Soybeans are also discussed on pages 769-70 (soy idli and dhosa in India), 806 (maize-soybean porridge as a fermented weaning food), and 849-50 (genetic engineering of soybeans). Address: Dep. of Bioscience and Biotechnology, Univ. of Strathclyde, Glasgow, Scotland, UK.

8092. Yokotsuka, Tamotsu; Sasaki, Masaoki. 1998. *Fermented protein foods in the Orient: shoyu and miso in Japan*. In: Brian J.B. Wood, ed. 1998. *Microbiology of Fermented Foods*. 2nd ed. Vol. 1. London: Blackie Academic & Professional / Thompson Science. An imprint of Chapman & Hall. xx + 440 + 17 p. Illust. Index. 24 cm. [197 ref]

• **Summary:** Contents: Introduction. History: The history of fermented proteinaceous foods in China (chu / koji, chuang / jiang, shi [fermented black soybeans], chuang-yu / soy sauce / tou-yu, shi-tche [the juice or extract of shi]).

Note: “This section was based on material drawn from *Thirty-five Years History of Noda-Shoyu Company* (1955), *The History of Kikkoman* (1970), Sakaguchi (1979) and Wang & Fuang (1981),” the history of shoyu and miso in Japan (hishio or sho or soya or soy, miso or mishi, tamari, miso-damari, tare-miso and usudare, shoyu, miso and shoyu of today). Fermented soybean foods in the Orient: shoyu, miso, tempeh and natto: Japanese shoyu (establishment of the Japanese Agricultural Standard {JAS} for shoyu in 1963, production methods, types and grades of shoyu by JAS, quality standard of shoyu exported from Japan, production [statistics], technological contributions by the Japanese government to the shoyu industry, soy sauce produced in Oriental countries other than Japan [Korea, Taiwan, Singapore, Malaysia, Indonesia], miso). Manufacture: Koikuchi shoyu (treatment of raw materials, koji making, mash-making and ageing, pressing of mash, refining), tamari shoyu, miso. Recent progress in shoyu and miso production in Japan: Soybeans and wheat as raw materials (soybeans, wheat), treatment of raw materials (soybeans, wheat), koji moulds, koji-making, mash fermentation (microbes in the mash, chemical changes in shoyu-mash fermentation, temperature of the mash, period of mash fermentation),

refining (pressing of the mash, pasteurization), material balance in shoyu manufacture, product (color and clarity of koikuchi shoyu, flavour components of shoyu {HEMF, HDMF, HMMF, phenolic compounds, flavour constituents of the top note aroma of pasteurized shoyu}, formation of flavour components during heating for pasteurization, flavour components of shoyu worldwide, relationship between organoleptic evaluation of shoyu and its chemical constituents, nutritional concern about excessive salt intake, safety of fermented shoyu [aflatoxins], microbial stability of shoyu). Discussion.

In the *Ben-Chao-Gong Mu* [*Bencao gangmu*, The great pharmacopoeia, 1596] many types of shi are discussed. In more recent times these have apparently been classified into three types depending on the microorganism used in the fermentation: (1) *Aspergillus oryzae* type. (2) *Mucor* type, usually made in Szechwan. (3) *Bacillus* type. Soak and cook soybeans, then place them in a cloth bag. Cover with straw and ferment for 1-2 days at 25-30°C. "When the beans are covered with viscous substances, Shui-tou-shi is prepared." Mix the sticky beans with ginger and salt, then pack tightly into jars; age for one week. The product [a sort of salted natto with ginger] is now ready to eat. "The organisms responsible for this fermentation have been identified as *Bacillus* species" (p. 356). Address: Research and Development Div., Kikkoman Co. Ltd., 339 Noda, Noda-shi, Chiba-ken, 278 Japan.

8093. Hodgson, Moira. 1999. Spices perk up sea scallops, shrimps or sausages. *New York Times*. Jan. 24. p. CT12.

• **Summary:** Includes a recipe for "Spicy shrimps with black beans." The ingredients include "4 tablespoons Chinese preserved black beans,... 2 tablespoons hoisin sauce,... 1 tablespoon soy sauce." Then: "Rinse the black beans thoroughly under cold running water and chop them fine."

8094. Jack, Alex. 1999. Let food be thy medicine: 750 scientific studies, holistic reports, and personal accounts showing the physical, mental, and environmental benefits of whole foods. 3rd ed. Becket, Massachusetts: One Peaceful World Press. 304 p. Index. 23 cm. [8 ref]

• **Summary:** This book, organized alphabetically by subject, is a very original and creative source of information, with hundreds of interesting bibliographic references. The author believes in a natural, whole-foods diet. Includes the following subjects: Alternative medicine, amasake (amazake), Asia Diet Pyramid, azuki beans, bovine growth hormone, cancer, cholesterol, coffee, complex carbohydrates, dairy food, estrogen, evolution, exercise and fitness, fats, fiber, genetically engineered food, genetic model of health and disease, genistein, global warming, heart disease, hiziki, hunza diet, isoflavones, Japanese diet, kombu, kuzu, lignans, longevity, macrobiotics, Mad Cow Disease, meat, menopause, microwave cooking, miso, mochi,

natto, nori, osteoporosis, Paleolithic diet, phytochemicals, phytoestrogens, polyps, potatoes, Price-Weston, prostate cancer, protein, rice, Schweitzer-Dr. Albert, sea vegetables, seitan, sesame, shoyu, soy foods, tempeh, tofu, umeboshi plum, vegans, vegetarians, wakame, wartime restricted (diets, incl. World War I and II), whole grains. Resources. About the author. Address: Box 10, Becket, Massachusetts 01223. Phone: (413) 623-5742.

8095. Nutrisoy Pty. Ltd. 1999. Nutrisoy: Fitness food (Sell sheet). Botany, New South Wales, Australia. 1 p. Feb. Front and back. 30 cm.

• **Summary:** A large color photo on the bottom half of the front panel shows the company's tofu and tempeh products. Three paragraphs above that are titled: Nutrisoy. Tofu. Tempeh.

The back is titled "Nutrisoy products range." A color photo shows each of the company's products, by category. Plain and pre-marinated tofu: Plain Firm Tofu, Tofu Vegies, Tofu Tempeh, Tofu Herbs. Pre-cooked tofu and tofu burger: Tofu Spicy, Tofu Teriyaki, Tofu Vegies Burger, Tofu Tempeh Burger. Tofu deserts and silken tofu: Tofu cups in strawberry, apricot, mango, and tropical flavors. Silken tofu. Tempeh and tempeh burger: Plain Tempeh. Seasoned Tempeh. Mildly Spiced Tempeh. Tasty Tempeh (marinated in ginger and soy sauce). Tempeh Burger.

An attached, 1-page product list, gives the name and weight of all the company's products, including those under special or private labels such as Soyco, Nutal, and a few Indonesian names. They also sell hommus (hummus), chickpea veg. burger, spirulina juice, and berry juice.

Letter from Tony Wondal of Nutrisoy. 2007 Aug. 3. This leaflet was published in Feb. 1999. Address: 15 Hannon St., Botany NSW 2019, Australia. Phone: +61 2 9316 5171.

8096. Stevens & Associates, Inc. ed. and comp. 1999. U.S. 1999 soyfoods directory. Lebanon, Indiana: Indiana Soybean Development Council. 48 p. 28 cm. [23 ref]

• **Summary:** This is the fourth edition of the U.S. Soyfoods Directory. Page 2 states: "And a special thanks goes to the Soy Protein Partnership for sponsoring this project." For a list of farmers and companies that grow soybeans organically, see p. 28. This 1999 Soyfoods directory is now available online at www.talksoy.com. Address: Stevens & Associates, 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

• **Summary:** A good new source of macrobiotic supplies. Includes: Amazake (from Kendall Food Co.), arame (sea vegetable), azuki beans (from Hokkaido {Japan} and

organic), barley malt, black soybeans (from Hokkaido and USA), dulce, fu (dried wheat gluten), hato mugi [hatomugi], hijiki, kanten flakes, koji, kombu, kuzu, mirin, miso, mochi (organic, Kendall), natto (organic, Kendall), natto miso, nori, rice syrup, sea palm, sea vegetable kit (8 varieties), shoyu, suribachi, tamari, tekka, tofu—dried, tofu kit, umeboshi, umeboshi concentrate, wakame, yuba. Address: P.O. Box 500, Becket, Massachusetts 01223-0500. Phone: 1-800-645-8744.

8098. Liu, KeShun. 1999. Oriental soyfoods. In: C.Y.W. Ang, K. Liu, and Y-W. Huang, eds. 1999. *Asian Foods: Science & Technology*. Lancaster, Pennsylvania: Technomic Publishing Co., Inc. 546 p. See p. 139-99. Chap. 6. March. [60 ref]

• **Summary:** Contents: Introduction: Soybeans as a crop, composition and nutritional quality of soybeans, soyfoods—from the east to the west, soyfood classification.

Soymilk: Introduction, traditional soymilk, modern soymilk (techniques for reducing beany flavors, commercial methods, formulation and fortification, homogenization, thermal processing, and packaging), concentrated and powdered soymilk, fermented soymilk (with lactic acid bacteria), soymilk composition and standardization.

Tofu: Introduction, methods of tofu preparation, factors involved in tofu making (soybean varieties, concentration of soymilk, heat process of soymilk, types of coagulants, concentration of coagulants, coagulation temperature, coagulation time, process automation, packaging), varieties of tofu (silken tofu, regular and firm tofu, Chinese semidry tofu {*doufu gan*}, Chinese tofu sheets and tofu noodles, lactone tofu), varieties of tofu products (deep-fried tofu, Japanese grilled tofu, frozen tofu, Japanese dried-frozen tofu, Chinese savory tofu, fermented tofu {Sufu or Chinese cheese, varieties of sufu, preparation methods, preparation principle}).

Soymilk film (yuba). Soybean sprouts. Green vegetable soybeans. Other non-fermented soyfoods: Okara, roasted soy powder.

Fermented soy paste (Jiang and miso): Koji, koji starter, and inoculum (koji, koji starter, inoculum), Chinese jiang (traditional household method, pure culture method, enzymatic method), Japanese miso (preparing rice koji, treating soybeans, mixing and mashing, fermenting, pasteurizing and packaging), principles of making jiang or miso.

Soy sauce (Jiangyou or shoyu): Chinese jiangyou (traditional household method, modern methods), Japanese shoyu (treatment of raw materials, koji making, brine fermentation, pressing, refining), principles of making soy sauce, chemical soy sauce (made by acid hydrolysis; heat with 18% hydrochloric acid for 8-12 hours, then neutralize with sodium carbonate and filter to remove insoluble materials), proximate composition of soy sauce, quality attributes and grades.

Japanese natto: Methods of preparation, principles of preparation.

Indonesian tempeh: Traditional method, pilot plant method, principles of tempeh preparation. Fermented black soybeans (Douchi or Hamanatto): Chinese douchi, Japanese Hamanatto.

Tables: (1) Names (English, Chinese, Japanese, Korean, Indonesian, Malay, Filipino) general description, and utilization of nonfermented Oriental soyfoods. (2) Names (English, Chinese, Japanese, Korean, Indonesian, Malay, Filipino) general description, and utilization of fermented Oriental soyfoods. (3) Proximate composition (gm per 100 gm fresh weight) of some fermented soyfoods.

Figures show: (1) Flowchart: Traditional Chinese method for making soymilk and tofu (from whole soybeans). (2) A commercial processing method (Alfa Laval) for making soybase and a subsequent product—soymilk. (3) Photo of homemade firm tofu. (4) Photo of a dish of tofu and mushrooms. (5) Photo of cubes of sufu (Chinese cheese) on a white plate. (6) Flowchart for making sufu from firm tofu. (7) Photo of two packages of dried yuba sticks (Chinese). (8) Photo of a bowl of soy sprouts. (9) Photo of Chinese chiang, and Japanese red and white miso, each on one of three spoons in a shallow white bowl. (10) Flowchart of a common method for making Japanese rice miso [red miso]. (11) Photo of soy sauce in three different containers: dispenser, small bottle, and large Chinese can. (12) Flowchart of a common method for making Japanese koikuchi shoyu (soy sauce). (13) Photo of two chopsticks lifting some Japanese natto from a bowl full of natto; the thin strings connecting the natto above and below are clearly visible. (14) Flowchart of a common method for making Japanese natto from whole soybeans. (15) Photo of tempeh made in the USA in perforated plastic bags (Courtesy of Mr. Seth Tibbott, Turtle Island Foods, Inc., Hood River, Oregon). (16) Flowchart of traditional Indonesian method for making tempeh from whole soybeans. (17) Photo of Chinese *douchi* (fermented black soybeans) on a white plate.

Note: For a biography of KeShun Liu PhD see p. 544. Address: PhD, Soyfoods Lab., Hartz Seed, A Unit of Monsanto, Stuttgart, Arkansas.

8099. Mangels, Reed. 1999. *Vegetarian Journal's* guide to tofu and tempeh. *Vegetarian Journal* (Baltimore, Maryland) 18(2):20-21. March/April.

• **Summary:** A full-page table gives the nutritional composition of many different brands and products per 3 ounce serving. Data is given for calories, protein, fat, calcium, and iron. Tofu brands/makers include: Azumaya, Kikkoman, MoriNu. Nate's Easy Tofu (smoked), Nasoya, Smoke & Fire, SoyBoy Baked and seasoned (all varieties), White Wave, Whole Foods. The three tempeh makers are: Lightlife, SoyBoy, and White Wave.

For tofu: Calories range from 30 (MoriNu Lite) to 130

(Nate's). Protein ranges from 20 gm (White Wave baked) to 4 gm (MoriNu Soft). Fat ranges from 1 gm (MoriNu Lite) to 9 gm (White Wave baked). Calcium ranges from 600 gm (Nate's) to 20 gm (MoriNu-4 types). Iron ranges from 0.7 gm (MoriNu-4 types) to 9 gm (Nate's). Address: PhD, RD.

8100. Newman, Jacqueline M. 1999. Cultural aspects of Asian dietary habits. In: C.Y.W. Ang, K. Liu, and Y-W. Huang, eds. 1999. *Asian Foods: Science & Technology*. Lancaster, Pennsylvania: Technomic Publishing Co., Inc. 546 p. See p. 453-85. Chap. 15. [104 ref]

• **Summary:** Contents: Introduction. Foods of Bangladesh. Cambodian foods. Chinese foods: Food selection, eating behaviors, intracultural differences, feasts, holidays and special foods. Indian foods. Indonesian foods. Japanese foods. Korean foods. Laotian foods. Malaysian foods. Nepalese foods. Foods of Pakistan. Philippine foods. Thai foods. Vietnamese foods.

In each country and culture, the role and practice of vegetarianism is discussed.

Soyfoods are mentioned as follows: China (p. 458): "For breakfast, Northerners prefer warm soymilk and fried wheat-dough crullers." Vegetarians from both north and south get an important part of their protein "from a sophisticated cuisine based upon considerable use of gluten and tofu," made to look and taste like animal products.

Indonesia (p. 463): "... foods are preferred sweet; even the local soy sauce, kecap manis, is fermented sweetened."

Japan (p. 465): Mentions shoyu and tofu.

Korea (p. 468-69): Mentions tofu.

Malaysia (p. 472): Discusses Chinese who married Malay women (called Nonyas); "their families are called Peranakan or Straits Chinese and their cooking is called Nonya Cuisine. Straits Chinese live mostly in Penang, Malacca, and Singapore; practice Buddhism; and cook their Chinese food with a Malay influence. Their Nonya cuisine is eaten communally; all dishes are served at once,..."

Nepal (p. 473): "During Janai Purnima, a soup called *quantee* is essential; it is made from sprouted soy, chick pea, black beans,..."

Pakistan (p. 476): Pad Thai, a popular lunch dish, is made with tofu. Note: Pad Thai, based on rice noodles, is one of Thailand's national dishes. Address: PhD, R.D., Prof., the Dep. of Family, Nutrition and Exercise Sciences, Queens College-CUNY, Flushing, New York.

8101. Salmon, Margaret B. 1999. Soy expressions: Common-sense way to small food bills. 404 easy soy recipes. Demarest, New Jersey: Techkits, Inc. x + 160 p. Index. 22 cm.

• **Summary:** A quickie spiral-bound soy cookbook. It is not vegetarian; recipes call for the use of lean ground beef, chicken, turkey, frankfurters, turkey frankfurters, tuna, salmon, clams. The section at the back titled "Index" is not

really an index. Some form of soy appears in every recipe; the main forms are tofu, soymilk, soybean sprouts, cooked soybeans, soy sauce, teriyaki sauce, soybean oil, "Smart Dogs," black soybeans, soybean flour, and soy bacon bits. Contents: Introduction. How safe are soybeans? Hundreds of soy recipes. Soy foods taste good. A new look at soybeans. Recipes: Soups. Salads and vegetables. Main dishes. Omelets. Breads, cookies, muffins and snacks. Sugar free soy desserts. Desserts: Pies & puddings. Shakes and pops.

Margaret is the author of many books on food and nutrition. She was "formerly Research Dietitian on the cystic fibrosis research team at Columbia-Presbyterian Medical Center in New York City, and Chief Dietitian and Director of the Dietetic Traineeship Program at St. Joseph's Hospital and Medical Center in New Jersey. She is President of Salmon Consultants, Consultants to physicians, hospitals, schools and federal nutrition programs, and lecturer for schools, colleges, radio and television.

"She received a degree in food chemistry and nutrition at the University of California at Berkeley, and degrees at Columbia University in the science of nutrition and nutrition education. She also has a Certificate of Hospital Dietetics from Duke University and is listed in Who's Who of American Women and World Who's Who of Women and is a Registered Dietitian." Address: R.D., L.D., P.D., Techkits, Inc., P.O. Box 105, Demarest, New Jersey 07627.

8102. Simonds, Nina. 1999. A spoonful of ginger: Irresistible, health-giving recipes from Asian kitchens. New York, NY: Alfred A. Knopf. xii + 322 p. April. Illust. Index. 24 x 21 cm. [53 ref]

• **Summary:** This beautiful hardcover book and cookbook, printed on glossy paper with many color and black-and-white photos, looks at food in two ways: As medicine, and as the source of delicious recipes. The Asian holistic approach is relaxed and non-rigid; it emphasizes balance. Soyfoods appear throughout. Tofu is used to "increase body energy, produce fluids, and lubricate the system. It is said to have yin, or cooling, properties" (p. 23). Miso chicken soup with snow peas and tofu (p. 34). Grilled miso fish fillets (p. 66). Pan-seared halibut with garlicky black bean sauce ("Seasonings: 3 tablespoons fermented or salted black beans, rinsed, drained, and minced, 2 tablespoons minced garlic, 2 tablespoons minced fresh ginger,..." p. 71; "Black soybeans have been used by the Chinese for medicinal purposes for over 2,000 years"). Baked black bean shrimp (with "Seasonings: 2 tablespoons fermented black beans, rinsed and drained; 2 tablespoons minced scallions, white part only; 1 tablespoon minced fresh ginger; 1 tablespoon minced garlic; and 1 teaspoon dried chile [chili] flakes." When the oil in a wok is very hot: "Add the Seasonings and stir-fry for about 10 seconds with a slotted spoon or spatula until fragrant." A side note on this page: *The Chinese System of Food Cures*, by Dr. Henry Lu, says that "a regular diet

of fermented black beans can relieve depression and stress and counteract any toxins,” p. 75). Stir-fried saucy shrimp (with sweet bean sauce or *jiang*, one of the earliest Chinese seasonings; if unavailable, substitute hoisin sauce, p. 81). Grilled hoisin scallops (with ½ cup hoisin sauce, p. 83). Spicy grilled squid with warm greens (with ½ cup hoisin sauce, p. 86-87). Broccoli or cauliflower with a soy-lemon dressing (p. 173). Grilled leeks in a garlic-soy dressing (p. 174). Grilled wild mushrooms with a teriyaki dressing (p. 178). Black bean acorn squash (with “2 tablespoons fermented black beans, rinsed, drained, and minced.” Describes how to make “black bean sauce,” p. 179).

One chapter, titled “Soybeans and tofu” (p. 192-215), begins with a discussion of the work of Dr. Albert Leung, author of various books on Chinese herbs and food, and creator of a computerized database on Chinese herbal medicine for the National Cancer Institute. “Like a growing number of doctors, Dr. Leung feels strongly that an integrated approach should be taken in the treatment of many diseases, one that draws from the strengths of both conventional and alternative therapies. He also concurs with Henry Lu that fortifying the immune system is critical to good health. ‘Our immune system is the key to health and longevity and there are many factors that throw off our yin/yang balance,’ Dr. Leung says. ‘When this happens, Traditional Chinese Medicine often uses herbal tonics and food to help restore the balance.’

“Tofu is such a food. Chinese doctors classify its nature as cool and sweet. It is credited with clearing heat from the body, detoxifying the system, and strengthening the spleen and stomach.”

A full-page color photo (p. 192) shows tempeh being fried. Simonds notes that the earliest known recorded use of black soybeans dates back to the middle of the eighth century.

A table titled “Soybeans and their byproducts” (p. 196) lists ten products, how each is used, and how long they will stay fresh in a refrigerator. The foods are: Fresh soybeans [as a green vegetable appetizer], soybean sprouts, miso, soybean milk, silken tofu, soft tofu, firm tofu, extra-firm tofu, 5-spice pressed tofu, and tempeh.

Recipes are from many Asian countries”: Japanese-style silken tofu. Soybean sprouts and leeks in hot chile sauce. Rainbow salad with spicy peanut dressing (and tofu). Spicy garlic bean curd noodles. Vegetarian roll-ups (with tofu). Fragrant steamed pearl balls (with tofu and glutinous rice). Spicy ma po tofu. Cantonese style tofu in black bean sauce (incl. fermented black beans, garlic, ginger and hot chile paste). Vegetarian kung pao with broccoli and peanuts (with tofu. Note: Kung pao is a style of food preparation associated with Szechuan and Hunan). Curried tofu. Braised cinnamon tofu. Simmered tofu with black mushrooms. Fried tempeh with sweet and sour sauce. Spicy stir-fried tempeh with basil. Ginger teriyaki tempeh.

Also: Chicken-black bean brown rice (with fermented black [soy] beans, garlic, and fresh ginger, p. 231; Dr. Albert Leung says that making fermented black beans is a complicated process, in which small black soybeans are first soaked in water with mulberry leaves and wormwood herb, then they are fermented with salt). Vegetarian pad thai (with tofu, p. 245). Almond soy jelly with litchees and melon (with soy milk, p. 266). Two-spice vanilla tapioca pudding (with soy milk, p. 269; Soy milk lubricates the body, clears the lungs, and is often prescribed for urinary disorders and constipation). Coconut rice pudding with berries (with soy milk, p. 272). Address: Salem, Massachusetts.

8103. Bramblett, Billy. 1999. Update on Wildwood Fairfax and Wildwood Santa Cruz (Interview). *SoyaScan Notes*. May 27. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Wildwood no longer makes any sandwiches. The 65 people employed at the Fairfax facility include all of Wildwood’s driving staff, accounting staff, production staff, and support staff. Santa Cruz is basically a production facility, though three drivers and several administrators operate out of Santa Cruz. Santa Cruz produces all the tofu, and the YoSoy traditional soymilk. Second generation products made at Santa Cruz include the bakes, the burgers, and the tofu cutlets. If it comes in a vacuum-packed bag or a water-pack tub it is made in Santa Cruz. If it comes in a cup (as 18 products do), it is made in Fairfax—including 5 flavors of braised tofu, 2 tofu salads, etc.

Wildwood believes that it makes the best-tasting tofu on the West Coast. It has also been innovative in developing many delicious products, which some other companies are now trying to imitate.

Wildwood has long been in a big crunch making 30,000 lb/week of tofu; about half of this is sold as tofu and half goes into making second generation products. But they could sell twice that much tofu if they had the capacity to make it.

Last year Wildwood started making Baba Ganooj for Trader Joe’s (TJ). The project started as a sort of side deal to the Hummus, making maybe 700 units a week. Within a month, Wildwood was making 5,000 units a week for TJ. Bill had to add two shifts and make many other arrangements. TJ liked it and asked what other products Wildwood had. They came and visited, and Wildwood showed them its various products. TJ then asked if Wildwood could make baked teriyaki tofu for them. Billy agreed on the condition that they not order more than 5,000 units/week; TJ agreed. Their buyer for that section is a really great person named Kimberly Sprinkle Kruell, who Wildwood trusts. She told Wildwood that she and TJ like Wildwood and their products, and want to work with the company.

So in an effort to make more “secondaries,” Wildwood went to tofu makers it knows and trusts, and ordered a pallet (several thousand pounds) of tofu. They couldn’t do it; they were unable to come up with the volume, the quality, and the

shelf life that Wildwood needed. So Wildwood concluded that they have to make the tofu themselves.

Wildwood's fresh soymilk in gable top cartons is now selling well. It looks like they might be doing that for Trader Joe's too. "If that happens, it's gangbusters—outstanding!"

Wildwood was working with Ted Nordquist, who was making their soymilk base; he and Jeremiah have been friends for more than twenty years. But Wildwood "divorced" Ted and went to another supplier of soymilk base. He is very good at making non-dairy products, but he's a character, and working with him is very difficult. He is an enigma, and he doesn't seem to know what he wants. He and Wally Rogers were buddies and partners for many years, and all of a sudden they just split up. Address: Wildwood Natural Foods, 135 Bolinas Rd., Fairfax California 94930. Phone: 415-485-3940 X-47.

8104. Product Name: Organic Miso Tamari.
Manufacturer's Name: American Miso Co., Inc.
Manufacturer's Address: 4225 Maple Creek Rd., Rutherfordton, NC 28139. Phone: 828-287-2940.
Date of Introduction: 1999. May.
Wt/Vol., Packaging, Price: 5 oz or 10 oz bottle.
How Stored: Refrigerated.

New Product—Documentation: Talk with John Belleme. 1999. Nov. 18. This product was first sold in about May 1999, but it did not appear in the Great Eastern Sun catalog until November.

8105. River Currents: News from South River Miso Company (Conway, Massachusetts). 1999. Have you tried our tamari? Spring. p. 1.

• **Summary:** Miso tamari is the precious, rich liquid that collects in large pools in a vat of miso. "It takes over 2,000 pounds of miso to yield about 5 gallons of miso tamari. Our unpasteurized miso tamari is like liquid gold!... Because of its limited supply, this miso tamari is not commercially available except by direct purchase from South River. We ship miso tamari in sturdy plastic jugs but suggest you transfer it to glass. A recycled wine bottle makes an elegant container for this wonderful treasure."

8106. River Currents: News from South River Miso Company (Conway, Massachusetts). 1999. South River Miso Company: Price list—March 1, 1999. Spring. p. 5.

• **Summary:** Varieties of miso—all certified organic: (1) Three year dark miso (aged for a minimum of three full summer seasons): Hearty brown rice (with black soybeans & brown rice), Three-year barley, Black soy barley, Chick pea barley (with barley & chick peas). (2) One year light miso (aged for a minimum of one summer or three months): Sweet tasting brown rice, Chick pea, Azuki bean (with brown rice & azuki beans), Golden millet (with millet and soybeans). Special miso: Dandelion leek, Sweet white miso. Also: Miso tamari,

Brown rice koji, Miso samplers.

Beautiful color labels for the 16 oz. package of eight of these miso varieties were sent with the newsletter by Robin Cole of South River.

8107. Schinner, Miyoko Nishimoto. 1999. Japanese cooking: Contemporary & traditional—Simple, delicious, and vegan. Summertown, Tennessee: Book Publishing Co. 176 p. Illust. Index. 21 cm.

• **Summary:** Contents: Introduction (incl. Japanese attitudes towards nutrition, vegetarianism and animal rights, the recipes, the Japanese meal). Sample menus (by season). Glossary: Ingredients, kitchen concepts, and tools. Rice dishes. Soups and stews. Cooking with tofu. Fried dishes. Salads and cold vegetables. Noodles. Meals in a pot. Stewed and braised dishes. Meals in a bowl. Everyday favorites. Nouvelle Japanese cuisine.

Terms in the Glossary include: Abura-age, agar agar, atsu-age, azuki, fu (made from wheat gluten), goma (sesame seeds), goma-dofu (a tofu-like cake made from sesame butter), hijiki, Inari-zushi (sushi), kanten, konbu, kuzu & kuzu-ko, miso, mochi, natto, nori, okara, sesame oil (goma abura), shoyu, soba, soy sauce, tofu ("Perhaps the most misunderstood food in Japan... Americans might call it bland; the Japanese prefer to think of it as delicate in flavor"), umeboshi, wakame, yaki-dofu, yuba.

This vegan cookbook is filled with many soy-related recipes, both traditional and new. Examples of new: "Fishy Tempura Tempeh. Crispy Fried Tempeh (Kara-Age).

"Trying to dine out in a strictly vegan fashion in Japan can present challenges. Although dairy products are not found in traditional Japanese cuisine, fish-based stocks appear in a range of dishes from appetizers to soups to entrees... My advice to vegan or vegetarian visitors to Japan: find a temple or restaurant that serves traditional *kaiseki*-style *shojin-ryori* (Buddhist vegetarian cooking)—and splurge big time. You won't regret it" (p. 10).

On the rear cover is a biographical sketch of Miyoko. "She was born in Yokohama, Japan, and graduated from St. John's college in Maryland. Her bilingual bicultural background has endowed her with the creativity and originality of the West and the aesthetic sense of the East." She has been a vegetarian since age 12. Address: Owner, Now and Zen Bakery and Vegetarian Restaurant, San Francisco.

8108. Product Name: Miso Tamari (Unpasteurized) [Dark, or Light].

Manufacturer's Name: South River Miso Co. Inc.

Manufacturer's Address: South River Farm, Conway, MA 01341. Phone: (413) 369-4057.

Date of Introduction: 1999. May.

Wt/Vol., Packaging, Price: 1 quart bottle.

How Stored: Refrigerated.

New Product–Documentation: River Currents: News from South River Miso Company (Massachusetts). 1999. Spring. p. 1. “Have you tried our tamari.”

Talk with lady who calls from Vermont. 1999. Nov. 18. She has a bottle of this product and loves it. It also appears in the most recent South River Miso Co. newsletter under “Holiday gift pack No. 3”—which shows it is now available in pints. The label (photocopied black on white) states: “Collected from the vats of South River Miso. Fermented from deep well water, brown rice, chick peas or soybeans, sun-dried sea salt, and koji culture. Aged in wood for a minimum of 3 months or one summer. Certified organic.” Now Christian is making light and dark miso tamari.

8109. Kikkoman Corporation. 1999. Annual report 1998. 339 Noda, Noda-shi, Chiba 278, Japan. 30 p. 28 cm. [Eng]
• Summary: The information in this English-language annual report is current as of April 1999. Contents: Financial highlights. A message from the president (Yuzaburo Mogi): The year in review, dining pleasure and convenience, serving a global market, a source of variety, seeking new growth opportunities, promoting food culture. Global operations: The Americas, Europe, Asia and Oceania, Japan. Review of operations: Soy sauce, soy sauce derivative products, Del Monte, sake and wine. Research & development. Financial section: Consolidated balance sheets, etc. Corporate history (chronology from April 1925 to October 1998). Global network (directory of Kikkoman names, addresses, and phone numbers worldwide). Board of directors and officers. Corporate data.

Net sales were up slightly (7.1%), but net income was down for the second year in a row. Overseas sales (excluding exports from Japan) grew 15.8%, and have grown dramatically each year since 1994 (p. 16). In 1994 overseas sales accounted for about 15% of consolidated net sales; in 1998 about 28%. And operating income generated overseas accounted for 51% of Kikkoman’s consolidated operating income.

In 1998 Kikkoman released *Akadare-to-Kurodare*, a steak dipping sauce based on a blend of their popular *Akadare* (miso based) and *Kurodare* (soy sauce based) dipping sauces.

“Serving a global market: In June 1998, Kikkoman Foods, Inc., our first overseas plant, celebrated 25 years of operation, thus marking a major milestone for our international activities. Over the past quarter century, the production capacity of the Kikkoman Foods plant—located in Wisconsin—has expanded more than tenfold. To further augment capacity, in October we commenced operations at our second plant in the United States, in Folsom, California, which is conveniently located near large markets on the West Coast. Similarly, in Europe, we raised the annual production capacity of our plant in the Netherlands to 5,000 kiloliters. Following these additions, total production of soy sauce

and its derivative products at our overseas plants surpassed 100,000 kiloliters in 1998. This is approximately the same as the production capacity of the second largest soy sauce manufacturer in Japan.”

Kikkoman’s share of the soy sauce market in Japan is almost 3 times as large as that of its nearest competitor.

The Americas: On 6 Oct. 1998 Kikkoman had the formal opening of its second U.S. soy sauce manufacturing plant in Folsom, California. The 210,000 square meter facility was built at a cost of US\$46 million and has an initial soy sauce production capacity of 10,000 liters per year. The plant began operating in April 1998 and shipments of soy sauce started in October. The Kikkoman plant in Walworth, Wisconsin, is now approaching its annual soy sauce production capacity of 80,000 kiloliters.

Color photos show: Yuzaburo Mogi (president and CEO). The opening ceremony and an outside view of the plant in Folsom, California. Most of the company’s products (p. 8-13). Address: Noda, Japan.

8110. Hymowitz, Ted. 1999. Details concerning the early cultivation of soybeans in Georgia from 1765 to 1770 (Interview). *SoyaScan Notes*. Aug. 22. Conducted by William Shurtleff of Soyfoods Center.

• Summary: Question 1: Were soybeans first grown in Georgia in 1765 or 1766? When Bowen arrived in Savannah, Georgia, in 1764 he brought with him soybeans which he had obtained in China—probably a little bag full. He first bought land in Savannah on 14 May 1765—but it may not have been arable. So he gave his soybeans to Henry Yonge to grow out and multiply for him.

Hymowitz and Harlan discussed the question of whether Yonge grew the soybeans in 1765 or 1766. They decided it was probably 1765—but that is not certain. In a letter dated 23 December 1766 to Dr. Peter Templeman, Yonge wrote that the pease or vetch [soybeans] “were planted by me last year at Mr. Bowen’s request, and did yield three crops; and had the frost kept off one week longer I should have had a fourth crop, which is a very extraordinary increase,...” Clearly Yonge could have grown the soybeans in 1766.

Question 2: Were soybeans ever grown again in Georgia? If so, when, where, and by whom? We have no direct evidence that soybeans were ever grown again in Georgia. Samuel Bowen never mentions growing soybeans himself—yet he never wrote much about anything; he was an entrepreneur, not a writer. We do know that in 1770-71 he exported 162 quarts of soy sauce, so he must have had enough soybeans to make that soy sauce. It must have taken someone, probably Bowen, 2-3 years to further multiply the soybeans originally grown by Yonge to get enough to make soy sauce. Thus, we have indirect evidence that soybeans were grown after 1765 or 1766.

Question 3: How could Yonge have gotten four crops of soybeans in Savannah? Was he growing them for forage

or to obtain mature seed? To answer this question we must understand maturity groups. The soybeans that Bowen brought the Georgia probably belonged to what is now called maturity group II; they mature very early. They were best adapted to a more northerly latitude—such as Pennsylvania. While such seeds will grow in a southern latitude, such as that of Savannah, the plants, seeds and yield will all be small. Yonge could have planted his first soybeans in March and harvested the mature beans after 85-90 days. He planted the beans he just harvested in late May and harvested his second crop in late July or early August. He planted the beans again and harvest his third crop after 85-90 days in October. He planted a fourth crop in late October or early November and the frost killed it. Ted has written about this idea related to maturity groups in a published article. However we don't know the description of the plant, such as flower color or seed color.

Question 4: Where in China did Bowen get soybeans of maturity group II? Probably in or around Canton, China. The farmers there grow rice during the warm months, then grow soybeans as a winter crop on the banks / bunds around the rice fields. Bowen could have gotten these soybeans from farmers, stashed them away in his seaman's private trunk, and thus taken them out of China. Address: Prof. of Plant Genetics, Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8111. Kairava (J. Spaelstra); Seemo (H. Shapira). 1999. Re: Update on Dakini Health Foods Pvt. Ltd. in Pune / Puna, India. Letter (fax) to William Shurtleff at Soyfoods Center, Aug. 22. 1 p. Typed, without signature on letterhead.

• **Summary:** Gives details on their work with tofu and tempeh. They do not yet have a recipe book nor do they vacuum pack their tempeh. They are, however, developing a nice label. They have contacted Raj Gupta of ProSoya by e-mail about soymilk equipment.

"The nutrition situation in this country and on all income levels is no good—from severe protein deficiency on the lower income rungs to fancy diseases for the rich. Developing soyfoods production here is most crucial, urgent, and possibly also a good investment!

"At a later stage, to avoid spreading ourselves too thin right now, we are interested in trying our hand at more fermentations such as Taucho, Miso, Soysauce. We are looking for more material to study." A copy of the recent article from *Citadel Pune* (full of errors) is attached. Address: Dakini Health Foods Pvt. Ltd., S.N. 33, Bhoiwasti, Keshavnagar, Mundhwa, Pune / Puna 411 036, India. Phone: +91 20-613985.

8112. Carmack, Robert. 1999. Soy sauce. *Australian Gourmet Traveller*. Aug. p. 78-83.

• **Summary:** Gives brief descriptions of the following types of soy sauce: Thick soy sauce, dark soy sauce, light

or thin soy sauce, low-salt soy sauce, koikuchi, usukuchi, saishikomi, marudaizu, shiroshoyu [shiro shoyu], tamari. Most recipes contain meat. Address: Australia.

8113. Grogan, Bryanna Clark. 1999. Soyfoods cooking for a positive menopause. Summertown, Tennessee: Book Publishing Co. 192 p. Sept. Index. 23 cm. [31 + 49 websites ref]

• **Summary:** On the front cover: "Reduce the discomforts of menopause naturally. Lower your cholesterol. Reduce your risk of heart disease and cancer. Over 150 family pleasing recipes." Eating a diet rich in soyfoods may alleviate many of the discomforts of menopause.

Content: Introduction. Glossary. 1. The soy prescription. 2. Soy for strong bones and weight loss. 3. Preventing the number one killer of women-heart disease. 4. Can soy prevent cancer? 5. A soyfoods primer. 6. Baking and cooking with soyfoods. 7. Breakfast foods and beverages. 8. Condiments, sauces, dips, dressings, and spreads. 9. Appetizers, salads, and soups. 10. Lunch, supper, and side dishes. 11. Dinner entrees. 12. Desserts. Bibliography and websites. Sources for ingredients.

8114. Ontario Soybean Growers. 1999. Canadian soybeans (Ad). *Soya & Oilseed Bluebook* 2000. p. 104.

• **Summary:** This one-third page black-and-white ad states: "High quality, food grade soybeans for the production of tofu, miso, natto, soymilk, soy sprouts, soy sauce, tempeh and other soya products. Soybeans for the crush market. Identify preserved (I.P.)—Specialty soybeans. Organic and transitional soybeans. Container—Bag/bulk. Bulk vessel.

"Trusted, reliable, supplier of soybeans to the world for over 25 years.

"For more information or a list of suppliers contact: Canadian Soybean Export Association." Address: P.O. Box 1199, Chatham, Ontario, Canada N7M 5L8. Phone: 519-352-7730.

8115. Iino, Ryoichi. 1999. The history of shoyu (Soy sauce) 1. *Food Culture (Kikkoman Inst. for International Food Culture, Noda, Japan)* No. 1. p. 12-15. Oct. 19. <http://kiifc.kikkoman.co.jp>. [14 ref]

• **Summary:** Contents: Shoyu (Soy sauce): The worldwide seasoning. Sho from China. The sho in *Qi Min Yao Shu*. Production of sho in Japan. Japanese sho, made from soybeans. Liquid or mash (moromi)? Sho for making pickles. Mash-style sho. Notes (14).

Note: "Born in Tokyo in 1938, Ryoichi Iino graduated from the department of English literature at Waseda University. He is also a graduate of the History-Geography program at Meiji University." Address: Food historian, and teacher of food history, Hattori Nutrition College, Japan.

8116. Egan, Jeanette Parsons. 1999. Soy! Soy! Soy! Enjoy

soyfoods' benefits in delicious recipes. Tucson, Arizona: Fisher Books. xxx + 162 p. Oct. Illust. Index. 23 cm. Simply Healthy Series.

• **Summary:** This is a soyfoods cookbook. Contents: Dedication. Acknowledgments. Why I love soyfoods: Why eat soyfoods?, soy's health benefits, reduces heart disease, helps prevent cancer, soy for your bones (osteoporosis), to flash or not to flash (menopause), what about soyfoods allergies, how much soy should I eat? (soy protein, isoflavones), where to purchase soyfoods, how to add soy to your diet, important notes about eating soy. A soyfoods glossary: Black soybeans and yellow soybeans, green soybeans (edamamé), meat alternatives or analogs, miso, soy cheeses, soy cream cheese, soy flour, soy grits, soy milk (soy beverages), soybean oil, soynuts, soynut butter (roasted soybean butter), soy protein concentrates, soy protein isolates, soy sauces (tamari, shoyu), soy yogurt, tempeh, textured soy protein (TSP), tofu. Appetizers. Soups. Salads. Main dishes. Side dishes. Breads. Breakfast dishes. Desserts. Mail order sources for soyfoods. Other sources.

Contains 8 full-page color photos showing recipes. This is not a vegetarian cookbook. Recipes call for the use of chicken (4 recipes), ground beef, ham, crab meat, etc.

8117. Fallon, Sally; Enig, Mary G. 1999. Nourishing traditions: The cookbook that challenges politically correct nutrition and the diet dictocrats. 2nd ed. Washington, DC: New Trends Publishing Inc. xvi + 668 p. Illust. by Marion Dearth. Subject index. Recipe index. Menu index. 26 cm. [200* ref]

• **Summary:** Contains over 700 recipes. Contents: Preface. Introduction: Politically correct nutrition, fats, carbohydrates, proteins, milk & milk products, vitamins, minerals, enzymes, salt, spices & additives, beverages, about food allergies and special diets, parting words, guide to food selection (nourishing traditional foods, compromise foods {such as tofu}, newfangled foods {such as soy protein isolates and commercial soy milk}), a word on equipment, kitchen tips & hints, references (188). Mastering the basics. Great beginnings. The main course. A catalog of vegetables. Luncheon and supper foods. Grains & legumes. Snacks and finger foods. Desserts. Beverages. Feeding babies. Tonics and superfoods. Appendixes (A-F). About the authors.

Some of the basic recommendations in this book fly in the face of modern nutritional science: Eat more meat. Eat dairy products made from raw milk; pasteurization harms the milk. The worst fats are *trans* fatty acids, produced by hydrogenation; cholesterol and saturated fats do not cause heart disease. Consume plenty of enzymes. Meat should be eaten raw, rare, or braised in stock. Moreover, the authors propose a conspiracy in which doctors, researchers, nutritionists, and spokesmen of various government agencies are giving bad nutritional advice to the American public (p. 2). The authors wish, sentimentally, for the return of the

small American farm. Moreover, they do not examine some the non-dietary issues related to a diet based on meat and dairy products: What is its impact on the environment? How would it affect the ability of the Earth to feed more than 6 billion people? What right do humans have to kill animals?

However the authors also make a number of recommendations that many people would agree with: Eat more natural, traditional, fresh, and unrefined foods instead of refined and processed foods. Avoid sugar and hydrogenated fats. This book is strongly influenced by the observations of Dr. Weston Price, a dentist, whose important book *Nutrition and physical degeneration: A comparison of primitive and modern diets and their effects*, was published in 1939.

Concerning soyfoods, the authors favor the use of small amounts of fermented soyfoods (such as traditionally fermented soy sauce and miso) but are strongly opposed to the use of non-fermented soyfoods such as tofu and soymilk.

Soy-related recipes and information: Commercial soy formulas are low in saturated fats and devoid of cholesterol (p. 6). Today most of the fats in the American diet are polyunsaturated and derived from vegetable oils such as soy (p. 10). The cheapest oils, such as soy oil, are often hydrogenated; this creates *trans* fatty acids (p. 14-15). Cows lose valuable Activator X when fed high-protein soy-based feeds. Lecithin is found in butter (soy, the main source of lecithin worldwide, is not mentioned). Mother's milk is high in cholesterol because it is essential for growth and development (p. 16-17).

Omega-6 (bad) and omega-3 (good) fatty acids in soybean oil (p. 19). Fermented soy foods contain compounds that resemble vitamin B-12 but they are not absorbed by humans (p. 28). Isolated protein powders made from soy are usually obtained by a high-temperature process that over-denatures the proteins to such an extent that they become essentially useless, while increasing nitrates and other carcinogens. These isolated soy proteins can cause osteoporosis (p. 29).

Beef should not be fed soy meal for protein, but rather animal parts (p. 31). Avoid farm raised fish [aquaculture] that have been fed soy meal (p. 32). Cultured soybean products from Asia, such as natto and miso, are a good source of food enzymes if they are eaten unheated (p. 47). The natural glutamic acid in soy sauce and miso gives these foods their rich, meat-like taste (p. 49). Many processed foods contain MSG or hydrolyzed protein, "especially soy-based concoctions" (p. 50).

Heavily yeasted foods, such as soy sauce and Worcestershire sauce, often exacerbate the symptoms of chronic yeast [candida] infection (p. 56). Beans cause digestive problems because they contain two complex sugars, farrinose [sic, raffinose] and stachyose (p. 60). The macrobiotic diet and soybeans: Use only as fermented products like miso, natto, and tempeh. Problems with tofu,

soy milk, and phytoestrogens in soy (p. 62). The sickening effect of soy on ruminants (p. 87). In Japan, a typical meal contains miso, soy sauce, and pickles, all fermented products. In Indonesia, they eat tempeh (p. 94).

Ode to naturally brewed tamari soy sauce and teriyaki sauce (p. 147). Soy products increase the body's need for vitamin B-12 (p. 164). Soy in Chinese history. Miso soup. Tofu in fish stock and soy sauce broth (p. 201). Macrobiotic diets (p. 343). Soy foods block zinc absorption (p. 348). Eat natural salmon; farm-raised salmon are fed inappropriate soy meal (p. 418). Problems with soy flour and modern soy products: phytates, antinutrients, omega-3 fatty acids, disagreeable taste, phytoestrogens, phytic acid, enzyme inhibitors (p. 477, 495).

Soybeans are low in two essential amino acids (p. 496). Textured soy protein contains three antinutrients: Phytic acid, trypsin inhibitors, and isoflavones (p. 502). Person fed soybean milk as an infant had a spleen filled with ceroid (p. 546). Infants should not be fed soy-based formulas which contain phytic acid and estrogen compounds (p. 599, 603-04).

Note: The first edition was apparently published in 1995 by ProMotion Publishing (San Diego, California). Address: California. Phone: (877) 707-1776.

8118. **Product Name:** SoyAct (Soy Isoflavones).

Manufacturer's Name: Kikkoman Corporation, Biochemicals Div.

Manufacturer's Address: 1204 Allanson Rd., Mundelein, IL 60060. Phone: 847-247-9319.

Date of Introduction: 1999. October.

Ingredients: Soy isoflavone aglycones (40%) and glucosides (60%).

Wt/Vol., Packaging, Price: Bulk.

How Stored: Shelf stable.

New Product–Documentation: Nutrition Business Journal. 1999. Oct/Nov. p. 5. Earlier in 1999 the Biochemicals Division of Kikkoman Corp. (Mundelein, Illinois) launched SoyAct, an isoflavone aglycone that contains genistein and daidzein. Kikkoman claims that its unique form of aglycone is more easily absorbed than the glucoside form of those isoflavones and has a higher antioxidant activity. SoyAct joins Novasoy (made by ADM) in competing for sales to the supplement and functional foods markets. Talk with Kikkoman Biochemicals Div. in Mundelein, Illinois. 1999. Dec. 8. This product was introduced in Oct. 1999. It is a white powder, packaged in bulk according to the customer's order. It contains 40% aglycones. It was developed in Japan, and is manufactured there.

8119. Great Eastern Sun. 1999. Pricelist. Effective November 15, 1999 [Mail order]. Asheville, North Carolina. 24 + 6 p. 28 cm.

• **Summary:** Contents: Catalog information: I Ching reading

(hexagram #43), ordering, billing, shipping. Miso Master organic misos (traditional, mellow, sweet, miso tamari). Sweet cloud organic sweeteners. Haiku organic Japanese teas. One world organic classic teas. Mandala organic herbal teas. Organic planet pasta. Emerald Cove sea vegetables. Emperor's Kitchen condiments (Organic Oriental sauces, condiments in bottles, condiments in jars, condiments in bags, Japanese kitchenware). GES variety packs. Also sells coarse nigari in 44 lb or 440 lb lots. Address: 92 McIntosh Road, Asheville, North Carolina 28806. Phone: 704-252-3090.

8120. Pukel, Sandy. 1999. History of interest in macrobiotics, miso, and the Oak Feed Miso Co. Part II. 1975 to Aug. 1979 (Interview). *SoyaScan Notes*. Nov. 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Over the years Michio Kushi had talked about having a factory that made shoyu (natural Japanese-style soy sauce) in the United States. In about 1975, Sandy decided to do something about Michio's dream. He was increasingly an entrepreneur, but only in the sense that he liked to help make things happen. He still did not see himself as a businessman, in that he had little interest in money except insofar as it was important for making things happen. Oak Feed Co. was now a thriving enterprise. But why? "Because we didn't do it to make money, and because nobody took any money out of the company. So all the earnings were put back into the business. My job was to keep the philosophy going." Sandy's living expenses came from other investments. In the early 1970s, most young people Sandy knew who were interested in macrobiotics were dropouts with no money. He lived in a very nice house in Pinecrest (near Miami) and had the money he needed. In 1976 he began looking at the idea of a shoyu factory more seriously, but he soon realized that the complex equipment and buildings would make it too expensive.

Then John Belleme started coming to the macrobiotic cooking classes and other events at Sandy's house on 63rd Avenue. Though he came on his motorcycle, John had a "straight" job in electron microscopy at the Veterans Administration Hospital in Miami. Soon he was deeply interested in macrobiotics and wanted to learn more and more. So Sandy suggested that John go to Boston to study macrobiotics with Michio. John did that, moving into a Ken Burns' study house. He stayed for about a year, then went to Mexico with Frank Head, and finally returned to Miami.

He asked Sandy for a job at the Oak Feed Store, and Sandy said "Fine." He was a responsible and knowledgeable person. John soon became the store manager, while also taking macrobiotic cooking classes at Sandy's house, but he did not see his future in a retail food store, thus he wasn't very happy with the job—though he was a very good worker. John was more a creator than a manager, and he and Jan had become sweethearts—great people and good workers.

Jan used to make delicious seitan there. One day in about late 1977 John went to Sandy and suggested they do some kind of a project together. One of the ideas that came out of their brainstorming session was starting a miso factory in America.

A new idea was born, and Sandy responded by making John a deal. If John would work in the Oak Feed Store, in retail, for a total of three years (1976-79), Sandy would take care of the money necessary for making a miso factory happen and he would pay John's expenses related to starting the factory, pay for John's trip to Japan to study traditional miso making, and pay for John's share of ownership in the new miso company—\$25,000 in shares. John would be responsible for doing the research, learning how to make miso in Japan, etc. John accepted and began to manage the store.

In the fall of 1978 Sandy and John visited Michio in Boston to discuss the idea; Michio was very supportive, but he wanted the miso company to be in Massachusetts—perhaps on land at Becket or Ashburnham. Sandy didn't like the idea of Massachusetts—too much macrobiotic politics and the weather was too cold. Sandy put money from the Oak Feed Store into a separate account that John used to pay his miso-related expenses. Soon he began taking Japanese language lessons.

In 1977 Sandy started the Oak Feed Restaurant, and at about the same time Leon got married. These two events led to the three partners dividing up the properties of the communal LJZ Enterprises. Sandy ended up as the sole owner of the Oak Feed Store and his friends ended up with other businesses. Sandy took in partners in the restaurant; Michael Henry (a friend), and Wayne Neal and his wife. They invested and owned shares in the restaurant. Sandy got Yozo Masuda to be the chef at the restaurant. For many years Yozo had been the right-hand man of Hiroshi Hayashi at Sanae, an early macrobiotic restaurant in Boston. Sandy brought him and his whole family from Japan, and got him a green card so he could cook at the Oak Feed Restaurant.

1979 (early)—At some point, Sandy began looking for land for the miso company—using specifications related to the climate and temperature that John Belleme had given him. But he was also looking for land for another reason—the Oak Feed Land Project. This was Sandy's dream of a macrobiotic educational center where various people would build homes and apprentice with John at the miso plant, and where various macrobiotic retreats and workshops and a summer camp with classes could be held on the land. Sandy spent about two months looking at catalogs, talking to realtors, etc.

1979 Feb.—Oak Feed Miso, Inc. is incorporated. By this time two groups have formed and begun to discuss their potential ownership of shares in the miso company: The Oak Feed group and the Erewhon group. It was agreed that the company would be named the Erewhon Miso Company. In the Erewhon group were Michio and Aveline Kushi, Sendai

Miso-Shoyu, and maybe Mr. Kazama of Mitoku. In the Oak feed group were Sandy and John Belleme. It was expected that the Japanese would play a very important role in this company; they would assist the Americans in making miso in the United States. Sandy recalls meeting only once with some representative of Sendai Miso-Shoyu, probably at some natural foods trade show. Michio had most of the contact with them. At about this time the first of many of drafts concerning ownership of shares was placed on the table. None of the drafts was ever signed.

1979 April—Barry Evans becomes a major investor in the miso company.

1979 summer—After extensive research, Sandy flies up to North Carolina (Asheville) alone, looks at several pieces of property that a real estate agent has suggested, finds exactly the piece of land and house he had been looking for, makes a deposit or down payment of \$10,000 to \$15,000, agrees to assume the mortgage of the previous owners at the Tryon National Bank, North Carolina, and flies home alone the same evening. The roughly 90-95 acres of land in Rutherfordton cost about \$100,000 to \$120,000. The mortgage payments were \$500/month for 30 years. It was a lovely but very rural piece of property with rolling green hills. The Sears-style prefab 5-bedroom house on the property was basically thrown in free of charge. The land had become available because someone had died recently. With the new land and house, Sandy's Macrobiotic Foundation could do things that were impossible in metropolitan Florida.

1979 Aug. 7—Sandy closes / finalizes the purchase of the land for Oak Feed Miso in Rutherfordton, North Carolina. He and John Belleme both sign the closing documents. Now the new miso company would have to find the money to make the monthly mortgage payments, plus additional monthly payments to two officers of the bank totalling \$23,000. Barry Evans' money was important in making these payments but it was not essential. The miso company definitely would have been able to pay for the land in Rutherfordton and send John and Jan to Japan without the money Barry invested at this time. The investments Barry made after construction of the factory began in mid-1980 and after Erewhon filed for bankruptcy were more important to the company's survival. Sandy put in the first money; Barry's came later. Sandy told John that if John took care of all the technical matters, Sandy would take care of all the financial matters to make the new company happen. Continued.
Address: Owner, Oak Feed Store and Restaurant, 4500 S.W. 63 Ave., Miami, Florida 33133. Phone: 305-446-9036.

8121. Belleme, John. 1999. Update on American Miso Co. (Interview). *SoyaScan Notes*. Nov. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John has worked for years as a consultant for and vice-president of American Miso Co. John is also on the board of directors. Two days a week, he works closely with

Greg Gonzales, who has become an excellent maker of koji and miso. Previously Greg had been a dancer from Southern California.

Today their first batch of good corn koji came out. They have been working out the process for six months. He and Greg used it to make a corn miso. Other people who have used corn in miso have used it in place of the soybeans together with a rice koji. As far as John knows, this is first miso made with corn koji. John also goes to Great Eastern Sun where he is developing new miso products, such as a freeze-dried miso soup—in three flavors.

John thinks the American Miso Company might now be the largest manufacturer of hand-made koji in the world; they produce about 600,000 pounds a year of 5-6 different types of koji which end up in 11 different types of miso. The koji types are: Short-term barley koji, long-term barley koji, mellow barley koji, brown rice koji, white rice koji, corn koji, and soybean koji.

Last year they made soybean miso experimentally for the first time—which was extremely difficult because the carbohydrate content of the soybeans is very low. The trick is to keep the soybean koji from being overrun by bacteria and turning into natto. The soybean miso is now aging.

About a year ago American Miso Co. started selling “miso tamari” in 5 oz and 10 oz bottles. Address: Honto Press, P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

8122. Coleman, Joseph. 1999. A sauce fit for the emperor. *Times of India (The) (Bombay)*. Nov. 24. p. 13.

• **Summary:** Describes the way Kikkoman makes soy sauce for the emperor at the Goyogura in Noda, Japan. Noda, a hamlet 35 km north of Tokyo, “has served as the center of Japanese soy sauce production for centuries.” Address: Associated Press.

8123. South River Miso Co. 1999. Miso Happy—See You Tamari (T-shirt). South River Farm, Conway, MA 01341.

• **Summary:** This handsome T-shirt, made of 100% pre-shrunk, heavy weight cotton, comes three sizes (medium, large, extra-large), various colors (incl. deep plum, forest green, beige, black, brick red, and denim), and styles (short sleeve or long sleeve). On the front, in large uppercase letters, are the words “Miso Happy.” On the back is written “See You Tamari.” Below those words are the company logo and, in smaller letter, the words “South River Miso.” These t-shirts are illustrated and described in the company’s spring 2000 catalog (p. 2).

Talk with Robin of South River. 2000. March 20. This t-shirt was first available in Nov. 1999. An earlier version, first available in April 1998, had writing on the front only. Over the left breast was written “Miso Happy” and near that was the company’s former logo. Address: Conway, Massachusetts.

8124. Israel, Cocavatiyah Baht. 1999. Re: Update on “Eternity” and Taste of Life vegetarian restaurants in Israel. Letters to William Shurtleff at Soyfoods Center, Dec. 12 and 10 Jan. 2000. 2 p. + 2 p. Handwritten, with signature. Plus leaflet. [1 ref. Eng; Heb]

• **Summary:** This group used to be known as “Eternity,” an all vegetable ice cream parlor. Now they serve their vegetarian ice cream plus a menu “consisting of many various dishes (vegetable) that include tofu and the vegetable protein product seitan. We are vegan—no animal by-products, no artificial food coloring, no cholesterol. Kosher.” They now have a second restaurant at Hakishon St. (across from Magen David), Tiberias, Israel. Phone: 06 671 2133. They also have a factory that produces the ice cream, tofu, and most of the take-out products and carob candies. The main dishes (entrees) and some vegetarian products are made in the restaurant daily. They make tofu at: Nature’s Gate Ltd., Mivne Taaseya Haradash 76, Box 029, Dimona, Israel 86000. Phone: 972-7-655-7774. Fax: 972-7-655-7769. In 1986 they started to make and sell tofu as tofu. They sell their tofu at about 30 different places outside their two restaurants. Nature’s Gate Ltd. own the factory and L’Haïem owns the restaurants.

They also make their own soymilk at Nature’s Gate Ltd. Presently they produce the soymilk only for their own use, but in the future they hope to expand.

Enclosed is a one page recipe in Hebrew and English. The 12 food categories are: Desserts (incl. 9 flavors of non-dairy ice cream), candies, beverages (incl. soya milk), dressings, salads, breads, breakfast (incl. tofu links, scrambled tofu), sandwiches (incl. tofu cheese, marinated tofu, okara sticks, tofu falafel, tofu burger, tofu vege burger, stir-fry with tofu, stir-fry with seitan), steamed vegetables, take away (take-out), main entrees (incl. tofu teriyaki, tofu with gravy, tofu medley), a la carte (incl. tofu medley). Address: 60 Ben Yehuda St., Tel Aviv, Israel. Phone: 03 620 3151.

8125. Jaffrey, Madhur. 1999. Holidays with spice girl Madhur Jaffrey. *Times of India (The) (Bombay)*. Dec. 18. p. 13.

• **Summary:** The Sunday Times: A short but excellent biography of the well known actress, writer, cook, wife, mother, and grandmother—written in the first person. Jaffrey was born in Delhi and grew up India. She left India at age 19 to go to drama school in Britain, which is where her love of cooking began. After she married Indian actor Saeed Jaffrey, they lived in New York and took their young kids to Martha’s Vineyard [an island south of Cape Cod, Massachusetts]—before the Kennedys started going there and it became fashionable. During the holidays, she likes to cook. She and her husband usually take a winter holiday to Italy, where she and several friends cook Tuscan dishes. “My Chinese friend

brings her Chinese soy sauce and I bring my spices.”

A portrait photo shows Madhur Jaffrey, smiling and looking very happy.

Note 1. She is the author of more than 25 cookery books, including *An Invitation to Indian Cooking* (1973) (James Beard Foundation Awards Cookbook Hall of Fame winner) and *Madhur Jaffrey's World of the East Vegetarian Cooking* (1981) (James Beard Foundation Awards winner).

Note 2. Wikipedia says of her (Jan. 2012): She was born Madhur Bahadur on 13 Aug. 1933 in New Delhi, India. She is an Indian actress and food writer who introduced the Western world to the many cuisines of India. She was educated at Miranda House (of the University of Delhi). After college, she worked for All India Radio. She then attended the Royal Academy of Dramatic Art, from which she graduated with honors in 1957. She then met and married Indian actor Saeed Jaffrey and moved to New York City. She and Saeed divorced in 1965. They have three daughters, Meera, Zia and Sakina Jaffrey. In 1969, she married Sanford Allen, a violinist with the New York Philharmonic Orchestra.

8126. Skiff, James. 1999. New Japanese law concerning labeling of foods made with genetically engineered ingredients (Interview). *SoyaScan Notes*. Dec. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jim is aware of this Japanese law, which was passed in Oct. 1999 but does not take effect until 1 April 2001. Jim Echle, head of the American Soybean Association office in Tokyo, told Jim about the law; Echle is extremely receptive to the needs of his Japanese customers, such as tofu makers. ASA is also getting more involved with issues involving identity preserved (IP) soybeans; they are organizing an IP conference on Jan. 17 in St. Louis, Missouri.

Skiff then faxes Shurtleff a provisional translation of the labeling guidelines, in the form of a 1-page table. The translation was done by ASA-Tokyo and sent to Skiff by Jim Echle. There are three columns: (1) Classification of food: A. Not equivalent to conventional foods with regard to composition, nutrients, or intended use. B. Equivalent to conventional foods, but modified DNA or protein produced therefrom remains after the manufacturing process. C. Equivalent to conventional foods, but modified DNA or protein produced therefrom is removed or decomposed and no longer exists in the in the final food. (2) Examples of the three types of foods: A. High oleic acid soybean oil. B. Tofu and tofu products, soybean sprouts, natto, soymilk, miso, soybean flour, roasted soybeans, corn, popcorn, potatoes, etc. C. Soy sauce, soybean oil, high fructose corn syrup. (3) Method of labeling: “Soybean (genetically modified),...” Address: US Soy, 2808 Thomason Dr., Mattoon, Illinois 61938. Phone: 217-235-1020.

8127. **Product Name:** Organic Veggie Bowl [Teriyaki

Rice].

Manufacturer's Name: Cascadian Farm, Inc. (Marketer-Distributor).

Manufacturer's Address: Rockport, Washington 98283.

Date of Introduction: 1999.

Ingredients: Organic brown basmati rice, organic sauce (pineapple juice, water, organic soy sauce, organic sesame oil, organic sugar, organic rice vinegar, corn starch, garlic powder, spice, xanthan gum), organic peas, organic broccoli, organic baked tofu (organic soybeans, water, nigari, natural calcium sulfate, organic soy sauce, soy oil, spices, dehydrated garlic), organic carrots, organic mushrooms.

Wt/Vol., Packaging, Price: 9 oz tray in paperboard box. Retail for \$3.69 at Safeway supermarket (1999/06, Lafayette, California).

How Stored: Frozen.

New Product–Documentation: Product with Label purchased at Safeway supermarket in Lafayette, California. 1999. June 14. 6 by 5 by 1.75 inch paperboard box. Red, brown, green, and yellow on white a light orange. Cascadian Farm logo—“Since 1972.” A color photo shows a dark orange bowl of the product. Front panel text: “A tasty entree with basmati rice, peas, baked tofu, broccoli, carrots and mushrooms in a teriyaki-ginger sauce. Microwavable.”

8128. **Product Name:** Tonzu Organic Tofu [Teriyaki].

Manufacturer's Name: The Organic Soy Company, Ltd.

Manufacturer's Address: Unit A, 2 Corban Ave., Henderson, Waitakere City, Auckland 0612, New Zealand.

Date of Introduction: 1999.

Ingredients: Certified organic soybeans (guaranteed to be non-genetically modified), filtered water, natural coagulant nigari (511). Teriyaki flavour sachet: Fermented soy beans, sea salt, cider vinegar, honey, ginger, garlic.

Wt/Vol., Packaging, Price: 275 gm, vacuum packed inside paperboard box.

How Stored: Refrigerate at 4°C or less.

New Product–Documentation: Label sent by Elizabeth Chalmers, owner. 2007. Jan. 22. The product was introduced by this company in 1996, but it was first sold in this paperboard box in 2001. They started using the Tonzu brand name in 2002. Color photo of snowy mountains beyond a deep green valley, on deep blue background. Superb label design. GE [Genetically Engineered] Free logo. Certified Organic logo.

8129. Astuti, Mary. 1999. History of the development of tempeh. In: Sapuan, Noer Sutrisno, and Jonathan Agranoff, compilers and translator. 1999. *The Complete Handbook of Tempe: The Unique Fermented Soyfood of Indonesia*. Singapore: American Soybean Association. xiv + 186 p. See p. 2-15. [17 ref. Eng]

• **Summary:** A superb, landmark history of tempeh in Indonesia. The best seen to date! Contents: Introduction.

The origin of soybeans in Indonesia. The origin of tempe. Origin of the tempe inoculum. Consumers and producers of tempe. The development of tempe processing technology. Development of tempe inoculum: Leaf inoculum, semi-pure powdered tempe inoculum, pure strain *Rhizopus oligosporus*. Conclusion.

The origin of soybeans in Indonesia: “The modern Indonesian name for soybean is *kedelai*, but according to Winstedt’s (1960) dictionary, *kedelai* comes from the Tamil language in southern India. Similarly Wilkinson’s (1955) dictionary cites *kedelai*, to mean soybean or mung bean (Tamil).”

“In Javanese literature, the word *kedelai*, (written as *kadele* in Javanese), was first recorded in the Serat Sri Tanjung manuscript, believed to have been written in the 12th or 13th centuries. The manuscript describes the story of Sri Tanjung, wife of Ki Sidapaksa. In the story, Sri Tanjung was accused of committing adultery and, to prove her innocence, she threw herself into the river, from whence rose a beautiful fragrance, proving her innocence. As a reminder, the place where Sri Tanjung lived was given the name Banyuwangi, which means ‘fragrant water.’ The Sri Tanjung Manuscript (*Serat Sri Tanjung*) represents a legend of the town of Banyuwangi, and includes the mention of soybeans as illustrated in the excerpt below (in ancient Javanese):” A 3-line excerpt, which includes the word “*kadele*,” is given.

“A rough translation of the above is as follows: “The dwelling place of the teachers and the hermits was very beautiful, as were the gardens that were planted with peanuts, taro and sugarcane, soybeans and beans. There were tubers and ivory bananas beside them and ‘cintamani’ sugarcane as well as ‘gunting’ bananas that were also laid out in rows.”

The word for “soybeans” is also found “in the Serat Centhini manuscript. This manuscript tells the story of Tambangraras, daughter of the king of Giri (a region of East Java near Surabaya), who fled with her brother from Giri when it was threatened by the armies of Mataram under Sultan Agung Anyakraksuma in the 16th century. They traveled with their servant, Centhini, throughout Java. Tambangraras told stories of their experiences and observations on the philosophy and culture of the Javanese which were recorded by Centhini. These stories, or Serat Centhini are also known as Suluk Tambangraras (after the daughter of Sunan Giri) and contain highly detailed analyses of the Javanese people, now regarded as reference works for the basis of Javanese knowledge and culture. In these accounts, they describe not only the regional cultures they came across in different parts of Java, but also the wide range of different foods that they were presented with. Although very little information was documented about how these foods were prepared, the ingredients are described in detail. As skills are largely handed down from generation to generation in Javanese society rather than being formally written down, it would not have been usual for a detailed

recipe to be described. The original manuscripts were transcribed by Ronggo Sutrasno of the Palace of Surakarta by the order of Sultan Amengkunagara III. It was quite common at the time for such stories to be recorded by royal families in different areas and this one was also transcribed into verse in the Javanese calendar year 1724, (1814 AD).

“The word for soybeans appears first in section two of the Serat Centhini. This section describes the travels of Cebolang, son of Seh Akadiyat, from Purbalingga to Mataram, stopping at the home of Ki Amongtrustha. Here he was served dinner that consisted of a selection of foods including soybean porridge. In Mataram, Cebolang also obtained information about a special offering that was prepared by parents about to marry off a child. One such ceremony, witnessed by Sriyanto was about the *kacar-kucur*. Kacar-kucur contained kawak beans and mature soybeans, yellow rice, aromatic flowers and shiny metal coins. According to this well preserved ceremony, soybeans had been used in the kacar-kucur for traditional ceremonial purposes for a long time. It also reveals that the savory rice dish *nasi udeg* cooked with coconut for serving with chicken, was also served with fried black soybeans. Black soybeans evidently have a deep significance in Javanese culture.”

“Etymology may also hold a clue for us.” In Chinese (Cantonese), beans are called *tau* or *tao*. Therefore, in Indonesia, many foods made from beans have names with the prefix *tau* (or *ta*) such as: (1) *tauci* / *taosi* / *tau-dji* (modern and former spellings) (salted black soybeans). (2) *tauco* / *taucho* / *tautjo* (Indonesian-style miso). (3) *taugé* (bean sprouts). (4) *taujiong* / *tau-jiong* (soybean jiang). (5) *tahu* (tofu, by shortening *tau-hu*). (6) *tahua* (a by-product of tofu similar to yogurt in consistency). (7) *takua* (firm spiced tofu). Another fermented Indonesian soybean product is *kecap* / *ketjap* (soy sauce) which is *ke tsiap* in its native China. Notice that tempe, whose name is not derived from Chinese, does not start with the prefix *tau* / *tao*.

“The origin of tempe: The earliest written record of the word *tempe* comes from the Serat Centhini manuscript, Chapter 3. The excerpt of the manuscript describes the journey of Mas Cebolang when he traveled between Prambanan temple and Pajang, via Tembayat in Klaten regency (in Central Java). Here, Cebolang was served a hefty lunch by the prince of Bayat, which is described in its entirety, to include: *jae santen tempe*, a dish of tempe in coconut cream, and *asem sambel lethokan*, the main ingredient of which is over-fermented *tempe lethokan*. *Sambel lethok*, also known as *sambel tumpang* is nowadays still frequently made by the Javanese.

“Tempe made from soybeans was again mentioned in the Serat Centhini in chapter 12, which describes the journey of Jayengresmi and his group at Bustam village. Here they were hosted by Ki Arsengbudi, who served them a banquet which included *Kadhele tempe srundengan*.

“From the descriptions of the travels through Java of

the Giri children and Cebolang, plus the numerous banquets served by their hosts, it can be seen that soybeans and tempe only appeared in Central Java. This was in the region of Mataram which includes the villages of Mataram, Mbayat and Bustam. In West Java (Bogor) fish was largely served as it was also in Surabaya (East Java)."

Origin of tempe inoculum: "The method of making ragi tempe was first described by Widagdo in a local magazine called *Guru Desa* (The Village Teacher), published in 1915, from Kulon Progo. According to Widagdo, making ragi tempe was easier than making ragi tape, and that one had to use pre-existing ragi tempe to make more ragi tempe. How the first ragi tempe came to be is still a mystery..." Continued. Address: Gadjah Mada Univ., Faculty of Agricultural Technology, Jalan Socio Yusticia, Bulaksumur, Yogyakarta, Indonesia.

8130. Bladholm, Linda. 1999. *The Asian grocery store demystified: A food lover's guide to all the best ingredients*. Los Angeles, California: Renaissance Books. 234 p. Foreword by Jonathan Eismann. Illust. Index. 23 x 13 cm. Series: A Take it With You Guide.

• **Summary:** An original, well-researched and well-written book—though some of the terminology (such as "beancurd") is outdated. Soyfood products include: Beancurd noodles (p. 38). Kinako (p. 47). Soy sauce, mushroom soy sauce, kecap manis (p. 53). Hoisin sauce (p. 54).

Chapter 10, titled "Soybean products" (p. 93-99) includes: Black bean sauce, dried soybeans, tempeh, beancurd (pressed beancurd, deep-fried beancurd, savory grilled beancurd {yaki-tofu}, freeze-dried beancurd [sic] {koyadofu}, bean curd sheets {fu pei, yuba, fu jook; the latter are "rolled-up, long, ruffled, cream-colored sticks of bean curd skin, bent in two"}), fermented beans (preserved black beans {fermented black beans, tau see}, bean sauce, toen-jang, chili/hot bean sauce, fermented beancurd), okara, edamame, soybean sprouts, soy milk.

Note: This is the earliest English-language document seen (March 2009) that uses the word "toen-jang" (or "toen jang") to refer to Korean-style soybean jang (miso).

Concerning preserved black beans: "Also called salted or fermented black beans or 'tau see,' this is made by steaming small black soybeans, then fermenting them with salt and spices. Used in a variety of dishes to add a pleasant rich aroma and salty taste... Crush or mash beans slightly to release more flavor or mix with garlic, fresh ginger, or chilies. Available in small glass jars, cans, and plastic bags. They should feel soft and not be dried out... Look for Pearl River Bridge brand labeled 'Yang Jiang Preserved Beans' in a 1-pound yellow canister, and Koon Chun Sauce Factory, Double Parrot, and Zu Miao Trademark brands all in 8-ounce bags." Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "tau see" to refer to Chinese-style fermented black soybeans (preserved black

beans).

Concerning bean sauce: "Varieties of this Asian staple include yellow bean sauce, brown bean sauce, bean paste (tau jeong), or sweet bean condiment. All are made from yellow or black soybeans, fermented with salt and in the sweet Northern Chinese type, with sugar-sweetened crushed yellow [soy] beans. Two forms are found: whole beans in a thick sauce and bean paste, which is mashed, ground or pureed beans. The whole bean type has a rounder flavor and adds texture, while the pastes are very salty and should be used sparingly... The yellow bean paste is tau cheo... Sold in glass jars and cans. Look for Koon Chun Sauce Factory, Kon Yick Wah Kee bean sauce, Amoy, or Yeo's.

Chapter 18, titled "Japanese food products" (p. 168-81) includes: Tsukemono (pickled in miso), miso paste, shiromiso, akamiso, mamemiso, natto, miso soup, noodle dipping sauce base (memmi), tamari sauce, teriyaki sauce, tonkatsu sauce.

Interesting non-soy products include: Sesame paste (p. 57). Satay sauce (with peanuts), gado-gado-dressing (p. 58). Peanut oil (p. 64). Sesame oil (p. 65). Amaranth (vegetable, p. 72). Winged beans (p. 76). Pickled wheat gluten (p. 108). Sesame seeds, peanuts, roasted peanuts (p. 118). Red/azuki beans, agar-agar (p. 121). Wheat gluten (p. 127). Sesame candy, peanut roll (p. 136). Sesame seed and peanut cookies (p. 137). Sweet red bean paste (azuki an, p. 139). Coix seed (Job's tears, p. 165). Japanese seaweed and kelp (p. 169-70). Umeboshi (p. 171). Fu (dried wheat gluten cakes), mochi (p. 177). Address: Writer, designer, illustrator and photographer, Miami Beach, Florida.

8131. Davidson, Alan. 1999. *The Oxford companion to food*. New York, NY and Oxford, England: Oxford University Press. xviii + 892 p. Illust. by Soun Vannithone. Index. 29 cm. [1500+* ref]

• **Summary:** The 2,650 alphabetical entries in this excellent encyclopedia and cornucopia represent 20 years of Davidson's work. The 175 illustrations by Laotian artist Soun Vannithone are superb. There are 39 longer entries about staple foods such as rice, noodles, and apples. A comprehensive bibliography provides access to further information. The book does not contain recipes.

Soy-related entries include: Bean sprouts (p. 64). Black beans, fermented (*chi*, p. 79). Kecap (Indonesian soy sauce, made "basically from soya beans and palm sugar only." "The word 'kecap' has passed into the English language as catchup or catsup and then as Ketchup, which now means something quite different." p. 429). Ketchup ("probably via the Malay word *kechap*, now spelled *kecap*, which means soy sauce. The word was brought back to Europe by Dutch traders who also brought the oriental sauce itself. The sauce has changed far more than has the word, although the name has appeared in a large number of variations such as catchup and catsup."

Tomato ketchup is now the best known and widely

used—in fact almost the only ketchup left. Whereas tomato ketchup contains much sugar and vinegar, mushroom ketchup contains neither, and is basically a salted mushroom extract with a liquid, transparent consistency. The British food historian, C. Anne Wilson (1973), believes that mushroom ketchup was the first kind of ketchup in Britain; she argues that people used to pickle mushrooms, intending to use the mushrooms, but then started using the pickle too, and finally began using the pickle by itself.

“Oysters, mussels, walnuts, and many other ingredients have been used to make ketchup, and could be blended with spices, garlic or onions, wines and spirits to vary the flavour” p. 430-31). Koji (p. 435). Lecithin (p. 447). Miso (p. 509). Natto (p. 530). Soybean (p. 739). Soy milk (p. 739-40). Soy sauce (p. 740). Tempe (or tempeh, p. 788). Tofu (p. 798-99), including plain tofu (dofu in Chinese), pressed tofu (*dofu-kan*, sic, *dofu-gan*), *wu-hsiang kan*, cotton tofu or momendofu, kinugoshi or silk tofu, *sui-dofu*, freeze-dried tofu [dried frozen tofu], smoked tofu. Cooked forms of tofu: Deep-fried tofu, *dofu pok*, *cha-dofu*, *abura agé* or deep-fried thin slices which can be opened to make *Inari-zushi*, *ganmodoki* or deep-fried tofu balls, *yaki-dofu* or tofu which has been grilled. Fermented tofu: The generic term is *dofu-ru*. The most popular type is white *dofu-ru*, and there is red *dofu-ru*, *tsao-dofu*, *ch’ou dofu* [*chou dofu*], *chiang dofu*. In the Philippines fermented tofu is called *tausi* [sic, *tahuri*, *tahuli*; *tausi* is fermented black soybeans]. Miscellaneous: A specialty of Japan is *umesutsuke*, “tofu pickled in plum vinegar with a purple exterior.” Note: As of Oct. 2011 not one hit / result for *umesutsuke* can be found on Google. Nor have we ever heard of such a Japanese tofu product.

Dofu nao (literally “bean brain”) or smooth curds, *yuba* or “bean curd skin” or “tofu skin,” *okara* or “presscake” (pulped skins of soya beans) (p. 798-99). *Yuba* (p. 860-61).

Also discusses: Alfalfa (p. 10). Almond (p. 12-13, incl. “almond milk”). Amaranth (p. 13). American cookbooks, history (p. 15-17). Azuki beans (p. 44-45). Barley, barley breads, and barley sugar (p. 58-60). Beef-BSE (mad cow disease, p. 68). Chia (p. 166). Cowpea (p. 230-31). Chufa (p. 185). English cookery books, history (p. 276-80). Five grains of China (p. 305). Gluten (p. 341). Groundnuts (or peanuts, p. 356-57). Hemp (p. 377-78). Hydrogenation (p. 391). Japanese culinary terms (p. 415-17). Kudzu (p. 437). Linseed (p. 454-55). Lupin (p. 463). Margarine (p. 478-79). Mung bean (p. 518). Nori (p. 534). Noodles of China (p. 537, incl. “*Gan si* {soya bean noodles}” and “*Fen si* {also *fen-szu*} {mung bean vermicelli}”). Oncom (p. 553-54). Quark (p. 644). Quinoa (p. 645). Seaweeds (incl. *hijiki*, *kombu*/*konbu*, *nori*, *wakame*, etc., p. 712). Sesame (p. 713). Shortening (p. 721-22). Sprouts (no listing). Tahini (p. 779). Toast (p. 797, incl. *Melba toast*). Ume and *umeboshi* (p. 817). Winged bean (p. 849).

The entry for “Fermentation” states that the two main

reasons for subjecting a food to fermentation are: (1) To “convert it from a form that will not keep, such as milk, to one which will, such as cheese.” (2) To “make foods which are indigestible in their original state, such as wheat or soya beans, digestible by turning them into products such as bread or tempe.” Other benefits include improvements in flavour. Many do not realize that fermentation is part of the process of making coffee, cocoa, vanilla, and many kinds of sausage. A brief biography and nice portrait photo of Alan Davidson, a man of extraordinary knowledge in the world of food, appear on the rear dust jacket.

Note: The paperback edition of this book (2002) is titled *The Penguin companion to food*. Address: World’s End, Chelsea, London, England.

8132. Klingel, Brigitta. 1999. *Gesundheit fuer die Zellen—Soja-Lecithin* [Health for the cells—Soya lecithin]. Munich, Germany: Suedwest Verlag GmbH. 96 p. Illust. (color photos). Subject index. Recipe index. 21 cm. [9 ref. Ger]

• **Summary:** A popular introduction to lecithin, with basic information about other soyfoods and vegetarian recipes. Contents: Lecithin—The multitasking. Soya lecithin. Help for the heart. Lecithin lowers blood cholesterol. Mental and bodily top fitness. Beauty thanks to lecithin. Soyfood products: Dry soybeans, soymilk, *yuba*, *okara*, tofu, tempeh, miso, soy sauce, soy sprouts. Recipes with lecithin. Address: Germany.

8133. Lwin, Claudia Saw. 1999. *The food of Burma: authentic recipes from the land of the golden pagodas*. Boston, Massachusetts: Periplus; North Clarendon, VT: [Distributed by] Tuttle Pub. 120 p. Introductory articles by Wendy Hutton, San Lwin and Win Pe. Illust. (color photos by Luca Invernizzi Tettoni). Index. 21 x 23 cm.

• **Summary:** Contains 75 recipes collected from all over Myanmar. A glossy, full-page photo is on every other page. The most populated “upcountry” region of Myanmar is the Shan Plateau. One of the main foods grown here is soya beans. The soups from this area are often “thickened with powdered soya bean. One example of this is a Shan version of Burmese noodles (*kyaukswe*), which is based on pork in a soup thickened with powdered soya bean...” (p. 12-13).

“The Shan tribes also make a fermented soya bean product similar to the Indonesian *tempe*, which is often dried, pounded and used as a seasoning” (p. 13).

“The soya bean, a native of China, appears in many guises in Myanmar: soy sauce, fermented soya beans (sometimes pressed into a cake and dried) and beancurd [tofu].” The Shan people also make a unique type of tofu from chickpeas. Sprouts are made from several types of beans, including soya beans and mung beans (p. 15).

In Part II, “Cooking in Myanmar,” the section on “Burmese ingredients” has three soy-related entries (p. 35): “Soya bean cake (*pè bya*): Dried soya beans are steamed,

fermented, and made into cakes or wafers, which are roasted or pounded to a powder. This powder is added to curries and soups, or mixed with tomatoes to make a dish similar to Myanmar curried *ngapi*.” A small color illustration shows soya bean cake. “Soy bean preserve (*pè ngapi*): Fermented soya beans are made into a paste and used as a condiment. Tinned soya bean paste is sold outside Myanmar and can sometimes be used as a substitute for the fermented soya bean products.

“Soy Sauce (*pe nganpya yay*):” Light and dark soy sauce are both used in Burmese recipes; the light sauce is saltier and paler in colour.

Soy related recipes: Khayanchinthee pantwepyaw (Tomato sauce, with “2 slices dried fermented soya bean cake, 7 cm (3 inches) in diameter,” p. 37). Wether ahchochet (Pork balls cooked in sweet soya bean sauce, with “2 tablespoons sweet soya bean sauce,” p. 96-97). Kailun gyaw (Stir-fried kailan, with “1 tablespoon light soy sauce,” p. 108).

8135. Mowe, Rosalind, ed. 1999. *Southeast Asian specialties: A culinary journey through Singapore, Malaysia, and Indonesia*. Cologne, Germany: Culinaria Koenemann. 319 p. Illust. (color photos by Günter Beer). Index. 26 x 22 cm.

• **Summary:** Translated from the German. Includes headings in Chinese. This book is a feast for the eyes, printed on glossy paper with informative color photos on almost every page. The structure and content are also creative and very interesting; it has caught the heart and spirit and nuances of the culture. On some pages, however, the type is too small to read. The name of most recipes and ingredients is given in their native language. A 2-page map of Southeast Asia appears near the front. The basic structure: Singapore (p. 12-109). Malaysia (p. 110-215). Indonesia (p. 216-301). Glossary (p. 302-04). Introduction to Chinese nutritional theory, by Andrea Fülling (p. 305-06): Introduction, yin and yang, the three warmers, the warming effect of foods (the five energy states are hot, warm, neutral, refreshing, and cold), the five elements. Acknowledgements. Photo credits. Index.

The contents includes: Healing herbs (p. 26-29). Soup as medicine (p. 30-33). Soybean (in Singapore, p. 40-47): Introduction (familiar forms are sprouts, soy sauce, beancurd, tempeh; new disguises are “vegetable protein,” emulsifier,”

“lecithin,” “vegetable oil” which are found in dairy products, canned fish, candies, desserts, and much more), in the West soybeans are “often grown as monocultures, with the disadvantages that this entails, such as the use of chemical fertilizers and pesticides,” and genetically engineered soybeans, great nutritional value yet rarely used as whole dry soybeans, most of the harvest in SE Asia is processed into beancurd and tempeh, importance of fermentation, soy milk resembles cow’s milk and is an excellent substitute, soy sauce is used throughout this cuisine. Photo of green soybean plants with green pods.

Soybean sprouts: “Black soybeans are imported from Thailand and Myanmar (Burma).” After washing, the beans are spread out in deep baskets and kept in the dark for 6 days. “Before the baskets of sprouts can be sold, the top layer if green leaves is trimmed off. They are used as feed for chickens and ducks. One basket yields 154 lb (70 kg) and the output of a medium-sized business is 60 baskets a day.” Soybean “sprouts should never be eaten raw, nor should they be cooked for too long.” Mung bean sprouts are better known than soy sprouts, but both can be bought fresh.

Dou ban jiang (“Salted soya bean sauce.” Photo of jar and Sinsin label). Dou chi (“Black bean sauce.” Photo of jar and Sinsin label). Note 1. Typically Dou chi are named “Salted black beans.” Photo of five glasses showing how dry soybeans are transformed into soymilk, then curds.

Tofu: Meat from the fields (p. 42-44). The best tofu is made from special types of soybeans that are different from those that are crushed to make oil and meal. Most of the tofu in Singapore is made from soybeans imported from Canada. Describes the basic process for making commercial pressed tofu or soft tofu, with 7 photos showing the steps. Implies that making yuba is part of the process for making tofu; it “is eventually sold as dried beancurd sticks (*fu chok*).”

Soy milk products: Fu pei—dried tofu skin [yuba]. Fu chok—dried tofu sticks [dried yuba sticks]. Tim chok—sweet tofu pieces [sic, sweet dried yuba / ama-yuba].

Note 2. This is the earliest English-language document seen (Feb. 2012) that uses the term “Tim chok” to refer to sweet dried yuba, or that uses the term “dried tofu sticks” to refer to dried yuba sticks.

Tofu fa—soft tofu as a dessert [tofu curds]; a little tapioca flour may be added. “Served warm or cold with a syrup flavored with almond extract.” Color photo shows yellow yuba atop hot soymilk, and a woman removing a slab pressed tofu from its mold.

Tofu recipes for every taste (p. 44-45): “Tofu on its own is rather bland in taste, but this is precisely its strength, since when it is combined with different ingredients and condiments it tastes new and different every time. Recipes: Niang dou fu (Fried beancurd pockets). Xia ren dou fu (Stir-fried beancurd with jumbo shrimp). Hong shao dou fu (Braised beancurd). Sui rou zheng dou fu (Steamed soft beancurd with ground pork). Dou hua (Sweet beancurd

dessert). Zha fu pi juan (fried beancurd skin [yuba] roll). Color photos show the 2nd and last recipes.

Soy sauce (p. 46-47): A naturally fermented product made with mold cultures of *Aspergillus oryzae*. Describes the process for both light and dark soy sauce; the koji is made in shallow round trays, ready after 4 days. It is “then transferred into fiberglass tanks [or earthenware jars], covered with brine, and left to ferment for 3 months,” after which the 1st extraction of crude soy sauce takes place [but not through pressure]. More brine is added and a second extraction takes place 1 month later; this process is repeated for the third extraction. “At this point, the paths of the different soy sauces diverge.” The saltier, light-colored soy sauce is mixed with a preservative, pasteurized, “and stored in tanks to clarify before bottling.” The dark soy sauce is mixed with both a preservative and caramel coloring, is allowed to mature for an additional 4 weeks, then is pasteurized and bottled. Note 3. What happens to the 2nd and third extractions? Color photos show five steps in the process, but a traditional earthenware vat is shown instead of the fiberglass tanks. Dark soy sauce is thicker than light. Recipes: Jiang you ji (Chicken in soy sauce, with marinade). Hong shao niu nan (Braised shoulder of beef).

Oyster sauce (contains no soy). Sesame oil (p. 49, with 7 photos).

Condiments (p. 50-51): Color photos show the front and label of 15 separate jars and bottles with a substantial description under each. Those containing soy are: Hoisin sauce. Dou chi (Fermented bean dried). Dou ban jiang (Tou cheong). Fu ru (Beancurd preserved). Jang qing (light soy sauce). Hei jiang you (Dark soy sauce). Tian jiang (Sweet sauce).

Peking duck (p. 62-65; soybean paste {no Chinese name is given} and Hoisin sauce are ingredients in the sauce). One key is the crisp skin. It is served in thin Mandarin pancakes.

Suckling pig (p. 86-87): Piglets are bred in Hunan province. Slaughtered at the age of 3-4 months. After a dead piglet has been patted dry, it is brushed with soy sauce, then coated with a marinade that includes fermented red bean curd and light soy sauce. As with Peking Duck, suckling pig is prized for its crisp, tasty skin. Six photos show the skewered baby pig.

Symbolic foods (p. 98-101): One of these is Moon Cakes from the mid-autumn festival (15th day of the 8th lunar month). “Traditional fillings include sweet black bean or lotus paste.” Is the sweet black bean filling made from soy beans?

Instant cup noodles [instant ramen] (p. 48): Note 4. Wikipedia says at Momofuku Ando: ORS [Order of the Rising Sun], (lived March 5, 1910–Jan. 5, 2007) was the Taiwanese-Japanese businessman who founded Nissin Food Products Co., Ltd. He is famed as the inventor of instant noodles and cup noodles, which he launched on 25 Aug. 1958 (at age 48) under the name Chikin Ramen—after months

of trial and error experimentation to perfect his flash-frying method. On 18 Sept. 1981 he launched his most famous product, Cup Noodle.

Beansprouts (p. 154-57): With a long introduction, a description of the process, beautiful photos, and recipes: Taugeh goreng kucai (Fried beansprouts with chives). Taugeh masak kerang (Fried beansprouts with baby clams). Tahu goreng (Fried tofu with beansprouts). Bihun goreng (Fried rice noodles). Urap taugeh (Fried beansprouts with grated coconut).

Nasi tumpeng (rice cone) (p. 220). Served with sambal goreng tempe (crisp-fried marinated strips of tempeh). Gudeg (rice with green jackfruit cooked in a sweet sauce, p. 221) is served with a side dish of tahu goreng bacem (tofu cooked with spices, then fried).

Tempeh (p. 228-29), soybeans fermented with *Rhizopus oligosporus* mold. Indonesians consume more tempeh than tofu. The process is described, with 4 color photos: Recipe: Tempe goreng (fried tempeh).

Glossary (p. 302-04) includes: Fermentation. Soy sauce (“Probably the best-known Asian seasoning agent,...”). Sticky rice (also known as glutinous rice). Tahu (Indonesian; tofu). Tempeh. Tofu (beancurd, incl. hard, soft, and smoked).

8136. Togano, Meiji. 1999. Saishin shôyu jôzô-ron [Principles of modern shoyu brewing. 3 vols.]. Tokyo: Ryûkei Shosha. Illust. 22 cm. Series: Meiji Kôki Sangyô Hattatsushi Shiryô, Nos. 459-461. [Jap]*

• **Summary:** This is a modern edition of his classic, first published in 1913 and 1914.

8137. Wild Oats Community Market; Alfalfa's Markets. 2000. The joy of soy: Resolve to evolve. This millennium, pick up a good habit. Your guide to soyfoods—True health food. Colorado. 8 panels. [10 ref]

• **Summary:** This is a chain store newspaper (published from time to time; copyrighted 1998), with this issue devoted to soyfoods. It contains ads for many soy products sold at the store, many of them on sale. “Soy strategy: 3 New Year's resolutions. 1. Get healthy. 2. Lose weight / cut down on bad fats. 3. Help protect the environment.

A sidebar titled “Cool beans! Top ten reasons to enjoy soy” states: “1. Soy protein helps reduce cholesterol levels, thereby reducing the risk of coronary heart disease, which accounts for more than 500,000 deaths in the U.S. per year.

“2. The soybean is the only vegetable to offer a complete protein profile, equal to both meat and eggs in its protein content.

“3. As a complete protein, soy contains all nine essential amino acids. (The human body needs twenty amino acids, only eleven of which are produced by our bodies).

“4. Soybeans are higher in essential, healthful fats than most vegetable foods.

“5. Soybeans are a good source of several vitamins and

minerals, including calcium, zinc, copper, magnesium, iron and many of the B vitamins.

“6. One acre of soybeans provides about 30 times more protein than one acre devoted to raising beef.

“7. Soy is also the richest dietary source of isoflavones, which act as phytoestrogens that may help protect against cancer, osteoporosis and menopause.

“8. Soy may increase bone density and reduce the risk of osteoporosis.

“9. Soy may reduce menopausal hot flashes in women—good news for those women who do not wish to take hormone replacement therapy.

“10. Other heart-healthy benefits of soy include low saturated fat, high calcium content, high essential fatty acid (EFA) content, high vitamin E content and no cholesterol.”

There are definitions of and information about: Miso, shoyu, tamari, tofu, tempeh, soy milk, soy yogurt, soy cheese, soy desserts, soy oil, soy flour, texturized soy protein, soy grits, soy nuts, edamame (soy in the pod), and meat alternatives.

8138. **Product Name:** Senbei (Rice Crackers) [Soy, Original (Lightly Salted), and Sun Dried Tomato].

Manufacturer's Name: Masuya Naturally (Importer). Made in Japan.

Manufacturer's Address: 730-999 Canada Place, Vancouver, BC, V6C 3E1. Phone: (604) 844-1913.

Date of Introduction: 2000. January.

Ingredients: Incl. glutinous rice flour and soy sauce.

How Stored: Shelf stable.

New Product—Documentation: Card sent by Patricia Smith from Natural Products Expo, Anaheim. 2000. March 27. This postcard advertises Masuya's senbei. On the front is a color illustration of the Buddhist monk Kobo Daishi (St. Kobo) kneeling by a long rectangular hibachi (*naga-hibachi*) and baking rice senbei using the ancient Japanese method. The back notes that Masuya sells three varieties of senbei and gives the company's address, phone, and website.

Talk with Brian R. Elliot at Masuya in Canada. 2000. March 31. This product was introduced in North America in Jan. 2000. It is made in Mie prefecture, Japan and packed in 4 oz foil bags for freshness. The company plans to switch from shoyu to tamari so that the product is free of wheat and gluten.

8139. Purvis, Kathleen. 2000. Say soy! New foods and drinks keep sprouting from these magic beans. *Post-Dispatch* (St. Louis, Missouri). Feb. 14.

• **Summary:** Perhaps the tastiest form of soy is edamame. These green soybeans, boiled, salted, and served chilled, are the “latest craze in the chi-chi [“chic”] cocktail set.” In Japan they are served as snacks with beer or sake.

In the six months before June 1999, sales of soyfoods have grown 34.4%, according to data from SPINS. Sue

Havala notes that soymilk is now available at mainstream food stores / supermarkets. A full-page color photo shows bright green edamame, with the pods both opened and closed. Contains four recipes and a glossary of the following: Green soybeans, soymilk, soy flour, soy nuts, canned soybeans, soynut butter, miso, tofu, tempeh, soy sauce. Address: Knight Ridder Newspapers.

8140. Bittman, Mark. 2000. Faster than you can say soup: The minimalist. *New York Times*. March 29. p. F3, or p. B12 (National ed.).

• **Summary:** “It would be hard to find a more powerfully complex natural convenience food than miso.” Miso, which is more intense than soy sauce, but not saltier, can be used to make dressings and sauces, or toppings for tofu. “But miso's most amazing feat is turning a cup of hot water into soup in about 30 seconds.” Contains a recipe for “Nearly instant miso soup,” with tofu, carrots and scallions.

8141. Edward & Sons. 2000. A new look and a new variety! Organic vegan. Premier Japan (Sell sheet). Carpinteria, California. 1 p. Single sided.

• **Summary:** Shows the front label of four organic bottled sauces: Garlic Tamari, Ginger Tamari, Wasabi Tamari, and Thai Soynut. The first three are 5 oz, the last is 10 oz. On each is a vegan logo. Address: P.O. Box 1326, Carpinteria, California 93014. Phone: 805-684-8500.

8142. **Product Name:** Soy Deli Baked Tofu [Teriyaki, Hickory, Honey Sesame].

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 171 Beacon St., South San Francisco, CA 94080. Phone: 650-553-9900.

Date of Introduction: 2000. March.

Wt/Vol., Packaging, Price: 6 oz.

How Stored: Refrigerated.

New Product—Documentation: Leaflet (glossy, color, two-sided) from Natural Products Expo (Anaheim, California). 2000. March. “The Soy Deli—Hand crafted by tofumasters since 1906.” The front shows the labels of 20 Soy Deli brand products made by Quong Hop & Co., including five types of baked tofu. The back gives product specifications for each. Each product is organic.

8143. **Product Name:** Japanese Miso Dressing, Sesame Soy Dressing, Teriyaki Sauce.

Manufacturer's Name: Red Shell Foods Inc. (Marketer-Distributor).

Manufacturer's Address: 825 Baldwin Park Blvd., City of Industry, CA 91746. Phone: 1-800-40-Salad.

Date of Introduction: 2000. March.

Ingredients: Miso dressing: Soy bean oil, rice vinegar, soy bean paste (soy beans, rice, salt), white wine vinegar, sugar, etc.

Wt/Vol., Packaging, Price: -

How Stored: -

Nutrition: -

New Product–Documentation: Sell sheet sent by Patricia Smith from Natural Products Expo, Anaheim. 2000. March.

8144. Seapoint Farms (Formerly Seaside Farms). 2000. The wonder veggie (Leaflet). Huntington Beach, CA 92648. 1 p. Front and back. 28 cm.

• **Summary:** Two different glossy color leaflets with this title were distributed at the Natural Products Expo in Anaheim, California, March 2000. The front of this one shows the label of four new frozen Edamame Rice Bowl products: Vegetable Fried Rice, Kung Pao Vegetable, Teriyaki Vegetable, and Szechwan Vegetable. Each 12 oz pack contains green vegetable soybeans mixed with other vegetables and original sauces. Seapoint Farms has trademarked the phrase “The wonder veggie.” In the center of each front label is a circle in a square with a large red heart at the center. On the heart is written “Heart Healthy.” Around the circle is written: “The Wonder Veggie” and “100% Vegetarian.” For questions call: (888) 722-7098. Across the bottom of the ad is the FDA health claim for soy protein. One serving of each products contains 7.25 gm of soy protein. The back contains nutrition facts, ingredients, and other information about each of these four edamame products.

The front of this leaflet, “The Wonder Veggie” appeared later as an ad in *Natural Foods Merchandiser*. May. p. 48. Address: Huntington Beach, California 92648. Phone: 1-888-722-7098.

8145. Stephens, Roger; Stephens, Jane Ade. ed. and comp. 2000. Soyfoods guide 2000: Helpful tips and information for using soyfoods. Indianapolis, Indiana: Stevens & Associates, Inc. Distributed by the Soy Protein Partners. 24 p. Illust. No index. 28 cm. [23 ref]

• **Summary:** This guide is available only on a limited basis to dietitians and health professionals. Contents: Health: Add soy to diet to reduce heart disease (FDA recommends 25 grams of soy protein a day to reduce blood cholesterol levels), sample day soy meal planner (easy ways to add 25 grams of soy protein). Daily soyfood guide pyramid. Soy and your health—Scientists are learning about soy’s health benefits: Isoflavones, heart disease, menopause & osteoporosis, cancer, allergies, diabetes & kidney disease, fat. Soyfood Descriptions: Meet the bean: Green vegetable soybeans (edamame), hydrolyzed vegetable protein (HVP), infant formulas, soy-based, lecithin, meat alternatives (meat analogs), miso, natto, nondairy soy frozen desserts, soy cheese, soy fiber (okara, soy bran, soy isolate fiber), soy flour (50% protein), soy grits, soy protein concentrate, soy protein isolate (isolated soy protein, 90% protein), soy protein, textured (flour or concentrate), soy sauce (tamari, shoyu, teriyaki), soy yogurt, soybeans, soymilk, soy beverages,

soynut butter, soynuts, soybean oil & products, sprouts (soy), tamari (see soy sauce), tempeh, Teriyaki sauce (see soy sauce), tofu & tofu products, whipped toppings, soy-based, yuba. Helpful charts: Soyfood substitutions, soyfood isoflavone content. Soyfoods web site. Soyfood composition. Recipes using: Meat alternatives, textured soy protein, whole soybeans, soy flour, soynut butter, soymilk, tofu. Address: 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

8146. Chen, Ingfei. 2000. Diet wisdom from the East: New research confirms it. The simple, mouthwatering meals that Asians have eaten for centuries hold disease-fighting secrets that we should all take to heart. *Health*. April. p. 126-31, 177-78.

• **Summary:** With recipes by Nina Simonds. Photos by Brooke Slezak. Nina, age 47, lives in a cozy brick home in Salem, Massachusetts. An author and expert on Asian cuisine, she has just prepared a small feast for her husband and a few guests. Walter Willett, head of the nutrition department at the Harvard School of Public Health, is “nibbling on boiled *edamame*, or soybeans. Nina’s passion is the health benefits of Asian cuisines, which use less meat, more veggies, and less artery-clogging fat—with meals that are quick, simple, and delicious. These health benefits of an “almost-vegetarian” diet are being proven by the Cornell-Oxford-China study, directed by T. Colin Campbell, with vital assistance from Chen Junshi, a nutritionist from Beijing. They conducted huge studies in 1983 and 1989. The first study showed that the Chinese get only 15% of their calories from fat, compared with 34% in America. Moreover, the Chinese consume three times as much fiber and a third less protein. But 89% of their protein is from plant sources, whereas 70% of U.S. protein is from animal sources other than fish—such as meat, poultry, eggs, and dairy products. The conclusion: Americans out to be eating more plant foods.

In 1994 Willett and his colleagues at Harvard teamed up with the Oldways Preservation and exchange trust in Boston to introduce the traditional Mediterranean diet pyramid. A year later, in 1995, a rival Asian diet pyramid based largely on Campbell’s work, made its debut. They agree on several key points. Eat plenty of grains (ideally whole grains) and veggies, and cut way back on red meat.

Nina Simonds, hoping to ease her passage through perimenopause, has been adding “extra tofu and soy” to her meals. Soy-related recipes include: Wild mushrooms with ginger-soy dressing [with soy sauce]. Photos show: (1) Nina Simonds smiling. (2) Walter Willett nibbling on edamame. (3) A close-up of edamame in the pods.

A sidebar titled “Foods for lifelong health: From the Asian pantry” (p. 129) discusses the importance of balancing the body’s yin and yang. One part states: “Soy—Ancient wisdom: Fermented black soybeans are used to treat lung and

digestive problems. Tofu is said to boost energy, lubricate the intestines, detoxify the body,” and prevent vomiting, intoxication, and high blood pressure. Modern research shows that soy protein can lower high blood cholesterol levels. Generous servings of isoflavone-rich soy may partly explain why prostate and breast cancer rates are so low in Asia. These isoflavones also appear to bolster bone density and may ease menopausal symptoms.

8147. Jonas, Steven; Gordon, Sandra J. 2000. 30 secrets of the world's healthiest cuisines: Global eating tips and recipes from China, France, Japan, the Mediterranean, Africa, and Scandinavia. New York, Chichester, Weinheim, Brisbane, Singapore, Toronto: John Wiley & Sons, Inc. ix + 261 p. Index. 24 cm. [80* ref]

• **Summary:** This book contains numerous recipes for beef, pork, lamb, chicken, shrimp, salmon, and other meats. Soy-related recipes and topics include: Isoflavones (p. 77, 85-86). Miso (p. 83-84, 86, 186). Soy sauce (p. 36, 51-52, 85, 138). Soyfoods (p. 37, 77, 103, 137). Soyfoods in Japan (p. 83-86). Tofu (p. 83-86, 137). Tofu recipes (150, 173, 182, 185, 188). Vegetarian eating (p. 44-45, 106), Vegetarian recipes (p. 181-97).

Dr. Steven Jonas is a veteran triathlete, a certified professional ski instructor, and a longtime author of books on healthy eating and exercise (he has written 8 books of his own). Address: 1. Prof. of Preventive Medicine, State Univ. of New York, Stony Brook; 2. Freelance health and nutrition writer, Weston, Connecticut.

8148. *Vegetarian Times*. 2000. Glossary. April. p. 119.

• **Summary:** Five of the seven entries are for soyfoods: Hoisin sauce, edamame, miso, tempeh, and tofu. The pronunciation of each is given.

8149. Fort, Matthew. 2000. Braised or roasted, sir: France is shocked by the news that a man has been caught eating his dogs. But why are we so horrified by the idea of cooking our pets? *Guardian (England)*. May 26. p. A6.

• **Summary:** Earlier this week a man in France was fined £300 for eating an unknown number of dogs in his care. Unfortunately, we were told nothing about how he cooked them.

“Did he, for example, braise them with soy sauce, sugar, fermented bean curd, dried bean curd [probably *doufu-gan*, which is pressed tofu], water and white wine to make the classic Chinese dish of *hon tsao go zo* (red cooked dog)? Or did he favor the Hawaiian style spatchcocking them and grilling them on the barbecue with sweet potatoes?”

• **Summary:** This is basically a reprint of Dana's 1996 book titled *Soy! 75 Delicious Ways to Enjoy Nature's Miracle Food*, also published by Prima Publishing. It contains no new text and no new recipes; a few small errors have been corrected and the design of both covers and the title page is new. Address: Food writer, New York, NY.

8151. Carpenter, Joseph. 2000. Living in Boston and on the Oak Feed Miso Co. land in Rutherfordton, North Carolina from 1979 to 1980. Part I (Interview). *SoyaScan Notes*. June 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Joseph was born on 5 Aug. 1948 in Oakland, California, at Providence Hospital. He lived with his family in Berkeley until he was age 10; his father, who was a carpenter by trade, died in 1954, when he was still a boy. He and his mother then moved to nearby El Sobrante (by the back gate of De Anza High School—where he graduated from high school). He attended Contra Costa Junior College for two years, moved up to Sonoma State for a year, then dropped out. At age 19-20 (1967-68), he took off to see the world. As a young man, he became a skilled carpenter, learning by doing. Several of the men he worked with were good teachers.

A hippie during the 1960s, he met Patricia Roberts who was born in March 1947 in Queens, New York, and grew up in Rockaway Beach in Queens. Her father was a New York City police officer and detective for 20-25 years. Her parents retired to Florida in the late 1960s or early 1970s. When the kids were at home, they lived in a nice big home at Whitehouse Point; after the kids were gone, they moved to Deerfield Beach. Soon after meeting Patricia, Joseph stopped using psychedelics drugs and alcohol. They picked apples together in Hood River, Oregon, and lived in an old picker's camp. Having been overweight, he lost about 80 pounds in less than 6 months—and felt great. He and Patricia and a girl friend of hers migrated to Tucson, Arizona, where they were planning to pick oranges for the winter. While looking for a place to stay, they came across a macrobiotic bakery, The Granary, run by Jack Garvey. That was their first introduction to macrobiotics. Because of their largely raw food diet, they were somewhat resistant at first, but soon became friends and students of Jack's. In 1973 Joseph and Patricia were married in Arkansas.

1977 Feb.—Joseph arrives in Boston from Northern California; he is very sure of this date. He met Charlie Kendall (a maker of traditional natto, amazake, and mochi), who had just bought a house in Brookline by the railroad tracks; Joseph helped him extensively remodel that building. Charlie's wife, Yoko, was Aveline's sister. Joseph soon became friends with Bill Painter, who was a house painter by trade and also had a small shop in the basement of the Kushi's house. Before long Joseph was working as a carpenter with Bill Eggloff, building a handsome grain bin for Erewhon's retail store on Newbury Street. Using

red oak and Plexiglas, they worked on it in the basement, which had a garage door that opened onto the alley behind the store. Bill, who lived on Cape Cod, stopped working for Erewhon when the bin was finished. But the store needed more fixtures, so Joseph made a bid, signed a contract, then installed new check-out stands, new shelves, and units to hold the crocks of bulk tamari, barley malt, etc. Joseph had a family to support, and carpentry was his livelihood, so he was paid for all work he did in the Boston area. Later, over 4-day weekend, he worked to tear out old bathrooms and office spaces to open up the cramped front of the Erewhon store. He also did some work on a new Erewhon store in Brookline. After Erewhon moved out of their old 4-story brick warehouse, he worked on the huge modern warehouse that Erewhon moved into. The Kushi's house on 62 Buckminster Road had been the headmaster's house for a private school. Upstairs there was an institutional bathroom. Aveline asked Joseph to remodel it to make a private bathroom—with lots of tile. After about a year of working for the macrobiotic community (always for pay), Joseph got “burned out” and went to work for a regular contractor unconnected to macrobiotics.

1977 Christmas—Joseph and Patricia go to Florida for Christmas, one of many trips they took there. In early 1978 Joseph worked as a carpenter for several months in Sandy Pukel's Oak Feed Restaurant in Coconut Grove, Florida. He had gotten to know Sandy because his wife, Patricia, and Sandy were close friends; they had first met when they both went to a seminar Michio Kushi gave in Coconut Grove. After the restaurant opened, in about May 1978, Joseph and Patricia took a vacation to Jamaica. During the summer and fall of 1978 Sandy came to Boston several times. Each time he and Patricia and Joseph went out to dinner together. Sandy mentioned that he was thinking of starting a miso company and asked if they might be interested in getting involved. They expressed interest, but no definite plans or offers were made.

1979 Feb.—Joseph's second child, Benjamin, is born in Boston to his wife Patricia. The Carpenters took many trips to Florida, especially during the winter, to visit Patricia's parents. In about March 1979, over a long weekend, when Patricia and their two children were vacationing in Florida (visiting her parents), Sandy Pukel paid for Joseph to fly from Boston to South Florida for a meeting to discuss the part that the Carpenters might have in the development of the new miso company. Sandy knew Joseph's skills as a carpenter. Joseph recalls that the meeting was at Edmund Benson's house. Sandy said that he wanted Patricia and Joseph to become part of the miso company. In exchange for their labor, they would be given a share of the business ownership worth \$25,000. Joseph does not recall whether they would receive the \$25,000 once or each year that they worked—but he definitely recalls the \$25,000 offer. Joseph recalls that the talk at this first meeting was very general

in terms of what kind of carpentry or construction work he would do for the company.

1979 May (late)—Joseph leaves Boston in his van, headed for North Carolina—after handing over their house to the next renters. On the way, following Sandy's instructions, he stops in Hendersonville, North Carolina, for about a week to check out some real estate. With real estate agents that Sandy Pukel and/or Edmund Benson had found, Joseph looks at property the agents thought might be appropriate for the miso company in the Asheville area and in Rutherford County. As far as he knows, Joseph was the first person to actively look for land for the miso company. They found several properties that Joseph considered borderline, so Sandy (and probably John Belleme and Edmund) flew up from Florida and they all visited these sites together. Finding nothing that was suitable, they left. Joseph continued on to Florida in his van to be with Patricia and their children. Sandy continued to work with local realtors until he found a suitable piece of property. Joseph is quite sure that just before they finally purchased the land in Rutherfordton, Sandy, Michio and he (and perhaps a few other people) all went to see the property at the same time. They walked over the roughly 100 acres of land and through the beautiful house.

During the summer of 1979 Joseph and Patricia met with Sandy and Edmund several times to discuss their living on the miso company land while John and Jan Belleme were away studying miso-making in Japan. Though nothing was put into writing, Joseph and Patricia both recall clearly that their daily expenses would be taken care of, they would work on the land, and, at the end, they would own a part of this new business. They were not given any specific list of tasks or duties they were expected to accomplish. Continued. Address: 10655 Lakeshore Dr., Clear Lake, California 95422. Phone: 707-994-3218.

8152. Gonzales, Greg. 2000. Making miso and koji for American Miso Co. Inc. Part II (Interview). *SoyaScan Notes*. June 20-21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** To enter the original koji room, one had to step up a foot or so from floor level. The koji table was built into the room, and was thus immovable. The original koji room is now used for cold storage of miso tamari from the top of the vats (they bottle and sell it) and for tubs of bulk miso. The company now has two new and larger koji rooms. The floor of each is level with the floor of the building and the door is larger; thus, it is now possible to roll the koji table and racks of koji trays in and out of the room. Two koji tables can fit side by side in one new koji room. Don DeBona had the idea of putting the koji table and racks on wheels. He called it “Reinventing the wheel.” Each koji room has about the same floor area as the old one, but the ceiling is 8 feet high rather than 6 feet. The floor of the new rooms is insulated wood

(rather than cement) to prevent loss of heat and humidity.

After the rice is steamed, it is put into the hopper of a machine where three things happen: Metal fingers break up any clumps, a water-cooled jacket cools it, and a small blower blows spores of koji starter over it. It comes out onto a low table, whence it is shoveled (using a stainless steel shovel) into the koji crib atop the stainless steel table. The koji crib is about 18 inches deep and is lined with organic linen cloths before the cooked rice is put in. The inoculated rice, on the table, is then wheeled into the koji room.

"The hotter it is, the harder it is to make koji," notes Greg. So on very hot days, Greg will spread the grain by hand on the low table to cool it faster and more; then he will inoculate it by hand, and work the inoculant in evenly with his hands.

When the koji in the crib is ready, the crib (on its table) is wheeled out of the koji room. The koji is then scooped onto koji trays using a one *shō* measure. Greg does not stack the koji trays in different ways to conserve or release heat; rather he puts them on rolling racks. Once a koji tray is placed on a rack, it stays in that place on the rack until the koji is ready. When a rack is full, it is wheeled back into the koji room. This saves labor and enables Greg to make much more koji.

Greg makes miso in a three day cycle. He steams the rice on Monday, puts it in trays on Tuesday, and makes the miso on Wednesday. For most of the year, this cycle is repeated twice a week. Making miso twice a week is hard work. During the busiest times of year, the company employs about eleven people—including Greg; five in production and six in packing. Many of the packers are local women who like the miso company work better than that offered by the local mills, because there is less stress, and they can set their own hours as long as the work gets done. Greg is the general manager, in charge of these workers. He really appreciates this challenging opportunity. So far this year, Greg and his coworkers have made 119,250 lb of finished koji.

Most consumers use miso to make soups. They use more miso in the winter than in the summer. So by the beginning of summer, the vats are usually full. By October or November enough vats have been emptied of their miso, that it is time to start making more miso to refill them.

Concerning this work, Greg reflects: "I love it. I don't mind hard work. It offers its own reward. I feel connected to everyone who went before me—part of a lineage. Also, you can't be phony with the koji, or pretend, or get arrogant with it. If you don't look at it carefully, and feel and smell it, then you'll make a mistake. It's dynamic, and it keeps you honest that way. This is an honorable thing to do, and I feel privileged to have found myself in the same wacky way that everything else happened here—to be the baby sitter for a while."

When not making miso, Greg continues to write short stories and poetry. When he learned that Erewhon was

connected with this miso company during its formative years, he joked: "That makes perfect sense. 'Erewhon' spelled backwards is 'nowhere,' and this place is out in the middle of nowhere." Recently Louise Hagler of The Farm in Tennessee visited the American Miso Co. for three days. She is writing a miso cookbook, which will contain a brief description of koji and how it is made into miso.

Greg's son, Devin, is now age 8, and his stepson, Keith Fancher (who is into computers and math) is age 16. Manon cares for the kids at home. They are considering home schooling for next year. Both of Greg's parents are still alive. They have found that the corporate world is not a nurturing place. So they have come to respect his choice to follow his own path, and the fact that he is now general manager.

Talk with Barry Evans, owner of American Miso Co. 2000. June 29. Greg Gonzales' right hand man in making (and tending) koji and miso is his brother, Dave Gonzales. Two black guys and a Honduran immigrant also make koji and miso with them. The father of Greg's partner, Manon Fancher, is Hampton Fancher, who is a screen writer; he wrote the script for the well-known movie *Blade Runner*. Address: 4225 Maple Creek Rd., Rutherfordton, North Carolina 28139. Phone: 828-287-2940.

8153. Troy, John. 2000. Update on Wizard's Cauldron and work with miso (Interview). *SoyaScan Notes*. June 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John's original organization was the Lindenself Foundation, a nonprofit organization involved with Eastern spirituality. The linden tree symbolized the heart. Out of this grew Linden's Elfworks, then Elf Works, Ltd., whose first product was a candy bar named Wizard Baldour's Power Pac introduced in 1976, and containing ginseng. Elf Works, Ltd. was created outside of the nonprofit corporation, and it existed only briefly (1981-1984).

In about 1980, John was first introduced to miso by Joel Dee of Edward & Sons who was introducing his Miso Cup, a dehydrated miso soup. Troy's next product was Wizard Baldour's Hot Stuff (in Regular or Blazing intensities); it was the company's first big success. It contained miso from the day it was launched. Troy first bought this miso from Erewhon (a fairly dark salty rice/red miso), but when Erewhon filed for Chapter 11 bankruptcy in Nov. 1981, Troy started buying his miso from Barry Evans of American Miso Co. It was John Belleme and Barry Evans who really got Troy interested in and involved with miso—before American Miso Co. had any miso for sale, but after their miso plant had been constructed. Troy can't remember how, where, or when he met Barry Evans. Belleme told him about going to Japan and apprenticing with Mr. Onozaki. Later Barry Evans introduced Troy to John Fogg in Charlotte. Troy later worked closely with Fogg; "at first I thought he was arrogant and fussy, but he ended up being a tremendous influence in my life, and taught me so much about marketing... To this day I

still draw on the wisdom of John Fogg.”

Troy now makes almost 100 different products for the natural food trade. Most of these contain miso and/or soy sauce. All of his business is private labeling, so he develops and manufactures products, which other companies market. Across the street from his office is a modern, high speed blending, bottling, labeling plant, with plenty of cold storage. He manufactures and bottles every product he develops. His company, The Wizard’s Cauldron, Ltd., run small by a small team of leaders, now does about \$2 million a year in annual sales. His products are now almost totally organic—200 ingredients. John has just a handful of customers. The biggest is Whole Foods Markets; he makes all the salad dressings and sauces sold under the Whole Foods label. Second biggest is Joel Dee of Edward & Sons. Troy makes four brands for Joel Dee: Premier Japan, The Wizard’s, Troy’s, and Rain Forest Organic. Joel’s company owns the “Wizard” brand, which Troy gave him in 1987 as part of his “recovery plan” after American Natural Foods went down the tubes. Joel said, “You make it, I’ll sell it.” At about the same time, they also both developed the Premier Japan brand and line, which is still doing extremely well. In about July 1989 John developed “The Wizard’s Worcestershire Sauce,” a vegetarian sauce, for Joel Dee. It is now selling better than Hot Stuff. Ponzu is the Japanese equivalent of Worcestershire sauce; they use bonito instead of anchovies. But ponzu originated first, so “Worcestershire sauce is a Western ‘knock-off’ of ponzu.” The Ginger Tamari is still a wonderful product that is doing very well.

Troy’s third largest customer is Albert’s Organics, America’s largest organic produce distributor, for whom he makes a line of fresh, refrigerated organic dressings. Albert’s Organics recently merged with UNFI (United Natural Foods, Inc., the collection of distributors that was Stow Mills, Cornucopia, Rainbow, Mountain People’s Warehouse, etc.). UNFI is now a big publicly-owned company. Troy’s favorite product developed for Albert’s is Mellie’s Miso Mustard Dressing, launched in 1998 with a mild miso from American Miso Co. Albert’s daughter is named Mellie.

John is now developing a line of dressings under the Moosewood Restaurant brand for the people who own that restaurant. John’s favorite is the Miso Ginger Salad Dressing. A few days ago he closed a deal with Robert Tepper (formerly of The Farm, in Summertown, Tennessee) to market his Simply Delicious brand of dressings. Robert now has his own company named Sunrise Management, which is a brand management company; Simply Delicious will be the first brand he owns. Robert worked for Natural Nectar, then Blue Sky, then Annie’s (which he left in early 2000 to start his own company).

John’s main work is still developing new products and naming his creations—the work he enjoys most of all things. “It’s really fun.” Blessed are those who find a way to do what they love most in life. Address: The Wizard’s Cauldron, 8411

Hwy. NC 86 N, Cedar Grove, North Carolina 27231. Phone: 919-732-5294.

8154. Katayama, Osamu. 2000. A dash of Kikkoman: When it comes to soy sauce, the Kikkoman Corporation has its competitors licked. *Look Japan (Tokyo)* 46(531):18-19. June.

• **Summary:** Contains a brief history of shoyu followed by a history of Kikkoman and how the company began to sell, then make shoyu in the USA. Shoyu was first brewed in Japan during the late Muromachi period (1333-1568), and the Mogi and Takanashi families were among the first to make shoyu commercially—both in the town Noda, north of Tokyo. In 1917 their descendants incorporated their brewery as Noda Shoyu Co. Ltd. Today that company is known worldwide as Kikkoman.

Kikkoman’s move toward America began in 1957, when a sales company was established in San Francisco, California. Their first U.S. plant came on line in 1973—after years of study and debate. That plant now produces some 80,000 liters/year and accounts for about 50% of the different types of soy sauce sold in the USA. Over the past 26 years, Kikkoman’s output of soy sauce has increased 12-fold!

In the year 2001 Kikkoman plans to build a plant in China. Though the Chinese market for Japanese-style soy sauce is small at present, the prospects for growth are large.

Kikkoman has had the hardest time introducing shoyu in Europe, which is more conservative than the USA or Australia. The company began by launching a *teppan-yaki* business in Germany, followed by a sales company in 1979, also in Germany. In 1997 Kikkoman built its first European shoyu plant in the Netherlands. Why is the overseas market for shoyu growing so nicely? Yuzaburo Mogi thinks it is because more and more people are realizing how well shoyu goes with meat.

Photos show: (1) Yuzaburo Mogi. (2) A 19th century woodblock print of Kikkoman’s Noda factory. (3) Three bottles of different Kikkoman soy sauces and a table-top dispenser. Kikkoman’s logo is composed of an hexagonal tortoise shell (“kikkô”) inside of which is the Chinese character / ideogram for 10,000 (“man”). (4) Kikkoman’s first U.S. plant at Walworth, Wisconsin.

8155. Kikkoman Corporation. 2000. Annual report 1999. 339 Noda, Noda-shi, Chiba 278, Japan. 33 p. 28 cm. [Eng]

• **Summary:** The information in this English-language annual report is current as of April 2000. Contents: Financial highlights. A message from the president (Yuzaburo Mogi): Overview of the fiscal year, principal developments, summary of business policy (business principles, medium-term business strategy, business organization, basic policy on distribution of profits, looking to the future, tasks for the coming years, in closing). Global operations: The Americas, Europe, Asia and Oceania, Japan. Review of

operations: Soy sauce, soy sauce derivative products, Del Monte, sake and wine. Research & development. Financial section: Consolidated balance sheets, etc. Corporate history (chronology from April 1925 to Nov. 1999). Global network (directory of Kikkoman names, addresses, and phone numbers worldwide). Board of directors and officers. Corporate data.

Consolidated net sales fell 3.4%, but net income rose 1.3%. In 1999 overseas operations (excluding exports from Japan) accounted for about 27% of consolidated net sales and 49% of Kikkoman's consolidated operating income.

The Americas: Today more than 100 items are manufactured at Kikkoman's plant in Walworth, Wisconsin. The plant's annual soy sauce production capacity is 80,000 kiloliters. The new Folsom plant had an initial annual soy sauce production capacity of 10,000 kiloliters. There is room to expand this capacity fourfold. In the year 2000 production capacity is expected to reach 15,000 kiloliters. Annual per capita soy sauce consumption in the USA has increased to 700 milliliters, which is less than 8% of the estimated 9,000 milliliters per capita in Japan. U.S. consumption is expected to double within the next ten years.

Color photos show: Yuzaburo Mogi, Kikkoman's new headquarters in Noda, all company products. Address: Noda, Japan.

8156. **Product Name:** Edamame Rice Bowl: Vegetable Fried Rice, Kung Pao Vegetable, Teriyaki Vegetable, and Szechwan Vegetable.

Manufacturer's Name: Seapoint Farms (Formerly Seaside Farms).

Manufacturer's Address: Huntington Beach, CA 92648. Phone: 1-888-722-7098.

Date of Introduction: 2000. June.

Ingredients: Teriyaki Vegetable: Cooked rice (rice, water), edamame (soybeans), teriyaki sauce (water soy sauce {water, wheat, soybeans, salt}, sugar, corn starch {unmodified}, sesame seed oil, xanthan gum, natural hickory smoke flavor), vegetable blend (baby corn, red bell pepper, carrots).

Wt/Vol., Packaging, Price: 11 oz (312 gm).

How Stored: Frozen.

New Product–Documentation: Leaflet (glossy, color, two-sided) from Natural Products Expo in Anaheim, California. 2000. March. "The wonder veggie." A large color photo shows each of the four products.

Ad (8½ by 11 inches, full color) in *Natural Foods Merchandiser*. 2000. May. p. 48. "The wonder veggie." Same as the front of the leaflet.

Talk with Kevin Cross, owner and founder of Seaside Farms. 2000. May 11. He had to change the company name because another company named Seaside was selling beans. The company recently moved its offices from Cardiff by the Sea to Huntington Beach. The four products will be available in stores in June. Kung Pao is the spiciest, followed by

Szechwan Vegetable. The word "Soybean" is not part of the product name. He is advertising these four products widely, with ads in *Natural Foods Merchandiser* in May and June, in *Vegetarian Times* in June and July, and in *Delicious* in June.

Labels, leaflet, and news release for all four products sent by Seapoint Farms. 2000. Nov. 14. Labels: Each is a color paperboard sleeve. 6.5 by 7.5 inches. On the front panel is a color photo of the dish in a bowl with a rayed green and yellow sun in the background. In the center of each is a square logo, with a red "Heart Healthy" heart at the center surrounded by a circle. Across the top is written "The wonder veggie." Across the bottom: "100% vegetarian." Across the top of the label: "Meatless. High protein." On the back: Nutrition facts, cooking directions, and ingredients. "Seapoint farms edamame is non-GMO."

Leaflet (glossy, color, front and back): "Edamame Rice Bowls: The wonder veggie—Complete meals." A color photo shows each of the four products. The Seapoint Farms news release is dated 14 March 2000. "Taking great meals to heart!"

8157. Stewart, Martha. 2000. Edamamé. Television broadcast. Tuesday, June 13. Martha Stewart's Living program.

• **Summary:** The first segment of this TV program is titled "Edamamé" (3 minutes, 20 seconds). Martha Stewart, one of the most famous women in America today and a leading authority on entertaining and cooking, begins by holding a package of Trader Joe's precooked, frozen edamamé and saying: "If you see edamamé in the freezer section of your grocery story, buy a package and try it. It's really fantastic. I'm always looking for healthy, easy-to-prepare snacks that are also nutritious—and these are just the answer." Inside the fuzzy green pods are soybeans. Soy sauce, miso, and tofu are among the many other yummy foods made from soybeans.

Martha demonstrates how to cook the soybeans, following the instructions on the package, by boiling them in heavily salted water for about 5 minutes. Have a bowl of iced water nearby in the sink. "Soybeans like this are packed full of vitamins, nutrients, and unsaturated fats—the kinds of fats that break down cholesterol in your body. As such, I suggest that you try 'em as a snack." Lift the edamamé out with a strainer, then lower the strainer into the iced water. Leave until cool, but not too long, lest they become soggy. Drain in the strainer, then while they are still a little bit damp, sprinkle them generously with natural sea salt—the kind with irregular crystals. Then they are ready to eat. "You just squeeze on the pod, and the little soybean pops out. Mmmm. Really good." "Keep a supply of this edamamé in your freezer, and the next time guests stop by or your children come home from school, you'll be prepared with a really healthy and delicious snack."

Talk with Tak Kimura. 2000. July 11. To prepare precooked, frozen edamamé: After the green pods are picked from the soybean plants, they are rushed to the packaging

plant, blasted with steam (to clean the surface of the pods), immediately blanched in boiling water for 4-5 minutes (to help them keep their bright green color and good flavor and texture), then quickly frozen and packaged. A large percentage of the edamamé consumed in Japan today are sold frozen like this, so that they can be enjoyed year-round. This new frozen trend started in about 1990; before that Japanese enjoyed edamamé as a seasonal food, fresh during the summer only. Nowadays quite a few companies even freeze the fresh edamamé during the summer, because they find that dealing with fresh foods is a nuisance.

Note: Martha Stewart has been able to turn her own lifestyle into a major industry. A successful model during the late 1950s and early 1960s, she was even more successful as a Wall Street stockbroker, and again very successful in a catering business she started. In 1982 she wrote a best-selling book titled *Entertaining*. Her ideas about gracious living have had a major influence. Address: Westport, Connecticut.

8158. Product Name: Kami Bento Box (Ready to Eat).
Manufacturer's Name: Trader Joe's (Distributor-Retailer). Made by Okami, Inc., Sun Valley, CA 91352.
Manufacturer's Address: South Pasadena, CA 91031.
Date of Introduction: 2000. June.

Ingredients: Soba noodles topped with sesame seeds, soba sauce, edamame (peel & eat), tofu pouches filled with vinegared rice [Inari-zushi], thinly sliced fresh gingerroot, shiitake mushroom rolls, Kikkoman lite soy sauce packet, "wasabi" (horseradish, water, artificial food coloring), etc.
Wt/Vol., Packaging, Price: 15 oz (424 gm) on formed plastic tray with clear plastic cover. Retails for \$4.29 (2000/07, Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Talk with Patricia Smith of Trader Joe's. 2000. June 20. She says this is an excellent new product. Product with Label purchased at Trader Joe's in Lafayette, California. 2000. July 6. Soyfoods Center evaluation. All parts of this Japanese-style Bento Box lunch (8.75 by 7.25 by 1.5 inches, with four compartments) are authentic and delicious, except for the tofu pouches, which have some extremely fiery "blow-your-head-off" spice inside. This is not authentic, and we find it almost inedible. The so-called "wasabi" contains no wasabi at all; thus it is mislabeled. The edamame are wonderful, as are the soba noodles, their sauce, and the mushroom rolls.

8159. Product Name: Trader Joe's Organic Baked Tofu [Teriyaki, or Savory].
Manufacturer's Name: Trader Joe's (Marketer-Distributor). Made by Wildwood Natural Foods in California.
Manufacturer's Address: P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.
Date of Introduction: 2000. June.

Ingredients: Organic tofu (filtered water, organic soybeans*, nigari {magnesium chloride, a natural firming agent}), soy sauce (water, wheat soybeans, salt), rice vinegar, tomato paste, rice wine, Fruitrim (fruit juice, natural grain dextrins), brown rice syrup, garlic ginger, garlic powder, safflower oil, ginger powder, arrowroot. * = Organically grown and processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: Teriyaki: 7 oz (198 gm) vacuum pack. Retails for \$2.99 at Trader Joe's (2001/01, Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2001. Jan. 25. 4 by 6 inches. Self-adhesive label on plastic bag. Black and white on orange and gray. "Marinated and ready to eat. Perishable. Keep refrigerated." Contains two servings. Soyfoods Center taste test: Delicious!

8160. Wollner, Joel. 2000. Mr. Kitani of Yamaki Co. in Japan has a huge new shoyu and miso factory that uses 100% organically grown ingredients (Interview). *SoyaScan Notes*. July 2. Conducted by William Shurtleff of Soyfoods Center.
• Summary: In June 2000, on a trip to Japan and China, Joel (together with translator and guide Yoshi Nanabayashi) visited Mr. Tomio Kitani, owner of Yamaki Jôzô K.K. in Saitama prefecture, Japan. He is about age 60 and very healthy and vital. Several years ago he moved from the nearby town into the mountains, where he built a huge new factory where he makes miso, shoyu, tofu (fresh and instant), and pickles. The company's address is (written Japanese-style): Saitama prefecture, Kodama-gun, Kamiizumi Mura, Oaza Shimo, Akuhara 955. Phone: 0274-52-7000. Fax: 0274-52-7001. Plant manager: Morikawa Kazuhiko. The nearest railroad stop is Kodama station.

The company has about 80 huge shoyu vats filled with moromi. Most of his miso is short-term—1 to 3 months. His koji rooms are fully automated. Yamaki Co. is extremely important in the world of organic miso and shoyu in Japan. Joel thinks they make more of these products than Sendai Miso Shoyu, and may be the biggest such manufacturer in Japan. He also bottles and sells water from a spring he owns. His company is flourishing, and growing very rapidly. Some 90-95% of his market is in Japan; the rest is miso and shoyu exported to the USA. He is the 4th of 5th generation owner, and he hopes his son will take over from him within the next ten years or so. The main ingredient he uses is soybeans, but all of his ingredients are organically grown in Japan by MOA (Mokichi Okada International Association), a quasi-religious, quasi-cooperative organic farmers organization and movement. MOA is one of the pioneering and most important organic organizations in Japan.

Joel first visited Yamaki in 1985 when he, Bob Kennedy, and Herman Aihara were setting up Ohsawa America (after

Kennedy had sold Chico-San to Heinz). Joel later brought in Martin Roth—who is now married, lives in Berkeley, and is head of a marketing company with Kristin Brun (who lives in El Cerrito). Ohsawa America, which traded with Ohsawa Japan, no longer exists. Address: 76 Florida Ave., Berkeley, California 94707. Phone: 510-524-4420.

8161. Taira, Ele; Taira, Terry; et al. 2000. Auntie Aloha's—A taste of soy. Honolulu, Hawaii: Independent Distributors of Nutrition for Life. 92 p. Recipe index. 22 cm.

• **Summary:** These are Hawaiian-style recipes that use various NFLI (Nutrition for Life International) meatless soy products made from whole soy flour, such as: Harvest Beanuts, Heartful Gourmet Beef Chunks, Heartful Gourmet Beef Strips, Heartful Gourmet Chicken Chunks, Heartful Gourmet Chicken Strips, Heartful Gourmet Ground Beef, Heartful Gourmet Ground Turkey, Nutri-Flour Blend, Powdered Soymilk, or Vegetable Curls. Recipes also include traditional soyfoods such as shoyu, tofu. The name of the person who developed and submitted each recipe appears below the recipe title.

Contents: Salads. Soups. Pupus. Pasta & rice. Main dishes. Desserts and breads.

Proceeds (less costs) from the book go to HopeLine, the advice line for young people sponsored by Karing for Kids, a Christian charity. The HopeLine currently operates 8 hours/day on average. Its budget will enable 65,000 youths to call and receive help each year. Yet the goal is to make HopeLine available 24 hours a day, every day, year-round.

Letter (fax) from Ele Taira. 2002. Aug. 6. All the NFLI Healthful gourmet product are meatless and made from soy. For details visit the website at www.nutritionforlife.com. Address: Ele Taira, 1015 Ala Napunani Street #701, Honolulu, Hawaii 96818. Phone: 808-836-4994.

8162. Wolf, Walter. 2000. Soy-related documents—Business records (Archival collection). Peoria, Illinois.

• **Summary:** In July 2000 Dr. Walter Wolf, as he was preparing to retire from the Northern Center for Agricultural Utilization Research in Peoria, Illinois, sent to Soyfoods Center many file folders of soy-related documents that he had collected between about 1968 and the present. Most are in the field of soy protein, and none are confidential / proprietary. Each one is neatly dated, and the documents are in reverse chronological order in each manila file folder.

Dr. Wolf earned his PhD degree at the University of Minnesota, where he studied soy proteins. He began work at NCAUR in 1956; at that time it was named the Northern Regional Research Center. He worked as a chemist in the Meal Products Research Group. He did mostly pure research, rather than applied. At the time there was little interest in food uses of soy protein. One of his main contributions was collecting and publishing statistics on the annual production and price of soy flour, soy protein isolates, soy protein

concentrates, and textured soy protein products.

The following files (listed alphabetically) were received by Soyfoods Center. Unless otherwise stated, only one file on each company or subject was received. A thin file contains less than about 20 sheets of paper; a thick one contains more than 20 sheets: ADM (Archer Daniels Midland Co.; 2 thick files 1970-2000). Anderson Clayton (thin, 1971-81). Cargill (thin, 1970-2000). Central Soya (4 thick files, 1959-1999). Dawson Mills (thick, 1974-1983). Edible Soy Products, Inc. (Hudson, Iowa; Maker of Pronuts; thin, 1971-78). EMI Corp. (Des Plaines, Illinois, thin, 1971-74). Erie Casein Co. (thin, 1966-73). Fuji Oil Co. Ltd. and Fuji Purina Protein Ltd. (of Japan, thick, 1972-1993). Farmland Industries and Far-Mar-Co (thin, 1970-1993). Food Ingredients—Dale Johnson (thick, 1964-1998). Garrison Products (extrusion, thin, 1977-78). General Foods (thin, 1974-1981). General Mills (thick, 1965-1976). Gerber Products (thin, 1969). Grain Processing Corp. (1968-1976). Griffith Laboratories (thick, 1968-1986). Gunther Products (purchased by A.E. Staley, thick, 1963-1975). Honeymead Products (Mankato, Minnesota, thin, 1978-1986). Industrial Grain Products (Montreal, Canada, thin, 1973-1975). Kikkoman (thick, 1972-1997). Kraft, Inc. (1965-1984). Lauhoff Grain (1 thin, 1973-86). Loma Linda Foods (thin, 1969-1986). Miles Laboratories (thick, 1970-83). Nabisco (1974-81). Meals for Millions Foundation (1 thin file, 1976). Protein Advisory Group of the United Nations, PAG Guidelines (thin, 1969-1978). Quaker Oats (thin, 1970-97). Joe Rakosky, consultant (1979-83). Ralston Purina Co. (4 files, very thick, 1962-1999). Soy protein products (2 files, thick, 1970-1986). Soy protein production statistics and estimates (two thick files, 1970-1996). Staley (A.E., 1 thick, 1969-1986). Swift & Co. (thin, 1961-1971). Takeda Chemical Industries (thin, 1970-1984). Textured soy proteins (1 thin, 1969-71). Tofu equipment (thin, 1970s). Tokuji Watanabe tofu studies at Peoria, Illinois (thick, 1960-61). United Nations Industrial Development Organization (UNIDO, thick, proceedings of Nov. 1969 meeting at Peoria, Illinois), Unilever (thin, 1974-79). Wenger Manufacturing Co. (thin, 1975-76). Worthington Foods (thick, 1965-1998). Address: NCAUR, Peoria, Illinois.

8163. Business Communications Co. 2000. Soyfoods: Trends and developments. Norwalk, Connecticut. 137 p. Sept. *

• **Summary:** This study of the soyfoods market, No. R2-419, retails for \$3,450. One section is titled "Whole soybean products." By type of product: Largest share and fastest growth—Soymilk. Next largest share and fastest growth—Tofu. Good share: Soy sauce. By application: Largest share—Substitute meat products. Fastest growth—Substitute dairy products. Industry structure: Market influences—Consumers, age/gender, media messages, health benefits, retailing outlets. Driving forces—Regulations, technology, price, niche marketing. Most active manufacturers—Market leaders, industry environment.

The second section is titled “Soyfoods as ingredients—Soy protein, soy fiber, soy isoflavones. By type of product: Largest share—Soy flour (defatted). Fastest growth—Soy protein concentrates. Next fastest growth—TSP [Textured Soy Proteins] Good growth: Soy protein isolates. Slow growth—Soy grits, soy fiber. Soy isoflavones. By application: Largest share—Substitute meat products. Fast growth—Substitute dairy products.

The third section is “Soyoil products—Soybean oil and lecithin.” Address: Norwalk, Connecticut.

8164. Hagler, Louise. 2000. Soja: Wandelbarste Bohne der Welt. Eine ‘coole’ Proteinquelle [Soya: The most versatile bean in the world. A ‘cool’ source of protein]. Aitrang, Germany: Windpferd. 140 p. Illust. Index. 18 cm. [Ger]

• **Summary:** Foreword by Peter Golbitz. Foreword by Louise Hagler. Introduction by Dr. Mark and Virginia Messina. Basic soyfoods. Feeding babies and children soyfoods. Breakfast, brunch & bread. Whole soybeans. Sauces, spreads, dips & dressings. Soup & salad. Main dishes. Desserts. Drinks & yogurt.

No dairy products or eggs are used; honey is called for in some recipes. Address: The Farm, Summertown, Tennessee.

8165. Iino, Ryoichi. 2000. The history of shoyu (Soy sauce) 2. *Food Culture (Kikkoman Inst. for International Food Culture, Noda, Japan)* No. 2. p. 20-23. Sept. <http://kiife.kikkoman.co.jp>. [11 ref]

• **Summary:** Contents: Introduction. Abolition of the *Hishio no Tsukasa* (Jan. 808 AD); Establishment of the *Sho-in* (somewhere between 835 and 882). *Sho* section and the manufacture of *sho* (*sho* soybeans were the major ingredient in *sho*). *Sho* and *sai-sho* (*sho* which still contains the dregs). What is *sai-sho*? The decline of liquid *sho*. Notes (11). Address: Food historian, and teacher of food history, Hattori Nutrition College, Japan.

8166. Adie, M. Muchlish; Widowati, S.; Soedarjo, M. 2000. The characteristics of Indonesian soybean varieties, and its importance to the soybean processing. In: Kyoko Saio, ed. 2000. Proceedings—Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 79-80. [6 ref]

• **Summary:** A survey by Indrasari (1991) showed that consumption of tempeh and tofu in Indonesia were 1,065 gm per capita per month, and 866 gm per capita per month, respectively. Address: 1,3. Research Inst. for Legume and Tuber Crops, PO Box 66 Malang, Indonesia; 2. Research Inst. for Food Crops Biotechnology, Jalan Tentara Pelajar 3A Bogor, Indonesia.

In: Kyoko Saio, ed. 2000. Proceedings—Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 11-16. [30 ref]

• **Summary:** Contents: Abstract. Keywords: soybean soy food, soy protein, glycinin, beta-conglycinin, three-dimensional structure, saponin, isoflavone, osteoporosis, hypocholesterolemic, breeding, lipooxygenase-free soybean, allergen-less soybean. Introduction. Nutritional and physiological effects of soybean storage proteins and soybean minor constituents: Reevaluation of nutritive value of soybean storage proteins, physiological function of soybean storage proteins. Physicochemical functionalities of soybean storage proteins: Basic structures of beta-conglycinin and glycinin molecules, three-dimensional structures and physicochemical functionalities. Quality improvement of soyfood products: Off flavors and allergenic proteins in soybeans, genetic improvement of soybean qualities. Conclusion. Address: Kikkoman Corp. [Japan].

Proceedings—Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 117-120.

• **Summary:** Japan is the world’s largest soybean importer. Of the 4.9 million tonnes (metric tons) imported, about one million tons (actually 960,000 tonnes or 19.6%, called “food soybeans”) are used for making tofu, miso, natto, soysauce, etc. The rest are crushed to make soybean oil and meal.

A table (p. 118) shows the quantity of soybeans obtained from various sources to make each of the major Japanese soyfoods in 1998, 1999, and 2000. In the year 2000, some 512,000 tonnes were used to make tofu, 168,000 tonnes for miso, 125,000 tonnes for natto, 40,000 tonnes to make soy protein and products, 30,000 tonnes to make soysauce (from whole soybeans), 6,000 tons to make soymilk, and 79,000 tons to make other products. Grand total 960,000 tonnes. Address: Marubeni Corp., Japan.

8169. Li, Lite; Li, Shujun. 2000. Reviews on Chinese fermented soybean foods. In: Kyoko Saio, ed. 2000. Proceedings—Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 701-06. [8 ref]

• **Summary:** Contains excellent, original and detailed information about fermented tofu (*sufu*) and fermented black soybeans (*douchi*).

Contents: Introduction. Developing history of soybean and soybean foods in China: History of soybean cultivation in China (it began about 4-5,000 years ago), distribution and yield of soybean in China, important role of soybean in Chinese food culture and diet, fermented soybean foods.

Present situation of fermented soybean foods in China: Kinds and distribution of Chinese fermented soybean foods (sufu, douchi, doujiang, soy sauce, etc.), processing technology and applied microorganisms for Chinese traditional fermented soybean foods (Sufu—classification of sufu, processing technology of sufu, microorganisms used in mold cultivation, microorganisms used in fermentation; Douchi—same categories). Developing tendency and countermeasure of fermented soybean foods.

Classification of sufu: (1) According to the color and flavor of product: red sufu, white sufu, green sufu, sauce sufu, colored sufu. According to the morphology of the product: biggest rectangle sufu, big sufu, middle rectangle sufu, chess sufu. Based on the type of microorganism applied in the process: bacterium sufu, mould sufu, halophilic pediococcus sufu.

Figures show: (1) The main soybean producing provinces in China (1996): Heilongjiang 31%. Shandong 9%. Henan 7%. Hebei 6%. Inner Mongolia 6%. Jilin 5%. Other 36%.

Tables show: (1) Steps in two types of sufu production: Mould sufu, and halophilic pediococcus production. (2) Species of microorganisms (16) isolated from sufu and the area of sufu production. (3) Characteristics of main kinds of *Mucor* applied in Sufu-making (for main kinds; for each kind is given: mycelium, sporangiophore, sporangiospore, spore axis, thick spore suitable temperature). (4) Brief introduction to six famous douchi: Four of the six are made using black soybeans (a) Sichuan province, Santai county. History goes back more than 300 years. Made with *Mucor racemosus* mold (naturally fermenting). (b) Sichuan: Yong Chuan Douchi, a famous brand. Made with *Mucor* mold. History goes back more than 300 years. (c) Hong chang fa douchi. About 60 year history. (d) Yang jiang douchi (Yangjiang douchi), made with *Aspergillus* mold and black soybeans. Note: Yangjiang is a city in Guangdong province, China. (e) Liu yang douchi (Liuyang douchi), made with *Aspergillus* mold and black soybeans. (f) Lin yi shui douchi, fermented with a bacterium. History goes back more than 130 years. Address: China Agriculture University, Beijing 100083.

8170. Maneepun, Saipin. 2000. Prospect of traditional fermented soybean products in Thailand. In: Kyoko Saio, ed. 2000. Proceedings—Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 707-10. [8 ref]

• **Summary:** Tables: (1) Traditional fermented soybean products in Thailand.

Soy sauce (local name *si-iu*).

Soy paste [Thai miso] (local name *tao-chew*).

Fermented soy curd [fermented tofu] (local name *tao-hu-yi*). Made in central Thailand using bacteria, yeasts and molds (*Actinomucor elegans*) on tofu cubes. They are yellowish or red in color. The yellowish product is eaten

directly as a relish, whereas the red product is cooked with vegetables or meat. Making fermented soy curd involved three steps: preparing the tofu, molding, and brine fermentation and aging. First a pure culture of the mold is applied to the surface. Then it is incubated at 20°C for 3-7 days. Finally it is aged in brine for about 40-60 days to develop flavor and aroma. Used as both a main dish and flavoring agent. The product is made in small-scale factories, as well as in soy sauce and soy paste factories. The composition is given in Table 2.

Fermented whole soybean (local name *thua-nao*). Made in north Thailand from whole soybeans fermented with bacteria [like Japanese natto]. A paste or solid used as a main dish or flavoring.

Imitation fried pork rind (local name *kap-mu-tiem*). Made in north Thailand from fermented tofu. A solid. Used as a snack. Address: Inst. of Food Research and Product Development, Kasetsart Univ., Bangkok 10903, Thailand.

8171. Mogi, Katsumi. 2000. Makasete, makasazu [Entrust, but keep an eye on it]. Japan: 133 p. Oct. No index. 21 cm. [Jap]

• **Summary:** Katsumi was the former vice-president and president of Kikkoman Corp. Address: Former president, Kikkoman Corporation, Japan.

8172. Onishi, Yoshihisa. 2000. Adapting HACCP to Japanese traditional soybean food. In: Kyoko Saio, ed. 2000. Proceedings—Third International Soybean Processing and Utilization Conference. Tokyo, Japan: Korin Publishing Co., Ltd. [xxiv] + 728 + 8 p. See p. 138-141.

• **Summary:** In 1996 Japan was hit by a series of intestinal hemorrhagic *E. coli* O157 cases nationwide. The Japanese are working to adopt HACCP (Hazard Analysis and Critical Control Points) to the soy sauce, miso, and tofu industries. Each food has its unique CCP. Address: Japan Food Industry Centre.

8173. Packaged Facts. Subdivision of Marketresearch.com. 2000. The U.S. soyfoods market. New York, NY. 150+ p. Oct. 28 cm. *

• **Summary:** This market study, No. LA595, retails for \$2,750. It examines the \$2.2 billion soyfoods industry, and the strategies that are used in causing this market to explode, including unique promotional programs, product innovations, and acquisitions. The report covers 5 product categories: Meat alternatives; Dairy alternatives; Snacks, cereals, and breads; Bulk soybeans; Meal replacements/protein powders. It also discusses other soyfoods (including soy sauce and miso) and profiles leading manufacturers. It projects sales trends through 2005 and gives details on distributor trends and consumer attitudes and behaviors. Available from Marketresearch.com, which has a database of over 6,000 reports from 350+ publishers.

Talk with representative of Packaged Facts. 2000. Oct. 31. Packaged Facts is no longer a subsidiary of FIND/SVP; they separated in about 1997 or 1998. FIND/SVP is, however, a strategic partner which conducts only custom market research; they have no off-the-shelf reports. Address: 625 Ave. of the Americas, New York, NY 10011. Phone: 1-800-346-3787.

8175. Chiang, Cecilia Sun Yun. 2000. Maodou (green vegetable soybeans) in Chinese food culture (Interview). *SoyaScan Notes*. Nov. 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** *Maodou* (characters: hair + beans) are widely used in two types of Chinese cooking: (1) As a seasonal vegetable in the cooking of Jiangsu province (Wade-Giles: Kiangsu; southeastern China), whose major culinary cities are Shanghai (now an independent municipality), Nanjing (Nanking), Wuxi (Wu-hsi), and Changzhou; (2) Chinese Buddhist vegetarian cookery (*su-tsai*). *Maodou* is rarely used in northern Chinese cooking, where the people eat a lot of flours. In Shanghai they eat a lot of beans, including *maodou*. Yet *maodou* is almost never found in the cookery of neighboring Guangdong province or in the famous cookery of its capital, Canton.

Cecilia was born in Wu-hsi near Shanghai, one of 13 children in a family of great wealth. Her father was a high government official. When she was age 4, she moved with her family to Peking, where she was raised in luxury (their famous house had been an old palace) and educated from grammar school to university graduate. Her mother cooked only on special occasions. Among the 14 servants and maids, her family had two chefs; one cooked northern Chinese food and the other cooked Shanghai food. Cecilia learned nothing from these two cooks, since she was not allowed to go into the kitchen! In 1943, when the Japanese marched on Beijing (Peking), her family fled south to Chongqing (Chungking / Ch'ung-ch'ing; capital of "Free China" from 1937-1945); there she was married. It was not until 1945, V-J Day, that she first saw the remains of her parents' house at Wuxi. It had been destroyed by Japanese bombings. She and her husband (plus a cook and a few servants) lived near Shanghai for four years, then in April 1949 they fled to Japan when the Communists arrived, eager to confiscate the property of the

wealthy. They lived in Japan for 8 years, until 1957, during the hard, lean years after World War II. Then they came to America. Cecilia learned to cook after she came to America.

In the Shanghai area during the summer months *maodou* are as widely found as edamamé in Japan. They are used in many different dishes. For example, shelled, they are cooked with shrimp, or with shrimp, pickled vegetables, and *pai-yeh* (sliced, pressed tofu sheets). A very large number of Buddhist vegetarian dishes contain *maodou*—such as "Vegetable Delight" which Cecilia used to serve at The Mandarin restaurant. When served in the pods, the pods are first boiled in unsalted water, then sesame oil and soy sauce are sprinkled on the pods, and the *maodou* are served in the pods.

Because they are available fresh for only about two months each year, *maodou* are very expensive. Thus, they are certainly not a poor-man's food. Some people (such as her mother) would dry *maodou* during the summer for use as a vegetable during the snowy winter when vegetables are scarce. The dried *maodou* are washed, soaked, then cooked—often with meat.

Cecilia is aware that edamamé are now starting to become quite popular in the USA. She thinks "the Japanese did something very good. Many Japanese restaurants give you a little edamamé to start with."

Cecilia knows nothing about the history of *maodou*, but she is quite sure these characters have been used in Chinese cooking for at least several hundred years.

Today, lots of edamamé are grown in Taiwan but Cecilia thinks this is not a result of the Japanese occupation of Formosa. Rather, the Japanese used Formosa mainly to grow sugar cane and pineapples. Address: Former owner, The Mandarin restaurant, Ghirardelli Square, San Francisco, California.

8176. Lumpkin, Tom. 2000. Update on work with edamamé (green vegetable soybeans) in the state of Washington (Interview). *SoyaScan Notes*. Nov. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** One of the earliest Chinese-language references Tom has seen to soybeans (though he is not sure they are green vegetable soybeans) is in a poem about boiling immature soybeans with the branches of the plant. The poem is told from the viewpoint of the pods, which lament "Why are my brothers, the branches, boiling us?"

Tom has a videotape made in Japan that contains several early Japanese references to edamamé.

The proceedings of the edamamé conference, to be held on 10-12 Aug. 2001 at Washington State University, will be published before the conference. Tom asks Shurtleff to write a worldwide chronology of green vegetable soybeans and edamamé, which Shurtleff agrees to write; Tom will present it at the conference and publish it.

For the past five years, Tom's program has been

developing ten non-shattering varieties of edamamé; they are at the F-6 stage. The key to breeding edamamé for America is making them machine harvestable. One Japanese and one Thai graduate student are helping him on the project. The varieties do not yet have names, only numbers. The main variables are non-shattering, structure of the plant, seed size, and flavor. Tom's program is also running "microsatellite fingerprinting" and "AFLP fingerprinting" on 150 edamamé varieties. Note: AFLP, which stands for "amplified fragment length polymorphism," is the registered trademark of a Dutch company. Most of the varieties are Chinese, with some Japanese and including their own ten. These new techniques, which give genetic fingerprints of each variety, enable them to: (1) Give precise descriptions of varietal differences; (2) See how much diversity exists among popular varieties; (3) Protect the lines and varieties they are developing; and (4) See who has been stealing varieties from whom. They have already constructed a pedigree, which will appear in an article, probably in *Crop Science* and in the conference proceedings. To get a broad range of offspring, a breeder wants to ideally select parents that are quite different.

Americans find the image of green soybean pods very attractive. Tom is well aware that edamamé are not simply any soybeans harvested at the green stage. He likes to say: "What sweet corn is to field corn, edamamé is to soybeans." They must also be processed in the same way to keep the sugars from changing into starches.

Tom has heard the word *azunda* used to refer to a soup containing edamamé; it is also used in some sweets, and his group has made a nice guacamole containing edamamé.

Tom believes that China will become the world's major grower of edamamé in the near future. Tom is working with Small Planet Foods (formerly Cascadian Farms) in the state of Washington—doing varietal development. Small Planet sells edamamé both in the pods and shelled. Tom also expects that precooked, flavored edamamé (in wasabi, teriyaki, etc. flavors) will become a big item in the near future.

Tom has been department chair at WSU for five years. His administrative duties (with 40 faculty and 70 staff people) make it harder for him to find time to do his own research and write. Just before he accepted this position, he had been accepted to go to the Needham Research Institute (which includes the East Asian History of Science Library) at Cambridge University in England. He would like to do that when he steps down from his current position, and maybe do a book on edamamé at that time. Address: Head, East Asian Crop Development Program, Dep. of Crops and Soil Sciences, Washington State Univ., Pullman, WA 99164-6420. Phone: 509-335-2726.

8177. *Canadian Soybean Bulletin (OSG, Chatham, Ontario, Canada)*.2000. Incoming Japan soybean mission. 14(2):1. Nov.

• **Summary:** Japan imports 5 million tonnes (metric tons) or 184 million bushels soybeans each year. Of that, about 1 million tonnes (20%, or 37 million bushels) are used to make soyfoods such as tofu, miso, natto, soy sauce, etc. Of the 1 million tons, 500,000 tonnes (50%) are for tofu, 160,000 tonnes (16%) are for miso, and 130,000 tonnes for natto.

Exports of Canadian soybeans have been increasing rapidly, from 36,000 tonnes in 1995, to 75,000 tonnes in 1998, to 175,000 tonnes in 2000.

In Sept. 2000, the Canadian Soybean Export Association and the Ontario Soybean Growers hosted ten Japanese from the soyfoods industry and showed them the Canadian soybean industry. These Japanese were most appreciative "of our efforts to segregate GMO and non-GMO varieties of soybeans using our Identity-Preserved, or IP program."

8178. *SoyaScan Notes*.2000. Chronology of major soy-related events and trends during 2000 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan. 8—The Kerry Group (of Wisconsin and Iowa) purchases Solnuts, a pioneer manufacturer of dry-roasted soynuts, in Hudson, Iowa.

Jan.—Kraft Foods Inc. (Illinois) purchases Boca Burger Inc., America's third largest maker of veggie burgers, after Worthington Foods and Gardenburger.

March 6—The Hain Food Group announces that it will acquire the Celestial Seasonings tea company to become the largest natural foods company in the USA.

March 9—The USDA formally approves a rule change allowing soy protein products to completely replace meat products in the Federal School Lunch Program.

March 31—Monsanto, the world's leading agricultural biotech company, merges with Pharmacia & Upjohn (a large pharmaceutical company), and the new company is renamed Pharmacia Corporation.

April—An article by Lon White on tofu and brain aging is published in *J. of the American College of Nutrition*.

June 9–20/20 (ABC) television program, titled "Soy—The untold story," airs on Friday at 10:00 p.m. discusses many of the shortcomings of soyfoods, but in a very fair way.

June 13—Martha Stewart, on her popular nationwide TV program *Living*, has a very positive segment on edamamé.

July 14—Lightlife Foods Inc. (of Turners Falls, Massachusetts) is purchased by ConAgra, Inc., a \$25 billion food company based in Omaha, Nebraska—for an undisclosed amount. Lightlife's plant, employees, and management team will stay in place. Lightlife is a leading maker of vegetarian meat alternatives, with 150 employees and about \$25 million in annual sales.

July—At a joint meeting of ASA and USB, the International Soy Protein Program (ISPP) was born as ASA and the Illinois Soybean Program Operating Board (ISPOB) formalized their joint commitment to "Increase

the international consumption of soy protein by humans in new markets—developing countries—and thereby create new opportunities for disappearance of soybeans and provide higher economic returns to U.S. soybean producers.” ISPOB and its Executive Director Lyle Roberts were instrumental in conceiving the program and raising its initial funding. This program was later renamed WISHH.

Sept.—Monsanto’s patent on glyphosate expires. Glyphosate is the active ingredient in *Roundup*, the world’s best-selling herbicide.

Dec.—Sanitarium Foods of Australia acquires the 47% of SoyaWorld owned by Sunrise Soya Foods (Vancouver, BC, Canada).

Trends: 1. This year, the momentum created by the FDA health claim in Oct. 1999 has propelled the soyfoods industry to new heights. Existing companies are growing rapidly, and many new companies (including some of America’s biggest food companies) are entering the market with new products.

2. This year, for the first time, soymilk has become a mainstream American beverage. As of May, White Wave Silk soymilk is sold in 24,000 supermarkets nationwide. Edamamé (green vegetable soybeans) have gone mainstream in California, and are rapidly becoming popular on both coasts of the USA.

3. In the United States and Europe, the tide seems to be flowing increasingly against genetic engineering of foods and food plants. More and more companies in the natural foods industry are labeling their products as “non-GMO” or “GMO-free” or “No GMOs.” Monsanto has stopped its efforts to develop genetically engineered soybeans for food use and focused its attention instead on livestock feeds. It now seems likely the genetic engineering of plants has a future, but not in the area of foods—at least in developed countries.

4. Interest in “food-grade soybeans” continues to grow in the USA and has increased substantially this year. Canada began focusing on identity-preserved food-grade soybeans 10-15 years before the USA. U.S. interest began to grow in about 1995 with the introduction of genetically engineered soybeans and with the accelerating interest in food uses of soybeans.

5. While pro-soy articles (mostly about health benefits) continue to increase, so do anti-soy articles and Internet sites. The loudest anti-soy voices are those of Sally Fallon and Mary Enig of the USA (they believe traditional fermented soyfoods—such as miso, shoyu, natto, and tempeh—are good, traditional non-fermented soyfoods—such as tofu, soymilk, and edamamé—are not very good, and modern soy protein products—such as soy protein isolates, concentrates, and textured soy flour—are the worst of all, being highly processed with chemicals such as hexane solvent). Also: Richard and Valerie James of New Zealand, and Lon White of Hawaii. Some of the concerns they raise are legitimate and deserve further research, but the majority (we believe) are

not. Nevertheless, many of the health claims made for soy in popular articles are exaggerated or somewhat sensational, and not firmly supported by scientific evidence.

6. As we are about to enter a new century and a new millennium on 1 Jan. 2001, soyfoods appear to have a bright future, worldwide. This past year has seen more activity and interest in, and media coverage of, soyfoods than at any time in the history of the United States.

8179. Huang, H.T. 2000. Science and civilisation in China. Vol. 6, Biology and biological technology. Part V: Fermentations and food science. Joseph Needham series. Cambridge, England: Cambridge University Press. xxviii + 741 p. Illust. Index. 26 cm. [200+ soy ref]

• **Summary:** This is the most important book on soyfoods in China ever written, and it is especially good on their origins and early history in China. It is also one of the best books seen on food in Chinese culture and history.

The section titled “Soybean processing and fermentation” (p. 292-378) comprises 14.3% of the book’s text, and has the following contents: Introduction. Soybean sprouts. Soybean curd and related products: The origin of bean curd, transmission of *tou fu* to Japan, products associated with *tou fu* (soymilk {*tou fu chiang*}, tofu curds {*tou fu hua* or *tou fu nao*}, pressed tofu sheets {*ch’ien chang* or *pai yeh*}, yuba {*tou fu i* or *tou fu p’i*}, deep-fried tofu {*yu tou fu* or *tou fu p’ao*}, pressed tofu {*tou fu kan*}, five-spice pressed tofu {*wu hsiang tou fu kan*}, plain dried tofu [pressed tofu] {*pai tou fu gan*}, smoked tofu {*hsün tou fu*}, dried tofu soaked in brine and fermented {*ch’ou tou fu kan*}, frozen tofu {*tung tou fu*}, making fermented tofu {*fu ju*}, comparison of *tou fu* and cheese, addendum. Fermented soybeans, soy paste, and soy sauce: *Ferments* for food processing, fermented soybeans—*shih*, fermented soy paste—*chiang*, fermented soy sauce—*chiang yu*, soy fermentations in China and Japan.

Note: This is the earliest English-language document seen (Feb. 2004) that uses the term “hsün tou fu” [pinyin: *xun doufu*] to refer to smoked tofu. Soy is also discussed in other parts of the book. Address: Alexandria, Virginia.

8180. Larson, Stephanie. 2000. The soyfoods boom: What’s driving the explosion? First in a series. *Soybean Digest*. Dec. p. 10-11.

• **Summary:** Mark Messina says the whole market is driven by consumer demand because of health effects. Sales of soyfoods and soy protein products was \$2.1 billion in 1999. Of that total, soymilk sales accounted for \$300 million, up 38% from 1998. A graph shows soymilk sales (in million dollars) from 1992 to 1999, with projection to 2002. These sales rose from \$100 million in 1993 to \$300 million in 1999, projected to reach \$500 million in 2001.

The United Soybean Board calculated that last year Americans consumed 37 million bushels of soybeans via

soyfoods. A color photo shows many commercial soyfood products with colorful labels: Bergin Nut Company Soynuts (no salt), Fantastic Foods Tofu Scrambler, MCOA Brown Rice Miso, Spectrum Soy Oil, Health Trip Soynut Butter, Midwest Harvest Textured Soy Protein, Low-Fat Soy Flour, and Firm Tofu, Country Choice Soy Cocoa, Eden Organic Black Soy Beans, and Whole Foods Soy Ginger Sauce.

8181. Shurtleff, William; Aoyagi, Akiko. 2000. Tofu & soymilk production. 3rd ed. Lafayette, California: Soyfoods Center. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Dec. 28 cm. [223 ref]

• **Summary:** Contains many new advertisements, plus changes on the title page, copyright page, and rear cover of both paperback and hardcover editions (new ISBN for each). Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

8182. Vitasoy USA, Inc. 2000. Nasoya: This could be the filet mignon of baked tofu! (Ad). *Natural Foods Merchandiser*. Dec. p. 16.

• **Summary:** This half-page color ad shows the labels of four new types of Nasoya baked tofu: Mesquite Smoke Flavored, Teriyaki, Thai Peanut, and Tex Mex. Each is made with whole organic soybeans and ready to serve. "Offer your customers an exciting new meat alternative with Nasoya Baked Tofu." Address: One New England Way, Ayer, Massachusetts 01432. Phone: 1-800-4-Nasoya or www.viatsoy-usa.com.

8183. Adams, M.R.; Moss, M.O. 2000. Food microbiology. 2nd ed. Cambridge, England: Royal Society of Chemistry. xiv + 479 p. + 16 pages of unnumbered plates. Illust. 24 cm. [439* ref]

• **Summary:** This book focuses on general principles, and does not try to mention every fermented food. Chapter 9.12, "Mould fermentations" (p. 363-68) discusses tempeh, soy sauce and rice wine [saké], koji (a mould enzyme preparation), miso, and Chinese chiang [jiang].

Ochratoxin may result from contamination of soya beans by *Aspergillus* species. Address: Univ. of Surrey, Guildford, UK.

8184. Davis, Brenda; Melina, Vesanto. 2000. Becoming vegan: The complete guide to adopting a healthy plant-based diet. Summertown, Tennessee: The Book Publishing Co. v + 281 p. Index. 25 cm. [153 ref]

• **Summary:** An excellent vegan sourcebook (not a cookbook) by two registered dietitians. Contents: Acknowledgements. From the authors. 1. Vegan roots. 2. Perspectives on vegan health. 3. Plant protein. 4. Big fat lies. 5. The two faces of carbohydrates. 6. Prospecting for minerals. 7. Vitamins for vegan vigor. 8. Phytochemicals. 9. The vegan food guide. 10. Building vegan dynamos. 11.

Growing vegans. 12. The prime of life. 13. Overweight. 14. Eating disorders. 15. Underweight. 16. The vegan athlete. 17. Vegan diplomacy.

This book begins with a good history of veganism and contains (throughout the book) a wealth of accurate, positive information about many different types of soyfoods (especially tofu) and related subjects, including tofu, soymilk, tempeh, soy yogurt, soy cheese, soy sauce, tamari, and soy oil (incl. omega-3 fatty acids). Plus Adventist Health Studies, dietary fiber, phytochemicals and sea vegetables. Address: 1. Kelowna, British Columbia; 2. Langley, British Columbia. Both: Canada.

8185. Evans, K. Lee; Rankin, Chris. 2000. Giant book of tofu cooking. New York, NY: Sterling Publishing Co., Inc. 256 p. Illust. (color photos). Index. 28 cm.

• **Summary:** A beautiful vegetarian cookbook, with many color photos on glossy paper, excellent use of standard terminology (except for "freeze-dried tofu"), and 350 healthful, delicious recipes. Contents: Introduction. Tofu basics and techniques: Getting started (buying tofu {soft tofu, form tofu, extra-firm tofu, silken tofu, marinated tofu, smoked tofu, freeze-dried tofu, fermented tofu}, storing tofu, preparing tofu for your recipes {draining and blotting, pressing, freezing and thawing, blending, cubing and dicing, crumbling, shredding / grating, marinating, boiling slightly sour tofu, frying, deep-frying}), other soy products (edamame, meat alternatives, miso, soy cheese, soy flour, soy ice cream, soy milk, soy sauce, soy sprouts, soy "yogurt," soynut butter, soynuts, tempeh, textured soy protein, whole dry soybeans), tofu and a healthier you (introduction, protein, heart disease, cancer, menopause, osteoporosis, our planet), simple ingredient substitutions (eggs, milk, cheese, butter, salt, sugar {honey, molasses, maple syrup, rice syrup, barley malt syrup}). Ingredient glossary: Incl. arrowroot, balsamic vinegar, bamboo shoots, barley malt syrup, fermented Chinese black beans, filé powder, galangal, garam masala, garbanzo beans, Hoisin sauce, liquid smoke, mirin, miso, nutritional yeast, phylo or filo, pickled ginger, quinoa, rice noodles, rice papers, rice syrup, sake, shoyu, tahini, toasted sesame oil, vegetarian gelatin, vegetarian Worcestershire sauce ("Just like the original, it is made of soy, vinegar, and spices, but without the anchovies"), wakame, wheat germ. Breakfast. Appetizers. Soups. Salads. Lunch and dinner. Dressings, sauces, and spreads. Desserts. Metric conversion chart. Acknowledgments.

8186. Fruehschuetz, Leo. 2000. Soja [Soya]. Schaafheim, Germany: Bio Verlag. 144 p. With recipes by Judith Braun. Illust. Index. 15 cm. [12 ref. Ger]

• **Summary:** Contents: Forward: Portrait of the soybean: From China to the entire world, the composition of whole beans, does soya help with cancer?, protein and oil for the world economy. The original soybean and what followed:

Introduction (there is not much to improve on in the soybean), the “labor-bean” (Monsanto and Roundup-Ready soybeans), the results for farmers, for the environment, for health, politics without results, for trade and the end-users, the forgotten results, soya in animal feeds. Organically grown soya—without genetic engineering and pesticides. Versatile: Soya in the wholefoods kitchen: Soybeans: whole, ground, and sprouted, the fluid bean—milk, yogurt (fermented), and oil, tofu—the meat without bones, tempeh—the noble cultured food from Indonesia, soy sauce—aged in wooden vats, miso—soya for soups, soyameat—saved from the wolf. Recipes: Soymilk, soy flour and flakes, tofu, tempeh, soy meat and granules, miso, soy sprouts. Address: News journalist for natural foods and long-lived people, co-worker with Schrot&Korn.

8187. Hosking, Richard. 2000. *At the Japanese table*. New York: Oxford University Press. x + 70 p. Illust. (some color). Index. 20 cm. Series: Images of Asia. [19 ref]

• **Summary:** Contents: Acknowledgements (thanks to Dr. Naomichi Ishige). The Japanese and food. Food: the raw and the cooked. Seasonal foods and drinks. Appearance, texture, and flavour. The dining room and kitchen. Meals and menus.

Briefly mentions: Soy sauce (p. 2, 12, 20), bean curd (2), tamari (p. 20), Japanese Worcester sauce (p. 20), other soy bean products (p. 20-21), tofu (p. 21, 25), yuba (p. 21, 36), deep-fried tofu—aburaage, agedofu (p. 21), miso (p. 21), green vegetable soybeans (p. 21), teriyaki sauce (p. 28), miso soup (p. 35).

8188. Kornfeld, Myra. 2000. *The voluptuous vegan: more than 200 sinfully delicious recipes for meatless, eggless, and dairy-free meals*. New York, NY: Three Rivers Press. [xi] + 305 p. Illust. (by Sheila Hamanaka). Index. 24 cm.

• **Summary:** A vegan cookbook with some macrobiotic flavor. The excellent glossary includes: adzuki beans, agar-agar, almond butter, barley malt, barley miso, carob powder, edamame, gluten, haricots verts, Hass avocado, hijiki, Hokkaido pumpkin (kabocha squash), kanten, koji, kombu, kudzu, maple sugar (crystallized maple syrup), mirin, miso, MSG, nori, oden, Rice Dream, rice syrup, sambal (Indonesian word for chutney), sea salt, seitan, shiitake, shoyu, soybean, soy milk, Sucanat, tahini, tempeh, umeboshi paste, wakame, wheat gluten, Yannoh coffee. The index contains 29 entries for tofu, 9 for seitan, 5 for tempeh, 2 for miso, 1 for “Cheese”—tofu (p. 214), “Sour cream”—tofu (p. 25), and teriyaki vegetables. Note: Soy milk is called for in many recipes. Address: Professional Chef, New York City.

8189. Kouwenhoven, Arlette; Forrer, Matthi. 2000. *Siebold and Japan: His life and work*. Leiden, Netherlands: Hotei Publishing. 111 p. Illust. (Incl. color). No index. 27 cm. [40* ref. Eng]

• **Summary:** An excellent biography of Philipp Franz von

Siebold (1796-1866), a German physician and naturalist who was one of the first Europeans to live in Japan. In 1823 Siebold wrote a letter to the Governor of Batavia requesting professional help at Deshima. In 1825 two men were finally dispatched: (1) Dr. Heinrich Bürger (1804-1858), a scholar, who worked as a pharmacist in Batavia, and who was to assist with scientific research, chemistry and mineralogy; and (2) Carel Hubert von Villeneuve, an auditor and artist.

On 15 Feb. 1826, Siebold departed from Deshima, accompanying the court journey to Edo (today's Tokyo) of *Oppehoofd* Johan Willem de Sturler; Siebold was joined by Dr. Bürger in the role of secretary, although Bürger's true purpose was to assist Siebold in his scientific research. These were the only three Dutchmen allowed to make the long journey. Siebold and Bürger were well prepared for the trip; they had gathered all sorts of equipment to take with them, including barometers, thermometers, hygrometers, sextants, chronometers, microscopes, crockery, furniture, silver, fine glassware, and even a piano. Some of these items were intended as gifts. En route, the inquisitive Siebold observed and wrote about practically everything. They arrived in Edo on 10 April 1826, about 2 months after leaving Nagasaki, a trip of about 1,400 km. On 1 May 1826 the three Dutchmen had an audience with the shogun. The delegation finally left Edo on 18 May 1826 and arrived at Deshima on July 7. Note: It was almost certainly on this trip that Siebold and Bürger observed soybeans and recorded their observations in the trip's log.

A 3-page chronology of Siebold (p. 100-02) includes: 1796 Feb. 17. Philipp Franz von Siebold born in Würzburg [in today's Germany]. 1815—Starts study of medicine at the University of Würzburg; subjects include chemistry, botany, and physics. 1820—Completes his studies in medicine, surgery, and anatomy, obtains his doctorate, and establishes himself as a physician in Heidingsfeld. 1822 June 21—Appointed Surgeon-Major in the Dutch East-Indies Army. 1823 Feb. 13—Arrives in Batavia. On April 18 he is appointed to the post of physician at the trading post on Deshima, near Nagasaki, Japan. He also receives instructions to conduct research into Japanese natural history, laws, and politics.

1823 Aug. 12. Arrives on Deshima and starts teaching almost immediately. That same year he “married” Kusumoto Sonogi, also known as Otaki (1807-1865); she is 11-12 years younger than he. 1824. Starts a botanical garden on Deshima at the request of the government in Batavia. Opens his school in Narutaki, just outside Nagasaki. 1825. Dr. Heinrich Bürger arrives from Batavia to help Siebold with his geological research, accompanied by C.H. Villeneuve, the illustrator.

1826 Feb. 15 to July 7. He accompanies *Oppehoofd* De Sturler on the court journey to Edo. Bürger, Keiga and several of his Japanese students join the delegation. 1827. The government in Batavia requests his return there, with the possibility that he may have to return to Holland. Also in

1827 Von Siebold's daughter, Oine (1827-1903) is born.

1828 Sept. 18. A severe storm causes the ship, with 89 crates containing Siebold's collection, to run aground on the coast at Nagasaki. The discovery of forbidden objects leads to the detainment of Siebold, Takahashi, and many others. Siebold is placed under house arrest.

1829 Oct. 22. After being subjected to lengthy cross-examination, Siebold is banished from Japan. On Dec. 30 he leaves Japan.

1830 Jan. 18. Arrives in Batavia, then travels to Holland where he arrives on July 7. In Antwerp he meets Dr. Hoffmann, who is later to become the first professor at Leiden University.

Note: 1830. Siebold's first publication on Japanese plants appears (largely in Latin, but with many Japanese characters) in *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 12:1-74. See p. 54-57, plus first table at end. He mentions two species of soybeans: *Sooja Japonica*, the cultivated soybean, and *Sooja nomame*, the wild soybean; he says he has seen a living plant specimen of the latter. Soybeans are used to make shoyu, miso, and tofu. A note at the end of table I states that he drafted it at Deshima in November 1827.

1831 April 20. King Willem I agrees to buy Siebold's ethnographic collection and to pay an advance of 12,000 guilders. 1832. Hires a house at 19 Rapenburg in Leiden, Netherlands, where he organises his collection and opens it to the public. He maintains contact with Bürger, who still lives on Deshima. Travels to Germany in the autumn. 1833. Returns to The Netherlands in the summer. Presents the first copy of his opus *Nippon* to the Society of Dutch Letters on 26 Nov.

1835. Travels in Germany and Austria. Meets Zuccarini and others. 1836 Aug. 22. Buys the house at 19 Rapenburg. 1839. From now on he spends winters in Germany, where he meets his future wife, Helene von Gagern.

1840. Buys a piece of land at Leiderdorp, where he builds the villa, 'Nippon' and starts a nursery. 1842. Establishes the plant and seed company, Siebold & Co. with Blume and Rodbard. 1845 July 10. He marries the Lady Helene von Gagern (1820-1877) in Berlin; she is 24 years younger than he. Soon four children are born. 1859. Returns to Japan. Arrives in Nagasaki on Aug. 4. 1861 Oct. He is banished from Edo, and Japan itself. 1866 Oct. 18. Von Siebold dies in Munich, Germany; he is buried in the Alten Südlichen graveyard on the Thalkirchner Strasse.

8190. Kulp, Karel; Ponte, Joseph G., Jr. eds. 2000. Handbook of cereal science and technology. 2nd ed., revised and expanded. New York, NY: Marcel Dekker. ix + 790 p. Illust. Index. 29 cm. Series: Food Science and Technology, No. 99. • **Summary:** Chapter 26, "Fermentation and microbiological processes in cereal foods," by Pierre Gélinas and Carole McKinnon (of Food Research and Development Centre,

Agriculture and Agri-Food Canada, St. Hyacinthe, Quebec, Canada) (39 refs) (p. 741-54) contains a long table (p. 742-46) titled "List of foods prepared from fermented cereals." The four columns are: (1) Food name (synonym or related food). (2) Food type (characteristics). (3) Area (country or continent). (4) Main microorganisms.

Under "Soybeans" the following foods are listed: Chee-fan. Chinese yeast. Hama-natto. Kenima. Ketjap. Meitauza. Meju. Miso (chiang, doenjang, kochujang, tauco). Natto. Soy sauce (kanjang, kecap, kicap, shoyu, taosi [sic]). Sufu (tahuri, taokoan tao-hu-yi). Tairu (taire-fermented soybean milk, like yogurt, from Malaysia). Taotjo. Tempe (tempeh).

"Chee-fan" is described as "Curd-like" [fermented tofu] from China. Main microorganisms: *Mucor* spp., *Aspergillus glaucus*.

Note 1. Taokoan (listed under Sufu, above) is not a fermented food. It is the Filipino equivalent of Chinese *doufu-gan* or "pressed tofu." Filipino fermented tofu is *tahuri* (also spelled *tahuli*).

Table 2, "List of representative microorganisms associated with fermented cereal foods" (p. 74-48) contains two columns: (1) Type of microorganism (and within type, genus and species, listed alphabetically by genus). (2) Food produced.

Under "Bacteria" are: *Bacillus natto*—Hama-natto [sic], natto. *Lactobacillus delbrueckii*—Miso, soy sauce. *Pediococcus* spp.—Hamanatto. *Pediococcus halophilus*—Soy sauce. *Streptococcus* spp.—Hama-natto.

Under "Bacteria" are: *Actinomucor elegans*—Meitauza, sufu. *Aspergillus glaucus*—Chee-fan. *Aspergillus oryzae*—Hama-natto, ketjap, meju, miso, saké, soy sauce. *Monascus purpureus*—Anka (ang-kak, beni-koji, red rice), hong-ru (lao-hong). *Mucor* spp.—Chee-fan, ruhi, sufu. *Mucor hiemalis*—Sufu. *Rhizopus oligosporus*—Tempe.

Under "Yeasts" are: *Candida* spp.—Soy sauce. *Zygosaccharomyces rouxii*—Miso, soy sauce.

The section on "Major commercial fermentation processes" includes (p. 752-53) soy sauce (from wheat and soybeans) and miso (from rice and soybeans).

Note 2. Koji, the basis of soy sauce, miso, and saké fermentations, is not mentioned in either of the first two tables. However it is mentioned by name on p. 753. Address: 1. American Inst. of Baking; 2. Prof. Emeritus, Kansas State Univ. Both: Manhattan, Kansas.

8191. Liberty, Anne. 2000. Super soy! Protect yourself against bone loss, heart disease, cancer, menopause, high cholesterol. Boca Raton, Florida: American Media Mini Mags Inc. 66 p. 14 cm. [1 ref]

• **Summary:** This mini-book (only 5½ inches high) was sold (for \$1.19) next to the tabloid magazines at the checkout stand at Longs Drug Store in Lafayette, California. On the little cover is a color photo of a grey-haired and healthy-looking lady holding a glass of soymilk. Contents: All

about soy: Inside the soybean (phytoestrogen, isoflavones, genistein, protease inhibitors), eight of soy's top health benefits (antioxidant protection from free radicals, breast cancer protection, cholesterol control, colon cancer protection, strong bones, hot flash reduction, a strong immune system, and kidney disease prevention), different soy products (green soybeans, hydrolyzed vegetable protein {HVP}, infant formula {soy-based}, lecithin, meat alternatives, miso, non-dairy frozen soy ("soy ice cream"), soy cheese, soy flour, soy grits, soy protein (incl. TSP = textured soy protein = textured soy flour), soy sauce, soy yogurt, whole soybeans, soy nut butter, soy nuts, soy oil, soy sprouts, tempeh, tofu, whipped soy-based topping, yuba), nutritional value, how much do you need? Bone loss. Heart disease and cancer: Heart disease, cancer (genistein, isoflavones, phenolic acids, phytates, protease inhibitors). Menopause. Cholesterol. Cooking with soy products: Soy flour, miso, soy milk, soy protein, tofu, tempeh. Delicious soy recipes.

The author frequently refers to Earl Mindell, PhD, but has no real scientific references. Many of the recipes were provided by the United Soybean Board. On the last page are two sources of more information and recipes: The United Soybean Board website www.talksoy.com and the Indiana Soybean Board website www.soyfoods.com.

8192. Rose, Robert. ed. 2000. Beans, lentil & tofu gourmet. Toronto, Ontario, Canada: Robert Rose, Inc. 192 p. Illust. Index. 26 cm.

• **Summary:** This is an unusual but attractive book, with no real author or publisher. It was written by "The editors of Robert Rose" and published by Robert Rose Inc., with financial support of the government of Canada. Basically, it is a collection of recipes from other cookbooks. Except in the chapter titled "Meatless" (p. 145-62), many recipes contain meat, poultry, fish, or seafood. The section titled "Contributing authors" lists eight authors, with photos and descriptions of their cookbooks, and statements such as "Recipes from this book are found on pages 23, 38, 69, and 180." The book contains 12 full-page color photos of dishes prepared from the recipes.

Contains 13 tofu recipes and one tempeh recipe: Malay vegetable-stuffed fried bean curd with spicy sweet-and-sour sauce. Bak choy noodle and tofu chicken soup. Curry-fried tofu soup with vegetables and udon noodles. Mixed vegetable herb broth with soft tofu. Chickpea tofu stew. Braised stuffed bean curd. Braised roasted pork with tofu and green onions. Steamed shrimp-stuffed tofu with broccoli. Hoisin stir-fried vegetables and tofu over rice noodles. Barbecued tempeh with basil, hyssop and ginger. Chickpea tofu burgers with coriander mayonnaise. Thai dry vegetable curry (with tofu, p. 162). Pea tops with pancetta and tofu. Soy-braised tofu, cabbage and ginger with cellophane noodles (with soya sauce, p. 172-73). Address: 120 Eglinton

Ave. E., Suite 1000, Toronto, ONT Canada. Phone: (416) 322-6522.

8193. Wilkinson, Endymion Porter. comp. 2000. Chinese history: A manual. Revised and enlarged. Cambridge, Massachusetts: Harvard University Press / Harvard Yen-ching Institute. xxiv + 1181 p. Index. 23 cm. Harvard Yen-ching Institute Monograph Series, 52. 1st ed. 1998. [500+* ref]

• **Summary:** A remarkable and extremely valuable book. Partial contents: Introduction: Recent historiographical trends, center and periphery, periodization, the dynasties. I: Basics. 1. Language. 2. Dictionaries. 3. People. 4. Geography. 5. Chronology. 6. Telling the time. 7. Statistics: Numbers and order of magnitude, population, weights and measures, money, prices. 8. Guides and encyclopedias. 9. Locating books. 10. Locating secondary sources. 11. Libraries.

II: Pre-Qin sources. 12. Archaeology. 13. Pre-Qin archaeology. 14. Prehistoric signs and symbols. 15. Oracle bone inscriptions. 16. The characters: Evolution and structure. 17. Epigraphy. 18. From bamboo strips to printed books. 19. Excavated and transmitted texts.

III: Historical genres. 20. Primary and secondary sources. 21. Annals. 22. Standard histories. 23. Topically arranged histories. 24. Miscellaneous histories. 25. Government institutions. 26. Official communications. 27. Law. 28. War.

IV: Other primary sources... 35. Agriculture, food and the environment. 36. Medicine. 37. Technology and science... 42. Foreign accounts of China.

V: Primary sources by period.

In the chapter titled "Agriculture, food and the environment," section 35.2.2 on "Pre-Qin foodstuffs and cooking" (the Qin dynasty, 221-206 B.C., came just before the Han) states that the staple dishes, cooked mainly by boiling or steaming, were typically "accompanied by a savory paste (*jiang*, *miso* in Japanese) made from hydrolyzed (fermented) meat, fish, crustaceans, or, most important of all, soybeans" (Footnote 8). "The soybean is indigenous to northeast China. Its cultivation began in the Zhou period. It was a major source of protein, especially for peasants and laborers. Starting in the Yangzi valley, it was brined and hydrolyzed into the characteristic Chinese flavoring, soy sauce (*jiangyou*) (9). By the Han, a new process had been discovered; if the production was interrupted half way and the beans dried, they became blackened and delicious. Along with savory pastes (*jiang*) and pickles (*zu*), these fermented soybeans (*chi*) were immensely popular (10)."

Footnote 8: See *Zhongguo shiqian yinshishi* (A history of Chinese prehistoric food and drink), Wang Renxiang, ed. in chief, Qingdao, 1997.

Footnote 9 (p. 638): "The origin of 'soya' in European and other languages is from either *xiyao* [fermented black soybean sauce] or *shōyu* (the Cantonese and Japanese for

jiangyou [soy sauce] respectively). The early generic word was *shu* (*Glycine max*), later *dou*, and later still *dadou* to distinguish it from post-Han imported pulses.”

Footnote 10: “*Chi* used to be pronounced *shi*. Other names for *chi* were *douchi*, *daku*, and *nadou* (*nattô* in Japanese).”

Section 35.2.3 on “New foodstuffs and cooking” covers the period from the beginning of the Han dynasty in 202 B.C. Noodles (*bing*) were introduced. Soybeans (in the forms of *jiang* and fermented black soybeans {*chi*}) remained an important source of protein. Alfalfa (*musu* or *mushu*), peas (*hudou*, modern *wandou*), and sesame (*huma*, modern *zhima* or *mazi*) are said to have been introduced by Zhang Qian, the emissary from the Former / Western Han dynasty. By the Tang “bitter fermented blackened soy beans” (*huchi*) had been introduced; *hu* means “barbarian.” Tofu (*doufu*) is first mentioned in the early Song dynasty. It was imported into Japan and first appeared there in a document dated 1183. “It was used as a substitute for meat and fish in Buddhist vegetarian cooking.” New World crops which made their way into China from the 16th century include peanuts (*fandou*, modern *huasheng*), chili, corn, sweet potatoes, and tomato (p. 643).

Note: The author was educated in England. Address: Head of Delegation and Ambassador to China for the European Commission.

8194. Hymowitz, Ted. 2001. When were soybeans first cultivated in Pennsylvania, and by whom? (Interview). *SoyaScan Notes*. Jan. 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** On 16 Jan. 1769 Samuel Bowen sent both soybeans and soy sauce to a committee of the Society for the Promotion of Useful Knowledge in Pennsylvania. As secretary of the Society, Charles Thompson would have been aware of these items. The committee then gave the soybeans to eight farmers. Ted has done extensive research trying to find out who these farmers were and whether any of them grew the soybeans. First he looked at later publications of the Society to see if they reported on these soybeans; he found nothing. Then he dug deep into the records of each of these individuals, such as diaries; again nothing. Ted has also looked at everything he could find about John Bartram (to whom Benjamin Franklin sent seeds); no record of him planting soybeans. Maybe the soybeans failed to germinate.

In 1804 Mease made his famous statement: “The Soybean bears the climate of Pennsylvania very well. The bean ought therefore to be cultivated.” At that time, Mease was Secretary of the Society. We do not know the basis for his statement. Who could have planted these soybeans in Pennsylvania between 1769 and 1804, and from where were they obtained? Probably one of the 8 farmers, who got them from Samuel Bowen. John Bartram was one of these 8 farmers.

Ted believes, based on the wording, that Mease was paraphrasing Charles Thompson (Feb. 1771); both use the word “climate” and both are referring to introduced plants. Yet Thompson uses the term “Chinese Vetch” and Mease uses the term “Soy-bean” to refer to the same plant. Why the change? Thompson, who was secretary of the American Philosophical Society, stated in their Transactions that Chinese Vetch had been introduced to the colonies—not specifically to Pennsylvania. Thompson was almost certainly referring to the soybeans grown by (or for) Bowen in Savannah, Georgia; he knew this through the Minutes of the Society.

Therefore, Ted believes that Mease 1804 is the earliest document seen which states clearly that soybeans have been grown in Pennsylvania. Yet many questions remain. When were these soybeans first grown? By whom? If any of these early soybean were grown, were they the ones sent to Pennsylvania by Bowen or by Franklin?

Update: Talk with Ted Hymowitz. 2005. Nov. 7. Ted has found a record that John Bartram grew soybeans in Philadelphia, but we do not know when; his grandson or great-grandson did his best to document Bartram’s work by collecting the little scraps of paper that Bartram left lying around. Bartram (on one of his scraps of paper) called the bean “soi.” Both John Bartram (lived 1699-1777) and James Mease (1771-1846) were members of the American Philosophical Society, however Mease was age 6 when Bartram died.

Bartram, who was a farmer and owned a small seed company that exported seeds, bulbs, and cuttings to Europe. Though barely literate, he was a good botanist but he did not keep good records. He was apparently too poor to buy notebooks to record his botanical observations, so he recorded them on little scraps of paper, which he left here and there. He led a chaotic life. He liked to work with his hands in the fields. European gentleman botanists who came to visit his home in Philadelphia, asked if they could please see Mr. Bartram. They thought the man they had just met, whose pants were torn or patched, who had mud on his boots, dirt on his hands, and seemed like he hadn’t washed for a week, was Mr. Bartram’s gardener.

In conclusion: It seems likely that soybeans were first cultivated in Pennsylvania in 1769, but we have no proof. One of the 8 farmers to whom Bowen’s soybeans were distributed probably planted them that year, but Ted can still find no record of that. We have no proof that soybeans were cultivated in Pennsylvania until 1804, when Mease says they were. Address: Prof. of Plant Genetics, Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8195. Glenville, Marilyn. 2001. Natural alternatives to HRT* (* hormone replacement therapy) cookbook: Understanding estrogen and foods that benefit your health. Berkeley, California: Ten Speed Press. 192 p. Illust. Index. 24 x 21 cm.

[37* ref]

• **Summary:** Every woman who experiences menopause has probably experienced unpleasant symptoms such as joint pains, mood swings, weight gain, hot flashes, etc. Yet these symptoms can be avoided, or at least alleviated—by simple and safe changes in diet to include more phytoestrogens and isoflavones. This book tells and shows you how. Already a best-seller in the U.K. with over 20,000 copies in print.

Although this is not a vegetarian cookbook (recipes call for the use of fish and shellfish such as crab, mussels, salmon, tuna, etc.), there is extensive discussion of the benefits of soyfoods in a diet for menopausal women and many recipes that use soy (especially tofu). The chapter titled “What you need to eat at menopause” contains a good discussion (p. 17-18) of the benefits of isoflavones / phytoestrogens and natural soyfoods. It is known that “legumes contain good levels of isoflavones, and soy ranks the highest.” Phytoestrogens are also good for bone health, and soy protein helps to reduce cholesterol (p. 25).

In the “Introduction to the recipes” is a section on “Soy products” (p. 47) that discusses miso, soy milk, soy sauce, tempeh, and tofu (which is “wonderfully versatile”). Soy-related recipes include: Scrambled tofu (p. 71). Tofu vegetable quiche (p. 90). Russian salad deluxe with tofu dressing (p. 96). Vegetable, bean sprout and tofu stir-fry (p. 104-06). Tofu and mushroom stroganoff (p. 106-07). Herby tofu and oat sausages with nutty mash (p. 112). Austrian bean salad with tofu dressing (p. 130-132). Deluxe kebabs (p. 136). Apricot tofu ice-cream (p. 156). Tofu cheesecake (p. 157). Mixed berry fool (p. 159). Miso broth (p. 176). Soy mayonnaise (p. 179). Sesame tofu dressing (p. 180). Tofu dip for raw vegetables (p. 180). Mocha tofu cream (p. 183). Tofu cream (p. 183).

Marilyn Glenville, PhD, earned her doctorate at Cambridge University and is Chair of the Governing Council for the British Association of Nutritional Therapists. She has practiced nutritional therapy in the U.K. and U.S. for more than twenty years, and specializes in the natural approach to female hormone problems. She practices from three private clinics in London and Kent, including the prestigious Hale Clinic. Address: PhD, nutritional therapist, UK.

8196. *Nutrition Business Journal* (San Diego, California). 2001. Edward & Sons resists would-be acquirors: Service, quality and established supplier relationships are the basis of business for niche-oriented organic food company. 6(2):16. Feb.

• **Summary:** Located in Carpinteria, California, Edward & Sons is a 24-year old firm with annual sales of \$8-\$10 million, growing at nearly 20% a year. They sell 60 items including misos, sauces, rice crackers, and organic sprinkles. All products are vegetarian and two-thirds of its sales are from organic products.

The company's original product, Miso Cup, a dry instant

soup, was developed by founder and president Joel Dee in response to a dearth of instant meals for vegetarians. It remains the company's flagship product. The second product, Brown Rice Snaps, from Japan, were the first wheat-free crackers on the market. The company also introduced the first flavored soy sauces under the Premier Japan brand; they now have several other sauce brands, including Wizard Organic, Troy's, and Rainforest Organic.

8197. **Product Name:** Azumaya Baked Tofu: Mesquite Smoke Flavored, Teriyaki, Spicy Thai Peanut, and Chile Picante.

Manufacturer's Name: Vitasoy USA, Inc.

Manufacturer's Address: 400 Oyster Point Blvd., Suite 201, South San Francisco, California 94080.

Date of Introduction: 2001. February.

Ingredients: Teriyaki: Tofu (water, whole non-genetically modified soybeans, magnesium chloride), soy sauce (water, whole non-genetically modified soybeans, sea salt, whole wheat, alcohol to preserve freshness), cane juice (dried), sea salt, ginger, natural flavors, garlic (dried), caramel color, carrageenan, sesame seeds.

Wt/Vol., Packaging, Price: 2 pieces in 8 oz (227 gm) shrink pack. Teriyaki retails for \$1.29 (2001/08, Lafayette, California).

How Stored: Refrigerated.

New Product—Documentation: Products with Labels purchased at Safeway in Lafayette, California. 2001. Aug. 15. Teriyaki retails for \$1.29 but Mesquite retails for \$2.69. Teriyaki Label: 3 by 4¼ inches. Red, black, white, and blue. A color illustration shows a large red Japanese Shinto torii arch standing in water with snow-capped Mt. Fuji in the background. In the right front is a Japanese woman in a kimono holding a fan in one hand and a paper umbrella in the other. On the front panel: “Ready-to-Eat. All natural. No preservatives. Cholesterol free. Pasteurized.” On the back of the Teriyaki is written: “Soy protein claim: Azumaya Baked Tofu is an excellent source of soy protein. One 4-ounce serving of Azumaya Baked Tofu contains 19 grams of soy protein.” A date code: 11/00 (Nov. 2000) is printed in the lower left corner. Soyfoods Center taste test: Mesquite has grill marks on the outside. Not much flavor penetration: 7. Teriyaki has somewhat better flavor. Label design: Okay.

8198. Stephens, Roger; Stephens, Jane Ade. ed. and comp. 2001. *Soyfoods guide 2001: Helpful tips and information for using soyfoods*. Indianapolis, Indiana: Stevens & Associates, Inc. Distributed by the Soy Protein Partners. 24 p. Illust. No index. 28 cm. [23 ref]

• **Summary:** This guide is available only on a limited basis to dietitians and health professionals. Contents: Foreword. Keep your heart healthy: Super soy protein smoothie. Beans, beans, good for the heart: The more you eat, the better your chances of lowering your blood cholesterol levels.

Cholesterol: What's in a claim. Sample soy meal planner (4 meals a day for 5 days, to get 25+ grams/day of soy protein). Dietary guidelines for Americans. Composition of soyfoods (table). The healthy bean: Isoflavones, heart disease, menopause and osteoporosis, allergies, diabetes and kidney disease, fat. Isoflavone content of soyfoods (table). The state of soy research. Protein content of soyfoods (table). Soy resources: Web sites, books. Soyfood substitution chart. Descriptions of soyfoods: Traditional soyfoods, soy-based products, soy ingredients. Recipes: Meat alternatives. Textured soy protein. Soy flour. Whole soybeans. Soymilk. Tofu. Soy snacks and smoothies. Soy—Good for your heart.

The Foreword (p. 2) states: “The 2001 *Soyfoods Guide* is distributed by the Soy Protein Partners. Partners include state soybean boards from: Alabama, Arkansas, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, North Carolina, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. Industry partners include: American Soybean Association, Archer Daniels Midland Company, Central Soya Co., Minnesota Soyfoods Association, Protein Technologies International, Soy Protein Council, Soyfoods Association of North America, Soyfoods Council and the United Soybean Board.” Address: 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

8199. Andoh, Elizabeth. 2001. Sampling seasonal delicacies, at reasonable prices, in Osaka. *New York Times*. April 1. p. TR6, TR18 (Sunday).

• **Summary:** Contains reviews of restaurants in Osaka. Yoshino Sushi offers “plump vegetable rolls stuffed with broth- and soy-simmered koya-dofu (dried tofu).

Shiru Yoshi offers “one tofu kaiseki; each menu is \$100 a person. Throughout Japan tofu is not synonymous with vegetarian cuisine. At Shiru Yoshi, it means two of the many courses that feature silky bean curd [kinugoshi; silken tofu]: in the winter a hot pot of tofu and mushrooms with a soy-based dip... and agedashi, a deep-fried block of tofu...” A “succulent chunk of miso-marinated fish was also served” to those who ordered the kobachi kaiseki dinner (literally “feast of small dishes”). Address: Tokyo, Japan.

8200. Iino, Ryoichi. 2001. The history of shoyu (Soy sauce) 3. *Food Culture (Kikkoman Inst. for International Food Culture, Noda, Japan)* No. 3. p. 20-23. May. <http://kiife.kikkoman.co.jp>. [8 ref. Eng]

• **Summary:** Contents: *Sho* in the Kamakura period. The development of *nimono*. The appearance of *tare-miso*. Cooking with *tare-miso*. *Tou-miso* in the *Tamonin-nikki*. The appearance of the term *shoyu*. Soy sauce and tamari.

This article begins: “*Sho* in the Kamakura Period: In the previous issue of *Food Culture*, I noted that both liquid *sho* [pronounced *jiang* in Chinese] and unrefined *sho* [which probably had a consistency like applesauce]

were manufactured during the Heian period (794-1185); that the term *sho* was generally used to refer to unrefined *sho*; and that the use of liquid *sho* gradually declined. In this continuation of my article, I would like to discuss the situation in the subsequent period; that is, during the medieval age, up until the appearance of soy sauce.”

“*Tare-miso* is a liquid seasoning made by adding water to miso, boiling it down, and then straining the mixture by suspending it in a cloth bag. A method for making *tare-miso* can be found in the *Ryori Monogatari*, compiled in 1643... The same book contains a different recipe for *nama-dare*, which is a form of *tare-miso* prepared without cooking.” Yet *tare-miso* is mentioned as early as 1432. Address: Food historian, and teacher of food history, Hattori Nutrition College, Japan.

8201. **Product Name:** Nasoya Baked Tofu: Mesquite Smoke Flavored, Teriyaki, Thai Peanut, and Tex Mex.

Manufacturer's Name: Vitasoy USA, Inc.

Manufacturer's Address: Ayer, Massachusetts. Phone: 1-800-4-Nasoya or www.viatsoy-usa.com.

Date of Introduction: 2001. May.

Wt/Vol., Packaging, Price: 8 oz (227 gm).

How Stored: Refrigerated.

New Product—Documentation: Ad (8½ by 11 inch, color) in *Natural Foods Merchandiser*. Dec. p. 16. “Nasoya: This could be the filet mignon of baked tofu!” “Offer your customers an exciting new meat alternative with Nasoya Baked Tofu.” Also appeared in the June 2001 issue of this magazine (p. 40).

8202. Kanai, Atsuko. 2001. How sushi came to California, and how edamamé came to be served there with the sushi (Interview). *SoyaScan Notes*. June 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mutual Trading Company (MTC) was started in 1926 in Los Angeles (LA), as a co-op for Japanese immigrants who wanted to consolidate their purchases. It was located at 803 East 1st St., three blocks east of central Little Tokyo. During the 1950s, Noritoshi Kanai, Atsuko's father, exported to MTC from Japan. Then in 1964 he came to America and joined the company. Since that time MTC's forte has been the restaurant trade. Back in the 1960s, Mr. Kanai, thinking about how to best introduce Japanese foods to Caucasian Americans, realized that the retail channel was too difficult; it takes too long (25+ years), makes it hard to introduce authentic Japanese food without “Americanizing” it, and cooking authentic Japanese foods is too challenging for average Americans. It would be much easier and faster to introduce Japanese foods through the restaurant trade because then the Americans could taste the foods that had already been prepared and served, in the way they were intended to be, by Japanese chefs.

The story goes back to the 1960s and a man named Harry Wolff, Jr. Harry was a huge man (“He looked like Santa Claus.”), Jewish, and a confectionery food broker. Mr. Kanai and Mr. Wolff met at a fancy food show. Mr. Wolff asked Mr. Kanai what he sold. The answer: Rice crackers, and thin honey & sesame biscuits. Mr. Wolff observed: “To be successful in the United States, you have to have a good doctor, a good lawyer, and a good Jewish friend. I am a Jewish broker and I know all the distribution channels, so I’ll become your friend and team up with you.” He helped Mr. Kanai to sell his high-quality honey & sesame “Harvest Cookies” imported from Japan. Together, they made a little fortune. Then competing American companies, such as Nabisco, got smart and started importing cheaper versions from Taiwan—which ruined Mutual’s cookie sales.

So in 1966 Mr. Kanai and Harry Wolff decided to take a trip together to Japan to look for something else to sell. They stayed at a hotel in Tokyo and one day they went to a sushi bar across the street. Mr. Kanai explained that most Americans don’t like the raw fish in sushi, but Mr. Wolff was intrigued by both the sushi and the rapport that he built with the sushi chef. In typical American restaurants, you never even see the chef. At the end of the week, as they were preparing to leave Tokyo, Mr. Kanai was surprised to receive a bill for 100,000 yen, which was a lot of money in those days. Mr. Wolff had returned to the sushi bar every day, fell in love with sushi (including the raw fish), and learned a lot about it. The 100,000 yen turned out to be an excellent investment for Mr. Kanai; it confirmed his belief that Americans could be taught to love sushi.

Returning to America, Mr. Kanai worked to expand the sushi restaurant trade, geared to both Japanese and Caucasian Americans. The first sushi bar in Southern California was Kawafuku restaurant, started in 1966 in Little Tokyo, Los Angeles. It was owned by Mr. Nakajima and the chefs were Mr. and Mrs. Shigeo Saito. They made a fortune of \$30,000. Upon returning to Tokyo, they started a sushi restaurant in Ginza. Word of Kawafuku’s success spread quickly in Japan, starting a flood of young Japanese sushi chefs to the USA.

Soon a second sushi bar opened on mid-Wilshire Boulevard, then a third in Santa Monica. Mr. Kanai worked on the sushi retail trade—which took longer to reach takeoff.

Why did sushi spread so quickly in the USA? From the consumers viewpoint, it’s a novel cultural experience which is both interesting and fun—rapport with the chef. The food tastes great, is not easy to make at home, and is healthy. From the business viewpoint, it is profitable and requires special skills which are difficult for others to copy.

To make sushi, a restaurant needs three types of things: Hardware (special knives, graters, mats, etc.), food ingredients (nori, wasabi, shoyu), and a sushi master. Mr. Kanai began to import these from Japan. Originally, only the special sushi rice was available in the USA; Kokuho Rice was developed in 1963 for Koda Farms by Dr. Williams of

the University of California at Davis.

Company records show that on 30 July 1966 Mutual Trading imported its first edamamé (2 cases) from Japan as a test, for sale to Japanese restaurants. However there was no connection between the 1966 trip to Japan for sushi and the 1966 test import of edamamé. On 1 July 1970 edamamé first appeared in Mutual’s restaurant catalog. In 1977 Mutual started to import edamamé from Taiwan, in addition to Japan.

The popularity of edamamé in the U.S. is directly related to the rise in popularity of Japanese food—especially sushi. Many Asian cultures eat soy products, but only the Japanese eat soy as a snack in the vegetable form—as edamamé.

In general, Americans regard sushi as a unique food genre, separate from Japanese food. Before the 1970s, Japanese restaurants in America were visited by Japanese-Americans who were familiar mostly with Kansai/Kyoto style sushi such as Inari-zushi, maki-zushi, and oshi-zushi. They were not familiar with the Edo/Tokyo sushi-bar style of raw-fish sushi. During the 1970s sushi bars in America grew as Japanese businesses in various fields set up offices in Southern California. The Japanese businessmen brought Americans into sushi bars and Japanese-Americans began to become familiar with raw fish.

America’s sushi boom began in California in Sept. 1980, when the very popular TV miniseries and epic drama *Shogun*, based on the novel by James Clavell, sparked a great interest in traditional Japanese culture among Americans. With the sushi, they drank Japanese beer (especially Sapporo big bottle) and saké. In America, beer is usually served with peanuts. But, true to tradition, Japanese restaurants served edamamé, free of charge, with the beer. “It was a mass sampling of the edamamé without people having ordered it! So the success of sushi, Japanese beers, Japanese saké, and edamamé, are all tied in together.”

In 1985 in the White House, sushi was served as hors d’oeuvres at an official presidential dinner; Ronald Regan was president.

On 27 May 1993 Mutual began to distribute its first edamamé grown in the United States—from Minnesota Edamamé. But there were two big problems with this Minnesota product: (1) the soybeans were the wrong kind, grown for oil extraction and feed, rather than the large-seeded vegetable types; and (2) the harvesting equipment damaged the pods, and some of the beans even fell out. So the edamamé that Mutual received from Minnesota were not very good quality. After 3–4 shipments, MTC discontinued the product.

Another very important issue is the varieties; today Mutual carries only two edamamé varieties, imported from Taiwan and China. The beans are sweeter, bigger, prettier than most other varieties. Moreover, the flavor changes from one soil type to another, and from year to year.

Another issue is freshness. In Japan, edamamé have

traditionally been harvested at their peak of flavor (the whole soybean plant is pulled up by the roots), and sold fresh, with the pods still on the branches/stems, and the plants bundled together, roots and all. Edamamé in Japan is always served in the pods because the pods (1) seal in flavor, otherwise lost during the boiling process, and (2) seal in nutrients, also lost in boiling. In fact, some high-class restaurants in Japan serve boiled edamamé, still on the branches—emphasizing their “very fresh” status. Today, during the summer season, most edamamé consumed in Japan are still sold fresh. But during the other three seasons, virtually all are imported frozen.

Commercialization of *fresh* (not frozen) edamamé is impossible in such a large country as the USA because edamamé has only a 3-day window during which it must be picked to be at the peak of flavor—according to MTC’s edamamé purchasing manager. If picked before that time, the beans are too small; after that time they start to lose their tenderness and sweetness.

Of the three types of things needed to make sushi, the hardest to find was good sushi masters, so several years ago a Sushi Academy was started in Venice, California, near LA, by Mr. Toshi Sugiura, who owns Hama, a very successful sushi restaurant next door. The California Sushi Academy (phone: 310-581-5272) has courses for both professionals (6 months) and amateurs (weekends) and is very successful. Address: Mutual Trading Co., Inc., 431 Crocker St., Los Angeles, California 90013. Phone: (213) 626-9458.

8203. Kikkoman Corporation. 2001. Annual report 2000. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 39 p. 28 cm. [Eng]
• Summary: The information in this English-language annual report is current as of April 2001. Contents: Financial highlights. Introduction. Message from the president (Yuzaburo Mogi): Fiscal year in review, operating results, strengthening the competitive business, summary of business policy (business principles {based on consumer satisfaction}, medium-term business strategy, business organization, basic policy on distribution of profits, tasks for the coming years, in closing). Global operations: United States, Europe, Asia, Japan. Topics: Commemorative events held to mark milestones at Singapore and Taiwan plants, Kikkoman takes part in Dutch water resource preservation project. Research and development. Financial review: Operating results. Consolidated balance sheets, etc. Corporate history (chronology from April 1925 to Aug. 2000). Global network (directory of Kikkoman names, addresses, and phone numbers worldwide). Board of directors and officers. Corporate data. Overall, sales and profits remained approximately unchanged from 1999.

Overseas, Kikkoman is benefitting from the growing popularity of soy sauce. Statistics demonstrate this. Over the last 26 years, overseas of Kikkoman soy sauce have grown by an average of more than 10% a year. Last year, overseas sales of soy sauce topped 120 million liters for the first time.

Overseas sales (excluding exports from Japan) accounted for about 30% of consolidated net sales and 50% of Kikkoman’s consolidated operating income—excluding the Coca-Cola Business. Sales volume in the USA, the company’s largest overseas market, rose to 95 million liters, grew steadily, and accounted for 80% of Kikkoman’s total overseas sales of soy sauce. Last year, Kikkoman’s share of the U.S. home-use market hit an all-time high of 55%. In Europe, production capacity at the plant in the Netherlands is presently being raised to 7 million liters, from 6 million liters, to meet rising demand. In China, Kikkoman is constructing a soy sauce plant; shipments are slated to start in the spring of 2002. The China plant will be the company’s third in Asia outside Japan, joining plants in Singapore and Taiwan.

Effective from fiscal 2000, the results of the Tone Coca-Cola Bottling Co., Ltd. and two other companies accounted for by the equity method have been included in the consolidated results, following the introduction of new accounting standards based on the Securities and Exchange Law of Japan. However tables on p. 22 make it easy to compare Kikkoman’s 2000 financial performance with that of the year before. Excluding Tone: Sales were down 1.4% but net income (profit) was up 39.6%.

Photos (p. 3 and 7) show Yuzaburo Mogi. Address: Noda, Japan.

8204. Severson, Kim. 2001. One soy sauce changes its ways. *San Francisco Chronicle*. July 25. Food section. p. 4.

• Summary: Potentially dangerous amounts of 3-MCPD, a suspected carcinogen since 1999, were found in 22 of 100 brands of soy and oyster sauces in the United Kingdom according to results announced last month by the British Food Standards Agency—the UK’s equivalent of the U.S. Food and Drug Administration. Some of the products tested were made by Lee Kum Lee, one of the world’s largest manufacturers, however a company spokesperson said they may have been tested before the company changed its manufacturing process. The sauces in question use hydrochloric acid in a process that reduces the manufacturing time to six days from the typical 6 months. Address: Staff writer.

8205. Dillman, Erika. 2001. The little soy book. New York, NY: Time Warner. xiii + 190 p. Index. 15 x 16 cm. [58 ref]

• Summary: Contents: Introduction. 1. It’s soy time. 2. Why eat soy? Health benefits of soy? Soy foods: Soy milk, soybean oil, soy sauce, soy meat alternatives, tofu, tempeh, miso, whole soybeans, edamame, soy nuts, soy nut butter, soy sprouts, soy ice cream, soy yogurt, soy cheese, soy flour and grits, textured soy protein (TSP), soy protein concentrate, soy protein isolate, hydrolyzed vegetable protein, infant formula, lecithin, natto, yuba, soy fiber, Cooking with soy (recipes). Notes [references]. Resources [Directory]. Glossary. Address: Seattle, Washington.

8206. **Product Name:** Trader Joe's Miso Mesquite Sauce.
Manufacturer's Name: Trader Joe's (Marketer-Distributor).

Manufacturer's Address: Monrovia, CA 91016. Phone: 626-599-3700.

Date of Introduction: 2001. July.

Ingredients: Water, catsup (tomato paste, vinegar, high fructose corn syrup, corn syrup, salt, onion powder, spice, natural flavor), sugar, soy sauce (water, wheat, soybeans, salt), miso (fermented soybeans, rice, salt), onion powder, sesame seed oil, modified corn starch, salt, garlic powder, spices, natural hickory smoke flavor, xanthan gum.

Wt/Vol., Packaging, Price: 12 oz (340 gm) glass bottle retails for \$1.99 (2001/07, Lafayette, California).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2001. July 13. Pink, apricot, black, white and green. Color photo shows a lady in traditional Japan holding a large paper umbrella, with several more open on the ground behind her. SKU #32666.

8207. Law, Edward. 2001. The origins of the silver trade in Sheffield (Website printout–part). homepage.eircom.net/~lawed/Origins.htm. 6 p. Printed March 23.

• **Summary:** The silver trade in Sheffield was established as a direct result of the invention of Sheffield Plate in 1742. The initial discovery of silver plating was made by Thomas Boulsover. “We are fortunate to have information (footnote 53) to be able to consider the firm of Roberts, Cadman & Co. in some detail. The firm was started in 1784 by two young men.” Roberts, age 21, had just finished his apprenticeship, while Cadman, who had also served an apprenticeship, was a few years older. Within 2 years of starting business, the firm took a “sleeping partner” named Naylor, who had an equity share but no role in the firm's management.

One of the firm's most interesting records is a stock book from 1787, “perhaps the first stock-taking of the firm following the introduction of Naylor.” “The stock in the warehouse shows that from the earliest days the firm was manufacturing all types of wares. It included... dish rings and dish crosses with lamps; sauce, pickle, soy, snuffer and ink boats; tureens; epergnes...”

8208. Gai, Junyi; Guo, Wentao. 2001. History of *maodou* production in China. In: T. Lumpkin, ed. 2001. Second International Vegetable Soybean Conference. Pullman, Washington: Washington State University. 202 p. See p. 41-47. [5 ref]

• **Summary:** Two books review the ancient Chinese literature on the history of soybean production: (1) *Dou Lei (Legumes)*, by Li Chang-Nian, published in 1958; (2) *History of Soybean Cultivation in China*, by Guo Wen-Tao, published in 1993.

Both authors are from the Chinese Agricultural Heritage Institute (Nanjing Agricultural University, Nanjing, Jiangsu 210095, China).

The author then cites ten early mentions of soybeans in Chinese literature: The first three are from three different sections of the *Shi Jing* [*Shijing*] (6th century BC); the others are from the *Zhou Shu* (5th to 3rd century BC), *Zhou Li* (3rd century BC), *Meng Zi* (3rd century BC), *Mo Zi* (5th to 4th century BC), *Xun Zi* (3rd century BC), *Li Ji* (1st century BC), and *Zhan Guo Ce* (1st century BC).

Noting that the *Shi Jing* [*Shijing*] contains the oldest Chinese literature, he adds that it “is a collection of poems circulated among the people from the Western Zhou Dynasty to the Spring and Autumn Period. Some of them might be works from the Shang Dynasty [ca 1600-1045 BC]. The book was edited and finished in the middle Spring and Autumn Period (6th century BC). Mao Hêng (Western Han Dynasty, 2nd century BC), Zheng Xuan (Eastern Han Dynasty, 2nd century AD), Lu De-Ming (Tang Dynasty, early 7th century AD), and Kong Ying-Da (Tang Dynasty, 642 AD)” each wrote commentaries on the *Shi Jing* to explain its meaning. From the literature listed above, the following points about soybeans can be derived: (1) Soybeans and millet played a significant role among the five or nine major Chinese crops during the period from the Western Zhou Dynasty (6th century BC on) through the Spring and Autumn Period and Warring States, even to the Qin [221-206 BC] and Han [202 BC to 220 AD] dynasties. “This is indicated by statements about gentlemen using stewed soybeans as their major meal and even the emperor [in the *Zhou Shu*, 5th to 3rd centuries BC] taking soybeans taking soybeans and chicken as his major daily food.

“(2) The way to eat soybeans during that time was to stew the seeds as meal and to cook young green leaves as soup. These ways of preparation had a significant influence on the later adoption of eating immature green soybeans (*maodou*).

“(3) In ancient China, proverbs about soybeans existed before relevant Chinese characters were invented. Texts related to soybeans were recorded as soon as relevant characters were created from about 2700-3000 years ago. Oral works from the Shang Dynasty recorded in the *Shi Jing* date to 3600 years ago. From these records it can be inferred that soybeans existed during the Yan-Huang and Hou-Ji period, 5000 years ago” (p. 41-42). Note 1. The last three sentences are pure speculation and unsupported by any known evidence. The earliest solid evidence for soybean domestication in China dates from about the 11th century BC (Hymowitz 1970, p. 415-17).

The soybean is called “soy, soja, or soya” in Western countries, “which originates from the pronunciation of the Chinese character ‘Shu.’” Note 2. Most etymologies of the words “soy,” “soybean” and “soya” state (correctly, we believe) that they are derived from the Japanese word *shôyu*

meaning “soy sauce.”

Soybeans were used and processed in 4 different ways in ancient China (for each he gives a citation): (1) The dried seeds were stewed for daily meals and the young leaves were used as a vegetable to make soup. (2) The seeds, stems, leaves, and pods were used as animal feed. (3) The soybean was used for medicinal purposes. (4) Technology was developed for making various kinds of soyfoods, such as fermented black soybeans, tofu, doujiang, soybean oil, soybean sprouts, etc.

The section titled “Historical textual research on maodou in ancient China” cites 6 early documents which are said to mention immature green soybeans. Each of these six are cited elsewhere. A 7th was the *Jie-An Man-Bi* (Ming dynasty, by Li Xu, 16th century) which states: There are some varieties [of maodou] with fragrant flavor and glutinous taste, and some with flavor like ginkgo seeds. Those are new varieties.

“The exact record and time of the initial utilization of green pods and beans has not been discovered in the literature.” The practice of picking green pods, shelling them for immature seeds, and even putting them on the market for sale, existed by the 12th century (Song dynasty). The term *maodou* first appeared in the literature during the 17th century (Ming dynasty).

Since then the term *maodou* has appeared extensively in the literature, for example: (1) *Nong-Pu Bian-Lan* (1755). (2) *Qi-Ming Si-Shu* (1846). (3) *Jin-Si Tu-Can Biao-Lue* (1898). (4) *Yong-Chen Tu-Can-Biao* (1899). (5) *Zhi-Wu Ming-She Tu-Kao* (19th century). These texts include statements such as: Green immature soybeans are especially delicious; the fried ones can be served as vegetable dishes. And: Yellow soybeans (*huang-dou*) are now also called *maodou*. There are different varieties. They can be used as a vegetable at an early stage, then as a major food after maturity. They are necessary for the daily life of the people.

From ancient times to the present, green vegetable soybeans (*maodou*) have been most widely cultivated and consumed in the southern half of China, especially in two areas: (1) The lower and middle Yangtze valleys and drainage systems, in the provinces of Jiangsu, Shanghai, Zhejiang, and Anhui. The total area grown here today is about 100,000 ha. (2) Southeast China along the seacoast, including Taiwan, Fujian, and Guangdong provinces. The total area grown here today is about 30,000 ha. 8210. Mai, Pham. 2001. *Pleasures of the Vietnamese table: Recipes and reminiscences from Vietnam's best market kitchens, street cafés, and home cooks*. New York, NY: HarperCollins Publishers. xii + 242 p. Aug. Illust. (Photos by Martin Jacobs, some color). Index. 24 cm.

• **Summary:** This is a marvelous, very original book, with real passion for food and cookery and a deep curiosity on this subject and desire to learn. It overflows with warmth, devotion, and kindness, and is full of insights about Vietnam, its food, and most of its best cooks—street food cooks. Here we see the origin of the modern restaurant and its chefs. Contains more than 100 authentic recipes and many black-and-white photos.

The Vietnamese eat fresh herbs like vegetables. The Hmong are one of Vietnam's ethnic groups.

The ancestors of today's Vietnamese migrated south from southern China in about 1500 BC. By the 2nd century BC they had annexed the country and introduced their system of government, Confucianism, and Buddhism. Over the centuries they introduced their food traditions—stir-frying, eating with chopsticks, steaming, and such ingredients as soy sauce, tofu, noodles, and ginger.

Vietnam is often divided into three culinary regions: the fertile south, the cooler central region, and the harsh, mountainous north—which suffered most from recent American war.

Important ingredients include: Bean sauce (*tuong hot*). Hoisin sauce (*sot tuong*). Soy sauce (*nuoc tuong* {liquid}; Brands—Pearl River Bridge, Kikkoman. Although not used as widely as fish sauce, soy sauce is a common seasoning in vegetarian and stir-fried dishes).

Soy related recipes: Vietnamese bean dipping sauce (*tuong goi cuon*, with ¼ cup fermented whole soybeans {*tuong hot*}, p. 28). Soy-lime dipping sauce (*nuoc tuong pha*, with 1/3 cup soy sauce, preferably light Chinese style sold under the brands Kim Lan, Bo De, or Pearl River Bridge, p. 29). Sweet soy sauce with chilies and ginger (*nuoc tuong den ot*, with 3 tablespoons sweet soy sauce, p. 30, 37). About soy sauces (light, dark, and sweet, p. 37. Kikkoman is considered light. There are two types of dark soy: One, also called “black soy,” contains molasses and is thick. The other, called sweet soy sauce, is even thicker and sweeter).

Tofu, tomato and chive soup (*canh dau hu he*, with 6 ounces soft or medium tofu, p. 74). About fermented black

beans [fermented black soybeans] (*tau xi*, an ancient Chinese seasoning, also called salted black beans, are sold in 1-pound plastic bags, paper cartons, or earthenware jars. The author prefers Yang Jiang Preserved Beans with Ginger by Pearl River Bridge).

Chapter 7 is “Return to the grandmotherland: Vegetarian favorites and meatless recipes.” Of her beloved grandmother (now age 102) she writes: “When my grandfather died years ago at an early age, my grandmother was forced to raise seven kids by herself while running the family plantation. That twist of fate turned her into a vegetarian, in part because vegetarianism is a form of merit-making” (gaining merit, *duoc phuoc*). “In doing so, one’s wishes would be granted. In my grandmother’s case she prayed for the well-being of her children.” “Many Vietnamese are vegetarians who practice vegetarianism on one level or another... With the shortage of animal protein and the pervasiveness of the Buddhist influence in the culture, it is not uncommon to find many Vietnamese dishes eaten in two ways—*man* (with meat) and *lat* (without meat). Indeed almost every meat dish in this book can be made vegetarian.”

Vegetarian recipes (p. 185-99, with tofu unless stated): Salad rolls with jicama, peanuts and basil (*bo bia chay*, with 1 {6 ounce} piece tofu and 1 tablespoon soy sauce). Salad rolls with tofu and mushrooms. About tofu and *tau hu ky* [yuba or dried yuba sticks]. Cucumber and tofu salad (*goi chay*). Vegetarian pho noodle soup (*pho chay*). Vegetable curry (*ca ri chay*, with 2 pieces dried bean curd skin [yuba]). Spicy lemongrass tofu (*dau hu xa ot*). Rice noodles with stir-fried vegetables (*bun chay*). Vegetarian claypot rice with ginger (*com tay cam chay*). Black mushrooms with bean threads in claypot (*nam kho*). Water spinach with tofu (*rau muong xao*). Twice-cooked eggplant with garlic and basil (*ca tim xao rau que*).

Warm soymilk with pandanus leaf (*sua dau nanh*, with 1 pound dried soybeans made into fresh soymilk, p. 220-21). The headnote to this interesting recipe begins: “I grew up on soy milk, but never thought of making it fresh until I started until I started going back to Vietnam. There, fresh soy milk is sold at markets and on street corners early in the morning and late at night. Sometimes I can walk into a market and just sniff my way to a soy milk vendor. I definitely have a nose for *sua dau nanh*, especially if it’s been flavored with pandanus leaf.”

Glossary (p. 223-32) includes: Bean sauce (*tuong*). Fermented black beans (*tau xi*). Fermented soybeans (*tuong hot*). Hoisin sauce (*sot hoisin*, incl. soybean purée). Peanuts (*dau phong*). Tofu (*dau hu*).

About the author (with portrait photo on inside rear dust jacket): She was born in Vietnam and raised in both Vietnam and Thailand. She fled Vietnam “just days before Saigon fell to Communist rule on April 30, 1975. We left with the clothes on our backs, fighting our way through the pandemonium at the airport before climbing aboard a plane

that would fly us to safety.” Six years ago she ventured back to Vietnam for the first time—to be with her grandmother (and give her a modern wheelchair) and to eat *pho*. Her inaugural tour to Vietnam in 2000 was televised internationally by CNN, and was frequently rebroadcast on United and Delta airlines. She has returned about once a year since then, for the same reasons but also to learn about the food and cookery from the best cooks in the country—at market stalls, not fancy restaurants. She is now chef and owner of the acclaimed Lemongrass Restaurant in Sacramento, California. She also writes and teaches. Her first book, *The Best of Vietnamese and Thai Cooking* was published in 1996. Address: Chef and owner, Lemon Grass Restaurant, Sacramento, California.

8211. Saia, Rob; Cook, Byron; Terry, Michelle. 2001. The joys of soy: Recipes from the heartland. Topeka, Kansas: Kansas Soybean Association. 39 p. No index. 22 cm.

• **Summary:** Contents: Appetizers & dips. Marinades and sauces. Salads & dressings. Entrees. Breads. Breakfast/brunch. Vegetables. Desserts & drinks. Address: Kansas Soybean Assoc., 2930 S.W. Wanamaker Dr., Topeka, Kansas 66614. Phone: (785) 271-1030.

8212. Shurtleff, William; Aoyagi, Akiko. 2001. The book of miso: Savory, high-protein seasoning. 2nd ed. Revised. Berkeley, California: Ten Speed Press. 278 p. Illust. by Akiko Aoyagi Shurtleff. Index. Aug. 28 cm. [223 ref]

• **Summary:** This revision has completely new front and rear covers, designed and illustrated by Akiko. It contains a completely new “Appendix D—Miso Manufacturers in the West” (p. 255, updated to 10 May 2001). The page “About the Authors” (autobiographical) has been updated, and the original photographs have been replaced with more recent ones—reflecting the fact that Bill and Akiko separated in Nov. 1993 and their marriage ended in May 1995.

The last page, “Soyfoods Center,” has been updated.

The inside rear cover has been updated, and now includes current information about: (1) *Miso Production*, a book published by Soyfoods Center about how to start and run a company making miso on any of various scales and budgets. (2) *Miso and Soybean Chiang: Bibliography and Sourcebook*, published by Soyfoods Center. (3) SoyaScan, the unique computerized database produced by Soyfoods Center. This database now contains more than 62,000 records from 1100 B.C. to the present, and more than 76% of all records have a summary / abstract averaging 146 words in length. A description of the four different types of records (published documents, commercial soy products, original interviews and overviews, and unpublished archival documents), and the number of each type, is given.

The title page, copyright page, and table of contents have been redesigned and updated to give the book a much more contemporary look. Other small changes have been made throughout the book. Still contains 130 vegetarian

recipes—both western and Indonesian.

Ten Speed Press gave this book a new ISBN: 1-58008-336-6. Yet despite the many changes described above, the authors preferred not to have this called a “new edition” or “revised edition.” Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

8213. Thym, Jolene. 2001. A twist on tofu: New, tastier food products put the joy in soy. *Oakland Tribune*. Sept. 5. Bay Area Living section. p. 1, 6.

• **Summary:** This front-page story contains a long interview with Dana Jacobi, author of *Amazing Soy*, plus a large color photo showing ten different types of soyfoods. The writer has discovered that “there’s a whole lot more to soy than plain tofu.” A sidebar titled “Name that food” is a glossary including: Edamame, silken tofu, miso, tempeh, fermented bean curd, fried tofu balls, yakidofu, yuba, soynuts, soy sauce, soy milk. Contains four recipes from Jacobi’s book. Address: Staff writer.

8214. Lukas, Paul. 2001. Outrageous fortune: Howard Epstein’s love of packaging revolutionized Chinese takeout. *Fortune Small Business*. Oct. 4. *

8215. Goldbeck, Nikki; Goldbeck, David. 2001. Eat well the YoChee way: The delicious and easy way to cut fat and calories with natural YoChee (Yogurt Cheese). Woodstock New York: Ceres Press. xviii + 309 p. Oct. Illust. Index. 23 x 19 cm.

• **Summary:** This very interesting and original book is about dairy “yogurt cheese,” which has a smooth, creamy texture and is easily made by draining fat-free yogurt in a sieve or colander in the refrigerator overnight. For best results, use a yogurt that contains no thickeners or stabilizers, including modified starch, gelatin, or gums, and which has not been pasteurized or heat treated after processing. “YoChee can help you overcome many of today’s most pressing dietary concerns—particularly those linked to calcium, fat, and calories.

Though the full-fat product is an ancient one among nomadic people who make yogurt, the name was coined by the authors to refer to its modern nonfat counterpart. Contains 275 recipes. Soy-related recipes include: Mushroom-tofu paprikash (p. 146). A blurb advising use of “genuine soy sauce” appears on pages where soy sauce is called for as an ingredient (p. 53, 85, 111, 146, 186). Address: P.O. Box 87, Woodstock, New York 12498. Phone: (845) 679-5573.

8216. Watanabe, Koichi. 2001. Re: History of La Soyarie Inc. and list of current products. Letter to William Shurtleff at Soyfoods Center, Nov. 7. 5 p. Typed, with signature on letterhead. [Eng; Fre]

• **Summary:** Each page, except the cover letter, has a color

heading and is written in two columns, the left one in French, the right one in English. “About us: La Soyarie produces many food products with soya: Tofu (firm, regular, silk), Tofu burger, Soy Nuts, Tofu Nuggets, Vegetarian Pate. We also distribute other products under the following brand names: Yves Veggie Cuisine, Fontaine Sante Foods Ltd., Nutrisoya, Noble Bean. Address, phone, and fax numbers.” Mme. Jeanne d’Arc d’Astous is chief administrator.

“Company history: From very modest beginnings, La Soyarie produced its first Tofu in 1978, right in our founder’s [Koichi Watanabe’s] home kitchen. This product was supplied only to small local health food stores and friends.

“In 1979, we moved into our first real production facility at 25 St. Etienne St., Hull (Quebec). During this period, our production consisted of only 7 batches of tofu a week. Our company had 20 customers, and produced bulk tofu blocks for total sales of \$1600 a week.

“La Soyarie was incorporated on the 31st of March, 1982.

“In 1983, La Soyarie Inc. launched new product lines derived from traditional Japanese recipes, and made with tofu: the burgers and nuggets.

“On October, 1st, 1989, the business and offices moved to a brand new location, with 6000 square feet, at 94 Adrien-Robert St. in Hull. From then, the company began to prosper and grow rapidly. We now own the building and use all of its space that is 12000 square feet.

“Today, La Soyarie contracts 13 distributors that serve the regions of Montreal, Quebec and Toronto. We sell to some supermarkets chains and we supply ‘Fontaine Sante Foods Ltd’, on a weekly basis, for them to make their tofu based products.

“We serve more than 70 other businesses in the Ottawa region: Supermarkets, natural food stores, and some restaurants.

“We use more than 400,000 kg of organically grown Canadian soya beans per year.

“We currently employ 24 persons.

“The name for our company, ‘La Soyarie’ was selected from the entries in a ‘name the business’ contest. The winner received a year’s supply of tofu.

“The logo represents a soya leaf.”

A 1-page list of products shows that the company makes the following: Tofu—Regular water pack, 500 gm. Tofu—Regular vacuum pack, 454 gm. Tofu—Herb vacuum pack, 454 gm. Tofu—Vegetable vacuum pack, 454 gm. Tofu—Silk water pack, 500 gm. Tofu burger fried 300 gm. Miso burger fried 300 gm. Teriyaki burger fried 300 gm. Ganmo burger fried 300 gm. Tofu burger baked 280 gm. Miso burger baked 280 gm. Teriyaki burger baked 280 gm. Ganmo burger baked 280 gm. Imperial burger 150 gm. Oriental burger 150 gm. Nut burger 300 gm (no soya). Pinto burger 300 gm (no soya). Regular tofu nuggets 150 gm. BBQ tofu nuggets 150 gm. Soynuts 250 gm (regular, BBQ, plain, no salt). Tofu cutlets

(150 gm, or 300 gm). Vege pate 220 gm (yeast free, no soya). Address: President & plant manager, 94 Adrien-Robert St., Hull, Quebec, Canada J8Y 3S2. Phone: (819) 777-6716.

8217. Wilkinson, Endymion. 2001. Chinese culinary history. *China Review International (Hawaii)* 8(2):285-302. Fall. [49 ref]

• **Summary:** This article consists of reviews of three books. The first book (p. 285-91) is: H.T. Huang (Huang Hsing-Tsung). *Fermentations and Food Science*. Part 5 of *Biology and Biological Technology*, volume 6 of *Science and Civilization in China*, edited by Joseph Needham. Cambridge: Cambridge University Press, 2000. xxviii, 741 pp. Hardcover. £90. ISBN 521-65270-0. This is an excellent, positive review by a man who is deeply knowledgeable and interested in both Chinese history and Chinese food history. He was European Union Ambassador to China from 1994 to 2001 and author of one of the best books on Chinese history. He begins by noting that this book “goes to the very heart of what makes Chinese food Chinese by tracing the historical development of the chemical basis of the fermentations used in Chinese food processing. Dr. Huang is deeply qualified to write such a study...” He discusses each chapter in order. Concerning chapter (d) on soybean processing and fermentation, he observes: “From the Han to the Tang soybeans were normally cooked into granules (*doufan*) or congees (*douzhou*) and eaten as a staple (*zhushi*). By the Tang, wheat was replacing soybeans, which were increasingly used as a supplemental food (*fushi*).” Because soybeans had an unpleasant beany flavor and required a long time to cook by boiling, the Chinese experimented with other ways of processing them. Sprouting beans (*dadou huangjuan*) had been used as a medicine since at least the Han; soybean sprouts emerged as a foodstuff in the Song. “A form of soybean curd (*doufu* in Chinese, pronounced *tofu* in Japanese) may have been discovered in the Han but it only became a popular foodstuff in the Song (at which time it was imported to Japan by Buddhist monks, who at first called it Chinese curd, *Tôfu*).” Note: The first character, when pronounced *Tô* in Japanese means “China,” but when pronounced Tang refers to that Chinese dynasty (618-907) shortly before the Song (960-1279).

“By the Former Han, salted or semi-fermented black beans (*shi*; modern pronunciation, *chi*, *douchi*) were produced by stopping the fermentation process halfway...” Huang believes that soy sauce made from jiang began to emerge during the Han dynasty but did not acquire its modern name of *jiangyou* (soy sauce) until the Song “(it is only from the Qing [1644-1912] that it became the main condiment and seasoning in Chinese cooking).”

Wilkinson is critical of the series editor for the continued use of Needham’s obsolete system of romanization.

The second work is: Xu Hairong, editor in chief. *Zhongguo yinshi shi* (The history of Chinese food and drink).

6 volumes. Beijing: Huaxia Chubanshe, 1999, 4,067 pp. Hardcover. ISBN: 7-5080-1958-X. Since the 1980s, much excellent research has been done on Chinese culinary history, and this 6-volume Chinese-language work sums up much of this scholarship. More than 4,000 pages long (with plenty of illustrations), it is by far the largest history of Chinese food and drink available. Most of the authors are professional historians and several have already made important contributions in this field. A brief analysis of each volume is given. Unfortunately, the absence of an index makes this large work difficult to use as a reference. It is followed by an overview of other valuable works (mostly in Chinese) in the field.

The third book is *The Cambridge World History of Food*, 2 vols. (2000). Wilkinson is sharply critical of this work, both because so little material on Chinese culinary history is presented, and because that material contains so many errors and inconsistencies—examples of which he presents one by one for 4 pages! Address: Harvard Univ. [Cambridge, Massachusetts].

8218. Weed, Susan S. 2001. New menopausal years: The wise woman way. Woodstock, New York: Ash Tree Publishing. xxiii + 280 p. Dec. Illust. Index. 22 cm. [102* ref]

• **Summary:** Soy is discussed throughout this book but sources are rarely cited. When they are cited, we insert them below. For heavy bleeding (flooding) during the menopausal years: To nourish and tonify, avoid tofu, soy drinks, and soy protein powders (p. 9-10). For uterine fibroids: Consume lignans, which are anti-estrogenic phytoestrogens, found in all whole grains and beans—including soy (p. 15). Building better bones: Exercise regularly, eat calcium-rich foods, and avoid calcium-leaching foods such as soy “milk,” tofu, coffee, alcohol, and white flour products (p. 24). Calcium: Caution—“Unfermented soy (e.g. tofu) is especially detrimental to bone health being protein-rich, naturally deficient in calcium, and a calcium antagonist to boot (p. 28). Beware of calcium antagonists, foods that interfere with calcium utilization. Avoid consistent use of unfermented soy products, including tofu, soy beverages, and soy burgers (p. 29; see p. 163).

Phytosterolic, phytoestrogenic foods: Whole grains and beans are good sources. “Caution: Beans must be cooked or fermented to remove anti-nutritional substances. Tofu and soy ‘milk’ are not recommended” (p. 70).

Red clover has ten times more phytoestrogens than soy, as well as much more bone-building minerals, such as calcium and magnesium (p. 71). Sea vegetables are second only to flax in concentration of lignans. Seaweeds, not soy, are the real secret of health in the Japanese diet (p. 72). “The phytoestrogens in *dong quai*, like those in soy, promote the growth of cancer cells in petri dishes” (p. 73). Phytoestrogenic herbs: Fermented soy products (miso,

tamari, tempeh), ground flax seeds, whole grains, etc. are rich in hormonal precursors and phytoestrogens. Use daily to ease menopausal symptoms, prevent cancer, and lower heart disease risk (p. 94). Lack of vitamin B-12 doubles the risk of severe depression for older women; tofu and soy beverages interfere with its absorption (Fallon 1999) (p. 114).

Preventing breast cancer: 75% of all breast cancers occur in women over age 50. Reduce use of seed oils, such as soy oil. For each 5 gm of polyunsaturated fat (from vegetable oils), risk of breast cancer rose by 70% (Wolk 1997 [sic, 1998]) (p. 145). Eat more beans: "There is a relationship between the large amount of *fermented* soy products (miso and tamari) in the Japanese diet and low incidence of breast cancer. But no relationship has ever been shown between the consumption of processed, fake, imitation soy foods, and breast cancer reduction. Soy beverage is used moderately, or not at all, depending on the specific Asian country" (p. 146).

Herbal allies: Red clover is everything you thought soy would be with none of soy's drawbacks. It contributes to bone health, normalizes the thyroid, and prevents and counters breast cancer. "So do miso and tamari, but not other soy foods. Red clover contains more active phytoestrogens in greater quantity than soy... Red clover contains all four of the major estrogenic isoflavones; soy has only two of them. A cup of red clover infusion (not tea) contains ten times more phytoestrogens than a cup of soy beverage, is richer in calcium, has less calories, and contains no added sugars" (p. 161).

The section titled "Soy" (p. 163-64) praises fermented soy foods (miso, tamari, tempeh, natto) but is quite critical of tofu, soy milk, and "fake soy foods" (burgers, hot dogs, soy cheese, etc.). Soy can reduce hot flashes and prevent heart disease; fermented soy foods can protect against breast cancer. Soy is not a good source of calcium and it is deficient in fats needed for healthy brain/memory functioning. "Soy protein isolate, textured vegetable protein, isolated isoflavones—processed soy foods come in more forms than I can list. I eat miso and tamari freely, tofu and tempeh occasionally, and other soy products not at all. Dosage: 50-200 grams of isoflavones per day, preferably from food. Caution: Excess soy can cause liver damage and is said to feminize men. Soy may be difficult to digest, may cause allergic reactions."

Interstitial cystitis: Tofu may cause problems (Ford 1999).

Heart healthy: Soy, whole grains, vitamin E (from foods), essential fatty acids, and seaweeds are helpful (p. 210).

Osteoporosis risk factors: Being a vegetarian or vegan who eats a lot of tofu or soy beverage (p. 218). "Eliminate soy products except tamari and miso. (Unfermented soy prevents you from utilizing calcium.)" (p. 220).

Aching joints: A tofu poultice may help (p. 229).

Vitamins and minerals for the menopausal years:

Vitamin B-12, calcium, and iron are depleted by unfermented soy products (p. 248, 250-51).

Note: The author does not cite a single scientific publication to support her many criticisms of soyfoods. In fact, the scientific literature does not support her criticisms. It is well known that the author is an admirer of Sally Fallon. Address: P.O. Box 64, Woodstock, New York 12498-0064.

8219. Kiuchi, Kan. 2001. Miso and natto. *Food Culture (Kikkoman Inst. for International Food Culture, Noda, Japan)* No. 3. p. 7-10. <http://kiife.kikkoman.co.jp>. [6 ref. Eng]

• **Summary:** This article makes several statements that, to us, seem very surprising: (1) "Both *miso* (soybean paste) and *natto* (fermented soybeans) are said to have originated in China, but once introduced into Japan they inspired the development of a variety of unique local soybean based products" (p. 7).

Note 1. We believe that *itohiki-natto*, whose main fermentation organism is *Bacillus subtilis* and which is unsalted, originated in Japan, and that *douchi* (fermented black soybeans), whose main fermentation organism is a mold and which is salted, originated in China, long before *itohiki-natto* is thought to have originated in Japan.

(2) "Whole soybeans are used to make *natto*, and because only a single variety of *natto* mold is used in the fermentation process, the beans retain the original shape" (p. 7).

Note 2. Natto (i.e., *itohiki-natto*) is not made with a mold; it is made with a bacterium.

(3) *Natto* is thought to have originated in China's Yunnan province, although legend has it that *itohiki-natto* (hereinafter simply called "natto") was invented by accident in Japan's Tohoku region in the eleventh century when boiled beans that were going bad were eaten and found to be rather tasty.

"The two main varieties of *natto* are *itohiki-natto* and *shiokara-natto*, which is also known as *tera-natto* and includes *daitokuji-natto* from Kyoto and *hama-natto* from Hamamatsu. A bean koji is made using koji mold" (p. 9).

Note 3. We believe that the statement "*Natto* is thought to have originated in China's Yunnan province,..." is very confusing, and that confusion is based on the fact that in Japanese, two completely different and unrelated fermented soyfoods are both referred to as "natto." We would say instead: Natto (i.e., *itohiki-natto*) originated in Japan and *douchi* (called *shiokara-natto in Japan*) originated in China. Address: Ph.D., Prof., Dep. of Food Science and Nutrition, Kyoritsu Women's Univ., Japan.

8220. Lee, Cherl-Ho. 2001. Fermentation technology in Korea. Seoul, Korea: Korea University Press. iii + 330 p. 26 cm. [Eng]*

• **Summary:** Korea has a long history of eating fermented

soyfoods. Early documents indicate that the cultivation of soybeans originated in Manchuria, which was part of Korea in ancient times.

Contents: 1. Evolution of Korean Dietary Culture. 2. Primitive Pottery Age (B.C. 8000 to about 3000)—the era of fermentation experiments. 3. History of Cereal Fermentation Technology. 4. Korea, the land of soybean fermentation. 5. Effect of soybean fermentation on the protein quality. 6. Kimchi, Korean fermented vegetable food. 7. Fish fermentation technology. 8. Lactic acid fermented foods and their benefit in Asia. 9. Present status and prospect of Korean fermentation industry. Appendix: Collection of research paper abstracts in Korea—I. Alcoholic fermentation. II. Soybean fermentation. III. Kimchi fermentation. IV. Fish Fermentation. V. Other fermentations. Authors index. Address: Graduate School of Biotechnology, CAFST, Korea Univ., Seoul, 136-701, Korea.

8221. **Product Name:** San-J Tamari Sesame Dressing, Tamari Peanut Dressing.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 804-226-8333.

Date of Introduction: 2001.

Ingredients: Tamari Sesame: Water, tamari soy sauce (water, soybeans, salt, alcohol), rice vinegar, organic sugar, onion juice (onion juice, salt, natural flavors), sesame oil, ground sesame, arrowroot, whole sesame, white pepper. This product is made in a plant inspected by the Gluten-Free Certification Organization (www.gfco.org).

Wt/Vol., Packaging, Price: 8 fl. oz. (237 ml) glass bottle.

How Stored: Refrigerate after opening.

New Product–Documentation: Digital color image of front and back labels for both dressings sent by Misako Binford of San-J. 2012. May 11. In an attached e-mail she says that these products were first sold in 2001 in a “milk jug type” bottle (which looked like it was designed for sauces) rather than the present “banjo-type” bottle. However the copyright on the back of each label is 2009—indicating that the label design was updated.

8222. Tamang, Jyoti Prakash. 2001. Kinema. *Food Culture (Kikkoman Inst. for International Food Culture, Noda, Japan)* No. 3. p. 11-14. <http://kiifc.kikkoman.co.jp>. [7 ref. Eng]

• **Summary:** Contents: Introduction. Hypothesis of the origin of kinema. Methods of preparation. Kinema dishes. Socio-economic factors. Microbiology and nutritive value of kinema. Transition in food culture.

“The common word kinema is derived from ‘kinambaa’ of the Limboo dialect (Limboo, being one of the major ethnic communities of Nepal), ‘ki’ means fermented and ‘nambaa’ means flavor. The kingdom of ‘Limbuwan’ (presently the eastern Nepal districts of Therathum,

Taplejung, Panchthar, Dhankuta, and Ilam) was established by the Limboo earlier than the seventh century and remained independent till the unification of Nepal in the seventeenth century. Though there is no historical document on the origin of kinema, it is certain that among the Nepal, the Limboo started production and consumption of this unique fermented flavorful soybean food.”

A flow chart shows the traditional method of kinema production practiced in Sikkim—starting with 100 gm dry soybeans. Clean and wash. Soak in water overnight. Drain excess water. Add clean water. Boil. Drain excess water. Crack lightly in a wooden mortar with a wooden pestle. Sprinkle with wood ash (up to 1% by weight). Wrap in fern leaves and keep in a bamboo basket, covered. Allow to ferment at 25-45°C for 2-3 days. Result: About 230 gm kinema.

Photos show: (1) A plate of kinema. (2) A woman pounding cooked soybeans with a heavy, 4 foot long pestle in a large wooden mortar (14 inches wide by 18 inches high). (3) The woman adding firewood ash to the pounded soybeans in the mortar. (4) The cooked soybean grits are placed in the leaves of a local fern (*Glaphylopteropsis erubescens*) prior to wrapping and fermentation. (5) Wrapped in fern leaves, the grits are kept in a bamboo basket, covered with a jute bag. (6) Kinema curry served in a side dish next to a plate of the ingredients.

(7) Jyoti Prakash Tamang, Ph.D., born in Darjeeling, India, in 1961.

The most common recipe for kinema curry is given. Heat vegetable oil in a frying pan and add 1 chopped onion and fry until it becomes tender. Add 1 sliced tomato and ¼ tablespoon turmeric powder; fry for two minutes. Add 250 gm fresh kinema, 1 teaspoon salt, and 3 sliced green chilies; fry for three to five minutes. Pour in a little water to make a thick curry, and cook for 5-7 minutes more. Kinema curry is now ready for serving with boiled rice.

A map shows kinema diversity in the Eastern Himalayan regions. It is called “kinema in eastern Nepal, the Darjeeling hills, Sikkim and Bhutan, aakhuni in Nagaland, hawaijar in Manipur, turangbai in Meghalaya, and bekanthu in Mizoram... These fermented soybean foods are similar to the natto of Japan, chungkok-jang of Korea, thua-nao of northern Thailand and pe-poke of Myanmar.”

Note 1. This is the earliest document seen (Jan. 2012) that mentions “aakkhuni,” a close relative of Nepalese kinema and Japanese natto.

Note 2. This is the earliest document seen (Jan. 2012) that mentions “bekanthu,” a close relative of Nepalese kinema and Japanese natto.

Note 3. This is the earliest document seen (Jan. 2012) that mentions “turangbai,” a close relative of Nepalese kinema and Japanese natto from Meghalaya.

Note 4. This is the earliest document seen (Jan. 2012) that uses the alternative spelling “pe-poke” to refer to pepok,

a close relative of Nepalese kinema and Japanese natto from Myanmar.

Note 5. This is the earliest English-language document seen (Jan. 2012) that uses the alternative spelling “chungkok-jang” to refer to Korean natto. Address: Ph.D., Professor, Sikkim Government College / Director, Darjeeling Centre for Traditional Food Research.

8223. Bittman, Mark. 2001. *The minimalist cooks dinner: More than 100 recipes for fast weeknight meals and casual entertaining*. New York, NY: Broadway Books. 211 p. Plus 12 unnumbered pages of color plates. Index. 24 cm.

• **Summary:** This book collects two years of recipes from Bittman’s popular *New York Times* column “The Minimalist,” which cleverly caters to the modern gourmet whose expectations are high but whose time is limited. Includes a recipe for miso soup.

Soy-related recipes: Nearly instant miso soup with tofu (p. 4-5). Curried tofu with soy sauce (with “1 block tofu (about 1 pound) cut into 3/4-inch cubes, p. 18-19). Fish simmered in spicy soy sauce (with “1/3 to 1/2 cup good soy sauce,” p. 102-03). Roast salmon with spicy soy oil (p. 106-07). Salmon with soy and black beans (with “1 tablespoon preserved (Chinese) black beans,” p. 107). Soy poached chicken (p. 140-41). Horseradish (or wasabi) and ginger butter with soy [sauce] (p. 157). Pork cutlet with miso-red wine sauce (with “2 tablespoons red miso,” p. 178-79). Green salad with soy vinaigrette (p. 197). Rice salad with peas and soy [sauce] (“Substitute shelled *edamame* {fresh or frozen soybeans} for the peas if you like, p. 200).

Note the interesting use / revival of the word “soy” to refer to soy sauce Address: New York Times food writer.

8224. Davis, Brenda; Grogan, Bryanna Clark; Stepaniak, Joanne. 2001. *Dairy-free & delicious*. Summertown, Tennessee: The Book Publishing Co. 160 p. Index. 21 x 18 cm.

• **Summary:** Contains over 100 creative vegan recipes for managing milk allergy and lactose intolerance. Nutritional information by Brenda Davis, R.D. Recipes by Grogan and Stepaniak. Contents: Introduction. 1. Lactose intolerance. 2. Milk allergy. 3. Building strong, milk-free bodies. 4. Superb substitutes. 5. Dairy-free dining: Travel tips. Natural foods for dairy-free cooking [glossary]: Agar, arrowroot, brown rice syrup, liquid smoke, mirin, miso, nutritional yeast, seitan, soy flour, soy protein isolate powder, soy sauce (tamari), tahini, tempeh, tofu. Dairy-free & delicious recipes: Homemade dairy-free spreads, uncheeses, and milk. Sauces. Breakfast. Salads and dressings. Soups. Main dishes. Desserts.

With this book, you can make any “dairy product” you can imagine without using dairy. The most widely used ingredients are: Tofu (used in more than 70 recipes!). Soy milk, rice milk, and other dairy-free milks. Nutritional

yeast.

8225. Geiskopf-Hadler, Susan; Toomay, Mindy. 2001. *The complete vegan cookbook: Over 200 tantalizing recipes plus plenty of kitchen wisdom for beginners and experienced cooks*. Rocklin, California: Prima Publishing. xvi + 318 p. Illust. Index. 22 cm.

• **Summary:** Contains more than 200 vegan recipes, including many recipes for miso (3 recipes), soy cheese (9), tempeh (7), tofu (regular, 22), tofu (silken, 6), and soy yogurt (2). The “Glossary of special ingredients” contains definitions of miso, soy mayonnaise, soy milk, tempeh, and tofu. For nutritional information about soy foods, see p. 20-21. Tamari soy sauce is frequently used as a seasoning.

Contents: Acknowledgements. Introduction. 1. Cooking fundamentals. 2. Stocking the vegan pantry. 3. Menus for entertaining and everyday meals. 4. Appetizers. 5. Salads. 6. Soups and stews. 7. Vegetable side dishes. 8. Pasta dishes. 9. Grain and bean dishes. 10. Sautés and stir fries. 11. Baked and grilled entrées. 12. Sandwiches and wraps. 13. Morning meals. 14. Deserts. 15. Frequently used ingredients. Appendix: Nutrition fundamentals. Glossary of Specialty ingredients. Address: Northern California.

8226. Hayter, Kurumi. 2001. *The soy for health cookbook: Recipes with style and taste*. Alexandria, Virginia: Time-Life Books. 144 p. Illust. (color). Index. 25 x 19 cm.

• **Summary:** This is a beautiful and strange book, designed and produced by Quintet Publishing Ltd. (London). Beautiful in that almost every other page is a stylish full-color photo of a recipe. Strange in that: (1) Tofu is probably the most common soy ingredient used, yet it does not even appear in the index. Nor does tempeh which is also called for. Yet miso is in the index. (2) A number of the soyfood terms are bizarre and unconventional—such as “beancurd pouches” [abura-age or deep-fried tofu pouches], “sticky beans (natto).” (3) On the inside front cover, the book’s title is given as “The Tofu for Health Cookbook.”

Contents: Introduction: Nutrition and health, lactose (dairy intolerance), prevention against heart disease, prevention against cancer, prevention of other disorders. How to use this book. Glossary of soyfoods and other ingredients. Basic recipes. 1. Soups and stews. 2. Salads and appetizers. 3. Main dishes. 4. Snacks and side dishes. 5. Desserts.

This book is not vegetarian; some recipes call for beef, pork, chicken, fish, etc.—but none call for dairy products.

8227. Hepinstall, Hi So Shin. 2001. *Growing up in a Korean kitchen: A cookbook*. Berkeley, California: Ten Speed Press. 254 p. Illust. Index. 26 cm.

• **Summary:** The best book seen to date for information and recipes on soyfoods in Korea. The author grew up in Cheongju, South Korea, in her ancestral home.

Families made sauces in earthenware crocks (p. 7). A list of ingredients with descriptions includes: Bean curd (Tubu [tofu]). Beans, dried (K'ong, incl. yellow and black soybeans, mung beans and red [azuki] beans). Koch'ujang (Korean hot red pepper paste [with soybeans]). Kudzu (Ch'ik). Meju (Korean fermented soybean paste block [soybean koji]). Piji (Bean curd dregs [okara]). Red bean paste (P'at komul). Soy sauce (Kanjang). Soybean powder (K'ong karu; a yellow powder sold in 1-lb plastic bags). Soybean sprouts (K'ong namul). Toenjang (Korean fermented soybean paste).

Essential sauces and pastes: Recipe for: "Homemade soy sauce and fermented soybean paste: Kanjang and toenjang." It makes 10 gallons and takes about 2 months to prepare. Unusual ingredients include: 3 pieces oak wood charcoal, 1 gallon white grain syrup (choch'ung), 10 toasted jujubes, and 5 dried hot red peppers. For about 60 days, let the crock stand in the open without a lid; cover when it rains. At the end of 60 days the mash is filtered through a bamboo basket lined with a fine-mesh cloth into a crock to yield two products: The fermented soybean paste (toenjang) remains in the strainer, whereas the soy sauce filters through into the crock. Store the paste in a sterilized crock; sprinkle a thin layer of coarse salt on top. "Pour the soy sauce liquid into a caldron, bring to a boil, and allow to simmer over low heat until it is reduced to one-third of its original volume." Adjust saltiness. The paste and the sauce or now ready to be aged, but we are not told for how long.

Soy sauce at this stage (unaged) is called *ch'ongjang* (clear soy sauce) or *Choson kanjang* (Korean soy sauce). A plain and somewhat salty brown sauce, it is used mostly in base seasonings and clear soups. To make *chin kanjang*, a superior thin, syrupy, jet-black soy sauce, similar to the dark soy sauce sold in today's markets, submerge a large-mesh cloth pouch containing black soybeans, p'yogo mushrooms, and strips of kelp (*Miyok*) in the clear, unaged soy sauce and simmer over low heat for about an hour. The longer it is aged, the mellower it becomes, and the more intense the flavor.

Homemade hot red pepper paste (*Koch'ujang*, with 1 cup fine meju powder and ½ cup soy sauce). Instant fermented soybean paste (*Makjang*; uses 5 cups powdered meju and takes 10 days to mature). Vinegar soy sauce (*Ch'o kanjang*). T'ang soybean paste (*T'anggukjang*; "the best tasting soybean paste among all toenjang). Fermented soybean paste with garlic and bean curd (*Ssamjang*; "Probably the tastiest soybean paste made in the Korean kitchen," p. 32).

Main dishes: Five grain rice (*Ogkpap* or *Chapgokbap*, with ½ cup dried black soybeans, p. 41. Koreans traditionally eat this dish on the 15th day of the 1st month of the lunar year). Soybean sprouts with steamed rice (*K'ongnamulbap*, p. 44). Ceremonial soup (*T'ang*, with medium firm tofu, p. 62). Seaweed soup (*Miyokguk*, with tofu, p. 65). Kimchi

soup (*Kimchiguk*, with tofu and soybean sprouts, p. 67). Soybean porridge (*K'ongjuk*, with 1 cup soybean powder, p. 78). Noodles in chilled soybean milk (*K'ong kusu*, with 1 quart soy milk, p. 86). Stuffed dumplings (*Mandu*, with medium-firm tofu, p. 90-91). Soy sauce kimchi (*Chang kimchi*, p. 103).

Side dishes: Seasoned soybean sprouts (*K'ong namul*, p. 122, incl. Chilled soybean sprouts, and Soybean sprout soup). Sauteed cabbage kimchi with beancurd and pork (p. 130). Bean curd and vegetable stew with fermented soybean paste (*Tubu toenjang tchigae*, p. 138). Bean curd and vegetable hot pot (p. 152). Soybean pancakes (p. 163). Stuffed pan-fried bean curd (p. 167). Stuffed pan-fried p'yogo mushrooms (with bean curd, p. 168). Stuffed pan-fried peppers (with bean curd, p. 169).

More tofu recipes are on pages 170, 171, 172, 196-97, 199, 200, 204-05, 217. Many recipes call for kelp, kim (laver, nori) or seaweed (see index). Address: Washington, DC.

8228. Hsiung, Deh-Ta. 2001. *The Chinese kitchen*. New York, NY: St. Martin's Press. 240 p. Foreword by Ken Hom. Illust. (color). 29 cm. [30 ref]

• **Summary:** This book focuses on ingredients and essential kitchen tools used in Chinese cooking. For each it gives all or most of the following: Name romanized in Mandarin Chinese and Chinese characters. A glossy color photo of the item. A basic description. Appearance and taste. Method of manufacture. Buying and storing. Culinary uses. 1-2 recipes. The many color photos are very useful, but the index is hard to use

Soy related: Black bean sauce recipe (p. 33). Soy (soy sauce; *jiang you*, p. 64-67; Recipes are Soy chicken and Soy duck. Mushroom soy sauce is a Cantonese specialty. Chili soy sauce is sold in small bottles).

Seasonings section: Oyster sauce (*haoyou*, p. 79. Soy sauce is a typical ingredient).

Salted black beans (*douchi*, p. 88-89. "They are very popular all over China, especially in rural households in the South." They are also the oldest recorded soy food in Chinese history, and the ancestor of soy sauce. Indeed the water in which salted black beans has been soaked is often used as a substitute for soy sauce by low-income people, to save money. To make douchi: Boil black soybeans until soft, then soak in water overnight. Steam them for 3 hours the next morning. Inoculate them with *Aspergillus oryzae* mold and ferment for 15-21 days. Then cover beans with a brine solution and alcohol, and allow to mature for at least six months. Then spread them out to dry in the sun. Steam them again until soft and spread in the sun to dry. Repeat the last step one more time. The product is, at last, ready to use).

Black bean sauce (*chizhiang*, p. 90-91. "I have a strong suspicion that commercial black bean sauce {liquidized, salted black beans seasoned with soy sauce, salt, sugar and

spice} is a Hong Kong invention concocted mainly for the convenience of Westerners. I cannot remember ever seeing it in China, nor can I find any mention of its existence in any Chinese publication, past or present.” “Commercial black bean sauce is less aromatic than the fresh paste one makes oneself... Some varieties also include added orange peel, ginger, chilies or garlic.” A number of different brands are available. The author uses this only for convenience. “One of the most popular variations is black bean and garlic sauce.” Recipes include: Steamed spareribs with black bean sauce).

Yellow bean sauce (*huang jiang*, p. 92-93. “Sometimes labeled brown bean sauce or ground bean sauce {*mochi jiang*}, this is the soybean paste made from crushed or ground, salted and fermented yellow soybeans, which are sweeter and less salty than black beans.” Spices and other seasonings can be added to this basic bean sauce giving many varieties. In different regions of China, seasonings and spices are added in different proportions. Hoi Sin sauce {p. 94} is one example. Guilin chili sauce {p. 95} and Peking Duck sauce {p. 93} are others. To make: Soak soybeans for 16 hours. Then steam until soft. Ferment beans for about 5 days, stirring and turning every other day. Blend into beans salt, sweet glutinous rice wine, and dark brown sugar. Fill a pottery jar with them—not too tightly, nor too loosely. Seal opening tightly then let jar stand for 2 days. Turn jar upside down in a cool, dry place and ferment beans for 3 more months. The beans are now ready to be used as is, or to be ground and blended with additional seasonings).

Hoi Sin Sauce (*haixian jiang* in Mandarin or *hoisin jiang* in Cantonese, p. 95. This very popular Cantonese specialty, also known as “barbecue sauce,” has become almost as popular as soy sauce in most households. To make: Season yellow soybeans with sugar, vinegar, salt, chili, garlic, sesame oil, and red coloring; thicken with flour and water. The author believes that Hoi Sin sauce should not be used with Peking Duck).

Guilin Chili sauce (*Guilin lajiao jiang*, p. 95. Guilin is the capital of Guangxi, located just north of Guangdong {Canton}. To make: Mix fermented and salted beans with fresh red chilies. Then stir in the lesser ingredients: garlic, salt, sugar, and starch. The author’s favorite authentic brand, Mount Elephant, is sold in a rustic brown earthenware pot. Recipe: Chicken cubes with chili bean sauce).

Chu Hou bean paste (*chuhou jiang*, p. 96. To make: Use yellow soybeans, wheat flour, sugar, lard or vegetable oil, and sesame. Recipe: Chu Hou chicken).

Sweet bean paste (*dousha*, p. 97. Although there are red and black sweet bean pastes, they are both made from red beans [azuki beans]. “I discovered this unexpected fact only very recently, while researching this book.” To make basic red bean paste: Gently boil red [azuki] beans in water until soft. Grind to a pulp, then clean and strain them to get rid of the hull / skin; filter and press. To this basic unsweetened paste, mix in crushed rock sugar. For “sweet black bean

paste, add additional sugar with lard or vegetable oil, then heat while stirring until the color turns black. Essence of fragrant flowers, such as roses or sweet-scented osmanthus {*Osmanthus fragrans*; cassia} is usually blended with the black paste, which is shiny black. Sweet bean paste is widely used as a filling for steamed buns {*baozi*}, cakes and other desserts. “In China, sweet black bean paste is far more popular than the red variety, and as a child, I always preferred the sweeter taste of the former.” Recipe {served in most non-Cantonese restaurants}: Red bean paste pancakes).

Chili bean paste (*toban jiang*, p. 98. This is distinguished from other thick seasonings in that it is made from broad beans rather than soybeans. The most delicious product comes from Pixian County, in the Chengdu Plains near Chengdu—the capital of Sichuan province. Recipe: Home-style braised bean curd).

Fermented bean curd (*doufu nai*, literally “bean-curd milk,” p. 102-03. It has often been compared with a strong cheese and is definitely an acquired taste: “you either love it {as does almost everyone in China} or hate it {as does almost everyone else}. But everyone loves it when it is disguised as a seasoning. Also called *jiang doufu*. A legend of its origin states that two immortals told a street bean-curd seller how to make it, starting with molded bean curd. “Since the 15th century Fengdu fermented bean curd has held an excellent reputation.” Today the two leading brands are The Immortals and The Two Immortals. To make it: (1) Make bean curd [tofu]. (2) Lay cubes of bean curd on beds of rice straw for about 5 days in spring or 7 days in winter. (3) Dry the mouldy [moldy] bean curd in the sun, then marinate with salt, sorghum spirit and spices. Mature in brine in sealed earthenware urns for at least 6 months. The two basic types are red and white. The red type, which has the milder flavor of the two, has ground red rice added to it instead of spice. In China, it is most widely consumed for breakfast with rice congee. Recipes: Pork chops with red fermented bean curd. Sichuan-style fried green beans).

Vegetables section: Soybean sprouts (*Huang douya*, *Glycine hispida*, p. 150-51. Soybean sprouts are much more widely used in China than mung bean sprouts. For how to grow at home, see p. 148. Soybean sprouts are almost twice as large as mung bean sprouts both in length and diameter. Soybean sprouts are the main ingredient in Vegetarian stock {p. 71}. Neither soybeans nor their should ever be eaten raw. Recipes: Soybean sprouts salad {with parboiled soybeans}. Assorted vegetable soup).

Under Lotus root (p. 144) is a recipe for Braised pork with lotus root that calls for “dried bean curd sticks.”

Under Ginkgo nut (p. 167) is a recipe for Vegetarian casserole (A slightly simplified version of Buddha’s Delight, p. 193) that calls for “3 8 inch long pieces (1 oz.) dried bean curd sticks, soaked.”

Note 1. This is the earliest English-language document seen (June 2011) that uses the term “dried bean curd skin

sticks” to refer to dried yuba sticks. The recipe intends to call for “Three 8-inch long dried bean curd sticks.” Later, we are instructed to “Cut the bean curd sticks into short sections,...

Preserved and processed foods section: Pickles (*Jiang cai*, p. 185, are vegetables pickled in soy sauce-based hydrolysate).

Bean curd (tofu, doufu, p. 196-99. Bean curd was invented in China “and is regarded as the country’s national dish...” Proof exists that bean curd, made from soybeans, was sold in markets during the Tang dynasty {618-907}. Until the 17th century, bean curd was eaten exclusively by the poor until Kung Xi {1662-1722}, a Qing dynasty emperor, “discovered it while visiting Suzhou in Jiangsu province when he ventured out incognito to mingle with the people in the streets. When he returned to Peking, the Emperor ordered the chefs of the Palace kitchen to produce bean curd dishes. Overnight, humble bean curd became nobleman’s fare and is now popular worldwide.” It is off-white in color. Under “Medicinal uses: The nutritional benefits of bean curd cannot be exaggerated.” Free of cholesterol, it is ideal for combatting heart disease and high blood pressure. It is also extremely easy to digest, so it is very good for infants, the elderly and invalids. Recipe: Sichuan spicy bean curd {*Ma po doufu*}. Fish and bean curd casserole. Stir-fried shrimp with bean curd. Stuffed bean curd {Popular in Canton and with the Hakka people}).

Deep-fried bean curd (*youzha doufu*, p. 200. Sold in the form of small cubes, large squares, or triangles. Used in soups, stews, casseroles, braised dishes or stuffed triangles).

Pressed bean curd (*doufu-gan*, p. 201. After being pressed it is typically seasoned with soy sauce and a little five-spice, or star anise, or cinnamon).

Dried bean curd skins (*fuzhu, fupi*, p. 202-03. One kind is a thin flat sheet; the other is rolled into a stick. The sticks require much more soaking before use—several hours or overnight. Recipes: Bean curd skin and asparagus soup. Vegetarian bean curd skin roll).

Tofu (in recipes only): p. 75, 139, 189.

Non-soy: Gluten (p. 34). Cooking oils (p. 58; soy oil is not mentioned). Sesame seed oil (p. 60). Sesame paste (p. 61). Peanut (p. 164-65).

Note 2. This book was first published in Great Britain in 1999 by Kyle Cathie Limited. This is the first U.S. edition. Address: Author and chef, London.

8229. Hsiung, Deh-Ta; Simonds, Nina; Lowe, Jason. 2001. Food of China. Sydney, NSW, Australia: Murdoch Books. 296 p. Illust. (color). Index. 31 cm. *

• **Summary:** An excellent book with many fine color photos. One section titled “Soy” (p. 192-95) discusses: Introduction. Soy sauce. Tofu. Tofu products: Fermented tofu, mouldy tofu, tofu skin [yuba], etc. Northern-style tofu.

Fermented tofu is mentioned on pages 9, 164 (1 tablespoon red fermented tofu), 167, 193, Contains a

glossary of Chinese food and cooking (p. 288-89) which includes an entry for “fermented tofu,” which is sometimes called “preserved tofu or tofu cheese and is used as a condiment or flavoring.”

Photos show: Kung Wo Bean Curd factory in Hong Kong. A soy sauce factory and its canned “Premium Soy Sauce.”

8230. Huang, Guiyou. ed. 2001. Asian American autobiographers: A bio-bibliographical critical sourcebook. Westport, Connecticut: Greenwood Press. xiii + 446 p. See p. 281-85. Index. 24 cm. [200+* ref]

• **Summary:** Pages 281-85: Contains an excellent biography of Ilhan New (1895-1971), by Seiwoong Oh. New was one of the two founders of La Choy Food Products, Inc. Born in Korea on 15 Jan. 1895, New was the eldest son of a moderately successful entrepreneur who eventually settled in Pyongyang, the present capital of North Korea, where New grew up, as he describes in his autobiography *When I Was a Boy in Korea*. Most of his childhood memories are from Pyongyang. The intended audience for the book was American children.

In Pyongyang, New’s father started selling imported products and became interested in Western culture and religions; he was eventually baptized as a Christian. Inspired by what missionaries in Pyongyang told him about the West, New’s father decided to send his son, now age 9, to live in a Presbyterian household in Kearney, Nebraska, and to receive an American education. During this time his name was accidentally changed to “Ilhan” from “Ilhyung.” First in Kearney, then in Hastings, Nebraska, New attended high school, playing center on the football teams and debating on the debate team. In 1919 he graduated from the University of Michigan, with a B.A. degree, then worked for the Michigan Central Railway and General Electric in New York. In 1922, with a friend from the University of Michigan, Wally Smith, he co-founded La Choy Food Products, Inc. in Detroit. The business grew steadily. In 1925 New married Mary Woo, an American-born Chinese, whom he met at the University of Michigan and who later became a physician. In 1926 he and his new wife returned to Korea (which had been ruled and occupied by Japan since 1910), where (like his father) he opened an import company, first in dyeing materials then later in pharmaceutical products. While in Korea, he was asked by Lothrop, Lee and Shepard Publishing Co. to write a book about his childhood. He consented and in 1928 his book, *When I was a Boy in Korea*, was published in English. This book later came to be widely recognized as the earliest literary work in English by a Korean American. Yet it was not an autobiography, and contains “little information about the author’s life except bits and pieces to be gleaned from his passing remarks.”

Note: In 1930 New left La Choy Food Products, probably selling his share to his partner and friend, Wally

Smith.

In Korea, New's import business grew rapidly. But in 1936, during one of his trips abroad, he decided to stay in California to join the Korean movement for independence from Japan and to study for an M.B.A. [Master of Business Administration] degree from the University of Southern California.

After World War II, in 1946, New returned briefly to Korea, but came back to the USA to study law at Stanford University (in California) and reconsider his future plans. In 1953 he returned to Korea, where his pharmaceutical company had grown steadily in his absence. New resumed his position as chairman and worked to expand the business. By the 1970s his firm's net profit ranked among the top ten in Korea—a remarkable achievement. He had earned a reputation in Korea as a model entrepreneur, who supplied the people with products they strongly wanted and who returned his profits to the public, “as a pioneer in applying modern management science to his business, and as a philanthropist who, among others, founded and fully financed New Han Engineering High School, offering full scholarship for all students.

He died in 1971 at about age 76. In his will, he donated all his money to the Korea Social and Educational Trust Fund, except for \$10,000 to be given to his granddaughter for her college tuition. His museum, located in Seoul, houses his personal correspondence, personal possessions, and other historical records of his life.

The bibliography for this chapter (p. 285) cites 5 studies of Ilhan New and his book, from 1929 to 1999. Address: Oh: PhD, English Dep., Rider Univ., Lawrenceville, New Jersey.

8231. Ishige, Naomichi. 2001. The history and culture of Japanese food. London, New York, Bahrain: Kegan Paul. x + 273 p. Illust. Maps. No index. 24 cm. [59 ref. Eng]

• **Summary:** This book is crippled by the lack of an index. Moreover, the sources of most of the interesting material in the text are not cited. Otherwise it is very well researched and well written.

Contents: Introduction—The historical framework. Part I: The dietary history of Japan. 1. The prehistoric era: The Paleolithic age, the advent of earthenware, Jōmon society and dietary culture. 2. Establishment of a rice-growing society: A crop held in special regard, the dissemination and development of rice, rice cooking, sake brewing, fermented fish and flavourings. 3. The formative period of Japanese dietary culture: Historical setting, the taboo on meat eating, the lack of a dairy industry, annual observances and rites of passage, place settings and table settings, cooking and banquet styles, the roles of the monasteries, the popularization of noodles.

4. The age of change: Historical setting, the diffusion of tea, the impact of the ‘Southern Barbarians’ (*nanban*; first came the Portuguese and Spaniards, Catholics from Iberia,

then the Dutch and English, Protestants from northwest Europe called *kômōjin* {“redheads”} to distinguish them from the Iberians, Saint Francis Xavier, introduction of meat eating {beef} by Catholics by 1557 in the town of Oita in northwest Kyushu, expansion of meat eating by non-Christians in Nagasaki and Hirado island {northeast Kyushu}, in 1612 Christianity and meat eating are prohibited by the Tokugawa shogunate but the Chinese colony in Nagasaki is exempted, Dutch traders are the only Europeans allowed to remain in Japan after the country is closed but they are isolated on a tiny island in Nagasaki harbor and barred from contact with ordinary citizens, dishes with nanban influence include fried tofu patties {called *ganmodoki* in the east of Japan, or *hirōsu* or *hiryōzu* in the west}, tempura, nanban confectionary {such as *kasutera*} is especially popular, introduction of new crops by Europeans {incl. sweet potato, two types of pumpkin squash, cayenne pepper, kidney beans, peanuts}, formation of a new style (banquet-style meals {*honzen ryōri*}, *kaiseki*), change in the frequency of meals (from two to three). 5. The maturing of traditional Japanese cuisine: Historical setting town and country, the spread of soy sauce, the emergence of the restaurant, snack shops, books on cooking and restaurants, the Ainu, the Ryukyu Islanders. 6. Changes in the modern age: Historical setting, the resumption of meat eating, milk and dairy products, entry of foreign foods, zenith and nadir, new meal patterns, integration of foreign foods—a model.

Part II: The dietary culture of the Japanese. 7. At the table: Gohan—framework of the meal, the rise of the table, the tabletop as landscape, chopsticks and table manners, etiquette—as you like it. 8. In the kitchen: The secularization of fire and water, from wood fire to electric rice cooker, the knife—a sword in the kitchen, restaurants—the public kitchen. 9. On the menu: Soup and umami flavouring. Sashimi—Cuisine that isn't cooked, Sushi—from preserved food to fast food, sukiyaki and nabemono, tofu and nattō—meat for vegetarians, vegetarian temple food, tempura and oil, noodles and regional tastes, pickled and preserved seafood, mochi, confectionery and tea, the dynamics of sake and tea.

Teriyaki developed during the Edo / Tokugawa period (1600–1867) (p. 116; However no citation for the source of this information is given).

During the Edo period, most commoners living in Japan's cities ate plain and repetitive meals. In Edo (later Tokyo) most had a breakfast of rice, miso soup, and pickles; for lunch and dinner they ate approximately the same thing “with the addition of one dish of simmered vegetables or tofu, or simmered or grilled fish” (p. 113). Address: National Museum of Ethnology, Osaka, Japan.

8232. Ishige, Naomichi. 2001. The spread of soy sauce [and miso]. In: N. Ishige. 2001. The History and Culture of Japanese Food. London, New York, Bahrain: Kegan Paul. x + 273 p. See p. 113–17. [59 ref. Eng]

• **Summary:** Soy sauce and miso are both made by mixing soybeans and miso with a fermenting agent named koji (see Section 2.4, p. 32-35). Prototypes of these fermented soyfoods were probably developed in China during the Han dynasty (c. 200 BCE to CE 200). The earliest record of their use in Japan appears in the Taihō Code of 701. The fermented soyfoods mentioned in those laws are: (1) Miso. (2) *Kuki*, which was similar to today's Daitokuji Natto and Hamanatto, in which the beans retain their shape and solidity in the final product. (3) *Hishio*, "a semi-liquid paste or gruel fermented from a mixture of soybean, grains, and sake."

At least 90% of the miso consumed in Japanese households today is used in miso soup, which most people consume once a day. Miso soup is known to have existed as early as the 10th century, when it was mentioned in the *Engi Shiki*. However "during medieval times it was not part of the meals of the common people. This may have been because miso was considered a luxury and hence not made in quantities sufficient for daily cooking. Instead small amounts were typically consumed by eating a side dish of miso or of vegetables pickled with miso." Small amounts were also used as a flavoring. Regional varieties began to develop. In order to improve the appearance of food or to impart a lighter flavor, "miso and water (or a cooked mixture of miso and water) would be placed in a cloth bag and the liquid that trickled out would be collected. This refined miso solution was used in preparing elegant meals for the upper class, and later was replaced by soy sauce."

As noted above, the prototype of soy sauce was *hishio*, a semi-liquid flavoring, which was probably used in Japan as early as the 8th century (Fukuo 1979). Yet it "was probably too expensive to come into general use, for it is harder to make than miso and has a more refined flavour."

Soy sauce (shoyu) is mentioned in several 16th century documents. By the 2nd half of this century shoyu factories had been established in the Osaka-Kyoto (Kansai) area, "and some trading ships were used exclusively to distribute the product to other regions. It was as a factory-made product that soy sauce became popular, initially coming into use at daily meals among the townspeople whose lives depended upon the commodity economy." As Edo (today's Tokyo) grew into a major city, its residents consumed large quantities of soy sauce made in the Osaka-Kyoto (Kansai) area.

Then in the late 1600s, "soy sauce aimed at the Edo market began to be made locally, in the districts that are now called Chōshi and Noda in Chiba Prefecture." In contrast to the lighter-colored and saltier Kansai product (*usukuchi*), the plants around Edo / Tokyo used a larger proportion of wheat to make a rich, fragrant soy sauce called *koikuchi*. This suited the townspeople of Edo well and by the late 1700s, it had taken over the metropolitan market.

In the cities, by the 1700s, "soy sauce had become the principal seasoning for food and miso had come to be used

almost exclusively for soup. But in remote rural districts, miso remained in use as a seasoning for daily meals until the early 20th century, while soy sauce, purchased in small quantities from local factories, was eaten [consumed] only at festival meals or when serving special guests. Many farm families made their own miso until the 1950s, whereas those families that made only soy sauce were always a rarity.

"Nothing is wasted in making miso, because all of the ingredients are turned into the paste which is eaten. Making soy sauce not only involves more work but also leaves a substantial amount of inedible lees after the liquid is strained [and the lees pressed]. The lower rate of yield from the raw materials made soy sauce a luxury item which the peasantry could not easily produce at home, and so miso remained the everyday seasoning among the rural population. What soy sauce was used was factory made. Besides the local sake brewery, every area had a small soy sauce brewery until the early 20th century, when major firms with large factories and national distribution networks created an oligopoly market for soy sauce and it came into regular use even in poor rural households. Thus the main flavouring of Japanese cooking shifted from miso to soy sauce over a period of more than two centuries, as urban taste gradually diffused through the countryside."

"Direct use of salt is much less common in Japan than in the West, for much salt is ingested indirectly from soy sauce and miso. A 1980 survey by the Ministry of Health and Welfare determined that soy sauce and miso supplied 27% and 16% respectively of the average daily salt intake, while salt sprinkled on food in the kitchen or at the table accounted for only 13%. In addition to saltiness, of course, soy sauce and miso add other flavour and fragrance to food. Their tastiness results notably from their high content of glutamic acid (discussed in Chapter 2) and their complex flavour structures contain tart and sweet elements as well as alcohol."

"Soy sauce, being a liquid, is easier to use than miso." Its greater convenience and wider range of use are key factors in its growth in popularity, which was "also connected with a change in the style of eating raw fish" (*namasu* or *sashimi*). "Sashimi now means fish that has been sliced and arranged on a plate and served with a smaller plate of soy sauce,... With this style, skill at cutting and arranging the slices in a pleasing becomes a point of pride with the chef. Besides *sashimi*, such popular and internationally known dishes as sushi (*nigiri-zushi*), tempura and teriyaki, which all developed during the Edo period [1600-1867], are also meant to be eaten with soy sauce."

The "cooks of the Edo period were not very eager to develop new tastes. Their culinary ideal was... rather to present the natural taste of the food itself in as pure a way as possible." Soy sauce helped them fulfill this ideal. "Cooking which concentrates on avoiding creativity and complexity in taste, and which seeks to select the finest ingredients and

to slice and serve them with the most beautiful technique, is what developed among the chefs of the high-class restaurants during the Edo period.” Address: National Museum of Ethnology, Osaka, Japan.

• **Summary:** In the section on “Bottles” (p. 14-20) a black and white photo (p. 16) shows: “A pair of blue glass cruet bottles, with gift wine label cartouches, ‘Soy’ and ‘Kyan’ [perhaps derived from “kyanite,” a variant of cyanite, meaning “dark blue”—or from “cayenne” pepper], gilt faceted, cut ball stoppers, ca. 1790. 4 inches (10 cm) high. £600-660. Som.”

Note: For a “Key to illustrations” (including the letters “Som.”) see pages 305-07. For a Glossary, see p. 308-10. Address: England.

8234. Namkoong, Joan. 2001. Go home, cook rice: A guide to buying and cooking the fresh foods of Hawaii. Honolulu, Hawaii: Namkoong Pub. 104 p. Illust. (color photos by Rae Huo). Index. 28 cm. *

• **Summary:** “A collection of food stories that appeared in the *Honolulu Advertiser* from 1994 to 2001 and information about food products.” “Guide to buying and cooking the fresh foods of Hawai’i” (from the publisher).

The section titled “Soy” (p. 67-71) begins with brief definitions of tofu, fresh soybeans [edamame], soy sprouts, miso, natto, and “fermented black beans.” Then recipes: Basic miso sauce. Spicy soy beans (with “1 pound soybeans”). Soy bean sprouts (*kong na mul* in Korean). On page 69, more soyfoods are described: Aburage. Fermented bean curd. Fu jook [Dried yuba sticks]. Tempeh. Tofu. Then a recipe for Lemon grass tofu (Vietnamese). Page 71 discusses “Soy bean sauces” such as hoisin, bean sauce, and shoyu (made with koji). Page 72: “The flavors of soy sauces.” Chinese soy sauces (tend to be saltier than Japanese shoyu). Tamari. Kecap manis. Light or sodium reduced soy sauces. Dashi soys. How to use soy sauces. Address: Hawaii.

8235. Rodinson, Maxime; Arberry, A.J.; Perry, Charles. 2001. Medieval Arab cookery: Essays and translations. Totnes, Devon, England: Prospect Books. 527 p. Index of foreign words. General Index. 25 cm. [20+* ref]

• **Summary:** Contains Arberry’s translation of al-Baghdadi’s 13th century book, some important essays by Maxime Rodinson from the 1940s and 1950s, Perry’s translation of the 14th century book, which is an expanded edition of the 13th century book, and various other essays.

In the introduction to his translation of *The Description of Familiar Foods*, a book composed of two very similar

manuscripts (one dating from the 18th or late 17th century and the other from the year 1373—see concordance of recipes, p. 289), Charles Perry discusses two condiments (both now extinct) used as sauces for fish. The first, named *murri* was made—in a two-part fermentation—by inoculating loaves of raw barley dough with *Aspergillus* or *Penicillium* molds, wrapping them in fig leaves [the molds are on the leaves], covering and allowing them to “rot” for several weeks. The decomposed barley was then mixed with flour, salt and water and allowed to ferment further on one’s rooftop during late summer—typically for 40 days. Perry translates *murri* as “soy sauce;” even though soybeans were never used in making it, *murri* had the characteristic fragrance of soy sauce. “*Murri* probably developed from ancient Mediterranean brine sauces such as the Greek *garos* and the Roman *garum*, which consisted of the brine in which fish had been pickled... The Chinese were mould-culturing soybeans [to make *jiang*] centuries before there is evidence of *murri* in the Middle East, but there seems to reason to think *murri* was borrowed from China. Soy sauce has always been made from beans, often with a grain extender, but beans were never used in the Middle Eastern product. And *murri* was always a liquid sauce, but it was only in the sixteenth century (when *murri* was already extinct) that a liquid sauce started to be extracted from the fermented bean paste in China. *Murri* was always flavored with spices.”

In the section on relishes and condiments (p. 400) is a detailed description of how *murri* is made by people in Iraq. It is called *halmiyra* in Greek and *muria* in Latin. Ingredients include fermented barley, wheat flour, salt, fennel, and nigella. Stir twice a day for about 2 weeks. When it starts to bubble, leave it until it settles, then strain it. Add more water and repeat for the second extraction. After straining, if it is too salty, or to make it sweeter, some people add jujubes, or date molasses and honey. At the end, add saffron, cinnamon, and other good spices to make an excellent sauce.

Pages 400-01 describe how to make *al-Murri al-Naqi lil-Maghariba*—the infused sauce of the North Africans (as in Egypt) that resembles soy sauce. The ingredients used in the first part of the two-part fermentation are barley and water. In part two, add to the above: Equal weights of table salt, dry thyme, milled dry coriander, caraway, nigella, fenugreek, anise, and fennel. Put on the rooftop in a wide-mouthed vessel and add water “until its consistency becomes like flowing date molasses.” Then toss in one each of broken-up carob, fennel stalks, citron leaves, and the pith of bitter orange branches. Add 2-3 pine cones whose seeds have been removed. Stir with a stick of fig wood with branches. After 40 days in the sun, filter and store in a clay pot, “shielded with oil” (i.e. with a layer of oil on top of the sauce to serve as a seal). Then add chunks of partially baked bread, leave it in the sun for 10 more days, then strain again and put in glass vessels sealed with oil. This first extraction is the best. Save the dregs for use in other dishes.

A related product *Bunn* is described on pages 403-04. *Murri* (translated as “soy sauce”) also appears in recipes (for example) on pages 308, 310, 317-18, 328, and in five vegetarian recipes (p. 446-48).

Talk with Charles Perry. 2001. May 23. The earliest document he has seen that mentions *murri* is a book that was compiled in the 10th century composed mostly of 9th century recipe collections of the caliphs—the spiritual heads of Islam—and kings. So we know that *murri* was being made in the 9th century. Before that, we have no information. It seems to have developed independently in the Arab world. The word *murri* is Greek but the word for the rotted barley and the word for the mash from which the sauce was pressed are both Persian. So it might have developed in the Fertile Crescent (from the southeast Mediterranean to the Persian Gulf) when that area was under both Persian and Greek cultural influence—before the Moslem conquest in the 7th century. In the 15th century the Turks were conquering the area where *murri* had existed. That brought the end of the old Arab aristocracy and their culture. In 1453, Mehmed / Mehmet II (Mehmed the Conqueror) captured Constantinople from the Christians. Now all the wealth was flying to that city, where a new Ottoman culture was being developed. Mehmed made Constantinople one-half Turkish and one-half every other nationality he had conquered or expected to conquer. He was also a great patron of all the arts and of cookery.

In Arabic and Persian, the verb “to rot” refers to food molding processes, whereas “to ferment” refers only to the action of yeasts, as in breads or beers. Charles has made *murri* several times himself, following an ancient recipe, and using fig leaves as the source of the molds. The flavor and appearance of the finished product reminded him very much of soy sauce. Address: 1. French linguist, historian, and sociologist; 2. British arabist and linguist; 3. Los Angeles, California.

8236. Singleton, Paul; Sainsbury, Diana. 2001. Dictionary of microbiology and molecular biology. 3rd ed. Chichester, New York, Weinheim, Brisbane, Singapore & Toronto: John Wiley & Sons, Ltd. xi + 895 p. Illust. 25 cm.

• **Summary:** Contains entries for: fermentation, fermented foods, fermenter (fermentor), fungi, miso, natto, ogi, oncom, shoyu (see Soy sauce), soy paste (see Miso), soy sauce (shoyu), sufu, tempeh, tofu (an intermediate in Sufu production). Address: London.

8237. Huang, Hsing-Tsung. 2002. Takamine Jokichi and the transmission of ancient Chinese enzyme technology to the West. In: Alan K.L. Chan, Gregory K. Clancey and Hui-Chieh Loy, eds. 2002. Historical Perspectives on East Asian Science, Technology and Medicine. Singapore: World Scientific Publishing Co. See p. 525-32.

• **Summary:** “When we talk of technology transfer in the

last hundred years, we tend to think of the traffic as flowing entirely from West to East. Actually, even in the 20th century significant bits of Chinese or East Asian technology were also being transmitted to America and Europe. Of these the most influential and yet least appreciated is the use of microbial enzymes in food processing and related industries.”

Most of the enzymes used today are derived from 3 genera of moulds, namely *Aspergillus*, *Rhizopus* and *Mucor*. In the early 1950s Dr. Huang gained a working knowledge of the enzyme industry in the U.S. when he worked as a research chemist at the Enzyme Research Department of Rohm and Haas Co. (Philadelphia, Pennsylvania).

Table 1 shows microbial enzymes used in food processing in 2002, and Table 2 shows those used in food processing in 1951. Takamine Laboratories (Clifton, New Jersey) made and marketed Takadiastase, a digestive aid. Wallerstein & Co. (New York) produced the enzyme papain for chillproofing of beer. Rohm & Haas pioneered the application of pancreatic enzymes for the bating of hides. All 3 companies were founded at about the turn of the 19th to 20th centuries.

Jokichi Takamine’s innovation was based on koji (Chinese: *qu* [pronounced ch’ü]; the Japanese word is written with the ancient Chinese character), which has been used in Japan for centuries to make saké (and other alcoholic drinks), soy sauce, and miso (both soy condiments). “Modern microbiological studies show that the principal organisms in *qu* are grain molds of the genera *Aspergillus*, *Rhizopus*, and *Mucor*.

“The origin of *qu* is obscure. It was a known entity in the early Zhou (1000 B.C.), but it could have been in existence much earlier, perhaps even before the legendary Xia dynasty (2000 B.C.). According to the *Jiu Gao* (Wine Edict), c. 300 A.D., by Jiang Tong, *qu* was first obtained when steamed rice was inadvertently left in the open and became mouldy [endnote 3 gives the exact Chinese characters]. This view is supported by two pieces of evidence. First, rice was already cultivated extensively and pottery steamers were known around 6000 B.C. in the Hemudu culture near Hangzhou [W.-G. Hang-chou, or Hang-chow, capital of Zhejiang province in eastern China]. Second, this is precisely the way a rudimentary *qu* was prepared and used in making wine in the 1950s by the aborigines in Taiwan. Thus the earliest *qu* probably had rice as the growth substrate. Rice is still the principal substrate in South China today. But during the Zhou [1045-256 B.C.], as barley and wheat (which were considered inferior grains) grew in importance as cultivated crops in North China, they were adopted as the preferred substrates for making *qu*. Endnote 4. For further details on the origin of *qu*, see H.T. Huang’s book titled *Fermentations and Food Science in the Science and Civilization in China* series.

“The art of using *qu* or koji to make fermented drinks,

i.e. *sake*, was brought to Japan from South China, probably towards the end of the Han dynasty (Shinoda Osamu 1967, p. 551-74). Their employment in the making of fermented soy condiments, such as *Jiang*, arrived later during the Tang (618-907 A.D.), accompanied by the famous agricultural treatise *Qimin Yaoshu* (Important Arts of the People's Welfare) of 544 A.D. But the Japanese soon developed their own versions of soy condiments such as miso which is quite unlike the fermented *jiang* (soy paste) of China." Modern microbiology has shown that the principal mould in koji is *Aspergillus oryzae*.

"The technology of *qu* was also transmitted, presumably by Chinese immigrants in more recent centuries, to Indonesia. It is called *raggi* [*ragi*] by the natives or *peh-khak* ('white qu') by the Chinese settlers. In the 1890s Dutch scientists determined that the fungi in *raggi* were species of *Mucor* and *Rhizopus*. They tried to exploit the amylolytic activity of these fungi for converting grains to alcohol commercially in Seclan [Seclin], France, and Antwerp, Belgium, but their attempts were unsuccessful."

These early ventures might have remained forgotten were it not for the work Jokichi Takamine in the USA. There follows a summary of Takamine's life to 1890. In his travels in the U.S. Takamine learned how the brewers and distillers there "used malt to hydrolyze grains into sugar so they could be fermented into alcohol. He realized that Japanese *koji* was much more active than malt for the hydrolysis of grains. He studied the production of 'diastase' (amylolytic [starch splitting] enzymes) by the *koji* mold *Aspergillus oryzae* when he returned to Japan. The results convinced him that replacing malt with *koji* enzymes would be a great improvement in the manufacture of whiskey." In 1890, with the help of his wife's parents, Takamine made the fateful decision to move his family to the USA and to start the Takamine Ferment Company in Peoria, Illinois, to produce diastase for a local distillery company. The initial results were very promising.

"However, Takamine's apparent success presented an unwelcome threat to the malt producers in Peoria. They incited local xenophobia [fear and hatred of strangers or foreigners or of anything that is strange or foreign]. One night in 1894 the distillery in which his experiments were being conducted was burned down." Note 1. There is no evidence that he ever sold any of his purified enzymes in Peoria. [Three years later] "He moved his family to Chicago, where he continued to promote his diastase preparation. Fortunately, by this time, he had obtained a patent (U.S. 525,820) on the use of his diastase as a cure for dyspepsia." Parke, Davis & Co. (Michigan) agreed to make and market the product under the brand name Takadiastase. In 1897 he moved his family and research laboratory to New York City. Address: Goodwin House, 4800 Fillmore Ave., Alexandria, Virginia 22311.

8238. Kikkoman International Inc. 2002. Se habla soy sauce! (Ad). *Food Product Design* 11(10):77. Jan.

• **Summary:** A large color photo shows a tortilla wrapped around a mixture of meat and vegetables on a plate. On the tortilla is branded: "Kikkoman naturally brewed soy sauce." The text reads: "There's big news in flavor enhancement, amigo. From fajitas to fish sticks, manufacturers are discovering a surprising natural flavor enhancement solution: Kikkoman Soy Sauce. That's because Kikkoman's naturally occurring amino acids actually intensify the flavors of other ingredients. Naturally brewed and aged for full flavor, Kikkoman is available in every form for every function, from liquid to dry, reduced sodium to preservative free and even clear—the widest selection of any company in the world. So when you think soy sauce, don't just think Asian. Because no matter what cuisine you're working on, Kikkoman speaks your language. Naturally." Address: San Francisco, California. Phone: 415-956-7750.

8239. Tibbott, Seth. 2002. Update on Tofurky (Interview). *SoyaScan Notes*. Feb. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sales of Tofurky roasts grew nicely during the past year from 82,000 in 2000 to 105,000 in 2001—an increase of 28% during a recession year in the American economy. The product is sold in two forms: Tofurky Roast, and Tofurky Feast (the 26-ounce stuffed roast plus four Tempeh Drumettes, 14 oz. Tofurky "Giblet" Gravy, and Tofurky Jurky Wishstixs). In recent years, Tofurky has been made for Turtle Island in California. Now Seth is planning to move production in-house, which should enable him to reduce production costs dramatically. Address: Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: 541-386-7766 OF.

8240. Amy's Kitchen Inc. 2002. Amy's bowls: Life is just a bowl of... Amy's good food (Ad). *Natural Foods Merchandiser*. Feb. p. 55.

• **Summary:** The top two-thirds of the full-page color ad shows Amy's Teriyaki Bowl, with tofu and vegetables in a sauce on top of white rice. The bottom one-third shows the front panel of four new Amy's Bowls: Stuffed Pasta Shells, Santa Fe Enchilada, Brown Rice and Vegetables, and Teriyaki. All but the Stuffed Pasta Shells contain tofu as a major ingredient. Address: P.O. Box 449, Petaluma, California 94953. Phone: 707-578-7188.

8241. Vaidya, Achutananda. 2002. Re: Answers to questions on soyfoods in Nepal. Letter to William Shurtleff at Soyfoods Center, April 12. 3 p.

• **Summary:** On 19 Jan. 1993 William Shurtleff, founder of Soyfoods Center, wrote Mr. Vaidya a series of questions based Mr. Vaidya's last letter. Mr. Vaidya and his uncle seem to be the first people to make tofu in Nepal, so details of their

work are very interesting from an historical point of view.

“First, questions about the work of your uncle, Raghubir Baidya. (1) Did he ever sell any of his tofu? Even a few cakes? He Must have sold a few cakes if he tried for several months?” Answer: “First he made Tofu for his own consumption only.” He did not sell that tofu. At that time none of the Nepali people understood what tofu was, so he had no idea of selling it.

(2) “At what address did he make his tofu at his residence in Kathmandu?” Ans: The address of his residence in Kathmandu was Tripureswar, Kathmandu, Nepal. Now his family address has changed.

(3) “Did your uncle ever mention that tofu was made commercially (= for sale) in Tibet? Have you ever heard that it is?” Ans: “No I never heard my uncle mentioning that Tofu was made commercially in Tibet. He had no idea about it.” I heard he had only one Tibetan friend.

(4) “You said he started making tofu for ‘domestic consumption.’ Does that mean he made it, free of charge (of course) for members of his immediate family? How did they cook and serve it (what kind of recipes?). Did he also give it to members of his extended family such as brothers, nephews? Did you ever taste it? What did you think of it? How was it prepared when you tasted it?” Ans: Yes, at first when he started making Tofu he made it free of charge for members of his family. At first Tofu is fried in oil. And then it is used with vegetables as a delicious food,” like pickles etc. “Yes he gave it to his extended family members. Yes, I’ve tasted it. I think Tofu is an excellent food for helping to solve world food crisis because it is a high quality nutrition food and the cost is very low. I tested it; I thought it was like a vegetable.” I studied your book, *The Book of Tofu*.

(4a). “How often did you watch your uncle making tofu?” Ans: “Sometimes I watched him making tofu.”

(5) “Did he do a special demonstration just for you to teach you the process or did you just watch him while he was making tofu as usual?” Ans: “He never did a special demonstration to teach me but I learned by watching him as usual.”

“My uncle was not interested in Tofu because the Nepalese people were not interested because it was a new product for them.” The Nepalese concept of the soybean is that it is very cheap and used only by low-class people. “But I was very interested because it was of high quality nutrition and the cost was very low.

“At first no one knew that Tofu was soybean cakes. My uncle’s family also didn’t know it. They just called it using the Nepali words *Bhatamass Ko Paneer*.” But when my friend Mr. Akifumi Nakamura came to Nepal from Kobe, Japan, in 1972, he suggested to me that I call this product Tofu. “Mr. Nakamura was the one who saw my interest in Tofu and taught me to make tofu. He came to Nepal in 1972” to work with Japan Overseas Cooperation Volunteers (JOCV) for two years. He worked at the Central

Food Research Laboratory in Kathmandu. During this time he taught me to make Tofu during his after office hours. Then I learned how to make tofu. I started making tofu commercially in Dec. 1974, first at my own residence to keep my expenses low. I started by selling it to small shops and many other places. Then I developed recipes and sold it to even more people. And slowly the people of my country came to understand it as well. At times Mr. Nakamura would help me and we imported some machines from Japan. Then I started commercially.

“Now I want to ask about your company, Nepal Soya Industries. I think you were a pioneer in Nepal not only with tofu, but also with other soyfoods! (7) In what month and year did you start to SELL each of the following soyfoods commercially in Nepal. And approximately what percentage of your total sales does each account for now? Ans: (7a) Shree Akita Miso = Akadashi Miso. Started Oct. 1986. I made miso and sold it in Japanese hotels and restaurants. Even now no Nepalese people know about miso. It accounted for 15% of total sales. Now it is named Akita Miso.

(7b) Soya sauce. Started in March 1982. When I started to make soy sauce nobody knew what it was. Nowadays some people in the cities know about it. And also some local restaurants used soya sauce. It accounted for about 25% of total sales.

(7c) Dry Tofu. I tried making it but never sold it commercially because there was no interest.

(7d) Soya Milk. At first the Nepalese people had not heard of soya milk, but after a few years one International company started it. They named it Indreni Soyamilk. But after some years they stopped selling it. (7e) Soya Curd. I started making it in 1985. It is a part of Yogurt we used. It is sold commercially. But now lots of dairy companies make it commercially, so I stopped producing it. During the period 1985-1990 it accounted for about 10% of sales.

(7f) Vita Tofu. It started making it Dec. 1974. I stopped making it during 1983-1985 because at that time I went to Japan and could not manage my factory. My children could not do the work for me. From 1986 to 2000 we again made Vita Tofu, but last year our country had a crisis—the Royal Family accident. Nowadays Maoists are attacking most parts of our country. And now the Nepalese Government has issued an Emergency. Because of this, tourists have stopped visiting Nepal. My business fully depends on tourists. So last year I had to stop making tofu. It once accounted for 40%. “I am interested in working with soyfoods in any country. If you will arrange it I am always ready for it.”

(8) “Please circle each product for which you were the first person in Nepal to make that product commercially.” Ans: He is not sure, so he circles only Tofu in 1974.

(9) “Are you making all these products commercially now? Are you making any others? Is making soyfoods your main source of income now?” Ans: Nowadays I produce it

on a very small scale and this is my main source of income. But now I am retired from my job also [on 15 March 2001 at the Central Food Research Laboratory in Kathmandu and as a food inspector].

(13) “You said that in Japan you learned to make moyashi. Were these soybean sprouts or sprouts from other kinds of seeds?” Ans: They were not soybean sprouts but rather sprouts from some kind of black seeds.

Mr. Vaidya attaches his business card and a 2-page curriculum vitae with a portrait photo attached. He was born on 28 Dec. 1947. Address: Founder and owner, Nepal Soya Industries, 9/374 Bhedashing, Jamaguthi, Kathmandu, Nepal.

8242. Steinkraus, Keith H. 2002. Fermentations in world food processing. *Comprehensive Reviews in World Food Science and Food Safety* 1(1):23-32. April. [96 ref]

• **Summary:** The section titled “Alkaline fermentations” (p. 28) states that highly alkaline fermentations are generally safe. These include *dawadawa* in Nigeria, *soumbara* in the Ivory Coast, and *iru* in West Africa—each made by fermentation of the soaked and cooked seeds of the African locust bean tree (*Parkia biglobosa*). This is a bacterial fermentation; the bacteria belong to the genus *Bacillus*, typically *Bacillus subtilis*. No inoculum is used.

Soybeans can be substituted for the locust beans.

Protein-rich alkaline fermentations also include several based traditionally on soybeans; natto from Japan, thua-*nao* from northern Thailand, and kinema from Nepal and environs. In each food, the essential microorganism is *Bacillus subtilis* and related bacilli. The enzymes produced are highly proteolytic; the proteins in the substrate are hydrolyzed to peptides and amino acids. Ammonia is released and the pH rapidly rises to 8.0 or higher. The combination of high pH and free ammonia plus the rapid growth of the essential microorganisms at relatively high temperatures (above 40°C) make it difficult for spoilage microorganisms to grow. Therefore the products are quite stable and well-preserved. They are safe to eat even when made in an unhygienic environment.

The section titled “High salt savory flavored amino / peptide sauces and pastes” (p. 28) discusses sauces and pastes including Chinese soy sauce, Japanese shoyu and miso, Indonesian kecap, Korean kanjang, Taiwanese inyu, and Filipino taosi.

“The ancient discovery of how to transform bland vegetable protein into meat-flavored amino acid / peptide sauces and pastes was an outstanding human accomplishment.” Address: Prof. Emeritus, Microbiology and Food Science, Cornell Univ., Ithaca, New York 14853.

8243. Treloar, Brigid. 2002. Tofu. Singapore: Periplus Editions (HK) Ltd. Printed in Singapore. 112 p. Illust. (color). Index. 25 x 24 cm. Series: The Essential Kitchen.

• **Summary:** This is a beautiful book, with stylish and

informative full-page glossy color photos on every other page. It is well researched, comprehensive, and generally uses standard tofu and soyfoods terminology. It is also strange: We are not told in which country the publisher is located (perhaps Hong Kong or Singapore) or where the author lives. It is distributed in North America, Japan and Korea by Tuttle Publishing. On the inside rear dust jacket: www.tuttlepublishing.com. It is clearly targeted at a world market.

Contents: Introduction. Tofu glossary (introduction, firm and soft tofu, firm and regular tofu, fresh tofu, silken tofu, soft tofu, extra firm tofu, powdered tofu {or instant tofu or soy milk powder}, nigari tofu, flavored or dessert tofu, grilled tofu {yaki-dofu}, deep-fried tofu {age}, freeze-dried tofu {koya-dofu}, thin deep-fried tofu {aburaage or usuage}, thick deep-fried tofu {atsuage or namaage}, seasoned tofu pouches {for *inari-zushi*}, tempeh). Creating texture and flavor. How to use tofu: How to cut tofu, making a chrysanthemum flower, how to remove excess moisture, how to change soft tofu into firm, how to prepare tofu for cooking (marinating, grilling, pureeing or blending, parboiling / braising, panfrying / stir-frying, scrambling, steaming, deep-frying, smoking, how to reconstitute freeze-dried tofu, how to prepare deep-fried tofu for cooking, substituting tofu in recipes). Appetizers Snacks and light meals. Soups. Baked dishes. Stir-fries. Grilled dishes. Noodles, couscous and rice. Vegetables. Salads. Desserts. Glossary (of general ingredients, incl. soy sauce, Teriyaki sauce). Guide to weights and measures.

Note: This is not a vegetarian cookbook. Some recipes call for pork, chicken, fish (salmon, trout, tuna), etc.

Talk with representative of Tuttle Publishing, Vermont. 2004. May 8. Brigid lives in Australia. Periplus, created in 1997 by Tuttle, is located in Singapore and a sister company of Tuttle. Address: Food writer, stylist, consultant, and cooking instructor [Australia].

8244. Severson, Kim. 2002. Global food fight? Why, soytainly! Battle brews over sauce labeling. *San Francisco Chronicle*. Aug. 25. p. 1, A21.

• **Summary:** The debate concerns classification of soy sauces made by different methods under the rules of the Codex Alimentarius Commission, the powerful regulator of international food trade, which was created in 1962 by two organizations of the United Nations. The Commission sets standards for foods that are imported and exported. Starting September 23, the Codex committee in charge of soy sauce will meet in San Antonio, Texas.

The debate began several years ago when Japanese officials proposed that only “naturally brewed” [fermented] products be allowed to use the term “soy sauce” in international trade. Products made using the quicker hydrolyzed vegetable protein nonbrewed method would have to use another name. The International Hydrolyzed

Vegetable Protein Council dislikes the proposal; they believe the standard is discriminatory. *Food Chemical News*, a trade publication, has strong views on the subject. The stakes are high since Americans consume almost 3 cups of soy sauce a year.

Leaders of Slow Food, an international organization with 60,000 members dedicated to preservation of natural food products and methods, say the debate is about consumer rights. They believe only brewed soy sauce should have the right to use that name.

However, 30 years ago nonbrewed soy sauce was America's favorite, led by the La Choy and Chun King brands. Then in 1973 Kikkoman entered the picture with a brewed soy sauce. Today La Choy and Chun King are owned by ConAgra Foods, and are much less popular than Kikkoman.

A sidebar titled "Tasters find brewed is best" explains how the Chronicle's food staff compared the taste of Chun King (nonbrewed) and Kikkoman (brewed). Kikkoman won. Address: Staff writer.

8245. American Soybean Assoc. 2002. *Cocinando con soya* [Cooking with soya]. Mexico City, Mexico: Asociación Americana de Soya. 96 p. Aug. 28 Illust. 28 cm. [Spa]

• **Summary:** In July 2001 the first national "Cooking with Soya" contest was held at the Institute of Gastronomy in the University Anáhuac del Sur—sponsored by the American Soybean Association. These recipes are the result of that contest. Each page of the book is devoted to one recipe, with the name of the recipe and its creator, the ingredients, method, nutritional content of 6 portions and of one, symbols, and a color photo (6 cm on a side) of each recipe. Main ingredients used: Tofu, whole dry soybeans, textured soy protein, soy sauce, soy sprouts, okara, soy oil,

Contents: About the contest. Editorial. About the Institute of Gastronomy. Color photos showing: (1) A portrait photo of each participant. (2) Each of the many finalists standing behind his or her recipe. (3) The three winners. Symbols. Salads. Main dish. Desserts. Traditional recipes. Address: Jaime Balmes 8-2º piso, Colonia Los Morales Polanco 11510. Phone: +52 5821 0120/6150.

8246. Kikkoman Corporation. 2002. Annual report 2002. Year ended March 31, 2002. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 30 p. 28 cm. [Eng]

• **Summary:** Kikkoman has changed its fiscal year end from Dec. 21 to March 31. April 2001. It is disappointing that so little information about the company's performance and activities is given compared with previous years. Sales and profits were about the same as for the year ended 31 Dec. 2000. As in previous years, growth in overseas sales and profits was much larger than their Japanese counterparts. Address: Noda, Japan.

8247. Stanchich, Lino. 2002. Work with Noboru Muramoto sensei making miso and natural salt in California (Interview). *SoyaScan Notes*. Sept. 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Lino was a business partner with Muramoto sensei, first at the Herb-T Company on 11th St. in San Francisco, and later at Great Life Co. in Escondido, California—where they imported sun-dried crude / unrefined salt from Mexico, cleaned it by boiling, washing, and filtering (to remove the pollutants found in sea water), then sold it as different varieties of natural salt and also used the salt to make many different kinds of miso, which they sold commercially. Muramoto moved from Glen Ellen, California, south to Escondido to do research on salt. Lino thinks he moved in about 1980 or 1981. They always lost money on the salt, since it took so much time to remove the pollutants. So they tried to make up for those losses by selling miso. Lino and his wife, Jane, were with Muramoto in Escondido from August 1983 to 1985. Lino helped. Lino was never in Glen Ellen. Muramoto stayed in the USA legally in term of immigration.

The various types of miso and Lino's best guess as to the date of introduction is as follows: Chick Pea Miso (fall 1983). Barley miso (1984). Peanut Miso (1984). Green pea miso (1984). Three-year Hatcho miso (1985). They also sold tamari collected from various types of miso, and they made tamari as a separate product.

As far as Lino knows, Muramoto was the first person to make and sell chick pea miso in the USA. It was a sweet miso that fermented for about one year. The koji was always made with rice; sometimes soybeans were used with the chick peas and koji, whereas at other times no soybeans were used. He sold hundreds of pounds of Chick Pea Miso in 1-lb plastic bags, mostly by mail order, but also through a few natural foods stores—in San Francisco (California), Boston (Massachusetts), and Florida. Muramoto was in charge of food production (he had a few assistants) and Lino was in charge of sales.

Lino was born on the border between Italy and Croatia near Trieste; his first name is Italian and his surname Croatian. Address: 101 Willow Lake Dr., Asheville, North Carolina 28805. Phone: 828-299-8657.

8248. Tadano, Mary; Tadano, Michiko. 2002. History of Showa Shoyu Brewing Co. (Interview). *SoyaScan Notes*. Sept. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The Tadano family has a long history as farmers in the Glendale area. A history of Glendale, Arizona says that Takeshi Tadano, head of the Tadano family in Glendale, arrived in 1907; however Michiko is quite sure that he arrived several years after that, and she is sure that he was in Glendale—a little horse and buggy town—in 1913.

Takeshi was born in about 1873 in Japan, in Wakuya,

Miyagi prefecture. He fought with the Japanese army in the Sino-Japanese War (1894-1895) and won some medals. He and his first wife had a family of two boys and two girls, all born in Wakuya, Japan. The boys were: Tadashi (born 15 March 1907, the eldest, who married Michiko, who is now age 90 but very clear of mind) and Takeo (born 7 June 1909). After his youngest daughter was born in about 1912 in Japan, Takeshi moved to the United States with his wife and two sons, settling in Glendale, Arizona, where they began farming. They had a third son named George born 3 July 1919, but, tragically, when he was about 8 months old, the mother passed away in the huge epidemic of Spanish Influenza—leaving the eldest son, Tadashi, to care for their baby. Takeshi later remarried to a woman whose given name was Yaeno (her surname has been forgotten). The couple had two more children, John Tadano (born “Takejiro John Tadano,” 18 Sept. 1923) and Joe Tadano (born “Takeji Joe Tadano,” 27 April 1925), both born in Phoenix.

However it was difficult to make a living in farming, a part because of anti-Japanese sentiments in the 1920s and acts of anti-Japanese terrorism in 1934-35—which affected the Tadano family directly (see below). Therefore, in the late 1930s, Takeshi decided to start a business making shoyu (fermented Japanese-style soy sauce) in Glendale. There was a shortage of shoyu in the USA at the time and most of it was imported from Japan, with a small amount coming from Hawaii. Leaving his farm under the supervision of his two grown sons, in about mid-1940 he returned to Japan, learned how to make shoyu from a large shoyu manufacturing company (nobody remembers where), then after about one year, returned to the United States in about September 1941, on the last Japanese ship allowed to reach the United States before the Japanese attack on Pearl Harbor.

Arriving in Glendale that fall, he immediately set to work constructing a large wooden building on his farm in which to make shoyu. The wooden vats were commercially made, about 5 feet high and 6 feet in diameter. The finished moromi was pressed out of bags using a hand-turned screw press. It is not clear where they got this specialized equipment. Then Takeshi taught two of his sons, Takeo and George, how to make shoyu. At the shoyu factory on Glendale Ave., the koji was made in the traditional Japanese way, in flat wooden boxes placed in a warm incubation room with controlled humidity.

The attack on Pearl Harbor took place on 7 Dec. 1941. The next day some FBI agents came to Takeshi’s house at night to get him; they believed he was a Japanese spy. Several days before Takeshi had had a heart attack; his doctor told him to stay in bed for 6 weeks and not to be moved. Since neither Takeshi nor the boys spoke much English, Michiko told the FBI agents what the doctor had said and gave them the doctor’s name and phone number in case they wanted to verify her story. The FBI left Takeshi alone for 6 weeks, then they came and took

him in an ambulance to the internment camp at Lordsburg, New Mexico. George accompanied his dad as far as El Paso. Takeo, the second son, had come to the USA on a business visa but was found farming, so he was also taken to the Phoenix jail for 2 months and then to the Lordsburg internment camp.

On 19 Feb. 1942 Executive Order No. 9066 was signed; as a result, more than 110,000 Japanese Americans and Japanese nationals living in the western USA were soon sent to internment camps.

Shoyu that had been made by a handful of Japanese factories in the western United States was no longer available.

The city of Phoenix and its environs (including today’s suburb of Glendale, located on Grand Ave. about 7 miles northwest of Phoenix city center) was divided down the center diagonally by Grand Avenue, which ran from northwest to southeast. Those Japanese-Americans living on the west side were mostly sent to camps, whereas those living on the east side (such as the Tadanos) were not sent to the camps; many kept farming—but were not allowed to enter “off limits” areas such as Phoenix. Therefore these farmers were not allowed to take their products to market, so they had to hire a Caucasian to do that for them.

Tadashi (Michiko’s husband) and John were permitted to stay at home and farm—to feed their wives and relatives. Since George was born in the USA and was therefore a U.S. citizen, he had no problems—even though he was educated in Japan. At the time of Pearl Harbor, John was age 18 and a senior at Glendale High School. For the next two years he went to Phoenix Junior College.

After the Japanese attacked Pearl Harbor, all imports of foods and condiments (including shoyu) from Japan to the USA came to an abrupt stop. But by now Takeo and George were making shoyu in the barn on the family farm—located on Lateral 15 at the time, and since renamed 35th Ave. Initially, only the family used this soy sauce, but soon they bottled it in gallon bottles and shared it with other Japanese families in the area, and after a while they began to sell to friends for a low price. News of the new source of shoyu spread by word of mouth, and soon many Japanese were coming to the Tadano farm to buy a gallon bottle of shoyu.

In about Sept. 1943 Takeshi, the head of the Tadano family in Glendale, was allowed to leave the internment camp in New Mexico and return to his family farm because he was very ill and they thought he would not survive; family members drove to New Mexico (via back roads) and brought him home. But with good care and the food he liked, he recovered. Before long, he was working to expand the shoyu company.

So Takeshi and his son, John (who had been born in America, was an American citizen, spoke fluent English, and decided to leave junior college to focus on business) began to expand the company. First they registered the company

as the Showa Shoyu Brewing Corp., with John as president. They also registered the Marusho brand for their shoyu and had labels printed.

Then, as their business thrived and expanded, they finally had to move to a new location. They rented part of the red brick sugar beet factory at 1150 East Glendale Ave. (which is now located at 51st Ave. and Glendale Ave.; the streets have been renamed) in Glendale, converted it into a shoyu factory, and moved much of the equipment out of the wooden building on the farm into the new space. They also bought new, much larger, wooden vats, about 10 feet high and 10 feet in diameter. [Note: This was probably in about July 1945. See *Soybean Digest*, Aug. 1945, p. 22]. John's name was on all the official documents. First George, then Takeo (who returned from the internment camp in 1944) was in charge of making the shoyu and koji, John was the salesman, and their father Takeshi (who was not as strong as formerly) oversaw the business. Takeshi died of a stroke in on 1 July 1949.

This was a fermented Japanese-style shoyu, made with roughly equal parts soybeans and wheat. The soybeans were cooked in a large metal cooker; it is not clear whether they were pressure cooked or not. Moromi mash was fermented in huge wooden vats (about 10 feet tall) for roughly 2 weeks in a temperature controlled room; it was mixed manually using a special stirring pole. The resultant mash was placed in canvas bags and the shoyu pressed out. It is not known what type of pressing equipment was used. The shoyu was sold only in bottles, either 1 liter or 1 gallon in size. Soon John set up a sales office in Denver, Colorado. There, in 1943, he met Lucy Taguchi, and they became close. Lucy helped distribute his shoyu, and her father, who ran a Japanese grocery company, became a regular customer. When their romance broke up, John married Lucy's sister, Mary, in July 1945. She was a medical technician in Denver. Their first home was on 35th Ave. in Phoenix.

John later set up an office in Los Angeles, California. He sold a large amount of his shoyu to Modern Foods, a Japanese food distribution and trading company in Los Angeles. John also distributed his soy sauce as far east as New York; he often traveled to New York and Chicago (Illinois). Mary believes that John's Marusho Shoyu was the only authentic, fermented Japanese soy sauce sold in the USA during World War II. At one time Best Foods Co. wanted to buy John's recipe and distribution network.

When the shoyu company was doing well, John started a parallel career in the nursery business. But he spent more than he made and before long the shoyu company had to declare bankruptcy. Part of the reason was increased post-war competition from imported shoyu, especially from Yamasa shoyu, which started coming into the USA from Hawaii, and Kikkoman shoyu from Japan. John changed careers at that time. Mary and Michiko each has a bottle of Marusho Shoyu with a label still on it.

Note: According to the book *Glendale—Century of Diversity: An Illustrated History*, by Dean Smith and Paula Ilardo (2000, Publ. by City of Glendale, Arizona, 247 p.): (1) Takeshi Tadano came to Glendale in 1907 (Chapter: The convergence of culture, p. 34). (2) "Anti-Japanese sentiments had been festering among the Anglo farmers for over a decade. Jealous of the success of hard-working Japanese farmers, many Anglo farmers pressed for laws to limit Japanese landholdings as far back as 1920... The anti-Japanese terrorism of 1934-35 began. Dynamite bombs exploded outside farmhouses, irrigation headgates were demolished, Japanese families were terrorized. Tadashi Tadano was irrigating his Glendale farm late on the night of September 12, 1934, when six sedans discharged 15 men who brandished pistols, pushed Tadano's truck into the nearby canal, and fired two shots into the vehicle. Panic-stricken Tadano ran for cover, dodging two bullets that whizzed over his head. Many other such terror stories occurred as emotions ran high." (Chapter: Overcoming trying times, p. 74-75).

John T. Tadano passed away on 21 Jan. 1989. Mary is his widow. Joe George Yoneo Tadano died on 4 Jan. 1981. Joe Takeji Tadano died on 24 Nov. 1990. Address: 3539 West Colter St., Phoenix, Arizona. Phone: 602-841-1763.

8249. Schmit, Matthew. 2002. Soy pioneers: Where are they now? (Interview). *SoyaScan Notes*. Sept. 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** September 2002 will mark the 25th anniversary of The Tofu Shop, which began in the fall of 1977 in Telluride, Colorado.

Matthew was born on 13 Sept. 1950 in Duluth, Minnesota. His family moved to Florida when he was in high school. In 1972 he received a degree in social work from Florida State University. Upon graduation, he started working for the state of Florida in its drug prevention social work program. Through training programs, he was exposed to healthy alternatives to a drug-oriented lifestyle—vegetarian food, yoga, etc. He became very absorbed with those new philosophies—like many people in the early 1970s. In 1973 he stopped eating red meat and poultry.

He left his job in late 1973, stopped eating fish, became a vegetarian, and traveled to the West Coast, visiting yoga centers, intentional communities, etc. He visited his sister, Marna, in Arcata, where she was about to have a child. She had married Jack Hice from Florida, where she became pregnant. They wanted to have a natural childbirth—which was against the law in Florida—so they loaded up their possessions in a van and headed west. When they got to Arcata, she was so pregnant they couldn't go any further. Arcata had a great free clinic and midwives, so they settled in Arcata and invited Matthew to attend the birth. Aaron was born in late December 1973.

Shortly after the birth, Matthew traveled with Marna

and Jack's family to a remote ranch on the Smith River near Crescent City, California, just south of the California-Oregon border; there they visited Jack's high-school friend, Jackson Hollomon (and his wife, Valerie, and brother, Henry) who were caretaking the ranch for the winter. Matthew stayed for several "magical" weeks, enjoying the wild scenic beauty, crystal-clear air and water, and whole natural foods. One morning he was introduced to tofu, purchased fresh locally, and served on homemade whole-wheat bread (made from freshly ground grains) over a bed of sprouts; the tofu was sliced thick, browned in a cast-iron skillet with a little oil, and had soy sauce sprinkled on top. It was good—no big deal.

After that, Matthew traveled to Jackson Hole, Wyoming, to visit some friends from Florida. Together they formed a food-buying club named Body and Soul; they bought bulk natural foods from a company in Salt Lake City, Utah, had them shipped in, then divided them up. Matthew stayed only for the winter of 1973-74. "I was very young and moving fast." That spring, he traveled southward through Colorado, visiting and Naropa Institute in Boulder during its exciting first summer (Ram Dass and Bhagawan Dass and many other spiritual figures were there), and visiting an aunt in Denver. One of her sons, Matthew's close cousin, was in Telluride (located to the southwest), an old mining town with a 3-year-old ski resort. Matthew visited him in the summer of 1974 and ended up staying. The country was spectacular and young city kids were moving in. Matthew was a member of the group that started the food co-op in Telluride, first as a little food-buying club that grew into a store-front co-op called "Winterstash," located in a mini-mall of five tiny shops below the classical old refurbished Sheridan opera house—built in the 1800s. He was very active in the co-op and was on the board of directors. The co-op was also active in leasing land and growing food using sustainable agriculture; the word "natural" was widely used, and the word "organic" was starting to be used. Matthew was practicing yoga regularly, and making part of his living from teaching yoga classes. Eventually he organized and sponsored a woman named Ma Yogashakti Saraswati to come from India to Telluride to lead a week-long yoga workshop and retreat. She eventually came three times, and each visit was very successful. Matthew became very involved with her and her organization. In about 1976 he moved back to Florida to help her buy some property there and to establish and incorporate a meditative community and business office; it is still there and is very successful. Through such activities, Matthew was developing organizational and business experience. After a year, missing the West and the mountains, he decided to move back to Telluride, arriving in the summer of 1977.

While he was gone, Olof Brentmar and his wife had moved to town. They had learned how to make tofu from *The Book of Tofu*, and they started making it in Telluride at The Upper Crust Bakery—at night after the bakery and restaurant had closed. They sold their tofu at the local co-

op—perhaps in little plastic bags; Matthew doubts they had a name for their small business. The Brentmars taught the process to a fellow named Timothy Mecke, and Tim taught Matthew. Just as Matthew arrived in Telluride, Olof was bowing out of the scene, and Tim was making the tofu by himself—about 25 lb.—from about 10:00 night until 3:00 in the morning in the restaurant kitchen. Tim and Matthew made tofu together several times in the restaurant, then found a little shop space near the co-op that was for rent—at 116 North Oak Street; they decided to rent the space, increase production, and "make something out of it." They called it "The Tofu Shop"—a humble name that was a basic description of what they did. Nobody coined the name; people just started calling it that—until it stuck. Matthew and Timothy each invested \$500. At the time, Matthew had only \$65 to his name. However he was able to borrow \$250 from each of two friends, Craig Boykin and Gary Lewin. One of the main reasons Matthew started making tofu was because of his interest in vegetarianism; his yoga teacher was also a vegetarian. The basic idea originally was to make tofu and sell it in Telluride; the restaurant idea came later.

The equipment they inherited from Olof included a wooden pressing box (they put rocks on the lid to press the tofu), a 10-gallon ceramic pot for curdling the soymilk, a primitive cedar bucket with holes drilled in (that was lined with cheesecloth for pressing the soymilk from the okara). They borrowed a refrigerator and a typical home kitchen stove. They built the entire kitchen out of wood, including counters, sprout racks above sinks, work tables, etc. They had a handyman make a lever press, hinged to the wall; it had a plunger that fit down into the cedar bucket to press the soymilk from the okara. Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

8250. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part II (Interview). *SoyaScan Notes*. Sept. 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Initially, they sold all their tofu to the co-op next door. Then people began to come into the little shop to ask what to do with the tofu; for recipes, they referred them to *The Book of Tofu*. Within a month, they decided to build a little wooden counter (so people couldn't walk into the production area) and began selling tofu directly to consumers out of the shop. The co-op didn't mind. "We were all in it together."

Their original logo was a dragon; a woman artist in Telluride had painted it (copying a Chinese vase), and fired it on four tiles, then framed. Matthew and her husband taught Yoga classes together, and he knew their family very well. Matthew traveled with the husband to Durango; he opened the back door of his van and a box of the finished tiles fell out and were damaged. He picked one up and gave it to Matthew; it was a dragon. Matthew liked it, drew a circle

around it, and decided to use it as the new company's logo. He hung the four tiles outside the shop door; she then painted "The Tofu Shop" on some new tiles, which were framed and hung below the dragon. The nearest alternative community was in Boulder, about 4 hours by car. They visited The Spinning Kitchen and White Wave, two early tofu shops in Boulder. Once they bought soybeans from Steve Demos of White Wave.

On 8 Dec. 1977 the earliest known article about the little company appeared in the *Telluride Times* on page 11. Titled "Tofu prepared daily in Telluride shop." It gave a brief history of tofu and described the new company; a photo shows Matthew, Susie Imbarrato, and Tim Mecke—all holding a tray of sprouts.

In late 1977 or early 1978, Tim Mecke left the business. Matthew changed the ownership of The Tofu Shop to a worker-owned collective (legally a co-op, if he remembers correctly), although his name was on all legal documents.

About 3 months after the company started, they decided to install a take-out food window. The daily schedule now changed; they made tofu starting at 3:00 in the morning then cleaned and were out by 10:00 a.m.—when the people who made the restaurant products would show up. They developed a nice little two-sided vegan menu—no animal products. Their first deli items were 3-4 tofu sandwiches. Spinning Kitchen in Boulder made a "Kung Fu" open-face tofu sandwich; Matthew's cousin loved it and brought him the recipe; it was a slab of tofu grilled in a skillet with soy sauce and maybe some sesame seeds on top—very simple. Another was a mock tuna salad sandwich. They also made and sold tofu salads, and a tofu dressing, and soyburgers—made with cooked soybeans rather than tofu. Once a month they would boil big pots of soybeans and of rice, then add carrots, spices, etc., mash it all together, run part of it through a Champion Juicer, shape into patties, fry hundreds and hundreds on a skillet, then freeze them. One year the smoke from frying disrupted the fledgling film festival in the opera upstairs. "We filled the opera house with smoke." The guy who organized the festival rushed down to ask "What are you guys doing?"

Note: This is the earliest English-language document seen (June 2006) that mentions the "Champion Juicer."

In 1978, about 6 months after starting The Tofu Shop, Tim, Matthew's partner, decided that making tofu was not the work for him; he was more of a carpenter. He gave Matthew his half of the company, but Matthew insisted on paying him for it. Years later, Tim popped into Arcata and was pleased to see Matthew making tofu there.

Matthew now started to run the business alone; he quickly felt overwhelmed, having no employees. He needed help. He hired a few people to help him make the tofu. But soon a little group formed around the shop—4-5 people who were loyal to the shop, very interested in tofu, and wanted to come in and learn and work. Matthew has always considered

what he is doing as teaching, but he still preferred to pay people in exchange for their work.

The little group of loyal people decided to make The Tofu Shop a worker-owned business. People owned shares, and there was a constitution and by-laws based on a worker-owned restaurant in Santa Fe, New Mexico, that Matthew had learned about; he obtained copies of their documents. Telluride is located on the Uncompahgre Plateau of the Rockies; there is also an Uncompahgre River and an Uncompahgre Peak. So the little group decided to create a new organization named Uncompahgre Natural Foods; it was a legal holding company "that ran The Tofu Shop as a vehicle for its mission, which was developing sustainable vegetarian foods."

Matthew was the "mover and shaker" of the group; he had his name on all the legal and tax documents. He was working full time and putting in lots of hours; most of the others were working part time and were less involved. The new ownership structure worked well. They would have business meeting every Sunday and make decisions based on consensus. Matthew made enough money to live in a nice rented stand-alone home—not an apartment.

At about the same time The Tofu Shop rented first one and then another shop space on both sides to their original space. The co-op also expanded into a second space, so between them they filled the entire mini-mall. The Tofu Shop's three rooms were used for: (1) Production of tofu and deli items. (2) A restaurant in the front space, which they remodeled themselves—with all wood and sit-down tables. (3) Sprout production—alfalfa, mung beans, radish seeds (no soybeans). Initially they grew the sprouts only for use in their sandwiches, but soon they began selling them in the co-op in plastic bags.

Also at about that time they started distributing tofu and sprouts beyond the co-op—starting with a small supermarket in Telluride. Red Hat produce company, which brought the only fresh produce up from Grand Junction once a week, took The Tofu Shop's products back down the mountains, and distributed them to health food stores and co-ops in Montrose, Durango, and Grand Junction. They also flew tofu up to Aspen where they competed with White Wave. "We had the western slope of the Colorado Rockies; White Wave had the eastern slope." Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

8251. Schmit, Matthew. 2002. Soy pioneers: Where are they now? Part IV (Interview). *SoyaScan Notes*. Sept. 19. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Matthew and Suzanne had developed a close personal relationship. In favor of their continuing relationship, they decided to get Matthew out of tofu-making because it was burning him out. So, in late 1979, they decided to leave Telluride together—for where

they did not know—to set up another, better-organized tofu shop in a larger community. There were big meetings with the other owners about how to make the transition. Mathew encouraged the members of the cooperative to sell it in order to pay off debts and dissolve the business. Finally the business was split into three parts and each part sold separately, with one group (Catherine Peterson) getting the restaurant (which she renamed Far Pavilions), another the tofu-making and other food production (Joel Rosenbloom was very disappointed he did not get this part), and a third the sprout growing. The new owners of the sprout business renamed it Mt. Sprouts. They hired an attorney and it was all done carefully and legally. The Tofu Shop had been profitable since almost the first day. Each worker was paid the same rate per hour—but Matthew worked many more hours than the others. This enabled Matthew to live off his share of the profits. The new owners took over all existing debt. Both the tofu and sprout companies folded from poor management shortly after Matthew left, but Far Pavilions continued for many years. A woman named Sharon (about age 40) and her two sons ended up owning the tofu production company.

In 1978 Matthew heard that Spinning Kitchen in Boulder had stopped making tofu. Their shop had been upstairs in a building, and water had leaked through the floor into the restaurant downstairs. A couple had bought their classic tofu equipment, moved it to Carbondale, Colorado (near Aspen), started a small tofu shop, and began making tofu—the reincarnation of The Spinning Kitchen. Matthew also heard that this couple had decided to stop making tofu and that their equipment was for sale.

So in about Oct. 1979 Matthew and Suzanne drove to Carbondale and met the two people, who took them to a storage unit where they had all their possessions (both tofu equipment and personal) in storage: A big cast-iron pot on three legs, capacity about 25 gallons; a hand-made cedar curdling barrel (which Matthew still uses as an end table in his living room); an old apple-cider press that was used to press soymilk from the okara; and a great old grinder with metal plates, a hopper on top, a fan belt and an electric motor below, made by C.W. Bell Co. in Ohio. Matthew ended up buying this classic old equipment for several hundred dollars. He brought it back to Telluride. Note: Matthew may have a receipt on which he can verify names of people & Co.

By the fall of 1979 Matthew and Suzanne were looking for a larger community in Colorado—preferably on the east slope of the Rockies. They had obtained a 4-level pizza oven from the Upper Crust Bakery Telluride, and a 6-foot-square walk-in cooler; they hoped to eventually start a small bakery and soy deli—somewhere.

In Oct. 1979 they drove to Durango—which is about 2 hours by car south of Telluride. One of Matthew's customers was there and the city had a great co-op. Matthew and Suzanne actually rented a space to start a tofu shop there,

made a deposit, and began converting the building. Then they realized that Durango is surrounded by huge mounds of toxic “mill tailings” from the old mining days. No plants will grow on them. One day they decided that, for their health, they didn't want to stay there. So they lost their deposit and headed back to Telluride. They never settled in Durango and never moved their tofu equipment there.

In Telluride, Matthew helped out at the tofu shop and at the co-op—where he was on the board of directors. But winter was coming on, and he and Suzanne were living in a small travel trailer in the town campground. They had some friends, the Boykins, in Telluride who were planning to go to Point Area, California, located just south of Mendocino. Craig Boykin and his wife, Anne, had rented a U-Haul truck; the tofu equipment, pizza oven, and cooler were loaded onto this truck and Craig drove it to Point Arena, California.

In Nov. 1979, in the midst of a snowstorm, Matthew and Suzanne, now very close, said their farewells, left Telluride in Suzanne's van, and headed west for California. Arriving in Point Arena, they visited with Craig Boykin, and talked about setting up a tofu shop in Point Arena, but decided they weren't ready yet. They continued up the Pacific Coast looking for a community or town in which to settle, arrived in Arcata and visited Matthew's sister, then continued up the coast to Ashland (Oregon) and on into Washington state. Returning to Arcata in early 1980, they began looking for a job. Suzanne quickly found one with United Naturals, a natural foods distributor in Eureka run by Jethren Phillips—who later founded Spectrum Naturals—the vegetable oil company. Again, Matthew had faith that the universe would take him to where he was supposed to be—a style of decision making not much approved of by his father, a conservative Republican. However his dad, who was executive vice-president for Jeno Palucci (who founded Chun King in 1945), has been in the food business since the family lived in Duluth, and has long been Matthew's “greatest business advisor.” His mom has also been very supportive.

Suzanne and Matthew rented an old farm house on the edge of town; their tofu equipment was on the front porch under tarps, but they were no longer pursuing a tofu business. However, when Matthew arrived in Arcata, he joined the group of people he had taught to make tofu—they were still making it. They were now considering renting a shop space. But when it got to the point of signing a lease and making real commitments, “the group just fell apart.”

So Matthew got a job as a carpenter for 6-8 weeks remodeling a house. The whole north coast of California was considered a “depressed area,” dragged down by the timber industry. Matthew advertised for a job, but was unable to find work. “I became very depressed for several months. I didn't know what to do with myself. On the drive to California I had sworn to myself I was going to try not to get into tofu-making and/or cooking food. But actually, I was straddling two dreams. So I marshaled my enthusiasm and decided that

I was going to start working on a new tofu company—apart from the group in Arcata. It was just something to keep me busy.” Matthew decided to develop a new way to market tofu. The product, called “Tofu Helper,” came in a divided plastic tub, with a cake of tofu in the large compartment and a various sauces/marinades in the smaller one. Suzanne said she had seen packaging like that in Europe.

In August 1980 Matthew and Suzanne and Suzanne were married in Arcata; the marriage lasted less than a year.

At about this time Matthew found a job as a cook at The Sprouted Seed, a vegetarian restaurant in Arcata—in part because the owner’s cousin was the wife of the guy who owned the Upper Crust Bakery in Telluride, where Matthew started making tofu. Matthew’s depression vanished; it was a good experience. The founders of the restaurant, Brain and Debbie, developed a superb Tofu-Tahini Dressing recipe which is still being made for use at the restaurant and also sold refrigerated in glass jars at local natural food stores.

One day in the summer of 1980 a man who sold carrot juice to the vegetarian restaurant told Matthew that the shop space next to his little juice operation had just come up for rent. It was just two blocks from The Sprouted Seed. Matthew looked at the space, thought about it, and talked to Suzanne—who was positive. So they started thinking seriously about setting up a soy deli, bakery, and tofu shop like they had planned in Durango. The focus was on the deli, but Matthew knew he could also sell his tofu at the Arcata Co-op—which was then selling tofu made by Quong Hop & Co. in South San Francisco. The Tofu Shop, located right next to Humboldt State University, opened on 12 December 1980. For his tofu, Matthew used the same label (blue on white with a blue dragon in the middle) he had used in Telluride. He initially bought organic soybeans from United Naturals, then switched to Living Farms in Tracy, Minnesota—his source for many years. Address: Tofu Shop Specialty Foods, Inc., 65 Martin Ct., Arcata, California 95521. Phone: 707-822-7401.

8252. Schmit, Matthew. 2002. Tofu turkey in Telluride, Colorado, and Arcata, California (Interview). *SoyaScan Notes*. Sept. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The first tofu turkey that Matthew is aware of was made in Telluride, Colorado, in 1978 at Thanksgiving by Craig Boyken, a longtime close friend of Matthew’s who loaned him \$250 to help start The Tofu Shop in Telluride in the fall of 1977. Craig is an amazing, sort of Renaissance man—an artist, mountain climber, musician—among other things. 1978 Craig and his wife, Anne, were living in Telluride in a studio they had built inside an old deserted brick school building. He used to have big banquets in his studio. Shortly before Thanksgiving of 1978 Matthew brought Craig two large blocks of firm nigari tofu, which he sculpted into the shape of a turkey, basted it with soy sauce

and oil, baked it in an oven, and continued to baste it from time to time. He probably fashioned some kind of drumsticks on the side. Matthew does not recall any stuffing inside the turkey. As the turkey baked, it shrunk/contracted and lost its distinctive turkey features. It was carved and served with a vegetarian gravy and probably cranberry sauce and stuffing on the side. It was a potluck Thanksgiving vegetarian banquet, with about 30-40 people present, including all people who worked at The Tofu Shop. It was probably the first “Tofu Turkey Thanksgiving” in American history.

After starting The Tofu Shop in Arcata, California, Matthew continued the turkey tradition each year from Thanksgiving to Christmas, starting in about 1982 or 1983. It was a major event. They started carving the turkey from two large blocks of tofu; they would hollow each out, fill the space with stuffing, then put them together and bake them. It would come out like a loaf; when you sliced it you would get a combination of the white meat plus the stuffing inside. The Tofu Turkey came in three sizes (small, medium, and large—which fed 24 people) and was sold as a special-order product via the deli—either for take-home or as a hot plate (sliced, with gravy, stuffing, and cranberry sauce) to eat at the deli; it was not sold to other retail stores. Their record year, they sold \$4,000 worth of Tofu Turkeys including mushroom gravy, and a custom stuffing with okara and miso. People could also special-order tofu pumpkin pies, cranberry sauce, etc.—a full meal. The product was last sold by The Tofu Shop in 1993. Bob Meeks now makes it at the Daybreak Cafe in Arcata, but he has improved the recipe. Also, the Arcata Co-op, which has a service deli named Spoons, has for many years made their own Tofu Turkeys in house.

Matthew met Seth Tibbott of Turtle Island Foods (home of Tofurky) years ago when he came down through Arcata doing in-store food demos for his tempeh products, and Matthew has talked with him periodically over the years.

To this day, Matthew is asked to bring Tofu Turkey to his extended family’s get-together on Thanksgiving in Arcata—for the vegetarians in the family. Address: Tofu Shop Specialty Foods Inc., 65 Frank Martin Court, Arcata, California 95521. Phone: 707-822-7401.

8253. Noble Bean. 2002. Tempeh—Noble Bean (Leaflet). McDonalds Corners, Ontario, Canada. 2 p. 6 panels. Front and back. 28 cm.

• **Summary:** The front 3 panels of this color leaflet are printed with black and yellow on a green background: (1) About the company in English, with an oval color photo of Casey, Marty, Susan, and Allan. “Noble bean is a family-run cottage industry nestled in the rolling hills of the Ottawa Valley. Here on 10 acres of land we produce 100 lbs. of tempeh a day.” In 1979 the company was started. (2) Six tempeh products (packages and labels) made by Noble Bean, plus one old and two new photos of the family at work. (3) About the company (in French) with a cartoon illustration of

the outside of the shop.

The inside 3 panels contain recipes for Tempeh Salad and Tempeh Teriyaki, plus an early photo of Allan and Susan making tempeh. Address: RR#1, McDonalds Corners, ONT, Canada K0G 1M0. Phone: (613) 278-2305. Fax (613) 278-0173.

8254. Yamasa Corporation USA. 2002. Use Yamasa soy sauce in all food formulations (Ad). *Prepared Foods* 171(9):57. Sept.

• **Summary:** A full-page color ad. "Reach deep into the past to flavor the future! In the land where soy sauce matters, chefs and food processors trust one brand above all others—Yamasa. Naturally-brewed Yamasa soy sauce..."

"Since 1645." Plus the Yamasa logo. "Winner 2000, 2001 and 2002 American Tasting Institute's Gold Medal for Best Flavor Enhancer." Address: Plant: Salem, Oregon. California sales office: 3480 Torrance Blvd., Suite 226, Torrance, CA 90503.

8255. Battaglia, Evelyn. 2002. Cooking with soy products. *Martha Stewart Living*. Oct. p. 278, 280, 282, 284.

• **Summary:** Introduces fresh soybeans (edamame), tofu, soy milk, miso, soy sauce. Includes recipes for: Miso soup with tofu, spinach, and carrots. Sesame marinated tofu with vegetables. Chai tea with soy milk. Edamame succotash.

8256. Stacey, Michelle. 2002. Weighing the health benefits of soy. *Martha Stewart Living*. Oct. p. 90, 92, 94, 96.

• **Summary:** Under "the good news" and "the bad news" discusses the benefits and possible (but unclear) disadvantages.

8257. Slater, Nigel. 2002. Recipes: Nigel Slater's cookbook of the month. Thai Food by David Thompson. *Observer (London)*. Nov. 10. p. 147.

• **Summary:** At last we have the definitive book on Thai cooking. David Thompson, who spent years in researching and writing this book, is the Australian chef at Nahm in London's Halkin Hotel; before that he was owner of the Darley Street Thai in Sydney.

Recipes include: Stir-fried Siamese watercress with yellow beans, garlic and chillies (*Pak bung fai dtaeng*; with "2 tbsp yellow bean sauce, rinsed" and "2 tbsp light soy sauce"). "This simple dish can be enhanced with... roast duck and fermented bean curd."

8258. Kadokura, Tania. 2002. In the *Saveur* kitchen: The beef behind sukiyaki. *Saveur (New York, NY)* No. 62. p. 89. Nov.

• **Summary:** Suki-yaki is thin slices of meat or seafood with tofu and vegetables, simmered in a sweetened soy sauce base; it is Japan's best-known nabe. Contains a recipe and color photo. Address: Tokyo-based cooking teacher.

8259. **Product Name:** Tofu Life Naturally Smoked Tofu Paté [Olives Tomatoes, or Garlic Teriyaki].

Manufacturer's Name: North Coast Distributors.

Manufacturer's Address: 4860 East 2nd St., Benicia, CA 94510. Phone: 707-747-0410.

Date of Introduction: 2002.

Ingredients: Organically grown soybeans, water, natural calcium sulfate (as hardener), shoyu (water, wheat, soybeans, salt). All fresh: Onions, ginger, hot pepper, garlic green onions, citric acid, herbs & spices.

Wt/Vol., Packaging, Price: 7.5 oz plastic tub, vacuum packed with nitrogen flush. Retail for \$3.49.

How Stored: Refrigerated, 35-40 day shelf life.

New Product—Documentation: Product with Label brought by Marina Li of Moraga. 2005. June. It retails for \$3.59 at the Natural Grocery Co. in Berkeley. Products with labels and leaflet brought to Soyfoods Center by Hanan Onn. 2006. Feb. 14. He says both were introduced in 2002. His best-selling paté is Olives Tomatoes.

8260. **Product Name:** San-J Asian BBQ: Sweet & Smoky Fusion BBQ Sauce. Gluten Free.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 804-226-8333.

Date of Introduction: 2002.

Ingredients: Organic sugar, tamari soy sauce (water, soybeans, salt, alcohol), water, tomato paste, rice vinegar, molasses, arrowroot, onion juice (onion juice, vinegar, salt), ginger powder, garlic powder, sesame, canola oil, spices, natural flavor (maltodextrin, hickory smoke flavor), xanthan gum.

Wt/Vol., Packaging, Price: 10 fl. oz bottle.

How Stored: Shelf stable.

New Product—Documentation: E-mail from Misako Binford of San-J. 2012. May 8. An attached Excel spreadsheet gives that date each San-J product was first sold commercially, starting in 1987. This product was first sold in 2002.

Two labels sent by Misako Binford of San-J International. 2012. May 14. Black, red, yellow and white on green. Illustration of a deep iron pot with colored flames coming out the top. The label now reads as shown above. One logo on the front panel: Certified Gluten Free.

8261. Batmanglij, Najmieh. 2002. Silk Road cooking: A vegetarian journey. Washington, DC: Mage Publishers 336 p. Illust. (color). 30 cm.

• **Summary:** This vegetarian cookbook contains beautiful color photos and an extensive glossary. The Glossary includes entries for agar-agar, almond milk, almonds—sweet, hoisin sauce ("made from fermented soybean paste"), soy sauce (Chinese), sprouts (alfalfa, wheat, mung bean, or lentil;

no soy), tahini paste, tempeh, tofu. Yet the Index shows the soyfoods appearing only in the Glossary, not in the recipes or elsewhere.

However the soybean, bean curd and soy sauce are mentioned on page 41. On page 43 is a magnificent full-page color photo of a Chinese bean-curd seller displaying her wares on a Shanghai street; many different varieties of doufu are shown.

The remarkable story of the Silk Road pioneer, Zhang Qian, is told on pages 24-28. The Han dynasty court (under Emperor Wu Di) dispatched Zhang Qian, a military officer who was familiar with the Xiongnu, to the Western Regions in 138 BCE with a group of ninety-nine members to make contact and build an alliance with the Yuezhi against the Xiongnu. He was accompanied by a guide named Ganfu, a Xiongnu who had been captured in war. The objective of Zhang Qian's first mission was to seek a military alliance with the Yuezhi, in modern Tajikistan. No one knows what route Zhang followed. However to get to the territory of the Yuezhi he was forced to pass through land controlled by the Xiongnu who captured him (as well as Ganfu) and enslaved him for ten years. During this time he married a Xiongnu wife, who bore him a son, and gained the trust of the Xiongnu leader.

On the inside front cover and facing page is a 2-page map of the Silk Road region from Shanghai, China, to Genoa, Italy. The author, a woman, has a brief biography and large color photo on the inside rear dust jacket. Born and raised in Iran, "she received her master's degree in education and art in the United States and France. During the past 25 years she has traveled across much of the ancient Silk Road region, working with regional chefs and home cooks along the way. She is a leading authority on Persian cuisine and the author of the best-selling *New Food of Life*, described by the *Los Angeles Times* as the definitive Iranian cookbook..." Address: Washington, DC.

8262. Charney, Ken. 2002. *The bold vegetarian chef: Adventures in flavor with soy, beans, vegetables, and grains*. New York, NY: John Wiley & Sons. vi + 313 p. Illust. Index. 23 x 19 cm.

• **Summary:** Contents: Acknowledgments. Introduction: Vegetarian delights. 1. Starting off right: Appetizers and snacks. 2. Soups and stocks: Warm beginnings. 3. Breakfast, lunch, and brunch: From scrambles to sandwiches. 4. Burgers, fritters, and loaves: Stars of vegetarian cuisine. 5. Outrageous soy: Tempting tofu and tempeh. 6. A bold way with beans: Powerhouse dishes. 7. Pasta, risotto, and polenta: Comfort carbs. 8. Seitan: The power of wheat meat. 9. Vegetables and grains on the side: All the best accompaniments. 10. Green salads: Crisp and well dressed. 11. Just desserts: Sweetness and light.

On the rear cover is a brief bio of Ken Charney; on the front cover is a color portrait photo. Address: Seattle,

Washington.

8263. Emi, Kazuko. 2002. *Japanese cooking: The traditions, techniques, ingredients and recipes*. London and New York: Hermes House. 256 p. Illust. (color). 31 cm. *

8264. Grant, Amanda. 2002. *Fresh & fast vegan pleasures: More than 140 delicious, creative recipes to nourish aspiring and devoted vegans*. New York, NY: Marlowe & Company. ix + 230 p. Index. 23 cm.

• **Summary:** This vegan cookbook from the UK uses much less soyfoods than its typical counterpart from the USA. The index contains 1 entry each for soy milk/cream and tofu. Soy sauce appears in the title of one recipe. In the headnote to the tofu recipe (p. 114-15) we read: "There are many health benefits to eating this soybean product, not the least of which is its high percentage of protein. It is eaten in vast quantities in Japan, along with other products of the bean such as shoyu and miso." Address: Author and food editor, London.

8265. Khachatourians, George G.; Arora, Dilip K. eds. 2002. *Applied mycology and biotechnology. Vol. 2. Agriculture and food production*. Amsterdam, New York: Elsevier. xvi + 428 p. Illust. Keyword index. 25 cm.

8266. Kissel, Renate. 2002. *Soja & Tofu: Die neue Vitalkueche [Soya & tofu: The new vital cookery]*. Frankfurt am Main, Germany: Umschau Buchverlag. 128 p. Illust. (color photos). Recipe index. 24 cm. [Ger]

• **Summary:** Contents: Soya—the powerbean for nutrition. 1. Salads and appetizers. 2. Sauces, dips, garnishes, and spreads for bread. 3. Soups. 4. Main dishes. 5. Desserts, baked goods, and drinks. 6. Asian dishes. Glossary. Note: The majority of recipes in this cookbook use tofu.

8267. Kurlansky, Mark. 2002. *Salt: A world history*. New York, NY: Walker and Co. xii + 484 p. Illust. Maps. Port. Index. 21 cm. [240* ref]

• **Summary:** Soy sauce is mentioned on 14 pages: 20, 38, 71, 73, 189, 279, 373, 377, 380, 390, 395-97, and 439.

Soybeans on pages 20 and 21. Jiang, jiangyou and shoyu on p. 20.

Miso on p. 373. Dousi [doushi or douchi; fermented black soybeans] on pages 393 (in two places), 394 and 395. Douban on p. 394 and 395.

This book contains quite a few questionable statements. For example, speaking of the soybean (which he often calls "soy," p. 21): "The bean is so nutritious that a person could be sustained for a considerable period on nothing but water, soy, and salt." Moreover, the word *douchi* is almost never spelled *dousi*. This is the *only* example of this spelling in our entire book! Address: Author, New York City.

8268. Lee, Cherl-Ho; Lee, Sang Sun. 2002. *Cereal*

fermentation by fungi. In: George G. Khachatourians and Dilip K. Arora, eds. 2002. *Applied Mycology and Biotechnology*. Vol. 2. Agriculture and Food Production. Amsterdam, New York: Elsevier. 428 p. See p. 151-70. [50 ref]

• **Summary:** Contents: Summary. Introduction. Fermentation starters: History of solid state fermentation starters in northeast Asia, cereal alcoholic fermentation starters, soybean fermentation starters. Fungal fermented foods: Cereal alcoholic products (rice wine, rice beer, alcoholic rice paste, alcoholic rice seasoning), fermented soybean products (Korean *kanjang* and *doenjang*, Japanese *shoyu* and *miso*, *tempe*, Chinese *sufu*), other fermented products (Chinese red rice {Anka}, enzyme foods). Hygienic aspects of fungal fermented foods: Mycotoxins in fermentation raw materials, mycotoxin formed during fermentation. Conclusion.

Page 162: "... soybean sauce, *kanjang*, and soybean paste, *doenjang*, have been used in Korea for more than 2000 years and formed the characteristic flavor of Korean cuisine. The term "Shi" [fermented black soybeans], the Chinese letter indicating *meju*, first appears in *Jijiupian* written in the Han period (206 B.C. to 208 A.D.) of China. *Bowuzhi* of Jin (265-420 A.D.) of China describes that *Shi* [fermented black soybeans] originated in a foreign country, and the letter is a dialect. *Xintangshu* of the Tang period (618-807 A.D.) in China names *Shi* as a special product of Balhai or Bohai (688-826 A.D.), a nation founded by the refugees from defeated Kokuryo (37 B.C. to 668 A.D.).

"It is generally recognized that Koreans were the first to experiment with soybean fermentation, sparking the beginning of the soy sauce culture of the Orient (Lee 2001). Their traditional fermentation technology was so advanced that they taught their techniques to neighboring countries."

Page 162-63: "*Meju* [soybean koji], the fermentation starter for Korean soysauce, *kanjang*, is made from soybean... The ripening of *kanjang* mash in the brine is ended in 1-2 months."

Figures: (12) A combination diagram and flowsheet showing the process of making Korean *kanjang* and *doenjang*. Address: 1. Graduate School of Biotechnology, CAFST, Korea Univ., Seoul, 136-701, Korea; 2. Dep. of Biology, Korea National Univ. of Education, Chungbuk, 363-791.

8269. Ling, Kong Foong. 2002. *Food of Asia: authentic recipes from China, India, Indonesia, Japan, Singapore, Malaysia, Thailand and Vietnam*. Singapore: Periplus. 192 p. Illust. (color photos). Index. 31 cm.

• **Summary:** This oversized paperback book, loaded with glossy color photos, is an expanded version of the original 1998 edition. The introduction and essays are by Kong Foong Ling. The index, which is poor, makes the book hard to use if you are looking for particular foods found throughout Asia such as soybeans, soy sauce, miso, salted /

fermented black beans, yuba [bean curd skin], etc.

Contents: The flavors of Asia. Ingredients. The Asian kitchen. Burma. China. India. Indonesia. Japan. Korea. Malaysia & Singapore. The Philippines. Sri Lanka. Thailand. Vietnam. Appendix.

The "Ingredients" section (p. 10-17) includes: Bean curd (incl. cotton or momen tofu, silken bean curd, deep-fried bean curd or aburage, grilled bean curd or yakidofu, fermented bean curd or nam yee). Bean curd skin [yuba]. Black beans, salted (and fermented). Hoisin sauce ("A sweet sauce made of soy beans, with spicy and garlicky overtones"). Miso (incl. red miso and white miso). Salted soy beans (incl. "yellow bean sauce"). Soy sauce (incl. light soy sauce, black soy sauce, red soy sauce, Kikkoman, tamari, thick sweet soy sauce (kecap manis-Indonesian)). Tempeh. Also: Red beans (dried azuki). Seaweed (incl. dried kelp, golden kelp, mozuku, salted dried kelp, laver or nori, wakame). Sesame (black and white seeds, tahina {tahini}). Sesame oil. Sesame rice crackers.

Korea (p. 109+). Page 110: There are also many fermented pastes and sauces for dipping, called *chang*. Every restaurant and home has its own formula for making *chang*. Based on a fermented mash of soy beans, the three most common varieties are *kan chang* (dark and liquid), *daen chang* (thick and pungent), and *gochu chang* (fiery and hot).

Soybean is mentioned on pages 8, 11, 68, 89.

Beancurd or bean curd is mentioned on pages 8, 10, 11, 26, 32, 33, 35, 36, 40-42, 68, 70-71, 74, 89, 90, 92, 93, 94, 96, 100, 102, 104, 107, 111, 112, 113, 119, 120, 127, 133, 158, 172, 175, 185, 189, 190, 191, 192.

Bean curd skin [yuba] is mentioned on pages 11, 35, 36.

Bean paste and bean paste sauces, p. 8, 32.

Fragrant soy sauce is mentioned on page 128.

Also: Red bean paste, p. 46 (canned, azuki).

8270. Nguyen, Chi; Monroe, Judy. 2002. *Cooking the Vietnamese way*. Revised and expanded to include new low-fat and vegetarian recipes. Minneapolis, Minnesota: Lerner Publications. 72 p. Illust. Index. 23 x 20 cm. Series: Easy Menu Ethnic Cookbooks.

• **Summary:** This thin hardcover book is an introduction to Vietnamese cooking, but not a vegetarian cookbook—though it contains some vegetarian recipes. Contains many color photos. The section titled "Special ingredients" includes cellophane noodles (made from mung beans), coconut milk, fish sauce (nuoc mam), ginger root, lumpia, mung beans, sesame seeds, soy sauce, and tofu. The Vietnamese use nuoc cham (p. 33) the way diners in many countries use salt: The main ingredients are fish sauce, garlic, red pepper flakes, sugar, vinegar and water. Soy sauce is also widely used as a seasoning—as in fried rice, grilled lemon-grass beef. Soy-related recipes include: Steamed tofu (Dau hui hap, p. 59).

8271. Price, David Clive; Kawana, Masano. 2002. *Food of*

Korea: authentic recipes from the land of morning calm. Singapore: Periplus; North Clarendon, Vermont: Distributed by Tuttle Pub. 120 p. Illust. (Color). 21 cm.

• **Summary:** In this attractive book, almost every recipe is accompanied by a glossy, full-page photo (usually of a prepared dish in an attractive table setting) on the facing page. The 60+ recipes were created by the chefs of the Sarabol Restaurant in The Shilla Hotel, Seoul.

Page 16: There are also many fermented pastes and sauces for dipping, called *chang*. Every restaurant and home has its own formula for making *chang*. Based on a fermented mash of soy beans, the three most common varieties are *kan chang* (dark and liquid), *daen chang* (thick and pungent), and *gochu chang* (fiery and hot).

Note: Soy sauce is also spelled *ganjang* (p. 23, 72). Korean-style miso (thick and pungent) is also spelled *doenjang* (p. 30, 60). Korean chili paste (fiery and hot) is also spelled *gochujang* (p. 23, 26, 31, 82, 106).

Bean curd [tofu] is mentioned on pages 9, 19, 24, 30, 44, 50, 56, 58, 60, 66, 68, 70, and 74.

Soybean sprouts (or bean sprouts) are mentioned on pages 6, 10, 11, 24, 40, 46, 64, 106.

Soy beans are mentioned on pages 6, 9-12, 19, 23-26, 30, 31, 44, 46, 50, 62, 106, and 120.

Fermented soybean paste (*doenjang*) is mentioned on pages 23, 25.

Soy sauce is mentioned on 27 pages (definition on p. 27). The two main types are light and dark.

8272. Sass, Lorna J. 2002. Lorna Sass' complete vegetarian kitchen: Where good flavors and good health meet. New York, NY: William Morrow. An imprint of HarperCollins Publishers. xiv + 494 p. Index. 26 cm. [35*+ ref]

• **Summary:** First published in 1992 as *An Ecological Kitchen: Healthy Meals for You and the Planet* (William Morrow). This innovative vegan cookbook offers 250 cholesterol-free recipes. It features a complete glossary of wholesome ingredients for stocking the vegan pantry (no meat, dairy, or eggs). Address: New York City.

8273. Thompson, David. 2002. Thai food (Ahaan Thai). Berkeley, California: Ten Speed Press. xiii + 673 p. Illust. Index. 25 cm. [218 ref]

• **Summary:** This is a superb, massive, beautiful and unique book—a wholistic study of food in Thai culture overflowing with lovely and expressive color photos by Earl Carter.

Contents: Acknowledgements. Introduction, by David Thompson, and author's notes. Part one: Thailand and food. 1. A history. 2. Culture and society. 3. Regions of Thailand. 4. Rice.

Part two: Fundamentals of Thai cooking. 5. The Thai kitchen. 6. Ingredients and basic preparations. 7. Relishes. 8. Soups. 9. Curries. 10. Salads. 11. Side dishes and accompaniments. 12. Menus.

Part three: Food 'outside' the meal. 13. Snacks. 14. Desserts. Select bibliography (Books in English: Primary sources 23. Secondary sources 65. Cookbooks 18. Total English: 106. Thai sources: Cookbooks 46. Memorial books: 66. Total Thai: 112. Grand total: 218).

Introduction: The author has written this book, in part, to describe this ancient cuisine which "reached an apex in the last decades of the 19th century," and "before it is eroded, altered and modernised." The transliteration is phonetic; it is not the official system devised by King Rama VI.

The section titled "The importance of Buddhism" (p. 38-40) in Thai cookery and culture states: "It is the obligation of every Thai male to become a monk for at least three months, usually around the age of 20,..." This is a rite of passage from childhood to adulthood; it acquaints each young man with the basics of Buddhism and meditation. Strict Buddhists abstain from eating meat and "there is a strong tradition of vegetarianism in Thailand." Meat does not have a primary role in the Thai diet and most Thai believe that forgoing meat earns merit for themselves or another. Some give up meat once a week, or for a prolonged period, or even for an entire year.

Chapter 6, "Ingredients and basic preparations," discusses the following: Bean curd (*dtor huu*): There are several types, from firm to soft. The author prefers the softest kind, sometimes called "silken bean curd."

Fermented bean curd (*dtor huu yii*): Of Chinese origin and fermented with a red mold, it is sold in small jars and comes in two types: "very red, or creamy white veined with pink. The author prefers the latter, which is more versatile and subtle."

Fermented soy bean (*tua nao*): This ancient fermented product was once used extensively in Thai cookery. But it has largely been replaced by shrimp paste, so it is not so common now. "Before *tua nao* is used in a recipe, it is grilled or toasted, then ground."

Soy sauce (*nahm siu uu*): A lighter-style soy sauce is generally preferred by Thai cooks. "Sweet Indonesian soy sauce (*kecap manis*) is used only occasionally."

Yellow bean sauce (*dtow jiauw*): "This is a sauce based on yellow soy beans, which are salted and then fermented with rice mould... [it] tastes delicious, very much like Japanese miso." Its use usually indicates a dish of Chinese influence. There are two basic types: "the first, and more traditional is creamy white; the more common one is honey brown."

Peanuts and wing beans [winged beans] are also discussed in chapter 6.

Soy-related recipes: Murray perch and mushroom soup with yellow beans (*dtom het dtow jiauw*; p. 249). Light soy sauce (p. 341). Fermented bean curd simmered in coconut cream (*lon dtor huu yii*; p. 430-31). Deep-fried bean curd with crab, pork and spring onions. (*tor huu yord sai tort*; p. 440-42). Prawns and yellow beans simmered in coconut

cream (*lon dtao jiaw*; p. 444-46). Pickled ginger with yellow beans (*king dong dtow jiaw*; p. 457). Bean curd stir-fried with bean sprouts (*tor huu pat tua nork*; p. 462). Bean curd and bean sprout soup (*tgeng jeut or huu orn*; p. 469-70). Stir-fried Siamese watercress with yellow beans, garlic and chillies (*pak bung fai dtaeng*; p. 532-33). Yellow bean and ginger sauce (*nam jim dtow jiaw*; p. 545). Spicy yellow bean sauce (*nam jim dtow jiaw*; p. 558). Address: Chef, restaurateur, cookery writer, and preserver of traditional Thai culture, Sydney, Australia.

8274. Treloar, Brigid; Inge, Karen. 2002. *Healthy soy: Cooking with soybeans for health and vitality*. Hong Kong: Periplus Editions (HK) Ltd. Printed in Singapore. 112 p. Illust. (color). Index. 24 x 22 cm.

• **Summary:** This is a beautiful book, with stylish and informative full-page glossy color photos on every other page. It is well researched, comprehensive, and generally uses standard soyfoods terminology. It is also strange: We are not told in which country the publisher is located (perhaps Hong Kong or Singapore) or where the authors live. It is distributed in North America, Japan and Korea by Tuttle Publishing. On the inside rear dust jacket: www.tuttlepublishing.com. It is clearly targeted at a world market.

Contents: Introduction. The health benefits of soy: The heart, cancer, menopause, osteoporosis, weight control, allergies, lactose intolerance, the nutritional value of soy, protein, phytoestrogens, fats, calcium, soluble fiber, vitamins and minerals, energy, carbohydrates, how much soy do we need? (as an exchange for meat), how to use the nutrition table. Nutrition table (for various soyfoods). Soybeans: Green soybeans—fresh and frozen, dried soybeans, how to buy and prepare soybeans (selecting and storing dried soybeans, preparing dried soybeans, soaking, pan-roasting, boiling, pressure cooking, canned). Soy foods: Tofu (selecting and using, storing, freezing), bean curd sheets (yuba), deep-fried tofu (age; seasoned tofu), miso, tempeh, soya sauce (shoyu; regular, low-salt, light, tamari, ketjap manis), soy milk, soy flour, soy nuts, soy germ powder, soy oil, soybean sprouts, soybean paste (fermented), natto, soy dairy products (soy butter, soy spread {margarine}, soy cheese {plain or flavored}, cream cheese, yogurt, mayonnaise), soy meats (meat alternatives), others (soy breads, cereals, pasta, chocolate, chips, health bars, desserts, tofu ice creams), soy grits, tips (tofu, soy dairy products). Compatible soy flavors. Preparation and cooking techniques: Draining and pressing tofu, cutting tofu, deep-frying tofu, how to reconstitute yuba, how to use deep-fried tofu pouches, how to use miso, miso tips. Soups. Appetizers and dips. Light meals and snacks. Main dishes. Seafood. Vegetables. Salads. Desserts. Soy drinks. Glossary. Guide to weights and measures.

Note: This is not a vegetarian cookbook. Some recipes call for chicken, fish (swordfish, tuna, salmon), shrimp,

etc. Address: 1. Food writer, stylist, consultant, and cooking instructor [Australia]; 2. Nutritionist and nutrition correspondent for *Good Morning Australia*.

8275. Weil, Andrew; Daley, Rosie. 2002. *The healthy kitchen: Recipes for a better body, life, and spirit*. New York: Alfred A. Knopf; London: Ebury. xxviii + 325 p. Illust. (color photos by Sang An, Amy Haskell, and Eric Studer). Ports. Index. 24 cm.

• **Summary:** Lifelong good health starts in the kitchen. Includes 135 recipes; none require red meat, but not vegetarian. Rosie's introduction encourages: "Don't be afraid to work with new ingredients, such as... using tofu,..." The section on "Nutrition and health" contains useful information on the glycemic index (p. xx-xxi), the main sources of fat (p. xxi) and protein (p. xxiv) in the American diet. Eat more vegetable protein, especially from soybeans, "and less animal protein, especially from fish and reduced-fat dairy products. The section on "Stocking the pantry" includes Asian foods—soy sauce or tamari, and "miso paste "Made from soybeans" (p. xxxiii-iv).

Soy related recipes include: "A soy shake," with silken tofu (p. 3, for breakfast). The section "Got (too much) milk?" (p. 34-35) recommends soymilk as a healthful alternative. And in the "Poultry" section (p. 54), Weil suggests substituting baked tofu. Weil has a full page (p. 58) about "Soy sauce: Shoyu and tamari," which also mentions "rice starter (koji)." There are recipes for: "Vegetable nori rolls" with natural soy sauce (p. 72-73). Miso pâté (p. 80). Miso soup (p. 125). Meat and meat substitutes (incl. tofu and gluten) (p. 149-50). Greens with tangy miso dressing (p. 244-45). Address: 1. M.D., Clinical Prof. of Medicine, Univ. of Arizona and Director of its Program of Integrative Medicine; 2. Chef trained at the Cal-a-Vie spa near San Diego, former Oprah Winfrey chef.

8276. **Product Name:** [Organic Shoyu].

Foreign Name: Salsa de Soja (Shoyu) Organico.

Manufacturer's Name: M.O.A. Internacional.

Manufacturer's Address: Argentina.

Date of Introduction: 2002?

Ingredients: Soybeans, wheat, salt, water.

Wt/Vol., Packaging, Price: 900 cc bottle.

How Stored: Shelf stable.

New Product–Documentation: Visit with Carlos Planes at Soyinfo Center in Lafayette, California. 2012. Feb. 23. He brought this label in a scrapbook. Red, black and yellow on green. 2.75 by 4.5 inches. Carlos says MOA is a well-known company in Argentina, owned by Japanese, located on a little farm near Buenos Aires. He does not know when MOA started to make and sell Japanese-style soy sauce (shoyu) but he obtained this label from the product in Argentina in about 2002. MOA also made (and probably still makes) Japanese-style tofu.

8277. Menzies, Gavin. 2003. 1421: The year China discovered America. New York, NY: William Morrow & Co. (Imprint of HarperCollins). xix + 552 p. Illust. Index. 25 cm. [850* ref]

• **Summary:** Chapter 3, “The fleets set sail,” is describing the events in March 1421, when a Chinese fleet sailed from Tianjin near Beijing across the Yellow Sea. On board was an historian, Ma Huan, to document the voyage. His diaries, *The Overall Survey of the Ocean Shores*, were published in 1433. “The staple foods—soya bean, wheat, millet and rice—were carried in separate grain ships, enabling a fleet to stay at sea for several months without replenishing supplies... Soya beans, grown in tubs all year round, were used in several ways. Soaked in water, they sprouted ‘yellow curls’ from the green bean. The sprouting process increased the content of ascorbic acid, riboflavin and nicotinic acid, the basis of vitamin C, and protected the crew from the deficiency disease scurvy. The Chinese knew well the dangers of scurvy and the remedies to prevent it” (p. 65).

Note: This is the earliest English-language document seen (Nov. 2008) that uses the term “yellow curls” to refer to soybean sprouts.

When they ran out of fresh vegetables, “the sprouting soya beans were particularly valuable. Soya beans also produced ‘milk’. When boiled, it became curd, or tofu, rich in vitamin D, and the fermentation of soya produced soy sauce. Tofu and vegetables were flavored from a sauce made from fermented fish, soy, dried herbs and spices, or glutamate made by chewing wheat flour.” Address: London, England.

8278. Mescher, Kelly. 2003. Japanese expand minds and menus to new soyfoods: The Japanese are known for observing tradition. *Iowa Soybean Review* (Iowa Soybean Association, Urbandale, Iowa) 14(4):6. Jan.

• **Summary:** Discusses the “Japan Food Soybean Mission, in which the Iowa Soybean Promotion Board (ISPB) staff, board members, and Iowa food grade soybean exporters traveled to meet with soybean processors in Japan and to talk with them about market opportunities.”

“The soyfoods seminar provided cooking demonstrations for professional chefs, manufacturers, and food media in Japan.” An American chef, Michael Foley, prepared various dishes (whose names are given) using soy ingredients. “They ate everything. There was not a morsel left, and they wanted the recipes,” said Linda Funk, executive director of the Soyfoods Council. The Japanese are already fans of soy in its traditional forms, says Foley, “but these recipes were outside the box for them. To finish soups with soymilk, soy yogurt, and soy sauce is new to them... They were surprised at how good it tasted.”

One of the highlights was the first Soyfoods Foodservice Seminar. A color photo shows Linda Funk and Jim Stillman

(ISPB director) in a downtown market in Tokyo.

8279. Iino, Ryoichi. 2003. The history of shoyu (Soy sauce) 4. *Food Culture (Kikkoman Inst. for International Food Culture, Noda, Japan)* No. 5. p. 8-10. Feb. 20. <http://kiifc.kikkoman.co.jp>. [5 ref]

• **Summary:** Contents: Edo period—The production and diffusion of shoyu (soy sauce). The manufacture of soy sauce. From barley to wheat. Heating and *niban shoyu* (second soy sauce). Kijoyu (raw soy sauce) and the addition of dilutors. The center of production moves to Kanto (Tokyo area). Exports to Holland. Another name for soy sauce (*oshidashi*). Soy sauce with cooked dishes and soups. Grilled foods and soy sauce. Sashimi (raw fish) and soy sauce.

Another name: “We know that soy sauce became a standard seasoning relatively early in Japan by the fact that it is also began to be called *oshidashi*. The word *oshidashi* is written using the Chinese characters meaning foundation or base. The term was used during the Muromachi Era (1338-1573) to indicate soup stock or broth, which was the basic ingredient for flavoring foods. *Oshidashi* was used in the same way to later refer to soy sauce. There are several written examples of the use of the term *oshidashi* to indicate soy sauce including *Onna Chouhou-ki* (1692), the three-volume *Ukiyo Burou* (1811), *Tokaidouchuu Hizakurige* (1814) and *Kouto Gosui* (1850).” Address: Food historian, and teacher of food history, Hattori Nutrition College, Japan.

8280. **Product Name:** Trader Joe’s Organic Baked Thai Tofu.

Manufacturer’s Name: Trader Joe’s (Marketer-Distributor). Made by Wildwood Natural Foods in California.

Manufacturer’s Address: Monrovia, CA 91016.

Date of Introduction: 2003. February.

Ingredients: Organic tofu (filtered water, organic soybeans, nigari {magnesium chloride, a natural firming agent}), organic soy sauce (water, organic soybeans, sea salt, organic whole wheat, alcohol {to preserve freshness}), organic lemon juice, Fruitrim (fruit juice, natural grain dextrins), rice wine, organic garlic, organic ginger, organic brown rice syrup, organic cilantro, organic toasted sesame oil, peanut oil, jalapeno peppers, organic cayenne pepper, Thai curry paste (garlic, red chili, lemon grass, galangal, salt, ginger root, onion, pepper), organic lemon grass. Certified organic by Quality Assurance International (QAI). Manufactured in a facility that processes peanuts.

Wt/Vol., Packaging, Price: 7 oz (198 gm) vacuum pack. Retail for \$2.99 at Trader Joe’s (2003/02, Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Trader Joe’s Fearless Flyer. 2003. Feb. p. 5. “One of the greatest things about tofu, aside from its obvious health benefits, is its ability to absorb the

flavors of the marinades and spices with which it's cooked. We have two Organic Baked Tofus that will cause you to seriously reconsider how you view tofu."

Product with Label purchased at Trader Joe's in Lafayette, California. 2003. Feb. 16. 4 by 2 inches. Self-adhesive label on plastic bag. Red, purple, black, and white on greenish yellow. "Perishable. Keep refrigerated. Ready to eat." USDA Organic logo. QAI logo. 2 servings. Soyfoods Center taste test. 2003. Feb. 16. Delicious. Not too spicy.

8281. Bittman, Mark. 2003. The minimalist: Move over vinaigrette. *New York Times*. March 26. p. F3.

• **Summary:** As always, it is worth buying good soy sauce. "The standard brands (Kikkoman, Yamasa, San-J and so on) are fine, as is any soy sauce that lists as its ingredients only soy [beans], wheat, salt, and 'culture,' the yeast that makes the mixture ferment.

"Homemade ponzu will keep for several days with no loss in quality."

8282. Burke, Dan. 2003. The origins of Pacific Soybean & Grain in San Francisco (Interview). *SoyaScan Notes*. March 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Dan founded Pacific Soybean & Grain in 1973 in San Francisco. A number of circumstances led him to establish the company; it was not very intentional. His first soybean customers were all in San Francisco: Wo Chong (tofu manufacturer), Quong Hop (tofu manufacturer), and Wing Nien (maker of both traditional Chinese-style fermented soy sauce and HVP soy sauce).

In July 1978 Dan attended the foundation meeting of the Soycrafters Association of North America, in Ann Arbor, Michigan. He flew to the event with Jack Mizono of Azumaya. In Feb. 1993 his company moved from their address at 495 De Haro St., San Francisco, to their present address. Address: Founder, Pacific Soybean & Grain, One Sutter St., Suite 300, San Francisco, California 94104. Phone: 415-433-0867.

8283. **Product Name:** The Wizard's Organic Vegetarian Worcestershire Sauce (Regular, Wheat Free).

Manufacturer's Name: Edward & Sons Trading Co., Inc.

Manufacturer's Address: P.O. Box 1326, Carpinteria, CA 93014. Made in North Carolina.

Date of Introduction: 2003. March.

Ingredients: Apple cider vinegar*, tamari* (water, wheat, soybeans, salt), molasses*, filtered well water, wheat syrup*, salt, tamarind*, ginger root*, lemon juice concentrate, garlic*, spices*, xanthan gum, shiitake mushrooms*, citrus extracts*, spice extract*, natural smoke flavor.

Wt/Vol., Packaging, Price: 5 oz, 10 oz, and 8.5 oz bottle.

How Stored: Shelf stable.

New Product–Documentation: Sell sheet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo

West (Anaheim, California). 2003. March. Shows the bottles of three products. Regular (5 oz, 10 oz), and Wheat Free. On the rear is listed the ingredients and nutrition facts for each product.

8284. **Product Name:** Pete's Tofu 2 Go [Sesame Ginger Tofu with Jazzed Ginger Soy Sauce, Lemon-Pepper with Mango Chipotle Sauce, Santa Fe Sizzle with Pineapple Mango Fusion Sauce, Thai Tango with Mango Wasabi Sauce].

Manufacturer's Name: Sunrise Soya Foods.

Manufacturer's Address: 729 Powell St., Vancouver, BC Canada V6A 1H5. Phone: 1-800-661-2326.

Date of Introduction: 2003. March.

Ingredients: Sesame Ginger: Tofu (water, certified organic soybeans, calcium sulfate), whole sesame seeds, dehydrated ginger, dehydrated garlic, spices, soybean oil, soy sauce (water, wheat, soybeans, salt), vinegar, brown sugar, salt. Jazzed ginger soy sauce: water, soy sauce (water, wheat, soybeans, salt), brown sugar, dehydrated organic ginger, sesame seeds, sesame oil, vinegar, lemon juice, dehydrated onion, dehydrated garlic, citric acid, xanthan gum.

Wt/Vol., Packaging, Price: 14.4 oz (206 gm) in tray inside plastic bag. Retail for \$2.79 (2004/03, Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Leaflet (8½ by 11 inch, color) from Natural Products Expo West (Anaheim, California). 2003. March. "Pete's Tofu: Taking the guesswork out of tofu!" "Pete's Tofu: A whole new way to enjoy tofu."

Product (Sesame Ginger) with Label purchased at Trader Joe's in Lafayette, California. 2004. March 13. 4¼ by 8½ by 2 inches deep. Brown, green, black, and white on tan. Color photo shows four triangles of tofu around a square pan of the sesame ginger sauce with mint leaves on a red plate. "Made from organic soybeans. Cholesterol free, High in soy protein. High in calcium. No preservatives added. Ready-to-eat tofu with sauce for snacking and more." Contains two 6.2 oz pouches of tofu plus two 1 oz packets of sauce. Logo: "Certified organic by Quality Assurance International (QAI)." Soyfoods Center evaluation: This product comes in innovative packaging. Four tofu triangles (which have been marinated and baked, or deep-fried) are packed two-deep in each of two vacuum pack cubes. These cubes are placed in the two compartments (2½ inches square by 3/8 inch deep) of a plastic tray. The sesame ginger sauce comes in small plastic pouches. These three items are invisible inside the outer plastic bag. To serve. Cut open the vacuum pack cubes. Place tofu triangles in compartments of plastic tray. Cut open pouches and pour sauce over tofu. Eat as a finger food or with a food. Product concept: Excellent. Flavor and texture: Very good, but there is too much liquid in the two vacuum pack cubes; it must be drained off when they are opened.

8285. Tasty Eats, Inc. 2003. Finally, a meatless jerky with taste (Ad). *Natural Foods Merchandiser*. March. p. 96.

• **Summary:** This 8½ by 11 inch color ad shows five packages of the company's product: Soy Jerky—Dry Style: Original, Teriyaki, Ginger, Hot N' Spicy, and Peppered. For more information: www.TastyEats.com.

8286. **Product Name:** Soy Jerky—Dry Style (Original, Teriyaki, Ginger, Hot N' Spicy, or Peppered).

Manufacturer's Name: Tasty Eats, Inc.

Manufacturer's Address: 25 Greystone Manor, Lewes, Delaware 19958. Phone: 302-236-7503.

Date of Introduction: 2003. March.

Ingredients: Ginger: Textured soy protein (non-GMO), water, evaporated cane juice, expeller pressed sesame oil, spices, ginger powder, salt, white pepper, caramel powder (non-GMO cane juice).

Wt/Vol., Packaging, Price: 1.5 oz (42 gm) vacuum pack in paperboard sleeve. Retail for \$1.69 (2003/05, Berkeley, California).

How Stored: Shelf stable.

New Product—Documentation: Ad (8½ by 11 inch, color) in *Natural Foods Merchandiser*. 2003. March. p. 96. "Finally, a meatless jerky with taste." Four products with Labels purchased by Loren Clive at Berkeley Bowl Marketplace (California). 2003. May 21. 5.5 by 6.75 inches. Paperboard sleeve. Black, white, and orange on yellow. Front panel: Chinese characters at lower left. "Meatless. 97% fat free. Cholesterol free." Non-GMO logo. Back panel: "No additives. No preservatives. No MSG. No artificial coloring. No artificial flavoring. Product of Malaysia."

8287. Colbin, Annemarie. 2003. Interview with Irma Paule: February 9, 2002. *Macrobiotics Today* (Oroville, California). March/April. p. 10-13.

• **Summary:** A biography of Irma Paule, a pioneer in organizing macrobiotics in New York City, starting in about 1959-60, when Alcan Yamaguchi saved her life—free of charge. At the time, she was a young actress and a coffee addict, drinking 30 cups a day. Because she speaks French, she served as George Ohsawa's translator when he spoke in America. Yamaguchi and Herman Aihara had founded the Ohsawa Foundation in New York City. When they left for Chico, California, it fell into Irma's hands willy-nilly. She called it by various names, including the Ohsawa Foundation and the Macrobiotic Foundation. She gave lectures and advised people, but never charged for her services. She rented a small professional apartment at 217 Second Ave. where they had some Ohsawa books and sold organic brown rice, etc.

There was a swank Japanese restaurant named Musubi on West 56th Street, between 5th and 6th avenues. The Sato brothers invested money in that restaurant and Alcan

Yamaguchi ran it like a macrobiotic restaurant. There she first saw a machine for making rice cakes. Describes the death of Beth Ann Simon from Irma's recollections. Beth drank "three-fourths of a bottle of tamari soy sauce" shortly before she died. A photo shows Irma Paule. Address: PhD, Founder, Natural Gourmet Cookery School and Inst. for Food and Health, New York City.

8288. Kabourek, Jamie L.; Taylor, Steve L. 2003. Soyfoods and allergies: Separating fact from fiction. *Soy Connection (The)* (Jefferson City, Missouri—United Soybean Board) 11(2):1-2, 6. Spring. [24 ref]

• **Summary:** "True food allergy is an abnormal response of the immune system to certain components, typically naturally occurring proteins in foods." Food intolerances (such as lactose intolerance) are also abnormal reactions to food, but do not involve the immune system. "Food intolerances generally involve more mild symptoms and a lesser degree of sensitivity than true food allergies."

"More than 160 foods have been documented as causing food allergies." The "Big Eight" food groups which cause more than 90% of all true food allergies are: milk, eggs, fish, crustacea, peanuts, tree nuts, wheat, and soybeans.

"The most severe form of food allergy is anaphylaxis that can involve numerous symptoms and result in death due to cardiac or respiratory collapse."

Overall, IgE-mediated food allergy affects 2 to 2.5% of the total U.S. population. While the prevalence of soy allergy is not precisely known, it is less frequently encountered in infants and young children than allergies to eggs, milk, peanuts, and wheat.

"Soy allergy is also known to be a transient allergy of infancy and childhood, often being outgrown by age three. The prevalence of soy allergy in adults is not known but is thought to be less than peanut, tree nuts, fish, and shellfish in the U.S."

"Soy sauce has undergone fermentation and appears to be safe for sensitive individuals." "Soybean is a major allergenic food but is rarely known to induce severe anaphylaxis." Address: 1. M.S., R.D., Resource Manager; 2. PhD, Dep. head, and Co-Director. Both: Food Allergy Research and Resource Program, Dep. of Food Science and Technology, Univ. of Nebraska, Lincoln, NE.

8289. **Product Name:** Trader Joe's Organic Edamame Dip.

Manufacturer's Name: Trader Joe's (Marketer-Distributor).

Manufacturer's Address: Monrovia, CA 91016.

Date of Introduction: 2003. April.

Ingredients: Organic soybeans [edamamé], organic soybean oil, organic garlic, organic sesame seeds, organic lemon juice concentrate, organic tamari soy sauce (water, organic soybeans, salt, alcohol), cultured dextrose (cultured dextrose, silicon dioxide), salt, pepper sauce (vinegar, red peppers,

salt), spices.

Wt/Vol., Packaging, Price: 7 oz (198 gm) plastic tub. Retail for \$3.19 at Trader Joe's (2003/04, Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Product with Label purchased at Trader Joe's in Lafayette, California. 2003. April 13. 4.5 inches in diameter; 1.75 inches deep. Printed lid and tub. Green and black on white. "Perishable. Keep refrigerated." USDA Organic logo. QAI logo. 7 servings. "Distributed and sold exclusively by Trader Joe's... Allergy information: Processed in a facility that uses peanuts, milk, wheat & tree nuts." Soyfoods Center taste test. 2003. Feb. 16. Delicious. Flavor and texture similar to hummus. Not too spicy. Too expensive.

8290. Aoyagi, Akiko. 2003. McDonalds in Japan plans to launch a fried tofu burger (Interview). *SoyaScan Notes*. May 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Akiko recently saw a program on Japanese TV stating that McDonalds Holdings Co. (Japan) Ltd., the American burger giant, is experiencing lagging sales and decreasing profits for the first time in 29 years in Japan. In response they have decided to start selling a fried tofu burger as a healthy alternative in their Japanese restaurants, and to make other healthy additions to its Japanese menu. The new tofu burger will come with a ginger-flavored soy sauce and sell for \$1.91. McDonalds' problems include youth savvy competition from the Freshness Burger chain and fears about Bovine Spongiform Encephalopathy (BSE).

Note: An article in *Bluebook Update* (May 2003, p. 1) stated that On April 23, McDonalds Holdings Co. (Japan) Ltd., a mainstream foodservice company, is adding "tofu hamburgers" to its menu. Address: Walnut Creek, California.

8291. *World Grain*. 2003. ADM builds soy plant in China. 21(5):12. May.

• **Summary:** ADM is building a soy processing facility in Shanhaiguan, China, in a partnership with Wilmar Holdings. The plant will make ADM's Arcon line of soy protein concentrates, specialty soy flour for soy sauce fermentation, and whole edible soybeans.

In a separate report, China's State Grain Bureau predicted soybean crushing capacity could rise 27% this year, as new plants are built. That increase in capacity will probably increase Chinese demand for soybeans from the USA, Brazil, and Argentina.

China imported 10.385 million tonnes (metric tons) of soybeans in 2001-02 according to the USDA; this number is projected to reach 16 million tonnes in 2002-03.

8292. Hymowitz, Ted. 2003. Samuel Bowen and James Flint: Mung beans (Luk Taw), Chinese vetches, and soybeans (Interview). *SoyaScan Notes*. July 9. Conducted by William

Shurtleff of Soyfoods Center.

• **Summary:** Samuel Bowen coined the term "Chinese vetches" in about 1766 or 1767. We know that he used the term in London before May 1767 when he personally presented as sample of "Chinese vetches" to the Society for the Encouragement of Arts, Manufactures, and Commerce (see Templeman 1767). He also appears to have been the first to use the term "Luk Taw," but (curiously) we have only one record of its use—in the 1767 article by Henry Yonge.

Bowen and Flint first met on the ship *Success*, and sailed together on 13 June 1759 from Canton (site of the East India Company's trading post), via Ningpo north to Tientsin, where Flint disembarked on July 29. Bowen probably disembarked at the same time—but we are not sure. Although they were probably on the same ship for about 6 weeks, we do not know how well they got to know one another. Flint was stationed in China, where he had been an employee of the East India Company since 1736; he was the Company's interpreter and supercargo—a high, well-paid position. Bowen arrived in Canton from London as a lowly seaman on the East India Company's ship *Pitt*.

The two men probably parted in Tientsin; each somehow worked his way back to Canton via the overland route. The *Success* and her crew were lost at sea on the return voyage to Canton. Flint was imprisoned by the Chinese at Macao from Dec. 1759 to Nov. 1762, then banished forever from China. Bowen claimed that he was a prisoner in China for nearly 4 years and was carried from place to place throughout the country's interior. We do not know how long Bowen lived in Canton or southern China, where or how he learned how to make soy sauce, and where or how he got the soybean (and perhaps mung bean) seeds he took to Georgia. So he could have learned the word "Luk Taw" while he was in southern China. Flint, who had a sound knowledge of Chinese culture and language, could have given seeds to Bowen and advised him that they were valuable.

Bowen and Flint apparently returned to London on different ships, but they were both there in late 1763. On 16 Nov. 1763 Bowen petitioned the Court of Directors of the East India Co. for compensation. At about the same time, Flint petitioned the same Court. Ted is sure they met again at this time in London. They must have become close friends, because Flint later visited Bowen in Savannah, Georgia, and two of Bowen's sons bear the name "Flint."

Henry Yonge / Young had no Chinese ancestry or friends. Address: Prof. of Plant Genetics, Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8293. Wang, June. 2003. Pioneering work of Tau Wang, founder of First Vegetarian Foods Co., in introducing Chinese vegetarian foods to California (Interview). *SoyaScan Notes*. July 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** June's father, Tau Wang, was born in 1935 in

Shandong province, China. With his elder brother, he moved to Taiwan at age 11, became a veterinarian, married, and started a family. He was a Buddhist and a vegetarian. In 19?? he decided to emigrate to the USA. He knew it would take too much time and money to get another veterinarian's degree in America, so he went through culinary training and cooking school in Taiwan. In the mid-1970s (what year??), while in his 40s, he came to the United States and established what June believes is the first Chinese company to make vegetarian products in California—perhaps in the United States. While his family waited in Taiwan as he created a place for them, he began by working at a Chinese restaurant in Maryland for 1-2 years until he obtained his resident status. Then in the late 1970s (what year??) he moved to Southern California; he liked the semitropical climate and wanted to get away from the cold East Coast climate. In those days, most Chinese still lived in Chinatown in downtown Los Angeles. There he met some Buddhist friends from Buddhist temples. He soon realized that there were almost no Chinese vegetarian foods for them to choose from—other than tofu and vegetables. So he decided to start a company named First Food to make vegetarian foods to supply first the Buddhist temples in Los Angeles, with the hope of soon expanding. His first product was steamed Chinese buns (*mantou*), followed by “Vegetarian Duck” or *Suya* (made by simmering wheat gluten; pinyin: *mianjin*; W.-G. *mien chin*), and steamed and lightly salted wheat gluten (*kaofu*). He experimented with many different vegetarian foods that were not available in Los Angeles. One new product was konnyaku.

June (age 11) and her brother left Taiwan joined their father in Los Angeles in 1979. Mrs. Wang and three more daughters came 6 months later (summer 1980). Soon the whole family was working in the business after school. June recalls: “After school, we kids would go to work. After work, we would all go home and eat together as a family. Then we'd do our homework. We knew that our life had changed and we all had to pitch in and do whatever we could.” When June arrived, she spoke no English. But she learned and graduated from California State Polytechnic University, Pomona, with a degree in accounting.

In about the mid-1980s Mr. Wang introduced his first soy product which was “Vegetarian chicken” called “*Suichee*” (pinyin: *siji*; Wade-Giles: *ssu-chi*), made out of extra-firm pressed tofu. It was cooked in water seasoned with a little salt, then the water was pressed out and it was sold in the shape of a half-cylinder. When this product was successful, he extended the line with Mushroom *Suichee* and Savory *Suichee* (seasoned with soy sauce and his own blend of seasonings). In 1985 he incorporated the company.

Gradually his business expanded to Chinese restaurants, supermarkets, northern California, then to distributors servicing other states. Because of the language barrier, and because it was family-run sole proprietorship where he

pretty-much ran the whole show, with the help of his family and a few other workers.

June's father was concerned about what would happen to his business when he retired. Their foods were sold, packaged, and distributed only to the Chinese market. He also hoped it would expand beyond the Chinese market. After working outside the family business for a few years, June bought the business from him on 31 Aug. 1999, with the goal of helping her dad to realize his dream of expanding the business beyond the Chinese community. She invited her younger sister, Saline, to join her as a manager—and a potential shareholder. She soon launched a new line of Hispanic / Mexican hand-held meatless snack products named Starlite Cuisine, including 3 flavors each of Soy Taquitos (rolled in corn tortillas) and Soy Rolled Tacos (rolled in wheat flour tortillas)—both filled with textured soy protein concentrates. She hoped to sell these through Trader Joe's, but after sending many samples to the frozen foods buyer, he stole the product name and idea, and now Trader Joe's has its own Taquitos—Ugh!

A brief biography of Tau Wang's work has been written in Chinese. The company also makes an abalone alternative based on konnyaku; it contains no soy ingredients. Address: 1429 Virginia Ave., Suite F, Baldwin Park, CA 91706. Phone: 626-338-8233.

8294. Hymowitz, Ted. 2003. Re: Did Samuel Bowen introduce the soybean, the mung bean or both to North America? What about vermicelli. Letter (e-mail) to G. Hou at Univ. of Guelph, Ontario, Canada, July 14. 2 p.

• **Summary:** Prof. Hymowitz, after addressing each question in detail concludes: (1) Samuel Bowen introduced the soybean to North America and not the mung bean. (2) Vermicelli was a small business for Bowen compared to sago and soy sauce. Hymowitz cannot find any records of how Bowen made the vermicelli. “Thus I will omit from now on all suggestions that it was soy noodles. It could be that he made the noodles from wheat growing in the colonies and did not need or use mung or soy beans.”

“Thus the original hypothesis that Mr. Bowen introduced the soybean into North America in 1765 still holds. Was this the earliest introduction? I do not know! I have already indicated to you that the first ‘China Town’ in the New World was in Acapulco, Mexico. Most likely the soybean reached the shores of the New World via the Chinese sailors. However finding some evidence is very difficult.”

Talk with Prof. Hymowitz. 2003. July 16. Mr. Hou is a graduate student from China who is just finishing his PhD thesis. He has not indicated any interest in pursuing the history of the soybean. Ted thinks that Bowen applied for a patent on vermicelli because it was for plants growing in America, but it is odd because many people knew how to make vermicelli from wheat, he never exported very much, and he never showed or demonstrated the vermicelli to

anyone in the Colonies. He sent soy sauce, sago powder, and Chinese vetches to Franklin's society in Philadelphia, Pennsylvania; he did not send vermicelli. He got the patent because various people vouched for him; he didn't describe how to make any of the food products he patented. Ted worked with both mung beans and soybeans in Oklahoma. Bruchid beetles eat mung beans voraciously, but they do not eat soybeans. This is a point in favor of the vermicelli not being made from mung beans. Ted does not know if bruchid beetles eat wheat or wheat products.

There are no records concerning soybeans in Acapulco. Most of those records are in Seville, and a few may be in the state archives in Mexico City. Address: Prof. of Plant Genetics, Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8295. Katz, Ellix Sandor. 2003. *Wild fermentation: The flavor, nutrition, and craft of live-culture foods*. White River Junction, Vermont: Chelsea-Green Publishing Co. xv + 187 p. July. Illust. by Robin Wimbiscus. Index. 26 cm. [78 ref]
• Summary: This book introduces readers to fermented foods from around the world. Contents: List of recipes. Foreword, by Sally Fallon. Acknowledgments. Introduction. Cultural context: The making of a fermentation fetish. 1. Cultural rehabilitation: The health benefits of fermented foods. 2. Cultural theory: Human beings and the phenomenon of fermentation. 3. Cultural homogenization: Standardization, uniformity, and mass production. 4. Cultural manipulation: A do-it-yourself guide. 5. Vegetable ferments. 6. Bean ferments. 7. Dairy ferments (and vegan alternatives). 8. Breads (and pancakes). 9. Fermented-grain porridges and beverages. 10. Wines (including mead, cider, and ginger beer). 11. Beers. 12. Vinegars. 13. Cultural reincarnation: Fermentation in the cycles of life, soil fertility, and social change. Appendix: Cultural resources. Notes. Bibliography. Index.

Chapter 6, "Bean ferments," includes details on miso, miso pickles, koji, tamari, and tempeh—with instructions for making them at home plus recipes. Other chapters discuss: Kefir, cultured soymilk, and Sunflower sour cream (p. 90). Amazake (p. 118-20). Walt Whitman's poem on compost (p. 162). Von Liebig, whose 1845 monograph "laid the groundwork for the chemical agricultural methods that have become standard practice and that are rapidly depleting soils everywhere."

The author believes strongly that fermented foods have helped him and several friends to survive AIDS—a fascinating hypothesis! Address: Short Mountain Sanctuary, in the hills of Tennessee.

8296. *SoyaScan Notes*. 2003. Soy sauce cruets on the Web (Overview). Aug. 23. Compiled by William Shurtleff of Soyfoods Center.

• Summary: A search of the Web using Google and the terms

"soy cruet*" or "soy sauce cruet*" yielded the following results: (1) "George III silver 'soy' cruet label. Made by James Hyde in London circa 1785." 2.5 cm wide. Price: £245.00. Note: George III ruled England 1760-1820; he was king during the American Revolution. A "soy cruet label" hangs around the neck of a finely cut glass bottle [cruet] containing soy sauce to identify the contents. The word "soy" is stamped into it.

(2) "George III six bottle soy cruet. Price \$9,000. Dealer: Koopman Rare Art. All glass. Made in 1806 by Paul Storr. With tray."

(3) "The G-type soy sauce cruet released by Hakusan Toki in 1958. Masahiro Mori designed the cruet. 2.2 million have been sold to date."

(4) Modern pottery cruets: Greg Stahly, a student at Goshen College, uses the term "soy cruet" to describe a modern, wood-fired soy sauce dispenser. (5) Jennifer Kerr Marsch of Mosquito Mud Pottery, New Smyrna Beach, Florida, makes a "Soy sauce bottle or cruet." \$30.00. (6) A set of "Large stoneware rice bowls with a matching soy cruet," by Doug Hirely. Price for the soy cruet only: \$19.95.

(6) Bonhams & Butterfields—Sunset Estate Auction held in Los Angeles, California on 28 Sept. 2003, Sunday, at 10 a.m. Lot 7786. "Silver soy cruet frame with associated fittings. Estimate: \$250–\$500. Bearing marks for JA, London, 1820. Of shaped square form on paw supports, the frame for four same sized bottled centered with a handle, fitted with four associated bottles and stoppers. Height: 7¼ inches by width: 6 inches (14 oz. 10 dwts). Frame showing numerous repairs. Bottles are non matching, with associated stoppers and with damage." Contact: www.butterfields.com/areas/sunset.

8297. Kikkoman Corporation. 2003. Annual report 2003. Year ended March 31, 2003. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 30 p. 28 cm. [Eng]

• Summary: Consolidated net sales rose 1.7% to \$2.854 billion and operating income climbed 19.8% to \$69 million. Address: Noda, Japan.

8298. [How Kikkoman introduced soy sauce to America]. 2003. Television broadcast. KTSF (San Francisco—Channel 8 or 26). PBS. Oct. 4. 7-8:00 p.m. Series: Project X: Challenges. [Jap; eng]*

• Summary: This is an excellent Japanese-language documentary with English subtitles.

8299. Welters, Sjon. 2003. Re: Soyfoods in Russia. Letter to William Shurtleff at Soyfoods Center, Sept. 25. 1 p. Typed, with signature.

• Summary: Sjon found tofu in only one store in Russia, in a supermarket in Moscow, in the dairy case. He encloses the label. "We ate it. It tasted rather salty, and was like an extra-firm calcium chloride tofu, I would say. Not bad... The

only other soyfoods (not counting Maggi by Nestle) we saw were an Alpro (who else!) soymilk carton in the dairy section of a Moscow supermarket. This particular aseptic one-liter pack was made in Austria. The price was about 60 rubles (30 rubles = \$1). The other soyfood was Kikkoman soy sauce, a sweetened and an unsweetened variety, in small 12 fl. oz bottles. The price was 90 rubles each. That we saw on the way to Samara.”

In Russia, the situation concerning soy is “definitely at ground level. Soy is getting bad press in Russia, according to my hostess, as being bad for you. Specifics they could not give me, but it came up whenever they were promoting soy. Genetically engineered soybeans are not liked. That is a plus in my opinion.”

Sjon encloses a number of articles and the title pages of several books related to soy; he found them in the ACDI/VOCA office in Moscow.

8300. Product Name: Kikkoman Pearl Organic Soymilk (In Aseptic Carton) [Original, Creamy Vanilla, Green Tea], or Pearl Soymilk (Made with Organic Soybeans) [Tropical Delight with 7 Juices].

Manufacturer's Name: Kikkoman International, Inc. (Importer-Distributor). Made in Japan.

Manufacturer's Address: 50 California St., Suite 3600, San Francisco, CA 94111. Phone: 415-956-7750.

Date of Introduction: 2003. September.

Ingredients: Filtered water, whole organic soybeans, organic evaporated cane juice, organic green tea powder, tricalcium phosphate, organic natural flavors (lemon and vanilla), sea salt, carrageenan, vitamin A palmitate, vitamin D2. Certified organic by QAI.

Wt/Vol., Packaging, Price: 32 fl oz (1 quart) Tetra Brik Aseptic Carton.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Ad in *Vegetarian Times*. 2003. Sept. p. 11. Also: During late 2003 and early 2004 this product is advertised by Kikkoman on Japanese language TV in the USA; an Asian-American young person is showing drinking it.

Product with Label sent by Martine Liguori. 2007. Feb. Purchased at Grocery Outlet in Oakland, California. Paid \$0.59 for 1 quart of Green Tea. Regular retail price is \$2.29 to \$3.29/quart.

8301. Kikkoman. 2003. Soymilk for the purist (Ad). *Vegetarian Times*. Sept. p. 11.

• **Summary:** Shows five varieties of “Kikkoman Pearl” brand soymilk in 1 quart Aseptic cartons against a pearl-colored background. In the foreground is a glass of soymilk. The organic flavors are Original, Creamy Vanilla, and Green Tea. The Tropical Delight (With 7 Juices) is made with organic soybeans.

8302. Cook, Carla. 2003. Dining out: An Asian trek. A menu large enough to get lost in lets diners chart their own courses. *New York Times*. Oct. 19. p. NJ14.

• **Summary:** This is a review of a unique Chinese restaurant Sunny Garden (15 Farber Road, Princeton, New Jersey)—which also serves quite a few Japanese dishes. Recommended dishes include “Duck with black bean and ginger sauce.”

This Chinese restaurant also (amazingly) as its own sushi bar. And it serves salmon “surrounded by a shallow pool of sweet-and-sour sauce flavored with miso, mirin, and vinegar.” Also Teriyaki shrimp.

8303. Tsai, Ming; Boehm, Arthur. 2003. Simply Ming easy techniques for East-meets-West meals. New York, NY: Random House. *

• **Summary:** Recipes include: Hoisin-lime sauce. Roasted Miso-Citrus chicken.

8304. Product Name: Organic Teriyaki Sauce.

Manufacturer's Name: The Organic Soy Company, Ltd.

Manufacturer's Address: Unit A, 2 Corban Ave., Henderson, Waitakere City, Auckland 0612, New Zealand.

Date of Introduction: 2003.

Ingredients: Certified organic ingredients: Fermented soy beans, sea salt, cider vinegar, honey, ginger, garlic, water.

Wt/Vol., Packaging, Price: 275 ml glass bottle.

How Stored: Shelf stable.

New Product–Documentation: Label sent by Elizabeth Chalmers, owner. 2007. Jan. 22. The product was introduced by this company in 2003. White, black, and beige on red. 2.25 by 6.5 inches. “Ideal as marinade, condiment, or tasty cooking ingredient.”

8305. Choe, Ji Sook; Moriyama, Yukiko. 2003. Korean cooking for everyone. Tokyo, Japan: Joie, Inc. 112 p. Illust. (many color). Index. 26 cm.

• **Summary:** A cookbook of “quick & easy recipes,” each step of which is illustrated by numerous color photos. The Korean name of each recipe is given, written in both Korean characters and Roman letters. Many recipes are seasoned with soy sauce.

Soy related recipes: Assorted vegetables (Namool, with soybean sprouts and toasted sesame seeds, p. 44-45). Stuffed cabbage rolls (Cabbage sam, with firm tofu, p. 54-55). Seafood and vegetable omelet (Cheon, with firm tofu, p. 56-57). Tofu steak (Tuboo steak, with firm tofu, p. 60). Braised tofu (Tuboo chorim, with firm tofu, p. 61). Tofu hot pot (Tuboo cheongol, with firm tofu, p. 62). Tofu casserole with miso (Tuboo toenjjang chige, with tofu, red miso and white miso, p. 63). Vegetables and beef on rice (Bibimpap, with soybean sprouts, p. 64). Rice with soybean sprouts (Kongnamul bap, and with light soy sauce, p. 68). Stir-fried rice (Bokkumbap, with soybean sprouts and kochu jang, p.

69).

In the section titled “Preparation” is a subsection on “How to make kochu jang (hot sauce)” (p. 95). The major soy ingredient is “meju [soybean koji] powder.” “No one-pot dish, rice dishes, salads or stews are Korean without this sauce. Each Korean family has its own recipe, but the common method is the ‘slow and steady’ maturation to form a good harmony of hot, sweet and sour flavors. “Born from the severe weather and environment, *kochu jang* became the Korean’s masterpiece of seasonings. Make a large amount and store as it keeps well.”

The word “jang” is found in seasonings such as *kan jang* (soy sauce), *toen jang* (miso, soy bean paste), and *kochu jang* (hot fermented soy bean paste).

Koreans believe that “Food is a medicine.” When there is any disorder, the first thing to do is to take revitalizing food, rather than medicine (p. 102).

The glossary of “Ingredients” (p. 107-09) describes miso, nori seaweed, sesame oil, sesame seeds, soybean sprouts, soy sauce, tofu, and wakame seaweed.

8306. Farnworth, Edward R. 2003. Handbook of fermented functional foods. Boca Raton, Florida: CRC Press. 390 p. See p. 227, 295. Index.

• **Summary:** An overview, with two chapters on fermented soyfoods (natto and miso) cited separately. Chapter 1, titled “History of fermented foods” (p. 1-25) includes brief and vague histories of “Soy foods” including (p. 18-19) soy sauce, miso, tempeh, natto, and sufu [fermented tofu].

Chapter 4, titled “Kefir: A fermented milk product” (p. 77+) states (p. 85-86) that kefir can be made by growing kefir grains in soybean milk (Abraham and de Antini 1999, p. 327-33).

Chapter 9 is “Natto—A food made by fermented cooked soybeans with *Bacillus subtilis* (natto),” (p. 227-245).

Chapter 11 is “Miso: Production, properties, and benefits to health” (p. 277-87). Chapter 12 is “Korean fermented foods: Kimchi and doenjang” (p. 287-305). Soyfoods mentioned on page 289 include ganjang (soy sauce), doenjang (fermented soybean paste), chongkukjang (quick fermented soybean paste), and gochujang (hot chili pepper soybean paste); each of these is a major condiment in Korean cuisine. Address: PhD, Senior Research Scientist, Food Research and Development Centre, Agriculture and Agri-Food Canada, St. Hyacinthe, Quebec, Canada.

8307. Gusman, Jill. 2003. Vegetables from the sea: Everyday cooking with sea greens. New York, NY: William Morrow. ix + 131 p. Illust. (color). Index. 24 x 22 cm.

• **Summary:** Learn to identify, buy and prepare sea vegetables. Contents: Introduction: How to use this book, for time-conscious cooks, deep-sea treasures, the history of sea vegetables in world cuisines, how seaweed is cultivated and harvested, sea vegetables in your kitchen. Meet the sea

vegetables: Agar, alaria, arame, bullwhip kelp, dulse, fucus tips, grapestone, hijiki, Irish moss, kombu, laver, nori, sea lettuce, sea palm, wakame. Appetizers and meal starters. Soups and stews. Salads, Entrees. Side dishes. Rolls, wraps and sandwiches. Condiments. Sweets and treats. Beauty secrets from the sea. Mail-order sources.

Soy-related recipes include: Soy sauce and tamari (p. 21). Classic miso soup (with wakame and silken tofu, p. 40). Sweet-and-sour tofu stir-fry (with arame, p. 70-71). Age tofu [aburage] in sea palm (p. 77). Hijiki with deep-fried tempeh (p. 82). Contain a large color photos of each of the sea vegetables and each of the recipes. Address: Teacher, Chef’s Training Program, Natural Gourmet Cooking School, New York City.

8308. Hosoi, Tomohiro; Kiuchi, Kan. 2003. Natto—A food made by fermenting cooked soybeans with *Bacillus subtilis* (natto). In: Edward R. Farnworth. 2003. Handbook of Fermented Functional Foods. Boca Raton, Florida: CRC Press. 390 p. See p. 227-50. [111 ref]

• **Summary:** Contents: Fermented soybean foods in Asia. Ingredients of natto: *Bacillus subtilis* (natto) spores, soybeans (color, size, protein content, sugar content, washing and storage methods). Natto processing: Washing and soaking of soybeans, steaming of soybeans, inoculation with *Bacillus subtilis* (natto) spores, packaging, fermentation, packing for shipment, changes in packages. Assessment of quality: Chemical composition, sensory tests (8 criteria), changes in consumers’ preferences (growing preference for larger soybeans and natto with markedly weaker odors and strings). Health benefits: *Bacillus subtilis* (natto) cells (effects on intestinal microflora and feed efficiency, effects on the immune system, anti-allergy effect of subtilisin, fibrinolytic activity of subtilisin, role of vitamin K-2 (menaquinone-7) in the prevention of osteoporosis), phytoestrogens—effects on cancer and osteoporosis. Conclusions.

Natto and related foods are all made by fermentation with the bacterium *Bacillus subtilis* (natto). These include sweet dou chi (*xian doushi*) in China (where it is used as a seasoning for Beijing duck [Peking duck]), kinema in Nepal and Myanmar, *tua nao* in Thailand, and *chungkuk-jang* in Korea.

In the year 2000 a total of 10.1 million metric tons of soybeans in Japan were converted directly into foods; more than 80% of these soybeans were imported. Between 1991 and 2000 there was a 13% increase in soybean consumption for natto products.

Natto makers prefer to use certain soybean varieties such as Suzuhime and Suzumaru which are grown in Hokkaido, Kosuzu in Iwate, Miyagi, and Akita Prefectures, and Natto-Shoryo in Ibaraki Prefecture.

Natto makers generally desire the following qualities in soybeans: 1. Extra small or small size (for consumers from

Tokyo northward). 2. Easily washable. 3. Yellow surfaces and hila. 4. A suitable degree of stickiness when made into natto. 5. Relatively sweet taste. 5. Minimal changes in constituents and appearance during storage.

In Japan, soybeans are classified by diameter into four groups: (1) Extra small is less than 5.5 mm diameter. (2) Small is 5.5 mm to 7.3 mm. (3) Medium is 7.3 mm to 7.9 mm. (4) Large is greater than 7.9 mm in diameter.

Japan's leading natto trade association is called the "Federation of Japan Natto Manufacturers Cooperative Society."

A soybean allergen has been identified as *Gly m d 28K*. This allergen is found in high concentrations in various nonfermented soybean products such as soy protein isolate, tofu, dried frozen tofu, and yuba. However fermented soybean products such as natto, soy sauce and miso do not contain this allergen. "*Bacillus subtilis* (natto) produces a serine protease [proteolytic enzyme] of subtilisin NAT during its growth. Subtilisin NAT appears to degrade *Gly m d 28K*."

"Circulating platelets and blood-derived proteins (fibrin) are essential for the formation of blood clots, which prevent bleeding long enough for healing to occur. However, excess coagulation prevents normal physiologic blood flow, which causes thrombotic disorders. Thrombolytic therapy is the most direct means of restoring blood flow. *Bacillus* spp. produce serine proteases called subtilisins, which are known to have fibrinolytic activity" [8 references cited]. Address: 1. PhD, Tokyo Metropolitan Food Research Centre; 2. PhD, Dep. of Food Science and Nutrition, Kyoritsu Women's University. Both: Tokyo, Japan.

8309. Kingsley, Farina Wong. 2003. Asian. New York, NY: Simon & Schuster–Source. 119 p. Illust. (color photos by Maren Caruso). Index. 24 cm. Series: Williams-Sonoma collection.

• **Summary:** Facing each recipe is a full-page glossy photo. Soy-related recipes: Udon with tofu and egg (with "4 blocks deep-fried tofu (page 107) each 3 inches (7.5 cm) square," p. 14-15). Miso soup with tofu and seaweed (with "3 by 3 by 5-inch (7.5 by 7.5 by 13-cm) block soft tofu" and "6 tablespoons (3 oz / 90 gm) white miso paste," p. 40-41).

Stir-fried pork in black bean sauce (with "1½ tablespoons fermented black beans, well rinsed," p. 65) has a sidebar titled "Fermented black beans" which states: "Sometimes called salted or preserved black beans, fermented black beans are soybeans that have been dried, salted, and allowed to ferment until they turn black. They are distinctly pungent, have an almost smoky character, and are used mainly in Chinese cooking such as in this simple pork stir-fry. Before using the beans, gently rinse them in a fine-mesh sieve to remove excess salt... Sold in plastic bags, fermented black beans will keep for a year in a cool, dry place."

The "Ingredients" section (p. 106-08) has an entry for

tofu. The "Basic recipes" section has a recipe (p. 110) for Ginger-soy dipping sauce.

The Glossary (p. 112-15) contains entries for azuki beans, hoisin sauce, soy sauce, white miso paste.

Note: Recipes and text by Farina Wong Kingsley. General editor: Chuck Williams.

8310. Kwon, Hoonjeong; Kim, Young-Kyung Lee. 2003. Korean fermented foods: Kimchi and doenjang. In: Edward R. Farnworth. 2003. Handbook of Fermented Functional Foods. Boca Raton, Florida: CRC Press. 390 p. See p. 287-304. Chap. 12. [86 ref]

• **Summary:** Contents: Introduction. Kimchi: Changes during fermentation, cancer, cardiovascular disease, nitrosamines and ethyl carbonate.

Doenjang: Cancer (epidemiology, anticarcinogenic and antimutagenic activities in vitro and animal models), cardiovascular disease (inhibition of angiotensin converting enzyme, antithrombotic peptides), isoflavones. Conclusions. Conclusions. Acknowledgments.

Note: Angiotensin is an oligopeptide in the blood that causes vasoconstriction (constriction of blood vessels), increased blood pressure, and release of aldosterone from the adrenal cortex. It is a hormone. The inhibition of angiotensin converting enzyme is thought to help relieve medical conditions such as high blood pressure, heart failure, diabetic nephropathy and type 2 diabetes mellitus.

Table 12.1 titled "Fermented food consumption by the Korean population" (gm per person per day) gives statistics for the following soy based foods:

Ganjang (soy sauce): Overall 6.6, highest 8.0 in persons aged 30-49.

Gochujang (hot pepper-soybean paste): Overall 3.7, highest 5.2 in persons aged 30-49 years.

Doenjang (soybean paste): Overall 5.6, highest 8.0 in persons aged 50-64.

Jajang (black [soy] bean paste): Overall 1.1, highest 1.8 in persons aged 7-12.

Chongkukjang (soybean paste, quick fermented [Korean-style natto]): Overall 1.0, highest 2.4 in persons aged 65 or older.

Mixed bean paste: Overall 1.0, highest 1.5 in persons aged 30-49.

Total: 19.0, highest 24.4 in persons aged 30-49.

Source: Adapted from Ministry of Health and Welfare, Report on 1998 National Health and Nutrition Survey (Dietary Intake Survey), Korea Health Industry Development Industry.

Conclusion: There is presently no conclusive evidence showing human health benefits from consumption of Korean fermented soyfoods. Address: 1. PhD, Food Toxicology Div., Dep. of Food and Nutrition; 2. Research Inst. of Home Ecology. Both: Seoul National Univ., Seoul, Korea.

8311. Levenstein, Harvey A. 2003. *Paradox of plenty: A social history of eating in modern America*. Revised ed. Berkeley, California: University of California Press. ix + 353 p. Index. 23 cm. Series: California studies in food and culture No. 8. [1529* endnotes]

• **Summary:** This revised edition is identical to the original 1993 edition except that: (1) The publisher and cover are different. (2) It contains a new Epilogue (which updates the book, p. 256-67) after the last chapter, plus 56 endnotes that accompany it. The index appears to be the same. Levenstein was born in 1938. Address: Prof. Emeritus of History, McMaster Univ., Univ. of Hamilton, Ontario, Canada.

8312. Locricchio, Matthew. 2003. *The cooking of China*. Tarrytown, New York: Marshall Cavendish-Benchmarks Books. 71 p. Illust. (By Janet Hamlin; photos by Jack McConnell). Index. 26 cm. Series: Superchef.

• **Summary:** This thin hardcover book, an introduction to the regional cooking of China for young cooks, contains many color photos and illustrations. Soy-related recipes include: Hot and sour soup (*Suan La Tang*, with firm tofu and soy sauce, p. 28-29). Sweet and sour tofu stir-fry (*Tian Suan Dou Fu*, p. 42-43). Stir-fried beef wraps with smoked tofu (*Niu Rou Dou Fu Bao*, p. 52-53).

The section titled "Essential ingredients in the Chinese kitchen" (p. 68-69) includes Hoisin sauce, sesame seeds, shiitake mushrooms, soybeans, soy sauce, and tofu.

8313. Marquard, Wolfgang. 2003. *Kochen mit Soja-Sauce: die wuerze fuer jede Kueche* [Cooking with soy sauce: the seasoning for every kitchen]. Cologne, Germany: DuMont-Monte Verlag; Kikkoman Trading Co., Europe GmbH. 140 p. Illust. 23 cm. [Ger]*
Address: West Germany.

8314. Somerville, Annie. 2003. *Everyday Greens: Home cooking from Greens, the celebrated vegetarian restaurant*. New York, London, Toronto, Sydney, Singapore: Scribner / Simon & Schuster. xix + 395 p. Illust. by Mayumi Oda. Index. 24 x 19 cm. [30+ ref]

• **Summary:** A delightful and lovely vegetarian cookbook, filled with the spirit of Greens and Zen Center in San Francisco, California. Soy-related recipes: Crispy spring rolls with spicy dipping sauce (with ½ lb firm tofu brushed with tamari or soy sauce. The refreshing dipping sauce contains ¼ cup tamari or soy sauce, p. 5-6). Vietnamese spring rolls with peanut-hoisin sauce (with 14 oz firm tofu, p. 7-9). Tai's Vietnamese tofu sandwich (with 1 package regular tofu, 14 to 16 oz, fried, p. 129-30. "This warm, braised tofu sandwich is reminiscent of sandwiches sold by street vendors in the cities of Vietnam"). Spring stir-fry with peanut sauce and Thai basil (with ½ lb firm tofu, p. 210-11. For the sauce: "Be sure to use high-quality nonhydrogenated peanut butter; it makes all the difference here"). Udon with miso, shiitake

mushrooms, and bok choy (with ½ lb firm tofu, p. 246-48).

"The Asian pantry" (p. 358-60) includes entries for ginger, and "tofu or bean curd" (including silken tofu). "Condiments and seasonings" (p. 360-62) includes coconut milk, hoisin sauce ("This dark, intensely flavored sauce has a perfect balance of sweet and salt; that's what makes it so deliciously addictive"), miso, mushroom soy sauce, tamari, and toasted sesame oil. "The dessert pantry" (p. 363-66) includes various types of chocolate, soy milk ("For desserts and pastries, we prefer vanilla soy milk to plain soy milk; with its smooth vanilla flavor, it's especially good with chocolate"), almond paste ("just plain almonds ground with sugar"). Address: USA.

8315. Vergne, Elisa. 2003. *Chinese pavilion: Casual Chinese cooking at home*. San Francisco, California: Silverback Books. 119 p. Illust. (color photos by Yves Bagros). Index. 23 cm. *

• **Summary:** A recipe for Spinach and tofu calls for "2 tablespoons spicy fermented tofu" (p. 106).

8316. Hymowitz, Ted. 2004. Importance of early documents on soy cruets and soy cruet frames in England (Interview). *SoyaScan Notes*. Jan. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** These early documents add more evidence to and fill out the story of soy sauce in England. By the late 1700s, soy sauce was clearly important enough that it caught the attention of English silversmiths and glassmakers. That is the key. So they made and sold articles of craftsmanship to be used with soy sauce.

Most of this soy sauce was probably imported (more on private ships than on country ships) from East Asia. There must have been a lot of it, but we have no clear idea of how much. Some of the importers bypassed the customs houses. But in the late 1760s and/or early 1770s some of it was imported from the British Colony of Georgia in North America, where it was made by Samuel Bowen. Bowen was a salesman, who traveled back and forth between Georgia and England. Ted imagines (though he has no evidence) that when Bowen went on the ship to England, he took his soy sauce with him. Then he probably took the bottled sauce around personally to various retail stores. Ted knows the name of every single store in England where Bowen sold his soy sauce; he blundered into it in Europe about a year ago. Thus, some of the soy sauce made by Bowen in the Colony of Georgia and exported to England may well have ended up in glass cruets on tables in England.

Ted hires a person (a researcher, historian, vicar, etc.) and pays them by the hour to look into various collections where he has reason to believe documents may be hiding. Many of these are in "trusts" (such as the Wellcome Trust in England), but one needs permission from the trust before one can begin research; it often takes lots of time. Address: Prof.

of Plant Genetics, Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8317. Antique Web Galleries. 2004. George II style sterling silver soy ladle (Website printout—part). www.antiquewebgallery.com. 1 p. Printed March 23.

• **Summary:** Dated 1882, this ladle was made in London by Richard Bridgman, with a gilt bowl. Condition: Good. Price: \$125.00. Item ID: 20885. A large color photo shows the silver soy ladle.

Fax (letter) from Winston of Trace Mayer Antiques in Louisville, Kentucky. 2004. March 30. The soy ladle is 4½ inches long.

8318. Okazaki, Tetsuki. 2004. The role of the merchant coalition in pre-modern Japanese development: An historical institutional analysis. CIRJE-F-284. www.e.u-tokyo.ac.jp/cirje/research/dp/2004/2004cf284.pdf. 20 + [8] p. March. [59 ref]

• **Summary:** Shinbo and Hasegawa (1988, p. 262-63) pointed out that in 1780 a *kabu nakama* [merchant coalition] of merchants trading soy sauce from other regions was established in Kyoto; it formed a distribution system for soy sauce from the other regions and brought about soy sauce production in Tatsuno. This is an example of how a merchant coalition can contribute to forming a distribution network (p. 12).

Commodities whose prices are known during the period 1800 to 1840 in Edo (Tokyo) and Osaka are unpolished rice, polished rice, barley, soybeans, raw cotton, wax, muscovado, miso, soy sauce, and saké (p. 12-13). Note: Muscovado (also “muscavado”) is unrefined or raw sugar obtained from the juice of the sugarcane by evaporation and draining off the molasses. Address: Faculty of Economics, Univ. of Tokyo.

8319. **Product Name:** Soy Natto—Natto Boy Snack Nuts [Plain, or Sea Salt & White Soy Sauce].

Manufacturer’s Name: Soy Natto Food Co. (Importer-Distributor). Made in Japan.

Manufacturer’s Address: 1015 East Howard Ct., Visalia, CA 93292. Phone: 559-679-9699.

Date of Introduction: 2004. March.

Ingredients: Sea Salt: Soybeans, Subtilis natto, White soy sauce, sea salt.

Wt/Vol., Packaging, Price: 1.06 oz (30 gm) plastic pouch.

How Stored: Shelf stable.

New Product—Documentation: Sell sheet (8½ by 11 inch, color) sent by Patricia Smith from Natural Products Expo West (Anaheim, California). 2004. March. “New generation soy food: Soy natto.” “Healthy and happy snack from kids to seniors. Easy to crunch, enjoyable for snacking.” Also press release dated March 5, 2004. “Soy Natto Food Company is proud to unveil its new products, ‘Soy Natto Snack Nuts’... into North America and Europe Markets at Natural Products

Expo West at Anaheim, California on March 5, 2004. Soy Natto is a dried food product derived from fermented soy beans. Fermented soy beans, known as ‘Natto,’ have received positive attention for the natural enzyme, Nattokinase, and ability to help maintain a healthy circulatory system in addition to diversified beneficial functions.” Natto has a long history in Japan, going back many centuries. Contact: www.soynatto.com or info@soynatto.com.

Product with Label sent by Mike Masuyama, PhD, of Visalia. 2006. June. 4 by 6 inches plastic pouch. Two flavors. On the front panel is a color cartoon of Natto Boy, a soybean, with a smiling mouth, eyes, 2 hands, and 2 feet, On the sea salt flavor he is wearing a flat-brimmed yellow hat with a red flower in it. Nutrition facts and barcode are also on the front panel; there is no printing on the back of the package. The natto inside have been dried until crunchy, quite like soynuts. Soyfoods Center taste test. The salted ones have a good flavor and texture. The unsalted are quite bland.

Note: K. Mike Masuyama, PhD (Executive Vice President) and Christopher K. Maruyama (Marketing Manager) both sell “Spirit of the Sea” High Mineral Sea Salt. A leaflet (8½ by 11 inches, 3 panels each side) gives details.

8320. **Product Name:** White Tamari (White Soy Sauce), or White Golden Tamari (White Premium Soy Sauce).

Manufacturer’s Name: White Soy Sauce Food Co. (Importer-Marketer). Made in Japan.

Manufacturer’s Address: 1015 E. Howard Ct., Visalia, CA 93292. Phone: 599-740-8543.

Date of Introduction: 2004. March.

Wt/Vol., Packaging, Price: 300 ml glass bottle.

How Stored: Shelf stable.

New Product—Documentation: Leaflets sent by Patricia Smith from Natural Products Expo West (Anaheim). 2004. March. (1) A letter from Mike Masuyama, on company letterhead (printed in color) describing the product. White Soy Sauce Food Company is the U.S. marketing office of Nitto Jyozo Co., Ltd. of Japan. Both products were introduced to the American market at Natural Products Expo West at Anaheim, California, on March 5, 2004. White soy sauce, a traditional product in Japan, “is a golden color liquid condiment.” It has a “fruity aroma and a balance of salty, sweet and savory taste... It is different from conventional, dark or black soy sauce. The taste is a perfect companion for sushi, sashimi, tofu, seafood and natural foods. Unlike dark or black soy sauce, white soy sauce does not overwhelm the delicate flavor or darken the color of delicate foods.” “The Ninagawa family in the Mikawa region of [central] Japan [near Okazaki] revitalized the use of white soy sauce in the early 1910s.” It is a local seasoning, used mostly in that area.

(2) Color brochure titled “White Tamari (White Soy Sauce), or White Golden Tamari (White Premium Soy Sauce).”

Talk with Mike Masuyama, PhD, executive vice

president. 2006. June. 22. These products are both *shiro shoyu*, imported from Japan, and made in the Nagoya area. It has the lightest color of all types of Japanese shoyu—even lighter than usukuchi—and a slightly sweet taste. Note: In the 1983 U.S. soy sauce standards, it was called “clear shoyu.” It should not be confused with tamari.

Packet of materials sent by Mike Masuyama. 2006. June 25. Includes: (1) Five color recipe sheets (each 4 by 6 inches) for using White Tamari. One shows an authentic Arita Porcelain dispenser, with spray pump. Another is a Tofu-mushroom salad. (2) Color photocopy of: “People’s Choice Award, International Restaurant & Foodservice Show of New York, Best in Condiment / Ingredient, White Soy Sauce Food Company, March 5-7, 2006, New York, NY.” (3) Two-page leaflet titled “Cooking information: White Golden Tamari & White Tamari.” (4) Product review from www.thenibble.com. Black gold: The best soy sauces (undated). (5) Menu from JapaVege: Good food to go. Restaurant at 11410 South St., Cerritos, California. All “sushi served with organic rice & white soy sauce (no MSG).” (6) Corti Brothers (Sacramento, CA). (Undated). “Three new products from Japan: White Tamari (\$5.99 for 10.2 fl. oz), Golden White Tamari (\$7.99 for 10.2 fl. oz), and Yakishio.” Plus spray bottles, Arita ware, Gaho potter production (\$9.99 each). (7) An authentic Arita Porcelain dispenser, with spray pump (6½ inches tall). Red, white, green, gold and purple.

Note: K. Mike Masuyama, PhD (Executive Vice President) and Christopher K. Maruyama (Marketing Manager) both sell “Spirit of the Sea: High Mineral Sea Salt.” A leaflet (8½ by 11 inches, 3 panels each side) gives details.

8321. Ness, Carol. 2004. Kikkoman voted top vanilla soy milk: Taster’s choice. *San Francisco Chronicle*. April 28. p. F2. Food section.

• **Summary:** Five brands of organic soymilk were tasted and rated in descending order of preference as follows: 1. Kikkoman Pearl (73 points, \$2.29/qt at Rainbow). 2. Silk fresh (70 points, \$1.99/qt). 3. Pacific Select Low Fat (68, \$1.89/qt). 4. Vitasoy Smooth (66, \$2.09/qt). 5. Vitasoy Vanilla Delight (58 points, \$2.09/qt).

“Also tasted but unranked were Safeway Select Organic, WestSoy Plus, Soy Dream, Silk (boxed), Clover Stornetta, Trader Joe’s, Pacific Ultra, Wildwood, 8th Continent, Edensoy, and 365.” Address: Staff writer.

8322. **Product Name:** Whole Soymilk, Tofu Blocks, Soy Custard, Braised Tofu, Tofu Puffs, Tofu Noodles, Soy Omelette, Yuba (Tofu Skin), Poached Yuba Loaf. **Manufacturer’s Name:** Basic Soy Beanery (renamed Hodo Soy Beanery in Sept. 2005).

Manufacturer’s Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.

Date of Introduction: 2004. May.

Ingredients: See below.

Wt/Vol., Packaging, Price: -

How Stored: Refrigerated.

New Product–Documentation: Labels by brought to Soyinfo Center by Min Tsai on 2009. Sept. 16. Ingredients:

Whole Soymilk: Soybeans, filtered water (cane sugar is added to our sweetened soymilk).

Tofu Blocks: Soybeans, filtered water, calcium sulfate.

Soy Custard: Soybeans filtered water, calcium sulfate.

Ginger syrup: Filtered water, rock sugar, fresh ginger.

Braised Tofu: Soybeans, filtered water, soy sauce, cinnamon, anise, calcium sulfate.

Tofu Puffs: Soybeans, filtered water, soybean oil, calcium sulfate.

Tofu Noodles: Soybeans, filtered water, calcium sulfate.

Soy Omelette: Soybeans, filtered water, soy sauce, sugar, soybean oil.

Yuba (Tofu Skin): Soybeans, filtered water.

Poached Yuba Loaf: Soybeans, filtered water, soy sauce, white pepper, anise.

8323. *Sushi & Tofu (Free)*. 2004. The white soy sauce story. 4(6): May.

• **Summary:** Also in this issue is an ad for “White Golden Tamari & White Tamari–White Soy Sauce.” Contact www.whitesoyssauce.com or Info@whitesoyssauce.com.

8324. **Product Name:** Trader Joe’s Organic Firm Tofu.

Manufacturer’s Name: Trader Joe’s (Marketer-Distributor). Made by Wildwood Natural Foods in California.

Manufacturer’s Address: P.O. Box 3270, South Pasadena, CA 91031-6270. Phone: 818-441-1177.

Date of Introduction: 2004. May.

Ingredients: Organic soybeans*, filtered water, nigari (an extract of sea water). * = Organically grown and processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 16 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.

How Stored: Refrigerated.

New Product–Documentation: Product with Label purchased at Trader Joe’s in Lafayette, California. 2004. Brown, black, yellow, and white.

8325. **Product Name:** TofuTown (Organic Frozen Entrees) [Grilled Tofu Tenders in Tamari].

Manufacturer’s Name: White Wave, Inc.

Manufacturer’s Address: Boulder, Colorado.

Date of Introduction: 2004. May.

New Product–Documentation: Akasha Richmond. 2004. *Vegetarian Times*. March. p. 31. “Trends.” Shows the cover of a package. Below the title: “Add vegetables, pasta, or grains.” Talk with Akasha Richmond. 2004. Feb. 11. This product will be demoed at the Anaheim show, but will not

be in stores until a few months after that. Article in *Natural Foods Merchandiser*. 2004. Sept. p. 1, 9. "Demos to lead combined brands." White Wave has launched its TofuTown line of prepared "tofu tenders."

8326. Kikkoman. 2004. Kikkoman: The original teriyaki. *Gourmet*. June. p. 74-75.

• **Summary:** The unique ad (full page, color) consists of three tear-out recipes printed front and back on cardstock paper. On the front, each shows a bottle of a different type of Kikkoman teriyaki sauce with a slogan: Roasted garlic—"Respect the chicken." Marinade & sauce—"Respect the halibut." Toasted sesame—"Respect the tenderloin." On the back of each is the recipe with a color photo of the finished meat.

8327. *Food Processing (Chicago)*. 2004. Wellness Foods—New Product Profiles: Two next-generation analogues better simulate full muscle texture. 65(8):s38. Aug. 1.

• **Summary:** ADM has introduced NutriSoy Next using soy proteins combined with other vegetable proteins such as wheat gluten or, in some cases, egg whites. Using a twin-screw extruder with the ingredients at relatively high moisture levels of 50-80% locks in flavor and gives them a moist texture.

Garden Protein International has launched Gardein, which is extruded non-GMO soy protein and wheat. It comes in a variety of formats and flavors. "Beef, chicken, and pork analogs are available in small or medium shreds as well as 3/4 inch and 3/8 inch dice. Pre-sauce options include teriyaki, BBQ, sweet and sour, honey garlic as well as roasted garlic and pepper."

8328. *Easy Home Cooking*. 2004. A white miracle: White soy sauce. Vol. 12. Aug.

8329. Kikkoman Corporation. 2004. Annual report 2004. Year ended March 31, 2004. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 33 p. 28 cm. [Eng]

• **Summary:** This year's annual report is unfortunately a minimal and rather uninteresting version with almost no information about activities in the USA and Japan, and little financial information in dollars—only yen.

Consolidated net sales fell 2.4% to ¥334.656 trillion, operating income fell 4.8% to ¥69 trillion, but net income rose 11.7% to ¥9.287 trillion. Cash dividends per share were up 25%, to ¥10 from ¥8.

Message from the CEO (Yuzaburo Mogi, with color photo): "Summary of business policy. Business principles: The activities of the Kikkoman Group are shaped by three core principles: To pursue the fundamental principle 'consumer oriented.' To provide high-quality products and services and to promote the international exchange of food culture. To become a company whose existence is

meaningful to the global society.

"The future performance and prosperity of a company are the direct result of customer satisfaction. Indeed, optimizing satisfaction is the key to future growth and earnings. Accordingly, the Kikkoman Group continues to develop products imbued with value that mirror the ever-changing needs of consumers and that provide opportunities for new culinary experiences."

"In order to earn recognition as a socially responsible company whose existence is meaningful to society, Kikkoman is committed to deepening its involvement in social activities while working to assure that its operations co-exist in harmony with the environment."

"Business strategy: Overseas we are making progress ramping up production capacity at our plants in Wisconsin, U.S.A., the Netherlands and in Singapore. Shipments are also increasing steadily from our plant in China. With these developments, we are creating a foundation to enable us to meet new demand for, and stimulate greater consumption of, soy sauce in markets around the world."

The section titled "Soy sauce division" (p. 7) states: "In Japan the home-use sector, *Tokusen Marudaizu Shoyu* (premium soy sauce), *Gen-en Shoyu* (light soy sauce), *Tokusen Yuki Shoyu* (organic soy sauce) and other products generated strong sales. However, sales in the home-use sector were down year on year due to lower sales of 1-liter bottles of mainstay *Koikuchi Shoyu* (regular soy sauce)."

"From June 2003, Kikkoman progressively switched to using non-genetically modified soybeans for its soy sauce in response to customer calls for safe and reliable products that are free of any concerns surrounding genetically modified ingredients.

"Overseas, in the U.S. and Asia outside Japan, sales were sluggish in the first half of the year due to the Iraq war and fallout from SARS, but results improved in the second half on the back of a recovering economic picture. Sales continued to grow steadily in European soy sauce markets."

Small color photos across the bottom of pages 6-7 show bottles of various Kikkoman soy sauce products.

Note: SARS stands for "severe acute respiratory syndrome," a viral disease in humans. There was a near pandemic between Nov. 2002 (it began in south China) and July 2003, with 8,096 infected cases and 774 deaths. Address: Noda, Japan.

8330. Bryant, Anne. 2004. New developments with HVP soy sauce (Interview). *SoyaScan Notes*. Sept. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** New regulations require that the terms "HVP" and "hydrolyzed vegetable protein(s)" be made more specific; for example: "hydrolyzed soy protein" or "hydrolyzed wheat protein." This is related in part to a new allergy bill.

Concerning the international Codex Alimentarius,

ConAgra wants its La Choy brand HVP soy sauce to be able to be sold as “soy sauce” worldwide. The U.S. government is attending international meetings in support of ConAgra’s position. The Japanese position is that only fermented soy sauce should be able to bear the label “soy sauce.” Address: Center for Science in the Public Interest, Washington, DC.

8331. Skrzycki, Cindy. 2004. Feud ferments between soy sauce makers: The regulators. *Washington Post*. Sept. 21. p. E1, F4-F5.

• **Summary:** The dispute, which began several years ago, involves setting an international standard, under the auspices of the United Nations’ food standards program (Codex Alimentarius Commission), that would govern the manufacture and labeling of soy sauce. In 1998, the Japanese asked the Commission to define soy sauce as being fermented (“naturally brewed”) and aged.

But the proposal was not well received by the International Hydrolyzed Protein Council; some of its members make HVP soy sauce. The U.S. delegation wants both fermented and HVP soy sauce to be able to bear the label soy sauce. The issue has not yet been finalized.

8332. Soy Online Service. 2004. Uncovering the truth about soy (Website printout-part). www.soyonline.service.co.nz. Printed Oct. 28.

• **Summary:** A virulently antisoy website, with many links to other sites, anti-soy articles and books, etc. It was clearly initiated in New Zealand by the small group containing Richard and Valerie James and Mike Fitzpatrick. They were soon joined by Sally Fallon in the USA, and others (unknown) in the UK.

Contents: Home page–Site map (7 p.). 1. Introduction (4 p.). 2. History. 3. Hot reading. 4. Phytoestrogens: Soy & DES, the thyroid, male health, your baby, infertility, menopause, birth defects, cancer/leukemia, diabetes: Type 1, immune function, your pets, cognitive function [Lon White]. 5. Phytosterols. 6. GM soy. 7. Soy sauce. 8. Other toxins. 9. Doses simplified. 10. Soy allergies. 11. Soy politics. 12. SOS guidance. 13. Downloads. 14. Links. 15. Hot news. 16. Regulators. 17. Big Ugly Bull: Sanitation, FDA-CF-SCAN, Novogen, Abbott, Dr. Brian Strom, USDA, Unilever, NZ MOH (New Zealand Ministry of Health), ANZFA, Plunket, Israeli Officials, USB [United Soybean Board], Solae / DuPont / Bunge. 18. Testimonies. 19. Chicken roost.

A counter near the bottom of the Home Page states that this site has had 476,892 visitors since 27 April 1999. The information on this site cannot be printed unless you select the particular text you wish to print.

8333. Cui, Zhanglin; James, A.T.; Miyazaki, Shoji; Wilson, Richard F.; Carter, Thomas E., Jr. 2004. Breeding specialty soybeans for traditional and new soyfoods. In: KeShun Liu, ed. 2004. Soybeans as Functional Foods and Ingredients.

Champaign, Illinois: AOCS Press. xii + 331 p. See p. 264-322. [217 ref]

• **Summary:** Contents: Introduction. Soybean and soyfoods in China: Domestication of soybean, ancient utilization and processing, traditional soyfoods cultivars, current soyfoods markets, modern soyfoods cultivars (cultivars for bean curd {tofu} and soymilk, cultivars for small-seeded soybeans {sprouts, natto}, cultivars for vegetable soybeans {*maodou*}, cultivars for soy sauce, *doujiang*, *douchi*, and medicine, cultivars with improved seed composition).

Soybean and soyfoods in North America: Introduction of soybean, current soyfoods markets, modern soyfoods cultivars, genetic base and diversity of soyfoods cultivars. Soybean and soyfoods in Japan: Introduction of soybean to Japan, traditional soyfoods in Japan, current soyfoods markets, modern soyfoods cultivars (cultivars for tofu {bean curd} and soymilk, cultivars for *miso* {soybean paste}, cultivars for natto {fermented soybean; Japanese cultivars registered with the Ministry of Agriculture, Forestry and Fisheries (MAFF) include Suzumaru, Kosuzu, Natto-shoryu = Natto-Kotsubu}, cultivars for *nimame* {boiled soybean}, cultivars with low allergenic properties).

Soybean and soyfoods in Australia: Current soyfoods markets, modern soyfoods cultivars. Breeding for the soyfoods market: Tofu (environmental influences on tofu yield and solubility of seed dry matter, genotypic effects on tofu yield, seed protein and gelling properties of tofu, seed color, sugar content, undesirable flavors in tofu), natto, *edamame* or *maodou*, soymilk. Designing future soyfoods cultivars: Increasing protein and oil concentration, soybean protein composition (potential for altering protein composition, mutations in 7S storage-protein genes, mutations in 11S storage protein genes, influence of nutrition on storage protein gene expression, association with protein functionality), soybean carbohydrate composition (genetic regulation of oligosaccharide content), soybean fatty acid composition (genetic modification to reduce saturated fatty acid composition, genetic modification to alter unsaturated fatty acid composition, influence of multiple gene combinations on oil composition), Tocopherols and isoflavones in soybean seed (tocopherols, isoflavones). Summary. Acknowledgments.

8335. Liu, KeShun. 2004. Soy sauce as a natural seasoning. In: KeShun Liu, ed. 2004. *Soybeans as Functional Foods and Ingredients*. Champaign, Illinois: AOCS Press. xii + 331 p. See p. 248-263. [33 ref]

• **Summary:** Contents: Introduction. Types of Soy Sauce. Production of fermented soy sauce: Treatment of raw materials, koji making, brine fermentation, pressing, refining. Principles of making fermented soy sauce: Action of koji enzymes, fermentation of lactic bacteria and yeasts, color and flavor formation, formation of sugars and alcohols, formation of amino acids, function of salt. Enzymatic method—an alternative to traditional fermentation. Chemical and semichemical soy sauce. Proximate composition, quality attributes, and grades. Application of soy sauce.

Figures: (1) Outline of typical preparation process for koikuchi shoyu, the most common Japanese type of soy sauce.

Tables: (1) Differences in chemical components between brewed (fermented) and nonbrewed (chemical) soy sauces. (2) Applications of soy sauce on various types of food. Address: Univ. of Missouri, Columbia, Missouri.

8336. Pearlstein, Leo; Messinger, Lisa. eds. 2004. *Mrs. Cubbison's best stuffing cookbook: Sensational stuffings for poultry, meats, fish, side dishes, and more*. Garden City Park, New York: Square One Publishers. v + 148 p. Illust. Index. 19 x 19 cm.

• **Summary:** Includes a brief (and very incomplete) biography of Sophie Cubbison, with a photo of "Cubbison's Health Food Store." Several of the recipes (see p. 60, 88) call for soy sauce. Address: 1. President of Lee & Associates, Inc., Los Angeles; 2. Award-winning cookbook review columnist and food story writer.

8337. Bittman, Mark. 2004. Japan's liquid gold [shoyu]. *Travel & Leisure*. Nov. *

• **Summary:** The writer travels to Kyoto, Japan, where he visits Denkichiro Matsuno's shoyu factory. He describes how traditional shoyu is made (including koji and moromi) and discusses possible origins and early history of shoyu and its place in Japanese culture. Regular shoyu (*koikuchi*) is fermented for 18 months and double-fermented (*saishikomi*) is fermented for 2 years. Matsuno's family has been making shoyu since 1805; he is the 6th generation to run the business. He makes 26,000 gallons of shoyu a year whereas the big Kikkoman factory in Noda turns out more than 90,000 gallons a day! Today about 1,600 companies make at

least 12 different varieties of shoyu in Japan and Kikkoman is the largest.

Bittman then visits Tsukiji, the bustling central fish market in Tokyo, and has sushi (with shoyu) for breakfast. Every piece of fish is glazed with a light sauce of shoyu and mirin just before being served. "This mixture, on which the best chefs pride themselves, is added to daily, often making the base years and years old. My dining companion whispered, 'If there's ever a fire, the shoyu base is the first thing the chef will grab.'"

For dinner, after a hot public bath, he enjoys freshly made soba (buckwheat noodles) served with *soba tsuyu*, a dipping sauce made of shoyu, mirin, and dashi. His friend orders mixed tempura, served with shoyu (of course) followed by *soba yu* the water in which the soba noodles were cooked. They mixed it with leftover *soba tsuyu*, spiked it with chili and shoyu, then drank it like tea—a great tradition. Conclusion: "Shoyu makes everything taste good."

A photo shows a Japanese man pouring fresh koji from a wooden scoop into a wooden koji tray.

8338. Product Name: Spicy Braised Tofu, Kung Pao Tofu Salad, Spicy Yuba Syrips.

Manufacturer's Name: Basic Soy Beanery (renamed Hodo Soy Beanery in Sept. 2005).

Manufacturer's Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.

Date of Introduction: 2004. December.

Ingredients: See below.

Wt/Vol., Packaging, Price: -

How Stored: Refrigerated.

New Product—Documentation: Labels by brought to Soyinfo Center by Min Tsai on 2009. Sept. 16. Ingredients:

Spicy Braised Tofu: Soybeans, water, calcium sulfate, star anise, teriyaki sauce, vinegar, chili oil.

Kung Pao Tofu Salad: Soybeans, water, calcium sulfate, soy sauce, tea infusion (loaf is smoked over tea leaves), teriyaki sauce, chili oil, vinegar, peanut, cilantro.

Spicy Yuba Syrips: Soybeans water, soy sauce, sugar, soybean oil, teriyaki sauce, vinegar, chili oil.

8339. GEM Cultures. 2004. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437-4127. 10 p. Undated. [4 ref]

• **Summary:** Contents: Greetings from Northern California. Soycrafters section: Powdered tempeh starter, natto starter, koji starters, fresh koji, seed miso, tofu boxes [kit], coagulants. Bread and crepe cultures: Cultured crepes, cool rise natural leaven, rice or rye sourdough. Dairy cultures: Fil mjolk (subs for piima), viili, kefir. Tea fungus—kombucha. Kitchen items: cheesecloth, super sealers. Ordering information. Address: Fort Bragg, California. Phone: 707-964-2922.

8340. Blussé, Leonard; Viallé, Cynthia; Rummelink, Willem; Daalen, Isabel van. eds. 2004. *The Deshima diaries marginalia, 1740-1800.* Tokyo: Japan-Netherlands Institute. xl + 898 p. Illust. Maps (some color). Index of ship's names. Index of geographical names. Index of non-Japanese names. Index of Japanese names. Subject index. 27 cm. Series: Scientific Publications of the Japan-Netherlands Institute No. 2. [99 ref]

• **Summary:** "The basis for the present text are the Deshima [Japan] *dagregisters...*" of the Nederlandsche Oost-Indische Compagnie. Comptoir, Nagasaki.

Contents: Fold-out color Japanese map of Nagasaki in the 1700s, with numbers and accompany legend inserted for key places by the editors. Three other fold-out color illustrations. Map of the route to and from the Shogun's court in Edo (today's Tokyo), with a circle giving the name of each overnight place. The route to Edo goes across Kyushu then along the southern coast of Japan's main island (Honshu). The route back is largely by boat through the Inland Sea to Shimonoseki, than back across Kyushu. List of illustrations. Contents. Foreword. Editorial note. Introduction. Diary kept for one year (starting in about mid-November or early December) by each *Opperhoofd* (Chief of the Dutch factory on Deshima with the rank of Senior merchant). Appendixes (4; secret diaries and private notes). Sources (with NFJ numbers at the Dutch National Archives, The Hague). Glossary.

The legend to the color fold-old map of Nagasaki Bay and city includes: (6) Dutch ship at harbor. (7) Deshima. (9) Government house. (10) Chinese island (about the same size as Deshima, but just to the south of Deshima). (11) Chinese garden. (12) Junk from Nanjing. (13) Boats of the Shogunal guard. (14) Shogunal guard at Tomachi. (15) Tow boats. (16) Dutch ship arrives. (17) Shogunal guard from Nishidomari. (18) Junk from Fuzhou arrives.

In the index there are many entries under: Chinese—Island. And under Seaweed.

Note: Soy sauce is not mentioned in the Index under "Chinese—Island." Very little has been written in English about the activities of the Chinese traders who lived on this artificial island in Nagasaki harbor—very near the island of Deshima, where the Dutch traders were confined. The Chinese traders at Nagasaki were confined to a walled compound, and their activities, though less strictly controlled than the Dutch, were closely monitored and scrutinized by the Governor of Nagasaki. Many questions arise: What is this island called? What kind of Chinese organization(s) occupied the island? Was it a single private company like the Dutch East India Co., or was it a collection of independent Chinese merchants, or something else? When did the Chinese island compound start to be used as a trading post? When did it cease to be used? Did the Chinese export or import any soy products? If yes, which ones, how much of each per year, from when to when. Where were these products sold? Inside

China or outside? Address: Netherlands.

8341. Elliot, Rose. 2004. *New vegetarian cooking: 120 fast, fresh, and fabulous recipes*. New York, London, Toronto, Sydney: Simon & Schuster. 192 p. Illust. (color). 28 cm. Index.

• **Summary:** Contains many full-page color photos, mostly of dishes prepared from recipes. Chapter 1: Why I'm a vegetarian: Being a healthy vegetarian or vegan, get slim and stay slim, eating for two, nurturing the next generation, look younger, live longer. Chapter 6 is titled "Tofu, tempeh, and seitan" (p. 138-61). Other soy-related recipes and info include: Soy milk (p. 13, 20, 21, 23, 188). Green soybeans [frozen edamame] (with soba, p. 60, 61). Tofu mayonnaise (p. 66). Breakfast smoothie (p. 118, with soy milk, rice milk, or almond milk). Soy yogurt (p. 119, 188). Soy sauce (p. 153, 188). Soy creamer (p. 169, 188). Also discusses: Sea vegetables (arame, hijiki). Quinoa.

8342. Flanders, Judith. 2004. *Inside the Victorian home: A portrait of domestic life in Victorian England*. New York & London: W.W. Norton & Company. 416 p. See p. 279. [300+* ref]

• **Summary:** In Chapter 7, The dining room, we read (p. 279): "One cookbook recommended as a basic list,...curry powder, soy, anchovy-sauce, Lucca [i.e., olive] oil,... Chili vinegar, Harvey sauce, tomato sauce,..." Address: Author, London, England.

8343. Fukushima, Danji. 2004. Industrialization of fermented soy sauce production centering around Japanese shoyu. In: Keith H. Steinkraus, ed. 2004. *Industrialization of Indigenous Fermented Foods*. 2nd ed. Revised and Expanded. New York, NY & Basel, Switzerland: Marcel Dekker. xix + 796 p. See p. 1-98. Chap. 1. [179 ref]

• **Summary:** Contents: Introduction. History: Historical development of soy sauce in China (Chiang, shih), introduction of soy sauce in Japan, origin of fermented soy sauce in the United States. Present soy sauce situation: Japan (types of soy sauce, manufacturing, flavor components and quality evaluation), China, Southeast Asia, United States. Change of soy sauce manufacturing methods from indigenous to modern processing: Treatment of soybeans and wheat as materials, koji fermentation, brine fermentation, pressing, pasteurization, refining and bottling. Microbiology and biochemistry: Role of koji as an enzyme source (unique source of enzymes, peptidases in koji, role of proteinases in koji during protein digestion, role of glutaminase in koji in formation of glutamic acid during protein digestion) effect of heat treatment of soybean proteins on their digestibility and nutritive value (enzyme digestibility and yield of soy sauce, enzyme digestibility and nutritive value of protein), microorganisms during brine fermentation in soy sauce (change of microflora during brine fermentation,

properties of *Tetragenococcus halophilus*, properties of *Zygosaccharomyces rouxii*, properties of *Candida species*), safety of soy sauce and physiological functional properties (Studies of mycotoxins and safety of soy sauce, studies of mutagens and safety of soy sauce, long-term animal tests and anticarcinogenicity of soy sauce, other physiologically functional properties of soy sauce). Application of new technology for soy sauce manufacture: Manufacture of soy sauce through fermentation by bioreactor with immobilized whole cells, enzymatically hydrolyzed vegetable protein, breeding of koji mold through protoplast fusion. Forecast.

Contains 68 figures and 23 tables.

The section titled "Origin of fermented soy sauce in the United States" states (p. 10) that in 1907 a plant manufacturing fermented soy sauce was opened in the United States by Shinzaburo Mogi—a relative of the Mogi family of Kikkoman fame. Note: The author does not say where this plant was, nor does he cite any evidence to support his claim. As of Jan. 2005, Soyfoods Center has been unable to find any firm evidence that such a plant was opened.

"After that, another soy sauce company named Oriental Show-You Company was promoted in 1917 in Columbia City, Indiana." Shinzaburo Mogi was one of the stockholders in this company. Shinzo Ohki, a Japanese man living in the USA, began to make regular (koikuchi) shoyu in the traditional Japanese way, and at one time was making 30,000 gallons/year. In 1961 the Oriental Show-You Co. was sold to Beatrice Foods, Inc. and subsequently became part of La Choy Food Products which was also owned by Beatrice.

Figure 12 (p. 28) shows imports of soy sauce to the USA from 1947 to 1981. This graph was taken, without citing the source, from: Shurtleff & Aoyagi. 1985. *Soyfoods Industry and Market*, 5th ed. p. 103.

Concerning the soy sauce market in the United States (p. 28-31): In 1973 Kikkoman opened its first plant to make fermented soy sauce at Walworth, Wisconsin. In 1998 Kikkoman opened a 2nd such plant in California. In 2001 these two Kikkoman plants made 85,000 kiloliters and 20,000 kiloliters (kL) of soy sauce respectively, for a total of 105,000 kL. To take advantage of the rapidly growing American market for soy sauce, several other foreign manufactures also opened plants making fermented soy sauce. In about 1980, Wan Ja Shan (Taiwan) opened a plant making regular Japanese-style soy sauce (koikuchi). In 1991 San-J (San Jirushi, Japan) opened a plant making tamari soy sauce. In 1994 Yamasa (Japan) opened a plant in Salem, Oregon. In 2001 the total annual production of these 3 plants was estimated at about 20,000 kL. In addition, HVP soy sauce (unfermented) is made and sold in the USA under brands such as La Choy, Chun King, and Aloha—with total production in 2001 estimated at 15,000 kL. Thus in 2001 total soy sauce production in the USA was estimated at 140,000 kL with the following market shares: Kikkoman

75%, 3 other makers of fermented soy sauce 14.2%, and HVP 10.7%. Figure 14 shows total U.S. consumption of soy sauce from 1950 to 2001, including total domestic production, total Kikkoman U.S. production, and total imports. Address: Noda Inst. for Scientific Research, Noda-shi, Japan.

8344. Grimaldi, Polly. 2004. Quick and easy soy and tofu recipes. Hayward, California: Bristol Publishing Enterprises. (A Nitty Gritty book). iv + 155 p. Illust. Index. 14 x 21 cm.

• **Summary:** Contents: 1. An introduction to tofu and soy. 2. Breakfast. 3. Entrees. 4. Side dishes. 5. Salads. 6. Soups. 7. Sauces, spreads, dips and snacks. 8. Breads. 9. Drinks. 10. Desserts. Address: Hayward, California.

8345. Hottinger, Greg. 2004. The best natural foods on the market today: A yuppie's guide to hippie food. Vol. I. Asheville, North Carolina: Huckleberry Mountain Press. 223 p. Index. 23 cm. [94 ref]

• **Summary:** This book looks very commercial because it mentions many natural products by brand name. We wonder if companies paid to be mentioned. Contains scattered recipes for branded products, and scattered sidebars titled "Hippie wisdom." Discusses: Almonds, almond butter, almond milk, American Miso Co., antibiotics (used in agriculture in 4 different ways; prevention, treatment, and control or disease, and growth promotion. In 1998 the European Union banned the use of antibiotics to promote growth in livestock. In Oct. 2000 the FDA proposed a ban on two antibiotics also used to treat humans), antioxidants, Bifidobacterium (bifidus), bovine growth hormone, bovine somatotropin (BST), Bragg Live Foods, Bragg Liquid Aminos, breast cancer, calcium, canola oil, celiac disease, cereal & Kellogg Brothers, cheese alternatives, dulce, edamame, Eden Foods (says "Eden Foods opened shop in 1968. By 1969 they were grinding their own flours and bottling their own oils and nut butters"), FDA, flaxseed oil, Galaxy Foods (says they "started in 1972 when founder Angelo Morini invented a new way to make a cheese product free of saturated fat, cholesterol, and the milk sugar, lactose"), genetically engineered foods, ghee, ginger, gluten sensitivity, glycemic index, GMO [genetically engineered] crops, Graham-Sylvester, heart disease, hippie foods, Horizon Organic, hormones, Lactobacillus, lactose intolerance, Lappe-Francis Moore, Lightlife Foods, magnesium, Maine Coast Sea Vegetables, Messina-Mark, milk-problems with, miso, Miso Master brand, nutritional yeast, oils, olive oil, omega-3 and omega-6 fatty acids, organic farming, palm oil, phytochemicals, phytoestrogens, prostate cancer, protein, Red Star nutritional yeast, quinoa, saturated fat, sodium, soymilk, soy products, soy sauce, soy supplements and concerns, soy yogurts, spelt, Stonyfield Farm, tahini, tamari, tempeh, trans fats (hydrogenated oils), WholeSoy Company. Near the back are many color coupons

for the companies mentioned in the book by name. Address: MPH, RD, Asheville, North Carolina.

8346. Steinkraus, Keith H. ed. 2004. Industrialization of indigenous fermented foods. 2nd ed. Revised and expanded. New York, NY & Basel, Switzerland: Marcel Dekker. xix + 796 p. Illust. Pseudo-Index. 24 cm. Series: Food Science and Technology No. 136. [508 soy ref]

• **Summary:** This book contains the following chapters on soyfoods: 1. Industrialization of fermented soy sauce production centering around Japanese shoyu, by Danji Fukushima. 2. Industrialization of Japanese miso fermentation, by Hideo Ebine. 4. Industrialization of Japanese natto, by Kan Kiuchi and Sugio Watanabe (incl. yukiwari-natto, a special product of Yamagata prefecture, p. 196). 11. Industrialization of tempeh fermentation, by Kapti Rahayu Kuswanto. 12. Tempe production in Japan, by Michio Kozaki. It also contains chapters on the industrialization of the production of sake, tapai, African beers, magehu, ogi, gari, Mexican pulque, Thai fish sauce (nam pla), Thai fermented fish and related products, and Myanmar fish paste and sauce.

The final chapter is titled "Industrialization of indigenous fermented food processes: Biotechnological aspects."

Soy-related chapters are also cited separately.

Note: Cornell Prof. Emeritus Keith H. Steinkraus died on 13 Nov. 2007 at age 89. He was a specialist in indigenous fermented foods and food microbiology. Address: Inst. of Food Science, Cornell Univ., Geneva, New York.

8347. Stevens, Alan M.; Schmidgall Tellings, A. Ed. 2004. A comprehensive Indonesian-English dictionary. Athens, Ohio: Ohio University Press. xviii + 1103 p. 27 cm. [Ind; Eng]*

8348. Chajuss, Daniel. 2005. Brief biography and history of his work with soy in the USA and Israel. Part I (Interview). *SoyaScan Notes*. Feb. 19. Followed by numerous e-mails through Dec. 2007. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Daniel was born on 23 Sept. 1936 in Jerusalem, Palestine, the son of Elijah Mathew Chajuss (a flour miller, born on 12 April 1903 in Jerusalem) and Dvora Margaliot, born on 4 April 1908 in Tiberias, a town on the western shore of the Sea of Galilee (which today is in northeast Israel). Both his parents were born before World War I when Palestine was still part of the Ottoman Empire; Turkish (written in Arabic script) was the official language, but Hebrew was the main language of the Jewish population.

The family name was pronounced "Chayes" (or "Hayes") but was written "Chajuss." Within the family and among close friends it was pronounced "Khatuth" or "Khayooth," where the initial "ch" is pronounced like the non-initial German *ch* as in *Bach*. Daniel's mother's family

had lived in Palestine for at least 9 generations and his father's family for 5 generations. He was the second of three children, with an elder sister and a younger brother.

In 1953, at age 16, he went to the United States to study at Kansas State University (Manhattan, Kansas), focusing on the milling industry and cereal chemistry. In 1956 he began what became a lifelong interest in soy when he learned of the effects of soy flour components on wheat flour; he did some research on soy protein utilization in food systems. He finished his studies in 1956 and graduated in 1957 with a B.S. degree in milling technology. While an undergraduate in the USA, Daniel received lots of help and support from his father and family, but he worked to earn most of his living expenses. After graduation, he returned to Israel, where (in the late 1950s) he worked in the Israel Army Quartermaster Corps. doing food research and development for military purposes.

Eliahu Navot was the first real pioneer of soybean utilization and production in Israel. He devoted much of his life to this work. Daniel met him once or twice in the late 1950s, and was aware of his work. "He impressed me as a person totally devoted to soy and his aim was that the soybean should be grown and used in Israel for many good reasons."

In 1956, the same year his son became interested in soy, Elijah M. Chajuss incorporated a company named "E.M. Chajuss, Ltd." It was a small commercial and trading company, established mainly to trade in grains and foods. Elijah owned 80% of the shares and Daniel owned the remaining 20%. The firm was not very active and it ceased to exist in about 1988.

In 1958 Daniel returned to the United States to do graduate work at Washington State University (at Pullman). He was not yet married. In 1960 he received an MSc degree in food technology; his dissertation was titled "Post mortem tenderization of chicken muscle."

In early 1961 Daniel went to work at the Northern Regional Research Lab. (NRRL) at Peoria, Illinois, as an employee under A.K. Smith; other coworkers included Joseph Rackis, Walter Wolf, Clifford Hesseltine, and Gus Mustakas. His research included work on soy proteins, and specifically work on making soy protein concentrates (SPC) by the aqueous alcohol wash process, which had been developed by Mustakas and coworkers in about 1960 and published in the *Journal of the American Oil Chemists' Society* in 1962. Yet Daniel was most interested in the biologically active soy compounds which were found in the non-SPC solubles, a by-product of this new aqueous alcohol wash process; he would soon call these solubles "soy molasses." Daniel has a sister in the U.S. Their father came to visit them at this time and Daniel showed him around the USDA laboratory at Peoria and explained the work he was doing there.

In 1962, after about a year at NRRL, he decided

to return to Israel, where he got registered and certified Chemical Engineering certification.

In 1962 Daniel and his father, Elijah, incorporated Hayes Ashdod Ltd. (Industrial Zone P.O. Box 2230, Ashdod, Israel); all the shares were owned by their family. At the same time they established Hayes General Technology (HGT) Company Ltd. as the first company's R&D arm or division, and an agro-industrial engineering firm; it was not a separate company and was not incorporated at this time. Daniel's father was chairman of the company and a firm believer that proteins were in short supply and that soy proteins with good acceptability would offer an affordable solution to many. Elijah also handled commercial operations. Daniel dealt mainly with the technology, research, product development, and plant operation. Thus, Daniel spent much of his time with HGT, which was located in a separate building on the Hayes Ashdod site. HGT's goal was to do basic research and develop new technologies and know-how in areas not necessarily related to soy protein concentrates.

Ashdod is a city about 3 miles inland from the Mediterranean Sea, 35 miles due west of Jerusalem and about 15 miles north of the northernmost part of the Gaza Strip. Important harbor facilities have been constructed on the coast near Ashdod; in 1990 its population was about 76,600.

But as with all pioneering ventures by entrepreneurs, starting a new business was risky and the future was unknown. Daniel recalls: "When we started the plant in Ashdod my uncle (father's brother) came to me and said (in a teasing, friendly way), 'Daniel, you are doing a criminal thing. You take your money and your father's money and the bankers' money and big loans to make soy protein concentrate. Who needs it?'"

In 1962 Daniel and Hayes Ashdod began an ongoing, long-term collaboration with Israel's leading center for research on the composition and biologically active components of soybeans—the Hebrew University's Faculty of Agriculture at Rehovot [pronounced rei-HO-vot], located only about 13 miles north of Hayes. Daniel worked very closely with Yehudith ("Judith") Birk, co-discoverer of the Bowman-Birk trypsin inhibitor, who also did work on isoflavones, saponins, etc. She was a great pioneer in the field of soy research; she is still [2005] active at about age 75 and a very able and very nice person. Dr. Michael Naim was a pioneer in the field of soy molasses. Other researchers at Rehovot included Bondi, Gertler, Gestetner, Tagiri, and others.

This collaboration was based on mutual interest in the nutritional value of soybeans, unknown growth factors in soybeans, etc. No money changed hands, no contracts were entered into, Daniel did not assign the researchers any specific projects to work on, and no research was done specifically for Daniel or Hayes. Rather, Daniel and the researchers at Rehovot collaborated on research projects of

mutual interest. Daniel sometimes went to Rehovot when needed and did research there, however most of his research was done in the Hayes' laboratories in Ashdod. His work in Ashdod was mainly to fractionate soy components and evaluate the same at the request or understandings with the workers from the faculty. His visits to Rehovot were mainly to discuss the various ongoing research projects with the people involved, and to visit the large library there. Occasionally researchers from Rehovot visited Daniel and Hayes in Ashdod. Daniel spent the most hours in Rehovot during the 1980s, when for about a year he visited the faculty once a week and stayed all day. After 2004 he went there seldom. No one from Hayes did research at Rehovot on a regular basis.

In addition to his own work, Daniel contributed soy products his company had made at Ashdod, e.g., soy protein concentrates (processed in various ways), soy fibers, hulls, soy molasses and various fractions thereof, etc.

Together they worked, for example, on nutritional aspects of soy molasses components, of the soy protein concentrate in human and calves milk replacers, on antigenic components of the soy and their elimination, on the soy dietetic fibers ("Sobit"), etc.

Many research papers were published in leading scientific journals, and PhD and MSc degrees were obtained because of their mutual work. Daniel believes that grants for the research were provided by the USDA under the P.L. 480 (Food for Peace) program. All of them enjoyed the mutual work very much. This fruitful collaboration continued until a few years ago.

In 1963 Hayes Ashdod began operations. Daniel recalls the general situation with soy in Israel at that time: In 1962 there were several makers of soy food products in Israel. Soybean crushing factories made soy oil for human consumption and toasted soybean meal for animal feeds. However, some of the toasted soybean meal was milled to soy flour for use in households, in the meat processing industry, and in the baking industry. There were also some small cottage industries making various Oriental soy products, such as soy sauce, simply-made toasted and non-toasted full-fat soya flours, roasted soybean coffee, etc.; Daniel does not remember the names of these companies. Continued. Address: Managing Director, Hayes General Technology Company Ltd., Misgav Dov 19, Mobile Post Emek Sorek, 76867 Israel. Phone: (972) 8 592925.

8349. Chajuss, Daniel. 2005. Brief biography and history of his work with soy in the USA and Israel. Part II (Interview). *SoyaScan Notes*. Feb. 19. Followed by numerous e-mails. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: Let us now return to the early, pioneering products introduced by Hayes Ashdod during the 1960s. Hayes Ashdod was one of Israel's first company to make foods from soybeans, and Israel's first manufacturer of

modern soy protein products.

In 1963 the company launched its first product, a soy protein concentrate named Haypro. This product was also the first commercial soy protein concentrate manufactured outside the United States.

The main applications for Haypro were as a meat extender, and in hypoallergenic formulas (especially for babies and children allergic to cow's milk). Most of the product was sold outside Israel, mainly in Europe.

Hayes Ashdod was the world's first commercial plant to make "traditional" soy protein concentrate (SPC) and soy molasses by a counter-current aqueous alcohol wash system; that system was developed by Daniel. The plant's initial capacity was about 5,000 metric tons of soy protein concentrate and about 2,500 metric tons of soy protein concentrate per year (each on an as-is wet basis).

Who should get the credit for developing this important new process using alcohol? In Dec. 2007 Daniel wrote: "The credit for developing the process for SPC by aqueous alcohol wash should go to Mustakas and coworkers [at NRRL] in Peoria [1960-62]."

"In the early 1960s, aqueous alcohol washed SPC was introduced on a commercial scale by the Central Soya Company's Chemurgy Division in the USA; they developed a immersion aqueous alcohol extraction system to make SPC. At about the same time we introduced in Israel a continuous counter current aqueous alcohol wash system to make SPC. The producers of the 'traditional' alcohol washed SPC generally use the continuous counter current aqueous alcohol wash system today."

Also in 1963 Hayes Ashdod introduced "Soy molasses, a concentrated soy solubles extract, obtained during the production of soy protein concentrate." This product is used in animal feeds and as a source of oligosugars [oligosaccharides] for elderly people to maintain proper [digestive-tract] flora and regularity (mainly in Japan). Note: Daniel Chajuss wrote the above quoted words and date on 14 Jan. 1993 in a letter to William Shurtleff, in response to a question from Shurtleff. On 9 Sept. 1995 he again wrote Shurtleff: "The name 'soy molasses' was coined by me in 1963. It is generally manufactured today in accordance with the contents of my Israeli Patent No. 19168." He recalled in Feb. 2005: "When we got soy molasses, it was a dark, sweet, bitter, viscous, strong-smelling product. It looked very much like molasses. I decided to sell it to the feed mills, which at that time were using beet sugar molasses. So I decided to call it 'soy molasses.' But from my research in Peoria, I knew it contained many very interesting compounds—such as isoflavones and those that prevent perosis in chickens. In 1963 I made an application to the Israeli government to do research on soy molasses. I believed in it very much because of the many interesting components it contained. Now, most of the patents concerning soy isoflavones are about 'soy molasses,' as are most of the scientific articles. So this term

has become accepted, probably because it is so descriptive. Soy molasses is more like beet sugar molasses than cane sugar molasses.

In 1964 the company introduced Haysoy brand soy flours in full fat and defatted, toasted and untoasted forms, mainly for the baking and fermentation industries.

In 1966 Hayes Ashdod Ltd. introduced texturized soya protein concentrates under the brand names Hayprotex and Context. Hayprotex was designed for use mainly as a minced meat extender, while Context was designed mainly for vegetarian analogs.

Hayes Ashdod started making texturized [textured] soy protein concentrate in large part because they were very familiar and friendly with the Katzin family—Sol and Sid Katzin, two brothers, who came to Israel from the USA and who built the Shefa Protein Industries plant in Arat, Israel. They were idealists who made the first textured soy flour in Israel. Sometimes they would buy (from Hayes Ashdod) the fines of the white flakes to texturize. Daniel asked Sol why he didn't texturize soy protein concentrate. Sol replied: "We don't sell taste, we sell nutrition." Sol was a really nice fellow, a nutritionist at heart and in his profession. They were real pioneers, but they had such a difficult time and were often disappointed.

In the early days, after he saw Sol Katzin's extruder, Daniel first did some trials with a Wenger single-screw extruder. With assistance from Oak Smith, Hayes bought a small Wenger extruder. Since Daniel didn't want to compete with his friend, Sol, he decided to extrude soy protein concentrate—but the product was not very successful, and definitely not as successful as Shefa's textured soy flour products. Daniel's product failed largely because of its high price whereas the Katzin's product failed because of its flavor—although its shape was excellent. Daniel is not aware of any company that made textured soy protein concentrates before he did. He knows that another similar product was Response, made by Central Soya.

Note: Concerning early textured soy protein concentrates: Hayes Ashdod introduced Hayprotex and Context in 1966, Griffith Laboratories introduced GL-219 and GL-9921 in 1974, and Central Soya introduced Response in 1975.

"Hayes Ashdod Ltd. Research and Development Department has developed many soy analogs in various forms ('vegetarian sausages', 'fish-less fish fingers', 'vegetarian sea food analogs', 'vegetarian schnitzels', 'vegetarian nuggets', 'vegetarian gulash', etc.) based on texturized soy protein concentrates (Context) mainly to promote Hayes Ashdod Ltd. markets and to find customers for its products. These vegetarian analog products were never sold directly to the consumers but were sold to institutions or to various manufacturers / distributors mainly in dry rehydratable forms. They started to appear in the market in about 1966 and still exist today. The usual name was the

product name as appears above. Soy protein isolates were made on a pilot plant scale and were never manufactured or sold by Hayes Ashdod Ltd. in any significant quantities."

Also in 1966 Hayes introduced Hyprovit and Promolac, two powdered hypoallergenic soy formulas which were designed to replace milk powder formulas for infants and children allergic to cow's milk.

In 1968 Hayes started producing Haypro-T, a special soy protein concentrate, free of trypsin inhibition and free of antigenicity, for use in calf milk replacers as a substitute of milk proteins.

In 1969 Hayes started to produce Primepro, a more functional and soluble soy protein concentrate, by further treatment of the aqueous alcohol extracted soy protein concentrate (Haypro), for use as substitutes for soy protein isolates and for caseinates in various food systems, especially in the meat processing industries.

Also in 1969 Hayes introduced So-Bit (also spelled Sobit), a fiber product which was removed from the soy protein concentrate by a tail-end dehulling system containing both aqueous alcohol washed hulls and fibers obtained from soybean cotyledons. This product has proven to be beneficial as a source of dietary fiber, especially for diabetic patients. Address: Managing Director, Hayes General Technology Company Ltd., Misgav Dov 19, Mobile Post Emek Sorek, 76867 Israel. Phone: (972) 8 592925.

8350. *Iowa Soybean Review* (Iowa Soybean Association, Urbandale, Iowa).2005. Promise of soyfoods inspires Heartland Fields' seed-to-plate business model. 16(6):16. March.

• **Summary:** In the year 2000 John Schillinger, PhD, one of the best U.S. breeders, founded Heartland Fields LLC, an Iowa-based farmer-owned soyfoods company. By the end of 2004, "Heartland Fields had shipped 2.5 million of his ready-to-heat frozen Soy Beef & Broccoli and Soy Chicken Teriyaki entrées to U.S. Troops serving in the Iraqi Freedom campaign. The military is offering them to all troops now—not just to vegetarians.

"Schillinger's concept was to breed a soybean specifically for people food, not animal feed..." to create a vertically integrated seed to plate business model.

"As a result more than 100 farmers in Maryland and Illinois have invested in Heartland Fields' research and marketing efforts.

"The result was a non-GMO, identity preserved soybean that had 25 percent more protein than the standard [soy] bean, a appealing flavor profile, and can be produced organically."

The harvested soybeans are processed and sold as High Protein Textured Soy (HPTS) (TM). A color photo shows the front panels of some of its soy-based meals: Soy Beef & Broccoli with Rice, Soy Chicken Alfredo with Broccoli, Soy Chili with Soybeans. A black and white photo shows a

portrait of John Schillinger.

Note: In 1999 John Schillinger, PhD, “retired” from the presidency of Asgrow Seed Co. to form Schillinger Seed Inc. in Des Moines, Iowa. John is a graduate of the University of Maryland and holds a PhD in Plant Genetics from Michigan State University.

8351. Nutrisoy Pty. Ltd. 2005. Home page and four links (Website printout–part). www.nutrisoy.com.au. 9 p. Printed April 12.

• **Summary:** Contents: Home (2 p.). About us (1 p.). Product information (1 p.; tofu and tempeh). Nutrisoy products (2 p.). Soyco products. Where to buy. Recipes. Contact us. Privacy policy. email: info@nutrisoy.com.au.

About us: Nutrisoy is a family owned company established in 1984. “In 1992 Nutrisoy attained the standards set down by Biological Farmers of Australia to become a certified processor of organic tofu and tempeh.

“Nutrisoy uses only the finest Australian Grown Soybean (free from genetically engineered soybean) which is a rich source of isoflavones / phytoestrogens, a substance that could offer protection against and help reduce the risk of a wide range of disease in men and women including prostate, breast and skin cancer, osteoporosis, hot flushes, and heart diseases.” A large color photo shows Nutrisoy’s many products.

Nutrisoy products: The colorful front panel of each of the following is shown: Plain firm tofu. Tofu vegies [sic]. Tofu tempeh (This tofu has chunky tempeh in it and has been marinated in shoyu and ginger). Tofu herbs. Tofu spicy. Tofu teriyaki. Tofu vegies burger. Tofu tempeh burger. Strawberry tofu (dessert in a cup, with real fruit sauce on top). Apricot tofu (dessert in a cup).

Note: Nutrisoy is the inventor of Tofu tempeh, and Tofu tempeh burger. Address: 15 Hannon St., Botany (suburb), Sydney, NSW 2019 Australia. Phone: +61 2 9316 5171.

8352. Jacobi, Dana. 2005. 12 best foods cookbook: Over 200 delicious recipes featuring the 12 healthiest foods. Emmaus, Pennsylvania: Rodale Press. xv + 336 p. April. Illust. (color photos). Index. 23 cm. [2 soy ref]

• **Summary:** Among these 12 foods rich in nutrients and phytonutrients, the author considers soy the best of all. 28 of the 200 recipes include soyfoods.

In Chapter 1 is a section on Soy (p. 17-24) which includes: Introduction. Everyday ways (“Soy is the easiest Best Food to enjoy every day...”). Benefits at a glance. Soy protein in selected foods (Tofu, miso, edamame, soybeans, soynuts, tempeh, soymilk, cultured soy yogurt, soynut butter, soy flour, soy pasta, soy protein powder, soy drink mixes). Guide to soy products: Soymilk, soymilk cooking secrets, more soy dairy (soy cream cheese, soy sour cream, soy cheese, frozen dessert), terrific tofu (regular tofu, silken tofu, baked or smoked tofu), tofu cooking secrets, other soyfoods

(black and yellow soybeans, edamame, meat analogs, miso, soy flour, soynuts, soynut butter, soy protein powder and soy drink mixes, soy sauce and tamari, tempeh), baking with soy, cooking with soy.

Chapter 8, titled “Eggs, beans, and soy,” contains recipes (p. 196-203). for: Black soybean and butternut squash stew. Black soybeans. Braised black beans with red wine. Braised tofu with kohlrabi and pears. Broccoli, black mushrooms, and edamame with black bean sauce. Asparagus, red pepper, and curried tofu.

Other soy-related recipes: Finger lickin’ edamame (p. 50-51). Black bean hummus (with tofu, p. 57). Mushroom crostini (with tempeh, p. 61). Black bean soup (with dried black soybeans, p. 79). Mushroom consommé with sake (and tofu, p. 88). Double miso soup (p. 89). Nine a day salad (with soynuts, p. 100). Southwestern three bean salad (with canned black soybeans, p. 107). Curry dressing (with silken tofu, p. 115-16). Pepper ranch dressing (with soft silken or regular tofu, p. 116-17). Creamy herb dressing (with tofu, p. 118-19). Blue cheese dressing (with tofu, p. 118). Cracked mustard dressing (with tofu, p. 119). Citrus miso splash (p. 119). Soy and honey drizzle (with reduced-sodium soy sauce, p. 151). Whole wheat linguine with arugula and edamame (p. 164-65). Dirty rice (with tempeh, p. 194). Tempeh, lettuce, and tomato sandwich on rye (p. 207). Honey soynut butter sandwich (p. 208). Grilled pizza (with tofu, p. 210). Soycotash (with shelled edamame, p. 238-39). BBQ collard greens with edamame (p. 240). Miso mashed potatoes (p. 241). Key lime tartlets (with tofu, p. 250-51). Blueberry-lemon trifle (with lemon soy yogurt and soy cream cheese, p. 252-53). Brown rice crisp treats (with salted, roasted soynuts, p. 282). Wild blueberry trail mix (with salted soynuts, p. 283).

On the rear cover is a photo of the author and a brief bio. “After apprenticing at three-star restaurants in France, Dana Jacobi opened a catering business and marketed her own line of gourmet sauces. She has since authored five cookbooks...” Address: Food writer, New York, NY.

8353. Bean Me Up, Soya Station, Salad Bar. 2005. Welcome to the Soya Station (Menu). Anjuna/Vagator, Goa, India. 10 p.

• **Summary:** Contents: Welcome. Starters: Side dishes (incl. Spiced tofu {deep fried} with peanut or chilly sauce. Tofu or tempeh {pan fried} with peanut or tahini. Baked potato with sour cream, butter, or tofu cream cheese). Just for kids: 12 years and under (incl. Tofu bolognese, served over spaghetti. Tempeh sandwich with tortilla chips). New York Pizza (incl. Indonesian special {tempeh & pineapple}. Veg. special {tofu, onion, capsicum, mushroom & olives}, Additional toppings–tofu, tempeh). Salad bar (Tofu salad–Beet root, carrots, onions, cucumber, tofu cubes & tofunaise {vegan}, Side order of tofu or tempeh, with choice of tahini, peanut, or tomato sauce).

Good morning–Breakfast (incl. Tofu {scrambled w/ onion capsicum or butter fried w/soya sauce}, Soysage {4 pieces}, Add 10 rupees for soymilk with any breakfast dish). Desserts: Vegan (non-dairy) or dairy. Vegan includes: Soya ice cream in coconut, chocolate, banana, coffee, or berry (seasonal) flavors. Tofu brownie. All desserts served with soya whipped cream. Beverages (incl. soy milk {hot or cold}–Plain unsweetened, vanilla, chocolate, cardamom). Sandwiches (incl. Soya burger, Tofu burger, Tofu (butter fried), Tofu cream cheese {made with garlic & Herbes de Provence}, Tofu scrambled, Tofulafel. Tempeh {fried} in sesame oil & soy sauce. Seitan fried in onion). Dinner menu: All dinners are served with choice of brown rice, baked potato, or spaghetti, and vegetables of the day. Three broad choices (each with one or more of three symbols by it–vegan, dairy, hot ‘n’ spicy): (1) Tofu–Khadi tofu, Tofu bolognaise, Tofu lasagne, Tofu nori roll, Vegetable tofu quiche. (2) Tempeh–Tempeh potato patties, Thai style tempeh with cashew nuts, Indonesian sampler. (3) Seitan–Seitan scallopini in cream sauce (served over spaghetti). Address: 1629 Deulvaddo, Anjuna / Vagator, Goa, India 403-509. Phone: 0091-(0)832-227349.

8354. Hymowitz, Ted. 2005. Samuel Bowen and soy sauce (Interview). *SoyaScan Notes*. July 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** By 1776 Bowen was selling his Soy [soy sauce], made in the colony of Georgia, at various establishments in London. Ted has a list of the shops in London that were selling Bowen’s soy sauce. Bowen went to England 5-6 times, and his key question initially was: Is there are market in London for soy sauce that is as good as that imported from Asia? When he saw the cruets made especially for soy sauce, he knew there was a market. Address: Prof. of Plant Genetics, Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8355. Crain, Liz. 2005. City’s soy wranglers offer a totally tofu experience. *Portland Tribune (Oregon)*. July 15. p. B3.

• **Summary:** About Ota Tofu and Dae Han Tofu, both in Portland. At Ota Tofu in southeast Portland, there are 13 workers on a work floor of just over 900 square feet. “Since 1918, the family business has focused on the local market, never expanding outside Portland.” Ota tofu is fresh and unpasteurized, curded with a refined form of nigari.

Ota Tofu doesn’t deliver or advertise; it doesn’t have to. People and businesses who want Ota Tofu come to the shop to pick it up. Today, the restaurants Sweet Basil, the Farm Café, Old Wives’ Tales, Fong Chong, and Curry in a Hurry have all stopped by to pick up buckets or water-filled bags of fresh tofu. All day long, vans and trucks from catering services, Asian markets and other restaurants from as far away as northern Washington drive to the front of Ota to load up on tofu.

A large color photo shows Ota employee Wai Yang as she uses long chopsticks to deep-fry tofu pouches (agé) in a rectangular stainless steel fryer.

Dae Han Tofu, owned by Calvin Chun, started in 1993 and now has four employees. Chun, who moved to Portland from South Korea in 1989, rolls up his sleeves and helps with all parts of the work. Dae Han’s work space is a bit larger than Ota’s and streamlined for higher volume. In addition to regular types of tofu, the company produces specialty tofus such as teriyaki, hot and spicy, extra firm, and low fat (made from dehulled soybeans).

Contact information: Ota Tofu, 812 S.E. Stark St. Phone: 503-232-8947. Dae Han Tofu, 3340 N.W. Yeon Ave. Phone: 503-223-0044.

8356. Kikkoman Corporation. 2005. Annual report 2005. Year ended March 31, 2005. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 35 p. 28 cm. [Eng]

• **Summary:** Consolidated net sales rose 3.0% to \$3.220 billion, operating income climbed 4.6% to \$166 million, and net income rose 2.2% to \$88.6 million.

“In March 2005, the Kikkoman Group established Country Life, LLC with Consac Industries, Inc. to manufacture and sell in the U.S. nutritional supplements, health foods, sports foods, personal care and other products.” Address: Noda, Japan.

8357. *SoyaScan Notes*. 2005. Etymology and definition of the word “seitan” (Overview). Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Etymology: From Japanese *sei*- fresh or raw + *tan* (in *tanpaku*(shitsu) protein); usually written in the Japanese katakana syllabary to deemphasize the meaning of the Chinese characters, however < Middle Chinese.

The word was coined in 1961 by the founder of macrobiotics, Nyoichi (or Nyoti) Sakurazawa, known in the West as George(s) Ohsawa (1893-1966).

Definition: “A condiment or meat alternative made by simmering fresh wheat gluten in soy sauce, sesame oil, ginger, and kombu.”

The word seitan was clearly coined by George Ohsawa in 1961–see authoritative account (interview) of the word’s origin by the man (Mr. Kiyoshi Mokutani) who developed and first commercialized seitan in Japan and was with Ohsawa when he coined the term, writing it in the Japanese katakana. This is a key point; he wanted it to be a Japanese word, not a Chinese loan word.

Seitan was first made commercially in Japan in 1962, and was first imported to the Western world (USA) in about 1969 by two macrobiotic trading companies. For most of the first 10 years of its history it was used as a condiment, mainly by those eating a macrobiotic diet; it was much too salty for typical Americans, and was not widely available.

The basic taste and texture of seitan underwent a gradual

transformation over its first 10 years in the USA. It started as a very salty, black, rather hard or tough (like jerky) condiment, then evolved into a much less salty, more tender, brownish product that might be called a meat alternative. I have never heard anyone—except OED—refer to it as a “textured vegetable protein.” The latter term is generally used to refer to products that have been texturized by a machine named an extrusion cooker or extruder. I strongly prefer the term “meat alternative,” but only for seitan’s later incarnation. The term “meat substitute” has largely been replaced in the USA over the past 10 years “meat alternative”—which has a more neutral connotation.

8358. Hymowitz, Ted. 2005. Early history of soybeans (Interview). *SoyaScan Notes*. Aug. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** James Flint probably provided Samuel Bowen with some of the financial support he needed to buy and run his plantation in Georgia. While Kaempfer was the first westerner to make the clear connection between the soybean and its products, James Mease (1804) was the first to do this in English. Mease (in 1804) was also the first to use the word “soy” in the name of the soybean. Ted has discovered that Mease got his information from John Bartram, to whom Benjamin Franklin sent soybeans, which he called Chinese caravances.

Ted now has 253 references on Samuel Bowen.

In the early 1600s, the Swedish East India Co. imported soy sauce to Sweden from China in amphorae. Address: Retired Prof. of Plant Genetics, Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8359. PRNewswire. 2005. Mizkan Americas’ parent company, The Mizkan Group, acquires leading Chinese company: Distributor of popular Wadakan brands added to global portfolio (News release). Sept. 20.

• **Summary:** “Mt. Prospect, Illinois... Mizkan Americas, Inc., a leading condiment manufacturer, today announced its parent company, the Mizkan Group, has added to its roster of high-quality brands with its acquisition of Wadakan Investment Holding Company, a Beijing-based manufacturer of soy sauce and vinegar products in China.”

8360. Barrett, Walter. 2005. Work with soybeans in Central Asia (Interview). *SoyaScan Notes*. Oct. 4 and 6. Conducted by William Shurtleff of Soyfoods Center. Preceded by letter (e-mail) of Oct. 3.

• **Summary:** Walter has worked with soybeans in 4 Central Asian nations: Kazakhstan, Uzbekistan, Turkmenistan, and Tajikistan. Kazakhstan and Georgia have the most history with commercial soybean production, because Soviet planners made it happen there. They designated other Central Asian countries for cotton production, in part because cotton needs less water. Latitude is part of the reason. The climate

is also very dry, so that all soybeans (and almost all crops) in these countries must be irrigated, but with river water carried by gravity. Of all the Central Asian countries, Kazakhstan has been the most successful at understanding a market economy and making it work.

Walter has many contacts in these countries. He is willing to help Shurtleff try to get a better history of soybeans in each of these countries. First, Shurtleff will send Walter an e-mail containing a table showing the dates he has for the earliest document seen showing soybeans in each in each country, and soybean cultivation in each country. Then the earliest date seen for soybean cultivation in each country. Walter will forward this e-mail to an intermediary (Winrock International or Mercy Corps), who will then mail or phone or hand deliver the message to the network of indigenous researchers Walter has developed over the years. The message will encourage them to contact other researchers who might be interested; then Walter will wait for replies.

Walter believes that Korean communities in at least four of these countries (Turkmenistan, Uzbekistan, southern Kazakhstan, and Tajikistan) were growing soybeans for their own use at an early date—probably since the early 1900s and using them almost entirely for food—such as tofu, soy sprouts, Korean-style miso and soy sauce, green vegetable soybeans, etc. The Koreans raise chickens, for example, but they forage for food and are not fed soybeans. Walter has no idea when, or, why, or how these many Korean communities came to be established in Central Asia. He has no idea where the soybean varieties they grow came from. These Korean communities are all found within a horizontal oval that cuts across national boundaries, and includes the cities of Almaty [Alma-Ata] (in southwest Kazakhstan), Tashkent [Tashkent] (capital of Kyrgyzstan), Dushanbe (capital of Tajikistan), and Ashgabat (capital of Turkmenistan). In this area are numerous Korean restaurants where Walter has eaten; but he has no idea how many Koreans live in this area. Most individual Korean communities grew only one variety, but each Korean community had its own variety. By contrast, there are not many Chinese communities in these areas.

Walter expects his next trip to Central Asia to be in the spring of 2006—probably Uzbekistan and possibly Turkmenistan or Tajikistan. He is given drivers and interpreters by the NGO sponsoring his trip. One of the ongoing problems he faces is the limited abilities of interpreters; communication is often difficult, and it is hard to pursue agricultural or academic questions with farmers. It is less difficult with educated researchers or academicians (best is Tajikistan, followed by Turkmenistan—who might help find others). The researchers in these countries don’t talk much with each other, either within a country or among countries. They have few opportunities to travel, and little access to the Internet or e-mail. This is because of government restrictions, difficulty of getting visas or money, etc. Researchers are lucky if they have a working computer,

but most have a telephone and some have a cell-phone.

Of all Central Asian countries, Kazakhstan is the one in which the soybean is the most important as a commercial crop—by far. They probably have at least several thousand hectares planted to soybeans. The soybeans in Kazakhstan are run through an extruder (extrusion cooker) to make soybean oil and meal. These same extruders are also used to process cottonseed. Soybeans are grown in Central Asia largely because of the demand for meal by the local poultry industry for use in chicken feeds. Poultry is the driving force, and Central Asia is a “protein-poor” region. Walter’s main reason for being there is because of poultry and (to a lesser extent) livestock; it is to help educate them about the soybean, its value for producing soybean meal and oil, and about the importance of protein. He helps farmers to grow soybeans and to develop markets for their beans. Actually, there is a ready-made market from poultry growers—who now have to pay a lot of freight to import their soybeans from Kazakhstan, Iran, Turkey, or India. The key is for Walter to serve as the bridge—to help bring the poultry growers and the potential soybean farmers together, to discover that they have a common interest, and then to work out agreements.

NGOs do lots of impact studies; they want their volunteers to work on projects that will have economic impact. They believe that increasing poultry production will have a positive impact on the economy and the people. The oil is also appreciated, and refined using modern technology within each country for use as a high-quality edible oil, sold in bottles at retail stores. Kazakhstan is about one-half the size of the United States, and is quite a progressive country with a market economy, fairly advanced education and technology. Soybeans are grown mostly in the very south. They were major crop during Soviet times (Russia was a major market for the oil and meal), but after Kazakhstan became independent in 1990, soybean production fell off to near zero. The economies of Central Asian countries plunged at about the same time (1989-91). They are now slowing getting back to where they once were.

The second most important country for soybeans (a very distant second, with maybe 300-500 hectares planted to soybeans) is the Republic of Georgia, where the western half is quite moist and the eastern half is very dry. They have a long history of growing soybeans. Walter knows of one company there that is processing soybeans using an extrusion cooker (similar to that made by Insta-Pro).

In third place might be Uzbekistan, followed by Turkmenistan, and Tajikistan—but all with only about several hundred hectares in soybeans.

Walter believes that soybeans could become a valuable double crop in Central Asia, planted after the wheat harvest in June. That would earn farmers more income, improve the soil, and break various insect and disease cycles. They need a legume in the rotation. The government does not help. They seem interested only in short term profit, keeping the status

quo, and staying in power, not in innovation or long-term thinking.

In Tajikistan, he met a village farmer, Mr. Mahmadullo, who had the ability to build machines. He already had a small business making wheat flour using two motor-powered millstones. He worked with Walter to build a revolving soybean drum roaster; the outside was heated by natural-gas flames. After roasting a batch of about 20-25 kg of soybeans, he ground them into flour.

In Turkmenistan, Dr. Ashraf spent quite a bit of time working with a Korean community in the town of Dashoguz in making tofu. She also worked a lot with Peace Corps Volunteers (PCVs) in that same town; one of the PCVs was a Korean-American. Walter has not heard of any TVP being made in Central Asia; if it is made, it must be in very small quantity. In Uzbekistan, technologically the most developed, soybeans are being grown—often spread by volunteers. Address: 2804 Trent Drive, Fort Wayne, Indiana 46815. Phone: 260-484-7493.

8361. Hirayama, Tadao. 2005. *Shōyu hattatsu shoshi: Sho kara shōyu e* [Brief history of shoyu development: From *sho* to *shoyu*]. Tokyo: Printed by Hokazu Hachibori. 66 p. 26 cm. [47 ref. Jap]

• **Summary:** This excellent history, with many illustrations, is available from the Kikkoman International Institute for Food Culture (KIIFC), Noda, Japan.

Contents: Preface I. Chinese jiang: 1. Jiang was called different names by the raw materials which were used to make various types (p. 1). 2. How to make doujiang (“bean jiang”) (p. 2). 3. Doujiang might have been a side dish and had a consistency like moromi (p. 4).

II. Japanese sho (hishio?): 1. From the “fish jiang” (*gyosho*) period to the “grain jiang (*kokusho*)” period (p. 5). 2. *Sho* and *misho* were differentiated in the very early period (p. 5). 3. *Sho* was used having a consistency like moromi [quite like applesauce]. (p. 7).

III. The birth of shoyu: 1. Various types of *sho* and *misho* as seasonings (p. 9). 2. Characters used to write the word *shoyu* in Chinese documents (p. 10). 3. Kinzanji miso and shoyu (p. 11). 4. Popularization of Zen Buddhism and Tea Ceremony culture (p. 12). 5. *Tare miso* and *To Miso* (p. 13) 6. The birth of shoyu (p. 15).

IV. The path / road to becoming true shoyu: 1. Shoyu and tamari (p. 17). 2. The making of shoyu at Tatsuno: The birth of *sumi shoyu* (p. 18). 3. The process for becoming true shoyu (p. 20). 4. San koji (Scattered means not clustered Koji) and *mochi koji* (p. 21). 5. The birth of the true shoyu after the mid-17th century (p. 22).

V. Shi (kuki) or sho: 1. Shi (kuki) to shoyu (p. 24). 2. Fermentation in solid form and fermentation in liquid form (p. 25). 3. Research in recent years (p. 27) 4. From simplicity to complexity; from only one to more varieties (p. 28). 5. Purpose of the production of sho (hishio) (p. 30). 6. Arrival

of new technology made sho into Shoyu (p. 31).

VI. Production of shoyu in Edo period: 1. Production methods of shoyu from mid- to late 17th century (p. 33). *Ryori Monogatari* (Cooking Story) (p. 33). *Yoshu Fushi* (p. 34). *Honcho Shokkan* (*Honcho Shokukan*) (p. 34). 2. Things we cannot afford not to have in the kitchen *Wakan Sansai Zukan* (p. 35). 3. The best way is; Prepare (*shikomi*) shoyu in summer (during Doyo) and finish (harvest) in fall Bankin Sangyotai (Mankin sangyo bukuro) (p. 37). 4. Shoyu making at home Koekikokusanko (Translator's guess at meaning: Wide profit domestic products ideas?) (p. 39).

VII. Kudari shoyu and Kanto Jimawari Shoyu: 1. Kudari shoyu (p. 41). 2. Ama's (Nuns') namaage shoyu (p. 43). 3. Favorite flavor of people of Edo (p. 44). 4. Kamigata's (Kyoto Kansai area) Dashi (stock) and Edo's Dashi (stock) (p. 47). 5. Edo's Honkobushi (Honkare bushi? Honkosetsu?) (p. 47). 6. Kanto's jimawari shoyu (p. 48). 7. The method in Shinsen Hochotei (Shinsen Hocho Hashigo) (means Newly Selected Knife Ladder) (p. 51). 8. Making shoyu into a commercial product (p. 53).

VIII. Shoyu production in Kansai area: 1. Shoyu production on Shodoshima Island (p. 55). 2. Shoyu production in Tatsuno (p. 56). 3. Adding amazake to moromi to create Tatsuno shoyu's unique flavor (p. 57). 4. In Tatsuno they strongly believed in using Kohamaen (Kohama salt) (p. 59). 5. To make large production of shoyu, they used Ako's Saen (salt) (p. 61).

Conclusions (Summary). Main sources (Bibliography). Address: Japan.

• **Summary:** A very attractive, complex character, Chinese-language edition of *The Book of Miso*. Address: 1. Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

8363. Santoso, Sinta; Santoso, Sugeng. 2005. History of Primasoy [Tempeh maker in Australia]. Victoria, Australia. 1 p. Dec. 13.

• **Summary:** Both Sinta (a woman) and Sugeng (her husband) were born and raised in Malang, East Java, Indonesia. They grew up in Indonesia, where they enjoyed "Tempe Malang" as a staple food, eaten with meals at least once or twice a week. Sugeng writes: "I could remember as a child I was taken by my father, who spoke fluent English, to accompany an American to visit the tempeh village near Malang to see the tempeh production. This must have been in the sixties. I wonder if it was you."

Sinta graduated as a food chemist from Braunschweig University, Germany, and Sugeng as a process engineer from Cologne, Germany. They migrated to Australia in 1982, and were married there in 1983. They initially opened

an Indonesian restaurant in Melbourne, where Sugeng met Michael Manser, the first tempeh maker in Melbourne as far as he knows. Michael has since retired; he never went to Indonesia but made excellent tempeh. After the restaurant, they worked for large companies in their professional fields. Sugeng worked for a big supermarket as a quality officer; he realized that he was not destined to work in the corporate world and began researching the tempeh industry in Australia. He came to the conclusion, after Michael retired, that there was no good quality tempeh on the market; he believes that vacuum packing and the addition of vinegar makes the tempeh brown, chewy, watery, and bitter. "This has damaged the image of tempeh in Australia, and therefore tempeh is not very popular here now. I would really like to do some more research to extend the shelf life of tempeh so I can distribute my product interstate within Australia without using vacuum packaging." They spent months perfecting the method of making Tempe Malang in order to produce a high quality, sellable product.

"There are several tempeh manufacturers in Australia at the moment. The last of these, Nutrisoy, is owned by an Indonesian born operator. Then there are smaller operators such as Tally Ho, and Simply Soy and Blue Lotus in Melbourne. There may be more smaller manufacturers in other states which I am not aware of."

2004 July—They rent a small suburban store, close to their home at 2 Dunoon Court, Mulgrave, Victoria; they convert it into a tempeh manufacturing kitchen. The tempeh is made solely by Sinta and Sugeng.

2005 Feb.—Primasoy has its first public debut at *The Age* 'Harvest Picnic at Hanging Rock,' a food festival designed to promote locally made food and beverages. About 30,000 visitors circle the various food stands. Their tempeh was very well received by the public as a new and exciting product.

2005 March—Following the Harvest Picnic success, Primasoy begins promoting their product in selected organic food shops around Melbourne.

2006 Dec.—Sinta and Sugeng are still making tempeh commercially at Primasoy. "Things are very good. We are still experimenting with the MAP vacuum packaging. MAP stands for Modified Atmosphere Packaging. Depending on the product, the atmosphere in the packaging is either nitrogen, carbon dioxide, oxygen, or a mixture of these gases in various ratios. Our experiments show that a mixture of oxygen and nitrogen looks promising. Currently we found pasteurization and light vacuum might be the way to go, but we have not yet validated it. We have been busy doing cooking demos lately and have not been concentrating on shelf life extension." They are now writing a book about tempeh. And they will have two new tempeh products early next year: (1) Tempeh with tamari, ginger and sesame oil. (2) Tempeh with roasted garlic and coriander. "Next project will be okara tempeh (*tempe gembus*) and tempeh burger. I have a leaflet with recipes and I will send it to you."

They have lost touch with Mike Manser; last they heard he was planning to move to Tasmania. Address: 2 Dunoon Court, Mulgrave 3170, Victoria, Australia.

8364. Lea & Perrins. 2005. About us: Lea & Perrins heritage (Website printout-part). www.leaperrins.com/about/heritage.php. Printed Dec. 15.

• **Summary:** Lea & Perrins Worcestershire sauce began to be produced commercially in 1837. There follows a timeline / chronology (undocumented) with 2 entries in the 1700s, 11 entries in the 1800s and 11 entries in the 20th century. Here are a few samples, starting with the earliest ones:

1791—John Wheeley Lea is born. He was is of one of three sons and four daughters and was raised in a farming family. As a young man he chose to become a chemist.”

1793—William Henry Perrins was born... He chose to become a chemist.

1823—Lea & Perrins decide to form a partnership. They have a catalogue prepared and ready for the opening on 1 Jan. 1823 of their shop on Broad Street, Worcester, England. The shop soon becomes successful.

1825—Lea & Perrins open a branch shop in Kidderminster, a town about 20 miles north of Worcester.

1834—They open a shop in Cheltenham, about 25 miles south of Worcester.

1837—Commercial production of Lea & Perrins Worcestershire Sauce begins...

1839—John Duncan, a New York entrepreneur, orders a small quantity of Lea & Perrins Worcestershire sauce. Within a few years, Duncan was importing large shipments to keep up with demand.

1867—William Henry Perrins dies.

1874—John Wheeley Lea dies.

8365. *SoyaScan Notes*. 2005. Chronology of major soy-related events and trends during 2005 (Overview). Dec. 31. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Jan.—Monsanto acquires Seminis for \$1.4 billion. This gives Monsanto a commanding position in the fast-growing and very profitable vegetable seed market—a segment in which Monsanto previously had no presence. Jan.—*EarthSave News* stops being printed on paper and migrates to the Internet.

Feb. *The Whole Soy Story: The Dark Side of America's Favorite Health Food*, by Kaayla T. Daniel published by New Trends Publishing Inc. (Washington, DC). This is the first entirely anti-soy book.

March 14—Steve Demos, founder of White Wave, Inc., is terminated without cause (forced out) by Dean Foods.

July 7—Galaxy Nutritional Foods announces it will sell its manufacturing assets to Schreiber Foods, Inc. of Green Bay, Wisconsin, a major manufacturer of cheese products. Galaxy has recently suffered large financial losses.

July—Israeli Ministry of Health announces plans to

recommend that young children limit soy products to one a day and advised that infants avoid them altogether. The French government recently advised that soy products not be given to children younger than age 3.

Oct. 17—Gardenburger Inc., the company credited with taking veggie burgers into the mainstream, files for Chapter 11 bankruptcy. The company will stay in business but become privately held; the name of the new owner is not yet known. The value of all Gardenburger shares is now zero.

Nov.—Yamasa Corporation purchases San Jirushi Corp. (Kuwana, Japan). San-J plans to build a new tamari plant next to their original plant (which has reached full capacity) in Richmond, Virginia.

During 2004-05 world production of palm oil reached 33.88 million metric tons to pass soybean oil (32.31) for the first time in history and to become the world's leading vegetable oil. Projections show this lead continuing to grow during the next two years (Source: *2007 Soya & Oilseed Bluebook*, p. 348).

8366. **Product Name:** [Organic Shiro-shoyu (clear soy sauce)].

Foreign Name: Shiro shōyu.

Manufacturer's Name: Hichifuku Brewing Co., Ltd.

Manufacturer's Address: 2-7 Yamagami, Hekinan, Aichi 447-0869 Japan. Phone: +81 566-92-5213.

Date of Introduction: 2005.

Ingredients: Wheat, soybeans, salt, culture.

How Stored: Shelf stable.

New Product—Documentation: The website www.pref.aichi.jp lists this company at Certification No. 225. “Japan’s only specialized manufacturer of *shiro-shoyu* soy sauce, in Hekinan City, the home of this special ingredient. Executive director: Atsunori Inuzuka. Company outline: Hichifuku [Shichifuku] Brewing is the only company in Japan whose *shiro-shoyu* soy sauce plant is organic—JAS certified. Wheat accounts for 90% of the raw material used to produce this soy sauce. The amber-colored product keeps intact the colors of the other ingredients as they cook. Hichifuku Brewing also manufactures *shiro-dashi* (a combination of shiro-shoyu soy sauce and dashi broth of carefully selected dried bonito, kombu, and shiitake mushrooms).”

8367. **Product Name:** Soyettes [Teriyaki, Barbecue, Jamaican Jerked].

Manufacturer's Name: Soya Foods.

Manufacturer's Address: 8 Frontenac St., Dorchester, MA 02124-3902. Phone: 617-282-1000.

Date of Introduction: 2005.

Ingredients: Tofu

New Product—Documentation: Gavin, Robert. 2006.

“Meat-like qualities whet the US appetite for tofu: Biologist tackles taste, texture issues.” *Boston Globe*. Jan. 2. Xiang F. Kong has developed a new tofu product named Tofettes, in

flavors such as teriyaki, barbecue, and Jamaican jerked.

8368. Andoh, Elizabeth. 2005. *Washoku: Recipes from the Japanese home kitchen*. Berkeley, California: Ten Speed Press. vii + 320 p. Illust. (many color). Index. 25 x 25 cm.

• **Summary:** A beautiful book. Contains a section titled “Tofu and eggs” (p. 268-93), plus many recipes that use miso, shoyu, edamame, kinako, and amazake. Address: Japan.

8369. Bennett, Beverly Lynn; Sammartano, Ray. 2005. *The complete idiot’s guide to vegan living*. New York, NY: Alpha. 360 p.

• **Summary:** “It’s not a diet—it’s a lifestyle.” The vegan lifestyle means compassion for all living things. It means eliminating animal foods and animal products from one’s diet. True vegans avoid the use of honey, and don’t wear animal skin (leather, suede) or fur. Many avoid silk, made by suffocating silkworms inside their cocoons.

Contents: Part 1: Compassion for all. 1. Why be vegan? 2. Vegan 101 (incl. famous vegetarians and vegans, the Vegetarian Society of the UK, the Vegan Society emerges, Donald Watson, coming to America—Dr. Catherine Nimmo and Rubin Abramowitz, Jay Dinshah, ahimsa). 3. Key to good health. 4. Starting your vegan transition. Part 2: Clearing up misconceptions. 5. But you need meat for protein. 6. But you need dairy for calcium. 7. But carbohydrates make you fat. 8. Vegans are all weak and sickly.

Part 3: A vegan survival guide. 9. Nourishing yourself. 10. Seeking supplementation. 11. Raw foodists: Raw and uncut. 12. Oh baby! Bringing up baby. Part 4: Veggin’ it; Tips for maintaining a vegan lifestyle. 13. Handling family and friends. 14. Dining, vegan style. 15. Supporting your ideals. 16. Buying your vegan eats.

Part 5: Substitution is the mother of invention. 17. Using protein alternatives (incl. Demistifying soy products: soy sauce, the incredible tofu, tempting with tempeh, playing tricks with TVP). 18. Doing without dairy and cheese. 19. Vegan baking substitutions. Part 6: Vegan food for the soul. 20. Breakfast ideas. 21. Lunch and lighter fare. 22. Main and side dishes. 23. Baked goods and desserts.

Part 7: Vegan lifestyle choices. 24. Body care and personal items. 25. Dressing to impress. 26. Other things to consider. Appendixes: Glossary, resources.

The index contains 17 entries for tofu, 16 for soybeans, 7 for tempeh, 3 for seitan, 2 for TVP, and 1 each for edamame, nondairy milk substitutes, shoyu, soy milk, tahini, tamari, and tofurky.

“This book offers a vegan food pyramid, fifty vegan recipes, tips on finding animal-free products and hints for reading ingredient lists and other labels to find ‘hidden’ animal ingredients or byproducts” (publisher’s statement). Address: 1. Vegan chef and author, Eugene, Oregon; 2. Musician, web developer, and Beverly’s life partner.

8370. Feral, Priscilla; Hall, Lee. 2005. *Dining with friends: The art of North American vegan cuisine*. Darien, Connecticut: Friends of Animals, Inc. iii + 164 p. Foreword by John Robbins. Illust. (some color). No index. 21 x 23 cm.

• **Summary:** The Foreword, by John Robbins, contains this lovely prayer from the Buddhist teacher Thich Nhat Hanh.

“Let us fill our hearts with compassion
“towards ourselves and towards all living beings.

“Let us pray that all living beings realize
“that they are brothers and sisters,

“all nourished from the same source of life.

“Let us pray the we ourselves cease to be

“the cause of suffering to each other.

“Let us please with ourselves to live in a way

“which will not deprive other beings

“of air, water, food, shelter, or the chance to live.

“With humility,

“with awareness of the existence of life,

“and of the sufferings that are going on around us,

“let us pray for the establishment of peace

“in our hearts and on the earth.”

This vegan cookbook contains many soy recipes, for example: Scrambled tofu. Believable bacon (with “8 ounces firm tofu, drained, p. 12). Spinach dip for raw vegetables (with “1 cup Tofutti brand Imitation Sour Cream, p. 19). Veggiessoise (with “1 cup soy creamer {such as White Wave’s ‘Silk’ creamer},” p. 36). Tofu spinach lasagne (p. 60). Tofu hummos with toasted cumin seed (with “12 ounces soft tofu,” p. 109). Sweet dessert cream (with “1 package {12.3 ounces} Mori-Nu Silken Firm Tofu,” p. 126). Key lime pie (with “1 package {12.3 ounces} Mori-Nu Silken Lite Firm Tofu,” p. 130). Soy milk is called for in many recipes.

The Glossary (p. 153-61) includes: Antioxidants (steaming causes minimal loss of antioxidants; microwaving causes much loss). Brown rice syrup. Butter substitutes: See vegan margarine. Cheese (Added casein makes most commercial cheese alternative non-vegan; presently, however, Tofutti, Vegan-Rella, and Soymage Grated Soy Parmesan are vegan). Chocolate (“Both Ecco Bella and Paul Newman’s brands offer vegan chocolate”). Cholesterol. Egg replacers (Ener-G Egg Replacer). Fruitarian. Gelatin. Genetically modified organisms (“GMO”); genetic engineering (“GE”). Lightlife. Linolenic acid. Miso. Nama shoyu. Nayonaise. Nutritional yeasts. Organics. Ovo-lacto vegetarian. Pareve (parve). Pesco-vegetarian. Protein. Soy milk. Stevia. Tamari. Tempeh. Tofu. Tofutti. Vegan (VEE-gun). Vegan society (www.vegansociety.com).

The Shopping guide” (p. 161-63) describes companies that make or sell vegan products,

On the rear cover we read: “Friends of Animals is an international, non-profit, animal advocacy organization, incorporated in the State of New York in 1957. We work to cultivate a respectful view of nonhuman animals, free-living

and domestic. Our goal is to free animals from cruelty and institutionalized exploitation around the world.”

On the inside rear cover are portrait photos and biographical sketches of Priscilla Feral, president of Friends of Animals, and Lee Hall, legal director for Friends of Animals. Address: 1. President; 2. Legal director. Both: Friends of Animals, New York.

8371. Fu, Peimei. 2005. Peimei shi pu. Di er ce [Pei Mei's Chinese cook book. Vol. II]. Taipei, Taiwan: Ju zi wen hua shi ye you xian gong si. 386 p. Illust. (color). No index. 22 cm. [Chi; Eng]

• **Summary:** Fu Pei Mei is considered by many Chinese to be one of the best Chinese chefs alive today. This book, which first appeared in July 1974, contains 110 recipes categorized by ingredients under 11 separate headings, such as chicken, duck, pork, beef, fish, shrimp and seafood. The majority of the recipes in this book are based on meat, poultry, fish or eggs (animal products). Contents: Foreword. Introduction. About the Chinese menu. About Chinese condiments and spices: Glossary includes: 1. Soysauce (made from fermented soybeans, comes in light, medium, and dark colors. Kikkoman is a good example of medium). 9. Hot bean paste (“Made from red hot peppers, flour, soybeans, salt, and other condiments”). 11. MSG. 18. Bean curd. 19. Dried bean curd sheets (skin). 20. Bean sprouts (mung or soy). 21. Bean pastes (“Thick brown pastes prepared from soy bean flour and flavorings. Sweet types have sugar added and resemble pureed dates”). 22. Sweet red bean paste (“Made from red [azuki] beans. Almost all Chinese desserts use this for the filling. Mash the cooked beans in a strainer. The paste will come out leaving the skin”). Contents of recipes. Abbreviations, weights & measures. Contents of color photos. Index of recipes Vol. I. English-Chinese list of foodstuffs. About the author. Copyright.

Seating: The guest of honor sits in the seat at the inner side of the room, facing the entrance, while the seats on the serving side are for the host and hostess. The guest of honor always sits facing the host (p. 10).

After the “abbreviations” page are 4 full-page numbered color photos of Chinese tableware, vegetables, special ingredients, and Chinese individual place setting used in this book, and the numbered name of each item, in both Chinese and English, facing the photo. Among the vegetables is: 27. Fresh soybean (*maodou*). Among the special ingredients is: 2. Beancurd sheet (*doufu-pi*). 14. Bean curd threads (*gansi*). 21. Bean curd (*doufu*). 26. Fermented black [soy] beans [fermented black soybeans].

For every recipe there is a large (often full-page) color photo with the recipe name in Chinese and English, and the page number of the recipe. All the recipe photos come in a block before the recipes themselves. Each Chinese recipe is on the left page of the 2-page spread, and its English counterpart is on the right page. The ingredients for each

recipe are in two rows at the top, in exactly the same relative place, to make finding the Chinese characters easy.

Recipes include: Braised soysauce duck (p. 157). Spareribs with fermented black beans (*Shih chih p'ai ku*, p. 177). Shredded pork with bean sauce (*Ching Chiang Jou szu*, with 2 tablespoons “sweet bean paste,” *t'ien mien Chiang* [pinyin: *tian mian jiang*], and soysauce, p. 186-87). Diced fish with fermented black beans (*Shih chih yü ch'iu*, p. 216-17). Steamed fish with fermented black beans and hot pepper (*Tou shih la chiao cheng yü*, with 2 tablespoons *dou shih* / fermented dried black beans,” p. 226-27).

The chapter titled “Egg and bean curd” (p. 256-75) contains 10 recipes. Examples of the descriptions of bean curd in the ingredients listing are: “6 squares bean curd (3” x 3”).” “8 pcs. [pieces] bean curd (1” x 2” x 1”).” “4 pcs. tender bean curd (3” x 3”).” “10 oz. thin dried bean curd strips” (*gansi*). On p. 276 is a half-page description of bean curd and related products.

More recipes: Assorted vegetarian dish (*Lo han chai*, with “1 bean curd stick,” *fu chu* / *fuzhu* [dried yuba sticks], p. 289). Spinach and bean curd soup (*Po ts'ai tou fu keng*, p. 317). Chicken, ham and shrimp with bean curd shreds soup (*San hsien kan szu t'ang*, p. 319). Yu-T'iau ([crullers] p. 335). Noodles with minced pork and bean sauce (*Pei fan cha Chiang mien*, with *maodou* / green beans, p. 339). Fried taro dumplings with sweet bean filling (*Tou sha yü tsao*, with “sweet [azuki] bean paste,” p. 349).

A good portrait photo of Miss Fu appears on p. 371. Taiwan's popular T.V. chef, she “is also a producer and director. She has demonstrated over 600 different recipes from 1964 to the present. In 1955 Pei Mei's Chinese Cooking Institute was founded, In 1962 Taiwan's first television station was established. She accepted an offer to teach a demonstration cooking program once a week, starting in 1967. In 1969 she wrote her first volume, *Pei Mei's Chinese Cookbook*. The dishes were divided according to the geographical areas of China—North, East, South, and West. In 1977 Miss Fu began a weekly program on Japanese television.

The copyright page states that this book was published in the 80th year, 9th month of the Chinese calendar. Address: Cooking teacher, Taipei, Taiwan.

8372. Fu, Peimei. 2005. Peimei shi pu. Di san ce [Pei Mei's Chinese cook book. Vol. III]. Taipei, Taiwan: Ju zi wen hua shi ye you xian gong si. 388 p. Illust. (color). 22 cm. [Chi; Eng]

• **Summary:** Chinese cooking can be divided clearly into five major schools or branches: Shanghainese, Cantonese, Szechuanese, Peking-style, and Hunanese. These correspond roughly to Eastern, Southern, Western, Northern, and Central China. This 3rd volume, containing 130 recipes, consists of nine complete formal Chinese banquet dinners from different provinces: Kiangche (Shanghai style), Canton, Szuchuan

[Szechwan], Peiping, Hunan, Fuk-ien, Taiwan, Vegetarian style, and Buffet dinner.

The number of special ingredients in the numbered color photo has been increased to 47 from 32. Interesting new ingredients include: 29. Sweet red bean paste [azuki]. 31. Green sea weed. 32. Laver [sheets of nori]. 34. Fresh bean curd skin. 35. Dried bean stick [dried yuba sticks, fuzhu]. 36. Bean curd sheets [dried yuba]. 37. Bean curd, dried [doufu-gan]. 39. Wheat gluten. 40. Steamed wheat gluten. 41. Fried gluten puff.

The basic format of this book is quite similar to that of Vol. II, but the color photos of recipes are arranged together in a group of about 12 pages at the beginning of each of the nine sections, and quite a few pages have two recipes per page.

Recipes include: Sautéed black mushrooms with soy sauce (p. 35). Stir-fried crab with bean sauce (*Chiang pao ch'ing shieh*, with 1 tablespoon "sweet soy bean paste" / *t'ien mien chiang* / *tian mian jiang*, p. 46-47). Stewed beef with hot bean sauce (*Yu hsiang nyu nan*, with 1 tablespoon "hot bean paste," (*la dou ban jiang*), p. 122-23).

The introduction to the section on vegetarian dishes notes: "Centuries ago in China, devout Buddhists and Taoists followed a strictly vegetarian diet, in keeping with their religious sanctions against the killing of sentient beings." The recipes in this section call for: Soy sauce (almost all). Soy bean soup stock (p. 313). Wheat gluten sticks (*su chang*) (each of which is made by rolling up a big sheet of wheat gluten, p. 315). Pieces of steamed wheat gluten and Pressed bean curd (*dou fu gan*) (p. 317). Cooked green vegetable soybeans (*shu mao dou*, p. 323). Sheets of bean curd skin, fresh or dried [yuba] (*toufu p'i* / *dou fu pi*, p. 323, 325, 331). Shredded dried bean curd (p. 327). Bean curd (p. 328).

More recipes: Braised beef with brown sauce (with 1 tablespoon "hot bean paste" (*la dou ban jiang*) and ½ tablespoon "soybean paste" (*tian mian jiang*), p. 360-61). Sautéed bean curd balls (p. 369). Two good portrait photos of Fu Pei Mei appear on page 296. Address: Cooking teacher, Taipei, Taiwan.

8373. Fujii, Mari. 2005. The enlightened kitchen: fresh vegetable dishes from the temples of Japan. Translated by Richard Jeffrey. Tokyo, New York, London: Kodansha International. 107 p. Illust. (photos by Tae Hamamura). Index. 26 cm.

• **Summary:** This is a lovely Japanese vegan (and vegetarian) cookbook filled with the spirit of kindness and of Zen—and with color photos on almost every page. It discusses and describes the ancient tradition of *shojin ryori*, the plant-based diet which originated in Japan's Buddhist temples. The author, who is the wife of a Buddhist monk, has taught temple cuisine for over 20 years. Her husband, Sotetsu, lived as a monk for ten years in various Buddhist temples; he also trained as the *tenzo* (head cook).

In this book she presents 60 beautiful, delicious, health-giving, and heart-warming recipes, many adapted to Western kitchens but all true to their roots. A majority of the recipes contain soyfoods in one form or another.

The helpful glossary includes descriptions of edamame beans, hijiki, karashi mustard, konbu, Koyadofu ("freeze-dried tofu"), miso, natto, nori seaweed, pickled plum paste, saké, sesame paste, sesame seeds, shiso (perilla), soy sauce, soybeans, sukikonbu, tofu, umeboshi pickled plum, usu-age tofu, wakame seaweed, wasabi, yuba, yuzu.

The index contains 20 entries for miso, 15 for tofu (p. 15, 24, 29, 32, 39, 41, 42, 48, 51, 53, 56, 62, 71, 100, 104), 6 for soymilk (p. 17, 45, 47, 94, 99, 104) 4 for edamame (p. 16, 35, 68, 99), 3 for deep-fried tofu (p. 32, 42, 71, 104), 3 for natto (p. 44, 50, 100), 2 for teriyaki (p. 48, 62), 2 for Koyadofu (p. 48, 100), 2 for usa-age (thin slices of deep-fried tofu; p. 32, 104). 2 for yuba (p. 47, 104). A small color photo on the inside rear dust jacket shows Mari Fujii. Address: Cooking teacher, Kamakura, Japan.

8374. Hartley, Paul. 2005. The Lea and Perrins Worcestershire Sauce cookbook. London: Absolute Press. 80 p. Illust. (color). 22 cm.

• **Summary:** A colorful book of 50 recipes that call for Lea & Perrins' Worcestershire Sauce. Contains many interesting (but undated) full-page color posters (courtesy of Lea & Perrins). A number of interesting historical sidebars, scattered throughout the book, contain vignettes from Lea & Perrin's history. The section titled "A splash of history" (p. 75-79) contains a brief chronology of Lea & Perrins and their Worcestershire sauce. For example:

"Late 1930s—In a show of great business acumen, Lea & Perrins managed to get cases of their sauce onto all ocean liners that came in and out of British waters. A fee was paid to the on-board stewards, who served the sauce in the dining rooms. Passengers tried the sauce, and, intrigued, would then... buy a bottle to take home. It didn't take long for word to get around, and Lea & Perrins' fame grew quickly."

1839—A New York entrepreneur named John Duncan ordered a small quantity of Lea & Perrins Worcestershire Sauce. "He liked the sauce a lot and saw its potential." Within a few years Duncan began to import large amounts to keep up with the demand. Address: Food writer, England.

8375. Hellmiss, Margot. 2005. Mit Soja durch die Wechseljahre [Using soy through the menopause years]. Munich, Germany: Suedwest Verlag. 96 p. Illust. (color). Index. 20 x 18 cm. [Ger]

• **Summary:** An attractive book, with many fine color photos on glossy paper. Contents: Soybeans—Tradition and history (Healing plant from China): Productive source of protein, tofu—quark with a longer tradition, triumphal procession around the world, great economic significance, soya and genetic engineering. Fundamental changes of the menopause

years (What happens during these years?): Hormonal changes, the right attitude helps, the new understanding of women, many hormones influence the body, men also experience menopause, questionable preparations, Hormone Replacement Therapy—Pros and cons. Natural help from soy isoflavones (remarkable phytoestrogens): The active agent of plant hormones, the effectiveness of isoflavones, natural SERMs, safeguard against osteoporosis, estrogen protects the circulatory system, soy hormones as free-radical catchers, the end of hot flashes, strong powers of resistance and smooth skin, isoflavones will take good care of you.

Soyfoods that contain isoflavones (A great variety): Whole dry soybeans, soymilk, tofu, soy oil, soy flour (*Sojamehl*), soy flakes (*Sojaflocken*), soy bran (*Sojakleie*), tempeh, natto, soy granules, soy sauce, shoyu and tamari, miso, lignans. Soybeans: A powerful package for your health (Plant protein as an alternative): Indispensable protein, lecithin, minerals, B vitamins for strong nerves, vitamin E—the fountain of youth. Recipes for enjoying soya (Basic recipes): Hors d'oeuvres and salads, soups, pasta, main dishes, sauces, dips, and bread spreads, mueslis, desserts, and baked goods, beverages.

8376. Hu, Shiu-ying. 2005. Food plants of China. Hong Kong: Chinese University Press. xvi + 844 p. Illust. Index. 26 cm. [350+ ref]

• **Summary:** This is a truly remarkable book—the most original and comprehensive book seen to date on the food plants, plant foods, and the economic botany of China. It is the author's supremely valuable life's work.

Contents: Foreword by Richard Evans Schultes (Director, Botanical Museum of Harvard University, Emeritus). Foreword by George W. Staples, III (Bernice P. Bishop Museum, Honolulu, Hawaii). Introduction: Why the book and to whom it is addressed. Illustrations (numbered but on unnumbered pages).

Part I: Cultural aspects of Chinese foods. 1. The sources and nature of information. 2. The production and preparation of Chinese plant food. 3. Selected Chinese food plants with instruction for preparation. 4. Spices and flavoring materials. 5. Health food (*bupin*) and herbal tea (*liangcha*).

Part II: Botanical aspects of Chinese food plants. 6. Nonvascular plants. 7. Vascular plants (incl. spermatophytes {seed-bearing plants} and angiospermae {flowering plants}, incl. monocotyledons and dicotyledons). Bibliography. Latin name index. Chinese name index. English name index.

On the inside front cover and facing right-hand page is a large map of China, with each province shown, and the localities of Shiu-Ying Hu's botanical activities in China clearly show in symbols: white triangle = before and white circle = after 1950. A black triangle or circle = staying 8 or more years. In each triangle or circle is a number, keyed to a list of the names of 65 localities. She did more research in southern China than in northern.

There is no country in the world today “where the value of useful plants is more thoroughly appreciated than in contemporary China” (p. vii, Foreword 1).

Dr. Hu is an expert taxonomist and economic botanist. She “draws on the fields of plant taxonomy, morphology, economic botany, pharmacognosy, and phytochemistry to name a few, yet the text is far from a dry recitation of facts and statistics. What brings the work to life are the numerous anecdotes and personal experiences she shares. Indeed, this latter element gives the book the aspect of a personal memoir.” “The major divisions... are taxonomic and within each division the plants are arranged alphabetically by scientific name. Also provided are the names in Chinese characters, the transliteration in English of both the Putonghua and Cantonese pronunciations for the Chinese names, common names in English, and a brief commentary” (p. ix-x, Foreword 2).

“The food plants of an area provide the material basis for the survival of its population” and furnish inspiration for its cultural development. “In China, 1,156 species and 274 varieties and/or cultivars of food plants have been recorded and are used” by the people. The preparation of this work began in 1957 and a compilation was distributed at the Ninth Pacific Science Congress. Born in 1908, the author entered a boarding school in Xuzhou, Mary Stevens Girls' High School, run by Presbyterian missionaries. In like manner she went to Ginling College, a small liberal college of arts and sciences in Nanjing. After college she entered Lingnan University (formerly Canton Christian College) in Guangzhou, from which she graduated with the master of science degree in June 1937—a month before the Marco Polo Bridge Incident on July 7, 1937, when the Sino-Japanese War broke out in Beijing. She fled to Chengdu, Sichuan, where in Jan. 1938 she accepted a teaching position in the Department of Biology, West China Union University—also a missionary college. In the late 1930s and early 1940s, Hu had botanized in western Sichuan at a time when only a few men (notably Armand David, Joseph Rock, and E. Wilson) had explored that region. During summer vacations, she took students to botanize around Muping. At West China Union University, Hu continued her field studies, taught courses in botany, and was elected president of the International Women's Club. The vice president of the club, who was a Radcliffe graduate, applied to Radcliffe for a fellowship for Hu.

She left China on 2 Aug. 1946 for graduate work at Radcliffe College; it was like a metamorphosis—the United States was a completely new world. In 1946 she was offered a graduate fellowship for a doctorate (PhD) program at Radcliffe College under Prof. E.D. Merrill, then Director of the Arnold Arboretum (Harvard Univ.) from 1935-1946. Her doctoral dissertation on the genus *Illex* (Aquifoliaceae) was carried out at the Arnold Arboretum under the direction of E.D. Merrill. After completing the requirements and

finishing the dissertation for a doctorate degree at Harvard, in April 1949, she became the herbarium assistant at the Arnold Arboretum. From 1953 to 1957 she worked on the Flora of China Project at Arnold Arboretum. Among other things, she became famous for her Chinese dinners with staff and students alike. She officially retired from the Arnold Arboretum on 30 June 1976.

Dr. Hu returned to China in July 1975, after 29 years abroad. Since the normalization of diplomatic relations between the USA and China in 1978, she has made many trips to China, and travelled studied extensively (p. xi-xii, 12-14). As of Aug. 2011 Dr. Hu resides in Hong Kong and is closely associated with the Chinese University of Hong Kong.

A photo (Fig. 1) shows the author in 1941 as a young lady in Tibetan attire; she spent summers in the area formerly called “Eastern Tibet.”

Fig. 34, an illustration composed of seven superb line drawings (each with a scale) showing the soybean plant, a flowering branch, the front view of a flower, a lateral (side) view of the same, a fruit (pod with 2 seeds) with one side of the pericarp (outer pod) removed—showing the seeds, a soybean seed showing the acentric hilum, the micropyle and the hypocotyl ridge, soybean sprouts from a market showing the smooth fleshy cotyledons, the hypocotyl and the very small plumule.

Fig. 35. Four black and white photos showing: (1) Two round trays of koji, made of cooked soybeans, roasted wheat flour, and fungal spores, in shelves, to be used for making soy sauce. (2) Large earthen jars with convenient hat-like covers, containing the koji, salt and water, placed in the yard of the *jiang-yuan* (2 Cc = Chinese characters given) (“jiang garden”), exposed to the sun during the day and dew at night, covered only when it rains and stirred occasionally. (3) A man stirring hot soymilk in a large shallow cauldron before adding pulverized calcium sulfate for precipitation of the soybean protein, used to make tofu. (4) A wooden frame [curdling box], lined with cloth for filtering the coagulated protein and solidifying the mass (under small pressure) to make bean curd.

Soybeans (*Huang-dou*, 2 Cc). Before World War II, the United States was a net importer of soybeans; now she is a net exporter. “Although soybean products have entered American supermarkets, several Chinese uses of soybean can introduce more variety and tastier food into many homes (Figure 35). Included... are: green immature soybean, soybean curd, soybean sheets [pressed tofu sheets], firm bean curd squares [pressed tofu], soybean skin [yuba], and soybean sprouts.” With the exception of soybean sheets, all these items are available in Chinese American grocery stores. “The Food Plants Research Institute, Amherst, Massachusetts, is in the process of introducing soybean sheets (3 Cc) to American markets (p. 118-19).

Hordeum vulgare L. var. *vulgare*—Barley *Da-mai* (W.-G.

Ta-mai) (2 Cc, ‘big grain’). “... also ground with sorghum and soybean for a coarse, healthy, fiber bread flour.”

Glycine max (L.) Merrill—Soybean. *Da-dou* (W.-G.: *Ta-tou*). (2 Cc) (‘giant bean’). *Huang-dou* (W.-G.: *Huang-tou*). (2 Cc) (‘yellow bean’). “Seed mixed with *gao-liang* (kaoliang) and barley, ground together for flour, used to be the staple of the rural population in the Yellow River Region; soaked, cooked with salt, served as tidbits in northern China; used as source for all the following forms of Chinese food” (p. 474).

Dou-you (W.-G.: *Tou-yu*). (2 Cc) (‘soybean oil’). Cooking oil extracted from the soybean. (p. 474). Address: Botanist, Arnold Arboretum, Harvard University; Honorary Professor of Chinese Medicine, The Chinese University of Hong Kong.

8377. Hu, Shiu-ying. 2005. Fermented soybean foods: Soy sauce (Document part). In: Shiu-ying Hu. 2005. Food Plants of China. Hong Kong: Chinese University Press. xvi + 844 p. See p. 32-34.

• **Summary:** This is a truly remarkable, original and comprehensive book. The section on “The use of microbes in Chinese plant food” (p. 32+) notes that, in China, people with lower incomes eat proportionally more fermented foods to help them eat the tasteless cooked rice or steamed bread. Fermented soybean products are widely used in this way. The Chinese term *jiang* is a generic term used to refer to all fermented bean and grain products, particularly those which are a mushy, spicy mass. In modern Chinese cookbooks, the word *jiang* is often translated as “sauce.” For example, *la-dou-ban-jiang* (4 Cc = Chinese characters given) is translated as “hot bean sauce,” *la-jiao-jiang* (3 Cc) is translated as “hot pepper sauce,” *suan-mei-jiang* (4 Cc) is translated as “duck sauce,” and *tian-mian-jiang* (4 Cc) is translated as “sweet flour sauce.”

The following subsection, titled “Fermented leguminous products” (p. 33+) states that Chinese fermented plant foods come primarily from the soybean (*Glycine max*). The ones most widely used in China are all available in the United States. They are: (1) Soy sauce (2 Cc). (2) Fermented black soybean (2 Cc). (3) Soybean sauce [*dou-ban-jiang*] (3 Cc). (4) Bean curd cheese [fermented tofu, *dou-fu-ru*] (3 Cc).

In Western China, broad bean sauce is prepared from *Vicia faba* L.

(1) Soy sauce: Soy sauce is the only liquid Chinese fermented food. Making soy sauce is one of the most important food industries in China. Before the 1930s, soy sauce in China was made from fermented soybeans. Now many bottled soy sauce products, especially those in American supermarkets, are chemical combinations with artificial colors [HVP soy sauces with little or no fermentation].

In China, soy sauce is made in almost every city and in nearly all the large, rural market-places. Formerly the

manufacture of soy sauce was a family business, run by the owner of a store called a jiang garden (*jiang yuan*), which focused exclusively on making and selling fermented and pickled foods. In small towns and rural market-places, soy sauce is made in the back yard of such a store, whereas in large cities it is made on the outskirts of the city where land is less expensive. In Hong Kong, for example, most soy sauce is made in the New Territories.

To make soy sauce, soak soybeans overnight, cook with a small amount of cracked wheat, inoculate purposely or naturally with airborne spores, then heap up to enable fermentation. An experienced person can tell by the color of the molds and the texture of the fermented material [*koji*] when the microbial action is complete. Then transfer the fermented material into “large, top-shaped, thick-walled, earthenware urns about one meter tall and one meter in diameter across the top. Add salt, water and spices, then stir to make a uniform mass.”

Note: Spices are not typically added to the basic soy sauce ingredients in either China or Japan.

Arrange the urns in rows in a “jiang garden” [open courtyard] and place beside each urn with a roof-like cover to be used only when it rains. Keep the urns uncovered day and night so the contents are exposed to fresh air, direct sunshine, and dew at night. On clear days, stir the material in each urn uniformly so that the bottom can be exposed to the fresh air, etc. Under these conditions, natural physical, chemical, and microbial changes take place; the color of the mixture gradually changes to a hue between chestnut brown and black, and the texture becomes more homogeneous, uniform and mushy. As soon as these changes have taken place, make a well in the upper surface of the mass [by pushing a woven bamboo basket into it]. Soy sauce will gradually fill the well and can be collected. This first collection is called *yuan-you* (2 Cc) (“prime sauce”). It is the best in excellence, aroma, and nutritional value, and is “said to be used for table dipping in high class restaurants and/or the homes of officials and rich families.”

After removing all liquid, add water and salt to the urn and repeat the process of exposure to the fresh air, sun and dew. This time, the resulting soy sauce is called *tou chou* (*t’ou-chou*) (2 Cc) (“first extract”). This is also “good sauce and is used for table dipping in restaurants and/or in the homes of affluent families.”

After the first extract is removed, the space in the urn will be larger. So add more water, salt, and spices. The third soy sauce extracted is named *sheng-chou* (2 Cc) (“raw extract”). “It has a much lighter color and is the soy sauce used by most people for cooking. This type is available in Chinese American stores.”

To the final puree left in the bottom of the urn, add water, salt, and partially charred brown sugar. Homogenize the mixture and bottle it. This thick, dark reddish-brown liquid [which is not an extract] is named *lao-tou-chou* (*lau*

t’ou-cho) (3 Cc) (“old man extract,” often shortened to *lao-chou*, 2 Cc). It is also available in the United States.

Note: No miso-like jiang remains in the bottom of the urn.

“The several Chinese cookbooks published in English available to me all mention two types of soy sauce, one light and the other dark. The raw extract and the old man extract are the sauces to which they refer. The old man extract... is used to cook pork or chicken dishes to give the desired color.”

Extensive research on microbiology in Japan has shown that the main organisms used or found in the manufacture of soy sauce are *Aspergillus soyae* Sakaguchi et Yamada, and *A. oryzae* (Ahlburg) Cohn.

A recipe for “Steamed wisteria flowers” calls for “1 Tbsp soy sauce” and “1 tsp hot soybean sauce” (p. 81).

A recipe for “Vegetarian’s *jiao-zi* (*Su-jiao-zi*)” calls for “3 Tbsp soy sauce (*sheng-chou*, 2 Cc)” and (optional) “2 Tbsp hot soybean sauce” (p. 97-98).

Jiang-you (W.-G.: *Chiang-yu*). (2 Cc) (“soy sauce”). “Various types of liquid prepared after the fermentation of soybean with inoculation of *Aspergillus*” (p. 474). Address: Botanist, Arnold Arboretum, Harvard University; Honorary Professor of Chinese Medicine, The Chinese University of Hong Kong.

8378. Kwan, Choi Wah (Guan, Caihua). 2005. Ying Yue zi dian English-Cantonese dictionary: Cantonese in Yale romanization. Hong Kong: The Chinese University Press. 579 p. *

• **Summary:** On page 495 are the following Cantonese definitions / words: Soy (noun). baahkdau; wohngdau * soy sauce (noun). sihyauh (M: jeun; di).

Soybean (noun). baahkdau; wohngdau * soybean milk (noun). dauhjeung (M: wun).

8379. Lee, Jeyseon; Lee, Kangjin. 2005. Korean dictionary and phrasebook. New York: Hippocrene Books. 311 p. [17 ref]

• **Summary:** This is both a Korean-English and an English-Korean dictionary. Korean characters are given for each word in both parts.

Page 21: *gan-jang* means soy sauce.

Note: This is the earliest English-language document seen (April 2012) that uses the term *gan-jang* to refer to Korean soy sauce.

Page 35: *doen-jang* means soybean paste. *doen-jang jji-gae* means soybean paste stew.

Page 80: *kong-na-mul* means [soy] bean sprouts.

English-Korean—Page 93: The Korean word for “bean” is *kong* and for bean sprout is *kong-na-mul*.

Page 135: The Korean word for “pea” is *kong*.

Page 151: The Korean word “soy sauce” is *gan-jang* and for “soybean” is *kong*.

Page 260: The Korean word for “bean sprout soup” is *kong-na mul-kkuk* and for “boiled tofu” is *du-bu jo-rim*.

Page 263: The Korean word for “red-pepper paste” is *go-chu-jang*, for “soybean paste” is *doen-jang*, and for soy sauce (again) is *gan-jang*.

Also (p. 263): The Korean word for “sesame oil” is *cham-gi-reum* and for “sesame seed” is *kkae-so-geum*. Address: 1. Lecturer in Korean and supervisor of Korean language courses, Univ. of California at San Diego.

8380. Moriyama, Naomi; Doyle, William. 2005. Japanese women don't get old or fat: Secrets of my mother's Tokyo kitchen. New York, NY: Delacorte Press. 274 p. Illust. Index. 22 cm. [50+ ref]

• **Summary:** From the publisher's description: “Japanese-born Moriyama reveals the key to the enduring health and beauty of Japanese women. The Japanese eat one of the most delicious, nutritious, and naturally satisfying cuisines in the world without denial, without guilt, and, yes, without getting fat or looking old. If you think you've eaten Japanese food, you haven't tasted anything yet. Japanese home-style cooking isn't just about sushi and raw fish but good, old-fashioned everyday-Japanese-mom's cooking that's stood the test of time—and waistlines—for decades. Reflected in this are the age-old traditional values of family and the abiding Japanese love of simplicity, nature, and good health. It's the food that millions of Japanese women eat every day to stay healthy, slim, and youthful. Even better, it's fast and easy. If you're tired of counting calories, counting carbs, and counting on diets that don't work and don't satisfy, it's time to discover this.”

Traditional Japanese soyfoods are mentioned throughout this book, always in a very positive way and in recipes. Japanese generally eat soyfoods in their more natural and less processed forms such as tofu, miso, natto, and edamame—and rarely in the forms of soy supplements, soy shakes, soy burgers, soy energy bars, etc. that are so popular in the West.

Chapter 5, “The seven pillars of Japanese home cooking,” states (p. 122) that they are: “fish, vegetables, rice, soy, noodles, tea and fruit.” Soy, “The fourth pillar,” is discussed very nicely on pages 181+.

Here is the number of pages on which various foods are mentioned: Tofu 56 (incl. silken tofu {kinugoshi}, cotton tofu {momen, regular}, atsu-age {deep-fried tofu cutlets}, usu-age {deep-fried tofu pouches}, yakidofu or broiled tofu). Miso 50 (incl. p. 91-92. 99-100). Soy sauce 50. Edamame 12. Shoyu 3 (p. 75, 114, 121). Natto 2 (p. 184, 188). Okara 1 (p. 184). Yuba 1 (p. 184). Also many reference to sea vegetables (hijiki, kombu, nori). A photo on the inside rear dust jacket shows the authors; she was born in Tokyo, and he is an American who has written or cowritten five books.

Note: The paperback edition of this book (only) mentions “The Japanese Skincare Revolution: How to Have

the Most Beautiful Skin” in connection with tofu. Address: Wife and husband live in New York City.

8381. Park, Kun-Young; Jung, Keun-Ok. 2005. Fermented soybean products as functional foods: Functional properties of doenjang (fermented soybean paste). In: John Shi, C.-T. Ho, and F. Shahidi. 2005. Asian Functional Foods. Boca Raton, Florida: CRC Press. xxi + 647 p. See p. 555-96. Chap. 20. [121 ref]

• **Summary:** Contents: Introduction. History of Korean soybean fermented foods. Manufacturing methods and characteristics of doenjang fermentation. Functional properties of doenjang: Nutritional and functional components in soybean and doenjang, safety of doenjang, antimutagenic activity of doenjang. Anticancer effect of doenjang. Increased chemopreventive effect of doenjang: Antioxidant effects, reduced cardiovascular diseases (fibrinolytic effect {as in chungkookjang and natto which secrete strong fibrinolytic enzymes}, antihypertensive effects, reduced serum cholesterol level), other possible functions of doenjang. Conclusion.

Doenjang is “Korean fermented soy paste” and kanjang is Korean-style fermented soy sauce that is obtained by filtering off the liquid from doenjang. “Historically soybeans and processed soybean foods have been the main protein sources in the Korean diet” (p. 555). “The medicinal functions of doenjang were first described in the *Donguibogam* [*Dongui Bogam* (RR), *Tongui Pogam* (MR)] (1613 A.D.), which was a popular traditional Korean medical text” [no citation given].

The section titled “History of Korean soybean fermented foods” contains what promises to be a number of references to early and possibly very interesting documents that mention soybeans and soyfoods in Korea. Yet the authors fail to cite any of them properly, so for the time being, we must accept their account of what the documents say. The problems are: (1) None of these documents (except one, Ref. #46) is cited in the long list of references at the end of the chapter. (2) The title of all these documents is given only in Korean, even though at least two should have Chinese titles; one of those two (described as “The Chinese agricultural technology book, *Jeminyosul* {A.D. 530 to 550} written by a governor, Maeunsa,...”) is actually the famous *Qimin Yaoshu*, by Jia Sixie. (3) We are never told in what language the original document referred to is written. (4) The page number(s) on which the ancient, important information appears is not given for any of these documents. (5) For some documents no date is given, whereas for others no author is given. (6) It is not clear what names were used to refer to each of the various soyfoods in the original documents. (7) The authors never tell us whether they examined the original document, or read a contemporary version, or simply got the information from a secondary source.

For example (all dates are A.D.): 99—It has been reported

[by what document?] that soybeans were cultivated—Where were they cultivated?

530-550—The *Jeminyosul* [*Quimin Yaoshu*] states (in Chinese) that shi [fermented black soybeans], soybeans fermented with bacteria, in Korea were disseminated to China and Japan.

683 Feb.—An article [no title given] by King Sinmoon, that appeared in the 3rd year of his reign (during the Silla dynasty), mentioned the words *jang* (mold-fermented soybeans) and *shi* (bacteria-fermented soybeans).

701—*Daeboulyryong* mentioned the words *jang*, *shi*, and *maljang*, which referred to soybean products.

739—*Jungchang Wonmooseu* also mentioned the word *maljang*.

Donga (no date given), which was written by Shinjungbaesuk (is that the writer's real name?) in Japan, "indicated that *maljang* was imported from Korye (the old name of Korea);" it was renamed "miso" (Source: Ref. #46—35th Chronicle of Korea Soy Sauce Industrial Cooperative. 1997. Seoul. p. 27-32). Korean *jang* is said to have developed into traditional Japanese miso using *meju* made of soybeans and rice instead of *maljang*, which was made from soybeans only.

918-1392—During the Korye [Goryeo] dynasty, [in Korea] the name "maljang" changed to "maejyo" and then to "meju" [meaning soybean koji in the shape of balls or cones]; it was soaked in brine in a clay pot and ripened [then filtered]. The liquid was called *kanjang* (soy sauce) and the solid sediment was called *doenjang* (soy paste).

1613—*Donguebogam* [see above], written by Hurjun, described how to make medicinal *doenjang* using soybeans and how to fix soured *doenjang*.

1760—*Jungbosan Limkyunge*, written by Yojungim, "introduced 45 different processing methods for soybean foods, describing how many days fermentation for *jang*, selection of water, salt quality, how to handle the pottery, fixing *jang* with an off-taste, etc."

1790 ca.—*Kyuhap Chongseo*, written by Madam Lee (lived 1759-1824) described the proper methods for making the various types of *jang* in great detail.

1930 ca.—Commercial production of fermented soybean products ("jang" in Korean) started in Japanese-built *jang* factories in Korea during the occupation (1909-1945) to supply soybean products for the Japanese in Japan.

1945—After gaining independence from Japan, Koreans took over the factories. Since the Korean war (1950-1953) military personnel and people living in large cities have mostly consumed commercial fermented soybean products, whereas families living in rural areas still prepare their own. Address: Pusan National University, Busan, Korea.

8382. Shi, John; Ho, Chi-Tang; Shahidi, Fereidoon. 2005. Asian functional foods. Boca Raton, Florida: CRC Press. xxi + 647 p. Illust. Index. 24 cm. Series: Nutraceutical Science

and Technology.

• **Summary:** Contents: Preface. About the editors. Series introduction. Contributors. Table of contents. 1. Functional foods and their impact on nutrition and health: Opportunities in the Asia Pacific... Contains two chapters on fermented soyfoods (Chap. 19, Miso, and Chap. 20, Doenjang) which are cited separately.

The Preface begins (p. v): "Health and 'healing' foods have a long history in Asian cultures." Asians such as the Chinese and Indians have long known that food and medicine come from the same source; they can treat illnesses and build a healthy life. Since ancient times, Chinese have compiled a remarkable amount of information about the materia medica, the use of natural substances—plants, animals, and chemical—to treat illness.

Kudzu (*Pueraria lobata*, *ge geng*), one of the earliest medicinal plants used in traditional Chinese herbal medicine, is discussed on pages 83-86.

In chapter 7 titled "Traditional Functional Foods in Korea," the section on "Fermented soybean foods" (p. 165-66) states that typical daily per capita consumption of these foods are: Soy sauce 20 ml, soy paste 20 gm, and hot soy paste 10 gm. In recent years there has been a decrease in soy intake due to increased use of Western seasonings such as mayonnaise, tomato ketchup, meat sauces, etc.

In Chapter 8, titled "Evolution of Korean dietary culture and health food concepts," the section on "Food as medicine" begins (p. 210): In traditional Korean culture, food was regarded as the basic source of health. It was believed that all diseases could be cured by foods. Korean knowledge of the medicinal effects of foods came, not through the sciences of nutrition, medicine, chemistry, or physiology, but through long human experience. Moreover, a key practice and discipline has long been to eat only when hungry, and not to overeat. The enormous size of the health food market in Korea today reflects the country's long tradition of 'food as medicine.'"

Page 229: "Micronutrients." Asian fish sauces are good sources of vitamin B-12 (cobalamine) because they are made from animal protein. Fish sauce from Thailand contains 1.91 mcg (micrograms) per 100 ml. This amount protects the Thai population from megaloblastic anemia caused by vitamin B-12 deficiency. The estimated average requirement for vitamin B-12 is only 2 mcg per day. However fermented soybean sauce contains very little (0.14 mcg per 100 ml); the small amount present is attributed to microbial synthesis.

Page 230: "The high salt problem." Japanese men rank highest in daily per capita sodium intake at 5.4 gm; the United States, Thailand, and New Zealand each average about 3.9 gm.—72% as much, or 28% less. Some cultures consume as little as 0.69 gm / day.

Pages 248-49: "Future potential for fish sauce." It is unclear whether fish sauce was first developed in Asia or Europe. But while it has vanished in Europe, it has become

a thriving industry in Southeast Asia—perhaps because the extensive use of bland-tasting rice requires a salty and tasty protein-rich seasoning. Several species of anchovy are the preferred raw material for fish sauce. Some say that soy sauce was first developed in Japan. Address: 1. Research Scientist, Federal Dep. of Agriculture and Agri-Food Canada, Ottawa, Ontario, Canada; 2. Rutgers Univ., Rutgers, New Jersey; 3. Memorial Univ. of Newfoundland, St. John's, Newfoundland, Canada.

8383. Trieu, Thi Choi; Isaak, Marcel. 2005. Authentic recipes from Vietnam. Singapore: Periplus Editions. 112 p. Illust. (photos by Heinz von Holzen). Recipe index. 28 cm. Introduction by Annabel Jackson-Doling.

• **Summary:** This book often reads as if it were a written to attract tourists to Vietnam. Contents: Food in Vietnam. The imperial cuisine. The ascending dragon. Homestyle Vietnamese cooking. Cooking methods. Authentic Vietnamese ingredients (incl. tofu {p. 23}, pressed tofu {tau kwa or tou gan}, and firm tofu). Recipes.

Vietnam is in the shape of an “S” with the eastern coastline 1,600 miles long from north to south, yet only 30 miles across at the narrowest point. The country fades from cool in the north to tropical in the south. The two main deltas are the Red River Delta in the north and the Mekong Delta in the south. Vietnam is the 3rd largest rice exporter in the world after Thailand and the USA. About 60% of the arable land is devoted to rice production. Hue, in central Vietnam, was the capital of Vietnam from 1802-1945. Today Ho Chi Minh City (formerly Saigon) is the largest city in Vietnam (p. 5-8).

The section titled “The Imperial cuisine” (p. 11) is about Hue, on the banks of the Perfume River in central Vietnam. Now a rather small and sleepy place, Hue traditionally served as a cultural, educational, and religious center. It “is the site of the country’s most important Buddhist monasteries and temples. It was also the political capital of Vietnam under the thirteen emperors of the Nguyen Dynasty.” Hue “once inspired the creation of the most sophisticated Vietnamese cuisine [under Tu Doc (1848-1883)] and took vegetarian cuisine to even higher heights than those reached by masterful Chinese chefs.”

Soy related recipes include: Yellow bean sauce (Nuoc tuong, with “3/4 cup {4 oz / 120 gm} dried yellow soy beans, boiled and drained,” p. 26). Soy sauce dip (Nuoc tuong toi ot, with “1/4 cup {60 ml} soy sauce,” p. 26). Braised mushrooms with soy sauce (Nam xao nuoc tuong, with “2 tablespoons soy sauce,” p. 49). Crab soup with tofu and rice noodles (Bun rieu, with “1 cake pressed tofu {about 7 oz / 200 gm},” p. 57). Fried tofu with lemongrass and five spice (with “4 cakes pressed tofu {about 18 oz / 600 gm in total}, halved and pressed between paper towels to remove moisture,” p. 64). Stir fried water spinach with yellow bean sauce (Rau muong xao tuong, with “2 tablespoons Yellow

Bean Sauce,” p. 67).

The word “soy” is mentioned on pages 3, 13, 20, 26, 36, 39, 49, 72, 75, 81, 82, 88, 99, and 111.

8384. Yu, Ki-Yull. 2005. Seed production and distribution in Korea. Seoul, Korea: Sein Pub. Co. 143 p. Illust. 23 cm. [10+ ref]*

• **Summary:** Soybean is mentioned on pages 36, 70, 108 and 6 others. Ganjang (soy sauce) is mentioned on page 108.

8385. Gavin, Robert. 2006. Meat-like qualities whet the US appetite for tofu: Biologist tackles taste, texture issues. *Boston Globe*. Jan. 2.

• **Summary:** Xiang F. Kong has developed a new tofu product named Tofettes, in flavors such as teriyaki, barbecue, and Jamaican jerked. He starts by making tofu. To achieve a meat-like texture, he employs a press that uses “precise heat and pressure,” established through a long process of trial and error. The extra firm tofu is then cut into small pieces and fried briefly in vegetable oil. The resulting tofu has a unique texture and ability to take on new flavors. Address: Globe staff.

8386. Smith, Andrew F. 2006. Soy [sauce] and ketchup / catsup (Interview). *SoyaScan Notes*. Jan. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** William Shurtleff called Smith, who had written a book on the history of ketchup (*Pure Ketchup*), to ask why there were recipes in early American cookbooks titled “Tomato Soy” (Randolph 1838, p. 163) and “Soy” (Beecher 1850, p. 72) which did not call for soy [sauce] as an ingredient and did not even mention “soy” in the body of the recipe.

Smith: The price of the soy sauce imported to America from Asia in the late 1700s and 1800s would have been very high. Importers may have adulterated this soy sauce to obtain more and reduce the price. Andrew thinks that the “soy” called for in early American cookbooks would probably not have been real soy sauce; that is, it may not have been made with soybeans—you don’t know for sure. Soy is a generic concept; it’s like the term “ketchup,” which is also a generic term. “Ketchup” and “soy” were used interchangeably. There were probably only a handful of people in 19th century America who knew what “soy” really was, and most of those did not realize that soy sauce was made from soybeans. And soy was certainly not a major part of the American diet or cookery. Mary Randolph could use the word “soy” in place of ketchup and not even give it a second thought. Ketchup is a sauce that is made from a single food product (such as mushrooms) with added spices. Soy was the same. It wasn’t necessarily made from soybeans.

Once a term is adopted, like ketchup in England, it becomes an “in” word, and people then use the word to mean other things. These words are not yet clearly defined.

In the United States, Noah Webster's *American Dictionary of the English Language* did not appear until 1828. It states: "Catchup or Catsup: A liquor extracted from mushrooms, used as a sauce." "Catsup: see Catchup, Ketchup." "Ketchup: A sauce. See Catchup." "Soy: A kind of sauce used in Japan."

Mary Randolph ran a boarding house. If someone came in with a "Tomato soy" recipe, she would probably have said "Okay, fine."

If a cook goes somewhere and samples or buys a little real soy [sauce], and finds it to be tasty, her / his goal is to go home and try to develop a kitchen recipe for it—just as with ketchup. Ketchup was originally a fermented sauce from Indonesia which included soybeans. When it arrived in England, people tried to duplicate it. Recipes are interesting in that they first show us that people were using the word "soy" to refer to sauce that contained no real soy sauce. People did not feel the need for clear definitions in the area of recipes, and especially with the terms "ketchup" and "soy." It really isn't until sauces become commercialized that clear definitions become necessary.

Concerning terms like "India soy" and "Indian soy," Shurtleff notes: Japan was closed to foreign trade until about 1868. The one exception was the Dutch trading post on the tiny island of Deshima in Nagasaki Bay in southern Japan. From there, Dutch trading ships would transport Japanese shoyu to their own network of trading posts in Southeast Asia, and to the southern tip of India, where they would sell it to the British East India Company. But, of course, they would not tell the British where it was made. So the British began calling it "India Soy" or "Indian Soy," even though (as far as we know) no soy sauce was made in India. Smith adds: The Dutch probably also traded Indonesian ketchup (kécap; Indonesian-style soy sauce, made in Indonesia) with the British, but there is less evidence of this.

In 1684, the British established a settlement on Sumatra named Bencoulin [Benkulen, Bengkulu] (alternatively spelled Bencoelen, Benkulen, Benkoelen). "It served as a center of the British pepper and spice trade during the late 17th and early 18th centuries. At the time of its founding, Bencoulin was the only British settlement in Southeast Asia." In 1825 the settlement was handed over to Dutch control in exchange for the Dutch colony of Malacca on the Malay Peninsula [in today's West Malaysia on the Strait of Malacca].

"Only one ketchup recipe known to have originated in Southeast Asia has survived. It was published by Richard Bradley in the 1732 edition of his *Country Gentleman and Farmer's Monthly Director*. The recipe was titled "Ketchup in Paste" (see Part 2, p. 150) and its main ingredient was kidney beans—which almost certainly referred to soybeans. Rich in spices, it contained no salt or sugar, so it could not have lasted for any length of time. "It appears to have had no influence on subsequent cookery writers." In short, the British first discovered ketchup—and began using the word—

on the southwest coast of Sumatra, in today's Indonesia, in Bengkulu, on the Indian Ocean. That ketchup was probably Indonesian-style soy sauce. They tried to duplicate it when they returned to England, but since they didn't have soybeans, and didn't even know it contained soybeans, they developed a host of alternative recipes—based on mushrooms, walnuts, anchovies, etc.

Isn't it strange, that soy sauce was never adopted or became popular in the Netherlands, as it did in England. This raises one real question. Also: Why are there so few early records concerning soy sauce in today's Indonesia? Another question is whether the terms "India soy" and "Indian soy" refer to today's India or to the Dutch East Indies. Address: 135 Eastern Parkway, #11a, Brooklyn, New York 11238.

8387. Shurtleff, William. 2006. Thoughts and questions concerning Dutch traders, the Dutch East India Co. (VOC), soy sauce in the Dutch East Indies and the Netherlands, and the words "catchup," "catsup," "ketchup" and "ketjap" (Editorial). *SoyaScan Notes*. Jan. 15.

• **Summary:** During the 1600s and 1700s, traders and merchants of the Dutch East India Co. in Asia greatly preferred Japanese shoyu [soy sauce] to Indonesian kecap / ketchup [soy sauce]. In the 1640s, the Dutch replaced the Portuguese as the only nation allowed by Japan's ruling shoguns to trade with Japan. Dutch traders purchased Japanese shoyu from their trading post at Deshima, then filled orders for it from their many trading posts in the Dutch Indies (today's Indonesia and parts of India), where it was used to season foods. Dutch traders also sold it in India to British East India Co. traders, who shipped it back to England and on to the United States; in both these places it became quite popular—much more popular than it ever became in the Netherlands. The British had no access to Japan; the only way they could obtain Japanese soy sauce was to buy it from the Dutch East India Co. In short, the Dutch were the first foreigners to buy, sell, and use Japanese soy sauce.

It seems very surprising that, during this period, there is almost no evidence that these Dutch traders were importing any kind of soy sauce to the Netherlands.

Soy sauce was in England by 1679, when it was reported by John Locke in his journal. This is also the earliest date seen for soy sauce in Europe. It was not reported in the Netherlands until 1727; that year the German physician and traveler Engelbert Kaempfer wrote: "This *Soeju* [shoyu, or soy sauce] is exported by the Dutch, and brought even into *Holland*."

From 1641 to 1858 there was a Dutch East India Co. trading post on Deshima, an artificial island in Nagasaki harbor, Kyushu. The earliest date seen for a shipment of shoyu from Deshima by Dutch traders is 1651.

About 20 years earlier, in 1619, the Dutch built Batavia [today's Jakarta] and established a settlement on Java [part of

today's Indonesia].

When the British started buying "Ketchup" from the Dutch: (1) What type of Ketchup was it? Sweet or salty. Perhaps we could find the answer by doing a careful analysis of its early imitations—mushroom, walnut, and oyster ketchup. Were they basically sweet and thick like the more modern kecap manis, or were they thinner and salty—like ketjap asin or like Japanese or Chinese soy sauce? (2) Where in the Dutch East Indies was it made? (3) At which trading post did the Dutch East India Co. sell it to the British East India Co. (4) When did the earliest known sale take place and where is it recorded? (5) In what type of containers was it packaged and shipped?

If only one VOC ship a year was allowed to export Japanese goods (including soy sauce) from Deshima, the VOC would plant that shipment very carefully to maximize profits. Why would they want to sell the soy sauce at wholesale prices to the British East India Co.

The best way to understand what early ketchup was, is to study it together with soy sauce—not by itself, alone.

Did the VOC or the Dutch ever import soy sauce from the Dutch East Indies to the Netherlands? If so, starting when? What did they call it? Did they import different types?

When did soy sauce first appear in Holland / The Netherlands?

What were the characteristics of earliest homemade ketchup recipes in English—make a table of ingredients with date down left column. Did they tend to be sweet or salty? When salty, how was the salty flavor obtained? The savory flavor? Were any early ones fermented? Or just aged? Address: Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

8388. Welters, Sjon. 2006. Ketjap and soy sauce in the Netherlands (Interview). *SoyaScan Notes*. Jan. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sjon first became aware of soy sauce as a child in the Netherlands in the late 1950s, when he was introduced to ketjap (sweet Indonesian-style soy sauce). When a person says "ketjap" in the Netherlands (then, as now), they mean "ketjap manis" (pronounced KET-jap MAN-is), the sweet, thick type. People usually say simply "ketjap"; they rarely say "ketjap manis," even though that is the product name on the label. If you asked for "ketjap" in an Indonesian restaurant in the Netherlands, they would almost always bring ketjap manis.

He was first introduced to salty soy sauce years later when he became interested in macrobiotics and Japanese-style soy sauce. Sweet Indonesian-style soy sauce is sold at many supermarkets in the Netherlands, however it is usually in the special section reserved for Indonesian products; salty Indonesian soy sauce is not typically sold in that section. In the Netherlands, ketjap manis is definitely thicker than Japanese soy sauce, but not as thick as American tomato

ketchup. It's consistency is more like miso-damari; if you tilt the bottle, it pours by itself. Note: Ketjap manis is fairly similar to *tonkatsu sauce*, very popular in Japan as a seasoning for deep fried foods. *Tonkatsu* means "breaded pork cutlet" (deep-fried).

For more information on ketjap manis and a color photo, go to the Conimex website (www.conimex.com); Conimex, a Dutch company specializing in the import of Indonesian food, was founded in 1932 and is now owned by Unilever. The website states: "It all started with the import of Indonesia's most important basic ingredients like spices, ketjap (sweet soy sauce) and sambal (chili paste)."

In the Netherlands, Maggi (pronounced MA-hi) is very widely used as a seasoning instead of salty Indonesian soy sauce. Made now by Nestlé, it is sold among the regular non-ethnic foods and seasonings in Dutch supermarkets. There is a special flavor in Maggi, called *lavas* (lovage, or "Maggiplant") in Dutch, that Sjon likes very much.

Note: Talk with Anneke de Weerd Shurtleff. The ingredients in Conimex Ketjap Manis are: Sugar, soya sauce (25%; water, soyabeans, salt, wheat), water, molasses, salt, brown sugar, burned sugar syrup, preservative E-202, nutrition acid E-270, aroma (with celery), bay / laurel extract. Store in a cool, dark place. The ingredients in Maggi (a concentrated liquid bouillon seasoning) are: water, hydrolyzed corn gluten and soy protein, salt, artificial flavor. "Improves vegetables, gravies, soups and stews." Address: Founder and owner, Rhapsody [natural foods restaurant], 28 Main St., Montpelier VT 05062. Phone: 802-229-6112.

8389. Tullo, Alex. 2006. Givaudan and IFF [International Flavors & Fragrances] plan to revamp: Moves may be coincidental rather than emblematic of a struggling industry. *Flavors and fragrances. Chemical and Engineering News* 84(3):6. Jan. 16.

• **Summary:** Richard A. Goldstein, CEO of IFF, plans to cut 300 jobs. By mid-2007, Givaudan, plans to close plants in New Milford, Connecticut and Oconomowoc, Wisconsin, and to transfer jobs from these sites to plants in Cincinnati, Ohio, and Devon, Kentucky. "The New Milford plant makes savory flavors, including hydrolyzed plant proteins (HPPs)."

Givaudan also plans to discontinue production of "commodity-type savory base-note flavors such as HPPs and yeast extracts. These business generate about \$35 million a year in sales.

In 2002 Givaudan acquired Nestlé's FIS (Food Ingredients Specialties) unit and is still working to integrate those abundant assets.

8390. Maggi—The company's history (Website printout—part). 2006. www.museedelapub.org/virt/mp/maggi/index_anglais.html. Printed Jan. 17.

• **Summary:** A good company timeline with many photos. 1870—Julius Michaël Johannes Maggi (1846-1912) [also

called “Jules Maggi,” especially in French], of Switzerland, inherits the family business: a mill in Kemptal, near Zurich.

“1883—Several women were factory workers, thus the time available for housework and the preparation of meals was considerably reduced, and working class families suffered from poor nutrition. In view of this state of affairs, the doctor Schuler recommended the wide use of dried vegetables: peas and beans give their rich nutritive value. Julius Maggi produced appliances [equipment] for roasting and grinding these vegetables, to make flour from peas, beans, lentils, etc., enabling housewives to make a quick nourishing soup. Eventually Maggi put his instant product—vegetable powders—on the market, under his friend Doctor Schuler’s patronage. Julius Maggi distinguished his products by a four branches star, with a cross at its heart. The Cross Star trademark was registered.”

“1886—Maggi marketed three kinds of powdered ‘minute’ [instant] soups, presented in a rolled up packet. Industrial fabrication is just beginning, and soon several Maggi depositories opened throughout Europe. Julius Maggi engaged famous artists for his advertising campaigns.” Maggi soups were tied to “Women’s emancipation.”

1889 (Koenig)—[Soybean preparation named “miso” (Made by Jul. Maggi & Co. in Kemptal; sampled in 1888; Study by W. Kisch {personal communication})].

“1890—The Maggi flavour was invented to improve soups. It was composed of vegetable extracts (the same product as today’s tablets). Julius Maggi did the drawing on the bottle (which is also the same today)... The *Société Anonyme pour la Fabrication des Produits Alimentaires Maggi* was founded and set up offices throughout Switzerland, Austria, and Germany. Julius Maggi simplified the recipe for bouillon, and made it cheaper. He [then] produced a concentrated bouillon based on meat extracts, first in capsule form, then as a cube.”

1895—Firmin Bouisset designed a famous poster for Maggi with a young girl holding up a sign promoting Maggi’s products.

1900—At the Universal Exhibition in Paris, Maggi won several medals and grand prizes. Julius Maggi established his headquarters and a factory in Paris.

1912—The Bouillon KUB in bars was launched with a massive promotional campaign. When Julius Maggi died that year the family firm was renamed Société Général Maggi. The first commercial for chick stock, a silent film in black and white, appeared.

1911 (Dahle)—[Shoyu is even used in the well-known Maggi seasoning].

1930—Maggi’s star product is the Bouillon KUB. A new Chicken Stock slogan is coined.

1934—A holding company, Alimentaire S.A. takes charge of the business.

1947—Maggi was acquired by Nestlé.

1948—Sopad took over from Nestlé to handle

production and marketing of Nestlé and Maggi products in France. Maggi now has 11 factories worldwide. Address: Switzerland.

8391. Global Industry Analysts, Inc. (GIA). 2006. Soy foods—Global strategic business report. 5645 Silver Creek Valley Rd., San Jose, California. 302 p. Jan. *

• **Summary:** Publisher description: This report analyzes the worldwide markets for Soy Foods in millions of US\$. The specific product segments analyzed are Soy Ingredients, and Soy Oil. The report provides separate comprehensive analytics for the US, Canada, Japan, Europe, Asia-Pacific (excluding Japan), Latin America, and Rest of World. Annual forecasts are provided for each region for the period of 2000 through 2010. The report profiles 151 companies including many key and niche players worldwide such as Archer Daniels Midland Company, Dean Foods Company, White Wave, Eden Foods, Inc., Galaxy Nutritional Foods, Inc., Gardenburger, General Mills, Glenn Foods, Greet Spot (Thailand), Griffith Laboratories (UK), H.J. Heinz Co. Hain Celestial Group, Hartz International (Australia), Hazlewood Grocery (UK), Heartland Fields (USA), Hermans Foods (Australia), High Mark Foods (New Zealand), Imagine Foods, Inc., Kerry Group PLC (Ireland), Kerry Ingredients (Australia), Kikkoman (Japan, Australia, USA, Singapore), Kimlan Foods Co. (Taiwan), Kuhne Nederland BV (Netherlands), SoyaWorld, Inc., Turtle Island Foods, Inc., and Vitasoy USA, Inc.

Price: Electronic or hard copy 3,496 euros. Please note: Reports are sold as single-site single-user licenses. The delivery time for hard copies is between 3-5 business days, as each hard copy is custom printed for the organization ordering it. Electronic versions require 24-48 hours as each copy is customized to the client with digital controls and custom watermarks. Address: San Jose, California. Phone: 408-528-9966.

8392. *SoyaScan Notes*. 2006. Chronology of the Dutch East India Company (VOC), 1602-1799 (Overview). Feb. 6. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Throughout the 16th century (1500s), Portugal became fabulously wealthy from its monopoly of the spice trade in the East Indies. Like many commercial advantages of the time, this was achieved by control of sea routes, especially domination of the route to the East Indies via the Cape of Good Hope (at the southern tip of Africa).

A well-organized Protestant church movement developed in the Netherlands, and the dissatisfaction with Catholic Spain coincided with the Protestant revolt against the Roman Catholic Church.

1566—Anti-Catholic riots spread across the Spanish Netherlands. Philip II of Spain sends his troops whose harsh actions result in open revolt.

1568—The 80-year war of independence by the Dutch

against Spain begins (ended 1648).

1579–Signing of the Union / Treaty of Utrecht with Spain marks the foundation of the United Provinces. These are the 7 northern Protestant provinces of Holland, Zeeland, Utrecht, Gelderland, Groningen, Friesland, and Overijssel. The 7 provinces that joined the union would eventually become the Netherlands; the 10 southern Catholic provinces that did not would become Belgium.

1581–The Union of Utrecht (United Provinces) declare independence from Spain.

1596–Dutch merchants begin trading with Jayakarta (today's Jakarta).

1600–The Dutch ship *Liefde* is stranded in Usuki Bay, Japan; the first Dutch contact with Japan.

1600–The Honourable East India Company is established in London, Europe's first such international trading company. The Tokugawa shogunate begins in Japan.

1602 March 20–The Dutch East India Company (*Verenigde Oostindische Compagnie*, VOC—literally “United East Indies Company”) is established by Dutch merchants, when the Estates-General of the Netherlands granted it a monopoly to conduct trade, business and colonial activities in Asia. It was the world's first company to issue stocks and the first multinational corporation. The VOC eventually became the world's largest company, in existence for over 200 years. It built over 1,600 ships called East Indiamen.

The VOC consisted of 6 Chambers (*Kamers*) in Amsterdam (with 8 delegates), Middelburg (for Zeeland; 4 delegates), plus Enkhuizen, Delft, Hoorn, and Rotterdam (1 delegate each). Delegates of these chambers convened as the *Heeren XVII* (the Lords Seventeen). Because of its majority 8 delegates, the Amsterdam bloc basically decided policy. The start-up capital was 6.4 million Gulden, raised by the 8 chambers, of which 27% came from Amsterdam. This capital was raised by selling VOC stock to 1,143 subscribers.

1603 Dec. 18–The first VOC fleet of 12 ships sails under the command of Steven vander Hagen.

1605–VOC first lands in Asia. Armed Dutch merchantmen capture the Portuguese fort at Ambon (Amboyna / Amboina, a town and island in the Moluccas, in today's eastern Indonesia) and take control of the island which was the most important of the Moluccas (Spice Islands) at this time. The Portuguese had established a factory here in 1521; it was the source of their clove monopoly. This fort is developed in the VOC's first secure fort. Ambon was the headquarters of the VOC from 1610 to 1619 until the founding of Batavia (now Jakarta) by the Dutch.

1609–VOC factory (comptoir, trading post) established on site of Jacatra / Jakatra (today's Jakarta) by Dutch merchant Jan Pieterszoon Coen. Located at the far western end of the island of Java, it becomes the headquarters of the Dutch East India Company, which gradually extends control over neighboring sultanates and principalities.

1609–First VOC factory (trading post) in Japan established on the island of Hirado (Por. Firando), off Japan's southernmost island of Kyushu (northwest of Nagasaki).

1609–Twelve Years' Truce, signed in Antwerp, calls a halt to hostilities between Spain and the Seventeen Provinces.

1610–Small walled town of Paliacatta (also spelled Paliacatte; today's Pulicat) established on the east coast of southern India. It soon becomes the chief Dutch settlement and headquarters of the VOC factories on the Coromandel Coast. At its center is Fort Geldria, with its permanent garrison of Dutch soldiers, its cannon and armory to protect the various Company trading posts along the Coromandel Coast.

1612–Fort established on Ceylon (today's Sri Lanka).

1613–As early as this year, VOC leaders recognize the importance of direct trade with China. However attempts to establish a settlement on the Chinese coast in the early 1600s are not successful.

1615–Powerful Dutch merchant Isaac Le Maire tries to break the VOC monopoly on trade routes to the Indies by sailing westward through dangerous and uncharted waters around Cape Horn, the southernmost tip of South America and into the Pacific Ocean, avoiding the VOC-controlled Straits of Magellan. The ship arrived in Jakarta in Oct. 1616, to the amazement of Governor-General Jan Coen.

1616–Danish East India Company founded.

1619–The Dutch attack and destroy Jayakarta (Jakarta, Jacatra). East of the ruins they build a new coastal town, which Coen names Batavia (essentially he renamed Jayakarta). Batavia becomes the headquarters of the VOC and of Dutch colonial power in Asia for almost 350 years.

1621–Banda Islands (in today's south central Moluccas, Indonesia) conquered by the VOC, which establishes its monopoly over nutmeg and mace there.

1621–Dutch West India Company founded. In 1624 this Dutch West India company establishes a settlement in New Amsterdam (now Manhattan, New York).

1622–VOC attack on the Portuguese in Macao / Macau fails.

1624–Chinese armies drive the VOC from the Pescadores Islands. A fortified settlement on Formosa (Taiwan) becomes VOC's base for trade with China until 1662.

1633–St. Helena island in the South Atlantic Ocean becomes a supply station.

1635–The Portuguese blockade Malacca (until 1640).

1638–Goa (capital of Portuguese India) blockaded by Dutch fleets (until 1644).

1638–Beginning of VOC's conquest of the coast of Ceylon near Kandy.

1639–The Portuguese are expelled from Japan by the shogun.

1641–The Dutch put a blockade on Melaca / Malacca

(the city in today's Malaysia that controls the crucial Straits of Malacca) then seize the city from the Portuguese after 6 months. They keep this hold on Melaka for the next 150 years.

1641—The VOC trading post on Hirado (closed in 1640 by the shogun) is moved to the tiny artificial island of Deshima in Nagasaki Bay, where the men are kept as virtual prisoners (with more severe restrictions than before Shimabara Revolt and the seclusion {*sakoku*} of Japan in 1641) and allowed only one trading ship a year. The Dutch are the only Europeans allowed to trade with Japan for the next 200 years—until 1853.

1648—Treaty of Muenster ends the 80-years' war; Spain recognizes the sovereignty of the Dutch Republic, which is now the foremost commercial and maritime power in Europe, and Amsterdam is the financial center of the continent.

1651—Repeat of the war with Portugal in the Indies—in Ceylon and on the Malabar Coast of southwest India.

1652—Jan van Riebeeck establishes a supply station at Table Bay, the first European settlement near the Cape of Good Hope (on the southern tip of today's South Africa). This post later became a full-fledged Dutch colony, the Cape Colony.

1652-54—First English-Dutch sea war.

1658—Dutch replace Portuguese in Sinhalese kingdom (Ceylon) as the occupying power.

1661—Beginning of the definitive campaign (completed in 1663) to drive the Portuguese out of the Malabar Coast and to control their production of pepper.

During the 1600s (17th century), British and Dutch traders became bitter rivals in international commerce.

1662—VOC is driven out of Formosa / Taiwan by Ming Chinese troops under the command of Cheng Ch'eng-Kung, known to Europeans as Koxinga. In 1684 Manchu troops occupy Formosa.

1664—French East India Company founded.

1665-67—Second English-Dutch sea war.

1667—Dutch seize town of Macassar (Ujung Pandang) and develop trade monopoly in Makassar Strait (in today's Indonesia between East Borneo and West Sulawesi).

1667—VOC takes trading post at Achem (Aceh), the native kingdom of Sumatra.

1669—The VOC is now the richest private company the world has ever seen, with over 150 merchant ships, 40 warships, 50,000 employees, a private army of 10,000 soldiers, and a dividend payment of 40%. By now, the company is in almost constant conflict with the English. Moreover, the VOC has now grown to become a state within a state.

1682—Dutch seize Bantam in West Java. VOC outposts were also established in Persia (today's Iran), Bengal (now Bangladesh), Siam (now Thailand), and mainland China (Canton).

Dutch policy encourages monoculture of the fine spices they controlled: Amboyna for cloves, Timor for sandalwood, the Banda Islands for mace and nutmeg, and Ceylon for cinnamon.

During the 17th century, the VOC was the most important European company in the Asia trade, and Amsterdam became Europe's most important market. It took a Dutch ship 3 to 6 months to travel from Holland to Batavia. The trip was risky, in part because of the inherent dangers of bad weather and uncertain navigation, but also because no reliable method of determining longitude was discovered until the 1770s (by John Harrison in England) and measures to prevent scurvy (carrying fresh fruit, vegetables, and sauerkraut) were not put in place until the period 1772-1795.

The 17th century has been called the Dutch Golden Age, in which Dutch trade, science, and art were among the most acclaimed in the world. This Golden Age was caused by wealth, tolerance, and a new national consciousness.

1731—The Swedish East India Company founded.

1780-1784—Fourth war between the United Provinces and England; England wins, capturing many VOC ships and imposing peace terms that enabled it to trade without hindrance from the VOC and to take over key VOC settlements in Asia. After this war, the VOC is in deep financial trouble.

1795 Jan 19—The seven provinces which have comprised the Republic of the Seven United Netherlands proclaim the *Bataafse Republiek* (Batavian Republic), rendering the Netherlands a unitary state—one country. From 1795 to 1806, the Batavian Republic designated the Netherlands as a republic modelled after the French Republic.

1799 Dec. 31—The bankrupt Dutch East India Company is nationalized, dissolved and liquidated; its huge debt of 219 million Dutch guilders and all of its property are taken over by the Dutch government.

From 1806 to 1810, the *Koninkrijk Holland* (Kingdom of Holland) is set up by Napoleon Bonaparte as a puppet kingdom governed by his brother Louis Bonaparte in order to control the Netherlands more effectively. The name of the leading province, Holland, was used for the whole country. French domination lasted until 1815 when the "United Kingdom of the Netherlands" was formed by the Congress of Vienna at the end of the Napoleonic Wars.

8393. **Product Name:** Re: Ethnic Koreans growing soybeans in Tajikistan or Turkmenistan, and her work introducing soyfoods to these countries.

Manufacturer's Address: Letter (e-mail) to William Shurtleff at Soyfoods Center, Feb. 18.

Date of Introduction: 2006. February.

New Product—Documentation: In Tajikistan she met a couple who lived near Dushanbe. The husband, Victor, was planning to grow soybeans. She gave him some seed grade soybeans to grow, although she had the impression that he

hadn't grown soybeans before. She sensed that he wanted to grow them because of increased interest in soybeans—for reasons she does not understand. She gave him the seeds that Walter Barrett had given her, because the soybeans she had found in Tajikistan were not of good quality.

Victor led her to a Korean tofu maker, a woman who didn't speak Korean. She supplied tofu to a Chinese restaurant in Dushanbe. She told Helen that she bought her soybeans from Uzbekistan, and said they were expensive. Helen did not ask the woman when she had started to make tofu commercially or what the name of her small business was. Helen does not recall exactly where it was located.

Vera, Victor's wife, sold Korean salads at a green bazaar in Dushanbe. She and other Korean salad vendors at the green markets sold a type of dish made from Chinese TVP, which is white in color and imported from China.

At an import supermarket called Holland Market in Dushanbe, Helen found several Russian-made TVP products and soymilk powder. She also saw soymilk sold in Tetra Pak cartons.

In Ashgabat, Turkmenistan, two Korean men came to talk with Helen at the Winrock office about a soymilk machine.

In the Dashoguz region of Turkmenistan, Helen met two different groups of Koreans (a least 30 people total) who wanted to see her presentation and demonstration of soymilk and tofu production using a SoyJoy machine, along with a display of soy products such as tofu (in a Tetra Pak carton), TVP, soynuts, soy flour, soy protein isolates, energy bars, soy sauce, etc. In some presentations at farms or for women's groups (including the Korean groups), she also prepared soyfoods or Turkmen foods that included whole soybeans.

In Tajikistan, she gave 3 presentations / demonstrations: One at "Salsa Restaurant" in downtown Dushanbe, and two at a cafeteria and at the meat processing lab of the Khujand branch of the Technical College of Tajikistan. She usually ended her presentations with a meal with the participants. Her menu included Pulov [pilaf] (rice with some meat, soybeans, carrots, and onions), soup, salad, and a crepe (using a mixture of wheat flour, soy flour, and some type of local jam).

At the Agricultural University of Tajikistan in Dushanbe, and at the Khujand branch of the Technical College of Tajikistan, she gave technical presentations using an overhead projector with PowerPoint slides showing the nutritional composition of soybeans, and techniques for the preparation of traditional soyfoods and commercial products such as soy oil, soy protein, lecithin, etc.

In Turkmenistan: She gave food preparation presentations: (1) At a farm in the Mary district. (2) At apartment style homes in the cities (Mary district, and Dashoguz). (3) At the Winrock office in Dashoguz for different groups of women. (4) For 2 groups of Peace Corps volunteers in Dashoguz. "Peace Corps was interested in

soyfoods because it was suspected that the protein intake of PCVs in that country was not sufficient."

While in Tajikistan and Turkmenistan, Helen did not see any soybeans being cultivated, nor any bundles of soybean plants harvested for green vegetable soybeans.

After her visit: (1) Her soy recipes were translated into the Turkmen language by Winrock staff, but (as far as she knows) they were not printed or reproduced. (2) A 30-page Russian-language brochure on soybeans was created (using desktop publishing) by a group of Peace Corps volunteers in the Dashoguz area. It included planting information and recipes, with colorful pictures and diagrams; about 200 to 300 copies were printed. The produced was funded by the Peace Corps and Helen, however Helen does not have a copy with her in Mexico. (3) Helen prepared a trip report, which is now the property of Winrock International. She did not write much about Koreans in that report.

She includes a Russian-language article on soya from the newspaper *Asia-Plus* (23 Sept. 2004, p. 4).

Note: This document mentions the earliest known commercial soy products in both Tajikistan and Turkmenistan.

8394. *SoyaScan Notes*.2006. What words for "ketchup" appear in early American newspapers? How often and from when to when? (Overview). Feb. 24. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** An online database titled "Early American Newspapers" (EAN) contains almost all early U.S. newspapers, from 1690 to about 1915 in digitized, computer-searchable form.

The words "ketchup" or "ketchups" appear in about 6,815 issues (mostly in classified ads) from Sept. 1740 to April 1886. Clearly "ketchup" is by far the most commonly used word.

The words "catsup" or "catsups" appear in about 2,756 issues from Nov. 1781 to Sept. 1915.

The words "catchup" or "catchups" appear in about 1,063 issues from 1752 to 1886.

The words "kitchup" or "kitchups" appear in about 104 issues from Nov. 1762 to July 1816.

Other words (listed alphabetically) that produce a small number of hits are: Catchap (2), catchop (6), catsap (12), catshup (9), catsop (18), katchap (2), katchop (1), katchup (23), katch-up (1), ketchap (31), ketchop (36), ketsup (6), and kitchap (5).

The word "soy" appears in a surprisingly large percentage of these ads, often immediately before or after the "ketchup" word.

8395. Krukar, Rudolph. 2006. History of hydrolyzed vegetable proteins (HVP) (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyfoods Center.

Address: 757 Birdie View Point, Sanibel, Florida 33957.
Phone: 239-472-8451.

8396. Krukar, Rudolph. 2006. Personal history and history of his work with hydrolyzed vegetable proteins (HVP) (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyfoods Center.
Address: 757 Birdie View Point, Sanibel, Florida 33957.
Phone: 239-472-8451.

8397. Manley, Charles H. 2006. History of hydrolyzed vegetable proteins (HVP) (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Discusses: Justus Liebig (developed basic chemistry), Julius Maggi (commercialized the product in Switzerland with many products), Nestle (acquired Maggi in the 1930s), Unilever, World War II (Maggi built HVP plant at New Milford, Connecticut in USA), wheat, corn and soybeans, Aji-no-moto and Suzuki, monosodium glutamate, Japanese fermentation process, Huron, process flavors (started in late 1960s with Dr. May, a Brit who worked for Unilever). Address: PhD, Vice President, Science and Technology, Takasago International Corp. (USA), 4 Volvo Dr., Rockleigh, New Jersey 07647. Phone: 201-784-7305.

8398. INTSOY. 2006. Processing and marketing soybeans: Meat, dairy and baking applications, May 1-5, 2006 (Leaflet). Urbana, Illinois. 8 panels. Front and back. 22 x 36 cm.

• **Summary:** This glossy leaflet (green and black on white) announces a 5-day course (\$1,800) plus the course and an extended workshop schedule (\$2,400). The program now has 15 corporate sponsors: The Solae Co., Staeta, Insta-Pro, Proviant, BAR, N.A., Inc., SOI, ADM, Assoy, Wenger, Microsoy Corporation, US Soy, Silk, Kikkoman, Cargill, and Buehler. Course schedule: Welcome, international soymilk processing, success stories, soymilk, and soy products, marketing, soy flour, soy and meat, hot topics (soy infant formula, soy and reduction of chronic disease, soy allergies, quality and stability of soybean oil, specialty soybean varieties, biotechnology of soybeans). A list of featured speakers are given; many are from the corporate sponsors!

Talk with INTSOY employee. 2005. The "short course" has been discontinued; it was established through a grant, has come to an end. The course is now under the aegis of NSRL. In the year 2000 the 4-day course attracted 28-30 people. Address: National Soybean Research Lab. (NSRL), 1101 W. Peabody Dr., Urbana, Illinois 61801. Phone: (217) 244-1706.

8399. Aihara, Cornelia. 2006. The secret of cooking, from *The Do of Cooking. Macrobiotics Today (Oroville, California)* 46(3):22-27. May/June.

• **Summary:** Contents: Eat locally grown foods in season.

Do not waste. The yin yang game / principle in selection of foods. The three stages of cooking (beginner, skillful, master). Don't hurry. Basic suggestions (Main foods should be whole grains. For seasonings use traditional, naturally fermented miso and soy sauce. Tekka, gomashio, hiziki [hijiki], shio kombu). Condiments and spices (incl. soy sauce and miso). Food combination (based on yin and yang). Lunchbox and other tips. Kitchen hints.

Photos show: (1) Portrait of Cornelia. (2) Lima Ohsawa and Cornelia standing together. (3) Cornelia teaching foot massage to David Hammon.

8400. Masuyama, Mike K. 2006. Re: Shiro (white) soy sauce. Letter (e-mail) to William Shurtleff at Soyfoods Center, July 3—in reply to inquiry. 1 p.

• **Summary:** Hello Bill: I would like to share the info that Mr. Ninagawa has sent me. 1. Ninagawa does not know the exact first name of Mr. Endo, guessing probably "Yoshinao".

2. There is an association of white soy sauce manufacturers, Tokai Shiro Shoyu Association" (1-16-7 Sakae, Naka-ku, Nagoya, 400-0008, Japan, Phone 011-81-52-221-9501, No e-mail address listed). This organization is not a trade organization but one with volunteer memberships. It holds 2-3 friendly meetings a year for traditional greeting or some news exchanges. It does not represent the whole white soy sauce industry and does not do any publication of statistics or government-public relation activities.

3. According to Ninagawa, there are 9 manufacturers of white soy sauce in Aichi-Mie prefecture area: Yamashin, Nitto Jyozo, Ohtaya (under the brand name of Morita), Shichifuku, Hatoya, Sato, Yamadai, Nakari, Isekura.

There are four manufacturers outside Aichi-Mie prefecture area. Kinoene (under Kikkoman, Chiba), Shoda (Gunma), Chiba (Chiba), Honmurasaki (Hiroshima).

4. The Shoyu Information Center www.soy sauce.or.jp is the only one organization to provide info to public. According to Ninagawa, there are no statistics on white soy sauce there.

I pay respect to your comment on our business. I will answer you technical questions as follows:

1. Since white soy sauce darkens through photo-chemical reaction, we use amber or green bottles to minimize darkening. Yamashin appears not to be concerned with the natural reaction in clear bottles. There is no safety issue there but appearance and taste concerns.

2. A very small amount of alcohol may be produced in white soy sauce fermentation process. The alcohol listed as an ingredient is alcohol originating from another fermentation that is added for preservation and flavor stabilization.

"I hope you will make contacts with the Tokai Shiro Shoyu Association or Shoyu Information Center for further inquiries. Happy 4th of July. Mike Masuyama." Address: Visalia, California.

8401. Sato, Takashi. 2006. Sale of San Jirushi to Yamasa. Plan to build a new plant in Richmond, Virginia (Interview). *SoyaScan Notes*. July 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In Nov. 2005 Yamasa Corporation purchased San Jirushi Corp. and San-J International (Kuwana, Japan; and Richmond, Virginia). San-J International had reached the production capacity of their tamari plant in Richmond, Virginia, and they needed about \$40 million to build a second plant on the same property as their first plant.

They like being purchased by Yamasa because Yamasa is owned by one family (just like San Jirushi, which is owned by the Sato family) and that family and their family are related at the level of cousins. San-J is has not publicized the acquisition in the USA because they wish to keep their separate identity.

Note 1. As of Sept. 2010 Soyinfo Center has been unable to find even a single article in any U.S. newspaper or magazine announcing or discussing this acquisition.

Note 2. E-mail from Misako Binford of Yamasa Co. 2012. May 7. She says that Yamasa Co. purchased San-J International (Richmond, Virginia) in April 2004, then purchased the parent company, San Jirushi (Kuwana, Japan) in Nov. 2005. She cannot find any newspaper or magazine articles that give information about the acquisition. Address: President, San-J International, Inc., 2880 Sprouse Dr., Richmond, Virginia 23231. Phone: 804-226-8333.

8402. AP WorldStream English. 2006. Chinese soy sauce Giant, Lee Kum Kee, tries to avoid the perils of leadership succession (News release). July 23.

• **Summary:** Xinhui, China. Company chairman Eddy Lee is haunted by a famous Chinese saying: "Wealth doesn't go beyond the third generation."

The family firm was founded in 1888 near Canton in Guangdong province of southern China. Le Kum Kee's first product was oyster sauce. In 1946 the company moved to Hong Kong and quickly began to expand its business, selling the luxury product to wealthy Chinese living in San Francisco, London, New York, and Hawaii. Today Lee Kum Kee sells nearly 300 varieties of sauces and condiments, including soy sauce.

The company is making a big push to become the leader in the huge soy sauce market in China—and then in the world. They are now No. 2 in China.

Le Kum Kee now makes about 100,000 metric tons of soy each year at its plant in Xinhui, which employs about 1,400 people.

8403. Patterson, Daniel. 2006. The way we eat: I can't believe its tofu. *New York Times Magazine*. Aug. 6. Sunday.

• **Summary:** The writer never thought he could love a soy product. He could probably muster admiration, certainly

respect, but never infatuation. So he was quite surprised when dining at Kappo Sakamoto in Kyoto, Japan, that he swooned over a dish of yuba. It was served in a handmade box, simmering in water over a piece of glowing charcoal. He lifted the opaque sheets from the bubbling water, dipped them into a sauce (made from soy sauce, dashi, mirin, and fresh wasabi) and wow! A mildly sweet flavor and tender texture he had never experienced before. Here was tofu's sexy and elegant cousin. He returned to the USA in search of yuba.

By good fortune, Ryuta Sakamoto, the son of Kappo Sakamoto's chef, was a partner in a San Francisco restaurant name "Medicine," that served (among other things) yuba! He explained that "yuba is one of the purest expressions of Kyoto cuisine. It is exquisitely simple, so its magic lies in the quality of the ingredients and the skill with which they are handled." Just as a film forms atop milk when it is heated, so yuba forms atop soymilk. Each batch of soymilk will yield about 7-8 layers of yuba. The first 4-5 are the best quality; the last 2-3 sheets are generally dried. "Yuba is best just after it is made" and will keep for only about 5 days.

Can you make yuba at home? Yes, but not with commercial soymilk. The protein content is too low.

Then Sakamoto directed the writer to Minh Tsai, the owner of Hodo Soy Beanery, a Bay Area company that makes soyfoods using only organic ingredients that are not genetically engineered. Tsai sells his yuba and other soy products at farmer's markets around the Bay Area and will also ship yuba in the U.S. The writer bought some and rushed back to his restaurant to try it. Modest success. But when he deep fried the yuba it was pure bliss.

8404. Kikkoman Corporation. 2006. Annual report 2006. Year ended March 31, 2006. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 37 p. 28 cm. [Eng]

• **Summary:** Consolidated net sales rose 4.4% to \$3.076 billion, operating income climbed 4.0% to \$158 million, and net income rose 6.7% to \$86.5 million. Note: Some dollar values actually fell due to changing foreign exchange rates.

"In terms of capital and business alliances, we are collaborating with Higeta Shoyu Co., Ltd. on jointly purchasing raw ingredients and effectively sharing each other's manufacturing facilities, while fostering closer cooperation in the foodservice- and industrial-use markets... We are also reinforcing our alliance with the Kibun Foods Group." In April 2006 Kikkoman "transferred" [sold?] its *shochu* [a clear alcoholic beverage] business. A nice photo shows Yuzaburo Mogi (Chairman of the Board and CEO) and Takashi Ushiku (President and COO). Address: Noda, Japan.

8405. Hymowitz, Ted. 2006. Why did the West (Europe and the Middle East) know so little about China in the 12th and 13th centuries? (Interview). *SoyaScan Notes*. Sept. 1.

Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Because the Arabs blocked most European travel over the Silk Road / Route from about the 7th century until the 12th or 13th century. The Arab conquest blocked the overland route, in part to control the trade. There were actually two phases in the history of the Silk Road. The first phase ended in about the 6th or 7th century, before the origin of Islam.

Note: Both of these “Silk Roads” was actually a series of interconnected routes than ran from about Xian (Chang’an) in eastern China, along the northern part of China, branching into today’s Central Asia, south of the Caspian Sea, through today’s Turkmenistan, Iran (formerly Persia), and Iraq, to Damascus (today’s Syria) and Antioch (in today’s Turkey). The first famous and documented Chinese traveler, Zhang Qian (W.-G. Chang Ch’ien) led two expeditions to the Western Regions in the 2nd century BC, during the Former / Western Han dynasty.

As early as the 1st century AD, there were already some oceanic routes that were part of the “Silk Road.” They hugged the coast from central China, around India, into the Persian Gulf and the Red Sea, then on to Italy!

This Arab blockade was one of the reasons for the search for a water route to China. The blockade began to fail as sea routes were developed. For example, in May 1498, Vasco da Gama was the first European to discover a sea route to India.

Another reason it took so long for information about the soybean to reach Europe from China was that the soybean is unlike rice, wheat, and maize / corn, where the product of the crop is associated very closely with what is growing in the field; everyone knows what rice, wheat and corn look like because they are so widely consumed as food. The main products of the soybean, especially those in commerce (such as soy sauce), bear no resemblance to the seed or plant from which they are made. It took a long time before Europeans realized that soy sauce (for example), which was known in Europe by the late 1600s, was made from the soybean—which did not arrive in Europe until the late 1730s. Even in Asia, the various names of the soybean were very different from the names of its major products. For example in China: Soybean is *dadou* or *huangdou*, soy sauce is *jiangyou*, tofu is *doufu*, and soymilk is *dounai* or *doujiang*. In Japan: Soybean is *daizu*, soy sauce is *shoyu*, tofu is *tofu*, soymilk is *tonyu*, miso is *miso*, natto is *natto*, and green vegetable soybeans are *edamamé*. In Indonesia, *tempé* is *tempeh*. Even in the Western World today, many of these traditional foods and condiments do not have “soy” as part of their name. Moreover, the foods look totally different from the seed / bean from which they are made.

The first European to understand the connection between the soybean and its products was Engelbert Kaempfer; he made this clear in his book *Amoenitatum exoticarum...* vol. 5. Yet most Westerners did not understand this connection until more than a century later, and quite a few even today don’t

realize that tofu (for example) is made from soybeans.

Ted is convinced that Marco Polo and the various early Western missionaries who traveled to China probably tasted soyfoods over and over again—but they didn’t realize they were made from soybeans. A good example is milk. The early Western travelers in China often mentioned that Chinese drank milk; in some cases they were probably drinking soymilk. Address: Prof. of Plant Genetics (retired), Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8406. Fruin, W. Mark. 2006. Thoughts on the early history of soy sauce and kecap / ketjap (Interview). *SoyaScan Notes*. Oct. 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mark knows a woman professor Tashiro in Japan who is doing research on the early history of soy sauce (e-mail shiro@flet.kweio.ac.jp). She and others she knows are interested in the “leaky sieve” theory which basically says “Yes, we had this very controlled system during the Tokugawa / Edo period, but lots of things were going on that were not official—such as exporting outside of Deshima. You could call them pirates or extra-legal exports. Many of these exports went to places like Korea, or the Korean islands between the Korean mainland and Japan, all of which were near Japan. Mark suggests I write her and mention his name.

Remember that there is a difference between Kansai shoyu (lighter in color and saltier, *usukuchi*) and Kanto shoyu (darker in color, *koikuchi*). Whatever they shipped out of Deshima and Nagasaki was more likely to be Kansai shoyu than Kanto shoyu.

Also remember that soy sauce was widely made locally by small makers. One of the bigger castle towns (*jōka-machi*; “castle + under”) or commercial towns (*shukuba-machi*) of Kyushu or southern Japan probably provided the early shoyu exported by the Dutch East India Co. (VOC). These were the two types of cities in Tokugawa Japan; there had to be one castle per fiefdom (*han*). Address: Palo Alto, California.

8407. Hymowitz, Ted. 2006. Re: Earliest clear reference to soy. Letter (e-mail) to William Shurtleff at Soyfoods Center, Oct. 13. 1 p.

• **Summary:** Ted has just finished all the literature reviewing he plans to do for the first chapter in his book on Samuel Bowen. “Except for indirect references there is very little in the European and Arabic literature about soy in the 1200s, 1300s, and 1400s.”

The earliest indirect reference to the soybean he has goes back to the 1200s. “The monk said he only ate on Sunday, when this lady sent him a meal of cooked dough with vinegar to drink.” The dish is *mien* which is seasoned with soy sauce.

“My poor eyeballs have gone through literally dozens of diaries of monks and assorted travelers to China (e.g. Marco Polo) and have found zilch about soy.”

For the next two weeks Ted intends to update his references in his computerized database, and then to focus on writing the Bowen book. Address: Prof. of Plant Genetics (retired), Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8408. Hymowitz, Ted. 2006. Re: Why are “India Soy” and “Indian Soy” early names for soy sauce? Letter (e-mail) to William Shurtleff at Soyfoods Center, Oct. 21. 2 p.

• **Summary:** Ted’s guess as to why “India Soy” or “Indian Soy” were used as names for soy sauce is that it was imported into England by the Honourable East India Company. Remember, the EIC traded in China and what is today Southeast Asia. More importantly, “East India” covers more than India. Soy Sauce was probably picked up in Asia by British ships and transported to Calcutta. From there it was transshipped to England.

For the British, the main transshipment cities for Southeast Asia and greater India (what is now India, Pakistan, Sri Lanka, Bangladesh, Burma, Nepal, etc.) were Calcutta in the west, Madras in the south, and Bombay in the west. For the Spanish, Manila was a main transshipment city; goods were shipped from there to Acapulco and the Americas.

The name “ketchup” probably comes from the imports by the Dutch East India Company. Address: Prof. of Plant Genetics (retired), Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8409. Dee, Joel. 2006. History and present status of Edward & Sons Trading Co. (his company) and of his work with miso and tamari (Interview). *SoyaScan Notes*. Oct. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** A far-ranging interview on his many important innovations and success. Joel appears to have been the first person in the Western world to add flavor to soy sauce, with Lemon Tamari (Aug. 1985), Ginger Tamari (Feb. 1988), and many other related products.

Joel developed the Premier Japan line because he believed the two main importers from Japan (Eden Foods and Westbrae) both defined their market too narrowly—as macrobiotic. He soon came up with the tagline “Traditional Gourmet,” just as the specialty foods market was taking off in the USA. But the macrobiotics criticized this line as not being “medicinal quality” so it never took off in the macro or natural foods markets.

Joel does not supply Trader Joe’s with their Instant Miso Soup; he is not at liberty to reveal the name of the supplier. The TJ product contains dextrose, clam extract, and bonito powder (all for flavor) which Joel’s Miso Cup does not contain.

The main segments of his company are now: Soy seasonings (miso and tamari), rice crackers, organic canned foods (coconut milk, pineapple, etc.), candy, and baked

goods. Address: President, P.O. Box 1326, Carpinteria, California 93014-1326. Phone: 805-684-8500.

8410. Hymowitz, Ted. 2006. Re: Note on “India Soy” and “Indian Soy” as early names for soy sauce. Letter (e-mail) to William Shurtleff at Soyfoods Center, Oct. 31. 2 p.

• **Summary:** “Looking through gobs of historical documents it is obvious that certain cities in Asia were centers of trade within and between Asian countries and with the west.

“For example, when the Spanish started trade with the Philippines in 1560 they recorded what was brought back to Mexico. I was amazed at the stuff that came from China, Japan, etc.

“I was puzzled by the diversity of items in the Spanish trade. However, when I visited the Pescadores Islands a little snooping about solved my Manila problem. During the day the fishing boats were out fishing. However, at night they were also gone. Aha, the boats were loaded with electronics for trade with Mainland China. The fishing boats would meet with boats from mainland China somewhere mid-point between the Islands and China and exchange goods. Probably exchanges were made by family contacts.

“Manila was a trading city as was Calcutta and places in Indonesia. Thus India soy was the name given to soy that arrived from Calcutta. Obviously it was not made in Calcutta but rather was brought there via local trading ships. Thus soy sauce was shipped to Calcutta and from there transported to England. Now the Dutch had their own contacts in India, Japan and Indonesia. Thus soy sauce reached the Netherlands via the Dutch ships who transported the sauce via the Dutch East India ships. The Dutch were the main importers of ketchup since it was made in the Malaysia Area where they had extensive contacts.

“Was soy sauce made in China? In 1711 Lockyer says so. But I suspect most of the stuff in international trade came from Japan via the Dutch.

“The first English factory in India was in Surat. Could very well be that Surat was or had been the transshipping point of soy sauce to England.”

Note: This e-mail was a reply to one that Shurtleff had written Hymowitz the day before:

Not much soy sauce was made in China in the 1600s and 1700s, and several travelers in Asia from that period say that Chinese “soy” was not nearly as good as Japanese soy. The reasons were simple:

(1) The Chinese saw making soy sauce as wasteful; what were they going to do with all that residue, except feed it to pigs. So they spent little effort in trying to improve the process and the product.

(2) Chinese soy sauce, to this day, is usually made with soybeans only, and little or no grain; it is basically the same as Japanese tamari—a product with a tiny niche market in Japan and worldwide. The standard Japanese formula calls for equal parts soybeans and roasted wheat. The wheat is

hydrolyzed by the koji enzymes into alcohol and many fragrant and volatile compounds, such as esters, giving Japanese shoyu a real “bouquet.”

So I ask again, where do you think the Chinese got the soy sauce that they shipped to India? China? The Dutch East Indies (they had a small base there)? Address: Prof. of Plant Genetics (retired), Dep. of Crop Sciences, Univ. of Illinois, Urbana, Illinois.

8411. *SoyaScan Notes*. 2006. Soymilk, non-dairy beverages, and cow's milk prices at The Natural Grocery Co., Berkeley, California (Overview). Dec. 14. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Since Dec. 1983, approximately every other year, Soyfoods Center has conducted a survey of the prices of soymilk and cow's milk in California. Cindy La reports the following retail prices. (Note: oz = fluid ounces; 32 fl oz = 1 quart; 33.8 fl oz = 1 liter. 2 quarts = one half gallon). All soymilk products at Berkeley Natural Grocery Co. are now organic or largely organic = Org. MOS = Made with organic soybeans. NON ORG = Non Organic.

Shelf-stable / Aseptic soymilks: Westsoy Light and Plus all flavors (MOS) \$2.39/quart. Westsoy Nonfat (MOS) \$1.99/quart. Westsoy original creamy (95% Org) \$2.29/quart or \$1.79 on special. Westsoy shakes (MOS) \$2.49/quart.

Edensoy Original (95% Org) \$2.79/liter. Edensoy Enriched (95% Org) \$2.89/liter. Eden Blend Rice & Soy (95% Org) \$2.65/liter. Edensoy Dream 3-pack (75-95% Org) \$2.89/3 x 8 oz.

Vitasoy Original (75-95% Org) \$2.65/quart or \$2.09 on special. Vitasoy Light (75-95% Org) \$2.65/quart or \$2.09 on special. Vitasoy Enriched (75-95% Org) \$2.65/quart or \$2.09 on special. Vitasoy Holiday Drinks (95% Org) \$2.99/quart or \$2.19 on special.

Soy Dream Regular or Enriched (Hain) (75-95% Org) \$2.65/quart. Soy Dream 3-pack (75-95% Org) \$3.09/3 x 8 oz. Pacific Foods (95% Org) \$2.89. Kikkoman Pearl (75-95% Org) \$2.59. White Wave Silk (95% Org) \$2.49. Silk 3-pack (75-95% Org) \$3.39/3 x 8 oz.

Refrigerated / Fresh soymilks (in gable-top cartons): Wildwood (95% Org) \$2.39/quart or \$3.99/half gallon. White Wave Silk Plain (95% Org) \$1.99/quart or \$3.69/half gallon. White Wave Silk Vanilla (75-95% Org) \$3.69/half gallon. Soy Dream Enriched (75-95% Org) \$3.89/half gallon.

Rice drinks: Rice Dream (75-95% Org) \$2.59/quart. Lundberg (75-95% Org) \$2.69/quart. Pacific Foods (75-95% Org) \$2.19/quart.

Refrigerated cow's milk. Clover Stornetta \$1.29/quart. or \$2.19/half gallon or \$3.99/gallon. Clover Stornetta 100% Organic \$1.99/quart. or \$3.49/half gallon or \$6.39/gallon. Straus 100% Organic in glass bottle \$2.49/quart or \$3.99/half gallon. Claravale Raw Milk non-organic \$3.99/quart. Organic Valley 100% Organic \$1.99/quart or \$3.99/half gallon. Meyenber Goat Milk non-organic \$3.49/quart.

Lactaid Milk non-organic \$2.19//quart.

8412. Cwierotka, Katarzyna J. 2006. The soy sauce industry in Korea: Scrutinising the legacy of Japanese colonialism. *Asian Studies Review* 30(4):389-410. Dec. [81 + 27 endnotes. Eng]

• **Summary:** Excellent; very original, carefully researched, well documented, and well written! Contents: Introduction. Fermented soyfoods in Korea. The soy sauce industry in Japan. The Japanese soy industry in colonial Korea. The soy sauce industry in South Korea. The hidden legacy of Japanese colonialism. Address: Centre for Japanese and Korean Studies, Leiden Univ., P.O. Box 9515, 2300 RA Leiden, The Netherlands. Phone: +31 71 527 2599.

8413. Kikkoman Inst. for International Food Culture. 2006. Identifying the true character of Kansai soy sauce: Report on our “Edo Soy Sauce” revival project. *Food Culture (Kikkoman Inst. for International Food Culture, Noda, Japan)* No. 11. p. 10-13. <http://kiifc.kikkoman.co.jp>. [5 ref]

• **Summary:** Contents: Kansai soy sauce. Examination of “Edo Soy Sauce” and Kansai Soy Sauce. Contains many color photos.

Company index. Subject index. *

• **Summary:** The larger book contains a glossary at the end. Address: 1. Kanagawa Univ., Japan; 2. Univ. of Missouri at Kansas City; University of Kansas.

8415. Beebe, Lewis; Beebe, John M. 2006. *Prisoner of the rising sun: the lost diary of Brig. Gen. Lewis Beebe* (Internet resource). College Station, Texas: Texas A&M University Press. xii + 253 p. Introduction by Stanley Falk. Series: Texas A&M Military History No. 103. *

• **Summary:** This book shows the treatment accorded officers and shows how the prisoners in Corregidor fared as World War II progressed.

Page 162: “Incidentally, this Japanese canned meat ration is something new to me and very good. It appeared to be beef, cut in small slices, and cooked in a gravy made of soya sauce, sugar, and salt added to the natural meat juice.”

Page 184: “The issue of rice is holding up very well and most of us are getting about all the rice we can eat. We have miso in the soup almost every morning and that is a help. I may be putting on a little weight...”

Page 185: “The regular issue of rice dropped to the point where we barely averaged a teacup level full for each meal, and on several occasions there was less than a cupful. The

soup also fell off in quality, as we are not receiving as much miso, cooking oil, etc. There was no meat in the soup today (Sunday) as there usually is.”

Page 215: “There is frequently nothing in the morning soup except miso—no vegetables.”

Note: The diary was written by Lewis Beebe (1891-1951). This book was edited by John M. Beebe.

8416. Davidson, Alan; Jaime, Tom. 2006. *The Oxford companion to food*. New York, NY and Oxford, England: Oxford University Press. xxviii + 907 p. Illust. by Soun Vannithone. Index. 29 cm. [1500+* ref]

• **Summary:** The first edition of this remarkable book (1999) is already a “classic.” “Alan Davidson famously wrote eighty percent of the first edition, which was praised for its wit as well as its wisdom. Tom Jaime, editor of the second edition, worked closely with Jane Davidson and Helen Saberi to ensure that new contributions continue in the same style... The text has been updated where necessary” and there are many new entries. The front matter, which is 10 pages longer, begins with “Alan Davidson: A tribute” (p. vii; he died in 2003) followed by a “Preface to the Second edition” by Tom Jaime. Entries in the 1st edition are generally on a different page in this edition. Tofu, for example, formerly on pages 798-99, is now on pages 801-02; however the information is the same. The marvelous illustrations in both editions are by the same artist. The last page of this edition is page 907 compared with page 902 in the 1st edition. Address: World’s End, Chelsea, London, England.

8417. Golbitz, Peter; Jordan, Joe. 2006. *Soyfoods: Market and products*. In: Mian A. Riaz, ed. 2006. *Soy Applications in Food*. Boca Raton, Florida, London, New York: CRC Press (Taylor & Francis Group). [x] + 288 p. See p. 1-21.

• **Summary:** Contents: History of soyfoods: Growth and development in the Western world, soybean industry blossoms in the United States, soybeans grow around the world. Soybean production and utilization for food: Soyfoods in Asia, soyfoods in Europe, soyfoods in Africa, soyfoods in the United States: Development of the U.S. soyfoods industry, Americanization of soyfoods. Soybean nutritional components: Soy protein, soy oil, carbohydrates and fiber, vitamins and minerals, isoflavones. Soyfoods and protein ingredients: Whole dry soybeans, tofu, soymilk, tempeh, soymilk yogurt, miso, soy sauce, okara, natto, soy nuts, meat alternatives, cheese alternatives, nondairy frozen desserts, green vegetable soybeans (edamame), soy sprouts, full-fat soy flour, defatted soy flour, textured soy flour, soy protein concentrate, soy protein isolate. Conclusions.

Tables: (1) World soybean production by major producers. (2) Annual per capita consumption (2001) of soybeans for direct food. (3) U.S. soyfoods market (1996 to 2005).

This chapter suffers from a lack of references, and

contains several basic errors concerning the early history of the soybean. Contrary to what Mr. Golbitz says: (1) The Chinese have not considered the soybean a basic source of nutrition for almost 5000 years (see Hymowitz 1970, “On the domestication of the soybean”). For “a little more than 3000 years” would be much more accurate. (2) The first reference to soybeans in Chinese literature does not date back to 2853 B.C. (see Hymowitz 1970, and Hymowitz and Shurtleff 2005, “Debunking soybean myths and legends in the historical and popular literature”). It dates back to about 1100 B.C. (3) Natto was not developed at least 3000 years ago in Japan (the earliest known document that mentions natto dates from 1450 CE—or about 560 years ago). Address: Soyatech, Inc., Bar Harbor, Maine.

8418. Moey, S.C. 2006. *Chinese feasts & festivals: A cookbook*. Singapore: Periplus Editions. 144 p. See p. 28. Illust. by the author (Color). 31 cm.

• **Summary:** A colorful book with marvelous, creative illustrations. The recipe for “Pork and taro bowl” (p. 28) has a headnote which begins: “This is a festive Hakka dish, obligatory for every Hakka celebration... Red preserved bean curd (nam yee) has a pungent flavor rather like strong cheese. It comes in cubes packed in jars or bottles and is available in Asian food stores.”

The recipe calls for “2 tablespoons red preserved bean curd (nam yee).”

Note 1. This is the earliest English-language document seen (Oct. 2010) that uses the term “red preserved bean curd” to refer to a type of fermented tofu.

The recipe for “Five spice rolls” (p. 29) notes that these rolls are a Fukienese favorite. “Dried sheets of bean curd skin [yuba] are traditionally used to wrap them and can be bought from health food stores or Chinese grocers.” The recipe calls for “4 large sheets dried bean skin.” The directions read: “2. Wipe the dried bean curd skins with a damp cloth to soften them, then cut the sheets in to sixteen 6-inch (15-cm) squares. Set aside.

The recipe for “‘Good luck’ spring rolls” (p. 45) calls for “10 sheets dried bean curd skin.”

The recipe for “Braised assorted vegetables” (p. 52) is an adaptation of the traditional Buddhist vegetarian dish *Lohan-zai*. Popular additions include “dried bean curd sticks.” The basic recipe calls for “1 tablespoon red preserved bean curd” [nam yee].

Six recipes call for “black soy sauce.”

In the “Vital ingredients” section [glossary] (p. 134-41) are entries for the following soy-related ingredients: Dried bean curd skin [dried yuba]. Hoisin sauce (a sweet brown sauce based on yellow soybeans). Hot bean sauce or chili bean sauce (“a smooth red sauce made from yellow bean sauce mixed with chilies”). Oyster sauce (contains soy sauce). Preserved bean curd (“has the consistency and pungency of strong smelling cheese.” The two main varieties

are red (colored with red rice) or brown; chili and rice wine are often added. “Red preserved bean curd (*nam yee*) has chili and hoisin sauce added to it during fermentation”). Soy sauce (The two main varieties for cooking are light and black soy sauce. Regular soy sauce {light} is saltier and thinner, and is used as a seasoning in cooking and as a table dip. “Black soy sauce is darker, thicker and richer in color, and is slightly sweeter in taste. Used as a browning agent for roasting or braising meats, it contributed color as well as flavor. Also available are mushroom-flavored soy sauces, seasoned soy sauces for seafood and chili soy sauces”). Yellow bean paste (“*tau cheo* in Hokkien is also known as fermented bean paste or black bean paste and is similar to Japanese miso”). Address: Freelance writer, artist and cook, Penang, Malaysia.

8419. Nguyen, Andrea Quynhgio. 2006. Into the Vietnamese kitchen: Treasured foodways, modern flavors. Berkeley, California: Ten Speed Press. vii + 344 p. Foreword by Bruce Cost. Illust. (color photos by Leigh Beisch). Index. 25 x 24 cm. [58 ref]

• **Summary:** This is a very attractive book, well written and very engaging. Soy related recipes include: Baguette sandwich (with seared or grilled firm tofu, p. 34-35). Mock turtle stew of pork, plantain, and fried tofu (p. 153-55). Panfried stuffed tofu with fresh tomato sauce (Dau hu nhoi thit xot ca, p. 188-90). Deep-fried tofu simmered with scallion (Dau hu chien tam hanh la, p. 191).

In the “Guide to ingredients” chapter are substantial entries for: Hoisin sauce (tuong hoi xin, made from soybeans, p. 329). Soy sauce (nuoc tuong, xi dau, p. 333. “Soy sauces are not all the same. There are many kinds and they all taste different.” The author prefers Pearl River Bridge, dark, golden label).

From the publisher’s description: “When author Andrea Nguyen’s family was airlifted out of Saigon in 1975, one of the few belongings that her mother hurriedly packed for the journey was her small orange notebook of recipes.” The family fled together by air in April 1975. Andrea was only six years old. Seven days later Saigon fell to the communist North Vietnamese / Viet Cong. Her father had many connections: he was a former military governor in the administration of President Ngo Dinh Diem (1901-1963; his family name is Ngo), the first president of South Vietnam. They arrived in Camp Pendleton (the Marine Corps base) in southern California and were soon living in San Clemente. Of the 58 recipes, 39 are in English and 19 in Vietnamese. Address: Food writer, Santa Cruz, California.

8420. Null, Gary. 2006. Gary Null’s power foods: the 15 best foods for your health. New York, NY: New American Library. 327 p. Plus 8 unnumbered pages of color plates. Illust. No index. 24 cm.

• **Summary:** A vegan cookbook. Gary has eaten a vegan

diet for more than 30 years. He owns a juice bar named Gary Null’s Uptown Whole Foods in New York City. He advocates eating soybeans and soy products; because of their “extensive and well researched health benefits” and because it comes in such a wide variety of forms, from “tofu and tempeh, to nondairy products like milks, cottage cheese, cheese, yogurt and ice creams. No other legume can be used in so many delicious ways” (p. 10, 24-25). One of his 15 “power foods” is soy (p. 13). He likes juicing and raw foods; in the chapter on beverages he sometimes adds 1-2 tablespoons soy protein powder, or a cup or so of soymilk or rice milk, or soy yogurt. For dips, he likes silken tofu. The chapter on “Entrees” (p. 240-88) includes 13 recipes that call for tofu, and 8 that call for tempeh. Edamame, whole soybeans, tamari, and soy cheese are included. His daughter, Shelly Null, is a gourmet chef. The book has no index. Address: Author of more than 70 books, New York City.

8421. Oseland, James. 2006. Cradle of flavor: home cooking from the spice islands of Indonesia, Malaysia, and Singapore. New York and London: W.W. Norton & Co. 384 p. + 16 unnumbered pages of plates. Illust. (some color). Maps. Index. 26 x 21 cm. [41 ref]

• **Summary:** Lavishly praised. “James Beard Foundation Book Award Winner: Asian Cooking.”

In Chapter 3, “At the market, ingredients” (which has many fine color photos) is a long, interesting entry for “Indonesian sweet soy sauce (*kecap manis*, p. 72). “Sweet soy sauce is hugely popular in the cooking of Indonesia and, to a lesser extent, Malaysia and Singapore. (The word *kecap*, by the way, is derived from the Cantonese *koe-chiap*, or ‘sauce,’ from which we get the word *ketchup*. It was probably handed over by traders from southern China who long ago traveled extensively to the Indonesian islands.)” Its main use is as a table condiment or dipping sauce, although cooks also use it in marinades and to flavor stews. When Indonesian sweet soy sauce is mixed with sliced red chiles and lime juice, it becomes the widely used *sos kecap rawit*. In the U.S., the two most widely available brands, both imported from Indonesia, are Cap Bango (which the author prefers) and ABC.

There are also entries for “Soy sauce (*kecap*, p. 87. Of the two types, the first is called simply soy sauce, whereas the second “is double-black soy sauce, which has been aged longer and mixed with a small quantity of molasses.” It has a more robust flavor than regular soy sauce). Sweet soybean paste (*tauco* or *taucheo*, p. 88-89, a Hokkien word. A “thick, golden brown, misolike condiment made of fermented soybeans, rice flour, sugar, and salt). Tempeh (p. 90-91, “one of Indonesia’s great gifts to the culinary world”). Tofu (*tahu*, p. 91-92).

Chapter 13 (p. 318-35), titled: “Tempeh, tofu, eggs,” has a long and very interesting introduction about the author’s visit to Rahmat, a traditional tempeh maker and his shop

in Yogyakarta, Java; he wanted to learn how tempeh is made. Recipes: Garlic-marinated tempeh (*Tempe goreng, Indonesia*). Tempeh sambal with lemon basil (*Sambal tempe, Bali, Indonesia*). Carmelized tempeh with chiles (*Tempe kering, Central Java, Indonesia*). Tofu and summer vegetables in coconut milk (*Soyur lodeh, Malaysia*). Twice cooked tofu with coriander (*Tahu goreng bacem, Central Java, Indonesia*).

Tempeh, tofu, soy sauce, and sweet soy sauce are also discussed in many places throughout the book. Address: Executive editor of *Saveur*, New York City.

8422. Packaged Facts. 2006. Market trends: food flavors and ingredients outlook 2006. Rockville, Maryland: Packaged Facts. Digital PDF file. *

• **Summary:** This report contains sections on: Protein. Seaweed. Nori. Miso. White soy sauce. Organic ingredients. Kosher ingredients. Heirloom vegetables. Tofu. Edamame. Omega 3. Whole grains. Probiotics. Glycemic index. Quinoa.

8423. Planck, Nina. 2006. Real food: What to eat and why. New York and London: Bloomsbury Publishing. [viii] + 343 p. Index. 22 cm. [30+ ref]

• **Summary:** This book is carefully researched and very well, thoughtfully and fairly written; the author has written for *Time* magazine and comes with very good credentials for this book. Born in 1971 in Buffalo, New York. "She was a speechwriter to the U.S. ambassador to Britain when she opened the first farmers' market in London on June 6, 1999. Six months later she quit her job to open ten more markets, write *The Farmers' Market Cookbook*, and host a British television series on local food. In 2003 Nina created the Mount Pleasant Local Food Market in Washington, D.C. In New York City she ran Greenmarket, the largest network of farmers' markets in the United States. Nina's new company, Real Food, runs markets for farmers and purveyors of regional and traditional foods" ("About the author," p. 344).

The author advocates the following: (1) Eat real, traditional foods rather than more modern "industrial foods." These real foods include plenty of meat, fish, poultry, eggs, and dairy products made from whole raw (unpasteurized) milk from cows grazed outdoors on grass (rather than corn and soybeans, which cows were not designed by eat by nature) without synthetic hormones—plus real, organically grown fruits, vegetables, whole grains and legumes (including traditional soy foods), real salt, and dark chocolate.

(2) Eat real fats—including butter, beef fat, coconut oil, lard, and extra-virgin olive oil, including saturated fats and cholesterol. Avoid industrial fats—such as margarine, polyunsaturated vegetable oils (including soybean, corn, and sunflower oil), and shortening. (3) Go beyond and disregard the cholesterol myth; the evidence supporting it is weak. (4) Stop eating a vegetarian diet, and especially a vegan diet

(which no traditional society has ever practiced).

To start with the section on soy foods: In the Chapter 8, titled "Other real foods," the section on soy foods is titled "Traditional and industrial soy are different" (p. 225-34). Traditional soy foods are those that have a long history in the diet, and are still made in pretty much the way they used to be. Her information on the early history of the soybean and soy foods (p. 225-26) contains many errors, as well as some interesting observations. Some of the earliest soyfoods were fermented (starting with soy nuggets and jiang in China). She lists five health benefits of fermentation. Fermentation (along with cooking) helps to reduce the phytic acid in soybeans. Soy foods do not contain reliable vitamin B-12. The author states several times that soy protein is not complete protein. Most nutritionists for the past 50 years have correctly avoided this "is" vs. "is not" labeling and instead have listed all foods along a continuum from high quality to low quality. By the latest measures of protein quality, soy protein (by itself, without supplementation by cereal grains) has about the same quality as beef, but lower than that of eggs or milk. While noting that about 85% of all soybeans are genetically engineered, she fails to mention that most traditional soyfoods in the USA are made from organic, non-GE soybeans. She discusses the important part that soy plays in the Okinawan diet, where the people have the highest longevity in the world. Yet soy "should be viewed as part of a diverse diet, not as a nutritional silver bullet." We heartily agree. She lists the many traditional soyfoods (p. 231-32), made in basically the traditional way, including: Bean sauce (jiang), miso, natto, soy milk (non-industrial), soy sauce, sufu (fermented tofu, incl. Filipino tahuri), tofuyo (fermented tofu from Okinawa), tamari (liquid left after miso is made), tempeh, tofu, and edamame. She recommends that we avoid modern soy protein products made from defatted soybean meal (typically extracted with hexane solvent), including soy protein isolate, "industrial soy milk," soy based infant formula, and soy sauce which uses defatted soybean meal instead of whole soybeans. But what would she do with all the oil left over after using whole soybeans?

Concerning a diet rich in fish, meat, and poultry. She partly ignores the ethical issues involved in killing billions of those animals each year and the environmental issues involved in raising them. These are both huge issues. Several complex issues that she addresses head-on and in a fair, interesting way: (1) Is milk good for humans (p. 39-86).

One of the basic hopes / agendas behind this book is that people will start to leave cities, buy a piece of land (as the author's own family did when she was age 2), grow their own food and raise their own animals for milk, meat, and eggs. There is a steadily growing number of books advocating this traditional way of life.

The Glossary (p. 306-15) contains many good definitions that most people will be able to understand. The bibliography (p. 316-21) is substantial, and there are also

endnotes (p. 290-303) but the book would be better if more of its controversial or historical statements cited authoritative sources. Address: USA.

8424. Sugano, Michihiro. 2006. Nutritional implications of soy. In: Michihiro Sugano, ed. 2006. *Soy in Health and Disease Prevention*. Boca Raton, Florida: Taylor & Francis. [xii] + 313 p. See p. 1-16. [10 ref]

• **Summary:** Contents: Introduction. Structure of soybean. Components of soybean: Proteins, oil, carbohydrates, minerals, vitamins. Composition of soy products. Nutritional aspects of soy products: Protein, peptide, oil, oligosaccharide, vitamins, other components. From "A Meat in the Field" to "A Treasure Box of Functionality."

Tables: (1) Major soybean components and their health effects. Two columns: Components and functions. (2) Nutrient contents of dried soybean (incl. minerals and vitamins). (3) Nutrient contents of soybean products (gm per 100 gm): Kinako (parched soybean flour, full-fat). Tofu (bean curd). Abura-age (fried bean curd). Kori-tofu (frozen bean curd). Natto (fermented soybean). Okara (Tofu refuse). Tonyu (soymilk). Yuba (Soy milk skin). Tempe. Miso (bean paste). Shoyu (soy sauce). Soy protein isolate. (4) Mineral contents of soybean products (sodium, potassium, calcium, magnesium, phosphorus, iron, zinc, copper, manganese; same products as in Table 3). (5) Vitamin contents of soybean products (retinol, carotene, D, E, K, B-1, B-2, niacin, B-6, B-12, folic, pantothenic, C; same products as in Table 3). (6) Amino acid and protein composition of Japanese soybean products. (7) Proposed patterns for essential amino acid requirements and composition of soybean proteins (soy protein concentrates and isolates). (8) Fatty acid composition of soybean oils (% of total fatty acids) (Products: Refined soybean oil, genetically modified oils, low linolenic, high oleic, low palmitic, low saturated fatty acid, high palmitic, high stearic).

Figures: (1) Pie chart of intake of soybean and its products in Japan (gm per day of tofu {38.2 gm}, fried tofu {7.9 gm}, natto {6.9 gm}, whole soybeans {2.0 gm}, other {2.3 gm}; Total 57.3 gm per day). (2) Bar chart: Amino acid score of dietary proteins in humans (casein 1.0, egg white 1.0, soy protein concentrate 9.9, soy protein isolate 9.5, beef 9.5). (3) Graph and bar chart: Soybean protein lowers liver delta-6 desaturase activity and liver phospholipid delta-6 desaturation index in rats—relative to casein. Address: Director, Fuji Foundation for Protein Research, Japan; Professor Emeritus Kyushu University and President, Prefectural Univ. of Kumamoto, Japan.

• **Summary:** Contents: Introduction. Natto: Antibacterial activity of natto and natto bacillus, fibrinolytic enzyme substances contained in natto, depressor effects, carcinostatic effects, and dissipation of the effects of alcoholic drinks, preventive effects for osteoporosis. Tempeh: Strong antibacterial activity and effectiveness against intestinal disorders, antioxidant, antiallergic, and beauty care effects, starters for tempeh and high nutritional value. Shoyu (soy sauce): Antibacterial, antioxidation, and depressor effect, antitumor effects. Miso (soybean paste): Effectiveness of soybean paste for cancer prevention, depressor effects, antioxidation and antiradioactivity effects. Tofuyo.

Tables: (1) Dipicolic acid in natto and *Bacillus subtilis* natto. (2) Fibrinolytic activity in human plasma after the intake of natto. (3) Expired gas and intestinal gas after intake of tempeh. (4) Isoflavone content in tempeh. (5) Antioxidation activity of the aromatic components of shoyu (soy sauce). (6) Functional effects of melanoidine contained in shoyu (soy sauce) and miso (soybean paste).

Figures: (1) Graph of the effects on *O*-157 as a result of the addition of natto bacillus. (2) Graph of the effects on *H. pylori* (Sydney strain) resulting from the addition of natto extracts. (3) Photo of fibrinolytic activity of natto. A piece of natto commonly sold on the market was placed in a petri dish with artificial thrombus. (4) The molecular structure of nattokinase. (5) Photo of fibrinolytic activity of nattokinase. (6) 3 graphs of changes in the fibrinolytic parameters in the blood after oral administration of nattokinase to human volunteers. (7) Graph of the effects of natto extracts on blood pressure. (8) Graph of the inhibitor activity of platelet aggregation. (9) 2 graphs of the concentration of vitamin K₂ in human blood after the intake of natto. (10) Bar chart of change in the concentration of menaquinone-7 in plasma after ingestion of natto. (11) Graph of the effects of the tempeh bacteria on aflatoxin-producing bacteria. (12) Diagrams of the aromatic components of shoyu (soy sauce). (13) Bar chart of the effects of the concentration of nitrous acid on the antitumor activity of shoyu (soy sauce). (14) Chart of the carcinogenesis inhibitor effects of HEMF against proventriculus tumors induced by benzo[a]pyrene. (15) Bar chart of standardized mortality from stomach cancer relative to the level of frequency of eating miso soup. (16) Graph of changes in blood pressure by oral administration of miso (soybean paste) extracts. (17) Graph of reaction between coloring degree of miso and its antioxidative activity. Address: Dep. of Physiological Chemistry, Kurashiki Univ. of Science and the Arts, Kurashiki, Japan.

• **Summary:** In the section on "Auctions and catalogs," in the description of Mr. Christie's (London) catalogs, we read:

“A gentleman ‘lately returned from India’ has decided to sell his ‘Dressing Boxes, fine India paper, Muslin, Soy, [and] fine Batavia Arrack’ (30 November 1767).” Address: Assoc. Prof. of English, Univ. of Virginia.

8427. Ishige, Naomichi. 2007. Re: Early history of the word “teriyaki.” Letter (e-mail) to William Shurtleff at Soyinfo Center, Jan. 5. 1 p. [Eng]

• **Summary:** “The following is my answer to your question of teriyaki.

“As far as I know, the first appearance of the word ‘teriyaki’ was in 1813, when *Shijûhachi Kuse* [48 habits], written by Shikitei Sanba, was published. The word appeared in the second volume of the novel as ‘shrimp teriyaki’. The original text was a block book, so the page number was unknown. However, according to the reprinted edition, the details are as follows: *Ukiyodoko: Shijûhachi Kuse in Shincho Nippon Kotenshusei* 52, Honda Yasuo (corrections and notes), Tokyo: Shincho-sha, 1982, p. 237.

It is assumed that teriyaki’s recipe already existed in the Edo period before the word of teriyaki appeared in a book. For instance, the way to cook *unagi no kabayaki* (“charcoal broiled eel”), which went around from the middle of the Edo period onward, is the same as teriyaki; its sauce is the mixture of soy sauce and mirin or sake. Eel is covered by the sauce and baked. In the 19th century, the use of mirin in the sauce became more popular than the use of sake, because it gave good gloss (*teri*) to the eel when it was cooked. As a result, I suppose, ‘teriyaki’ became a generic term for the style of cooking that fish was grilled with soy sauce and mirin.

A Happy New Year! Best wishes, Naomichi Ishige.

Note: In his book *The History and Culture of Japanese Food* (Kegan Paul, 2001, p. 116), Ishige says that teriyaki developed during the Edo / Tokugawa period (1600-1867), however no citation for the source of this information is given. Address: National Museum of Ethnology, Osaka, Japan.

• **Summary:** A basic introduction. A large color photo shows bottles of: Kikkoman Naturally Brewed Tamari. Pearl River Bridge Superior Dark Soy Sauce. Pearl River Bridge Mushroom Flavored Superior Dark Soy Sauce. Shiro Shoyu. Address: Food writer.

8429. Chalmers, Elizabeth. 2007. Business history of the Chalmers family: Making soyfoods in New Zealand (Interview). *SoyaScan Notes*. Jan. 16. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** On Easter 1980 Rick & Elizabeth Chalmers, together with Rick’s brother Greg (his formal name is “Stephen”), opened Harvest Wholefoods, 403 Richmond

Road, Grey Lynn, Auckland. They borrowed the money from Elizabeth’s mother, and were all equal owners. It was New Zealand’s first wholefoods / natural foods store as well as the country’s first macrobiotic foods retail store. They were idealists and purists, refusing to sell any vitamins, or minerals, or dairy products.

They started the store partly as a result of becoming interested in macrobiotics, and partly because Elizabeth and Rick had a 3 year old son (Daniel) who could not tolerate dairy products. As the Chalmers could not get the food they wanted anywhere, they thought that they would open a shop to also provide it to others. Moreover, Greg, who had been overseas in London (where he had worked in a restaurant) and the USA, was a pioneer in bringing macrobiotics to New Zealand. “He brought home miso and some seaweeds—foods we had never seen before.”

After about six months, in Oct. 1980, in order to attract customers to the shop, they started to make nigari tofu (for their own store only) in a small room at the back of the store, designated just for that purpose. They made the simple equipment themselves, and they learned the process from *The Book of Tofu*, by Shurtleff and Aoyagi.

After another six months they were inundated with other store owners, and cafe & restaurant owners from all over New Zealand wanting to buy their tofu. “It was just amazing.” The tofu was completely unpackaged and they sold under water in bulk buckets only. So in about April 1981 they started to sell their tofu outside of Harvest Whole Foods. “Sometimes they would pick it up, and sometimes we would deliver it.”

Sanitarium Health Food Co. was making many kinds of breakfast cereals and canned nut meats, but no soyfoods. Several Chinese restaurants were making tofu (they called it “bean curd”), but only for use in their own restaurants; they did not sell it elsewhere. One of these was named Sun Sun, located in Khyber Pass, Auckland.

Their daughter, Jesse, was born on 1st October 1981, and by this time it was becoming difficult to manage both the shop and making tofu. So they sold the shop and with the capital gained they brought in special tofu making equipment from Japan, moved to new premises at 1 Wallingford St., Auckland, and started Harvest Soyfoods. Harvest Whole Foods is still at its same original location today; it is going strong and doing well financially.

Harvest Soyfoods’ first product was nigari tofu; to this they soon added Tofu Spreads (Feb. 1981) then Tempeh (April 1981). The business grew very rapidly, and during this period Greg also had a child, so they all had very young children and were trying to manage their lives as well as an extremely rapidly increasing business.

Greg’s partner decided that she wanted to leave Auckland, and as they could not picture another partner in his place and were feeling very overloaded anyway they decided in 1983 to sell the business to Paul and Trevor

Johnston, who renamed it Bean Supreme. The Johnstons paid half the money at the time of sale and the remainder a year later; Elizabeth and Rick Chalmers worked for the Johnstons during that year. This business is also still in existence, although it was bought out by Sanitarium Health Food Co. in about Aug. 1986. Note: Trevor is no longer with the company; Paul sold the company to Sanitarium Health Foods.

From 1983 to 1986 Rick and Elizabeth had a commercial cleaning business, which suited the family structure very well, but was very unsatisfying workwise and environmentally.

In about 1980 or 1981 Austin Holden had started a largely macrobiotic import and wholesale business, Kiaora Naturals, at 374 West Coast Road, Glen Eden, in west Auckland. Holden soon started a very small shop in the corner of his warehouse and called it East West Wholefoods. For the first few years, his only customer was Harvest Wholefoods. "We kept him going."

Then in 1986 Rick and Elizabeth started East West Organics, taking over the building (and business) formerly occupied by Austin Holden and Kiaora Naturals. They knocked out all the walls, resulting in a much larger shop that specialised in organic food, with a big emphasis on fruit and vegetables.

They had no intention of making soyfoods. However there was suddenly an influx of Asian immigrants to New Zealand and Asian Tofu (usually made with calcium sulfate in aluminum pots) became widely available. By this time organics was really growing in New Zealand. Elizabeth and Rick wanted to stock organic tofu in their store, but they couldn't find a source. They talked with Trevor and Paul Johnston about making it for them, but the brothers felt there was no future in it, so they declined to do it.

So in 1996 Elizabeth and Rick started The Organic Soy Company, again in a small food factory out the back of East West Organics. They started making nigari tofu again—for their own store only. For the first time, they started to use organic soybeans, and as many other organic ingredients as they needed and could get. "We were right back where we started. And then exactly the same thing happened again. Once the word got out that organic nigari tofu was available again, people started coming from everywhere to buy it. It was not our intention to get back into the soyfoods business; we'd already sold our company. But we wanted the quality, so we had to make it ourselves." East West Organics is still operating today, although out of new premises (outgrew old one), and has just moved up the road slightly.

Their son Daniel joined them in January 1998, and in October of 1998, they sold East West Organics and moved The Organic Soy Company to their current premises at Unit A, 2 Corban Avenue, Henderson, Auckland.

Elizabeth and Rick separated the same year, but continued on in the family business together. In 2001 their

daughter Jesse returned from Europe and also joined us in the business. Later that same year Rick left the business to go to University and currently, Elizabeth, Daniel and Jesse are in joint ownership, with Rick still having a 10% share. They started using the brand names (the first being Tonzu) in 2002.

The business is growing slowly, currently producing tofu, tempeh, soy yoghurt, tofu burgers and teriyaki sauce, all 100% organic. Elizabeth has moved to part time as the younger generation are taking on the responsibility for the business. They currently have 3 full time employees as well as themselves, so are still reasonably small.

"We see a great future for the business and will probably outgrow our current premises within the next few years. We love making traditional soy products, and eventually hope to make miso and tamari, which will be export products as well as for the domestic market."

First sold commercially by the organic soy company: Tofu (1996), Teriyaki Tofu (1999), Tempeh (1999), Tofu Burgers (2001), Teriyaki sauce (2003).

All current labels and packaging are new, and have changed very much from the original. They once made two tofu spreads, one teriyaki and the other curry flavour. However it was hard to get a good enough shelf life out of them to make them viable, so reluctantly they discontinued them. They have also changed their burgers significantly. When they first produced a burger in 2001, they had 3 varieties: Garlic and Cheese, Sundried Tomato, and Feta, and Vegan. They have discontinued them all and now just make one that is actually Vegan, although they do not call it that. The burgers did not sell well; they are not certain why that was, maybe they were too expensive with all the organic ingredients and very labour intensive. So they have simplified and streamlined our current burger making the whole process more viable.

As the population of the whole of New Zealand is around 4 million and only 15% of them are vegetarian, they are playing to quite a small market, this can sometimes be quite a challenge. In the long term it will be sensible to develop products that they can export. Address: Founder and owner, The Organic Soy Company, Ltd., Unit A, 2 Corban Ave., Henderson, Waitakere, Auckland 0612, New Zealand. Phone: +64 9 835 3617.

8430. Takesuye, Betty. 2007. Four generations of Tadanos hold reunion in Phoenix. *Asian SUNews (Asian Chamber of Commerce)* 13(9):1, 4, Jan. 16.

• **Summary:** "The Tadano family recently [28 Dec. 2006] held a reunion in Phoenix [in the Japanese Free Methodist Church] to share family history with the children and grandchildren, to reconnect with one another,... Four generations of Tadanos attended."

Takeshi Tadano came to the United States from Wakuya [Miyagi prefecture, northern Honshu], Japan about 1915. He left his sons Tadashi and Takeo in Japan but they soon

followed him to the U.S. where they farmed in the Phoenix area. His other sons, Yoneo, John, and Joe were born in Arizona.

“Takeshi had two daughters whom he left in Japan to live a more comfortable life than he could give them in America.”

“Pictures of the farm on Lateral 15, now known as 35th Avenue as well as the farm on Lateral 18, now called 59th Avenue brought back memories of farm life...” “The senior member of each family attending included Michiko Tadano (Tadashi)... Photos of Takeshi and his family throughout the years were assembled in a heritage album which everyone enjoyed seeing.”

Note: The famous shoyu (soy sauce) company founded by John Tadano is not mentioned. Address: Newspaper: 7217 N 6th Way, Phoenix, Arizona 85020. Phone: 602-222-2009.

8431. Tibbott, Seth. comp. 2007. Tofurky brand products overview: Natural foods segment. Hood River, Oregon: Turtle Island Foods, Inc. [36] p. 28 cm. [1 ref]

• **Summary:** A full-color booklet bound with a handsome, black ProClick plastic spine. On the front cover: “1980-2006: 26th anniversary Turtle Island Foods, Inc.” “Sales data from: SPINscan Natural and SPINscan Conventional. 52 weeks ending December 30, 2006. All statistics are for the total U.S. market.

Contents (unnumbered pages): (1) “Turtle Island Foods honored by Inc. magazine: 2,240th fastest growing small business in the USA (of 6 million total). 159.7% growth rate over last 4 years. 57th fastest growing food and beverage company in the USA. 19th fastest growing food processor.

(2) About Tofurky products: 100% vegan. Based on organic soy products. Use non hexane extracted proteins. VejNews. Winner veggie awards—Best meat substitute.

(3) Natural foods market without Whole Foods (which no longer shares sales info with the industry). Growth of top ten brands ranked by dollar volume. Frozen and refrigerated meat alternatives. 52 weeks ended Feb. 24, 2007. Category: \$35.5 million. Growth: 4.7%. Turtle Island is the fastest-growing brand: 16.1%, followed by Quorn, Nates, Amys Kitchen, Morningstar Farms, Gardenburger, and Yves. Lightlife, Boca Foods, and White Wave all have negative growth.

(4) Natural foods market. Frozen and refrigerated meat alternatives. Top ten of 478 items by dollar volume. 52 weeks ending Dec. 30, 2006. #1. Quorn Chicken Style Nuggets. 10.6 oz. \$1,507,537. 5.6%. #2. Turtle Island Tofurky Italian Sausage (organic) 14 oz. \$1,262,616. 25.7%. #3. Quorn Chicken Style Patties. #4. Lightlife Gimme Lean Sausage. #5. Quorn Veg. Naked Chicken Cutlet. #6. Turtle Island Tofurky Deli Slices, Hickory Smoked. 5.5 oz. \$1,131,760. 19.2%. #7. Lightlife Smart Dogs. #8. Boca Original Patties Chicken Natural (4-pack). #9. Amys Burger California Veggie. #10. Quorn Meat Free Chicken Tenders.

(5) Natural foods market. Refrigerated meat alternatives, Top 10 of 260 items by dollar volume. 52 weeks ending Dec. 30, 2006. Turtle Island currently as the #1, #3, #9 and #10 best selling items among the 260. They are: Tofurky Italian Sausage. Tofurky Deli Slices Hickory Smoked. Tofurky Deli Slices Oven Roasted. Tofurky Kielbasa (sausages).

(6) Tofurky deli slices: Six features, incl. “Organic tofu based.” The six types of deli slices are: Oven roasted, Hickory smoked, Peppered, Italian deli, Cranberry & Stuffing, “Philly-style” steak.

(7) Tofurky deli slices. Bar charts of refrigerated meatless deli sales, 2001-2006. For each year are given: Competitor #1. Competitor #2. Turtle Island. Overall category. “While the competition sales have been flat, Turtle Island has grown the subcategory 72 and has become the #1 brand.

(8) Deli slice standings. (9) Tofurky gourmet sausages. (10) Frozen and refrigerated meat alternatives. (11) Tofurky Jurky: 5 features.

(12) Top 10 jerky items (meat and meatless)—SPINscan natural channel. 52 weeks ending Feb. 24, 2007. The category is 8.3 million. There are three vegetarian jerkys among the top 10. Tofurky Jurky Original is the #2 seller and Tofurky Jurky Peppered is #7. The other vegetarian brand (#6 seller) is Primal Strips Seitan Teriyaki.

(13) Tofurky “foot long” veggie dogs: 5 features, incl. organic tofu based. (14) “Open mouth, insert foot.”

(15-17) Turtle Island tempeh: Five features.

(18-22) Happy Tofurky Day: Five features.

(23-35) Glossy color sell sheets, printed on both sides, with the following titles: (23-24) Happy Tofurky Day! (25-26) Brave New Tempeh. (27-28) Tofurky Jurky. (29-30) Frankly speaking Tofurky Franks & Links are the best! (31-32) There’s 3 big new dogs in the house. (33-34) Go beyond the bun: Introducing Tofurky ‘foot long’ veggie dogs. (35-36) Tofurky deli slices: New look. Other Turtle Island glossy color sell sheets. Address: Founder and President, Turtle Island Foods, P.O. Box 176, Hood River, Oregon 97031.

8432. Vialle, Cynthia. 2007. Re: In 1637 the Dutch exported ten barrels of *moersackij* (shoyu) from Japan. Letter (e-mail) to William Shurtleff at Soyinfo Center, Feb. 19. 1 p.

• **Summary:** “About soy. Do you know that soy was also called *murasaki*? *Sakijmoer* or *moersakij* in the Dutch records. I have a reference of 1637 that ten barrels of *moersakij* were shipped from Japan to Siam or Batavia. Two Japanese historians told me that *moersakij* is *murasaki*, soy. It’s nothing to do with the history of the word, but I thought it might be of some interest to you.”

On March 28 Cynthia sent the following citation: “10 vaten *moersackij*” = 10 barrels of *murasaki* [soy sauce]. “Hirado, 27 Nov. 1637. Shipped in the *Aeckersloot* sailing from Hirado to Siam and Batavia.

Source of document: “Nationaal Archief, The Hague,

Archive of the Dutch Factory in Japan, record number 837.” Address: Leiden Univ., Netherlands.

8433. Huang, H.T. (Hsing-Tsung). 2007. Re: First and second drawing of soy sauce in China. Name and use of the residue or dregs. Letter (e-mail) to William Shurtleff at Soyinfo Center, March 10. 1 p.

• **Summary:** The first batch of soy sauce drawn from the large earthenware jars (where it collected in a finely-woven deep cylindrical bamboo tube or basket and was ladled out) is known as *xianchou* (“early draw”); the first batch drawn from the old mash, after addition of salt water and further incubation, is known as *laochou* (“old draw”).

Dr. Huang does not know the Chinese word for the residue or dregs left over after making soy sauce. In China, the latter may be used to marinate tofu and other foods, or may be fed to pigs (or other animals). Address: PhD, Alexandria, Virginia.

8434. Conklin, Dave. 2007. History of Japanese food in Portland, Oregon until 1941 (Interview). *SoyaScan Notes*. March 23. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** Dave is writing his master’s thesis at Portland State University on the social history of Japanese food in Oregon; it looks at the Japanese culture through the lens of food. He has been reading Japanese-language newspapers in Portland and he found an ad that mentioned Ota Tofu (at 86½ N. 5th Street, Portland) on 1 Jan. 1915 in the *Oshû Nippô* (*The Oregon News*). It mentions “Ota Kyodai” (Ota brothers), as if they owned the shop at that time. The newspaper started about 1908 and was published in Portland 6 days a week, usually 6 pages per issue, and he found the 1915 issues on a roll of microfilm from the University of Washington. This special New Year’s Day issue was about 30 pages long. He has most issues of the *Oshu Nippo* printed between 1917 and 1928. Using a grant, they were recently put on a CD for the Oregon Nikkei Legacy Center in Portland (NW 2nd St.); they are not digitized. The center is open most weekdays. Becky Patchett is the archivist.

After the Japanese invaded Manchuria and China in the 1930s, there was a great deal of conflict between Japanese and Chinese in Portland. The children would have to walk to school on opposite sides of the street. They weren’t allowed to play with each other. However certain Chinese grocers would still sell particular foods, such as bean sprouts, to Japanese customers. The Japanese wouldn’t eat at the Chinese restaurants—maybe because they wouldn’t be served. So Japanese restaurants started serving Chinese food. In the 1920s *Shina udon* (“China noodles,” which we now call “ramen noodles”) was common in all the Japanese restaurants—as shown by ads. But by the late 1930s this food was no longer mentioned in ads by Japanese restaurants.

Dave is also interested in how American anti-Japanese

racism played out through food. In 1924 Congress passed the National Origins Act (also known as the Immigration Act of 1924, the Asian Exclusion Act, or the Johnson-Reed Act). A sweeping law to keep out “undesirables,” it limited the number of immigrants who could be admitted from any country in any given year to 2% of the number of people from that country living in the United States in 1890, according to the 1890 U.S. census. Essentially, it put an end to all immigration from Asia. Moreover, all Asians were forbidden from being naturalized as citizens, and it had the effect of preventing Japanese Americans from legally owning land. From 1924 on anti-Japanese racism rose steadily in the USA even though Japanese were making huge contributions to American life and the economy in areas such as farming. They also paid taxes. The Seattle City Council [in Washington state], for example, passed laws attempting to put Chinese hog farmers out of existence. Other laws made it illegal for Japanese to fish for salmon in the Columbia River, or to obtain hunting licenses. The whole Pacific oyster industry came from Japan; laws shut it down. Dave is not sure why they did this. It could have been resentment that they were successful, or it could have been harassment.

Nobuo Harada is a leading Japanese food scholar, who writes mostly in Japanese; his focus is the mid-Edo period. He has one article in English titled “Culinary Culture and its Transmission in the Late Edo Period,” in *Written Texts—Visual Texts: Woodblock-Printed Media in Early Modern Japan*, edited by Susanne Formanek and Sepp Linhart (2005, p. 141-158).

Dave has studied numerous editions of *Zaibei Nipponjin Kan* (*Directory of Japanese in the USA*), published by Shin Sekai-sha. The 1912 edition is at Waseda University in Tokyo. The 1916, 1928, and 1936 editions are at University of Washington (Seattle). Several other universities (UCLA, Univ. of Oregon) also have the 1936 edition. He has not seen the 1922 ed.

Another interesting source of information are the old guide books for coming to the USA; they were published in Japan, mostly in Japanese but with some English-language ads from hotels, food suppliers and importers, and labor contractors in the USA. Until 1912 the rice consumed in Oregon was grown in either Hawaii or Japan; then in 1912 Japanese-style rice started to be grown in commercial quantities in and around Sacramento, California. Rice had been milled in California since about the 1860s.

Hood River is a city on the Columbia River about 60 miles east of Portland. The Yasui Brothers Store (a general store) existed in Hood River from about 1907 until the internment in 1941. The store was the center of the Japanese community. Masuo Yasui, who owned the store with his brother, never threw any documents away for his entire life. He kept order sheets, cancelled checks, letters, telegrams—everything. These documents are now at the Oregon Historical Society, but they are just starting to be cataloged.

Several scholarly books about this Yasui family have been published in English, such as *Stubborn Twig: Three Generations in the Life of a Japanese American Family*, by Lauren Kessler (1993).

Early soyfoods manufacturers in Portland that David has found include: (1) Asahi Tofu, 52 North 3rd St. Source: Oshû Nippo. 1922. May 4. p. 5. (2) Sanyo Co., which advertised miso (from Jan. 1915) and shoyu, and probably made them. (3) Kuge Tofu in the late 1930s and early 1940s until the internment.

Good books on Japanese rice in America are: (1) *A History of the American Rice Industry, 1685-1985* by Henry C. Dethloff (1988). (2) *Rice in California*, by Jack H. Willson (1979). Address: Portland, Oregon.

8435. Ness, Carol. 2007. Top tamari balances sweet and salty: Taster's choice. *San Francisco Chronicle*. March 28. p. F2. Food section.

• **Summary:** Seven brands of tamari sold in San Francisco were tasted and rated in descending order of preference as follows: 1. Eden (organic, imported green label) (69 points; \$5.69 for 10 oz at Rainbow). 2. Mitoku imported (60 points, \$7.99 for 10 oz at Rainbow). 3. Eden (55 points, organic, plum-colored label, not imported. \$4.19 for 10 oz at Whole Foods). 4. Kikkoman (53 points, made in Japan, \$3.89 for 10 oz). 5. San-J (45 points, black label, \$2.59 for 10 oz at Rainbow). (6) Ohsawa (35 points). (7). San-J gold label 14 points.

Tamari is a Japanese-style soy sauce "made mainly from soy beans with little or no wheat, which gives it a richer taste than regular soy sauce." Tasters commented mainly about the color, saltiness, sweetness, and (above all) the balance of saltiness and sweetness. "The panel looked for a smooth, rich flavor balanced by the right amount of salt. Common problems were harsh or sweet notes, or too much salt." Address: Staff writer.

8436. Chow, Cheryl; Chow, James. 2007. *Hypoglycemia for dummies*. 2nd ed. Hoboken, New Jersey: John Wiley & Sons. xii + 274 p. Illust. Index. 24 cm.

• **Summary:** Hypoglycemia (low blood sugar) is difficult to diagnose and to treat; it may be linked to or confused with other health problems.

Soyfoods are a good source of protein in the diets of those suffering from hypoglycemia (low blood sugar). Soy is mentioned on pages 37 (Soy is one of 8 foods to which people are most often allergic), 38 (if you have a food reaction, try eliminating one of these 8 potential allergens from your diet. Go on an elimination diet for 2 weeks and keep a food journal), 41 (If you think you have candidiasis, try going on a hypoglycemic diet. In addition, avoid fermented foods or those that contain yeast, including soy sauce), 91 (MSG is also called hydrolyzed protein, soy extract, meat tenderizer, Accent, Ajinomoto), 104, 106

(milk substitutes, including soy milk, should not contain added sweetener), 107 (Foods such as tofu {bean curd}, tempeh and natto are good sources of protein, but intake should be limited to 2-3 servings of whole soy foods a day), 196, (unsweetened soy milk is good to drink), 250 (soy products make good meat substitutes), and 258 ("Noshing on nourishment": Vegetables such as edamame make excellent, nutrient-packed snacks).

Concerning natto (p. 250): "These sticky, fermented [soy] beans are a great vegetarian source of protein... In Japan natto is often eaten over rice for breakfast." However natto has a strong odor which takes some time to get used to. Address: 1. Writer and editor; 2. MD, Practicing physician, Director, Nihon Clinic [with branches in Manhattan, New York, Atlanta, Chicago and San Diego].

8437. *SoyaScan Notes*. 2007. Early Dutch exports of soy sauce from Japan, and early documents that mention soy sauce in Europe (Overview). June 10. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1647—Documents show that the Dutch East India Co. (VOC) began exporting soy sauce from Japan, from their tiny artificial harbor in Nagasaki harbor, and exported some almost every year from 1751 on. Most of this soy sauce was sent and used at to their trading posts in Southeast Asia.

Concerning early documents that mention soy sauce in Europe:

1679—John Locke (England) mentions "saio" in his journal.

1688—William Dampier (England) mentions "Soy" in his journal.

1690—E.B. (England). The canting crew. "Catchup, a high East-India Sauce."

1696—Ovington, Suratt (England). "Bambou and Mangoe Achar [pickle], Souy the choicest of all Sawces, are always ready to whet the Appetite."

1705—Samuel Dale (England). "3. Soia *Offic.* [probably *Officinarum*] *Phaseolus Japonicus* ex quo *Japonesium Soia*, qui intinctus species est, conficitur *Herm.* Species *Phaseoli parvi albi*, è Japonia allata, è qua conficiunt condimentum *Ketchup* dictum, duum generum, liquidum nimirum & solidum.

1736—The first Dutch soy sauce, exported from Japan via Batavia in the Dutch East Indies, arrives in Holland.

1750—Soy sauce first arrives in the United States (actually the British colonies of North America) in New York City. It is imported from Europe and advertised as being on sale in a retail store.

8438. Shurtleff, William. 2007. Thoughts and questions concerning Chinese traders in Nagasaki, Japan. Could they have exported soy sauce? Could they have sold that soy sauce to British East India Co. merchants? *SoyaScan Notes*.

July 15. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** In about 1600 the Chinese obtained an official trade permit and settled in Nagasaki. At the peak of Chinese activity there, about a century later, as many as 190 Chinese ships a year were visiting Nagasaki, and one-sixth of the town's population hailed from the East Asian mainland. Address: Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

8439. Kikkoman Corporation. 2007. Annual report 2007. Year ended March 31, 2007. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 37 p. 28 cm. [Eng]

• **Summary:** Consolidated net sales rose 9.1% year on year to \$3.327 billion, operating income climbed 16.6% to \$183 million, and net income rose 16.6% to \$91.1 million. All three were record figures for Kikkoman. Note: Some dollar values actually fell due to changing foreign exchange rates.

Page 1, titled "A golden heritage: Kikkoman's 50th anniversary in America," begins: "In 2007 we celebrate the 50th anniversary of our full-scale entry into the U.S. market. Over the ensuing 50 years, we have aimed to make soy sauce a more integral part of the American food culture... Sales volume of soy sauce overseas during fiscal 2007 grew to some 157,000 kiloliters." A map shows North American production and sales bases. A bar chart shows "Overseas sales volume," which has grown from about 10,000 kl in 1974 to 35,000 kl in 1986 to 92,000 kl in 1996 to 158 kl in 2006; it has increased dramatically and exponentially. Kikkoman's two soy sauce factories in the USA, at Walworth, Wisconsin, and Folsom, California (northeast of Sacramento, California, near Folsom Lake) "now ship over 110,000 kiloliters of soy sauce throughout North America."

A photo (p. 2) shows Yuzaburo Mogi (Chairman of the Board and CEO) and Takashi Ushiku (President and COO). Address: Noda, Japan.

8440. Kikkoman Corp. 2007. Kikkoman—A golden heritage: Kikkoman's 50th anniversary in America. *Arigato, America* (Ad). *New York Times*. Sept. 19. p. A13.

• **Summary:** A full-page color ad. The top half is a message from Mr. Yuzaburo Mogi, Chairman and CEO, Kikkoman Corporation. It begins: "Thank you, America, for 50 great years.

"Thank you for making Kikkoman one of America's best-loved food brands. We are honored and humbled by the generous welcome you have extended to us since we started marketing our soy sauce in America 50 years ago.

"A lot has changed since then, but one thing remains the same. Our core product, naturally brewed soy sauce, is still made just as it was more than 300 years ago—slowly fermented and aged for full flavor like a fine wine." Below the message is Mr. Mogi's signature. In the bottom half of the ad is a large color photo of Mr. Mogi, a bottle of Kikkoman soy sauce, and the logo of Kikkoman's 50th

anniversary in America (1957-2007). In smaller red letters we read: "A member of the family that founded the company more than three centuries ago, Mr. Yuzaburo Mogi has helped make Kikkoman one of the world's leading food brands."

At the bottom of the ad is an announcement of Kikkoman's 50th anniversary sweepstakes, which ends Sept. 30, and includes a trip to Japan. To enter and for official rules go to www.kikkoman50.com.

8441. Keller, Elizabeth. 2007. Professor Emeritus Keith H. Steinkraus dies at age 89 (Web article). www.news.cornell.edu/stories/Nov07/obit.Steinkraus.html.

• **Summary:** "Cornell Professor Emeritus Keith H. Steinkraus, a specialist in indigenous fermented foods and food microbiology, died Oct. 23. He was 89.

"Steinkraus, who joined the faculty of the New York State Agricultural Experiment Station in 1952, graduated cum laude from the University of Minnesota in 1939 and earned a Ph.D. in microbiology in 1951 from Iowa State University. He was promoted to full professor in 1962 and retired as professor emeritus in 1988, although he remained active in his field and at Cornell for many years afterward.

"At Cornell, the experience of mentoring international students who had come from Asia, Central America and Africa to study the microbiology of their native foods prompted Steinkraus to study fermented foods, including tempe, tape, trahanas, idli/dosa and the fermented fish sauces and soy products of the Far East, including miso and tofu.

"In 1959 Steinkraus was invited by the Interdepartmental Committee for Nutrition for National Defense to participate in surveys of the nutritional status of military personnel, their dependents and the general populations of South Vietnam, Ecuador and Burma. The project was later extended to include Indonesia, the Philippines, Korea, Taiwan, Thailand and Malaysia.

"Over the course of his career, Steinkraus maintained and developed his connections with Asia as a consultant on food processing issues in Indonesia and as a teacher and researcher at the University of the Philippines College of Agriculture. He lectured in Indonesia, Thailand, Singapore, London, Germany and Switzerland. His *Handbook of Indigenous Fermented Foods*, published in 1983, was the first comprehensive and authoritative book on the subject.

"Steinkraus was the American delegate to the United Nations Environmental Program, United Nations Educational, Scientific and Cultural Organization and International Cell Research Organization panel on applied microbiology and biotechnology and worked as a consultant to the United Nations Industrial Development Organization to determine how genetic engineering and biotechnology could be used to help developing countries in Africa. He was honored in 1985 with the Institute of Food Technologists' International Award and was a fellow of the American

Association for the Advancement of Science and the American Academy of Microbiology.

“A memorial service will be held Sunday, June 8, at 2 p.m. in Sage Chapel.” Address: Part-time writer for the College of Agriculture and Life Sciences, Cornell Univ.

8442. Belleme, John; Belleme, Jan. 2007. Japanese foods that heal: Using traditional ingredients to promote health, longevity, and well-being. Tokyo, Rutland, Vermont, Singapore: Tuttle Publishing. 224 p. Illust. Index. 26 cm.
• Summary: On the dedication page is a portrait photo of Takamichi Onozaki. Contents: Pronunciation guide. Foreword, by Christina Pirela. Preface, by John and Jan Belleme. Introduction: Food is medicine. 1. Miso: A health secret to savor. 2. Toasted sesame oil: The cooking oil supreme. 3. Shoyu: King of condiments. 4. Tamari: Wheat-free soy sauce. 5. Amazake: Sweet ambrosia. 6. Kuzu: The wonder root. 7. Brown rice vinegar. 8. Shiitake: Miracle mushroom. 9. Brown rice malt syrup: Heavenly sweet water. 10. Umeboshi: Venerable pickled plumbs. 11. Mochi: Sweet rice cakes. 12. Noodles. 13. Tofu: The square egg. 14. Seitan: The vegetarian alternative. 15. Sea vegetables: Underwater harvest. 16. Mirin: Sweet rice wine. 17. Maitake: The king of mushrooms. 18. Japanese tea: A healthy tonic. Acknowledgments. Shopping resources. Glossary. Recipe index.

8443. **Product Name:** Sesame Yuba Strips, Cilantro Tofu Salad.

Manufacturer's Name: Hodo Soy Beanery.

Manufacturer's Address: 1600 S. De Anza Blvd., San Jose, CA 95106. Phone: 408-517-8958.

Date of Introduction: 2007. December.

Ingredients: See below.

Wt/Vol., Packaging, Price: -

How Stored: Refrigerated.

New Product–Documentation: Labels by brought to Soyinfo Center by Min Tsai on 2009. Sept. 16. Ingredients: Sesame Yuba Strips: Soybeans, filtered water, teriyaki sauce, rice vinegar, sesame paste, soy sauce, sugar, soybean oil, black sesame seeds.

Cilantro Tofu Salad: Soybeans, water, calcium sulfate, rice vinegar, mushroom powder, sesame oil, cilantro, sugar, salt, black pepper.

8444. **Product Name:** San-J Tamari Ginger Dressing.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 804-226-8333.

Date of Introduction: 2007.

Ingredients: Tamari Sesame: Water, tamari soy sauce (water, soybeans, salt, alcohol), rice vinegar, organic sugar, onion juice (onion juice, salt, natural flavors), sesame oil, ground sesame, arrowroot, whole sesame, white pepper. This product is made in a plant inspected by the Gluten-Free Certification Organization (www.gfco.org).

Wt/Vol., Packaging, Price: 8 fl. oz. (237 ml) glass bottle.

How Stored: Refrigerate after opening.

New Product–Documentation: Digital color image of front and back label sent by Misako Binford of San-J. 2012. May 11. In an attached e-mail she says that this product was first sold in 2007. However the copyright on the back of each label is 2009—indicating that the label design was updated.

8445. 1001 foods to die for. 2007. Kansas City, Missouri: Andrews McMeel Publishing LLC. Madison Books. 960 p. Introduction by Corby Kummer. Illust (color). Index. 22 cm.
 *

8446. Bittman, Mark. 2007. How to cook everything vegetarian: simple meatless recipes for great food. Hoboken, New Jersey: John Wiley & Sons, Inc. xii + 996 p. Illust. Index. 24 cm.

• Summary: The chapter titled “Tofu, vegetable burgers, and other high-protein foods” (p. 637-78) has this contents: Introduction. The umami factor (savory-ness). The basics of tofu: The tofu lexicon (regular tofu, silken tofu, pressed or extra-firm tofu, smoked tofu, fried tofu, baked tofu, fermented or pickled tofu, tofu skins {dried bean stick, yuba, bean curd sheets or skins}). Buying and storing tofu. Preparing tofu (freezing, squeezing, puréeing,...); then come a wealth of recipes.

The index contains 129 entries for tofu, 32 for miso, 26 for tempeh, 25 for soy sauce, 24 for edamame, 23 for seitan, 11 for soybeans, 7 for black beans (fermented [soy nuggets]), 4 for teriyaki sauce, 6 for tofu skins (yuba and dried yuba sticks), 3 for milk substitutes, 2 each for meatballs (vegetarian), and 1 each for bean sprouts (soy), black soybeans, meatless meat sauce, soybean oil, soy flour, soy milk, soy nuts, soy pasta, soy protein isolate, textured vegetable protein, tofu noodles, and Worcestershire sauce (hold the anchovies).

There are also recipes for adzuki beans [sic], tahini, vegan cookery—and much more. Address: New York Times food writer.

8447. Bittman, Mark. 2007. Mark Bittman's quick and easy recipes from the New York Times. New York, NY: Broadway Books... An imprint of Random House. x + 340 p. Index. 23 x 20 cm.

• Summary: This book collects 350 recipes from Bittman's popular *New York Times* column “The Minimalist,” which cleverly caters to the modern gourmet whose expectations are high but whose time is limited.

Soy related recipes: Nearly instant miso soup with tofu (p. 7). Soy vinaigrette (with soy sauce, p. 44). Rice salad with peas and soy (with soy sauce, p. 58). Steamed clams with soy (sauce, p. 65). Soy-dipped shrimp (p. 78-79). Miso-broiled scallops (p. 80). Simplest steamed fish with soy (p. 95). Salmon with soy and black beans (with "1 tablespoon preserved (Chinese) black beans," p. 110-11). Soy duck (p. 142). Soy poached chicken (p. 154-55). Grilled soy-and-ginger boneless lamb leg (p. 193). Pork chops with miso-red wine sauce ("Miso is a superb thickener, adding a rich, creamy consistency," p. 201). Roast asparagus with soy and sesame (p. 217). Grilled asparagus with soy-ginger dressing (p. 218). Curried tofu with soy sauce (p. 243). Simmered tofu with ground pork (Ma-Po tofu, p. 244). Address: New York Times food writer.

8448. Blereau, Jude. 2007. *Wholefood: heal—nourish—delight*. Philadelphia, Pennsylvania: Running Press. 332 p. Illust. Index. 23 x 19 cm. [8 ref]

• **Summary:** This cookbook is not vegetarian. Vegan recipes are so labeled. One chapter, titled "Soy" (p. 92-110) is divided into two parts: Tofu and tempeh. The index contains 18 entries for tofu, 14 for tempeh, 3 each for miso and tamari, 2 each for miso soup, soy beans, 2 and soy milk, and 1 each for soy flour, teriyaki marinade, and textured vegetable protein.

"Jude Blereau is a natural foods chef, food coach, and cooking teacher who has been involved with the organic and wholefoods industry for more than 15 years. She first became involved in the natural food industry while living in the U.S. in the late 1980s. In 1997, Jude co-founded The Earth Market, a much loved wholefood store and cafe; in Perth, Western Australia. Her focus is on helping people learn about good food—what it truly is, where to get it, how to use it—and to give them the tools and information to make healthy eating a part of their everyday lives. Blereau lives in Australia." From publisher's description. Address: Natural Foods Chef, Australia.

8449. Esselstyn, Caldwell B., Jr. 2007. *Prevent and reverse heart disease: the revolutionary, scientifically proven, nutrition-based cure*. New York, NY: Avery. A member of the Penguin Group (USA) Inc. xii + 308 p. Plus 8 unnumbered pages of plates. Foreword by T. Colin Campbell, Ph.D. Illust. (some color). Index. 24 cm. [27 ref]

• **Summary:** A remarkable, milestone book! Every person with a heart should read this book. Advocates a plant-based diet with no oil or nuts. On the cover: "Based on the findings of a now 20-year study first published in the *American Journal of Cardiology* [in Dec. 1995]. With more than 150 great-tasting recipes."

Contents: Foreword, by T. Colin Campbell. Introduction. Part I: The heart of the matter. 1. Eating to live. 2. "Someday, well have to get smarter." 3. Seeking the cure. 4. A primer on

heart disease. 5. Moderation kills. 6. Living, breathing proof. 7. Why didn't anyone tell me? 8. Simple steps. 9. Frequently asked questions. 10. Why can't I have "heart healthy" oils? 11. Kindred spirits. 12. Brave new world. 13. You are in control.

Part II: The joy of eating. 14. Simple strategies. 15. Advice from Ann Crile Esselstyn. 16. Breaking the fast. 17. Feasting on salads. 18. Sauces, dips, dressings and gravies. 19. Vegetables, plain and fancy. 20. Soups, thick and delicious. 21. Sandwiches for all occasions. 22. The main course. 23. Wonderful, easy desserts.

This book is based on a 20 plus year study of coronary artery disease using diet and lifestyle modifications; it reports the results of that study. President Bill Clinton has spoken (in public and on TV) very highly of this book and of Dr. Esselstyn (pronounced ES-sul-stun, not ES-sul-stine); the name is Dutch.

The dietary rules (p. 120-21): 1. Don't eat any meat, chicken or fish. 2. Do not eat *any* dairy products. 3. Do not eat eggs; that includes egg whites and even egg substitutes that include egg whites. 4. Do not consume any oil at all—Not even virgin olive oil or canola oil. 5. Use only whole grain products, including brown rice. That means no white flour products. 6. Do not drink fruit juice—but its fine to eat fruit. 7. Do not eat any nuts. 8. Do not eat avocados (or guacamole). 9. Do not eat coconut. 10. "Eat soy products cautiously. Many are highly processed and high in fat. Use 'light' tofu. Avoid soy cheese, which almost always contains oil and casein." 11. Read *The China Study*, by T. Colin Campbell.

After having cautioned the reader to "Eat soy products cautiously," the plant-based recipe section of the book (p. 119-286), by Ann Crile Esselstyn, calls for soyfoods in many recipes. Some of the breakfast cereals call for plantmilk using a standard format: "2 cups oat, multigrain, almond, or nonfat soymilk" (p. 129-32, 162, 231, 276, 283). A comparison of the caloric, fat, sodium, and sugar content of nine plantmilks (six of them containing soy) is given on pages 136-37. "Low-sodium tamari" and Bragg Liquid Aminos (which contain sodium by no salt) are widely used in small amounts for seasoning (p. 128, 158-59, 165-66, 168, 170-72, 177, 179, 184, 251, etc.). White miso is used occasionally as a combination seasoning and sweetener (p. 163, 191). Seitan (made from wheat gluten) is occasionally used as a meat substitute (p. 213, 250-51). Light silken tofu or light extra-firm tofu (often one 12.3-ounce package) is used as a dairy alternative in dessert recipes such as: Chocolate mousse (p. 272-73). Blueberry purple passion (p. 273). Pineapple paradise (p. 274). Lemon whipped topping (p. 275). Pineapple frosting (p. 278). Creamy fudge frosting (p. 279).

Sweeteners are used in moderation and the chapter on "Desserts" begins: "Its best not to eat dessert every night. Make it a rare treat, when there are lots of people around—and no temptation to eat too much." Many fruits are naturally

sweet and make good desserts. One format is: “3 tablespoons maple syrup, honey, agar nectar, or sugar.”

Acknowledgments (p. 287): “Kindred spirits in the transition to healthier living have my gratitude for their own inspiring work. Among them: Neal Barnard, Colin Campbell, Antonia Demas, Hans Diehl, Joel Fuhrman, Mladen Galubic, Alan Holdhamer, William Harris, Michael Jacobson, Michael Klaper, Robert Kradjian, Doug Lisle, Howard Lyman, John McDougall, Jeff Nelson, Dean Ornish, John Robbins.”

“My late father, Caldwell B. Esselstyn, M.D... And long before it became fashionable, he argued that the only way out of the impossible health-care burden that confronts the United States is to teach people how to live healthier lives” (p. 288).

Publisher’s summary: “Heart disease remains the leading cause of death in this country for men and women. And while we spend millions of dollars each year developing treatments, traditional procedures fail patients by focusing only on the symptoms of the disease, not the underlying causes. In *Prevent and Reverse Heart Disease*, Dr. Caldwell B. Esselstyn, Jr., a former surgeon, researcher, and clinician at the Cleveland Clinic, challenges conventional cardiology by posing a compelling, revolutionary idea—that we can, in fact, abolish the heart disease epidemic by changing our diets.

“The proof is in the incredible results of the patients who have followed Dr. Esselstyn’s ground-breaking program. The men and women in his twenty-year nutritional study—the most comprehensive study of its kind—came to him with advanced coronary disease. Despite the aggressive traditional treatment they received—including bypasses and angioplasties—a number had been told by their cardiologists that they had less than a year to live. Within months of following a plant based, oil free diet, their angina symptoms eased, their cholesterol levels dropped significantly and they experienced a marked improvement in blood flow to the heart. Twenty years later they remain free of symptoms. Drawing on the results of this revolutionary study and his ongoing work with patients all over the country, Dr. Esselstyn convincingly argues that plant based, oil free nutrition can not only prevent and stop the progression of heart disease, but also reverse its effects.

“Furthermore, it can eliminate the need for expensive and invasive surgical intervention except in acute emergencies, no matter how far the disease has progressed. *Prevent and Reverse Heart Disease* explains the science behind these dramatic results, and offers readers the same, simple plan that has changed the lives of Dr. Esselstyn’s patients forever. In addition, the book offers more than 150 delicious recipes developed by Ann Crile Esselstyn, that the Esselstyns and their patients have enjoyed for years. Clearly written and backed by irrefutable scientific evidence, startling photos of angiograms and inspiring personal stories, this book will empower readers to take charge of their heart

health. It is an important call for a paradigm shift in heart disease therapy.”

About the author: Caldwell Blakeman Esselstyn Jr., M.D., (born December 12, 1933) is an American physician, author, and former Olympic rowing champion. His color portrait photo appears on the front dust jacket. Esselstyn graduated from Deerfield Academy and in 1956 graduated from Yale University, where he was a member of Skull and Bones. Caldwell Esselstyn competed at the 1956 Summer Olympics in Melbourne, where he won a gold medal in eights with the American team. On 1 May 1961 his engagement to Ann Crile was announced by the *New York Times*; they were married on 18 June 1961. 1961–He received his M.D. from Western Reserve University. 1985–He began his famous study at the Cleveland Clinic of 22 patients who had previously had heart attacks. 1988–He and his family began to move toward a plant-based diet. Dr. Esselstyn and his wife, Ann Crile Esselstyn, have mostly followed a vegan diet since the mid-1980s. He attributes the success of his 12 year trial with heart patients to low mean levels of both total cholesterol (145 mg/dl) and LDL cholesterol (82 mg/dl). In 2010 after cardiac surgery, former U.S. president Bill Clinton mostly adopted the plant-based diet recommended by Caldwell Esselstyn, Dean Ornish and T. Colin Campbell. Source: Wikipedia, at Caldwell Esselstyn. May 2011.

Dr. Esselstyn and Ann Crile were married on 18 June 1961 in Cleveland, Ohio. They have four grown children: Rip (born in 1963), Ted (1964), Jane (1965), and Zeb (1967). Three are married, and Dr. Esselstyn and Ann have six grandchildren (p. 288). In 1988 the Esselstyn family joined together in moving toward eliminating dairy products, meats, and oils from their diet. Their eldest son, Rip, became an all-American swimmer at the University of Texas at Austin; after graduating he was a professional triathlete for 11 years. Today (2011) he is a teacher and writer about diet and health—advocating a “plant-strong diet.” Their second son, Ted, set a 200-yard backstroke record at Yale University, and their daughter, Jane, won the Big Ten 200-yard backstroke championship while attending the university of Michigan. Their youngest son, Zeb, as an Ohio high school junior, was the state butterfly swimming champion. And Ann, now in her early seventies, runs for 40 to 70 minutes almost every day. Clearly their plant-based diet provides them with plenty of strength and energy (p. 78-79). Address: M.D., former surgeon, researcher and clinician, Cleveland Clinic, Ohio—for 35+ years.

8450. Esselstyn, Caldwell B., Jr. 2007. *Prevent and reverse heart disease: the revolutionary, scientifically proven, nutrition-based cure* (Continued, Part II). New York, NY: Avery. A member of the Penguin Group (USA) Inc. xii + 308 p. Plus 8 unnumbered pages of plates. Foreword by T. Colin Campbell, Ph.D. Illust. (some color). Index. 24 cm. [27 ref]

• **Summary:** Continued: Basic biography: Caldwell Esselstyn, M.D., received his B.A. from Yale University and his M.D. from Western Reserve University. In 1956 he received a gold medal as a member of the Olympic rowing team. He trained as a surgeon at the Cleveland Clinic and at St. George's Hospital in London. In 1968 as an army surgeon in Vietnam he was awarded the Bronze Star. Dr. Esselstyn has been associated with the Cleveland Clinic since 1968, having served as staff president and on its board of governors. He chaired the Clinic's Breast Cancer Task Force. In 1991 Dr. Esselstyn served as president of the American Association of Endocrine Surgeons, and in the fall of 1991 he organized "The First National Conference on the Elimination of Coronary Artery Disease" in Tucson, Arizona. He invited Dr. T. Colin Campbell to speak at this conference. In 2005 Dr. Esselstyn became the first recipient of the Benjamin Spock award for compassion in medicine. His website is heartattackproof.com.

Heart disease is the leading cause of death of men and women the United States, with more than 500,000 deaths each year. Three times that number suffer a known heart attack and 3 million more have a "silent heart attack." Dr. Esselstyn believes this is all unnecessary. There doesn't have to be any heart disease at all. He calls it a "toothless paper tiger that need never ever exist. And should it exist, it need never ever progress." His views are based on the global epidemiology of this disease and also on his research. When you look globally, there are still cultures on this planet where heart disease is virtually unknown—the rural Chinese, the Papua Highlanders in Papua New Guinea, the people in Central Africa, and the Tarahumara Indians of northern Mexico (known for their long-distance running). This is largely because, by culture, heritage, and tradition, they consume a largely plant-based diet that does not contain any of the "atherosclerotic lynchpins," which are dairy products, meat, and processed oils. By contrast, in the USA, by age 12 our children begin to have thickening of those major carotid arteries which go to our brain. If they live until age 20 and they happen to die in combat, as was known in Korea and Vietnam 40-50 years ago, roughly 80% of these young G.I.s already have gross evidence of coronary artery disease—visible even without a microscope. A more recent study, done in 1999, of those who happened to die of accidents, homicides, and suicides, between the ages of 16 and 34, found that 100% of these people have coronary artery disease. This is the background of why Dr. Esselstyn wanted to do research in this area. His research started in about 1985 and he has concluded that the major cause of coronary artery disease is the standard American diet.

A sampling of the many priceless gems in this book: "Can I change?" It is difficult, but "The key is to remember that the rewards are greater than the frustration... after 12 weeks of eating no animal foods, dairy, or added oils, you lose your craving for fat" (p. 76).

The typical Western diet gets 37% of its calories from fat. This diet recommends about 10% of the calories from fat—which is ideal for good health (both heart disease and cancer). And this diet provides about 50-70 gm of protein a day (p. 77).

"Will I have enough strength and energy?" "The truth is that excessive consumption of animal protein badly weakens our bodies. Among other things, it accelerates the loss of calcium through the kidneys, leading to the brittle, porous bone condition called osteoporosis." "And look at the examples that nature offers." The elephant, the bull, etc. They eat a plant-based diet—as do many great athletes, such as Carl Lewis (1991) and many others.

"What if my cholesterol won't go below 150 mg/dL? A tiny minority of the population, no more than 5% of all Americans, has an inherited cholesterol disorder that makes it impossible for them to reduce total cholesterol below 400 to 500 mg/dL, even with careful nutrition. Such patients need to be monitored by highly qualified cholesterol specialists" (p. 79).

A plant-based diet should contain "large quantities of natural antioxidants, which prevent the body from oxidizing LDL cholesterol into its most dangerous, artery-clogging form."

"Don't my genes predetermine whether or not I'll get heart disease?" The "answer is an emphatic NO. If you maintain a cholesterol level under 150 mg/dL, or LDL under 80 mg/dL, you—and all other relatives who inherited these genes—will be free of heart disease" (p. 80).

"Why can't I have 'heart-healthy oils'?" The idea of heart-healthy oils and the Mediterranean Diet was based on the Lyon Diet Heart Study, and was widely praised by the media and in books. But: "By the end of the study, nearly four years after its start, fully 25% of the subjects on the Mediterranean diet—one out of four—had either died or experienced a new cardiovascular event. I feel these are wretched results for a nonmalignant disease. We can do much better." "In fact the medical literature is filled with evidence of the harmful effects of monounsaturated oils" as is Dr. Esselstyn's personal experience (p. 84-86).

"T. Colin Campbell, the Cornell University professor who directed and cowrote *The China Study*, observes that there are 'two worlds' of medicine—two radically different visions of how to approach health. 'One consensus favors drugs as the cure, the other favors food,' he explains; Western medicine, for the most part, has chosen drugs. As I see it, we got it wrong.' I agree."

Chapter 11, "Kindred spirits," summarizes the pioneering work of some mentioned previously in the "Acknowledgments" section of this book: T. Colin Campbell, Nathan Pritikin, Hans Diehl, John McDougall, Dean Ornish (whose program is most similar to Esselstyn's. "Among the wide variety of programs promoting cardiovascular health, his and mine are the only ones I am aware of that are based

on peer-reviewed research that demonstrates arrest and reversal of heart disease.” Dr. Esselstyn’s 12-year study started in 1985; Dr. Ornish’s study started in 1986. Dr. Ornish “did not use cholesterol-lowering medication. Like mine, Dr. Ornish’s patients had three-vessel coronary heart disease. And Dr. Ornish insisted that, in addition to adopting a plant-based diet, his patients must use relaxation and meditation techniques and participate in a structured exercise program. Finally Dr. Ornish had a control group of patients with similar disease severity, but who followed a traditional program of cardiac care”), Dr. Charles Atwood (a longtime pediatrician with an extremely busy practice, his focus on children was very important [not to be confused with Dr. Robert Atkins of low-carb diet fame]), and Antonia Demas.

“And yet with all the research that demonstrates the wisdom and benefits of plant-based nutrition, its growing ranks of opponents still face a formidable array of opponents from the titans of the animal food industry to the medical establishment itself. My colleague Dean Ornish succinctly sums up the dilemma faced by those of us who believe in this healthy way of eating. ‘I don’t understand why asking people to eat a well-balanced vegetarian diet is considered drastic, while it is medically conservative to cut people open.’ Well said” (p. 93). Address: M.D. former surgeon, researcher and clinician, Cleveland Clinic, Ohio—for 35+ years.

8451. Kurihara, Harumi. 2007. *Harumi’s Japanese home cooking*. 1st American ed. New York, NY: Home Books. A division of the Penguin Group (USA) Inc. 160 p. Illust. (color). No index. 26 cm.

• **Summary:** A translation of *Kurihara Harumi no japanizu hoomu kukkingu*. One chapter is titled “Soup, eggs & tofu.” The book (which is crippled by the lack of an index) contains 7 recipes for miso, 5 for tofu, 2 for teriyaki sauce, and 1 for edamame. Soy sauce is used as an ingredient in many recipes such as Chicken with soy and balsamic dressing. The short glossary mentions Kochujan (Korean miso).

Harumi Kurihara, a housewife, is Japan’s most popular cooking expert. Her first book in English, *Harumi’s Japanese Cooking* won the Gourmand World Cookbook award in 2004. Address: Japan.

8452. Lusso, Jack N.; Shahidi, Fereidoon; Bagchi, Debasis. 2007. *Anti-angiogenic functional and medicinal foods*. Boca Raton, Florida: CRC Press. 715 p. See p. 131. Illust. 24 cm. [30+ ref]*

• **Summary:** Section 6.2.2 “Fermented soy foods (Doenjang, chonggukjang, and ganjang)” has the following contents: 1. General characteristics of doenjang, chonggukjang, and ganjang. 2. Health promoting effects of doenjang, chonggukjang, and ganjang.

Doenjang is Korean soy paste [somewhat like Korean miso]; it is made from meju (a fermented mass of cooked soybeans [soybean koji]) and takes several months to

ferment. In traditional meju the main microorganisms are *Aspergillus oryzae*, *Aspergillus sojae* and *Bacillus subtilis*. “In the past, doenjang was obtained by separating the soy sauce (ganjang) after fermentation of meju in brine for several months. However, commercial doenjang is now produced as a sole product without separation of ganjang, and other cereals are often added to soybeans as a substrate [as is also the case for Japanese miso]. Modern meju is prepared on an industrial scale by inoculating” the substrate with *Aspergillus oryzae* “and *Bacillus* rather than depending on natural contaminant flora.”

Chonggukjang is another type of fermented soybean paste; in Korea it is typically consumed as the basis of a soup and takes only a few days to ferment. The fermented soybeans are typically mixed with salt, garlic, ginger, and red chili pepper before being used as a soup base. Chonggukjang was first mentioned in the *Sanlim Gyongje*, by Hong Man-Sun, an agricultural encyclopedia published in 1715. Note: It could be called Korean natto.

Ganjang is Korean soy sauce. Traditionally it was made by separation of the liquid from doenjang [From Google Books Preview].

8453. Oliveira, Karla. 2007. *Tassajara cookbook: lunches, picnics & appetizers*. Layton, Utah: Gibbs Smith. 224 p. Illust. (color). Index. 26 cm. [1 ref]

• **Summary:** From the Tassajara Zen Mountain Center, a beautiful Buddhist monastery north of the Carmel Valley, in California’s Ventana Wilderness of Los Padres National Forest in the Santa Lucia Mountains. Full-page color photos accompany many recipes. On page 15 is a color photo of the lovely Tassajara kitchen building with natural stone walls 18 inches thick and entire trees for rafters.

Soy related recipes: Artichoke Walnut Spread (with ½ cup firm silken tofu, or ricotta cheese, p. 25). Creamy tempeh [spread] with garlic and dill (p. 62). Tempeh spread with capers and onions (p. 66). Western-style shira-ae (with 6 ounces soft tofu, mashed, p. 65). Creamy tofu dip (p. 66). Pâté tempeh (p. 76).

One chapter is titled “Tofu, tempeh & egg salad sandwich fillings” (p. 85-95): Herb-crusted tofu. Happy tuna salad (with tempeh). Eggless egg salad (with tofu). No egg salad (with tofu). Tofu salad sandwich spread. Mexican tempeh salad. Tofu mayonnaise. Tempeh salad (p. 94).

Tofu “bits” in Kosho’s secret tenzo sauce (p. 95). Miso sauce (p. 109).

Another chapter is “Marinades for tofu, tempeh & vegetables” (p. 117-26; speaks of a “block” of tofu): Orange balsamic marinated tofu. The Tassajara marinated tofu. Tofu teriyaki. Tofu marinated with parsley and olive oil. Honey-mustard tofu. Hoisin marinade (with soy sauce).

Edamame salad (p. 132). Cabbage salad with miso “floating cloud” dressing (p. 140). Japanese marinated salad with diced tofu (p. 141).

In the Index is a long entry for “Vegan cookies” and another for “Vegan spreads.” Address: M.S., R.D., Nutritionist and professional chef, San Francisco Bay Area.

8454. Reinfeld, Mark; Rinaldi, Bo. 2007. *Vegan fusion world cuisine: extraordinary recipes & timeless wisdom from the celebrated Blossoming Lotus restaurants*. New York, NY: Beaufort Books. 243 p. Foreword by Dr. Jane Goodall. Illust. (color photos). Index. 26 cm.

• **Summary:** A beautiful, inspirational book. Chapter 8 is titled “Tempeh, tofu & seitan” (p. 114-33). The index contains 28 entries for tofu, 13 for tempeh, 4 for seitan, 3 for soymilk, and 2 for miso.

Includes a resource guide, a good glossary with entries for miso, nama shoyu, seitan, shoyu, soy milk, tamari, tempeh, textured vegetable protein, and tofu.

Note: Unfortunately the quotation near the beginning, supposedly by Albert Einstein, is a mish-mash by various wise writers including Albert Schweitzer. Address: 1. Founding chef, Blossoming Lotus Restaurant (Kaua’i, Hawaii), and author; 2. Author and teacher. Both: Kaua’i, Hawaii.

• **Summary:** Contents: Editor’s introduction (by Ken Roseboro, publisher and editor). Suppliers of non-GMO products: United States, Canada, Europe, Africa / Middle East, Asia / Australia, Latin / South America. The Non-GMO Project special section (The Non-GMO Project rises to forefront of natural food industry, Verification aims to protect natural and organic foods from GMOs, assure consumers, The Non-GMO Project facts, Michael Funk [President and CEO of United Natural Foods, Inc., UNFI]: “Time has come” for The Non-GMO Project, Company profile: Straus Family Creamery becomes first company to be verified through Non-GMO Project). Related products, services, and organizations. Indexes: Index of non-GMO suppliers by product category: Seeds, grains and oilseeds (incl. soybeans {identity preserved, specialty, food- and feed-grade}, soybeans–organic), canola / rapeseed products, corn products, soy products (phytosterols, soy flakes, soy flour, soy germ concentrate, soy grits, soy lecithin {including organic}, soy meal {including organic}, soy nuts, soy oil {including organic}, soy oil–low linolenic, soy protein, isolates and concentrates, soy protein–textured, soymilk, soymilk powder, soy sauce, vitamin E / tocopherols), other ingredients and processing aids (citric acid, dairy ingredients, enzymes, flavors, food colors, organic sweeteners, etc.), food products, animal feed. Index of related products, services and organizations. Index of related products, services, and

organizations. Comprehensive index. Order form for *The Organic & Non-GMO Report*.

This comprehensive book gives the single best picture of the growing industry, worldwide, opposed to genetic engineering of foods and feeds. Address: Editor / Publisher. Phone: 1-800-854-0586.

8456. Cook, Anne. 2008. Digging for a story: Urbana author got interested in crop during explorations of Illinois rural life. *News-Gazette (Champaign, Illinois)*. Feb. 3. p. E-3. [1 ref]

• **Summary:** Raymond Bial has written a new 40-page full color children’s book titled “The Super Soybean.” An Urbana, Illinois, author, he has written more than 100 books, most of them for younger audiences. The publisher’s website states that the book is for age levels 8-11, grades 3-6. He also shot most of the photos for the book. In China and Japan, soybeans were known as “yellow jewels.”

“Curiously, according to Bial’s research, a man named Samuel Bowen brought [soy] beans from China via London to Savannah, Georgia, in about 1765. Even more curiously he grew them on his plantation to make soy sauce and vermicelli to export to England.”

George Washing Carver is presented as an important figure in the history of the soybean. A photo shows Bial smiling, holding up the cover of his book. Address: Staff writer.

8457. Lee, Jennifer 8. 2008. *The fortune cookie chronicles: Adventures in the world of Chinese food*. New York, NY: Twelve (Hachette Book Group USA). x + 307 p. 24 cm. [75+ endnotes]

• **Summary:** Contents: Prologue. 1. American-born Chinese. 2. The menu wars. 3. A cookie wrapped in mystery inside an enigma. 4. The biggest culinary joke played by one culture on another. 5. The long march of General Tso. 6. The bean sprout people are in the same boat we are. 7. Why chow mein is the chosen food of the chosen people, or, The kosher duck scandal of 1989. 8. The Golden Venture: restaurant workers to go. 9. Take-out takeaways. 10. The oldest surviving fortune cookies in the world? 11. The mystery of the missing Chinese deliveryman. 12. The soy sauce trade dispute. 13. Waizhou, U.S.A. 14. The greatest Chinese restaurant in the world. 15. American stir-fry. 16. Tsujiura Senbei. 17. Open-source Chinese restaurants. 18. So what did Confucius really say?

The basic history: Fortune cookies were invented in Japan by the 1870s (they were called *Tsujira senbei*), then brought to California by Japanese immigrants. Before World War II they were called *senbei* and the fortunes were usually written in Japanese. Makoto Fujiwara served these *senbei* in 1894 in San Francisco at the Japanese Tea Garden (of which he was superintendent); it was built as part of the World’s Fair, the Midwinter International Exposition. In San

San Francisco, there was a 9-foot fortune cookie manufacturing machine in the basement of Benkyodo, a Japanese sweets and food store still in operation.

Starting in early 1942, and during World War II, when basically all 110,000 West Coast Japanese were sent to internment camps, Chinese living in America took over the business of manufacturing fortune cookies (in Los Angeles and San Francisco)—in part because Chinese restaurants needed them. “By the 1940s English-language fortune cookies were already commonplace in Chinese restaurants in San Francisco and southern California. Historically, Chinese have never baked and are not known in the West for their desserts—which use little sugar and fat, but plenty of red [azuki] beans, lotus, peanuts, sesame seeds, soybeans and almonds. The Chinese built automated factories and when the Japanese were freed from the camps after the war, they were unable to get back into the industry. Today, the major fortune cookie manufacturing companies in the USA are owned and run by Chinese Americans.

Chapter 12 is about a company named Kari-Out, located in the quasi-industrial town of Totowa, New Jersey. Kari-Out—which was founded in the late 1960s by Howard Epstein, a Bronx-born businessman with a “passion for what he called ‘small-unit packaging’”—makes the millions of tiny transparent packets of brown-black liquid that are distributed every year for free in Asian take-out meals and products (like ramen noodles). It is called “soy sauce” but its main ingredients are water, hydrolyzed vegetable protein, caramel coloring, and corn syrup. So, where’s the soy? Asian manufacturers of traditional fermented soy sauce, in which soybeans are one of the main ingredients, have begun a global campaign to prevent products like that made by Kari-Out from being classified as “soy sauce.” Through the government of Japan, they have submitted a proposal to the Codex Alimentarius Commission, the “forum for international food-definition battles.” The Asian makers of soy sauce wanted to have soy sauce classified into four types: long-term brewed, short-term brewed, nonbrewed, and mixed. But the debate has heated up because La Choy, founded in America, also makes this same kind of HVP soy sauce. Suddenly the International Hydrolyzed Protein Council and the USDA were defending La Choy’s HVP soy sauce. In the end, the Americans wrestled the definition of “soy sauce” away from the Asian makers. In 2005 the Japanese government quietly withdrew its proposal.

Note 1. From the publisher’s description of this book: “If you think McDonald’s is the most ubiquitous restaurant experience in America, consider that there are more Chinese restaurants in America than McDonalds, Burger Kings, and Wendy’s combined. New York Times reporter and Chinese-American (or American-born Chinese). In her search, Jennifer 8. Lee traces the history of Chinese-American experience through the lens of the food. In a compelling blend of sociology and history, Jenny Lee exposes the

indentured servitude Chinese restaurants expect from illegal immigrant chefs, investigates the relationship between Jews and Chinese food, and weaves a personal narrative about her own relationship with Chinese food. The Fortune Cookie Chronicles speaks to the immigrant experience as a whole, and the way it has shaped our country.”

Note 2. The author was born in 1976. “Jennifer 8. Lee, the daughter of Chinese immigrants and a fluent speaker of Mandarin Chinese herself, grew up eating her mother’s authentic Chinese food in her family’s New York City kitchen before graduating from Harvard in 1999 with a degree in Applied Mathematics and economics and studying at Beijing University. At the age of 24, she was hired by the New York Times, where she is a metro reporter and has written a variety of stories on culture, poverty, and technology.” A color photo on the rear dusk jacket shows Jennifer 8. Lee. Address: Harlem, Manhattan, New York City, New York.

8458. Liu, KeShun. 2008. Food use of whole soybeans. In: Lawrence A. Johnson et al. eds. 2008. Soybeans: Chemistry, Production, Processing, and Utilization. Urbana, Illinois: AOCS Press. viii + 842 p. See p. 441-481. Chap. 14. [85 ref]

• **Summary:** Contents: Introduction. Non-fermented soyfoods: Soymilk (traditional soymilk, modern soymilk {techniques to reduce beany flavors, formulation and fortification, homogenization, thermal processing, and packaging}), tofu (preparation methods, factors involved in tofu-making {soybean varieties, storage and pretreatment, solids concentration, heating, type of coagulants, coagulant concentration, coagulation temperature, coagulation time, process automation, packaging}), varieties of tofu {silken tofu, regular and firm tofus, varieties of tofu products}), green vegetable soybeans, soybean sprouts, yuba, okara, roasted or cooked soybeans. Fermented soyfoods: Terms (Koji {fermentation, koji starter, inoculum}), fermented soy paste (preparation method {preparing rice koji, treating soybeans, mixing and mashing, fermenting, pasteurizing and packaging}), processing principles), soy sauce (preparation method {treating raw materials, koji making, brine fermentation, pressing, refining}), processing principles, chemical soy sauce), Japanese natto (preparation method, processing principles), Indonesia tempeh (processing method, processing principles), fermented soymilk, fermented tofu (preparation method, processing principles), fermented black soybeans (Chinese douchi, Japanese hamanatto). Conclusion.

Figures show: (1) Flowchart of a traditional Chinese method for making soymilk and tofu. (2) Photo of savory tofu dices. (3) Photo of soy sprouts. (4) Photo of yuba (soymilk film). (5) Photo of Chinese jiang and Japanese white and red miso. (6) Flow chart of a common method for making Japanese rice miso. (7) Photo of Japanese natto. (8) Flow chart of a traditional Indonesian method for making

tempeh. (9) Photo of Chinese douchi (fermented black soybeans or fermented whole soybeans). Address: Research Chemist, U.S. Dep. of Agriculture, Agricultural Research Service, Grain Chemistry and Utilization Lab., Aberdeen, Idaho 83210.

8459. Takesuye, Betty Tadano. 2008. Re: John Tadano, Joe Tadano, and the family shoyu factory in Glendale, Arizona. Letter (e-mail) to William Shurtleff at Soyinfo Center, July 15. 1 p.

• **Summary:** It was Betty's uncle John Tadano, not Joe Tadano, who was the brother in charge of the shoyu factory. The other brothers also were involved in one way or another.

"Takeshi Tadano was born in Wakuya, Miyagi-ken, Japan, on May 7, 1876.

"I have a couple of photos of John which I can copy and send you. I do not have a copy of the building while it was housing the shoyu factory. The building is still in existence in Glendale. Do you want a photo of it as it stands today? I can take one—there are other buildings in the area that have been erected since the factory was used in the 1940s so it won't have the same appearance as before."

John and Mary have two daughters, one here in Arizona and the other in Utah. Both were born in the late 1940's. They might have photos you would be interested in, although they would not have any memories of the factory. It is possible that they could relate anecdotes told them by John. Address: 807 N. 73 Place, Scottsdale, AZ 85257.

8460. Peters, Barbara Y. 2008. Recollections of her father, John T. Tadano, founder of Showa Shoyu Brewing Co. in Glendale, Arizona (Interview). *SoyaScan Notes*. July 21. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** John T. Tadano was Barbara's father; her mother was Mariko ("Mary") Taguchi Tadano. In the large 1948 photo ad of the shoyu factory from the *Chicago Japanese American Year Book*, only the front building (facing Glendale Ave.) is the shoyu factory. The larger, taller building behind it was a soda pop factory.

Takeshi Tadano, John Tadano's father and Barbara's grandfather, was the real founder of the shoyu company; he had the recipe for making shoyu and he knew the process. On the day the Japanese bombed Pearl Harbor, Takeshi and his wife were living in the home of John Tadano and his family. The next day he was arrested as a prisoner of war and taken away; the family was not told where he was taken. John (his son), like the rest of Takeshi's other sons, tried to locate Takeshi, so he looked for Takeshi along his delivery route as he went southward. In El Paso, John almost got lynched because he was Japanese. John finally found his father, Takeshi, at the World War II internment camp in Crystal City, Texas.

Before coming to the USA, Takeshi had served as a messenger for the Emperor of Japan (Hirohito), delivering

messages to various persons in Japan.

The verb "ki-Bei suru" means "to return to America." Barbara understands it to refer to a person who is sent from the USA to Japan, to be educated in Japan. The eldest son in a family is often educated in this way, but in this family it was Frank Tadano [sic, George Yoneo Tadano] who was sent. The eldest son, Takeshi, who married Michiko, was not sent.

Takeshi had been a target for the U.S. government for two main reasons: (1) He had been a messenger for the Emperor of Japan; (2) He had sent one of his children back to Japan to be educated.

Frank (the ki-Bei) was later imprisoned with Takeshi—and his wife and family decided to go with him, even though they didn't have to. Takeshi had guards with drawn bayonets surrounding him; they still hate Japanese there. Before the end of World War II, Takeshi (Barbara's grandfather) developed heart problems so he was released from the camp in Crystal City, Texas.

The Tadashi sons are from two different mothers, but the same father. This split lineage is essential to understanding the history of this family and of the shoyu factory. John Tadano was a born entrepreneur. His family (wife and children) was the only family that did not live on Takeshi's ranch; all of the other brothers, with their wives and families, lived on the ranch. One reason John did not live on the ranch was because of his wife, Mariko, who grew up in Colorado. Her father was not in agriculture; he owned his own Japanese store in Rocky Ford, Colorado. John hated agriculture; he didn't want any of his children to work in the fields—even though they did so from time to time—to help out. Joe Tadano, who was the youngest son, moved off the ranch later in his life. Barbara thinks Joe had nothing to do with the shoyu business. None of the employees except Ben Yubuto were Tadano family members or relatives. Barbara was a toddler (age 2-4) at the time the shoyu plant was in operation; she went there many times but has only vague memories of the fermenting room, the corn syrup (or molasses) room, the rooms full of big vats, the distillery (with glass tubing and glass bottles) in her father's office, etc. Japanese kids work, and she did real work at the plant. John was very bright [intelligent]; he did some amazing things.

Some artifacts from the shoyu plant still exist. Barbara is quite sure she can locate both full and empty bottles of John's shoyu; Michiko used to have a whole case of them. "It doesn't taste like anything that's currently on the market. It was much thicker, much denser—more like the tamari that's sold at health food stores. It tended to get better with age, and something would settle to the bottom."

John did not have to go to an internment camp. In fact, he ran the commissaries at the two internment camps in Arizona: Poston and Gila River War Relocation Centers. He would deliver Japanese food. He was a produce broker (including for the ranch) and later a food broker for Japan

Foods. He also delivered rice; that is how he met his wife to be in Colorado.

After World War II, John Tadano's shoyu factory was shut down. Either General Foods or Best Foods [or perhaps Beatrice Foods, which in 1943 purchased Oriental Show-You Co., which made fermented shoyu] tried to buy it, but Takeshi did not want to sell the recipes. John also had a thriving business with a grocery store that was very famous.

There has long been a problem with money in the family. When Takeshi died, he left no will; so all of the land wealth went to the first born (Tadashi); the other children got nothing. John had his own business, so he didn't really care about it, but the other brothers who lived on the farm got nothing.

Betty Takesuye is Barbara's cousin; Michiko was Barbara's aunt. Michiko had the best memory. Ben Yubuto is still alive and he ran the factory when John Tadano was away; but John and his father (Takeshi) were the only people who knew the actual process. Takeshi didn't trust his other sons with the process; that was a sore spot. Barbara is not sure who founded the company; it was Takeshi's recipe (he made soy sauce in Japan before he came to the USA), but John may have raised the money. Takeshi was the banker for the Japanese community in Phoenix.

John Tadano died about 13 years ago (i.e., about 1995); Barbara knew him as one adult to another. Some books have been written in which John Tadano is mentioned. John's wife was not much involved in her father's business. Barbara worked for her father from the age of 2 until he died; she graduated from Harvard University in about 1971. At one point she was going to write a cookbook, so she collected many cookbooks. Ben Tadano (Betty's brother) is another person who knew John Tadano well; he worked a bit in the shoyu factory. Joe Tadano and all of his brothers died by age 67. Joe was something of a womanizer. Address: Signature Real Estate Group, 1776 Park Ave., Suite 209, P.O. Box 681777, Park City, Utah 84068.

8461. Takesuye, Betty Tadano. 2008. Re: John Tadano the Tadano family shoyu factory in Glendale, Arizona. Letter (e-mail) to William Shurtleff at Soyinfo Center, July 21. 1 p.
• Summary: "Kibei refers to Japanese who were born in the U.S. but were raised / educated in Japan before returning to the U.S. Frank was not a Kibei but the younger brother George Yoneo was the Kibei in the Tadano family.

"My grandfather Takeshi Tadano went to Japan in 1939/1941 to learn the shoyu making process. He was on the last ship out of Japan back to the U.S. before war broke out. He intended to make shoyu in Arizona.

"Ben Yabuno worked for John Tadano. He has passed away. I do know the whereabouts of his daughter. I would have to ask her permission for you to contact her, however.

"I do not have any knowledge of articles or books in which uncle John is mentioned. I would be interested in

whatever you have been able to uncover.

"I know of two intact bottles of Marusho Shoyu. I have not seen either of them so I do not know the condition of the bottle or label. I think they both are the small size. I don't know if they are still full."

A color photo taken by Betty Takesuye shows the big old sugar beet building on the left and the Tadano Shoyu factory on the right. But are unoccupied red brick buildings behind a chain link fence. Address: 807 N. 73 Place, Scottsdale, AZ 85257.

8462. *SoyaScan Notes*. 2008. Xiamen (Amoy), Hokkien, and the word "ketchup" (kiô-chap) (Overview). Aug. 8. Compiled by William Shurtleff of Soyinfo Center.

• Summary: In 1541, European traders (mainly Portuguese) first visited Xiamen (also known as Amoy), which was China's main port in the nineteenth century for exporting tea. As a result, the Hokkien dialect (also known as the Amoy dialect) had a major influence on how Chinese terminology was translated into English and other European languages. For example, the words "Amoy", "tea" (tê), "ketchup" (kiô-chap), "Pekoe" (peh-hô), kowtow (khâu-thâu), and possibly Japan (Jit-pún) originated from the Hokkien.

It seems likely that the Indonesian word for soy sauce (ketjap, kecap) also originated in or around Hokkien of southeast China.

8463. Kikkoman Corporation. 2008. Annual report 2008. Year ended March 31, 2008. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 41 p. 28 cm. [Eng]

• Summary: Consolidated net sales rose 5.4% to \$4.139 billion, operating income climbed 10.2% to \$238.5 million, and net income rose 6.6% to \$114.4 million. "Sales growth was hampered, however, by lackluster performance from Kibun Food Chemifa's soy milk drinks." Note: Dollar values may have changed at different percentage rates due to changing foreign exchange rates.

Page 1 is titled "Kikkoman Group global launch of new corporate brand logo and slogan. Written in orange, it is: "kikkoman: season your life." Above and to the right of the word "kikkoman" is the old hexagonal Kikkoman logo with the Japanese character meaning "man = 10,000" inside. "Kikkoman introduced its previous corporate logo in the Japanese market in 1987. In the two decades since then, Kikkoman has steadily globalized its operations and generates half of its operating profit in markets outside Japan." The new corporate brand logo represents the Group's "determination to harness both tradition and innovation in its business activities."

A photo (p. 7) shows Yuzaburo Mogi (Chairman of the Board and CEO) and Mitsuo Someya (President and COO).

Pages 8-9 show color photos of Japanese soy sauce products including *Tokusen Marudaizu Shoyu* (Premium shoyu made from whole soybeans—rather than the usual

defatted soybean meal) and *Tokusen Yuki Shoyu* (Premium organic shoyu, certified by Japanese Agricultural Standards, JAS). Address: Noda, Japan.

• **Summary:** Contents: Introduction. The soul of Korean cuisine. The industrialization of *Chang* manufacture. Conclusion—*Chang* and Korean identity. Notes.

Photos show: (1) One of the Starbucks outlets in Korea's capital. (2) Industrially produced soybean paste and hot red pepper paste on shelves in a modern retail store. (3) A traditional home in the Hahoe Folk Village near Andong. Meju [soybean koji] is hanging under the eaves and sauce pots stand in the courtyard. Liquid soy sauce is *kanjang*. Korean miso is *toenjang* or *doenjang*. Hot red pepper miso is *koch'ujang*, which was first mentioned in the 2nd half of the 17th century.

Although foreign foods are widely consumed in Korea today, soybeans and soyfoods remain a fundamental part of the Korean diet, and appear in a wide range of forms. Whole soybeans are boiled with other beans, rice, and other cereals to make *k'ongbap* [*kongbap*]. Whole soybeans are also mashed or ground into a creamy soup called *k'ongguksu* [*kongguksu*] which is served in the summer with noodles, soymilk, and julienned cucumber. Soybean sprouts (*k'ongnamul*), long a favorite in Korea, are used as an ingredient in a variety of soups, stews, and stir-fried. Seasoned soy sprouts (*k'ongnamul much'im* [*kongnamul muchim*]), a popular dish at many Korean meals, is made with blanched soybean sprouts seasoned with green onions, garlic, salt (or sometimes soy sauce), sesame oil, and crushed sesame seeds. Several kinds of tofu (*tubu*) are used in Korean cooking; they can be fried, braised, or simmered. To make Tofu kimchi (*tubu kimch'i*), cut fresh tofu into squares and arrange with pieces of kimchi; it serves as a popular snack with alcoholic beverages. Minced or mashed tofu mixed with minced meat can be used as a filling for dumplings called *mandu* [like Japanese *manju*], which are then fried or steamed. Roasted soybeans (*pokkum k'ong*) and roasted soybean flour (*k'ongaru*) are indispensable ingredients in many traditional desserts such as *kwaja* and *ttok*. During the last two decades, soymilk has become a popular product in Korea.

Footnote 16 describes the four basic types of Korean soy sauce: *ch'ong kanjan*, *chung kanjan*, *chin kanjang*, and *chin kanjang* (written with a different ideogram than no. 3). There is also *honhap kanjang* (a mixture of Japanese soy sauce and its chemical counterpart) and *choson kanjang* (a product manufactured on the basis of traditional Korean methods) (p. 172-73). Address: 1. Leiden Univ., Netherlands, lecturer at

the Centre for Japanese and Korean Studies.

8466. Nguyen, Can Van. 2008. Tofu in Vietnamese life. Translated by Duong Thanh Nguyen. In: Christine M. Du Bois, C.-B. Tan, and S.W. Mintz, eds. 2008. Urbana, Illinois: University of Illinois Press. viii + 337 p. See p. 182-194. [7 ref]

• **Summary:** Contents: The origins of tofu in Vietnam: Oral history and direct documentary evidence, evidence for the earlier diffusion of tofu. The role of tofu in Vietnamese life. Tofu in Vietnamese cuisine. Other soybean uses. A photo shows a man making tofu in Hanoi, Vietnam.

Tofu is a popular daily food throughout Vietnam. It would be difficult to find anyone who eats rice but never eats tofu. "Most Vietnamese consider tofu a traditional, cheap, and well-liked dish."

In Vietnam, certain villages have long specialized in tofu production. "Elderly informants told us that it is a hereditary trade, handed down from generation to generation for a long time." But these elders do not know when or how this skill came to Vietnam.

In Vietnam, it is hard to find early documents that mention tofu or soybeans, for after so many decades of war, many of the old scripts and documents have been lost. For example, the *Dai Viet Su Ky Toan Thu* (*Complete Set of Dai Viet History*) is thought to be the most reliable history of Vietnam. The introductory chapter of the 1983 edition states that it was written by Le Van Huu (lived AD 1230-1322), finished in 1272, and consisted of thirty volumes. But no original is known to exist today, and some scholars doubt that there ever were 30 volumes. The original of the 1983 version was edited and printed in 1697 by historians who lived some 400 years after the original edition was first printed.

Two early Vietnamese books that mention soybeans and tofu have been found. Both are available in modern editions: (1) *Van Dai Loai Ngu*, by Le Quy Don (lived AD 1723-1783); modern edition published 1962. In his discussion of grains, he mentions soybean (*dai dau*). (2) *Nu Cong Thank Lam*, by Le Huu Trac (lived AD 1720-1791); modern edition 1971. He stated that the soybean (*dau nanh*) has a sweet and warm nature, and "is good for recovery after an injury, for the beauty of women, for bone marrow, for vitality, and as an antidote for ingested toxins. He noted the tofu contains

nourishing substances (known today as amino acids and vitamins).” He described two methods of separating liquid soymilk from the solid residue and then of curdling the soymilk to make tofu, and he gave eight vegetarian dishes made with tofu—including: Tofu soaked in soy sauce; Wine fermented tofu. Grilled vegetarian tofu chao.

Le Quy Don and Le Hu Trac are two famous 18th century Vietnamese polymaths. Since both men were born in the early 1700s, it seems quite likely that tofu existed in Vietnam during the 1600s.

However, some scholars believe that tofu arrived in Vietnam much earlier, in the 10th to 11th centuries. These scholars given four reasons for their belief—all based on circumstantial evidence.

(1) Early relations and mass migrations: China and Vietnam have had relations for more than 2,000 years. Chinese imperial envoys imparted cultural information to small groups of Vietnamese leaders. Moreover, there were many wars between China and Vietnam throughout their ancient history. The migration of thousands of people during these times also spread cultural knowledge—such as (perhaps) how to make tofu.

(2) Migrations of Chinese and Vietnamese Buddhists: Because Buddhists have traditionally been vegetarians, they have long been interested in soybeans and soyfoods. A book titled *Thien Uyen Tap Anh*, considered to have first appeared in the 13th to 14th centuries AD, states that “the Buddhist master Vo Ngon Thong (?-AD 826) came from Quang Dong (Guangdong [Canton]), China... In December 1820 he came to Kien So temple (now in Gia Lam district, Hanoi) to meditate and founded the ‘Vo Ngon Thong’ sect in Vietnam” (Vietnam Buddhist Church 1990). Elsewhere the book describes how two other Chinese Buddhist masters came to Vietnam during the periods 1054-1071 and 1091-1170. In addition, the monks who were students of these masters went to China during this period to meditate. The Vietnamese may well have learned how to make and use tofu during this time either in Vietnam or in China.

(3) Exchanges between the imperial governments of China and Vietnam: There were frequent high-level exchanges. The *Complete Set of Dai Viet History* mentions that in the year 1007 the Vietnamese emperor sent two envoys to Song dynasty China; they returned in 1009. In the year 1020 another envoy went to China and returned. These envoys may have eaten tofu while in China, and they may have asked for training in how to make it.

(4) Vietnamese folk songs and sayings: “These suggest an ancient origin for tofu in Vietnam.” The words to one song say: “If you want to enjoy tofu with traditional Chinese soy sauce, sharpen your knife and scissors, shave your head, and become a monk.” This suggests that tofu first appeared in Vietnam in Buddhist temples—during the Northern Song dynasty in China, and the Ly and Tran dynasties in Vietnam. Nevertheless, these are only theories.

Since ancient times, Vietnamese have eaten “vegetarian dishes every day, including tofu, in accord with their beliefs that vegetarian food is clean and promotes tranquility.”

In Vietnam today, various types of tofu are sold including: Firm tofu, grilled tofu, deep-fried tofu, fermented tofu, and soft tofu. It is used in four basic categories of dishes: vegetarian, nonvegetarian, vegetarian soups, and nonvegetarian soups. The two most popular dishes cooked in Vietnamese homes are: Boiled tofu with sauce (*dau phu luoc*). Tofu cooked with tomatoes and ginger (*dau phu sot ca chua*).

Other foods made from soybeans: (1) Soymilk, served sweetened with sugar. Before carbonated beverages / soft drinks became popular, during the hot summer months, soymilk was the favorite drink in Vietnam. Today some families still make soymilk at home. (2) Soy sauce (*dau tuong*). (3) Sweet silken tofu, curdled with calcium sulfate (*tao pho*). (4) Meat alternatives made from tofu. Address: National Academy of Social Sciences and Humanities, Hanoi, Vietnam, researcher at Chinese Studies Institute..

• **Summary:** Contains a recipe from the USA Rice Federation that includes “3 cups frozen edamame, thawed.”

8469. Edge, John T. 2008. Kentucky bloodlines in a new soy sauce. *New York Times*. Oct. 22. p. D3.

• **Summary:** Matt Jamie is making artisanal shoyu in Louisville, Kentucky. In 2003, while thinking about career opportunities, he realized that nobody in the USA was making “small batch soy sauce.” He buys local soybeans that are not genetically engineered, uses limestone filtered water from a nearby spring, and ages his soy sauce in old whiskey barrels, purchased from two distilleries. Its shoyu with an “impeccable Kentucky pedigree.”

In August 2008 his first batch of Bluegrass Soy Sauce hit the market—\$5 for a five-ounce bottle. A photo shows Matt Jamie holding a bottle of his soy sauce.

Note: As of March 2011 Bluegrass Soy Sauce is sold at Whole Foods. The URL is www.bourbonbarrelfoods.com. A video on the website shows Matt, his shop and his process.

8470. Huang, H.T. (Hsing-Tsung). 2008. Re: Various types

of black bean sauce and soy sauce in China. Letter (e-mail) to William Shurtleff at Soyinfo Center, Oct. 30. 2 p.

• **Summary:** William Shurtleff writes: “I have been reading quite a few Chinese cookbooks and articles about Chinese foods during the period 1960 to the present. I am confused about the meaning of several widely-used terms in Chinese cookery. In all of the following the ‘black beans’ are actually black soybeans.

A common term is “Black Bean Sauce.” This sauce is usually made in the kitchen by crushing (for example) 4 tablespoons of salty, fermented black beans with 3 tablespoons dry sherry or shao hsing wine. The two key points for me are: (1) It is not an extract like Kikkoman soy sauce; the whole salted black beans end up in the final sauce. (2) It can be made in the kitchen as part of a recipe, quickly and easily; just combine and mash. It is most widely used to add a delicious flavor to recipes for chicken, shrimps, clams, fish, etc.

Question 1. What is THIS “Black bean sauce” called in Mandarin, pinyin, and Cantonese?

“Answer 1. It seems to me this sauce is not the invention of a particular chef; it is not a commercial product.

“Then there is a canned product that is sometimes sold as “Black Bean Paste.” I have seen the Chinese names *hei chiang* (pinyin: *heijiang*) or *hei touban chiang* (pinyin: *hei douban jiang*).

“Question 2. Is this canned product basically the same as product #1, which can be made so easily in the kitchen—but in convenient canned form? Or are there some differences?

“Answer 2: This is simply *jiang* (pinyin) or *chiang* (W.-G.). *Hei chiang* is simply black chiang.

Question 3. What is the canned product called in Cantonese? Answer 3: “If I remember right, “jiang” is pronounced “jiong” in Cantonese.

“Question 4. How is *Tou chiang* (pinyin: *doujiang*) related to product No. 2? Answer 4. They are the same product.

“Then there are two extracts—like our typical “soy sauce,” where the residue is separated and either discarded or used as a low-value product. *Shizhi* (pinyin) / *Shi Chih* (W.-G.) is an ancient extract of *chih* = fermented, salted black soybeans. *Shiyou* (pinyin) / *Shih-yu* (W.-G.), *Shi-yau*, (Cantonese), or (Japanese) *Kuki-jiru* is an extract of fermented black beans.

Note: This is the earliest English-language document seen (Nov. 2011) that contains the term “Shizhi” in connection with this type of soy sauce.

“Question 5. Am I basically correct in saying that products 1 and 2 are closely related and that products 3 and 4 are also closely related but are very different from products 1 and 2.

“Answer 5. Product 1 is a chef’s concoction. 2. is a commercial product. When you extract shi with water you get *Shih Chih*. When you ferment shi further, the run-off

juice is *shiyu*.

“Question 6. Am I basically correct that product 3 is now extinct and that product 4 is no longer very widely made or used? Or is it still made in certain regions of China?

Answer 6: Check my book in the Needham series (2000, pages 365-66). Both *shiyu* and *jiangyou* are translated as soy sauce. Both are made in China. The term “shiyu” is more popular in south China. In Fujian it is preferred. In Guangdong the product is called “shiyu” but it is often made from *jiang*.

Basically, *shiyu* is “tamari” and *chiangyou* / *jiangyou* is *shoyu*. Address: PhD, Alexandria, Virginia.

8471. *Organic and Non-GMO Report (The)* (Fairfield, Iowa). 2008. Japanese company to triple non-GMO soy production in Canada: Market news. 8(9):9. Oct.

• **Summary:** In a few years, Kanematsu Corporation (Japan) plans to triple planting of non-GMO (not genetically engineered) soybeans for food use on 50,000 acres on Prince Edward Island, Canada.

Next year, PEI’s soybean production is expected to be 15,000 metric tons grown on 15,000 acres—all for shipment to Japan. PEI farmers are shifting to growing organic soybeans from potatoes, which require high pesticide use and are less profitable due to falling demand.

Japanese makers of tofu, soy sauce, and other food processors use about 1 million tons a year of non-GE soybeans from overseas in addition to domestic organic soybeans. Kanematsu provides about 10% of those non-GE imports.

8472. O’Connor, Anahad. 2008. Really?: The tongue is mapped into four areas of taste. *New York Times*. Nov. 11. p. D6.

• **Summary:** Many high school textbooks contain a map of the tongue, dividing it into four areas based on what it can taste (taste receptors). But now we know of a 5th taste—umami, a Japanese word that means “savory,” and can be detected in miso and soy sauce. We have also learned that receptors for different tastes are not confined to certain parts of the tongue. Address: New York Times.

8473. **Product Name:** [Lima tamari soy sauce].

Manufacturer’s Name: Lima Foods

Manufacturer’s Address: Maldegem, Belgium.

Date of Introduction: 2008. November.

How Stored: Shelf stable.

New Product–Documentation: Tamari bottle neckhanger sent by Sjon Welter from the Netherlands. 2008. Nov. 15. The full-color neckhanger, written in French, Dutch, and German, has 4 panels on both the front and back. On the back side are recipes only. On the front panel: New. 25% less salt. Tamari soy sauce. www.limafood.com. Note: It is not clear from this: (1) Whether this tamari is made in Europe

or imported—it is probably imported. (2) The name of the manufacturer. Lima is owned by the Hain-Celestial Group. The website states: Today, Lima has 49 employees, sales of 17 million euros, mainly from the European market, sells a range of 200 products, and makes 155 million rice cakes a year.

8474. Bennett, Beverly Lynn; Sammartano, Ray. 2008. *The complete idiot's guide to vegan cooking*. New York, NY: Alpha Books. Published by the Penguin Group. xix + 328 p. Illust. Index. 23 x 19 cm.

• **Summary:** Dedicated: “To those who are guided by the open heart and open mind of compassion.”

Being vegan is “not about being on some trendy new diet; it is a lifestyle” (p. 85).

The index contains 48 entries for tofu, 37 for tamari, 30 for soymilk, 8 for tempeh, 6 for TVP, 4 each for miso, soy yogurt, tofu cream cheese, and seitan, 2 for silken tofu and Soyriso, and 1 each for edamame, soynut butter, and Soyatop (natural nondairy whipped topping).

“There are so many reasons to go vegan—health and nutrition, weight loss, green and sustainable living, and prevention of cruelty to animals. With over 200 mouth-watering recipes and tips for converting meat- and dairy-based dishes into vegan ones, *The Complete Idiot's Guide to Vegan Cooking* will help readers enjoy a healthy vegan diet without sacrificing taste” (publisher's description). Address: 1. Vegan chef, author, and host of veganchef.com since 1999; 2. Long-time vegan cook and “foodie”.

8475. Chiang, Cecilia; Weiss, Lisa. 2008. *Seventh daughter: My culinary journey from Beijing to San Francisco*. Berkeley, California: Ten Speed Press. x + 246 p. Foreword by Alice Waters. Introduction by Lisa Weiss. Illust. (mostly color photos). Index. 24 x 20 cm. [1 ref]

• **Summary:** Cecilia (Sun Yun) was born on 18 September 1920 in Wuxi, near Shanghai, China—when her mother was age 38 and 17 years after the birth of her oldest sister. Cecilia was the 7th daughter in a family of ten children. In China, everyone considers themselves a year older on New Year's day. Her mother, Sun Shueh Yun Hui, gave birth to twelve children—nine girls and three boys—over the course of 24 years, but two did not survive. Her father, Sun Long Guang (“unofficial” or familiar name Yung Xiao), born in 1878, was a gentle, progressive, scholarly man who had been schooled in France in the early 20th century, after the overthrow of the Qing Dynasty in 1911. Like many intellectuals in his generation, he worked to bring Western liberal ideas and modernization to China. He retired from his engineering job with the railway at age 50 so he could tend the gardens he loved, listen to music, and read. He was unusual in having no concubines, and all in his family were proud of him for that.

Her mother (whom she called “Um-ma”) had tiny,

four-inch-long bound feet, which were very painful to her. Between ages 5 and 7, when her foot bones were still fairly soft and malleable, they were broken. “The toes were folded down under the ball of the foot and the arch folded in half, then the whole foot was wrapped tightly in gauze bandages so that it would essentially stop growing. The smaller the foot, the more desirable the woman, and thus the more marriageable she would be. It was an unbelievably lengthy and painful process, and often girls died from the resulting infection” (p. 49). Cecilia's father absolutely forbade the binding of his daughters' feet. So they grew up being able to run, dance, play tennis and ice skate. Cecilia rode her bicycle daily to the Fu-Jen Catholic University. Cecilia's mother tottered around the family home, overseeing the servants, nannies, and cooks. By the late 1930s in China, “in all but the most rural areas, the custom of foot binding became a thing of the past” (p. 50).

When Cecilia was age 4, the whole family moved from Wuxi to Beijing, the capital of China. In those days it was very unusual for a family to move such a long distance, from one province to another. However, her parents were “drawn to the capital because of its intellectual and cultural offerings.” They moved into a huge walled compound with enormous red gates. It was “an actual palace that took up an entire city block and had been built in the 16th century for a minister to one of the last emperors of the Ming dynasty. It had 52 rooms and six bathrooms in seven parallel buildings” (p. 50). The dining room was the most important room in their home that was where their family life took place. Her “mother was so short, she needed to stand on a stool to see into the pots on the stove.” Yet she ran the kitchen with absolute authority. “Like all upper-class Chinese women of her time, she did not actually cook.” “She instructed her chefs as to how she wanted things done.” This included “making her own soy sauce, a few bottles of which contained shrimp roe—though those are the ones she brought out only for special occasions” (p. 51). Her mother was a perfectionist.

They were served breakfast, typically rice congee—a kind of rice porridge—with assorted condiments including sausage, dried fish, thousand-year eggs, vegetables pickled in jiang, and fermented bean curd [stinky tofu; *chou doufu*].

In 1937 the Japanese finally arrived at Beijing; the city had been bracing for their arrival since 1931 when they had invaded Manchuria. Almost overnight, food (including soy sauce and fresh *dofu* / *tofu*) became scarce and life became difficult. In 1940 the Japanese moved in and occupied their home, but let them stay in a small part of the building. Soon Cecilia and Teresa (sister #5, Qin) began to think about leaving Beijing for Chongqing (W.-G. Chungking, in Sichuan province), where Chiang Kai-shek had moved the nationalist government headquarters after the fall of Nanjing, his previous capital. In Jan. 1942 they fled in disguise for Free China, calling their adventure “The Long Walk.” After

many amazing adventures, they arrived in Chongqing in June 1942. Soon she was seriously dating two men. She decided to marry the businessman, Chiang Liang. They were married in May 1945 in Chongqing. China was still divided by war. In China, the groom's family pays for the wedding. A few days after the Japanese surrender to the Allies on 15 Aug. 1945, her husband announced that he wanted them to move to Shanghai, so they took the scenic 1,500 mile trip down the Yangtze from Chongqing to Shanghai; it took them 2 weeks.

1946 June—Their first child, a daughter named May, was born in Shanghai. At about this time, Chiang Kai-Shek moved the Nationalist capital back to Nanjing, which is close to Shanghai. The civil war with the Communists resumed.

1949 Jan.—Communist forces capture Beijing.

1949 May 25—Communist forces capture Shanghai, shortly after Cecilia, her husband, and the eldest of their two children have flown to Tokyo (April 29), where they stayed at the Chinese Mission. But Cecilia was soon homesick for Chinese food.

1951 fall—She (with a small group of Chinese friends) opens a large (400-seat) Chinese restaurant in Tokyo named The Forbidden City; it was a huge success from the very beginning.

1960—Cecilia moves to San Francisco from Tokyo and opens The Mandarin (for details see Chapter 1). 1961—Her husband comes to check out her restaurant, then dismisses The Mandarin as insignificant; he had expected something much grander. She realized right then their marriage was over.

1962—Her two children, Philip and May, come to live with her in San Francisco. The restaurant prospers and grows.

1968—She moves The Mandarin to larger quarters at Ghirardelli Square; to do so she takes out a \$750,000 personal loan. It opens in June 1968 with “special little round cruets for soy sauce that looked like perfume bottles” (p. 22).

1974—Cecilia open The Mandarin in Beverly Hills.

1975 July—Cecilia travels to Beijing to visit her ailing father; it is their last visit.

Cecilia's Pantry (p. 5-7); soy-related items. “Bean sauce—Made from ground, salted, and fermented yellow soybeans mixed with seasonings.” “Black bean sauce: A prepared sauce sold in a jar and made from salted black [soy] beans mixed with soy [sauce], salt, sugar,...” “Hoisin sauce—This thick, sweet-spicy sauce, made from ground soybeans mixed with sugar, flour, and vinegar,...” Soy sauce: Cecilia likes the Lee Kum Kee brand, but also uses Pearl River Bridge mushroom soy sauce. “which has a nice, rich, earthy flavor.” Tofu—Also called dofu or bean curd. Of the various kinds, pressed tofu is often called “seasoned.” If you are unable to buy seasoned tofu [also called five-spice pressed tofu, *wu-xiang doufu-gan*], it's easy to make your own at home; a recipe is given (p. 7).

Soy-related recipes: Hot and sour soup (with firm tofu,

suan la tang, p. 43). Tofu and spinach soup (*bo cai dou fu tang*, p. 58-59). Mapo dofu (p. 142). California congee with condiments (inc. fermented tofu; *xi fan he xiao cai*, p. 160-61). Clams in black bean sauce (*dou chi chao xian*, p. 210-11). Shrimp with edamame (*mao dou chao xia ren*, p. 235). Spinach with bean curd (*bo cai ban dou fu*, p. 237).

8476. Chung, Taekyung; Samuels, Debra. 2008. The Korean table: from barbecue to bibimbap. 100 easy-to-prepare recipes. North Clarendon, Vermont: Tuttle Publishing. 159 p. Illust. (color photos by Heath Robbins). Index. 27 x 24 cm. [4 ref]

• **Summary:** A stylish book is printed in Singapore entirely on glossy paper with many large color photos. The section titled “The ingredients: Stocking your Korean pantry.” includes information about: Miso (Korean miso is *doenjang*). Seaweed (*Miyeok*). Sesame paste (*Chamkkae anggeum*). Sesame seeds (*Chamkkae anggeum*). Soy sauce (*Ganjang*). Soybean sprouts and mung bean sprouts (*Kongnamul and Sookjoo namul*). Tofu (*Dubu or tubu*).

In Chapter 1, “Starters and snacks,” we find Sweet and salty glazed soybeans (with edamame) (*Kong jorim*) (p. 45).

Chapter 6 (p. 121-29) titled “Vegetables & tofu,” includes: Braised tofu (*Dubu jorim*). Pan-fried tofu with mushrooms (*Dubu jeon*). Vegetable and miso porridge (*Kongnamul sigeumchi doenjang jook*). Another tofu recipe is a dessert: Crusty tofu sherbet (with soymilk) (*Yooja dubu sherbet*).

Many recipes call for soy-based sauces such as: Soy dipping sauce (*Cho ganjang*) (p. 30). Sweet soy sauce base

(*Jomi Ganjang*) (p. 31) The main ingredient is soy sauce, to which is added water, garlic, sliced fresh gingerroot, crushed black peppercorns, light brown sugar, and wine. Soy scallion dipping sauce (*Yangnyum ganjang*) (p. 32). Spicy miso dip (*Ssam jang*) (p. 33).

8477. Fiore, Toni. 2008. *Totally vegetarian: easy, fast, comforting food for every kind of vegetarian*. Philadelphia, Pennsylvania: Da Capo / Life Long. xi + 273 p. + 16 pages of unnumbered plates. Illust. (some color). Index. 24 cm.

• **Summary:** A mostly vegan cookbook; each recipe that calls for milk as an ingredient gives soy milk as an alternative. Rarely, if ever, have we seen such a dazzling and delicious variety of vegetarian soy recipes and information in one book. One purpose of this book is to demystify the world of vegetarian cookery and vegetarianism—especially for non-vegetarians.

The Introduction tells the story of the author's gradual transition from typical meat eater (living in Europe), to animal rights activist in Maine, to vegetarian. She advises: Buy locally, eat seasonally, buy organic, use your intuition (and imagination).

The chapter "Stocking the pantry" contains basic information (p. 39-42, 45-46) about sea vegetables, seitan, and soy products, including edamame, miso, tempeh, textured vegetable protein (TVP), tofu, and soy sauce (Light Chinese soy sauce, shoyu, and tamari), and Worcestershire sauce (vegetarian; without anchovies)

Soy related: Golden tofu bites (with one 14-ounce package firm tofu, frozen, then thawed... p. 50). Red pepper tofu dip (p. 67). Vegetarian Caesar salad (with "silken soft tofu, p. 76). Edamame and apple salad (p. 81; kids love edamame). Boiled edamame pods. Curried lima bean and rice salad with tempeh (p. 92). Tofu lime dressing (with silken tofu, p. 102). Spinach and tofu soup (p. 108). Miso soup. Hot and sour soup (with firm tofu, p. 109). Roasted pumpkin bisque (with soy milk, p. 114). Corn bread (with soy milk, p. 130).

One chapter is titled "Tofu" (p. 145-53): Seared tofu. Tofu sour cream. Baked tofu meatballs. Tofu with parsley sauce. Tofu kebabs with tamari-ginger sauce. Tofu pot pie.

The next chapter is "Tempeh and seitan" (p. 155-69): Best braised tempeh (with sweet and spicy marinade, p. 197). Tamari tempeh. Barbequed tempeh. Jamaican jerk tempeh. Malaysian curried tempeh. Greek stuffed cabbage (with lemon cream sauce and tempeh). Tempeh and cabbage. Moroccan stew. Tempeh cacciatore. Tempeh fajitas. Tempeh marsala. Homemade seitan (from bulk vital wheat gluten). Penne with onions and vegetarian bacon (p. 175). Spaghetti tofunese (p. 176). Tofu ravioli with butter and sage (p. 181-82). Bechamel (with soy milk, p. 184). Tofu lasagna (p. 185-86). Vegetable lasagna (with tofu filling, p. 187). No-egg salad sandwiches (with tofu). Mock fish salad sandwiches (with tempeh). Mock Maryland crab cakes (with tofu, p.

196). Tempeh club sandwiches (p. 197). Cornhusker's reubens (with tempeh, p. 198). New York hot dogs and onions (with vegetarian hot dogs, p. 199). Soysage-pepper sandwiches (with Italian-style vegetarian sausage links, p. 200). Eggplant meatballs (with tofu, p. 214). Stuffed sugar pumpkins (with tempeh, p. 215). Fluffy mashed potatoes (with soy milk, p. 219). Spinach tortillas with potatoes (and seitan, p. 228). Pfannkuchen (with soy milk, p. 239). Rye bread French toast (with soy milk, p. 240). Loaded bagel (with tofu cream cheese, p. 243). Tofu cannoli (p. 250). Tofu coconut cream pie (p. 251). Basmati rice pudding (with soy milk, p. 252). Banana chocolate chip cake (with soy milk, p. 256).

About the author: "A vegetarian for over 20 years, Fiore is a self-taught chef who first embraced Mediterranean culinary techniques and philosophy while growing up in Italy." But she spent the first six years of her life in Germany. Address: Portland, Maine. Host of the national public television show *Delicious TV's Totally Vegetarian*.

8478. Pettid, Michael J. 2008. *Korean cuisine: An illustrated history*. London: Reaktion Books. 223 p. Illust. (color). Maps. Index. 23 cm. [118 + 110 endnotes]

• **Summary:** This is the best book seen to date on this subject. "Korean words are transliterated into English using the McCune-Reischauer system and Chinese words by the Pinyin system." The book uses Korean words liberally, which we find very helpful. The many color photos on glossy paper also help to clarify the text. Contents: Daily foods. Ritual and seasonal foods. Regional specialties. Drinks. Foods of the royal palace. The kitchen space and utensils. Food in contemporary Korea.

Page 36: Rice mixed with beans (*k'ong pap*) was another way to stretch the rice supply; today it is common in many homes and restaurants. Black [soy] beans were generally used to make this dish. They were soaked overnight before being cooked with the rice. However, on the Harvest Festival (*Ch'usok*), the 15th day of the 8th lunar month, beans that are not quite fully ripened are added to the rice and cooked as is—to make the special holiday dish named *ch'ongdae k'ong pap*.

Pages 38-39, 101: The popular rice dish, Pipim pap [Bibim pap], probably developed from foods eaten by farmers when cooked rice (or other grains) was mixed with whatever vegetables were at hand. Nowadays, soybean sprouts (*k'ong namul*) are an essential ingredient.

Page 107, 109: In Pyongyang Province of today's North Korea, one of the most famous foods is *mandu* dumplings; in this area they are stuffed with beef, pork, kimch'i, [soy] bean sprouts, and the like.

Page 109: In Hamgyong Province, which occupies the northernmost reaches of the Korean Peninsula, the climate is harsh and the winter are long and cold. Rice is rarely grown here, but dry-field crops such as soybeans, millet and

potatoes are grown in abundance.

The foods of northern Korea tend to be less spicy than those grown in the south. “Perhaps most important to the flavour of Korean foods are the seasonings made from soybeans: *toenjang* (soybean paste) and *kanjang* (soy sauce). Sprouts from soybeans (*k’ong namul*) are eaten as a side-dish or added to soups and stews...” (p. 40).

Note: We find it interesting that in this detailed book on Korean cuisine, no mention is made of *chungkukjang* / *chongkukjang* (Korean natto). This is probably an indication that this food is no longer of much importance in Korean culture. Address: Asst. Prof of Korean, Dep. of German, Russian, and East Asian Languages, Binghamton Univ., England.

8479. Pettid, Michael J. 2008. Korean cuisine: An illustrated history. Korean-style soy sauce, miso, and red pepper sauce (Document part). London: Reaktion Books. 223 p. [118 + 110 endnotes]

• **Summary:** This is the best book seen to date on this subject. There are many records of the early Korean kingdoms using soy products; for example a record of 683 CE states Korean-style *jang* (*toenjang*) and soy sauce (*kanjang*) were among the presents exchanged in a royal wedding (p. 40, endnote 15. See: Kim Pusik, *Samguk sagi* {“History of the Three Kingdoms”} translated into modern Korean, Yi Pyongdo {Seoul, 1996}, Vol. 1, p. 201).

The section on “Condiments and seasonings” (p. 42) begins: An old Korean proverb states, “Food is only as good as the *jang*” (sauces based on soybeans).

Korean cookery has a wide range of flavors which include the stronger flavors of soybean paste stew (*toenjang tchigae*) and *kimch’i*. Moreover, even among the soy sauces (*kanjang*) and Korean-style misos (*toenchang*) there is a tremendous range of varieties and regional specialties, with many distinctive flavors.

A work titled *Chungbo sallim kyonje* (Farm management, supplemented and enlarged), written in the early 1800s points out the importance of *jang*.

“*Jang* is the source of all flavors. If the taste of a house’s *jang* is not good, even if there are good vegetables or flavorful meats, one cannot prepare good food. The household head must always keep in mind the fermentation of *jang*, and through this will be able to have well-aged and good *jang*.”

Likewise, Yi Pinghogak (1759-1824) in her *Kyuhap ch’ongso* (“Encyclopedia for Women’s Daily Life”) discusses the best days to make *jang* and also the importance of having the *changdoktae*, the terrace upon which earthenware jars of soy sauce and other *jang* are kept, face in an auspicious direction, as determined by the yearly calendar.

The three main types of *jang* are *toenjang*, *kanjang* and *koch’ujang*. The suffix *-jang* refers to a fermented sauce based on soybeans; *toenjang* means ‘thick’ soybean sauce

and *kanjang* means ‘salty’ liquid soybean sauce.

The basic ingredient used to make both these sauces is soybean koji (*meju*) which was traditionally made in the late autumn and allowed to ferment until past the lunar New Year, about 3 months in all. The blocks of *meju* were then soaked in large earthenware pots of brine to make *jang* and *toenjang*.

In Korea, there are three basic types of soy sauce (*kanjang*): (1) a strong-flavored sauce with a dark color (*chin kanjang*), (2) a medium-flavored sauce with a light-brown color (*chung kanjang*), and (3) a weak-flavored sauce with a light, clear color (*mulgun kanjang*). Type (1) requires at least five years of fermentation, and because of its sweet flavor and dark color it is used for boiling, fermenting, or as a seasoning in medicinal rice (*yak pap*). Type (2) was traditionally used as a seasoning for vegetables or stews, whereas type (3) which was fermented for 1-2 years used mainly as a seasoning for soups.

Given the importance of soy sauce in Korea, it is no surprise that recipe books of the Choson

Joseon period (1392-1910) offer dozens of variations on the basic recipe. For example, *Sallim kyongje* (“Farm management”) alone offers some 25 variations.

In each household, soy sauce was prepared with great care, and each step in the process was carefully followed according to the family tradition. If a daughter-in-law failed to match the preferred taste of the soy sauce in her husband’s household, it was seen as a bad omen for the family. Many families even made small ritual offerings to the household gods when making soy sauce in order to ensure success. Other customs such as hanging gold-colored thread, red chili peppers, or traditional socks—all believed to repel malevolent spirits—around the earthenware pots of soy sauce were done to keep away malicious spirits.

During the period 1910-1945, when Korea was a colony of Japan, Japanese-style shoyu was introduced to Korea and mass-produced in factories. However the flavor of this new soy sauce did not match the tastes of the Korean people, so despite the rationing of crops for the military, Koreans continued to make their traditional soy sauce, thereby preserving this important element of Korean food culture.

A detailed discussion of Korean-style miso (*toenjang*) is given next, followed by a shorter discussion of *koch’ujang* which is made by mixing *meju* powder, glutinous rice or regular boiled rice, and red chilli pepper powder—and then fermenting the entire mixture. Address: Asst. Prof of Korean, Dep. of German, Russian, and East Asian Languages, Binghamton Univ., England.

8480. Longone, Janice B. 2009. The remarkable life of Ilhan New after he left La Choy Food Products Co. in about 1930 (Interview). *SoyaScan Notes*. Jan. 23. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** The Korean gentleman (Ilhan New) and the American gentleman (Wally Smith) were students at the

Univ. of Michigan, where they became friends. Wally Smith's family had a grocery store, and they were looking for local fresh food. So New and Smith decided to grow mung bean sprouts. That is now La Choy started. They worked together for many years. In 1925 he married an American-born Chinese woman, who later became a physician

Then [in about 1930] Mr. New sold his share in La Choy to Smith, returned to Korea [the land of his birth] and he became a multi-millionaire. In Korea he made money in some sort of business, such a importing or engineering company. His business became very profitable and he started the New Han Engineering High School; its goal was to teach Koreans to be good in modern things like science, engineering, and business practices. Students could attend his university free of charge. "When he died—and this is the thing that grabs me—he left all of his money to the Korea Social and Educational Trust Fund, except for the money he left to his granddaughter, to get a college education."

There is a biographical dictionary of Korean leaders in which there is an entry for him. Jan will try to find a more specific reference. Address: Curator, William L. Clements Library, The Univ. of Michigan, 909 S. University Ave., Ann Arbor, MI 48109-1190. Phone: 734-764-2347.

8481. Uyttenhove, Chantal. 2009. Re: Lima Seasalt was being sold by 1957. Letter (e-mail) to William Shurtleff at Soyinfo Center, Jan. 27. 1 p.

• **Summary:** "Indeed, we were the exporters of Lima seasalt to the US. As far as I can remember, Eden Foods did import the salt and before that, it was Pierre Gevaert himself who had contacts with Erewhon. EdenSoy has long be produced with Lima sea salt and yes, we delivered salt to the American Miso company.

"In those days, Lima seasalt came from France, from the Isle of Noirmoutier. The so called 'grey' seasalt because it is/was harvested from handmade clay pans—*salières*. The gray clay interacts with the salt and thus gives it its color. Today, we still have Lima seasalt but years ago, I decided to step away from Noirmoutier salt because of some issues we had. Today, the Lima seasalt comes from South Portugal, from a company who, years ago, decided to repair and restore century-old *salinas* [salt fields] and started cultivating sea salt the old way. They have hand harvested salt, traditionally sun dried and have been rewarded as a 'slow food company' several times. Their 'Fleur de sel' is a real 'delice.'

"The only difference: the salt is white. There is a much longer harvesting season in Portugal so that they don't have to scrape the salt to the bottom of the salinas. And so, the salt stays pure white because it does not interact with the clay. That company in Portugal is a real beauty." Note: Chantal encloses two color photos of the white seasalt being harvested in Portugal.

Update: Jan. 29 e-mail. "I started working for Lima in January 1985. Since Lima started in 1957, there is a lot of

history before me.

"We are planning on moving to a new building at the end of this year—an ecological friendly building with the least possible footprint—so, I'm in charge to make sure we don't throw away the old things. I'm sitting on the first ever Lima-Tamari packaging (brown plastic bottle, actually a cosmetic bottle) and all sorts of things. There are a lot of old documents that I still have to go through. There is also a very old movie from before my time which needs to be digitalised. (When finished, I can send you that if you are interested. There is a French and a Flemish version).

"The oldest document I have referring to the sea salt is a handwritten order from 1962. So my guess is that we started with the salt even before that as we have contracts older than that. I did not go through old invoices nor do I have a price list but I'm sure we have that somewhere. Later this year, those things will 'surface' again."

Follow-up e-mail from Chantal. 2009. Feb. 2. "Dear Bill, We do have a well documented history—there is the start of a book; it begins with the engagement of the father of Pierre, Edgar Gevaert, his work for world peace, first contacts with Ohsawa—and with the start of the Lima production in the kitchen and the opening of the first store to the start the company Lima. One catch: it's all in Flemish ! I'm so sorry.

"Here it says that Pierre Gevaert made a trip to Ile de Ré in France to buy seasalt and that only later, in 1957, he bought machinery. That would mean he started even before 1957 with buying seasalt for the production of tahini and gomashio which was produced in the kitchen.

"The history is so rich Bill, that I could put my job aside and do only this. Unfortunately, that is not possible. I wish more was available in another language but then Flemish and French were the languages at the time so all the documents are in those languages.

"Should something come up during the move, of course we'll think of you. Thank you and kindest regards, Chantal." Address: Purchasing Manager, Hain Celestial Europe [Belgium] (formerly Lima Foods N.V.).

8482. Clearspring, Ltd. 2009. Clearspring (Website printout—part). www.clearspring.co.uk. Printed Jan. 28.

• **Summary:** Contents: Home page. About us. Awards. Glossary. FAQ. News. Books. Links. Stocklists. Trade. Contact. Food quality. Producers. Health. Recipes. Where to buy.

"Introducing the chairman: Christopher Dawson was born 19 September 1953, at New Plymouth Hospital, New Zealand and grew up in Opunake, a rural town in New Zealand. He is the third son of William Geoffrey and Joan Dawson.

"Education: He did his primary, secondary and tertiary education in New Zealand. He first started independently studying vegetarianism and organic agriculture at the age

of 18. In 1974 he came to London to further his studies of organic agriculture, both at the Henry Doubleday Horticulture and Nutrition Research Centre in Braintree and the Bio Dynamic Agriculture section at the Rudolf Steiner Emerson College, Sussex.

“Beginning Organic Food Distribution: In 1977, he opened and managed the East West Natural Foods Store at the Community Health Foundation, Old Street, London. He developed this shop into a distribution centre for traditional natural / macrobiotic foods, sourced from both local organic farms and from abroad, especially from Japan.

“From August 1978 through to January 1980 he traveled extensively throughout Europe, America, Australia and Asia, investigating the traditional dietary practices and food-processing techniques. He studied at the East West Foundation in Boston, Massachusetts, U.S.A. about Far Eastern philosophical principles and traditions and studied the distribution network of the natural foods movement in both America & Europe, as well as Australia and New Zealand.

“Eighteen Years in Japan: Christopher made his first trip to Japan in July 1979, visiting natural food enterprises throughout Japan with Mr. A. Kazama, president of Mitoku Co. Ltd. He returned to Japan in January 1980 and began extensive studies into the daily life and cultural and dietary practices of the Japanese people.

“At the end of 1980 he commenced full-time employment at Mitoku Co. Ltd., the major exporter of traditional, natural Japanese foods. During the eighteen years he spent with the company Christopher studied Japanese Foods & production, worked with the producers to develop products to suit the needs of customers abroad and help the producers become compliant with EU organic certification. He also travelled extensively to introduce the foods to markets worldwide, with the intention to see if Japanese foods could really become international foods.

“Building Clearspring in the UK, Europe and the Middle East: In September 1993, Christopher bought the Clearspring Ltd. company, which was then a London based wholesaler with one shop, the very shop that Christopher started in 1977! By 1998, he felt he had sufficient knowledge of traditional, top quality Japanese food and decided it was the right time to come back to UK and to focus on marketing organic and authentic Japanese foods under the Clearspring brand.

“Recognition from the Japanese government: On 25 May 2007, Christopher received the Award for Overseas Promotion of Japanese Food 2007 from the Ministry of Agriculture, Forestry and Fisheries of Japan, for his distinguished contribution to the promotion of Japanese organic food worldwide.”

Down the right side of this page are the following photos: (1) Christopher seated at a desk, writing in a notebook, looking very happy, at an early age (about 6),

already a promoter of the written word. (2) Christopher at the East West Natural Foods Store in 1977. (3) Christopher with his mother at home in New Zealand. (4) Christopher at Mitoku in Japan (with Mr. Kazama and staff) in the late 1980s. (5) Photo taken 11 Oct. 1990 with Lima Ohsawa, then 91, the wife of macrobiotic teacher George Ohsawa and Aveline Kushi, then 67, the wife of macrobiotic teacher Michio Kushi. (6) Christopher with his young family (Japanese wife and 3 children) in Japan in the early 1990s. (7) Christopher, with his wife and two sons in Spain in 2006. (8) Christopher now regularly visits Clearspring's suppliers in Japan, here with team of Sendai Miso Shoyu Company and Mr. Yoshida from Mitoku. (9) Christopher in Japan with Onozaki san, miso producer. (10) Christopher at the Organic & Natural Products Show, London 2007. (11) Special vegetarian foods prepared at the Dawson household, to celebrate the New Year. Address: 19A Acton Park Estate, London W3 7QE, UK. Phone: +44 (0)20 8749 1781.

8483. Fish, Peter. 2009. Tofu: The staple of hippie cuisine goes mainstream. *Sunset new essential No. 5. Sunset (Menlo Park, California)*. Jan. p. 108.

• **Summary:** Many will remember their first encounter with tofu, “a tremulous white cube doused in soy sauce.” Your mother probably said it was good for you.

“Cut to 2009, and the low-calorie, high-protein soybean curd is as mainstream here as the Quarter Pounder”—for tofu is deeply Western. Tofu was being made in San Francisco as early as 1878. Today, House Foods of Garden Grove, California, makes 150,000 packages of tofu each day. “And tofu has vaulted from health food to haute cuisine... Like mom, we always know a good thing (eventually) when we see one.”

A large color photo shows four pieces of tofu, each a different size and shape.

8484. Roseboro, Ken. 2009. The 2009 non-GMO sourcebook: A buyers guide to global suppliers of non-GMO and organic seeds, grains, ingredients, and foods. Eugene, Oregon: Evergreen Publishing, Inc. 106 p. Illust. (both color, and blue and white photos). Index. 28 cm.

• **Summary:** Contents: Editor's introduction (by Ken Roseboro, publisher and editor). Suppliers of non-GMO products: United States, Canada, Europe, Africa / Middle East, Asia / Australia, Latin / South America. The Non-GMO Project special section (Non-GMO verification of organic foods begins, Non-GMO Project facts, Non-GMO corn chips create a niche for healthy snack foods, Grain suppliers express concern about the Non-GMO Project, First inspector training for non-GMO verification held). Related products, services, and organizations. Indexes: Index of non-GMO suppliers by product category: Seeds, grains and oilseeds, specialty grains and crops, canola / rapeseed products and ingredients, corn / maize products and ingredients, soy

products and ingredients (phytosterols, soy flakes, soy flour, soy germ concentrate, soy grits, soy lecithin {including organic}, soy meal {including organic}, soy nuts, soy oil {including organic}, soy oil–low linolenic, soy protein, isolates and concentrates, soy protein–textured, soymilk, soymilk powder, soy sauce, vitamin E / tocopherols), other ingredients and processing aids (citric acid, dairy ingredients...), sweeteners, food products, animal feed. Index of related products, services and organizations. Complete index of listings. Order form for *The Organic & Non-GMO Report*.

This comprehensive book gives the single best picture of the growing industry, worldwide, opposed to genetic engineering of foods and feeds. Address: Editor / Publisher, P.O. Box 51137, Eugene, Oregon 97405. Phone: 1-541-343-2272.

8485. Sanders, Rebecca L. 2009. New life may be near for old beet-factory site: West Valley. *Arizona Republic*. March 17.

• **Summary:** A large photo shows the old, five-story sugar beet factory in Downtown Glendale, Arizona. Built in 1906, it has been closed since 1985 and is surrounded by chain-link and barbed-wire fences. In the right foreground, also inside the fences, is the old Marusho soy sauce factory, run by the Tadano family.

Glendale's director of economic development is talking with a developer about breathing new life into the building, which has been on the National Register of Historic Places for 31 years. The shoyu factory is not mentioned in the article.

8486. Soy Bean Company. 2009. SBC–Tempeh, soy, soyproducts (Website printout). tempehproducts.com/pagina/home_tempeh_soy_products_uk_holland/index.html. Printed March 31. [Eng]

• **Summary:** Contents: Home, soybeans, tempeh, recipes, contact. On the homepage of the SBC is a brief definition of tempeh. Color photos show: (1) Outside front of the company. (2) Two views of the inside of the company.

Soybeans: Introduction (click link for Q+A Are there special concerns related to soy foods? Provided by the George Mateljan Foundation), a health-promoting meat replacer, stay lean with soy, soy lowers blood pressure and cholesterol in men, beneficial effects on cholesterol levels and platelets.

Tempeh: Same as home page. Recipes: For Tijuana tempeh, Tempeh teriyaki, Tangy tempeh with portobello mushrooms.

E-mail in Dutch: croci@htnet.nl. E-mail in English: soybeancompany@htnet.nl.

Note: This is a minimalist website, with no company history and very little interesting information. Yet *History of Tempeh*, by Shurtleff & Aoyagi (1985, p. 29) states that this

was Europe's third earliest commercial tempeh company, founded in 1969. In Jan. 1972 the thriving company moved to Kerkrade from Rotterdam. In June 1980 the company bought a \$1,000,000 modern factory in Kerkrade and expanded production greatly. By mid-1982 it was the largest tempeh company in the world, making 6,000 to 8,000 lb of tempeh a week. Address: Tunnelstraat 107, 6468 EJ Kerkrade (Limburg), Netherlands. Phone: 045 567 0583 or 0584.

8487. Centraalbureau voor Schimmelcultures. 2009. CBS Fungal Biodiversity Centre (Website printout–part). www.cbs.knaw.nl. Printed April 6.

• **Summary:** This culture collection organization is similar to the National Center for Agricultural Research Utilization (NCAUR) in Peoria, Illinois. Contents: Home (incl. current news, biodiversity). About CBS. Research. Collections. Databases (18). Publications. Service. Links.

When we searched the 1st database, the “Filamentous fungi database,” it was very slow to load and to search. It “contains data on more than 38,000 strains in the CBS collection,” we got interesting results searching for: (1) Tempeh–14 hits = records found. In each record, tempeh appears in the field “Substrate.” The “Taxon name” (scientific name) of *Rhizopus oligosporus* has been changed to *Rhizopus microsporus* var. *oligosporus* (Saito) Schipper & Stalpers. In some records the name of the collector and date collected are given. Country and locality (where collected): Indonesia.

Other organisms used to make tempeh are: *Rhizopus oryzae* Went & Prinsen Geerligs. *Rhizopus stolonifer* var. *stolonifer*. *Cladosporium oxysporum* Berkeley & M.A. Curtis. *Rhizopus azygosporus* G.F. Yuan & S.C. Jong. One culture typically costs “150 Euro (65.0 Euro for Academies, Universities, Education).”

(2) *Rhizopus oligosporus*: 5 hits.

(3) Miso: 3 hits. One substrate was soy sauce and another was koji starter culture. The fungi were: *Aspergillus oryzae* var. *oryzae*. *Aspergillus sojae* Sakaguchi & K. Yamada ex Murakami.

(4) Soy sauce: 13 hits. In addition to the two molds used to make miso, there was also: *Aspergillus oryzae* var. *effusus* (Tiraboschi) Y. Ohara.

(5) Chinese cheese: No hits.

(6) Fermented tofu: No hits.

(7) Sufu: 9 hits. The molds used are: *Mucor racemosus* f. *racemosus*. *Mucor indicus* Lendner. *Mucor hiemalis* Wehmer. *Actinomucor elegans* (Eidam) C.R. Benjamin & Hesseltine. *Mucor circinelloides* f. *circinelloides*. *Rhizopus microsporus* var. *microsporus* Tieghem.

(8) Douchi or doushi or doushih or dowsee or dowsi or toudshih or tou-shih or fermented black beans or preserved black beans: No hits.

(9) *Aspergillus*: 1,213 hits.

(10) Soybeans: 1 hit. Substrate: Soybeans. Taxon name: *Aspergillus wentii* Wehmer. Country and locality: Indonesia, Java.

(11) Soybean: 18 hits. Substrate is usually “soil from soybean field.” Molds are *Penicillium* and *Aspergillus* species.

(12) Koji: 36 hits. Molds: *Aspergillus oryzae* var. *oryzae*. *Aspergillus oryzae* var. *brunneus* Murakami. *Aspergillus tamarii* Kita. *Rhizopus microsporus* var. *tuberosus* R.Y. Zheng & G.Q. Chen (koji from China). Address: Utrecht, Netherlands. Phone: +31 (0)30 212-2600.

8488. Shurtleff, William. 2009. Re: Research on soy sauce in the archives of the Dutch East India in the Hague, Netherlands. Letter (e-mail) to Dana Jacobi, food writer, New York City, Aug. 1. 1 p.

• **Summary:** “Did I tell you that I hired an expert in Dutch archival research for two years to send me documents showing how the Dutch brought ‘soy’ [sauce] from the Dutch East Indies to Amsterdam—when they were sent and sold everywhere by Dutch and British merchants with ships.

“Soy sauce was being sold in retail shops in New York City by 1750—the first form of soy to arrive in the British North America, even before the soybean itself. Of course nobody but Samuel Bowen realized that ‘soy’ was made from soybeans. Bowen was the first to actually make commercial soy sauce in the British North America.

“He had worked at the archives of the Dutch East India Co. for years and could read the handwritten Old Dutch that appears in the letters, logs, manifests, etc. He sent me both photocopies of the originals and his translations into English of the relevant parts.

“He made a breakthrough when we realized that by 1637 the Japanese were using the ancient word for soy sauce—Murasaki—which means ‘deep purple.’

“The only Japanese food item that the Dutch loved more than soy was—guess what—sake! The more things change, the more they stay the same. The Dutch also ordered lots of miso, umeboshi, and pickled vegetables for their personal tables at Dutch trading posts in the East Indies

“That story, now ready to be published, is filled with interesting and unexpected twists and turns. I hope to have a it published as part of the History of Soy Sauce on our website within the next 12 months.” Address: Founder and Director, Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

8489. Shurtleff, William. 2009. Re: Research on and questions about the early history of ketchup. Letter (e-mail) to Dana Jacobi, food writer, New York City, Aug. 1. 1 p.

• **Summary:** “I have been doing serious research on a soy-related food problem for the last 5 years: Ketchup.

“Andrew Smith has written a good book about it, but I feel he misses the key point concerning its origin.

“Ketchup—also spelled ketjap, ketchap, or kecap in Malay or Indonesian—means ‘soy sauce.’

“Yet ketjap manis (‘sweet soy sauce’) is thick and sweet (with herbs and spices), rather like today’s tomato ketchup, yet expensive (since it had to be imported by the Dutch from the Dutch East Indies) and made with an ingredient (the soybean) that was largely unknown in Europe at the time.

“Soon the British and Dutch were at work making less expensive imitations: Walnut ketchup, tomato ketchup, mushroom ketchup, oyster ketchup, etc.

“I have more than 30 ads from newspapers of the 1700s showing ‘soy’ (as soy sauce was then called) in ads from New York and other North American ports advertised right next to ketchup.

“And lots more—its an amazing story: ‘How ketchup came to the West.’ Kind of like your mustard blog story but much harder to work out its history. I wish I had a year to spend on only this esoteric puzzle. I’d go to the Hague, find an expert helper, and search the archives of the Dutch East India company. I’m quite sure I could make the link and rewrite the early history of ketchup.” Address: Founder and Director, Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

8490. Kikkoman Corporation. 2009. Annual report 2009. Year ended March 31, 2009. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 41 p. 28 cm. [Eng]

• **Summary:** Largely as a result of the global financial crisis, starting in the fall of 2008: Consolidated net sales decreased 0.3% to \$4.210 billion, operating income fell 14.6% to \$207.8 million, and net income declined by 76.0% to \$28.0 million. Note: Dollar values may have changed at different percentage rates due to changing foreign exchange rates.

Page 1 is titled “Kikkoman Corporation shifts to a holding company structure.” The shift will be effective 1 Oct. 2009. “The transition will entail the creation of several new spin-offs to operate the Group’s existing businesses. A chart shows the holding company structure after 1 Oct. 2009. Under Kikkoman Corporation (the holding company) are eight divisions: 1. Kikkoman Business Services Company (new). 2. Overseas business. 3. Other domestic businesses. 4. Fodchemifa Co., Ltd. 5. Manns Wine Co., Ltd. 6. Nippon Del Monte Corporation. 7. Kikkoman Beverage Company (new). 8. Kikkoman Food Products Company (new).

“We have revised our business principles based on the following three principles. (1) To pursue the fundamental principle ‘consumer oriented.’ (2) To promote the international exchange of food culture. (3) To become a company whose existence is meaningful to the global society.”

A photo (p. 7) shows Yuzaburo Mogi (Chairman of the Board and CEO) and Mitsuo Someya (President and COO).

Pages 8-9 show color photos of Japanese and overseas soy sauce products including *Tokusen Marudaizu Shoyu*

Hawaiian Teriyaki Sauce

18 FL OZ (532ml)

As a boy growing up in Hawaii, my family passed this recipe through the generations. When I moved to the mainland, I brought it with me and have been making it for friends and family for years. Now my native Hawaiian sisters and I would like to share it with you. This sauce is made with fresh fruit and has a sweet, tropical flavor. I suggest marinating chicken, pork, beef or fish for at least a day, turning occasionally. This allows the flavor to infuse the meat, resulting in the best Hawaiian Teriyaki meat you've ever eaten. Also excellent as dipping sauce, with vegetables or rice. Let your imagination go wild.

Ingredients: Soy Sauce (water, wheat, soybeans, salt, sodium benzoate: less than 1/10 of 1% as a preservative), Sugar, Crushed Pineapple (pineapple, pineapple juice), Distilled Vinegar, Corn Starch, Fresh Sweet Onions, Fresh Garlic, Fresh Ginger, Black Pepper.

Contains: Wheat, Soy.

Shake Well. Refrigerate After Opening.
Please try our other delicious sauces.

Asian Sesame Ginger Sauce

NET WT. 18 OZ. (510g)

As a boy growing up in Hawaii, my family passed this recipe through the generations. When I moved to the mainland, I brought it with me and have been making it for friends and family for years. Now my native Hawaiian sisters and I would like to share it with you. This sauce is unmatched for flavor when mixed with cooked ground beef for the perfect filling for lettuce wraps. Bursting with flavor, it is perfect for chicken wings, poultry, meats, vegetables, rice or stir fry. Makes an excellent marinade, salad dressing, or dipping sauce. Let your imagination go wild.

Ingredients: Soy Sauce (water, wheat, soybeans, salt, sodium benzoate: less than 1/10 of 1% as a preservative), Honey, Mirin Wine, Sesame Oil, Sugar, Toasted Sesame Seeds, Corn Starch, Fresh Ginger, Fresh Sweet Onions, Fresh Garlic, Black Pepper.

Contains: Wheat, Soy.

Shake Well. Refrigerate After Opening.
Please try our other delicious sauces.
Product of USA

(Premium shoyu made from whole soybeans—rather than the usual defatted soybean meal) and *Tokusen Yuki Shoyu* (Premium organic shoyu, certified by Japanese Agricultural Standards, JAS). Overseas: Less Sodium Soy Sauce (North America). Teriyaki Sauce (3 types) (North America). Sweetened Soy Sauce (Europe) (*Sauce Soja Sucrée*). Herbal Soy Sauce (Asia; made in Singapore with a fragrant blend of sweetness and herbs). Address: Noda, Japan.

8491. **Product Name:** Bro Dan's Hawaiian Teriyaki Sauce, Asian Sesame Ginger Sauce, Volcanic Hot Sauce.

Manufacturer's Name: Bro Dan's Specialty Sauces.

Manufacturer's Address: P.O. Box 7988, Surprise, AZ 85374. Phone: 623-544-9873.

Date of Introduction: 2009. November.

Ingredients: Hawaiian Teriyaki Sauce: Soy sauce (water, wheat, soybeans, salt, sodium benzoate: less than 1/10 of

1% as a preservative), sugar, crushed pineapple (pineapple, pineapple juice), distilled vinegar, corn starch, fresh sweet onions, fresh garlic, fresh ginger, black pepper). Contains: Wheat, soy.

Wt/Vol., Packaging, Price: 16 oz. glass bottles.

New Product—Documentation: Talk with Bro Dan Swafford about the history of his work. 2009. Nov. 20. Letter (on letterhead, with business card) from Bro Dan. "As stated, I am just a start up company, but taken off very well..." He and his family in Hawaii have been making similar sauces for more than 40 years. Soy sauce forms the basis of each sauce; all of his major ingredients are fresh: pineapple juice, ginger, garlic, onions, etc. "Shake well. Refrigerate after opening."

As of 24 April 2012 his sauces are in some Safeway stores and in Maui Wowi. His website is now down for renovation. Neither an e-mail nor a website appear on his letterhead. But a website (www.BroDansSpecialtySauces.com).

com) does appear on each label.

1 May 2012. One bottle of each of four sauces (incl. Sweet Jamaican Island Jerk Sauce, introduced in about 2010) and two extra labels of each sent by Dan Swafford (with letter on new letterhead). Each label is very attractive and nicely designed. The central graphic on each is a stylized brown and green pineapple on a dark blue vertical oval. Hawaiian Teriyaki is yellow and black on peach. Asian Sesame Ginger is purple and black on light purple; the first five ingredients are soy sauce, honey, mirin wine, sesame oil, and sugar. Volcanic Hot is orange and black on light orange; the first five ingredients are cayenne pepper sauce, corn oil, water, salt, and monosodium glutamate. Sweet Jamaican Island Jerk is green and black on light green; the first five ingredients are cayenne pepper sauce, brown sugar, water, butter flavored oil (partially hydrogenated soybean oil), and salt.

Note: Neither of the last two sauces contains any soy sauce.

8492. Brackman, Agnes de Keijzer; Brackman, Cathay. 2009. *The complete Indonesian cookbook*. Singapore: Marshall Cavendish Cuisine. 184 p. Illust. (color). 24 cm. *

8493. Esselstyn, Rip. 2009. *The Engine 2 diet: the Texas firefighter's 28-day save-your-life plan that lowers cholesterol and burns away the pounds*. New York, NY: Wellness Central. xiii + 273 p. Foreword by T. Colin Campbell, PhD. Illust. Index. 24 cm.

• **Summary:** A very interesting, readable, and innovative book that advocates a sound, healthy diet that can last a lifetime. "Rip managed to convert a firehouse full of committed firefighters to a plant-based diet. Rip (born in 1963) is the eldest son of Caldwell B. Esselstyn, Jr., M.D., who has become famous for his ground-breaking book *How to Prevent and Reverse Heart Disease*. This book is both similar and different. It is similar in that the basic whole foods, plant-based diets advocated by father and son are 98% the same (and please focus on practicing that 98% and not squabbling about the 2%). It is different in that Rip is from a younger generation, is not a physician but an athlete and firefighter, and is trying to help people who want help in lowering their high cholesterol levels and their weight. He is not primarily trying to help people who have had at least one heart attack, are a death's door, and are (generally) willing to do almost anything to save their lives.

In Chapter 2, "My story," we read that while in school, Rip was an outstanding athlete. He set many high school swimming records (he still holds a national record in the 200 meter medley relay); he was a top player in his high school tennis team and co-captain of the water polo team.

At the University of Texas at Austin, he was a three-time All American swimmer and an Olympic trials qualifier in the 100- and 200-meter backstroke and freestyle events. In 1986

he graduated from the University of Texas and within six months he was competing as a professional triathlete—which required a 1-mile swim, a 24.9 mile bike ride, and a 6.2 mile run. In the Hawaii Ironman Triathlon he competed against six-time Ironman Champion Dave Scott, who was powered by a plant-based diet—Rip lost. So in 1987, because of the influence of his father and of Dave Scott, Rip changed to a healthy, whole foods, plant-based diet. In 1997 he decided to become a fire fighter in Austin, Texas. He continued to compete and won many events and set many records. For example, in May 2008 he set the National Record at the U.S. Masters Swimming Championship in the 200 yard backstroke (1:56:55). Rip is married to Jill Kolasinski, and they have a son, Kole.

Rip's commitment to a healthy plant-based diet has resulted in many people asking him to help them with their diets. So in 2007, he devised the six-week Engine 2 Pilot Study in which 62 people agreed to eat a plant-strong diet; he put them through a gauntlet of tests before and after study to quantify the results—which were spectacular. Then in May 2008 he initiated a similar 4-week (28 day) study in which 15 people participated, 13 Engine 2 firefighters and two civilians. Again careful before and after records were kept. The average participant saw his total cholesterol drop 62 points (from 197 to 135), his average LDL (bad) cholesterol fall 50 points (from 125 to 74), and his weight drop 14 pounds (from 203 to 189). And all this in only 4 weeks! This book is based on the latter plan.

Rip makes much more use of soyfoods in his plant-based diet than does his father. The index contains 16 entries for tofu, 4 for tempeh, 4 for seitan, 2 for milk substitutes ("soy, rice, almond, and oat milk, for example"), 1 each tofu sour cream (p. 239), soy milk, soy yogurt (Silk or WholeSoy).

Soy related recipes include: Migas especiales (with 1 lb firm tofu, p. 154). Breakfast tacos (with "½ tube vegetarian breakfast sausage {we like Gimme Lean})," or use scrambled tofu (p. 155). E2 omelet (with "12 ounces Silken Lite Firm Tofu," p. 156). Lemon cornmeal pancakes (with "2 cups soy milk" and "½ cup soy yogurt, p. 157). Tofu steaks and mushrooms with mashed potatoes and green peas (with "1 pound extra-firm tofu," p. 180).

Linguine and creamy alfredo sauce (with "1 package Silken Lite firm tofu" and "2 cups unsweetened soy milk," p. 195). Lynn's meatloaf (with "10 ounces firm tofu," p. 204). Vegetable stir-fry with brown rice (with "1 pound seitan" and "two tablespoons low-sodium tamari," p. 208). Tempeh-mushroom stir-fry and soba noodles (with "1 package tempeh," and "3 tablespoons low-sodium tamari," p. 209). Red vegetable curry and brown rice (with "1 pound extra-firm tofu," p. 210).

Pad Thai (with "1 pound broiled tofu cubes {see p. 210}," p. 211). The great wooden bowl salad (with "1 pound extra-firm tofu," p. 214-15). Tofu vegetable spread (with

"½ pound extra-firm tofu," p. 238). E2 sour cream (with "1 package Silken Lite firm tofu," p. 239). Asian marinade (with "3 tablespoons soy sauce, p. 241). Island marinade (with "4 tablespoons soy sauce," p. 241). Add tofu and allow to marinate refrigerated for 30 minutes to 4 hours (p. 241). Rip's favorite snacks include "4. Soy yogurt: I'm particularly fond of the Westsoy... cherry" (p. 243). E2 Basics chocolate pudding (with "1 package Silken Lite tofu," p. 245). Fruit bowl with soy drizzle (with "4-6 ounce container of soy yogurt," p. 249). Fruit mousse (with "1 package extra-firm Silken Lite tofu," p. 255). Maple sour cream dream (with "1 vanilla soy yogurt," p. 256).

Many recipes call for "Bragg Liquid Aminos" which are simply HVP (hydrolyzed vegetable protein) made by a quick and unnatural / artificial process; soybeans, wheat, and/or corn are immersed in hydrochloric acid until, after 1-3 days, the acid has broken down the protein into its constituent amino acids. Fermentation (as of soy sauce) can do the same thing naturally in 4-6 months. HVP is a source of flavor without salt, but that flavor is generally considered to not nearly as good as the flavor of soy sauce.

Rip has an exercise component to his "Engine 2" 28 day plan.

And Rip gives people a choice as they start the 28 day plan; one can be a Fire Cadet or a Firefighter (p. 22). The "Fire Cadet option is for those who prefer a more gradual approach." In week 1 Cadets must stop eating dairy products and processed / refined foods (such as refined sugar, white flour, etc.). In week 2 Cadets must stop eating meat, poultry, fish and eggs. In week 3 Cadets must do without added or extracted oils—even vegetable oils such as olive oil. In week 4 Cadets and Firefighters eat the total E2 diet, a healthy, whole-foods, plant-based diet. A Firefighter (the plan Rip recommends) requires that a give up all of these unhealthy foods from the start of the program. "Americans consume a staggering 50 percent of their calories from refined and processed foods."

Cholesterol-lowering drugs (such as statins: Rip, who is not a physician, does not use them).

Salt and sodium: Rip advocates a low-sodium diet.

Support groups after the 4-week program: Optional. People who wish to can create or find one themselves (p. 92).

Meditation and relaxation to reduce stress: Not part of the program.

Sugar and sweets. Avoid refined sugars, high fructose corn syrups, and things such as sodas, candy to which they are added. Instead choose natural sugars such as those in whole naturally-sweet fruits (p. 114-15, 134). In desserts, Rip often calls for up to 3-4 tablespoons maple syrup or agave nectar, yet a recipe for Brownies (p. 247) calls for "½ cup light brown sugar, packed" and "½ cup raw sugar." And a recipe for "Oatmeal raisin cookies" (p. 253) calls for even more refined sugar. Rip admits he has a sweet tooth. Some of his desserts violate the basic principles of the Engine 2

diet; they contain large amounts of refined sugars—unlike the recipes (developed by his mother) in his father's book. Moreover, his mother strongly suggests that desserts be saved for special occasions.

This is a sound, healthy diet and anyone who stays on it for 28 days will see dramatic improvements in their overall health and weight.

The Engine 2 diet is a good, practical diet for the rest of your life. But go easy on the desserts and try to avoid the ones with refined sugar. Address: Austin, Texas.

8494. Nguyen, Andrea Quynhgio. 2009. Asian dumplings: Mastering gyōza, spring rolls, samosas, and more. Berkeley, California: Ten Speed Press. 234 p. Illust. (color photos by Penny De Los Santos). Index. 28 x 19 cm. [38 ref]

• **Summary:** Another very attractive book and well-written book by Andrea Nguyen. In the Introduction, the section titled "Ingredients" (p. 8+) discusses soy sauce (p. 16) and tofu (p. 16-17).

Soy related recipes include: Steamed vegetable dumplings [vegetarian] (Zhengjiao, Chinese, with 3 oz. brown pressed tofu filling, and light (regular) soy sauce, p. 35-36). Kimchi dumplings (Kimchi mandu, Korean, with 10 oz firm tofu, p. 44-45). Korean meat and vegetable dumplings (Gun mandu, with 6 oz firm tofu, p. 46-47). Steamed filled buns (Zheng bao, Chinese, with Vegetable and tofu bun filling {p. 101}, p. 95-96). Baked filled buns (Ju bao, or Guk bao in Cantonese, Chinese, with Vegetable and tofu bun filling {p. 101}, p. 97-99). Vegetable and tofu bun filling (Cai bao, Chinese, p. 101).

Chapter 9, "Sauces, Seasonings,..." contains several soy dipping sauces: Tangy soy dipping sauce (great with Chinese jiaozi or Japanese gyōza, p. 215). Korean dipping sauce (for Korean Mandu, p. 215). Sweet soy sauce (good with Cantonese steamed rice rolls {p. 156-60}, p. 217). Address: Food writer, Santa Cruz, California.

8495. Silverstone, Alicia. 2009. The kind diet: a simple guide to feeling great, losing weight, and saving the planet. Emmaus, Pennsylvania: Rodale Press. Distributed to the trade by Macmillan. xi + 308 p. Foreword by Neal Barnard. Illust. (color photos by Victoria Pearson). Index. 24 cm. [17 + 71 endnotes*]

• **Summary:** On the cover: "New York Times Bestseller." A powerful, very popular book about a plant-based (vegan) lifestyle and diet, which calls for only "real food," with some nice macrobiotic flavor—A whole grain dish should be at the center of every meal, use of seasonal foods organically grown, azuki beans, daikon, kuzu, kabocha, miso, mochi, nori, sea vegetables, seitan, shoyu, no white or cane sugar (a "crazy making" food), tamari, umeboshi, etc.

By a well known actress who first became widely known for the film *Clueless*, a 1995 American comedy film loosely based on Jane Austen's 1815 novel, *Emma*.

She dedicates the book to Sampson, a stray dog she picked up on the streets of Los Angeles, to all animals who suffer needlessly, and to all “who do their best to tread lightly on the earth.”

The index contains 16 entries for tofu, 14 for miso, 11 for seitan, 4 for soybeans (whole dry), 3 for soy milk, 2 each for edamame and tempeh, 1 each for butter substitute (soy-based margarine, p. 142-43), cheesecake-tofu, cheese-vegan (p. 143), shoyu (p. 142), sour cream-soy (p. 143), soy candles (p. 134), and tamari (p. 142).

Some good quotations from a fine writer: “And what about your health?... What if I told you that, by eating a plant-based diet, you will strengthen your immune system, beautify your skin, increase your energy, and reduce your risk (significantly) of cancer, heart disease, diabetes, arthritis, osteoporosis, allergies, asthma, and almost every other disease? What if I said that I feel myself getting younger, more powerful, and more beautiful as I age simply because of *what I eat*?... If you want to lose weight, you’ve come to the right place (p. 1).

“Eating a plant-based diet is the most ecologically friendly thing you can do... Every time you purchase organic plant-based food, you are protecting the quality of the soil and participating in a more equitable distribution of resources. Conversely, every time you buy a mass-produced steak—packaged in Styrofoam and plastic—you are feeding a huge, unsustainable, toxic death machine. This may sound harsh, but it’s the truth! There’s a whole world of consequences behind every decision we make” (p. 131).

A large color photo on the cover shows lovely Alicia Silverstone, seated, with a bowl of food in one hand. The book contains many fine color photos on glossy paper. Address: Actress, activist, and committed conservationist, Los Angeles, California.

8496. Walters, Terry. 2009. *Clean food: a seasonal guide to eating close to the source, with more than 200 recipes for a healthy and sustainable you*. New York, NY: Sterling. 290 p. Illust. (Color). Index. 24 cm.

• **Summary:** This vegan cookbook, with a strong macrobiotic flavor and 223 recipes (arranged by season), shows you how to eat seasonal, unprocessed, and locally-grown foods that are good for people and the environment.

On pages 17-18 is a section titled “Soy” in which the author describes her belief that “there is so much information about whether soy is healthy or not.” We have rarely seen a short section on soy containing so many clearly false or misleading statements as this one—too many to list. Clearly she gets her information about the nutritional value of soy from the Web rather than from scientific journals. Nevertheless she recommends and uses miso, tempeh, tamari / shoyu, and tofu.

The glossary of foods likewise contains many errors. For example: Aduki beans: Misspelled. Fermented black beans:

She fails to mention that these are soybeans. Gomasio: Misspelled. Tempeh: “Made from pressed and fermented soybeans.” Tofu: “Made from soybean curd.”

The index contains 23 recipes for tofu, 9 each for miso, and tempeh, 3 for shoyu, and 4 for tamari. Address: Connecticut.

8497. Yagihashi, Takashi; Salat, Harris. 2009. *Takashi’s noodles*. Berkeley, California: Ten Speed Press. An imprint of Crown Publishing Group, a division of Random House. vii + 168 p. Illust. (photos by Tyllie Barbosa). Index. 25 cm.

• **Summary:** A very original, beautifully designed book. “A collection of 75 recipes from James Beard Award-winning chef Takashi Yagihashi for both traditional and inventive hot and cold Japanese noodle dishes” (from the publisher).

Contents: Acknowledgments. Introduction. 1. Ramen. 2. Soba. 3. Udon. 4. Somen. 5. Asian noodles. 6. Pasta. 7. Appetizers. Ingredients glossary.

The cover photo shows a photo of “Natto soba.” The headnotes to the recipe for “Natto soba” (p. 46-47) state: “My hometown of Mito is known throughout Japan as ‘Natto City’ in recognition of our devotion to these fermented soybeans. Natto has a wonderful nutty flavor and aroma, and I’ve loved it since I was a kid. Serving it with soba is a terrific introduction to this nutritious and ancient naturally preserved ingredient. When you open a packet of natto, the beans will be sticky and thready, but don’t let that put you off. This dish makes a beautiful presentation when it’s served. Just make sure you mix together all the ingredients very well before you eat to combine the flavors.” On the facing page is a full-page color photo of the dish with cold soba broth being poured over the top.

The brief Glossary (p. 161-63) includes: Abura-age, goma paste, hoisin sauce, kombu, mirin, miso (red, white, or brown), natto, nori, soy sauce, sunchang kochujang, tobanjan, tofu, umeboshi, wakame, wasabi, yamaimo, and yuzu.

The word “soy” appears on 51 pages in this book, “soy sauce” on 43 pages, “Japanese soy sauce” on 39 pages, “miso” on 15 pages, “tofu” on 14 pages, “abura-age” on 7 pages, “natto” on 6 pages, “soybeans” on 2 pages, and “soybean” on 1 page. “Japanese soy sauce” is called for in dashi, in all other noodle broths, and in most recipes. Meat, poultry, fish, shellfish, and eggs are used throughout the book.

Several photo portraits show youthful, handsome Takashi. Harris Salat writes about food and culture. Address: USA.

8498. Shurtleff, William. 2010. *Do the English words “ketchup,” “catchup,” and “catsup” trace their origin back to Chinese (Cantonese) or to Malay?* (Editorial). *SoyaScan Notes*. Jan. 16.

• **Summary:** If the English words for “ketchup” trace their

origin back to Chinese, then they probably trace their origin back to the Cantonese, because Cantonese speakers (from Canton / Guangzhou in southern China) made up the great majority of emigrants from China starting during and after the Mongol Dynasty (also called Yuan Dynasty; 1279-1368) when the Mongols ruled China.

In Cantonese, there is a word that sounds very similar to the English word “ketchup.” Written with two characters, it is pronounced “ke-tsup.” The first character means “tomato,” and the second character means “sauce,” “juice,” or “liquid.”

Thus, the Cantonese word seems in both sound and meaning to be very similar to the English word “ketchup.”

Written Cantonese is used primarily in Hong Kong and in overseas Chinese communities. It uses characters not found in the Standard Mandarin, and is not easily intelligible to Mandarin speakers.

Romanization: Cantonese romanization systems are based on the accent of Canton and Hong Kong, and have helped define the concept of Standard Cantonese. The major systems are Barnett-Chao, Meyer-Wempe, the Chinese government’s Guangdong romanization, Yale and Jyutping. While they do not differ greatly, Yale [New Haven, Connecticut] is the one most commonly seen in the West today. The Hong Kong linguist Sidney Lau modified the Yale system for his popular Cantonese-as-a-second-language course, so that is another system used today by contemporary Cantonese learners. And there is the International Phonetic Alphabet (IPA).

In Malay—the language of today’s Indonesia (which includes Java)—the word for soy sauce was written *ketjap* and is today written *kecap*. The sound is very similar to the Cantonese sound but the meaning is very different.

By the way, none of the three English words for “ketchup” (nor any words with similar sounds) is found in the book *Hobson-Jobson: a glossary of colloquial Anglo-Indian words and phrases*,..., by Sir Henry Yule, and Arthur Coke Burnell.

As the Cantonese left China for overseas destinations (both near and far), they almost surely took soybeans and soy sauce technology with them.

Since Java and Indonesia are closer to Canton than are Australia or New Zealand, it seems likely that more Cantonese settled there. More important, Java and Indonesia have much longer cultural and economic ties to Asia than do Australia or New Zealand, so it is more likely that Cantonese foodways would take root in Java.

A product named “Ketchup” (spelled in various ways) had arrived in Europe by the late 1600s and early 1700s. It was probably imported from Southeast Asia. Yet when ketchup arrived in Australia and New Zealand, a century later, it was imported not from nearby Southeast Asia, but from far-away Europe. Address: Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

on moromi fermentation of soy sauce with intermittent aeration. *African J. of Biotechnology* 9(5):702-06. Feb. 1. [20 ref]

• **Summary:** Soy sauce has long been a traditional fermented food in Malaysia, where there are many different varieties such as dark soy sauce, light soy sauces, *Kicap lemak manis* [sweet and thick], *Kicap lemak masin* [salty and thinner], etc. In Malaysia, soy sauce is produced on a small scale in cottage industries using traditional methods and equipment / technology.

Note: This is the earliest English-language document seen (April 2012) that uses the term *Kicap lemak manis* or the term *Kicap lemak masin* to refer to Malaysian sweet or salty soy sauces. Address: 1&4. Chemical and Sustainable Process Engineering Research Group, School of Engineering; 2-3. School of Science. All: Monash Univ., Jalan Lagoon Selatan, Bandar Sunway, 46150, Selangor Darul hsan, Malaysia.

8502. Shurtleff, William. 2010. Thoughts about George Ohsawa. *SoyaScan Notes*. Feb. 5. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** There are six things I greatly admire about George Ohsawa: (1) He had a tremendous sense of gratitude for life itself and for all things. (2) He emphasized the oneness of all things (nonduality) and showed that the pairs of opposites are more deeply one. (3) He had a marvelous love of life and sense of humor. People remember him as a deeply happy and charismatic man. (4) He had a very original and creative mind—especially for a Japanese man of his time. (5) He introduced many fine Japanese foods into Western diets that Caucasians now actually eat on a regular basis—miso, tofu, shoyu / tamari, umeboshi, kuzu, sea vegetables, seitan, natto, and many more—and in doing so played a major role in starting the natural foods movement in America. (6) He played a leading role in introducing brown rice into American food culture, starting in the 1960s. Address: Founder and owner, Soyinfo Center, Lafayette, California. Phone: 925-283-2991.

8503. **Product Name:** Amy's Teriyaki Wrap (With Organic Tofu, Brown Rice & Vegetables).

Manufacturer's Name: Amy's Kitchen Inc.

Manufacturer's Address: P.O. Box 449, Petaluma, CA 94953. Phone: 707-762-6194.

Date of Introduction: 2010. March.

Ingredients: (Vegan): Organic brown rice, filtered water, organic wheat and whole wheat flour, organic tofu (filtered water, organic soybeans, nigari {magnesium chloride, a natural firming agent}), organic broccoli, pineapple juice, organic tamari...

Wt/Vol., Packaging, Price: 5.5 oz (156 gm) in plastic bag. Retail for \$3.29.

How Stored: Frozen.

New Product–Documentation: Product with Label purchased at Diablo Foods in Lafayette. 2010. March 7 by 3 inch plastic bag. Dark blue, green, white and red. On front panel: "Non-dairy. Keep frozen. Non GMOs."

8504. Nguyen, Hoang Quoc. 2010. Re: Soyfoods and soybeans in Vietnam. Letters (e-mails) to William Shurtleff at Soyinfo Center, May 4-12. 1 p. each.

• **Summary:** Mr. Nguyen is the father of Andrea Nguyen, author of *Into the Vietnamese Kitchen* (2006, Ten Speed Press) and was kindly introduced to Soyinfo Center by Andrea, who is now writing a book about tofu in Asia.

Mr. Nguyen was born and raised in Vietnam, and lived there with his wife and family until April 1975 when he fled to the USA just before the fall of Saigon and the American defeat in what Vietnamese call the "American War."

He was governor and military sector commander of two provinces in the Mekong Delta of Vietnam (Vinh Binh {now called Tra Vinh} from 1956, and Kien Phong {now called Dong Thap Muoi} from 1956-1960), and of Binh Thuan, in the south of central Vietnam, from 1960-1963. While he is not a specialist in Vietnamese food, he knows as much about it (or more) as the typical person born and raised in that country.

Question: Do Vietnamese eat soybeans as a green vegetable (green vegetable soybeans, edamamé)? Ans: No, and there is no specific name for them.

Question: Please tell me about soymilk in Vietnam. Ans: Its name in Vietnamese is *sua dau nanh* (with diacritical marks). It was very popular, but mostly in the cities (as we were in Viet Nam before 1975). Don't know exactly at the present time. Use it at breakfast or at any time during the day as a beverage. It is sold in a plastic container, at tofu shops or at marketplaces. Nobody made it at home at our time in Viet Nam (before 1975). But soybean milk machines are now on the market at non-expensive prices. Probably some people are making it at home for freshness. It is typically served sweetened or plain; not salty. It has a fairly long history. Its popularity is increasing with the propagation of the soybean's benefits.

Question: Please tell me about yuba (the film that forms atop soymilk when it is heated) in Vietnam. It is often called beancurd skin or (when dried) beancurd sticks in Vietnamese cookbooks. Ans: It is called *phu chuc* (dried rolled yuba; dried yuba sticks) in north Viet Nam, and *tau hu ky* in south Viet Nam. [Called Fuchu or fuzhu in Chinese]. Fresh dry yuba is *tau hu ky tuoi* (it needs to be frozen or refrigerated and thawed before using) and regular dry yuba is *tau hu ky kho*.

All Vietnamese (north, center, and south) use only one language but there are differences in tone and accent in pronunciation, and also in the naming of some things and objects. The phonetic adaptation from Chinese or French words are also different, it may be the reason of Tau Hu Ky

for Fu Pi and Phu Chuc for Fu Zu.

Yuba is very popular, used in households, market stalls, and restaurants—especially in place of meat in vegetarian dishes and diets (influenced by Buddhism). It is sold in dry form, either unfried or fried, in a package at any market place. It is made only by special factories of Chinese origin. It is served as a wrapper for shrimp or meat, then fried. Also in soup—fried and served with broken steamed rice, and many other dishes at home and restaurants from selected to street corners. It is especially useful in the preparation of vegetarian dishes as a substitute for real meat. In one popular dish (called *Chan Thien Ky*), *tau hu ky* [yuba] is wrapped around minced shrimp to make a little packet, which is deep-fried; it is somewhat like the Cantonese dim sum item of shrimp in “tofu skin” but Viet people commonly serve it as a side dish on rice plates. Another popular yuba recipe in Vietnam is *Com Tam Tau Hu Ky Suon Bi* (Broken rice with yuba wrapped around shrimp, pork chop, and pork skin). Note: A Google search for “tau hu ky” will bring up many other recipes, images, and videos in Vietnamese and English. Yuba has a long history in Viet Nam, being introduced along with Chinese cuisine. Today its use is increasing along with the demand for new recipes and awareness of the benefits of consuming foods made from soybeans. Yet it is still not an item in everyday meals, but is reserved for special occasions, whether at home, in a restaurant, or at parties.

Question: When the French divided today’s Vietnam into Tonkin (north), Annam (middle) and Cochinchina (south), were there any cultural or language differences between the three? Were the divisions based on these cultural and language differences or not? Ans: No major difference in culture or language existed between the three regions at that time. The French made the division just for more efficiency and convenience in their colonization of Viet Nam. The French split Viet Nam up into many areas with different administrative systems so as to maintain the division, in order to make their occupation more efficient [and to try to prevent or limit the growth of nationalist or resistance movements].

Question: Please tell me about soybean cultivation in Vietnam. Ans: At this present time, because of the huge demand of soybean for edible oil and meal or cake for animal feeds, milk for human consumption, large areas in the South (east and west parts) are being used for cultivation of soybean. Production in the North and Central regions, due to limitation of available lands, may be sufficient only for regional production of Tuong and Tofu. Five different kinds of seeds are being introduced and tested and yield/ha are much better. Areas in the south-west (Mekong delta) will produce 3 crops per year.

For centuries soybeans have been cultivated in Viet Nam. Before the vegetable oil from soybean was introduced, each region produced what people need for daily consumption. This has been changed completely because of

the demand for soybean oil, milk, sub-products for animal feeds.

Soybeans are cultivated along the hillsides or high level areas not submerged by water, or in between the rice crops seasons. In the south western region (Mekong delta) where the field is submerged under the water every year for 4 months, farmers can now plant soybean after the rice crop harvest. They burn the hay, make holes and put the seeds down, cover with hay, let it grow, fertilize (chemical), use pesticides and herbicides. After 75-82 days they can harvest (still by hand), or use a machine to pull out the beans, then dry them. Viet Nam is presently divided into 62 provinces and towns; soybean is planted in 43 of them. At the present time, no information is available about large size farms using complete machinery like in the USA, but an area like the Mekong Delta may open up and introduce this kind of large farming process. The highlands in Viet Nam offer tremendous opportunities for development of modern farming (mechanized) but require enormous investments in knowledge, experience, and quick flexibility of action and funds. A state economy system cannot afford to let that happen, I would say.

Viet Nam still has to import 400,000 to 500,000 tons of soybean every year from China, Kampuchea [Cambodia], Thailand, Canada and the USA.

Today, soybeans are most widely used as a food in the south of Vietnam. My estimate of the amount of soybeans used in traditional foods (in descending order of popularity) is: Tofu, soy milk, tuong (a thick fermented soy sauce), chao (fermented tofu), soy sauce (liquid), tau hu ky (yuba).

Additional remarks: Tuong should be considered in this study, as tuong is a sauce made and used only in Viet Nam. It is made from rice and soybean, plus salt, in a very delicate way, serving as sauce for eating and cooking. Long ago the northern Viet term for soybeans was “dou,” as in Chinese. But soybeans were also called “dou tuong” because they were so widely used in Vietnam to produce the popular fermented sauce “tuong.” That’s why today the Vietnamese term for soy sauce is either “nuoc tuong” [sauce + tuong; a lingering reference] or “xi dau,” from the Cantonese phonetic.

All the Vietnamese (old generation, of north and center origin) living in the US, miss “tuong” very much as the Tuong Cu Da being sold in the market places here is not the real thing—in terms of composition, taste and flavor. The three best kinds of Tuong are: (1) Tuong Cu Da. (2) Tuong Ban, in north Viet Nam, and (3) Tuong Nam Dan, in Nghe An (central Viet Nam).

Note: Andrea adds: “These are really cool tuong sauces!” Address: San Clemente, California.

8505. *SoyaScan Notes*.2010. The Jakarta Post: The best source of current English-language information on soybeans and soyfoods in Indonesia (Overview). May 16. Compiled by

William Shurtleff of Soyinfo Center.

• **Summary:** Indonesia is the largest producer and user of soybeans in Southeast Asia. *The Jakarta Post* has digital archives of its daily issues going back to 1999. A search for soybeans or soybean gets hundreds of hits, as do searches for tempe, tempeh, tahu, tofu, kecap, soy sauce, kecap manis, etc.

The Jakarta Post, an English-language daily, is Indonesia's largest English-circulation, with an average circulation of about 50,000 copies. Launched on 25 April 1983, its head office is in Jakarta. The Jakarta Post is a small but influential newspaper oriented towards local English-speaking expatriates and the diplomatic community. In many ways, it acts as an unofficial mouthpiece of the Indonesian government into the international community. Go to: www.thejakartapost.com.

8506. Astuti, Mary. 2010. Re: When did the term "ketjap manis" first appear in Indonesia? Letter (e-mail) to William Shurtleff at Soyinfo Center, May 31. [Eng]

• **Summary:** "... according to me, ketjap manis has been used for centuries. I was born in 1948 and when I was a kid I used to eat rice gruel with ketjap manis. Bango soy sauce factory in West Java has been producing ketjap manis since 1932 and another factory in East Java has been making it for more than 100 years. The word 'ketjap' is now spelled 'kecap.' Best regards." Address: Indonesia.

8507. *SoyaScan Notes*. 2010. What words for "ketchup" appear in "Eighteenth Century Collections Online" (ECCO) documents (from Gale / Cengage)? How often and from when to when? (Overview). Aug. 4. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** An online database titled "ECCO," produced by Gale / Cengage contains more than 180,000 titles, mostly from Great Britain, from the period 1680 to 1799 in digitized, computer-searchable form.

The word "catchup" appears in about 284 documents from 1707 to 1800.

The word "ketchup" appears in about 211 documents from 1678 to 1800.

The word "catsup" appears in about 80 documents from 1735 to 1800.

The word "katchup" appears in about 29 documents from 1732 to 1795.

The word "catchups" appears in about 24 documents from 1718 to 1800.

The word "catchap" appears in about 18 documents from 1741 to 1798.

The word "catchop" appears in about 18 documents from 1737 to 1799.

The word "ketchups" appears in about 3 documents from 1792 to 1800.

The word "catsups" appears in about 2 documents from

1799 to 1800.

Clearly "catchup" is the most commonly used word. Other words that appear are "katchop" (in 8 documents), "katch-up" (in 2), "ketchop" (in 9), "ketchap" (in 3), "kichap" (in 1), "kitchap" (in 3), and "catsap" (in 1).

The word "soy" appears in quite a few of these documents near the word for ketchup.

8508. Heck, Wolfgang Rainer. 2010. Re: Brief history of Life Food GmbH—Taifun Tofurei. Letter (e-mail) to William Shurtleff at Soyinfo Center, Aug. 14. Updated on 18 Nov. 2011. 2 p.

• **Summary:** I have looked again at the early documents which show that Life Food was officially started on 10 April 1985. At that time the company only made sprouts. As you know, Klaus Kempff (who was born in 1935) started the first steps in producing Tofu in a cellar. At this time he grew sprouts and he sold a small range of sprout varieties at the big cathedral-market in Freiburg. He named his business Life Food.

In 1986 he first began experiments making tofu and after getting good results (your book helped him) he produced a few kilos of tofu and sold it to his sprout clients. He produced it together with the members of his "patchwork-family."

I first met Klaus in the summer of 1986 at a [drumming] workshop in Greece. After this workshop we went together to the Netherlands to have a look at a bigger soyfood production operation initiated by sanyassins [Disciples of Sri Rajneesh / Osho]; they made burgers and rolls with tofu and vegetables. When we came home he had trouble with the official bureau for hygiene in Freiburg. They did not allow production of food in a cellar.

Klaus was really shocked by this information and he had two options—to cancel everything or to move to a new location. At this time I found an empty store and proposed to Klaus that we use it together as the new production place. He invited me to go to work with him and his growing tofu business. Together with the people of his family we renovated the old store by ourselves. So we became partners. Now the tofu became legal and we could develop our equipment and process / technology.

In the beginning of 1987 I founded the enterprise Taifun (that was the exact name) as a personal company. I rented a small place in a market-hall in Freiburg, and sold tofu made by Klaus at the new production place. He delivered it to me every morning. I sold part of it as fresh tofu (stored in fresh, cold water in an aquarium), and I prepared salads and meals using the rest. For two years everyday I cooked a fresh tofu meal for about 50 people.

Note: When people tasted plain, unseasoned tofu they didn't like it at all. But when they tasted pan-fried tofu, seasoned with a little shoyu / soy sauce, almost all of them liked it very much.

Klaus and his crew produced the tofu for me and for other gastronomic businesses. He developed the smoked- and the sprouted soy-tofu. The big idea was to bring Life Food and Taifun together some day as a GmbH (this is typical German and maybe similar to a corporation).

In 1989 the space for the production became too small and we had some trouble with the neighbours. The smell of the tofu and the fried tofu products was very intense. So we decided to relocate again; we rented a new production-hall in the industrial area of Freiburg. Now we had a good place and we were able to process 111 kg (244 lb; 4.5 sacks) of soybeans a day. This means about 190-200 kg tofu a day. So we produced 1,000 kg a week. I quit my job in the market hall. We tried to produce for the organic shops in our region. Taifun became the brand name and Life Food the name of the organization. On 29 December 1989 we [Wolfgang, Klaus Kempff, and Silvia Notbohm-Kempff] integrated the brand name Taifun into our organisation name—as a result we created the corporation Life Food GmbH / Taifun-Tofuprodukte.

At this time we had 400 square meters of floor space and we developed a big range of different tofu specialties. There was also a change in the crew. Klaus' "family people" [including Silvia Notbohm-Kempff] stopped working for the company and in Feb. 1990 Günter Klein joined Life Food.

Now we started to work more professionally and we built up an efficient organisation for all the departments.

In 1991 at age 56, Klaus Kempff told us that he also wanted to realize other things in his life, in part because the speed of development in Life Food was very fast. He worked on the development of his own awareness and of healing methods. He soon focused on healing work.

On 9 Dec. 1991 Klaus quit his job as managing director of the corporation (*Geschäftsführer*). At this time Günter Klein and I became equal full partners (*Gesellschafter*); we made a contract with Klaus and bought his shares of the corporation. Klaus went on to do some social projects with older people.

At the end of 1994 we moved into Bebelstrasse 8, which is our present location—in Freiburg's Hochdorf Industrial Estate. Here we found a big production place with more than 2,600 square meters of floor space. First we rented it and 4 years later we had the chance to buy the land. We started in the Bebelstrasse making about 1,200 kg per day of tofu.

In January 1995 Alfons Graf entered the company.

In 2004 Günter Klein asked for a sabbatical year and went for this time to the Amazon to experience shamanism. One year later, he came back with new ideas.

In 2007 we invested in a Logistic Center for our cool products 400 meters from the production place. Our own shuttle bus is running there 10 times a day with the products and other things.

In October 2009 Günter Klein left the company; he decided to follow his interests related to shamanism totally.

2010 Aug. 14—We now make about 14,400 kg/day of tofu—about have 12 times more than we made in 1994. Günter Klein is the plant manager—in charge of production and equipment. I develop the organisation and products, and manage the sales activities.

This year Klaus Kempff visited us two or three times. He is really proud of the present situation, because his former vision of less meat and more vegetable protein has become much more a reality. Klaus is now 74 years old and always engaged in social action and very active against genetically engineered plants and animals—GMO.

Update: 18 Nov. 2011—Until November 2011 I worked together with 3 heads of the business units. Each one of them is responsible for some departments. In early November 2011 we arranged the first step of changing the organisation once more. Since 1 November 2011 Alfons Graf has worked together with me as co-managing director (*Geschäftsführung*). Meanwhile we have about more than 160 employees with 35 different Tofu-specialities. We need about 2000-2200 metric tons of soybeans a year and we produce about 70 tons of tofu a week and 40 different tofu specialty products. This year we had 1,400 tons of soybeans from Germany, France and Austria. We are expanding this time and next year is the 25th birthday of the brand Taifun.

I hope this information will help you to answer your questions. Thank you for the Rilke words. By the way: I like Rainer Maria Rilke very much and maybe you can understand the words which are written down in my office: *... es handelt sich darum, alles zu leben.*

*Wenn man die Fragen lebt,
lebt man sich allmählich,
ohne es zu merken, eines fremden Tages
in die Antwort hinein.* Address: Managing Director, Life Food GmbH.

8509. Kikkoman Corporation. 2010. Annual report 2010. Year ended March 31, 2010. 250 Noda, Noda-shi, Chiba 278-8601, Japan. 41 p. 28 cm. [Eng]

• **Summary:** Consolidated net sales decreased 30.8% to \$3.071 billion, operating income rose 3.9%% to \$226.7 million, and net income increased 213.2% to \$92.49 million. Note: Dollar values may have changed at different percentage rates due to changing foreign exchange rates.

Page 2 is titled "Kikkoman exhibits at Japan industry pavilion, Expo 2010, Shanghai, China." A *ryôtei* is a Japanese restaurant that serves *kaiseki-ryori*, an ultimate form of Japanese cuisine. Kikkoman's booth was named *Ryôtei Murasaki*.

A photo (p. 3) shows Yuzaburo Mogi (Chairman of the Board and CEO) and Mitsuo Someya (President and COO). Address: Noda, Japan.

8510. Andoh, Elizabeth. 2010. *Kansha: Celebrating Japan's vegan and vegetarian traditions*. Berkeley, California: Ten

Speed Press. vii + 296 p. Illust. (color photos by Leigh Beisch). Index. 25 x 25 cm.

• **Summary:** A beautiful book, and a major contribution toward understanding Japanese cuisine, culture, and the pervasive spirit of gratitude / appreciation. In Japanese, *kansha* means appreciation or gratitude. Contents: Acknowledgments. Introduction: A historical perspective on *kansha* (*shojin ryori* is vegan), recent developments, putting theory into practice, practicing *kansha*, meal planning, some final thoughts, a note about language. Rice. Noodles. Stocks and soups. Fresh from the market. The well-stocked pantry. Mostly soy. Tuskémono [pickles]. Desserts. A guide to the *kansha* kitchen. A catalog of tools and techniques. A catalog of ingredients [glossary]—with entries that include the following: daikon, edamame, flours (kinako), kudzu, herbs, spices and seasonings (ao nori, sansho, shiso, togarashi, wasabi), kabocha, dried beans (adzuki [sic], daizu {dried soybeans—the most important legumes in the Japanese pantry}), dried soy foods [sic] (hoshi yuba {dried yuba}, koya-dofu / kori-dofu). Dried vegetables from the land (dried shiitake mushrooms). Dried vegetables from the sea (arame, hijiki, kanten, kombu [konbu]). Dried wheat gluten. Kasu (sake dregs). Konnyaku and shirataki. Matcha. Miso (red miso, white miso, genmai miso). Mushrooms. Natto. Nigari. Nuka. Okara. Pickles. Rice. Roots and tubers. Saké. Salt. Sesame (seeds, sesame paste, sesame oil). Soy milk [sic]. Soy sauce. Sweeteners (ama-zaké, kuro-zato, mirin, mizu amé). Tofu (firm tofu, silken tofu, grilled tofu, thin fried tofu {abura agé}, thick fried tofu {atsu agé}).

Tsukemono (pickles). Umeboshi (pickled plums). Vinegar. Yuzu. Yuba.

Note: This is the earliest English-language document seen (May 2012) that uses the term “thin fried tofu” to refer to abura agé / deep-fried tofu pouches, or the term “thick fried tofu” to refer to atsu agé / deep-fried tofu cutlets.

Contains many recipes that use tofu, miso, soy sauce, edamame, natto, etc. Address: Japan.

8511. **Product Name:** San-J Orange Sauce: Asian Glaze & Stir Fry.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 804-226-8333.

Date of Introduction: 2010.

Ingredients: Organic sugar, water, tamari soy sauce (water, soybeans, salt, alcohol), orange juice concentrate, rice vinegar, apple cider vinegar, tomato paste, honey, arrowroot, garlic powder, canola oil, xanthan gum, red pepper.

Wt/Vol., Packaging, Price: 10 fl oz bottle.

How Stored: Shelf stable.

New Product–Documentation: E-mail from Misako Binford of San-J. 2012. May 8. An attached Excel spreadsheet gives that date each San-J product was first sold commercially, starting in 1987. This product was first sold in

2010.

Two labels sent by Misako Binford of San-J International. 2012. May 14. Red, gold, white, and black on orange. Outline of an Asian pagoda. The label now reads as shown above. One logo on the front panel: Certified Gluten Free. “New. Make authentic orange chicken at home.”

8512. Nagai, Toshiro; Tamang, Jyoti Prakash. 2010. Fermented legumes: Soybean and non-soybean products. In: Jyoti P. Tamang and K. Kailasapathy, eds. 2010. Fermented Foods and Beverages of the World. Boca Raton, Florida: CRC Press / Taylor & Francis. xii + 448 p. See p. 191-224. [125 ref]

• **Summary:** An ethnic fermented food is one used by a certain ethnic group Contents: Introduction. Fermented soybean foods: Bacilli-fermented, sticky and nonsalty soybean foods (natto, kinema, thua nao, chungkokjang, hawaijar, tungrymbai, aakhone, bekang, perayaan, pepok, sieng), mold-fermented soybean foods (tempe, douchi, sufu, doenjang, miso, shoyu / soy sauce, tauco).

Fermented non-soybean legume foods: Dawadawa (preparation and culinary, microbiology), ugba (preparation and culinary, microbiology), maseura (preparation and culinary, microbiology), wari (preparation and culinary, microbiology), oncom (preparation and culinary, microbiology), dhokla and khaman (preparation and culinary, microbiology). Conclusion.

Among the Bacilli-fermented, sticky and nonsalty soybean foods, natto, for example, has the following contents (p. 194-96): Introduction, history, preparation and culinary, socioeconomy, microbiology and food safety, biochemistry, nutritional composition, and functional properties. Kinema and thua-nao similarly subdivided, however some lesser-known soyfoods and some non-soy foods are described in less detail.

The Introduction (p. 192-93) discusses Dr. Tamang's revised “KNT triangle” theory, with two maps. “Within the proposed triangle-bound countries, many fermented sticky nonsalty soybean foods are consumed by the different ethnic groups of people in Cambodia, Laos, Vietnam, Darjeeling hills and Northeast states of India, eastern part of Nepal, southern part of Bhutan, Myanmar, and southern parts of China (Figure 6.2). Beyond this hypothetical ‘KNT triangle’ there is no report of kinema-like products that are sticky and ammonia-flavored fermented soybean foods, and the proposed ‘KNT triangle’ does not include salted, nonsticky and non-bacilli fermented soybean products such as *tempe*, *miso*, *sufu*, *soy sauce*, etc. (Tamang 2010).”

Fermented soyfoods can be classified in various ways: (1) Those fermented by bacteria (primarily *Bacillus subtilis*), such as natto, thua nao, kinema, etc. (all have a characteristic stickiness), and those fermented by molds, such as soy sauce, miso, tempeh, etc. (2) Nonsalted (those to which no salt has been added, such as natto, kinema, tempeh), and salted

(such as soy sauce, miso, douchi, etc.) (p. 194). Pepok (p. 207) is an ethnic fermented soyfood from northern Myanmar (formerly Burma). To make pepok: Soak soybeans in water overnight, drain, and bring to a boil. Then wrap in leaves and allow to ferment for 2-4 days. Mash the fermented beans with salt and hot chili pepper, roll out into disks, and dry in the sun. Use as a seasoning or consume after roasting.

Sieng (p. 207) is a traditional fermented soyfood from Cambodia. To make sieng: Soak soybeans in water overnight, drain, and bring to a boil. Spread in shallow bamboo baskets and allow to ferment naturally for 2 days by bacteria adhering to the baskets or suspended in the air. Then immediately transfer the fermented soybeans to salt water and soak for 5-7 days; occasionally tree sap or enzymes are added to the salt water. Use with salt and spices as a seasoning.

Tables: (1) Nutritional composition of boiled soybeans (as a control), natto, and tempe [incl. vitamins, minerals, and fatty acids]. (2) Nutritional composition of kinema and raw soybeans.

Figures (photos unless described otherwise): (1) Map of the natto triangle (based on Nakano 1972). (2) Stylized map of the KNT (kinema-natto-thua nao) triangle. (3) Chopsticks lifting up natto from a polystyrene paper package. *Bacillus subtilis* (natto) produces a polyglutamate, a viscous material, which is called *ito*, meaning “string,” in Japanese. (4) Natto in a classical package made of rice straw. (5) A bowl of kinema—freshly fermented. (6) Kinema curry in a bowl and on a plate. (7) Thua nao in a plastic bag, with the label in Thai. (8a) The front of a package of chungkokjang, labeled in Korean, with a photo on the label of the product in a thick spicy stew (*chigae*). (8b-c) Top view and side view of a mound of chungkokjang. (9a) The front of a package of Rusto’s Tempeh. (9b-c) Top view and side view of a cake of tempe. The spaces between soybean cotyledons are packed tightly with white mycelia of *Rhizopus oligosporus*. Address: 1. Genebank, National Inst. of Agrobiological Sciences, Tsukuba, Japan; 2. Food Microbiology Lab., Sikkim Government College, Sikkim Univ., Gangtok, Sikkim, India.

8513. Nishimura, Mayumi. 2010. *Mayumi’s kitchen: Macrobiotic cooking for body and soul*. Tokyo, New York: Kodansha International. 157 p. Illust. (mainly color). Index. 26 cm. [15 ref]

• **Summary:** This is Mayumi’s first English-language book. Madonna (of worldwide musical fame) wrote her a letter that appears in this book (p. 7): “Dear Mayumi, Congratulations on your fabulous book!... Not only are you the best chef in the world, you are part of our family, and we thank you for your love and warmth.

“In the seven years you lived with us and cooked for us, your amazing food helped me to be a happier, healthier person, balanced in body and mind. I feel better than I did 20 years ago. I am very grateful to you for this.”

The index of this stylish book contains 24 entries for tofu (some in the chapter titled “Protein dishes”—p. 97-104), 20 for miso, 14 for seitan, and 11 for tempeh. How nice to find a Japanese cookbook that calls for the use of brown rice (basic recipe, p. 67).

The centerpiece of Mayumi’s book is her 10-day detox diet.

Also contains specific recipes for: Nabe (with “2 pieces abura-age {deep-fried tofu skins}, halved or cut open on one side to form pouches,” p. 67). Soybean and millet croquettes with beet sauce (with “15 oz {425 gm} canned soybeans, drained,” p. 84). Seitan pot stickers (with seitan and tofu, p. 113). Smoked tofu salad (with “7 oz {200 gm} firm tofu,” p. 104). Black soybean tea (p. 113).

The Glossary (p. 140-49) includes entries for: abura-age, adzuki beans, brown rice, brown rice mochi, edamame, hijiki, kombu, koyadofu, kuzu, mirin, miso, nori, rice milk, rice syrup, seitan, sesame oil, shiso, shoyu (incl. soy sauce and tamari), soba, soy meat nuggets (TVP), soymilk, tahini, tempeh, tofu, umeboshi plum, umeboshi plum paste, wakame, wasabi, whole-wheat flour.

About the author (inside rear dust jacket): “Mayumi Nishimura was born on the small island of Shinojima in Aichi Prefecture [in Mikawa Bay Quasi-National Park]. In 1982 she moved to the U.S. and began studying macrobiotics under Michio Kushi—the leading authority in the field—at the Kushi Institute. Later she worked at the school as head cooking instructor. In 2001 Mayumi became Madonna’s private macrobiotic chef, joining her on her Drowned World Tour. Between 2001 and 2008 she cooked for the superstar full-time. Currently Mayumi travels between Japan, where she writes and lectures on macrobiotics, and the U.S.” She has written four books published in Japanese. A large color photo of Mayumi appears on the front dust jacket.

The book is dedicated to Mayumi’s children, Lisa and Norihiko, to her parents, and to Michio Kushi and his wife, Midori.

8514. Quinlivan, Rachel. 2010. *Cooking light: Way to cook vegetarian*. Birmingham, Alabama: Oxmoor House. 424 p. Illust. (color). 24 cm.

• **Summary:** An excellent, gorgeous vegetarian cookbook, printed entirely on semi-gloss paper with many color photos.

One very creative chapter (p. 206-43) is titled “Tofu & tempeh.” The contents (not including recipes): Tofu (description). Tofu varieties: Silken tofu, water-packed tofu, flavored tofu. Tempeh. Tempeh varieties (with a good color photo of each): Wild rice, soy, flax, garden vegetable, multigrain, original. How to press tofu. How to bread and pan-fry tofu. How to fry in a healthier way. How to saute tofu. How to marinate tofu. How to broil tofu. How to prepare lemongrass. How to peel and grate gingerroot.

The index contains 18 entries for tofu, 9 for tempeh, 2 for edamame, 2 for soy and 1 each for soy sauce (low-

sodium tamari), black bean garlic sauce (such as Lee Kum Kee) and seitan. Address: R.D., editor.

8515. Reinfeld, Mark; Murray, Jennifer. 2010. The 30 minute vegan's taste of the East: 150 Asian-inspired recipes—from soba noodles to summer rolls. Cambridge, Massachusetts: Da Capo Press. xix + 266 p. Plus 16 unnumbered pages of color plates. Illust. (color photos). Index. 24 x 18 cm. [28 ref]
• Summary: The index contains 22 entries for tofu, 8 each for tempeh and for seitan, 3 for miso, 2 for edamame, and 1 each for tamari and for soy sauce (Noodles with sweet soybean sauce, pad siew).

Includes a good glossary with entries for miso, nama shoyu, seitan, shoyu, soy milk, soy sauce, tamari, tempeh, tofu Address: 1. Founding chef, Blossoming Lotus Restaurant, and author; 2. Author and teacher. Both: Kaua'i, Hawaii.

8516. Richmond, Simon. 2010. Lonely Planet Korea. 8th ed. Footscray, Victoria, Australia; Oakland, California: Lonely Planet. 440 p. See p. 188. Illust. (some color). Maps (some color). Index. 20 cm.

• Summary: This is a guidebook to Korea. including North Korea. 110 maps. Korean characters are given for the names of most places and foods—which we find very helpful. “In the year 2000 the Korean government adopted a new method of romanising the Korean language. Most of the old romanisation system was retained. The new system is used throughout this book (p. 411)

Ganjang (soy sauce) is mentioned on pages 68, 69, 70, 75, 178 and 188.

Page 188: In Gangwon-do, “Gangneung’s prized specialty is *sundubu* (3 Kc = Korean characters given), soft or uncurdled tofu [soymilk curds] made with sea water in Chodang, the ‘tofu village.’ At its plainest, *sundubu* is served warm in a bowl, with *ganjang* (soy sauce) on the side. It can also be prepared in *jjigae* (5 Kc; stew) or *jeongol* (5 Kc; casserole).”

In Chodang, there are about 20 restaurants, one of the best-known of which is Chodang Halmeoni.

Sundubu (soymilk curds or soft uncurdled tofu) is mentioned on pages 72, 78, 186, 188 and 189.

Doenjang (fermented soybean paste) is mentioned on pages 56, 68, 70, 78, 134, 188, 246, 257 (spelled *twenjang*) and 346.

Doenjang jjigae (soybean paste stew) is mentioned on pages 78, 134, 188, and 246.

Tofu (*dubu*) is mentioned on pages 70-74, 78, 127, 134, 136, 179, 188, 294, and 388.

Soft tofu is mentioned on pages 204, 257, 299.

8517. Sugawara, Etsuko. 2010. Fermented soybean pastes miso and shoyu with reference to aroma. In: Jyoti P. Tamang and K. Kailasapathy, eds. 2010. Fermented Foods and

Beverages of the World. Boca Raton, Florida: CRC Press / Taylor & Francis. xii + 448 p. See p. 225-45. [29 ref]

• Summary: Contents: Introduction. Aroma compounds of miso and shoyu. Brewing of miso. Brewing of shoyu. Identification of important aromatic compounds that exist together in miso and shoyu. Changes in the concentration of HEMF during fermentation. Formation mechanism of HEMF by yeast cultivation in model media. Effects of the type of yeast and growth conditions on the formation of HEMF. HEMF formation pathway by yeast in miso and shoyu (Contribution of ribose and glycine to HEMF structure, contribution of glucose to the ethyl group of HEMF). Conclusion. Acknowledgments.

HEMF is 4-hydroxy-2(or 5)-methyl-3(2H)-furanone.

More than 300 aroma components have been determined in shoyu and miso.

Figures show: (1) Quantitatively important aroma compounds in miso and shoyu: 1-Hexanol, Maltol, 2-Furfural, HDMF, 2-phenylethanol, HEMF, 4EG(4-ethylguaiaicol), Methionol. (2) Simplified manufacturing process [flow sheet] for a fermented soybean paste (red salty rice miso) (with the halotolerant yeast *Zygosaccharomyces rouxii* and/or *Candida versatilis* added). (3) Simplified manufacturing process [flow sheet] of shoyu (with the halotolerant yeasts *Zygosaccharomyces rouxii* and *Candida versatilis* added). (4) Effects of nitrogenous compounds in the media of the formation of HMF by the yeast. C1: polypeptone. C2: casamino acid. C3: glutamic acid. C4: threonine. C5: serine. C6: alanine. (5) Effects of medium preparation on the formation of HMF by *Z. rouxii* 061. (6) Effect of glucose concentration and NaCl concentration in the medium on the formation of HEMF by *Z. rouxii* 061. (7) Hypothetical formation pathway of HEMF by yeast. Note: The title of this chapter seems unusual: miso is a fermented soybean paste but shoyu (soy sauce) is a liquid. However the author states (p. 227): “The original meaning of *miso* in Japanese is ‘immature shoyu.’” Address: Faculty of Education, Iwate Univ., Morioka, Japan.

8518. Tamang, Jyoti Prakash. 2010. Himalayan fermented foods: Microbiology, nutrition, and ethnic values. Boca Raton, Florida: CRC Press. xix + 295 p. See p. 65-78. 230-31, 233. Illust. 25 cm. [584 ref]

• Summary: This is a very interesting, original, well researched and well written book. It is also the best source of detailed, well documented information on kinema and its close relatives seen to date.

The word Sanskrit word Himalayas means literally “abode of the snows.” This region is the home of over 65 million people. Those in the eastern Himalayas are of Mongolian ethnicity and ancestry.

Chapter 3, titled “Fermented legumes,” includes a section titled “3.1 Important fermented soybean foods” which states (p. 65): “Some of the common ethnic nonsalted

sticky fermented soybean foods of the eastern Himalayas are *kinema* (Nepal, Darjeeling hills, Sikkim, and South Bhutan), *hawaijar* (Manipur), *tungrymbai* (Meghalaya; food of the Khasi and Garo peoples), *bekang* (Mizoram; food of the Mizo people), *aakhone* (also called *axone*, Nagaland; food of the Sema Naga), and *peruyyan* (Arunachal Pradesh). Manipur, Meghalaya, Mizoram, Nagaland, and Arunachal Pradesh are small states in northeastern India.

All of these foods are similar to *kinema*.

Note: As a guide to the Seven Sister states of North East India, we are including a color map of the area created for Soyinfo Center.

For all these six foods is given: The name of the food, a close-up photo of the food, indigenous knowledge of preparation, a flow chart showing the indigenous method of making the food, culinary practices (how the food is prepared / cooked and eaten), economy (its role in the local economy), microorganisms (dominant and secondary).

Section 3.3 is “Microbiology” (of fermented legumes): Kinema (microorganisms, source of inoculation in kinema production optimization of fermentation period, in situ fermentation of kinema, selection of starter culture, monoculture fermentation of kinema, development of pulverized starter for kinema production, phylogenetic similarity of *Bacillus* strains from Asian fermented soybeans), other fermented soybean foods of north east India.

Section 3.4 is “Nutritive value” (table 3.1 compares the nutritional composition of raw soybean and kinema). And section 3.5 is “Conclusion.”

The long and very interesting section (9.1.1) on the “Antiquity of kinema” (p. 230-34) states that it is a food of the Kirat ethnic group (to which the Limboo belong) of eastern Nepal. The origin of the word “kinema” can be traced back to the word *kinaba* of the Limboo language (*ki* = fermented; *namba* = flavor). It is not clear whether *kinema* appeared first, then was disseminated and diversified, or vice versa. The Limboo believe that their discovery and domestication of the soybean (which they named *chembi*) is mentioned in one of their oral myths known as *mundhuns*. This myth, which is described here in detail, might have been written between 2500 and 100 BC (p. 231).

Kinema is made by fermenting whole soybeans, without inoculation, with strains of *Bacillus subtilis* bacteria. It is alkaline in nature / pH, has a sticky, stringy texture and a strong flavor.

Natto [salty natto, not itohiki natto] is believed to have been introduced to Japan from China during the Nara period around 710-714 AD (Ito et al. 1996; Kiuchi 2001). Kinema might have originated in east Nepal around 600 B.C. to 100 A.D. during the Kirat dynasty.

Products closely resembling kinema are popular foods in many non-Brahmin communities in the eastern Himalayas. “The Lepcha [the aboriginal inhabitants of today’s Sikkim]

call it *satlyangser*; the Tibetans and Bhutia [of Bhutan and Sikkim] call it *bari*; the Khasi [of Meghalaya] call it *tungrymbai*; the Meitei [of Manipur] call it *hawaijar*; the Mizo [of Mizoram] call it *bekang*; the Sema Naga [of Nagaland] call it *aakhone*; and the Apatani [of Arunachal Pradesh] call it *peruyyan*.”

Soybean products closely resembling kinema outside of the Himalaya region are *natto* of Japan, *chungkokjang* of Korea, and *thua-nao* of Thailand [From Google Books Preview].

Dr. Sasuke Nakao (1972) coined the term “natto triangle,” but Dr. Tamang proposes that the hypothetical triangle be renamed “Kinema–Natto–Thua-nao triangle” (or KNT triangle).

Note: Four facts support Dr. Tamang’s elegant new triangle:

(1) Indonesia and its mold-fermented tempeh should not have been part of the original natto triangle.

(2) Nakano (1972) guessed that natto might have come to Japan from Java during the Muromachi period, however extensive research on natto and tempeh after 1972 offers no support to his guess.

(3) Many new relatives of natto have been discovered since 1988, many of them by Dr. Tamang and co-workers. All of these (except the relatives of dawadawa made from soybeans found in West Africa) fall within the KNT triangle.

(4) No mold-fermented soyfoods—such as tempeh, miso, soy sauce, jiang, or fermented tofu—fall within the new KNT triangle.

An illustration / map (Fig. 9.1) shows this improved triangle with Japan (natto), Nepal-India-Bhutan (kinema), and Thailand (thua nao) at its three vertices / corners; it also includes chungkokjang (Korea), pepok (Myanmar), sieng (Thailand), and [incorrectly, mold-fermented] *douche* [*douchi*] from south China. These mildly alkaline, sticky fermented foods are popular among the peoples of Mongolian origin. This may be due to their typical flavor called *umami* (Kawamura and Kara 1987). This flavor is developed during the hydrolysis of soy protein (by protease enzymes) into amino acids during fermentation. Have people of Mongolian origin evolved or developed particular senses which incline them to enjoy the umami flavor? In the eastern Himalayas green vegetable soybeans are also boiled and eaten.

Section 10.3, “Commercialization through ethnic food tourism,” suggests that just as tourists visit the vineyards of France, tempeh shops in Indonesia, and artisans or factories that make shoyu or sake in Japan, there are potential tourist sites for experiencing how traditional foods are made in the Himalayan villages. For kinema, try visiting Aho village in Sikkim.

About the author (p. xix): A good biography and portrait photo are given. In the “Acknowledgments” (p. xvii) he writes: “I am thankful to my wife Dr. Namrata

Thapa for constant support and technical assistance in the preparation of this book. Over the past 16 years the team of brilliant Ph.D. students that I have recruited from the Food Microbiology Laboratory, Sikkim Government College, Gangtok, has been the real driving force in researching and identifying the scientific mechanisms of ethnic Himalayan fermented foods.” He then lists their names. Address: Food Microbiology Lab., Sikkim Government College, Gangtok, Sikkim 737 102, India.

8519. Tamang, Jyoti Prakash; Kailasapathy, Kasipathy. eds. 2010. *Fermented foods and beverages of the world*. Boca Raton, Florida: CRC Press / Taylor & Francis. xii + 448 p. Illust. 25 cm. Series: Food science and technology.

• **Summary:** Includes a directory of “Contributors” (p. xi-xii). Among the many interesting, carefully researched and documented chapters, those that mention soy include: Chapter 1. “Dietary culture and antiquity of fermented foods and beverages,” by J.P. Tamang and D. Samuel (p. 1-40, for soy see the section titled “Fermented soybeans and non-soybean legumes,” p. 11).

Chapter 2. “Diversity of fermented foods,” by J.P. Tamang (p. 41-84, for soy see the section titled “Fermented soybeans and non-soybean legumes,” p. 50-52, plus p. 71).

Chapter 6. “Fermented legumes: soybean and non-soybean products,” by Toshirou Nagai and J.P. Tamang (p. 191-224, cited separately).

Chapter 7. “Fermented soybean pastes miso and shoyu with reference to aroma,” by Etsuko Sugawara (p. 225-45, cited separately).

Chapter 15. “Health aspects of fermented foods,” by Mariam Farhad, K. Kailasapathy, and J.P. Tamang (p. 391-414).

On page 282 is a section about viili, the Finnish fermented milk product, traditionally made in the summer as a way of preserving excess milk.

Table 12.4, “Some important vegetable foods of Africa” (p. 326) mentions dawadawa or iru, produced and consumed throughout most of West Africa, especially in the northern parts. It was traditionally made from the African locust bean (the seed of the leguminous tree *Parkia biglobosa*) but is now also widely made from soybeans. The bacterial fermentation is caused mainly by *Bacillus subtilis* and *Bacillus licheniformis*.

A flow sheet is given (p. 333) for the preparation of dawadawa / iru. A bibliography of the writings of the Nigerian microbiologist S.A. Odunfa appears on p. 348. Address: 1. Food Microbiology Lab., Sikkim Government College, Sikkim Univ., Gangtok, Sikkim, India; 2. School of Natural Sciences, Univ. of Western Sydney, Sydney, NSW, Australia.

8520. Tamang, Jyoti Prakash; Samuel, Delwen. 2010. *Dietary cultures and antiquity of fermented foods and*

beverages. In: Jyoti P. Tamang and K. Kailasapathy, eds. 2010. *Fermented Foods and Beverages of the World*. Boca Raton, Florida: CRC Press / Taylor & Francis. xii + 448 p. See p. 1-40. [188 ref]

• **Summary:** Contents: Cultural foods: Hindu foods, Buddhist foods, Christian foods, Muslim foods. World dietary culture: Use of hands, use of chopsticks, use of cutlery, evolution of dietary culture. Antiquity and cultural aspects: Fermented vegetables, fermented soybeans and non-soybean legumes, fermented cereals, fermented milks, fermented fish, fermented meats, fermented beverages and alcoholic drinks. Conclusion.

Section 1.3.2 titled “Fermented soybeans and non-soybean legumes,” begins with a concise and well documented paragraph on the origin of the domesticated soybean in the eastern half of north China around the 11th century BC around the end of the Shang dynasty (ca. 1700 to 1100 BC), then its dissemination / spread from this primary soybean gene pool to central and south China, and the Korean peninsula. The soybean then spread to Japan, and throughout Southeast Asia and into northern India during the following centuries.

The next paragraph discusses the two earliest Chinese fermented soyfoods: *chi* (*shi*) [fermented black soybeans] and *jiang* (*chiang*) [Chinese-style miso]. *Chi*, now known as *douchi* was “next to salt use in China.”

Note: Actually, salt was rarely used directly to season food in China; in the early days *jiang*, and later soy sauce had that honor. Yet salt was a major ingredient in both *jiang* and soy sauce.

Recipes for making 3 different types of *chi* and 14 different types of *jiang* are given in the *Qimin Yaoshu* (6th century B.C.). Soy sauce is presently an essential seasoning in Chinese cooking, “but it was not an ancient and deliberate preparation. It developed as a by-product of some *jiang* relishes and did not become of culinary importance until the Song dynasty (960-1279) (Sabban 1988).”

There follows a discussion of the early development of fermented soyfoods in Japan, including the Taiho Laws (AD 701) and the *Engishiki* (AD 906). Salted fermented black soybeans, which originated in China, took root in central Japan, where they were known by various names such as *hama-natto* and *daitokuji-natto*; in Taiwan they were known as *in-shi* (Yokotsuka 1991).

The subsequent few paragraphs contain three statements which we believe are incorrect and are not found in the sources cited: (1) “*Natto*, a fermented sticky soybean, was introduced to Japan from China by Buddhist priests during the Nara period around AD 710-794 (Ito et al. 1996, Kiuchi 2001 [p. 9]). Note: This statement is based on a misinterpretation of the documents cited and on the confusion resulting from the fact that the Japanese word “*natto*” can be used to refer to two very different foods, *natto* and fermented black soybeans. Both documents are referring

to the introduction to Japan (by a Buddhist priest) of salted, fermented black soybeans (*douchi*) and not of *itohiki* natto. For example, Kiuchi (2001, p. 9, written in English) states: “The two main varieties of *natto* [in Japanese] are *itohiki-natto* and *shio-kara-natto*, which [referring only to the latter] was introduced to Japan from China during the Nara period (790-794) by a Buddhist priest.”

(2) “The production of shoyu and miso in China was recorded around 1000 BC, with the transfer of the indigenous knowledge to Japan happening at around AD 600 (Yokotsuka 1985). Yokotsuka is perhaps the world’s leading authority on this subject. However nowhere in this excellent chapter by Yokotsuka can we find anything that would justify the surprising statement (especially the date 1000 B.C. for shoyu) above.

(3) “Tempe made in present day Indonesia was originally introduced by ethnic Chinese centuries ago.” No source is cited. Address: 1. Food Microbiology Lab., Sikkim Government College, Sikkim Univ., Gangtok, Sikkim, India; 2. Div. of Nutritional Sciences, Kings College London, London, United Kingdom.

8521. Tamang, Jyoti Prakash. 2010. Diversity of fermented foods. In: Jyoti P. Tamang and K. Kailasapathy, eds. 2010. *Fermented Foods and Beverages of the World*. Boca Raton, Florida: CRC Press / Taylor & Francis. xii + 448 p. See p. 41-40. [228 ref]

• **Summary:** In the section titled “Types of fermented foods” (p. 46-67) is a subsection on “Fermented soybeans and non-soybean legumes.” About 90% of fermented legumes are soybean-based foods while the rest are non-soy. Fermented soyfoods have long been made in Asia, especially by Chinese, Nepalis, Japanese, Thais, Koreans, Indonesians, and many minor ethnic groups. Consumption of ethnic fermented soyfoods “is not part of the traditional food culture of non-Mongoloid races.”

Table 2.2, “Some fermented legume products of the world,” has six columns: (1) Name of fermented food (alphabetical). (2) Substrate (e.g., soybean, Locust bean). (3) Sensory property and nature (e.g., alkaline, sticky, paste). (4) Culinary (e.g., side dish, condiment). (5) Microorganisms. (6) Country. Those having soybean as a substrate are aakhone, bekang, chee-fan, Chiang [jiang], chungkokjang, douchi, doenjang, furu, hawaijar, kecap, ketjap, kinema, meitauza, meju, miso, natto, pepok, peruyaan, sieng, shoyu, soy sauce, sufu, tauco, tempe, thua nao, tofu si? [China, Japan], and tungrymbai. Address: Food Microbiology Lab., Sikkim Government College, Sikkim Univ., Gangtok, Sikkim, India.

8522. Young, Jean Allison. 2011. Chronology of interests in macrobiotics and work with Erewon (Interview). *SoyaScan Notes*. Feb. 10. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** Chronology: 1945 June 1—Jean is born in St. Paul, Minnesota. She has two brothers. Her father was killed in a traffic accident when she was 18 months old. Her mother went into the hospital for about 2 years. Her mother later came back into their lives, but her father’s parents were suing for custody of the children. So her mother married her stepfather (who turned out to be a nice guy) and in 1949 the two of them moved with the 3 children to Los Angeles when Jean was age 4—to get away from the custody lawsuit.

1959 Aug. 22—The family moves to the Hawaiian Islands the day they became a state of the USA. Jean goes to high school in Hilo, on the island of Hawaii, and graduates in 1963 with honors.

1963 early summer—Jean leaves Hawaii to work for the summer at Army/Navy Supply House in San Francisco, California, as a secretary. In the fall she enters San Francisco State College while continuing her job part time during the fall. During college she also worked in several temporary jobs ranging from tax work and insurance to general office work. During 1965-66 she worked part time at Wilson’s Advertising Agency in San Francisco as a secretary. She did not graduate from college (this was a time of turmoil, strikes, and protests at San Francisco State) but she does have a 4½ year education in Liberal Arts. Like many students, Jean did participate in the protests.

At the college, Jean was involved in acting, and through that she met both Paul Hawken and Bill Tara, who were doing theater in San Francisco and the psychedelic “drug scene” at that time.

1963-1967—Jean, Paul Hawken and Bill Tara grew to know one another well during the six years when they lived (often together) in San Francisco. In the early spring of 1966, shortly after rock concerts began at the Fillmore Auditorium [at the corner of Fillmore St. and Geary Blvd.] in San Francisco, they rented an old abandoned firehouse [fire station] at 3767 Sacramento Street, north of the Haight-Ashbury district in the Sunset District. Jean, Paul and Bill all lived in the firehouse the entire time they were there. Jean was Bill’s girlfriend. They organized and hosted live musical performances and dancing with some of the original street bands in San Francisco—Sopwith Camel, The Charlatans, Big Brother and the Holding Co. (including Janis Joplin), etc. The firehouse held about 100 people, and the door was kept “closed,” admitting people only in small groups. The resulting noise was kept carefully under control so as not to disturb the residential neighborhood. People paid a mandatory “donation” [one ticket shows: “Donation \$2.00”] to hear the performance, and the hosts did not make change. No one sat, as there were no chairs, so everyone danced—although it was usually so crowded that no one could dance.

Concerts were held at the firehouse for at least 3 months [Feb. 12 to April 2]. “Since the last concert was the Wreckers Ball, I would assume that we had been told by the landlord that the place was to be raised and he wanted us out.” “It was

a wonderful and exciting time—to be there at the beginning of the rock and roll music scene in San Francisco.” Jean thinks they moved from the firehouse directly to the warehouse south of Market Street, but she is not sure.

Note: This Firehouse is now part of early rock and roll legend in San Francisco. See the long blog titled Rockarchaeology101. See also: <http://www.chickenonaunicycle.com/Firehouse%20History.htm>.

“The rest of the time we were dealing and using drugs.” The only LSD they could get in those days was the real Sandoz LSD. Several days in advance of each trip, they carefully prepared their minds, bodies, and the environment. They had someone who was not taking it who was in the room with them to ground them. They did it the right way because it was “a spiritual experience.”

They soon moved into and rented one floor of a warehouse on an alley [65 Harriet St.] south of Market Street, between 6th and 7th streets. They pooled the money to pay the rent. “The warehouse was actually an old factory for making the pre-packaged small half-pies that you could buy at a convenience store. Initially, we had a wicked problem with rats and mice (a house cat took care of that) but had so many cockroaches that we use to have a monthly ‘cockroach killing party’ with Raid and beer. Great fun.”

“We lived communally in a huge warehouse space, except for a single room in the back. We each set up our own bedroom area—but shared the living room area (defined by a sofa, chairs and a rug) and open kitchen (defined by a table, stove, refig and cupboards). Bill lived there, I lived there but moved out before Bill, and Paul lived there for a time also.”

“The word ‘studio’ fits to a certain degree. Bill Tara and I were a couple for several years although we broke up at about the time we started the macrobiotic diet—which was Renee came along. Michio and Aveline Kushi made several attempts to get us back together as a couple as they wanted to send us off as a ‘teaching team.’”

Jean thinks that Paul Hawken was the first of the group to learn about macrobiotics in about 1967, perhaps from little yellow book that he was given by Roger Hillyard, who was doing light shows in San Francisco at the time. “My memory says that we were pretty much off of drugs by then. As a group we were pretty disgusted with the whole ‘flower child’ movement of the late 1960’s—the indiscriminate use of drugs just to get as high as you could. We were also more cautious about the drugs that were available at that time, they were cut [diluted] with just about anything that came to hand. You couldn’t be sure about the quality. So I would expect that we started with the exact diet as proposed by Ohsawa—brown rice for X number of weeks, gradually adding miso, shoyu, veges [vegies], etc. Alcohol was never a big deal with any of us, so I expect we just stopped. As to sugar, you know how hard that one is!! But, I expect we all tried hard. Very idealistic. I also think we were several months in to the diet—close to a year, before we left for Boston.” Continued.

Address: Chatham, Massachusetts.

8523. Sharp, Carolyn Heidenry. 2011. Re: Erewhon, Michio and Aveline, and the Boston macrobiotic scene (Continued, Part VI). Letter to William Shurtleff at Soyinfo Center, Feb. 15. 11 p.

• **Summary:** Continued: “Given all of the above I suppose it was inevitable that Erewhon should fall.

“Many people would have had difficulty filling the shoes of president. Not an easy job. Probably no one, among the community of friends and associates that Michio and Aveline knew, and from whom they would have selected a president, had the experience or training to handle the job. And most anyone would have had some successes, and also made some mistakes. However, if Tom DeSilva or Evan Root had been president of Erewhon, I don’t think either of them would have tolerated too-high salaries, too-low profit margins, or hired Tom Williams as comptroller. Or taken out \$10,000 loans from the company.

“After the collapse of Erewhon, Michio once said that if ever he began a food company again, he would make it a very simple operation, selling grains, beans, sea vegetables, Condiments, miso, soy sauce, noodles, etc. of very good quality, rather than the hundreds of items (thousands I think) that Erewhon carried before it died.

“So, about 12 years later (in about 1994), I was very disappointed and puzzled when he began KFC—Kushi Food Corp. And not sorry when it folded. Michio often had a short memory.

Note: The company was originally named “Kushi Macrobiotic Corporation” (KMC). It was listed on Nasdaq as KMAC as early as 7 Nov. 1995 and as late as 23 Aug. 1996. But by Feb. 1996 it had been renamed (probably for wider appeal) to “Kushi Natural Foods Corporation.” On 26 Sept. 1996 its merger with American Phoenix Group, Inc. was completed.

“When I met the CEO that Michio and Fred Sternau selected to run the company, I was stunned. I mentioned my misgivings firmly to Michio and Fred, separately, when I next saw them. They both seemed strangely casual and not too concerned about it, and didn’t seem to realize the huge impact this person would have on the company.

“One final note: In all the years I worked for Michio and Aveline and in all the time I lived at their home, I never heard either of them say one word that could be construed as anti-semitic. In fact, there were so many Jewish people working for them in their various enterprises and organizations, that I remember the Kushis being criticized for having too many Jewish people running things. Michio’s secretary for several years, Donna Cowan, was also Jewish. Michio’s lawyer for several decades, Morris Kirsner, was Jewish. And many students and employees were Jewish or half Jewish. Michio seemed too evolved to carry around prejudice of any kind. He was, and is, a great friend of

humanity. All humanity.” Address: P.O. Box 125, Hinsdale, Massachusetts 01235.

8524. *SoyaScan Notes*. 2011. Updated USDA database on the isoflavone levels in foods, commercial ingredients, soybeans and soyfoods (Overview). April 23. Compiled by William Shurtleff of Soyinfo Center. [1 ref]

• **Summary:** The link is now http://www.ars.usda.gov/SP2UserFiles/Place/12354500/Data/isoflav/Isoflav_R2.pdf. “Legumes and legume products” starts on p. 16. Start by going to page 24, which is where the soy section begins. Then you can do a PDF search for fermented soyfoods such as: Tempeh, miso, soy sauce, natto, or Sufu (fermented tofu)—and you will see that they are NOT lower in total (or specific isoflavones) than nonfermented soyfoods such as: Tofu, soymilk, soybeans (immature), soybeans (mature), etc.

8525. Earle, Steve. 2011. Re: Takayoshi Sato has written a history of San-J, based on his recollections, mostly about the period after 1981. Letter (e-mail) to William Shurtleff at Soyinfo Center, April 28. 1 p. [1 ref]

• **Summary:** A couple of years ago Takayoshi Sato, the younger of the two San-Jirushi brothers, put together a history of San-J based on his recollections; he was kind enough to send me a copy and it was quite well done, despite a few mistakes. This was written for an internal (company) audience and I would not feel right about passing it on without his permission, but suggest that you contact his son, Takashi Sato, current president of San-J in Richmond. Address: Assistance, Richmond, Virginia.

8526. Takesuye, Betty Tadano. 2011. The Tadano family and the Showa Shoyu Brewing Co. (Interview). *SoyaScan Notes*. May 2. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** During World War II, Takeo Frank Tadano ended up in the internment camp at Crystal City, Texas; Betty thinks he was gone for about four years. His family went and joined him there; they stayed with him until he was released.

Note: Crystal City, Texas, “was home to the largest of the World War II internment camps, having housed American civilians of German, Japanese, and Italian ancestry. However, the majority of internees were South American citizens. The camp was administered by the INS [Immigration and Naturalization Service] and the Department of Justice. To reduce hardships during internment and to reunite families, the INS originally intended to detain only Japanese at Crystal City,...” (Source: Wikipedia, at Crystal City, Texas, May 2011).

Betty’s grandfather, Takeshi Tadano, was also taken away to Lordsburg, New Mexico. But he had a very serious heart condition, so the family had to go after him and brought him home.

The family farm was originally in Phoenix; they moved

it to Glendale in about 1936. The two locations are only about 6 miles apart. Betty’s older brother was born in 1936, in Phoenix hospital, but she does not know if he was born before or after the move.

Betty’s grandfather, Takeshi, went to Japan to learn how to make koji. Betty’s sister has an original small bottle of Marusho Shoyu. Address: 807 N. 73 Place, Scottsdale, AZ 85257.

8527. Timberlake, Sean. 2011. *SFOodies* 92: No. 10. Oboro Tofu at Eiji (Web article). http://blogs.sfweekly.com/foodie/2011/05/eiji_oboro_tofu_sfodies_92_favorite_dishes_2011.php. May 4.

• **Summary:** This blog is: “SFOodie’s countdown of our 92 favorite things to eat and drink in San Francisco, 2011 edition.” A large color photo shows Oboro tofu in a ceramic bowl (with garnishes on top); \$9.25 for two. The blog describes the experience of being served. The curds are apparently made by stirring nigari (a coagulant) into hot soymilk at the table. “The texture is otherworldly.” The garnishes, in a second bowl, are: sesame seeds, sliced scallions, fresh and pickled ginger, shaved bonito flakes, a chiffonade of shiso leaf. But as she spoons a wedge of the tofu into your bowl, she suggests you try it first—plain. A little real tamari (made without wheat) is also served.

On the table is a quote (titled “Home made tofu”) about oboro from *The Book of Tofu*, by Shurtleff and Aoyagi. “Like the clouds it resembles in so many other ways, *oboro* is transient; in a few moments it will be gone, only to reappear as tofu. But before it vanishes or changes form, it may be tasted. As soft as the most delicate custard, warm fresh curds have the richness of cream and a wonderful subtle sweetness.”

Eiji is at 317 Sanchez (at 16th St.), San Francisco. Phone: 415-558-8149. They have been serving oboro since at least Jan. 2007. On 13 May 2008 the *San Francisco Bay Guardian* did an online video a story titled “Heavenly oboro: SFBG goes to Eiji.” The restaurant opened in mid-June 2006. Address: San Francisco blogger.

8528. *Nichi Bei Weekly*. 2011. Northern California Soy & Tofu Festival: Come discover the joy of soy. June 2-8. p. 5-7. Cover story.

• **Summary:** This issue announces the first Northern California Soy & Tofu Festival to be held on June 11, in San Francisco Japantown, Peace Plaza, 11 am–4 pm. It is sponsored by the Nichi Bei Foundation and many large corporate sponsors. Gold sponsor: Pacific Gas and Electric Company. Silver sponsors: Kikkoman, Union Bank.

The main article on page 6 is titled “Soy to the world: Small businesses explore varied tastes, textures,” by Akiko Minaga (Nichi Bei Weekly Contributor). It discusses Megumi Natto, Hodo Soy Beanery, San Jose Tofu, and Sacramento Tofu.

A second article by her (on the same page) titled “Soy, the magic bean: The many benefits of soy” discusses tofu, soymilk, beauty treatments, soy clothing, soy ink, etc.

A sidebar is titled “Tofu: A brief 2,000 year history,” by William Shurtleff of Soyinfo Center.

Photos show: (1) Chester Nozaki and his wife, Amy, owners of San Jose Tofu. (2) Alvin and Dorothy Kunishi, owners of Sacramento Tofu. (3) Min Tsai, owner of Hodo Soy Beanery. Address: P.O. Box 15693, San Francisco, California 94115. Phone: (415) 673-1009.

8529. Shurtleff, William. 2011. Comparison of the macrobiotic diet and Dr. Caldwell Esselstyn’s whole foods, plant-based diet (Editorial). *SoyaScan Notes*. July 2.

• **Summary:** Meat: Macrobiotic diets allow consumption of fish, shellfish, and other seafoods, whereas the Esselstyn diet (which is designed to prevent and reverse coronary artery disease / heart disease) allows no animal products.

Dairy: The Esselstyn diet prohibits consumption of dairy products; the macrobiotic diet discourages their consumption. Note: Actually nothing is prohibited by macrobiotic diets; as taught by George Ohsawa, they are broad, flexible, and nondogmatic.

Refined carbohydrates, such as white sugar, white rice, and white flour. Both diets discourage their use except that the Esselstyn diet uses white sugar (in large amounts) in a small percentage of desserts. For example, in the book *Prevent and Reverse Heart Disease* (2007), the recipe for Birthday Cake (p. 276) calls for “1 cup (or less) sugar.” Chocolate Red Devil Cake (p. 278) calls for “1 cup sugar.” Luscious Lemon Cake (p. 280) calls for “3/4 cup (or less) brown sugar plus granulated sugar sprinkled over the cake.”

Salt: The salt content of the macrobiotic diet (like the traditional Japanese diet) is high, provided by such condiments as miso, soy sauce (tamari), and gomashio, whereas the Esselstyn diet aims to use as little salt as possible—since many of the patients have both cardiovascular disease and hypertension. “If you *still* miss salt, try adding a little Bragg Liquid Aminos” (a salt alternative) or small amounts of “South River Sweet White Miso or low-sodium tamari. Try to limit sodium consumption to 2,000 mg a day.” A table shows the amount of sodium in salt and four condiments (p. 122).

Soyfoods: Macrobiotic diets uses soyfoods abundantly; in addition to miso and tamari, they enjoy tempeh, natto, and small amounts of tofu. The Esselstyn diet advises: “Eat soy products cautiously. Many are highly processed and high in fat” (p. 121).

Fruits: Macrobiotic diets use fruits sparingly, since most are classified as very “yin.” However apples (the most yang fruit) are used quite freely. The Esselstyn diet encourages the use of all fresh, whole fruits except avocados (which are high in fat).

Grain vs. vegetables. The macrobiotic diet is based on

the central idea of a primary food (such as brown rice or other whole grains) and secondary foods (such as cooked vegetables). The Esselstyn diet encourages the use of all fresh, whole vegetables. One might say that the center of the Esselstyn diet is fresh fruits and vegetables.

Macrobiotic diets strongly discourages consumption of foods which are members of the nightshade family—potatoes, tomatoes, and eggplants. The Esselstyn diet encourages the consumption of whole (unpeeled) potatoes and tomatoes.

Macrobiotic diets resembles a Japanese diet, whereas the Esselstyn diet resembles an American diet.

Use of local, seasonal foods: Macrobiotic diets emphasizes this somewhat more than the Esselstyn diet.

Use of added oil: The Esselstyn diet strongly discourages this, whereas the macrobiotic diet focuses more on the quality of the oil, but while still advising moderation in quantity, includes recipes for deep-fried foods (such as tempura).

The term “macrobiotic diets” is short, whereas the term “whole-foods, plant based diet” is descriptive but too long, and in need of a shorter name. Address: Founder and owner, Soyfoods Center, Lafayette, California. Phone: 925-283-2991.

8530. Shurtleff, William; Aoyagi, Akiko. comps. 2011. How Japanese and Japanese-Americans brought soyfoods to the United States and the Hawaiian Islands—A history (1851-2011): Extensively annotated bibliography and sourcebook. Lafayette, California: Soyinfo Center. 328 p. Subject/geographical index. Printed 12 July 2011. 28 cm. [1259 ref]
• **Summary:** Begins with a chronology of how Japanese and Japanese-Americans brought soyfoods to the United States and the Hawaiian Islands. Contains 110 historical photos and illustrations (some in color), graphs, and tables. <http://www.soyinfocenter.com/books/146>. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

8531. Kushi, Michio. 2011. Kushi Institute International Aveline Award presented to William Shurtleff and Akiko Aoyagi.

• **Summary:** The plaque reads: “In recognition for your enduring support of macrobiotics. Your teachings and writings have brought hope and healing to people around the world. With this award Michio Kushi expresses his gratitude to you for your important contribution to macrobiotics, humanity, and the world.”

Signed, Michio Kushi.

“Presented on August 4, 2011, at the International Macrobiotic Summer Conference.

Note: The award was presented in absentia since Shurtleff was unable to be present at the award ceremony. The plaque is 10½ by 13 inches, with a leather border. The body of the plaque is the printed paper covered by a sheet of glass. The blue logo of the Kushi Institute International is

near the top of the sheet of paper. Address: Massachusetts.

8532. Astuti, Mary. 2011. Re: Yayasan Tempe Indonesia (Indonesian Tempe Foundation). Researching a book on black soybeans. Letter (e-mail) to William Shurtleff at Soyinfo Center, May 31. [Eng]

• **Summary:** “Yayasan Tempe Indonesia (Indonesian Tempe Foundation) was established at Jakarta on April 11, 1995 and the book of ‘Bunga Rampai Tempe’ [Anthology of Indonesian tempeh]. was published in 1996 in Indonesian.

Indonesian Tempe Foundation was supported by Indonesia’s Ministry of Food. I am sorry to tell you that the Indonesian Tempe Foundation is no longer active because (1) there is no support from the government and (2) Dr. Sapuan, the head of this foundation, has retired.

“Through the support of the American Soybean Association (ASA) there is Forum Tempe Indonesia (Indonesian Tempe Forum). I have been involved in Yayasan Tempe Indonesia and Tempe Forum Indonesia.

“I am in the process of researching and writing a book about black soybeans, including the black soybean products such as sweet soysauce, tempe, tofu and crackers. I hope it will be finished by the end of this year.” Address: Indonesia.

8533. Shurtleff, William; Aoyagi, Akiko. comps. 2011. History of fermented black soybeans (165 B.C. to 2011): Extensively annotated bibliography and sourcebook. Lafayette, California: Soyinfo Center. 398 p. Subject/geographical index. Printed 11 Dec. 2011. 28 cm. [754 ref]
• **Summary:** Begins with an attempt to answer the question “What are fermented black soybeans,” followed by a brief chronology of fermented black soybeans. Contains 54 historical photos (most in color), graphs, and illustrations <http://www.soyinfocenter.com/books/150>. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

8534. *SoyaScan Notes*. 2011. Why seitan has not become as popular as tofu as a source of plant protein in the USA (Overview). Dec. 21. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1. Historical: Tofu has been a basic food in all countries of East Asia for at least 1,000 years. This includes China, Japan, Korea, Vietnam, and Indonesia. So wherever people with ancestry from these countries live, tofu is made. It has no class affiliation and is inexpensive, so it is eaten by people of all classes and income levels from these countries. And it appears in virtually all cookbooks for these cultures. So there has long been a large demand for tofu in the USA.

2. Tofu manufacturers in the USA: Since 1900 there have been plenty of tofu shops to supply the demand. Between 1905 and 1975 at least 528 different Japanese-owned tofu manufacturers were established in the USA. Probably at least that many Chinese-owned tofu makers also

started.

3. Seitan historical: It was invented in about 1962 by George Ohsawa, the macrobiotic teacher, together with Mr. Kiyoshi Mokutani, the owner of a small soy sauce company (Marushima shoyu) in Japan. So it has a very short history. And originally (starting in 1969) it was all imported from Japan.

4. Macrobiotics: Seitan has been limited mostly to macrobiotic community. Wikipedia says incorrectly that seitan is another name for wheat gluten. Not true. Seitan is a product made from wheat gluten just like tofu burgers are made from tofu.

5. Evolution of the meaning of the word: Seitan was originally a salty seasoning, not a protein source. But over the years the meaning of the word gradually changed; it came to refer to any wheat gluten seasoned with soy sauce.

6. Not widely made in the USA since not much demand.

7. Very expensive compared with tofu, in part because not widely available so had to be sent by UPS or mail.

8. Wasteful process. It is made from wheat by discarding all but about 14% of the original wheat and using only the protein. Or, if you start with “vital wheat gluten” (a powder) the quality of the seitan is not nearly as good as if you start with whole wheat flour.

9. Process causes pollution: Dumping all of that starch into any sewage system pollutes the system and usually leads to either a fixed fee or a fine on the manufacturer.

10. Few books about seitan, and no much press coverage or information. Only 3 books about seitan (with “seitan” in the title) have ever been published in English: Jacobs 1987, Wingate 1988, and Bates 1993. Just the opposite with tofu.

8535. Jamieson, Alexandra. 2011. Vegan cooking for dummies. Hoboken, New Jersey: Wiley Publishing, Inc. xx + 364 p. Illust. (some color). Index. 24 cm.

• **Summary:** A fun, well written, and very informative book. Contains more than 160 healthy vegan recipes. The index contains 22 entries for tofu, 14 for tempeh, 11 for soy foods, 5 for seitan, 3 for edamame, 2 each for milk replacements (soy milk), miso, soy sauce, soy yogurt, and 1 for TVP (textured vegetable protein).

Also mentions macrobiotics, mochi, raw foods diet, sea vegetables, sesame oil, sesame seeds, etc. Address: Professionally trained vegan chef and board certified holistic health counselor (CHHC), and member American Association of Drugless Practitioners (AADP), New York City.

8536. Vos, Heidemarie. 2011. Passions of a foodie: An international kitchen companion, A to Z. Durham, Connecticut: Eloquent Books. An imprint of Strategic Book Group. 598 p. 26 cm.

• **Summary:** Best-selling author Heidemarie Vos recounts a fascinating story and her journey of putting together the

world's first cross-referenced book regarding food-using more than five languages. This cookbook [which contains no recipes] will become an invaluable resource for your kitchen (from the publisher).

The Introduction states: "There are 7922 entries, 300,017 words... based on my own travels to 6 continents and over 40 countries." Note: This is somewhere between a dictionary (in 5+ languages) or brief encyclopedia of food names. It immediately sets the language and cultural context for each word, and ends with broader or narrower terms. For example: "Aburage: Japanese cooking = A fried bean curd... Also see Bean Curd." It contains more than its share of errors and outdated terminology and spellings. It is a "print on demand" book.

It includes: Aburage. Adzuki beans [sic], Agé. Aji Nomoto [sic], see monosodium glutamate. Aka miso—red bean paste. See Miso. Almond milk. Almond oil. Arachide / Arachis. See Peanut. Arachide oil. See Peanut oil. Bean cake, fermented: Chinese cooking, "fu yu" [fermented tofu]. Bean curd, pickled: Chinese cooking. [What is it?]. Bean curd cheese, red: Chinese cooking, "nam yu" or "nan yu" [red fermented tofu]. Bean curd: Oriental cooking. Known as "tofu" in Japanese or "dow fu" in Chinese. Pressed bean curd is "dow fu kon" [doufu-gan, pressed tofu].

"Bean curd, dried [yuba]: Chinese cooking = Known as 'tiem jook' [sweet yuba] / 'fu jook pei', other dialects are 't'ien ch'u' and 'fu pi chi'. It is soybean milk residue, which comes in a thin rectangular sheet or is curled into round sticks. They are usually tan- or cream-coloured with a shiny, glossy smooth texture."

Bean paste, red: Chinese cooking. "Made from soybeans and sugar mashed together then fried and dried out until it resembles sand." Used to fill Chinese moon cakes. Bean sauce, Chinese: Chinese and Asian cookery. Many types including "min see jiong" or "do bahn jiang." Incl. "Black bean sauce." Beans, black: Chinese cooking. "A pulse [sic] known as 'wu dow' / 'wu do' [Black soybeans].

"Beans, black salted fermented: Chinese cooking = Known as 'dow si' / 'dou shih,' used as a vegetable or spice. Known as 'wu dow' dried and salted. They are dull, wrinkled, moist and tender and have an appetising fragrance, yet are pungent with a tangy salty flavor. Used as a flavor enhancer in dark sauces." Keep covered so they do not dry out... "Must be rinsed prior to use to avoid over-salting. Store in a closed jar in the refrigerator after opening."

Bean sprouts: Asian cooking [small green are mung bean sprouts, large yellow soybean sprouts]. Benne seeds: Sesame seeds are used to make sesame oil and tahini (sesame paste). Black beans, Chinese. Also known as 'salted black beans' or 'fermented black beans' and as 'dow si' (Chinese). China beans: See Soya / soy bean. Earth nut: See Peanut. Edamame: Japanese cooking. "Fresh soybean in or out of the pod." Firm tofu. Fried tofu puffs. Ground nut: See peanut. Hard tofu. Hydrogenated fats. See fats. Miso. Naahm yu:

Chinese term. "A cheesy-looking bright red bean curd sauce" [Red fermented tofu]. Nam yu / Nan yu: See Bean curd cheese, red. Shoyu: Japanese cooking. Japanese soy sauce. Soy bean / Soya bean. *Glycine soja*, also known as "'China beans,' 'Butter Beans' and 'Haricot de Java' (French)." Soy bean jam / condiment. See Main see. Silken tofu. Silken firm tofu. Soya oil. Soya sauce. Soy sauce. Tamari soy sauce. Tofu. Tofu tempeh [sic].

Not listed: Amazake. Lecithin. Daitokuji natto. Fermented black beans. Hamanatto. Kudzu. Kuzu. Meat alternatives. Meat substitutes. Milk alternatives or substitutes. Milk, nondairy. Milk, soy. Natto. Seitan. Soy milk. Soy protein concentrate. Soy protein isolate. Soy protein, textured. Tempeh. Teriyaki sauce. Yuba.

Errors: Arame is not also known as "Hijiki." Address: Port Elizabeth, South Africa.

8537. Troy, John. 2012. Update on life and work since the year 2000 (Interview). *SoyaScan Notes*. March 7. Conducted by William Shurtleff of Soyinfo Center.

• **Summary:** John is now age 72, retired, and still married to Carol. They live on 20 acres of land in Cedar Grove, North Carolina, in a home that he has been building for the last 16 years or so. His ancestors came from North Carolina, and when he was growing up he spent a lot of time hiking in the Great Smoky Mountains.

In 2006 John sold his sauce manufacturing and bottling company for \$7 million to an investment company named Dogwood Equity. He was making and bottling about 500 different products (SKUs) at the time, most for other people / companies. Everyone he asked said he would be less happy after he sold it than he was at the time, but he sold it anyway. Dogwood changed the name from The Wizard's Cauldron Ltd. to a name that was not as good, diversified into the wrong products, and generally messed things up. It was an "asset purchase" and they bought the rights to make the products. Many of the companies who were John's customers are no longer with Dogwood.

Why did John name his company "Wizard's Cauldron"? His wife, Carol, threw the *I Ching* (using special coins) and got Hexagram #50, the Cauldron. Then she threw it again and got the same hexagram. So "Cauldron" became a key word in his company's name.

His original company was named American Natural Foods. Pure and Simple (owned in part by Jimmy Silver) was his distributor and had a large inventory of his products. When Pure and Simple went down the tubes (bankrupt), John's company did too.

John is now very much involved with travel and spiritual practice. He also has a radio program, "Conversations with Avant-Garde Sages," on WCOM 103.5 FM in Chapel Hill, North Carolina, or Cyber Satsang via live streaming audio (www.thewizardllc.com). Every Tuesday, Eastern Time from noon until 1 pm. He has hosted people such as Norio Kushi

(who has written a book).

Where does creativity and everything else come from? “It all emerges out of silence.” “The ‘I’ thought is the big mistake and the problem.” John once asked Doug Greene, who founded *Natural Foods Merchandiser*, what he felt was the secret to his life and work. John said: “I just went with what wanted to happen.”

John has written one book titled “Wisdom’s Soft Whisper” and another titled “The Human Gospel of Ramana Maharshi.” Address: 5134 Boone Village Trail, Cedar Grove, North Carolina 27231.

8538. Shurtleff, William; Aoyagi, Akiko. comps. 2012. History of Worcestershire sauce (1837-2012): Extensively annotated bibliography and sourcebook. Lafayette, California: Soyinfo Center. 213 p. Subject/geographical index. Printed 23 March 2012. 28 cm. [1934 ref]

• **Summary:** Begins with a detailed chronology of Worcestershire sauce based on published documents. Contains 42 historical illustrations and photos (most in color). <http://www.soyinfocenter.com/books/152>. Address: Soyinfo Center, P.O. Box 234, Lafayette, California 94549. Phone: 925-283-2991.

8539. Katz, Ellix Sandor. 2012. The art of fermentation: An in-depth exploration of essential concepts and process from around the world. White River Junction, Vermont: Chelsea-Green Publishing Co. xxiii + 498 p. April. Illust. (photos and illustrations). Index. 25 cm. [109 (Chap. 10 + 11) ref]

• **Summary:** A marvelous book by self-described “fermentation revivalist” Sandor Katz, whose books and lectures have inspired thousands to rediscover the ancient art of fermentation.

In this book Katz redefines an old noun “ferment” (no longer used to mean enzyme) to mean fermented food(s). It works quite nicely. For example: “The Japanese soy ferment *natto* contains an enzyme called *nattokinase*.” Although information on fermented soyfoods is found throughout the book (see the excellent index), most of it is found in two chapters, 10 and 11 (p. 274-335). The contents of these two: 10. Growing mold cultures: Introduction. Incubation chambers for growing molds (oven method, aquarium method, temperature controller, dedicated incubator designs). Making tempeh. Cooking with tempeh. Propagating tempeh spores. Making koji. Amazake. Plant sources of mold cultures. Troubleshooting. Sidebars: Microorganisms in my bed, a poem by qilo. Sculpting with tempeh. Ode to tempeh, by Spiky. Tempeh variations (chickpea tempeh, etc.).

11. Fermenting beans, seeds, and nuts: Introduction... Spontaneous fermentation of beans. Idli / Dhokla / Khaman... Soybeans. Miso. Using miso. Soy sauce. Fermented soy “nuggets” [fermented black soybeans]: Hamanatto and douchi. Natto. Dawadawa and related West African fermented seed condiments. Fermenting tofu.

Troubleshooting. Sidebars: Dosa variations. Miso generic proportions. Miso soup with William Shurtleff. In the middle of this chapter are 15 pages of very helpful color photos. Address: Short Mountain Sanctuary, in the hills of Tennessee.

8540. Spots: Soy sauce. 2012.

• **Summary:** (1) View using the “Google Ngram Viewer” of the relative frequency of appearance in books digitized by Google, from 1800 to 2000 of the three case-sensitive terms “soy” (the most frequent), “soy sauce,” and “shoyu” (increasing in use since about 1980).

Note that “soy” changed its meaning in about the 1980s. Originally it had referred to soy sauce. Then, as “soy sauce” began to replace, it came to be used as a general term for soybeans, soyfoods, and the “essence” of both. For example: “The health benefits of soy.”

(2) Soy jar, used for storing soy sauce, from Santa Cruz, California.

(3) A traditional illustration of Japanese men probably pouring moromi into a vat so it can start fermenting.

(4) Japanese men working around large fermentation vats bound with braided bamboo hoops.

(5) A pottery jar that once held soy [sauce] manufactured by Sollonyama, Nagasaki, Japan.

(6-7) A wide illustration (divided vertically into halves) of a Noda Shoyu (later Kikkoman) soy sauce brewery at the turn of the century (1900). For an explanation see *The Book of Miso*, by Shurtleff & Aoyagi (1976, p. 222-23)

8541. Spots: Tempeh, fermented tofu, and other fermented foods. 2012.

• **Summary:** (b) Red fermented tofu. (c) White fermented tofu. (d) Hoisin sauce. (e) Fermented tofu in jar (Beancurd preserved). (f) Fresh thick tempeh at a market in Indonesia wrapped in banana leaves (g) Freshly sliced thick tempeh. Fermented tofu. Tofuyo. (Source: Wiki at Tempeh).

8542. Spots: Worcestershire sauce, or Worcester sauce. 2012.

• **Summary:** (1) View using the “Google Ngram Viewer” of the relative frequency of appearance in books digitized by Google, from 1800 to 2000 of the four case-sensitive terms “Worcestershire sauce” (the most frequent), “Worcester sauce,” “Worcestershire Sauce,” and “worcestershire sauce” (never widely used).

Note the rapid rise and fall of the word “Worcestershire sauce” with peaks in about 1917, 1950, and 1985.

8543. *SoyaScan Notes*. 2012. Soyfoods historical research and writing wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1. Early history of Chinese soyfoods companies and products in America and Europe. Especially Chinese tofu manufacturers in San Francisco and Los Angeles from

1850 to 1910.

2. Statistics on soyfoods in China during the 1980s.
3. The Swedish trading mission in Canton during the 1700s and 1800s and its work with soy sauce.
4. A lengthy, scholarly history (with an extensive bibliography) of soybeans and soyfoods in China written by a Chinese.
5. A lengthy, scholarly history (with an extensive bibliography) of soybeans and soyfoods in Japan written by a Japanese.
6. A lengthy, scholarly history (with an extensive bibliography) of soybeans and soyfoods in Korea written by a Korean.
7. A history of the health foods industry in America, 1930-1980.
8. A book on mochi or how mochi came to the West, with a clear chronology of commercial mochi manufacturers in the western world.
9. A scholarly history (with an extensive bibliography) of each of the following soyfoods in Japan, written by a Japanese with a long-term involvement in the field: natto, miso, shoyu, tofu.
10. Explain why Linnaeus stated in *Hortus Cliffortianus* (1737, p. 499) that the soy bean was grown in the colony of Virginia in North America.
11. A lengthy, scholarly history (with a good bibliography) of Chinese growing and processing soybeans in California. They must have grown them between 1849 and 1899! (13 Sept. 1991)
12. Visit the best libraries and centers in Germany for doing research on soybeans and soyfoods (See #37465) and try to get missing old documents.
13. Try to document the statement that the soybean was used as a coffee substitute during the Civil War in the USA (1861-1865).
14. Use the Coker family archives in South Carolina to write a history of the company's pioneering work with the soybean.
15. A history of early experimental gardens such as those that the Portuguese developed on the Cape Verde Islands, the British at Kew, Nairobi, Singapore, and the colony of Georgia (the Trustees' Garden of Georgia, a government experimental farm at Savannah, laid out in 1733), the Spanish (under Cortez / Cortés) in today's Mexico, etc. Did soybeans appear in any of them? When did they first appear in each?
16. Learn much more about Korean natto. Did it exist in Korea before Korea became a Japanese colony? Try to find some references, as in early studies of food in Korea. How widely was it made and used? Try to find some estimates of annual production. How was it served? What was its distribution in Korea in 1900? 1950? 2000?
17. A scholarly biography of Clifford E. Clinton of Los Angeles.

8544. *SoyaScan Notes*.2012. Commercial soyfoods products wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1. Organic, non-GE soy protein isolates (2002/03). 2. A very low calorie soy beverage for weight loss in hospitals. Must be able to be used as a sole source of nutrition. 3. More smoked tofu in America.

4. Meatless pepperoni, sausage shaped, for use atop a meatless pizza. 5. Natural shoyu brewed in America, ideally as part of a joint venture with a Japanese shoyu company. 6. A vegetarian Worcestershire sauce, with no anchovies (John Troy developed "The Wizard's Worcestershire Sauce" for Joel Dee's Premier Japan line in about 1995; it was vegetarian).

7. A low-calorie, low-fat tofu. Fat and calorie content should be at least 30% lower than that made from whole soybeans. The easiest way to make this product would be to run soymilk made from whole soybeans through a decanting centrifuge (like a cream separator) to remove the desired amount of fat, just like the dairy industry does to make low-fat or non-fat milk. There is a big potential market for such a product since 1% fat milk has now passed low-fat milk (2%) as the best-seller in American supermarkets (11 Sept. 1991). 8. Bland soymilk base (11 July 1997). Presently no company (including International ProSoya Corp. of Canada, Pacific Foods of Oregon, and Ted Nordquist dba TAN Industries, Inc. etc.) offers this product.

9. A soy-based kefir made from authentic kefir grains/cultures plus FOS (fructooligosaccharides), a dietary fiber derived from chicory roots. FOS feeds and increases the level of "good guy bifidobacteria by up to five times in the gastrointestinal tract, and boosts the body's absorption of calcium and other minerals by up to 50 percent." See article in *Ag Innovation News* (April 1999, p. 3, 14).

8545. *SoyaScan Notes*.2012. Soyfoods big ventures wish list (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** The Soyfoods Association should team up with other interested parties (such as Protein Technologies International) and petition the FDA to outlaw the use of the term "non-dairy" on the label of (or otherwise in connection with) products which contain sodium caseinate or any other product derived from cow's milk. This would open the way to many new soy-based dairylike products.

A joint venture with a Japanese company such as Sendai Miso Shoyu to brew Japanese-style shoyu in America in the traditional way. Large amounts are now imported from Japan.

8546. *SoyaScan Notes*.2012. Chronology of Soyfoods Center: The work of William Shurtleff and Akiko Aoyagi. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1. Introducing soyfoods to the West: Popular books (1972 Oct.–1979 July).

The Book of Tofu:

1972 Oct. 22–First visit to San-gen-ya tofu shop in Tokyo. Mr. Toshio Arai begins to teach William Shurtleff the traditional art of making tofu.

1972 Dec. 22–Meet Nahum Stiskin of Autumn Press. Start to write tofu booklet.

1973 Jan. 13–Sign contract for *Book of Tofu* with Autumn Press.

1973 March 2–Visit Sasa-no-yuki tofu restaurant in Tokyo.

1975 Dec. 12–*The Book of Tofu** published by Autumn Press.

* = Book illustrated by Akiko Aoyagi.

1978 Dec. 22–*The Book of Tofu** published by Ballantine Books in a mass-market pocketbook edition that retails for \$2.95.

The Book of Miso

1974 Feb/March–Study miso and shoyu in Japan on trip with Bob Gerner, head of Westbrae Natural Foods.

1974 May 7–Start to write *The Book of Miso*, table of contents.

1975 April–Autumn Press accepts idea of publishing *The Book of Miso*. Contract signed Aug. 18.

1976 Sept. 23–*The Book of Miso** published by Autumn Press.

1976 Sept. 29–1977 Feb. 3–Tofu & Miso America Tour. We do 70 public programs, many TV and radio interviews, drive our van 15,000 miles in 17 weeks.

The Book of Tempeh

1977 May–To Indonesia for one month of tempeh research.

1978 Feb. 27–Sign contract with Harper & Row.

1979 July 14–*The Book of Tempeh** published by Harper & Row.

2. Working to build a soyfoods industry in the Western world (1977 April–present)

1977 April 5–Establish Takai Tofu and Soymilk Equipment Co.

1977 Aug. 16–First Takai catalog of tofu and soymilk equipment published.

1977 Aug. 16–*Miso Production** published by Soyfoods Center–the first book we self-published.

1978 July 28–30–The Soycrafters' Association of North America is founded in Ann Arbor, Michigan. William Shurtleff helps to organize the inaugural meeting, is a founding member, and a member of the first board of directors.

1978–Soyfoods Center starts to develop a mailing list (typed so as to fit on pressure sensitive labels) of all people who have purchased books or contacted us.

1979 July 15–*Tofu and Soymilk Production** published by Soyfoods Center.

1979 July–The first issue of *Soycraft* magazine is published by Richard Leviton, director of Soycrafters' Association in Massachusetts. Each mailing is based on the use of Soyfood Center's mailing list–free of charge.

1980 March 10–*Tempeh Production** published by Soyfoods Center.

1980 Sept.–Dec.–Our mailing list of about 5,000 names and addresses, divided into 70 coded categories, is computerized by Parallel Procedures in San Francisco. This was done primarily to help Richard Leviton of *Soycraft* magazine.

1981 Dec.–There are now 10,900 names on our computerized Soyfoods mailing list, rising to 13,800 names by May 1982.

3. Documenting the history of soybeans and soyfoods (1980 Oct.–present)

1980 Sept. 10–Start to build what we hope will become a large library at Soyfoods Center with regular trips to the University of California at Berkeley library system.

1980 Oct. 22–Start writing *History of Soybeans and Soyfoods*.

1984 June 1–History book manuscript is now completely in our word processor: 2,500+ pages, 70+ chapters.

1984 June 21–Soyfood Center's annual summer intern program begins. Irene Yen, a Stanford student starting her senior year, is our first summer intern.

1984 July 17–*History of Tempeh published*–our first history book.

4. Studying the burgeoning soyfoods industry and market (1982 Sept.–1985 Feb.)

1982 May 16–*Soyfoods Directory and Databook* (1st edition) published. Renamed *Soyfoods Industry and Market: Directory and Databook* on 26 Feb. 1983. 3rd edition.

1982 Sept. 10–*Soyfoods Labels, Posters, and Other Graphics* published.

1984 Feb. 25–*Soymilk Industry and Market* published.

1985 Feb. 22–*Tofutti and Other Soy Ice Creams* published.

1990 May 8–*Tofu Industry and Market in Europe* published.

1990 July 17–*Soymilk Industry and Market in Europe* published.

1994 Jan.–*Soyfoods Industry and Market: Bibliography and Sourcebook* published.

5. Foreign language editions of our books are published (1980 –)

1980 July–*Das Miso Buch** (hardcover and paperback) published by Ahorn Verlag (Wolfgang and Gabriella Furth-Kuby) in Germany.

1981 Aug.–*Das Tofu Buch** (hardcover) published by Ahorn Verlag in Germany.

1988 Nov.–*Das Tempeh Buch** (hardcover) published by Ahorn Verlag in Germany–6 years after the project started.

1988 Nov.—New German pocketbook editions of *Das Tofu Buch* and *Das Miso Buch* (paperback) published by Goldmann Verlag.

6. Developing a computerized information center (1980 Dec.—present).

1980 Dec. 12—Mailing lists of Soyfoods Center and Soyfoods magazine merged and computerized by Parallel Procedures in San Francisco. 5,500 names in 50 categories.

1983 Sept. 28—Install first computer at Soyfoods Center, IBM-PC with 20 MB hard disk and word processing software to use for writing our book on *History of Soybeans and Soyfoods*.

1985 May 9—Install Revelation database manager software for developing a computerized bibliographic database on soya.

1985 July 31—Finish keying all 6,677 file cards (3x5 inch) into our computerized database. Our library is now computerized.

1985 Aug. 30—Our computerized database, containing 9,500 bibliographic records, is now available for use by the public.

1986 Sept. 1-16—The first of many trips to do library research at the USDA National Agricultural Library, Library of Congress, and National Library of Medicine—America's three national libraries, all located in and about Washington, DC.

1987 July 6—Start entering Commercial Soy Products into our database.

1987 Oct. 11—*Bibliography of Soymilk, from 1578 to 1987: With 1,584 References* published—our first bibliography.

1987 Oct. 19—Coin the name SoyaScan, start using it to refer to our computerized database, and apply for a registered trademark, which we are issued on 19 July 1988.

1993 Feb.—Install a Novell 5-user network to link our various computers.

1995 Feb. 11—We enter the 50,000th record into our SoyaScan database.

1997 Nov. 24—We enter the 55,000th record into our SoyaScan database.

7. Current status of computerized information—2000 January 1

SoyaScan database now contains 59,440 records from 1100 B.C. to the present, including 48,318 published documents, 12,683 commercial soy products, 4,628 original interviews and overviews, and 41,584 unpublished archival documents.

More than 75% of all SoyaScan records have a summary/abstract averaging 143 words in length.

More than 26,000 records (44% of the total) are for documents published before 1970.

Thirty five major books in the series *Bibliographies and Sourcebooks on Soya*, produced from the SoyaScan database, are now available, published by Soyfoods Center.

Soyfoods Center Library owns about 54,000 documents, almost all of which have a record in the SoyaScan database.

SoyaScan Directory now contains the name, address, and phone number of 17,300 people and organizations worldwide actively involved with soyfoods and soybeans. Each entry is coded to show the type of activity, e.g. 2A = Tofu manufacturers.

8. Collecting and Publishing Information on Vegetarianism and Other Non-Soy Food Products that can Replace Animal Products.

1984 Oct. 31—Create our first vegetarian keyword (subject heading) *VegeAnim* = Vegetarian Diets and Animal Rights.

1988 Feb. 21—*Amazake and Amazake Frozen Desserts: Industry and Market in North America* published. Updated bibliographic supplement published in March 1995.

1992 Oct.—Start actively collecting information specifically on vegetarianism and veganism, and entering it into our new *VegeScan* database.

1992 March 4—*Bibliography of Vegetarianism: 1,755 References from A.D. 1170 to 1992, Extensively Annotated* published (360 p. large format, preliminary edition).

1992 June 12—*Sourcebook on Wheat Gluten Foods and Seitan* published. Expanded edition published in Jan. 1994.

2000 Jan. 1—*VegeScan* database now contains 5,500 bibliographic records on vegetarianism and veganism from 238 B.C. to the present.

Best selling books from Soyfoods Center (English-language editions only, as of Jan. 2000).

The Book of Tofu—557,000 copies sold.

The Book of Miso—115,900 copies sold.

The Book of Tempeh—47,950 copies sold.

Tofu & Soymilk Production—5,020 copies sold.

Other—9,200 copies sold.

Total—775,070 copies sold. Address: Lafayette, California. Phone: 925-283-2991.

8547. *SoyaScan Notes*.2012. Definition of HVP soy sauce (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** HVP soy sauce is prepared from hydrolyzed vegetable protein, which is made by mixing defatted soybeans (and sometimes wheat or corn) with hydrochloric acid. It is usually not fermented. Rather, its flavor and color come from additives such as corn syrup, caramel, and salt. Water is also added. Since it takes only a day or two to prepare, it costs less to produce, and thus its price is usually lower than that of fermented soy sauce. Sample brands are La Choy and Chun King. HVP was developed in about 1907 in Europe and used to make Maggi Soup Cubes. Address: Soyfoods Center.

8548. *SoyaScan Notes*.2012. Chronology of Kikkoman Corporation. Compiled by William Shurtleff of Soyinfo

Center.

• **Summary:** This chronology is based largely on the excellent chronologies near the back of Kikkoman annual reports, dates in “Kikkoman Today & Tomorrow” (1972, p. 1), and dates in Fruin (1983). “Ideally situated close to soybean-growing regions as well as the Edo River, which provided a convenient transportation route for consumers in or near Edo, or present-day Tokyo, Noda has been well-known for its soy sauce (shoyu) production since the Edo period. Noda is located about 30 miles northeast of Tokyo in Chiba prefecture.

“Kikkoman Soy Sauce first went on the market in 1661 when the Takanashi and Mogi families constructed breweries and started the brewing of soy sauce.”

1914—When World War I started, excessive competition arose between Japan’s many shoyu producers because of the wartime economy, causing a very confused market situation.

1917 Dec.—With these conditions as a background, eight Mogi and Takanashi family companies, the leading shoyu producers in the Noda area, merged to form Noda Shoyu Co., Ltd., a company with capital of ¥7 million and the predecessor of Kikkoman Corporation.

1925 April—Noda Shoyu Co., Ltd. absorbs Noda Shoyu Jozo Co., Ltd., Manjo Mirin Co., Ltd., and Nippon Shoyu Co., Ltd., through a merger. 1926—Kikkoman No. 7 shoyu brewing plant constructed.

1930 August—The Takasago soy sauce production plant (formerly the Kansai Plant) is constructed near Osaka and completed in 1931.

1936—Kikkoman Worcestershire Sauce plant completed.

1939—With the start of World War II, government controls on the price of soy sauce are established.

1946—Kikkoman stock first becomes available to the public.

1949—Export of Kikkoman soy sauce is reestablished after the war.

1950—Wartime soy sauce controls end and free competition resumes.

1957 June—Kikkoman International Inc. (KII) is established in San Francisco, California, in the United States.

1958—The first KII branch is established in Los Angeles.

1960—The second KII branch is established in New York.

1961 July—Kikko Food Corporation is established (later renamed Kikko Food Industries Co., Ltd.). In July 1991, the company becomes Nippon Del Monte Corporation.

1961—Seishin Pharmaceutical Co., Ltd. established.

1962 February—Tone Beverage Co., Ltd., is established. In February 1963, the company becomes Tone Coca-Cola Bottling Co., Ltd.

1962 October—Katsunuma Yoshu Co., Ltd., is established in Japan. In March 1964, the company becomes Mann’s Wine Co., Ltd. 1963—Japan Calpak Co., Ltd. established.

1964 October—Noda Shoyu Co., Ltd., is renamed Kikkoman Shoyu Co., Ltd.

1965—The third KII branch is established in Chicago, Illinois.

1966—Sales of Higeta brand products assumed by Kikkoman.

1968—Bottling of Kikkoman Soy Sauce for the American market begins at the Leslie Foods plant in Oakland, California.

1969 June—Kikkoman invests in and merges with Japan Food corporation, the biggest distributor of Oriental food in the United States. In June 1978 the company becomes JFC International Inc.

1970 March—Kikkoman invests in and merges with Pacific Trading Co., Ltd., a sister company of Japan Food Corporation.

1972 March—Kikkoman Foods, Inc. (KFI), is established in Walworth, Wisconsin (USA) for the purpose of manufacturing soy sauce and teriyaki sauce. Shipping is scheduled to start in early 1973.

1972 August—Kikkoman + Daitokai (Europe) GmbH is established in Düsseldorf, in Germany.

1974 February—Kikkoman Restaurant, Inc. is established.

1979 March—Kikkoman Trading Europe GmbH is established in Neuss, in Germany.

1980 October—Kikkoman Shoyu Co., Ltd. is renamed Kikkoman Corporation—the company’s present name.

1983 January—Kikkoman Ajinomomiji Co., Ltd., is established.

1983 June—Kikkoman (S) Pte. Ltd., a production facility, is established in Singapore.

1983 October—Kikkoman Business Development Inc. is established.

1986 August—New shoyu production facilities come on stream at Kikkoman’s Chitose Plant, in Hokkaido.

1990 January—Kikkoman buys perpetual marketing rights for the Del Monte brand in the Asian-Pacific region, excluding the Philippines.

1990 February—A joint venture company, President Kikkoman Inc. is established to produce soy sauce in Tainan, in Taiwan.

1996 April—Kikkoman establishes Kikkoman Foods Europe B.V., Europe’s first soy sauce manufacturer, located in Hoogeveen-Sappemeer, in the Netherlands.

1996 May—Production of *Shochu* a clear Japanese spirit, commences at a new facility of the Ojima Plant.

1997 March—Kikkoman holds a ground-breaking ceremony for its second U.S. soy sauce production plant, in Folsom, California, in the United States.

1997 October—Kikkoman Foods Europe B.V. begins operations at its plant [in Hoogeveen-Sappemeer, the Netherlands].

1998 October—The second shoyu manufacturing plant

of Kikkoman Foods, Inc., in Folsom, California, begins shipments.

1999 July–Kikkoman opens its new headquarters in Noda, Chiba prefecture, to commemorate the Company's 80th anniversary.

1999 October–Kikkoman Institute for International Food Culture is opened at the Company's new headquarters.

1999 November–Kikkoman announces a joint venture with its partner in Taiwan [Uni-President Enterprises, Taiwan's largest food manufacturer] to build a soy sauce plant in China [In Kunshan, near Shanghai].

2000 May–Kunshan President Kikkoman Biotechnology Co., Ltd. (a joint-venture company) is established.

2000 Aug.–Construction starts on a soy sauce plant in China. The first shipments are slated for spring 2002.

2002 May–The China plant Kunshan President Kikkoman Biotechnology Co., Ltd., holds its grand opening.

2003 May–Kikkoman Foods, Inc. (with its plant at Walworth, Wisconsin) holds its 30th anniversary ceremony.

2004 March–Kikkoman invests in Higeta Shoyu Co., Ltd. and Kibun Food Chemifa Co., Ltd. (The latter makes soy milk).

2006 June–Kibun Food Chemifa Co., Ltd. becomes a consolidated subsidiary of Kikkoman.

2007–Kikkoman celebrates its 50th anniversary in the U.S.

2008–Kikkoman rolls out its new corporate brand logo and slogan globally.

2009 Oct.–Kikkoman shifts to a holding company structure.

8549. *SoyaScan Notes*. 2012. Chronology of miso and soybean chiang. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** 1st century B.C.–Soybean chiang is first mentioned in China in the *Shih chi* [Historical records] by Ssu-ma Ch'ien, and in the *Chi chiu p'ien* [Primer on addressing matters], by Shih Yu.

535 A.D.–The *Ch'i min yao shu* in China gives the first detailed descriptions of making soybean chiang—and other soyfoods.

701–Soybean hishio, miso, and soy nuggets start to be made in Japan by the *Hishio Tsukasa*, a government bureau. References to these seasonings are found in documents published between 730 and 748.

901-08–The modern word for *miso* first appears in Japan in the *Sandai Jitsuroku*.

927–The *Engi Shiki* gives the first details about the production of soybean hishio-miso in Japan.

1597–Miso is first mentioned by a Westerner, the Florentine Francesco Carletti; he calls it *misol*.

1712–Englebert Kaempfer, a German who lived in Japan, is the first European to give detailed descriptions of how miso and shoyu are made in Japan. Also mentions koji.

1727–Miso is first mentioned in an English-language publication, *The History of Japan*, by E. Kaempfer. He spells it “*Midsu*, a mealy Pap, which they dress their Victuals withal, as we do butter.”

1779–The word “miso” (“that is used as butter”) first appears in an English-language publication, the *Encyclopaedia Britannica*. 1847–The word “miso” first appears in print in the United States, in a letter from T.W.H. of Cambridge, Massachusetts, to the *Farmers' Cabinet and Herd Book*.

1908–Miso is first made commercially in the continental United States by the Fujimoto Co. of San Francisco, California. Brand name: Kanemasa Miso.

1921–The term “bean paste” is first used to refer to miso by J.L. North of England in the *Illustrated London News*.

1929–Amano Brothers, Canada's first commercial miso maker, starts in Vancouver, British Columbia. Founder: Mr. Teichi Amano. 1960–Dr. C.W. Hesseltine and K. Shibasaki, of the Northern Regional Research Laboratory in Peoria, Illinois, publish the first of many important scientific articles on miso.

1963–Michio and Aveline Kushi, teachers of macrobiotics in Boston, start to teach Americans about miso.

1966 April–Aveline Kushi (with Evan Root) starts Erewhon, a pioneering retailer in Boston, that soon starts selling miso.

1968–Erewhon expands to become an importer and distributor of natural and macrobiotic food. Their first two misos, Mugi Miso and Hacho Miso, are imported from Japan.

1976 June–Miyako Oriental Foods, a division of Yamajirushi Miso Co. in Japan, starts making miso in Los Angeles. Owned by Noritoshi Kanai. Brands: Yamajirushi, Kanemasa, Yamaizumi.

1976 Sept.–*The Book of Miso*, by Shurtleff and Aoyagi, is published by Autumn Press of Hayama, Japan. This is the first book about miso in the Western world.

1978 Oct.–The Ohio Miso Co., the first Caucasian-run miso company in the Western world, is founded by Thom Leonard and Richard Kluding. They begin miso production on 13 March 1979.

1978 Nov.–Joel Dee of Edward & Sons (New Jersey) launches Natural Instant Miso Cup, an instant miso soup made with freeze-dried miso from Japan.

1978 Dec.–Miyako Oriental Foods of Los Angeles introduces Cold Mountain Firm Granular Rice Koji, the first koji sold commercially in the USA. In 1979 they start selling Cold Mountain Miso, the first miso with an American-style brand.

1979 Oct.–John and Jan Belleme arrive in Japan to study traditional miso—and koji-making with the Onozaki family in Yaita, Japan. They are the first Caucasians to do this, and then to return to the West to start making miso commercially. From 1981 on they write many superb articles about miso,

published in America.

1979 April—Shin-Mei-Do Miso is founded by Lulu and Yasuo Yoshihara in British Columbia, Canada.

1981 April—John Troy of Elf Works, Ltd. in Chapel Hill, North Carolina, launches Hot Stuff, an early and very successful American miso product. He first learned about miso from Joel Dee.

1981 Aug.—John and Jan Belleme begin full-time, large-scale production of miso and koji at Erewhon Miso Co. in Rutherfordton, North Carolina. By early 1982 their company is renamed American Miso Co. with Barry Evans as the new owner.

1982 Oct. 25—Christian and Gaella Elwell start making miso and koji at South River Miso Co. in Conway, Massachusetts. Earlier that year they purchased The Ohio Miso Co. Address: Lafayette, California. Phone: 925-283-2991.

8550. *SoyaScan Notes*. 2012. Definition of teriyaki and teriyaki sauce (Overview). Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** Etymology: Formed from the Japanese verbs *teru* “to shine or be glossy or bright” and *yaku* “to grill or broil” (traditionally over charcoal or coals, using a hibachi, a small, usually round charcoal brazier).

Teriyaki, a Japanese appetizer, is said to have originated in Japan during the Edo period (1600-1867; see *The History and Culture of Japanese Food*, by Naomichi Ishige, 2001, p. 116; he does not cite his source). The word “teriyaki” originally referred to fish (or occasionally poultry), cut into small pieces, marinated in a Mirin-Shoyu sauce, skewered on bamboo skewers, grilled on the hibachi, and basted / brushed occasionally with the sauce; the mirin was considered the key to the glossy appearance. Note: Mirin is sweetened sake for cooking or seasoning. Shoyu is regular Japanese-style soy sauce.

As the recipe became Westernized in the early 1950s, it was transformed; the mirin was often omitted, garlic (ideally fresh, crushed), and a small amount of sweetener (such as sugar or pineapple juice) were added, and chunks or thin strips of beef were often used in place of fish. The teriyaki sauce was used initially as a marinade, then later in the cooking process for basting while grilling.

Although teriyaki originated in Japan, it came to the United States largely from Hawaii in the early 1950s, and was soon viewed by Americans as an Hawaiian recipe and dish. American versions may skewer chunks of fruit (such as pineapple) or vegetables (green or red bell peppers) alternatively with chunks of meat. Vegetarian versions usually use pressed firm tofu or seitan in place of meat. Address: Soyfoods Center.

8551. *SoyaScan Questions*. 2012. Questions about the history of soybeans and soyfoods in Canada. Further research

needed. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** (1) Try to find out when and from whom Mr. Bruce (of John A. Bruce & Co.) in Hamilton, Ontario, obtained the soja beans which he sent in 1881 to Canada’s Central Experimental Farm at Ottawa. Which library in Canada or the USA has the best collection of John A. Bruce & Co.’s seed catalogs? Look at these starting in the year 1881, going backward, then forward to see if the company ever sold soybeans in its seed catalog. Has a history of this seed company or of its founders ever been written? Is there an archival collection anywhere for this seed company? Has anyone written a genealogy of this branch of the Bruce family which includes its founders?

(2) What was the relationship between the company in Toronto that made Sunsoy (Soy Bean (Sunsoy) Products Ltd. Renamed Sunsoy Products Ltd. in about 1939) and Victory Mills Ltd.? Both were subsidiaries of Canadian Breweries Ltd. When, why and by whom was Soy Bean Products Ltd. founded? What kind of a company was it—a soybean crushing company? A maker of whole (full-fat) soy flour? Did it import any soybeans or soyfoods? What products did it make and what was the name of each?

(3) When, where, and by whom were soybeans first cultivated in Quebec? Where did Leonard Klinck get the soybeans he cultivated? When did he first cultivate them?

(4) When and where was soy sauce first imported to Canada?—probably during the period 1750 to 1800? In what newspaper or book (and in what language—French or English) is this information first recorded? Which were Quebec’s earliest surviving newspapers? Have they been digitized? What were the various early names of soy sauce in Canadian French and English?

(5) When and where were soybeans first grown in Quebec (probably at Macdonald College). When and from where did Leonard Klinck obtain his first soybeans? The Quebec No. 92 was originated by selection by Dr. L.S. Klinck, when in charge of the agronomy work at Macdonald College, Quebec.

8552. *SoyaScan Questions*. 2012. Questions about the history of Worcestershire sauce. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** The history of this sauce has never been well documented and there are some interesting unanswered questions and contradictions in the history as it is popularly presented.

To answer these questions it would be best to travel to Worcester, England, and to spend at least 1-2 weeks there.

Have any local newspapers or magazines (near Worcester) been digitized so that they can be searched electronically for information on this subject. If yes, which ones and for what years? Ideally we would start by searching publications dating back to the 1830s.

In what year and month did Lea and Perrins first sell

their Worcestershire sauce (about 1837)?

Did they make and sell the first seasoning named “Worcestershire sauce”?

What was the name and address of the second company to make “Worcestershire sauce”?

If the Worcestershire sauce made in Worcester used soy sauce as a major ingredient, when did it start to be used? From the very first batch?

In what foreign country (Japan, China) was Lea and Perrins’ soy sauce made? By which company? Did the same company (and only one company) make this soy sauce up until World War II?

How was this soy sauce transported to Worcestershire? Was it first transported by boat? Up the River Severn?

When did the transportation switch from boat to train / rail? Were any photos ever taken of the soy sauce being unloaded from the vehicle in which it was transported. Or were any news stories ever published of the arrival of a shipment of unknown goods from East Asia?

Try to locate the company John Duncan’s Sons or John Duncan & Sons (or their archives) of New York. Do they have any records showing when they first imported Worcestershire sauce? Do they have any early labels or records showing ingredients?

Which organizations or individuals in Worcestershire know the most about or are most interested in the history of Lea and Perrins and / or of Worcestershire sauce? From Web: (1) Worcestershire Historical Society, Tettenhall, Wolverhampton. (2) Worcester and District Industrial Archaeology / local History Society, Redditch, Worcestershire. (3) Worcestershire Local History Forum, Trinity Street, Worcestershire. Has this story ever been told in any histories of Worcester or Worcestershire? Have any articles ever been published on this subject? (See a local Worcester library).

When did soy sauce switch from being shipped in wooden kegs / casks to more modern containers such as barrels or drums?

Did Lea & Perrins ever make its own fermented soy sauce? If so, starting when? Where? How did they learn the process? How long was it fermented.

What year and month (during World War II) did Lea and Perrins stop using fermented soy sauce from Asia and start using HVP? But note that about April 1978, when Craig Claiborne of *The New York Times* visited the plant in Fair Lawn, New Jersey, he was told that “soy” (probably referring to the soybean hydrolysate in HVP) was one of the ingredients, and that the mixture was fermented. He noted a pleasant smell around the 35 giant wooden curing vats—each holding a total of 6,000 gallons. No one would tell him how long the base for the sauces is aged, but he estimated a minimum of two years.

How long has Lea & Perrin’s sauce been fermented at different points in its history? Is it fermented now? In New

Jersey? If so, for how long? If not, when did fermentation stop?

8553. *SoyaScan Questions*. 2012. Questions about the history of soybeans and soyfoods in the Hawaiian Islands (Hawaii). Further research needed. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** (1) When was soy sauce first made commercially in the Hawaiian Islands? Was it Japanese-style or Chinese-style? Try to find the name and address of the manufacturer, and a brief history.

(2) What was the first commercial soyfood product made in the Hawaiian Islands? When was it first sold commercially? Try to find the name and address of the manufacturer, and a brief history. (3) If we look at the first earliest 20 soyfood products made in the Hawaiian islands, were most of them made by Japanese-owned or Chinese-owned companies?

8554. *SoyaScan Questions*. 2012. Questions about the history of soybeans and soyfoods in South Asia. Further research needed. Compiled by William Shurtleff of Soyinfo Center.

• **Summary:** (1) The term “Indian Soy” was the earliest name given to soy sauce imported to the British colonies of North America; it was first used in 1750 to refer to the product sold in retail stores (starting in New York) and widely advertised in newspapers along with other imported goods in ports up and down the East Coast of the British colonies. But what does it mean? Where was it made? In Japan? In China? In India? (unlikely). Was it actually shipped to India? To which port and by what company?

(2) The same questions for the term “India Soy” which started to be used in 1801 for a new retail product.

An asterisk (*) at the end of the record means that SOYFOODS CENTER does not own that document.

A plus after eng (eng+) means that SOYFOODS CENTER has done a partial or complete translation into English of that document.

An asterisk in a listing of number of references [23* ref] means that most of these references are not about soybeans or soyfoods.

Africa–Cape Verde or Cape Verde Islands (Ilhas do Cabo Verde. República de Cabo Verde). 8543

Africa–Congo (formerly Zaire). Officially Democratic Republic of the Congo (DRC). Also known as Congo-Kinshasa. Named Zaire from Oct. 1971 to May 1997. Named Congo Free State from 1855–1908, Belgian Congo (*Congo Belge* in French) from 1908–1960, Republic of the Congo from 1960 to 1964, then Democratic Republic of the Congo from 1964–1971. 2839, 2925, 3153, 3246, 3373, 3679, 4112, 4494, 6055, 6089, 6802, 6815, 8065

Africa–Cote d'Ivoire (Ivory Coast until Oct. 1985; Part of French West Africa from 1895–1959). 3297, 6815

Africa–Egypt. Named United Arab Republic (UAR) from 1958–1971. 1124, 1525, 1923, 2447, 3114, 3153, 3254, 3297, 3679, 4154, 4155, 5120, 5316, 6055, 8235

Africa–Eritrea (Part of Ethiopia PDR from 1952 to May 1993). 3153

Africa–Ethiopia (Including Eritrea in Ethiopia PDR from 1952 to May 1993. Formerly Part of Italian East Africa). 3153, 5352, 5590, 5609, 6055

Africa–Gabon (Part of French Equatorial Africa from 1910 to 1958). 3760, 4861, 5154, 6680

Africa–Gambia (The). Includes Senegambia. 1792, 1838, 1962, 1972, 1981, 2447, 3679, 6055

Africa–Ghana (Gold Coast before 1957). 1972, 2447, 3297, 3679, 5690, 5957, 6055, 6205, 7102, 7810

Africa–Guinea (French Guinea before 1958; Guinée in French; Part of French West Africa from 1895–1958). 994

Africa–Introduction of Soybeans to. Earliest document seen concerning soybeans in a certain African country. 1150, 3153, 3760

Africa–Introduction of Soybeans to. Earliest document seen concerning soybeans or soyfoods in connection with (but not yet in) a certain African country. 1707, 2226

Africa–Introduction of Soybeans to. Earliest document seen concerning the cultivation of soybeans in a certain African country. 1150, 3153, 3760

Africa–Introduction of Soybeans to. This document contains the earliest date seen for soybeans in a certain African country. 1150, 3153, 3233, 3246, 3760

Africa–Introduction of Soybeans to. This document contains the earliest date seen for the cultivation of soybeans in a certain African country. 1150, 3153, 3233, 3246, 3760

Africa–Kenya (British East Africa Protectorate from 1895. Renamed Kenya Protectorate in 1920). 5352, 5609, 6055, 6680, 8543

Africa–Libya (Including Tripoli, Tripolitania, and Cyrenaica; Also Spelled Libia). 3153, 6055

Africa–Madagascar (Malagasy Republic or Republique Malgache before 1975). 994, 1707, 1749, 2203, 3153, 5156, 6055

Africa–Malawi (Nyasaland from 1891-1964). 6055

Africa–Mauritius (Ile Maurice, Including Rodriguez, in the Mascarene Islands, 450 Miles East of Madagascar). 815, 1962, 1981, 2084, 2203, 2447, 3153, 6055

Africa–Morocco, Kingdom of (Including Western Sahara. Divided into French Morocco and Spanish Morocco from 1912-1956). 3153, 3159, 3297, 3416, 5228, 5352, 5609

Africa–Mozambique (Moçambique; Portuguese East Africa before 1975). 6055

Africa–Nigeria, Federal Republic of. 1972, 2447, 3297, 3530, 3679, 3690, 4491, 5093, 5120, 5156, 5352, 5609, 5616, 6055, 6276, 6744, 6925, 6928, 7174, 7306, 7807

Africa–Reunion (Réunion is a Department of France, in the Mascarene Islands, 425 Miles East of Madagascar). 813, 3153, 6055

Africa–Rwanda (Part of the Belgian trust territory of Ruanda-Urundi or Belgian East Africa until 1962). 3246, 6802, 7769, 7774, 7832

Africa–Senegal (Part of French West Africa from 1895-1959. Sénégal & Sudanese Republic from June 20 to August 20, 1960. Includes Senegambia). 6815

Africa–Sierra Leone. 1972, 2118, 2447

Africa–South Africa, Republic of (Including four former Homelands–Bophuthatswana, Transkei, Venda, and Ciskei). Named Union of South Africa from May 1910 to May 1961. 994, 1792, 1838, 1851, 1863, 1904, 1962, 1972, 1981, 2092, 2118, 2178, 2186, 2203, 2335, 2360, 2375, 2447, 2766, 2979, 3153, 3207, 3297, 3373, 3578, 3679, 4535, 4676, 4856, 5120, 5248, 6055, 6485, 6744, 7115, 7225, 7478, 7651, 7748, 8392

Africa–Soybean Production, Area and Stocks–Statistics, Trends, and Analyses. 3530, 6815

Africa–Sudan (Anglo-Egyptian Sudan from 1899-1956). 3153, 6055

Africa–Tanzania, United Republic of (Formed the Bulk of German East Africa 1895-1946. Tanganyika existed 1920-1961. Created in 1964 by Merger of Tanganyika and Zanzibar). 3530, 4491, 5156, 5352, 5609, 6055

Africa–Togo (Togoland until 1914). 2226, 3297, 6055

Africa–Tunisia. 1161, 2925, 3153, 3159, 3297, 3416

Africa–Uganda. 5352, 5609

Africa–Zambia (Northern Rhodesia from 1899-1964). 3297, 3530

Africa–Zimbabwe (Southern Rhodesia from 1923-1970, Rhodesia from 1970-79). 3153, 3297, 3530, 4535, 6815

All-India Research Project on Soyabean (ICAR). See Asia, South-India. Work of the Indian Council of Agricultural Research (ICAR)

Allergies. See Nutrition—Biologically Active Phytochemicals—Allergens

Allied Mills, Inc. Including (by July 1929) American Milling Co. (Peoria, Illinois) and Wayne Feed Mills (Chicago, Peoria, or Taylorville, Illinois). 3045, 3391, 4533

Allis-Chalmers Manufacturing Co. (Milwaukee, Wisconsin). Made Farm Equipment (Tractors, Combines) and Soybean Processing Equipment (Driers, Rolling and Flaking Mills, Solvent Extraction Units). 4470

Almond Butter or Almond Paste. 434, 1450, 2823, 2958, 2979, 3090, 3343, 4987, 5282, 5946, 6139, 7436, 7604, 7605, 7726, 7914, 7943, 8272, 8345

Almond Milk and Cream. See also: Almonds Used to Flavor Soymilk, Rice Milk, etc. 434, 1258, 1450, 2243, 2246, 2490, 2569, 2623, 2650, 2652, 2846, 3415, 3520, 4398, 5234, 5242, 6032, 7454, 7491, 7593, 7789, 7943, 8131, 8345, 8416

Almond Oil. 877, 930, 999, 1497, 1815, 2246, 3038, 6857

Almonds Used to Flavor Commercial Soymilk, Soy Ice Cream, Soy Cheese, Amazake, Rice Milk, or Other Commercial Non-Dairy Products. 3327, 6053, 7856

Almonds (*Prunus dulcis* syn. *P. amygdalus*)—Especially Origin and Early History of the Almond. Including Almond Bread, Almond Meal, and Almonds Seasoned with Soy Sauce / Tamari. 41, 434, 981, 994, 999, 1101, 1199, 1212, 1335, 1368, 1390, 1394, 1450, 1474, 1497, 1604, 1671, 1885, 1898, 2330, 2331, 2489, 2491, 2915, 2958, 3038, 3162, 4396, 4792, 4832, 4834, 4929, 4973, 5071, 5125, 5134, 5282, 5674, 5717, 5718, 5946, 6139, 6919, 7016, 8224, 8225, 8345

Alpro (Wevelgem, Belgium), Including the Provamel and Belsoy Brands Sold in Health Foods Stores. 6485, 6492, 6633, 6909, 6958, 6959, 7115, 7193, 7208, 7311, 7334, 7348, 7453, 7470, 7645, 7675, 7800

Alternative medicine. See Medicine—Alternative

Aluminum in the Diet and Cooking Utensils—Problems. Soy Is Not Mentioned. 2823, 3038, 3078, 3296, 3481, 5153, 5850, 6865

Amaranth, Grown for Grain / Seed (*Amaranthus hypochondriacus*, *A. caudatus*, and *A. cruentus*. Genus formerly spelled *Amarantus*). 2330, 6257, 7030, 7048, 7053, 7284, 7624, 7712, 7726, 7789, 7880, 7895, 7914, 7928, 7942, 8131, 8272, 8416

Amazake. See Rice Milk (Non-Dairy)

American Lecithin Corp. (Incorporated 1930), American Lecithin Company (Re-incorporated 1934-35), and Joseph Eichberg, President of Both. 3152, 3391

American Milling Co. See Allied Mills, Inc.

American Miso Co. (Rutherfordton, North Carolina). 5794, 6127, 6574, 6657, 6794, 6808, 7041, 7132, 7171, 7238, 7356, 7427, 7552, 7695, 7712, 7871, 7980, 8104, 8119, 8120, 8121, 8151, 8152, 8153, 8345, 8481, 8549

American Natural Snacks (St. Augustine, Florida). 7065, 7712, 7809

American Philosophical Society (Philadelphia). See Franklin, Benjamin

American Soy Products (Michigan). See Natural Foods Distributors and Manufacturers in the USA—Eden Foods

American Soy Products (Saline, Michigan). Started Nov. 1986. 4672, 7383, 7557, 7683, 8530

American Soybean Association (ASA)—Activities in the United States and Canada, and General Information (Headquarters in St. Louis, Missouri. Established 3 Sept. 1920. Named National Soybean Growers' Association until 1925). 2587, 2680, 3152, 3296, 4231, 4395, 5287, 5289, 6575

American Soybean Association (ASA)—Activities, Offices, and Influence Worldwide (General). 3918

American Soybean Association (ASA)—Activities, Offices, and Influence in Asia. 3895, 3918, 3924, 3936, 3989, 3995, 4029, 4037, 4043, 4082, 4110, 4122, 4153, 4171, 4176, 4185, 4186, 4194, 4257, 4352, 4429, 4452, 4489, 4526, 4589, 4598, 4673, 5663, 5826, 6337, 6566, 6765, 7229, 7442, 7708, 7954, 8080, 8126, 8532

American Soybean Association (ASA)—Activities, Offices, and Influence in Europe (Western and Eastern). 6635, 7214, 7398

American Soybean Association (ASA)—Activities, Offices, and Influence in Latin America. 8245

American Soybean Association (ASA)—Funding and Fundraising Before Checkoff Program or 1971. Voluntary or from USDA (FAS or ARS). 3924, 4029, 4043, 4176

American Soybean Association (ASA)—Japanese-American Soybean Institute (JASI). 3924, 3936, 3983, 3989, 3995, 4037, 4110, 4122, 4153, 4171, 4176, 4224, 4242, 4257, 4352, 4429, 4489, 4526, 4598, 4673, 7954

American Soybean Association (ASA)—Meetings / Conventions (Annual) and Meeting Sites. 2549, 2734, 3436, 4395

American Soybean Association (ASA)—Officers, Directors (Board), and Special Committees. 2549, 2790

American Soybean Association (ASA)—Periodicals, Including Soybean Digest, Proceedings of the American Soybean Assoc., Soybean Blue Book, Soya Bluebook, Late News, etc. 3530, 3531, 3989, 4151, 4231, 6815, 7415

American Soybean Association (ASA)—Soybean Council of America (June 1956-1969). Replaced by American Soybean Institute (Est. 11 July 1969). 4532

American Soybean Association (ASA)—State Soybean Associations and Boards (Starting with Minnesota in 1962). 4558, 7801, 7859, 7883, 7913, 7975, 8040, 8042, 8096, 8145, 8198, 8211, 8278

American Soybean Association (ASA)—State Soybean Associations and United Soybean Board—Activities Related to Food Uses of Soybeans / Soyfoods, or Soy Nutrition, in the United States (Not Including Soy Oil or Edible Oil Products). 2549, 3044, 3045, 3152, 3176, 3201, 3436, 3486, 3530, 4231, 4558, 5004, 5457, 5530, 5942, 6849, 7759, 7801, 7802, 7804, 7859, 7883, 7890, 7891, 7913, 7975, 8040, 8042, 8060, 8096, 8145, 8180, 8191, 8198, 8211, 8278

American Soybean Association (ASA)—Strayer. *See* Strayer Family of Iowa

American Soybean Association (ASA)—United Soybean Board (USB, Established 1991, Chesterfield, Missouri). 7801, 7802, 7890, 7891, 7954, 8060, 8191, 8198, 8332

American Soybean Association (ASA) or United Soybean Board—Activities Related to Food Uses of Soybeans / Soyfoods, or Soy Nutrition, Outside the United States (Not Including Soy Oil). 3895, 3918, 3995, 4029, 4037, 4110, 4122, 4153, 4171, 4257, 4352, 4429, 4452, 4489, 4526, 4589, 4673, 5471, 5663, 6566, 6633, 6635, 6765, 7214, 7229, 7345, 7398, 7708, 7722, 7828

Asia, East–Macao / Macau (Portuguese Colony, then Overseas Territory. Returned to China in 1999). 554, 2010, 6385

Asia, East–Manchuria (Called Manchukuo by Japanese 1932-45; The Provinces of Heilongjiang [Heilungkiang], Jilin [Kirin], and Liaoning Were Called Northeast China after 1950). 937, 961, 1009, 1021, 1041, 1142, 1244, 1326, 1383, 1386, 1409, 1473, 1491, 1524, 1597, 1603, 1617, 1643, 1654, 1693, 1723, 1746, 1750, 1773, 1774, 1780, 1781, 1786, 1787, 1791, 1803, 1806, 1815, 1822, 1832, 1833, 1835, 1836, 1837, 1838, 1850, 1851, 1852, 1854, 1858, 1873, 1876, 1879, 1880, 1882, 1883, 1888, 1904, 1905, 1912, 1913, 1923, 1926, 1950, 1962, 1972, 1973, 1981, 1993, 1994, 2022, 2030, 2048, 2050, 2051, 2077, 2088, 2091, 2092, 2106, 2118, 2126, 2127, 2128, 2129, 2131, 2137, 2149, 2167, 2171, 2177, 2178, 2179, 2187, 2189, 2193, 2196, 2199, 2203, 2231, 2240, 2241, 2243, 2252, 2254, 2274, 2279, 2282, 2298, 2302, 2306, 2310, 2311, 2318, 2337, 2343, 2375, 2378, 2389, 2390, 2392, 2393, 2394, 2403, 2413, 2442, 2447, 2456, 2458, 2459, 2468, 2481, 2488, 2492, 2517, 2518, 2524, 2534, 2566, 2615, 2617, 2618, 2622, 2627, 2635, 2649, 2651, 2653, 2680, 2705, 2723, 2734, 2762, 2763, 2764, 2766, 2771, 2772, 2774, 2778, 2781, 2782, 2784, 2785, 2787, 2789, 2790, 2795, 2827, 2828, 2830, 2838, 2852, 2853, 2860, 2863, 2873, 2894, 2895, 2925, 2930, 2954, 2963, 3015, 3026, 3053, 3079, 3095, 3112, 3130, 3153, 3159, 3168, 3169, 3171,

3172, 3187, 3190, 3228, 3297, 3322, 3373, 3403, 3412, 3416, 3489, 3491, 3501, 3503, 3504, 3513, 3537, 3579, 3639, 3663, 3679, 3741, 3764, 3893, 3918, 3926, 4112, 4362, 5185, 5454, 5679, 5933, 6063, 6305, 6306, 6337, 6338, 7225, 7469, 7772

Asia, East–Manchuria–Soybean Production, Area and Stocks–Statistics, Trends, and Analyses. 1803, 1912, 2447, 2458, 2488, 2492, 2766, 2790, 2852, 2895, 3169, 3187, 3491

Asia, East–Manchuria. *See* South Manchuria Railway and the South Manchuria Railway Company (*Minami Manshu Tetsudo K.K.*)

Asia, East–Mongolia (Mongol Uls; Outer and Inner Mongolia Before 1911; Outer Mongolia [Mongolian People's Republic] Thereafter). 1096, 1142, 1147, 1182, 1962, 1981, 1997, 2025, 2389, 4350, 5439, 5454, 7403, 7899

Asia, East–Soybean Crushing–Soy Oil and Meal Production and Consumption–Statistics, Trends, and Analyses. 1121

Asia, East–Soybean Production, Area and Stocks–Statistics, Trends, and Analyses. 2795, 3530, 5352

Asia, East–Taiwan (Republic of China. Widely called by its Portuguese name, Formosa, from the 1870s until about 1945). 51, 56, 58, 59, 62, 63, 64, 1734, 1736, 1854, 1923, 2257, 2435, 2447, 2481, 2488, 2611, 2680, 2771, 2795, 2963, 3026, 3054, 3129, 3190, 3297, 3477, 3491, 3878, 4127, 4368, 4373, 4382, 4534, 4535, 4576, 4598, 4606, 4644, 4659, 4880, 4917, 5121, 5124, 5211, 5213, 5267, 5276, 5318, 5352, 5383, 5384, 5405, 5407, 5408, 5558, 5560, 5570, 5604, 5657, 5663, 5686, 5765, 5806, 5821, 5826, 5829, 5838, 5856, 5858, 6017, 6043, 6200, 6233, 6239, 6242, 6350, 6485, 6524, 6549, 6566, 6619, 6744, 6765, 6766, 6807, 6930, 6971, 7059, 7094, 7115, 7161, 7229, 7253, 7345, 7383, 7403, 7443, 7473, 7507, 7694, 7708, 7735, 7881, 7993, 8001, 8051, 8059, 8109, 8371, 8372, 8524, 8548

Asia, East–Taiwan–Soybean Production, Area and Stocks–Statistics, Trends, and Analyses. 2488

Asia, East–Tibet (Conquered by China in 1950; Also called Thibet or, in Chinese, Sitsang) and Tibetans Outside Tibet. 1245, 1368, 1497, 5289, 5458, 7789

Asia, East–Trade (Imports or Exports) of Soybeans, Soy Oil, and / or Soybean Meal–Statistics. *See also* Trade (International). 5008, 5015

Asia, Middle East–Afghanistan, Islamic State of. 3236, 3679

Asia, Middle East–Bahrain, State of (Also spelled Bahrein). 6055

Asia, Middle East–Cyprus. 3153

Asia, Middle East–Introduction of Soy Products to. Earliest document seen concerning soybean products in a certain Middle Eastern country. Soybeans as such have not yet been reported by that date in this country. 1803, 3014, 6055

Asia, Middle East–Introduction of Soy Products to. This document contains the earliest date seen for soybean products in a certain

Middle Eastern country. Soybeans as such had not yet been reported by that date in this country. 1803, 3014, 6055

Asia, Middle East–Introduction of Soybeans to. Earliest document seen concerning soybeans in a certain Middle Eastern country. 3153, 3679

Asia, Middle East–Introduction of Soybeans to. Earliest document seen concerning soybeans or soyfoods in connection with (but not yet in) a certain Middle Eastern country. 3153

Asia, Middle East–Introduction of Soybeans to. Earliest document seen concerning the cultivation of soybeans in a certain Middle Eastern country. 3153, 3679

Asia, Middle East–Introduction of Soybeans to. This document contains the earliest date seen for soybeans in a certain Middle Eastern country. 3679

Asia, Middle East–Introduction of Soybeans to. This document contains the earliest date seen for the cultivation of soybeans in a certain Middle Eastern country. 3679

Asia, Middle East–Iran, Islamic Republic of (Jomhori-e-Islami-e-Irân; Persia before 1935). 1161, 3236, 3297, 5352, 6055, 8235, 8360, 8392, 8405

Asia, Middle East–Iraq (al Jumhuriya al ‘Iraqia). 2489, 2491, 3236, 6055, 7110, 8235, 8405

Asia, Middle East–Israel and Judaism (State of Israel, Medinat Israel; Established May 1948; Including West Bank, Gaza Strip, and Golan Heights Since 1967). 2120, 2329, 3153, 4368, 4374, 6874, 6879, 7252, 7325, 7341, 7354, 7498, 7499, 7651, 7719, 8124, 8332, 8348, 8349, 8365

Asia, Middle East–Jordan, Hashemite Kingdom of (Transjordan until 1949). 6055

Asia, Middle East–Kuwait (Dowlat al-Kuwait). 6055

Asia, Middle East–Lebanon (al-Jumhuriya al-Lubnaniya). 7285

Asia, Middle East–Oman, Sultanate of (Saltanat ‘Uman). 6055

Asia, Middle East–Palestine (Divided between Israel and Jordan in 1948-49). 3153, 8348, 8349

Asia, Middle East–Qatar, State of (Dawlet al-Qatar; Also called Katar). 6055

Asia, Middle East–Saudi Arabia, Kingdom of (al-Mamlaka al-‘Arabiya as-Sa‘udiya). 1019, 6055, 8066

Asia, Middle East–Soybean Production, Area and Stocks–Statistics, Trends, and Analyses. 8072

Asia, Middle East–Syria (Syrian Arab Republic; Including Latakia, Alawiya, and Territory of the Alaouites). 3014, 3185, 3235, 8405

Asia, Middle East–Turkey (Including Anatolia or Asia Minor). 1803, 3153, 3343, 3530, 3912, 4532, 5316, 5352, 5945, 6815, 8235, 8360, 8405

Asia, Middle East–United Arab Emirates (Formerly Trucial States or Trucial Oman; Also Dubai). 6055, 7651

Asia, Middle East–Yemen (Formed in May 1990 by the Merger of Pro-Soviet South Yemen [People's Democratic Republic of Yemen, Including Aden] and Pro-Western North Yemen [Yemen Arab Republic]). 6055

Asia, Middle East, Mideast, or Near East (General). 3553, 5120, 5199, 5228, 5350, 5609, 5616, 6018, 6524, 6916, 6994, 7729, 8044, 8066, 8072, 8235

Asia, South (Indian Subcontinent). 1410, 6524, 8072, 8554

Asia, South–Bangladesh, People's Republic of (East Bengal [See India] from 1700s-1947, and East Pakistan [See Pakistan] from 1947-1971). 2655, 3153, 4784, 6055, 6690, 6744, 6815, 7404, 7932, 8392

Asia, South–Bhutan, Kingdom of. 3153, 3188, 4958, 6867, 7750, 8222, 8512, 8518

Asia, South–India (Bharat, Including Sikkim, and Andaman and Nicobar Islands). 60, 69, 71, 72, 73, 78, 79, 81, 82, 101, 132, 143, 149, 161, 163, 168, 170, 178, 182, 188, 211, 212, 219, 222, 223, 225, 231, 232, 233, 235, 236, 237, 238, 239, 240, 244, 246, 253, 258, 261, 262, 263, 264, 265, 266, 268, 275, 277, 279, 280, 282, 283, 284, 285, 287, 289, 290, 291, 293, 296, 298, 299, 300, 301, 303, 304, 306, 308, 309, 310, 312, 314, 315, 318, 319, 320, 321, 323, 324, 327, 328, 330, 332, 334, 335, 338, 339, 344, 345, 346, 349, 354, 356, 359, 360, 361, 362, 363, 364, 368, 370, 372, 373, 375, 379, 380, 383, 388, 389, 390, 391, 394, 397, 400, 407, 410, 412, 414, 416, 419, 420, 421, 422, 423, 425, 427, 431, 432, 433, 435, 442, 443, 445, 450, 453, 454, 459, 460, 464, 465, 466, 470, 473, 475, 476, 478, 479, 480, 484, 485, 486, 487, 491, 494, 496, 500, 503, 504, 506, 507, 509, 511, 512, 515, 516, 518, 519, 526, 528, 531, 532, 537, 540, 542, 546, 547, 549, 551, 552, 555, 558, 564, 565, 568, 570, 572, 574, 575, 579, 590, 592, 593, 594, 595, 600, 603, 608, 609, 611, 614, 627, 629, 631, 638, 639, 644, 652, 654, 660, 662, 663, 664, 665, 667, 678, 690, 692, 694, 695, 697, 700, 702, 706, 709, 710, 712, 724, 727, 731, 732, 737, 742, 760, 764, 765, 766, 767, 776, 783, 784, 797, 808, 813, 816, 823, 841, 848, 852, 867, 875, 877, 878, 879, 889, 893, 904, 914, 919, 924, 927, 930, 931, 936, 951, 957, 960, 968, 979, 981, 987, 991, 992, 994, 998, 999, 1000, 1004, 1010, 1023, 1027, 1030, 1035, 1037, 1041, 1048, 1049, 1056, 1066, 1072, 1073, 1077, 1096, 1101, 1114, 1133, 1134, 1139, 1147, 1161, 1169, 1175, 1176, 1188, 1192, 1199, 1210, 1214, 1215, 1217, 1229, 1235, 1236, 1239, 1240, 1242, 1244, 1245, 1248, 1253, 1257, 1260, 1264, 1279, 1282, 1283, 1284, 1287, 1301, 1317, 1318, 1321, 1326, 1341, 1342, 1345, 1349, 1359, 1360, 1368, 1383, 1386, 1389, 1395, 1415, 1437, 1441, 1450, 1478, 1488, 1497, 1533, 1568, 1572, 1582, 1602, 1640, 1651, 1696, 1723, 1746, 1763, 1804, 1856, 1879, 1880, 1896, 1902, 1905, 1923, 1932, 1962, 1973, 1975, 1979, 1981, 1991, 1997, 2007, 2045, 2096, 2104, 2112, 2124, 2127, 2137, 2179, 2203, 2226, 2243, 2265, 2283, 2304, 2307, 2309, 2317, 2324, 2332, 2335, 2344, 2447, 2456, 2458, 2492, 2550,

2551, 2577, 2584, 2652, 2655, 2824, 2842, 2912, 2942, 2963, 3058, 3079, 3152, 3153, 3187, 3188, 3190, 3247, 3255, 3297, 3360, 3373, 3545, 3608, 3658, 3660, 3679, 3906, 3910, 3945, 3947, 3956, 4033, 4082, 4101, 4149, 4169, 4232, 4435, 4456, 4457, 4494, 4499, 4532, 4624, 4625, 4665, 4768, 4771, 4784, 4818, 4890, 4899, 4916, 4941, 4965, 5025, 5055, 5120, 5156, 5192, 5249, 5348, 5352, 5501, 5519, 5589, 5590, 5599, 5609, 5824, 5973, 6018, 6055, 6061, 6123, 6208, 6225, 6244, 6277, 6282, 6359, 6436, 6437, 6450, 6485, 6524, 6680, 6690, 6744, 6756, 6759, 6769, 6815, 6867, 6907, 6927, 7019, 7049, 7102, 7107, 7115, 7276, 7371, 7404, 7543, 7623, 7647, 7664, 7667, 7780, 7798, 7830, 7849, 7855, 7877, 7937, 7990, 8049, 8053, 8065, 8080, 8088, 8090, 8111, 8125, 8129, 8222, 8249, 8353, 8360, 8382, 8386, 8408, 8410, 8426, 8452, 8498, 8512, 8518, 8519, 8520, 8521, 8552, 8554

Asia, South–India, Northeast / North-East. The Contiguous Seven Sister States and Sikkim–Which are Ethnically Distinct. The States are Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, and Tripura. 1245, 1257, 1341, 1368, 1497, 1651, 1763, 1902, 1962, 2045, 2655, 3153, 3188, 3297, 3947, 6867, 7107, 8053, 8222, 8512, 8518, 8519, 8520, 8521

Asia, South–India. Work of the Indian Council of Agricultural Research (ICAR), the All-India Research Project on Soyabean (ICAR, Uttar Pradesh), and the National Research Centre for Soybean (ICAR, Madhya Pradesh)–with Soybeans in India. 4665

Asia, South–India. Work of the Indian Institute of Science (Bangalore) with Soybeans in India. 4532

Asia, South–Introduction of Soy Products to. Earliest document seen concerning soybean products in a certain South Asian country. Soybeans as such have not yet been reported in this country. 60, 75

Asia, South–Introduction of Soy Products to. This document contains the earliest date seen for soybean products in a certain South Asian country. Soybeans as such had not yet been reported by that date in this country. 60, 3910

Asia, South–Introduction of Soybeans to or Dissemination of Soybeans from. Other or general information and leads concerning South Asia. 1651

Asia, South–Introduction of Soybeans to. Earliest document seen concerning soybeans (but only wild perennial relatives of soybeans) in a certain South Asian country; cultivated soybeans have not yet been reported. 324

Asia, South–Introduction of Soybeans to. Earliest document seen concerning soybeans in a certain South Asian country. 443

Asia, South–Introduction of Soybeans to. Earliest document seen concerning the cultivation of soybeans in a certain South Asian country. 443, 2045

Asia, South–Introduction of Soybeans to. This document contains the earliest date seen for soybeans in a certain South Asian country. 443

Asia, South–Introduction of Soybeans to. This document contains

the earliest date seen for the cultivation of soybeans in a certain South Asian country. 443

Fermented Black Soybeans from Japan–Kuki. 8, 22, 33, 874, 1400, 1965, 4399, 5259, 5466, 6204, 8232, 8361, 8470, 8533

Fermented Black Soybeans from Japan–Other Names (Tera Natto, Shiokara Natto, Jofukuji Natto). 22, 33, 37, 4867, 5239, 5240, 5256, 5259, 5262, 6212, 6533, 6610, 8219, 8533

Fermented Black Soybeans, Homemade–How to Make at Home or on a Laboratory Scale, by Hand. 5, 4388, 4634, 4769, 4946, 6208, 7991, 8533

Fermented Black Soybeans, Unsalted or Bland (Soybean Koji)–Whole Soybeans Fermented without Salt in China (Danshi / Danchi in pinyin, or Tanshih, Tan-shih, or Tan-ch'ih in Wade-Giles). 5, 6, 41, 169, 4958, 6116, 6867, 7403, 8308, 8533

Fermented Soyfoods and Their Fermentation (General). See also: Microbiology and Bacteriology–History of Early Discoveries. 1069, 1111, 1316, 1416, 1421, 1475, 1555, 1559, 1610, 1900, 1901, 1929, 1967, 2046, 2102, 2146, 2216, 2341, 2393, 2394, 2445, 2460, 2461, 2462, 2620, 2679, 2712, 2719, 2775, 3114, 3345, 3489, 3492, 3607, 3667, 3954, 3969, 3978, 4063, 4137, 4221, 4353, 4450, 4477, 4501, 4506, 4540, 4567, 4568, 4569, 4573, 4594, 4634, 4666, 4676, 4703, 4710, 4729, 4765, 4778, 4801, 4856, 4858, 4891, 4900, 4946, 4954, 4956, 4960, 4965, 5049, 5059, 5176, 5182, 5219, 5245, 5247, 5254, 5256, 5284, 5286, 5290, 5292, 5299, 5403, 5414, 5450, 5465, 5513, 5567, 5568, 5574, 5582, 5589, 5590, 5591, 5597, 5603, 5616, 5617, 5700, 5704, 5705, 5713, 5751, 5758, 5779, 5858, 5878, 5918, 5925, 5945, 6015, 6036, 6040, 6205, 6218, 6225, 6226, 6227, 6234, 6235, 6240, 6298, 6301, 6355, 6434, 6449, 6450, 6451, 6453, 6612, 6616, 6618, 6669, 6694, 6734, 6735, 6736, 6762, 6783, 6831, 6847, 6891, 6903, 6908, 6910, 6911, 6912, 6913, 6925, 6927, 6928, 6929, 6933, 6934, 6936, 7101, 7102, 7116, 7272, 7280, 7405, 7406, 7410, 7416, 7441, 7540, 7548, 7623, 7646, 7647, 7971, 7986, 8014, 8016, 8053, 8091, 8183, 8236, 8242, 8295, 8306, 8346, 8362, 8441, 8465, 8512, 8517, 8519, 8520, 8521, 8539

Fermented Specialty Soyfoods–Soy Wine, Cantonese Wine Starter (Kiu-Tsee / Tsée), Soy Fermentation Pellicle or Bean Ferment (Tou Huang), Soyidli, Dosa / Dosai, Dhokla, and Soy Ogi. 4, 6, 7, 8, 40, 41, 43, 1147, 1178, 1244, 1311, 1364, 1523, 1974, 1989, 1997, 2287, 2546, 2680, 2865, 2866, 3157, 3297, 4450, 4475, 4634, 4695, 4856, 5354, 5641, 5650, 5705, 5758, 6226, 6240, 6301, 6450, 6734, 6741, 6763, 6927, 7036, 7106, 7116, 7306, 7405, 7416, 7753, 7971, 8346

Fermented Tofu, Homemade–How to Make at Home or on a Laboratory or Community Scale, by Hand. 3493, 5059

Fermented tofu, commercial production. See Tofu, Fermented... Production

Fermented tofu. See Tofu, Fermented

Fermented whole soybeans. See Natto, Dawa-dawa, Kinema, Thua-nao

Ferruzzi-Montedison (Italy). Purchased Central Soya Co. (USA) in Oct. 1987. European crushing operations renamed Cereol on 1 Jan. 1990. Cereol acquired by Bunge in April 2003. 7828

Fertilizer, soybean meal used as. See Soybean Meal / Cake, Fiber (as from Okara), or Shoyu Presscake as a Fertilizer or Manure for the Soil

Fertilizers / Fertilizer (Incl. Foliar Sprays), Fertilization, Plant Nutrition, Mineral Needs, and Nutritional / Physiological Disorders of Soybeans (Including Chlorosis). 1042, 1384, 1385, 1876, 1881, 2081, 2082, 2265, 3032, 3433, 4695, 5700, 6965

Fiber–Okara or Soy Pulp–Etymology of This Term and Its Cognates / Relatives in Various Languages. 997, 1052, 1259, 1276, 1384, 1613, 1649, 1654, 2256, 2593, 2793, 2946, 3033, 3161, 3296, 3297, 3724, 4786, 7383

Fiber–Okara or Soy Pulp, Used as an Ingredient in Commercial Soyfood Products. 5529, 5596, 5644, 5739, 5756, 5880, 5924, 5932, 6129, 6185, 6194, 6245, 6269, 6270, 6324, 6392, 6522, 6673, 6688, 6689, 6772, 6812, 6877, 6890, 7093, 7096, 7176, 7219, 7231, 7247, 7525

Fiber–Okara or Soy Pulp, from Making Soymilk or Tofu–Value Added Uses (Not Including Livestock Feeds) and Solutions to Disposal Problems. 1649, 2283, 2946, 3741, 4408, 5093, 5211, 5213, 5327, 5529, 7050

Fiber–Okara or Soy Pulp, the Residue Left from Making Soymilk or Tofu. Also called Bean Curd Residue, Soybean Curd Residue, Dou-fu-zha (Pinyin). 41, 997, 1005, 1052, 1158, 1221, 1222, 1259, 1271, 1276, 1334, 1384, 1395, 1420, 1468, 1488, 1514, 1517, 1613, 1614, 1649, 1654, 1656, 1707, 1746, 1749, 1756, 1833, 1850, 1912, 1982, 1997, 2022, 2027, 2182, 2210, 2226, 2255, 2256, 2270, 2274, 2283, 2352, 2360, 2403, 2447, 2593, 2616, 2617, 2668, 2676, 2774, 2784, 2793, 2946, 3013, 3033, 3161, 3162, 3296, 3297, 3348, 3358, 3481, 3482, 3516, 3724, 3725, 3728, 3741, 3945, 4068, 4128, 4277, 4388, 4408, 4471, 4513, 4600, 4601, 4786, 4861, 4883, 4916, 4932, 4933, 4934, 4941, 5046, 5048, 5054, 5059, 5083, 5093, 5154, 5157, 5211, 5213, 5215, 5234, 5254, 5262, 5272, 5303, 5327, 5335, 5336, 5352, 5445, 5547, 5554, 5576, 5588, 5604, 5609, 5641, 5642, 5647, 5650, 5661, 5673, 5691, 5707, 5737, 5794, 5859, 5934, 5947, 6006, 6013, 6024, 6037, 6073, 6103, 6176, 6216, 6221, 6293, 6323, 6338, 6373, 6421, 6432, 6455, 6533, 6604, 6607, 6610, 6613, 6638, 6662, 6750, 6754, 6856, 6865, 6908, 6919, 6925, 6928, 6933, 6934, 7005, 7030, 7036, 7050, 7051, 7052, 7053, 7190, 7246, 7274, 7319, 7365, 7383, 7450, 7517, 7552, 7555, 7577, 7587, 7593, 7624, 7625, 7712, 7726, 7741, 7752, 7851, 7854, 7883, 7887, 7908, 7914, 7924, 7929, 7956, 7957, 7974, 7975, 8007, 8010, 8023, 8024, 8027, 8035, 8036, 8037, 8040, 8069, 8070, 8083, 8090, 8107, 8124, 8130, 8132, 8145, 8150, 8164, 8181, 8209, 8245, 8249, 8251, 8252, 8272, 8334, 8353, 8363, 8380, 8424

Fiber–Presscake, Residue or Dregs from Making Soy Sauce. 961, 1113, 1132, 1146, 1148, 1199, 1292, 1321, 1324, 1334, 1384, 1416, 1421, 1430, 1488, 1524, 1554, 1556, 1597, 1603, 1796, 1814, 1888, 1990, 2055, 2086, 2129, 2389, 2397, 2461, 2593, 2723, 2986, 3288, 3388, 3516, 4069, 4070, 4403, 4471, 5649, 6030, 6827, 8433

Fiber—Seventh-day Adventist Writings or Products (Especially Early) Related to Dietary Fiber. 2073, 2400, 2491, 2965, 2979, 3655, 7789, 7862

Fiber—Soy Cotyledon Fiber / Polysaccharides (from Making Soy Protein Isolates). 7828, 7876, 7879

Fiber, Soy—Bran (Pulverized Soybean Hulls / Seed Coats) and Other Uses of Soybean Hulls. 2447, 3157, 4073, 4965, 5589, 6741, 6909, 7365, 7956

Fiber, Soy—Bran—Etymology of This Term and Its Cognates / Relatives in Various Languages. 2447, 3157

Fiber, Soy—General, for Food Use (Specific Type Unknown). 2073, 3090, 6257, 7456

Historical—Earliest Commercial Product Seen of a Particular Type or Made in a Particular Geographic Area. 47, 50, 66, 67, 202, 719, 1346, 1446, 1542, 1642, 1713, 2429, 2432, 2848, 3062, 3077, 3407, 3713, 4345, 4356, 4466, 4851, 5395, 5396, 5413, 5434, 5561, 5948, 6104, 6330, 7598, 8393

Historical—Earliest Document Seen Containing a Particular Word,

Term, or Phrase. 17, 37, 40, 44, 46, 81, 92, 101, 107, 118, 125, 188, 197, 219, 237, 246, 256, 271, 294, 324, 431, 434, 440, 491, 503, 518, 546, 569, 603, 615, 700, 714, 742, 772, 775, 793, 797, 822, 877, 881, 896, 959, 961, 981, 994, 997, 1009, 1030, 1039, 1041, 1052, 1057, 1061, 1066, 1068, 1071, 1093, 1147, 1148, 1156, 1164, 1179, 1192, 1205, 1224, 1257, 1259, 1276, 1306, 1316, 1323, 1327, 1336, 1341, 1349, 1384, 1386, 1395, 1421, 1436, 1440, 1450, 1452, 1458, 1503, 1533, 1543, 1554, 1613, 1614, 1649, 1654, 1696, 1769, 1780, 1781, 1785, 1828, 1831, 1833, 1838, 1843, 1875, 1900, 1930, 1940, 1943, 2044, 2048, 2089, 2118, 2134, 2156, 2189, 2219, 2226, 2243, 2254, 2256, 2265, 2270, 2352, 2359, 2360, 2370, 2390, 2400, 2401, 2447, 2489, 2491, 2569, 2593, 2650, 2668, 2782, 2785, 2788, 2790, 2875, 2913, 2933, 2946, 2970, 2974, 3026, 3044, 3124, 3152, 3157, 3161, 3169, 3177, 3237, 3255, 3346, 3348, 3433, 3461, 3482, 3501, 3535, 3684, 3807, 3912, 3918, 3923, 4193, 4338, 4343, 4389, 4497, 4513, 4651, 4690, 4717, 4903, 4912, 4916, 4941, 5035, 5049, 5149, 5150, 5197, 5211, 5213, 5338, 5341, 5521, 5647, 5674, 6073, 6373, 6421, 6633, 7284, 7334, 7517, 7937, 8181

Historical–Earliest Document Seen That Mentions a Particular Soybean Variety. 1452, 2045, 2097, 2189, 2265, 3044, 3485, 3578

Historical–Earliest Document Seen of a Particular Type. 197, 248, 908, 2680

Historical–Earliest Document Seen on a Particular Geographical Area—a Nation / Country, U.S. State, Canadian Province, or Continent. 4, 50, 101, 200, 201, 248, 297, 385, 443, 503, 512, 567, 664, 1001, 1009, 1041, 1057, 1095, 1096, 1136, 1149, 1150, 1186, 1188, 1194, 1244, 1245, 1326, 1359, 1385, 1391, 1419, 1446, 1468, 1533, 1542, 1642, 1713, 1780, 1803, 1804, 1832, 1866, 1882, 1923, 2007, 2037, 2118, 2137, 2180, 2231, 2268, 2287, 2429, 2974, 3014, 3077, 3080, 3089, 3112, 3153, 3679, 3760, 4023, 4314, 4851, 6104, 7598

Historical–Earliest Document Seen on a Particular Subject. 1, 2, 4, 5, 6, 8, 11, 17, 23, 26, 41, 42, 43, 44, 46, 49, 63, 66, 81, 83, 84, 103, 112, 118, 129, 158, 192, 201, 211, 214, 215, 232, 271, 294, 296, 321, 324, 331, 413, 440, 502, 504, 569, 582, 593, 601, 603, 606, 615, 669, 672, 677, 719, 728, 733, 763, 813, 843, 884, 908, 912, 961, 991, 997, 1009, 1041, 1042, 1057, 1069, 1074, 1093, 1108, 1114, 1144, 1147, 1148, 1171, 1196, 1228, 1277, 1315, 1316, 1352, 1359, 1389, 1391, 1395, 1421, 1430, 1434, 1450, 1452, 1458, 1466, 1475, 1542, 1548, 1557, 1650, 1653, 1746, 1785, 1786, 1805, 1806, 1828, 1852, 1860, 1863, 1864, 1866, 1888, 1912, 1922, 1937, 1940, 1942, 1943, 1972, 1982, 2059, 2097, 2117, 2142, 2170, 2217, 2223, 2256, 2265, 2274, 2428, 2432, 2464, 2496, 2617, 2728, 2777, 2788, 2823, 2839, 2852, 2970, 2971, 3017, 3037, 3038, 3090, 3162, 3310, 3384, 3391, 3415, 3462, 3482, 3493, 3500, 3518, 3625, 3806, 3895, 3901, 3934, 3947, 3971, 4069, 4110, 4139, 4154, 4211, 4239, 4242, 4356, 4430, 4472, 4535, 4539, 4690, 4712, 4720, 4795, 4796, 4910, 4935, 5026, 5027, 5063, 5079, 5080, 5108, 5199, 5223, 5239, 5277, 5283, 5286, 5287, 5289, 5290, 5292, 5413, 5432, 5504, 5596, 5627, 5647, 5947, 6055, 6073, 6330, 6373, 7517, 8181

Historical–Earliest Document Seen on a Particular Subject. 14, 15, 44, 51, 53, 77, 83, 132, 145, 215, 566, 578, 824, 909, 961, 965, 994, 1000, 1042, 1048, 1093, 1132, 1144, 1282, 1308, 1377, 1402, 1430, 1451, 1452, 1498, 1572, 1591, 1603, 1610, 1649, 1689, 1702, 1707, 1710, 1724, 1728, 1770, 1781, 1784, 1806, 1886, 1916, 1918, 1947,

2142, 2199, 2217, 2283, 2292, 2308, 2381, 2479, 2488, 2550, 2616, 2740, 2835, 2850, 2865, 2931, 2932, 2972, 3035, 3297, 3813, 3925, 3983, 4083, 4392, 4397, 4402, 4870, 5079, 5209, 5259, 5273, 5434, 7027

Historically Important Events, Trends, or Publications. 4, 6, 7, 8, 16, 22, 33, 36, 40, 41, 43, 49, 99, 785, 1069, 1137, 1178, 1266, 1626, 1997, 2117, 2167, 2216, 2277, 2617, 3036, 3062, 3162, 3210, 3543, 3594, 3668, 4209, 4421, 4475, 4685, 5328, 5434, 5831, 5893, 5999, 6165, 6273, 6359, 6385, 6485, 7115, 7119, 7172, 7449, 7453, 7827, 8178, 8365

Sea Vegetables–Imports, Exports, International Trade. 1899, 2128

Sea Vegetables or Edible Seaweeds, Often Used with Soyfoods.

324, 387, 450, 677, 981, 994, 999, 1008, 1023, 1076, 1090, 1113, 1132, 1148, 1153, 1156, 1170, 1171, 1199, 1201, 1212, 1213, 1219, 1224, 1235, 1258, 1263, 1271, 1323, 1333, 1351, 1411, 1477, 1531, 1540, 1541, 1573, 1590, 1594, 1607, 1617, 1652, 1654, 1686, 1688, 1718, 1743, 1763, 1919, 1946, 2117, 2128, 2246, 2247, 2330, 2359, 2400, 2448, 2493, 2652, 2668, 2734, 2946, 2979, 3033, 3090, 3161, 3163, 3237, 3288, 3296, 3327, 3415, 3520, 3527, 3639, 3647, 3707, 3730, 3818, 3873, 3888, 3903, 4008, 4023, 4070, 4109, 4128, 4154, 4155, 4195, 4212, 4280, 4328, 4349, 4360, 4396, 4401, 4430, 4442, 4469, 4471, 4513, 4517, 4539, 4556, 4574, 4625, 4677, 4690, 4697, 4698, 4699, 4704, 4712, 4720, 4796, 4798, 4813, 4822, 4832, 4837, 4843, 4861, 4865, 4873, 4880, 4883, 4890, 4907, 4910, 4913, 4916, 4932, 4933, 4934, 4941, 4949, 4961, 4969, 4974, 4975, 4987, 4988, 5018, 5034, 5037, 5044, 5046, 5047, 5054, 5055, 5071, 5094, 5119, 5149, 5150, 5154, 5157, 5169, 5189, 5197, 5198, 5211, 5213, 5233, 5234, 5238, 5253, 5265, 5267, 5276, 5282, 5286, 5287, 5288, 5289, 5290, 5292, 5310, 5322, 5336, 5342, 5343, 5350, 5360, 5366, 5367, 5393, 5395, 5396, 5416, 5452, 5458, 5489, 5494, 5509, 5515, 5520, 5524, 5536, 5540, 5541, 5544, 5549, 5554, 5557, 5586, 5612, 5638, 5639, 5646, 5647, 5653, 5661, 5683, 5691, 5695, 5707, 5744, 5750, 5752, 5753, 5754, 5760, 5773, 5782, 5785, 5786, 5787, 5788, 5794, 5807, 5833, 5844, 5845, 5850, 5852, 5854, 5859, 5874, 5880, 5898, 5914, 5917, 5940, 5946, 5959, 5966, 5975, 5991, 6001, 6005, 6018, 6032, 6041, 6053, 6054, 6056, 6073, 6096, 6107, 6117, 6139, 6162, 6170, 6179, 6180, 6199, 6210, 6219, 6232, 6251, 6275, 6281, 6307, 6330, 6336, 6341, 6358, 6373, 6380, 6382, 6408, 6409, 6410, 6413, 6414, 6428, 6429, 6436, 6440, 6441, 6446, 6447, 6448, 6452, 6454, 6461, 6472, 6484, 6521, 6538, 6543, 6557, 6560, 6576, 6578, 6597, 6606, 6608, 6630, 6632, 6637, 6640, 6647, 6652, 6655, 6659, 6660, 6671, 6672, 6675, 6733, 6737, 6748, 6760, 6794, 6797, 6805, 6808, 6816, 6836, 6837, 6858, 6859, 6862, 6904, 6916, 6918, 6919, 6948, 6976, 6994, 6999, 7016, 7037, 7040, 7050, 7052, 7060, 7063, 7069, 7077, 7086, 7124, 7129, 7134, 7135, 7136, 7137, 7138, 7139, 7152, 7171, 7172, 7183, 7184, 7226, 7235, 7236, 7242, 7248, 7260, 7270, 7311, 7313, 7314, 7319, 7321, 7323, 7331, 7334, 7342, 7343, 7347, 7360, 7379, 7381, 7440, 7444, 7463, 7465, 7480, 7485, 7496, 7515, 7517, 7531, 7541, 7542, 7547, 7557, 7583, 7585, 7587, 7593, 7599, 7601, 7604, 7605, 7606, 7618, 7624, 7628, 7652, 7656, 7661, 7673, 7679, 7686, 7689, 7691, 7696, 7698, 7699, 7703, 7720, 7726, 7739, 7751, 7761, 7786, 7789, 7811, 7814, 7825, 7836, 7842, 7871, 7880,

7895, 7914, 7918, 7920, 7928, 7941, 7943, 7966, 7980, 7981, 8006, 8011, 8027, 8039, 8052, 8083, 8090, 8094, 8097, 8107, 8119, 8130, 8131, 8181, 8184, 8185, 8202, 8218, 8224, 8225, 8266, 8272, 8307, 8339, 8345, 8353, 8357, 8362, 8399, 8416, 8467, 8502

Seafood, meatless. *See* Meat Alternatives—Meatless Fish, Shellfish, and Other Seafood-like Products

Seaweeds, edible. *See* Sea Vegetables

Second Generation Soyfood Products. 5647, 5934, 6073, 6088, 6323, 6373, 7517, 7688, 8181

Seed Certification and Certified Seeds (Soybeans). 2447, 4695

Seed Cleaning—Especially for Food or Seed Planting Uses. 6, 7, 8, 41, 1912, 1930, 1937, 2022, 2311, 2456, 3895, 3918, 4029, 7403

Seed Color (Soybeans)—Gives the Color of Seed (and Often Hilum) for Various Specific Varieties. *See also:* Soybean Seeds of Different Colors. 1009, 1151, 1205, 1244, 1263, 1323, 1386, 1452, 1562, 1851, 2199, 2223, 2257, 2403, 3173, 7782

Seed Companies and Seedsmen, Early Soybean, Worldwide (Especially Before 1925)—Including Siebold & Co., Vilmorin-Andrieux, Wood & Sons, Haage & Schmidt, Dammann & Co., Peter Henderson, Thorburn & Co., Mark W. Johnson, Johnson & Stokes, Harry N. Hammond, Burpee, E.E. Evans, Funk Bros. Seed Co. 908, 909, 1057, 1136, 1137, 1149, 1167, 1169, 1176, 1182, 1188, 1191, 1244, 1246, 1291, 1336, 1359, 1385, 1710, 1767, 1785, 1851, 1856, 1972, 2137, 2401, 2518, 3044, 3080, 3173, 3246, 3485, 3535, 3578, 7225

Seed Companies, Soybean—Other (Small) and Lists—Especially USA, Not Very Early. 3531, 3578

Seed Germination or Viability—Not Including Soy Sprouts. 1520, 1972, 1997, 2082, 2262, 2265, 2285, 2360, 2488

Seed Quality of Soybeans—Condition, Grading, and Grades (Moisture, Foreign Material, Damage, etc.). 2534, 2894, 3501, 3530, 3680, 3764, 3895, 3918, 4029, 4289, 4965, 4966, 5589, 6765, 7173, 7677

Seed Quality, Composition, and Component / Value-Based Pricing (Percentage and Quality of Protein, Oil, Fatty Acids, etc.). 7859

Seed Treatment with Chemicals (Usually Protectant Fungicides) for Protection. (For Treatment with Nitrogen-Fixing Bacteria *see*—Soybean Production—Nitrogen Fixation & Inoculation). 5300, 7845

Seed Weight / Size (Soybeans)—Weight of 100 Seeds / Grains in Grams, or Number of Seeds Per Pound or Per Kilogram, and Agronomic Significance of Seed Weight. 1147, 1159, 1228, 1316, 1494, 1530, 1597, 1710, 2045, 2458, 3578, 3619, 5301, 7708, 7782, 7861, 8176

Seed and plant introduction to the USA. *See* United States Department of Agriculture (USDA)—United States Department of Agriculture (USDA)—Section of Foreign Seed and Plant

Introduction

Seed companies—Thompson. *See* Thompson (W.G.) & Sons Limited, Blenheim, Ontario, Canada

Seed companies, soybean. *See* Asgrow (Des Moines, Iowa), Coker Pedigreed Seed Co. (Hartsville, South Carolina), Dammann & Co. (San Giovanni a Teduccio {near Naples}, Italy), DuPont (E.I. Du Pont de Nemours & Co., Inc.) (Wilmington, Delaware), Evans Seed Co. (West Branch, Ogemaw County, Michigan) and Mr. Edward Ellsworth Evans (1864-1928), Funk Brothers Seed Co. (Bloomington, Illinois), Haage & Schmidt (Erfurt, Germany), Hartz (Jacob) Seed Co. (Stuttgart, Arkansas), Monsanto Co. (St. Louis, Missouri), Peter Henderson & Co. (New York City), Pioneer Hi-Bred International, Inc. (Des Moines, Iowa), Vilmorin-Andrieux & Co. (France), Wannamaker (John E.) (St. Matthews, South Carolina), Wing Seed Co. (Mechanicsburg, Champaign County, Ohio)

Seed, Food or Feed Composition—High-Speed Measurement Techniques, such as Near Infrared Reflectance (NIR) or Transmittance (NIT) Analysis and Spectrophotometry. 7859

Seedlings, soybean. *See* Green Vegetable Soybeans—Soybean Seedlings or Their Leaves Served as a Tender Vegetable. Called *Doumiao* in Chinese

Seeds, soybean—Variety development and breeding of soybeans. *See* Variety Development and Breeding

Seitan. *See* Wheat Gluten Made into Seitan

Sensory evaluation. *See* Taste Panel, Taste Test Results, or Sensory / Organoleptic Evaluation

Serbia and Montenegro. *See* Europe, Eastern—Serbia and Montenegro

Sesame / Sesamum / Benné or Benne / Gingelly or Gingili / Til or Teel—Etymology of These Terms and Their Cognates/Relatives in Various Languages. 219, 246, 256, 714, 1071, 1148, 3343, 3912

Sesame Butter, Tahini / Tahina / Tahin, Sesame Halva / Halwa, or Sesame Paste. 3343, 3724, 3912, 4154, 4155, 4195, 4216, 4360, 4430, 4442, 4457, 4478, 4483, 4517, 4539, 4616, 4677, 4698, 4704, 4712, 4720, 4766, 4785, 4786, 4820, 4821, 4843, 4874, 4890, 4910, 4933, 4939, 4961, 4969, 4974, 4975, 4987, 5034, 5044, 5046, 5076, 5087, 5108, 5143, 5149, 5150, 5189, 5197, 5198, 5199, 5206, 5228, 5232, 5269, 5282, 5323, 5346, 5350, 5413, 5494, 5522, 5531, 5548, 5564, 5565, 5661, 5673, 5681, 5691, 5695, 5703, 5707, 5708, 5709, 5735, 5744, 5752, 5753, 5754, 5794, 5808, 5859, 5898, 5909, 5939, 5946, 6032, 6034, 6037, 6121, 6139, 6162, 6232, 6257, 6281, 6415, 6481, 6526, 6527, 6561, 6581, 6590, 6626, 6657, 6757, 6814, 6916, 6919, 6994, 7050, 7051, 7139, 7226, 7308, 7331, 7430, 7436, 7582, 7585, 7598, 7643, 7675, 7695, 7726, 7741, 7789, 7811, 7842, 7914, 7943, 7990, 8027, 8070, 8079, 8083, 8084, 8088, 8107, 8130, 8131, 8185, 8188, 8224, 8225, 8228, 8251, 8269, 8272, 8345, 8353, 8369, 8416, 8443, 8481, 8510

Sesame Meal or Cake (Defatted). 1132, 1148, 4070

Sesame Milk. 4974, 5045, 5592, 6032

Sesame Oil. 17, 18, 23, 24, 84, 169, 219, 246, 576, 714, 805, 877, 918, 930, 965, 981, 994, 1021, 1023, 1028, 1030, 1071, 1113, 1118, 1153, 1176, 1198, 1199, 1212, 1244, 1245, 1263, 1316, 1339, 1361, 1396, 1421, 1431, 1491, 1547, 1656, 1815, 1838, 1912, 2025, 2035, 2045, 2051, 2117, 2149, 2173, 2240, 2243, 2246, 2274, 2343, 2359, 2369, 2378, 2385, 2400, 2435, 2494, 2501, 2595, 2625, 2913, 3038, 3090, 3500, 3674, 3770, 3855, 3941, 3944, 4154, 4155, 4212, 4257, 4394, 4396, 4401, 4457, 4473, 4487, 4492, 4509, 4539, 4620, 4654, 4659, 4690, 4697, 4704, 4712, 4720, 4731, 4741, 4785, 4821, 4833, 4835, 4843, 4877, 4883, 4898, 4910, 4939, 5076, 5081, 5087, 5106, 5154, 5157, 5206, 5244, 5336, 5350, 5401, 5413, 5433, 5445, 5468, 5494, 5518, 5525, 5644, 5646, 5655, 5689, 5693, 5698, 5708, 5709, 5734, 5874, 5934, 5946, 5986, 6003, 6018, 6117, 6139, 6162, 6294, 6404, 6405, 6436, 6560, 6751, 6808, 6882, 6896, 6916, 6954, 6955, 6976, 7063, 7064, 7088, 7089, 7112, 7135, 7137, 7139, 7171, 7226, 7250, 7251, 7264, 7308, 7313, 7344, 7389, 7392, 7393, 7411, 7458, 7459, 7463, 7532, 7542, 7604, 7605, 7620, 7643, 7654, 7655, 7657, 7693, 7706, 7720, 7726, 7831, 7836, 7871, 7889, 7914, 8008, 8027, 8049, 8088, 8107, 8119, 8127, 8130, 8135, 8156, 8175, 8185, 8206, 8225, 8269, 8272, 8280, 8284, 8286, 8314, 8353, 8357, 8363, 8379, 8442, 8443, 8464, 8510, 8535

Sesame Seed (*Sesamum indicum*, formerly *Sesamum orientale*). (Also Called Ajonjoli, Benne, Benni, Benniseed, Gingelly, Gingely, Gingelie, Jinjili, Sesamum, Simsim, Teel, Til). Including Sesame as an Oilseed, Sesame Flour, and Sesame Salt / Gomashio. See also Sesame Butter / Tahini, Sesame Cake or Meal, Sesame Milk, and Sesame Oil. 1, 2, 4, 17, 18, 22, 23, 24, 84, 95, 169, 219, 246, 256, 259, 677, 714, 758, 805, 841, 877, 918, 930, 965, 981, 994, 998, 1021, 1023, 1028, 1030, 1042, 1071, 1113, 1148, 1151, 1153, 1176, 1198, 1199, 1209, 1210, 1212, 1221, 1233, 1244, 1245, 1263, 1271, 1316, 1323, 1333, 1334, 1339, 1361, 1362, 1381, 1387, 1390, 1396, 1410, 1421, 1431, 1474, 1491, 1502, 1540, 1541, 1590, 1656, 1689, 1718, 1719, 1736, 1746, 1815, 1822, 1838, 1912, 1970, 2024, 2025, 2035, 2045, 2051, 2082, 2088, 2117, 2173, 2240, 2243, 2246, 2274, 2279, 2330, 2335, 2343, 2359, 2369, 2385, 2400, 2435, 2448, 2488, 2497, 2625, 2655, 2668, 2676, 2913, 2915, 2946, 2961, 3038, 3090, 3195, 3288, 3339, 3343, 3444, 3500, 3631, 3642, 3674, 3690, 3770, 3855, 3903, 3912, 3926, 3944, 4068, 4070, 4116, 4128, 4154, 4155, 4172, 4195, 4212, 4249, 4257, 4272, 4328, 4349, 4360, 4391, 4394, 4396, 4401, 4421, 4430, 4442, 4457, 4473, 4483, 4492, 4509, 4514, 4539, 4580, 4590, 4591, 4620, 4659, 4677, 4690, 4697, 4704, 4712, 4720, 4756, 4785, 4821, 4826, 4832, 4835, 4843, 4865, 4873, 4874, 4883, 4898, 4910, 4913, 4916, 4932, 4939, 4941, 4974, 4978, 4997, 5018, 5045, 5054, 5071, 5076, 5081, 5086, 5108, 5111, 5144, 5154, 5157, 5163, 5197, 5206, 5211, 5213, 5228, 5242, 5277, 5280, 5282, 5291, 5292, 5315, 5320, 5336, 5343, 5346, 5350, 5368, 5375, 5397, 5400, 5413, 5433, 5445, 5454, 5458, 5468, 5469, 5492, 5503, 5584, 5589, 5592, 5642, 5644, 5646, 5650, 5654, 5655, 5661, 5668, 5673, 5680, 5681, 5689, 5698, 5708, 5709, 5734, 5756, 5770, 5794, 5804, 5817, 5818, 5849, 5852, 5874, 5905, 5924, 5934, 5938, 5946, 5981, 5986, 5987, 5988, 6003, 6018, 6032, 6034, 6066, 6089, 6099, 6113, 6117, 6121, 6128, 6139, 6162, 6176, 6194, 6210, 6249, 6253, 6255, 6267, 6270, 6285, 6294, 6322, 6358, 6375, 6385, 6404, 6405, 6415, 6436, 6461, 6464, 6522, 6560, 6564, 6599, 6628, 6688, 6689, 6695, 6738, 6751, 6774, 6802, 6804, 6808, 6882, 6896, 6902, 6916, 6923, 6931, 6954, 6955, 6957, 6974, 6976, 6979, 7022, 7030, 7050, 7051,

Soy Cheese Industry and Market Statistics, Trends, and Analyses—Individual Companies. 7688

Soy Cheese or Cheese Alternatives—General, Western Style, That Melts. Often Contains Casein (Cow's Milk Protein). 1940, 2970, 4715, 5287, 5289, 5942, 5943, 6485, 6856, 7065, 7115, 7154, 7191, 7246, 7284, 7305, 7307, 7319, 7454, 7456, 7489, 7503, 7542, 7583, 7585, 7607, 7686, 7725, 7746, 7752, 7755, 7756, 7765, 7814, 7820, 7842, 7854, 7883, 7895, 7908, 7924, 7934, 7944, 7953, 7956, 7974, 7975, 8003, 8004, 8010, 8025, 8035, 8036, 8040, 8060, 8062, 8069, 8070, 8079, 8116, 8145, 8184, 8191, 8205, 8218, 8224, 8225, 8344

Soy Cheese or Cream Cheese, Used as an Ingredient in Second Generation Commercial Products Such as Entrees, Pizza, etc. 7046, 7481, 7501, 7502

Soy Cheesecake or Cream Pie, Usually Made with Tofu. 3415, 5153, 5211, 5213, 5451, 5457, 5554, 5647, 5651, 5695, 5832, 5937, 5956, 6037, 6048, 6073, 6209, 6216, 6323, 6373, 6428, 6749, 7050, 7052, 7454, 7491, 7517, 7547, 7585, 7593, 7712, 7741, 7812, 7842, 7953, 7988, 7999, 8062, 8069, 8181, 8195

Soy Chocolate (Toasted Soy Flour) (Also includes use of non-roasted Soy Flour or Soymilk in Making Chocolate). 1161, 1942,

1989, 1997, 2007, 2056, 2089, 2118, 2144, 2146, 2210, 2211, 2242, 2243, 2273, 2367, 2403, 2424, 2627, 2738, 2768, 2779, 2908, 2974, 2997, 3016, 3080, 3100, 3104, 3115, 3116, 3190, 3195, 3207, 3246, 3297, 3319, 3355, 3415, 3557, 3861, 3862, 3923

Soy Coffee (Roasted Soy Flour)—Etymology of This Term and Its Cognates / Relatives in Various Languages. 1009, 1175, 1843, 2007, 2211, 3233, 3684

Soy Coffee—Made from Roasted Soy Flour or Ground Roasted Soybeans. 1009, 1056, 1159, 1169, 1175, 1181, 1183, 1192, 1195, 1228, 1241, 1246, 1283, 1375, 1385, 1390, 1414, 1458, 1466, 1494, 1522, 1529, 1606, 1707, 1749, 1785, 1835, 1836, 1837, 1843, 1851, 1856, 1863, 1879, 1887, 1928, 1932, 1935, 1942, 1962, 1972, 1981, 1989, 1997, 2007, 2056, 2084, 2089, 2092, 2118, 2144, 2146, 2150, 2151, 2186, 2199, 2203, 2205, 2209, 2210, 2211, 2213, 2224, 2226, 2242, 2243, 2254, 2265, 2272, 2273, 2283, 2330, 2343, 2367, 2375, 2403, 2424, 2447, 2488, 2518, 2549, 2627, 2655, 2738, 2768, 2774, 2779, 2784, 2845, 2846, 2876, 2908, 2913, 2931, 2970, 2971, 2973, 2974, 2984, 2997, 3019, 3032, 3037, 3038, 3079, 3080, 3090, 3099, 3113, 3152, 3153, 3162, 3163, 3173, 3184, 3190, 3233, 3234, 3260, 3288, 3296, 3297, 3319, 3321, 3353, 3355, 3356, 3385, 3389, 3391, 3433, 3436, 3439, 3463, 3475, 3481, 3501, 3530, 3545, 3557, 3637, 3684, 3728, 3741, 3861, 3862, 3908, 3923, 4093, 4395, 4505, 4622, 4728, 5338, 5352, 5418, 5552, 5609, 5832, 5908, 5942, 6024, 6103, 6122, 6224, 6282, 6692, 6750, 6905, 6972, 7143, 7166, 7278, 7295, 7479, 7686, 7721, 7780, 7956, 8024, 8348, 8349, 8543

Soy Cream Cheese—Etymology of This Term and Its Cognates / Relatives in Various Languages. 2970, 3296

Soy Cream Cheese, Usually Made of Tofu or Soy Yogurt. 2970, 2971, 3296, 5045, 5604, 5647, 6037, 6073, 6373, 7052, 7254, 7311, 7334, 7515, 7517, 7593, 7712, 7809, 7842, 8027, 8116, 8181, 8224, 8274, 8353

Soy Flour—Imports, Exports, International Trade. 7354

Soy Flour—Whole or Full-fat. 11, 13, 43, 197, 808, 965, 981, 1048, 1159, 1181, 1201, 1204, 1212, 1240, 1282, 1283, 1287, 1335, 1361, 1391, 1468, 1499, 1529, 1591, 1604, 1606, 1671, 1710, 1718, 1753, 2226, 2390, 2622, 2627, 2702, 2766, 2840, 2842, 2845, 2875, 2887, 2889, 2894, 2908, 2933, 2974, 2997, 3032, 3097, 3105, 3152, 3187, 3207, 3348, 3361, 3367, 3389, 3430, 3434, 3448, 3452, 3488, 3556, 3557, 3626, 3722, 3798, 3912, 3947, 4026, 4093, 4231, 4395, 4409, 4421, 4499, 4532, 4535, 4832, 4966, 4997, 5019, 5144, 5147, 5197, 5211, 5213, 5230, 5232, 5246, 5346, 5352, 5583, 5599, 5642, 5650, 5720, 5805, 5908, 5942, 5946, 6024, 6037, 6122, 6139, 6224, 6492, 6600, 6750, 6865, 6959, 7295, 7365, 7455, 7719, 7790, 7801, 7802, 7862, 7887, 7891, 7956, 8161, 8348, 8417, 8551

Soy Flour Industry and Market Statistics, Trends, and Analyses—By Geographical Region. 3722, 4421, 4535, 4691, 5912, 5980, 6648, 7354, 7455, 7456, 7721, 7800

Soy Flour Industry and Market Statistics, Trends, and Analyses—Individual Companies or Products. 5375, 7800

Soy Flour or Defatted Soybean Meal in Cereal-Soy Blends, with Emphasis on Dry Products Used in Third World Countries (such as

CSM, WSB, etc.). 3434, 3722, 4082, 4526, 4964, 4965, 5224, 5242, 5346, 5352, 5589, 5609, 5863, 5942, 6648, 6756, 7036, 7433, 7800, 7956

Soy Flour, Defatted or Partially Defatted, Used as an Ingredient in Second Generation Commercial Products Such as Baked Goods, Pasta, etc. 3276, 3328, 4844, 4847, 5173, 5224, 5375, 5395, 5422, 5818, 6267, 7096, 7856

Soy Flour, Grits and Flakes (Usually Defatted)—Etymology of These Terms and Their Cognates / Relatives in Various Languages. 981, 1361, 1785, 1786, 1803, 1851, 2222, 3501, 3684, 3923

Soy Flour, Grits, Meal, Powder, or Flakes—For Food Use (Usually Defatted or Low-Fat). See also Soy Flour—Whole or Full-fat. 601, 604, 1118, 1305, 1311, 1376, 1380, 1441, 1585, 1606, 1661, 1785, 1786, 1803, 1806, 1817, 1822, 1825, 1828, 1830, 1835, 1840, 1850, 1851, 1856, 1863, 1875, 1882, 1887, 1888, 1904, 1907, 1910, 1912, 1916, 1919, 1923, 1930, 1932, 1935, 1937, 1940, 1942, 1963, 1972, 1982, 1997, 2007, 2008, 2022, 2025, 2037, 2042, 2045, 2048, 2060, 2074, 2088, 2089, 2091, 2092, 2095, 2099, 2108, 2111, 2118, 2131, 2137, 2144, 2146, 2150, 2151, 2173, 2178, 2186, 2187, 2193, 2199, 2205, 2207, 2208, 2209, 2210, 2211, 2213, 2222, 2224, 2229, 2241, 2242, 2243, 2254, 2256, 2258, 2265, 2268, 2269, 2270, 2272, 2274, 2277, 2282, 2283, 2291, 2292, 2295, 2302, 2322, 2332, 2337, 2343, 2352, 2360, 2367, 2369, 2370, 2375, 2378, 2381, 2400, 2403, 2408, 2445, 2447, 2456, 2458, 2474, 2479, 2486, 2488, 2518, 2523, 2534, 2549, 2569, 2587, 2593, 2622, 2626, 2627, 2641, 2649, 2652, 2654, 2676, 2680, 2735, 2738, 2774, 2776, 2779, 2781, 2784, 2785, 2788, 2789, 2791, 2824, 2828, 2833, 2840, 2846, 2876, 2879, 2880, 2885, 2887, 2894, 2896, 2913, 2914, 2915, 2917, 2920, 2922, 2925, 2931, 2933, 2958, 2965, 2973, 2974, 2979, 2997, 3000, 3016, 3019, 3026, 3032, 3033, 3038, 3049, 3058, 3080, 3089, 3090, 3093, 3097, 3099, 3100, 3104, 3113, 3115, 3116, 3150, 3152, 3153, 3159, 3162, 3163, 3169, 3172, 3173, 3174, 3179, 3184, 3187, 3195, 3196, 3199, 3201, 3233, 3234, 3235, 3238, 3246, 3254, 3257, 3260, 3288, 3296, 3297, 3305, 3312, 3319, 3321, 3323, 3327, 3335, 3340, 3343, 3346, 3352, 3353, 3355, 3356, 3360, 3367, 3373, 3381, 3382, 3385, 3391, 3403, 3409, 3410, 3412, 3414, 3415, 3416, 3424, 3430, 3433, 3436, 3439, 3441, 3444, 3452, 3455, 3463, 3469, 3472, 3473, 3474, 3475, 3478, 3479, 3481, 3482, 3501, 3507, 3513, 3519, 3520, 3530, 3534, 3535, 3537, 3542, 3553, 3579, 3609, 3628, 3644, 3667, 3672, 3673, 3677, 3678, 3680, 3684, 3690, 3695, 3697, 3722, 3728, 3741, 3760, 3798, 3814, 3860, 3861, 3869, 3889, 3908, 3912, 3918, 3923, 3945, 3947, 3967, 4022, 4033, 4073, 4076, 4077, 4101, 4139, 4151, 4176, 4232, 4239, 4277, 4337, 4338, 4343, 4352, 4361, 4368, 4398, 4409, 4423, 4429, 4436, 4471, 4475, 4488, 4494, 4499, 4526, 4532, 4533, 4535, 4543, 4557, 4558, 4574, 4600, 4601, 4623, 4644, 4656, 4665, 4691, 4696, 4707, 4712, 4715, 4720, 4766, 4773, 4785, 4791, 4817, 4823, 4824, 4826, 4837, 4861, 4874, 4895, 4903, 4910, 4915, 4938, 4944, 4945, 4948, 4965, 4966, 4974, 4977, 4987, 4988, 4994, 4997, 5000, 5013, 5019, 5024, 5035, 5036, 5037, 5045, 5046, 5047, 5048, 5049, 5054, 5056, 5062, 5067, 5071, 5107, 5108, 5120, 5138, 5140, 5143, 5144, 5154, 5169, 5187, 5189, 5192, 5195, 5197, 5201, 5206, 5211, 5213, 5229, 5234, 5242, 5246, 5283, 5298, 5300, 5320, 5321, 5322, 5323, 5324, 5329, 5338, 5345, 5352, 5354, 5369, 5418, 5438, 5457, 5460, 5469, 5471, 5491, 5494, 5531, 5542, 5547, 5565, 5566, 5572, 5576, 5580, 5588, 5589, 5604, 5605, 5609, 5613, 5629, 5631, 5672, 5675, 5703, 5707, 5711, 5743, 5748, 5770, 5791, 5805, 5824, 5832, 5835, 5837, 5846, 5849, 5850, 5854, 5863, 5888, 5899, 5908, 5921,

5925, 5943, 5944, 5947, 5954, 5959, 5980, 5995, 5996, 6005, 6011, 6023, 6024, 6032, 6034, 6071, 6103, 6110, 6113, 6119, 6122, 6210, 6224, 6232, 6257, 6272, 6282, 6293, 6338, 6353, 6385, 6425, 6435, 6445, 6508, 6511, 6566, 6604, 6607, 6613, 6635, 6648, 6662, 6663, 6677, 6692, 6744, 6749, 6751, 6756, 6761, 6765, 6779, 6815, 6840, 6842, 6845, 6856, 6865, 6905, 6909, 6914, 6919, 6959, 6970, 7005, 7036, 7065, 7087, 7108, 7118, 7143, 7166, 7189, 7201, 7232, 7246, 7274, 7278, 7311, 7319, 7330, 7334, 7348, 7354, 7384, 7409, 7415, 7433, 7454, 7455, 7456, 7466, 7478, 7491, 7503, 7526, 7542, 7544, 7547, 7575, 7647, 7659, 7660, 7668, 7674, 7719, 7721, 7726, 7729, 7742, 7752, 7763, 7765, 7778, 7798, 7799, 7800, 7801, 7802, 7814, 7839, 7845, 7851, 7854, 7881, 7883, 7886, 7887, 7890, 7891, 7895, 7908, 7913, 7914, 7924, 7927, 7932, 7944, 7953, 7956, 7957, 7974, 7975, 8003, 8006, 8007, 8010, 8023, 8024, 8025, 8035, 8036, 8040, 8042, 8060, 8065, 8069, 8070, 8072, 8086, 8096, 8101, 8116, 8117, 8126, 8137, 8139, 8145, 8150, 8162, 8163, 8166, 8180, 8185, 8186, 8191, 8198, 8205, 8209, 8211, 8224, 8266, 8272, 8274, 8291, 8334, 8344, 8348, 8349, 8352, 8371, 8375, 8393, 8398, 8455, 8484

Soy Flour, Grits, and Flakes—Enzyme Active (Whole / Full-Fat, Unheated). 4533, 4535, 7365, 7856, 8007, 8072

Soy Flour, Grits, and Flakes—Use in Brewing Beer, Such as ADM Pro-zyme Flakes and Soybean Brew Flakes. 3722, 3741

Soy Flour, Textured (Including TVP, Textured Vegetable Protein). 4557, 4570, 4966, 5120, 5174, 5246, 5374, 5542, 5563, 5572, 5605, 5678, 5696, 5707, 5789, 5810, 5816, 5817, 5908, 5912, 5941, 5943, 5944, 5980, 5982, 6005, 6088, 6103, 6128, 6129, 6130, 6160, 6172, 6173, 6174, 6269, 6338, 6443, 6468, 6492, 6551, 6584, 6585, 6631, 6670, 6673, 6806, 6810, 6856, 6909, 6914, 6959, 6977, 6996, 7006, 7012, 7189, 7201, 7256, 7284, 7327, 7346, 7348, 7408, 7455, 7487, 7503, 7518, 7550, 7551, 7581, 7592, 7624, 7645, 7659, 7660, 7721, 7752, 7763, 7773, 7882, 7897, 7922, 7934, 8037, 8062, 8178, 8211, 8256, 8344

Soy Ice Cream (General—Usually Non-Dairy). 2256, 2270, 2845, 2887, 2894, 2913, 2970, 2971, 2984, 3104, 3115, 3162, 3201, 3296, 3310, 3314, 3315, 3321, 3352, 3381, 3391, 3415, 3501, 3520, 3533, 3722, 3945, 4277, 4395, 4600, 4601, 4628, 4715, 4766, 4791, 5049, 5211, 5213, 5232, 5234, 5287, 5443, 5451, 5565, 5569, 5599, 5604, 5647, 5651, 5673, 5937, 5956, 6048, 6073, 6216, 6241, 6323, 6337, 6344, 6345, 6373, 6472, 6485, 6511, 6550, 6575, 6607, 6615, 6633, 6648, 6670, 6676, 6704, 6706, 6782, 6856, 6960, 6984, 7040, 7051, 7053, 7065, 7070, 7115, 7140, 7154, 7166, 7278, 7284, 7289, 7305, 7307, 7330, 7338, 7415, 7456, 7489, 7517, 7585, 7593, 7607, 7699, 7712, 7725, 7726, 7742, 7765, 7798, 7800, 7883, 7890, 7914, 7924, 7956, 7975, 7999, 8004, 8010, 8024, 8025, 8035, 8040, 8060, 8070, 8079, 8124, 8145, 8181, 8185, 8191, 8195, 8205, 8212, 8224, 8272, 8274, 8353, 8546

Soy Ice Cream—Etymology of This Term and Its Cognates / Relatives in Various Languages. 2256, 3501, 5211, 5213, 6633

Soy Ice Cream—Non-Soy Non-Dairy Relatives (As Made from Amazake, Fruit Juices, Peanuts, Field Peas, etc.). 2246, 2384, 3162, 6704, 7436, 7827

Soy Ice Cream Industry and Market Statistics, Trends, and Analyses—By Geographical Region. 6704, 6984, 7415, 7800

Soy Ice Cream Industry and Market Statistics, Trends, and Analyses—Individual Companies. 7800

Soy Molasses or Soy Solubles—A By-Product of Making Soy Protein Concentrate Using the Aqueous Alcohol Wash Process. Rich in Isoflavones. 8348, 8349

Soy Oil—Etymology of This Term and Its Cognates / Relatives in Various Languages. 40, 877, 961, 981, 994, 1030, 1041, 1147, 1161, 1200, 1375, 1769, 1784, 1851, 2008, 2035, 2189, 2996, 3233, 3346

Soy Oil Constants—Iodine Number / Value. 1440, 1769, 1831, 1928, 2155, 2173, 2189, 2254, 2880, 2983, 2996, 3110, 5049

Soy Oil Constants. Includes Index of Refraction, Refractive Index, Solidification Point (*Erstarrungspunkt*), Specific Gravity. See also Iodine Number. 1440, 1769, 2155, 2983, 2996, 8007

Soy Oil as a Commodity, Product, or Ingredient for Food Use (in Cookery or Foods). Its Manufacture, Refining, Trade, and Use. See Also: Industrial Uses of Soy Oil, and Nutrition: Lipids. 14, 15, 40, 43, 675, 809, 877, 961, 981, 994, 1021, 1030, 1041, 1095, 1114, 1118, 1128, 1142, 1144, 1147, 1151, 1161, 1169, 1175, 1178, 1185, 1188, 1190, 1192, 1200, 1211, 1215, 1241, 1244, 1246, 1248, 1257, 1258, 1260, 1263, 1283, 1298, 1301, 1311, 1326, 1336, 1341, 1342, 1349, 1357, 1361, 1364, 1373, 1375, 1377, 1382, 1386, 1395, 1414, 1431, 1440, 1468, 1474, 1478, 1488, 1491, 1497, 1499, 1502, 1523, 1529, 1597, 1603, 1640, 1654, 1696, 1707, 1719, 1723, 1743, 1746, 1749, 1750, 1756, 1763, 1769, 1784, 1785, 1786, 1787, 1791, 1803, 1804, 1806, 1815, 1826, 1828, 1830, 1831, 1832, 1833, 1836, 1837, 1838, 1851, 1863, 1880, 1888, 1889, 1904, 1905, 1907, 1908, 1912, 1913, 1919, 1921, 1923, 1926, 1928, 1932, 1935, 1940, 1950, 1962, 1972, 1973, 1981, 1994, 1997, 1999, 2007, 2008, 2022, 2025, 2026, 2035, 2037, 2045, 2048, 2050, 2051, 2088, 2089, 2091, 2092, 2099, 2106, 2108, 2118, 2126, 2131, 2137, 2144, 2149, 2150, 2151, 2156, 2159, 2167, 2177, 2187, 2189, 2193, 2196, 2199, 2203, 2205, 2206, 2209, 2213, 2218, 2223, 2240, 2241, 2242, 2243, 2252, 2254, 2255, 2256, 2257, 2262, 2268, 2270, 2272, 2274, 2277, 2279, 2282, 2283, 2287, 2288, 2291, 2298, 2302, 2315, 2316, 2322, 2330, 2332, 2335, 2337, 2343, 2352, 2369, 2370, 2375, 2378, 2381, 2382, 2389, 2393, 2394, 2403, 2408, 2435, 2442, 2447, 2448, 2456, 2458, 2468, 2474, 2477, 2488, 2492, 2518, 2549, 2569, 2587, 2617, 2623, 2625, 2626, 2627, 2640, 2649, 2651, 2652, 2668, 2680, 2702, 2723, 2734, 2735, 2763, 2766, 2774, 2778, 2779, 2781, 2784, 2789, 2791, 2804, 2827, 2835, 2852, 2855, 2871, 2876, 2879, 2880, 2883, 2887, 2894, 2895, 2908, 2925, 2931, 2963, 2973, 2974, 2975, 2976, 2983, 2996, 2997, 3014, 3015, 3016, 3019, 3025, 3026, 3032, 3037, 3038, 3043, 3045, 3053, 3058, 3061, 3062, 3089, 3090, 3093, 3100, 3104, 3108, 3110, 3113, 3115, 3116, 3152, 3157, 3159, 3162, 3163, 3168, 3169, 3172, 3173, 3179, 3184, 3185, 3187, 3190, 3195, 3201, 3207, 3215, 3233, 3234, 3235, 3238, 3246, 3296, 3297, 3305, 3312, 3321, 3346, 3353, 3373, 3389, 3403, 3410, 3412, 3416, 3444, 3452, 3463, 3474, 3475, 3482, 3500, 3501, 3503, 3507, 3513, 3515, 3519, 3537, 3542, 3544, 3557, 3579, 3609, 3615, 3620, 3639, 3644, 3650, 3678, 3679, 3680, 3684, 3695, 3776, 3861, 3862, 3926, 3944, 3945, 3947, 4026, 4093, 4110, 4112, 4130, 4137, 4139, 4153, 4231, 4246, 4257, 4277, 4289, 4314, 4330, 4337, 4338, 4343, 4352, 4361, 4404, 4408, 4427, 4475, 4489, 4494, 4505, 4509, 4514, 4600, 4601, 4622, 4628, 4644, 4691, 4695, 4714, 4849, 4850, 4910, 4912, 4943, 4964, 4965, 4966, 5007,

Soybean Marketing Association (1929-1932). Organized at Decatur, Illinois on 16 Oct. 1929. 2894

Soybean Meal (SBM) (Defatted). Formerly Called Bean Cake, Beancake, Soybean Cake, Oilmeal, or Presscake. 525, 877, 930, 937, 961, 981, 1021, 1041, 1052, 1090, 1114, 1118, 1128, 1142, 1161, 1185, 1190, 1199, 1209, 1210, 1212, 1215, 1246, 1248, 1257, 1258, 1260, 1283, 1326, 1333, 1342, 1349, 1351, 1361, 1375, 1384, 1386, 1387, 1388, 1390, 1409, 1414, 1473, 1474, 1478, 1491, 1502, 1517, 1530, 1579, 1585, 1597, 1603, 1606, 1654, 1723, 1736, 1743, 1746, 1750, 1756, 1763, 1769, 1773, 1778, 1780, 1781, 1784, 1786, 1787, 1791, 1803, 1805, 1806, 1815, 1826, 1830, 1831, 1832, 1835, 1836, 1837, 1838, 1840, 1850, 1852, 1854, 1856, 1863, 1873, 1874, 1875, 1876, 1879, 1880, 1882, 1889, 1902, 1904, 1905, 1910, 1912, 1913, 1919, 1923, 1926, 1930, 1932, 1935, 1940, 1942, 1950, 1962, 1972, 1981, 1993, 1994, 1997, 2003, 2025, 2030, 2037, 2045, 2048, 2050, 2051, 2055, 2060, 2077, 2088, 2091, 2092, 2095, 2097, 2099, 2102, 2106, 2118, 2124, 2127, 2128, 2129, 2131, 2137, 2144, 2149, 2151, 2160, 2167, 2171, 2173, 2177, 2178, 2186, 2189, 2193, 2196, 2199, 2203, 2205, 2206, 2209, 2223, 2230, 2231, 2235, 2240, 2242,

2243, 2254, 2255, 2265, 2272, 2274, 2279, 2282, 2283, 2287, 2292, 2298, 2302, 2311, 2315, 2316, 2322, 2335, 2343, 2358, 2360, 2369, 2370, 2375, 2378, 2381, 2389, 2393, 2394, 2403, 2408, 2417, 2424, 2426, 2435, 2442, 2447, 2456, 2458, 2459, 2474, 2475, 2488, 2492, 2518, 2549, 2557, 2558, 2582, 2617, 2622, 2623, 2626, 2627, 2635, 2641, 2649, 2651, 2653, 2665, 2671, 2680, 2687, 2738, 2763, 2764, 2766, 2774, 2778, 2781, 2784, 2789, 2790, 2791, 2795, 2804, 2827, 2828, 2837, 2838, 2852, 2853, 2855, 2857, 2876, 2879, 2887, 2888, 2894, 2895, 2905, 2908, 2915, 2925, 2955, 2963, 2972, 3014, 3015, 3016, 3019, 3026, 3032, 3053, 3061, 3087, 3100, 3115, 3116, 3130, 3153, 3159, 3168, 3169, 3173, 3185, 3187, 3190, 3203, 3207, 3218, 3219, 3224, 3234, 3260, 3271, 3293, 3305, 3307, 3321, 3334, 3338, 3346, 3353, 3356, 3388, 3389, 3409, 3412, 3416, 3441, 3444, 3463, 3472, 3474, 3502, 3503, 3507, 3512, 3519, 3536, 3537, 3545, 3579, 3600, 3610, 3615, 3620, 3632, 3639, 3663, 3667, 3672, 3678, 3679, 3763, 3776, 3786, 3788, 3830, 3843, 3861, 3893, 3895, 3947, 3958, 3959, 3960, 3961, 3966, 3973, 3990, 3991, 4026, 4032, 4091, 4112, 4120, 4137, 4151, 4224, 4231, 4239, 4246, 4257, 4278, 4279, 4291, 4352, 4361, 4370, 4378, 4404, 4408, 4416, 4418, 4427, 4444, 4461, 4484, 4489, 4494, 4514, 4536, 4598, 4639, 4644, 4656, 4659, 4691, 4699, 4735, 4826, 4902, 4964, 4966, 5004, 5016, 5019, 5048, 5049, 5080, 5081, 5160, 5199, 5246, 5298, 5299, 5320, 5349, 5369, 5414, 5443, 5454, 5456, 5472, 5488, 5547, 5620, 5840, 5856, 5857, 5886, 5996, 6063, 6260, 6329, 6331, 6339, 6433, 6445, 6495, 6497, 6551, 6583, 6614, 6615, 6619, 6687, 6744, 6750, 6765, 6815, 6865, 6905, 6968, 6972, 7005, 7029, 7036, 7039, 7049, 7108, 7133, 7221, 7288, 7290, 7291, 7292, 7316, 7330, 7357, 7370, 7385, 7400, 7415, 7426, 7428, 7439, 7445, 7455, 7456, 7600, 7708, 7719, 7721, 7722, 7732, 7742, 7758, 7790, 7798, 7799, 7804, 7820, 7845, 7883, 7890, 7937, 7954, 7975, 7993, 8004, 8007, 8024, 8072

Soybean Meal—Etymology of This Term and Its Cognates / Relatives in Various Languages. 1052, 1780, 1781, 2088, 2118, 3026, 3168, 3169

Soybean Meal / Cake, Fiber (as from Okara), or Shoyu Presscake as a Fertilizer or Manure for the Soil—Industrial Uses. 877, 961, 965, 1052, 1090, 1142, 1146, 1148, 1185, 1192, 1199, 1215, 1246, 1260, 1326, 1334, 1342, 1384, 1386, 1414, 1416, 1488, 1517, 1554, 1597, 1654, 1723, 1736, 1743, 1746, 1786, 1791, 1803, 1806, 1833, 1852, 1854, 1873, 1874, 1876, 1881, 1904, 1912, 1913, 1972, 1997, 2092, 2097, 2128, 2167, 2189, 2193, 2199, 2231, 2240, 2274, 2287, 2298, 2322, 2375, 2389, 2408, 2447, 2534, 2617, 2738, 2766, 2774, 2784, 2785, 2789, 2790, 3026, 3032, 3080, 3115, 3153, 3169, 3190, 3444, 3474, 3507, 3741, 6215

Soybean Production—General, and Amount Produced. 324, 384, 480, 504, 903, 909, 1215, 1245, 1352, 1409, 1491, 1603, 1643, 1651, 1806, 1863, 1963, 2008, 2024, 2042, 2048, 2084, 2129, 2137, 2241, 2274, 2332, 2336, 2337, 2442, 2587, 2589, 2626, 2635, 2654, 2680, 2766, 2828, 2887, 2894, 2895, 3015, 3019, 3159, 3169, 3171, 3173, 3190, 3305, 3321, 3352, 3410, 3416, 3436, 3444, 3491, 3535, 3545, 3673, 3678, 3945, 4101, 4208, 4277, 4334, 4418, 4439, 4600, 4601, 4964, 5048, 5052, 5098, 5185, 5298, 5301, 5303, 5304, 5320, 5325, 5345, 5456, 5471, 5547, 5641, 5642, 5650, 6110, 6119, 6331, 6494, 6495, 6497, 6499, 6573, 6648, 6849, 6901, 6905, 6972, 7119, 7407, 7612, 7721, 7722, 7798, 7800, 8360, 8504

Soybean Production—Industry and Market Statistics, Trends, and Analyses. 4695, 5345, 5354, 5589, 6106, 6110, 6119, 6499, 6573,

6648, 6649, 6849, 6905, 6926, 6965, 6968, 6972, 7330, 7346, 7415, 7443, 7721, 7742, 7800, 7954, 8072

Soybean Rust (Fungal Disease). 3288, 7330

Soybean Seeds—Black in Color—Etymology of This Term and Its Cognates / Relatives in Various Languages. 1009

Soybean Seeds—Black in Color. Food Use is Not Mentioned. 14, 15, 20, 118, 125, 202, 677, 809, 905, 908, 1009, 1021, 1041, 1056, 1096, 1113, 1151, 1159, 1167, 1181, 1188, 1192, 1201, 1205, 1244, 1327, 1341, 1361, 1364, 1375, 1386, 1391, 1452, 1481, 1494, 1520, 1523, 1530, 1534, 1541, 1543, 1548, 1556, 1562, 1654, 1725, 1767, 1780, 1785, 1804, 1808, 1817, 1830, 1850, 1851, 1856, 1879, 1910, 1912, 1913, 1943, 1946, 1962, 1972, 1973, 1976, 1981, 2000, 2025, 2045, 2082, 2088, 2129, 2134, 2178, 2180, 2189, 2193, 2199, 2209, 2223, 2247, 2257, 2265, 2274, 2282, 2285, 2315, 2316, 2322, 2335, 2336, 2343, 2370, 2401, 2403, 2406, 2424, 2447, 2456, 2457, 2459, 2492, 2497, 2549, 2587, 2668, 2734, 2824, 2839, 2879, 2908, 2931, 2942, 2963, 3019, 3026, 3089, 3112, 3173, 3246, 3356, 3461, 3479, 3578, 3781, 3842, 4072, 4471, 4474, 4514, 4843, 4975, 5649, 6162, 6210, 6301, 6867, 7225, 7535, 7707, 7789, 7809, 7957, 8256, 8352, 8478, 8513

Soybean Seeds—Black in Color. Used as Food (Including in Fermented Black Soybeans and Inyu), Beverage, Feed, or Medicine, or Their Nutritional Value. 13, 17, 24, 40, 41, 42, 43, 102, 128, 294, 440, 569, 615, 813, 1042, 1147, 1263, 1323, 1362, 1395, 1430, 1431, 1503, 1517, 1540, 1569, 1597, 1652, 1689, 1707, 1710, 1749, 1763, 1786, 1882, 1888, 1965, 1973, 1974, 1997, 2089, 2156, 2216, 2217, 2269, 2287, 2288, 2393, 2394, 2412, 2448, 2546, 2676, 2865, 3045, 3079, 3157, 3477, 3553, 3724, 3807, 4014, 4093, 4154, 4155, 4193, 4199, 4430, 4450, 4475, 4491, 4501, 4509, 4539, 4549, 4688, 4690, 4704, 4712, 4720, 4729, 4766, 4769, 4832, 4861, 4865, 4873, 4890, 4917, 4932, 4937, 4961, 5018, 5051, 5054, 5061, 5083, 5149, 5150, 5154, 5197, 5211, 5213, 5233, 5239, 5240, 5267, 5278, 5282, 5336, 5343, 5350, 5407, 5438, 5447, 5460, 5461, 5536, 5558, 5565, 5661, 5686, 5691, 5707, 5737, 5794, 5821, 5833, 5838, 5854, 5856, 5874, 5917, 6017, 6024, 6096, 6239, 6358, 6428, 6440, 6448, 6456, 6574, 6647, 6652, 6669, 6746, 6808, 6903, 6917, 6934, 7063, 7100, 7120, 7166, 7284, 7311, 7313, 7334, 7405, 7465, 7485, 7587, 7601, 7691, 7726, 7829, 7880, 7908, 7914, 7928, 7941, 7979, 8008, 8027, 8030, 8047, 8090, 8097, 8101, 8102, 8106, 8116, 8130, 8131, 8146, 8180, 8185, 8217, 8272, 8416

Soybean Seeds—Brown in Color. Especially Early Records. 14, 664, 1009, 1104, 1147, 1151, 1159, 1167, 1192, 1205, 1246, 1323, 1386, 1395, 1499, 1530, 1710, 1725, 1767, 1785, 1879, 1888, 1962, 1972, 1997, 2045, 2129, 2156, 2193, 2216, 2223, 2257, 2265, 2282, 2322, 2335, 2401, 2412, 2457, 2879, 3026, 3173, 3356, 3578, 7225

Soybean Seeds—Green in Color. Food Use is Not Mentioned. Early Named Varieties Include Aoda, Columbia, Giant Green, Guelph or Medium Green, Medium Early Green, Medium Green, Samarow, Sonoma, and Tashing. 4, 40, 41, 43, 197, 809, 908, 1009, 1041, 1113, 1147, 1151, 1205, 1244, 1246, 1263, 1323, 1327, 1386, 1387, 1431, 1452, 1548, 1562, 1597, 1710, 1767, 1769, 1785, 1810, 1879, 1962, 1965, 1972, 1997, 2072, 2088, 2131, 2156, 2193, 2209, 2223, 2257, 2265, 2277, 2283, 2288, 2315, 2316, 2322, 2403, 2406, 2412, 2456, 2457, 2459, 2497, 2635, 2734, 2879, 3532, 3578, 4475, 7225

Soybean Seeds—Green in Color. Used as Food, Beverage, Feed, or Medicine, or Their Nutritional Value. 1323, 1597, 1785, 2269, 2676, 2734

Soybean Seeds—Mottled, Speckled, Spotted, Striped, Banded, Flecked, Variegated, or Bicolored. 14, 40, 1009, 1113, 1147, 1151, 1188, 1205, 1244, 1263, 1323, 1386, 1562, 1851, 1879, 1962, 1973, 2193, 2223, 2394, 2412

Soybean Seeds—Red in Color. 14, 1096, 1151, 1161, 1188, 1205, 1244, 1263, 1323, 1856, 2197, 2257

Soybean Seeds—White in Color. 4, 13, 14, 15, 20, 24, 40, 41, 106, 118, 128, 188, 237, 294, 324, 677, 691, 729, 809, 877, 881, 908, 961, 997, 1039, 1041, 1049, 1113, 1147, 1148, 1151, 1188, 1205, 1244, 1258, 1259, 1262, 1263, 1276, 1323, 1324, 1341, 1377, 1386, 1431, 1452, 1503, 1562, 1570, 1597, 1652, 1654, 1725, 1763, 1804, 1850, 1851, 1879, 1882, 1910, 1962, 2082, 2134, 2216, 2257, 2265, 2287, 2288, 2315, 2316, 2343, 2448, 2457, 2459, 4622

Soybean Seeds—Yellow in Color. Including Yellowish White, Cream Colored, and Pale (*Pallida*). Especially Early Records. United States—States—Connecticut. 347, 353, 681, 817, 831, 837, 845, 847, 857, 858, 869, 882, 895, 899, 900, 957, 996, 1029, 1187, 1201, 1225, 1250, 1267, 1347, 1379, 1401, 1404, 1417, 1425, 1432, 1439, 1443, 1501, 1567, 1704, 1793, 2073, 2218, 2221, 2228, 2323, 2457, 2458, 2489, 2491, 2552, 3152, 3159, 3178, 3354, 3416, 3531, 3562, 3651, 3662, 3759, 4233, 4365, 4500, 4886, 4890, 4912, 4977, 5139, 5153, 5234, 5283, 5287, 5460, 5882, 5889, 6090, 6255, 6463, 6601, 6984, 7080, 7602, 7629, 7631, 7856, 7876, 7879, 7918, 7934, 8000, 8147, 8157, 8163, 8389, 8397, 8498

United States—States—Delaware. 2458, 3094, 3095, 3105, 3175, 3203, 3391, 3934, 3957, 3965, 4044, 4414, 7536, 7757, 7949, 8198, 8286

United States—States—District of Columbia (Washington, DC). 471, 861, 876, 881, 905, 1130, 1140, 1279, 1414, 1458, 1489, 1522, 1533, 1550, 1568, 1593, 1599, 1765, 1767, 1826, 1827, 1881, 1911, 1949, 1983, 2041, 2126, 2134, 2156, 2158, 2189, 2196, 2217, 2220, 2223, 2257, 2260, 2265, 2276, 2282, 2283, 2295, 2355, 2370, 2371, 2379, 2381, 2385, 2406, 2412, 2419, 2445, 2447, 2459, 2472, 2587, 2635, 2654, 2680, 2724, 2726, 2731, 2734, 2771, 2772, 2774, 2777, 2784, 2789, 2790, 2791, 2835, 2847, 2852, 2879, 2933, 2963, 2973, 3044, 3045, 3152, 3176, 3236, 3237, 3296, 3316, 3321, 3352, 3391, 3436, 3445, 3459, 3486, 3504, 3555, 3578, 3589, 3644, 3679, 3680, 3695, 3729, 3808, 3869, 3919, 3921, 3925, 4030, 4241, 4326, 4377, 4457, 4730, 4740, 4741, 4824, 4839, 4890, 4899, 4952, 4994, 5007, 5014, 5015, 5017, 5076, 5077, 5138, 5167, 5181, 5199, 5201, 5252, 5287, 5390, 5392, 5497, 5506, 5613, 5667, 5700, 6259, 7253, 7298, 7330, 7354, 7377, 7456, 7577, 7631, 7742, 7762, 7840, 7979, 8227, 8330, 8365, 8423, 8546

United States—States—Florida. 219, 246, 619, 2030, 2126, 2190, 2446, 2970, 2971, 2979, 3236, 3343, 3418, 3504, 3589, 3599, 4268, 4476, 4628, 4890, 5108, 5153, 5232, 5419, 5430, 5431, 5432, 5433, 5434, 5554, 5759, 5902, 6037, 6087, 6133, 6153, 6154, 6162, 6343, 6455, 6482, 6531, 6532, 6596, 6686, 6705, 6994, 7310, 7379, 7436, 7444, 7454, 7559, 7655, 7688, 7762, 7764, 7809, 7888, 8075, 8120, 8130, 8151, 8191, 8198, 8247, 8249, 8296, 8395, 8396

United States—States—Georgia. 201, 202, 203, 208, 209, 210, 211, 213, 215, 217, 218, 220, 230, 248, 250, 252, 255, 256, 259, 260, 304, 311, 878, 1006, 1051, 1057, 1079, 1144, 1208, 1230, 1350, 2208, 2388, 2458, 2513, 2594, 2839, 3152, 3246, 3578, 3713, 4707, 4890, 4996, 5088, 5108, 5283, 5287, 5374, 5375, 5567, 5568, 6361, 6365, 6383, 6385, 6442, 6508, 6528, 6950, 7033, 7101, 7147, 7225, 7339, 7779, 7809, 8000, 8068, 8110, 8194, 8198, 8292, 8316, 8354, 8358, 8456, 8543

United States—States—Hawaii. 1001, 1346, 1388, 1572, 1642, 1645, 1646, 1668, 1681, 1711, 1712, 1743, 1795, 1800, 1803, 1806, 1807, 1810, 1813, 1819, 1823, 1858, 1860, 1864, 1866, 1867, 1872, 1890, 1895, 1943, 1955, 1956, 1992, 1997, 2013, 2018, 2020, 2067, 2097, 2115, 2152, 2154, 2174, 2231, 2233, 2237, 2283, 2327, 2363, 2447, 2460, 2481, 2482, 2522, 2525, 2537, 2561, 2562, 2740, 2745, 2780, 2885, 2894, 2909, 2946, 3147, 3153, 3186, 3232, 3236, 3241, 3358, 3405, 3437, 3501, 3545, 3546, 3547, 3549, 3551, 3552, 3586, 3590, 3591, 3592, 3593, 3594, 3645, 3659, 3661, 3662, 3696, 3724, 3727, 3742, 3759, 3775, 3778, 3781, 3797, 3858, 3891, 3907, 3948, 3950, 3951, 3952, 3971, 3980, 4002, 4008, 4109, 4204, 4379, 4466, 4560, 4622, 4624, 4625, 4685, 4686, 4692, 4736, 4742, 4757, 4776, 4779, 4890, 4998, 5011, 5023, 5038, 5058, 5108, 5216, 5221, 5228, 5371, 5377, 5512, 5528, 5549, 5559, 5623, 5911, 5989, 6344, 6351, 6352, 6395, 6396, 6549, 6700, 6753, 7074, 7130, 7131, 7142, 7188, 7198, 7282, 7352, 7362, 7383, 7436, 7474, 7475, 7590, 7651, 7658, 7830, 7831, 7993, 8051, 8081, 8161, 8178, 8234, 8248, 8434, 8454, 8515, 8522, 8530, 8548, 8550, 8553

United States—States—Idaho. 1903, 2030, 2080, 2176, 3394, 3445, 5060, 6775, 7395, 7588, 8458, 8530

United States—States—Illinois. 977, 1026, 1058, 1063, 1067, 1110, 1127, 1143, 1152, 1238, 1273, 1284, 1286, 1343, 1397, 1415, 1445, 1450, 1452, 1471, 1513, 1557, 1576, 1581, 1663, 1678, 1705, 1708, 1767, 1789, 1864, 1866, 1867, 1872, 1898, 1947, 1948, 1979, 2074, 2094, 2095, 2096, 2100, 2109, 2110, 2111, 2120, 2132, 2145, 2153, 2172, 2194, 2199, 2212, 2226, 2229, 2251, 2266, 2295, 2299, 2313, 2346, 2347, 2351, 2387, 2415, 2424, 2447, 2458, 2489, 2491, 2496, 2498, 2511, 2518, 2549, 2583, 2626, 2738, 2776, 2777, 2790, 2818, 2831, 2846, 2886, 2887, 2894, 2920, 2929, 2957, 2972, 2980, 2990, 3016, 3019, 3025, 3026, 3043, 3062, 3095, 3100, 3101, 3102, 3104, 3105, 3110, 3113, 3115, 3152, 3153, 3173, 3196, 3314, 3315, 3318, 3321, 3377, 3379, 3381, 3391, 3424, 3428, 3429, 3430, 3434, 3448, 3464, 3467, 3469, 3478, 3484, 3485, 3501, 3509, 3512, 3515, 3538, 3539, 3543, 3544, 3548, 3550, 3561, 3563, 3578, 3581, 3582, 3583, 3584, 3585, 3598, 3599, 3601, 3611, 3615, 3618, 3619, 3620, 3621, 3628, 3645, 3659, 3672, 3680, 3713, 3722, 3730, 3736, 3763, 3773, 3775, 3781, 3843, 3846, 3891, 3894, 3942, 3986, 4029, 4043, 4053, 4065, 4073, 4074, 4101, 4147, 4151, 4199, 4239, 4246, 4258, 4329, 4331, 4335, 4340, 4353, 4359, 4368, 4374, 4375, 4395, 4417, 4421, 4450, 4451, 4462, 4470, 4480, 4486, 4501, 4525, 4534, 4540, 4547, 4557, 4581, 4599, 4634, 4637, 4640, 4650, 4670, 4671, 4676, 4729, 4732, 4776, 4791, 4820, 4821, 4822, 4856, 4871, 4890, 4898, 4911, 4946, 4952, 4979, 4983, 4998, 5003, 5011, 5026, 5027, 5039, 5049, 5052, 5088, 5106, 5108, 5120, 5153, 5156, 5171, 5185, 5190, 5195, 5246, 5250, 5257, 5266, 5270, 5280, 5283, 5352, 5362, 5386, 5445, 5467, 5471, 5493, 5496, 5507, 5609, 5616, 5617, 5675, 5677, 5700, 5707, 5713, 5721, 5729, 5734, 5743, 5751, 5765, 5777, 5779, 5784, 5788, 5790, 5804, 5827, 5832, 5866, 5867, 5868, 5869, 5878, 5887, 5918, 5921, 5925, 5933, 5946, 5954, 6015, 6059, 6071, 6078, 6095, 6139, 6240, 6265, 6298, 6307, 6343, 6347, 6355, 6361, 6370, 6379, 6385, 6434, 6453, 6489, 6501, 6505, 6544, 6549, 6588, 6669, 6676, 6709, 6744, 6778, 6787, 6815, 6910, 6911, 6912, 6913, 6933, 6934, 7033, 7059, 7110, 7190, 7225, 7272, 7287, 7332, 7339, 7362, 7405, 7438, 7441, 7470, 7540, 7594, 7631, 7654, 7655, 7656, 7671, 7708, 7719, 7734, 7758, 7760, 7767, 7798, 7808, 7812, 7820, 7885, 7897, 7915, 8058, 8067, 8118, 8126, 8162, 8178, 8194, 8198, 8237, 8248, 8291, 8292, 8294, 8348, 8349, 8350, 8398, 8456, 8487, 8548, 8549

United States—States—Indiana. 1445, 2226, 2368, 2428, 2458, 2535, 2547, 2549, 2626, 2660, 2681, 2722, 2738, 2765, 2894, 2959, 2969, 3019, 3037, 3102, 3152, 3153, 3173, 3242, 3302, 3379, 3391, 3406, 3436, 3467, 3480, 3485, 3501, 3531, 3578, 3604, 3617, 3634, 3649, 3653, 3680, 3778, 3854, 3886, 3946, 4082, 4134, 4151, 4190, 4363, 4572, 4689, 4890, 5057, 5287, 5743, 5967, 5968, 5969, 6071, 6118, 6496, 6593, 6815, 6929, 7203, 7225, 7287, 7333, 7539, 7864, 7883, 7915, 7975, 8040, 8042, 8055, 8057, 8064, 8096, 8145, 8191, 8198, 8343, 8360

United States—States—Introduction of Soy Products to. Earliest document seen concerning soybean products in a certain U.S. state. Soybeans as such have not yet been reported in this state. 168, 201, 221, 248, 258, 285, 297, 338, 347, 540, 573, 628, 717, 1001, 4023

United States—States—Introduction of Soy Products to. This document contains the earliest date seen for soybean products in a certain U.S. state. Soybeans as such had not yet been reported by that date in this state. 168, 221, 248, 258, 285, 297, 338, 540, 628, 717, 1001, 3948, 4023, 5512, 6700

United States—States—Introduction of Soybeans to. Earliest document seen concerning soybeans in a certain U.S. state. 217, 512, 664, 1057, 1385, 1419, 1798

United States—States—Introduction of Soybeans to. Earliest document seen concerning soybeans or soyfoods in connection with (but not yet in) a certain U.S. state. 213, 216, 471

United States—States—Introduction of Soybeans to. Earliest document seen concerning the cultivation of soybeans in a certain U.S. state. 217, 503, 512, 664, 1057, 1385, 1419

United States—States—Introduction of Soybeans to. This document contains the earliest date seen for soybeans in a certain U.S. state. 217, 664, 1057, 1230, 1359, 1385, 1419, 1798, 2174, 6385

United States—States—Introduction of Soybeans to. This document contains the earliest date seen for the cultivation of soybeans in a certain U.S. state. 503, 664, 1057, 1230, 1385, 1419, 2174, 6385

United States—States—Iowa. 1248, 2322, 2458, 2459, 3016, 3153, 3391, 3485, 3501, 3530, 3531, 3578, 3706, 3779, 4029, 4151, 4196, 4329, 4890, 5287, 5289, 5471, 5530, 5743, 5954, 6052, 6558, 6676, 6778, 6815, 7051, 7287, 7662, 7677, 7859, 7864, 7886, 8162, 8178, 8198, 8278, 8350, 8455, 8484, 8500, 8524

United States—States—Kansas. 1356, 1359, 1385, 1440, 1481, 1887, 2108, 2447, 2457, 2549, 3153, 3236, 3237, 3504, 3680, 3775, 4151, 5471, 6346, 7753, 8059, 8198, 8211, 8348, 8349, 8414

United States—States—Kentucky. 2189, 2226, 2458, 2549, 3485, 3578, 3680, 3773, 4108, 6534, 7225, 7410, 7784, 8389, 8469

United States—States—Louisiana. 628, 788, 826, 827, 834, 916, 1615, 3578, 4151, 4890, 4912, 4964, 4965, 4987, 5026, 5027, 5197, 5198, 5253, 5282, 5289, 5393, 6735, 7006, 7012, 7225, 7434, 7670, 7864, 7882, 7897, 7922

United States—States—Maine. 540, 549, 697, 2134, 2736, 3236, 3237, 4890, 5192, 5287, 6090, 6521, 6994, 7025, 7141, 7517, 7858, 8007, 8035, 8072, 8345, 8417, 8477

United States—States—Maryland. 297, 338, 414, 416, 423, 463, 484, 531, 544, 662, 665, 1080, 1450, 1785, 1887, 2074, 2126, 2156, 2226, 2387, 3152, 3153, 3237, 3296, 3391, 3513, 3539, 3578, 3589, 3679, 3871, 4362, 4823, 4890, 5038, 5108, 5153, 5169, 5287, 5627, 5637, 5664, 5794, 5872, 5971, 5978, 6065, 6095, 6100, 6153, 6643, 6702, 6703, 6741, 6793, 6994, 7125, 7246, 7298, 7318, 7319, 7405, 7498, 7499, 7577, 7690, 7864, 7904, 7944, 7969, 8069, 8075, 8198, 8293, 8350, 8524

United States—States—Massachusetts. 213, 216, 258, 267, 307, 321, 326, 327, 393, 402, 412, 425, 453, 505, 506, 507, 514, 515, 529, 532, 536, 537, 543, 547, 558, 563, 564, 583, 586, 594, 614, 638, 639, 649, 654, 660, 664, 689, 694, 749, 766, 780, 797, 840, 852, 894, 1024, 1057, 1084, 1103, 1182, 1231, 1277, 1340, 1356, 1385, 1395, 1414, 1423, 1442, 1447, 1450, 1452, 1485, 1508, 1509, 1526, 1534, 1551, 1585, 1752, 1767, 1769, 1887, 1897, 1961, 2126, 2145, 2197, 2199, 2204, 2221, 2247, 2256, 2321, 2342, 2345, 2356, 2361, 2442, 2447, 2457, 2458, 2469, 2545, 2591, 2614, 2979, 3152, 3153, 3345, 3391, 3500, 3539, 3562, 3642, 3680, 3713, 3723, 3754, 3808, 3851, 3944, 3945, 4137, 4272, 4277, 4442, 4457, 4487, 4549, 4580, 4600, 4601, 4607, 4616, 4627, 4654, 4663, 4670, 4671, 4672, 4681, 4690, 4712, 4720, 4721, 4750, 4821, 4832, 4834, 4835, 4875, 4890, 4907, 4909, 4912, 4914, 4915, 4948, 4971, 4987, 5024, 5026, 5027, 5051, 5078, 5082, 5096, 5108, 5116, 5125, 5144, 5153, 5177, 5184, 5187, 5189, 5196, 5197, 5198, 5200, 5234, 5253, 5269, 5282, 5285, 5287, 5289, 5351, 5391, 5392, 5393, 5435, 5439, 5440, 5451, 5502, 5505, 5535, 5563, 5645, 5648, 5661, 5707, 5761, 5775, 5787, 5794, 5854, 5901, 5912, 5914, 5917, 5940, 5970, 5980, 5981, 5993, 5994, 6053, 6057, 6059, 6060, 6082, 6090, 6091, 6092, 6110, 6119, 6134, 6141, 6159, 6165, 6219, 6255, 6272, 6293, 6296, 6307, 6320, 6343, 6347, 6358, 6359, 6384, 6386, 6387, 6464, 6466, 6481, 6508, 6511, 6526, 6549, 6550, 6575, 6576, 6577, 6614, 6648, 6652, 6680, 6686, 6776, 6802, 6973, 6994, 7004, 7030, 7050, 7051, 7052, 7075, 7132, 7149, 7172, 7181, 7227, 7235, 7236, 7317, 7336, 7355, 7358, 7361, 7378, 7435, 7462, 7463, 7542, 7608, 7609, 7649, 7651, 7654, 7656, 7658, 7659, 7668, 7670, 7671, 7672, 7673, 7674, 7679, 7680, 7682, 7741, 7761, 7762, 7798, 7800, 7817, 7836, 7848, 7941, 7968, 8002, 8003, 8038, 8041, 8094, 8097, 8102, 8105, 8106, 8108, 8120, 8123, 8125, 8146, 8151, 8178, 8182, 8201, 8217, 8247, 8367, 8385, 8482, 8522, 8523, 8546, 8549

United States—States—Michigan. 1277, 1450, 2073, 2119, 2280, 2348, 2382, 2400, 2401, 2402, 2428, 2458, 2489, 2490, 2491, 2496, 2535, 2539, 2568, 2570, 2630, 2650, 2678, 2788, 2796, 2833, 2848, 2891, 2911, 2979, 2980, 2984, 2995, 3037, 3078, 3097, 3099, 3152, 3158, 3163, 3173, 3175, 3189, 3236, 3237, 3260, 3316, 3342, 3378, 3391, 3411, 3428, 3455, 3461, 3469, 3578, 3635, 3680, 3859, 3889, 3934, 3945, 3965, 4007, 4041, 4042, 4044, 4047, 4052, 4067, 4277, 4355, 4406, 4470, 4572, 4600, 4668, 4670, 4671, 4672, 4690, 4795, 4817, 4842, 4890, 4903, 4905, 4908, 4910, 4972, 4973, 4988, 4993, 5022, 5037, 5055, 5074, 5094, 5108, 5113, 5153, 5164, 5173, 5174, 5193, 5202, 5203, 5204, 5205, 5206, 5210, 5224, 5236, 5251, 5258, 5283, 5287, 5289, 5366, 5367, 5404, 5422, 5423, 5424, 5425, 5475, 5500, 5503, 5504, 5521, 5522, 5539, 5543, 5611, 5631, 5743, 5750, 5766, 5791, 5792, 5875, 5889, 5930, 5942, 5943, 5955, 5961, 5967, 5968, 5969, 6001, 6168, 6169, 6170, 6175, 6405, 6406, 6445, 6548,

6550, 6605, 6638, 6674, 6676, 6693, 6706, 6969, 7029, 7051, 7063, 7133, 7143, 7225, 7235, 7236, 7241, 7283, 7287, 7303, 7383, 7396, 7491, 7536, 7557, 7608, 7609, 7654, 7671, 7683, 7734, 7757, 7758, 7759, 7760, 7798, 7864, 7897, 8009, 8057, 8074, 8075, 8198, 8230, 8237, 8282, 8350, 8480, 8546

United States—States—Minnesota. 2189, 2418, 3372, 3391, 3469, 3485, 3548, 3751, 3801, 3826, 3877, 4130, 4151, 4231, 4470, 4890, 5026, 5027, 5235, 5287, 5644, 5728, 5743, 5771, 5934, 6095, 6358, 6676, 6781, 6815, 6954, 6955, 7031, 7170, 7287, 7365, 7680, 7859, 7864, 8037, 8162, 8198, 8202, 8249, 8251

United States—States—Mississippi. 1179, 2265, 2283, 2458, 3153, 3578, 3680, 4272, 4890, 5289, 6690, 6744, 7225, 8198

United States—States—Missouri. 1012, 1059, 1099, 1119, 1374, 1380, 1385, 1730, 1864, 1866, 1867, 1872, 2189, 2270, 2424, 2458, 2549, 2626, 2894, 3019, 3094, 3095, 3152, 3153, 3158, 3391, 3485, 3526, 3531, 3578, 3680, 4151, 4890, 5108, 5283, 5287, 5289, 5457, 5471, 5743, 5756, 5933, 5937, 5943, 5956, 6048, 6129, 6269, 6270, 6280, 6554, 6810, 6815, 7046, 7140, 7164, 7186, 7225, 7287, 7688, 7802, 7804, 7817, 7827, 7890, 7891, 7956, 8198, 8334, 8335

United States—States—Montana. 2030, 2080, 2126, 3445, 3446, 4487, 4987, 5026, 5027, 5060, 7670, 8039

United States—States—Nebraska. 1481, 2030, 2322, 5197, 5198, 5253, 5282, 5289, 5393, 5743, 7051, 7161, 7476, 7507, 7740, 7801, 7913, 8178, 8198, 8230, 8288

United States—States—Nevada. 1759, 1819, 2030, 2176, 4890, 6446, 8530

United States—States—New Hampshire. 717, 1002, 4570, 4890, 5144, 5505, 5596, 6680, 7050, 7051, 7581, 8000

United States—States—New Jersey. 285, 1182, 1372, 1720, 1906, 2053, 2126, 2189, 2395, 2457, 3152, 3391, 3540, 3680, 3682, 3683, 4272, 4359, 4492, 4616, 4790, 4890, 5079, 5128, 5129, 5175, 5192, 5197, 5198, 5237, 5249, 5253, 5282, 5287, 5289, 5334, 5393, 5454, 5501, 5575, 5631, 5633, 5707, 5715, 5741, 5770, 5771, 5864, 6098, 6131, 6248, 6546, 6547, 6549, 6664, 6665, 6666, 6667, 6675, 6690, 6759, 6768, 6782, 6902, 7078, 7087, 7134, 7135, 7136, 7137, 7138, 7139, 7206, 7227, 7252, 7299, 7342, 7344, 7371, 7481, 7502, 7510, 7511, 7512, 7513, 7549, 7594, 7602, 7604, 7605, 7606, 7631, 7686, 7757, 7796, 7837, 7877, 7925, 7943, 7974, 7984, 7999, 8000, 8001, 8064, 8101, 8198, 8237, 8302, 8374, 8382, 8397, 8457, 8549, 8552

United States—States—New Mexico. 2030, 2176, 2587, 3457, 4824, 4890, 4899, 4948, 5287, 5289, 5681, 5743, 6386, 6595, 6725, 6890, 7542, 7574, 7673, 7689, 8006, 8248, 8526

United States—States—New York. 168, 175, 177, 194, 222, 223, 228, 229, 231, 232, 233, 234, 238, 239, 240, 241, 242, 243, 244, 251, 253, 254, 263, 265, 266, 268, 269, 274, 278, 279, 281, 282, 283, 284, 289, 290, 291, 292, 295, 298, 299, 300, 301, 306, 308, 309, 310, 312, 313, 314, 315, 316, 318, 319, 320, 322, 323, 332, 335, 345, 361, 364, 370, 390, 391, 410, 420, 432, 454, 460, 464, 476, 482, 486, 488, 500, 509, 532, 574, 598, 623, 673, 676, 678, 719, 746, 762, 781, 808, 846, 849, 859, 862, 866, 867, 870, 887, 896,

United States—States—Utah. 1566, 1589, 1722, 1819, 1903, 1969, 2030, 2080, 2123, 2126, 2176, 3394, 3427, 3446, 3539, 4065, 4890, 5152, 5289, 6343, 7410, 7591, 7603, 7659, 8249, 8459, 8530

United States—States—Vermont. 4890, 4948, 5082, 5287, 5865, 6034, 6401, 6723, 6889, 7077, 7670, 7671, 8039

United States—States—Virginia. 573, 665, 721, 1119, 1385, 1767, 1785, 2137, 2226, 2265, 2291, 2390, 2458, 2724, 2729, 2734, 2741, 2772, 2835, 2894, 3176, 3236, 3237, 3296, 3412, 3485, 3531, 3578, 3680, 4151, 4170, 4618, 4890, 5228, 5287, 5362, 5684, 5719, 5891, 5893, 5923, 5999, 6000, 6029, 6030, 6213, 6225, 6246, 6322, 6332, 6386, 6400, 6468, 6470, 6556, 6621, 6784, 6821, 6927, 6974, 7026, 7032, 7034, 7039, 7045, 7167, 7176, 7180, 7202, 7211, 7220, 7221, 7223, 7225, 7227, 7240, 7241, 7290, 7291, 7292, 7293, 7294, 7303, 7309, 7316, 7383, 7426, 7437, 7445, 7527, 7545, 7554, 7613, 7652, 7710, 7775, 7864, 7867, 7875, 7905, 7926, 8179, 8198, 8221, 8237, 8260, 8365, 8401, 8426, 8444, 8511, 8525, 8543

United States—States—Washington state. 1532, 1687, 1819, 1864, 1866, 1867, 1872, 1903, 1912, 1969, 2005, 2030, 2074, 2080, 2108, 2126, 2176, 2274, 2481, 2493, 2811, 2887, 3152, 3770, 4250, 4362, 4487, 4671, 4766, 4875, 4987, 5026, 5027, 5055, 5060, 5108, 5153, 5287, 5289, 5368, 5370, 5505, 5565, 5668, 5730, 5731, 5803, 6273, 6346, 6476, 6496, 6549, 6695, 6701, 7013, 7100, 7129, 7228, 7236, 7298, 7323, 7506, 7555, 7559, 7560, 7610, 7670, 7724, 7851, 7889, 7944, 7958, 8023, 8081, 8127, 8176, 8205, 8251, 8262, 8348, 8349, 8355, 8434, 8530

United States—States—West Virginia. 2258, 3153, 3578

United States—States—Wisconsin. 1558, 2111, 2151, 2447, 2458, 2549, 3152, 3153, 3236, 3391, 3471, 3483, 3485, 3493, 3578, 3889, 4362, 4470, 4477, 4870, 4871, 4876, 4878, 4879, 4890, 4952, 4984, 4998, 5002, 5003, 5004, 5005, 5006, 5009, 5011, 5068, 5069, 5084, 5088, 5279, 5302, 5311, 5416, 5476, 5510, 5532, 5538, 5546, 5600, 5615, 5643, 5670, 5672, 5705, 5731, 5739, 5743, 5811, 5835, 5876, 5953, 6055, 6064, 6126, 6147, 6265, 6266, 6328, 6339, 6374, 6389, 6390, 6393, 6467, 6478, 6491, 6534, 6580, 6581, 6582, 6676, 6861, 7008, 7073, 7084, 7110, 7142, 7165, 7225, 7233, 7332, 7368, 7375, 7383, 7569, 7570, 7623, 7733, 7740, 7818, 7838, 7939, 7955, 7982, 7993, 8051, 8054, 8056, 8058, 8067, 8071, 8109, 8154, 8155, 8178, 8198, 8298, 8329, 8343, 8365, 8389, 8439, 8548

United States—States—Wyoming. 1903, 2030, 2126, 2176, 3445, 3458, 3462, 5060, 8249

United States Department of Agriculture (USDA)—Agricultural Adjustment Administration (AAA, 1933-1942) and Agricultural Adjustment Agency (1942-1945). 3110, 3680

United States Department of Agriculture (USDA)—Agricultural Research Service (ARS, Established 1953). Including Agricultural

Research Administration (1942-1953). 3436, 3579, 3869, 3945, 4029, 4043, 4199, 4246, 4353, 4362, 4368, 4532, 4534, 4545, 4634, 4637, 4791, 5352, 6370, 6669, 6741, 6788, 7631, 7767

United States Department of Agriculture (USDA)—Arlington Experimental Farm at Arlington, Virginia (1900-1942). 1767, 2265, 2390, 2456, 2458, 2724, 2734, 2741, 2772, 2835, 3412

United States Department of Agriculture (USDA)—Bureau of Agricultural and Industrial Chemistry (1943-1953). Including Bureau of Agricultural Chemistry and Engineering (1938-1943), Bureau of Chemistry and Soils (1927-1938), and Bureau of Chemistry (1901-1927). Transferred to the Agricultural Research Service (ARS) in 1953. 1855, 2108, 2253, 2296, 2301, 2312, 2325, 2342, 2354, 2355, 2356, 2371, 2376, 2379, 2407, 2445, 2460, 2461, 2462, 2463, 2464, 2465, 2472, 2569, 2620, 3152, 3196, 3204, 3316, 3418, 3515, 3538, 3563, 3581, 3583, 3585, 3620

United States Department of Agriculture (USDA)—Bureau of Human Nutrition and Home Economics (1943-1953). Including Bureau of Home Economics (1923-1943), Office of Home Economics (1915-1923), and Nutrition and Home Economics Work in the Office of Experiment Stations (1894-1915). Transferred to the Agricultural Research Service in 1953. 1458, 1466, 1522, 1533, 1707, 1843, 1951, 1968, 2933, 3058, 3388, 3501

United States Department of Agriculture (USDA)—Bureau of Plant Industry, Soils, and Agricultural Engineering (1943-1953). Including Bureau of Plant Industry (1901-1943), Office of Plant Industry (1900-1901), and Division of Agrostology (1895-1901). Transferred to Agricultural Research Service in 1953. 1452, 1767, 1776, 1810, 2045, 2097, 2134, 2156, 2158, 2196, 2214, 2223, 2257, 2265, 2282, 2283, 2311, 2336, 2381, 2401, 2406, 2412, 2447, 2456, 2457, 2458, 2459, 2460, 2490, 2549, 2587, 2635, 2654, 2680, 2681, 2722, 2723, 2724, 2725, 2726, 2727, 2728, 2729, 2731, 2734, 2737, 2739, 2741, 2771, 2772, 2774, 2777, 2778, 2782, 2784, 2787, 2789, 2790, 2791, 2793, 2795, 2829, 2830, 2835, 2842, 2852, 2876, 2917, 2963, 2973, 2986, 3044, 3045, 3109, 3152, 3171, 3172, 3236, 3237, 3331, 3391, 3403, 3433, 3436, 3486, 3504, 3513, 3537, 3545, 3578, 3579, 3589, 3679, 3680, 3689, 3741, 3764, 3945, 4395, 5933, 7721

United States Department of Agriculture (USDA)—Foreign Agricultural Service (FAS, Est. 1953) Including Office of Foreign Agricultural Relations (1939-1953). Foreign Agricultural Service (1938-1939). 3361, 3924, 3989, 4029, 4043, 4176, 4257, 4314, 4644, 4659, 5369

United States Department of Agriculture (USDA)—Office of Experiment Stations (1888-1955). Transferred to the Cooperative State Experiment Station Service in 1961. 1432, 1458, 1503, 1522, 1533, 1654, 1655, 1656, 1657, 1843, 1968, 2448

United States Department of Agriculture (USDA)—Patent Office and Commissioner of Patents, Agriculture (Forerunners of USDA). 876, 881, 965, 2457

United States Department of Agriculture (USDA)—Section of Foreign Seed and Plant Introduction (Established 1898 within the USDA with David Fairchild in Charge). Transferred to Bureau of Plant Industry (1 July 1901). Later Referred to as the Office of

Foreign Seed and Plant Introduction and then the Office of Foreign Plant Introduction. 1693, 1767, 2134, 2156, 2158, 2223, 2257, 2282, 2283, 2310, 2406, 2412, 2456, 2459, 2680, 2722, 2726, 2727, 2729, 2737, 2778, 2782, 2787, 2788, 2790, 2795, 2829, 2830, 2835, 3236, 3237, 3504, 3578, 3589

United States Department of Agriculture (USDA)—War Food Administration (WFA), Including the Food Production and Distribution Administration. 3436

United States Department of Agriculture (USDA; Including Federal Grain Inspection Service [FGIS], and War Food Administration [WFA]). See also: Agricultural Marketing Service, Agricultural Research Service (ARS), Bureau of Plant Industry, Economic Research Service, Food and Nutrition Service, Foreign Agricultural Service, and Section of Foreign Seed and Plant Introduction. 1358, 1359, 1414, 1496, 1536, 1576, 1601, 1665, 1666, 1944, 1997, 2045, 2094, 2180, 2189, 2197, 2205, 2206, 2207, 2209, 2217, 2220, 2226, 2259, 2260, 2263, 2271, 2274, 2295, 2308, 2323, 2326, 2337, 2408, 2477, 2489, 2491, 2549, 2583, 2613, 2623, 2626, 2627, 2634, 2649, 2660, 2662, 2681, 2765, 2776, 2796, 2828, 2846, 2847, 2874, 2917, 3152, 3176, 3210, 3331, 3433, 3492, 3530, 3543, 3544, 3615, 3644, 3773, 3918, 3927, 3969, 4053, 4102, 4151, 4374, 4461, 4477, 4494, 4576, 4583, 4691, 4943, 5008, 5017, 5075, 5201, 5244, 5394, 5609, 5613, 5765, 5887, 5897, 5954, 6286, 6379, 6496, 6505, 6573, 6615, 6786, 6815, 6865, 6934, 7225, 7409, 7441, 7784, 7798, 7944, 8057, 8072, 8077, 8178, 8311, 8332, 8333, 8457, 8524, 8546

United States of America (USA)—Trade (Imports or Exports) of Soybeans, Soy Oil, and / or Soybean Meal—Statistics. See also Trade (International). 2199

United States of America (USA). 168, 175, 177, 184, 194, 201, 202, 203, 208, 209, 210, 211, 213, 216, 217, 218, 219, 221, 222, 223, 225, 228, 229, 230, 231, 232, 233, 234, 235, 238, 239, 240, 241, 242, 243, 244, 246, 248, 250, 251, 253, 254, 258, 263, 265, 266, 267, 268, 269, 270, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 289, 290, 291, 292, 295, 296, 297, 298, 299, 300, 301, 304, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 318, 319, 320, 321, 322, 323, 326, 327, 328, 332, 333, 335, 338, 345, 347, 349, 353, 361, 363, 364, 370, 373, 375, 379, 381, 382, 390, 391, 393, 397, 401, 402, 404, 405, 406, 407, 410, 412, 414, 415, 416, 418, 420, 421, 422, 423, 425, 426, 429, 432, 433, 436, 453, 454, 459, 460, 463, 464, 465, 471, 474, 476, 481, 482, 484, 486, 487, 488, 500, 503, 505, 506, 507, 509, 510, 512, 514, 515, 519, 526, 528, 529, 530, 531, 532, 533, 536, 537, 540, 542, 543, 544, 547, 549, 551, 557, 558, 561, 563, 564, 572, 573, 574, 575, 583, 586, 594, 598, 603, 613, 614, 617, 619, 623, 628, 638, 639, 649, 654, 660, 662, 664, 665, 673, 676, 678, 681, 687, 689, 692, 694, 697, 700, 717, 719, 721, 722, 737, 746, 749, 750, 762, 766, 767, 768, 771, 779, 780, 781, 785, 788, 797, 808, 813, 817, 826, 827, 830, 831, 833, 834, 837, 840, 842, 845, 846, 847, 849, 852, 854, 857, 858, 859, 860, 861, 862, 866, 867, 869, 870, 876, 877, 878, 879, 881, 882, 884, 887, 888, 891, 892, 894, 895, 896, 897, 898, 899, 900, 905, 906, 907, 909, 911, 916, 919, 922, 925, 928, 929, 930, 932, 933, 941, 945, 946, 948, 957, 959, 965, 967, 968, 973, 977, 978, 987, 988, 996, 1002, 1006, 1009, 1011, 1012, 1016, 1017, 1019, 1024, 1025, 1026, 1029, 1031, 1032, 1034, 1036, 1043, 1046, 1047, 1048, 1050, 1051, 1053, 1054, 1057, 1058, 1059, 1063, 1065, 1066, 1067, 1068, 1071, 1073, 1074, 1075, 1077, 1079,
