miso.

Fermented Vegetable Products include: Chiang-tsai (chiang-tsai; Vegetables in China pickled in chiang or soy sauce or tien-mien-chiang), miso-zuke. Address: USDA/ NRRC, 1815 N. University St., Peoria, Illinois 61604.

• **Summary:** This extensive review of the subject by one of the world's foremost authorities focuses on the Japanese product, shoyu. Contents: Introduction: Japanese shoyu, the soy sauce produced in other Oriental countries. Manufacture (of the five types of Japanese shoyu): Koikuchi, usukuchi, tamari, shiro, and saishikomi shoyu. Recent research and technological advances in shoyu manufacturing: Comparison between whole and defatted soybeans as raw materials, treatment of raw materials, koji molds, koji making, control of mash (moromi), refining. Color of shoyu: Color compounds of shoyu, measurement of shoyu color, browning mechanism of shoyu. Flavor evaluation of koikuchi shoyu. Volatile flavor ingredients of koikuchi shoyu: Organic acids, alcohols, esters, carbonyls and related compounds, phenolic compounds (incl. 4-Ethylguaiaicol (4EG) and *p*-ethylphenol, vanillin, ferulic acid, vanillic acid), lactones (incl. aliphatic lactones, 4-8 kinds of gamma lactones identified in Japanese fermented shoyu), pyrazines, sulfur-containing compounds, terpenes, flavor constituents of the topnote aroma of pasteurized shoyu, methods of quantitative analysis of the volatile flavor constituents of shoyu, contribution of volatile

flavor constituents to overall flavor evaluation. Safety problems of shoyu: Nonproductivity of mycotoxins by Japanese industrial molds, fluorescent compounds produced by *Aspergillus* molds with R_f values resembling those of aflatoxins, mycotoxins other than aflatoxins, mutagenic substances in shoyu, bactericidal action of shoyu, biological tests of shoyu. Research needs: Raw materials, koji molds, reduction of fermentation period of mash, application of enzyme preparations, refining and pasteurization, flavor, color. References. Address: Kikkoman Corp., Noda-shi, Chiba-ken 278, Japan.

6938. **Product Name:** [Higeta Soy Sauce].

Foreign Name: Higeta Shōyu.

Manufacturer's Name: Higeta Shoyu Co. Ltd.

Manufacturer's Address: Komai-cho 2-3, Nihonbashi, Chuo-ku, Tokyo 103, Japan.

Date of Introduction: 1986?

New Product–Documentation: Fruin. 1984. History of Five Japanese Shoyu Companies. Soya Bluebook. 1987. p. 94.

6939. Kadocho Mingu-kan. 1986? Shōyu no furusato: Kadochō mingu-kan shokunin-gura [The homeland of shoyu: Kadocho folk tool museum. Craftman's storehouse (Leaflet)]. Wakayama-ken, Japan. 6 panels. Undated. 26 x 12 cm. [Jap; eng]

• **Summary:** Company name with diacritics is: Kadochō Mingu-kan. This company and museum was founded by Mr. Chōbei Kanō. Photos in the leaflet show the ancient shoyu equipment including a lever press (*shime-ki*) used to press shoyu from the moromi mash during the Edo period (1600-1868), up until the Meiji period. a wooden ladle (*shoyu kasuri*), a wooden shoyu vat with bamboo hoops, cloth money collecting bags, and a pedal-powered wooden cog-wheel device for cracking wheat. A re-drawn line (the original was from early Meiji period) drawing shows the exterior of a row of shoyu plants along the street in downtown Yuasa. And a photo shows the inside and exterior of the present K.K. Kadocho, where shoyu is still made by traditional methods.

“The history of Yuasa shoyu: Shoyu, the world famous seasoning, was originally produced in Yuasa from Kinzanji-miso or soy bean paste, which was brought from China in the early 13th century by Hotokokushi of Kokokuji Temple of Yura. In those days, Shoyu was only for use at home and not for sale because of poor traffic facilities. But about 400 years ago, in Azuchi-Momoyama era, Shoyu was first shipped to other parts of Japan as a commodity here in Yuasa.

“Since then, Shoyu industry developed a great deal, thanks to the protection of the Lord of Kishu, and it is said that in the Bunka-Bunsei [Bunka (1804)–Bunsei (1818)?] era, there were 92 Shoyu-ya or Shoyu-makers in about one thousand houses of Yuasa.

“In the meantime, people in Yuasa showed how to make Shoyu to the people in some parts of Japan, such as Choshi near Tokyo. Today the Shoyu industry in Yuasa is dwindling, chiefly owing to the promotion of some major Shoyu companies. But we still have the traditional method of making that Yuasa Shoyu once called Yuasa Tamari in Kamakura era.”

“The origin of shokunin-gura or shoyu workshop: In Yuasa, the birthplace of Soy Sauce, there still remain some old workshops with very thick and crumbling walls here and there. Some workshops are now converted to the residences. With the disappearance of Shoyu makers, we can no longer see craftsmen who used to toil and moil here, and traditional Shoyu things, the fruits of their wisdom and efforts. (Today we have several museums of folk craft throughout Japan. But I feel responsible, as one of the Shoyu craftsmen, for collecting and preserving these old Shoyu things as well as ‘the taste of old days.’)

“Kadocho Shokunin-gura, with the size of 80 square meters, was one of the fermenting houses built in Keio era [in Keio 2, 1866]. All these Shoyu things kept here are the tools used for making Shoyu and each of them has sweat and pains in it of the craftsmen of those days. I welcome you to my Shoyu workshops of about 100 years old.” Address: K.K. Kadocho, Kitamachi 7, Yuasa-cho, Arita-gun, Wakayama-ken, Japan. Phone: 0737-62-2035.

6940. **Product Name:** [Marukin Shoyu].

Manufacturer's Name: Marukin Shoyu Co. Ltd.

Manufacturer's Address: Shinkawa 1-2-5, Chuo-ku, Tokyo 104, Japan.

Date of Introduction: 1986?

New Product–Documentation: Fruin. 1984. History of five Japanese shoyu companies. *Soya Bluebook*. 1987. p. 94.

6941. **Product Name:** [Tamari Shoyu].

Manufacturer's Name: Marusan-Ai Co., Ltd.

Manufacturer's Address: 1 Arashita, Niki-cho (P.O. Box 444-21), Okazaki city, Aichi prefecture 444-21, Japan.

Date of Introduction: 1986?

New Product–Documentation: *Soya Bluebook*. 1987. p. 94.

6942. **Product Name:** [Fried Tofu].

Foreign Name: Tofu-Bratschnitten.

Manufacturer's Name: Morgenland Pflanzenkost.

Manufacturer's Address: Kurze Strasse 1, D-3406 Lengler, West Germany.

Date of Introduction: 1986?

New Product–Documentation: Manufacturer's catalog. 1987. *Kleine Warenkunde*. Yellow. 4 pages. Describes each of the 13 soyfood products. “These ready to eat tofu slices are dipped in shoyu, fried, then lightly de-fatted.”

6943. **Product Name:** [Soynuts (Plain or with Sunflower Seeds and Shoyu)].

Foreign Name: Soja-”Nusse” Mit Sonnenblumenkernen und Shoyu.

Manufacturer's Name: Morgenland Pflanzenkost.

Manufacturer's Address: Kurze Strasse 1, D-3406 Lengler, West Germany.

Date of Introduction: 1986?

New Product–Documentation: Manufacturer's catalog. 1987. *Kleine Warenkunde*. Yellow. 4 pages. Describes each of the 13 soyfood products. “Munch on soynuts straight out of the bag or roast them for 2-3 minutes in a hot, dry pan and season with honey, or soy sauce, with paprika, curry, etc.”

6944. **Product Name:** [Tofu Burgers].

Foreign Name: Tofuburgers.

Manufacturer's Name: Svadesha R. Urban.

Manufacturer's Address: Ostpreussenstr. 22, D-8000 Munich 81, West Germany. Phone: 089 / 93 90 05.

Date of Introduction: 1986?

How Stored: Refrigerated.

New Product–Documentation: Talk with Svadesha R. Urban. 1990. June 13. This product was introduced after he moved to Ostpreussenstr. 22.

6945. **Product Name:** [Tofu Slices {Marinated in Shoyu then Fried}].

Foreign Name: Tofu Schnitten.

Manufacturer's Name: Svadesha R. Urban.

Manufacturer's Address: Ostpreussenstr. 22, D-8000 Munich 81, West Germany. Phone: 089 / 93 90 05.

Date of Introduction: 1986?

How Stored: Refrigerated.

New Product–Documentation: Talk with Svadesha R. Urban. 1990. June 13. This product was introduced after the company moved to Ostpreussenstr. 22. It is now the company's fourth best-selling product. Sliced tofu is laid and marinated in shoyu for 1-2 days, then deep-fried. No bread crumbs are used as a coating.

6946. **Product Name:** [Tofu Spread with Tempeh].

Foreign Name: Tofu Pastete mit Tempeh?.

Manufacturer's Name: Svadesha R. Urban.

Manufacturer's Address: Ostpreussenstr. 22, D-8000 Munich 81, West Germany. Phone: 089 / 93 90 05.

Date of Introduction: 1986?

How Stored: Refrigerated.

New Product–Documentation: Talk with Svadesha R. Urban, company founder. 1990. June 13. After moving to Ostpreussenstr., he introduced new versions of the product, one with herbs and one with tempeh. He also started selling tempeh, which was made by Byodo Naturkost.

6947. **Product Name:** [Tamari Shoyu Brand Soy Sauce

{Sold in the USA}}].

Manufacturer's Name: Yagi Shoyu K.K.

Manufacturer's Address: Tatsuno-shi, Hyogo-ken, Japan.

Date of Introduction: 1986?

6948. Westbrae Natural Foods. 1987. Distributor catalog, FOB pricing: Jan. 1, 1987. Emeryville, California: Westbrae. iv + 19 + [12] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-10 are a computer-printed price list, and 11-19 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) of various Westbrae products. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

6949. Matsuura, Masaru. Assignor to Kikkoman Corp. 1987. Process for production of sterilized packed tofu. *U.S. Patent* 4,636,398. Jan. 13. 4 p. Application filed 2 Jan. 1985. Application also filed in Japan on 13 Jan. 1984. [5 ref]

• **Summary:** Process for production of sterilized packaged tofu. Soymilk is mixed with coagulant, filled into the container, sealed, and heated to simultaneously effect sterilization and coagulation. Address: Noda, Japan.

6950. Frick, Elaine E. 1987. The soybean has its American roots in the South. *Record (Columbia, South Carolina)*. Jan. 14. [2 ref]

• **Summary:** Soy sauce, made in Georgia by Samuel Bowen, was sold by Z. Kingsley at his store in Bedon's Alley. Also about Benjamin Franklin and Samuel Bowen.

6951. Probbler, Jonathan. 1987. Food and fitness: Soy sauce and diet. *New York Times*. Jan. 21. p. C2.

• **Summary:** The Chinese invented soy sauce. The Japanese use a great deal of soy sauce, but theirs is "lighter than Chinese soy sauce." Many households in Korea still prepare their own soy sauce each fall.

There has been a proliferation of soy sauce brands in the USA. Old favorites such as Kikkoman and Ka-me [Kame], which are sold in supermarkets, are now also sold in lower-sodium versions. There is also a brand named Sushi Chef for those who like to make sushi at home.

Regardless of brand, soy sauces contain large amounts of sodium—even the "lite" versions. Kikkoman's "lite," for example, contains 160 milligrams per half teaspoon, which (multiplied by 6) translates into 960 milligrams per tablespoon.

For those on a low-sodium diet—which allows about 1,600 mg of sodium per day—the writer recommends a spray bottle dispenser, with the nozzle adjusted for a fine, misty spray.

6952. Waldbaum's. 1987. Terrific 1/2 (Ad). *New York Times*. Jan. 21. p. C2.

• **Summary:** In the middle of this full-page ad, in between the Vlasic Gherkins and Jolly Time popcorn, in small letters is written: "Yamasa Teriyaki sauce. Reg. 99¢. 10 oz. btl. [bottle] 45¢."

Note: This is the earliest Yamasa ad seen on the East Coast.

6953. **Product Name:** Barbecue Baked Tofu.

Manufacturer's Name: Ashland Soy Works.

Manufacturer's Address: 280 Helman St., Ashland, OR 97520. Phone: 503-482-1865.

Date of Introduction: 1987. January.

Ingredients: Tofu (water, organically grown soybeans, natural magnesium chloride or nigari: a derivative of seawater), tomatoes, molasses, honey, apple cider vinegar, chili powder, prepared mustard (vinegar, water, mustard, salt, turmeric, spices), soy oil, tamari (soy sauce), onion, garlic, parsley, liquid smoke.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 4 by 3 inches. Red and brown on white. Talk with Diana Muhs. 1988. Feb. 10.

6954. **Product Name:** Eastern Flavor Dim Sum or Pot Sticker (Stuffed Dumpling in Wonton Skin) [Vegetable, Shrimp, or Mushroom].

Manufacturer's Name: Eastern Foods Corp. (Distributor).

Manufacturer's Address: 3235 E. Hennepin Ave., Minneapolis, MN 55413.

Date of Introduction: 1987. January.

Ingredients: Vegetable: Wheat flour, soy bean protein [isolate], soy bean oil, soy bean curd (soy beans, water, calcium sulfate), green onion, onion, spinach, water, soy sauce, sesame oil, ginger, salt, black pepper. Note: Shrimp is same ingredients except shrimp is listed first.

Wt/Vol., Packaging, Price: 7.94 oz (225 gm). Package of 15 retails for \$1.89 to \$2.49.

How Stored: Frozen.

New Product–Documentation: Label. 1987. 6 by 9 inches. Gold, red, and blue on clear film. "Microwave Oriental Snack. Fully Cooked. Keep Frozen. Microwaves in 3 minutes. Vegetable Recipe." Talk with Mr. Lee. 1987. Nov. 11. Product was introduced in January 1987. It contains no okara and is now the company's main focus of energy.

6955. **Product Name:** Eastern Flavor Dim Sum or Powza (Stuffed Dumpling in Raised Round Dough) [Vegetable, Shrimp, or Mushroom].

Manufacturer's Name: Eastern Foods Corp. (Distributor).

Manufacturer's Address: 3235 E. Hennepin Ave., Minneapolis, MN 55413.

Date of Introduction: 1987. January.

Ingredients: Vegetable: Wheat flour, soy bean protein [isolate], soy bean oil, soy bean curd (soy beans, water, calcium sulfate), green onion, onion, spinach, water, soy sauce, sesame oil, ginger, garlic, salt, black pepper, yeast. Note: Shrimp is same ingredients but shrimp listed first.

Wt/Vol., Packaging, Price: 7.94 oz (225 gm). Package of 15 retails for \$1.89 to \$2.49.

How Stored: Frozen.

New Product–Documentation: Label. 1987. 6.5 inches square. Gold, red, and blue on clear film. “Microwave Oriental Snack. Fully Cooked. Keep Frozen. Microwaves in 3 minutes. Vegetable Recipe.” Talk with Mr. Lee. 1987. Nov. 11. Product was introduced in January 1987. It contains no okara and is now the company’s main focus of energy. Brochure. 1987. Percentage of households owning Microwaves: 1982 28%, 1987 65%, 1990 79% (Source: Amana study 1986). Dim Sum is grazing food.

6956. Kanematsu, Y. 1987. Hiire shōyu no maku roka ni tsuite [Membrane filtration of pasteurized soy sauce]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 82(1):11-19. Jan. [5 ref. Jap]
Address: Shōda Shōyu KK, Japan.

6957. **Product Name:** Vegetarian Nature’s Patties Burger with Tofu [Original, or BBQ].

Manufacturer’s Name: Nature’s Path.

Manufacturer’s Address: 9451 Van Horne Way, Richmond, BC, V6X 1W2 Canada. Phone: 604-278-4584.

Date of Introduction: 1987. January.

Ingredients: Tofu (organic soybeans, nigari, water), soya protein, sunflower seeds, brown rice, potato, rolled oats, sesame seeds, walnuts, gluten, tomato, onion, pimento, carrots, peppers, celery, sunflower oil, Engevita nutritional yeast, herbs and spices, tamari soy sauce, psyllium seed, molasses, dijon mustard.

Wt/Vol., Packaging, Price: Family size 10 x 3.3 oz patties, or 4 x 3 oz patties. Each is a plastic bag.

How Stored: Frozen.

Nutrition: Per 100 gm: Calories 236, protein 17.4 gm, carbohydrate 22.9 gm, fat 12.0 gm, sodium 185 mg, potassium 185 mg, fiber 1.5 gm.

New Product–Documentation: Leaflet. 1987, undated. 8½ by 11 inches, color. “Nature’s Path Vegetarian Nature’s Patties with Tofu. Contains no animal fats, eggs, dairy products, nitrates, or cholesterol. Succulent non-meat patties. 17% protein.” Spot in Soya Newsletter. 1987. 1(4):6. “Made with tofu (17%) and a wide selection of grains and vegetables. Contains no egg or dairy products.” Label. 1988. 10 by 5.5 inches. Plastic bag. Red, black, and blue on white with color photo of burger and vegetables. Letter from Rick Furdal, manager. 1988. April 4. They have moved to #170-2540 Simpson Rd., Richmond, BC V6X 2P9. Their

restaurant, Woodlands Natural Foods, 2582 West Broadway, Vancouver, BC V6K 2G1 (Phone: 604-733-5411) makes over 100 fresh soyfoods recipes on a rotational basis.

6958. *Soyfoods (ESFA)*. 1987. ESFA objectives. 1(1):31. Jan.

• **Summary:** 1. To prevent consumer deception, ESFA encourages soyfoods producers to establish voluntary standards for the various soyfoods. 2. To work with regulatory agencies in laying out the basis of requirements for the soyfoods on labeling, marketing, and health issues. 3. To provide reliable information to dietitians, press people (the media), and generally speaking to all people looking for information on soyfoods. 4. To promote utilization of soyfoods for their food value. “By soyfoods, we refer among others to the oriental traditional products directly derived from the soybeans, such as soybean milk, tofu, tempeh, soya sauce, and soybean sprouts.”

Those interested in joining the European Soy Foods Association should contact Guy Coudert, ESFA, 12 Avenue George V, 75008, Paris, France. Subscriptions to *Soyfoods* magazine (published by ESFA), 4 issues per year, are 300 French francs. Address: Paris.

6959. Vandemoortele, Philippe. 1987. Editorial. *Soyfoods (ESFA)* 1(1):2. Jan.

• **Summary:** Contents: What are soyfoods? Why was the Association founded? What will the Association do to achieve its goals. What can a member expect from the Association?

“Soyfoods cover all products deriving from the whole soybean produced according to a traditional process and manufactured into soya milk, tofu, tempeh, miso, soya sauce, soya sprouts and other products. Why was the European Soyfoods Assoc. founded? Until only a few years ago, only industrial soya protein such as defatted and fullfat flour, concentrates, isolates, and textured protein were used in the food industry. They are mainly used for their functional properties rather than for their nutritional characteristics.” Now there is a growing interest in soyfoods. The ESFA will organize a Soyfoods Conference every 2 years. Address: President of the ESFA (European Soyfoods Assoc.).

6960. Wilson, Geoff. 1987. Special report from Australia [on soyfoods]. *Soyfoods (ESFA)* 1(1):25-29. Jan.

• **Summary:** Much of this material appeared in the National Farmer (1984), Australia. John Wilson, in charge of soymilk for Alfa-Laval and Owen Price, managing director of the Dairy Farm group of companies in Hong Kong (he has made a soy ice cream) are both expatriate Australians. Contents: New markets beckon soybeans (especially soymilk in Australia and Southeast Asia). Expatriate Australians boosting soy (John Wilson of Alfa-Laval in Sweden, and Owen Price, managing Director of the Dairy Farm group of companies in Hong Kong). Soybeans poised for big

growth (in Australia, especially as soymilk). Tofutti takes off in Australia (David Grossbaum of Shoyu Natural Products in Melbourne has the sole Australian franchise for this popular soy-based product). Tofutti is tantalising U.S. tastebuds. Sustagen Gold uses dairy and soy foods (The increasingly popular Combibloc carton is now being used by Bristol Meters to package this product). Soy-dairy blends to overcome disadvantages. Six new soy drinks expected (following Golden Life, the first Australian soy drink launch late last year by Martin Pharmaceuticals). Soy products will enter the market (in Australia, believes Anders Lindner of STS–Soya Technology Systems). Flavored Soy Drinks selling well (according to Don Lazzaro of Ceres Natural Foods Pty Ltd. in East Bentleigh, Victoria). Address: Freelance journalist, Australia.

6961. *Toyo Shinpo (Soyfoods News)*. 1987. Kikkôman Chitose kôjô kadô [Kikkoman's plant in Chitose, Hokkaido, begins operation]. Feb. 21. p. 2. [Jap; eng+]

• **Summary:** The Kikkoman Corporation has built a 4-story, 273,000 square meter plant at Chitose, in Hokkaido. In August 1986, they started fermentation processes there, and on January 30, 1987, the first shoyu produced at the plant was shipped to market. Capital expenditure for the plant was about 700 million yen. The production capacity is 20,000 kl/year, enough to supply the shoyu demand in the Hokkaido region. The plant mainly produces "Kikkoman Shoyu," "Kikkoman Amakuchi Shoyu," and "Kikkoman Menmi." This is the corporation's third plant in Japan; it uses the latest technology and has the highest capacity of production of any of their plants.

6962. *Changing Times (Washington, DC)*. 1987. Sauces: Oh–It's soy. Feb.

• **Summary:** For raw fish and sushi dishes, choose tamari. Along with a richer, darker flavor it will be slightly lower in alcohol and salt content. If you want even less salt and alcohol and your dish can withstand an even darker color and richer flavor, then choose saishikomi. A final choice, yellow-tan, is called shiro. Use if for dishes where preservation of food flavor is especially important, as in delicate noodle soups.

6963. Diamond, Marilyn. 1987. A new way of eating: The proper foods, combinations, and recipes to start you on the road to health. New York, NY: Warner Publications. 158 p. Feb. Introduction by Harvey Diamond. Index of recipes by type. 21 cm.

• **Summary:** This is a slightly revised re-release of Marilyn Diamond's first book "The common sense guide to a new way of eating" (1980, Golden Glow Publishers). "Marilyn Diamond, co-author with her husband, Harvey Diamond, of *Fit for Life*, the diet and life-style program that has swept America from coast to coast, has been a student and

teacher of international cuisine for over 20 years. She is a Phi Beta Kappa, magna cum laude graduate of New York University, with certification in nutritional counseling from the American College of Health Science. She is director of the Institute for Nutritious Home Cooking in Santa Monica, California, and specializes in counseling for children and pregnant women. Much of her time is spent coordinating numerous projects, such as a *Fit for Life* food product line, *Fit for Life* restaurants, and a national *Fit for Life* club and newsletter." She lived one summer as an exchange student in Avignon, France.

This book is based on several dietary principles: 1. Consumption of a sufficient quantity of water-content foods, such as raw fruits and vegetables. One should eat lots of salads. 2. Proper food combining. 3. Correct consumption of fruit to cleanse your body. A fruit-only breakfast is recommended. 4. Avoid acid-causing foods such as meat, coffee, alcohol, dairy products, cooked nuts or fruits, and chemically processed foods such white sugar and white flour. Fresh fruit and vegetable juices neutralize acid. Note that small amounts of meat, chicken, and dairy products are included in some recipes (see p. 28-29, 48-49, 127, 129, 131, 134, 136, 138) since the author advises people to move away from their addictions and habits slowly and to enjoy feasts on special occasions.

Soy-related recipes include: Chinese vegetable salad and dressing (with soy sauce, p. 43, 55). Tamari salad dressing (p. 57). Easy minestrone (with white or red miso, p. 69). Easy chow mein (light soy sauce, tamari, and miso, p. 148). Note that tofu is not mentioned. Address: Fit for Life, 2210 Wilshire Blvd., Suite #118, Santa Monica, California 90403.

6964. **Product Name:** [Japanese Style Shoyu].

Manufacturer's Name: Granja Tierra Nueva.

Manufacturer's Address: Aldea San Luis, La Azulita, C.P. 5102, Estado Merida, Venezuela.

Date of Introduction: 1987. February.

New Product–Documentation: Letter from Ing. Oswaldo Perez. 1987. July. He made 400 liters.

6965. Ismunadji, M.; Zulkarnaini, I.; Somaatmadja, S. 1987. Nutritional disorders of soybean in Indonesia. *CGPRT* No. 10. p. 167-74. Feb. J.W.T. Bottema, F. Dauphin, and G. Gijsbers, eds. Soybean Research and Development in Indonesia. [11 ref]

• **Summary:** Nutritional disorders of soybean are common in Indonesia. Visual symptoms, such as leaf chlorosis (potassium deficiency), stunted growth, and malformation of leaves are often observed in the field. Molybdenum and phosphorus deficiencies, aluminum toxicity, and acid mineral soils (corrected by careful liming) are common problems on specific soil types.

Soybean is the most important grain legume crop grown in Indonesia. It is used for food and feed and plays an

important role in the Indonesian diet as a source of protein. Soybean protein is much cheaper than protein from animal sources. Soybean-based food such as tempe, tahu, soy sauce and tauchu are very popular. Indonesia is not yet self-sufficient in soybean and imports are close to a half million tons/year. The Government is promoting soybean production by acreage expansion and intensification. Address: Bogor Research Inst. of Food Crops (BORIF).

6966. Nakadai, Tadanobu. 1987. Shôyu no saishin gijutsu ni tsuite. I. [Current techniques for soy sauce production. I.]. *Nippon Jozo Kyokai Zasshi (J. of the Brewing Society of Japan)* 82(2):95-98. Feb. [9 ref. Jap]

• **Summary:** Techniques include electrodialysis, ultrafiltration, reverse osmosis, and extrusion. Address: Kikkoman, Jôzô Kagaku Kenkyû-jo, Japan.

6967. **Product Name:** [Tofu Spread].

Foreign Name: Lang Tzu.

Manufacturer's Name: Sojatopf. Renamed Soto in April 1989.

Manufacturer's Address: Friedrich-Ebert-Str. 40, D-8323 Trostberg, West Germany. Phone: 08621-62538.

Date of Introduction: 1987. February.

Wt/Vol., Packaging, Price: 200 gm glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Letter (fax) from Harry Whitford. 1990. May 30. Gives full details on product based on interview with Gerhard (Oskar) Schramm. "The German name sounds like Lao Tzu (The Chinese sage) but means 'grab it.' A very delicious spread with a hearty yeastflake [nutritional yeast]-tamari type taste reminiscent of liverwurst." On 1 Jan. 1990 the company moved to Wolfbergerstr. 47, D-8211 Breitbrunn am Chiemsee, West Germany.

6968. Tabor, Steven R.; Gijsbers, G. 1987. Soybean supply/demand prospects for Indonesia. *CGPRT* No. 10. p. 51-61. Feb. J.W.T. Bottema, F. Dauphin, and G. Gijsbers, eds. Soybean Research and Development in Indonesia. [2 ref]

• **Summary:** Soybean production is concentrated on Java. In 1986, Java accounted for 61% of total production of soybeans. The Province of East Java alone accounted for 37% of national production. Among other provinces, Sumatra accounts for 22% of total production; Sulawesi for 6.4%, and Bali and Nusa Tenggara for 8.7%. Java also accounts for the bulk of soybean consumption. More than 90% of total consumption of soybean products takes place in Java, according to the 1984 National Socio-Economic Survey (SUSENAS).

In 1986, soybean imports increased by 14% to a total of 343,000 tonnes. The total soybean import bill for 1986 was US\$70.3 million. In 1986, soybean meal imports were 285,000 tonnes at a total cost of US\$ 59 million. A total of

US\$ 2 million worth of soybean oil and modified soybean oil were imported in 1985. Small amounts of soybean sauces are also imported. The total value of sauce imports in 1985 was US\$ 95,000. In 1986 the total cost of all soybean imports, including beans, meal, oil and sauces, was approximately US\$ 131.5 million.

"Per capita consumption of soybeans has increased rapidly from 3.2 kg in 1970 to 5.3 kg in 1980. In 1985, per capita consumption was estimated as 5.9 kg. Based on the large increase in both production and imports in 1986, the 1986 domestic consumption is estimated at 7.9 kg/capita." Aggregate growth in soybean demand will increase at an average of 2.7% per annum in the period 1987-2000. Table is given showing soybean area harvested, yield, production and growth rates from 1969 to 1986 with forecasts from 1987 to 2000. Address: 1. Economist, U.S. Agency for International Development (USAID) Secondary Crops Development Project; 2. Economist, CGPRT Centre.

6969. Eden Foods, Inc. 1987. Traditional Japanese foods. 701 Tecumseh Rd., Clinton, MI 49236. Manufacturer's catalog.

• **Summary:** Contains information on the production and use of tamari, shoyu, and miso. The company still uses the terms Hacho [sic, Hatcho] miso, kome miso and mugi miso, and still confuse consumers by calling their shoyu "Tamari-Natural Shoyu." Address: Clinton, Michigan.

6970. Le Seuil. 1987. Catalogue [Catalog]. Zone Industrielle, 34190 Ganges, France. 34 p. 21 x 10 cm. [Fre]

• **Summary:** In French "Seuil" means "Threshold, sill, or shelf (of the ocean bed)." Contents: Oriental specialties (tamari, shoyu, and miso imported from Japan, p. 6-8). Soya pasta (spaghetti & macaroni, p. 15). Yellow soybean (p. 17). Virgin soy oil (p. 20).

Letter from Maurice Marchand. 1989. June 1. The company, which was founded in 1979, moved to this new address on 1 Jan. 1986. They are very interested in soyfoods, both imported (they import from Mitoku and Yamato), and made in France (they work with Athanor and Sojadoc). Address: Ganges, France. Phone: 67.73.99.80.

6971. Lee, Min-Hsiung; Kwok, Kam-Fu. 1987. [Studies on the flavor components of soy sauce]. *Chung-Kuo Nung Yeh Hua Hsueh Hui Chih (J. of the Chinese Agricultural Chemical Society, Taiwan)* 25(1):101-11. March. [29 ref. Chi; eng]

• **Summary:** One-year fermented soy sauce was prepared, and content and composition of its flavor components investigated. Contents of sugars and 5'-nucleotides were small, and thus may contribute only little to flavor. Free amino acids (51.44 mg/ml) were the main contributors to taste. L-Glutamic acid was the major component, 12.73% of total free amino acids. Content of organic acids was 3.52 mg/

ml; acetic acid was the major component (69.03% of total) and because it is very volatile and has a strong taste it was considered an important factor in soy sauce flavor. Of the volatile flavor components, furfuryl alcohol was the major one (based on GC [gas chromatogram] peak area), followed in order by 4-hydroxy-2(or 5)-ethyl-5(or 2)-methyl-3(2H)-furanone (HEMF), 2,3-butanedione, meso-2,3-butanediol, 2-phenyl ethanol, ethyl palmitate, isoamyl alcohol and ethyl linoleate. HEMF is considered to be the most important aroma contributor. Address: Graduate Inst. of Agricultural Chemistry, National Taiwan Univ., Taipei, Taiwan.

6972. Manuel, Paciencia C.; Huelgas, Romeo R.; Espanto, Leina H. 1987. Adoption of soybean in Lupao, Nueva Ecija, The Philippines. *CGPRT* No. 7. xvi + 57 p. March. Contains 50 tables. (Regional Co-ordination Centre for Research and Development of Coarse Grains, Pulses, Roots and Tuber Crops in the Humid Tropics of Asia and the Pacific, Bogor, Indonesia). Summarized in *Palawija News*. 1987. 4(1):10-11. March. [9 ref]

• **Summary:** This report describes and analyzes the performance of farmers participating in a package of technology program. Constraints to better yields were lack of water during vegetative growth, the occurrence of pests and diseases, and seed supply.

Some 70-90% of the Philippines' domestic production and imports of soybeans is used for animal feeds. Imports have risen sharply from 136,000 tonnes (metric tons) of soybean meal in 1979 to 291,000 tonnes in 1983. Imports of whole soybeans are small: 30,000 tonnes in 1983. Domestic soybean production in 1983 was a mere 8,000 tonnes.

In human foods, soybeans are most widely used as a coffee substitute. Only small amounts are used to make tofu, soy sprouts, and soy sauces. In 1983 the Philippine Government launched a program to develop soybean production to offset rising soybean meal imports. "The target was to be 130,000 hectares planted to soybean in 1986-1987 with a projected yield increase from 1.2 tonnes to 1.8 tonnes by 1986-1987. The programme aims at approximately 50% self-sufficiency in soybean in 1986-1987."

In Lupai it was found that 34% of the sample farmers participating in the soybean program achieved yields lower than 500 kg/ha of dry grain. Yields conforming to the national average of 1.2 tonnes/ha were reached by 20% of the participants. "The case study in Lupao permits the conclusion that the present recommended package of technology needs further adaption [adaptation] to farm-level practices; in particular, careful assessment of the place of soybean in the cropping calendar is necessary."

Contents: 1. Introduction; 2. The Farmer and His Environment; 3. Farmer Evaluation of the Pot (Package of Technologies); 4. Economic Evaluation of the Pot Trials; 5. Constraints to Soybean Production; 6. Conclusions and Recommendations. Address: 1. Agricultural Economist, Asst.

Prof. & Project Leader, Dep. of Agroc. Economics, UPLB-CDEM, College, Laguna 3720, Philippines.

6973. **Product Name:** Nasoya Teriyaki Tofu.

Manufacturer's Name: Nasoya Foods, Inc.

Manufacturer's Address: 23 Jytek Park (P.O. Box 841), Leominster, MA 01453.

Date of Introduction: 1987. March.

Ingredients: Tofu, expeller pressed sunflower oil, sauce: sauce; well water, apple and pear juice, soysauce, apple cider vinegar, lemon juice, natural herbs, spices and flavorings, natural vegetable gum.

Wt/Vol., Packaging, Price: 16 oz.

How Stored: Refrigerated.

New Product–Documentation: Leaflet. 1987. 8½ by 11 inches, color. "Make Meatless Meals in Minutes. Tofu in Oriental Sauce." Label reads: "Heat and serve. Tofu in teriyaki sauce." Soya Newsletter. 1987. 1(3):8. Spot in *Natural Foods Merchandiser*. 1987. June. p. 56. Retails for under \$2.50 per 16 oz package. Has a 5 week shelf life.

6974. **Product Name:** Hot & Spicy Szechuan All Purpose Sauce.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231.

Date of Introduction: 1987. March.

Ingredients: San-J tamari soy sauce, water, wine, honey, rice vinegar, apple vinegar, mustard, red pepper, garlic, ginger, kuzu, black & white pepper, ground sesame seeds, Japanese [ume] plum concentrate, xanthan gum, Chinese peppercorn.

Wt/Vol., Packaging, Price: 5 and 10 oz bottles.

How Stored: Shelf stable.

New Product–Documentation: Ad in *Vegetarian Times*. Sept. p. 11. "Simply Szechuan. The exotic tastes of Szechuan cuisine have been deliciously married in this versatile easy-to-use sauce. Awaken your palate with San-J. Since some like it hot!" Spot in *Vegetarian Times*. 1987. Oct. p. 63. It is wheat free. Leaflet. 1987. Front and back. "Szechuan cuisine is hot!"

Two labels sent by Misako Binford of San-J International. 2012. May 14. The red label now reads: Szechuan: Hot & Spicy Marinade & Stir-Fry. Gluten Free Soy Sauce. 10 fl. oz. A logo on the front panel: Certified Gluten Free. She notes: 1987 or before. Imported.

6975. **Product Name:** [Tofumé Smoked Tofu].

Foreign Name: Tofumé.

Manufacturer's Name: Société Soy.

Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

Date of Introduction: 1987. March.

Ingredients: Water, soybeans (23.4%), soy sauce, spices,

and aromatics.

Wt/Vol., Packaging, Price: 200 gm poly bag, two per bag.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Calories 129, protein 13.1 gm, fats 8.2 gm, carbohydrates 0.6 gm.

New Product–Documentation: Full-color English-language leaflet. 1988, undated. Smoked tofu with spices. Letter from Bernard Storup. 1989. March 3. This product was launched in March 1987 and is still on the market. Label. 1989, received. 8 by 4 by 1.5 inch paperboard box. Red, yellow, green, and brown on light yellowish beige. “Recipes for two inside. Preparation based on soya. Smoked on a wood fire. Easy to cook. The green protein (La proteine verte). Store at +4°C. Order our recipe book by sending 20 French francs in postage stamps.” Color illustration on cover of diced smoked tofu with vegetables, cheese, and shrimp. Color recipe on the back.

Label. 1989. 4 by 7.5 inches. Brown, green, red, and yellow on white. Printed on poly bag. “Fresh tofu smoked on a wood fire. Tofu, a food balanced in protein 16.1%, lipids 9.2%, and carbohydrates 1.6%, is prepared by SOY from the best organically grown soybeans.” Shows the Nature et Progres logo indicating organically grown ingredients.

6976. **Product Name:** Szechuan Baked Tofu.

Manufacturer’s Name: Surata Soyfoods.

Manufacturer’s Address: 302 Blair Blvd., Eugene, OR 97402.

Date of Introduction: 1987. March.

Ingredients: Tofu (organically grown soybeans, water, nigari), E.V.K. Szechuan Sauce (soy sauce, vinegar, water, salt, toasted sesame oil, cooking sherry, arrowroot, herbs, spices).

Wt/Vol., Packaging, Price: 8 oz in poly bag.

How Stored: Refrigerated.

New Product–Documentation: Label. undated. 2.5 by 3.25 inches. Red, silver, and black on white. “An Oregon Cooperative. Hot & Spicy.” A second label, same size and color, received June 1988 and said to be introduced in March 1987, has the following ingredients: “Surata Tofu (organically grown soybeans, water, nigari), Szechuan Sauce (water, soy sauce, vinegar, toasted sesame oil, cooking sherry, herbs and spices, carob bean gum, carrageenan).”

Form filled out by Shevah Lambert. 1990. July 2. Surata now makes 300 lb/month of this product. He says production started in July 1988, but in Jan. 1991 says that the product was actually introduced in March 1987.

6977. **Product Name:** Croissant Cuisine: Vegetarian Barbecue (Whole Wheat Croissants Stuffed with Textured Soy Protein in Sauce).

Manufacturer’s Name: Tumaro’s Inc.

Manufacturer’s Address: 5300 Santa Monica Blvd., Los Angeles, CA 90029.

Date of Introduction: 1987. March.

Ingredients: Beef-like strips (soy flour, soy oil, water, lemon juice, tamari, spices). Sauce: tomato paste, honey, apple cider vinegar, water, tamari, arrowroot starch, natural distilled wood smoke.

Wt/Vol., Packaging, Price: 6 x 6.5 oz.

New Product–Documentation: Leaflet. 1987, undated. 8½ by 11 inches. Blue on beige. “A brand new line. Delicious! Unique! Exciting!”

6978. **Product Name:** Tempeh Temptations: Marinated Tempeh Filets.

Manufacturer’s Name: Western Soy Complements, Inc.

Manufacturer’s Address: Santa Cruz, CA 95062.

Date of Introduction: 1987. March.

Ingredients: Soybean tempeh (made with organic soybeans and brown rice according to CA Health and Safety Code Section 26569.11), shoyu (a natural soy sauce), fresh ginger, garlic, spices, peanut or safflower oil.

Wt/Vol., Packaging, Price: 7 oz vacuum packed. Retail for \$1.69 (8/88 Berkeley, CA).

How Stored: Frozen.

New Product–Documentation: Label. 1988. 2.5 by 3.25 inches. Orange, black, and white. “A cutlet. A burger. For salad. Stir fries. Heat ‘n’ eat. Complete protein. Delicious cold, too! Perfect for toaster or microwave.” Talk with Jeremiah Ridenour. 1988. Aug. 31. This is a fried and marinated product that was launched in March 1987.

Product with Label purchased at Safeway supermarket in Lafayette, California. 1990. Dec. 3. The ingredients have changed: Soy-rice tempeh is used instead of soy tempeh, and canola oil instead of peanut or safflower oil. It is now a 6 oz. vacuum pack that retails for \$1.79.

6979. **Product Name:** Sesame Peanut Tempeh.

Manufacturer’s Name: White Wave, Inc.

Manufacturer’s Address: 1990 North 57th Court., Boulder, CO 80301. Phone: 303-443-3470.

Date of Introduction: 1987. March.

Ingredients: Tempeh (made with soybeans organically grown in accordance with section 26569.11 of the California Health and Safety Code and brown rice), natural soy sauce, garlic, onion, spices.

Wt/Vol., Packaging, Price: 6 oz (170 gm). Vacuum packed in poly pouch.

How Stored: Frozen or refrigerated.

Nutrition: Per 3 oz.: Calories 190, protein 9 gm, carbohydrates 6 gm, fat 3 gm, sodium 466 mg.

New Product–Documentation: White Wave Order Form.

1988. April. Talk with Steve Demos. This product, whose main ingredient is soybeans, was introduced at the same time as Sea Veggie Tempeh. He chose the colors for the artwork in the airport in New York on his way to India.

6980. Yanagida, Fujiharu. 1987. Traditional foods and their processing in Asia. Tokyo: NODAI Research Institute, Tokyo Univ. of Agriculture (Tokyo Nogyo Daigaku, Sogo Kenkyugo). vii + 235 p. Illust. No index. 26 cm. [50+ ref]
• Summary: "This volume was compiled from manuscripts presented at the seminar entitled "Seminar on Traditional Foods and Their Processing in Asia," which was held on November 13-15, 1986 at the Tokyo University of Agriculture, Japan." About 100 scientists from Japan, Indonesia, the Philippines, Thailand, Burma, Korea, Malaysia, Nepal, and Taiwan attended. The seminar was organized by NODAI Research Institute of Tokyo University of Agriculture. Address: Faculty of Agriculture, Gadjah Mada Univ., Indonesia.

6981. **Product Name:** Pasties (With Tofu Filling) [Regular, or Curry].

Manufacturer's Name: Bean Machine.

Manufacturer's Address: Grymych, Wales, UK.

Date of Introduction: 1987. April.

Ingredients: Dough: Incl. wholemeal flour. Filling: Incl. tofu, vegetables, soy sauce, spices.

How Stored: Frozen or refrigerated.

New Product–Documentation: Carolyn Rees. 1987. April. Soyfoods (ESFA). "The Bean Machine story." Pasties can be sold in different forms such as cooked and then frozen, raw and frozen, or fresh baked. They are ready to eat, and are mainly bought by cafes.

6982. **Product Name:** Somozas (Whole Meal Pastry Pouch With Tofu Filling).

Manufacturer's Name: Bean Machine.

Manufacturer's Address: Grymych, Wales, UK.

Date of Introduction: 1987. April.

Ingredients: Dough: Incl. wholemeal flour. Filling: Incl. tofu, vegetables, soy sauce, curry, and raisins.

How Stored: Frozen.

New Product–Documentation: Carolyn Rees. 1987. April. Soyfoods (ESFA). "The Bean Machine story." "A samoza is a whole meal pastry pouch or Indian origin... The name samoza comes from the name samoza, but we thought soyamoza is definitely a more appropriate name. The product has been discontinued due to lack of people and problems of distribution."

6983. **Product Name:** Tofu Bites (Marinated Deep-Fried Tofu Cubes).

Manufacturer's Name: Bean Machine.

Manufacturer's Address: Grymych, Wales, UK.

Date of Introduction: 1987. April.

Ingredients: Incl. tofu, tamari, flour, spices, oil.

New Product–Documentation: Carolyn Rees. 1987. April. Soyfoods (ESFA). "The Bean Machine story." "The Tofu bites are a cube of tofu marinated in tamari and tossed in a

flour and spices mixture. They are cooked by deep frying and are delicious with salad."

6984. Business Communications Co., Inc. 1987. Mass merchandised "healthy" foods. 25 Van Zant St., Norwalk, CT 06855-1781. 162 p. April. Price: \$1,500.

• Summary: In this expensive (\$1,500) market study, there is a chapter titled "The Soyfoods Market," which has the following segments: Summary of market segment. The tofu market. Soy-based frozen desserts. Soy-based beverages. Soy-based yogurt-like products. Other soy-based prepared foods. Fermented soy products. "A move toward the consumption of convenient, good-tasting foods with a healthful image is the food trend of the eighties. There is a strong relationship between healthful foods and the consumer's need for convenience. In the future, food manufacturers can expect the growth of 'healthy' foods to outpace that of the total food market, as more consumers pursue a healthful lifestyle..."

"BCC defines the 'healthy' food market as those segments of food categories that are generally accepted by the consumer as having a healthful image. Total retail sales of all product segments included in this analysis were estimated to have reached \$88 billion in 1986." Address: Norwalk, Connecticut. Phone: 203-853-4266.

6985. **Product Name:** Fred Marken's Hawaiian Teriyaki (100% Natural Marinade and Sauce).

Manufacturer's Name: Fred Marken Inc.

Manufacturer's Address: 1428 Yosemite Ave., San Francisco, CA 94124. Phone: 415-822-4675.

Date of Introduction: 1987. April.

Ingredients: Incl. soy sauce, pineapple juice, brown sugar, fresh garlic, fresh ginger, sodium benzoate.

How Stored: Shelf stable.

New Product–Documentation: Interview with Fred Marken. 1987. Sept. This product was first on the shelves in April 1987. The product is rich in pineapple juice and contains less soy sauce than most brands, giving it a lower salt content and milder flavor. Label and sell-sheet sent by Fred Marken. 1987. Sept. New label sent by Fred Marken. 1990. Nov. 5.

6989. **Product Name:** [Bio Mets Athanor Vegetable Curry {With Tempeh}].

Foreign Name: Bio Mets Athanor Curry Végétal.

Manufacturer's Name: Athanor SARL.

Manufacturer's Address: ZAE La Biste “Atelier 9,” 34670 Baillargues, France. Phone: 67 87 0608.

Date of Introduction: 1987. May.

Ingredients: Tempeh, onions or leeks, carrots, white turnips, cauliflower, raisins, soy sauce, pure sunflowerseed oil, spices and aromas, unrefined seasalt.

Wt/Vol., Packaging, Price: 250 gm plastic tray in a paperboard box. FOB Price 12.35 FF.

How Stored: Refrigerated.

Nutrition: Per 100 gm: Calories 111, lipids 7.9 gm, protein 6.0 gm, carbohydrates 3.9 gm.

New Product–Documentation: Label. Received 1988. May. Paper box, 5.5 by 4 by 1 inches. Multi-colored illustration of curry on front panel with sun logo. “100% Plant Protein. Preparation based on tempeh and vegetables. Ready in several minutes.”

6990. **Product Name:** [Bio Mets Athanor Vegetable Ragout {With Tempeh}].

Foreign Name: Bio Mets Athanor Ragoût Végétal.

Manufacturer's Name: Athanor SARL.

Manufacturer's Address: ZAE La Biste “Atelier 9,” 34670 Baillargues, France. Phone: 67 87 0608.

Date of Introduction: 1987. May.

Ingredients: Tempeh, haricot beans, carrots, onions or leeks, tomato paste, aromas, soy sauce, sunflowerseed oil, unrefined seasalt.

Wt/Vol., Packaging, Price: 250 gm plastic tray in a paperboard box. FOB price 12.15 FF.

How Stored: Refrigerated.

Nutrition: Per 100 gm: Calories 92, lipids 6.3 gm, protein

6.1 gm, carbohydrates 2.6 gm.

New Product–Documentation: Note: *Webster's Dictionary* defines ragout (derived from the French *ragoût*, and first used in about 1664) as “Well-seasoned meat and vegetables cooked in a thick sauce.”

Label. Received 1988. May. Paper box, 5.5 by 4 by 1 inches. Multi-colored illustration of ragout on front panel with sun logo. “100% Plant Protein. Preparation based on tempeh and vegetables. Ready in several minutes.”

6991. **Product Name:** [Bio Mets Athanor Vegetable Bolognaise {With Tempeh}].

Foreign Name: Bio Mets Athanor Bolognaise Végétal.

Manufacturer's Name: Athanor SARL.

Manufacturer's Address: ZAE La Biste “Atelier 9,” 34670 Baillargues, France. Phone: 67 87 0608.

Date of Introduction: 1987. May.

Ingredients: Tempeh, onions or leeks, carrots, tomato paste, soy sauce, sunflowerseed oil, aromas, unrefined seasalt.

Wt/Vol., Packaging, Price: 250 gm plastic tray in a paperboard box. FOB price 11.85 FF.

How Stored: Refrigerated.

Nutrition: Per 100 gm: Calories 54, lipids 2.5 gm, protein 5.6 gm, carbohydrates 2.3 gm.

New Product–Documentation: Label. Received 1988. May. Paper box, 5.5 by 4 by 1 inches. Multi-colored illustration of Bolognaise on front panel with sun logo. “100% Plant Protein. Preparation based on tempeh and vegetables. Ready in several minutes.”

6992. Duxbury, Dean D. 1987. Soy sauce: Distinctive fermented ingredient combines sweet, salty, tart flavors. *Food Processing (Chicago)* 48(5):70-72. May.

• **Summary:** Since the 17th century Kikkoman has continuously been the world's major supplier of soy sauce. The process is still as much an art as a science. Kikkoman's plant at Walworth, Wisconsin, produces 7 million gallons a year in 300,000 square feet with 94 operating employees. The shoyu making process is described; the slow aging of the moromi mash takes 5-6 months, during which time some 20 amino acids and lactic acid, alcohol, and a variety of other flavoring compounds result. Different fermentation cultures are added at various stages in the fermentation process.

Food processors using liquid soy sauce in their formulations can choose from 3 forms of soy sauce or teriyaki sauce: (1) Regular (Traditional) Soy Sauce, which contains sodium benzoate as a preservative and 13.5% sodium chloride (w/w). (2) Lite Soy Sauce, which also contains the preservative but only about one-half the sodium content. (3) Less Salt Soy Sauce, which contains no preservatives. Salt reduction is accomplished using dialysis. Soy sauce is also available in dehydrated form. Regular and reduced salt forms are spray dried onto a dextrin carrier.

Color photos show: (1) A typical Oriental-style stir-fried

dish in a wok; the flavor and aroma comes from added soy sauce or teriyaki sauce. (2) A large, rectangular automated koji room. (3) Kikkoman's newly introduced consumer line of high viscosity sauces includes Teriyaki Baste & Glaze, Stir Fry Sauce, Steak Sauce, Sweet & Sour Sauce, and Tonkatsu Sauce. (4) An aerial view of the Kikkoman plant in Walworth. Address: Associate Editor.

6993. **Product Name:** Light & Zesty Onion Dip (Originally Called Golden Soy Onion Dip).

Manufacturer's Name: Golden Soy Foods Inc.

Manufacturer's Address: P.O. Box 495, Athens, OH 45701.

Date of Introduction: 1987. May.

Ingredients: Organic tofu (water, organic soybeans, calcium sulfate coagulants), water, dried onion, soy oil, apple cider vinegar, shoyu (water, soybeans, wheat salt), raw honey, whole wheat flour, nutritional yeast, dried parsley, salt, vegetable gum, spices.

Wt/Vol., Packaging, Price: 16 fluid oz (1 pint) glass jar retails for about \$3.40.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 1 tablespoon (19 gm): Calories 45, protein 1 gm, carbohydrates 2 gm, fat 3 gm, sodium 170 mg.

New Product–Documentation: Product Alert. 1987. April 27. "Golden Soy Onion Dip." News release. 1987. April 20. The product will be released in May. News release. 1987. Aug. 12. "Cholesterol free, low calorie, low fat." Ads in Natural Foods Merchandiser. 1987. Oct. p. 35. Label. 1987. 10 by 2.5 inches Blue, gray-green, yellow, and white. "Dairy free and no cholesterol. Delicious dip for vegetables & chips. All natural. No preservatives."

6994. Jacobs, Barbara; Jacobs, Leonard. 1987. Cooking with seitan: Delicious natural foods from whole grains. New York, NY: Japan Publications. 256 p. Foreword by Aveline Kushi. Index. 26 cm. [16 ref]

• **Summary:** "Seitan is cooked and flavored gluten that has been extracted from [high-gluten] wheat flour. It is very rich in protein, while being extremely low in fat and calories... The traditional Japanese way of seasoning seitan is to cook it in a broth using kombu sea vegetable, natural soy sauce, and fresh ginger root. This... is the one taken for granted as the 'standard seitan flavor' by commercial seitan makers and most people who are familiar with seitan. Many other mixtures of seasonings can be added to the basic seitan broth. Several earlier books on wheat gluten have been written, generally by Mormons.

This book offers you the history, nutritional information, a variety of preparation techniques, and hundreds of recipes that will allow you to convert wheat into a delicious and nutritious food. Especially suited for vegetarians who are interested in high-protein substitutes for animal foods.

Contents: Acknowledgments. Introduction: About wheat

gluten, gluten, commonly asked questions about seitan.

Getting started. Creating seitan from wheat flour (at home in 30-40 minutes). Using the seasonings. Additional methods of cooking. Appetizers. Soups. Main dishes and casseroles. Side dishes. Salads. Sauces, dressings and marinades. Condiments. Sandwiches. Desserts. From the pantry. Sample lunch and dinner menus. Appendix: 1. All about saving and using wheat starch. 2. Storing uncooked seitan. Storing cooked seitan. 4. Commonly encountered problems and some solutions. Nutritional information. Questionnaire for readers. About our ingredients (discusses natural soy sauce, and soymilk). Glossary (includes fu [dried gluten], miso, natural soy sauce or shoyu, soymilk, tamari, tofu). Bibliography.

Recipes containing soyfoods include: Miso soup with fu and wakame (p. 79). Miso-lemon dressing (p. 171). Tangy miso-tahini sauce (p. 180). Tofu spread with variations (p. 181). Seitan-tofu paté (p. 181-82). Tofu "feta cheese" (p. 192-93). Miso-tahini sauce or spread (p. 209).

When Michio and Aveline Kushi started the Seventh Inn Restaurant in Boston in 1971, they introduced seitan, a food that George Ohsawa had popularized in Japan, especially among macrobiotic people. Yumie Kono taught the chefs, one of whom was Lenny Jacobs, how to make seitan (p. 5).

The Introduction (p. 17-18) states: "Seitan is a food with a long history. Although not widely known in the West, it was traditionally eaten in China, Korea, Japan, Russia, the Middle East, and probably many other countries that grew wheat. In America, the Mormons and the Seventh Day Adventists made gluten and used it on a regular basis... The name *seitan* comes to us from the Japanese, who have prepared cooked wheat gluten for hundreds of years... Some natural foods industry insiders think seitan will become the 'tofu of the '80s.'

"Seitan was introduced to the U.S. natural foods industry about sixteen years ago [1970] when a Japanese variety, shrink-wrapped and quite dry and salty, was first imported. There had been several other varieties available from vegetarian groups, primarily the Seventh Day Adventists and the Mormons. Chinese restaurants have also been preparing wheat gluten for many years. The Chinese call it *mien ching*, or *yu mien ching*. Chinese restaurants often refer to it as 'Buddha Food,' claiming that it was developed by Buddhist monks as a meat substitute. There is also a dried wheat gluten available in Oriental food markets called *fu* by the Japanese and *k'ao fu* or *kofu* by the Chinese."

In the USA, about 130,000 pounds of seitan are made each year. The market is growing rapidly. Current U.S. seitan manufacturers are: 1. Upcountry Seitan in Lenox, Massachusetts, the largest known producer in America, which makes about 600 lb/week and distributes it in 6 states. The company, started about 3½ years ago (counting from Jan. 1987, i.e. founded in about mid-1983) by Win Donovan, is now owned and operated by Wendy Rowe and Sandy Chianfoni. They get a yield of 1.33 (i.e. 90 pounds of

flour result in 120 pounds of seitan). 2. Rising Tide Natural Market in Long Island, New York. Michael Vitti has been making seitan for 6 years. About 1/3 of his production is bought by another company for use in making sandwiches. 3. Grain Dance in San Francisco, California. Ron Harris has been making seitan for 8 years and is currently selling 250 lb/week in 8 oz. packages. 4. Creative Kitchens in Miami, Florida. Yaron Yemini has been making seitan for 3 years, and has seen a 5-fold increase during this time. He now makes 120 lb/week. His yield is 0.7. 5. The Bridge in Middletown, Massachusetts. The company was founded in March 1981 by Roberto Marrocchesi and Bill Spear. They were making seitan by Oct. 1982. Steve Lepenta now makes 400 lb of cooked seitan each week and claims that sales have doubled in the past two years. 6. Maritime Foods in Portland, Maine. Rosemary Whittaker makes 50 lb/week of seitan. 7. Real Foods of Towson, Maryland. Sharon Warren has been making seitan for 6 years and now makes 150 lb/week.

Reviewed by Linda Elliot in East West. June 1987, p. 94. Note: Talk with Lenny Jacobs. 1990. Sept. 10. There has been little growth in the U.S. seitan industry since the book was published in May 1987. Problems with price and quality. If seitan is frozen, after defrosting it can become spongy and soggy. Address: Massachusetts. Phone: 617-232-1000.

6995. Lee, Young Soon; Homma, S.; Aida, K. 1987. Characterization of melanoidin in soy sauce and fish sauce by electrofocusing and high performance gel permeation chromatography. *Nippon Shokuhin Kogyo Gakkaishi (J. of the Japanese Society of Food Science and Technology)* 34(5):313-19. May. [9 ref. Eng; jap]

• **Summary:** Sixteen soy sauce samples and 6 fish sauce samples produced in Asian countries were characterized for melanoidin by electrofocusing on polyacrylamide gels and high performance gel permeation chromatography (HPGPC).

Note: Webster's Third New International Dictionary (1963) defines melanoidin as "any of various colored substances formed from proteins or amino acids (as in the presence of glucose)." Address: Dep. of Nutrition & Food Science, Ochanomizu Univ. Ohtsuka 2-1-1, Bunkyo-ku, Tokyo 112, Japan.

6996. Lumen Food Corp. 1987. Lumen: The 'meatless' solution for the 21st century. Today (Leaflet). Lake Charles, Louisiana. 8 panels. [1 ref]

• **Summary:** "Lumen is the term we use to describe a whole range of products that have the 'look, taste, and texture of real meat products.'" It is sold in poly bags. Flavors currently in stock include beef, Mexican beef, pepperoni, chicken, unflavored, ground beef, teriyaki beef, smoked ham, and Italian sausage. Address: 409 Scott St., Lake Charles, Louisiana 70602.

6997. Madison, Deborah; Brown, Edward Espe. 1987. The

Greens cookbook: Extraordinary vegetarian cuisine from the celebrated restaurant. Toronto and New York: Bantam Books. xx + 396 p. Index. 26 cm. [37 ref]

• **Summary:** Contents: Foreword, by Marion Cunningham. Introduction by Deborah Madison. Preface to the recipes by Edward Espe Brown. Salads. Soups and stocks. Sandwiches and breads. Pizzas. Pasta. Gratins, stews, and casseroles. Tarts and timbales. Filo pastries, fritattas, crepes, and roulades. Companion dishes. Sauces, relishes, and butters. Desserts. Appendix: Seasonal menus, wines and vegetarian food, glossary of ingredients (incl. nutritional yeast, miso {red miso, white miso}, tamari and soy sauce), useful kitchen tools, bibliography.

Soy-related recipes include: Miso soup (p. 63). Grilled tofu sandwich (p. 121). Tofu salad sandwich (p. 122). Vegetable brochettes with marinated tofu (p. 302). Marinated tofu (with "1 or 2 packages firm tofu, 14 to 18 ounces each" and "½ cup tamari soy sauce," p. 304).

Address: Noda Inst. for Scientific Research, Noda, Japan.

6999. Westbrae Natural Foods. 1987. Distributor catalog, FOB pricing: June 1, 1987. Spring / summer. Emeryville, California: Westbrae. iv + 19 + [12] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-10 are a computer-printed price list, and 11-19 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) of various Westbrae products. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

7000. Millon, Marc. 1987. They spend their weekends in search of bellflower, dropwort, sow's thistle and wild mushrooms. *Guardian (England)*. June 12. p. 21.

• **Summary:** Many Koreans spend their weekends (especially in the spring) searching for these wild foods. A recipe for Bulgogi calls for "1/3 pint light soy sauce (such as Kikkoman)" in the marinade.

7001. *Business Japan*. 1987. Japan's oldest biotechnology lays foundation for 21st century. June. p. 116-17.

• **Summary:** Yamasa Shoyu Co. was established in 1645 and has over 340 years of tradition in brewing soy sauce. Michio Hamaguchi is the president. Building on its background in the traditional biotechnology used to make shoyu, Yamasa has invented a technique to manufacture two flavor enhancers, Inosine 5'-monophosphate (IMP) and Guanosine

5'-monophosphate (GMP), by breaking down the ribonucleic acid (RNA) with a special microbial enzyme (nuclease P1).

Yamasa also discovered a synergistic action between L-glutamate and the flavor nucleotides (IMP and GMP), which established the new nucleotide industry. Mixing equal amounts of IMP and GMP made by Yamasa, a product registered as Yamasa IG is provided to the rest of the world. It is used as a flavor base for food processing, as an alternative to meat extract.

Yamasa is also working on DNA synthesis, in vitro diagnosis, and immunology. In the latter area, Yamasa began to work seriously on cell fusion technology in 1978. Fusing a mouse spleen cell and myeloma in 1981, Yamasa successfully developed a monoclonal antibody for the first time in Japan.

Photos show: (1) Michio Hamaguchi, President, Yamasa Shoyu Co., Ltd. (2) An aerial view of Yamasa's main shoyu plant in Choshi, Chiba prefecture, Japan. (3) Two views of working on new biotechnology R&D at Yamasa research laboratories. (4) Bottling Yamasa shoyu at the main plant. (5) Computer monitoring of RNA degradation. (6) Part of the central control room at the Choshi plant. (7) Yamasa cyclic AMP and GMP assay kits. (8) Bottles of commercial Yamasa monoclonal antibodies.

7002. Diamond, Harvey; Diamond, Marilyn. 1987. *Living health*. New York, NY: Warner Publications. xviii + 446 p. Index. 24 cm. [423* ref]

• **Summary:** This extensively documented, hardcover book, published by Warner after *Fit for Life*, became *Fit for Life II*. It is a book based on the philosophies of Natural Hygiene and a vegan diet, free of all animal products, and rich in fresh fruits and fruit juices. In the process, the author's negative attitude toward tofu (expressed in *Living Health*) changed into a positive one. They found that tofu was a very alkaline food.

At Acknowledgments: "Special mention must also be made of the great health reformers, our mentors and predecessors, who under extreme pressure and persecution fought the battle for freedom of choice in health care: Isaac Jennings, Russell Trall, John H. Tilden, Sylvester Graham, Florence Nightingale, Herbert M. Shelton, and all those others far too numerous to mention."

Concerning tofu, in the chapter titled "Questions frequently asked," Harvey Diamond writes: "What about tofu? There is good news and bad news. You know why tofu has no smell and no flavor unless you add garlic, onions, tamari, etc.? Because it is processed at a heat so intense that nothing alive could possibly survive and the process is repeated *three times!* Tofu is absolutely devoid of any nutrients whatsoever. The contention that tofu is a good source of protein is as truthful as the contention that the moon is made of green cheese. Now the good news. People generally eat tofu because they are trying to move

away from flesh foods and tofu helps them do that. *Great!* Tofu is so much less harmful than flesh foods that I would wholeheartedly support you in doing so. But do so with the idea in mind that you will eventually give up tofu as well, or at least cut back on it. It is merely a filler food. Just as with meat, tofu should not be eaten more than once a day, and should be properly combined."

The book also contains a recipe for Miso and vegetables soup (p. 376-77). In the index, there is no listing for soy- (including soymilk or soy sauce), tamari, or tempeh.

Chapters 2 and 3 tell about the authors (autobiographical): Harvey was born in 1945. He had severe stomachaches and frequent colds starting when he was a child. He was extremely thin. From age 18-22 he served in the U.S. Air Force and his last year of duty was spent in Vietnam. His weight ballooned up to 202 pounds but his piercing stomachaches did not go away. His father died of stomach cancer at age 57. At this turning point, Harvey decided to devote all his time to learning about how to become healthy. After long searching, he discovered Natural Hygiene in 1970 in Santa Barbara, California. In one day, after learning the one simple principle of proper food combining, his stomachaches went away (they have never returned) and he soon lost 50 pounds. "So I studied Natural Hygiene on my own, reading every book I could get my hands on pertaining to the subject and involving myself with people in Santa Barbara who had incorporated its principles into their life-styles. Three years later I established myself in Los Angeles, continuing my studies while I counseled people informally on Natural Hygiene... After eight years of independent study much to my excitement and delight, a complete course on Natural Hygiene principles finally became available in 1978" from the American College of Health Science. In Feb. 1983 Harvey received his PhD in nutritional science from this unaccredited college.

Marilyn was born in about 1944. Starting in the 1950s she began to suffer severely from a spastic digestive tract. At age 20 she underwent knee surgery in New York, a turning point in her search for health. By the time she was in her mid-twenties, she was married with two children, but the pain from her stomach spread to her back, so she began to take the painkiller Valium regularly. In 1971 she moved from New York to Los Angeles and began to change her lifestyle and diet. "I used whole grains, cut down on alcohol, and became very uncomfortable with my dependency on Valium." So she stopped taking the drug. In 1975 she met Harvey in Venice, California, where he was working at a produce store. She was ill and desperate, having suffered for over two decades with her digestive tract pain. Two months later they were married, and later they had a child. After going through a painful process of detoxification and withdrawal from Valium, Marilyn became the picture of health.

7003. **Product Name:** Fresh Miso Dressing (Creamy White).

Manufacturer's Name: Good Foods Inc.

Manufacturer's Address: P.O. Box 8542, Santa Cruz, CA 95061.
