Date of Introduction: 1987. June.

Ingredients: Shiro [white] miso, safflower oil, pure water, rice vinegar, rice wine, tamari, barley malt, spices, vegetable gum.

Wt/Vol., Packaging, Price: 12 oz glass jar.

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 1.5 by 3.5 inches. Self adhesive. Red and brown on greenish gold. "The Conscious Kitchen. Delicious on fish, salads, burgers, raw or steamed vegetables." Soyfoods Center product evaluation. 1987. June 13. Too salty! Miso is the first ingredient.

7004. *Harvard Medical School Health Letter*. 1987. Nitrates and cancer. June. p. 2. [1 ref]

• **Summary:** "Since the mid-1970s, nitrate—a relatively common substance in food and water—has been under suspicion as a cause of cancer, especially cancer of the stomach. When nitrate enters the body, or even when it is present in foods left at room temperature, bacteria may convert the compound to nitrite. Nitrite, in turn, can become attached to common organic substances to produce *nitrosamines*, which are carcinogenic..."

"The main source of nitrate in contemporary diets is vegetables, which pick it up from fertilizer in the soil. Drinking water may also contain a fair amount of nitrate (much of it, again, originating in fertilizer applied to soil in the run-off-region)..."

"In regions of the world where food preservation is inadequate, bacteria contaminating the food supply may generate high levels of nitrosamine, and this may account for the high rates of stomach cancer in less developed parts of the world. Also, certain relatively uncommon foods contain substances favoring formation of nitrosamines. Among them are some types of preserved fish, certain varieties of Japanese soy sauce."

British Medical Journal, February 28, 1987.

7005. Lindner, Anders. 1987. An introduction to soybean uses. *North European Food and Dairy Journal* No. 6/87. p. 210-15. June. [Eng; Ger; Dan]

• **Summary:** Of the 95 million tons of soybeans produced worldwide in 1986, an estimated 75 million tons were crushed, 15 million tons were stock, and 5 million tons were processed without crushing to make human foods. Of the soybeans crushed, 54 million tons became meal and flour, while 13 million tons became oil. Oriental soyfoods can be divided into those originating from traditional soymilk (tofu, yuba, soybean drinks, okara) and fermented products (soysauce, tempeh, miso). Modern soymilk can be

formulated to make dairylike products or concentrated by ultrafiltration to make a host of new products. Lists German and Danish names for all basic soyfoods. Each is described briefly. Advantages of using soybeans as a basis for products are discussed with emphasis on biotechnological advances. Address: Soya Technology Systems (STS), Ltd., Singapore.

7006. **Product Name:** Cajun Jerky (Meatless. Based on Textured Soy Protein) [Beef Style, Spicy Italian Style, Hot Pepperoni Style, or Smoked Ham Style].

Manufacturer's Name: Lumen Food Corporation.

Manufacturer's Address: 409 Scott Street, Lake Charles, LA 70601.

Date of Introduction: 1987. June.

Ingredients: 1995 Smoked Ham Style: Soy protein, water, soybean oil, yeast extract, cayenne, salt, potassium sorbate.

Wt/Vol., Packaging, Price: 1.5 oz poly bag. Retail for \$0.89 (1987).

How Stored: Shelf stable.

Nutrition: Per ½ oz.: Calories 50, protein 6 gm, carbohydrates 1 gm, fat 3 gm, sodium 185 mg, fiber 1 gm.

New Product–Documentation: Distributor Price List.

1987. Aug. 1. Label. 1987. "A Vegetable Protein Product.

Made with Pride in the Heart of Cajun Country." Brochure.

1987. "Cajun Jerky! The Jerky Snack That's Good for You."

Spot in Natural Foods Merchandiser. 1987. June. p. 56. Spot

in Soya Newsletter. 1987. 1(4):4. Letter from Greg Caton,

CEO. 1987. Nov. 3. "Our product is double extruded using

a Wenger and starting with defatted soy flour. We use no

concentrates or isolates. We pride ourselves as the world's

foremost authorities on industrial applications if extruded

soy flour products in the non-refrigerated IM (Intermediate

Moisture) mode. All of our products use these technologies."

M. Friedman. 1987. Adweek East. Nov. 16. "The most

interesting new [soy-based] food is Lumen... a surprisingly

close analog to meat."

Product with Label purchased by mail order from Lumen Foods. 1995. Dec. 22. Smoked Ham Style. 4 by 5 inches. Plastic bag. Red and green on yellow. Illustration of an alligator in a vest standing upright. "A vegetable protein product. No cholesterol. Low in calories. Low in fat. High in protein. Eats good!"

7007. Torii, Yasuko. 1987. New developments with tempeh in Japan (Interview). Conducted by William Shurtleff of Soyfoods Center, July 1. 2 p. transcript.

• **Summary:** Torigoe-Seifun stopped making tempeh in mid-1987. They had a hard time popularizing it. Marusan's tempeh is not selling well. They, too, are thinking of stopping. Mr. Kanasugi and the Natto Assoc. are trying to cooperate with Marusan. They suggest selling "tempeh miso," made as follows: Mix 10 kg tempeh, 10 kg barley koji or rice koji, and 1 kg salt. Grind in a meat grinder and let stand at room temperature in the summer for 1 month.

The result is a sort of Finger Lickin' Miso. Barley koji works best, and the resulting tamari is delicious. Mr. Kanasugu hopes some miso maker will make this. Only Mr. Kanasugi is doing tempeh research. He makes this miso in his restaurant daily. He also makes a spread like peanut butter. Mr. Ose is still making tempeh but his business, Udai, is not doing well. No one is left at the Ministry of Agriculture with an interest in tempeh: Mr. Katoh went to work with FAO in Rome and Ohta went to Showa Seiyu.

Why did tempeh fail to catch on in Japan? 1. It was poorly marketed. 2. The ads and Torigoe aimed at the older generation who still know how to deep fry foods. 3. It is not clear whether the attempted tie-in with natto was helpful or harmful. Natto is a convenient fast food. Now tempeh is not even sold at Natural House, the natural foods supermarket. Organic soybeans from Living Farms are now widely used in Japanese miso and natto. Address: Kamitsuchidana 324, Ayase-shi, Kanagawa-ken 252, Japan. Phone: 0467-76-0811.

7008. *Corporate Report Wisconsin (Milwaukee, Wisconsin)*. 1987. Kikkoman brews up super soy sauce. July.
• Summary: The plant on the Big Foot Prairie, 3 miles northwest of Walworth, is operated by Kikkoman Foods Inc., a unit of Kikkoman Shoyu Co. Ltd. of Japan. Production is now about 8 million gallons a year compared to about 1.7 million gallons in the plant's first year of operation. In 1977 Kikkoman became the leader in the U.S. soy sauce market. Presently U.S. retail market shares are Kikkoman 47%, La Choy 37%, and Chun King a distant third. "Kikkoman is one of the few Japanese companies to succeed in the U.S. with a traditional Japanese product. It has done so in part by promoting its sweet and salty sauce as an all-purpose and all-American product."

7009. Gauger & Silva, Inc. 1987. Season with protein instead of salt [San-J Tamari] (News release). 129 Hyde St., San Francisco, CA 94102. 2 p. July.

• Summary: San-J tamari, fermented over 4 seasons, is the best-selling tamari in Japan and the United States. "One teaspoon of tamari, which contains just a pinch of salt, is the seasoning equivalent of a full tablespoon of salt. The San Jirushi Corporation, founded in 1804 in Kuwana, Japan, is the largest manufacturer of tamari in the world and the only company exporting tamari in any significant quantity. San-J tamari is now sold in supermarkets, and has a major share of the industrial foods market. "Tamari is the original Japanese soy sauce... San-J Tamari has 30% more organic protein than shoyu and its flavor does not burn off in cooking." The new brewery in Richmond, Virginia, will have a capacity of one million gallons a year." Address: San Francisco, California.

7010. Hapgood, Fred. 1987. The prodigious soybean. *National Geographic* 172(1):66-91. July.

• Summary: Superb photos and an interesting original

color painting done by artist James Gurney, in the style of Norman Rockwell, shows more than 60 products containing soybean ingredients (both food and industrial). But, except for the first 2 pages, the text of this far-ranging article is mediocre to embarrassingly erroneous; even the *National Geographic* editors didn't like it, but Hapgood refused to correct his many errors. For example, large bold print at the top of the first page reads: "For centuries Chinese have called the Soybean 'Yellow Jewel' or 'Great Treasure.' Now this prodigious bean is seen by some as a weapon against world hunger." Note: This is the earliest English-language document seen (July 2007) that uses the term "Yellow Jewel" or "Great Treasure" to refer to the soybean.

Superb photos show: Selling tofu in China. Harvesting soybeans with combines. A tractor high over the hold of a cargo ship loaded with soybeans. Making koji at Kikkoman. 42 different colors and shapes of soybean seeds. Henry Ford on 2 Nov. 1940 wielding an ax against a car trunk lid made from a highly resilient soybean-derived plastic. Yuba drying over pans of soymilk. A Japanese woman with her dried-frozen tofu drying under the farmhouse eaves. Favorite Japanese soyfoods dishes: Dengaku, Simmering tofu, yuba, and miso dumplings. Hatcho miso in vats with stones piled high on each in an earthquake-proof pyramid shape. *Mame-maki* (bean-throwing ceremony) at Setsubun, held each February in Japan; the beans are thrown from small wooden measuring boxes (*masu*). The *hari-kuyo* ceremony for broken needles in Tokyo. A martial arts master and former Shaolin temple monk in China testing his strength by plunging his arm elbow-deep into a soybean-packed barrel. Address: Boston.

7011. **Product Name:** [Taifun Smoked Tofu].

Foreign Name: Taifun Geraeuchertes Tofu / Raeuchertofu.

Manufacturer's Name: Life Food.

Manufacturer's Address: Stuehlinger Strasse 9, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.

Date of Introduction: 1987. July.

Ingredients: Tofu (organic), natural soy sauce, smoke (from birch and juniper), herbs, wine vinegar.

Wt/Vol., Packaging, Price: 200 gm vacuum pack.

How Stored: Refrigerated.

New Product-Documentation: Label sent by Anthony Marrese. 1990. March 22. 3 by 2.25 inches. Green, black, yellow, and orange red on beige. Logo of yellow circle. Refrigerate at 2-7°C. They now make 60 kg/week.

7012. **Product Name:** Heartline Meatless Meats [Plain Unflavored, Beef Fillet Style, Ground Beef Style, Mexican Beef Style, Teriyaki Beef Style, Pepperoni Style, Chicken Fillet Style, Canadian Bacon Style, or Italian Sausage Style].

Manufacturer's Name: Lumen Food Corporation.

Manufacturer's Address: 409 Scott Street, Lake Charles, LA 70601. Phone: 318-436-6748.

Date of Introduction: 1987. July.

Ingredients: 1995–Teriyaki Beef Style: Defatted soy flour, purified water, soybean and/or sunflower oil, autolyzed yeast, natural flavorings [soy sauce (soybeans, water, salt), and/or garlic powder, onion powder, pepper cream, and/or cayenne], potassium sorbate (*a polyunsaturated fat used to preserve freshness*), citric acid.

Wt/Vol., Packaging, Price: 8 oz bag. Retail for \$2.79 (10/87).

How Stored: Shelf stable.

New Product–Documentation: Distributor Price List. 1987. Oct. 1. Heartline Meatless Meats. Spot in Soya Newsletter. 1987. Sept/Oct. p. 6. “Has the look, taste, and texture of real meat... Reconstitutes in less than 5 minutes. 100% natural.” Ad in Vegetarian Times. 1989. Jan. p. 49.

Ad in Whole Foods. 1989. Feb. p. 24. “Meat has met its match!” Five new full-color package designs are shown: Teriyaki Beef Style, Beef Fillet Style, Italian Sausage Style, Chicken Fillet Style, and Ground Beef Style. Spot in Health Foods Business. Jan. p. 61. “Meatless meats.” Lumen Food Corp. has repackaged and reformulated its line of Heartline meat replacers. The new box is printed in 4 colors with recipes on the back. The products are now made without simple sugars to give the consumer an alternative to meat without soy aftertaste, intestinal indigestion, toxic by-products, or animal drugs. Contact P.O. Box 350, Lake Charles, Louisiana 70602-0350.

Heartline products with Labels purchased by mail order from Lumen Foods. 1995. Dec. 22. Chicken Fillet Style, Teriyaki Beef Style, Canadian Bacon Style, Ground Beef Style. The Label (bag) is the same for each product; a sticker identifies individual flavors. 5½ by 8½ inches. Plastic bag. Red, brown, black, and white on yellow. A large illustration (line drawing) shows a woman in a leotard running. “A vegetable protein product. Makes 1 lb. Cooks in minutes. No cholesterol. Low in saturated fat. Only 83 calories/serving. High in protein. High in iron and calcium. 100% vegetable in origin. Unbelievably delicious! Surprisingly economical. Look, taste & texture of real meat. Eat as a delicious between-meal snack, or use in your favorite meat dishes.” Back of bag: What is heartline? Cooking instructions: Eat as is, microwave, or boil. Soyfoods Center taste test. 1996. Jan. 28. Extremely good flavor and texture. Package design is weak.

7013. Otsuka, Shigeru. 1987. *Shōyu sekai e no tabi* [A journey into the world of shoyu]. Tokyo: Toyo Keizai Shinpo-sha. 230 p. Illust. No index. 20 cm. [22 ref. Jap]
• Summary: Contents: A pedigree of shoyu (p. 11). The road to shoyu (p. 35). Shoyu and the world (p. 67). A friend of meat cookery (p. 103). Shoyu... make in the USA (p. 115). Shoyu as a forerunner of Japanese culture (p. 129). A visit to the real centers of the Japanese food boom (p. 159). Shoyu recipe contest (p. 209). Mini-science on shoyu (p. 213).

Conclusion (p. 219). Postscript (p. 225).

In the section on “Shoyu and the World,” subsection “Exports during the Edo Period” (p. 67-79) it is noted that: “In a book-keeping book under the date Man-en 1 (1860), Aug. 16 it is stated that 4 ceramic bottles of Japanese shoyu were shipped to Jakarta (Java), Indonesia. The shoyu that was exported to Europe was sent via Jakarta, Indonesia, to Holland. It was shipped in ceramic bottles each containing a volume of 3 gō (540 ml, or about 1 pint). On each bottle, in roman letters, was written the fact that the bottle contained Japanese shoyu. Terms such as “Japansch Zoya” or “JapanschZoya” or “Jap. Soya” appeared on the bottles.

One photo (p. 76) shows four (another shows three) of these bottles. Below this name, near the base of many bottles was written the brand “CPD” which is thought to have stood for “Comprador.” During the Kan-ei period (1624-1630) some rich merchants in Nagasaki established a company named *Konpura-sha*. The merchants who ran it were called Comprador. [Note: They are now (Oct. 2007) generally known in English as the “Comprador Merchant Guild;” Japanese: *Konpura Nakama*].

It is recorded in the *Kōka Nisshi*, the diary of a voyage by Tōsei? Yanakawa in 1860 (Ansei 7) from Japan to the USA by boat, that “after we landed in Washington state, we didn’t have any miso or shoyu, so we had nothing but salt with which to season our meals.”

In 1765 the French encyclopedist Denis Diderot (lived 1713-1784) wrote a section in his *Encyclopedie* titled “sou ou soi” about Japanese soy sauce. Note that the first term, pronounced soy, is today’s French word for soy sauce. The second term, pronounced “swa” apparently no longer exists.

Two black-and-white photos (p. 47) show the outside and inside of the Goyo-Gura in Noda. Page 93 shows a typical shoyu section in a Japanese supermarket. Address: Toyonaka-shi, Osaka-fu, Japan.

7014. *Progressive Grocer*. 1987. They’re ragin’ for Cajun. July. p. 114-15.

• Summary: In 1986 supermarket sales of soy and teriyaki sauce were \$60.78 million (gross profit: \$16.38 million),

accounting for 2.92% of the sauce category sales (3.29% of category gross profits; the average retail gross profit margin is 27.0%) and with sales up 17.79% over 1985. The best-selling sauce types are spaghetti sauce (28.86% of the category), ketchup (14.40%), meat sauce (13.63%), and dry mixes and seasonings (10.71%).

7015. Product Name: Tofu-Sausage 'n Pasta (Also called Sausage 'n Pasta Combo).

Manufacturer's Name: Tofu Shop (The).

Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

Date of Introduction: 1987. July.

Ingredients: Baked sausage made with tofu, tamari, spices and sunflower oil; pasta salad made with corn macaroni, fresh vegetables, olive oil, red wine vinegar, tamari, spices, and salt.

Wt/Vol., Packaging, Price: 8 oz (226.8 gm).

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 3.5 x 1.5 inches. Self adhesive. Red on yellow. "A simple meal from the Tofu Shop. Ready to eat or reheat." Illustration of the shop on stilts on a cliff over the ocean.

7016. Product Name: Tofu-Cutlets 'n Rice (Also called Cutlet 'n Rice Combo).

Manufacturer's Name: Tofu Shop (The).

Manufacturer's Address: 768 18th St., Arcata, CA 95521. Phone: 707-822-7409.

Date of Introduction: 1987. July.

Ingredients: Baked tofu marinated in tamari, garlic, kelp and lemon; organic brown rice salad with fresh vegetables, almonds, vinegar, olive oil, tamari and spices.

Wt/Vol., Packaging, Price: 8 oz (226.8 gm).

How Stored: Refrigerated.

New Product–Documentation: Label. 1987. 3.5 x 1.5 inches. Self adhesive. Green on yellow. "A simple meal from the Tofu Shop. Ready to eat or reheat." Illustration of the shop on stilts on a cliff near the ocean.

7017. Yamazaki, Junsei. 1987. The Junsei Yamazaki miso and umeboshi story (Brochure). Route 1, Box 1333, Orland, CA 95963. 6 p.

• **Summary:** Junsei arrived at Chico-San in May 1963. His wife, Kazuko, came in 1968. Later that year he went to New York to help Michio Kushi with his restaurant. He returned to Chico-San the following spring (1963?) where he started to make traditional miso and soy sauce. He had learned how while growing up on his family's farm in Chiba prefecture. He had attended Tokyo Agricultural University and majored in organic chemistry. Also at Chico-San he made rice syrup, called Yinnies. Now he and Kazuko live on their 5-acre farm in Orland, California. He makes organic miso (brown rice, rice, and barley) and she umeboshi salt plums with shiso.

Both farm. Address: Orland, California. Phone: 916-865-5979.

7018. Motai, Hiroshi; Fukushima, Yaichi; Ishiyama, Takashi. Assignors to Kikkoman Corp. 1987. Process for producing seasoning. *U.S. Patent* 4,684,527. Aug. 4. 4 p. Application filed 1 April 1986. [6 ref]

• **Summary:** A process is described for producing a seasoning by contacting a hydrolysate of soy sauce koji with an immobilized glutaminase or peptidase in the presence of sodium chloride. Address: 1-2. Noda, Japan; 3. Saitama, Japan.

7019. Currim, Mumtaz. 1987. The sweet 'n' sour palate: The big bite. *Times of India (The) (Bombay)*. Aug. 9. p. SM2.

• **Summary:** It's easy to prepare Chinese vegetarian food; just use tofu (soyabean curd) in place of meat.

It's the all-important sauces and seasonings that give Chinese cookery its unique taste—like light and dark soya sauces, black bean paste. These are now available at delicatessens. So also is tofu, although tofu is also made locally and sold fresh.

Contains a recipe for Braised mushrooms with bean curd, which calls for "4 squares bean curd." "Soya sauce" is called for in most of these recipes.

An illustration (line drawing) shows a Chinese dragon standing upright.

7020. Miller, Bryan. 1987. Restaurants: Midtown Greek and Chinatown. *New York Times*. Aug. 14. p. C22.

• **Summary:** This is a review of the Cantonese Chinese restaurant Oriental Town Seafood Restaurant (14 Elizabeth St., south of Canal St., New York City). Recommended dishes include "Deep-fried bean curd."

A good way to start "is with the golden bean curd cubes holding morsels of shrimp in the middle. They are delicious with some coriander-flecked soy sauce. Every Chinese family in the house seems to be eating a special, giant steamed oysters smothered in black-bean-and-ginger sauce." Also served was "Squid in black bean sauce."

7021. Ayres, Rosalie; Steinkraus, K.H.; Olek, A.; Farr, D. 1987. Characterization of the semi-purified membrane bound ATPases of *Zygosaccharomyces rouxii* adapted to 18% NaCl. *International J. of Food Microbiology* 4(4):331-39. Aug. [17 ref]

• **Summary:** "*Zygosaccharomyces rouxii* is a yeast with spoilage capabilities in high sugar foods such as maple syrups, liquid sugars and chocolate syrups. Its ability, however, to ferment under high salt (18% NaCl) conditions makes it an essential organism in soy sauce and miso fermentations." Address: 1-3. Inst. of Food Science, Cornell Univ., Geneva, New York 14456; 4. Nestle Products Technical Assistance Co. Ltd., Nestle Ave. 55, CH-1800

Vevey, Switzerland.

7022. Product Name: Homestyle Tempeh “No-Chicken” Salad.

Manufacturer’s Name: Homestyle Foods (Formerly Sonoma Specialty Foods).

Manufacturer’s Address: 2317 Bluebell Dr., Santa Rosa, CA 95403.

Date of Introduction: 1987. August.

Ingredients: Tempeh (organic soybeans, culture), celery, soy oil, soy milk, relish, soy sauce, mustard, vinegar, garlic, parsley, spices, and honey; Improved recipe (1988). Tempeh (organic soybeans*, culture), celery, soy oil, soy milk, mustard, tamari, vinegar, sesame, relish, garlic, parsley, natural spices and honey. * Grown in accordance with CA H&S Code 26569.11.

Wt/Vol., Packaging, Price: 8 oz plastic tub.

How Stored: Refrigerated.

Nutrition: Per 2.66 oz.: Calories 155, protein 7.5 gm, carbohydrates 7.4 gm, fat 10.7 gm, fiber 2.0 gm, sodium 0.25 gm, cholesterol 0.

New Product–Documentation: Label. 1987. 4.5 inches diameter. Red and blue on white plastic lid. “Natural. Non-Dairy. Cholesterol Free. No Preservatives. Use on sandwiches, in Dips and Salads.” Interview with Benjamin Hills. 1987. Sept. 7. In 8 oz plastic tubs. Label. 1988. In both 8 and 15 oz tubs. Red, black, and yellow on white. “New! Non-Dairy. Cholesterol-Free. Ready to Eat. Natural. No Preservatives. Nutritious.” Spot in Health Foods Business. 1988. April.

Address: 1-4. Dep. of Microbiology and Physiology, Mahidol of Science, Bangkok 10400, Thailand.

7024. Product Name: Kikkoman Tofu: Soybean Curd (In Retort Pouch) [Firm, or Soft].

Manufacturer’s Name: Kikkoman International, Inc. (Importer). Made in Japan by Kikkoman Corp.

Manufacturer’s Address: 50 California St., Suite 3600, San Francisco, CA 94111. Phone: 415-956-7750.

Date of Introduction: 1987. August.

Ingredients: Water, soybeans, glucono delta lactone and calcium chloride (coagulating agents).

Wt/Vol., Packaging, Price: 10.5 oz (297 gm) foil retort pouch inside a paperboard box.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 5.25 oz. firm: Calories 100, protein 9 gm, carbohydrates 1 gm, fat 7 gm, sodium 0 mg. Soft: Calories 90, protein 7 gm, carbohydrates 1 gm, fat 6 gm.

New Product–Documentation: Spot in *Food Processing*. 1987. June. p. 87. “Tofu shelf-stable in retort pouches.” A large color photo shows the package.

Temptingly Easy Recipes for Kikkoman Tofu. 1987. May. Six panels. 8½ by 11 inches. Full color. Contains recipes for Hunan Pork & Tofu Stir Fry, Simple Skillet Sukiyaki, Salad Nicoise with Tofu, Deluxe Chicken & Fruit Slaw, Glazed Meatloaf Special, Hot & Sour Soup with Tofu, Chocolate-Banana Pie, and Orange Smoothie.

Brochure. 1987. May. “Tofu.” 8½ by 11 inches, 2 sided. The front shows a stylish black plate of tofu cubes, meat, and vegetable stir fry. In the background is a cake of Kikkoman tofu partly cut into cubes. All is set in a black table. The back states: “Kikkoman firm tofu fits today’s healthy lifestyle. It means healthy profits, too. A color photo shows a package of Kikkoman Firm Tofu. “One serving of Kikkoman Firm Tofu has: 50% fewer calories and 40% less fat than a quarter pound cooked hamburger; 50% fewer calories than 1 cup of cottage cheese; 35% more protein than 1 large egg...

“Kikkoman Firm Tofu is packed in a special foil pouch and pasteurized to protect its fresh flavor and delicate texture.

“Special Features: High protein, low calorie; NO cholesterol & NO sodium; NO preservatives; creamy, firm consistency; helpful recipe information on the package; competitively priced; made with Kikkoman’s uncompromising standard of quality.”

Labels. 1988. 5.75 by 3 by 1.25 inch paper box. Firm is red, black, orange, and green on white. Front panel has a photo of tofu in a Chinese-style stir-fried dish. “High Protein. No Cholesterol. No Preservatives. Sodium Free. For stir-frys, salads, desserts... Keep in a cool place. Do not freeze.” Back panel contains a stir-fry recipe for Chicken & Vegetables with Tofu. Soft is blue, green, orange, and black on white. Front panel has a photo of cubes of chilled tofu on a square dish. Recipes on back for Creamy Corn Soup and Tuna-Tofu Spread.

Talk with Art Mio of Morinaga. 1987. Dec. 7. Kikkoman is selling their new tofu, which is much better quality than their original product, to Azumaya for distribution. It is sold in the produce section, where most of America’s tofu is still sold. But the nutritional composition statement is curious. The fat content is much higher and the carbohydrate content much lower than would be expected from a product made from whole soybeans. Soyfoods Center product evaluation. 1988 May 1. Comparing Azumaya, Mori-Nu, and Kikkoman tofu, we preferred them in that order. Kikkoman’s tofu is much better than its original product launched in 1985, which we found inedible. Talk with Terumitsu Hattori, VP of R&D, of Kikkoman, San Francisco. 1988. May 25. This tofu was relaunched in August 1987. Recipe booklet. 1988. June. “Kikkoman firm tofu presents recipes for today’s healthy lifestyle.” Contains 5 recipes: Savory vegetable dip. Extra creamy beef stroganoff (with 3/4 lb steak). No meat stuffed

shells. Chile corn bread. Molded pink lady.

Poster displayed at Yaohan department store in Los Angeles. 1988. Oct. 23. 11½ by 21½ inches. "Kikkoman Firm Tofu." Full color. Shows the package, product on a dish, and a veggie-meat stir fry.

Talk with Morinaga Nutritional Foods. 1994. March 18. Morinaga in Tokyo is now packaging this product for Kikkoman. The first batch arrived in the USA in Nov. 1993.

7025. Pollard, Jean Ann. 1987. The new Maine cooking. Lance Tapley, Publisher, P.O. Box 2439, Augusta, ME 04330. 288 p. See p. 22-24, 94, 202-15, 221. Illust. Index. 28 cm.

• **Summary:** Mostly recipes, arranged by season, including tofu (13), tempeh (6), miso (1), plus how to make tofu at home. Address: Winslow, Maine.

7026. San-J International, Inc. 1987. Tamari [Tamari (Poster)]. 2880 Sprouse Dr., Richmond, VA 23231. Reprinted in Soyfoods Marketing. Lafayette, CA: Soyfoods Center. [Jap; Eng]

• **Summary:** "On Thursday, September 24th, 1987, San-J International of Richmond, Virginia will become the United States' first brewer of genuine tamari. You are invited to join us for the brewery dedication... Tamari—a premium wheat-free soy sauce had its beginnings in 7th century Japan. The Sato family founded San Jirushi in 1806 and began brewing genuine tamari." A 12-step illustrated description of the tamari-making process says (incorrectly), "The cooked beans are molded into one-inch nuggets. The nuggets, called "koji nuggets," are dusted with a microbiological culture called "koji" (*aspergillus oryzae*)." Note: This is incorrect. The cooked soybean nuggets are dusted with spores of the mold *Aspergillus oryzae* the resulting fermented product is called "koji." Address: Richmond, Virginia. Phone: 800-446-5500.

7027. Shurtleff, William; Aoyagi, Akiko. comps. 1987. Bibliography of soy sauce, shoyu and tamari: 535 A.D. to the 1980s. 1775 references in chronological order, partially annotated with index. Lafayette, California: Soyfoods Center. 155 p. Aug. Index. 28 cm. [1775 ref]

• **Summary:** The most comprehensive bibliography on this subject. Note: This is the earliest bibliography seen (May 2001) published by Soyfoods Center. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

7028. **Product Name:** [Soyastern Shoyu].

Foreign Name: Soyastern Shoyu.

Manufacturer's Name: Soyastern Naturkost GmbH (Importer/Distributor). Made in Japan.

Manufacturer's Address: Osteratherstr. 26, 5000 Koeln 60, West Germany.

Date of Introduction: 1987. August.

Ingredients: Pure spring water (Reines Brunnenwasser), soybeans (Soyabohnen), wheat, sea salt (Meersalz).

Wt/Vol., Packaging, Price: 700 ml glass bottle.

How Stored: Shelf stable.

New Product—Documentation: Label. 1987, undated.

Black, grey, and yellow on beige. "Traditional Soyasauce, aged 2 years in oak vats. The universal seasoning. In daily cooking and at the table; it rounds off the aroma of your foods and enhances their indwelling flavors—making salt superfluous." Letter from Thomas Karas. 1989. April 21. "Soyastern Shoyu is a Japanese product. We import it from Muso in bulk and fill it in bottles at our company. We started with it in August 1987."

7029. Roller, Ron. 1987. Job's tears, San-J plant, Edensoy (Interview). *SoyaScan Notes*. Sept. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Edensoy contains Job's tears, the hard, pearly-white to tan seeds of an Asian grass (*Coix lacryma-jobi*), also known as "pearl barley" (easily confused with pearled barley), and called *hatomugi* in Japanese. Note: The large Kenkyusha dictionary (1954) translates *hatomugi* as "pearl barley." A Muso Shokuhin soymilk label gives the scientific name of *hatomugi* as *Semen coicis*. The grains are about the size of a mung bean but slightly oblong, and with a very prominent sunken tan line running from end to end, as with barley. Eden Foods has tested the growing of Job's tears in the southern USA, and now sells the grain in a 1-lb bag. San-J will be the first company to make natural shoyu in the USA. Eden has been negotiating with them for 4-5 years. Startup costs were \$10-15 million. They will make both tamari and shoyu from both defatted soybean meal and whole soybeans. It is an institutional factory, no wooden vats, all stainless steel. Offices will move to the plant site. Edensoy sales are on target. Estimates are that 25-30% of people who go into health food stores have never tasted soymilk. Address: Eden Foods, Clinton, Michigan.

7030. Shurtleff, William. 1987. History of Appropriate Foods Inc. and The Soy Source. Lafayette, California: Soyfoods Center. 3 p. Unpublished manuscript, based on a interviews with Robert Werz, Sept. 9.

• **Summary:** "Appropriate Foods was founded by Robert Werz in the fall of 1980 as a tempeh manufacturer. Born on 29 Dec. 1952, he had been a vegetarian since about 1970. Quite early he developed an affinity for soyfoods. He had been enjoying tofu since the early 1970s, when it was only available from Chinatown. He first heard about tempeh in 1975 from a friend in California, then first tasted it in about 1977. In 1979 he began to make tempeh part time at home in Sea Cliff, New York, for himself and a few friends while working as a carpenter and a boat builder. He also sold some of this tempeh to one store, Rising Tide, as a test market.

"In 1980 Werz decided to try making tempeh as a part

time business. So in October 1980 he founded Appropriate Foods, Inc. He rented a small kitchen (down 2 long flights of stairs in the Bayside Jewish Center) from a friend who was a kosher caterer in Bayside, New York. Commercial production of Tempeh Brothers Tempeh started there in Nov. 1980. When Werz first made tempeh at home and at the temple, he had a partner, David Sibek; friends called them “tempeh brothers.” Hence the product name. The only other tempeh sold in the area was that made by The Tempeh Works in Greenfield, Massachusetts.

“In the spring of 1981 Werz and Sibek decided to make tempeh a full-time business. They were distributing their products to about 10 health food stores and making about 20 pounds of tempeh each batch, 200 pounds a week. So they rented an old meal packing plant, complete with tile walls and floor drains, at 137 New Hyde Park Rd., Franklin Square, Long Island, New York.

In Feb. 1982 tempeh production started at the new location, and soon the company had two small distributors in New York. But now there were 12 tempeh brands on the market. In about June the distributors dropped ‘Appropriate Foods’ products. So they built an insulated box in the back of a pickup truck and began to deliver their own products. From this painful experience Werz learned a key lesson: “In the food business, distribution is everything.” If a company does not have control over the distribution of its products, it is extremely vulnerable.

Werz and Sibek quickly realized that they had to expand their product line, so in June 1982 they started making three new products: (1) Tempeh Brothers brand Soyfurters, a cake of tempeh sliced lengthwise into 4 sticks, marinated, and seasoned with liquid smoke, to sort of resemble hot dogs; (2) No Cow brand Soymilk (the soybeans were ground in a motor-driven Corona mill) in plain, cinnamon-honey, and carob-honey flavors; and (3) Tempeh Brothers brand Tempehburgers.

In the summer of 1982 the company added Tempeh Brothers brand Super Tempeh and Soy-Rice-Sesame Tempeh, and dropped the Soyfurters. Dave Sibek left in early 1983.”

“In Feb. 1984 Werz and a partner, Shelley Martin, started a second business, The Soy Source, to allow Appropriate Foods to start selling their products, under The Soy Source Brand, to supermarkets. Their first products were shoyu (Japanese-style soy sauce) and tamari (wheat-free soy sauce). The first new tofu product in the new line (launched in Feb. 1985) was Perfect Pasta brand Tofu Tortellini (frozen). The tofu was purchased from Nasoya and the product made by the pasta maker. In Sept. 1985 Vegetarian Gourmet Traditional Pot Pie with Tempeh and Tofu Quiche, both frozen, were added to the new line.”

“On 1 Dec. 1986 Appropriate Foods completed its move to a larger building in the East Brooklyn Industrial Park at 292 Liberty Ave., Brooklyn, New York. Production began

there in March 1987. In mid-March four new tempehs were launched as gourmet items, with silver and gold labels, under the Emperor’s Best Brand: Garbanzo Tempeh (with no soy), Soy & Amaranth Tempeh, Rye-Caraway-Soy Tempeh, and Brown Rice Tempeh (with no soy). A nice article in the *New York Times* (24 June 1987) noted: “Today, with six employees, the company produces about 10,000 pounds of tempeh a month. About half is sold to health food distributors and the rest is delivered to about a hundred stores and restaurants in the metropolitan area.

“As of September 1987 products made under the Appropriate Foods brand include Soy Tempeh, Super Tempeh, Soy-Rice-Sesame Tempeh, Tempeh Burgers, Soymilk, and Tofu Salads. Garbanzo Tempeh and Amaranth Tempeh are sold under the Soy Source gourmet brand. Soy Source is still an independent company with its own books. The distribution arm of the company, called Appropriate Foods Distributing, is trying to broaden its line. The future seems to lie in ‘crossover products,’ sold in supermarkets.”

The company is now one of America’s largest tempeh manufacturers. They have developed many innovative tempeh and tofu second generation products. Address: Lafayette, California.

7031. Johnson, Robert. 1987. Costly creation: General Mills risks millions starting chain of Italian restaurants. The cuisine isn’t authentic, but people like the food, extensive research shows. Teriyaki in an olive garden. *Wall Street Journal*. Sept. 21.

• **Summary:** About the Olive Garden restaurants—which serve (among other things) chicken simmered in teriyaki sauce. Address: Staff Reporter, Wall Street Journal.

7032. Gauger & Silva, Inc. 1987. Ancient Japanese technology comes to the U.S. (News release). 129 Hyde St., San Francisco, CA 94102. 2 p. Sept.

• **Summary:** “After 4 years of research and planning, a technology known in Japan since the 8th century has created a new industry for this country. On September 24th, the first tamari brewery ever built outside Japan will be dedicated by San-J International of Richmond, Virginia... San-J Tamari is the most widely used fermented soy sauce in the U.S. food processing industry. Major food companies, including Campbell’s, Hunt Wesson, Stouffer’s and General Mills, have discovered the same advantages as consumers—tamari tastes better, extends further, is heat stable, reduces sodium, and is a natural product.”

Photos show: (1) A front outside view of the new San-J plant in Richmond, Virginia. (2) The presses inside the plant where the tamari (liquid) is pressed from the moromi (mash). Address: San-J: 2880 Sprouse Dr., Richmond, Virginia 23231. Phone: 800-446-5500 or in VA 804-226-8333.

7033. Hymowitz, Theodore. 1987. The soybean comes to

Illinois. *Illinois Research* 29(2/3):5. Summer/Fall.

• **Summary:** Domestication is a process of trial and error and not an event. In the case of the soybean, this process probably took place during the Shang dynasty (ca. 1700-1100 B.C.) or perhaps earlier. Samuel Bowen brought soybeans from China to Greenwich, his residence in Savannah, the Colony of Georgia. The 450 acres of Greenwich became the center of his farming and manufacturing enterprises. On July 1, 1767, Bowen received patent number 878 for his invention of methods to prepare and make sago powder, vermicelli, and soy sauce from plants grown in America. The soy sauce that he made in Georgia was exported to London.

"In 1851, the soybean was introduced to Illinois by Benjamin Franklin Edwards, the youngest brother of the first territorial governor of Illinois, Ninian Edwards... He obtained the seeds from Japanese fishermen who were rescued at sea by the *Aukland*, which was bringing sugar from Hong Kong to San Francisco, California. Edwards gave the seeds to John H. Lea, of Alton [Illinois], who planted them in his garden in the summer of 1851." Address: Prof. of plant genetics, Dep. of Agronomy, Univ. of Illinois, Urbana, IL 61801.

7034. **Product Name:** San-J Tamari-Lite (Low Sodium).

Manufacturer's Name: San-J International, Inc. (Importer). Made in Japan by San-Jirushi Corp.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-446-5500.

Date of Introduction: 1987. September.

Ingredients: Soybean meal, water, salt, alcohol.

Wt/Vol., Packaging, Price: 5 oz dispenser, 10 oz bottle, and 20 oz bottle.

How Stored: Shelf stable.

New Product–Documentation: Interview with John Perelman. 1987. Sept. 15. He notes that Erewhon (made by Kagisa), Arrowhead Mills, and Eden Foods still misuse the term "tamari." Now Westbrae does too. Ad in East West. 1988. June. p. 23. "Pretty amazing stuff. 25% less sodium. Rich taste. Wheat free." Also run as a full-page color ad in Vegetarian Times. 1988. Sept. Inside front cover. And Oct. p. 30. Interview with John Perelman. 1990. Jan. 25. This product is still imported from Japan in drums and bottled in Richmond; the company has not yet installed its desalinization equipment in America, and probably won't until at least 1991.

Two labels sent by Misako Binford of San-J International. 2012. May 14. The white label now reads: "Tamari: Gluten Free Soy Sauce. Reduced sodium. 10 fl. oz. Made with 100% soy." Two logos on the front panel: (1) Non GMO Project verified. (2) Certified Gluten Free. "Contains 28% less sodium than regular tamari." She notes: Product introduced 1987 or before. Imported.

7035. **Product Name:** Sharon's Finest Curry Salad.

Manufacturer's Name: Sharon's Finest. Div. of Rose

International (Product Developer-Marketer).

Manufacturer's Address: P.O. Box 2687, Petaluma, CA 94953-2687.

Date of Introduction: 1987. September.

Ingredients: Tofu, soy oil, soy sauce, mustard, spices, citric acid, garlic, onion, sorbic acid, salt.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Talk with Richard Rose. 1987. Nov. 13. Ascorbic acid is used to reduce spoilage (molding). Label. 1987. "A delicious nondairy treat. This Curry Salad conforms to the Diet Center maintenance diet, and provides 1 protein allowance and 1 oil allowance per container. Available only at Diet Centers and selected fine natural food stores. Kosher Pareve."

7036. Snyder, Harry E.; Kwon, T.W. 1987. Soybean utilization. New York, NY: Van Nostrand Reinhold Co. xii + 346 p. Illust. Index. 23 cm. An AVI Book. [381 ref]

• **Summary:** Contents. Preface. 1. Production, marketing, and sources of information: Introduction, agricultural production, marketing, sources of information. 2. Morphology and composition: Morphology, chemical composition. 3. Processing of soybeans: Preparation, flaking, expellers, solvent extraction, oil refining, protein products. 4. Quality criteria for soy products: Protein and oil products. 5. Functional properties of soy proteins: Interactions of soy proteins with water, interactions of soy proteins with lipid, foaming, commentary on functionality. 6. Nutritional attributes of soybeans and soybean products: Inherent attributes of soybeans, changes due to processing.

7. Oriental soy food products: Traditional nonfermented soybean food products, traditional fermented soybean food products. 8. Soybean-supplemented cereal grain mixtures: Protein-rich food mixtures containing soy flours, composite flours containing soy flour, cereal blends containing soybeans. 9. Soy protein food products: Baked goods, meat products, dairy products, other foods containing soy protein. 10. Soybean oil food products: Salad and cooking oils, mayonnaise, and prepared salad dressings, shortenings, margarines and related products, soybean lecithin products. 11. Grades, standards, and specifications for soybeans and their primary products: Grades of soybeans, specifications for soybean meals and flours, trading specifications for soybean oils, specifications for lecithins, standards for the use of soy protein products in other foods. References in each chapter. Glossary.

This book is well written (though largely a repetition of previous works) in the area of modern soy protein products. It is weak and poorly researched in the area of "Oriental Soy Food Products," which comprises only 1 chapter (22 pages) of the total, making the book unbalanced. The author of this chapter seems to be almost completely unaware of the many major developments in the Western world during the past 10

years.

Note the following Korean soyfood terms: Fresh soybean = Put Kong. Toasted soy powder = Kong Ka Ru. Soy sprouts = Kong Na Moal. Soymilk = Kong Kook or Doo Yoo. Yuba (Soymilk film) = no name. Tofu (Soy curd) = Doo Bu. Tempeh (Fermented Whole Soybeans) = no name. Natto = Chung Kook Jang. Soy sauce = Kan Jang. Miso (Soy Paste) = Doen Jang. Fermented tofu (Fermented Soy Curd) = no name. Fermented okara (fermented soy pulp) = no name.

Note: This is the earliest English-language document seen (Dec. 2005) that uses the term "Toasted soy powder" to refer to roasted soy flour. Address: 1. Prof., Food Science Dep., Univ. of Arkansas, Fayetteville, AR; 2. Principal Research Scientist, Div. of Biological Science & Engineering, Korea Advanced Inst. of Science and Technology, Seoul, South Korea.

7037. Product Name: Vegetarian Wheat Cutlets (Seitan) [Garlic, Ginger, or Plain]. Renamed Wheatlets.

Manufacturer's Name: Sooke Soy Foods Ltd.

Manufacturer's Address: 2625 Otter Pt. Rd., R.R. 2, Sooke, BC, Canada V0S 1N0. Phone: 604-642-3263.

Date of Introduction: 1987. September.

Ingredients: Ginger: Gluten from organic wheat, water, shoyu (soybeans, wheat, salt), herbs and spices, kombu sea vegetables.

Wt/Vol., Packaging, Price: 225 gm (7.9 oz).

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Calories 124, protein 15 gm, carbohydrates 6 gm, fat 1 gm.

New Product–Documentation: Leviton. 1982. In a Small Bright Building. Talk with and letter from Wayne Fatt. 1988. Sept. 28-29. The business was started in 1980 in a small building in Sooke, a community on the outskirts of Victoria. It has since relocated twice. In May 1988 Wayne Fatt purchased the company from Wayne Jolley, and in July 1988 moved from 2625 Otter Point Rd., R.R. 2, Sooke, BC, V0S 1N0 to a much larger facility at 4247 Dieppe, in Victoria. The company name is unchanged. They now make Wheatlets (seitan, formerly called Vegetarian Wheat Cutlets, launched in Sept. 1987), available in garlic, ginger, or plain flavors.

Label for Wheat Cutlets sent by Wayne Fatt. 1988.

Sept. 6 by 4 inches. Self adhesive. Dark brown and white on orange-yellow. The product is now named "Grainwave Vegetarian Wheat Cutlets," made by Grainwave, Sooke, B.C. V0S 1N0.

7038. Product Name: [Tofu Ravioli, Tofu Tortellini].

Foreign Name: Tofu–Ravioli, Tofu–Tortellini.

Manufacturer's Name: Tofuhaus Tiefenthal.

Manufacturer's Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.

Date of Introduction: 1987. September.

Ingredients: Tortellini: Dough: Whole wheat grits, water,

sea salt. Filling: Smoked tofu, tofu, bread crumbs, walnuts, roasted onions, shoyu, sea salt, and aromatic herbs (basil, Tapenade, parsley, etc.).

Wt/Vol., Packaging, Price: 250 gm vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Leaflet. 1988. "These two products are made using our tofu by the firm G. D'Angelo GmbH in Saarlouis." Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in Sept. 1987.

7039. Gatins, Joseph. 1987. Varina brewing plant typifies foreign firm sought by Baliles [San-J tamari]. *Times-Dispatch (Richmond, Virginia)*. Oct. 5. p. 1, 13.

• **Summary:** The 40,000 square foot soy sauce brewing plant, located on a 9 acre property in the Eastgate Industrial Park in Varina, is run by San-J International, the U.S. subsidiary of 183-year-old San-Jirushi Corp. located near Nagoya, Japan. When the company was founded in 1804, the Shogun still governed Japan and Thomas Jefferson was President of the United States. Nobuyoshi Sato, Chairman of the Board, and Takayoshi Sato, Senior Vice President, are 7th generation heirs of the founding family.

The sauce is fermented in 10,000 gallon tanks for 6-12 months under strict temperature and humidity controls. The company uses Virginia soybeans and meal from the Midwest. The current strength of the yen against the dollar played a big role in the decision to invest in a U.S. plant according to John D. McLaughlin, the retired Army general who is president of San-J, and Takayoshi Sato, the company's senior vice president. The plant will run at peak capacity with only 20 employees. Top management will be American. A photo shows John McLaughlin and Takayoshi Sato with product.

7040. East West Journal. comp. 1987. Shopper's guide to natural foods. Garden City Park, New York: Avery Publishing Group. x + 204 p. Illust. Index. 28 cm. [66* ref]

• **Summary:** The book from the editors of the *East West Journal* is mainly a series of articles published in *East West Journal* or special articles by individual authors. Contents: 1. Introduction to natural foods. 2. Grains. 3. Breads, pastas & seitan. 4. Vegetables. 5. Sea vegetables. 6. Labeling and standards. 7. Fruits. 8. Seeds & nuts. 9. Beans (incl. tofu, tempeh, miso, azuki). 10. Beverages. 11. Condiments (incl. tamari, shoyu, vinegar, salt, umeboshi). 12. Cooking ingredients. 13. Pressure cookers. Address: New York; Massachusetts.

7041. *East West*. 1987. Natural Foods: The best and worst. 2nd annual awards. Oct. p. 32-36.

• **Summary:** Only packaged natural foods with nationwide distribution are judged. Best soymilk: Edensoy, but the Tetra Brik package doesn't biodegrade, burn, or recycle. Best sandwich spread: Nasoyanaise by Nasoya Foods. Worst shoyu: Natural shoyu from Erewhon. So heavy it is best

dispensed with an eye dropper. Best Tamari: San-J. Worst line of fake meat products: Worthington Foods. Worst beans: Honey Baked Style Vegetarian Beans with Miso from Health Valley. Best Miso: Miso Master Mellow White Miso by American Miso Co. for Great Eastern Sun.

7042. Product Name: Fred Marken's Private Reserve Soy Sauce.

Manufacturer's Name: Fred Marken Inc. (Importer-Bottler). Made in China.

Manufacturer's Address: 1428 Yosemite Ave., San Francisco, CA 94124. Phone: 415-822-4675.

Date of Introduction: 1987. October.

Ingredients: Water, wheat, soybeans, salt, 1/10 of 1% sodium benzoate, 1/10 of 1% xanthan gum, 1/10 of 1% potassium sorbate.

Wt/Vol., Packaging, Price: 12 fluid oz bottle with tamper-proof screw-on cap.

How Stored: Shelf stable.

Nutrition: Sodium: 90 mg per ½ teaspoon."

New Product–Documentation: Talk with Fred Marken. 1990. Oct. 29. This product was introduced in about Oct. 1987. He now buys soy sauce in bulk from China (PRC) and bottles it himself. He is thinking of building a "soy" plant in America. He recently hired a marketing man from Del Monte and sales are growing rapidly. Label sent by Fred Marken. 1990. Nov. 5. 5 by 4 inches. Self adhesive. Black, red, green, and blue on speckled gray. A color illustration of Mr. Marken is at the top center of the bottle, above which is written "He's not as good looking as Paul but his sauce is great!" "Naturally aged. Reduced sodium." Recipe for Fred's Minestrone Soup. Drawing of an American flag on one side. As of Nov. 1990, this sauce comes with three other Marken sauces in a gift box titled "Fred Marken Sauce and Marinades. Turns plain food into fancy fare. No M.S.G. Low salt." Each bottle has a tamper-evident shrink neck band over the cap/closure.

7043. Product Name: Fred Marken's Sweet & Sour Sauce.

Manufacturer's Name: Fred Marken Inc.

Manufacturer's Address: 1428 Yosemite Ave., San Francisco, CA 94124. Phone: 415-822-4675.

Date of Introduction: 1987. October.

Ingredients: Pineapple, unsulphured molasses, vinegar, soy (water, wheat, soybeans, salt), tomato paste, high fructose corn syrup, fresh garlic and ginger, sodium benzoate 1/10 of 1% (found naturally in cranberries), 1/10 of 1% potassium sorbate, xanthan gum.

Wt/Vol., Packaging, Price: Bottle.

How Stored: Shelf stable.

New Product–Documentation: Talk with Fred Marken. 1990. Oct. 29. This product was introduced in about Oct. 1987. Label sent by Fred Marken. 1990. Nov. 5. 5 by 4 inches. Self adhesive. Green, yellow, black, and blue on

speckled tan. A color illustration of Mr. Marken is at the top center of the bottle, above which is written "He's not as good looking as Paul but his sauce is great!" "Original recipe. All natural." Recipe for Fred's Sweet 'n' Sour Meat Balls. Drawing of an American flag on one side and an aerial map-like view of the Hawaiian Islands across the bottom.

7044. Golbitz, Peter. 1987. Soya interview: Gordon Bennett, Westbrae Natural Foods: Soyfoods past, present and future. *Soya Newsletter (Bar Harbor, Maine)*. Sept/Oct. p. 3, 10-11.

• Summary: Founded in 1970, Westbrae was built on the premise that healthy food makes a healthy planet. Bennett has been president since 1975. The company now has over 200 products. Soyfoods account for about 35% of sales, down from 50% 1-2 years ago. The company is reducing imports, focusing on American-made foods, and importing Westsoy soymilk from Southeast Asia [actually Vitasoy in Hong Kong] rather than Japan, including a new liter size. Address: Bar Harbor, Maine.

7045. Kingma, Sharyn. 1987. San-J International opens first U.S. tamari brewery. *Soya Newsletter (Bar Harbor, Maine)*. Sept/Oct. p. 9. See also Natural Foods Merchandiser. 1988. Jan. p. 3.

• Summary: On September 24 San-J opened the doors to its new \$10 million tamari brewery in Richmond, Virginia. The 40,000 square foot plant, which has a capacity of 1 million gallons a year, is the first to produce tamari outside of Japan. The plant will produce San-J Tamari, Tamari Lite, Shoyu, and Teriyaki and Szechuan Sauces. San-J tamari was first imported and introduced to the U.S. market in 1979. The plant will employ 20 people. Perelman notes that the U.S. soy sauce market is the second largest in the world (after Japan) having expanded at 24% a year between 1974 and 1984. Manufacturer sales are estimated at \$85 million in 1984 and \$91 million in 1985, estimated to grow to \$220 million by 1994. With current sales of nearly \$100 million, soy sauce is the largest category of soyfoods in the U.S. While Kikkoman has 44% of the U.S. soy sauce market, San-J maintains 75% of the industrial market.

7046. Product Name: New Tofu Link Specials (Meatless Hot Dogs with Soy Cheese).

Manufacturer's Name: Light Foods Inc.

Manufacturer's Address: St. Louis, MO 63303.

Date of Introduction: 1987. October.

Ingredients: Water, real Tofu, isolated soy protein, non-hydrogenated vegetable oil, cheddar style soy cheese (fresh soy milk, soy oil, calcium caseinate, fresh tofu, natural flavor, salt, lecithin. citric acid, guar gum, annatto (natural color)), rice syrup, natural spices, salt, beet powder, tamari (natural soy sauce), barley flour, locust bean gum, natural flavors, onion powder, garlic powder, natural spice oils.

New Product–Documentation: Poster. 1986. Sept. "Tofu

'n Cheese Links. Made with Real Tofu and cholesterol free soy cheese. No cholesterol, no MSG, no sugar, no meat." Poster. 1987, undated. "Higher Still... With natural imitation soy cheddar cheese." Talk with Bob Davis. 1988. March 26. These feature soy cheese, sort of like Oscar Meyer's meat counterpart. Talk with Lauraine Davis. 1988. Aug. 28. These are made with Richard Rose's soy cheese. Leaflet. 1988. April. 8½ by 11 inches. Black on light blue. "On the rise... Now you want a link with no animal ingredients, non-hydrogenated oil, less fat, maybe a rice syrup sweetener instead of honey, and an even better flavor. Introducing the New Tofu Light Links, and New Tofu Light Link Specials, with natural imitation soy cheddar cheese." Leaflet. 1988. April. 8½ by 11 inches. Blue and red on beige. "Higher still..." Gives ingredients for New Tofu Light Links, and New Tofu Light Link Specials.

7047. Murrieta Foundation. 1987. Murrieta Hot Springs vegetarian cookbook. Revised and expanded including Spa Cuisine. Summertown, Tennessee: The Book Publishing Co. 232 p. Color plates. Index. 23 cm.

• **Summary:** This is a vegetarian (but not a vegan) cookbook. The index contains listings for 26 tofu recipes, 5 miso recipes, and 2 tamari recipes. There are definitions of "liquid aminos" (HVP), miso, tamari, tempeh, and tofu. Many of the recipes are favorites from the Oasis Restaurant at the Hot Springs, where the three basic lacto-ovo vegetarian diets (as taught by Dr. Randolph Stone, 1890-1982, founder of Polarity Therapy) are The Purifying Diet, The Health Building Diet, and the Gourmet Vegetarian Diet. Address: Murrieta Hot Springs, California.

7048. *Prevention (Emmaus, Pennsylvania)*. 1987. Amaranth: The color of soy sauce. 39(10):53-54. Oct.

• **Summary:** "Scientists in China have come up with a new use for amaranth: as a natural coloring in soy sauce. Amaranth is a high-nutrition originally grown by the Aztecs. It requires less moisture than corn and wheat." Chinese scientists mixed dark-seeded amaranth with soybeans to produce a naturally dark-colored soy sauce. 7049. Shenoy, N.R.; Choughuley, A.S.U. 1987. Nitrosamines in some Indian brands of soya sauce samples treated with nitrite. *J. of Food Science and Technology (Mysore, India)* 24(5):214-16. Sept/Oct. [11 ref]

• **Summary:** Nitrite treatment of soy sauce led to the formation of at least 3 known carcinogenic nitrosamines, namely nitrosodimethylamine (NDMA), nitrosodiethylamine (NDEA) and nitrosopyrrolidine (NPY). However certain antioxidants contained in soy sauce containing meal may offer protection against nitrosamines in the diet containing soy sauce. Address: Bio-organic Div., Bhabha Atomic

Research Centre, Trombay, Bombay-400 085, India.

7050. Shurtleff, William. 1987. History of White Wave, Inc. Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** A detailed history of this pioneering, very creative, and rapidly growing company. Contains production and sales statistics at each major phase of growth. Early days: White Wave was founded and started making tofu in September 1977 by Steve Demos in Boulder, Colorado.

Born on 24 April 1949 in Philadelphia, Pennsylvania, Demos attended Bowling Green State University in Bowling Green, Ohio, majoring in political science and philosophy and graduating in the fall of 1970. He was introduced to tofu in the summer of 1970, when he was traveling in a van in northern California with a friend, who bought some at an Oriental food store. Demos found it to be a good source of protein, and liked the flavor.

Right after graduation Demos took two trips to India. During the first in 1971, with Pat Calhoun, he became a vegetarian after witnessing the meat bazaar in Afghanistan. In early 1972 he took a longer trip to India, again with Pat Calhoun. It included 10-day Buddhist meditation course with a teacher from Burma, Goenka, who became his spiritual teacher. He also lived for 1-3 months in a cave near Rishikesh (in the foothills of the Himalayas in northern India), doing Hatha Yoga and meditation. There were monkeys in the forest trees, tame peacocks, a stream 10 yards in front of the cave that dropped into a bathing pool, and many sadhus (Indian holy men) practicing in other caves nearby. Then in 1974 he started a health food store [named Touch the Earth] in La Haska, Pennsylvania, where he grew acquainted with many new foods such as miso, sea vegetables, and *gomashio* (sesame salt). After 9 months he sold the store and returned to India again. He was now actively involved in meditation.

After that trip, Demos started living on the East Coast in New Hampshire. By 1974 he began buying tofu in Boston, Massachusetts, then made it a few times in the kitchen and used it in cooking for a yoga studies group, which had purchased a farm. He was in charge of food and he had learned how to make tofu from the *Ten Talents* cookbook. In March 1976, after a trip to India, he was in Santa Barbara, California, at a 76-day meditation retreat with teacher Robert Hover. He made tofu, starting at 4:00 each morning in a commercial kitchen, for 100-150 people, using *The Book of Tofu*. During this retreat Demos conceived of and developed the idea of starting a tofu company, including the name and logo. Three months later he found himself, a hippie with long hair, in Boulder, Colorado. He had an idea but no capital, and was living on food stamps. By good fortune he met a man named Anton Rogers (a talented architect and builder), who loaned him \$2,000 startup capital, after having known

him less than a month. So in the summer of 1977 Steve began buying equipment for making tofu. His new company was not yet officially established or registered—though he probably opened a checking account at a local bank.

Demos started making tofu at White Wave on 27 September 1977. “At 11:30 a.m. I sold my first block. I’m staring at the astrological chart which sits next to my desk. That was when I translated the effort to a dollar.” The company began as a sole proprietorship, located in very small (300 square foot) rented quarters at 1738 Pearl Street in Boulder, Colorado. The front one-third of the shop was used for a retail deli and the back two-thirds for food production. From day one, the tofu was made from organically-grown soybeans. Each 14-ounce block of tofu was sold, floating in water, in Chinese food take-out cartons. For details on White Wave’s early use of organically grown soybeans, see SoyaScan interview with Steve Demos (Aug. 1998). The first batch of tofu was used to feed the participants in a ten-day meditation retreat in Boulder.

One direct competitor was the Spinning Kitchen, which had started 9 months earlier, in about January 1977. They had the Boulder market locked up when White Wave started.

White Wave had three products from the opening day: Nigari Tofu, Black Walnut Mushroom tofu, and Lemon Herb tofu. The latter two innovative flavored tofus were made by mixing the natural flavorings into curds at a specific point before pressing. Shortly White Wave expanded into making sandwiches, which led to salads, drinks, pies, cakes, and muffins. One of the first stores in Boulder to sell Steve’s tofu was Green Mountain Grainery, owned and run by Bruce Macdonald. Pat Calhoun (formerly Demo’s wife), arrived in December from the Pacific Coast Bakery in California, bringing all their recipes. Recipes for baked goods (such as cinnamon rolls and cookies) were adapted.

By early 1978 soymilk (plain, honey-sweetened, or carob-maple) was introduced, sold out of a jet spray juice cooler or in quarts, and also used to make Coconut Cream Pie and Tofu-Agar Pies filled with various fruits (apples or whole strawberries, peaches, or blueberries). At about the same time the okara from the tofu started to be used to make one of America’s earliest brands of Soysage. This spicy Vegetarian Soysage (shaped like a sausage) was distributed with the tofu. Before long White Wave was making a host of delicious and innovative tofu deli products which were sold only at the Pearl Street deli. These included Macro Pizza with Tofu, Mexican Entrees, Okara Granola, and Tofu Dogs and Sauerkraut (very firm tofu cut into long rectangles and marinated broth). Soy Sannies (Miso-tahini Sandwiches) were also sold at nearby health food stores.

To help attract customers, the deli also sold an assortment of then largely unknown food products: 10-15 varieties of Japanese and American miso, many sea vegetables, shoyu, kudzu, umeboshi plums, and the like, many of the same products Demos had sold 4 years earlier at

his health food store in Pennsylvania. Most of these were of great interest to macrobiotic devotees, though Steve had little personal interest in that subject.

Tofu was quickly recognized as a tremendously versatile, all-American ingredient. Now new people started coming into the company. Some were cooks and they helped to develop new products. In 1978 White Wave began to distribute a number of its most popular deli-type products to other retailers. These were among America’s earliest commercial second generation tofu products: Missing Egg Salad (America’s first, named by Trudy Stuart), Tofuna Salad (Vegetarian Tuna Salad), and Tofu Turnovers (with spinach and feta cheese filling). Other innovative second generation products sold or used only at the Pearl Street deli included Tofu Treats or Creamies (in banana-coconut, peanut-carob, or carob mint flavors), Miso Salad Dressings (hearty or mellow), and Tofu Mayo (eggless mayonnaise used in the Missing Egg Salad). Address: Lafayette, California.

7051. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part II). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** Continued: At the same time White Wave started making nut and seed products in the same little shop, starting with gomashio (sesame salt), tamari-coated sunflower seeds and almonds, and nut butters.

Just a year after opening, White Wave was forced to expand out of the tiny Pearl Street shop by the demand for its deli products from outside retailers, such as Arati and other natural food stores in Boulder. Demos recalls:

“We acted with very little foresight. It was more like ‘What do you want to do today? Let’s make something new.’ Finally we couldn’t get out the front door. We had to step over the top of buckets of tofu, presses, and boxes used to deliver our little Chinese fish cartons of tofu, stacked up so high we couldn’t see out the window. It was chaotic. We were making money and business was booming, but we were only paying ourselves \$1.42 an hour.”

On 28-30 July 1978 a meeting of tofu manufacturers from across the USA was held in Ann Arbor, Michigan. The meeting was organized by Steve Fiering, Jerry MacKinnon (plus coworkers at The Soy Plant) and Bill Shurtleff, and hosted by The Soy Plant. Steve attended this historic meeting, and ended up rooming with Tom Timmins, head of the New England Soy Dairy. “I thought I was rooming with one of the idols of the industry. Just by virtue of association, I was going to do well.” At this meeting the Soycrafters Association of North America (SANA) was established, with Larry Needleman as executive director of the new trade association. Steve was elected to be one of six members of SANA’s steering committee. Various photos of the meeting show Steve, with long hair and mustache, leading and participating in the discussions. A yellow lined sheet titled

“Tofu Sales” was circulated to all attendees; Steve wrote that White Wave was making medium-firm bulk and packaged tofu, which wholesaled for \$0.65 and \$0.74 per pound, f.o.b. plant. Several days after the Ann Arbor meeting, William Shurtleff and Wataru Takai visited Demos, and saw how he made tofu at his tiny shop on Pearl St. in Boulder. They sampled and enjoyed the various creative offerings in the deli, and Shurtleff took home a label from each product.

At Walnut Street: In September 1978, after just a year at Pearl Street, the tofu company had long since outgrown its minuscule ‘back room’ space. So manufacturing operations were moved to a 3,000 square feet converted warehouse at 3869 Walnut Street. It felt like they had moved into a castle, with ten times as much space. Now there was great pressure to expand the business to use up the extra space. The company began to make new products (such as tempeh, ice cream, and new deli foods) and look for new markets.

The deli remained at Pearl Street, and was given a new name, The Cow of China (a term from *The Book of Tofu*). The name “White Wave” was reserved for the tofu manufacturing company. But there was only one set of books, under White Wave. The company now changed to a partnership, with seven equal partners, all active. Demos was president and Pat Calhoun did the bookkeeping, and only these two were interested in meditation.

Right after the move, to announce The Cow of China as a retail outlet and its vegetarian deli products, Demos did his first real advertising, using three charming posters. The first read: “White Wave Through the Cow of China Offers Food from The Kingdom of Plants. We make it all here in Boulder. 100% Dairyless.” It then listed 14 soyfoods plus some non-soy desserts, almond-, cashew-, and peanut butters, and tahini. A second poster showed a soybean, with head, tail, and legs like a cow and dotted lines to delineate the choice butcher cuts. But instead of rump roasts and flank steaks were Soysage, Miso Dressings and the like. A third showed Jack, standing under a giant beanstalk, about to trade in his cow for the magical beans at which he is gazing in wonder. The caption: “We’ve got an alternative. White Wave Soy Dairy.” The latter two posters were used as catalog advertisements with a growing number of natural food distributors.

The tofu plant now consisted of an open kettle, VCM grinder, and hand press for the curds on the end of a swinging levered bar. White Wave started to deliver product to some Denver health food stores and in late 1978, not long after the move to Walnut Street, they landed their first supermarket chain, King Soopers supermarket chains, which began to order 100 cases. As business expanded, so did the need to improve packaging and marketing, and to control costs.

New packaging: White Wave couldn’t get its tofu into supermarkets unless it was sold in water-packed film-sealed plastic tubs (trays); the Chinese carry-out food/fish cartons

were not acceptable. So Demos bought a little hand-packing machine that allowed one person to pack one block of tofu at a time in water in a plastic tray, then seal the tray with a film lid. Steve remembers first using this machine at the Walnut St. plant. Initially, he would seal the tofu tray with clear, unprinted film, then run one of their oval labels (the one with a hint of green color in it, used previously on the Chinese cartons) through a gluing machine (which was less expensive than buying pre-glued labels), and slap the label on the clear plastic film. This was White Wave’s “first true commercial mass market package.” The new marketable package led to many new accounts. After King Soopers the company got into the City Markets chain, then about a year later into Safeway, followed by a host of other chains in outlying areas. As business expanded, White Wave could afford pre-printed film labels for its tofu in plastic trays. The label design, though rectangular, was basically the same as the old oval. The ingredients new read: “High protein soybean cake contains: Soybeans grown without the use of herbicides or pesticides, filtered water, and nigari (salt bitterns). No more no less!” Soon a variety of textures were available: Extra firm press, firm organic, extra firm, and sift.

New sources of soybeans: White Wave had made its tofu from organic soybeans from day one. When the company first moved into Walnut Street, they were still buying these soybeans from Green Mountain Grainery in Boulder. But in the fall of 1978 Steve drove to a meeting of the Organic Growers Association in Iowa. He spoke about the demand for organic soybeans and met Marvin Kurpkeweight, who was already growing soybeans organically in eastern Nebraska. Steve visited Marvin’s farm and contracted with him to buy organic soybeans direct from the farmer. Address: Lafayette, California.

7052. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part III). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** Continued: White Wave’s tofu production was growing nicely. It rose from 120,000 lb. in 1978 (2,308 lb/week), to 179,000 lb. in 1979 (3,442 lb/week, up 49%), to 279,000 lb. in 1980 (5,365 lb/week, up 56% over 1979).

In February 1979 a major new product line was started: tempeh. Chip McIntosh was the first tempeh maker, followed by Chris O’Riley. An old kitchen refrigerator, warmed by light bulbs, was used as the incubator. The first two products were Soy Tempeh and Soya Rice Tempeh, the latter being America’s first multi-ingredient, soy-and-grain tempeh.

At about the same time, a third new product was launched: Polar Bean. It was a soymilk based non-dairy frozen dessert, made in a soft serve machine but sold in hard-pack pints. The first flavor was Banana-carob. Later strawberry, chocolate, carob mint, and orange flavors were added. In about 1984 a soft serve version called Polar Softie

was introduced but did not prove successful.

Also in 1979 Richard Leviton visited White wave and the Cow of China, and did an in-depth study of their operations and products, published in the 1979 issue of *Soycraft* magazine. Soyfoods sold both at “The Cow” and for wholesale distribution to other retailers included: Organic Nigari Tofu, Soymilk (Honey-Vanilla or Carob-Maple), Soysage, Tempeh, Missing Egg Salad, Tofu Mayo, Baked Savory Tofu Cutlets, Sweet Bean Tofu Pie, Miso Salad Dressings (Mellow or Hearty), and Tofu Treats or Creamies (Banana-Coconut, Peanut Carob, or Carob-Mint; squares of creamy baked tofu blend on a healthful oats-coconut-flour crust).

Other ready-to-eat items sold only at “The Cow” included Soysage Pate, “Macro” Pizza (with tofu), Tofu Spinach Dill Turnovers, Tofu Cinnamon Rolls, Hot Tofu Meatballs and Meatball Sandwiches, Sloppy Joe Sandwich (made with TVP), Tofu Cream Cheese & Black Olive Sandwich, Tofuna Sandwich (like tunafish), Strawberry Tofu Pie, Soy Sesame Bars, and Tofu Butternut Squash Pie. In mid-1979 bulk recipes for about ten of these products were published, with permission, in *Tofu & Soymilk Production* by Shurtleff and Aoyagi.

Leviton noted: “The Cow of China is surely one of the nation’s most ambitious and energetic soyfoods companies.” It was just about breaking even with weekly gross retail sales of \$1,000, three-fourths of which came from soyfoods. Concerning the growth of the still totally unmechanized little company Demos, now the self-styled “beneficent dictator,” always frank and candid, added:

“It was a hell of a struggle, especially for an undercapitalized small business. But I certainly wouldn’t discourage anybody because we started with nothing, and we’ve been going since then, and we’ve been able to make it all meet. We’ve just rigged, we’ve improvised, we’ve done everything imaginable, as I’m sure many other people in this industry have. We cut our salaries back, we did without a lot, but its own momentum kicked in. I suppose we consider ourselves alchemists in turning sweat into money. So, let me express my gratitude to everybody and everything, seen and unseen, who have helped us pull this together.”

In August 1979 Gary and Chandri Barat arrived in Boulder and spent several days studying the Cow of China. They had met Demos at the Second Annual Soyfoods Conference in Amherst, Massachusetts (July 26-29, 1979). They were driving around the country, studying tofu and developing a business plan in preparation for starting a soyfoods company, which later became Nature’s Inn, then Legume. As they studied The Cow of China and Demos invited them for dinner several times. He and his wife, Ginny, served a tofu spinach feta pie and mushroom caps stuffed with tofu. Later Barat told Demos more than once how much this visit has influenced him in starting a company based on tofu entrees. The lineage of Legume’s early

products (Tofu Cream Pies, Tofu Spinach Pies) can be traced back to The Cow of China.

Barat encouraged White Wave to do a feasibility study on converting The Cow of China into a fast food restaurant named The Family Diner and moving into a vacated A & W root beer stand three blocks from The Cow in a very attractive location. The study was done, a potential menu was developed, but financial backing did not come through.

A White Wave catalog published in December 1979 included several new products: Doufu (extra firm Chinese style tofu), Savory Baked Tofu, and Tamarind Nuts and Seeds (Almonds, Cashews, Spanish Peanuts, Sunflower Seeds, Nut Mix).

The Cow of China deli was doing well. By February 1980 sales were \$1,700 to \$2,000 a week and there were often lines out the door. By the summer of 1980, according to *Soyfoods* magazine, the Cow of China had been renamed the Good Belly Deli, with the slogan “Real Food, Real Fast” and White Wave was producing 7,500 pounds of tofu and tofu products a week. The new deli, an expanded and Americanized version of “The Cow,” continued to serve as an excellent showcase for the White Wave’s innovative ready-to-eat soyfood products. Working with a friend who was an advertising agent, Demos had dropped the line of assorted health foods (miso, sea vegetables, etc.), expanded the deli items, and installed a stand-up counter bar to eat at and a few tables and chairs. Formerly it had been all takeout. Hot and cold fast food was served. The deli attracted lots of business (there was still usually a line out the door), the products were very innovative and they were praised by the natural foods community in Boulder. Address: Lafayette, California.

7053. Shurtleff, William. 1987. History of White Wave, Inc. (Continued—Document part V). Lafayette, California: Soyfoods Center. 11 p. Oct. Unpublished manuscript, based on interviews with Steve Demos from June 3 to Oct.

• **Summary:** Continued: First, he laid off all managers (who were not producing day-to-day results). Future plans were put on hold.

In October 1984 Jason Bois, who had been around the health food business for many years, approached White Wave to discuss having White Wave make him a soft serve soy ice cream. Demos advised against soft serve, but when Bois persisted, Demos developed a new soft serve formula for him, containing tofu and spray dried soymilk. Launched in January 1985 and marketed under the name Tofruzen, they failed within four months, for lack of a market. Bois quickly returned to Demos and beseeched him to develop Tofruzen in hard pack pints so that Bois could use these products to raise equity capital in a public stock offering. Demos had all the hard-pack formulas for Tofruzen developed in 30 days, using an improved version of his Polar Bean as the base mix but with totally new flavors (chocolate, strawberry,

vanilla-almond). After Tofruzen launched the new products mid-1985, they realized that they didn't really own anything. So Demos, with some unexpected luck and seeing a way to bring in new cash quickly, proposed Tofruzen buy the title to the formulas for \$25,000 cash, plus \$25,000 in 6 months, plus interest. And White Wave would have an extensive supply contract. Tofruzen agreed.

In December 1985 Tofruzen, Inc. raised \$1.6 million net in a public stock offering, and at that time paid White Wave its first cash. Tofruzen Bars followed in May 1987 and low-calorie Tofruzen Light in August. Once Demos saw that Tofruzen would be a successful product, he downplayed marketing of his Polar Bean. Tofruzen sales rose from \$91,000 in fiscal 1986 to \$158,000 in 1987.

Shortly after Karplus left, White Wave started selling its tofu in a colorful box. Karplus served as an agent to negotiate with advertisers and designers. The new package helped sales.

In mid-1985, to consolidate its business focus and bring in more cash, Demos sold White Wave's nut butter business to an employee for \$35,000. White Wave retained 5% interest in the company, which is now called Naturally Nuts.

To turn the tide of loosing money and get some badly needed breathing space, Pat Calhoun came up with a plan where she and Demos would call all the creditors and say, "Either we file bankruptcy or you allow us to pay off our debts to you over a one year period." All creditors agreed to this plan.

In July 1985, the moment of truth, the turning point, arrived. The company was \$100,000 overextended (60 days behind in payments) and could not borrow money. Everyone was disheartened. Demos and Calhoun started regular sitting meditation again, recommitting himself to spiritual practice as central and profitability as essential. He recalls, "Once I got my priorities straight, things started to go well." Within 90 days White Wave had started to generate a positive cash flow. By mid-1986 the \$100,000 debt had been paid off, and White Wave was once again accumulating cash and savings.

Headed with the feeling that he could save a struggling small company, transforming it into a winner, Demos decided to try his approach on another company, Soyfoods Unlimited, a major tempeh manufacturer, which he had been offered an opportunity to buy. Having started tempeh production in February 1981 in San Leandro, California, and grown to be America's third largest tempeh manufacturer by 1984, Soyfoods Unlimited was now heavily in debt. White Wave didn't have any extra money, but the offer made sense as a way to get distribution for White Wave products in California and the West Coast, and to increase production volume. So on 1 December 1986 White Wave made its first acquisition. The buyout took place over a period of time, with some cash down. By mid-1987 Soyfoods Unlimited had been turned around and was a profitable, wholly owned subsidiary. White Wave owned all the stock and had signed

a supply agreement with Soyfoods Unlimited to supply them with everything. This acquisition, with all tempeh production for both brands done at White Wave in Boulder, helped boost weekly output to 17,000 lbs. a week by the fall of 1987, making White Wave the biggest tempeh manufacturer in the USA. Growth of tempeh was strong and its future looked very promising.

White Wave has long been one of America's most innovative tempeh companies, in part because of its faith in the potential and future of tempeh. Tempeh continued to be the company's most profitable product. During 1985-88 the tempeh line was expanded with a number of original and delicious varieties: Quinoa (6/85), Lemon Broil (10/86), Amaranth and Sea Veggie (both 3/87), Peanut Sesame (3/88), and Teriyaki Burger (8/88). These also gave his product line more shelf space, a key consideration.

At King Soopers and Safeway, White Wave now had three shelves with tofu and tempeh right in the middle of the dairy section.

Tofu production was also strong, averaging 15,000 lbs. a week in mid-1987. A future high priority was the plan to pasteurize their tofu to give longer shelf life. After several years of selling tofu vacuum packed in a box, White Wave introduced a water pack without the box for the Asian-American market and some Caucasians since they are not used to the vacuum pack, and they prefer softer tofu, which cannot be vacuum packed.

By mid-1987 White Wave was back into high gear and growing nicely. Their space grew from 6,000 to 20,000 square feet. White Wave was one of the few Caucasian-run soyfoods companies that has been able to grow without selling most of the company. Demos' family has supported him to a large degree. He had borrowed roughly \$25,000 from friends and family. The company still owed one-third on its SBA and Mountain High loans, and some to family. Assets were now about \$300,000 and liabilities are \$200,000. Since May 1987 White Wave had money in the bank and a growth rate above 30%. The 1987 sales projection was \$2 million, of which 8-14% was expected to be profit.

In December, projected revenues for 1988 were \$3 million. The company was in the midst of a private placement offering for \$500,000 and the banks had approved equipment loans for \$600,000. They have put in a bid to purchase an old (built in 1978) meat processing house on 2.4 acres in Boulder.

The Future: New products to be launched in 1989 include several meat analogs (tofu hot dogs/franks, due in March, aimed at the mainstream market concerned with cholesterol) and a soy yogurt.

Demos has set a number of goals for White Wave. First, to become the major primary soyfoods ingredient manufacturer in the region, and to maintain a profit margin of at least 10%.

Second, to make the concept of a clearly delineated and

identified “Soyfoods Section” in the dairy case, succeed at King Soopers and Safeway. Set off with plastic dividers between yogurt and milk products, the section would be filled out with second generation soy products. This new concept would allow him to compete with larger tofu manufacturers (such as Azumaya and Hinode) who are lower priced but sold in the produce section. Address: Lafayette, California.

• **Summary:** A new breeding process for *Aspergillus sojae* involving protoplast fusion was undertaken to obtain desirable koji moulds with better enzyme productivity for soy sauce production. A pair of double marker mutants derived from genealogically unrelated *A. sojae* cultures were fused. Ultraviolet treated and stable heterozygous diploids were obtained. Address: Soy Sauce Research Lab., Kikkoman Corp., Noda 278, Japan.

7056. **Product Name:** [Sour Marinated Deep-Fried Tofu].

Foreign Name: Essig Age.

Manufacturer's Name: Yamato Tofuhaus Sojaprodukte GmbH.

Manufacturer's Address: Rittweg 11/1, D-7400 Tuebingen-Hirschau, West Germany. Phone: 7071-71094.

Date of Introduction: 1987. October.

Ingredients: Incl. deep-fried tofu pouch, vinegar, soy sauce, spices.

New Product–Documentation: Talk with Klaus Gaiser, President of Yamato. 1990. March 12 and May 8. This product was introduced in about 1987. “Age” is written Japanese style with no acute accent over the e. It was marinated in vinegar, soy sauce, and spices. This product was one of the first 2 products introduced after the move to Hirschau, along with Hirschauer Laible.

7057. **Product Name:** [Fried Tofu Marinated in Soy Sauce and Spices].

Foreign Name: Hirschauer Laible.

Manufacturer's Name: Yamato Tofuhaus Sojaprodukte

GmbH.

Manufacturer's Address: Rittweg 11/1, D-7400

Tuebingen-Hirschau, West Germany. Phone: 7071-71094.

Date of Introduction: 1987. October.

New Product–Documentation: Talk with Klaus Gaiser, President of Yamato. 1990. March 12 and May 8. This product was introduced in about autumn 1987. The tofu was first marinated in soy sauce and spices, and then deep-fried.

7058. *Toyo Shinpo (Soyfoods News)*. 1987. Shōyu no teien-ka junchō. Kadai wa fūmi no sonshitsu kaizen [The change over to lower salt shoyu is going smoothly. The task is to keep it from losing its flavor]. Nov. 11. p. 13. [Jap; eng+]

• **Summary:** In 1984, 1,200,000 kl (kiloliters) of shoyu were produced (0.5% more than in 1983). But in the past 5 years, shoyu production has averaged between 1,180,000 kl and 1,200,000 kl, meaning that production has stabilized. Low salt shoyu (called variously usujio, amajio, or asajio) has 5-8% lower salt content than regular shoyu (about 17%). The production of low salt shoyu in Japan over the last 5 years was as follows: 1980, 4,000 kl; 1981, 11,000 kl; 1982, 14,000 kl; 1983, 15,000 kl; 1984, 17,000 kl. Comparing the 1984 amount per capita with the 1980 one, one finds that shoyu consumption has decreased by 8% (although in 1984, the figure increased 2.4% from 1983). Also, the percentage of the family expenses for seasonings (chomiryo) spent on shoyu decreased from 11.1% in 1980 to 9.5% in 1984.

A comparison study revealed that in 1975 the average salt content of shoyu in Japan was 17.6%. This decreased to 17.1% in 1979 and to 16.6% in 1984. The same study showed that shoyu containing 16% salt held 10% of the market in 1975, increasing its hold to 23% in 1979, and rose to 31% in 1984. Shoyu with 17% salt had 28% of the market in 1975, 35% in 1979, and 34% in 1984. High-salt shoyu (18%) had 41% of the market in 1975 but fell to 26% in 1979, and to 14% in 1984. The reasons for this trend include health concerns and the fact that the Japanese people are eating a lot of instant or prepared foods, meaning that they are eating less home cooked foods and therefore are using less shoyu.

Sales have changed from regular shoyu used in home cooking to the second generation shoyu products like tsuyu & tare. It is a difficult task to make low-salt shoyu without having the shoyu lose its flavor. If the flavor is lost, people will use shoyu even less than the present rate. The 2 techniques used to remove some salt from the shoyu both have the problem of causing the loss of flavor or balance of flavor.

7059. Hymowitz, Ted. 1987. Present research on soybeans (Interview). *SoyaScan Notes*. Nov. 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** 1. Plate tectonics: The distribution of the genus follows the plates. The wild Glycine is not found east of the

Andesite line. This research aims to show the ancient place of origin of the soybean before domestication. Lots of field research is involved, collecting in Oceania and Southeast Asia, plus study of botanical literature. Plans to collect in Taiwan and the Ryukyus. 2. Dissemination of the soybean in Illinois after its introduction by Dr. Benjamin Franklin Edwards. 3. Trading between Sweden and China in early days. Address: Dep. of Agronomy, Univ. of Illinois.

7060. Westbrae Natural Foods. 1987. Distributor catalog, FOB pricing: Nov. 15, 1987. Fall. Emeryville, California: Westbrae. iv + 19 + [12] p. 22 by 28 cm.

• **Summary:** On the cover, the lettering is in black on a tan background. Pages i-iv are general information, 1-10 are a computer-printed price list, and 11-19 are a product glossary. There are also 1-page, single-sided inserts (sell sheets, many in full color) of various Westbrae products. Address: Office: 4240 Hollis St., Emeryville, California 94608; Mailing: P.O. Box 8711, Emeryville, CA 94662. Phone: (415) 658-7518 (orders).

7061. Barrett, Mariclaire. 1987. Soyfoods almanac. *Vegetarian Times*. Nov. p. 35-38, 40. [3 ref]

• **Summary:** An overview and introduction to tofu, tempeh, miso, soy sauce, etc. with summary of some new developments. Photos show Betsey Shipley & Gunter Pfaff, Jan Belleme, Henry Ford wielding axe against trunk of car made of soybeans.

7062. **Product Name:** Shoyu Soy Sauce.

Manufacturer's Name: Community Foods Ltd. (Importer). Made in Japan.

Manufacturer's Address: Micross, Brent Terrace, London NW2 1LT, England. Phone: 01-450-9411.

Date of Introduction: 1987. November.

New Product–Documentation: Simon Bailey. 1988. *Natural Choice*. Aug. 15. "Soya-Based Products." A photo shows the Label.

7063. Eden Foods, Inc. 1987. Product description: Eden Foods quality natural foods. 701 Tecumseh Rd., Clinton, MI 49236. 21 p. Plus 6 pages of inserts. Catalog.

• **Summary:** The catalog lists the following soyfoods: Edensoy (Original, Vanilla, Carob; shown on page 1. "Edensoy is the best tasting, best selling, best made natural soymilk on the market"), black soybeans (they "have a hearty yet sweet taste. In Japan, black soybeans are always prepared for the New Year's celebration as they are a symbol of health."), organically grown soybeans (usually Corsoy or Amsoy), Eden tekka ("a hearty, nutritious condiment made from hacho miso, carrots, burdock, ginger root, and unrefined sesame oil; 2.8 oz), dried tofu (actually dried-frozen; 5.8 oz), barley (mugi) miso, brown rice (genmai) miso, buckwheat (soba) miso, light (shiro) miso, rice (kome)

miso, hacho (100% soybean) miso, natto miso "Kinzanji," shoyu, organic shoyu, low-sodium shoyu, wheat-free tamari, tamari-roasted nuts and seeds wheat free (pumpkin seeds, sunnies [sunflower seeds], almonds, cashews, mixed nuts), and Lima Tempeh.

Some interesting non-soy foods listed in the catalog include quinoa (16.2% protein), kudzu-kiri, kudzu root starch, adzuki beans, mochi (100% brown rice, with mugwort, or with millet), sea vegetables, organic amazake, barley malt syrup, and Lima seitan.

In the spring of 1986, Eden Foods became General Agent for North America for the Lima Company of Belgium. Lima soyfood products include Lima Tempeh. Note: This catalog was still in use in Jan. 1989. Address: Clinton, Michigan. Phone: 517/456-7424 or 800/248-0301.

7064. **Product Name:** Tofu Classics: Mandarin Chow Mein, Creamy Stroganoff, or Shells 'n Curry (Pasta and Sauce Mixes).

Manufacturer's Name: Fantastic Foods.

Manufacturer's Address: 106 Galli Dr., Novato, CA 94949. Phone: 415-883-7718.

Date of Introduction: 1987. November.

Ingredients: Mandarin Chow Mein: Whole wheat Oriental noodles, dehydrated vegetables (onions, carrots, peas, red pepper, green onions, garlic, parsley), corn oil, powdered yellow miso (soybeans, rice, salt), hydrolyzed vegetable protein, whole wheat flour, dried yeast (molasses grown), toasted sesame oil, powdered soy sauce (soybeans, wheat, salt), spices, rice syrup powder, vinegar powder.

Wt/Vol., Packaging, Price: 4 oz (113 gm) paperboard box. Retail for \$1.65 (5/90, California).

How Stored: Shelf stable.

New Product–Documentation: Note: This product does not contain any tofu; it must be added. Ad in *Natural Foods Merchandiser*. 1987. Nov. p. 50. "Introducing... Tofu Classics. One pot cooking. Ready in less than 20 minutes." Dec. p. 16. "New Tofu Classics Take You Out of the Kitchen and Around the World." Also run in 1988. Jan. p. 40. Ad in *Vegetarian Times*. 1988. May. p. 11.

Label sent by Claire Wickens. 1990. May 30. 4.5 by 6.5 by 1.25 paperboard box. Tan, green, orange and red on beige. On the front panel is a photo of a white plate containing the finished tofu and pasta, plus a small insert photo of a package of water-packed tofu. "Add ½ pound firm tofu. All vegetarian. All natural." On the back is a pastel drawing of a Chinese person carrying two baskets on a shoulder pole by a lake. "One pot cooking. Ready in 7 minutes. Fantastic Foods' *Tofu Classics* are adaptations of favorite dishes from around the world, designed to enhance tofu cookery. We provide wholegrain pasta and a delicious sauce—you add tofu." Inside is a poly bag with short lengths of pasta and dried peas, diced carrots, etc.

Tofu Classics product with Label purchased at Open

Sesame in Lafayette, California. 1998. Jan. 10. Mandarin Chow Mein, design copyright 1994. Price: \$1.89. Shells 'n Curry, design copyright 1994. Price: \$1.89.

7065. Goldbeck, Nikki; Goldbeck, David. 1987. The Goldbeck's guide to good food. New York, NY: New American Library. xi + 563 p. Illust. Index. 24 cm.

• **Summary:** The all-new version of their *Supermarket Handbook*, which originally sold 850,000 copies. Chapter 12 (p. 143-51), titled "Soyfoods: World Class Protein," discusses tofu, frozen tofu, tempeh, soy flour and grits, high-tech soy (soy concentrates and isolates), textured soy protein products. There is also considerable information on soyfoods in other chapters throughout the book: Soy flour (p. 79). Soy nuts (p. 159, 163). Soy milk (p. 184-85). Soy yogurt (p. 190-91, 195). Soy cheese (212, 217-18). Soy protein concentrates or isolates (p. 233, 451, 483, 527). Soy oil (p. 144, 264, 288, 292-93). Meatless burgers and soy sausages (p. 394). Soy ice cream (p. 452-53, 455). Soy sauce (510-11, 515). Miso (p. 511-12, 515). Worcestershire sauce (p. 512).

The section titled "Soy Yogurt" gives a nutritional analysis of cultured Soygurt, made by Cream of the Bean; per 8 oz. it contains 255 calories, 6.7 gm protein, 45.2 gm carbohydrates, 5.3 gm fat, no cholesterol, 20 mg sodium, and 7% of the US RDA for calcium. The text reads: "Those who must avoid milk will be interested in nondairy soy yogurt. A new arrival in natural food stores, this yogurt is made from soymilk and bacterial cultures. Gelatin is added to some brands to maintain the typical yogurt consistency. There is no need, however, for the quality to be compromised by the addition of high fructose corn syrup, isolated soy protein, salt, and several thickening agents, as has been done in at least one brand we have encountered."

The section titled "Soy Cheese" states: "Cheese based on soy milk has recently added a new category of cheese products to the market. In terms of calories, protein, and overall fat content soy cheese competes quite favorably with animal cheeses... It is both lactose- and cholesterol-free and the sodium content is about average for cheese. Note, however, that soy cheese is held together with vegetable gums and will contain either the milk derivative calcium caseinate (in which case it is not dairy free) or isolated soy protein." Page 218 gives a nutritional analysis of Soya Kaas (soy cheese). Per 1 oz. it contains 78 calories, 6.7 gm protein, 5.6 gm fat, no cholesterol, and 168 mg sodium. Address: R.D. 1, Box 495, Woodstock, New York 12498 914-679-8561.

7066. Sumiyoshi, Yasuo. 1987. Miso, shoyu seizô gyôkai no genjô ni tsuite [Present status of the miso and shoyu industries in Japan]. *Daizu Geppo* (Soybean Monthly News). Oct/Nov. p. 19-28. [Jap]

• **Summary:** For the year 1983, 1,701 miso manufacturers produced 574,000 tonnes of miso, and 2,692 shoyu

manufacturers produced 1,194,000 kiloliters of shoyu. Miso production for recent years was: 1980 579,000 tonnes, 1981 576,000 tonnes, 1982 572,000 tonnes, 1983 574,000 tonnes, 1984 581,000 tonnes, 1985 573,000 tonnes, 1986 581,000 tonnes. Most of Japan's miso plants are still small: 1,513 plants (88.5% of all plants) produced 375 tonnes or less a year, but this accounted for only about 12% of all production. Yet eight plants produced 11,251 tonnes or more a year, and this accounted for 26.7% of all production.

Shoyu production for recent years was: 1980 1,189,000 kl, 1981 1,191,000 kl, 1982 1,187,000 kl, 1983, 1,194,000 kl, 1984, 1,200,000 kl, 1985, 1,186,000 kl, and 1986 1,201,000 kl. Address: Shokuryô-chô Kakô Shokuhin-ka, Miso Shôyu Kakari-chô.

7067. *Taste* (Kikkoman, Japan). 1987. Goyogura: A tale of two families. 1(1):8. Nov.

• **Summary:** In these buildings across the scarlet bridge over the moat, Kikkoman makes soy sauce for the imperial family. "Soy sauce for the emperor (which is also available at select stores) is made entirely from wheat and soybeans grown in Japan, and the fermentation process takes place completely naturally, without any temperature control, so that the soy sauce takes almost twice as long to mature. The huge vat room, painted in scarlet from floor to ceiling, contains ten vats, some bubbling softly, others still dormant." Near the entrance is a small museum room filled with artifacts: old sales records, large soy sauce jars shaped like vases, and sepia photographs.

KIKKOMAN CLOSE-UP

Goyogura: A Tale of Two Families

The Goyogura was completed in 1939 to mark the 20th anniversary of the modern company's founding or merging. For it was in 1917 that the soy sauce concerns of the eight branches of two families—Mogi and Takanishi—were united to form Noda Shoyu Company, renamed Kikkoman Corporation in 1980. Noda is 20 miles northeast of Tokyo and the center of Japanese soy sauce production since the mid-seventeenth century.

Photos show: (1) The bridge leading to the Goyo Gura. (2) Moromi fermenting in vats; the orange floor is just below the lip of the vats.

7068. *Taste (Kikkoman, Japan)*. 1987-- . Serial/periodical. Tokyo: Kikkoman Corp. Vol. 1, No. 1. Nov. 1987. Quarterly. Full color.

• **Summary:** Subtitled "A quarterly intercultural forum for the exchange of ideas on food." It will highlight traditional Japanese cuisine and present the many innovative dishes that have successfully combined Oriental and Western cooking concepts. For further information, contact Kenzaburo Mogi of the Foreign Operations Dept. Kaichiro Someya is General Mgr. of the Foreign Operations Dept. Address: 1-25 Kanda Nishiki-cho, Chiyoda-ku, Tokyo 101, Japan. Phone: 03-233-5610.

7069. *Whole Foods*. 1987. Great Eastern Sun, Westbrae trade lines. Nov. p. 18.

• **Summary:** Effective immediately Great Eastern Sun of Enka, North Carolina, is the exclusive distributor of Westbrae label seaweeds (sea vegetables) and Asian condiments, while Westbrae is exclusive distributor of Soba Shop ramen and noodles. Bruce Sturgeon is sales and marketing director for GES.

7070. *Whole Foods*. 1987. Sensational soyfoods. Nov. p. 62. [5 ref]

• **Summary:** This basic introduction is designed to be photocopied by natural food retailers for distribution to their customers.

7071. Mesmer, R.E. 1987. Don't mix miso with MAOIs (Letter). *J. of the American Medical Association* 258(24):3515. Dec. 25. [1 ref]

• **Summary:** MAOIs (Monoamine oxidase inhibitors) such as Parnate and Nardil are widely used to treat anergic depression and some anxiety and phobic disorders. One side effect of taking these drugs is hypertension. Patients are advised to follow a low-tyramine diet. But miso and soy sauce may contain enough tyramine to raise the blood pressure of persons taking MAOIs, causing hypertensive crises. Address: M.D., Warren (Pennsylvania) State Hospital.

7072. Weinreb, Sam; Martin, Shelly. 1987. Tofu in New York City (Interview). *SoyaScan Notes*. Dec. 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sam: Tofu has become a lost leader in New York City health food stores, sold at a small markup. He makes 1,800 lb/week of tofu including round tofu. He is supported by the co-ops, and is surviving out of sheer stubbornness and because he thinks what he is doing is important.

Shelly: The New York City health food industry is being taken over by the Koreans. They keep their stores open 24 hours a day and pay low or no wages (as to family). They are hard for a manufacturer to do business with. Soy Source has its soy sauce specially made by Wajashan. Address: 1. Local Tofu, West Nyack, New York 10994; 2. Appropriate Foods / Soy Source.

7073. Dun & Bradstreet. 1987. Report on Kikkoman Foods Inc. 5 p. Dec. 31.

• **Summary:** Chief executive: Shinichi Sugiyama, born 1928. Plant: 300,000 square feet in 1 story concrete block building. Location: Walworth, Wisconsin. SIC Number 20 35. Worth: \$31.49 million. Employs: 95. Trend: Up. Total assets: \$41.7 million.

History. Incorporated in Wisconsin 10 March 1972. 100% of capital stock is owned by parent company. The parent company has 21 subsidiaries in Japan and the USA including: 1. Kikkoman International Inc., San Francisco. Started in 1957, it wholesales food sauces. 2. JFC International Inc., South San Francisco. Started in 1969, it imports food products, mostly from Japan. 3. Pacific Trading (Inc.), Los Angeles. Started in 1980, it imports food products. The parent company, Kikkoman Corporation, Noda, Chiba, Japan, started in 1917. It is a manufacturer of soy sauce, plum wine, rice wine, worcestershire sauce, etc.

Yuzaburo Mogi, born 1926, married, active in Japan. Graduated from Columbia College, New York, NY.

7074. Nihei, Takao. 1987. [Barbeque shoyu, a Hawaii creation. (Food series, part VI)]. *Kokiku (Honolulu, Hawaii)*. Dec. p. 29. [Jap; Eng]

• **Summary:** Hawaii's barbeque shoyu consists of shoyu, sugar, garlic, ginger, and round onions in which the meat is marinated and broiled over charcoal. The term barbeque shoyu was already known and being sold commercially before World War II. Barbeque shoyu has changed to teriyaki sauce. Teriyaki is now an international term and enjoyed the world over, a sauce which is Hawaii's own creation.

7075. Product Name: Sesame Wheat Tempeh Burgers.

Manufacturer's Name: 21st Century Foods Inc.

Manufacturer's Address: 30A Germania St., Jamaica Plain, MA 02130.

Date of Introduction: 1987.

Ingredients: Organic soy tempeh, bulghur wheat, roasted sesame seeds, tamari, natural hickory smoke, lemon juice, herbs, spices.

Wt/Vol., Packaging, Price: 5.5 oz.

How Stored: Refrigerated or frozen.

New Product–Documentation: Label. 1987. 3 inch diameter. Black and red on yellow. "New! All natural. Gourmet."

7076. Product Name: Duck Brand Soy Sauce.

Manufacturer's Name: Chong (F.H.).

Manufacturer's Address: #35 Union Lane, Colombo 2, Sri Lanka.

Date of Introduction: 1987.

How Stored: Shelf stable.

New Product–Documentation: Jane Gleason. 1988. June.

7077. Product Name: Seitan.

Manufacturer's Name: Gold Mine Natural Food Co.

Manufacturer's Address: 1947 30th St., San Diego, CA 92102. Phone: 619-234-9711.

Date of Introduction: 1987.

Ingredients: Whole wheat*, soy sauce*, onions*, ginger*, kombu seaweed, garlic*, filtered water, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 12 oz ball in broth in a 16 oz deli tub.

How Stored: Refrigerated.

New Product–Documentation: Talk with Jean Richardson, co-owner of Gold Mine Natural Foods. 1992. July 8. This product, made by Gold Mine, was introduced in the spring of 1989. It is made entirely by hand by Alice Peckham, who learned the process from Carlos Richardson (her husband), who probably learned it from Hannah Bond, who now lives in Vermont. Most of the product is sold to local wholesale accounts. Production averages 150 lb/week.

Talk with Carlos Richardson of Gold Mine. 1992. July 10. He first saw seitan in about 1980 in Vermont, in a natural food store refrigerator. It was made by Chrys and Bruce Bailey of Bailey's Traditional Seitan. in northwestern Massachusetts. He first learned how to make seitan in 1983

either in Hawaii from Marijke Steevensz, or in Los Angeles at the East West Center, perhaps from Loretto Beamonte, who had come up from Mexico. Gold Mine started business in 1985. The first seitan sold commercially by Gold Mine (in about 1989) was purchased from Arturo Beamonte at the East West Center in Ensenada, in Baja California, Mexico (current phone: 667-61005), and then from a Canadian fellow who made it at the East West Center in San Diego. After that, Carlos made the seitan sold by Gold Mine starting in about 1989. He learned on a commercial scale by practice and by talking about the process on the phone with Chrys Bailey.

7078. Product Name: Far East Hoisin Sauce.

Manufacturer's Name: House of Herbs.

Manufacturer's Address: P.O. Box 178, Passaic, NJ 07055-0178. Phone: 201-779-2422.

Date of Introduction: 1987.

Ingredients: Fermented soy beans (formerly made by Wan Ja Shan), sugar, modified food starch, prunes, vinegar, water, salt, garlic, and 1/10 of 1% sodium benzoate as preservative.

Wt/Vol., Packaging, Price: 9 oz glass jar.

How Stored: Shelf stable.

New Product–Documentation: Talk with Paul Fischer, owner of House of Herbs. 1997. Sept. 11 and 15. This product was introduced in about 1974. It was first sold in a 375 (12.7 fluid ounces) ml glass bottle; later they changed to two smaller glass bottles to be competitive—10 fl oz (295 ml) and 5 fl oz (148 ml). For a history of this company and the product, see this 1997 SoyaScan Notes interview. Paul's product has been off the market for 4-5 years, since he has been unable to buy fermented soybean from Wan Ja Shan. So now Paul is looking for a way to make his own Hoisin Sauce from scratch—because nobody makes a good product. Products made by Japan Foods, by Kamé brands (which comes from Singapore), and by Mandarin—are all too salty. Paul realizes that Hoisin Sauce is traditionally made in China with the soybeans left over after making soy sauce. It should be inexpensive, but Paul had to pay a great deal for it to Mr. Wu because he didn't know where else to get it. The fermented soybeans he got from Mr. Wu they had not yet been made into soy sauce. He never tasted it so he does not know whether or not it was salty. It came in a big drum, and was a thick whitish liquid. You could see the shape of the individual soybeans—they were not altogether broken down, but were bloated with a light white mold on top—which they kind of scraped off.

A color leaflet (8½ by 11 inches, single sided), sent by Paul, shows the 22 products in his Far East Line. A label sent by Paul shows the ingredients, plus one suggested use on barbecued spare ribs.

7079. Inoue, F.; Awao, T. 1987. [Control of microorganisms in food (miso and soy sauce) factories]. *Miso no Kagaku to*

Gijutsu (Miso Science and Technology) 35(11):370-86. [14 ref. Jap]*

7080. **Product Name:** Kame Soy Sauce.

Manufacturer's Name: Intersales, Inc. or Shaffer, Clarke and Co, Inc. (Importer). Made in Japan.

Manufacturer's Address: 1445 E. Putman Ave., Old Greenwich, CT 06870. Phone: 914-358-8882.

Date of Introduction: 1987.

7081. **Product Name:** [Jimmi Soy Sauce-Shoyu].

Foreign Name: Jimmi Molho de Soja.

Manufacturer's Name: Jimmi. Div. of McCormick do Brasil S/A.

Manufacturer's Address: Avenida Olavo Bilac, 402, Osasco-SP, Brazil.

Date of Introduction: 1987.

Ingredients: Soybeans, wheat, molasses, MSG, alcohol vinegar.

Wt/Vol., Packaging, Price: 150 ml bottle retails for 114.00 crusados.

How Stored: Shelf stable.

New Product-Documentation: Label on bottle. 1988. 3.25 by 3.25 inches. Brown, red, green, and black on white. "Made in Brazil. Ideal for soups, poultry, vegetables, meats, fish." McCormick is moving to take over all the spice and related companies worldwide.

7082. **Product Name:** Shoyu (Naturally Brewed Soy Sauce), Organic Shoyu, Traditionally Brewed Tamari (Wheat Free Soy Sauce), Organic Tamari, and Tamari Teriyaki.

Manufacturer's Name: Kaiora Natural Ltd. (Importer). Made in Japan.

Manufacturer's Address: CPO Box 3007 (180 Victoria St. West), Auckland 1, New Zealand. Phone: 09-370 454.

Date of Introduction: 1987.

New Product-Documentation: 1. Shoyu (naturally brewed soy sauce): Made by Sendai Miso Shoyu Co. in Japan. The moromi mash is left to mature in huge cedar wood casks at ambient temperatures for up to 2 years. 300 ml and 750 ml. Labels are light and dark purple. 2. Organic shoyu: "Produced exclusively by a religious community in Japan... The community farms its own organically grown soybeans and wheat in Hokkaido." 150 ml and 750 ml. Labels are light and dark red. 3. Traditionally brewed tamari: Brewed by the San Jirushi Company of Japan. Matures for over one year in cedar kegs. 150 ml, 300 ml, and 750 ml. Labels are light and dark green. Salt content: 14.2%. 4. Organic tamari: Brewed by the Mansan Company of Japan. It is made in the traditional manner, maturing for over 1 year in cedar kegs. Labels are light and dark tan. 150 ml and 750 ml. Contains natural mirin. Salt content: 14.2%. 5. Tamari teriyaki. Made by San Jirushi. 300 ml. Label is brown and gold. Contains tamari, rice vinegar, mirin, honey, miso, ginger, garlic,

spices. No preservatives or additives. Labels sent 1988. Dec. by Austin Holden.

• **Summary:** These bacteria are members of the Lactobacillaceae. Address: Japan.

7084. **Product Name:** Kikkoman Teriyaki Baste & Glaze, Teriyaki Barbecue Marinade & Sauce, Stir-Fry Sauce, Steak Sauce, Sweet & Sour Sauce, Tonkatsu Sauce.

Manufacturer's Name: Kikkoman Foods.

Manufacturer's Address: Walworth, Wisconsin.

Date of Introduction: 1987.

New Product-Documentation: Duxbury. 1987. Food Processing. May. p. 70-71. Kikkoman Oriental Cooking. 1989. p. 5. Shows a color photo of the Kikkoman Teriyaki Marinade and Sauce, Teriyaki Baste & Glaze, Stir-Fry Sauce, and Sweet & Sour Sauce.

7085. **Product Name:** La Choy Thick and Rich Teriyaki Sauce.

Manufacturer's Name: La Choy Food Products.

Manufacturer's Address: 901 Stryker St., Archbold, OH 43502.

Date of Introduction: 1987.

New Product-Documentation: Talk with Milan Drake. 1988. Jan. 4.

7086. **Product Name:** Noble Bean Eggless Tempeh Salad.

Manufacturer's Name: North Coast Tempeh Co.

Manufacturer's Address: 1088 Ivanhoe Rd., Cleveland, OH 44110.

Date of Introduction: 1987.

Ingredients: Tempeh (Organic soybeans, water, *Rhizopus* culture), imitation mayonnaise (soy oil, water, honey, cider vinegar, lemon juice, natural spices, kelp, onion powder), celery, pickles, onion, parsley, shoyu, mustard, garlic powder.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product-Documentation: Label. 1987. Oval 4 by 2.75 inches. Blue, red, green, and yellow on white. Jeff Narten. 1987. "History of North Coast Tempeh and its Products." 4 p. Dec. 7.

7087. Oppenheimer, A.; Glas, M.; Cherukuri, S.R. Assignors to Warner-Lambert Company. 1987. Chewing gum and confectionery compositions containing a soy flavor enhancer. *European Patent Application* EP 0,239,540 A2. [Eng]*

• **Summary:** The flavor of chewing gum and confectionery compositions is improved by incorporating a natural soy

flavor enhancer selected from natural soy extract, soy sauce, soy powder or mixtures thereof in amounts which reduce the bitter or harsh flavor notes perceived after substantial chewing, without imparting the salty taste associated with soy derivatives. Address: Warner-Lambert, Morris Plains, New Jersey 07950, USA.

7088. Product Name: The Soy Deli Gourmet Fresh Tofu Salads/Dips/Spreads [No Tuna Salad, Curry Salad, Dilly Salad, Garlic Salad/Dip, Mild Jalapeno Sesame Spread/Dip, Salada Sin Carne, Curry Savory Salad].

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1987.

Ingredients: No Tuna Salad: Organic tofu (water, organic* soybeans, nigari), safflower oil, sunflower seeds, shoyu (water, whole soybeans, whole wheat, sea salt), water chestnuts and/or jicama, cider vinegar, scallions, sesame oil, spices. * Grown in accordance with Calif. Health & Safety Code 26569.11.

New Product–Documentation: Talk with Ben Lee. 1988. Sept. 30. Introduced in 1987, this was a local line of fresh products. Not a lot is happening with this line, just a small local market. He is revamping a lot of the labels. Labels. 1987. 3.5 inch diameter. One color plus black on white. "Master Tofu-Makers Since 1906."

7089. Product Name: The Soy Deli Gourmet Fresh No Tuna Salad San. (Tofu Sandwich).

Manufacturer's Name: Quong Hop & Co.

Manufacturer's Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1987.

Ingredients: Organic tofu (water, organic* soybeans, nigari), safflower oil, sunflower seeds, shoyu (water, whole soybeans, whole wheat, sea salt), water chestnuts and/or jicama and/or celery, cider vinegar, scallions, sesame oil, spices, whole wheat bread, (and/or lettuce, sprouts, bell peppers). * Grown in accordance with Calif. Health & Safety Code 26569.11.

New Product–Documentation: Talk with Ben Lee. 1988. Sept. 30. Introduced in 1987, this was a local line of fresh products. Label. 1987. 3.5 inch diameter. Black and blue on white. "The original."

7090. Product Name: Honest to Goodness Soup. Make-in-the cup (Dry Mix) [Tomato, Onion, or Mulligatawny].

Manufacturer's Name: Realeat Company Ltd.

Manufacturer's Address: 2 Trevelyan Gardens, London NW10 3JY, England. Phone: 01-459-3401.

Date of Introduction: 1987.

Ingredients: Brown rice, miso and soy sauce powder, vegetable bouillon powder, and spices. Varietal ingredients

include tomato, onion, curry, garlic, and celery salt.

Wt/Vol., Packaging, Price: 16 gm in nitrogen-flushed foil sachet.

How Stored: Shelf stable.

Nutrition: Per 15 gm dry: Protein 10%, carbohydrate 68%, vegetable fat 4%, calories 50.

New Product–Documentation: Letter from Gregory Sams. 1988. March 30. Leaflet, undated. "A Recipe for success." Gives detailed product information. "A truly unique range of additive-free Instant Soups with Real Flavor. They are made only with natural ingredients and thickened with nourishing brown rice."

7091. Product Name: Teriyaki Sauce (with Wood Smoke Flavor).

Manufacturer's Name: S&W Fine Foods.

Manufacturer's Address: -

Date of Introduction: 1987.

New Product–Documentation: Fred Marken's brochure.

7092. Product Name: Soy Devine Cajun Barbeque Style (Frozen Tofu Entree) [As is, or on a Nine Grain Bun].

Manufacturer's Name: Soy Devine.

Manufacturer's Address: Box 668, Miranda, CA 95553.

Date of Introduction: 1987.

Ingredients: Processed organic tofu [frozen], tomato sauce, onions, honey, mustard, cider vinegar, safflower oil, tamari (Westbrae), peanut butter, garlic, miso, spices (incl. paprika, cayenne, allspice).

Wt/Vol., Packaging, Price: In a tub.

New Product–Documentation: Talk with Mara Devine. 1988. April 7. She used to make the Village Soyburger. This may be America's first second-generation product made with frozen tofu. She buys the tofu from Quong Hop. It is not shaped like a burger. She freezes the tofu, slices it, marinates it in a sauce, then bakes it, pours on the sauce and bakes it a little more. It is akin to Sloppy Joes. She also sells it in a bun. Its very chewy. She has a whole book on frozen tofu. Label. 1988. As is, 4.5 inches diameter. Black, red and green on a white lid. Logo of an angel with a soybean plant in both hands. "No additives or preservatives. Tasty hot or cold. Made with organic tofu and homemade barbecue sauce. All vegetable protein. Excellent texture. On tub: Serving suggestions. Great as a burger, in sloppy joes, in spaghetti sauce, as burrito or enchilada filling, over rice, pasta, or baked potato." Label for burger. 1988. 3 inch diameter. Black and yellow, with same logo.

Talk with Mara Devine. 1995. June 1. In 1995 Cajun Barbecue Style was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. She moved from Miranda to Arcata, California, in June 1993.

7093. Product Name: Soya Nova Okara Spread (sold in bulk).

Manufacturer's Name: Soya Nova Tofu Shop.

Manufacturer's Address: R.R. #2 Rourke Road, C-28, Ganges, Saltspring Island, BC, V0S 1E0, Canada. Phone: 604-537-9651.

Date of Introduction: 1987.

Ingredients: Organically grown soybeans, brown rice, tamari, unrefined oils, fresh onions, garlic, carrots, herbs, spices.

How Stored: Refrigerated.

New Product–Documentation: Letter from Greg Lundh of Silverking Soya Foods in Nelson, BC, Canada. 1990. Dec. 14. Soya Nova Tofu Shop introduced Okara Spread in 1987.

Leaflet sent by Deborah Lauzon. 1991. Feb. 6. "Soya Nova Tofu Shop." Describes the product.

7094. Taiwan, National Bureau of Standards. 1987. [Soy sauce]. *Chinese National Standard CNS-N5006*. [Chi]* Address: Taiwan.

7095. Tomita, M.; Okubo, K.; Yamauchi, F. 1987. [Factors influencing formation of sediment in heated raw soy sauce]. *Hakko Kogaku Zasshi (J. of Fermentation Technology)* 65(3):185-89. [11 ref. Jap; eng]*

• **Summary:** Raw soy sauce (a filtrate of aged mash) is heated at 70-85°C at the final stage of fermentation to inhibit microbial and enzymic reactions. During heating, sediment is gradually formed, comprising 10% of the volume. The sediment decreases the yield and commercial value of soy sauce. More sediment is formed and it forms faster at 60°C than at 85°C, suggesting that raw soy sauce contains a factor or factor that accelerates sediment formation at the lower temperature and/or inhibits it at the higher. Address: Dep. of Food Chemistry, Tohoku Univ., Amamiya-machi, Tsutsumidori, Sendai-shi, Miyagi-ken 980, Japan.

7096. **Product Name:** Westico Soya Sausage.

Manufacturer's Name: Westico Foods.

Manufacturer's Address: West Indies College, Mandeville, Jamaica.

Date of Introduction: 1987.

Ingredients: Gluten, soya pulp (okara), soya flour, vegetable oil, salt, onion powder, garlic powder, sausage flavoring, soya sauce.

Wt/Vol., Packaging, Price: 19 oz can.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Form filled out and label sent by Westico. 1990. June 28.

7097. **Product Name:** Traditional Nama Agé. Renamed Pineapple Teriyaki Tofu Cutlets.

Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.

Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

Date of Introduction: 1987.

Ingredients: 1998: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride, a natural firming agent}), hi oleic acid safflower oil, unsweetened pineapple juice, soy sauce, pineapple concentrate, ginger, garlic powder, ginger powder, onion powder.

Wt/Vol., Packaging, Price: 6.5 oz vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1987, originally called Traditional Nama Agé, and made at Wildwood's plant in Santa Cruz.

7100. Albert, Rachel. 1987. *Gourmet wholefoods: Vegetarian and macrobiotic cuisine*. Grain of Salt Publishing, 2211 N.E. 50th, Suite #12, Seattle, WA 98105. xi + 176 p. Illust. by Rebecca Rickabaugh. Index. Introduction by Karl Mincin. 21cm.

• **Summary:** This vegan cookbook contains no recipes calling for eggs or dairy products. At last, a macrobiotic cookbook without fish. This book has a brief, unstuffy introduction to macrobiotics and tasty, creative recipes. Includes 11 recipes featuring tofu, 4 with tempeh, 1 using black soybeans, and many using miso and shoyu. Note the correct use of the term "shoyu" throughout. Also has recipes for "amasake" and "amasake frosting." Address: Washington.

7101. Beuchat, Larry R. 1987. *Food and beverage mycology*. 2nd ed. New York, NY: Van Nostrand Reinhold. xiii + 661 p. Illust. Index. 23 cm. [20+ soy ref]

• **Summary:** Contents: Contributors. Foreword. Preface. Classification of food and beverage fungi, by E.S. Beneke and K.E. Stevenson. Relationships of water activity to fungal growth, by Janet E.L. Corry. Fruits and fruit products, by D.F. Splittstoesser. Vegetables and related products, by R.E. Brackett. Meats, poultry, and seafoods, by James M. Jay. Dairy products, by Elmer H. Marth. Field and storage fungi, by C.M. Christensen. Bakery products, by J.G. Ponte, Jr. and C.C. Tsen. Traditional fermented food products,

by L.R. Beuchat. Alcoholic beverages, by G.G. Stewart. Edible mushrooms, by W.A. Hayes. Poisonous mushrooms, by Donald M. Simons. Fungi as a source of protein, by A.J. Sinskey and C.A. Batt. Fungal enzymes and primary metabolites used in food processing, by R. Bigelis and L.L. Lasure. Mycotoxins, by N.D. Davis and U.L. Diener. Methods for detecting mycotoxins in food and beverages, by L.B. Bullerman. Methods for detecting fungi in foods and beverages, by B. Jarvis and A.P. Williams. Appendix. Regulatory action levels for mold defects in foods.

Chapter 9, "Traditional fermented food products, has a section on koji and a long section on fermented soybean foods that discusses: Shoyu, miso, natto (incl. itohiki-natto, yukiwari-natto, and hama-natto / hamanatto; called tu su by the Chinese and tao-si by the Filipinos), sufu, meitauza, and témpé [tempeh]

Tables show: (9.1) Some fermented foods of fungal origin. For each food is given: Product name, geography, substrate, microorganisms, nature of product, and product use. Soy-related products include: Chee fan, Chinese yeast, Hamanatto, kecap, kinema, ketjap, meitauza, meju, miso (incl. chiang, jang, doenjang, tauco, tao chieo), natto, soybean milk, soy sauce (incl. chiang-yu, shoyu, toyo, kanjang, kecap, see-ieu), sufu (tahuri, tao-kaon, tao-ju-yi), tao-si, taotjo, tauco and témpéh. Address: Dep. of Food Science, Agric. Exp. Station, Univ. of Georgia, Experiment, GA 30212.

7102. Campbell-Platt, Geoffrey. 1987. Fermented foods of the world: A dictionary and guide. London and Boston: Butterworths. xxiii + 291 p. 26 cm. [25 soy ref]

• **Summary:** The author classifies fermented foods into 9 groups: Beverages, Cereal products, dairy products, fish products, fruit and vegetable products, legumes, meat products, starch crop products, and miscellaneous products. Fermented legume products are particularly important in the diets of East Asia, Southeast Asia, and the Indian subcontinent. He has sections on many fermented soyfoods: Dawadawa, hama-natto, kenima [sic, kinema], miso, natto, tempe (incl. tempeh, tempe bengook, tempe bongkreik, tempe gembus [okara tempeh], tempe lamtoro, tempe mata kedele), and sufu (incl. teou-fu-ru). He lists major areas consumed, related terms, how consumed, types, how produced, microbiology and biochemistry, and a few key references. His research began in Ghana with dawadawa made from the African locust bean. Address: National College Prof. of Food Technology, Dep. of Food Science & Technology, Univ. of Reading, Reading, Berkshire, UK.

7103. Downes, John. 1987. Soy source: A practical guide to cooking with soy foods. Chatswood, NSW, Australia: Nature and Health Books. Co-published in 1987 by Prism Press, 2 South Street, Bridport, Dorset DT6 3NQ, England. Distributed in the USA by Avery Publishing Group. 127 p.

No index. 22 cm. [21 ref]

• **Summary:** Contents: Introduction, Nutrition & Soyfoods, Ingredients & Techniques, Glossary, Appetizers & Dips, Marinades & Accompaniments, Soups, Soup Noodles, Main Courses, Salads & Dressings, Desserts, Bibliography. A cookbook containing very little information about soyfoods in Australia. The author was born in 1949. Address: Australia.

7104. Harrison, Marilyn. 1987. Lea and Perrins everyday cookbook. Cambridge, England: Martin Books, an imprint of Woodhead-Faulkner Ltd. 96 p. Illust. (color). Index. 20 cm.

• **Summary:** A booklet of recipes that call for Lea & Perrins' Worcestershire Sauce. Contents: Introduction. Conversion tables. Sauces, marinades and dressings. Dips and savoury butters. Fish. Meat and poultry. Vegetable dishes. Snacks, savouries and quick meals. Microwave hints and tips. Address: [England].

7105. Hartadi, Sri; Kabirun, Siti. 1987. Improvement of traditional soy sauce fermentation (mold selection and its application). In: Fujiharu Yanagida, ed. 1987. Traditional Foods and Their Processing in Asia. Tokyo: NODAI Research Institute, Tokyo Univ. of Agriculture. vii + 235 p. See p. 219-33. [15 ref]

• **Summary:** Contents: Abstract. Introduction. Materials and methods: Mold selection, soy sauce inoculum preparation (laboratory scale, then commercial scale). Results and discussion. Conclusions.

From a survey of soy sauce manufacturers in Java and laboratory studies the authors conclude that practically none of the soy sauce manufacturers in Java, except for one modern manufacturer in Jakarta, use special inoculum in the soy sauce fermentation process. The source of active microorganisms is mainly the previously used fermentation containers. Most of the soy sauce processing is not carried out in aseptic conditions, so many kinds of molds, yeast, and bacteria can be isolated from the fermented materials. The authors isolated a suitable mold for soy sauce fermentation, and found that the use of 1% of fresh inoculum is adequate for the fermentation of soy sauce. Address: Faculty of Agriculture, Gadjah Mada Univ., Indonesia.

7106. Karim, Mohamed Ismail Abdul; Hassan, Zaiton. 1987. Traditional fermented foods of Malaysia. In: Fujiharu Yanagida, ed. 1987. Traditional Foods and Their Processing in Asia. Tokyo: NODAI Research Institute, Tokyo Univ. of Agriculture. vii + 235 p. See p. 210-18. [12 ref]

• **Summary:** The authors discuss the preparation of a number of Malaysian fermented soyfoods, including tempeh, kicap kacang soya (soy sauce), and tauco (soybean paste).

Note: This is the earliest document seen (April 2012) that uses the term "kicap kacang soya" to refer to Malaysian soy sauce.

They also discuss other Malaysian fermented foods: budu or kicap ikan (fish sauce), cinaluk (fermented shrimp), belacan (fish/shrimp paste), pekasam (fermented freshwater fish), tapai (fermented rice or cassava), tempoyak (fermented durian), tairu/taire/taina (fresh cow's milk fermented by bacteria equivalent to sour milk or yogurt), dadeh (made from fermented buffalo milk), arak beras (rice wine), toddy (palm wine), idli (steamed pudding), dosai (pancake), dadeh (fermented sweetened milk), and jeruk buahbuahan & sayur sayuran (pickled fruits and vegetables). Address: Faculty of Food Science and Biotechnology, Universiti Pertanian Malaysia, Malaysia.

7107. Kawamura, Yojiro; Kare, Morley R. eds. 1987. Umami—a basic taste: physiology, biochemistry, nutrition, food science. New York, NY: Marcel Dekker. xiv + 649 p. Proceedings of the First International Symposium on Umami, held Oct. 7-10, 1985, Lihue, Kauai, Hawaii. Illust. Illust. Index. 24 cm. [1400* ref]

• **Summary:** Contains 28 papers by 48 different authors, quite a few of them from the Ajinomoto Company, Inc. (Kawasaki, Kanagawa prefecture, Japan). The basic message of this book is the same as its title: Umami is a basic taste, just like the traditional four—sweet, sour, salty, and bitter, which were advanced before modern taste physiology had developed. The term “monosodium glutamate (MSG)” appears many times in the index, but the word “Ajinomoto” (“a tradename for a mixture of MSG and ribonucleotides”) does not. At the end of each paper are many references.

The taste of MSG is unique: In Japanese it is called “umami” (p. 83). “Glutamic acid (Glu) elicits a unique taste (*umami*) in human sensations...” (p. 3). “Umami” is also found in basic traditional, natural foods widely used in Japanese cookery: *kombu* / *konbu* (*Laminaria japonica*, a sea vegetable), *katsuobushi* (dried bonito flakes), and *shiitake* mushrooms (p. 86). However MSG is derived naturally from konbu whereas GMP (guanosine 5'-monophosphate) is derived from shiitake. These substances were previously thought to “enhance taste intensity” (p. 35, 256). The “Chinese restaurant syndrome” is discussed on pages 309-14. Although “soy” is not mentioned in the index, it does appear several times in the book: soy sauce (p. 257), soy (p. 265, 267, 268).

Contents (in 8 parts): I: General concepts (3 papers. “Recent progress in the taste receptor mechanism.” “Fundamental properties of umami in human taste sensation.” “The umami taste concept: Implications for the dogma of the four basic tastes” (sweet, sour, salty, bitter)). II: Developmental aspects (3). III: Receptor mechanisms (5). IV: Psychometric analysis (7). V: Physiology and behavior (3). VI: Brain mechanisms (3). VII: Nutrition and behavior (3). VIII: Overview. Address: 1. Faculty of Nutrition, Koshien Univ., Takarazuko, Japan; 2. Director, Monell Chemical Senses Center and Dep. of Physiology, Univ. of

Pennsylvania, Philadelphia, PA.

7108. Nichterlein, Karin. 1987. Huelsenfruechte [Legumes]. Bonn, Germany: AID (Auswertungs- und Informationsdienst fuer Ernaehrung, Landwirtschaft und Forsten). 20 p. Illust. 21 cm. [10 ref. Ger]

• **Summary:** The section on soybeans (p. 14-16) discusses soya oil, lecithin, soybean meal, soy protein concentrates, soya bread, low-fat soy flour, Sojamark (Soya meat), TVP, soya milk, tofu, soy sauce (shoyu, tamari), miso, tempeh, sufu (fermented tofu), natto, and soy sprouts. Address: Institut fuer Pflanzenbau und Pflanzenzuechtung I, Giessen, Germany.

7109. NODAI Research Institute. 1987. Traditional foods and their processing in Asia. Tokyo: NODAI Research Inst. vii + 235 p. Seminar held Nov. 13-15, 1986 at the Tokyo Univ. of Agriculture, Tokyo, Japan.

• **Summary:** Contents include: Oncom: Fermented peanut pressed cake, by Dedi Fardiaz. Mochi: Rice Cake, by Akiko Kawabata. Miso: Bean paste, by Hisao Yoshii. Chemistry and technology of tofu and its derived products, by Tokuji Watanabe. Indigenous fermented foods in Nepal, by Tika Karki. Improvement of traditional soy sauce fermentation mold, by Sri Hartadi and Siti Kabirun. Address: Tokyo Univ. of Agriculture, 1-1-1 Sakuragaoka, Setagaya-ku, Tokyo 156, Japan.

7110. Panati, Charles. 1987. Extraordinary origins of everyday things. New York, NY: Harper & Row. xi + 463 p. Illust. Index. 24 cm. [150+* ref]

• **Summary:** Includes discussions of: Blender (electric kitchen appliance) (1922, Racine, Wisconsin, initially known as a “vibrator”). Plastic (1900, USA, incl. Celluloid, Bakelite, Cellophane, Acetate, Vinyl, Plexiglas, Acrylics, Melmac, Styrene, Formica, Polyester, Nylon, Tupperware {made of polyethylene}). Peanuts (1800s, USA, incl. P.T. Barnum, peanut butter, Planters Peanuts). Cracker Jack (1893, Chicago, Illinois {“Candied Popcorn and Peanuts”}). Hot dog (1500 B.C., Babylonia [today's Iraq], incl. frankfurter, American hot dogs, Nathan's franks). Hamburger (Middle Ages, Asia). Sandwich (1760, England). Melba Toast (1892, London). Worcestershire Sauce (mid-1800s, Britain). Graham Crackers (1830s, New England).

Note: This book is very well written, but some or all of the information in some of the entries (such as the blender, peanut butter and Worcestershire sauce) comes from secondary sources and is incorrect. The book would be much better (but much longer) if the sources for each statement or entry were cited.

7111. Passmore, Jacki. 1987. Asia: The beautiful cookbook. Los Angeles, California: Knapp Press. 256 p. Illust. (color). Index. 37 cm.

• **Summary:** This is a stunningly beautiful, oversized book—a feast for the eyes, filled with elegant color photos (many full page), authentic recipes and many insights about Asian cookery. Each recipe is accompanied by one or more photos, Contents: Japan: Simplicity and elegance. Korea: Warm and sustaining. China: From the beginning of time. Philippines: East meets West. Thailand: Titillating, tantalizing. Laos and Kampuchea: Unforgettable foods. Vietnam: Herbaceous overtones. Singapore and Malaysia: A blending of cultures. India: Southern fire, northern serenity. Burma: Exotic offerings. Indonesia: Symphony of flavors. Sri Lanka: Gems from an enchanted isle. Glossary. Acknowledgments.

Japan: Yudofu (Simmered bean curd, with 3 cakes tofu {bean curd}, p. 31). Tofu dengaku (Grilled bean curd on skewers, with 2 lb {1 kg} momen tofu and white miso, p. 31). Ton-negu no teriyaki (Teriyaki pork rolls, p. 38). Miso-shiru (Miso-flavored soup with bean curd).

Singapore and Malaysia: Popiah (with ¼ cup (about 2 oz / 60 gm) compressed bean curd cake, shredded, p. 155, 148-49). Tempe lemak (Tempe in coconut milk, p. 166). Hokkien mie (Hokkien style noodles, with 2 cakes compressed bean curd, p. 168). Laksa ayam (Chicken with laksa noodles in coconut sauce, with 2 squares / cakes compressed bean curd, p. 169).

Indonesia: Kecap manis is a sweetish soy and chili sauce (p. 218). Babi kecap (Pork in sweet soy sauce, p. 227).

Glossary (p. 252-54) includes short definitions of: Azuki beans. Bean curd. Bean pastes and sauces. Kecap manis (“based on dark soy sauce, sugar and spices”). Kombu. Nori. Paneer (India). Sesam. Wakame.

7112. Popham, Peter. 1987. The insider’s guide to [south] Korea. Edison, New Jersey: Hunter Publishing. 199 p. See p. 60. Illust. (color photos by Alain Evrard). Maps. Index. 23 cm. [9* ref]

• **Summary:** The 1988 Summer Olympics in Seoul introduced Korea to the modern world in a big, new way. This book was written for that event.

The chapter titled “Korean cuisine” (p. 58+) explains that it is the least known of the culinary traditions of Asia, and offers strong evidence of the nation’s distinctiveness, which shows clear Mongol influence. Like the Chinese and Japanese, the Koreans also eat “soy beans and bean curd” [tofu], and bean sprouts [soy sprouts are more popular than mung bean sprouts]. The undisputed mark of Korean cuisine is kimch’i [kimchi], most of which is still made by fermentation at home of a vegetable (such as cabbage), always with chili and garlic; there are many different types of kimch’i, the most popular of which are cabbage stuffed with oysters, sliced cucumbers with radish and ginger, diced daikon radish with scallions, and white radish sticks floating in brine. Other favorite Korean seasonings, besides garlic and chili, are scallions, ginger, sesame oil, sesame seeds, and soy sauce.

Pages 60-62: “There is also a whole range of fermented pastes and sauces for dipping, called *chang*. Every home and restaurant has its own recipe for *chang*, and each batch comes out differently. Based on a fermented mash of soybeans, the three most common varieties are “*kan chang*, a dark liquid, like soy sauce, *daen chang*, a thick, pungent paste, and *kochu chang*, a fiery version laced with chilies.”

Note: This is the earliest English-language document seen (April 2012) that uses the term *kan jang* to refer to Korean soy sauce.

Side dishes, known as *panch’an*, accompany the main dish, rice, and add variety to the basic Korean meal. They include: *Tubu*: Soybean curd, tofu. *Manul changah-chee*: Green garlic pickled in soy sauce. *Don chun*: Beef and bean curd patties spiced with ginger.

Koreas love to make rich, thick stews, especially in winter. “*Chigae* is a special thick stew simmered in heavy clay crocks.” Favorite Korean soups (*tang*) and stews include: *Maeun tang*: Rich soup of meat, fish, bean curd, zucchini and scallions. *Ten chang chigae*: Thick stew of meat, fish, bean curd, squash and chilies.

Simple “one-bowl” meals, especially popular as summer lunches, include: *Kong kookso*: Wheat noodles in fresh soy milk. *Udong* [Jap. udon]: Broad wheat noodles with onions, bean curd, egg and chili. *Kongnamul pap*: [Soy] bean sprouts, beef and cabbage served over rice.

A photo (p. 63) shows a man grinding food using a hand-turned stone mill (quern).

7113. Rizzi, George P. 1987. The biogenesis of food-related pyrazines. *Food Reviews International* 4(3):375-400. [102* ref]

• **Summary:** Flavorous pyrazines have been found in many fermented foods; the most extensive studies are those on soybeans, cocoa, and cheeses. At least three studies (which are summarized) have shown that natto contains various pyrazines. Table 2 (p. 379) shows pyrazines in foods produced by specific microorganisms; they are found in natto (produced by *Bacillus natto*), soysauce (*Aspergillus sojae*), miso (*Aspergillus oryzae*), and soybeans (*Aspergillus oryzae*). Address: The Procter & Gamble Company, Cincinnati, Ohio.

7114. Sayers, Robert; Rinzler, Ralph. 1987. The Korean onggi potter. Washington, DC: Smithsonian Institution Press. 288 p. See p. 58-60, 71, 75, 77. Illust. 23 cm. Series: Smithsonian Folklife Studies, No. 5. [166* endnotes]

• **Summary:** Onggi are traditional Korean earthenware vessels, used for the storage of pickled vegetables, bean pastes and soy sauces. Fieldwork for this project was initiated by Ralph Rinzler in 1971.

The section titled “Storage containers” (p. 58-59) contains a list of the names of ceramic food jars, with their appropriate uses, as given by people in Korea’s capital,

Seoul. "Soy sauce, for example, is stored in quantity throughout the year in large and medium size outdoor receptacles (*kannjang tok* and *kanjang hangari*); as needed, the liquid is transferred to a small spouted kitchen form (*kanjang tanji*).⁷ The large outdoor jar used to store soy paste *toenjang* is called a *toenjang tok* and the small kitchen form a *toenjang tanji*. The corresponding jars for red-pepper paste (*koch'ujang*) are called *koch'ujang hangari* and *koch'ujang tanji*.

To understand better how these storage jars are used, it is useful to describe the preparation of four Korean dietary staples: soy sauce, soybean paste, red pepper paste, and kimch'i. "The first of these, reddish black soy sauce (*kanjang*), is made from yellow soy beans boiled four or five hours, then mashed into a paste called *meju*. Today yeast is added to the *meju*; formerly it was molded into large rectangles or truncated cones, which were dried outdoors on rice straw mats, then hung from the house rafters to leaven [sic, mold] naturally over several months. In the springtime, the mold-covered *meju* is broken up into smaller chunks and submerged in a brine-filled *tok* positioned on an architectural feature of the outdoor living space called a *changdoktae* ("place for sauce jars"). This might be a stone or concrete terrace built up in a sunny part of the dwelling's inner courtyard or, in the city, an apartment balcony or rooftop (Figures 8 and 9, p. 60-61).

Over a period of two or three months, the mistress of the house checks her jars, taking care to see that their contents receive only the proper amount of sunlight. Then, in May or June, she boils the clear, dark liquid in a cauldron and replaces it in still other jars along with red peppers and chunks of wood charcoal, which absorb dirt and inhibit strong odors. The solid moldy matter that floats to the top is skimmed off, then crushed, salted, and kneaded into a paste (*toenjang*), which constitutes a second major soy by-product. For most Koreans the making of soy sauce and soy paste is a yearly activity.⁸ An affluent family might prepare an even larger supply. The sauce is believed to stay fresh up to three years, and is even said to improve with age.

"A second staple is the hot seasoning *koch'ujang*. In autumn, red chili peppers are harvested and sun-dried for a week or more. Then the peppers are split open and left in the sun a few days longer, after which the seeds are dislodged with a pole. What remains is pulverized in a mortar, then sifted through a pine-root sieve. Simultaneously (or during the making of soy sauce), a *meju* ring is prepared and secreted away in a dark corner of the house to ripen. In the springtime, the red pepper powder and pulverized *meju* are combined with rice paste *ch'apssalchuk*, salt, and sugar. The *koch'ujang* is not cooked, but is left to ferment in a storage jar for three or four months.⁹

Most cauldrons are made of iron, although some, made of carved soapstone, are used for preparing medicinal foods. "Ceramic cauldrons are perhaps the least common; however

a stew of fermented soybean paste [*toenjang*] is sometimes cooked in a small example (*toenjang sot*) manufactured from a low-firing refractory clay called *koryongt'o*, which is more resistant to shattering than dense, homogeneous stoneware bodies (*chômt'o*) (Fig. 17), p. 71.

Photos show: (1) Korean onggi peddlers, ca. 1900, with long wooden racks that hold a heavy load of many containers on their backs (frontispiece). (2) Rooftop terrace (*changdoktae*) for sauce jars. Photo by Ralph Rinzler, 1971 (p. 60). (3) Rural version of *changdoktae* at Kaya village, Kyonggi Province (p. 61). (4) A small ceramic cauldron (*toenjang sot*) for preparing soy paste, Kyongju, N. Kyongsang Province (p. 71). (5) A small pouring vessel (*kanjang tanji*) for soy sauce (p. 77). Address: 1. Dep. of Anthropology, California Academy of Sciences, San Francisco, CA 94118.

7115. Shurtleff, William; Aoyagi, Akiko. 1987. Soymilk industry and market: Updates from 1984 to 1987. Lafayette, California: Soyfoods Center. 17 + 59 p. Index. 28 cm. [165 ref]

• **Summary:** This 1987 update to the Soyfood Center's two-volume 1984 *Soymilk Industry and Market* has two parts: (1) Year in Reviewing, describing key events and trends each year from 1984 to 1986. (2) A bibliography of soymilk from January 1987 to late 1987, based on records in the SoyaScan database; at the end is a 10-page index. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

7116. Singleton, Paul; Sainsbury, Diana. 1987. Dictionary of microbiology and molecular biology. 2nd ed. Chichester, New York, Brisbane, Toronto & Singapore: John Wiley & Sons, Ltd. xii + 1019 p. Illust. 25 cm. A Wiley-Interscience Publication.

• **Summary:** Contains entries for: fermentation, fermented foods, fermenter (fermentor), miso, natto, nitrogen fixation (dinitrogen fixation), ogi, oncom, shoyu (see Soy sauce), soy paste (see Miso), soy sauce (shoyu), sufu, tempeh, tofu (an intermediate in Sufu production).

7117. Terajima, Ryôan. comp. 1987. Wakan sansai zue 7 [Collection of Japanese and Chinese diagrams and drawings of all things]. Tokyo: Heibonsha. 442 p. 18 cm. Series: Toyo bunko, no. 471. Toyo Pocket Library series. [Jap]*

• **Summary:** See Terajima 1711 (or 1713). This is a translation into modern Japanese, with a title slightly different from that of the original. There have been at least 3 different editions over the centuries, most recently in 1907, 1929, and 1980 on. The set published by Heibonsha was published in 16 volumes from 1980 (vol. 1) to 1990 (vol. 16). This Vol. 7 was chosen at random as one example. We do not know which volume (or volumes) contains the information on soy. Address: Physician.

7118. Weber, Marlis. 1987. The single vegetarian: Healthy recipes for one. Translated from the German by Linda Sonntag. Hammersmith, London, England: Thorsons—An imprint of HarperCollins Publishers. 144 p. Illust. by Juliet Breese. Index. 21 cm.

• **Summary:** This attractively illustrated and designed lacto-ovo-vegetarian wholefoods cookbook (first published in Germany in 1985 as *Vollwertkueche für 1 Person*) opens with a nice section on soya beans and tofu (p. 17). Contains more than 50 line drawings, used mostly to fill spaces that would otherwise be empty. Soy-related recipes include: Chicory and beansprouts in curried cream (with soya bean sprouts, p. 56). Soya bean hotpot (with cooked soya beans, p. 76). In the chapter titled “Milk, Quark and Tofu” (p. 121-24) we find recipes for: Tofu dessert. Savoury Tofu. and Tofu Burgers.

7119. Yu, Youtai. 1987. Agricultural history over seven thousand years [in China]. In: Sylvan Wittwer, Yu Youtai, Sun Han, and Wang Lianzheng, eds. 1987. Feeding a Billion: Frontiers of Chinese Agriculture. East Lansing, Michigan: Michigan State University Press. 462 p. See p. 19-33. Chap. 2. [9 ref]

• **Summary:** Chinese agriculture originated in the primitive society of the early and middle New Stone Age (5000-2100 B.C.). Farming villages established in the Wei and Yellow River valleys of northeast China cultivated millet, wheat, beans, rice, hemp, cabbage, and melon. The Slave Society period went from 2100-476 B.C. The description of the “five grains” (millet, glutinous millet, soybeans, wheat, and rice) first occurred during the Spring and Autumn period (770-476 B.C.). Feudal Society went from 475 B.C. to A.D. 1840.

The earliest Chinese characters, inscribed on bones and tortoise (land-loving turtle) shells date from around the 14th century B.C. These were first excavated in Anyang County of Henan Province at the end of the 19th century. The earliest book which systematically recorded Chinese agricultural activities was *Xia Xiao Zheng*. It was the calendar of the Zia Dynasty, estimated to have been written around the 16th century B.C. and comprising about 400 words. The main crops were broom millet, grain millet, wheat, rice, bean, hemp, vegetables and melons. Nearly 400 books on ancient Chinese agriculture were published prior to the middle of the 19th century and before the end of the Chinese Feudal Society. The 11th Century B.C. saw the progressive expansion of Chinese agriculture.

In Western Europe, land was inherited by only one son of the noble landlord and was not allowed to be sold. This permitted centralized planning and utilization of land resources. By contrast, during the Feudal Society of China, land was inherited by many sons.

Discusses intensive cultivation which began in Chinese agriculture as far back as the 3rd century B.C.

The first priority in Chinese agriculture has been the production of the food crops known as the “Five Grains.”

Second is the production of livestock known as “Six Animals.” The “six animals” are horses, cattle, sheep, chickens, dogs and pigs. The expression of “five grains” first appeared in the Chinese literature of the eight-fifth centuries B.C. The grains were millet, glutinous millet, soybean, wheat and rice. They were first defined as the 5 basic food crops cultivated in the reaches of the Yellow River.

“Shu” is broomcorn millet (*Panicum miliaceum*); “Ji” is a variety of “Shu.” The main difference is that “Ji” is not as glutinous when cooked as is “Shu.” In the most ancient Chinese characters inscribed on bones and tortoise shells, these 2 words appeared most frequently of all the grain crops.

In ancient times, farmers would grow some soybeans as a part of their food production program each year. Equal importance was given to millet and the soybean as substitutes for “Shu” and “Ji.” Food processing technologies were developed after China entered the Feudal Society. Then fermented and salted soybeans [fermented black soybeans], thick soybean sauce, bean curd, bean sprouts and many other products became commonplace. The soybean then moved from a main food crop to the category of a nonstaple food and an oil crop. Wheat increased, as the soybean declined as a major food crop.

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term “fermented and salted soybeans” (or “fermented and salted soybean”) to refer to fermented black soybeans.

7120. Amoy Industries (International) Ltd. 1987? Amoy: We bring the tastes of China to the world. Hong Kong. 16 p. Undated. 28 cm. Catalog. [Eng]

• **Summary:** This attractive color brochure, with a globe and carved ivory dragon ball on the cover, presents Amoy and its products. The company began as one small factory in the southern Chinese port of Amoy, making only soya sauce. An old photo shows that factory, with many earthenware crocks of soy sauce fermenting outdoors. “Amoy is now one of the largest manufacturers of exportable oriental food in Hong Kong.” Amoy has an affiliation with Pillsbury including Burger King and Haagen-Dazs.

Color photos (p. 6-7) show four of Amoy’s soy sauce products (Gold label lo chau; Silver label lo chau; Gold label sang chau; and Silver label sang chau), and of many traditional Chinese earthenware soy sauce fermentation crocks. Photos also show Amoy black bean sauce, Yellow bean sauce, fermented tofu. Plus non-soy Royal Dragon wonton, spring roll, shaomai, and dimsum combination. Address: 11-15 Dai Fu Street, Tai Po Industrial Estate, Tai Po, Hong Kong. Phone: 651-6633.

7121. **Product Name:** [Tofu Slices].

Foreign Name: Die Tofu-Scheiben.

Manufacturer’s Name: Sojalpe.

Manufacturer's Address: Saint Quentin sur Isère, 38210 Tullins, France. Phone: 76.93.60.21.

Date of Introduction: 1987?

Ingredients: Tofu, carrots, onions, rolled oats, salt, soy sauce.

Wt/Vol., Packaging, Price: 200 gm, precooked.

How Stored: Refrigerated at 4-6°C (39-43°F).

New Product–Documentation: Manufacturer's brochure. 1987? In German. "Tofu Slices. Dishes of the fine kitchen. The joy of eating... without putting on weight." Tofu: Holding high a tradition. Sojalpe tofu is handmade in Dauphiné, following the traditional slow way of cooking, which was commonly used in Asia. It is made from organically grown soybeans, and without preservatives or colorings. Nigari is the coagulant. The slices can be either pan fried or baked. Serve with a sauce, or as an accompaniment to salads, grains, or vegetables.

The company logo is a steeped building with 5 soy-shaped leaves growing out of the steeple, set in front of towering mountains. A photo on the front shows a tofu slice (about 1/8 inch thick by 4 inches wide by 6.5 inches long) on a plate, topped with a sauce. At the top is an illustration (line drawing) of a laughing male chef in a white top hat.

7122. Simonds, Nina. 1988. A scholar guides China's food policy. *New York Times*. Jan. 13. p. 15-16.

• **Summary:** Wang Qing is the 37-year old director of the Beijing Food Research Institute, China's principal food-policy organization. In 1967, after her family was arrested during the Cultural Revolution, she was sent to a farm in Shandong Province. Just a high school graduate, she was given the job of making soy sauce and tofu. She was taught a method of making soy sauce that originated at the time of the building of the Great Wall [220 B.C.?] All the utensils were made of wood and the process was ancient, but it was very sophisticated. After 6 years she returned to her family in Beijing, worked briefly assisting writers at the Beijing Food Research Inst., then went to Hunter College in New York City, where she completed undergraduate and master's degrees in 3½ years. Then she went to Columbia University for a doctorate in nutrition education; she expects to receive her PhD this year. At age 37 she returned to Beijing to become director of the institute, which publishes China's first food magazine, *China Food*. It has a paid circulation of over 400,000 and claims a readership of millions.

"Miss Wang has already begun to influence China's food policy. Last year she successfully redirected the Chinese from developing their dairy industry and toward the rebuilding of the soybean-milk industry." In 1984 the United Nations had given money to China to develop cow's milk. But 90% of the Chinese population is lactose intolerant and "it is simply too costly for us to raise cattle. They would have to compete with humans for the land." As part of her work on her dissertation, Miss Wang found that there had been a huge

decline in China in soybean culture and the manufacture of its by-products. She is now working to recover what was lost. Accordingly, her Institute has developed liquid soymilk in plastic pouches to be test marketed for mass consumption starting next month. 160,000 pouches/day are to be distributed in Beijing.

7123. Miyazawa, Mitsuo. 1988. [Re: History of Sendai Miso Shoyu Co. Ltd.]. Letter to William Shurtleff at Soyfoods Center, Jan. 14. 2 p. Handwritten. [Jap; eng+]

• **Summary:** Although this company was founded in 1919, its roots go back to the late 1500s. In March 1593 (Bunroku 2) 3,000 soldiers of Idate Han (the former feudal domain in northeast Japan where Sendai is now located) went to Korea, led by Daté Masamuné (DAH-tay Mah-sah-MU-nay) in the army of Toyotomi Hideyoshi. It was found during the summer battles that the miso brought by the soldiers from most other Hans started to spoil; only that from Idate Han (Sendai) remained tasty, and it was shared with the other soldiers. From this time the fame of Sendai Miso began to spread throughout Japan.

During the Genroku Period (1688-1703) the miso makers in the Sendai area formed a trade group named Miso Nakama. "Nakama" means "colleague, fellow worker, comrade, or associate." They established rules and made miso under the motto "Examine the quality first." During the Kyoho Period (1716-1735) they started selling shoyu and the group changed its name to Miso Shoyu Nakama." Sasa Ju (Sasaki Jubei) joined this group in the year 1834 (Tempo 5) and worked to protect its quality and tradition. During the Taisho Period (1912-1916) the Japanese economy was strong and demand for miso and shoyu from the Sendai area increased. So in 1919 the members of the Miso Shoyu Nakama formed Sendai Miso Shoyu K.K., headed by a descendant of Sasaki Jubei with the same name. The current president of Sendai Miso Shoyu K.K. is the 8th generation named Sasaki Jubei.

Since the mid-1970s the company has exported quite a bit of its naturally fermented miso and shoyu to macrobiotic and natural foods companies in the USA and Europe. Address: Sendai Miso Shoyu Co. Ltd., Furujiro 1-5-1, Sendai 982, Japan.

7124. Van den Berg, H.; Dagnelie, P.C.; Staveren, W.A. van. 1988. Vitamin B-12 and seaweed. *Lancet* i(8579):242-43. Jan. 30. [6 ref]

• **Summary:** "Neither in fermented soya products (tempeh, shoyu, tamari, rice miso, barley miso, tofu), nor in other fermented products (amasake rice, umeboshi prunes) did we find measurable B-12 (all below 0.02 micrograms per 100 g)." Tests done using both radioassay and *Lactobacillus leichmanii* showed that Spirulina and Nori (*Porphyra tenera*) were the two best vegetarian sources tested. But the B-12 in the nori does not appear to be available to the body. Its

presence may be due to corrinoid-like B-12 analogues.

This study showed a tendency toward vitamin B-12 related anemia (not iron-related) in macrobiotic children who are generally vegan. A deficiency of vitamin B-12 in children can result in serious neurological damage. Address: 1. TNO-CIVO Toxicology and Nutrition Inst., 3700AJ Zeist, Netherlands; 2-3. Dep. of Human Nutrition, Agricultural Univ., Wageningen, Netherlands.

7125. **Product Name:** Tofu Teriyaki (Flavored Tofu).

Manufacturer's Name: Bud, Inc.

Manufacturer's Address: 1100 Wicomico St., Baltimore, MD 21230.

Date of Introduction: 1988. January.

Ingredients: Organic nigari tofu, soy sauce, honey & malt, spices.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product–Documentation: Label. 1988, Jan. (dated). 3.5 by 3 inches. Card stock. Brown and tan on white. Under English product name is the Chinese name: Wu hsiang doufu gan. “Keep refrigerated. Serving suggestions: Serve as is, cube or slice, mix with salad, stir-dry with vegetable.”

7126. Kagiya, Shogo; Aiba, T.; Kadowaki, K.; Mogi, K. 1988. New killer toxins of halophilic *Hansenula anomala*. *Agricultural and Biological Chemistry* 52(1):1-7. Jan. [23 ref]

• **Summary:** Two strains of killer yeasts, both identified as *Hansenula anomala*, were isolated from shoyu moromi. Both killer yeasts showed killer activity toward *Zygosaccharomyces rouxii* EA under high NaCl concentration conditions. Both toxins were glycoproteins. The killer activities of both toxins increased with increasing NaCl concentration. The killer activities of these strains were not abolished by cycloheximide treatment or by cultivation at 37°C. No plasmid was detected in either killer yeast. Address: Research Lab., Higeta Shoyu Co. Ltd., Choshi-shi, Chiba 288, Japan.

7127. Shurtleff, William; Aoyagi, Akiko. comps. 1988. Marketing soyfoods—Labels, ads, posters, and other graphics: Miso and soy sauce. Lafayette, California: Soyfoods Center. 148 leaves. Illust. No index. 28 cm. Series: Marketing soyfoods.

• **Summary:** This book is a collection of black-and-white photocopies of materials ranging in date from 1975 to 1986. The books in this series, each a unique collection of graphic materials, are designed for a number of purposes: (1) To serve as a source of ideas, ingredients, inspiration, legal specifications, and basic guidelines for companies in the process of developing their own products, designing their own graphic materials, and conceiving their own marketing strategies. (2) To document the tremendous diversity of

soyfoods products and the way that each is presented and marketed. (3) By arranging the materials in chronological sequence, to help document the development and history of new product categories and soyfood types, and with them the rise of the soyfoods industry and market in the Western World. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

7128. Abe, Keietsu; Hashiba, Hironaga; Uchida, Kinji. Assignors to Kikkoman Corp. (Noda, Japan). 1988. Novel variant and process for producing light colored soy sauce using such variant. *U.S. Patent* 4,722,846. Feb. 2. 7 p. Application filed 5 April 1985. [5 ref]

• **Summary:** The process uses a novel variant, *Pediococcus halophilus* 13-2, obtained by mutating *P. halophilus* X-160. It is capable of utilizing pentose sugars (which cause brown colors in soy sauce), but does not cause fermentation of D-glucose. The variant is added at the koji preparation stage, or in the early stage of brewing of soy sauce moromi. Address: 1-2. Noda, Japan; 3. Nagareyama, Japan.

7129. Belleme, John. 1988. San-J's natural tamari-shoyu (Interview). *SoyaScan Notes*. Feb. 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** San-J uses the same ingredients to make tamari and tamari-shoyu (15% wheat) here and in Japan, but here they use temperature controlled fermentation. They do not make a regular shoyu with equal parts wheat and soybeans. The closest thing to it is their “tamari-shoyu” containing 15% wheat. This product is made like tamari, using koji-dama (koji balls). Their tamari sells for \$6/gallon versus \$3/gallon for Kikkoman shoyu. Yet many big food processors prefer tamari. [Probably because the higher amino acid content gives a higher flavor profile. Less flavor is lost from evaporation of alcohol during heating. And the salt content is lower]. Eden will be selling all of San-J's U.S.-made tamari-shoyu under their label. Off the subject: The first crop of U.S.-grown nori is now ready in Washington state. Joel Dee of Edward & Sons Trading just moved to California. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

7130. Kainuma, Teisuke. 1988. Honolulu Sake Brewery Co. Ltd. (Interview). *SoyaScan Notes*. Feb. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Honolulu Sake Brewery Co. Ltd, 2150 Booth Rd., Honolulu, HI 96813. Phone: 808-537-9069. It was founded about 80 years ago by Mr. Sumida, who is no longer living. His grandson, Mr. Sumida, is retired and lives in Honolulu. The company used to be called Honolulu Sake and Ice Co. It was recently purchased by Takara Sake Co. (Nihon Takara Shuzo Kaisha). They presently make soy sauce, sake, nigori (thick white sake) and mirin. Good contacts are Ron Sumida and Mr. Kimura, an engineer. Mr. Takao Nihei,

who is retired in Honolulu, is the best man on the history. Phone: 808-537-1369. He wrote a history of the company and of sake in America, which was published in *Nippon Jozo Kyokai Zasshi* (1978, 1985). He might know if there was any amazake produced commercially in Hawaii. Mr. Kainuma has Mr. Nihei's articles on the history of sake, miso, and shoyu in Hawaii, which he will send. Takara makes sake in America. It contains 16% alcohol, by volume. In 1983 Takara purchased Numano Sake Co., which was founded in 1978 by Mr. Numano at 708 Addison St. in Berkeley, California. Address: V.P., Director of Production, Takara Sake USA Inc., 708 Addison St., Berkeley, California 94710. Phone: 415-540-8250.

7131. Nihei, Takao. 1988. History of amazake, sake, shoyu, and miso in Hawaii (Interview). *SoyaScan Notes*. Feb. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Phone interview followed by a letter dated Feb. 18. He has written a history of sake, miso, and shoyu in Hawaii and America (5 installments), which he will send. Sake was first made in Hawaii in 1908 by Honolulu Shuzo Seizo Gaisha; the brand was Takara Masamune. Mr. Nihei did research on shoyu and miso at the National Fermentation Lab (Jozo Shikenjo) in Japan with Dr. Nakano and knows our work. From there he got into sake. He doesn't know much about amazake but thinks that there are no publications on it and there was never a commercial amazake company in Hawaii. The reason for that is that since long ago everybody there has made amazake from sake lees, perhaps since 1908, and not from koji, though koji was sold before World War II. He moved to Hawaii in 1950 and many people were making amazake from sake lees at that time. They mix the sake lees with hot water, plus sugar and a little grated ginger. His wife's method is his favorite.

Recipe #1, Hawaiian Style Amazake from Glutinous Rice and Sake Lees: Cook 1 cup glutinous rice (incorrectly called "sweet rice" or "mochi rice") with 3 cups water to make a porridge or gruel (*okayu*). Turn off heat and leave in covered pan for 10 minutes. When it is still fairly hot (50-55°C; 122-131°F), mix in 1 lb sake lees (sake kasu, which still contain some enzymes). Wrap the pot with towels or a blanket to keep the heat at about 130-140°F (this is important) and allow to incubate in a warm place for about 2-3 hours. When the mixture becomes soft, add 1 cup sugar and 3 cups hot water, then bring to a boil over low heat. To serve, mix 1 part of this base with 2 parts water; Enjoy hot or cold. Refrigerate leftovers in a sealed glass jar.

Recipe #2, Quick and Easy Hawaiian Style Amazake from Sake Lees (without Glutinous Rice). Mix 3 cups hot water with ¼ pound (about ¾ cup) sake lees. Let it stand for a while until the lees become soft. Heat on low heat, stirring gently until lumps dissolve. Stir in ½ to ¾ cup sugar and ¼ teaspoon salt. When it comes to a boil, add a little grated ginger juice immediately, and serve. Address: 422 Uhini

Place, Honolulu, HI 96813. Phone: 808-537-1369.

7132. Belleme, John. 1988. Update on miso in America. How about amazake as a soymilk sweetener? (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mitoku (Mr. Kazama and Chris Dawson) is considering a joint venture with Sendai Miso Shoyu of a miso plant on the West Coast of the USA. This is still very tentative. They are also considering making amazake. But about 2 years ago Miyako Oriental Foods increased their miso production capacity. They can probably make over 1 million pounds a year now. It was about 600,000 lb/year. Fujiwara Brewing Co. in Okayama, which makes equipment for miso and soy sauce companies, supplied the equipment to Miyako. The company San-J finally used to build their tamari plant and supply the equipment was Fujiwara's competitor, Nagata. Steve Earle said this was the same company that had just helped expand the Miyako plant. According to the people at Ohsawa-America, Mr. Kitani, the Japanese man who makes Yamaki Shoyu, and Bob Kennedy, formerly of Chico-San are planning a miso plant in the USA, probably with automatic koji equipment.

John feels that sales of miso in America have slowed down and that if new companies enter the market, it will be oversupplied. At American Miso Co. his maximum capacity was about 400,000 lb/year. The volume hasn't changed much in the past few years. Christian Elwell at South River Miso Co. has a capacity for about 60,000 lb/year, which he hasn't reached. Both these are more expensive than Miyako (\$4.49 for American Miso white miso, Christian's is more, and Miyako's is about \$2.85/lb, or only 63% as much). He suggests: How about amazake as a sweetener for soymilk? It would replace barley malt and give the soymilk more body, kind of like a shake. Then you can put rice on the label. Great idea! Address: Route 5, Box 258, Rutherfordton, North Carolina 28139. Phone: 704-749-9537.

7133. Roller, Ron. 1988. Eden Foods, San-J, and tamari shoyu (Interview). *SoyaScan Notes*. Feb. 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Eden has negotiated with San-J for San-J to make a private label soy sauce with less wheat than regular shoyu. This is an exclusive agreement, but the details have not been completely finalized. They make their koji from balls rather than loose koji. Now they are making soybean meal tamari for their industrial customers. Eden's product will be made from whole soybeans, not meal. Everything they bottle is made from whole soybeans. They want to get their tamari production going before they think about making shoyu. Tamari will be the primary product. But to cover their overhead, they will have to cut into the shoyu market. They have managed to capture a large percentage of the bulk soy sauce market with their tamari. Japan Foods

(which is owned by Kikkoman) is going to distribute their tamari. Apparently the more wheat a soy sauce has, the longer it takes to ferment. They use temperature control with all their soy sauce. They say it's the most modern fermented soy sauce factory in the world. He has visited the plant. Eden still imports a real shoyu from Marushima, and plans to continue it. But down the road they may ask San-J to make it for them. Now is much too early. A big question is what to call the new product that contains about 20% wheat. San-J plans to call it "shoyu," not "tamari shoyu." It's kind of an in-between product. They get their wheat and soybeans from Virginia. Address: Director of Purchasing, Eden Foods, Clinton, Michigan.

7134. Product Name: Premier Japan Natural Teriyaki. Barbecue Sauce & Marinade.

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: 1115 Lousons Rd., P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Shoyu soy sauce, apple cider vinegar, rice cooking wine (sake), water, apple juice concentrate, onion juice, ginger puree, natural herbs & spices, sea salt, mushroom & seaweed extract.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product–Documentation: Label. 1988. 6.5 by 3.5 inches. Glossy paper. Red, gold, orange, and black. Oval silhouette of Kyoto pagoda against the sunset. "Gourmet International Cuisine. Nothing artificial. No MSG. Fruit Juice Sweetened." The Story of Premier Japan. Designed to introduce traditional Japanese cuisine to the world. "Oriental barbecue sauce. Perfect for basting, grilling & tabletop use. Bakes & broils fish, chicken & tofu to perfection. A marvelous marinade too." Spot in Whole Foods. 1988. Feb. p. 58. Soya Newsletter. 1988. March/April. p. 8. These four new shoyu-based products are marinating- and dipping sauces, and dressings, part of the Premier Japan line of Gourmet Natural Products.

7135. Product Name: The Wizard's Sizzle. Spicy Barbecue Sauce.

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Tomatoes, cider vinegar, fruit juice concentrate, Barbados molasses, water, canola oil, cayenne pepper mash, shoyu soy sauce, miso, onion juice, garlic juice, The Wizard's magical blend of natural herbs and spices, sesame oil, sea salt, hickory smoke, seaweed extract.

Wt/Vol., Packaging, Price: 12 fluid oz (354 ml).

How Stored: Shelf stable.

New Product–Documentation: This was formerly Smoky Mountain Sizzlin', made by American Natural Foods and introduced in Sept. 1984. Label. 1988. 6 by 3 inches. Gummed glossy paper. Yellow, red purple, brown, black, and white. Illustration of a bearded wizard with hat, wand, and purple robe. Plus a dragon with fiery breath. "Makes any meal sizzle with sure-fire magic. Use your imagination and watch the magic make foods disappear. Contains nothing the least bit artificial or phony. Shake well and wake the dragon up. Wizard Baldour."

7136. Product Name: The Wizard's Catch Up. Spicy Catsup.

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Tomatoes, cider vinegar, fruit juice concentrate, water, shoyu soy sauce, The Wizard's magical blend of natural herbs and spices, sea salt, seaweed extract.

Wt/Vol., Packaging, Price: 12 fluid oz (354 ml).

How Stored: Shelf stable.

New Product–Documentation: Label. 1988. 6 by 3 inches. Gummed glossy paper. Yellow, red purple, brown, black, and white. Illustration of a bearded wizard with hat, wand, and purple robe. Plus a dragon with fiery breath. "Catch up with today's new natural cuisine. Everything you really want on it—is in it. Use your imagination and watch the magic make foods disappear. Contains nothing the least bit artificial or phony. Shake well and wake the dragon up. Wizard Baldour."

7137. Product Name: Premier Japan Natural Sukiyaki. Exotic Sweet Cooking Sauce.

Manufacturer's Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer's Address: 1115 Lousons Rd., P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Shoyu soy sauce, apple cider vinegar, rice cooking wine (sake), fruit juice concentrate, water, onion juice, garlic juice, toasted sesame oil, mushroom & seaweed extract.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product–Documentation: Label. 1988. 6.5 by 3.5 inches. Glossy paper. Red, gold, orange, and black. Oval silhouette of Kyoto pagoda against the sunset. "Gourmet International Cuisine. Nothing artificial. No MSG. Fruit Juice Sweetened." The Story of Premier Japan. Designed to introduce traditional Japanese cuisine to the world. "The exotic sweet character of this oriental cooking sauce is

perfect for wok cooking and all stir fries. Sukiyaki balances strong tastes while enhancing subtle flavors. An elegant sauce.” Spot in Whole Foods. 1988. Feb. p. 58. Soya Newsletter. 1988. March/April. p. 8. These four new shoyu-based products are marinating- and dipping sauces, and dressings, part of the Premier Japan line of Gourmet Natural Products.

7138. Product Name: Premier Japan Natural Ginger Tamari. Classic Sauce & Marinade.

Manufacturer’s Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer’s Address: 1115 Lousons Rd., P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Apple cider vinegar, shoyu soy sauce, rice cooking wine (sake), water, ginger puree, fruit juice concentrate, onion juice, sea salt, mushroom & seaweed extract.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product–Documentation: Label. 1988. 6.5 by 3.5 inches. Glossy paper. Red, gold, orange, and black. Oval silhouette of Kyoto pagoda against the sunset. “Gourmet International Cuisine. Nothing artificial. No MSG. Fruit Juice Sweetened. The Story of Premier Japan. Designed to introduce traditional Japanese cuisine to the world... A classic dipping sauce for tempura. Use full strength as a dressing for steamed vegetables or as a marinade for broiling seafood, chicken or tofu.”

Spot in Whole Foods. 1988. Feb. p. 58. Soya Newsletter. 1988. March/April. p. 8. These four new shoyu-based products are marinating- and dipping sauces, and dressings, part of the Premier Japan line of Gourmet Natural Products.

7139. Product Name: Premier Japan Natural Sesame Sauce. Gourmet Dip & Dressing.

Manufacturer’s Name: Edward & Sons Trading Co. (Importer). Made in Japan.

Manufacturer’s Address: 1115 Lousons Rd., P.O. Box 3150, Union, NJ 07083. Phone: 201-964-8176.

Date of Introduction: 1988. February.

Ingredients: Water, shoyu soy sauce, rice cooking wine (sake), sesame tahini, fruit juice concentrate, soy oil, rice vinegar, onion juice, toasted sesame oil, miso, arrowroot, sea salt, guar gum, mushroom & seaweed extract.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product–Documentation: Label. 1988. 6.5 by 3.5 inches. Glossy paper. Red, gold, orange, and black. Oval silhouette of Kyoto pagoda against the sunset. “Gourmet International Cuisine. Nothing artificial. No MSG. Fruit Juice Sweetened. The Story of Premier Japan. Designed to introduce traditional Japanese cuisine to the world. “Japan’s

gourmet secret for bakes and broils. Use as a dressing for rice, vegetables and salads. Also great as a dip for chips and hors d’oeuvres.” Chicken & tofu to perfection. A marvelous marinade too.” Spot in Whole Foods. 1988. Feb. p. 58. Soya Newsletter. 1988. March/April. p. 8. These four new shoyu-based products are marinating- and dipping sauces, and dressings, part of the Premier Japan line of Gourmet Natural Products.

7140. Elliott, James G. 1988. Consumer attitudes regarding soy products. In: L. McCann, ed. 1988. Soybean Utilization Alternatives. St. Paul, MN: Univ. of Minnesota Center for Alternative Crops and Products. vi + 429 p. See p. 381-91. [3 ref]

• **Summary:** Discusses: Consumer awareness of soy foods. Consumers’ awareness of manufacturers’ use of soy protein. Consumer willingness to purchase meat products containing soy protein. People were asked, when you think of foods which are made from soybeans, what products come to mind? Unaided awareness of soyfoods among consumers was low, only 4 in 10 were able to name a specific soyfood on a top-of-the-mind basis. However, aided awareness was significantly higher. Soy sauce and soybean oil had the highest levels of aided awareness among consumers at 94% and 77% respectively. Tofu, soymilk, margarine, and soy nuts registered moderate levels of aided awareness at 45%, 38%, 38%, and 31% respectively. Tofutti came in next at 21% and miso came in last at 10%.

When asked if they had “ever tried” these products, of the eight soyfoods mentioned, soy sauce demonstrated the highest trial level at 75%. All other products “ever tried” were 20% or less. Respondents who had not tried a particular food product made from soybeans were asked if they would be willing to do so. Expressed willingness to try was in the 60% to 70% range. It was the highest for soybean oil, soy nuts, margarine, tofu and Tofutti.

65% of those surveyed responded positively when asked, “have you heard of soy protein being included in certain food products?” 35% were unaware. Among consumers who were aware that manufacturers use soy protein, 60% said that they were definitely using foods that contain soy protein, or believed that they were; 29% said they were not using them; and 11% didn’t know. When asked, “Does the fact that a food manufacturer uses soy protein in its products change your feeling about the company?,” 80% stated no difference; 8% stated that they felt better; and 12% said that they felt worse. Address: Manager of scientific communications, Protein Technologies International, St. Louis, Missouri.

7141. Golbitz, Peter. 1988. Whole bean soy products. In: L. McCann, ed. 1988. Soybean Utilization Alternatives. St. Paul, MN: Univ. of Minnesota Center for Alternative Crops and Products. vi + 429 p. See p. 325-31.

• **Summary:** Discusses: Tofu. Soymilk. Yuba or soymilk film. Fresh green soybeans. Whole dry soybeans. Soynuts. Soy sprouts. Tempeh. Soy sauce. Miso. Address: Soyatech, Bar Harbor, Maine.

7142. *Harvard Medical School Health Letter*. 1988. Follow-up and feedback: Soy sauce and fish (Substances favoring nitrosamine formation). 13:8. Feb. [1 ref]

• **Summary:** “Our article on nitrates and cancer (June 1987) mentioned that ‘some types of preserved fish and certain varieties of Japanese soy sauce’ are among the foodstuffs containing substances that favor formation of nitrosamines. Nitrosamines have been implicated in carcinogenesis, and it has been suggested that a high dietary exposure to them might promote cancer of the stomach (which is increasingly rare in the United States, but very common in Japan). It has also been suggested that their formation from nitrites can be inhibited by the actions of vitamin C and vitamin E.

“Several readers, understandably, wrote to ask which soy sauces and fish have this characteristic. In the case of soy sauces, we don’t know. The Japanese researchers who reported the finding identified the products they studied only by country and state of origin. Several soy sauces produced in the state of Chiba, Japan, and one from the state of Mie, converted nitrite to nitrosamine at a high rate, and the resulting material had a high score on a laboratory test of bacterial mutation (a version of the Ames test), which is believed to correlate with carcinogenic potential. Soy sauces produced in other Japanese states and Hawaii, and most produced in the United States, yielded less nitrosamine and had much lower scores. One exception, from Wisconsin, was very high on both counts. But it was only identified as ‘soy sauce M.’”

7143. Henry Ford Estate. 1988. Menu of dinner served at Ford Exhibit, Century of Progress. August 17, 1934. Dearborn, Michigan. 1 p.

• **Summary:** This meal was served again by chef Jan Willemse on 29 Feb. 1988.—Tomato Juice Seasoned with Soy Bean Sauce—Salted Soy Beans—Celery Stuffed with Soy Bean Cheese—Puree of Soy Bean—Soy Bean Cracker—Soy Bean Croquettes with Tomato Sauce—Buttered Green Soy Beans—Pineapple Ring with Soy Bean Cheese and Soy Bean Dressing—Soy Bean Bread with Soy Bean Relish—Soy Bean Macaroons—Apple Pie (Soy Bean Crust)—Cocoa with Soy Bean Milk—Soy Bean Coffee—Assorted Soy Bean Cookies—Soy Bean Cakes—Assorted Soy Bean Candy—Chef Jan Willemse, food items and preparation, courtesy of the Miesel/Sysco Food Service Company of Canton, Michigan.

Note: This menu seems to differ slightly from the original 1934 menu in that it omits one dish (Soy Bean Biscuit with Soy Bean Butter) and replaces it with another (Soy Bean Macaroons). Address: Dearborn, Michigan.

7144. Kikkoman International Inc. 1988. Kikkoman stands on ceremony (Ad). *Prepared Foods* 157(2):3. Feb.

• **Summary:** This full-page color ad shows two shallow shoyu tasting cups on a tray. “We would consider it an honor to perform Soy Ceremony for you personally. To see, smell and taste the Kikkoman difference contact Kaz Takei, Kikkoman International, Inc.,” San Francisco.

“Choose from: Regular Brewed Soy, Reduced Salt Soy, Preservative Free, and dehydrated Soy Sauces. Kikkoman provides technical advice and prompt service from over 20 U.S. distribution centers.”

Across bottom of ad: “Since 1630. Kikkoman. Good taste is our business.”

7145. Lee, Byeong-Ho; Ryu, B.H.; Choi, S.H.; Kim, K.H.; Kim, H.S.; Chae, Y.Z. 1988. [Protoplast fusion between *Zygosaccharomyces rouxii* and *Saccharomyces cerevisiae* isolated from soy sauce mash]. *Hanguk Sikp'um Kwahakhoe Chi (Korean J. of Food Science and Technology)* 20(2):164-69. [33 ref. Kor; eng]

• **Summary:** The protoplast fusion was undertaken in order to breed a new and improved yeast for use in soy sauce fermentation. Address: Dep. of Food and Nutrition, Dongeui Univ., 24 Gaya-dong, Pusanjin-gu, Pusan 614-010, South Korea.

7146. *Natural Foods Merchandiser*. 1988. Soyfoods import costs rise as dollar declines. Feb. p. 32.

• **Summary:** Discusses techniques used by Westbrae, Edward and Sons Trading Co., Eden Foods, and San-J International to try to deal with the falling value of the dollar against the yen. The dollar began its fall in September 1985. In the past 18 months, the dollar has been devalued almost 40% against the yen, making Japanese imports about 40% more expensive. To try to keep consumer prices as low as possible, some companies try to absorb the cost increases themselves, some ask Japanese manufacturers to help, and some (such as Eden Foods, Westbrae, and San-J) start to make products in the USA.

7147. *Southern Supermarketing (Birmingham, Alabama)*. 1988. Kikkoman International—After more than 300 years, the success continues. Feb. p. 6-7.

• **Summary:** In the last two years, the South has shown the strongest growth record for Kikkoman products as compared to all other regions of the country. The Kikkoman method of production is a six-month process as compared to about a week required for the blended mixture (HVP). Kikkoman is not only the world’s oldest brand of naturally-brewed soy sauce—it is also the world’s largest selling soy sauce. In Japan, the average person consumes approximately 2.6 gallons of soy sauce a year. Kikkoman’s share of this huge market, where there are about 3,000 soy manufacturers, is approximately 30%. In 1957, Tom Yoshinaga pioneered

Kikkoman International Inc. in the U.S. and began opening regional offices like stepping stones.

Today, Kikkoman International has five regional offices in San Francisco, Los Angeles, New York, Chicago, and Atlanta. When Kikkoman first entered the U.S. market in the 1950s, the product was very unique in terms of its positioning because it had “All Purpose” printed on the label. Those two words were an important factor contributing to the success of the brand. In 1961, Kikkoman pioneered the bottled teriyaki sauce market in the U.S. Kikkoman introduced Teriyaki Baste & Glaze in 1984. Baste & Glaze is a thick and richly flavored teriyaki sauce. In 1982 Kikkoman developed Lite Soy Sauce with 40% less salt. This product represents about 20+% of Kikkoman’s total soy sauce volume. Similarly, in 1986 Kikkoman introduced Stir-Fry Sauce.

7148. Earle, Steve. 1988. Re: Answers to questions about history of San Jirushi. Letter to William Shurtleff at Soyfoods Center, March 7. 3 p. Typed, without signature on letterhead.

• **Summary:** No history per se of San-Jirushi has ever been written, however the Sato family has many records of historical interest. The original company, named Minato-ya (“Harbor Company”), was a trading house that traded up and down the rivers that empty into the Bay of Ise at Kuwana. Among the wares traded were salt, miso, and tamari. The miso and tamari were brewed in one of their warehouses (kura). Later this became Minato-ya’s principal business as the shipping trade moved north to Nagoya.

“There are indications that Minato-ya was already in operation at the beginning of the Edo period (1601), however it is not clear when it began producing miso and tamari as the earliest records were lost when the Minato-ya kuras were burned due to fire bombings in the Second World War...

“The company name was changed in 1909 from ‘Minato-ya’ to ‘Sato Shinnosuke Shoten’ and finally to ‘San-Jirushi Brewing Corporation’ in 1963.

“The original address was Ise-no-kuni, Kuwana-gun, Kuwana-cho Ooaza Senba.

“The original brand/trade name was Yamasan. The name and mark [three horizontal lines with a roof-like mountain over the top] symbolized Mount Tado (upriver just northwest of Kuwana) and the three rivers, Kiso, Ibi and Nagara...

“The mountain was dropped from the mark and the name changed to San-Jirushi in 1909. This name was officially registered in 1912.

“The original products were called ‘miso’ and ‘tamari’ (not ‘tamari-shoyu’). The original ingredients of Minato-ya’s miso and tamari were soybeans, water and salt. No wheat was used. There was also originally no *kosen* (roasted barley flour) used with the seed koji. This koji was called ‘tomo-koji’ and was made by obtaining koji-dama (half-fist sized balls of compressed, cooked soybeans) which were

then hung in straw sacks over the rafters in the kura loft to incubate. In these days there were apparently tradesmen, much like the ‘toushi’ in sake brewing, who made a circuit of miso and tamari brewers, bringing with them tomo-koji. There is still one employee of San-Jirushi who can recall making koji by this method in the old San-Jirushi kura.

“San-Jirushi began using seed koji [koji starter] in 1933. Koji-ya Sanzaemon, the koji house that still supplies San Jirushi today, has been in operation continuously since the Muromachi period supplying seed koji for sake manufacture, however this technology was not applied to miso and shoyu manufacture until quite late (Kikkoman and the four major shoyu brand makers began using seed koji at about this same time).” Address: UN Park Building, 7th Floor, Ebisu-Nishi 1-19-6, Shibuya-ku, Tokyo 150, Japan. Phone: 03-780-5933.

7149. Cooperman, Alan. 1988. Yum Buns graduate to larger quarters. *Berkshire Eagle* (Pittsfield, Massachusetts). March 27.

• **Summary:** Pittsfield “Special T’s Bakery, home of the Yum Bun, has moved from 194 Fenn St. to larger quarters in the Oasis Plaza at 95 West Housatonic St.”

“The bakery’s most unusual and best-known produce is still the Yum Bun, a vegetable sandwich described by the Theriault sisters (Louise Theriault Blake and Linda A. Theriault) as ‘tamari-seasoned vegetables stuffed into a whole wheat crust with almonds and tofu.’”

7150. *Essen und Trinken* (Hamburg, W. Germany). 1988. Tofu-Diaet [Tofu diet]. 3:112-14, 116, 118, 120, 122, 124, 126, 128-30, 132. March. [Ger]

• **Summary:** A spectacular article preceded by a 1-page praiseful editorial on tofu titled “The Frog Becomes a Prince: Tofu Reveals Charm,” by Angelika Jahr, the head editor of “Eating and Drinking.” The first two-thirds of the article is in color, consisting mostly for large color photos of tofu dishes, with calorie counts; the last third is the recipes. There are also brief descriptions of miso, shoyu, and gomasio [gomashio] as typical Asian seasonings. Address: Postfach 30 20 40, 2000 Hamburg 36. Phone: 040 41 18(1).

7151. Hondo, Satoshi; Yasuhira, Hitomi. 1988. Taipu no kotonaru tane kôji-kin ni yoru miso no shijô. III. Tane kôji-kin to miso hinshitsu no kankei [Fermentation of miso using various koji molds. III. Effect of koji mold on the quality of miso]. *Shinshu Miso Kenkyusho Kenkyu Hokoku* (Report of the Shinshu-Miso Research Inst.) No. 29. p. 14-19. [14 ref. Jap; eng]

• **Summary:** Koji variants used to produce rice miso, barley miso, soybean miso, sake, shochu, soy sauce, etc. (*Aspergillus oryzae* and *A. Sojiae*) were evaluated, as regards such attributes as growth rate, fermentation products, enzymic activity and sensory quality.

7152. Jangtoh Soontofu Restaurant. 1988. March. New soyfoods restaurant or deli. 4451 Beverly Blvd., Los Angeles, California (in the Beverly Hobart Plaza).

• **Summary:** This restaurant, which opened in March 1988, is geared for Koreans. Signs outside are written in Hangul, the Korean alphabet. "The restaurant serves only two dishes—*soontofu* and *kongbiji*, both of them soups. *Soontofu* is made with tofu, *kongbiji* with ground soybeans. That may sound like an extremely limited menu, but there are variations."

"Jangtoh makes its own tofu, producing several batches a day. If you've never tasted warm, soft, fresh tofu, don't miss the opportunity to try it here. A small bowl of this cloud-like substance comes with each meal. The kitchen garnishes it with a bit of chopped green onion, dried seaweed and sesame seeds. Then you spoon on a wonderful sesame-soy sauce-garlic condiment from a jar on the table."

Jangtoh, owned by Bu-A and Brian Chung, opened in March 1988.

Jangtoh Soontofu Restaurant, 4451 Beverly Blvd., Los Angeles; (213) 665-8664. Address: Los Angeles, California. Phone: 213-665-8664.

7153. *SoyaScan Notes*. 1988. New Trend: "Big Food" enters the U.S. tofu market, but in an unexpected way—Via Japan (Overview). March. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** For the past 5 years or so, U.S. tofu companies and industry watchers have been speculating as to when "Big Food" would jump into the U.S. tofu market. They had in mind big U.S. food companies such as General Foods, Kraft, etc. But at the start of this year, 1988, Morinaga, Japan's third largest manufacturer of dairy products (FY 1982 sales were \$1,171 million dollars) began the largest promotional campaign for tofu ever conducted in America, with attractive, full-page color ads for at least 3 months in a row in major natural foods magazines. The product is now showing up in many natural food stores and sales are skyrocketing. And Kikkoman, the world's largest maker of soy sauce and one of Japan's biggest food companies, is now also aggressively selling tofu. Both companies make their tofu in Japan. The big question now is when they will establish U.S. plants.

7154. *Taste (Kikkoman, Japan)*. 1988. New frontiers in Hokkaido [Kikkoman's new shoyu plant in Chitose]. 2(1):8. March.

• **Summary:** The Kikkoman's third, and newest, domestic soy sauce factory is in Hokkaido. The new plant was finished in early 1987, over half a century after the construction of the second Takasago plant near Osaka. Just as Kikkoman's first plant near Noda City was located amid wheat and soybean fields, the choice of this plant near Chitose was partly influenced by the ready supplies of wheat nearby. (The soybeans are imported from the U.S.) The factory is

27,300-square meters with four stories. Only fifty employees are on hand to man two large control rooms. They have also applied high technology to microorganisms used in the fermentation. The Chitose plant was singled out for a national award by the Nihon Keizai Shinbun last October. Kikkoman, one of Japan's leaders in biotechnology, demonstrated the results of its latest research on bioreactors, designed to reduce the time needed to produce soy sauce. Other companies promoted the versatility of their soybean-related food products, such as cheese-flavored tofu and tofu ice cream.

7155. *Taste (Kikkoman, Japan)*. 1988. Secrets of sukiyaki. 2(1):6-7. March.

• **Summary:** Historically, meat eating in Japan tended to fluctuate with the religious climate of the times. Before the introduction of Buddhism into the country (in A.D. 676) mountain-dwellers hunted for their food just as fishermen relied on fish for their meals. However, the arrival of the new faith soon banished meat from the daily diet. (The nobility, however, continued to consume meat under the guise of medicine.) Today, sukiyaki is prepared in two distinct regional styles; in Kanto (Toko-Yokohama) and in Kansai (Osaka-Kyoto). In Kansai, the ritualistic order of the meal is emphasized.

7156. Tochikura, Tatsurokuro. comp. and ed. 1988. *Shôyu no kagaku to gijutsu* [The food science and technology of shoyu]. Brewing Society of Japan, Takinogawa 2-6-30, Kitaku, Tokyo, Japan. 571 p. Illust. Index. 21 cm. [1067 ref. Jap]

• **Summary:** The best book of its kind seen up to this time. Contents: 1. Raw materials and their processing. 2. Making koji. 3. Brewing. 4. Microorganisms. 5. Making products and processing. 6. Components. 7. Browning reaction. 8. Preventing infestation and mold. 9. Product quality control. 10. Nutrition and food sanitation. 11. Various types of shoyu. 12. HVP (Amino acid liquid). 13. Seasoning processes. 14. Bottling and packaging. 15. New technology. 16. Waste water treatment and environment preservation. 17. JAS and other laws and regulations. 18. Shoyu around the world. Address: Prof. of Food Science, Kyoto Univ., Japan.

7157. **Product Name:** Mt. Fuji Mustard with Tamari & Wasabi.

Manufacturer's Name: Westbrae Natural Foods (Product Developer/Distributor).

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1988. March.

Ingredients: Mustard seeds, vinegar, tamari (soybeans, water, salt), wasabi (horseradish), cinnamon, allspice.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product—Documentation: Westbrae Newsletter. 1988.

Talk with Megan Eoyang. Released in March. A hot mustard. Label. 1988. Front and back panels. 2.5 by 2.5 inches. with bottom slightly wider than top and rounded corners. Glossy paper. Blue, green, and yellow on white with illustration of Mt. Fuji above a landscape. "A traditional 'hot' mustard with a hint of the Orient. Appropriate for every dish!" Talk with Gordon Bennett. 1988. Aug. 26. This product is made (mixed) in America, but the real Japanese wasabi powder (expensive!) and soy sauce used in it are imported from Japan. It also contains horseradish.

7158. *Daily Camera (Boulder, Colorado)*. 1988. Soy sensation: White Wave introduces new products for 1988. April 5.

• **Summary:** Coming this year from White Wave are sesame-peanut tempeh, teriyaki tempeh burger, sloppy joe tempeh, and a soy-based hot dog. Last year, White Wave reached \$2 million in revenue.

7159. Mori, Haruhiko. 1988. Re: Noda Industrial Scientific Laboratories / Noda Institute for Scientific Research. Letter to William Shurtleff at Soyfoods Center, April 30. 1 p. Typed, with signature on letterhead.

• **Summary:** Noda Industrial Scientific Laboratories (also known as Noda Industrial and Scientific Laboratory, Noda Sangyo Kagaku Kenkyusho) is now generally known as Noda Institute for Scientific Research. It is referred to as NISL in the culture collection list of the Institute of Fermentation, Osaka (IFO).

The institute, which is still active, was founded in 1942 by Kikkoman Corporation, and exists to do basic investigation in the fields of food science and the life sciences, especially microbiology, enzymology, biochemistry, genetic engineering, etc. Address: Noda Inst. for Scientific Research, 399 Noda, Noda-Shi, Chiba-ken 278, Japan. Phone: 0471-23-5568.

7160. **Product Name:** Pacific Gardens Original Tempeh Pasta Sauce with Chunky Vegetables, and Garlic & Mushroom Pasta Sauce with Marinated Tempeh.

Manufacturer's Name: Associated Cooperatives, dba Twin Pines Distributing (Marketer-Distributor).

Manufacturer's Address: 322 Harbour Way, Suite 25, Richmond, CA 94801. Phone: 415-232-1111.

Date of Introduction: 1988. April.

Ingredients: Original Tempeh: Italian plum tomatoes, tomato paste, water, tempeh, fresh onions, fresh celery, fresh bell peppers, fresh carrots, fresh zucchini, apple cider vinegar, natural herbs and spices.

Wt/Vol., Packaging, Price: 32 oz jar. 12 per case.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Soya Newsletter. 1988. March/April. p. 8. Garlic & Mushroom contains the above ingredients plus marinated tempeh, soy sauce, garlic, and

mushrooms. Talk with Terry Baird of Assoc. Co-ops. 1988. July 15. The products will be introduced July 1. Pacific Gardens is the brand and Twin Pines is the distributor. Tempeh is made by White Wave. It emphasizes organic. The products are made by a co-packer. Labels. 1988. Sept. Sent by Lonnie Stromnes. 13 by 3 inches. Red, yellow, green, tan, black, and white. "100% Natural. Better for you. Garden Style Recipe. No added salt, No oil, No sugar, No animal products. Nutritious tempeh in every bite!"

Talk with Knute Loken of Surata. 1990. March 6. Surata makes the tempeh for this product. Associated Co-ops has moved to Las Vegas.

7161. Business Trend Analysts, Inc. 1988. The market for salad dressings, sauces and condiments. 2171 Jericho Turnpike, Commack, NY 11725. 260 p. Price: \$750.

• **Summary:** Sauces include the following table sauces: Ketchup, meat (incl. steak, worcestershire, vegetable, and seafood sauces), barbecue, Mexican (incl. chili, taco, enchilada, etc.), prepared mustard, and soy and teriyaki. Gravies, dips, and dry sauce mixes are not included. Ketchup is the largest segment, about 40% of the total. It has grown at 4.6% annually from 1982-87, but growing faster during the same time are soy and teriyaki sauce (10.3%), barbecue sauce (11.4%), and Mexican sauce (9.2%). In 1977 soy and teriyaki revenues represented 3.1% of total sauce sales, compared to 6.7% in 1987. BTA expects the market to grow at 8.9% annually reaching \$280 million in 1997. Kikkoman, the leading producer of soy sauce in the U.S. sells most of its product in the western portion of the country. In 1987 it launched a national ad campaign to expand to the rest of the country.

According to U.S. Dept. of Commerce statistics, sales of soy and teriyaki sauce (in million dollars) and market percentage have grown from \$7.7 and 1.8% in 1972, to \$25.0 and 3.1% in 1977, to \$50.1 and 4.9% in 1980, to \$98.1 and 6.0% in 1985, and to an estimated \$132.0 and 7.0% in 1988. Other estimated market shares in 1988 were ketchup 39.2%, meat 19.6%, barbecue 14.4%, Mexican 12.1%, and prepared mustard 7.8%. Thus soy and teriyaki have the smallest share.

But the growth rate for soy and teriyaki sales have been slowing, in part due to lower inflation rates. The rate was 26.6% in 1972-77, 24.2% in 1977-82, 10.3% in 1982-87, and a projected 8.9% in 1987-97. In this latter period the growth rate is higher than for any other sauce category.

In 1987 for leading U.S. soy sauce producers, sales and market share were: Kikkoman Foods Inc. \$49 million and 41% market share; La Choy Food Products (Subsidiary Beatrice/Hunt-Wesson) \$43 million and 36%; Nabisco Brands Inc. (Subsidiary RJR Nabisco), maker of Chun King, \$12 million and 10%. All others, \$16 million and 13%. Note: Chun King Frozen Foods line was sold to ConAgra, Inc. (Omaha, Nebraska) in 1987. Nabisco still owns the soy sauce and other packaged goods. the U.S. soy and teriyaki market,

an estimated 41%, with 1987 sales of \$49 million.

According to Department of commerce statistics, U.S. imports of “thin” soy sauce have grown steadily from 13.3 million lb in 1978, to 15.9 in 1980, to 29.6 in 1985, and an estimated 40.0 in 1987. In 1986 roughly 38.9% of this came from Japan, followed by 26.9% from Hong Kong, 12.8% from China, 12.0% from Taiwan, and 9.3% from Others (incl. South Korea, Canada, and Philippines). These imports of 32.5 million lb in 1986 were worth \$13.9 million. Between 1980 and 1986 roughly 2,500 lb/year of soy sauce have been exported, a negligible amount. The main destinations were West Germany, Canada, and Mexico. Address: Commack, New York.

7162. Golbitz, Peter. 1988. Long life tofu: Wave of the future? *Soya Newsletter (Bar Harbor, Maine)*. March/April. p. 7, 12.

• **Summary:** Morinaga Nutritional Foods, Inc., Los Angeles, California, and Kikkoman International Inc. of San Francisco, California, are both marketing long-life tofu, produced in Japan exclusively for export to the U.S. and other countries. (A Japanese governmental agency has forbidden the companies to market these products in Japan for fear that they threaten the existence of the fresh tofu industry, which consists of at least 30,000, small and localized, tofu shops.)

Kikkoman’s product, Kikkoman Tofu, is also produced using a patented, though different process, packed in a foil retort pack. The product is produced by Kikkoman Corporation, at their Noda, Japan plant. The principle behind both products is really very simple. Cooled liquid soymilk is mixed with a heat reactive coagulant, packaged in a container, heated to activate the coagulant and then cooled. The major difference between Kikkoman’s and Morinaga’s product is when and where the sterilization of the package and product occurs.

Morinaga’s process consists of: sterilizing the soymilk with UHT processing, cooling, adding coagulants glucono delta-lactone (GDL) and calcium chloride, filling into a sterile Tetra Pak, sealing, heating the package with water just hot enough to activate the GDL, and then cooling.

With the Kikkoman Tofu, the sterilization of the product is achieved after packaging. Coagulants GDL and calcium chloride are added. It is then filled into a retort pack, sealed, and heated at temperatures high enough to activate the coagulant and sterilize the finished product. Both the Kikkoman and the Morinaga tofus tend to be slightly more expensive than regular tofu. Silken (unpressed) tofu is unfamiliar in the U.S., and no company has yet come out with a pressed tofu that doesn’t require any refrigeration.

Sales of Mori-Nu are up between 40 and 50% over last year, and unit sales of the product put Morinaga among the top five tofu companies in the U.S. Kikkoman’s product has been on the market for more than a year and is also

reportedly making healthy sales gains. Morinaga’s product is currently being shipped to 36 countries world-wide, with the U.S. being the largest consumer by far. Kikkoman also reports that they are shipping their product to Europe, Australia and Canada, but again, the biggest volume is in the U.S. Address: Soyatech, Bar Harbor, Maine.

7163. Kikkoman International Inc. 1988. Kikkoman. Ahead of its time for 358 years (Ad). *Prepared Foods* 157(4):119. April.

• **Summary:** This 8.5 by 11-inch, color photo ad shows a large (20 fl oz) bottle of Kikkoman naturally brewed soy sauce against a black and purple background. Green, computer-graphics circles are superimposed on the bottle. “Since 1630, Kikkoman has produced premium, naturally brewed soy sauce that has yet to be equaled.” Available from over 20 distribution centers in the U.S. and Canada.

This ad also appeared in the March 1989 issue (p. 5) of this magazine. Address: P.O. Box 784, San Francisco, California 94101. Phone: 415-956-7750.

7164. **Product Name:** New Tofu Light Links (Meatless Hot Dogs). Renamed in 1988 Vegan Tofu Light Links.

Manufacturer’s Name: Light Foods Inc.

Manufacturer’s Address: 613 C Broadmoor, St. Louis, MO 63017. Phone: 314-878-8915.

Date of Introduction: 1988. April.

Ingredients: Water, Real Tofu, isolated soy protein, non-hydrogenated vegetable oil, rice syrup, natural spices, salt, beet powder, tamari (natural soy sauce), barley flour, locust bean gum, natural flavors, onion powder, garlic powder, natural spice oils.

New Product–Documentation: Poster. 1987. March. “Tofu Light Links. Now with absolutely no animal products. Made with Real Tofu and non hydrogenated vegetable oil.” Note: This name was later changed to New Tofu Light Links than Vegan Tofu Light Links. Leaflet. 1987. Contains no animal ingredients. Uses non-hydrogenated vegetable oil. Sweetened with rice syrup. Talk with Bob Davis, president of Light Foods. 1988. March 26. These tofu hot dogs are not yet out. Unlike the original Light Links, they will contain no egg whites. Talk with Lauraine Davis. 1988. Aug. 28. This new product was launched in April 1988. They still have the original Light Links containing egg whites. These will eventually be labeled Vegan Tofu Light Links. Leaflet. 1988. April. 8½ by 11 inches. Black on light blue. “On the rise... Now you want a link with no animal ingredients, non-hydrogenated oil, less fat, maybe a rice syrup sweetener instead of honey, and an even better flavor. Introducing the New Tofu Light Links, and New Tofu Light Link Specials, with natural imitation soy cheddar cheese.” Leaflet. 1988. April. 8½ by 11 inches. Blue and red on beige. “Higher still...” Gives ingredients for New Tofu Light Links, and New Tofu Light Link Specials.

7165. Lingle, Rick. 1988. Kikkoman: Painstaking process marks unique operation. *Prepared Foods* 157(4):62-64. April.

• **Summary:** Describes the preparation of shoyu by Kikkoman at Walworth, Wisconsin. The koji is now made in both 100-foot-long koji beds and in a new circular koji room (installed in Feb. 1987), which has the output of 1.5 of the 100-foot units. The 6-month fermentation process is claimed to bring out flavors and aromas involving about 20 amino acids, lactic and acetic acid, and various other flavor compounds. The Kikkoman plant in Walworth, Wisconsin presently produces 7,000,000 gallons of soy sauce a year.

7166. Pecjak, Marinka. 1988. Soja v kuhinjski [Soybeans in the kitchen]. Ljubljana, Yugoslavia: Feniks. 138 p. Illust. Plus 16 pages of color plates showing recipes. 21 x 30 cm. [Slv]

• **Summary:** Features 300 recipes that use soybeans and soyfoods. Contents: Introduction: In the beginning there was the soybean, almost anything can be made from soya (a diagram shows many food and non-food products), soya is concentrated, soybeans in cuisine, how to use these recipes. Whole soybeans (p. 17): Recipes for coffee, different kinds of spreads, salads, soups, green soybeans with rice, dips with whole soybeans, soybeans with mushrooms, patties, soybean roast, sausages made of whole soybeans, stuffed duck, stuffed trout.

Soybean flakes and textured proteins (p. 40): Spread, party balls, filled bread, soups, pancakes, Australian pie, Buckwheat with flakes, flakes in mushroomy sauce, baked potatoes, stuffed cabbage leaves, chilled stuffed tomatoes, stuffed roasted peppers, stuffed eggplant.

Soymilk and dairylike products (p. 74): Various spreads, soups and salads with herbs, pancakes, baked potatoes, baked noodles, soy pudding, soymilk ice cream, avocado milk. Soy flour and semolina (p. 111): Soy noodles, pasta, pancakes, fish balls, soy bread.

Soy sprouts (p. 122): Soups, salads, sprouts with potatoes, chicken with sprouts and wine, pork with sprouts. Soy sauce and other forms of fermented soybeans (p. 128): Chart showing fermented soy products (incl. miso, tempeh, sufu, natto), salads, soups, chicken with sprouts and soy sauce, meat with fermented black soybeans, roast cutlets, Hoisin dip.

7167. San-J International, Inc. 1988. You don't cook ordinary food. Why use ordinary soy sauce? (Ad). *Vegetarian Times*. April. p. 51.

• **Summary:** "More cooks are discovering the extraordinary benefits of tamari—the gourmet's soy sauce. Natural fermentation of whole soybeans gives tamari a rich, full-bodied taste that is smoother and more complex than that of ordinary soy sauce. Tamari is a natural flavor enhancer.

It brings out the true flavors of food without overpowering them with the harsh, salty taste often associated with common soy sauce. By using tamari instead of salt you can reduce sodium in your cooking. One teaspoon contains just a pinch of salt, yet has the seasoning strength of a full teaspoon of salt. And unlike ordinary soy sauce, tamari won't burn off in cooking... Write San-J for free recipes." 2/3 page, color.

Talk with John Perelman. 1988. April 4. San-J calls this their "upscale yuppie ad," one of 7 they chose from. The company is divided into retail and industrial sales. John is in charge of retail, which in Jan-Feb. 1988 sold more tamari than in all of 1984. Address: 2880 Sprouse Drive, Richmond, Virginia 23231.

7168. Miller, John; Ledur Brito, Luiz A. 1988. Soyfoods, Soymilk, and the Mechanical Cow in Brazil (Interview). *SoyaScan Notes*. May 13. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the early 1980s soy came to be seen as a solution to some of Brazil's food, nutrition, and protein problems. The government tried to encourage production and consumption of soyfoods using various organizations such as ITAL and state and local governments. It was almost social and political mission. Soymilk was one of the major products to be introduced, starting in about 1984. But the quality was poor (beany flavor) so people rejected it and it is no longer available, except for Yakult.

Vanguarda Mecanica is making about 50 of their Mechanical Cows each month. They are selling like hotcakes. "I think they are going to many of the small towns in northeast Brazil (the most impoverished part of the country, where the basic staple is cassava/manioc flour) and the municipalities are into these giveaway programs, either to get votes or to help the nutrition of the people in the dry periods. So they are buying the Mechanical Cow and using it to make soymilk locally. The soymilk made by the Mechanical Cow does not taste very good. Yet it is widely used by many small towns in giveaway programs and school lunch programs. A major function of schools in Brazil is to feed the children.

ITAL's soymilk was sold in a can but is not seen much any more. Also, the government tried to get the people to use soybeans in place of black beans, but that didn't work because the soybeans take much more time and fuel to cook, and the people didn't like the flavor as well. Today, soyfood products have a negative image in Brazil, with the exception of soy sauce, which is widely available and well accepted. Unlike in the USA and Europe, you cannot sell soyfoods on their health benefits. Cholesterol is not of much concern.

There are now 300 health and vegetarian restaurants in Sao Paulo.

The Plano Crusado, which started in 1986, was a major event in modern Brazilian history. This unorthodox economic plan by the new democratic and socialist government was

intended to curb inflation. It didn't work. Today Brazil's parallel economy -comprised of people who do not pay a tax on sales and whose economic activity is not recorded—is estimated to be 50% of the total economy, and thriving. The statistics (which omit the parallel economy) indicate that the economy is declining, but actually it is booming. Address: SANBRA, Centro Empresario de Sao Paulo, Av. Maria Coelho Aguiar, 215 Bloco D, 5* Andar, Sao Paulo—CEP 05804—CP60.541. Phone: 545-5459.

7169. Hattori, Terumitsu. 1988. Status and future plans for Kikkoman's new tofu (Interview). *SoyaScan Notes*. May 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Kikkoman's aseptic tofu was relaunched in a new package, in firm and soft textures, in August 1987. It is made in and imported from Japan, and is being distributed in America by Azumaya. It is selling so fast that Kikkoman can't import enough to keep up with demand. The person in charge of the product is in Japan; there is no such person in America. If and when sales reach a certain level, Kikkoman will begin to study the possibility of a new plant in the USA. Address: Kikkoman Marketing & Planning Inc., 50 California St., Suite 3600, San Francisco, CA 94111. Phone: 415-956-7750.

7170. Menie, Tom. 1988. Eastern Foods Corp. and Mr. Lee R. Lee's resignation in April (Interview). *SoyaScan Notes*. May 27. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mr. Lee resigned as the head of the company at the end of April and is now probably involved in his new venture of importing natural foods from Korea. He still owns stock in the company and is still on the board. The company was in bad financial shape at the time. The corporation is owned by its stockholders. He and his brother in law owned a controlling interest, but with some options on the company's last stock offering, some other people ended up controlling the company. Now, Tom is handling the sales and marketing duties and Warren Thunstrom is handling production. The company is planning a stock offering in the near future and has many innovative food ideas on the drawing boards.

Tom says he heard from someone and read in some publication a figure of \$50 million projected for retail sales of Kikkoman's tofu in 1988. William Shurtleff believes that this figure at least 5 times too high. Address: Sales and Marketing Manager, Eastern Foods Corp., 3225 Hennepin Ave., Minneapolis, Minnesota 55413. Phone: 612-331-3353.

7171. Belleme, John. 1988. The great Japanese foods face-off: Are natural brands a better buy? *East West*. May. p. 26, 28-35.

• **Summary:** Contents: Introduction. Shiitake mushrooms. Wakame (sea vegetable). Udon. Toasted sesame oil.

Complex fermented foods: Rice miso, rice vinegar. Sea salt. The Oriental foods industry in the USA dwarfs the Japanese natural foods industry. Annual sales of JFC International Inc. [affiliate of Kikkoman] alone, about \$180 million, is about ten times that of the entire Japanese natural foods industry in the United States. Oriental foods sell for about half the price of natural foods. Mitoku's special quality miso is made by Takamichi Onozaki of Yaita, Japan. Eden Foods' miso is made by Toshi Shiroozu of Fukuoka, Japan. Also discusses rice vinegar quality.

Note: This article is a thinly disguised advertorial for Mitoku products.

7172. Bruce, Gene. 1988. The myth of vegetarian vitamin B-12. *East West*. May. p. 44-55. Summarized by Judy Brown in *Soya Newsletter*. 1988. May/June. p. 7. [4 ref]

• **Summary:** Although the requirement for B-12 is the lowest of all vitamins and the body can store a supply to last many years, alarming deficiencies of vitamin B-12 have been found in vegetarian children leading to serious physical and mental retardation, and neurological damage. The effects begin with numbness and tingling of the hands and feet. Although numerous studies have shown fermented foods made in traditional societies to have significant B-12, when these foods are made under sanitary conditions in industrialized countries, the B-12 is generally lost. Recent studies suggest the presence of a false B-12 or B-12 analogue that some laboratory tests (such as the microbiological assay using *Lactobacillus leichmanii*) have mistaken for the real thing. Bonny Specker, PhD at the Univ. of Cincinnati, Ohio, and J. Gorstin at Vanderbilt Univ. in Nashville, Tennessee have studied B-12 levels in tempeh, miso, and tamari. Only negligible to trace amounts were found. Significant amounts were found in sea vegetables and spirulina. Specker analyzed blood serum and urine samples of 169 macrobiotic adults and children. Very low levels of B-12 were found. At the Agricultural Univ. of Wageningen in the Netherlands, Peter Dagnelie was undertaking a similar project, checking the blood of 50 macrobiotic children. He found deficiencies of vitamins B-12, D, and B-2, plus protein, calcium, iron and calories.

U.S. tempeh makers, when asked to recheck their tempeh, found that it presently contained no B-12. Most are taking claims about vitamin B-12 off their labels after conducting their own tests and obtaining similar results. According to Dr. Keith Steinkraus, the most probable explanation for the loss of B-12 in U.S. tempeh is improved sanitation and the fact that the B-12 producing bacterium cannot compete with the abundant mold in properly inoculated tempeh.

Good non-flesh sources of B-12 are milk (whole or nonfat, 0.9 micrograms/8 oz), cheese (0.9 micrograms/3 oz), and egg (0.6 micrograms/large egg). In conclusion, lacto-ovo vegetarians are probably getting enough B-12. Strict

vegetarians (vegans) are advised to take a B-12 supplement. Without further research concerning B-12-analogues in sea vegetables and microalgae, there are no reliable vegetable sources of B-12. Address: Boston, Massachusetts.

7173. Ontario Soya-bean Growers' Marketing Board. 1988. Report on export market development mission of the Ontario soybean industry, March 19th–April 3rd, 1988. Chatham, Ontario, Canada. 23 p. May. 28 cm. Spiral bound. [Eng]
• Summary: This report was prepared by Owen Dobbyn, John Cunningham, Maurice Waddick, and Fred Brandenburg of OSGMB. Contents: Japan. The Japanese soybean market. Visits: Japan Miso Co-operative Industrial Assoc. (M. Iida, chairman), Japan Packaged Tofu Assoc. (H. Kijima, Exec. Secy.), Federation of Japan Natto Manufacturers Cooperative Society (Mr. Ohse), Takano Foods Co. Ltd. (E. Takano, president, uses 7,000 to 8,000 tonnes of soybeans annually to make natto), Home Foods Co. Ltd (Home Shokuhin, Y. Murai, managing director, has 160 employees and 3 tofu factories that use 300 tonnes of soybeans/month; owned by Wako Shokuryo, the #1 wholesaler of soybeans in Japan), Japan Oilseed Processors Assoc. (JOPA; H. Higashimori, managing director). Japan Oil and Fat Importers & Exporters Assoc. (JOFIEA; I. Shimizu, exec. director), Canadian Embassy, Tokyo.

Hong Kong. Soybean imports. Visits: The Hong Kong Soya-Bean Products Co. Ltd. (makers of Vitasoy soymilk), Amoy Industries (International) Ltd.

Malaysia. Soybean imports 1984, 1985, 1986. Visits: Ace Canning (owned by Lam Soon). Yeo Hiap Seng (Malaysia) Berhad (soymilk), Cheong Chuan (Hup Kee) Sdn. Bhd. (traditional fermented soysauce), Sin Yong Huat Enterprises Sdn. Bhd. (soybean importers), Syarikat Perniagaan Cheon Fatt (tofu manufacturer).

Singapore. Soybean imports (1983-1986). Visits: Sin Seng Lee Trading Co. (Pte.) Ltd. (claims to import 60% of soybeans to Singapore). Conclusions for each country. Recommendations for future action. Future export development missions. Accomplishments. Competition.

In Japan, 842,000 tonnes soybeans are used to make foods, as follows (in tonnes, p. 1): Tofu 456,000, miso 180,000, natto 90,000, dried-frozen tofu 30,000, boiled soybeans 23,000, soybean powder [probably kinako] 10,000, soymilk, 7,000, soysauce 5,000, other 41,000. The suppliers of these edible soybeans are (in tonnes): USA 400,000, China 280,000, Japanese domestic 280,000, Canada 24,000. Total Japanese soybean imports: 5,000,000 tonnes. Of this 4,036,000 tonnes (81%) are used for crushing, 842,000 tonnes for food, and 70,000 tonnes for feed (not crushed). The Japanese market for soybeans is very large for both crushing and food use, but is not growing. The beans for crushing come mostly from the USA and South America.

Preferred characteristics of soybeans for each type of soyfood are given. For example, for miso: Low oil, high

protein, high sugar, white hilum. For tofu: High sugars (glucose, sucrose), moisture content 10-12.5%, new crop preferred to old, protein 40%, oil 19-20%, hilum color is not very important but white is preferred, varietal consistency; preferred varieties are Beeson, Amsoy, Corsoy. Natto: Most important is small size, 5.5 mm or less, clean beans free of foreign material, high sugar content (saccharose, stachyose, which bacillus needs to work), less oil, must absorb water well. Soymilk: Good flavor, low moisture (10%), low percentage of splits (too high can cause rancidity), low oil, high protein.

In Japan, vegetable oil consumption has increased 2.5 times in the past 20 years to 45.17 gm/capita/day in 1986. Soybean oil and canola oil together account for 85% of production. Canola is replacing soybean oil. If the oil market is strong, the 30 Japanese crushers crush more canola, but if protein is strong they crush more soybeans. U.S. soybeans have too much foreign material; new contracts have a penalty for > 2% FM.

In Hong Kong, 6,000,000 cases of Vitasoy brand soymilk are produced annually. The company uses 2,500 tonnes/year of soybeans, 80% of which are grown in Canada. It uses 100 to 200 tonnes of organic soybeans for Vitasoy exported to U.S. health food stores. Using 15 Tetra Pak machines, production takes place 24 hours/day (3 shifts), 6 days a week. Contacts: Patrick Cheung (marketing manager), and Raymond Yuen (commercial manager).

Amoy Industries, the largest maker of soy sauce in this part of the world, produces 6,000 tonnes/year. The company was established 80 years ago in Amoy, eastern China, moved to Hong Kong in 1949; 50% was purchased by Pillsbury in 1983. Uses 2 containers of soybeans/week, 100% from Ontario for the past 5 years.

Malaysia soybean imports rose from 174,400 tonnes in 1984 to 255,200 tonnes in 1986. The main suppliers in 1986 were China (56.2% of total), Vietnam (15.8%), and Argentina (14.3%). Ace Canning uses ton tonnes/month of soybeans (presently all from China) to make soymilk. They have 7 Tetra Pak machines. Yeo Hiap Seng (Malaysia) is the largest soymilk producer in Malaysia, making 25,000 liters/year using 9 Tetra Pak machines. They use 1,250 tonnes of soybeans (80 containers) per year, all Canadian.

In Singapore, soybean imports rose from 28,287 tonnes in 1983 to 41,571 tonnes in 1986. In 1986, some 66% came from Canada, 16.6% from China, and the rest from others.

The major competition for food quality soybeans in these four countries at present comes from China. The Chinese have improved their soybean quality and appear to be actively seeking to increase their market share. In the long run, however, China may choose to reduce its soybean exports in order to increase meat consumption in China. This could lead to new market opportunities for Canada in these four countries. Address: P.O. Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

7174. Shimoda, Keiki. 1988. *NaijERIA de no nattô shishoku-kai—Osegere-mura, Zonkuwa-mura no rei* [Natto tasting meeting in Nigeria. Examples of Osegere village and Zonkuwa village]. *Daizu Geppo* (Soybean Monthly News). April/May. p. 32-35. [Jap]

• **Summary:** The first natto taste test in Nigeria was in Lagos. 7 women, ages 30-40, at the Department of Agriculture tried plain, unheated natto. They disliked the sticky/slimy texture, saying that it reminded them of rotten food. But the strong smell of natto was not foreign to them, since they knew dawa-dawa.

The next taste test was in the village of Zonkwa, located 50 km southeast of Kaduna. It had 200 inhabitants of which 10 tasted natto, but the village head tasted first and his response may have influenced that of the other villagers. These people know and consume dawa dawa soup, so the natto was used in a similar soup in place of dawa dawa. The result looked like a thick porridge. In this form, the natto was liked very much. A table compares natto and dawa dawa for appearance, smell, texture, and taste—on 5 levels of like and dislike. In each characteristic dawa dawa scored only slightly higher than natto. Natto received the highest score for its taste (very tasty: 8 vs. 9 for dawa dawa) and the lowest for its mouthfeel (4 vs. 9). All tasters said that natto soup was more “sticky” or mucilaginous (*nebatte-iru*) than dawa dawa soup, and that it reminds them of okra soup with corn.

Then at Zonkwa natto was served Japanese-style on white rice (probably seasoned with shoyu and thinly sliced leeks (*negi*)). The “brave young people who ate it said it as very tasty.”

The last taste test was in the village of Osegere, located about 20 km east of Ibadan. A tempeh experiment had been conducted there by the Denmark Ministry of Development starting in 1981. This time the local people (who did not speak much English) were asked to make natto soup using freeze-dried natto, plus the usual palm oil, pepe, etc. About 10-12 people tasted it and 90% said they liked it very much; 40% said they found it “sticky.” Address: Tsukuba Univ., Shushi Katei Kankyo Kagaku Kenkyu-ka.

7175. Shurtleff, William; Aoyagi, Akiko. comps. 1988. *Bibliography of soy sauce, from A.D. 535 to 1988: With 2150+ references*. Lafayette, California: Soyfoods Center. 181 p. Subject and country index. Partially annotated. Printed May 30. 28 cm. [2153 ref]

• **Summary:** The most comprehensive bibliography on this subject. Includes all known commercial soy sauce products. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

7176. **Product Name:** Virginia Soyworks Tofu, and Tofu Spread.

Manufacturer's Name: Virginia Soyworks.

Manufacturer's Address: Route 1, Box 193, Faber, VA 22938. Phone: 804-293-9244.

Date of Introduction: 1988. May.

Ingredients: Spread: Tofu (water, soybeans, magnesium chloride), soybean pomace [okara], mustard (vinegar, mustard seed, salt, turmeric, spices), celery, soysauce (water, soybeans, wheat, salt), green peppers, onion, garlic, spices.

Wt/Vol., Packaging, Price: Tofu: 16 oz. Spread: 8 oz.

How Stored: Refrigerated.

New Product—Documentation: Note: This company, founded in about May 1978, was originally named Redbud Creek Tofu Co., at Route 2, Box 505, Crozet (pronounced kro-ZAY), VA 22932. On 2 April 1987, owner Shag Kiefer sold the company to Robert Graham. In the spring of 1988, with Shag's help, Graham moved the company to its present location, Route 1, Faber, Virginia.

Talk with Ken Scotton, owner of Virginia Soyworks. 1990. Sept. 2. He bought this tofu company in March 1989 from Robert Graham. He still makes only two soy products, Tofu and Tofu Spread (plus very little soymilk sold unlabeled directly from the shop), but he also makes two non-soy bean dips and a burrito with a black bean filling. He lives at the shop and is burned out from working 60 hours/week. He hopes to sell the shop to the Twin Oaks Community (Route 4, Box 169, Louisa, VA 23093), located 70 miles away, where he lived before he bought the shop. If the community buys the shop, they will move it onto the community land. Ken's biggest market is Charlottesville, where the University of Virginia is located.

Ken Scotton. 1990. Virginia Soyworks. 3 p. unpublished manuscript.

Labels sent by Ken Scotton. 1990. Sept. 3 by 2 inches. Tofu: Blue on white. Spread: Green on white. Tofu ingredients: Certified organic soybeans, pure well water, & bitterns from seawater.

Letter from Jon Kessler. 1990. Oct. 20. He and friends have decided to buy Virginia Soyworks. They are planning to build a shop at Twin Oaks Community (Route 4, Box 169, Louisa, VA) and hope to move the business in by 1 Jan. 1991.

7177. **Product Name:** Westbrae Soy Sauce. Tamari Shoyu. **Manufacturer's Name:** Westbrae Natural Foods (Importer). Made in Japan by Sendai Miso-Shoyu.

Manufacturer's Address: 4240 Hollis St., Emeryville, CA 94608. Phone: (415) 658-7521.

Date of Introduction: 1988. May.

Ingredients: Water, whole soybeans, whole wheat, sea salt (including natural nigari).

Wt/Vol., Packaging, Price: 32 fluid oz (1 quart) 950 ml bottle retails for \$4.99.

How Stored: Shelf stable.

Nutrition: Contains 170 mg sodium per 3 gm (½ teaspoon) serving.

New Product–Documentation: Label. 1988. May. 10 by 4.5 inches. White, blue, and yellow on red, with oval full color illustration of a Japanese landscape featuring Mt. Fuji. Westbrae Shoyu is manufactured by the Sasaki family, “Gold-Medal” winners of Japan’s Soy Sauce Contest. The Sasaki family attains this quality by carefully sorting their soybeans so that only beans of higher than #1 quality are used. Broken beans are removed because they contribute to off-flavors. No other shoyu brewer takes this care in sorting their soybeans.

The Sasaki family ages their shoyu for 2 years in Japanese cedar kegs. Cedar kegs contribute historic culture strains into each batch—culture developed by generations of use in brewing “whole-bean shoyu.” As it does with fine wine, aging in wood enriches, mellows, and provides a distinctive character to the shoyu.

Other soy sauces are quick-brewed for one to four “seasons” (less than half the time of Westbrae Shoyu). This shortened aging time saves extra expense but loses all the complex flavor heritage that is brewed into the Sasaki’s shoyu. The Sasaki family has been brewing soy sauce for 9 generations in an unbroken tradition of fine craftsmanship. We invite you to compare the darker color and richer taste of our shoyu with any other!

Note: We are surprised to see term “tamari shoyu” on this product which is actually shoyu, especially since Westbrae has been a leader for many years in the effort to stop misuse of the term “tamari.” Talk with Gordon Bennett. 1988. Aug. 26. All of their former shoyu bottles have had the term “tamari” somewhere on the label, as in the statement “Formerly known as tamari,” or “Tamari style.” They wanted to move to a new label that would portray more of a high-class, gourmet image. After much discussion with all sales people, they decided that the word tamari must be kept on the label, but not in the “Formerly known as...” format, lest many consumers not be aware of what kind of soy sauce they were really selling. So they decided to focus on the American name soy sauce in big letters and put tamari in small letters at the bottom. “It was a reluctant capitulation to the realities of the marketplace. But that term tamari has a certain amount of magic to it. You can minimize it, but you can’t get away from it. The word has to appear some place on the bottle, otherwise people don’t know what’s really in it.”

7178. **Product Name:** Tempeh Cutlet.

Manufacturer’s Name: White Wave.

Manufacturer’s Address: 1990 North 57th Court., Boulder, CO 80301. Phone: 303-443-3470.

Date of Introduction: 1988. May.

Ingredients: Tempeh (made with soybeans organically grown in accordance with section 26569.11 of the California Health and Safety Code and brown rice), natural soy sauce, garlic, onion, spices.

Wt/Vol., Packaging, Price: 6 oz (170 gm). Vacuum packed

in poly pouch.

How Stored: Frozen or refrigerated.

Nutrition: Per 3 oz.: Calories 190, protein 9 gm, carbohydrates 6 gm, fat 3 gm, sodium 466 mg.

New Product–Documentation: Label. 1988, May. 2.75 by 3.75 inches. Blue on beige with rainbow border. “Perishable. Keep frozen or refrigerated.” Formerly under the Soyfoods Unlimited brand and weighing 7 oz. All White Wave products are certified Kosher-Pareve by Rabbi Mordecai Twerski of the Talmudic Research Institute in Denver. The symbol looks like an M with the central leg bent to the left.

7179. Fruin, W. Mark. 1988. Kikkoman archives and history (Interview). *SoyaScan Notes*. June 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Kikkoman has many documents written before 1900 in the Kikkoman Archives, which are located in a kura on the grounds of the administrative office building at Noda. Before 1980 they used to be in a sales office upstairs in the main building. Many early documents, often in shoji brush script, are very hard to read. There are also said to be many early documents in the personal homes of the families who owned the family businesses that became Noda Shoyu in 1917. They are mostly sales and accounting records. The Takanashi family is said to have many old documents in their mansion near the center of Noda. In Noda Shoyu Keizai Shiryo, Ichiyama Morio has taken some of the older documents and written them in a more easily readable form.

Concerning the relationship between Choshi Shoyu, Kikkoman, and Yamasa. The Choshi and Yamasa founders were two brothers who both came from Wakayama. They split apart during the Tokugawa period. In 1914 the Choshi Shoyu Co. Ltd. was formed from 3 previously independent shoyu brewers from Chôshi in Chiba prefecture. The three were Yoshiuemon Hamaguchi, Yoshibei Fukai, and Genba Tanaka. From the 1860s until this time, the main figure in Choshi Shoyu was Tanaka Genba, owner of the largest brewery there. During Meiji and Taisho periods the Choshi side got into financial trouble and asked Yamasa for help. Yamasa declined so Noda Shoyu (later Kikkoman) Kikkoman stepped in and bought 80% of the Higeta Shoyu Company’s stock in 1937. But during the occupation after World War II, Kikkoman was forced to divest Choshi/Higeta Shoyu. However Choshi still does most of its marketing through Kikkoman even though the ownership is separate. Choshi/Higeta uses the Kikkoman fermentation recipe and until recently the Kikkoman sold in Hokkaido was made by Choshi/Higeta Shoyu.

Choshi/Higeta Shoyu and Yamasa have many more early documents than Kikkoman does. Reiko Hayashi is a female professor of economic history (formerly at Tokyo Univ., now retired) who has done extensive research on those records and compiled bibliographies. One of her students, Hiroko Aburai, has also done a lot.

Kikkoman International is a private company in charge of soy sauce in North America. Kikkoman Corporation, the parent company, is publicly owned, but is only traded on the Tokyo stock exchange. It has annual reports. Address: Palo Alto, California.

7180. Belleme, John. 1988. Tamari: Reborn in the U.S.A. [San-J International begins production in America]. *East West*. June. p. 14, 16-18.

• **Summary:** In 1804, almost half a century before Commodore Perry's ships forced open Japan's ports to American trade, the Sato family's fleet of small boats began ferrying their homemade tamari and other goods up the Kiso, Ibi, and Nagara Rivers. From the port city of Kuwana in the Bay of Ise on the Pacific Coast, the Satos received goods from larger ships and delivered them to communities upriver. Takayoshi Sato is currently the president of San-J International, the remnant company, almost eighty years since the Satos closed their maritime business. Faced with the loss of livelihood, the Satos turned to making tamari and soybean miso on a large scale in 1909.

With the dollar at an all-time low against the Japanese yen, and 100% of all natural shoyu and tamari sold in the U.S. being imported from Japan, the opening of the San-J International tamari plant could not be more timely. American importers of Japanese foods have seen a 50% increase in the price of shoyu and tamari in the past eighteen months. There are just a few companies in Japan still making genuine tamari. San-Jirushi at Kuwana is the largest, producing roughly half of the country's annual production of 6,000 kiloliters (1,500,000 gallons).

William Shurtleff first proposed exporting San-J tamari to the U.S. in 1977. Shurtleff gave a sample of San-J tamari to the president of Mitoku, which supplied Erewhon with Japanese foods. Shortly thereafter, Erewhon began importing San-J tamari in five gallon tins. Next John McLaughlin, a Richmond businessman, tasted San-J tamari and was impressed enough to go to Japan and talk to the Sato brothers. The meeting led to the founding of San-J International in December 1978, a Japanese-American joint venture to market San-J tamari and eventually build the Richmond plant.

Today, industrial giants such as Stouffer's and Campbell's use San-J tamari exclusively in all their frozen food lines. San-J makes the point in their ads: "One teaspoon of tamari—which contains just a pinch of salt—is the seasoning equivalent of a full tablespoon of salt. Tamari seasons with protein, not sodium." In the manufacture of tamari, the mixture of koji and brine, called moromi, is left to ferment for about six months. Tamari is pasteurized (2% ethyl alcohol is added to prevent the growth of yeasts and molds). The Richmond plant can make about 1 million gallons of tamari and tamari shoyu (tamari with 20% wheat added) a year, about two times the current annual sales of the imported

product.

The Richmond process will differ from that used to make tamari in Kuwana. First, in Japan, San-J tamari is aged for at least 12 months at room temperature. In Richmond, fermentation is accelerated to approximately 6 months by heating the fermentation vats with electric coils. Second, the San-J tamari from Japan is aged in old cedar vats while the Richmond plant is using fiberglass vats lined with epoxy resin. Every major importer of natural Japanese foods has expressed interest in bottling San-J tamari in their private label. However, only Eden Foods Clinton, Michigan, has negotiated a contract with San-J.

7181. Cooper, Jack. 1988. Miso: The mother's touch. *Palate Pleasers of Japan (Los Angeles, Calif.)* 6:31-37. June.

• **Summary:** The "mountain made" miso commercial turned a small, local miso manufacturer in the Japan Alps, Miyazaka Jozo Co., Ltd., into the second largest miso producer in all of Japan. To Japanese everywhere, the "chop, chop, chop" sounds of mom dicing tofu and scallions in the kitchen, mixed with the savory, pungent fragrance of hot miso broth and the clean, sweet smell of steaming rice are as much a symbol of the dawning of the day as the aroma of fresh coffee and the sizzling sounds of bacon and eggs are to Americans. William Shurtleff and Akiko Aoyagi explain [the bewildering 'vintages' of miso] in their massive volume, *The Book of Miso*. All traditional miso contains salt and soybeans to which a mold culture, or "friendly agent," usually *Aspergillus oryzae*, has been added.

A 1965 study conducted by Dr. Takeshi Hirayama at Japan's prestigious National Cancer Center, people who eat miso soup daily are 32% less likely to develop cancer than those who never eat miso soup. Undiluted, miso contains on average about 12% salt, six times the salt content of cheddar cheese. Most miso sold in America is imported and sold under Japanese brand names like Maruman, Marukome, Shinshu-ichi, Yamabuki, Hanamaruki, etc. One reason for this may be Japan's stringent new laws requiring producers to list all ingredients and additives (mainly MSG, artificial coloring and preservatives), making the natural products more attractive to America's health-conscious consumers.

The Japanese National Miso Association estimates that there are over 2500 miso manufacturers in Japan, many of which are small, family-owned operations. Color photos show: (1) Miko-chan, the little kneeling girl who is the Miyazaka Jozo logo. (2) Three types and colors of miso in white bowls, next to an iris. (3) The historic old Shinshu Ichi miso and shoyu plant. (4) A bowl of white miso soup with crab and tofu. (5) An assortment of traditional miso dishes. (6) The ultra-modern computerized control panel, motorized conveyors, and the modern packaging facility at the Miyazaka Jozo factory (3 small photos). (7) A shop in Japan retailing Japanese miso in traditional small wooden kegs. (8) Five views of the South River Miso Co., Conway,

Massachusetts (including an exterior view of the home and miso shop, Christian Elwell at work in the temperature-controlled koji room).

Note: According to *The Book of Miso*, by Shurtleff & Aoyagi (1976, p. 257; based on 1974 statistics) *Mayasaka Jozo (Shinshu Ichi)* is Japan's largest miso factory. The company's Tokyo factory produces about 15,000 tons/year; the Nagano and Yamanashi plants produce 9,300 tons and 3,300 tons respectively. All make Shinshu-type light-yellow miso. As of 1983, the Tokyo factory also made freeze-dried miso. Address: Editor, Palate Pleasers.

7182. Fujinuma, Kenji; Saito, K.; Nakazato, M.; Kikuchi, Y.; Ibe, A.; Nishima, T. 1988. Shokuhin-chû no gurichirichin-san no bunseki-hô [Determination of glycyrrhizic acid in foods]. *Shokuhin Eiseigaku Zasshi (J. of the Food Hygienic Society of Japan)* 29(3):210-15. June [9 ref. Jap; eng]

• **Summary:** High performance liquid chromatography was used to determine the glycyrrhizic acid (GA) content of Japanese soy sauce and miso. In a survey of commercial foods, GA was detected at levels of 2 to 224 micrograms/gm in 16 out of 56 samples.

Glycyrrhizin is $C_{42}H_{62}O_{16}$. Glucoside contained in *Glycyrrhiza glabra* L. at the level of 6-14%, with strong sweetness, which is hydrolyzed with acid into glucuronic acid and glycyrrhetic acid ($C_{30}H_{46}O_4$). Address: Tokyo Metropolitan Research Lab. of Public Health, 3-24-1 Hyakunin-cho, Shinjuku-ku, Osaka, Japan.

7183. **Product Name:** [Tofu with Toasted Nori, Tofu with Toasted Sesame, Tofu Bars {With Millet}, Seitan in Soy Sauce].

Foreign Name: Tofu mit geroesteter Nori-Alge, Tofu mit geroesteter Sesam, Tofu Stange (mit Hirse), Seitan in Sojasauce.

Manufacturer's Name: Geestland.

Manufacturer's Address: Friedrichstrasse 19, D-2850 Bremerhaven, West Germany. Phone: (0471) 2 60 20.

Date of Introduction: 1988. June.

How Stored: Refrigerated.

New Product-Documentation: Talk with founder and present owner of Geestland, Paul E. Bremer. 1990. April 25. About 2 years ago the company moved to: Friedrichstrasse 19, D-2850 Bremerhaven and in June 1988 Tofu with roasted nori, and with roasted sesame were introduced.

7184. **Product Name:** [Fast Food Program: Deep-fried tofu Treasure Balls, Tofu Mixed with Rice & Herbs, Tofu Slices Cooked with Soy Sauce, Ginger & Konbu].

Foreign Name: Tofu Baellchen, Tofu Willi, Tofu Schnitte.

Manufacturer's Name: Geestland.

Manufacturer's Address: Friedrichstrasse 19, D-2850 Bremerhaven, West Germany.

Date of Introduction: 1988. June.

How Stored: Refrigerated.

New Product-Documentation: Talk with founder and present owner of Geestland, Paul E. Bremer. 1990. April 25. These products were introduced in mid-1988. The little balls are "fritiert." Fritiert means deep-fried in lots of oil. Gebraten means fried in a pan with only a little oil.

7185. **Product Name:** Ebara Teriyaki Marinade & Sauce; Tari Sauce [Original, Spicy, Ginger, Mild].

Manufacturer's Name: JFC International, Inc. (Importer/Distributor). Made in Japan.

Manufacturer's Address: 4353 Exchange Ave., Los Angeles, CA 90058.

Date of Introduction: 1988. June

Wt/Vol., Packaging, Price: Wide-mouth jar.

How Stored: Shelf stable.

New Product-Documentation: Ad in Palate Pleasers.

1988. Vol 6. June. p. 32. "Tangy, spicy, and delicious. Ebara—The pioneer of gourmet sauces in Japan."

7186. Kingma, Sharyn. 1988. New study released on consumer attitudes about soy proteins. *Soya Newsletter (Bar Harbor, Maine)*. May/June. p. 3, 14-15.

• **Summary:** Protein Technologies International, a subsidiary of Ralston Purina, St. Louis, Missouri, has recently released the results of a new study which evaluates current consumer attitudes related to soy protein, nutrition, dietary habits, and knowledge of dietary fiber. The 1988 Consumer Attitudes Monitor was undertaken to determine if there had been any significant changes in consumer attitudes since their first study was done in 1985.

One of the major differences between the earlier study (see Ralston Purina 1985 and Elliott 1988) and the current one is that the 1985 study contained specific questions related to soyfoods. But the 1988 survey also probed some interesting areas. For details, see the study itself.

Copies of the 1988 Consumer Attitudes Monitor are available through Jean Kuster, Protein Technologies International, Checkerboard Square, St. Louis, Missouri, 63164 or call 800-325-7108.

7187. **Product Name:** Meridian Teriyaki (Soya Sauce).

Manufacturer's Name: Meridian Foods Ltd. (Importer). Made in Japan.

Manufacturer's Address: Corwen, Clwyd, LL21 9RR, Wales, UK. Phone: 0490 3151.

Date of Introduction: 1988. June.

New Product-Documentation: Simon Bailey. 1988.

Natural Choice. Aug. 15. "Soya-Based Products." A photo shows the Labels. Each has an illustration on the front panel. The tamari shows Mt. Fuji and the ocean, the teriyaki a soybean plant, and the shoyu some Japanese-style trees. CSP form filled out by Simon Bailey. 1988. Sept. 28.

7188. Nihei, Takao. 1988. [The history of shoyu in Hawaii. (Food series, part XII)]. *Kokiku (Honolulu, Hawaii)*. June. p. 32. [Jap; Eng]

• **Summary:** “Yo o sutete yama ni iru tomo miso, shoyu, sake no kayoiji nakute kanawaji.” “Forsaking all worldly things, still, one can’t do without these: Miso, shoyu, and sake.” As in the ancient waka poem written by Shokusanjin (during the Edo period), no matter where the Japanese went, miso and shoyu were necessities of life. Hawaii’s first miso and shoyu were recorded in Meiji Gannen (1868), the year of the first Japanese immigrants’ arrival. Ikuma Yonekichi, who came on the ship “Scioto” (Saioto-go), noted in his diary, “Yokohama departure. Provisions of rice, miso, shoyu.”

In 1887, as the Japanese immigrant population increased, Japanese goods began to be imported, but there were many instances where miso and shoyu were insufficient. In Hawaii, shoyu was manufactured earlier than sake by Shimada Jihachi in 1891, but he gave it up due to financial difficulties. Later, Yamagami Nobuyuki, who came from San Francisco, California, started a shoyu factory which prospered. With the advent of World War II, imported goods from Japan were cut off, which gave rise to the start of miso and shoyu companies here. Barbeque shoyu is Hawaii’s own discovery. The locally made miso and shoyu are less salty than the Japanese products.

7189. Peluso, Michael R. 1988. The nutritional value of soy. *Health World (Burlingame, California)* 2(4):26-28. May/June.

• **Summary:** This introductory article discusses whole soybeans, soy flour, soy protein products (isolates, spun fibers, TVP), soy milk, soy cheese (tofu), tempeh, miso, and soy sauce. Table I shows the composition of most of these is given. The author is especially interested in soy oil as a good source of vitamin E and of the essential fatty acids, linoleic and alpha linolenic acids. He is critical of the hydrogenation process. Table II gives a nutritive comparison of soy oil and selected food fats. Table III gives a nutritive comparison of soy foods and selected animal foods. Address: P.O. Box 606, Occidental, California 95465.

7190. Udesky, James. 1988. The book of soba. Tokyo and New York: Kodansha International. 166 p. Foreword by William Shurtleff. Illust. Index. 27 cm. [50* ref]

• **Summary:** Contents. Foreword. Introduction. I. Making soba. Homemade soba noodles. Broth. Noodle dishes. Country cooking. Groat cooking. Variations and desserts. Ingredients. II. About soba. Nutrition. Buckwheat: From seed to table. History. III. Appendices. The soba dining experience. Selected soba restaurants in Japan. Oriental, natural, and specialty food stores in the United States and Canada. Bibliography.

Soy-related recipes include: Cold soba noodles with natto and sesame (with “2/3 oz natto,” p. 59). “Fox Soba”

(*Kitsune soba*, with “4 pieces thin deep-fried tofu {*abura-age* or *usu-age*}, p. 63). Soba noodles in miso stew (*Kenchin soba*, Ibaragi prefecture, with “4-5 tablespoons miso,” p. 70). Soy-Soba noodles (with “4 oz soybeans” [whole dry soybeans], p. 71). Broiled soba dumpling with miso sauce (with “3-4 tablespoons sweet white miso,” p. 81-82). Soba pasty (with “1½ oz natto, p. 85). Soy sauce is used in many recipes.

The excellent “Ingredients” section (p. 91-98), gives definitions of several soyfoods, including miso, natto, okara, soy sauce, tofu, and tofu—thin deep-fried (*abura-age*, *usu-age*).

The definition of “natto” is especially good: “Natto: This rich soybean product with a cheeselike flavor is still underestimated, unappreciated, and misunderstood, mainly because the sticky ‘threads’ resulting from its special fermentation process are strong and stubborn, making it pretty tricky for beginners to eat. Natto can be made easily at home with soy beans, ‘natto spore’ (now available at major health-food dealers on both coasts), a pot, and a box... If allowed to sit too long on store shelves, the beans become overripe. Although you cannot check the quality until you open up the package at home, the best natto should have a light, tannish color and still be moist and a little puffy. Too dark a color indicates overripening and a correspondingly bitter taste. To remedy this situation somewhat, stir the beans together with chopsticks or a spoon and combine with chopped onions, wasabi horseradish, and soy sauce. Since this food is the result of bacterial action, no preservative can be used. Thus, natto should be eaten as soon as possible.”

Mr. Udesky had a chance to prepare homemade soy sauce while living with Mr. Noboru Muramoto (author of *Healing Ourselves*) from 1971 to 1975. In the Appendix titled “Oriental, natural, and specialty food stores” is an entry (p. 153, col. 3.8) for: “Foods for Life, 504 E. Broadway, Glendale, California, 91025.” Note: This pioneering natural and organic food store is still in business in 1988.

For a complementary review, see Jean Pearce. 1991. Nov. 10. *Japan Times*.

Letter from James Udesky. 1997. April 21. The hardcover edition of *The Book of Soba* has now sold 12,000 copies in Japan and abroad, and 3,000 copies of a new soft-cover pocketbook edition (246 p.; 18.2 cm) were published by Kodansha International in Dec. 1995. An article on soba titled “The Art of Noodles,” by Udesky appeared in *Japan Quarterly* (April-June 1997, p. 32-42; it contains a large color photo of him rolling out soba dough). Udesky is living in Tokyo, has lived in Japan (except for a 3-month break in 1988) since 1988, married a Japanese woman in 1990, for the last 2 years has worked for a medical equipment importer and taught English part-time at Dentsu Inc. to survive financially, has established a company named Udesky Communications, and continues his practice of making traditional Japanese soba. He has plans for a new book

titled "Basic Techniques of Udon Making. " Address: Heim R1 #103, Meguro Honcho 6-18-3, Meguro-ku, Tokyo 152, Japan. Or: The Soba Center, P.O. Box 72, Winnetka, Illinois 60093-0072.

7191. Bubny, Paul. 1988. Venerable soybean sprouts new uses. *Health Foods Business* 34(7):72, 74, 76, 108. July.
• Summary: Lonnie Stromnes, national sales manager of White Wave Soyfoods in Boulder, Colorado, reports that White Wave recently "upscaled" the packaging on its tempeh products; the new graphics depict tempeh in use, so that customers do not have to bring a thorough knowledge of the food into the store with them. Mitoku-USA, based in Albany, New York, imports some 20 varieties of miso. At least one manufacturer, the Asheville, North Carolina-based Great Eastern Sun, saw its miso sales increase by 20% last year. Bruce Sturgeon, the company's vice president, said Great Eastern Sun's volume on miso alone was \$400,000 in 1987. Shoyu and tamari are frequently aimed at the gourmet market as well as the natural foods / specialty foods market. Owner Dale Kamibayshi of Alfalfa's Market in Boulder, Colorado said, "I think many people are still intimidated by (soyfood's) preparation." To help overcome the intimidation factor, Alfalfa's has scheduled a soyfood tasting fair for July 16; the first such fair which the store has devoted to soy.

Gary Barat, chairman of Legume, Inc. said, "I see the natural foods and gourmet markets coming together," said Barat. "And the smart marketers are realizing that." People who shop specialty stores have both eyes turned toward quality. Soy companies are increasingly making use of organically grown soybeans. There is also a trend toward using specific soybeans for specific products, a sign of a maturing industry. The trend is more prevalent in the U.S. than in Far East Asia. Westbrae, for example, uses Vinton beans for its Westsoy soy beverage. As the currency in Japan remains strong against the dollar, you're going to see more and more (soy) products produced in America. Also there will be greater growth in so-called "second-generation" soy products—dairy analogs with soymilk, soy cheese, soy ice cream and soy yogurt. Address: Associate Editor.

7192. Donegan, Priscilla. 1988. The incredible shrinking section: Sauces & dressings. *Progressive Grocer* 67(7):143, 146, 148, 150-52, 154-56, 158, 161-63. July. See p. 156, 158.
• Summary: In 1987 supermarket sales of soy and teriyaki sauce were \$74.93 million (gross profit: \$19.90 million), accounting for 2.03% of the sauces & dressings category sales [Note: New expanded category!] (2.37% of category gross profits; the average retail gross profit margin is 26.56%) and with sales up 23.28% over 1986. The best-selling types of sauces and dressings are bottled dressings (17.22%), spaghetti sauce (17.09% of the category), mayonnaise (12.98%), ketchup (8.20%), meat sauce (18.40%), dry mixes and seasonings (6.401%), and Mexican

sauce (6.04%).

"All the action in supermarkets today is against the walls in the perimeter departments."

7194. **Product Name:** Emperor's Kitchen brand Johsen Shoyu, and Sakae Organic Shoyu.

Manufacturer's Name: Great Eastern Sun (Importer). Made in Japan.

Manufacturer's Address: 92 Macintosh Rd., Asheville, NC 28806. Phone: 704-252-3090.

Date of Introduction: 1988. July.

Ingredients: Sakae: Well water, organic* whole soybeans, organic* whole wheat, seasalt, koji (natural culture). * Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: Both in 5 and 10 oz bottles. Johsen Shoyu also in 32 oz bottles.

How Stored: Shelf stable.

New Product—Documentation: Ad in Macromuse. 1988. June/July. p. 3. "The finest Japanese liquid seasonings. Identical to Mitoku & Mitoku Macrobiotic." No address or specific products are given. Talk with Barbara Holiday of Great Eastern Sun. 1989. Feb. 28. These products are imported in drums from Japan via Mitoku. GES started bottling the drums in North Carolina in Oct. 1987 and the products were in the stores by late 1987 or Jan. 1988. The Johsen Shoyu and Wheat Free Mansan Tamari are not organic. There are also non-soy products in the line. Sakae Shoyu is made by Mr. Kiyoji Fukaya, Ogasawara-Gun, Shizuoka-ken, Japan. Mansan Shoten is run by Enichiro Oguri (President), Handa-shi, Aichi-ken, Japan.

Labels. 1989. 5.5 by 3 inches, and 6.25 by 3.5 inches. Pink and black on silver. Illustration of a symbolic tree with leaves. "In the Emperor's Kitchen you find only the finest seasonings. Johsen Shoyu is one of the world's best soy sauces. Traditionally brewed in cedar kegs for early 2 years, Johsen Shoyu is made using only whole soybeans and whole grain wheat. Split or defatted beans or wheat flour are never

used... Use it for all your wok cooking or as a dipping sauce for sushi or sashimi.”

7195. Product Name: Emperor’s Kitchen brand Mansan Tamari [Organic, or Wheat Free].

Manufacturer’s Name: Great Eastern Sun (Importer). Made in Japan.

Manufacturer’s Address: 92 Macintosh Rd., Asheville, NC 28806. Phone: 704-252-3090.

Date of Introduction: 1988. July.

Ingredients: Wheat free: Water, whole soybeans, Mikawa mirin (water, sweet rice, koji), seasalt, koji (natural culture).

Wt/Vol., Packaging, Price: 5 and 10 oz bottles. Mansan Wheat Free Tamari also in 32 oz bottles.

How Stored: Shelf stable.

New Product–Documentation: Ad in Macromuse. 1988. June/July. p. 3. “The finest Japanese liquid seasonings. Identical to Mitoku & Mitoku Macrobiotic.” No address or specific products are given. Talk with Barbara Holiday of Great Eastern Sun. 1989. Feb. 28. These products are imported in drums from Japan via Mitoku. GES started bottling the drums in North Carolina in Oct. 1987 and the products were in the stores by late 1987 or Jan. 1988. The Johsen Shoyu and Wheat Free Mansan Tamari are not organic. There are also non-soy products in the line. Sakae Shoyu is made by Mr. Kiyoji Fukaya, Ogasawara-Gun, Shizuoka-ken, Japan. Mansan Shoten is run by Enichiro Oguri (President), Handa-shi, Aichi-ken, Japan. Labels. 1989. 5.5 by 3 inches, and 6.25 by 3.5 inches. Pink and black on silver. “Mansan Tamari is an authentic tamari soy sauce that is traditionally brewed in cedar kegs for over a year. Real tamari was originally the liquid drawn from soybean miso... Mansan tamari is blended with 40% Mikawa Mirin which gives it a unique and subtly sweet savoriness. Use it as a glaze for baked foods, a basting sauce for broiled fish, or a dipping sauce for sushi.”

7196. Meyer, Amy. 1988. Soy and teriyaki sauce products: Found in Boston supermarkets and Chinatown groceries, July 1988. Boston, Massachusetts: A. Meyer Research. 6 p. Unpublished typescript. 28 cm.

• **Summary:** For each sauce is given: Product / brand name. Size in oz. Price in one or both of two supermarket chain stores. Price in one or both of two independent Chinatown grocery stores. The product names are: Kikkoman soy sauce (5, 10, and 20 oz). Kikkoman Lite soy sauce (“40% less salt”) (10 oz). Kikkoman soy sauce dispenser. Kikkoman teriyaki sauce (10 and 20 oz). Kikkoman teriyaki baste and glaze (12 oz). LaChoy soy sauce (10 oz, 16 oz). LaChoy teriyaki sauce (10 oz). Angostura low-sodium soy sauce (“62% less”) (10 oz). Mee Tu soy sauce (16 oz; Allied Old English, Inc., Port Reading, New Jersey).

China Bowl (Hong Kong) light soy sauce (“100% natural”). (5 oz). China Bowl (Hong Kong) dark soy sauce

(“100% natural”). (5 oz). Yamasa Low-sodium soy sauce (10 oz; Distributed by Mitsubishi Foods, Inc., San Diego). Lee Kum Kee soy sauce (Hong Kong, 14 oz). Pearl River Bridge superior soy sauce (China; 22 oz). Koon Chun thin soy sauce (11 oz; Hong Kong). Koon Chun double black soy sauce (11 oz). Koon Chun black soy (21 oz). Wan Ja Shan soy sauce (16 oz; Mandarin Soy Sauce, Inc., Middletown, NY). Silver Swan soy sauce (21 oz; Manila, Philippines). Golden label superior soy sauce (21 oz; China).

Note: This is the earliest English-language document seen (April 2012) that uses the term “double black soy sauce” to refer to soy sauce. Address: 21 Beacon St. #10A, Boston, Massachusetts 02108. Phone: 617-523-3780.

7197. Mitoku. 1988. Spotlight on Johsen Shoyu: The world’s leading natural soy sauce (Ad). *East West*. July. p. 1-3.

• **Summary:** Johsen Shoyu is certified to meet the uncompromising standards of Macrobiotic Quality by Michio and Aveline Kushi. It is bottled under the labels of more than a dozen leading natural food companies on four continents. In February of this year, premium quality Johsen Shoyu was awarded the Japan Ministry of Agriculture’s prestigious first place award, “The highest quality soy sauce in Japan.” It was selected from over 200 entries by a panel of the world’s foremost soy sauce experts. Johsen Shoyu is kept in large cedar aging casks. Johsen Shoyu is aged slowly for more than one and one-half years, protected only from the outside weather by the wood frame building. Over five seasons, including two full summers, the fermentation continues. Johsen is aged over 5 seasons, including 2 summers, for a total of 18-24 months at natural seasonal temperatures. It is aged in well-seasoned cedar casks, and it is packed without additives or preservatives. Address: Tokyo, Japan.

7198. Nihei, Takao. 1988. [The history of Japanese sake in Hawaii. (Food series, part XIII)]. *Kokiku (Honolulu, Hawaii)*. July. p. 32. [Jap; Eng]

• **Summary:** The first Japanese immigrants who made a mark in Hawaii were the “Gannenmono” who crossed the ocean on the ship “Scioto” (Saioto-go) in 1868. Miso and shoyu had been loaded on that boat, but there is no record of any sake. Later on, due to a shortage of labor in the sugarcane fields, Hawaii’s largest industry, immigrants from Japan were brought in as a result of a contract between the Hawaiian Kingdom and the Japanese Government. On Feb. 8, 1885, the Japanese immigrants arrived in Hawaii on the ship “City of Tokio.” On this trip, Japanese sake had been put on board. Ten barrels of sake were offered as a gift to King Kalakaua. Sake began to be imported from 1888 on, increasing in volume each year.

7199. Product Name: [Indonesian-Style Sweet & Thick Soy Sauce].

Foreign Name: Ketjap Manis.

Manufacturer's Name: Yakso (Distributor).

Manufacturer's Address: Zoutstraat 17, Groningen, Netherlands.

Date of Introduction: 1988. July.

Wt/Vol., Packaging, Price: 220 ml jar.

New Product–Documentation: Fertilia price list. 1988. July. p. 34.

7200. Hymowitz, Ted. 1988. Early Swedish work with soy sauce in Canton, China (Interview). *SoyaScan Notes*. Aug. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ted learned that there was a Swedish colony in Canton in the period 1750 to 1760. Perhaps they knew something about the Bowen-Flint [Samuel Bowen and James Flint] affair, so he examined early Swedish literature, though he can't read Swedish. He found a document on methods of preparing Chinese soy by M. de Groupens. Berkeley or Harvard might have this document. The earliest Europeans to refer to the soybean were Carletti (1597), Saris (1613), and Fernández Navarrete (1665); Ted discovered all of these early references. There must be many other early references in travel logs, but it takes so much time to read them. He will cite this in a forthcoming article on new crops.

Ted will send me an article from *The Philosophical Magazine* (1804) by M. de Grubbens titled "Method of preparing Chinese soy." He also has on one of his note cards the story of a man visiting Peking in 1655; the man mentions miso and tofu. Address: Dep. of Agronomy, Univ. of Illinois, Urbana, IL.

7201. Bailey, Simon. 1988. Soya-based products. *Natural Choice*. Aug. 15.

• **Summary:** "The food of the future. The soya bean is a protein-packed food which is increasingly used as a dairy or food substitute in today's search for a healthier diet." Discusses soya milk, dairy free desserts, tofu, tofu-based foods, soya flour, soya sprouts, tempeh, soya sauce, miso, and high-tech soya foods including TVP and soya protein isolates. Address: 138 Randolph Ave., London W9 1PG, England. Phone: 01-289-7364.

7202. Thiel, Elizabeth. 1988. Soy sauce: Tamari comes to the capital. *Virginian Pilot (Norfolk, Virginia)*. Aug. 21. p. H1, H4.

• **Summary:** Mark Givens, London native and chief officer of a Japanese factory in Richmond, was drawn to American because of tamari, an upscale soy sauce produced by the year-old Virginia company. The young company already produces 40% of the world's tamari, exported to 25 foreign countries and sold to major food processors such as Campbell's Soup Co. The tamari sauce has 30% more protein than soy made under such labels as Kikkoman and La Choy, which add wheat to the mixture to speed up

fermentation. Tamari Lite has about 25% less sodium. The catch is the price. A bottle of tamari costs about a dollar more than a bottle of Kikkoman soy sauce. Fermentation takes as long as six months.

In 1979 San-Jirushi incorporated in California to take advantage of the booming Oriental food market in America. The American venture included a warehouse and 4-5 full-time employees. San-J employs 25 in the Richmond plant, and there are three workers at the warehouse in California, compared to 200 in Japan. San-J bottles tamari in 55 and 5 gallon containers for use by restaurants and food processors. "Sales are up 30% this year," Givens says.

Photos show: (1) Yuji Yamamoto, vice president of production at San-J's new tamari plant in Richmond, Virginia. (2) Stephen Earle, vice president of San-J, wearing a hard-hat and protective glasses, with machinery in the background.

Also contains a sidebar with recipes by Regina Schrambling titled "Upscale Oriental sidekick is vegetarian Worcestershire." Tamari is Mollie Katzen's "vegetarian variation on Worcestershire." Address: Staff writer.

7203. Drake, Milan. 1988. La Choy and other teriyaki sauces (Interview). *SoyaScan Notes*. Aug. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** La Choy now makes and sells 2 teriyaki sauces, the regular and the new (1987) Thick and Rich, which is more of a basting sauce, similar to the Armour basting sauces. The regular was launched at least 20 years ago. He has been with the company for 16 years, now in charge of technical services. In about 1984 La Choy was acquired by Hunt-Wesson, and now much of La Choy's information is located in Fullerton, California. He is not aware of the S&W company. La Choy's big competitor for teriyaki sauce is Kikkoman. Chun King (Gino Pallouci), may have had an early teriyaki sauce, but no longer sells it, after Reynolds took them over.

Chun King started a lot of things then dropped them. Armour was in Chicago, probably now in Phoenix. La Choy no longer makes any fermented soy sauce; its now all hydrolyzed (HVP), and that is what goes into their teriyaki. They also add soy sauce to quite a few of their own products, such as egg rolls. Este Kiern of the Oriental Show-You Company, Columbia City, Indiana, is a super man, now in his 80s but looks like he's 50, and the best living source on the early U.S. soy sauce industry. Address: La Choy Food Products, Archbold, Ohio 43502.

7204. *Good Housekeeping–British Edition (London)*. 1988. How it's made: Soy sauce. Aug. p. 165.

• **Summary:** Although soy sauce did not become popular in the UK until the takeaway invasion of the 1970s, the first imports reached this country back in the 17th century. Its advantages were that it withstood long sea voyages well and

helped to relieve the monotony of the seafarers' daily diet. To make HVP soy sauce, roasted soya beans are mixed with hydrochloric acid and left to react for 8 to 10 hours before sodium carbonate is added to help reduce the acidity. The following brands are made in this traditional way: Amoy, Kikkoman, Lotus, Sharwoods, and Sunwheel. Address: England.

7205. McSweeney, Daniel. 1988. Consumer survey 1988. *Whole Foods*. Aug. p. 27-28, 30, 32, 34.

• **Summary:** Natural/organic food purchases. Percentage of respondents who purchased a type of product during the past year: 1988 all/1987 all (1988 women / 1988 men). NA means "Not Available." The following are ranked in descending order of the percentage of consumers buying the product in 1988: Tofu: 63.5/83.4% (55.6/63.5%); Tamari 55.6% / NA (57.8/50.0%); Soy sauce 47.6%/NA (46.7%/50.0%); Miso 41.8/69.7% (42.2/38.9%); Tempeh 30.2/NA (35.6/16.7%); Soymilk 28.6%/54.5% (31.1/22.2%). Note the sharp declines between 1987 and 1988 for soymilk -47.6%, miso -40%, tofu -24%. All soyfood products for which there are statistics for both years declined, a serious trend.

Note: The "1986 and 1987 surveys statistics were generated through a reader questionnaire in East West magazine. The 1988 Consumer Survey was handed out to shoppers at 13 different retail stores throughout the country. Due to this variance in the survey base, some statistical discrepancies may have resulted."

7206. **Product Name:** Nikken Fermented Soy Sauce Powders [#5300 standard type, #5301 standard without MSG, #5302 standard without caramel color, #5303 fine mesh type, #5304 roast type].

Manufacturer's Name: Nikken Foods Company Ltd.

Manufacturer's Address: 37-7, 1-chome, Komaba, Meguro-ku, Tokyo 153, Japan.

Date of Introduction: 1988. August.

Wt/Vol., Packaging, Price: 22 lb or 110 lb boxes.

How Stored: Shelf stable.

New Product-Documentation: *Soya Newsletter*. 1988. July/Aug. p. 8. Imported to the USA by The J.F. Kelly Co., 150 River Road, A-3, Montville, New Jersey 07045. Phone: 201-299-9100. Contact: Mike Kelly. Spot in *Food Technology*. 1989. Jan. Nikken is now imported and represented by Zonner, Inc. The U.S. distribution center is in St. Louis, Missouri. Talk with Zonner. 1990. Jan. 23. The importer is now G.S. Suppliger in Missouri. Phone: 314-436-5050.

7207. *Nutrition News (Riverside, California)*. 1988. Soy: King of the mountain. 11(8):1-4. Aug. [1 ref]

• **Summary:** An overview and introduction to soyfoods nutrition, tofu, tempeh, miso, shoyu and tamari, and soymilk. Note: This magazine was formerly located in Pomona,

California.

7208. Schnell, Hannelore. 1988. Kleine Bohne, ganz gross [Small bean, very big]. *Natur (Munich, West Germany)*. Aug. p. 75-83. [3 ref. Ger]

• **Summary:** Discusses soymilk, tofu, soy sauce, miso, tempeh, Soyastern, Svadesha Tofurei, Alpro, and DE-VAU-GE. Concludes with a detailed discussion of newly recognized potential dangers with HVP products. Vegetable seasonings made by companies such as Maggi may contain carcinogenic chloropropanols, such as dichloro propanol. Maximum limits on these are now being established.

7209. *Soya Newsletter (Bar Harbor, Maine)*. 1988. U.S. soyfoods production to use 62 million pounds of soybeans in 1988. July/Aug. p. 10.

• **Summary:** This figure was the result of a recently soyfoods industry survey conducted by Soyatech, Inc. The soyfoods included in this projection are tofu, soymilk, tempeh, soy sauce, miso, and soynuts. When asked how they expected their demand for soybeans to grow over the next 5 years, 4.8% of soyfoods manufacturers surveyed expected it to remain the same, 52.4% expected it to grow slowly, 42.9% expected it to grow considerably, and none expected it to decrease.

7210. **Product Name:** Teriyaki Burger (Made with Tempeh).

Manufacturer's Name: White Wave.

Manufacturer's Address: 1990 North 57th Court., Boulder, CO 80301. Phone: 303-443-3470.

Date of Introduction: 1988. August.

Ingredients: Tempeh (made with soybeans organically grown in accordance with section 26569.11 of the California Health and Safety Code and brown rice), natural soy sauce, garlic, onion, spices.

Wt/Vol., Packaging, Price: 6 oz (170 gm). Vacuum packed in poly pouch.

How Stored: Frozen or refrigerated.

Nutrition: Per 3 oz.: Calories 190, protein 9 gm, carbohydrates 6 gm, fat 3 gm, sodium 466 mg.

New Product-Documentation: Talk with Steve Demos. 1988. Dec. 20. The product was introduced in Aug. 1988. Label. 1989. April. 4 by 4.5 inches. Yellow, white, and black on red. Large photo of a tempeh, lettuce & tomato sandwich, with a slice of tomato and 2 slices of dill pickles on top, cheese slices and lettuce below. "All the sizzle... none of the steak. Ready to eat in 1 minute. Makes a delicious sandwich or entree—just brown in a lightly oiled pan or microwave 1 minute high power." Leaflet. 1989. April. "Make your sales sizzle with White Wave."

7211. Mahoney, Louis. 1988. In the best East-Meets-West style, Japan's oldest soy sauce is about to become

Richmond's newest flavor booster. *News-Leader (Richmond, Virginia)*. Sept. 7. p. 29, 37.

• **Summary:** "From a cook's standpoint, the exciting thing about tamari is the versatility, depending on where you're using it," says Judie Cohen. She and chefs at the Butlery Ltd., where she is vice president and director of the catering division, have developed recipes to show home cooks the versatility of this Japanese staple. The first bottles rolled off the production line in eastern Henrico County in August. Tamari is brewed for 6 to 8 months. Since it doesn't have the alcohol that other soy sauces do, the flavor doesn't burn off during cooking. Address: New Leader food editor.

7212. *Washington Post*. 1988. First, define terms, then start cooking. Sept. 14. p. E4.

• **Summary:** "*Ong chai* (water spinach, empty heart): Distinguished by its crunchy hollow stems and soft pointy leaves, it tastes like mild spinach and is often served Cantonese-style stir-fried with garlic (and sometimes fermented bean curd)."

Recipes include: Madhur Jaffrey's bean curd with Chinese parsley (which calls for "½ pound medium-firm bean curd, cut into ¾-inch cubes" and "1 tablespoon Chinese thin soy sauce").

7213. Fass, Bill. 1988. Brief history of Macrobiotic Wholesale Co. of Asheville, North Carolina (Interview). *SoyaScan Notes*. Sept. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company was originally founded by Great Eastern Sun. In 1986 GES sold it to Kurt Schmitz [or Schmidt]; it was then located at 503 Haywood Rd. in Asheville. Schmitz in turn sold it to Bill Fass in August 1986. The company does not import. They distribute only macrobiotic products. Some 90% of the products they sell are imported from Japan, and 90% of these they buy from Great Eastern Sun, the importer. They also buy a few imported products from Eden Foods. Soyfood products they distribute include miso, shoyu, tamari, and koji. Address: 799 Old Leicester Hwy., Asheville, North Carolina 28806. Phone: 800-438-4730 or 704-252-1221.

7214. Cook, Anne. 1988. Visiting journalists say Italians shunning pasta for soy products. *News-Gazette (Champaign, Illinois)*. Sept. 28.

• **Summary:** Italian consumers are shunning pasta and olive oil and eating salads with soybean sprouts and dressing made from low cholesterol soybean oil, say some touring Italian journalists. "It used to be people only knew soy as soy sauce on Chinese food," said Ghigo Roggero, spokesman for the group visiting the United States to learn more about the product. "Now we cook with soy oil and eat soy sprouts and tofu," Rogerro said. Roger Leysen who works with the American Soybean Association in Brussels, Belgium, said

the trip was planned to familiarize participants "with the U.S. Soybean world from the farmer to the ship at New Orleans. About half the oil sold in Italy is made from olives grown there, and it sells primarily in gourmet 'extra virgin' form," Leysen said. Soybean oil has captured about half of the remaining blended and pure oil market. Address: Staff.

7215. **Product Name:** Earth Dance Vegetarian Jerki (Made with Tofu) [Original, or Hot-n-Spicy].

Manufacturer's Name: Earth Dance Vegetarian Foods.

Manufacturer's Address: 209 Commerce Drive #2 (or 305 West Magnolia #133), Fort Collins, CO 80524. Phone: 303-482-9213.

Date of Introduction: 1988. September.

Ingredients: Both: Organic soybeans, soy sauce (water, wheat, soybeans, salt), vinegar, liquid smoke, nigari (magnesium chloride from seawater) and spices.

Wt/Vol., Packaging, Price: 4 oz Ziploc plastic bag. Retail for about \$4.35 (7/89, Colorado). Bulk: \$0.27 per 0.38-oz piece.

How Stored: Shelf stable.

New Product-Documentation: Letter and leaflet (copyright 1988) from Jerry Manning, Sales/Marketing Director. 1989. June 20. Letter, Labels, articles, and samples from Jerry Manning. 1989. July 7. Label is 5 by 4.5 inches. Blue-green and orange on beige. Stylized illustration, based on an Australian rock painting, of 3 dancers in front of the sun on the horizon. "All vegetable. Made in Colorado. Created in the spirit of a love for life and respect for all of nature's creatures, Vegetarian Jerki is a spicy, chewy and nutritious all vegetable snack which contains no residual drugs or chemicals. Preserved naturally, Vegetarian Jerki has no cholesterol. Convenient food for conscientious people." Articles (with no year, date, or page) about the product from *The Coloradoan* (by Sally Norman), *Denver Post*, and *Rocky Mountain News*. It was created by Fran Rikhoff, age 31, a part-time housecleaner and full-time vegetarian. Soyfoods Center product evaluation. 1989. July 15. Delicious! Chewy texture and smoke-cured taste.

7216. Ohsawa America. 1988. Macrobiotic foods catalog [Mail order]. P.O. Box 3608, Chico, CA 95927. 36 p. Sept.

• **Summary:** Includes imported (from Japan) soy sauce, miso, miso condiments, koji, and nigari [a tofu coagulant]. Address: Chico, California. Phone: 800-647-2929.

7217. **Product Name:** [Tof'in Tofu Burgers {Not Fried} (Italian-Style, Chinese-Style, au Gratin, Provençale with Tomato & Onions, or Forest Mushrooms)].

Foreign Name: Tof'in (Italienne, Chinoise, Gratinée).

Manufacturer's Name: Société Soy.

Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

Date of Introduction: 1988. September.

Wt/Vol., Packaging, Price: 2 x 100 gm in vacuum pack.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 11.6 gm, fat 8.8 gm, carbohydrates 8.1 gm, calories 158.

New Product–Documentation: Letter from Bernard Storup. 1989. March 3. Tof'in (low fat tofu burgers, cooked without fat) in 3 flavors (Garlic & Fines Herbes, Provençale, and Forestiere) were introduced in April 1986 and discontinued in March 1988. Three other flavors (Italienne, Chinoise, and Gratinée) were introduced in Sept. 1988.

Letter from Bernard Storup of Société Soy. 1990. June 6. Tof'in was introduced first (in 1986) and Croque Tofu (deep-fried burgers) came second (Feb. 1987). They are the same product but the packaging for each was different.

Talk with Bernard Storup. 1990. June 13. Tof'in (pronounced toe-FEEN) was packaged for supermarkets. It was the same as Croque Tofou (both were deep-fried), but not the same as Croque Tofou Léger (which was not deep-fried, and which came in Italienne, Chinoise, and Gratinée flavors). Tof'in was discontinued about 2 years ago. Then 18 months later the company launched, for supermarkets, a product named Doré de Soja, which is the same as Tof'in (i.e. deep-fried).

7218. Sokensha Co., Ltd. 1988. Soken. Its naturally good (Ad). *Natural Foods Merchandiser*. Sept. p. 81.

• **Summary:** "The pioneer of Oriental foods. Soken, the most respected brand from Japan since 1975." Products shown on an island in a stream include soy sauce (no longer labeled tamari), and Vege-Soy Chips. Address: 724 Katakura-cho, Kanagawa-ku, Yokohama 221, Japan. Phone: 45-491-1441.

7219. **Product Name:** [Sra. Soya Soyryza (Like a Mildly Spicy Chorizo Sausage but Made with Okara)].

Foreign Name: Sra. Soya Soyryza.

Manufacturer's Name: Sra. Soya.

Manufacturer's Address: Huertas 17, San Miguel de Allende, Guanajuato 37700, Mexico. Phone: 465-20255.

Date of Introduction: 1988. September.

Ingredients: Okara, whole wheat flour, vinegar, soy sauce, eggs, mustard, garlic, chili & other spices.

Wt/Vol., Packaging, Price: 300 gm and 450 gm vacuum packed.

How Stored: Shelf stable, 3 week shelf life.

New Product–Documentation: Letter from Nicole Black, owner. 1988. Sept. 18. "Fried in oil this tastes like a good Mexican sausage, or mashed with a little mayonnaise it makes a wonderful paté that is very meaty in flavor. Everybody loves it. I think it should sell as well as or better than the tofu. Thus, what is ordinarily waste, ironically enough, will help to save my business."

7220. San-J International, Inc. 1988. Ancient Japanese seasoning now brewed in the U.S. (News release). 2880

Sprouse Drive, Richmond, VA 23231. 3 p. Oct. 6.

• **Summary:** San-J International announced October 6, 1988 that tamari has been successfully brewed for the first time outside of Japan. The domestic tamari was bottled at the company's new Richmond, Virginia brewery after months of careful aging. "Major food producers, including Campbell, Hunt-Wesson, Stouffer and Heinz, use San-J tamari in their packaged foods because of its purity, stability and superior flavor enhancing properties." San-J sent The Soyfoods Center an individually numbered commemorative bottle of their tamari.

Tamari compared to soy sauce "has 30% more organic protein than conventional soy sauce... The most prevalent amino acid in tamari is glutamic acid, which is the natural counterpart of monosodium glutamate (MSG)" San-J tamari is available in 5, 10 and 20 ounce bottles. Seven recipes are given including: Tamari Coconut Freeze, Tamari Mustard Sauce, Tamari Ginger Vinaigrette, Tamari Brown Sugar Bourbon Glaze, Tamari Hollandaise, Szechuan Sausage Cornbread, and Tamari Macadamia Nut Ice Cream. Address: Richmond, Virginia.

7221. San-J International, Inc. 1988. Facts about San-J's Richmond facility (News release). 2880 Sprouse Drive, Richmond, VA 23231. 1 p. Oct. 6.

• **Summary:** (1) San-J's facility in Richmond, Virginia is the only tamari brewery outside of Japan, breaking a 1,200 year old tradition. (2) San-J has the capacity to produce one million gallons/year of tamari. (3) 900,000 pounds of soybeans and 500,000 pounds of soybean meal are purchased per year. (4) Projected sales for 1988 are \$3.5 million. Projected sales for 1989 are \$5 million. (5) Twenty-five people are employed, four of which are Japanese. (6) The annual payroll is \$500,000. (7) Montague Farms is the sole Virginia supplier of soybeans to San-J (William Taliffero). Contact: Mark Givens, Chief Operating Officer; Steve Earle, Senior Vice President. Address: Richmond, Virginia.

7222. Meyer, Amy. 1988. U.S. soy sauce imports (Interview). *SoyaScan Notes*. Oct. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The basic source of information is U.S. General Imports. Schedule A. Commodity by Country. U.S. Dept. of Commerce, Bureau of Census. Monthly statistics are published and totals for each year are given in the December issue. The term "Thin Soy Sauce" refers to typical soy sauce, such as Japanese shoyu. The other thicker Chinese types (black soy sauce, etc.) do not have separate figures kept for them. The SIC code for Edible Foods is #098, and thin soy sauce is 098-0420.

After World War II, U.S. soy sauce imports began in about 1947-50. In 1972 they reached a peak of 23.098 million lb., worth US\$3.1 million. They dropped sharply for the next years after Kikkoman opened its U.S. plant, but

by 1981 were back up to 19.613 million lb., worth US\$7.444 million. One gallon of soy sauce weighs 9.8 lb; 1,000 lb of soy sauce is 102 gallons.

Talk with Amy Meyer. 1989. Dec. 3. She had wanted to publish her extensive research on the soy sauce market in a scholarly journal, such as the *Journal of International Marketing*. She submitted several proposals but they all found the subject too narrow and boring. So nothing was ever published and probably never will be. All the documents are now filed in a large box. Address: 21 Beacon St. #10A, Boston, Massachusetts 02108. Phone: 617-523-3780.

7223. Sugarman, Carole; Hitchcock, Tyler. 1988. A sense of direction: Finding a place for novel products in the Old Dominion. *Washington Post*. Oct. 19. p. E1.

• **Summary:** The section titled “Soy sauce savvy” notes that Takayoshi Sato, the president of San-Jirushi Corp. (the world’s largest brewer of tamari soy sauce) has invested \$10 million to build the company’s first factory outside Japan in Richmond, Virginia; it opened last year. Tamari is made entirely from fermented soybeans. Most Japanese sauces (such as Kikkoman) are made by fermenting both soybeans and wheat. It takes seven months to make tamari, using modern, sanitary equipment and computers. A detailed description of the process is given.

He chose Richmond for several reasons: (1) The cold Virginia winters and humid summers approximate those of Kuwano where Sato and his ancestors have been making tamari for the past 184 years. (2) The supply of pure water from the Appalachian mountains is quite similar to that from the Suzuka Mountains, a range of seven mountains in running through Mie Prefecture in central Japan. (3) A reliable supply of soybeans is available in the USA; they must be imported to Japan. (4) The Virginia location gives San-J better access to the growing American and European markets for tamari.

The San-J plant is will be located in an Industrial park off I-64; it will be clean and scentless. Sato’s office shows a blend of American and Japanese cultures. Once a week, American staffers are offered Japanese language classes; Japanese employees takes English classes.

The first batches of tamari are now ready, and have been sold to industrial users only—food makers such as Campbell, Heinz, and Stouffers. Tamari “is more heat stable and has a richer flavor than other soy sauces, so not as much has to be used per portion.

San-J hopes to supply their bottled tamari to retailers by Jan. 1989. Yet many Americans don’t know what tamari is. So a program of education will be needed if San-J wants to hit the big time.

7224. Ando, Seiichi. 1988. Kishu han no dentô sangyô [The traditional industries of the Kishu han]. In: S. Ando, ed. 1988. Zusetsu: Wakayama-ken no Rekishi [History of

Wakayama Prefecture]. Tokyo: Kawade Shobo Shinsha. See p. 171-. [Jap]*

• **Summary:** The present Wakayama prefecture is one part of the earlier Kishu Han. The latter place name was used during the Edo period until the start of the Meiji period. In this “Illustrated History of Wakayama Prefecture,” in the chapter cited above, there is one section titled “Yuasa—The home of shoyu” (*Shoyu no furusato—Yuasa*). The entire book is 333 p. Address: Osaka Sangyo Daigaku, Osaka, Japan.

7225. Bernard, Richard L.; Juvik, Gail A.; Hartwig, Edgar E.; Edwards, Calton J., Jr. 1988. Origins and pedigrees of public soybean varieties in the United States and Canada. *USDA Technical Bulletin* No. 1746. 68 p. Oct. [20 ref]

• **Summary:** Contents: Old domestic varieties. Modern domestic varieties from public institutions. Germplasm resources information network. Tables: 1. Number of U.S. and Canadian soybean varieties by maturity group. 2. Number of U.S. and Canadian soybean varieties by country of origin. 3. Origins and pedigrees of old domestic soybean varieties. 4. Lost old domestic soybean varieties. 5. Literature on old domestic soybean varieties in chronological order. 6. Origins and pedigrees of modern domestic soybean varieties from public institutions. 7. Genetic information on backcross-derived public soybean varieties. 8. Genetic information on backcross-derived soybean parental lines. 9. Public soybean variety registrations and licenses. 10. Corrections to published pedigree information.

Abstract: “In this report are described the origins of the 440 U.S. and Canadian soybean varieties that are maintained in the USDA Germplasm Collection at Urbana, Illinois, and Stoneville, Mississippi. Varieties in commercial use before the mid-1940’s were mostly introductions, and this report includes for each the geographic place of origin, the person or institution that provided the seeds, the foreign variety name (if any), as well as information about when it was released and who released it in the United States or Canada. Modern varieties have been developed by hybridization and selection. In this bulletin, the pedigree is specified and where and when each variety was developed and released. This information allows researchers and breeders to trace modern soybean varieties back to their introduced ancestors and facilitates breeding plans and evaluation of the germplasm base of the current commercial soybean crop.”

Table 4, titled “Lost old domestic varieties,” lists the source of each: Acme—PI 14.954 from Shanghai, China, in 1905. Akasoya—From Japan via Indiana. Allison Black—D.T. Allison, Tennessee. Amherst—PI 4.913 (PI 17.275) from Japan in 1900. Arikara—O. Will Company, North Dakota. Arkan—PI 87.050 from Niummen, Keisho Nando, Korea, in 1930. Arksoy 2913—Arkansas Experiment Station, Marianna (similar to ‘Arksoy’). Auburn—PI 21.079A from Tieling, Manchuria, China, in 1907. Baird—PI 6.414 (PI 22.333) from Pyongyang [P’yongyang], Korea, in 1901. Biltan—Selection

from 'Ootootan', South Africa.

Brindle—PI 20.407 from Merkoechofka, Siberia, in 1906. Brooks—PI 16.789 from Hangchow, China, in 1905. Brownie—PI 6.414 (PI 17.256) from Pyongyang, Korea, in 1901. Buckshot—PI 6.334 (PI 17.251) from Tokyo, Japan, in 1901. Burnette—From Farmville, North Carolina. Butterball—PI 8.433 (PI 17.273) from Japan in 1902, via Rhode Island AES [Agricultural Experiment Station] in 1903. Chame—PI 80.473 from Tokyo, Japan, in 1929. Chang—PI 54.610-2 from Changchun, Kirin, China, in 1921. Chernie—PI 18.227 from Khabarovsk, Siberia, in 1906. Chinaton Echo—From Harrow, Ontario, Canada.

Chiquita—PI 27.707 from Hankow, China, in 1910. Chuku—La Choy Company, Ohio. Cibao—From El Salvador. Delnoshat—Delta Station selection 6679, Mississippi. Delredo—From Mississippi. DeSoto—Ohio farmer. Dortchsoy No. 2—Dortch Seed Company, Arkansas (selected from 'Ogden', similar to 'Ogden'). Dortchsoy No. 6—Dortch Seed Company, Arkansas. Dortchsoy No. 7—Dortch See Company, Arkansas. Doxie—Georgia Experiment Station.

Duggar—PI 17.268C, a selection from 'Ito San.' Early Brown—PI 25.130 and PI 25.161 from Tennessee AES and Indiana AES in 1909. Eda—PI 17.257 from Japan in 1890. Edgecombe—R.P. Cocke, Williamsburg, Virginia. Edna—PI 6.312 (PI 17.252C) from Tokyo, Japan, in 1901. Edward—PI 14.953 from Shanghai, China, in 1905. Fairchild—PI 19.184 from Newchwang, Manchuria, China, in 1906. Farnham—PI 22.312 from Shanghai, China, in 1908. Feed All—A.M. Johnson, North Carolina. Flat King—PI 6.312 (PI 17.252) from Tokyo, Japan, in 1901.

Flava—PI 16.789A from Hangchow, China, in 1905. Gala—Georgia Experiment Station. Gem—P.B. Hutchins, Missouri. George Washington—From Virginia. Giant Yellow—PI 22.415 from Naples, Italy, in 1908. Golden—Harrow Experiment Station, Ontario, Canada. Goshen Prolific—Farmer selection, North Carolina. Hamilton—From USDA number 23 by Ohio Experiment Station in 1909. Hankow—PI 6.559 from beyond Chiu Niu, China, in 1901. Hansen—PI 20.409 from Merkoechofka, Siberia, in 1906.

Hay Boy—Farmer selection, North Carolina. Herman—From North Carolina. Hiro—PI 86.038 from Obihiro, Hokkaido, Japan, in 1930. Hope—PI 6.335 (PI 17.267) from Tokyo, Japan, in 1901. Ignatum—E.E. Evans, Michigan. Italian—Canada Experiment Station. Ito San—PI 17.268 from Japan in 1890. Jet—PI 17.861 from Sachon, China, in 1906. Johnsoy—A.E. Johnson, North Carolina. Kentucky A—Kentucky Experiment Station selection.

Kia—Illinois Experiment Station selection. Kungchuling—From Manchuria, China. Looney No. 2—Farmer selection, Tennessee. Lowrie—PI 22.898A from Paotingfu, Chihli, China, in 1908. Loxitan—Delta Experiment Station selection, Mississippi. Ludeke—Farmer selection, North Carolina. LZ—Louisiana Experiment Station selection. Mammoth Brown—Unknown. Manhattan—PI 6.333 (PI 17.277) from Tokyo,

Japan, in 1901. Matthews—Farmer selection, Georgia.

Merk—PI 20.412 from Merkoechofka, Siberia, in 1906. Meyer—PI 17.852 from Peking, China, in 1906. Midunk—Funk Brothers Seed Company, Illinois. Mikado—Farmer selection, Indiana. Misstucky—Farmer selection, Kentucky. Morgan—PI 22.633 from Sheklung, Kwongtung [Kwangtung / Guangdong], China, in 1908. Mount Carmel—PI 70.218-2 from Wuchiatzu, Manchuria, China, in 1926. Mukden No. 4—Wisconsin Experiment Station selection. Nanking—PI 71.597 from Nanking, China, in 1927 (see CNS, p. 6). Nanksoy—PI 104.881 from Nanking, China, in 1934.

Nansemond Early—Farmer selection, Virginia. Natsu—PI 19.984 from Yokohama, Japan, in 1907. Nemo—PI 19.985 from Yokohama, Japan, in 1907. Nielsen—PI 22.644B from Hangchow, Chekiang, China, in 1908. Nigra—PI 22.407 from Hong Kong, China, in 1908. Nuttall—PI 6.416 (PI 17.253) from Pyongyang, Korea, in 1901. Okute—PI 19.986 from Yokohama, Japan, in 1907. Oloxi—Coker's Seed Company, South Carolina. Otxi—From South Africa. Ozark—PI 37.272 from Kogen Province, Korea, in 1914.

Pee Dee—Coker's Seed Company, South Carolina. Pingsu—PI 18.259 from Tschang-ping-tsu, China, in 1906. Preston—Virginia Experiment Station selection. Quillian—Farmer selection, Oklahoma. Rattlesnake—Kentucky Experiment Station selection. Riceland—PI 20.797 from Shanghai, China, in 1907. Rila—Marsh Foundation, Ohio. Sainte Anne—Canada Experiment Station selection. Samarow—PI 17.260 from J.M. Thorburn and Company in 1902. Saskatoon—Farmer selection, Canada.

Sedo—PI 23.229 from Tientsin, Chihli, China, in 1908. Sherwood—PI 17.862 from Tientsin, China, in 1906. Southern Green—PI 62.839 from Nanking, China, in 1925. Southern Prolific—PI 37.250 from Keiki Province, Korea, in 1914. Stuart—PI 22.644 from Hangchow, Chekiang, China, in 1908. Summerland—Canada Experiment Station selection [British Columbia]. Suru—PI 89.128 from Kyojo, Korea, in 1930. Swan—PI 22.379 from Canton, Kwangtung, China, in 1908. Taha—PI 21.999 from Boshan, Shantung, China, in 1907. Tanloxi—Delta Station selection 483, Mississippi.

Tashing—PI 20.854 from Harbin, Manchuria, China, in 1907. Tensas—PI 104.881 from Nanking, China, in 1934 (same as Nanksoy). Texoil—Farmer selection, Texas. Tinzan—From Australia. Trenton—PI 24.610, a selection from 'Mammoth (Yellow)' in Kentucky in 1904. Trinitaria—From El Salvador. U.S.-5—PI 54.563-5 from Jungchiangko, Shengking [Liaoning], China, in 1921. Vilnensis—From Poland. Vireo—PI 22.874 from Tokyo, Japan, in 1908. White Eyebrow—PI 30.745 from Wulukai, Kirin, China, in 1911.

Yellow Biloxi—North Carolina Experiment Station selection. Yokotenn—PI 19.981 from Yokohama, Japan, in 1907. Yoshon—PI 6.314 (PI 17.262) from Tokyo, Japan, in 1901.

Talk with Dr. Richard Bernard. 1998. July 12. He considers this to be his best publication on this subject, but

it is quite similar to *INTSOY Series No. 30* titled “USDA soybean germplasm collection inventory. Vol. 1,” published in August 1987. Address: 1-2. Urbana, Illinois; 3-4. Stoneville, Mississippi.

7226. Product Name: Paul’s New and Original Brown Rice Tofu Sandwich [Basic, Raw Onion & Radish, or Half Size with Arame].

Manufacturer’s Name: Bert’s Place. Renamed Paul’s Place. Renamed Paul’s Organic Food Works in March 1989.

Manufacturer’s Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.

Date of Introduction: 1988. October.

Ingredients: Basic: Short grain brown rice*, spring water, nigari tofu*, sprouted wheat tortilla*, toasted tahini, barley miso*, green onions* or leeks*, carrots*, seasonal green*, lettuce*, clover sprouts*, shoyu*, sesame oil*, garlic*, ginger*, apple cider vinegar, unrefined sea salt, spices. * = Organically grown per Cal. Health Code Sec. 26569.11.

Wt/Vol., Packaging, Price: 12 oz. The basic and onion retail for \$3.75, the half size retails for \$2.10 (8/89, northern California).

How Stored: Refrigerated.

New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on pink, red, or blue paper. “12 happy ounces (6 ounces for arame). For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down.” Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back of each is a statement, which is changed every 2 weeks. For example: “Smile. Its great exercise for both of us.” “The means are the ends. Sonia Johnson.” “Mind is body is mind is body. Blumlein.” Talk with Paul Duchesne. 1989. Aug. 16. The basic was his first new product introduced in Oct. 1988, the Raw Onion & Radish (the radish used to be daikon) in November, and the half size in Dec. 1988. They were developed with the help of Barbara Svenning Garvey. The new and original is now different: The tofu is marinated and a seasonal green (usually kale or collards) is added. The rice is cooked in spring water. These changes are voluntary. Paul is now making and selling about 360 brown rice and tofu sandwiches a week.

7227. East West. 1988. East West presents: Best & worst awards. 3rd annual. 100% natural. Oct. p. 65-72.

• **Summary:** Best Natural Soy Sauce: Lima Nama Shoyu from Ohsawa-Japan, imported by Ohsawa America of Chico, California. Twice brewed, lower in salt, and aged four years. “It is unique among shoyus, with exceptional smoothness and flavor.”

Better Than It Sounds Award:” Tofu chocolate? Yes, Barat Bars by Legume Inc. of Montville, New Jersey, use tofu instead of dairy and no hydrogenated or fractionated palm kernel oil. Carob candies move over!”

Best Tasting Flavored Soy Drinks: “The Westbrae Malted won this contest going away. Creamy, thick, and delicious, they are more of a dessert than a drink. Some devotees eat them frozen.”

Least Healthful Line of Soy Drinks: “The Westbrae Malted. The flip side of their great taste is their almost 400 calories and 15 grams of fat per 8 ounces.”

Most Healthful Line of Soy Drinks: Edensoy. They are the only producers making a totally oil-free drink.

Worst Tasting Flavored Soy Drinks: “Vitasoy from San Francisco, Calif., seem to have few fans and finished last in our blind taste test.”

Most Questionable Beverage Label Claim: “3 grams of fat per 6 ounces of Carob and Chocolate Ah Soy, by Great Eastern Sun of Enka, North Carolina. These soymilks are rich and creamy, yet 3 grams is a lower fat content than even Edensoys, made without oil. How is that possible guys?”

That’s Progress? Award: “Mori-Nu Tofu by Morinaga Nutritional Foods of Los Angeles. Aseptic Tetrapacked tofu that has indefinite shelf life and can be shipped anywhere. Good for backpackers maybe but can’t compare to fresh and local.”

Best Fake Hot Dog: SoyBoy Tofu Not Dogs by Northern Soy of Rochester, N.Y. “Nice smoky flavor and smooth texture, almost as good as the real thing.”

Worst Fake Hot Dog: Tofu Pups of Lightlife Foods of Greenfield, Massachusetts. “Dry and crumbly on the inside, with a lack of distinctive flavor. Won’t fool anybody at the neighborhood cookout.”

Best Tamari: San-J Traditionally Brewed Tamari from San-J International of Colonial Heights, Virginia. “No one else even came close. Question: Will they be able to retain their appeal when the first U.S.-brewed batch hits the shelves?”

7228. Product Name: Rice & Vegetable Sandwich (In a Chapati with Tofu).

Manufacturer’s Name: Essential Foods.

Manufacturer’s Address: 6411 Latona Ave., N.E., Seattle, WA 98115.

Date of Introduction: 1988. October.

Ingredients: Organically grown brown rice, tofu, scallion, cabbage, carrot, corn oil, shoyu, salt, whole wheat chapati.

Wt/Vol., Packaging, Price: 7.5 oz.

New Product–Documentation: Talk with Paul Duchesne. 1989. July 31. Marty Roth learned how to make this sandwich from Paul. Marty told or taught Jeff Fairhall how to make these sandwiches. Jeff started making them in about the fall of 1988. He now makes 1,000 sandwiches a week and sells them fresh at multiple outlets, including 7-11 type stores. Jeff has 5 employees and is serving 45 products. Label sent by Paul Duchesne. 1989. Aug. 11. Black on tan. “Best served at room temperature or slightly warmed.”

Illustration of a rice plant.

7229. Karta, Susani K. 1988. Market trends in the development of traditional soyfood. Paper presented at the ASEAN Food Conference '88: Food Science and Technology in Industrial Development. 18 p. Held 24-26 Oct. 1988 at Bangkok, Thailand.

• **Summary:** Contents: Introduction. Traditional soyfood. Market situation and trends. Indonesia. Singapore. Malaysia. Thailand. Constraints in the market development of soyfood (in each of the above 4 nations). Major trends in the development of traditional soyfoods. Marketing strategy of soyfood. Tables: 1. Traditional non-fermented soyfood products. 2. Nutritional composition of traditional non-fermented soyfoods. 3. Description and uses of traditional fermented soyfood products. 4. Nutritional composition of traditional fermented soyfoods.

5. 1987 estimated consumption of soybeans as foods in the Far East [total and per capita in East Asia]. China, 1,062 million population, 7,325,000 tonnes, 6.9 kg/capita. Japan, 122 million population, 1,141,000 tonnes, 9.3 kg/capita. South Korea, 42.1 million population, 330,000 tonnes, 7.8 kg/capita. Taiwan, 19.6 million population, 260,000 tonnes, 13.3 kg/capita.

6. Southeast Asia soybean consumption for food. From 1983 to 1989 the increase in 1,000 metric tons was: Indonesia 927 to 1,600. Singapore 14 to 26. Malaysia 32 to 70. Thailand 40 to 150. Philippines 9 to 24. Total 1,022 to 1,870 (increase of 82.9% in 7 years).

7. Per capita soybean consumption for food in Southeast Asia. From 1983 to 1989 the increase in kg/person was: Indonesia 6.0 to 8.8. Singapore 5.6 to 10.5. Malaysia 2.1 to 3.7. Thailand 0.8 to 2.6. Philippines 0.2 to 0.5. Average total: 3.8 to 5.9 (increase of 55.3% in 7 years).

8. 1987 estimated consumption of soybeans as foods in Southeast Asia [total and per capita]. Indonesia, 175 million population, 1,575,000 tonnes, 9.0 kg/capita. Thailand, 53.6 million population, 118,000 tonnes, 2.2 kg/capita. Malaysia, 16.1 million population, 55,000 tonnes, 3.4 kg/capita. Singapore, 2.6 million population, 20,000 tonnes, 7.7 kg/capita. Philippines, 61.5 million population, 18,000 tonnes, 0.3 kg/capita.

9. Indonesian soybean production, imports, and consumption as food (in tonnes). From 1983 to 1989, production rose from 536,000 to 1,250,000, imports decreased from 391,000 to 350,000, and the amount consumed as food increased from 927,000 to 1,600,000. About 50% of the soybeans used for foods in Indonesia go to make tempeh, and 40% are used to make tofu.

10. Singapore soybean consumption as food. From 1983 to 1989 the amount increased from 14,000 tonnes to 26,000 tonnes. Most of these soybeans are used to make tofu and soymilk. 11. Malaysia soybean imports and consumption as food (in tonnes). From 1983 to 1989, production rose from 182,000 to 440,000, and the amount consumed as food

increased from 32,000 to 70,000. 12. Thailand soybean production, and consumption as food (in tonnes). From 1983 to 1989, production rose from 113,000 to 490,000, and the amount consumed as food increased from 40,000 to 150,000. Only in 1988 were soybeans imported—40,000 tonnes. This growth of soyfood consumption is due partially to the Government of Thailand's interest in promoting the awareness and utilization of soyfood products. The Thailand Agricultural Extension Service program and other institutions have been actively advocating of soyfoods into the food industry and the human diet, especially in rural areas. The government controls soybean imports by issuing licenses.

In summary: The soybeans with the highest per capita soybean consumption for soyfoods are: Taiwan 13.3 kg, Japan 9.3 kg, Indonesia 9.0 kg, Singapore 7.7 kg, South Korea 7.3 kg, and China 6.9 kg. The greatest potential for growth lies in China, where it is very common to find markets running out of soyfoods early in the morning. There is also great potential for growth in Malaysia, Thailand, and the Philippines. Address: American Soybean Assoc., 541 Orchard Rd., #11-03 Liat Towers, Singapore 0923, Republic of Singapore.

7230. Shurtleff, William; Aoyagi, Akiko. 1988. *Das Miso-Buch: Herstelllung, Sorten, Kochen mit Miso, Rezepte* [The book of miso: Production, varieties, cooking with miso, recipes]. Munich, West Germany: Goldmann Verlag GmbH. 414 p. Oct. Illust. by Akiko Aoyagi Shurtleff. Index. 23 cm. Pocket book edition. [Ger]

• **Summary:** A pocket book edition of the original 1980 German edition of *The Book of Miso*. Contains 350 recipes.

Contents: Foreword. What is miso? Part I. Varieties, preparation, and production of miso. Part II. Cooking with miso (recipes). Glossary. Acknowledgments. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 415-283-2991.

7231. **Product Name:** [Wheat & Soy Patties, Rice & Soy Patties, Green Rye & Soy Patties].

Foreign Name: Dinkel-Laibchen, Reis-Laibchen, Gruenkern-Laibchen.

Manufacturer's Name: Sojarei Ebner-Prosl.

Manufacturer's Address: Augasse 2, A-2500 Baden bei Wien, Austria. Phone: 02252/85101.

Date of Introduction: 1988. October.

Ingredients: Wheat & Soy: German wheat (spelt, Dinkel), soybeans [okara], sunflower seeds (all organically grown), wheat protein, tamari, onions, yeast flakes, salt, herbs, and spices.

Wt/Vol., Packaging, Price: 2 patties, 200 gm.

How Stored: Refrigerated.

New Product–Documentation: Label, received 1989. Oct. Red, black, green, and white on yellowish orange. 3.5 by 3

inches. Self adhesive. Logo is a green soybean plant against a white circular background. "Just warm and serve. Free of cholesterol. No flesh. Pure and from plants."

Ingredients for the Rice & Soy Patties are: Brown rice, soybeans, and whole wheat flour (all organically grown), rolled oats, barley miso, tamari, yeast flakes, salt, herbs, spices.

Ingredients for the Green Rye & Soy Patties are: Green rye and soybeans (both organically grown), tamari, onions, yeast flakes, salt, herbs, spices (curry).

Talk with Guenter Ebner of Sojarei Ebner-Prosl. 1990. May 28. The soy ingredient in these is okara.

7232. *SoyaScan Notes*. 1988. Products containing little or no soya or seitan made by Jonathan in Belgium for which Soyfoods Center has labels (Overview). Oct. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** These labels were sent by Jonathan in 1988, along with many labels for soyfood products. Most labels have the product name given in English, German, French, and Dutch. Only the English is given below. Many of the products contain organically grown ingredients, with the Cinab logo.

Spiced biscuits [with fructose], Bran biscuits [soy flour is the 7th ingredient], Fruit biscuits (without addition of sugar), Almond biscuits (without addition of sugar), Sesame biscuits (without addition of sugar), Fructose biscuits, Four-cereal biscuits (with cane sugar), Spiced butter biscuits (with cane sugar)

Mochi, Lasagna (vegetarian, with soy sauce), Pilav rice (Pilaf), Risotto and lentils (with soy sauce). This line of products (each 300 gm) has elegant labels with a color photo on the front panel.

Wheat wafers (with soy flour), Muesli wafers without sugar, Coconut cake with fructose, Wheat biscuits, Hasselt spices biscuits (with soy flour; Speculoos, Spekulatorius), Baby-food. All self-adhesive labels, 4.5 by 2.25 inches.

Mushrooms in tomato sauce (vegetarian), Lentils (with soy sauce), Lasagna, Whole wheat pasta.

Vegetarian entrees, each 500 gm: Brown rice casserole with lentils + vegetables, Brown rice casserole with lentils + seitan, Pumpkin creme, Pumpkin soup with brown rice, Mushroom soup, Millet-onion soup, Azuki bean soup, Lentil soup, Seitan-Ratatouille (Wheat protein and vegetables), Seitan-Goulash, Seitan, Nutmix spread, Hazelnut spread with almonds.

Each 250 gm: Prepared azuki beans, Prepared lentils, Seitan Bolognese, Lentil spread, Seitan spread, Mushroom spread, Mushrooms in tomato sauce, Apricot spread, Carob spread, Fig spread, Date spread, Raisin spread, Peanut butter, nutmix spread, hazelnut spread with almonds.

7233. *Taste (Kikkoman, Japan)*. 1988. Anniversary celebration: June 3, 1988 [Kikkoman Foods, Inc. in

Walworth, Wisconsin]. 2(3):8. Oct.

• **Summary:** The guest list was impressive. Five past and present governors of the state of Wisconsin were among the 500 guests who gathered to celebrate the 15th anniversary of Kikkoman Foods, Inc. Also present were Dr. Keizaburo Mogi (honorary chairman of Kikkoman Corp.) and Yuzaburo Mogi. In 1973 Kikkoman Foods began production in Walworth, Wisconsin to meet the growing demand for soy sauce in the United States. In the original small plant, 50 employees produced 1.5 million gallons a year of soy sauce and teriyaki sauce. Today the work force is more than double, while production has increased fivefold [to 7.5 million gallons a year].

7234. Meyer, Amy. 1988. The soy sauce market in America (Interview). *SoyaScan Notes*. Nov. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Total soy sauce sales in the U.S. are about \$125 million for 1987. The major market segments are consumer retail, restaurants and institutions, and industrial/food processors. The latter is estimated at about \$4 million. The figures compiled annually by Progressive Grocer only cover grocery stores.

La Choy is the leader in retail sales, followed by Kikkoman, then Chun King. Kikkoman is the leader in sales to restaurants, followed by Yamasa, then Chinese imports.

Last year San-J sold about \$5 million worth of soy sauce in the U.S. Of this, \$3 million went to industry (food processors) and \$2 million to retail (mostly health food). Amy is gathering this information for publication in a professional journal, probably the *Journal of International Marketing*. Address: 21 Beacon St. #10, Boston, Massachusetts 02108. Phone: 617-523-3780.

7235. Bolduc, Bill. 1988. Re: Early history of Eden Foods, Inc. to 1973. Part I. Letter to William Shurtleff at Soyfoods Center, Nov. 5. 2 p. Typed, with signature on letterhead (photocopy).

• **Summary:** The following account is based on hours of discussion between Bill Bolduc, the Redmonds, and the Silvers between 1988 and 1991. Bill is not familiar with the details of the history of the food co-op in Ann Arbor prior to 1969. But Ronnie Teeguarden says that in about July 1967 he and Gloria Dunn started a loosely-organized food buying co-op—which had no name—in Ann Arbor, Michigan. Within a few weeks, a number of their friends and acquaintances (a group of eclectic pathfinders, students, graduates, macrobiotics, dropouts, musicians) informally joined the group. These included Tim Redmond, Mark and Nancy Retzliff, Linda Succop, Iona Teeguarden, and Bob Thorson. From time to time, they collectively ordered macrobiotic staples from Erewhon in Boston using the Erewhon catalog. When the foods arrived, the food co-op members got together and divided them up at the Teeguarden-Leabu

General Store, located a half flight below street level at 209 South State Street, below the Herb David Guitar Studio in Ann Arbor. Run by Ronnie Teeguarden, with help from Gloria, this store's main business was selling local art, second hand clothes and records, etc.

Bill Bolduc and Judy Succop [Linda Succop's sister], were married in June 1969 in Ann Arbor. They were not yet members of the co-op at that time. A few days later, they went to Berkeley for the summer. When they returned to Ann Arbor at the end of that summer, they lived in Saline, Michigan, 12 miles outside of town with Mark & Nancy Retzloff, Linda Succop, and Tim Redmond. Bill, who wasn't working or going to college, was trying to figure out what to do next. By September 1969, Bill and Judy Bolduc joined the food co-op. They also joined the Zen Macrobiotic Supper Club; all of its members were also members of the food co-op.

In the fall of 1969 the Teeguarden-Leabu second-hand store looked like it was about to close, which would leave the food co-op without a home. The group (especially Ronnie) convinced Bill Bolduc to take charge of the food co-op and find it a permanent home, which he did.

On 4 Nov. 1969 Bill Bolduc incorporated Eden Organic Foods, Inc. as a non-profit corporation in the state of Michigan. The name "Eden," which stood for Environmental Defense Energy Network, was coined at this time by Bob Thorson during a discussion between, Bill Bolduc, and Gloria Dunn at a coffee shop. Thus, the term "Eden" was first used in connection with this co-op or business in Nov. 1969.

Eden was born under a good star. The date Nov. 4 was carefully chosen to be astrologically propitious. At the time, Bill was an intense student of astrology with Michael Erlewine—who is now world famous in the field, and the owner of Circle Books, an astrological publishing company. In 1970 Michael also designed the Eden logo of the 4 sprouts in a circle. Eventually Michael became one of Bill Bolduc's students in macrobiotics.

Bill was president of Eden Organic Foods and his wife Judy (who was working as a secretary at the University of Michigan School of Music) was secretary. Bolduc used \$200 of his own money to rent a converted apartment above the bicycle store at 514 East William St. in Ann Arbor, near campus. People from the community loaned \$1,500 to help stock the co-op store and buy an 8-inch Meadows stone mill to grind flour.

The question arises: When was Eden Foods established? Bill Bolduc and Tim Redmond believe that the founding should be dated from Nov. 1969, when the company was first named; before Nov. 1969 the food co-op was not even a business. It was dead and had disappeared for about a month until Bill resurrected it by placing an order to Erewhon using his own money.

Eden Organic Foods first began selling soyfoods

commercially in November 1969, starting with their first order from Erewhon in Boston. They would buy "tamari" (actually shoyu) and miso (kome = rice, mugi = barley, and Hacho varieties) in bulk from Erewhon (which imported them from Japan). At their store, Linda Succop (Bill's wife's sister) would repackage the products, putting the shoyu into bottles and the miso into plastic bags. They were labeled using plain white pressure-sensitive gummed labels with a rubber stamp. One stamp contained the name and ingredients for each product, and another, that was stamped below it, gave the company name and address. They wrote in the weight or volume by hand. Also at William St. a tiny Meadows Mill was used to grind grains and seeds into flour. Continued. Address: ELI Research Corp., 660 Northland Blvd., Suite 28, Cincinnati, Ohio 45240. Phone: 513-851-0330 or 513-751-9090.

7236. Bolduc, Bill. 1988. Re: Early history of Eden Foods, Inc. to 1973. Part II. Letter to William Shurtleff at Soyfoods Center, Nov. 5. 2 p. Revised 4 Dec. 1991 by Bill Bolduc, Ron Teeguarden, and James Silver.

• **Summary:** In Sept. 1970 the fledgling company had an offer to move into a newly-redecorated mini-mall [at 211 South State St.] on the main street of campus. New personnel and financing would be needed. Bolduc called Tim Redmond, who had been studying and working at the Sanae macrobiotic restaurant in Boston, to ask for help. Tim returned to Ann Arbor and joined Bolduc in the expansion effort. To raise money for the move, the two approached Tim Redmond's father, who said he would help finance the expansion only if the business was reorganized as a for-profit corporation with Tim having equal ownership. They agreed and in about Oct. 1970 Eden was reorganized as a for-profit corporation with Bolduc and Redmond each owning 50%. At that time the partners shortened the company name to Eden Foods Inc. Bolduc and Redmond then borrowed a 4-figure sum from Tim's dad, had the new store remodeled, and entered the big time. After the new store was opened and running, Redmond returned to Boston and the Sanae restaurant, where he completed his studies. But with this move they fell from the graces of the political co-ops. In November 1970 they did a "Brown rice, seaweed, and dirty hot dog" Bob Dylan commercial on a local radio station; it was a big hit. They bought a 15-inch Meadows Mill and a rotary-drum roaster, then milled flour and baked granola in the back of the store.

In 1970 Bill had located Tom Vreeland, an organic farmer in Ypsilanti, Michigan. An Eden Foods Wholesale Pricelist dated 26 July 1971 shows that the Eden store at 211 South State St. was wholesaling soybeans, soft wheat, corn, and rye, all grown organically in Michigan. Eden was also selling organic flours that they ground from these grains.

In the spring of 1971, after realizing they were the only "natural food" store in the area, and having some other

“health food” store owners in Detroit express an interest in carrying more food, they decided to wholesale foods out of the back of their retail store at 211 South State Street. Bill flew to Boston to meet Tim Redmond. They visited Erewhon (they wanted to convince Erewhon to let Eden be their distributor at lower prices), then Bill flew to Arrowhead Mills in Deaf Smith County, Texas, to make arrangements buying in bulk at wholesale prices. In the summer of 1971 they ordered their first 20-foot trailer load of organic foods from Arrowhead Mills, and ran an ad in *East West Journal*. Soon they started to distribute their foods to 4-5 accounts in Detroit. They bought a 1964 16-foot green Dodge van and a dry weight weigher/dumper machine. Their two main brands were Arrowhead Mills and Erewhon, but soon they developed the Eden brand with printed labels, onto which they would rubber-stamp the product name (such as bottled tamari and packaged miso). Soon they added other brands: Celestial Seasonings, After the Fall, Timbercrest, etc.

The wholesale operation quickly outgrew the back of the retail store, so they borrowed more money and rented a 5,000 square foot Quonset hut (resembling an airplane hanger) down on Main Street by the Huron River. Tim Redmond, Mark Retzliff, and Bill Bolduc ran the wholesale operation. Retzliff later co-founded Alfalfa's, a natural foods supermarket chain based in Boulder, Colorado.

In October 1971 Bolduc hired Michael Potter, who was living in Detroit, to run the store. Just before this, Potter had managed a natural foods store named Joyous Revival in nearby Birmingham, Michigan. Prior to this time, the company had been owned by Bill and Judy Bolduc (50%) and by Timothy Redmond (50%). Potter was given 13.5% of the stock and the other principals' share reduced proportionally.

In the late summer or fall of 1973 the Bolducs sold their shares back to the corporation, which then gave a portion of these to Tim Redmond and Michael Potter so that these two men now owned 51% and 49% respectively.

The Bolducs then left Ann Arbor, moving to Cincinnati, then to Illinois, then back to Ann Arbor. Bill is certain that when he left Eden Foods, the company was not importing any products from Japan. He would guess that it was not until about 1975 that Eden started to import a line of foods from Japan. Their first supplier in Japan was Muso Shokuhin, a leading macrobiotic and natural foods exporter in Osaka. Initially, all of their imported products were required to bear the Erewhon brand. Imported soyfoods included miso and shoyu. Sales hit \$175,000 in 1973.

Note: Eden was the first of the many macrobiotic distributors based on the Erewhon model to open in America. Others that soon followed included Food for Life in Chicago (1970), Janus in Seattle, Washington (1972 Jan.), Essene in Philadelphia (by 1971 Feb.), Laurelbrook in Maryland (1971 Aug. 23), Ceres in Colorado Springs (by 1973), and The Well in San Jose, California (1973). Address: ELI Research

Corp., 660 Northland Blvd., Suite 28, Cincinnati, Ohio 45240. Phone: 513-851-0330 or 513-751-9090.

7237. Sheraton, Mimi. 1988. Cookbooks to give thanks for: An autumn harvest of American standards, Asian flavors and universal inspiration. *Time*. Nov. 28.

• **Summary:** *An Ocean of Flavor* (Morrow, \$20.95) is by Elizabeth Andoh, an American who married a Japanese and has spent many years in Japan studying the country's food and culture. This fine guide shows how to enhance the flavor of seafood without destroying it. “Fried soft-shell crabs in a spicy sauce, cold poached tilefish with mustard-miso sauce and fiddlehead ferns, and a careful, simple tempura recipe are among the enticements.”

Another new Asian food book is *Asian Ingredients* (Morrow; \$22.95) by Bruce Cost. It includes a discussion of the “soy sauces that so many chefs are now using to accent European dishes.”

7238. Belleme, Jan. 1988. Fabulous finger foods. *East West*. Nov. p. 32, 34, 36-39.

• **Summary:** Includes recipes for: Tempeh Salad Tea Sandwiches. Walnut-Miso Dip. Deep-Fried Tempeh with Tofu-Mustard Topping. Address: Rutherfordton, North Carolina.

7239. **Product Name:** [Marinated Tofu].

Foreign Name: Tofu Mariniert.

Manufacturer's Name: Das Tofuhaus.

Manufacturer's Address: Hauptstrasse 13, D-6719 Lautersheim, West Germany. Phone: 06351-43718.

Date of Introduction: 1988. November.

Ingredients: Tofu, soy sauce, garlic, ginger.

Wt/Vol., Packaging, Price: 250 gm.

How Stored: Refrigerated.

New Product–Documentation: Form filled out by Albert Hess. 1988. Dec. 1. This product was introduced in Nov. 1988. Label. 1988. 2.5 by 3.5 inches. Black on yellow.

7240. Duxbury, Dean D. 1988. Japanese-style tamari furnishes more protein, less sodium, heat stability. *Food Processing (Chicago)* 49(11):90, 92. Nov.

• **Summary:** About San-J tamari, which contains 30% more fermented vegetable protein than conventional soy sauce. Address: Associate editor.

7241. **Product Name:** Eden Naturally Brewed Shoyu, and Eden Wheat Free Tamari.

Manufacturer's Name: Eden Foods, Inc. (Marketer-Distributor). Made in Virginia by San-J International, Inc.

Manufacturer's Address: 701 Tecumseh Rd., Clinton, MI 49236. Phone: 800-248-0301 or 313-973-9400\.

Date of Introduction: 1988. November.

Wt/Vol., Packaging, Price: 5, 10 and 20 oz bottles, 5 gallon

cubes, and 55 gallon drums.

How Stored: Shelf stable.

New Product–Documentation: Press Release. 1988. Nov. These two new products are “the first soy sauces made in America using traditional Japanese processing techniques and all-natural ingredients. Whole, Virginia-grown ingredients are fermented in temperature controlled vats which accelerate the brewing process while simulating the fluctuating temperatures of the seasons.”

7242. **Product Name:** Grand Life Seitan “Wheat-Meat.”

Manufacturer’s Name: Grand Life Natural Foods.

Manufacturer’s Address: P.O. Box 403, Pacific Grove, CA 93950 [c/o Sweet Earth, 207 16th St.]. Phone: 408-375-8673.

Date of Introduction: 1988. November.

Ingredients: Whole wheat flour, filtered water, natural tamari (soybeans, wheat, seasalt), kombu, ginger, garlic.

Wt/Vol., Packaging, Price: 8 oz (226 gm) vacuum pack. Retail for \$2.98 (11/91).

How Stored: Refrigerated.

New Product–Documentation: Talk with Paul Duchesne of Fairfax, California. 1991. Nov. 19. Two women from Austria (to whom Paul talked—they were returning to Austria) just sold their seitan company to two guys who still are making seitan. It was located in Pacific Grove, or near there, down the California coast. This seitan is sold in health food stores. It is sold sliced thin, in flat plastic bags, more like a cutlet than like Ron Harris’ old seitan chunks.

Product with Label purchased from Berkeley Natural Grocery Co., California. 1991. Nov. 24. 3 by 4.5 inches on a 6.5 by 9-inch plastic vacuum-pack bag. Black, white, and yellow on brownish-gold. “100% vegetable protein. Seasoned wheat gluten. Ready to eat. No cholesterol. Low in fat. Seitan was first developed by Zen Buddhist cooks in China and Japan, and used in place of meat. Grand Life seitan has a full-bodied, rich taste and a juicy, tender texture. It’s nutritional value and hearty, yet light taste and texture is pleasing to vegetarians and people attempting to reduce or eliminate from their diet. Grand Life seitan is superb in sandwiches, soups, salads, stews, and casseroles. Please try it deep-fried, sauteed, broiled, and even barbecued in your favorite recipes.”

Talk with Russel Hicks, owner of Sweet Earth Natural Foods in Pacific Grove. 1991. Nov. 26. Grand Life was started in late 1988 by Edmund and Angela Reininger (he was a trained chef and knowledgeable macrobiotic; they were married), and by a woman named Terry Navaille (whose brother is Russel’s brother-in-law). From the outset they rented space at Sweet Earth (soon they were trading product for rent), where they made seitan 1 day a week for about 2 years. Edmund developed this sliced form of the product. Then in about April 1989 Edmund and Russel developed the Grand Life Sandwich (based on breaded

seitan). In early 1991 Edmund and Angela felt guided to return to Austria; also their visas were running out and they were having trouble getting work permits. Terry was having a baby, so she went her own way in Pacific Grove. So in May 1981 the 3 founders sold their recipe and the name to Sweet Earth. Current seitan production is 250-300 lb/week. It is made from vital wheat gluten, not from whole wheat. Product sales are now growing nicely and are about to grow a lot more. Now it is sold vacuum packed and refrigerated, with a very limiting 2-week shelf life. Soon Sweet Life will be installing big freezers and it will be sold frozen and promoted much more. Many distributors want to carry it as soon as it is available frozen.

Soyfoods Center product evaluation. 1991. Nov. 26. Excellent texture, good flavor, poor label design. We feel product has expanded potential sold in a meatless gravy, or as breaded deep-fried cutlets.

7243. **Product Name:** [Tofu Burgers {Deep-Fried} (Garlic and Fines Herbes, Provencale with Tomato & Onions, or Forest Mushrooms)].

Foreign Name: Doré de Soja (Ail/Fines Herbes, Provençale, Forestière).

Manufacturer’s Name: Société Soy.

Manufacturer’s Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

Date of Introduction: 1988. November.

Wt/Vol., Packaging, Price: 2 x 100 gm in vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Talk with Bernard Storup. 1990. June 13. Tof’in is the same as Croque Tofou, but not the same as Croque Tofou Léger. Tof’in was discontinued about 2 years ago. Then 18 months later the company launched, for supermarkets, a product named Doré de Soja, which are the same as Tof’in. The packaging is very nice.

Letter from Bernard Storup. 1990. Dec. 26. “All the confusion between deep-fried and not deep-fried Croque Tofou comes from the fact that our first labels all said “Léger,” even for the deep-fried products. Croque Tofou Léger (not deep-fried) was the continuation of our former Tof’in (not deep-fried). Since Jan. 1990 we have stopped using the term “Léger” on our deep-fried products. Our Croque Tofou Léger have new labels since Jan. 1990. They are now called Doré de Soja, with 2 in each package.”

7244. Matsuura, Masaru; Obata, A.; Fujii, N.; Nobuhara, A.; Fukushima, D. Assignors to Kikkoman Corp. (Noda, Japan). 1988. Method for grinding soybeans and method for producing tofu. *U.S. Patent* 4,791,001. Dec. 13. 6 p. Application filed 12 Jan. 1987. 1 drawing. Application also filed in Japan on 14 Jan. 1986. [23 ref]
Address: 1-3. Noda; 4. Kasukabe; 5. Omiya. All: Japan.

7245. *Loveland Reporter-Herald (Colorado)*, 1988. Miso

works as flavoring substitute. Dec. 28.

• **Summary:** “Miso, a fermented seasoning made from a legume or grain plus salt, water and a bacterial culture. Is a good flavoring substitute for meat and meat broth, says Karen Wilken, Colorado State University Cooperative Extension food science and human nutrition specialist... Miso can be used as a substitute for bouillon or meat stock in soups, gravies or stews. It also can be used like soy sauce or Worcestershire sauce in sauces, dips and dressings.

“Because it is relatively low in sodium it can serve as a seasoning in moderate salt level diets.”

7246. Brown, Judy. 1988. The joy of soy: Nutrition for the '80s. *Body, Mind & Spirit*. Nov/Dec. p. 30-32.

• **Summary:** Contents (Soyfoods, nutrition, and a healthy diet). Tofu. Tempeh. Miso. Natto. Okara. Soy cheese & soy yogurt. Soy flour & grits. Soymilk. Soy sauce. Resources: Eden Foods, Fantastic Foods, Inc., Lumen Foods Corp., San-J International. Vitasoy (U.S.A.) Inc., Westbrae Natural Foods (Downey, California). Address: President, In Good Taste, 5923 John Adams Dr., Camp Springs, Maryland 20748.

7247. **Product Name:** Smoked Tofu, Teriyaki Tofu, Homestyle Tofu Balls, Gourmet [Nigari] Firm Tofu, Fiber Tofu, BBQ Tofu.

Manufacturer's Name: Dae Han, Inc.

Manufacturer's Address: 737 S.E. Alder St., Portland, OR 97214. Phone: 503-233-8638.

Date of Introduction: 1988. December.

Ingredients: No ingredients given on labels.

How Stored: Refrigerated.

New Product–Documentation: Talk with Paul Moss, who has worked with Dae Han for 7 years. The company name is now Dae Han, Inc., 737 S.E. Alder St., Portland, Oregon 97214. Phone: 503-233-8638. They now make tofu, smoked (& baked) tofu (7.5 oz), regular and cajun-style tofu burgers, homestyle tofu balls (5.25 oz), soymilk, teriyaki tofu (7.5 oz), fiber tofu (10 oz), BBQ (barbecue) tofu (7.5 oz), and kimchi. All the products listed above were introduced in Dec. 1988. Paul plans to use their plant to make tempeh.

Labels for each of these products sent by Paul Moss. 1990. May 10. 4 by 2.5 inches. Self adhesive. Colorful. On each label is written “High protein. Low calorie. Cholesterol free. No preservatives. (Keep Refrigerated).” The Gourmet firm tofu is certified kosher by Rabbi Yonah H. Geller.

Leaflet from Dae Han, Inc. 1991. July. Quality and unique. A photo shows all of the products, and their names are listed.

7248. Dagnelie, Pieter C. 1988. Nutritional status and growth of children on macrobiotic diets: a population-based study. PhD dissertation, Dep. of Human Nutrition, Wageningen Agricultural University, the Netherlands. 144 p. [Eng]*

Address: Dep. of Human Nutrition, P.O. Box 8129, Wageningen Agricultural Univ., 6700 EV Wageningen, the Netherlands.

7249. Golbitz, Peter. 1988. Soyfoods sales projected to reach \$750 million by 1990. *Soya Newsletter (Bar Harbor, Maine)*. Sept/Dec. p. 1, 6.

• **Summary:** The estimated retail value of soyfoods in the USA in 1988 was \$682 million. The various soyfoods had the following market shares: soy sauce 67.3% (est. \$460 million retail store valuation), tofu 11.3% (est. \$77 million), second generation products 9.5%, soymilk 5.3%, miso 4.1%, soynuts 1.7%, tempeh 0.8%.

All of the 1980 figures used in this study for comparisons and growth rates were taken, without permission, from *Soyfoods Industry & Market: Directory and Databook* by Shurtleff & Aoyagi. Address: Soyatech, Bar Harbor, Maine.

7250. **Product Name:** New York “Doggie” (Tofu Hot Dog & Brown Rice Rolled in a Tortilla).

Manufacturer's Name: Paul's Organic Food Works.

Manufacturer's Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.

Date of Introduction: 1988. December.

Ingredients: Short grain brown rice*, spring water, sprouted wheat tortilla*, tofu hot dog*, sauerkraut*, mustard, onions*, tomatoes*, hot peppers*, sesame oil*, shoyu*, leeks* or scallions*, mizuni* or arugula*, lettuce*. * = Organically grown per Cal. Health Code Sec. 26569.11.

Wt/Vol., Packaging, Price: 12 oz. Retail for \$4.25 (8/89, northern California).

How Stored: Refrigerated.

New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on yellow paper. “Brown rice sandwich. Sauerkraut–Mustard–Hot Pepper. 12 happy ounces. For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down.” Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back is the statement, “Resistance is the most subtle form of cooperation.” The statement is changed weekly. The tofu hot dog is made by Light Foods.

Note: Arugula or arrugula (pronounced uh-RUE-guh-luh, an Italian term), an ingredient in this product, is a plant of the mustard family resembling a fancy, slightly bitter lettuce grown in Salinas, California. It is expensive and can be replaced with parsley. It is also called “rocket” or “garden rocket” after the French word *roquette*. Mizuni (pronounced mi-ZU-ni) is a mustard green, which is grown in California. It is not listed in any Webster's Dictionary.

7251. **Product Name:** B-L-T Brown Rice Sandwich (With Tempeh, Tofu Mayo & Tomatoes).

Manufacturer's Name: Paul's Organic Food Works.
Manufacturer's Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.

Date of Introduction: 1988. December.

Ingredients: Short grain brown rice*, spring water, sprouted wheat tortilla*, Fakin' Bacon (smoked tempeh), Tofu Mayonnaise, tomatoes*, sunflower sprouts*, arugula* or mizuni*, sesame oil*, shoyu*, leeks* or scallions*, lettuce*.
 * = Organically grown per Cal. Health Code Sec. 26569.11.

Wt/Vol., Packaging, Price: 12 oz. Retails for \$4.25 (8/89, northern California).

How Stored: Refrigerated.

New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on purple paper. "12 happy ounces. For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down." Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back is the statement, "What is mind? No matter. What is matter? Never mind." The statement is changed weekly. Note: Arugula or arrugula, (pronounced uh-RUE-guh-luh, an Italian term), an ingredient in this product, is a plant of the mustard family resembling a fancy, slightly bitter lettuce grown in Salinas, California. It is expensive and can be replaced with parsley. It is also called "rocket" or "garden rocket" after the French word *roquette*. Mizuni (pronounced mi-ZU-ni) is a mustard green, which is grown in California. It is not listed in any Webster's Dictionary.

7252. **Product Name:** Garden Gourmet Meatless Entrees [Vege-Puffs in Pastry, Vege-Links in Pastry, Vege-Patties, or Vege-Cutlets].

Manufacturer's Name: Tivall.

Manufacturer's Address: 24 Spielman Rd., Fairfield, NJ 07006. Phone: 201-277-7060.

Date of Introduction: 1988. December.

Ingredients: Filling: Rehydrated soy protein concentrate, wheat gluten, soy oil, egg whites, spices, and tamari. Pastry shell for first 2 products: Wheat flour, soybean oil, salt.

How Stored: Frozen.

New Product–Documentation: Soya Newsletter. 1988. Nov/Dec. p. 10.

7253. *U.S. Imports for Consumption, Schedule A: Report IM146*. 1988. U.S. imports of soy sauce during 1988. p. 872-74.

• **Summary:** Total U.S. imports of soy sauce (called "soy sauce, thin" by the report) during 1988 were 37,971,804 lb. This is almost double the figure of 19,613,000 lb in 1981. The value of this FOB at foreign ports of export was \$15,095,348. The duty collected by the U.S. was \$315,115. Countries from which more than 1 million lb were imported, ranked in descending order of amount, were: Japan 12,709,008 lb (33.5% of the total), Hong Kong 9,220,737

lb, China 7,760,972 lb, Taiwan 4,806,452 lb, and Thailand 1,423,150 lb. Address: U.S. International Trade Commission, Washington, DC.

7254. Beddows, C.G. 1988. The old fashioned way with soya. *Food Science & Technology Today* 2(1):12-15. [6 ref]*

• **Summary:** The following soybean products are described briefly: soymilk, bean curd, tofu, tempeh, natto, sufu, miso, shoyu, and yuba. Protein yields are given for a range of plant crops versus milk and beef, e.g. soybeans 3500 kg/ha/annum versus 75 kg/ha/annum for beef. Recipes are included for miso cream cheese dip and deep fried tofu and miso soup. The marked rise in consumption of soybean products in the USA in recent years is noted. Address: Dep. of Applied Sciences, Leeds Polytechnic, Leeds LS1 3HE, England.

7255. **Product Name:** Marinated Tofu: Soya Bean Curd Marinated in Soy Sauce and Ginger.

Manufacturer's Name: Cauldron Foods Ltd.

Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: 0272 632835.

Date of Introduction: 1988.

Ingredients: Tofu (soybeans, calcium sulphate–natural coagulant). Marinade (soy sauce, fructose, citric acid, spices).

Wt/Vol., Packaging, Price: 180 gm vacuum packed in outside box. Retails for 79p (1/89).

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 11.5 gm, fat 5.25 gm, carbohydrate 2.10 gm, calories 102 kCal.

New Product–Documentation: Label. 1989, received. 5 by 4 by 1 inch paper box. Brown, orange, green, black, and red on white. Color drawing of tofu on a cutting board with a Chinese spoon, bowl, and chopsticks. Has a handwritten list of 20 recipes (mostly Chinese style) in which it can be used. Front panel also bears the green V Vegetarian logo in a box "Suitable for Vegetarians." On the back are three recipes: Hot & Sour Soup, Chinese Salad, and Marinated Tofu Stir Fry. "The versatile food ingredient. A complete vegetable protein. Keep chilled at 4°C."

7256. **Product Name:** Vegetable Burgers with Tofu.

Manufacturer's Name: Cauldron Foods Ltd.

Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.

Date of Introduction: 1988.

Ingredients: Reconstituted mixed vegetables (peas, carrots, onion, potato, leek, green and red peppers), tofu (water, soya beans, calcium sulphate), ground soya beans, oats, textured soya flour, soy sauce (water, soya beans, wheat, salt), yeast, hydrolysed vegetable protein, salt, yeast extract.

Wt/Vol., Packaging, Price: 300 gm paperboard box.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: calories 187, protein 12.92 gm, fat 10.45 gm, carbohydrate 11.15 gm.

New Product–Documentation: Label. 1989, sent by Philip Marshall. Paperboard box. Green, red and black on white. Color photo of oval burger-like product on front. Contains 4 burgers. “Just heat to eat. Contains no artificial flavourings or colourings. Keep chilled at 4°C.” Package bears the green “V” symbol “Suitable for vegetarians.”

Letter (fax) from Philip Marshall. 1990. July 9. This product was introduced in 1988.

7257. Product Name: [GranoVita Organic Tofu Vegetable Patties {Meatless}].

Foreign Name: GranoVita Bio-Tofu Gemuese Bratling.

Manufacturer’s Name: DE-VAU-GE Gesundkostwerk GmbH.

Manufacturer’s Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

Date of Introduction: 1988.

Ingredients: Organic tofu (water, organically grown soybeans, calcium chloride), whole soybean product, vegetable oils and fats in changing amounts, fine bread crumbs (Paniermehl), mushrooms, paprika, carrots, leeks, wheat protein [gluten], sunflowerseeds, wheat grits, oat flakes, soy sauce, onions, egg protein, herbs, seasonings (Wuerzmittel), spices (Gewuerze).

Wt/Vol., Packaging, Price: 125 gm vacuum pack poly bag, 3 pieces per bag. Retail for DM 2.98.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 13.1 gm, fat 10.2 gm, usable carbohydrates 19.5 gm, calories 222. 1 BE (Broteinheit, or diabetic exchange) = 61.5 gm.

New Product–Documentation: Label sent by Anthony Marrese. 2.75 by 5 inches. Red, green, white, and black on yellow. “Contains no flesh. Simply fry on both sides in a pan.” A photo shows three ready-to-eat patties on a plate with green peas, potatoes, a tomato, and parsley. Exklusiv Neuform certification symbol.

Label sent by DE-VAU-GE. 1990. June 11. Date for GranoVita Tofu-Gemuesebratling given as 1988.

7258. Product Name: [GranoVita Green Rye & Cheese Patties].

Foreign Name: GranoVita Gruenkern Kaese-Bratling.

Manufacturer’s Name: DE-VAU-GE Gesundkostwerk GmbH.

Manufacturer’s Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

Date of Introduction: 1988.

Ingredients: Water, vegetable oils and fats in changing proportions by weight, green rye, cheese, fine bread crumbs, onions, egg protein, seasonings (Wuerzmittel), soy sauce, sea salt, spices (Gewuerze).

Wt/Vol., Packaging, Price: 3 patties weigh 125 gm.

Nutrition: Per 100 gm.: Protein 10.9 gm, fat 11.6 gm, usable carbohydrates 29.3 gm, calories 265. 1 BE (Broteinheit, or diabetic exchange) = 41 gm.

New Product–Documentation: Form filled out and Label sent by DE-VAU-GE. 1990. June 11. This product was introduced in 1988. Label: 2.75 by 5 inches. Red, blue, green, white, black and yellow-beige. “Contains no flesh. Simply fry on both sides in a pan.” A photo shows three ready-to-eat patties on a plate with Brussels sprouts, potatoes, and parsley. Exklusiv Neuform certification symbol. A new version of this, probably introduced in 1990, is named GranoVita Gruenkern Käsebratling in Champignonsauce mit Gemuese-Reis; the patties come in a mushroom sauce with vegetables and rice.

7259. Product Name: [Chopburger (With Organic Soy Sprouts)].

Foreign Name: Chopburger.

Manufacturer’s Name: Jonathan P.V.B.A.

Manufacturer’s Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium. Phone: 03/664 58 48.

Date of Introduction: 1988.

Ingredients: Soy sprouts, onions, carrots, celery, leeks, mushrooms, wheat flour 85%, vegetable fat, tamari, spices.

Wt/Vol., Packaging, Price: Vacuum packed.

How Stored: Refrigerated.

New Product–Documentation: Jonathan catalog. 1988. A full-page color plate shows all these products.

7260. Product Name: [2 Seitan Burgers in Tomato Sauce].

Foreign Name: 2 Seitanburgers in Tomatensosse.

Manufacturer’s Name: Jonathan P.V.B.A.

Manufacturer’s Address: Antwerpsesteenweg 336, B-2080 Kapellen, Belgium.

Date of Introduction: 1988.

Ingredients: Seitanburgers: seitan (wheat proteins)*, onions*, mushrooms, spices. Sauce: Water, mashed tomatoes*, onions*, celery*, carrots*, mushrooms, vegetable extract, maize flour, soya sauce, sea-weed, spices. * = Organically grown.

Wt/Vol., Packaging, Price: 300 gm.

How Stored: Frozen.

Nutrition: Minerals 1.38%, vegetable proteins 5.28%, vegetable fats 1.77%, carbohydrates 12%. 80 calories (Kcal) per 100 gm.

New Product–Documentation: Label sent by Jos van de Ponsele. 1988. 6.25 by 10.5 inches. This card-stock sleeve fits over the product. Color photo of two seitan burgers on a white dish partly covered by a tomato sauce containing carrots, onions, etc. The product name is written in English and German, in white on a reddish-orange band. “Vegetable product.” Code CINAB.

7261. **Product Name:** La Choy Lite Soy Sauce.

Manufacturer's Name: La Choy Food Products. Div. of Beatrice/Hunt-Wesson, Inc.

Manufacturer's Address: 901 Stryker St., Archbold, OH 43502.

Date of Introduction: 1988.

Wt/Vol., Packaging, Price: 10 oz bottle retails for \$1.39 (3/89).

How Stored: Shelf stable.

New Product–Documentation: Ad in *Cooking Light*. 1989. Jan/Feb. p. 103. "Revolutionary China. New La Choy Lite Soy Sauce. It's based on the idea that less sodium doesn't have to mean less taste. So it has 47% less sodium than regular soy sauce. And the great taste that beat Kikkoman Lite 2 to 1."

Sun-Tattler (Hollywood, Florida). 1989. March 16. This product contains 110 mg of sodium per ½ teaspoon. It also contains preservatives.

7262. **Product Name:** Ta Brook Dried Beancurd.

Manufacturer's Name: SFC International (Importer). Made in Taiwan.

Manufacturer's Address: 2206 Lee Ave. #A, South El Monte, CA 91733.

Date of Introduction: 1988.

Ingredients: Beans, seasoning, sugar, refined salt, black soy sauce.

Wt/Vol., Packaging, Price: 3.5 oz plastic pouch. Retails for \$0.75 (10/88 in Los Angeles).

How Stored: Shelf stable, 120 day shelf life.

New Product–Documentation: Label. 1987. 5.5 by 9 inches clear plastic pouch. Light and dark reddish brown black, and white. "Beef Lu Taio." Product looks like strips of moist beef jerky.

7263. Sojarei Ebner-Prosl. 1988. Tofu aus der Sojarei [Tofu from the Sojarei (Leaflet)]. Baden bei Wien, Austria. 6 panels. [Ger]

• **Summary:** This full-color orange and red leaflet explains that the company makes and sells many fresh soy products, mostly tofu and tofu products, but also tempeh and soy sprouts. They sell tamari, shoyu, miso, gomashio (sesame salt), many types of vegetables, flakes, and legumes. They also have a soya recipe brochure and a tofu cookbook.

This young family-run business, founded in 1984, focuses on fresh soyfoods of the best quality—pure and natural. Sojarei tofu is described as the culinary wonder child in unpretentious clothes, but with many talents. Tofu is sold in slices, diced, or in strips. It can be pressed or pureed. There are color photos of the two owners and their wives, of tofu, and of 5 tofu dishes. Address: Augasse 2, A-2500 Baden bei Wien (near Vienna), Austria. Phone: 02252/85101.

7264. **Product Name:** [Tofu Teriyaki].

Foreign Name: Tofu Teriyaki.

Manufacturer's Name: Sunrise Market Ltd.

Manufacturer's Address: 729 Powell St., Vancouver, BC, V6A 1H5, Canada. Phone: 604-254-0701.

Date of Introduction: 1988.

Ingredients: Tofu (water, soybeans, calcium sulphate, magnesium chloride, vegetable oil). Sauce: Water, soy sauce, sugar, cornstarch, ginger, garlic, sesame oil, spices.

Wt/Vol., Packaging, Price: 10 oz (300 gm).

How Stored: Refrigerated.

New Product–Documentation: Label. 5.5 by 3.5 inches.

With color photo in middle of tofu teriyaki on pasta.

"Pasteurized. No preservative." Product name also written in Chinese. Form filled out by Peter Joe. 1988. May 20. Gives date.

7265. **Product Name:** [Tofu Sweet N' Sour].

Foreign Name: Tofu Aigre-Doux.

Manufacturer's Name: Sunrise Market Ltd.

Manufacturer's Address: 729 Powell St., Vancouver, BC, V6A 1H5, Canada. Phone: 604-254-0701.

Date of Introduction: 1988.

Ingredients: Tofu (water, soybeans, calcium sulphate, magnesium chloride, vegetable oil). Sauce: Water, sugar, vinegar, tomato paste, soy sauce, cornstarch (modified), salt, citric acid.

Wt/Vol., Packaging, Price: 10 oz (300 gm).

How Stored: Refrigerated.

New Product–Documentation: Label. 5.5 by 3.5 inches.

With color photo in middle. "Pasteurized. No preservative."

Product name also written in Chinese. Form filled out by Peter Joe. 1988. May 20. Gives date.

7266. Yoneyama, T.; Itoh, T.; Shinha, Y.; Fukuzawa, M.; Shimizu, K.; Nishizawa, N.; Baba, S. 1988. [Quality studies of commercial soy sauce. XV.]. *Research Report of the Nagano State Laboratory of Food and Technology* No. 16. p. 20-24. [1 ref. Jap]*

Address: Nagano State Lab. of Food Technology, Kurita, Nagano-shi, Japan.

7267. Anderson, Eugene N. 1988. *The food of China*. New Haven, Connecticut: Yale University Press. xvi + 313 p. Index. 24 cm. [380 ref]

• **Summary:** Contents: Preface. Acknowledgments.

Chronology of food and agriculture in China. 1. The natural environment. 2. Prehistory and the dawn of civilization. 3. The crucial millennium: Chou through Han. 4. Food from the West: Medieval China. 5. Definitive shaping of the food system: Sung and the conquest dynasties. 6. Involution: Late imperial China. 7. The climax of traditional agriculture. 8. Chinese foodstuffs today. 9. Some basic cooking strategies. 10. Regions and locales. 11. Traditional medicinal values of food. 12. Food in Society. Appendix: Dinner at the Ngs.

Soybeans and soyfoods are mentioned as follows: North China is the native home of the soybean (p. 3). Soybeans seem to have been introduced to China in about 1000 B.C., but they were not popularized until the early Eastern Chou period (Ho 1975). Called, *shu*, they “seem to have come from the Jung people, northern and northeastern neighbors of the Chinese, who may have been Tungusic or Altaic, and were perhaps related to or descended from the Hungshan.” Domesticated soybeans are descended from wild soybeans (p. 29).

Fan Sheng-chih wrote an agricultural manual in the first century B.C.; it survives in extensive fragments quoted in later agricultural works. This manual mentions the “Nine Staples”: wheat, barley, millet, glutinous millet, spiked millet, soybeans, rice, hemp, and small beans (*Vigna* spp.) (p. 50).

The art of fermenting soybeans was perfected sometime in the late Chou period, or perhaps even as late as the very early Han. Thereafter, Han texts devote much space to salt-preserved soybeans [fermented black soybeans], called *tou shih* (or *shih*), the *tausi* of modern Cantonese cooking. *Chiang*, fermented sauce, was made from beans, but also from meat and elm products (p. 51).

During the late Southern Sung, Wu Tzu-mu coined the famous phrase: “the things that people cannot do without every day are firewood, rice, oil, salt, soybean sauce, vinegar, and tea” (Freeman 1977, p. 151). By the Sung, *chiang* had come to refer unequivocally to soy sauce; as late as the T’ang, it would probably have been understood, at least in literary contexts, to refer to a variety of fermented foods (p. 82).

Bean curd or *tou fu* (Japanese tofu) was first mentioned in the early Sung; its invention was attributed to Liu An of the Han Dynasty, “but this is preposterous.” In fact, tofu “was invented in the late T’ang or early Sung—possibly by Taoists and/or people from the Huainan region, who then ascribed it, out of a sort of respect, to Liu An, the Taoist prince of Huainan (B.W.-C. Young, pers comm). Buddhists quickly took over the food as a good substitute for meat and for dairy foods...”

Soybean curd is also fermented; the firm tofu cubes are packed in brine and sold. “They constitute the Chinese equivalent of a cheese and are apt to be overpowering, reminiscent of strong German hand cheese [*Handkäse*, a German regional sour milk cheese]. They are graphically known as *ch’ou tou fu* (stinking bean curd). Only the very stoutest of heart eat them and then only in small quantities.”

Also discusses: Vegetarian cooking (p. 66, 86, 118, 150, 196, 204, 249). Vegetarianism came to China with Buddhism during the T’ang dynasty. Fish farming (p. 103, 129). Note: Eugene Newton Anderson was born in 1941. Address: Dep. of Anthropology, Univ. of California, Riverside, CA 92521.

7268. Boxer, Charles R. 1988. Dutch merchants and mariners

in Asia, 1602-1795. London: Variorum Reprints. 350 p. in various pagings Illust. Maps. 1 portrait. Index. 23 cm. *

• **Summary:** Hymowitz (2007/06) wrote: “Boxer points out that the Dutch East India Company exported soy sauce [from Japan] as early as 1673-1674. In 1673, the ship *In Laeren* (p. 333) carried 12 tubs of soy sauce as cargo and in 1674 the ship *In Hasenburg* (p. 334) had an unlisted amount of soy.”

Note 1. These two ships loaded their soy sauce at Deshima, Nagasaki, Japan. The ship *In Laeren* sailed to Batavia. There is no record that either of the ships transported this soy sauce to Holland; they were used in the intra-Asiatic shipping route. Note 2. Charles Ralph Boxer was born in 1904.

7269. Carpenter, Hugh. 1988. Pacific flavors: Oriental recipes for a contemporary kitchen. New York, NY: Stewart, Tabori & Chang: Distributed by Workman Pub. 270 p. Illust. (color, by Teri Sandison). Index. 29 cm.

• **Summary:** Appendix 2, titled “Oriental ingredients” (p. 256-65) includes: Bean sauce (sometimes called “brown bean sauce”). Bean sprouts are 3-day old mung bean sprouts.

“Black bean sauce: Made from chilies, salted black beans [fermented black soybeans], soy sauce, garlic and orange rind, this ingredient adds a spicy, complex, rich taste when added to sauces...” Use only ½ teaspoon at a time. “Storage: Sold in glass jars. Keeps indefinitely when refrigerated.” “Substitute: You can improvise a ‘house blend’ by combining rinsed and chopped black beans, garlic, grated orange peel, Chinese chili sauce, and peanut oil. Best brand: Mai Ling China, Inc.”

Black beans, salted: Also called “fermented black beans.” “They are always rinsed, coarsely chopped, and then combined with ginger and garlic for stir-fried dishes or rubbed across the surface of fish fillets.” “Best brand: Purchase salted black beans sold in a yellow cardboard canister... far superior to the salted black beans sold in plastic bags. Ask for Yang Jiang Preserved Beans with Ginger, Pearl River Bridge brand.”

Chili sauce, Chinese: The spicy Chinese condiment made from soybeans is called “hot bean sauce.”

“Fish Sauce... is used in Thai and Vietnamese cooking the way the Chinese use soy sauce.”

Hoisin sauce: Made with soy bean flour, chilies, garlic, ginger, and sugar. Buy only Koon Chun Hoisin Sauce.

“Monosodium glutamate (MSG):... MSG is used by chefs of little skill to rejuvenate food of poor quality... Chinese cooks who take pride in their cuisine agree that MSG is a crutch. It is neither recommended nor used in this book.”

Soy sauce, dark: Also called “heavy” or “black” soy, it is light soy to which molasses or caramel has been added. Best brands: Mushroom Soy Sauce.

Soy sauce, light: Also called “thin” soy sauce. Best brands: Superior Soy Sauce, Pearl River Bridge, Kikkoman.

Another product called “Soy Superior” is a dark soy sauce.

The index contains many recipes for Black beans, and several for Black bean sauce, including: Steamed shark with spicy black bean sauce (with 1 tablespoon salted black beans {Pearl River Bridge Brand}, p. 93, 134). Black bean scallops on julienned vegetables (p. 109). Game hens in black-bean tomato sauce (with “2 teaspoons black bean hot sauce {see Appendix},” p. 140). Artichokes in black-bean tomato sauce (p. 217). Asparagus in black-bean butter sauce (p. 220). Address: Head, cooking school, Santa Barbara, California.

7270. Cost, Bruce. 1988. Asian ingredients: Buying and cooking the staple foods of China, Japan and Southwest Asia. New York, NY: William Morrow & Co. 333 p. Illust. Index. 27 cm. [39 ref]

• **Summary:** Soy related: Soybean sprouts and recipe (p. 86). Beans, incl. soybeans (p. 146-50). Asian “dairy” (p. 186-87): The soybean and the coconut (incl. bean curd, doufu-nao, fermented bean curd / fu-ru, molded bean curd / chou dou-fu, dried bean curd / dou-fu gan, and bean curd skin [yuba]. Soybean milk.

Soybean sauces, condiments and pastes (p. 195-211): Salted and fermented black beans with recipes for “Roast chicken with black beans stuffed under the skin,” and “Soft-shell crabs with ginger, lemon, and black beans” (“Fermented black beans, often flavored with bits of ginger and sometimes orange peel, are usually sold in 8-ounce plastic bags.” Acceptable brands: Mee Chun or Koon Chun Sauce Factory. “Earthier and probably more classic are the Yang Jiang Preserved Beans (with ginger) from Kwangtung, China), bean sauce (other names: Yellow bean sauce, brown beans sauce, bean paste, jiang; two types are with the beans whole or ground), hot bean sauce / paste with recipe, hoisin sauce, sweet bean sauce (made with soybeans [probably tian mian jiang, p. 202], Taiwan), soy sauce (Chinese, Japanese, tamari; Highly recommended light soy sauce: Pearl River Bridge. Highly recommended dark: Pearl River Bridge Mushroom Soy, flavored with straw mushrooms), Java’s ketjap and other soy sauces miso with recipe, yellow miso (*Shinshu miso*), white miso (*shiro miso*, *Kyoto shiro miso*, sweet white miso), red miso (*aka miso*), Hatcho miso [soybean miso], barley miso (*mugi miso*), fermented bean curd (white or red; also called preserved bean curd, wet bean curd, bean cheese, dou-fu ru or fu-ru {Mandarin}, fu yu {Cantonese}) with two recipes).

“Red fermented bean curd” is described on pages 210 (also called “red bean cheese”), 211, and 283 (together with “red rice”).

Concerning ketjap (p. 206): Tomato ketchup, although it may seem to be of Asian origin, may or may not come from a family of Asian pickled products. But the word “ketchup” is clearly of Asian origin. [Note: The modern Indonesian word for soy sauce is *kecap* / *ketjap* / *kechap*.] “It comes from the Malay *kechap*, which apparently derives from the *kôe-chiap*

of a southern Chinese dialect (Amoy); both of these refer to the kind of briny liquid preserves that include fish and soy sauces.” Throughout most of Southeast Asia, fish sauces are the standard condiment, in Indonesia (incl. Java) soy sauce is more widely used. Sweet Indonesian soy sauce (*ketjap manis*), which is very widely used, is traditionally sweetened with palm syrup and seasoned with garlic, star anise, salam leaves, and galangal.

Also discusses: Seaweed (p. 165-70): Kelp (*Laminaria*), laver (*Porphyra*), wakame, dashi, hair vegetable / black moss / hairlike vegetable (China; *Gracilaria verrucosa*), agar-agar. Monosodium glutamate (p. 247)

Bruce Cost was born in 1945. A photo and brief biography appears on the inside rear dust jacket. Address: [San Francisco, California].

The first complete soya cookbook]. Munich, West Germany: Graefe und Unzer GmbH. 102 p. Illust. Index. 20 cm. [11 ref. Ger]

• **Summary:** The copyright (but not the title page) page says that this is a 3rd edition, however the ISBN is unchanged from the 1984 edition. Address: West Germany.

7275. Lautensach, Hermann; Dege, Katherine; Dege, Eckhart. 1988. Korea: A geography based on the author’s travels and literature. Translated from the German.

Supplemented with a thoroughly revised and expanded index. And edited by Katherine and Eckhart Dege. Berlin, Heidelberg, New York, London, Paris, Tokyo: Springer-Verlag. xvii + 598 p. See p. 20, 160, 174, 180-81, 201, 203, 229, 420-21, 452, 476, 482, 488. Illust. Maps (some color). 26 cm. [936* ref]

• **Summary:** “With 42 photographs, 95 diagrams, 46 tables and a [larger color] map.” This classic was first published 40 years ago (a few months before the end of World War II) and the field work was done 50 years ago, when Japan still ruled Korea and all place names were Japanese; these names have all been updated.

Vavilov classes soybeans among the plants that originated in the East Asian grain gene pool, and he includes Korea in the gene pool. Thus it is “quite possible” that soybeans were domesticated in Korea itself. Hulbert (1902) includes among the non-Chinese crops black soybeans, two of the three kinds of kaoliang, wild sesame (*Perilla*), and buckwheat (p. 20).

On page 21 is a very interesting “Chronological table of Korean history. Comparison with Chinese and Japanese history. A major change took place in 680 AD when the Three Hans [Three kingdoms] (Tribal Leagues; Koguryo [Gouryo, in the north], Paekche [Baekje, in the southwest], and Shilla [Silla, in the central and south east]) merged into one, named Silla. In 918-925 it became Koryô [Kingdom of Goryeo; Wang Dynasty], which in July 1392 became Chosôn [Joseon Dynasty; Yi Dynasty], that lasted until August 1910 when the Japan-Korea Annexation Treaty was enforced by the Empire of Japan.

Chapter 6, titled “The anthropogeographical character of ancient Korea” (p. 149+) contains extensive information about agriculture and food. Page 160: In wealthier sites, the farm buildings enclose a courtyard, to which an entrance gate gives access (Fig. 37c, p. 158). Some enclosures are so complete that a square courtyard results. “In some corner or other of the courtyard stand the huge brown earthenware jars, in which soy sauce (Jap. *shoyu*, Kor. *kanjang*) is prepared and stored.”

Nature and traditional culture: Plants found between the subtropical zone and the temperate zone include soybeans, foxtail millet, maize, and hemp. Since ancient times, rice has been Korea’s most important cereal crop. The great majority of it is grown in irrigated paddies. Paddy rice (an aquatic plant) has a different name in Korea from upland rice. Hubert (1902, p. 108) mentioned eight varieties of rice grown in traditional Korea, including glutinous rice, whose flour is made into rice cakes by mixing it with water and spicy herbs, then beating the cold mass for a long time with wooden hammers (p. 174).

Page 180: In East Asia, after cereal grains, pulses / legumes are the next most important crop. In Korea, by far the most important is the soybean (Kor. *k’ong*), which makes few demands on the soil. Korea’s climate is ideal

for soybeans (Tanaka 1931, p. 18); it is even better than Manchuria’s climate, because of the large amount of precipitation during the summer. Today, soybeans are an indispensable part of the various dry-field crop rotations. After planting of the paddies has finished, soybeans are planted on the ridges too; there they grow extremely well without being fertilized. Soybeans are grown throughout Korea, but least in the Kaema upland because of the warmth they require. In northern Korea, on dry fields, they are planted between the end of March and beginning of May. Toward the south, planting is delayed until the end of June. They are generally harvested in October, except in Chejudo, where they are not harvested until early November. Soybeans are the crop that is left standing the longest, and they are not harvested until their leaves have turned brown and started to fall.

Soybeans are used as a very nutritious food for both humans and horses. Also, cooked soybeans are used as a fertilizer for the rice paddies. “Above all, though, the hot brown soy sauce, which is never lacking on any Korean or Japanese table, is made of them, using salt and pepper and a process of fermentation. Bean curd (Kor. *tubu*, Jap. *tofu*) and soybean paste (Kor. *toenjang*, Jap. *miso*) are also made of them.”

Adzuki beans, cotton and hemp are discussed on p. 181.

The Korean regions: On the forest slopes, which were deforested but the Japanese are energetically reforesting, one can find various lianas [climbing vines] such as *Pueraria hirsuta* [Jap. kudzu]. In the northern part of the coastal fringe, soybeans are grown on the ridges between paddies (p. 200-01).

Namyang is a link in the shortest connection between Tokyo and Harbin, which includes the ship passage between Tsuruga or Niigata and Ch’ongjin. “For this reason, this section has been operated by the South Manchurian Railway since 1 October 1933.” The northernmost bays and harbors, especially Unggi, Najin, and Ch’ongjin, and their cities, are developing at an usually rapid rate. “They have become the export harbors for central Manchuria, particularly for soybeans” (p. 203).

In the Kaema upland we find “fire-field farming” and soybean fields in the valley bottoms or basins. “The most important fire-field crops at lower elevations are foxtail and barnyard millet, barley, soybeans, kidney beans, hemp and sesame.” “The Japanese forestry commission has taken over management of the remaining forests. In the natural forests, wood is cut selectively and only as much as grows back” (p. 229).

Korea as a Japanese possession [colony]: “In southern Korea, barley has replaced rice as the principal staple food under the influence of Japanese economic policy.” A large portion of the rice is sold to Japan.

Table 37 (p. 420), titled “Cultivated area, harvested amounts and yields per acre of the most important crops,

1935,” includes: Soybeans: 785,000 ha. 7.9 hectoliters of weight. Worth: 60.2 million yen. Yield: 10.1 hectoliters per ha. Adzuki beans: 235,000 ha. 1.7 hectoliters of weight. Worth: 14.3 million yen. Yield: 7.3 hectoliters per ha. The table also includes paddy rice, upland rice, barley, naked barley, wheat, foxtail millet, barnyard millet, broomcorn millet, kaoliang, maize, oats, buckwheat, potatoes, sweet potatoes, mung beans, etc.

“The soybean vies with foxtail for the third place in the order of crops, by cultivated area. Its is a very profitable, undemanding crop that does not fail even in meteorologically abnormal years. Therefore its harvest curve does not have the ups and downs that are characteristic of many other crops, particularly paddy rice (Fig. 84). Acreage and yield per hectare have not increased nearly as much during the Japanese period, however, as for many other crops. Nevertheless, soybeans are the third most important item of agricultural export today, and the quality is supervised by the state. Approximately one-fourth of the harvest is exported. The most important export markets are Unggi, Ch’ongjin, Songjin, Wonsan, Shinuiju, P’yong-yang, Kumch’ŏn and Ch’olsan (T. Tanaka 1931). They are located without exception in the northern half of the country” (p. 421). Note: Since 1948, the northern half of Korea has been a separate nation, North Korea.

“The Korean adzuki bean, particularly that from the northeastern coast, is highly priced in the Japanese market because of its high quality.” By acreage it is the sixth most important crop in Korea (p. 421).

The soybean mills that process Manchurian soybeans in to oil and meal lie on the Japan Sea coast of Hamgyongbuk-do (p. 452).

Table 43 (p. 476), titled “Korea’s most important import and export goods, 1939,” shows that “Beans” were the No. 7 export item to Japan, worth 23 million yen. The leading export was rice (149 million yen) followed by fertilizer (53), copper (52), fish etc. (32). “Of the beans exported to Japan... soybean take first place. Soybean exports to Japan had a weight of 1.3 to 1.9 million q” [1 quintal = 100 kg] in the ears 1934-1938. “In contrast, from the northeastern ports Manchurian beans were shipped to Germany and England.” In addition, large amounts of soybeans were imported by Korea itself from Manchuria (0.29 to 1.02 million q). Large amounts of soybean products made in Korea were also shipped to Japan (incl. soybean oil as much as 11.500 q, bean curd [tofu] up to 1.2 million q). Moreover soybean oil (up to 3,210 q) and bean curd (as much as 1.3 million q) were imported from Manchuria (p. 476).

Considerable amounts of dried seaweed and laver [nori] were also exported to Japan (p. 477).

Pages 482-83 try to characterize Korea’s significance in 1938 for the economy of Greater Japan (pan-Japan) in general and Japan proper in particular. Pan-Japanese production included that of Korea, Manchuria, and Formosa.

“The Korean rice crop in 1938 (44.8 million q) amounted to 23.4% of the pan-Japanese crop and 36.6% of that of Japan proper; 63.2% of Japan’s rice imports came from Korea. The soybean crop in 1938 amounted to 6.4% of the pan-Japanese crop, 68.7% of the crop of Japan proper; 17.8% of the soybean imports of Japan proper came from Korea. The relationship was that of a master country to a dominated colony. For example, the Japanese forced the Koreans to eat barley so that the Japanese could import and enjoy the rice grown in Korea.

Soybean production on steep slopes and at high altitudes is mentioned (p. 488).

Hermann Lautensach lived 1886-1971. This book was first published in 1945 in German. Address: Prof., Dr.

7276. Lea and Perrins. H.P. Foods Ltd. A wholly owned subsidiary of B.S.N. Limited. 1988. The history of Lea & Perrins (Leaflet). Worcester, England. 2 p. 30 x 21 cm. Black on green.

• **Summary:** Lea & Perrins “Original and Genuine” Worcestershire Sauce has been at the factory on Midland Road in Worcestershire since the factory was built in 1897. Still today the unmistakable aromas rise from oak casks stored below the ground. The recipe is understood to have been brought to England in 1835 by Marcus, Lord Sandys, who had held many offices in the east [i.e. in Asia] including that of the Governor of Bengal.

“On his return from India to his native Worcestershire, Lord Sandys took the recipe to John Lea and William Perrins, chemists who owned a pharmacy in Broad Street, Worcester. At Lord Sandys’ request, the chemists made up the sauce and, probably to satisfy their own curiosity and to assess the sauce’s viability as a commercial proposition, prepared a quantity for themselves which they put into stone jars. When they tasted the sauce, however, they found it so unpalatable that they consigned the jars to the cellar. Some time later they re-discovered the jars and, before throwing them out, tasted the sauce again. It tasted superb! The sauce had matured.

“The reputation of the sauce originally made for Lord Sandys quickly spread and Messrs Lea & Perrins decided to obtain the recipe permanently from Lord Sandys to manufacture and sell under the now familiar Lea & Perrins name.

“To this day the recipe remains a closely-guarded secret and only a handful of people know the exact ingredients, proportions and maturing processes involved in the manufacture of Lea & Perrins Worcestershire Sauce. With Lord Sandys’ permission, the sauce was first sold commercially in 1837 and in 1849 arrangements were made for its export to New York.

“By 1849 Lea & Perrins Worcestershire Sauce had rounded Cape Horn. The crew of a ship sailing up the Pacific coast to the United States deserted to join the 1849 Gold

Rush, leaving only the captain and the ‘supercargo’, the man directly responsible for the cargo, to sell off the goods they were carrying. Itemised on the cargo list was the famous sauce, along with a selection of medicines and Lea & Perrins trusses!

“An undamaged bottle was unearthed by archaeologists investigating the town of Te Wairoa in New Zealand. The town had been destroyed by a volcano in 1886—so the sauce must have reached New Zealand before that date!...

“Lea & Perrins Limited was acquired by HP Sauce Limited in 1930. In 1967 Imperial Tobacco (now Imperial Group) acquired HP Sauce and the Lea & Perrins brands with it... The product is used in over 130 countries.”

Photos show: (1) Seven old Lea & Perrins bottles, two of them with labels. The earliest, which has no label, dates from 1866. (2) Three present sizes of bottles, 20, 10, and 5 fl. oz. The first 3 ingredients are vinegar, molasses, and vinegar—in that order. Address: Midland Road, Worcester, WR5 1DT, England.

7277. McEachern, B. 1988. Sushi—In this most celebrated of Japanese foods, the skill of the chef is as important as the freshness of the fish. *Taste* 2(2):6-7.

• **Summary:** When nigiri-zushi, or hand-shaped sushi, first appeared around the 1810s, the fish and shellfish were preserved in vinegar, with the exception of tuna, which was preserved in soy sauce. Soy sauce is the basic seasoning for sushi. Two other soy sauce-based seasonings are *nitsume*, a thick, sweetish sauce brushed over conger eel, mantis shrimp, and cooked octopus, and *nikiri*, found today only in the best establishments. Wasabi is the grated root of Japanese horseradish, a native plant that grows in the beds of mountain streams. The biting, yet cleansing taste of wasabi ‘unlocks’ the subtle flavors of uncooked fish. Pickled ginger (*gari*), which refreshes the palate between mouthfuls, is made by preserving sliced ginger in salt, vinegar, and sugar for about a week. The ginger naturally turns pink during the process.

• **Summary:** Part 1 (p. 1-20) of this Tagalog-language booklet, which contains many illustrations (line drawings), is titled “Soybean Products.” It describes how to make basic soyfoods, such as soybean ketchup (*Ketsup na utaw*), soy coffee (*Kapeng utaw*), pastillas, soymilk curds (*taho*), *tokwa* (tofu), *polboron* (a confection usually made with powdered milk, but in this case using soybean powder), soymilk, soy flour (*harinang utaw*; note that *utaw* is word for soybean in Tagalog), *tao-si* (fermented black soybeans), soy sauce (*toyo*), and miso.

Part 2 (p. 25-45) titled “Soybean Recipes,” includes chicken with miso, tofu with miso, tofu with mushroom soup, soymilk custard, fried meat (pork; *Baboy*), fried meat with miso, bamboo shoots with miso, *baguio* beans with miso, fried tofu with sweet & sour soy sauce, miso with noodle soup, chicken soup with tofu, and fried tofu with vegetable sauce. Address: Philippines.

7279. Quigley, Delia; Pitchford, Polly. 1988. Starting over: Learning to cook with natural foods. Summertown, Tennessee: The Book Publishing Co. 144 p. Illust. Index. 23 x 15 cm.

• **Summary:** The index to this natural foods, vegetarian (but not vegan) cookbook contains listings for 15 tofu recipes, 7 miso recipes, and 6 tempeh recipes, plus an incorrect definition of “tamari.” The book uses a round yin-yang (*t'ai chi*) symbol to mark recipes that “qualify as macrobiotic.” The authors have a Florida television show named “The Granary Gourmet.” Address: Florida.

7280. Sabban, Françoise. 1988. Insights into the problem of preservation by fermentation in 6th century China. In: Astri Riddervold and Andreas Ropeid, eds. 1988. Food Conservation: Ethnological Studies. London: Prospect Books. 224 p. See p. 45-55. Presented at the Seventh International Conference on Ethnological Food Research held at Sogndal, Norway on June 10-14, 1987. [28 endnotes]

• **Summary:** “From a study of a 6th century agricultural text, the *Qimin Yaoshu* [W.-G. Ch’i-min yao-shu], it is clear that for the Chinese, fermentation was a vital process. The rules and precision employed in its execution were indicative of its status... The basic and most common condiment used throughout China is soya sauce, itself a product that results from the fermentation of soya beans and wheat. It is difficult to imagine Chinese cooking without soya sauce, and yet the record shows that it is a relatively modern adjunct to the list of Chinese condiments.”

An Appendix (p. 55) contains a handwritten index of Chinese characters. Address: Chef de Travaux, l’Ecole des Hautes Etudes, en Sciences Sociales, Paris, France.

7282. Spangler, Drew. 1988. West Coast pioneer [Elaine Beatson & Kikkoman]. *Taste* (Kikkoman, Japan) 2(2):8.

• **Summary:** The first serious attempt to introduce soy sauce to the American public took the form of a television ad campaign in 1956. The commercial was timed for Nov. 6, the day the American presidential elections were held

(Eisenhower was reelected), with the result that many Americans came to remember Kikkoman as a “candidate” for the presidency.

The following year, 1957, Kikkoman International, Inc., was established in San Francisco, California, and in 1970, its test kitchen and cooking school came into existence. At that time, Hawaiian-born home economist Elaine Beatson was hired to develop new recipes incorporating soy sauce as an ingredient. Beatson started out by publicizing soy sauce through creating recipes to go on the labels and neck hangers of bottled Kikkoman products. Today, however, publicity on all five products (Soy Sauce, Lite Soy Sauce, Teriyaki Marinade & Sauce, Teriyaki Baste & Glaze, and Stir-Fry Sauce) is supplemented by a monthly distribution of recipes and articles to food editors of metropolitan newspapers, as well as regular mailings to suburban and rural papers.

7283. Wingate, Colby. 1988. Seitan ethnic recipes. Kalamazoo, Michigan: Published by the author. 55 p. No index. 22 cm.

• **Summary:** Contents: Introduction. About seitan. Recipes: French, Indian, Japanese (tempura, croquettes, sukiyaki), American (sloppy joes, stew, pot pie), Italian (cacciatore, spaghetti, parmigiana), Mexican (tacos, tortillas, tamale pie), East European, Greek, Chinese, Salads, Soup/Beans. Note: Tamari is used as a seasoning in seitan and in many of the recipes.

The introduction (written Sept. 1987) notes: “After making seitan at home for a few years we [Colby and her husband Crick Haltom] decided to go into business. In May 1986 we started Great Lakes Grainfoods. Our products are seitan, (seitan) pate, (seitan) chili, and mochi... These recipes evolved from any hours in our kitchen at home cooking for family and friends, visitors, foreigners, vegetarians, macrobiotics, non-vegetarians, young and old.

Talk with Mark Mayell of East West Journal. 1991. Nov. 14. Colby and her husband owned a seitan company in Kalamazoo, Michigan, for about 3-4 years up until about 1990. They wrote this book and sold it to suppliers, customers, etc. It was not widely circulated. Colby and Crick now live at 1200 Hillcrest Ave., Kalamazoo, Michigan 49008. Address: Kalamazoo, Michigan.

7284. Wood, Rebecca T. 1988. The whole foods encyclopedia: A shopper’s guide. New York, NY: Prentice Hall Press (Simon & Schuster). xv + 218 p. Foreword by Michio Kushi. Illust. 28 cm. [200* ref]

• **Summary:** This book is mistitled. It should be titled “Rebecca Wood’s Macrobiotic Views on Natural Foods.” The parts on quinoa, teff, amaranth, and many “macrobiotic foods” provide good information. There is extensive information on soyfoods, all from a macrobiotic viewpoint, but with many errors or undocumented controversial assertions never seen before in the literature, such as the

following: “Cold Tofu. Foods that are cooling, like tofu, tend to reduce the fire in the lower organs. This explains why tofu was eaten by Buddhist monks to abate their sexual desires. This is not a prescription against tofu. Well-cooked tofu is less cooling. For optimum health, we need a balance of warming as well as cooling foods. However, if you are feeling cold, or if it is a cold day, or if you have strenuous activities planned, then you may opt for salmon over tofu.”

Foods discussed are: Cheese (imitation soy), ice cream and frozen desserts (soy or tofu ice cream), miso, natto, nigari, soybeans (black, yellow, and “just harvested green soy”), soy flour, soy protein isolate, soy milk, soy nut (“Those oversalted, beggarly little crunches found in everything from trail mix to salads are soynuts,...”), soy oil, soy sauce (“Also known as *Shoyu* and *Tamari*), and soy yogurt, tempeh, tofu, and TVP (texturized vegetable protein {textured soy flour}).

Note: This is the earliest English-language document seen (Feb. 2005) that contains the term “cooling food.” Address: P.O. Box 30, Crestone, Colorado 81131. Phone: 303 (or 719) -256-4939.

7285. Young, Erika. 1988. A touch of Lebanon in Japan. *Taste (Kikkoman, Japan)* 2(2):1-3.

• **Summary:** Madeline Umekawa, born in Beirut, Lebanon, 30 years ago, married a Japanese man in 1982 and now lives in Osaka, Japan. She has discovered that shoyu works nicely as a seasoning in Lebanese cuisine. A bento is a Japanese boxed lunch. Kikkoman’s Recipe Contest for Foreigners is an annual event in Tokyo that was begun in 1982 to encourage new innovative, and creative ways of incorporating soy sauce in the cuisines of other nations. The contest will be held in September. Address: Editor, Taste newsletter, Kikkoman Corp., International Operations Div., 1-25 Kanda Nishiki-cho, Chiyoda-ku, Tokyo 101, Japan.

7286. **Product Name:** Wild Baked Tofu (Teriyaki, and Veggie?).

Manufacturer’s Name: Wildwood Natural Foods.

Manufacturer’s Address: 135 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1988?

New Product–Documentation: On sale in Berkeley. 1988. Aug. 30.

7287. Theses on soybeans and soyfoods: Dissertation Abstracts (Database search report). 1989. 234 p. Jan. 20. 28 cm. Unpublished manuscript. [1106 ref]

• **Summary:** The Dissertation Abstracts database contains virtually every American PhD dissertation accepted at an accredited institution since 1861. A search yielded 1,106 theses on soybeans and soyfoods not including records with the terms pathogen*, Disease*, weeds, or insect* in the title or abstract. * = truncated term.

It contained the following number of theses on soyfoods: Soy milk 9-14, tofu 6, tempeh 6, miso 4, soy sauce 3, and natto 2.

The most valuable records for us are in the subject categories Food Science & Technology; Health Sciences, Nutrition; and Economics, Agricultural. Other subject categories include: Agriculture (Agronomy, Animal Culture & Nutrition, General, Plant Culture, Plant Physiology); Biochemistry; Botany; Chemistry (Agricultural and Biological, Analytical); Engineering, Chemical; Entomology.

A count of the records in which we were interested by state where the thesis was written shows the following: Illinois 128, Iowa 68, Indiana 37, New York 30, Missouri 28, Michigan 26, Minnesota 25, and Ohio 17.

7288. Belleme, John. 1989. The imperial sauce: Rich, dark, and subtle, Japan's traditionally made shoyu is an outstanding and versatile seasoning. *East West*. Jan. p. 72-77. [2 ref]

• **Summary:** Westerners indiscriminately sprinkle soy sauce on everything from beef to popcorn. Almost half of the 60 million dollars spent annually by Americans on soy sauce goes for a product that is not even fermented. Kame, La Choy, and Chun King brands for example, are the result of a 1-day chemical process. The ingredients are soy extract, alcohol, sugar, salt, food coloring, and preservatives. Nearly all other soy sauce sold in the U.S.—such as Kikkoman, Yamasa, Marukin, Higashi-Marukin, and Maruten—is made from chemically processed soy meal by a high-tech, accelerated method and temperature-controlled fermentation, and it usually contains sodium benzoate as a preservative.

Traditional shoyu products reach U.S. consumers in a roundabout way. For example, Muso buys traditional shoyu from the Marushima Brewing Co. of Shoda Shima, Japan, and exports it to Eden Foods, which sells it to American consumers under the Eden label. Ohsawa Japan buys from the Yamaki Brewing Co. of Tokyo, and sells to Ohsawa America, which bottles and sells it under the Lima label. The largest producer of traditional shoyu is the Sendai Shoyu and Miso Co. of Sendai, Japan. Sendai makes Johsen Shoyu, which is exported by Mitoku and is bottled in the U.S. under different brand names, including Westbrae, Tree of Life, Emperor's Kitchen, Mitoku-Johsen, and Mitoku Macrobiotic.

The author notes that, "My 8 years of miso-making in Japan and at American Miso Co. have taught me that miso aged in wood is superior to that aged in plastic... although Sendai shoyu and Miso Company started making high tech shoyu in 1950, Sasaki insisted that his company also continue to make traditional shoyu." Although at times Sasaki's pet project seemed a financial disaster, in 1970 he received a phone call from a Tokyo businessman, Akiyoshi Kazama. Kazama, a friend of macrobiotic teacher Michio Kushi, was looking for a supply of traditional shoyu for

Kushi's students. When Sasaki showed Kazama his 12 2,000 gallon cedar casks of naturally aging whole soybean shoyu a few days later, Kazama knew his search was over. Kazama shipped Johsen Shoyu to the U.S. in 5 gallon wooden buckets at first.

Jubei Sasaki has passed away, but his 12 casks of traditional shoyu have grown to 100 and his son continues the whole soybean shoyu tradition.

4 recipes are given. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

7289. *Dairy Foods*. 1989. Savory flavor enhancer saves on sodium: Soy-based tamari builds body into dairy foods naturally. Jan. p. 82.

• **Summary:** Tamari can be used to reduce the sodium content of products as much as 30%. Applications include frozen cream beverages (Tamari Coconut Freeze), custards, and ice creams. "Regular tamari has a sodium level of 5,500 mg/100 gm. Tamari Lite has a sodium level of only 4,000 mg/100 gm, reduced by vacuum evaporation at 175°C. Salt precipitates out under those conditions. Ultrafiltration is also used to filter out insoluble proteins (and microorganisms) while preserving essential flavor elements." Ultrafiltration is used after pasteurization.

7290. *Food & Beverage Marketing*. 1989. Tamari comes to the states. Jan. p. 38.

• **Summary:** The company is already selling a bulk product, mainly to food processors. The consumer product should hit supermarkets in February. New filtering technologies have given the product a brighter appearance. The U.S. plant will produce tamari from both whole soybeans and defatted soybean meal, whereas the Japan plant uses only whole soybeans. The tamari made from whole soybeans will retail for about \$2.39 for a 10 oz bottle bearing a gold label. The tamari made from defatted soybean meal will retail for about \$1.99 for the same size bottle and will bear a black label. The latter product is expected to be sold more in supermarkets and the former in natural food stores. The company is focusing on magazine advertising, as in *Bon Appetit* and *Cooking Light*, among others. Address: New York, NY.

7291. *Food Engineering*. 1989. Naturally brewed soybeans yield tamari: With 30% more protein than conventional soy sauces, tamari retains its full flavor when used in processed foods. 61(1):55-56. Jan.

• **Summary:** The San-J plant in Richmond, Virginia, which uses 900,000 lb of soybeans and 500,000 lb of defatted soybean meal a year, has the capacity to produce 1,000,000 gallons of tamari a year. The production process is described. In the last step, blended tamari is pasteurized then filtered using ultrafiltration. A color photo shows San-J's brewmaster, Mr. Yamamoto, and tamari vats.

7292. San-J International, Inc. 1989. Information on San-J's new U.S. produced tamari (Leaflet). Richmond, Virginia. Jan.

• **Summary:** A detailed, step by step description of exactly how San-J makes its new tamari in America. Contents: Raw materials: The soybeans are grown in Virginia. The solar dried sea salt comes from Baja, California [Mexico]. Note: No mention is made of defatted soybean meal. Muro and koji making: Incubation of the nuggets in the climate controlled chamber takes 2 days. Moromi: That made in America uses a higher proportion of brine to koji so that the resulting moromi can be pressed mechanically. Fermentation: The moromi is fermented for 6-7 months in temperature, fiber reinforced plastic tanks, which are more sanitary, less aerobic, and can be made larger than the traditional open wooden vats used in Japan. "One of the reasons that San-J chose Virginia as the site for its U.S. factory is that its climate is probably the most similar of anywhere in the U.S. to that of Virginia."

Press: Here the solids are removed. The resulting liquid is raw tamari. Blending: "The raw tamari is analyzed and blended to yield a consistent protein and salt content. Alcohol is added at this point. Alcohol: San-J adds natural, food grade grain alcohol (made from corn and certified Kosher) to bring the alcohol level up to 2% to inhibit the growth of aerobic yeasts. Pasteurization and filtration: Pasteurization arrests the fermentation and kills bacteria. Filtration removes fine, non-soluble solids. The filtration system used at San-J is a first. Commonly both tamari and shoyu are filtered through cellite (made from diatomaceous earth). The filter we use is a microfilter. This is both more efficient and more effective." Gold Label / Black Label. The Gold Label product is made from soybeans and is wheat free. The Black Label is made with soy grits, which "are made by removing the oil from whole soybeans by a process called hexane extraction. Hexane is a volatile liquid not unlike alcohol [actually it is a petroleum fraction], and is used to facilitate this mechanical [actually chemical] separation." No traces of hexane left in the grits. Address: 2880 Sprouse Dr., Richmond, Virginia 23231. Phone: 804-226-8333. Fax 804-226-8383.

7293. San-J International, Inc. 1989. Family planning (Ad). *Food Distributors Magazine*. Jan. And Feb. p. 80.

• **Summary:** This ½-page color ad shows three bottles of San-J soy sauce: Black-label tamari, Tamari Lite (low-sodium), and Szechuan Sauce. It also appeared in *Fancy Food* (Chicago). March. p. 78. Address: Richmond, Virginia.

7294. **Product Name:** Shoyu (Made from 70-80 parts whole soybeans and 20-30 parts wheat).

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-595-9545 or 415-821-4040 (Perelman).

Date of Introduction: 1989. January.

New Product–Documentation: Interview with John Perelman, VP Sales and Marketing, San-J. 1990. Jan. 25. The shoyu made in America by San-J first became available in Jan. 1990. It is not organic. It is sold exclusively by Eden Foods.

7295. Sojarei Ebner-Prosl. 1989. Preisliste [Price list]. Augasse 2, A-2500 Baden bei Wien, Austria. 10 p. Manufacturer's catalog. [Ger]

• **Summary:** The company has two catalog/price lists: one (green) for food processors and one (yellow) for retail stores. Products made by the company have been marked by the author with an "S." In the front of each catalog is an organic certificate. The retail catalog contains 20 fresh products, 3 books, and 30 non-fresh products. Fresh products made by the company include Tofu Natur, Tofu Mariniert, Tofu Geräuchert, Tofu Pastete Siddhartha, Tofu Pastete Toscana, Tofu-Burger, Soja-Getreide-Laibchen, Gruenkern Laibchen, Dinkel Laibchen, Reis-Laibchen, Weizengluten Laibchen, Weizengluten, Badener Bratwuerstchen, Badener Grillwuerstchen, Brotaufstrich "Rusticana", Brotaufstrich "Holzknecht." Fresh products sold but not made by the company include soy tempeh, marinated tempeh, and soy sprouts. The company sells 3 recipe books: (1) Their own recipe book *Wichtig für Ernährungsbewusste* (Important for understanding of nutrition); (2) *Tofu: Essen mit Zukunft* (Tofu: Eating with the future) by Brigitte Vogenreiter and Clemens Kuby, and (3) *Schlank mit Tofu* (Slim with tofu; 117 recipes) by A.W. Dänzer.

The company also sells many non-fresh products including yellow soybeans (organically grown), soya flakes (*Sojaflocken*, not defatted), whole soy flour, tamari, shoyu, barley miso, Hatcho miso, brown rice miso, soba (buckwheat) miso, nigari, Bonsoy soyadrink (natural and cacao), Pinoccio Soybean coffee, and soynuts.

In the catalog for food processors, for example, the regular tofu, marinated tofu, and smoked tofu are each sold in 1 kg, 30 kg, 60 kg, 100 kg, and 200 kg amounts. Address: Baden (near Vienna), Austria.

7296. Hodgson, Moira. 1989. Spicy cooking adds heat to a cold day. *New York Times*. Feb. 5. p. CN20.

• **Summary:** Includes a recipe for "Shrimp in black bean sauce with Oriental noodles." The ingredients include "4 tablespoons Chinese preserved black beans,... 2 tablespoons hoisin sauce,... 1 tablespoon soy sauce." Then: "Rinse the black beans thoroughly under cold running water and chop them fine." Stir-fry the scallions, garlic and ginger for 1-2 minutes. Add the black beans and chili and stir-fry for one minute.

Note: This is the earliest document seen (Nov. 2011) that uses the term "Chinese preserved black beans" to refer to fermented black soybeans. This new term appears in only 2

documents, in 1989 and 1999.

7297. Boeddeker, Ralph. 1989. Mit Tofu 100 Millionen Mark Umsatz: Das Reinheitsgebot fuer Deutsche Wurst ist gefallen—Naturkost-Hersteller rechnen mit Zuwachs [With tofu, sales of 100 million German marks: The standard of purity for German sausage has fallen—Natural-foods producers count on growth]. *Welt am Sonntag* No. 7. p. 33. Feb. 12. Sunday. [Ger]

• **Summary:** Describes the very successful soymilk plant sold by Soya Technology Systems (DTD) to DE-VAU-GE in Lueneburg, West Germany. Michael Makowski, healthy looking, in his 50s, and managing director of the company, introduces a meatless banquet and explains that he has been a vegetarian for 30 years. The future for this producer of vegetarian foods looks very bright. Meatless sausages or those extended with soy are seen as becoming increasingly popular. The company is now approaching the 100 million mark sales level and employs 350 men and women. It is in the top 10 of the 70 manufacturers of natural foods in Germany, with a market share of about 10%. Each year it ships about 15,000 tons of natural foods from Lueneburg to the country's roughly 2,700 Reformhaeuser (natural/health food retail stores). The company makes an assortment of 300 vegetarian food products, mostly from cereal grains and soybeans. The latter, grown in the USA, Brazil, and China, offer many possibilities. They can be fashioned into spread for bread, milk, or tofu.

Makowski sees the market for tofu, which resembles Quark, as especially promising. It can be nicely seasoned with spices such as paprika, curry, soy sauce, and/or herbs, and made into meatless sausages. The Reformhaeuser pioneered in introducing non-dairy margarine, whole-grain bread, and Muesli to Europe. Makowski sees the next wave as being tofu boom products. A photo shows the company's 3-level soymilk plant that produces 20 million liters a year in 500 ml and 1 liter containers.

Note added by Anders Lindner, head of STS: Up to now the plant has produced soymilk and desserts. Soon they will also start to produce tofu sausages, yogurt, and pâtés.

Mr. Makowski, eyeing the big potential market for tofu products, is a bit worried that the big food heavyweights such as Unilever, Nestlé, Kraft, etc. might enter this market. When the sale of tofu products begins, DVG's sales are expected to exceed DM 100 million. Address: Lueneburg, West Germany.

7298. Inoue, Kojiro; Sugarman, Carole. 1989. I made at least 1,000 pieces of sushi a day. Now I have sushi elbow. *Washington Post*. Feb. 26. p. I22.

• **Summary:** The moving and humorous story of Mr. Inoue, age 45, (as skillfully told by Carole Sugarman), who survived the ten-year process of becoming a sushi chef in Japan, then came to America determined to introduce

Americans to sushi and raw fish.

After working in sushi restaurants in Japan for 8 years (and getting married) he heard that Japanese restaurants were getting popular in the United States. In 1971 he came to the USA to run a small (5-stool) sushi bar at Sakura Palace in Silver Spring, Maryland. Sushi wasn't yet popular in America and the customers were surprised that anyone would eat raw fish, squid, octopus, eel, etc. They were also scared to try it themselves. Yet ten months later Mr. Inoue asked his wife and young child to join him. He had a hard time finding good quality, fresh fish. Americans told him, "A fish is a fish." Sometimes he brought frozen fish from Japan or California. After 5 years the owner of his restaurant retired and he now wanted to start and own a restaurant for himself. He started as a sandwich shop, then remodeled. It was hard. He had to explain what sushi was and how to eat to potential customers. Many customers asked for a knife and fork; some still do. He also explained about wasabi and soy sauce.

In 1977, the McGovern Report was released. It said that 500,000 Americans died of heart attacks and that Japanese food was low in cholesterol. Because of that, all Japanese restaurants became popular.

Today sushi has become part of American food culture. His customers are now 80% Americans and 20% Japanese. Fresh fish is easy to buy. Mr. Inoue, who was now making 1,000 pieces of sushi day, developed sushi elbow—just like tennis elbow. He had a cast on his elbow for one year.

"Tokyo people love *natto* (fermented soybeans) or miso soup. I eat bread. American bread. Sometimes cereal." Today Americanized sushi is all over Japan. He is still married, but his wife lives in Japan with his three kids. His kids eat American hamburgers, Kentucky Fried Chicken and pizzas in Japan. He operates a sushi restaurant in Washington, DC.

7299. Clarke, Betty. 1989. Re: List of Pacific distributors and brokers. Letter to William Shurtleff at Soyfoods Center, Feb. 28. 4 p. Typed, with signature on letterhead.

• **Summary:** These distributors and brokers are for the states of Washington, Oregon, California, Alaska, and Hawaii. In this region, the company has 24 distributors and four brokers.

The letter begins: "Thank you for your inquiry. We are sending some additional information regarding our Premier Japan sauces which we hope you will find useful."

It concludes with a handwritten note by Betty: "Joel Dee sends his Best Wishes."

The logo at the top center of the letterhead shows a three-masted sailing ship in full sail, in an oval, with three seagulls. Address: 1115 Lousons Rd., P.O. Box 3150, Union, New Jersey 07083. Phone: (201) 964-8176.

7300. Ando, Seiichi. 1989. Wakayama no shoku to sono haikai [The foods of Wakayama prefecture and their background]. In: S. Ando, ed. 1989. *Kikigaki Wakayama no Shokuji*. Tokyo: Nosan Gyosan Bunka Kyokai. See p. 344-

53. For shoyu, see p. 345-46. [Jap]*

• **Summary:** Discusses the foods of Wakayama prefecture, how they are made and interesting highlights, during the time from the end of the Taisho period to the beginning of the Showa period, thus from about 1920-1930. Address: Osaka, Japan.

7301. Collins, R. 1989. Re: Request for information on traditionally brewed low-salt varieties of shoyu. *East West*. Feb. p. 24. Letter.

• **Summary:** Most shoyu contains 16-18% salt. "Since salt is a natural preservative, however, any reduction must be compensated for by the addition of preservatives such as sodium benzoate or ethyl alcohol, as in high-tech varieties, or special handling, as in traditionally-made varieties.

"Traditionally-made lower salt shoyus, such as Ohsawa America Lima Nama Shoyu and Mitoku Macrobiotic Johsen Double Brew Dipping Sauce, are made by a complex process involving two fermentation periods, each lasting eighteen months to two years! First, the usual whole soybean moromi is prepared by mixing koji and a brine solution. After the traditional aging period, the moromi is pressed and the raw shoyu extracted. Next, additional koji and, in some cases, additional brine, is added to the mature raw shoyu and fermented again. The thick, double-brewed moromi is then pressed and the shoyu extracted. The addition of extra koji dilutes the final salt content to 13-14%.

"A few double-brewed shoyu varieties, such as Eden Low Sodium Shoyu and Westbrae Mild Shoyu, have been further diluted with water, reducing the salt content to 8-9% (80-90 mg sodium per half-teaspoon). These lowest salt varieties must be pasteurized, since they have no added preservatives. All low-salt shoyus should be refrigerated after opening."

7302. Dillon, Patricia. 1989. Ethnic ingredients: Mexican and Italian dominate. *Food Engineering* 61(1):73-76, 81. Feb.

• **Summary:** According to Business Trends Analysts, the retail Oriental foods segment of the ethnic foods market grew at 13.5% in 1977-82, at 9.6% in 1982-87, and at 8.7% in 1987-96 (estimated). In each time period it grew faster than the industry average. In 1987 Oriental foods accounted for 8.5% of the total retail ethnic foods market, compared with 40.9% for Italian foods, 24.6% for Hispanic foods, 14% for Pizza, and 12% for Italian sauces. "Retail sales of oriental foods for 1988 totaled \$255.5 million, an increase of 3.7%. As Americans continue to develop their tastes in oriental foods, many are passing up soy sauce for teriyaki sauces. Traditionally, it is made from equal parts of soy sauce, sake and sweet sake. Teriyaki and other sauces showed the most dramatic increase within the oriental food category growing 15% from 1987 with sales totaling \$38 million for the first ten months of 1988, says SAMI (Selling Areas Marketing

Inc.). Soy sauce demonstrated a more modest growth of 4.2% with sales of \$48.6 million for the same period...

"Oriental cooking incorporates much of U.S. current concerns for nutritious food that can be quickly and conveniently prepared. As John Gill of McCormick notes, fresh is the key word. The produce department has proven to be the most exciting area in the supermarket today. A few years ago, it was thought that frozen foods were going to decimate fresh produce, but that hasn't occurred."

7303. Eden Foods, Inc. 1989. A soy sauce for all seasoning... (Ad). *Natural Foods Merchandiser*. Feb. p. 14; April. p. 34.

• **Summary:** This 5 inch square ad with a color photo shows 5 bottled Eden soy sauces. Four bottles bear the Japanese character for "Hon" or genuine. These four are labeled shoyu soy sauce (including low sodium, and organic) and one is labeled tamari soy sauce (wheat free). "Our Low Sodium Shoyu is double-brewed, requiring three years to mature. Eden certified organically grown crops, aged to perfection, create our Organic Shoyu. Each soy sauce is a masterpiece."

An explanation on page 14 notes that two of these sauces are domestically made [by San-J in Virginia] (naturally brewed shoyu and wheat free tamari). Eden's popular soy sauce line has also been introduced: Traditional Japanese, low-sodium, and organic. "All five items are available in new, convenient sizes—5, 10- and 20 oz glass jars and bulk 4.75- and 55-gallon containers."

Also published in Let's Live. 1989. March. p. 45. And in East West. 1989. April. p. 9. Address: Clinton, Michigan.

7304. *Florida Grocer (Miami)*. 1989. Kikkoman says—Start the (Chinese) New Year off right! Feb. [1 ref]

• **Summary:** Kikkoman has just published a new 96-page cookbook [titled *Kikkoman Oriental Cooking*]. The article outlines Kikkoman's extensive TV and print ad campaign including (1) inserts in leading women's magazines to reach 35 million households, (2) sponsorship of 26 shows in the Yan Can Cook Show series on PBSTV broadcast in 150 markets, (3) sponsorship of Yue Sai-Kan's cable TV series 'Looking East' in Feb.-April, 875 30-second spots featured in a Chinese New Year flight and a fall flight, (4) 72 insertions in 22 magazines to reach 528 million readers, 6 times a year.

Kikkoman soy sauce "has always been made naturally, without any artificial ingredients" [How about preservatives?]. Kikkoman Soy Sauce is the market leader, with over 50% of the market share. With a 25% annual growth rate, Soy Lite is the fastest growing product in the Kikkoman family. Teriyaki Baste & Glaze dominates the category with a 75% market share; Stir-Fry Sauce has over 80% market share. Sweet & Sour Sauce is also doing well.

7305. *Natural Foods Merchandiser*. 1989. Soy inspirations: With plenty of new products on the horizon, retailers should

begin to plan now for a sizzling Soyfoods Month in April. Feb. p. 12-13.

• **Summary:** Sales of soyfoods (tofu, soymilk, soy sauce, miso, other such as entrees, cheese, ice creams, meat analogs, etc.) are estimated to be \$638 million for 1987 and \$682 million for 1988, and projected at \$754 million for 1990. Discusses Corporate Culinary Carnival soyfoods promotions by Judy Brown, and a soyfoods cooking contest by Mike Shields of Food For Thought in Long Island, New York. Winners received their weight in tofu. The unique idea made it into the pages of *USA Today*. Among the 30 entrants, winners were selected in 3 categories: entree, dessert, and beverage.

7306. Ogundipe, H.O.; Osho, Sidi M. 1989. Soybean in Nigerian diets—Past, present and future. Paper presented at the Soybean Production and Utilization Workshop. 3 p. Held 13-15 Feb. 1989 at Lagos, Nigeria. [3 ref]

• **Summary:** “Soybean is reported to have been introduced into Nigeria in about 1908. It was mainly restricted to that part of Nigeria now referred to as Benue State and the Zonkwa-Abuja ecological zones.” The earliest known use of soybean in the Nigerian diet was in the form of dawadawa, a fermented soup condiment traditionally made from the locust bean. Presently most of the dawadawa produced in Nigeria uses soybean as its raw material. Production has spread to various parts of the country and there has been a marked improvement in processing techniques. Soy ogi and soymilk have also been used as foods in Nigeria. Since 1984 the Kersey Children’s Home in Ogbomosho has run a clinic to treat malnourished children. About 24,000 out patients were treated in 1984 while at any given time about 40 severely malnourished children are admitted and placed on a diet consisting mainly of soymilk and traditional foods fortified with soybeans.

In Nigeria, the lack of recognition of the potential of the soybean is now a problem of the past. The greatest potential is expected to lie in the preparation of Nigerian foods. A book titled “Soybean Recipes” has been published. People in rural households in Nigeria are now learning to use soybeans. “The extension work with soybean utilization commenced at 3 project sites in Oyo State, i.e. Igangan, Ikoyi, Ijaye. Training and demonstrations take place at these sites, in which the villagers participate. The program has since expanded to 27 other villages.

“As a result of these training programs over 25,000 people have been trained and now soybean is found in local markets. The demand for utilization is increasing.

“Also, within the past few years, there are in the markets several soy fortified products like Nutrend, Golden morn, Nutrimax, etc. There are also whole soy products like soy nuts, soybean oil and liquid soy maggi [HVP soy sauce]. It is expected that several others will still enter the market this year.

“The future: While emphasis is presently being placed on the preparation and utilization of soybean at home, there is likely going to be a shift to commercial control processing of soybean... With the reduction in the availability of groundnut coupled with its soaring prices, soybean will play a more vigorous role in the formulation of livestock feed, with the possibility of reduction in feed cost and consequently of livestock produce.” Address: 1. International Inst. of Tropical Agriculture (IITA), PMB 5320, Oyo Rd., Ibadan, Nigeria; 2. Inst. for Agricultural Research and Training (IAR&T), Ibadan, Nigeria.

7307. Packaged Facts. Subsidiary of FIND/SVP. 1989. The Oriental foods market. 625 Avenue of the Americas, New York, NY 10011. 225 p. Feb. [1 ref]

• **Summary:** Contents (main divisions): I. Introduction. II. The overall market, including a brief history in America. The market leaders, in descending order, are La Choy, Stouffer, Chun King, Nissin, Kikkoman, Budget Gourmet, JFC. III. The frozen segment. IV. The canned/packaged segment: Sauce sales now over \$100 million and soy sauce nearly 3/4 of all sauce sales. V. The tofu segment (detailed below). VI. The dry soup segment: Nissin number one. Appendix: Company profiles: BCI Holdings Corp., Nestlé S.A., Nissin Foods Co., Kikkoman International (in American since 1956). ConAgra, Sanwa Foods, Others (Kraft, Benihana, JFC International).

Section V is “The Tofu Segment” (p. 153-178). Contents: I. The products: Brief history. A protein staple in the Orient. The Miracle food. Tofu high in protein. Calcium content can be high. How it is made. Raw tofu the most common form. Other forms found in specialty stores. How tofu is used.

II. The market: Tofu sales reach \$71 million in 1988 (Gives dollar volume in millions from 1984 [\$57] to 1988 [\$71]. Source: Packaged Facts). III. Factors in future growth: Popularity of Oriental cuisine. Tofu adopted by dieters and health conscious. Consumers attracted by low price. Dinners and entrees being introduced. Tofu helpers (Betty Crocker’s Oriental Classics Dinners [General Mills] call for the addition of tofu, chicken, or meat). Tofu substitutes are proliferating (value-added tofu based ice creams, puddings, burgers, cheese, hot dogs, salad dressings, etc.). Interest by corporate giants (Pillsbury and Carnation). Tofu used in U.S. National School Lunch Program (it is estimated that 50 million lb of soy proteins are used each year in school lunches). IV. Projected sales: \$119 million market by 1995 (7-8% dollar increase annually). V. Market composition: Raw tofu over half of sales. Supermarkets account for 60% of sales. VI. The Marketers: Field narrowed to 150 or fewer marketers. Four major marketers (Hinoichi, Azumaya, Morinaga, Nasoya; produce 100,000+ weekly). The second echelon (Northern Soy, Quong Hop, White Wave, Island Spring; produce 15,000–30,000 lb/week). VI. The

competitive situation: Precise market shares unavailable. Hinoichi, Azumaya, Nasoya, and Morinaga lead. Tomsun, failing with Jofu [tofu yogurt], files for Chapter 11. Watch out for Kikkoman. VII. Advertising and promotion: No measurable expenditures (except by Tofutti). VIII. Packaging: Plastic and foil. IX. Distribution and retail: Distribution. 60% of raw tofu sold in supermarkets. Pricing includes higher margins. Assortment. Most tofu shelved with produce. Pricing data at the retail level: In its *Key Price Book*, Marketing Services Corporation publishes detailed information on tofu products sold in California supermarkets. This includes data on package sizes, case sizes, competitive pricing, margins, and promotional discounts. Figures for Kikkoman Kinugoshi, and two textures of Morinaga were compiled on 1 Feb. 1989. X. The consumer: Size of user base unknown. Roper poll reveals a dislike of tofu. Those most likely to use. Address: New York. Phone: 212-645-4500.

7308. Product Name: Paul's New and Original Brown Rice Tofu Sandwich [Less Spread, More Veg].

Manufacturer's Name: Paul's Organic Food Works.

Manufacturer's Address: P.O. Box 431, Fairfax, CA 94930. Phone: 415-453-2360.

Date of Introduction: 1989. February.

Ingredients: Short grain brown rice*, spring water, nigari tofu*, sprouted wheat tortilla*, toasted tahini, barley miso*, green onions* or leeks*, carrots*, seasonal green*, cabbage, lettuce*, clover sprouts*, shoyu*, sesame oil*, garlic*, ginger*, apple cider vinegar, unrefined sea salt, spices. * = Organically grown per Cal. Health Code Sec. 26569.11.

Wt/Vol., Packaging, Price: 12 oz.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Paul Duchesne. 1989 Aug. 11. 5.5 by 2 inches. Black on green paper. "12 happy ounces. For the best taste, remove from refrigeration one hour before eating. To eat: Open bag–Tilt sandwich in bag–fold bag down." Illustration of animated product, with smiling face on tortilla, arms, and legs. On the back of each is a statement: "Concentrate on the issues, not the individuals..." The statement is changed weekly. Talk with Paul Duchesne. 1989. Aug. 16. Introduced in Feb. 1989.

7309. Product Name: San-J Gold Label Tamari (Traditionally Brewed Gourmet Soy Sauce, Made from Whole Soybeans and Wheat Free), Black Label Tamari (Made from Defatted Soybean Grits), Teriyaki Sauce, and Szechuan Sauce.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-595-9545 or 415-821-4040 (Perelman).

Date of Introduction: 1989. February.

Ingredients: Gold label: Whole soybeans, water, sea salt [and alcohol].

Wt/Vol., Packaging, Price: 5.07 fluid oz (150 ml) dispenser, 10 fluid oz bottle, 20 fluid oz (592 ml). The 10 oz Gold Label retails for about \$2.29, and the Black Label for about \$1.99 (13% less).

How Stored: Shelf stable.

Nutrition: Gold label: Per 1 tbs.: Calories 11.34, protein 1.84 gm, carbohydrate 1.06 gm, fat 0 gm.

New Product–Documentation: These products, formerly imported from Japan, are now all made in America at the new San-J plant in Richmond, Virginia. The basic San-J tamari started to be made in America in Oct. 1988 and is expected to be available by Feb. 1989. Specialty Food

Merchandising. 1988. Oct. "Japanese seasoning now brewed in U.S. San-J Tamari is already being used as an ingredient in the foods of such major U.S. packers as Campbell, Hunt-Wesson, Stauffer, and H.J. Heinz."

Ad (½ page color) in Food Distributors Magazine. 1989. Jan. And Feb. p. 80 "Family Planning." Shows black-label tamari, low-sodium tamari lite, and Szechuan sauce.

Article in Food & Beverage Marketing. 1989 Jan. p. 38. "Tamari comes to the states."

Ad (2.4 by 11 inches, color photo) in Cooking Light. 1989. Jan/Feb. p. 24. "Ancient remedy for tired recipes... The most contemporary cooks are using San-J Tamari in everything from stir-fry to nouvelle cuisine. Tamari, the original soy sauce of Japan, enhances flavors naturally and reduces sodium by up to 30% when used in place of salt." Shows a bottle of gold label tamari against a purple background. Also in Bon Appetit. Jan. 1990.

Ad in Natural Foods Merchandiser. 1989. March. p. 54. "The gold standard." This is the new product, made in America, with a gold label. Also run in Vegetarian Times. 1989. April. p. 3.

Interview with John Perelman, VP Sales and Marketing, San-J. 1990. Jan. 25. The Gold Label and Black Label tamari, made in America, first became available in Feb. 1990. The reformulated Teriyaki Sauce and Szechuan Sauce, made with American-brewed tamari, were introduced to the market in April 1989. See also separate record for this interview.

Ad in Vegetarian Times. 1990. March. p. 17. "Ancient remedy for tired recipes." (Different from that cited above). "More cooks are discovering the extraordinary benefits of traditional tamari soy sauce."

Two labels each sent by Misako Binford of San-J International. 2012. May 14. The black label now reads: "Tamari: Gluten Free Soy Sauce. 10 fl. oz. Made with 100% soy." Two logos on the front panel: (1) Non GMO Project verified. (2) Certified Gluten Free. "Contains 28% less sodium than regular tamari." She notes: Product introduced 1987 or before. Imported.

7310. Leblang, Bonny Tandy; Wyman, Carolyn. 1989. Jolly Time popcorn lacks cheesy taste: Supermarket sampler. *Sun-Tattler (Hollywood, Florida)*. March 16.

• **Summary:** This "Special" to the *Sun-Tattler* mentions "La Choy Lite Soy Sauce. \$1.39 per 10 oz. bottle." Bonnie writes: "Everyone from the Surgeon General to the American Heart Association suggests Americans lower their sodium intake." This new soy sauce contains 47% less sodium than La Choy's regular version, or only 110 mg of sodium per ½ teaspoon. It also contains preservatives.

7311. Akwarius Almere. 1989. Akwarius prijs en bestelboek: Natuurvoedingsprodukten, Januari-Februari-Maart [Catalog and price list: Natural food products, January-March]. P.O. Box 50070, 1305 AL Almere, The Netherlands. 77 p. [Dut]

• **Summary:** For details, see entry for the April-June 1989 catalog. Address: Almere, Netherlands. Phone: 03240-20800.

7312. **Product Name:** Baccio Tofino Gourmet Ravioli (Tofu Ravioli).

Manufacturer's Name: Baccio Ravioli and Pasta Company.

Manufacturer's Address: 179 E. 19th St., Chico, CA 95928. Phone: 916-893-8324.

Date of Introduction: 1989. March.

Ingredients: Pasta: Organic whole wheat flour*, semolina, tomato powder, purified filtered water. Filling: Tofu (made from organic soybeans*, water, nigari), potatoes, onions, carrots, bread crumbs, tomato paste, tamari, vinegar, garlic, herbs & spices, olive oil, sea salt. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 16 oz poly bag.

How Stored: Frozen.

New Product–Documentation: Talk with (call from) Amanda Leveroni. 1990. March 5. The product was introduced in about March 1989.

Label sent by Amanda. 1990. March 13. 4.75 by 8.5 inches. Thick paper; its slips into the bag. Red, green, and black on white. Illustration of a red lipstick print, all against a background grid of fine green lines in 3/8 inch squares. "Egg free. Dairy free. Cholesterol free! Introducing the all new Tofino! We've taken out the eggs and cheese to bring you a robust tasting ravioli with zero cholesterol! Our zesty blend of ingredients includes organic tofu and organic whole wheat flour! Enjoy this unique delicious ravioli plain or with Baccio's new pesto sauce! Baccio Ravioli. The ultimate meal in minutes [Boil for 4-5 minutes]. Let a Baccio kiss your tastebuds tonight." UPC indicia.

7313. Colbin, Annemarie. 1989. The natural gourmet: Delicious recipes for healthy, balanced eating. New York, NY: Ballantine Books. x + 325 p. March. Illust. by Laura Hartman Maestro. Index. 24 cm. [16 ref]

• **Summary:** Pat McNees of *The Washington Post* has called Annemarie "The Julia Child of natural foods cooking." Her photo, in color, graces the cover. The book incorporates "The Five Phases of Food" theory from China, based on a book by John W. (Jack) Garvey (1983), as an aid to meal balancing. Below each recipe name is given the major phase and minor phase that it represents. Soybeans, tofu, tempeh (as well as brown or white rice and mochi) are metal (declining state), while black soybeans are water (maximum rest before growth).

Page 27 notes: "You will not find any recipes in this book with whole soybeans; I find their taste too unpleasant, and tend to believe some research that indicates they may contain oxalates and other elements that prevent nutrient absorption. Soybean products such as miso, shoyu (the

natural soy sauce made with wheat), tamari (a wheat-free natural soy sauce), tofu, and tempeh, on the other hand, are delicious; tofu and tempeh are good protein sources when combined with the grains. You will also find the condiments miso and shoyu or tamari used in many of the recipes.”

Soy-related recipes include: Black and white aioli dip (with tofu, p. 49; Note: “Aioli” is derived from the French words for “garlic” + “oil.” Aioli sauce is made from crushed garlic, egg yolks, olive oil, and lemon juice). Tofu and spinach turnovers (Spanakopitas, p. 66-67). Bean-of-the-Orient miso soup (p. 74-75). Shoyu consommé with enoki mushrooms (p. 77). Collard miso soup (p. 78-79). Carrot-beet soup with tofu sour cream (p. 83-84). Tofu sour cream (p. 84-85). Baked [kidney] beans with miso and apple butter (p. 136). Vegetable-tofu sauté (p. 154-55). Tofu mushroom stroganoff with bulgur (p. 155). Tofu sour cream (p. 156). Broccoli-tofu quiche with wild mushrooms (p. 157-58). Open herbed tofu sandwiches (p. 158-59). Tempeh with shallots and white wine (p. 160-61). Tempeh in sweet and sour sauce (p. 161-62). Tempeh with creamy horseradish sauce (p. 163). Stir-fried bak choy with marinated tofu (p. 169-71). Green peppers with miso (p. 182-83). Spinach-nori rolls with tofu and wild mushrooms (p. 186-87). Green salad with miso-coriander dressing (p. 203). Red and white cabbage salad with miso-onion dressing (p. 208). Radish-watercress salad with soy-sesame dressing (p. 209; with ½ tablespoon black sesame seeds and ¼ cup toasted sesame oil). Salad of wilted collard greens with yellow peppers and white miso dressing (p. 210). Spiced glazed pears with tofu cream (p. 271-72). White miso and orange dressing (p. 285).

Note: This is not a vegetarian cookbook. There is a chapter of fish recipes, and other recipes for the use of alcoholic beverages/seasonings (wine, mirin). Address: Founder and director, Natural Gourmet Cookery School / Inst. for Food and Health, 365 West End Ave., New York City, NY 10024.

7314. GEM Cultures. 1989. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 4 p. March. [4 ref]
• Summary: Contents: 1. Powdered cultures for soy crafters: Powdered starter cultures for tempeh, miso, amazake, shoyu, and tamari. In home and commercial sizes. Rice koji. 2. Cookbooks with culture (lists 4 books). 3. Coagulants for curdling tofu: Natural nigari or Terra Alba calcium sulfate in 1 lb or 5 lb bags. 3. Self renewing cultures: Viili, sourdough, kefir, miso. 4. Sea vegetables from the Mendocino Sea Vegetable Co. 5. Recyclables: Cheesecloth, super sealers (lids).

“We at GEM Cultures are a husband and wife team, Gordon & Betty, with between us 37 years of professional experience in culturing microorganisms and teaching people about them. In 1980 we set up GEM cultures with the goal of providing dependable, low cost cultures and related items for the growing number of people who wish to have a hand

in creating a healthier diet through cultured foods.” Address: Fort Bragg, California. Phone: 707-964-2922.

7315. **Product Name:** Barbeque Chili with Tempeh.

Manufacturer’s Name: Homestyle Foods (Formerly Sonoma Specialty Foods).

Manufacturer’s Address: 2317 Bluebell Dr., Santa Rosa, CA 95401. Phone: 707-525-8822.

Date of Introduction: 1989. March.

Ingredients: Tempeh (organic soybeans*, culture), tomatoes, onions, soy oil, mustard, lemon juice, molasses, tamari, apple cider vinegar, natural herbs and spices. * Made in accordance with California H&S Code 26569.11.

Wt/Vol., Packaging, Price: 8 oz plastic tub.

How Stored: Refrigerated.

New Product–Documentation: Label. 1989. 4.5 inches diameter. Plastic lid. Red and black on white. Illustration of a cottage. “Microwaveable. New! Non-dairy. Cholesterol free. Heat or ready to eat in sandwiches & salads as an entree. Natural. No preservatives. Nutritious. Delicious. Kosher.”

Talk with Benjamin Hills. 1989. June 6. The product was launched in March. He is now working on a Tropical Pudding. The company seems to be going downhill.

Product served at World Vegetarian Day in San Francisco. 1990. Oct. 6. Note that Homestyle’s products are now made by White Wave in their plant at 1990 N. 57th Ct., Boulder, Colorado.

7316. San-J International, Inc. 1989. The gold standard (Ad). *Natural Foods Merchandiser*. March p. 54; April. p. 89.

• Summary: This full-page color ad refers to “San-J Whole Soybean Tamari: Wheat Free Soy Sauce,” and specifically to the new product, which bears a gold label, that is made in America. A large 10-oz. bottle of the tamari is shown against a background of whole soybeans. A small inset of Black Label Tamari and Tamari Lite are also shown. “This extraordinary seasoning establishes a new standard for the other varieties of San-J Tamari. Try our new Black Label soymeal tamari—brewed here for the first time—and Tamari Lite, which offers a 25% sodium reduction. San-J Tamari. Pure soybean. Pure gold.”

Also published in *Vegetarian Times*. 1989. April. p. 3. and May p. 2. And in *East West*. April. p. 47. Address: Virginia.

7317. *Whole Foods*. 1989. Bios: U.S. Mills. March. p. 110.

• Summary: U.S. Mills, established in 1908, specializes in 100% natural products. Our Erewhon cereals, granolas and nut butters are produced in our facility in Omaha, Nebraska. We also import a complete line of macrobiotic products from Japan, including shoyu tamari. In addition, we are the exclusive importer of Kentaur cereals from Switzerland. When the name Erewhon or U.S. Mills appears on the package, be assured your customers are getting the very

best. U.S. Mills Inc., 395 Elliot St., Newton Upper Falls, Massachusetts 02164; (617) 969-5400.

7318. Spitzler, Andrew C. 1989. Tasty tofu tailored to tempter's tongues: Silver Spring pair test market new dishes for national campaign. *Washington Business Journal* (McLean, Virginia). April 3. p. 1, 33.

• **Summary:** Edward H. Walker and Andrew J. Wilks (shown in a photo) of Tofoods hope to make tofu into a household and institutional dietary staple. "Tofu is often ridiculed as being rubbery, tasteless and just plain unappetizing..."

"Tofoods is seeking about \$2 million in venture capital to market its products to retailers and institutions such as hospitals and elderly service organizations. So far, the two partners have commitments for \$500,000... The idea for Tofoods came to Walker and Wilks while they were co-managing a restaurant at a health resort in the Catskills..."

"The pair raised \$300,000 from friends, family and themselves, relocated to Silver Spring and formed Tofoods in 1986. During 1986 and 1987 they test-marketed the frozen dinners they had developed. People responded well to such frozen entrees as sweet and sour tofu, tofu teriyaki and barbecued tofu. Tofoods sold \$100,000 of their products in 44 states, mostly in kosher and natural food markets." One company watching Tofoods progress is 50-year old Worthington Foods Inc. of Worthington, Ohio, the largest manufacturer and distributor of soyfoods in the USA, with \$50 million in sales last year.

7319. Brown, Judy; Bates, Dorothy R. 1989. Judy Brown's guide to natural foods cooking. Summertown, Tennessee: The Book Publishing Co. 160 p. Index. With 8 pages of color photos. 23 cm.

• **Summary:** This natural foods, vegan cookbook, which does not require the use of dairy products or eggs, includes more than 200 recipes, many of which contain soyfoods. In the chapter titled "The Natural Foods Pantry" is a sub-chapter titled "Soy Foods," which gives brief introductions to tofu, tempeh, miso, soy milk, soy cheeses, soy yogurt, soy flour, and soy pulp or okara. There are also sub-chapters on sea vegetables, sprouts (including soy sprouts), organic foods, macrobiotics (which is "heavily emphasized in this book"), more natural foods ingredients (which, under soy sauce, discusses the differences between shoyu and tamari).

The number of recipes featuring various soyfoods are: Tofu (15), tempeh (5), miso (4), soymilk (1), shoyu (1), and okara (1; soysege).

The author, a specialist in consumer education, presently organizes culinary carnivals and natural foods tasting fairs. She has written extensively on natural foods and holds a Master's degree in Consumer Economics from the Univ. of Maryland. She is president of Judy Brown Enterprises, a public relations company for natural foods products. Address: 9 Dovetree Court, Indian Head, Maryland 20640.

Phone: 301-753-6548.

7320. Golbitz, Peter. 1989. Soyfood releases down 37% from 1987: 1988 new product count. *Soya Newsletter* (Bar Harbor, Maine). Jan/April. p. 3.

• **Summary:** According to Soya Newsletter's figures, only 137 new soyfood products were released in the USA in 1988, compared with 217 in 1987. 70 new products (51%) contained tofu as the main soyfood ingredient. Soy sauce was the next most popular ingredient, used in 24 new items or 18% of the total. A bar chart is shown comparing 9 product categories in 1988 and 1987.

According to similar figures gathered by the Soyfoods Center, 220 new products were released in the USA in 1988, compared with 418 in 1987, a 47% drop. Address: Soyatech, Bar Harbor, Maine.

7321. **Product Name:** Grand Life Sandwich (With Seitan). **Manufacturer's Name:** Grand Life Natural Foods.

Manufacturer's Address: P.O. Box 403, Pacific Grove, CA 93950 [c/o Sweet Earth, 207 16th St.]. Phone: 408-375-8673.

Date of Introduction: 1989. April.

Ingredients: Incl. whole wheat bread, seitan (Whole wheat flour, filtered water, natural tamari (soybeans, wheat, seasalt), kombu, ginger, garlic), sauce (pickles, Nasoyanaise, etc.).

How Stored: Refrigerated.

New Product-Documentation: Talk with Russel Hicks, owner of Sweet Earth Natural Foods in Pacific Grove. 1991. Nov. 26. This product was developed by Edmund Reininger and Russel, and introduced in the spring of 1989. The seitan is breaded in a felafel mix and pan-fried, then put between two slices of wholegrain bread with a special macrobiotic sauce containing pickles, Nasoyanaise, etc. It is distributed refrigerated in central and northern California by Sweet Earth.

7322. Kikkoman Foods. 1989. How to go lite on the salt (Ad). *New Choices for the Best Years* (New York, NY). April.

• **Summary:** This 2½ by 9½-inch, color photo ad shows a lady's index finger holding up a bottle of Kikkoman Lite Soy Sauce, which contains 40% less salt. "100% Kikkoman taste. But very light in salt. Far lighter than other brands. So now you can add the Kikkoman touch and still go Lite on the salt. Kikkoman Lite. In the oriental section of your favorite market."

7323. Mitoku Co. Ltd. 1989. Food is medicine: Mitoku macrobiotic (Ad). *East West*. April. p. 33.

• **Summary:** The top half of this full-page ad contains a large square red seal with four Chinese characters, read "*Ishoku Dogen*, which literally means 'medicine and food (have the) same source.' It is an old traditional saying in Japan, and its not only Oriental philosophy. In the 4th and 5th centuries

BC, a Greek physician spoke of letting food be our medicine. Hippocrates taught that the effects of occupation, climate and food, were where much of the cause of illness lay. Today, modern science and medicine have begun to agree with this ancient wisdom.”

“Mitoku Macrobiotic products are a selection of some of the highest quality foods in the world; Miso, Tamari and Shoyu, premium seaweeds,... mochi.”

USA wholesale distribution: Granum, Seattle, Washington 98105 (206) 525-0051. Spiral Foods Inc., Asheville, North Carolina 28814 (800) 633-2156. Address: CPO Box 780, Tokyo, Japan 100-91.

7324. Product Name: [Thai Spring Rolls {With Tofu}].

Foreign Name: Thaïlande Soynem.

Manufacturer's Name: Société Soy.

Manufacturer's Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

Date of Introduction: 1989. April.

Ingredients: Rice cakes, sunflowerseed oil. Filling: Tofu (water, soya* 20%), carrot, onion, black Chinese mushrooms, rice vermicelli, soy sauce. * = Organically grown.

Wt/Vol., Packaging, Price: 160 gm.

How Stored: Refrigerated.

New Product–Documentation: Form filled out for Anthony Marrese by Bernard Storup. 1989. Nov. The product was launched in April 1989.

Label. 1989. 3 by 5.35 inches. Red, green, black, orange, yellow, and blue on white. Illustration of a Thai-like wooden sailing vessel in front of a large sun and palm trees. “The soya epicure/gourmand.” *Nem* is the Vietnamese word for “Spring Roll.”

7325. Product Name: Garden Gourmet Vege-Patties.

Manufacturer's Name: Tivall.

Manufacturer's Address: Kibbutz Lochamei Hagetaot, Mobile Post, Ashrat (Oshrat), 25220 Israel.

Date of Introduction: 1989. April.

Ingredients: Rehydrated soy protein concentrate and wheat gluten, vegetable oil (soybean, cottonseed), egg whites, spices, salt, onion, garlic, tamari sauce, hydrolyzed vegetable protein, caramel color, guar gum (natural vegetable gum), natural flavoring, lecithin, vitamin A, thiamine (vitamin B-1), riboflavin (vitamin B-2), pyridoxine hydrochloride (vitamin B-6), vitamin B-12, nicotinamide, vitamin C, calcium pantothenate.

Wt/Vol., Packaging, Price: Retail: 10.6 oz package.

Foodservice: 2.65 oz.

How Stored: Frozen.

Nutrition: Per 1 patty (75 gm): Calories 170, protein 12 gm, fat 11 gm, carbohydrate 6 gm, cholesterol 0 mg, sodium 353 mg.

New Product–Documentation: Leaflet (6 by 8.25 inches,

color photos). 1989. April. Obtained at Natural Foods Expo, Anaheim. “Congratulations. You have just completed the first exercise to a healthier you. Food this good for you never tasted this good.” Shows 4 packages and 4 entrees served on plates. Soy is not mentioned. “We’d like you to try Garden Gourmet entrees, the tasty and healthy alternative to red meat. Each delicious dish is made from a unique blending of farm-fresh legumes, whole grains and a dash of natural herbs and spices.” Note: Vege-Cutlets, Vege-Links in Pastry, and Vege-Puffs are presently based on wheat flour and contain no soy.

Garden Gourmet brochure sent by Tivall, Israel. 1990. Sept. 4. Glossy insert. “Garden Gourmet Vege-Patties is an entrée that combines a rich, savory taste with the versatility of a hamburger. Marvelous alone or topped with sauce and/or cheese for international flavor.”

7326. Toriano, Peter. 1989. Japanese food firms cook up new strategies for U.S. consumers. *Economic World*. April. p. 22-26.

• **Summary:** “Riding the success of tasty, low-priced food products, the Japanese eye a bigger helping of the U.S. grocery mart.” Two of the most popular Japanese food products have been soy sauce, ramen noodles, and tofu. “Nissin sold more Cup O’Noodles in the United States last year than McDonald’s sold hamburgers nationally... Japanese food companies and food products are slipping under America’s door unnoticed... The Japanese start selling their food products in the U.S. to a small, very concentrated ethnic market... While Kikkoman can trace exports of soy sauce to the U.S. as far back as 1869, most Japanese food companies did not export to or manufacture products in the United States in significant quantities until the 1970s...”

“American food product companies focus on their competitors, whereas the Japanese tend to focus on what the customer wants...”

“Kikkoman, one of Japan’s largest food-related companies, is involved with wines and liquors, pharmaceuticals, health foods and a chain of restaurants. In addition to its other products, Kikkoman has introduced a shelf-stable tofu, instant miso soup and a rice wine for use in cooking.

“Kenzaburo Mogi, planning manager of Kikkoman’s foreign operations department, says tofu could become as big a market as soy sauce for Kikkoman in the U.S. in the years to come. In the U.S., Kikkoman also owns 80% share of JFC (Japan Food Corp.), a major distributor of oriental food products... Consumption of Kikkoman’s soy sauce has increased fivefold since 1972... On average, each Japanese consumes about 2.5 gallons of soy sauce every year; the average American consumes less than 10 oz...”

“Almost a quarter of Kikkoman’s total business now is outside Japan: two-thirds in the U.S. and most of the rest in Southeast Asia. The company also is targeting production in

Europe, Australia and China...

"Ajinomoto Co, Japan's largest food processor, has been selling abroad since 1909, when its first overseas office opened in New York... Until the 1960s, Ajinomoto's main product was MSG (monosodium glutamate). Today, it has a more diversified line-up, with about 41% of sales coming from processed foods, and 26% from seasonings... The predominant products the firm manufactures in the U.S. are amino acids for pharmaceutical use...

"Kibun Products International Inc., a subsidiary of Kibun Company Ltd. Japan, is a major manufacturer of surimi in the U.S... Kibun is a multi-billion-dollar, 50-year-old food products company with worldwide operations totalling \$2,000 million annually...

"Morinaga Nutritional Foods Inc., a subsidiary of Morinaga Milk Industry Co. Ltd., the Borden of Japan, is selling its tofu in air-tight containers that prolong freshness, eliminate water changes and is bacteria-free...

"This could be the food of the future, replacing dairy and meat as major sources of nutrition," says Kent Cooper, spokesman for Hakuhodo Advertising America Inc. in Los Angeles, which handles Morinaga's account...

"Faith Popcorn, chairman of BrainReserve Inc., a marketing consulting company to Fortune 500 companies says America is eating healthier and is more and more concerned with where food products originate and what that does to the Earth, known as the graining/greening of America. 'Vegetarianism is growing like crazy. Americans are changing from flesh food to health food.'"

7327. Product Name: Sloppy Joe Tempeh, and Tempeh Chili. Renamed Vegetarian Sloppy Joe, and Vegetarian Chili in about June 1990 (Both still made with Tempeh).

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.

Date of Introduction: 1989. April.

Ingredients: Soy rice tempeh (cultured soybeans, water, brown rice), tomato paste, textured vegetable protein (soy flour), green pepper, soy oil, dehydrated onion, soy sauce, water, honey, apple cider vinegar, molasses, spices, garlic powder, salt.

Wt/Vol., Packaging, Price: 15 oz cup. Changed to 10 oz cup. Retail for \$2.89 to \$3.19 each.

New Product–Documentation: Talk with Steve Demos. 1989. May 13. Sloppy Joe Tempeh, and Tempeh Chili were introduced in April 1989 in 15 oz. tubs. Talk with Lon Stromnes. 1989. May 15. Clarifies names. The White Wave booth, with all its new products and T-shirts, was the hit of the NFM show at Anaheim last April. Soya Newsletter. 1989. May/June. p. 8.

White Wave News. 1991. Vol. 4, No. 1. June. "White Wave debuts new Size Vegetarian Sloppy Joe and Vegetarian Chili." The new size is a 10 oz. reclosable plastic tub. The

products are made with diced White Wave Soy Rice Tempeh. Recommended retail price: \$1.69 to \$2.19.

Letter from Lon Stromnes. 1991. July 30. The new 10 oz package was launched in June 1991. White Wave color postcard. 1992. Aug. "Think fast. For no-meat heat & eat, we serve the All-American favorites. Vegetarian Sloppy Joe. Vegetarian Chili. All the sizzle... None of the steak." The product appears to be sold in a red plastic tub, like tofu.

7328. Product Name: Tempeh Barbecue.

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.

Date of Introduction: 1989. April.

Ingredients: Soy tempeh (cultured soybeans, water), tomato paste, soy oil, honey, soy sauce, water, molasses, concentrated lemon juice, onion powder, granulated garlic, spices, salt. Our soybeans are organically grown in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated or frozen.

New Product–Documentation: Talk with Steve Demos.

1989. May 13. These tempeh products were introduced in April 1989. Talk with Lon Stromnes. 1989. May 15. Clarifies names. The White Wave booth, with all its new products and T-shirts, was the hit of the NFM show at Anaheim last April. Label. 1989. April. Black, white, and yellow on red. "All the sizzle... None of the steak."

Soya Newsletter. 1989. May/June. p. 8.

7329. Wood, Rebecca. 1989. Quinoa the supergrain: Ancient food for today. New York, NY: Japan Publications Inc. Distributed by Kodansha International USA/Ltd. 202 p. April. Illust. Index. 26 cm. [51 ref]

• **Summary:** Quinoa (pronounced KEEN-wa; scientific name *Chenopodium quinoa* Willd.) originated in the *altiplano*, the high plains of the Andes in Peru and Bolivia. It was called the "mother grain" by the ancient Incas. The protein content of quinoa seeds ranges from 7.5% to 22.1%. The two men most responsible for creating a quinoa market in the USA are Stephen Gorad and Don McKinley of the Quinoa Corporation in Boulder, Colorado.

Note: *Webster's Dictionary* defines quinoa (derived from Spanish, via the Quechua *quinua*; the term was first used in 1625) as "a pigweed (*Chenopodium quinoa*) of the high Andes whose seeds are ground and widely used as food in Peru."

Chapter 8, "All about cooking quinoa," contains many recipes. A number of these use soyfoods, including natural soy sauce or tamari (p. 65): Star canapés with tofu-caper topping (p. 88-89). Noodle salad with fresh soy mayonnaise (with soymilk, p. 110). Tofu, quinoa, and dulse salad (p. 114-15). Sweet and sour quinoa tempeh (p. 129-30). Address:

Crestone, Colorado.

7330. Library of Congress, Subject Cataloging Div., Processing Services. 1989. Library of Congress subject headings. 12th edition. Washington, DC: Cataloging Distribution Service, Library of Congress. 3 volumes.

• **Summary:** This 12th edition (LCSH 12) contains approximately 173,000 headings established by the Library through Sept. 1988. The book was available on 3 May 1989. Approximately 10,000 headings were added since the 11th edition in 1988. Among these headings are 139,000 topical subject headings, 22,000 geographic subject headings, 10,000 personal names (incl. 9,000 family names), 2,600 corporate headings. This book should be used with the Subject Cataloging Manual (1989. 3rd ed.).

These subject headings have been accumulated by LC since 1898 and the first edition of LCSH was printed between 1909 and 1914. Subject headings are listed in boldface type. Approximately 40% of headings are followed by LC class numbers, which are added only when there is a close correspondence between the subject heading and the provisions of the LC classification schedules.

References show the relationship between terms: (1) The equivalence relationship: Use of UF (Use for) references. (2) The hierarchical relationship: Broader terms (BT) and narrower terms (NT). BT and NT function as reciprocals. A term appearing as a BT must be matched by the reversed relationship as an NT (e.g., Motor Vehicles. BT Vehicles. NT Trucks). (3) The associative relationship: Related terms (RT. Ornithology. RT Birds). May Subd Geog (MSG) = May subdivide geographically. Soy related subject headings, listed alphabetically, are:

Fermented soyfoods (MSG). BT Food, Fermented. Soyfoods. NT Fermented soymilk. Miso. Natto. Soy sauce. Tempeh.

7331. Westbrae Natural Foods. 1989. Distributor catalog: FOB West pricing. Spring 1989. P.O. Box 91-1181, Commerce, CA 90091. [6] + 19 p. 22 x 28 cm.

• **Summary:** Has a black on yellow cover. Address: Commerce, California. Phone: (213) 722-1692.

7332. Sugiyama, Shin-ichi. 1989. Re: Good-bye to friends. Returning to Japan. Letter to Dr. W.J. Wolf, Northern Utilization & Development Div., 1815 North University St., Peoria, Illinois 61604, June 14. 1 p. Typed, with signature on letterhead.

• **Summary:** “It is with deep regret that I must say good-bye to the many friends and business associates I have come to know in Wisconsin. I will be returning to Japan to assume a new assignment at the end of June.

“These past six years in Wisconsin have been truly an interesting and invaluable experience, and I will carry many happy memories back to Japan.” A business card is attached.

Dr. Michitaro Nagasawa will be Dr. Sugiyama’s successor. From 1972 to 1974 he was at the University of Wisconsin, Madison. Since 1987 he has been Director, Div.

of Research, Kikkoman Corporation, Japan. Address: PhD, Executive Vice President & General Manager, Kikkoman Foods, Inc., P.O. Box 69, Walworth, Wisconsin 53184. Phone: (414) 275-6181.

7333. McCarthy, Michael J. 1989. RJR Nabisco to see Chun King brand in \$52 million pact: Venture in Singapore to buy maker of Oriental food in deteriorating market. *Wall Street Journal*. June 22. p. B6.

• **Summary:** Kohlberg Kravis Roberts & Co. (KKR) acquired RJR Nabisco Inc. acquired earlier this year. The new owners wanted to reduce RJR’s overall debt by \$5.5 billion within the next year, and they were under government orders to do so, so as not to reduce competition in the product area.

It is not surprising that KKR decided to keep La Coy which is the leader in the canned Oriental-food market, with an estimated 54% share—according to a memorandum prepared by KKR for its lenders last December—compared with only 19% for Chun King. Address: Staff Reporter.

7334. Akwarius Almere. 1989. Akwarius prijs en bestelboek: Natuurvoedingsprodukten [Catalog and price list. April-June]. P.O. Box 50070, 1305 AL Almere, The Netherlands. 77 p. [Dut]

• **Summary:** Akwarius is a larger importer and distributor of natural food products. They have worked in this field since 1971, and have a strong interest in macrobiotic and anthroposophical foods. Contents (p. 2). Philosophy and function (p. 3). Beverages (p. 7): Sojamelk naturel and Bonsoy, Provamel Sojadrink (4 flavors in 500 ml and 4 flavors in 1 liter sizes), Provamel Soja dessert (puddings; 5 flavors in 125 gm and 1 flavor in 1050 gm).

Manna sweeteners (p. 12): Amasake drink in 350 and 700 gm sizes, and rice koji. Note that Akwarius imports and distributes large line of Manna-brand macrobiotic products from Muso in Japan. Manna vegetable protein products (p. 21): Dried tofu (non-organic). Bonsoy soymilk, Seitan, and three types of dried wheat gluten (fu). Manna Soy Sauces (Sojasausen, p. 21): shoyu (B = biological or organically grown, and NB = not biological, i.e. non-organic), and tamari (non-organic).

Witte Wonder (p. 22): Seitan, Tofu Spread (in paprika, garlic, celery, dill, mushroom, and pepper flavors, 220 gm sizes, all organic), Tofu in Sauces (peanut, curry-pineapple, and tomato flavors, 340 gm, organic), Tofunaise (plain and lemon flavors), Tofu Dressing (Italian, garden herbs, Mexican, and plain flavors).

Yakso (p. 23): Seitan, Tempeh Spreads (in Indonesian poesta and doeloe flavors), Temmo (round tempeh burger, deep fried then marinated, ¼ inch thick, sold 5 in a glass jar), Soyaroma (tempeh spread like butter), Sweet Indonesian-style soy sauce (Ketjap manis), Tofu Spreads (cream cheese consistency, in salsa, dill, green, shallot, and pommodore [apple?] flavors), Tofu Mayonnaise (Sojanaise), Smoked

tofu (paprika, mushroom, and celery flavors in 170 gm wide mouth glass jars).

Akwarius soybeans and soybean meal/flour (p. 27-28, 35, organic). Manna Pasta (p. 28): Soya macaroni. Manna black soybeans from Hokkaido (p. 35; 350 gm, non-organic). Manna Tekka Condiment (p. 44), Manna soynuts (*Sojanootjes*, p. 45, 3 flavors). Lima soyadrink (p. 47).

Manna Miso (Sojapasta; p. 48): Brown rice miso (organic and non-organic), young rice miso (non-organic), barley miso (organic and non-organic), natto miso (non-organic), soybean miso (non-organic), instant miso soup (with and without fish, non-organic), instant miso soup with tofu. Manna sea vegetables (p. 49).

Note: This is the earliest Dutch-language document seen that mentions soynuts, which it calls *Sojanootjes*. Address: Almere, Netherlands. Phone: 03240-20800.

7335. Matsuura, M.; Obata, A.; Fukushima, D. 1989. Objectionable flavor of soy milk developed during the soaking of soybeans and its control. *J. of Food Science* 54(3):602-05. May/June. [23 ref]

• **Summary:** Beta-glucosidases, enzymes in soybeans, were found to be responsible for the production of daidzein and genistein from the isoflavone glucosides, daidzine and genistin, respectively, during the process of making soymilk. Address: Research & Development Div. of Kikkoman Corp., 399 Noda, Noda City, Chiba prefecture 278, Japan.

7336. Welters, Sjon. 1989. Soyfoods in Europe: Influenced by a colonial past. *Soya Newsletter (Bar Harbor, Maine)*. May/June. p. 1, 12-15. [1 ref]

• **Summary:** This is a historical overview of the introduction of soyfoods to Europe since 1945. The Indonesians who immigrated to the Netherlands after World War II played a major role in introducing soyfoods (especially tofu, tempeh, and a sweet soy sauce called ketjap) to that country and to Europe. Ketjap was the most popular soyfood in Indonesia. Asian immigrants started small manufacturing companies, restaurants, and importing companies (such as Conimex and Heuschen Schrouff). The macrobiotic movement also played a key role in introducing soyfoods, especially soy sauce, miso, and tofu. In Belgium, the Gevaert family founded Lima and began to make miso on a large scale, but a fire and other financial problems soon forced them to close the plant. Only recently have they started to make miso again.

During the 1970s, especially in Belgium and the Netherlands, inspired by the macrobiotic movement and with information from books by Shurtleff and Aoyagi, a new generation of non-Asian tofu makers emerged. "The first tofu shop in Europe owned and operated by non-Orientals was Manna Natuurvoeding. Opened in Amsterdam in 1977, Manna was a macrobiotic manufacturer, distributor, and retailer run by a non-profit foundation. Soon after opening, Manna was visited by entrepreneurs from Germany, England,

Portugal, Denmark, France, Sweden, Austria, and Italy, hoping to learn about making tofu."

During the early 1980s, tempeh was rediscovered. "Yakso Farms in the Netherlands was one of the first non-Oriental companies to produce tempeh, made from organic soybeans, and to process it into spreads, paté, sauces, and marinated products."

In the mid-1980s the focus shifted from production to marketing and to second-generation soyfoods. Most European soyfoods are made with organic soybeans. Address: President, Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 617-264-9511.

7337. **Product Name:** Meatless Healthy Franks (Tofu Hot Dogs).

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301. Phone: 303-443-3470.

Date of Introduction: 1989. June.

Ingredients: Organic tofu (water, organic soybeans, calcium sulfate and nigari [magnesium chloride]), soy oil, wheat gluten, egg white, tapioca starch, wheat germ, soy sauce (water, soybeans, whole wheat, salt), dried yeast, natural liquid hickory smoke, garlic powder, spices, natural flavor, beet powder, oleoresin paprika for color.

Wt/Vol., Packaging, Price: 12 oz package, 12 per case, retails for about \$3.09 (7/89).

How Stored: Refrigerated, 60 day shelf life.

New Product–Documentation: Talk with Steve Demos. 1989. May 13. This product will be officially launched in June, but they have been in interstate sales to protect their trademark. The use of the word "franks" was approved in writing by the FDA. They have enormous advanced sales, and they have done a lot of test marketing and sold a little to health food stores. Leaflet. 1989. April. "Introducing: Meatless Healthy Franks." Shows label. Both retail and food-service packs are available. Shelf life is 60 days at 38-40°F.

White Wave News. 1990. 3(3):1. June. "Healthy Frank meets nefarious Mr. Puppette." A humorous portrayal of the product and its competition. Healthy Franks are packaged in state-of-the-art six color packaging. "Special Note: White Wave will not use Carmine, a coloring agent used to achieve a heat-stable red hot dog. Carmine appears on labels as 'Natural Color' and is made from cochineal (a small red insect similar to a mealybug). Don't be misled by the red. Challenge any suppliers of heat-stable-red hot dogs about their coloring."

Talk with Lon Stromnes. 1993. April 14. This product is coming out in an improved formulation with much better texture.

7338. Perez Baez, Oswaldo. 1989. Re: New developments with soyfoods in Venezuela. Letter to William Shurtleff at

Soyfoods Center, July 10. 3 p. Typed, with signature on letterhead. [Eng]

• **Summary:** “In my last visit to Caracas I contacted: Prof. Makie Kodaira and Prof. Amaury Martinez of the ‘Instituto de Ciencia y Tecnología de Alimentos, Facultad de Ciencias, U.C.V.’ (Universidad Central de Venezuela) who are very interested in offering a theoretical and practical course about soyfoods, using their pilot plant (the second of importance in Venezuela). Prof. Kodaira studied in Hiroshima, Japan in 1977 and she is a specialist on seafoods. They would like the ‘Centro de Alimentos de soya de Venezuela’ to organize this course.

“I think this is the time to offer in Venezuela a complete course about soyfoods and I have thought to invite you to come to Venezuela. I am thinking about 2 courses:

“(a) One oriented to Institutional level (Instituto Nacional de Nutrición, Fundación Polar, CIEPE, Universidades, Industry, etc.) for professional people. This course could be in Caracas, Instituto de Ciencia y Tecnología de Alimentos, U.C.V.

“(b) Another one oriented to the general public (not necessarily professional level). This course could be here in La Azulita which is a rural and beautiful place, epicenter of the Venezuelan movement for alternative lifestyles.

“I have thought of the following content for these courses: (1) Soymilk. (2) Tofu. (3) Tofu and soy milk ice cream. (4) Miso. (5) Tempeh. (6) Shoyu.

“I am working on a book about soyfoods, and am enclosing an outline of the contents: I. Introduction. II. Agronomic aspects. III. Soya and food security. IV. The most important soyfoods. V. Industrial potential of the soybean. VI. Bibliography. VII. Index.” Address: Ing., Centro de Alimentos de Soya de Venezuela, Granja Tierra Nueva, Aldea San Luis, La Azulita, Estado Merida, C.P. 5102, Venezuela.

7339. Hymowitz, Ted. 1989. Discovery of a 1771 reference to soybeans from Philadelphia (Interview). *SoyaScan Notes*. July 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ted has just found a 1771 citation by Charles Thomson, one of the secretaries of the American Philosophical Society in Philadelphia. It reads: “Such of the plants of *China* as have been introduced here, seem to agree with our soil and climate, and to thrive in a degree equal to our warmest expectations; witness the Rice, the Whisk [broomcorn = sorghum] and the *Chinese Vetch*.”

In 1804 Mease wrote almost the same thing: “[The Soy-bean bears the climate of Pennsylvania very well. The bean ought therefore to be cultivated.]” But later historians have again and again mistakenly taken the term “soy,” which actually referred to soy sauce, to mean soybeans, and have also confused Chinese vetches and soybeans. A 1937 article by Conklin states, “Other samples of useful knowledge were promoted by the Society before 1800 were the surveys for

the Delaware Chesapeake Canal and the Susquehanna River, the promotion of the culture of silkworms and the production of silk, the propagation of Chinese vetches and soy beans.” Another states: “The American Philosophical Society promoted the growth of rice, whisk [broomcorn = sorghum], Chinese vetches, and soybeans.” A book titled *Philadelphia and the China Trade* (1978), which is based on the 1937 article, states, “By 1800 the American Philosophical Society was involved in the propagation of Chinese vetches and soybeans.

Samuel Bowen calls soybeans Chinese vetches, but Benjamin Franklin never calls them vetches; he calls them peas or caravances. Note that the 1771 article calls them “the Chinese vetch,” showing the link to Samuel Bowen. Mease was born in 1771, and in 1804, at age 23 year, he was the secretary of the society. Bowen sent soybeans to the Society in 1769 (see Hymowitz, T.; Harlan, J.R. 1983. “Introduction of soybean to North America by Samuel Bowen in 1765.” *Economic Botany*. Dec. p. 371-79).

Then the soybeans from Bowen were given to 8 local farmers. Ted has done extensive research on each of these farmers in APS records for years afterward, but he can find no evidence that any of them ever grew those soybeans—although at least one of them probably did. He still wonders: Who grew them out? What were the results?

Ted hopes to publish the article in the *Georgia Historical Quarterly*, rather than in *Economic Botany*. The earlier article in *Economic Botany* (Dec. 1983) just gave the skeleton of the story; this one will give the full details. A tentative title is “The arrival of Samuel Bowen in Georgia in 1764 and his Chinese vetches.” The Georgia publication will allow more of a detailed, historical treatment, with more references. But they require footnotes, which are difficult to deal with. Address: Prof. of Plant Genetics, Urbana, Illinois.

7340. Welters, Sjon. 1989. Re: Brief history of Manna Natural Foods. Letter to William Shurtleff at Soyfoods Center, July 24. 1 p. With follow-up talk on 2 Dec. 1989.

• **Summary:** This company was founded in about 1973 by Adelbert Nelissen and his wife Wieke Nelissen, plus Hugo van Seenus, among others. Adelbert is Sjon’s brother in law (his wife’s brother). Manna got started in the Rozenstraat in Amsterdam, in an abandoned house that was taken over by so-called “krakers” (counter-culture or hippie squatters). The store called “de Rozemaryn” (Rosemarin) was the first of a chain of stores which, at its peak, contained ten stores total. Hugo now owns and operates Hugo’s Market in Washington, DC.

Manna was originally a foundation named Stichting Natuurvoeding Amsterdam. It kept this name until 1982. Manna started the first tofu shop in Europe that was owned and operated by non-Orientals. Opened in Amsterdam in 1977, Manna was a macrobiotic manufacturer, distributor, and retailer run by a non-profit foundation. Soon after

opening, Manna was visited by entrepreneurs from Germany, England, Portugal, Denmark, France, Sweden, Austria, and Italy, hoping to learn about making tofu.

In 1975 Manna started importing miso and shoyu from Japan, initially via Muso Foods, and later also via Mitoku. But Muso was always their main supplier.

Manna filed for Chapter 11 bankruptcy or reorganization 2 or 3 times. The first time was a bankruptcy in March 1982. All their property was sold at an auction, but was bought back by a new foundation owned by basically the same people and the same foundation at one-third the value. It was probably at this time that Manna's name was changed from Stichting Natuurvoeding Amsterdam to Manna Natuurvoeding B.V. The company was back on its feet by 1983 but then things didn't work out again. At the last moment before declaring bankruptcy, they got financing. But this time the bank took the Foundation out of the picture, so that the foundation was not giving the collateral for loans. The person behind the foundation, Adelbert Nelissen, became the director/president of the holding company. He probably did not have majority ownership. But at this time (May 1983) Sjon and most of the management left.

In about late 1983 or early 1984 Manna moved all operations from Meeuwenlaan in Amsterdam to Zwanenburg. The former section of Amsterdam was torn down by the city. The third time was in 1987, when the company was disbanded. At that time Adelbert became inactive. The government-appointed curator tried to get as much as possible for the assets. The macrobiotic Manna brand name and the inventory of imported Japanese foods was purchased by Akwarius, which was located in Almere in a building constructed along anthroposophic guidelines (before about 1986 they had been located in the province of Utrecht). The production facility at Zwanenburg and its equipment was purchased (mainly for the bakery) by a conglomerate of 3 natural food companies, including Akwarius and Loverendale (the largest baker of natural yeasted breads in the Netherlands). They made Manna tofu for a year or two, then facing stiff competition, sold off the tofu equipment piecemeal. They ran the Manna sourdough bakery there until 1988, then moved it to Loverendale headquarters, and closed down the Zwanenburg production facility.

Akwarius is a company based on the anthroposophical philosophy of Rudolf Steiner. They were founded in about 1974. In Holland there were 4 types or philosophies of natural foods distributors: (1) Anthroposophical (Akwarius); (2) Macrobiotic and natural foods (Manna); (3) Ecological (Kleine Aarde [Small Earth; inspired by E.F. Schumacher's book *Small is Beautiful*] and De Nieuwe Lelie [The New Lily]); and (4) Reform movement/vegetarian (VNR: Vereniging van Nederlandse Reformhuizen = Union of Dutch Reform Houses, and Scholten [which was also the exclusive importer of Lima products from Belgium]).

Talk with Sjon Welters. 1994. April 4. Manna and Lima sold only vegetarian foods; they did not sell any fish, poultry, or meat. All these early Dutch natural foods companies were this way because no natural food store would sell fish or other flesh products; they were just not acceptable. Some years after they started they used eggs in a few products but they were always vegetarian. The only people who ever got involved in flesh foods in the early stages were the Anthroposophic / Biodynamic people because its part of their philosophy, but even in the beginning they didn't sell meat to the stores because customers didn't want it. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

7341. Business Trend Analysts, Inc. 1989. The health and natural food market: A product-by-product marketing analysis and competitor profile. 2171 Jericho Turnpike #342, Commack, NY 11725. 280 p. Price \$950.00. *

• **Summary:** Section 6 of this report is titled "The Market for Soyfoods" (24 pages). It projects 6.2% growth for the soyfoods industry, and contains the following (much of it provided by Soyatech, Inc. and Soyfoods Center): Analysis and summary. Manufacturers' sales of soyfoods. Manufacturers' sales of soyfoods to major outlets. Manufacturers' sales of soyfoods, by type of outlet. The top six soymilk producers in the U.S. U.S. per capita consumption of soymilk. Retail sales of soyfoods. Retail sales of soyfoods at major outlets. Retail sales of soyfoods, by type of outlet. Graph: Product mix of U.S. soyfood sales. Estimated mix of distribution channels used to market various soyfoods. U.S. soybean production. Characteristics of women's use of soy sauce. Quick Tamari tips. Selected 1988/89 new product introductions: Soyfoods.

Under "Report Highlights and Special Features" we read: "Soyfoods continue to gain popularity with mainstream consumers, as sales are expected to top the \$380 million mark, at the wholesale level, by year-end. At the retail level, sales of tofu alone are currently pegged at \$77 million, with supermarkets capturing close to 60% of dollar volume."

Overall report Contents: 1. Executive summary. 2. The overall market for health and natural foods (including Soyfoods 1979-1988, with forecast to 1998). 3. The market for health and natural dairy foods. 4. The market for health and natural grocery products. 5. The market for health and natural snack food products. 6. The market for soyfoods. 7. The market for health and natural grains and cereals. 8. The market for health and natural frozen foods. 9. The market for herbal products. 10. Distribution channels. 11. Factors affecting demand. 12. Trends in organic farming. 13. Competitor profiles: Alta-Dena Certified Dairy, Arrowhead Mills, Barbara's Bakery, Celestial Seasonings, Golden Temple, San-J International, Thompson Kitchens. Tivall U.S.A./Garden Gourmet, U.S. Mills (partial list). 14. Directory of more than 200 health and natural food

producers. Address: Commack, New York. Phone: 516-462-2410.

7342. Product Name: Wizard's Stir Krazy Vegetarian Worcestershire Sauce.

Manufacturer's Name: Edward & Sons Trading Co., Inc. (Distributor).

Manufacturer's Address: 1115 Lousons Rd., P.O. Box 3150, Union, NJ 07083. Made in Hillsborough, North Carolina Phone: 201-964-8176.

Date of Introduction: 1989. July.

Ingredients: Incl. Apple cider vinegar, tamari soy sauce, deep well water, Barbados molasses, miso, honey, fresh ginger puree, salt, tamarind, cayenne pepper mash, garlic juice, honey, herbs and spices, sea salt, hickory smoke, natural seaweed extract.

Wt/Vol., Packaging, Price: 5 oz shaker bottle. Retail for \$2.29 (12/89).

How Stored: Shelf stable.

New Product–Documentation: Spot in *Vegetarian Times*. 1989. "The VT shopper: We asked for it..." July. p. 69. "...and we got it. When 'The Wizard' (a.k.a. John Troy) read in VT that there is no such thing as vegetarian worcestershire sauce (all commercial brands now contain anchovies), he fired up his cauldron and—voilà!—he invented one. The Wizard's Stir Krazy sauce is full of spicy, authentic, worcestershire flavor. Thanks, Wiz. Distributed by Edward & Sons Trading Co. In natural food stores." A small photo shows a bottle of the new sauce.

Note 1. This is the 2nd earliest known vegetarian worcestershire sauce made in the USA; see Bonneau 1972.

Note 2. Wizard Baldour makes this sauce in Hillsborough, North Carolina.

Soya Newsletter. 1989. Sept/Dec. p. 11.

News release from Edward & Sons Trading Co. 1989. Nov. "Stir-Krazy named 'Best New Sauce of 1989.'"

Vegetarian Times likes this sauce "so much that they have featured it in their 'Best of 1989' awards. This is the first time the magazine has recognized new products in this way." The 5 oz shaker bottle, which "retails for \$2.29, is the perfect 'fixin' for tofu, teriyaki, and wok dishes..."

Talk with John Troy of North Carolina. 2012. March 7. The basic ingredients in John's sauce worcestershire (probably not in the exact order) were vinegar, tamari soy sauce, lemon juice concentrate (purchased frozen), filtered water, miso, honey, garlic, and ginger, spices, xanthan gum, citrus extracts (orange oil, lemon oil), spice extract (rosemary extract, used as a stabilizer—not for its flavor). It was not organic. Lea & Perrins' Worcestershire Sauce is quite similar to Japanese Ponzu sauce, which is made by simmering rice vinegar, mirin, katsuobushi flakes, and konbu seaweed. The liquid is then cooled, strained to remove the katsuobushi flakes, and finally the juice of one or more of the following citrus fruits is added: yuzu, sudachi, daidai,

kabosu, or lemon. *Ponzu-joyu* is based on equal parts soy sauce (shoyu) and lemon, lime, or yuzu juice. The Japanese use bonito flakes (*katsuobushi*) instead of anchovies, and sometimes yuzu (a citrus fruit) instead of lemon juice.

7343. Product Name: [Tofu Burger with Sea Vegetables].

Foreign Name: Galette de Tofou aux Algues Marines.

Manufacturer's Name: Ferme de Jas.

Manufacturer's Address: Eourres, 26560 Séderon, France. Phone: 92.65.10.95.

Date of Introduction: 1989. July.

Ingredients: Tofu, rice, sea vegetables, shoyu, sunflowerseed oil, spices, salt, flour.

Wt/Vol., Packaging, Price: 90 gm vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Letter and Labels from Anthony Marrese. 1989. June 7. This product was introduced in July 1989. Label. 2.75 inches diameter. Paper. Black on blue. Illustration of a sun rising over a farm, and 3 soybean leaves. "Préparation alimentaire à base de soja. Nature et Progres logo. 50% tofu and 40% rice." Organically grown (Produits de culture biologique).

7344. Product Name: Grilled Tofu in Peanut Sauce, or Grilled Tofu in Black Bean Sauce.

Manufacturer's Name: Jaclyn's Food Products, Inc.

Manufacturer's Address: P.O. Box 1314, Cherry Hill, NJ. Phone: 609-983-2560.

Date of Introduction: 1989. July.

Ingredients: Peanut Sauce: Organically grown brown rice, tofu (organically grown soybeans, purified water, nigari, calcium sulfate), peanuts, green beans, carrots, corn, onions, peanut oil (non-hydrogenated), tamari, garlic, rice syrup, sea salt, sesame seed oil (lightly roasted), natural herbs and spices. Ingredients for the second recipe are identical except that Black Beans are used in place of peanuts.

Wt/Vol., Packaging, Price: 10.75 oz box, 6 per case.

Retail for about \$3.09–\$3.66 each.

How Stored: Frozen.

Nutrition: Per 10.75 oz. serving: Calories 270, protein 19 gm, carbohydrate 44 gm, fat 9 gm, cholesterol 0 mg, sodium 145 mg.

New Product–Documentation: Leaflet. 1989. April.

"Jaclyn's microwaveable frozen dinners." Shows both packages and lists all ingredients. "Jaclyn's Food Products, Inc. was begun about one year ago [4/88?] to develop and market natural foods products for health and natural foods stores. They are sold exclusively through health food distributors.

Soya Newsletter. 1989. May/June. p. 8. Contact Robert Savar. Microwaveable. Tardosky. 1989. Whole Foods. Nov. p. 50. They are natural TV dinners. Both come with a side order of organic brown rice and a vegetable medley. The dinners were developed by a five star chef says company

president Robert Savar.

Label. 1989. 7.5 by 6 by 1.25 inch deep paperboard box. Brown, black, light blue and dark blue on pinkish tan. Front panel has a color photo of the meal. "All natural. Cholesterol free. Dairy free. High fiber. Reduced calories. Reduced sodium. Heat and serve in your oven or microwave." Soyfoods Center product evaluation. 1990. Feb. 12-13. Both entrees contain frozen tofu with a chewy texture. The black bean sauce is nice. The peanut sauce could be much better.

7345. Karta, Susani K. 1989. Traditional Chinese soyfood. In: T.H. Applewhite, ed. 1989. Proceedings of the World Congress on Vegetable Protein Utilization in Human Foods and Animal Feedstuffs. Champaign, IL: American Oil Chemists' Society. xii + 575 p. See p. 382-87. [18 ref]

• **Summary:** Contents: Abstract. Introduction. Variables in manufacturing tofu: Soybean variable, processing variable, maceration and extraction (soaking and grinding) stages, filtration and heating stages, coagulation stages, types and concentration of coagulants used in tofu manufacturing. Tofu products.

Tables: (1) Chinese nonfermented soy food products. Five columns show: Food items, Chinese names, organisms used, description, uses. The soy foods are: Fresh green soybeans (*mao-tou*). Toasted soy powder (*tou-fen*). Soy sprouts (*huang-tou-ya*). Soy milk (*tou-chiang*). Soy milk film / yuba (*tou-fu-pi*). Soybean curd (*tou-fu*).

(2) Chinese fermented soy food products. Five columns (same as table 1) The soy foods are: Fermented whole soybeans (*tou-shih*). Soy sauce (*chiang-yu*). Soy paste (*chiang*). Fermented tofu (*so-fu* [*sic*]). Actinomucor or Mucor molds are used. Description: Creamy cheese, mild flavor, salty. Uses: Relish, also cooked with meat or vegetable.

(3) 1987 consumption of soybeans as foods in Asian countries. The results are presented here in descending order of per capita consumption: Per capita soybean consumption, country (population), total soybean consumption in 1,000 tonnes. 13.3 kg/capita, Taiwan (19.6 million), 260,000 tonnes. 9.3 kg/capita, Japan (122.2 million), 1,141,000 tonnes. 9.0 kg/capita, Indonesia (175 million), 1,575,000 tonnes. 7.8 kg/capita, South Korea (42.1 million), 330,000 tonnes. 7.7 kg/capita, Singapore (2.6 million), 20,000 tonnes. 6.9 kg/capita, China (1,062 million), 7,325,000 tonnes. 3.4 kg/capita, Malaysia (55 million), 55,000 tonnes. 2.2 kg/capita, Thailand (53.6 million), 118,000 tonnes. 0.3 kg/capita, Philippines (61.5 million), 18,000 tonnes.

(4) Nutritional composition of traditional nonfermented foods: Fresh green soybeans, toasted soy powder, soy sprouts—raw, soy milk, soy milk film / yuba, tofu (Source: *Food Composition Table for Use in East Asia*, 1978). (5) Nutritional composition of traditional fermented foods: Fermented soybeans [*tou-shih*], soy sauce, soy paste [*doujiang*], fermented tofu (Source *Food Composition Table*

for Use in East Asia, 1978).

In China, fried tofu is called Tou-Pok. Address: American Soybean Assoc., 541 Orchard Rd., #11-03 Liat Towers, Singapore 0923, Republic of Singapore.

7346. Kim, Seung Ho; Kwon, Tai-Wan. 1989. Vegetable protein foods in Korea. In: T.H. Applewhite, ed. 1989. Proceedings of the World Congress on Vegetable Protein Utilization in Human Foods and Animal Feedstuffs. Champaign, IL: American Oil Chemists' Society. xii + 575 p. See p. 439-42.

• **Summary:** Contents: Abstract. Introduction. Situation of traditional protein foods. Situation of vegetable proteins. Traditional protein foods in Korea: Soy sauce (*kan jang*), hot soy paste (*ko chu jang*), *chung kuk jang* (a kind of soy paste made by mixing natto [*naap doo*] with seasonings [salt, red pepper, and garlic], and grinding then aging the mixture), soybean sprouts (*kong na mool*).

Note: This is the earliest English-language document seen (March 2009) that uses the term "ko chu jang" to refer to Korean-style red pepper and soybean paste (miso).

Note 2. This is the earliest English-language document seen (Jan. 2012) that uses the term "chung kuk jang" to refer to Korean-style natto.

Tables: (1) Domestic Korean production and import of soybeans from 1982 to 1987. Domestic production rose to 250,000 tonnes from 233,000 tonnes. Imports for food uses rose to 144,000 tonnes from 104,000 tonnes. Imports for feed uses rose to 936,000 tonnes from 479,000 tonnes. Total supply rose to 1,330 tonnes from 816 tonnes, up 63% in 5 years.

(2) Consumption of soybeans in traditional Korean foods, in 1,000 metric tons, from 1982 to 1987 (1982/1987). Figures in parentheses are for home production. Soy sauce (*kan jang*) 69(50)/70(51). Soy paste (*doen jang* [Korean soybean miso]) 51(41)/50(40). Hot soy paste (*ko chu jang*) 5(4)/5(4). Soybean curd (*doo bu*) 60/114. Soy milk (*doo yoo*) 7/14. Others: Homemade soybean curd and soy milk, *chung kuk jang*, *choon jang* (kinds of soy paste), soybean sprouts (*kong na mool*), and whole soybeans 145/141. Total 337/394, or an increase of 19.9% in 5 years.

Note: This is the earliest English-language document seen (March 2009) that uses the term "choon jang" to refer to Korean-style soybean paste (miso).

(3) Domestic production and import of soybeans in Korea (Estimated for 1987, in metric tons): Soy protein—Textured vegetable protein (domestically made) 4,500. Soy protein isolate (import) 1,800. Soy protein concentrate (import) 150. Wheat protein—Textured vegetable protein (domestic) 900. Vital gluten (domestic) 150. Gluten (wet & dry) (import) 409. Total 7,909.

(4) Nutritional composition of soybeans and soybeans sprouts (per 100 gm).

Figures show: (1) Manufacturing method for rice hot soy

paste (*ko chu jang*) (flow sheet). Numbers represent typical ratio of ingredients in volume. (2) Manufacturing method for chunk kuk jang (a type of soy paste) (flow sheet). Numbers represent typical ratio of ingredients in volume.

A photo shows one of the authors. Address: Korea Food Research Inst., P.O. Box 131, Chongryang, Seoul, South Korea.

7347. **Product Name:** [Taifun Hijiki Tofu].

Foreign Name: Taifun Hijiki-Tofu.

Manufacturer's Name: Life Food.

Manufacturer's Address: Robert-Bunsen-Strasse 6, D-7800 Freiburg, West Germany. Phone: 0761/50 61 55.

Date of Introduction: 1989. July.

Ingredients: Tofu (organic), hijiki sea vegetable. Marinade: Natural soy sauce, shiitake mushrooms, kombu, ginger, coriander, and smoke (from birch and juniper).

Wt/Vol., Packaging, Price: 200 gm vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Anthony Marrese. 1990. March 22. 3 by 2.25 inches. Green, black, yellow, and red on white. Refrigerate at 2-7°C. The now make 10 kg/week.

7348. Natufood B.V. 1989. Prijs-bestelboek [Natufood price list and catalog, July–Sept. 1989]. Fahrenheitstraat 18, 3840 BN Harderwijk, Netherlands. 73+ p. [Dut]

• **Summary:** This catalog of a Dutch natural foods distributor lists the farming method (organic or not), wholesale and retail prices for each product: Page 8: Witte Wonder tofu spreads (mushroom, chili, green peppercorn, garlic, paprika, celery), Lima Limapast contains sunflower seeds, miso, and soy flour. Page 30. Joannusmolen roasted soy flour. Page 31. Natufood defatted soy flour (sifted). Ad for the Vetara line of ready-to-eat foods, many of which contain TVP. Page 33. Avita soybeans (Avita Natufood's organic food line). Natufood soybeans. Ad from Nutricia for canned powdered infant foods. Nutri-Soja complete infant food based on soy. Nutri-Soja Plus based on soy for infants that have been weaned. Page 34. Nutricia infant formulas: Nutrisoja in 400 gm or 1000 gm and Nutrisoja-Plus in 900 gm. Page 35. Avita little soybeans (regular and large, organic).

Page 36. Witte Wonder soybeans in tomato sauce. Ad for Vetara organic tofu, which is produced by Heuschen-Schrouff B.V. in a completely new facility under extremely sanitary conditions. It is made with organic soybeans with a natural coagulant (Serempi) in the traditional way. "Best quality, lowest price." The product label (250 gm) is shown. Page 37. Refrigerated miso products made in Europe. Lima barley miso and rice miso, both unpasteurized. Page 38. Meat replacers. Seitan is sold by Vetara, Witte Wonder, Yakso, and Manna. Vetara herb tofu, Napolitan tofu, rice tofu, bali tofu, rames tofu, rames tempeh, Tjap Tjoy. Witte Wonder tofu in curry/pineapple sauce, and in peanut

sauce. Ad for Vetara vegetarian burgers, frankfurters, and schnitzels.

Page 39. Soya meat replacers and vegetarian mixes: Lists 11 Vetara products based on or containing TVP (textured soy flour) or HVP (hydrolyzed vegetable protein). Nutana meat replacers (9 products). Jonathan natural tofu. Cenovis and Huegli bouillon tablets (14 types, probably contain miso). [Sjon Welters adds that Huegli, a multi-million dollar Swiss food company, owns a major part of Natufood B.V.]. Western bouillons (Miso): Lima barley and rice misos. Heiwa Hatcho miso and instant miso soup. Huegli ad.

Page 42. Vegetarian refrigerated products: Vetara smoked tofu, natural tofu (EKO mark), saté tofu, vetaburgers with pineapple, with cheese & onion, natuburgers. Soyadrinks and desserts: Provamel (8 drinks and 6 desserts [puddings]). Lima (3 drinks).

Page 43. Seasonings: Vetara sweet soy sauce (Ketjap zoet). Yakso sweet soy sauce (Ketjap manis). Soy sauce. Lima shoyu (orange label) and tamari (blue label). Heiwa shoyu and tamari. Vetara shoyu. Page 44. Witte Wonder organic tofu dressings (Italian, Mexican, Garden herbs, or Natural). Mayonnaise and Tofunaise: Witte Wonder organic tofunaise (regular or with lemon).

Page 52. A. Vogel products: Vogel Sojaforce. Page 67. Natufood non-organic soynuts (natural, paprika, curry, or onion). A photo of the soynuts is given at the bottom of the page. Page 69. Non-organic soynuts in bulk (same 4 flavors as page 67). Page 73. Bulk defatted soy four, and soybeans (organic or non-organic). Ad for Vetara Vegetable Bouillon, which probably contains soy. Address: Harderwijk, Netherlands. Phone: 03410-23240.

7349. **Product Name:** [Vetara Sweet Soy Sauce].

Foreign Name: Vetara Ketjap Zoet.

Manufacturer's Name: Natufood B.V.

Manufacturer's Address: Fahrenheitstraat 18, 3840 BN Harderwijk, Netherlands.

Date of Introduction: 1989. July.

Ingredients: Organic.

Wt/Vol., Packaging, Price: 330 ml bottle.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Natufood Catalog. 1989. July/Sept. p. 43.

7350. **Product Name:** Tofu Life Naturally Smoked Tofu. Renamed Original in about 1994.

Manufacturer's Name: North Coast Finest Inc. Renamed North Coast Distributors in July 1993.

Manufacturer's Address: Soquel, California.

Date of Introduction: 1989. July.

Ingredients: Organic tofu, shoyu (a soy sauce), fresh ginger, garlic, herbs and spices.

Wt/Vol., Packaging, Price: Vacuum packed. Retail for

\$1.66 for 0.30 lb (5/92 Lafayette, California).

How Stored: Refrigerated.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1992. May 1. 2.5 by 1.5 inches. Blue letters on white. Self adhesive. “Naturally smoked. No artificial ingredients, no colorings, no liquid smoke flavoring.” Packed on April 30. Sell by June 9. Tried to phone company on 4 May 1992 but two phone numbers were no longer in service: 408-462-1634, and 408-763-1441.

Talk with Hanan Onn. 1992. Dec. 10. His company started making smoked tofu in Soquel in about July 1989. He purchased his tofu from Buddy Hamel of Clearway. In Oct. 1991 he moved the company to 381-P Pine St. in Watsonville, California. Then in June 1992 he moved to his present location at 2655 Cloverdale, Concord, California. Phone: 510-798-4393 or 510-944-0599. His name is Israeli and he belongs to a Kibbutz in Israel. The Kibbutz, which now makes fruit juices, is looking to diversify into new food products and may consider soyfoods.

Call from Onn. 1993. April 13. He is planning to relocate his business making smoked tofu in Benicia.

Call from Onn. 1994. July 14. About a year ago he changed the company name to North Coast Distributors. He is now located at 1717 Solano Way, Concord, CA 94520. Phone: 510-798-4393. He is disappointed that Buddy Hamel of Clearway started making smoked tofu like his last year. He started making his own tofu 1 month ago. He hopes to introduce a new Tofu Pâté soon.

Product with Label purchased at Diablo Foods in Lafayette, California. 1997. May 28. New label: 3.5 x 5 inches. Red, brown, green, and black on white. One illustration on the front panel shows a cornucopia at the base of a vertical sheaf of grain. Another shows three soybean leaves and two pods. The border is bamboo. “No artificial ingredients. The gourmet alternative for meat and cheese. Firm.” 6 oz vacuum pack retails for \$2.99. Label copyright by NCD 1995. Chof-K kosher pending. Note: The company is now located in Benicia but the label says Concord.

Product with new label, leaflet, and sandwich brought to Soyfoods Center by Hanan Onn. 2006. Feb. 14. Ingredients: Organically grown soybeans, water, natural calcium sulfate (natural hardening agent), shoyu (water, wheat, soybeans, salt), fresh ginger, garlic, lemon juice, herbs and spices. Contains 15-18 gm of protein per 100 gm of tofu. 50-55 days shelf life unopened and refrigerated. Soyfoods Center taste test: Flavor, texture, aroma: All 10. Among the smoked tofu types, the best sellers are: (1) Original. (2) Lemon-Garlic. (3) Hot Teriyaki. All are now priced at \$2.99 at Whole Foods.

7351. **Product Name:** Soy Deli Tofu Burgers [Barbecue Style, Cajun Spice, Curry Spice, Garden Style, Italian Spice, Original, Taco Spice, Tofu-Tempeh, or Teriyaki].

Manufacturer’s Name: Quong Hop & Co.

Manufacturer’s Address: 161 Beacon St., South San Francisco, CA 94080. Phone: 415-873-4444.

Date of Introduction: 1989. July.

Wt/Vol., Packaging, Price: 6.1 oz.

How Stored: Refrigerated.

New Product–Documentation: Ad, quarter page black-and-white, in Whole Foods. 1989. Sept. p. 132. “Make a healthy choice. New! From Soy Deli. The original organic tofu burger. Nine organic meals in a minute. Strengthen your health food line with the nine new international flavors of Soy Deli organic tofu burgers. All natural ingredients, no preservatives, made from the finest nigari tofu. Pre-cooked with a delicious blend of natural spices. Simply heat and serve, or add to your favorite recipes in place of meat. Good shelf life. High protein, low sodium, no cholesterol, meat or dairy products. Refrigerated or frozen.” A photo shows the label. Note: Quong Hop & Co. first introduced a tofu burger in Jan. 1979.

Talk with Ben Lee of Quong Hop. 1989. Sept. 1. These products were launched in July 1979. The full-color label is printed using a 6-color process. The company hopes the new product will make the transition to the typical deli case in delis; they are not shooting for the deli case in supermarkets. Soyfoods Center product evaluation. 1989. Sept. 9. So-so. Quite dry and crumbly, not juicy. Poor cohesiveness. No instructions for cooking in microwave oven. Flavors are okay, but what is the need for so many? It is not clear whether or not the product is fried.

Spot in Whole Foods. 1989. Nov. p. 83. Available in 9 international flavors. “The burgers are pre-cooked in high-oleic safflower [oil]... contain no meat or dairy products.” Ad (5 by 7 inches, black and white) in Whole Foods. 1990. Feb. p. 36. “Make a healthy choice. New! From Soy Deli. Nine organic meals in a minute.” Lists the 9 flavors.

7352. **Product Name:** Sa Bean Prepared Soybeans (Fully Cooked) [Chocolate, Strawberry, Coconut, Praline, or Plain].

Manufacturer’s Name: Sa Bean (Inventor & Marketer).

Manufacturer’s Address: 2211 Ala Wai Blvd. #2410, Honolulu, Oahu, HI 96815. Phone: 808-923-9663.

Date of Introduction: 1989. July.

Ingredients: Soybeans, water, pineapple juice, guava nectar, citric acid, spices.

Wt/Vol., Packaging, Price: 10 lb.

How Stored: Refrigerated.

New Product–Documentation: Label. 1989. 6.25 by 5.25 inches. Blue on white. Self adhesive. “Use: Add to soups, salads, vegetables, entrées, desserts, sautéed mushrooms. Not recommended for use in candies. Caution: To prevent dehydration in further cooking, avoid hot dry air! Cover completely in paté, casserole or meatloaf to retain vital moisture content.” Talk with and letter from Jerry Saub. 1989. Aug. 21. The patented process (U.S. Patent 4,601,910) by which these soybeans are prepared “drastically reduces

cooking time and simplifies processing to allow very rapid production of an extraordinarily wide variety of flavors in uncrushed soybeans... 'Prepared Soybeans' are used by chefs at Hawaii's finest hotels and restaurants." Larry Higashi, chef at Nicholas, Nickolas (808-955-4466), helped to develop an improved process without any noticeable pineapple smell.

2 page leaflet (1989) describing composition and features of the product. "Fully cooked. Ready for instant use. No salt. No cholesterol. Contains the health producing *Lactobacillus*. For superb nutrition in entrees, serve chicken, beef, or fish with soybeans and a teriyaki or other light sauce. These versatile soybeans are wonderful in salads, soups, desserts, or with vegetables.

"Sa Bean—Prepared soybeans. The most fragrant of the many processes suggested in this patent is the fast process using guava in the initial stage and pineapple in the final stage. I recommend placing soybeans prepared in this manner in a large brandy snifter. Before tasting, swirl the aroma. Sniff gently. Play with this awhile. Breathe deeply. For tasting, I suggest a large container of these soybeans in a salad bar."

"First taste the soybeans alone. Savor the rich nutty flavor. Then add a single salad dressing. Consider. Proceed slowly. Try more and more complex mixtures. You will discover that these are truly gourmet soybeans. Add enough cayenne pepper and jalapeno cheese and you'll have a salad that will surprise and delight you."

Soyfoods Center product evaluation. 1989. Aug. 23. We found little or no beany flavor from the new process, but we felt all flavors were undercooked and too crunchy; we feel properly cooked soybeans should be soft enough to crush easily between the thumb and ring finger. All flavors were quite sweet. We liked the coconut flavor best (try atop pineapple ice cream for a do it yourself piña colada). The chocolate was reddish-purple with a weak chocolate flavor. Information about the effect of the process on flatulence-causing oligosaccharides would be useful.

Spot in Food Engineering. 1989. Oct. p. 50. "Soybeans from new process developed." R.M. Sperber. 1989. Food Processing. Dec. p. 58. "Soybean process yields new product applications: Taste and odor neutralized."

7353. Uchida, Kinji. 1989. Trends in preparation and uses of fermented and acid-hydrolyzed soy sauce. In: T.H. Applewhite, ed. 1989. Proceedings of the World Congress on Vegetable Protein Utilization in Human Foods and Animal Feedstuffs. Champaign, IL: American Oil Chemists' Society. xii + 575 p. See p. 78-83. Contains 8 figures (diagrams and graphs) and 5 tables. [18 ref]

• **Summary:** Contents: Abstract. Introduction. Production and consumption of soy sauce in Japan: Processes of manufacturing soy sauce, treatment of raw materials, koji-making, moromi-mash fermentation and aging, pressing, refining. Microbiology of soy sauce manufacture: Breeding

of hybrid koji-molds by the use of cell-fusion technique, isolation and application of metabolically diverse soy pediococci in the fermentation. A photo shows K. Uchida. Address: Kikkoman Corp., 399, Noda, Noda-shi, Chiba-ken 278, Japan.

7354. Reeder, John. 1989. U.S. import/export statistics on soy products (Interview). *SoyaScan Notes*. Aug. 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John's specialty is tracking statistics on fats, oils, and oilseeds, plus natural gums and resins. The main publication carrying soy-related import statistics is titled "U.S. Imports for Consumption: U.S. Census Bureau Publication IM146." It is published by the Foreign Trade Div. of the U.S. Census Bureau and is available in a monthly published paper version, or on microfiche, or in electronic database form. With soy, it covers soybeans (Heading/subheading 1201.00), soy flour (1208.10), and soy sauce (2103.10). Miso and tofu statistics are lumped in with hundreds of other minor products in the catch-all basket category "Edible Preparations."

In the tariff part of the report, for each item there is an article description, units of quantity (e.g. kg), and rates of duty (general, special, or 2). For example, soy sauce has a general duty rate of 3%, which is granted to all "most favored nations." The "Special" column shows that it is imported duty free from countries with the codes A (Generalized System of Preferences, applied to many developing countries), E (CBERA or Caribbean Basin Economic Recovery Act), or IL (Israel). CA = Canada gets a reduced rate of 2.7%, which will be reduced to zero over the next 5-10 years under the recent Canadian Free Trade Agreement. Column 2, indicates that a 35% import duty applies to most Communist countries, except those (such as China) with "Most Favored Nation" status, when get the General rate.

In the imports part of the report, under each product (e.g. soy sauce, thin = soy sauce) there is a listing of countries, sorted by region from which the USA imports. After each country there may be the codes GSP (the amount of product imported under the lower General System of Preferences rate, because it has been shown to be as domestic product of that country), and OGN (the amount of product imported under the General rate because it has not been proved to be a domestic product), plus a total for the two. Then statistics for the current month and cumulative from January to date, of the quantity imported (which may be reported in two sets of units, Qty-1 and Qty-2, such as pounds and gallons), the customs value (the Free on Board or FOB value declared by the importer at the foreign port of export), and the calculated duty received by the U.S. based on the customs value.

The report is also available at federal depository libraries, such as Univ. of California at Berkeley. On 1 Jan. 1989 the way of reporting data was changed to the

“Harmonized Tariff Schedule of the United States” from the old “Tariff Schedule of the United States” (TSUS) system. This changes some nomenclature and makes the U.S. reporting more similar to that of many other countries, which facilitates determining tariffs and quotas on given items.

Corresponding export statistics are given in another report titled “Schedule B: U.S. Exports of Domestic Merchandise, FT410” published monthly by the U.S. Census Bureau. Each product has the same product code (e.g., soy sauce is 2103.10).

Another publication is the Directory of International Trade Analysts: Commodity Agreements.

Good databases for searching soy-related data are Disclosure, and Nexus (business news). Address: U.S. International Trade Commission, Agricultural Div., Washington, DC 20436. Phone: 202-252-1319.

7355. Welters, Sjon. 1989. Early involvement with soyfoods and Manna in the Netherlands (Interview). *SoyaScan Notes*. Aug. 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Sjon was born in 1955. He completed high school plus one year at the National Academy of Fine Arts. Then he dropped out to pursue his interest in the natural foods movement. He got involved with soyfoods when he became a vegetarian in 1973. In Sept. 1975 he started to work for Manna. During 1975-76 he did a lot of experimentation with soyfoods production while working at Manna, and he was involved in selling the shoyu and miso that Manna had been importing from Muso in Japan since 1975. In Sept. 1977 Sjon left Manna and started his non-profit natural foods foundation (Stichting Natuurvoeding Alkmaar) and his own natural foods store, both at Alkmaar (pronounced AL-ek-mayr), the Netherlands, based on the model established by Manna. During 1980-81 Sjon's foundation merged with Manna's foundation and Sjon started to work as director of operations at Manna, and he first became involved with the production of tofu and seitan. During the early 1980s Sjon was an editor of the *Manna Bulletin*. Address: Craft International Consultants, 21 Wetherbee St., Acton, Massachusetts 01720. Phone: 508-264-4011.

7356. Roth, Martin. 1989. Early history of Great Eastern Sun and subsequent work with soyfoods (Interview). *SoyaScan Notes*. Aug. 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Other records describe in detail Martin's pioneering work with commercial production of Brown Rice & Tofu Sandwiches, Sweet White Miso, Amasake, Amasake Shakes, and America's first Amasake Ice Cream. In 1982 he and his very close friend Barbara Svenning Garvey (they were never officially married) moved from Boulder, Colorado, to Miami, Florida, then to North Carolina. Martin

met Barry Evens in Florida and Barry commissioned Martin to go to North Carolina and set up a macrobiotic distribution and import company near the American Miso Co., of which Barry was then the principal owner. “The beginning of that company was a wonderful experience. Everybody was thrilled. We were the first ones to actually take a full line of Japanese foods and present it to the health food stores in a big way. At that time Erewhon still had a much more limited selection of Japanese imports, such as miso, tamari, soba, etc. We had only imports, 200 to 300 esoteric items that many people never heard. We put together a nationwide sales force and went store to store, introducing the concept of a macrobiotic section. We put that on the map. We had great success, opening hundreds of accounts. I left in about 1984 because I got an opportunity to work for Westbrae as sales and marketing manager, and North Carolina was not my favorite place to live.” Martin developed the concept, the name, and the graphics for the Westbrae Malted and for Mitoku's Supersoy. Address: Berkeley, California. Phone: 415-527-7066.

7357. Belleme, John. 1989. Natural soy sauce: A brewing controversy. *Solstice* No. 37. Summer. p. 10-12. [1 ref]

• **Summary:** “A San-J placard [shelf talker] sent to thousands of retail stores [about 6 months before this article] says: ‘You will notice that all San-J soy sauce has alcohol as an ingredient. As a result of fermentation, there is a small amount of naturally occurring alcohol in all soy sauces. We add a little more alcohol in order to inhibit the growth of naturally occurring aerobic yeast. While the addition of alcohol as a natural preservative is common practice for traditional soy sauce, often it is not listed on the label.’” The author contacted the three major suppliers of traditional imported soy sauce, they were unanimous in denying San-J's accusations. Likewise, the brewmasters of these products denied that any alcohol was added. (Note: Johsen shoyu is bottled under the Tree of Life, Koyo, Mitoku Macrobiotic, Emperor's Kitchen, and Westbrae labels. Marushima Shoyu supplies Eden Traditional Shoyu and Organic Shoyu). However Mansan Brewing Co. of Handa, Japan, adds 4% Mikawa Mirin (rice brandy) to its Mansan Tamari, which is marketed under the Mitoku Macrobiotic label. When Belleme asked San-J vice president Steve Zoller which brands of soy sauce have unlisted alcohol, Zoller could not give any specifics. “The soy sauce San-J imported until their domestic product became available last fall was labeled ‘no artificial additives or preservatives.’ When we asked Steve Zoller if this shoyu and tamari contained added alcohol and tamari, he replied, ‘No comment.’”

Belleme was also concerned that San-J tamari made with hexane-extracted soybean meal using a modern temperature-controlled process would be called “traditionally brewed.” Note: Belleme later admitted that the statement in this article about benzene being used by ADM to make food grade

ethanol was incorrect. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

7358. Product Name: Lightlife Lemon Grill (Tempeh Burger).

Manufacturer's Name: Lightlife Foods, Inc.

Manufacturer's Address: 74 Fairview St., Greenfield, MA 01301. Phone: 413-774-6001.

Date of Introduction: 1989. August.

Ingredients: Organic soy-rice tempeh (organically grown soybeans, brown rice, water, tempeh culture), fresh lemon juice, soy sauce, canola oil, olive oil, granulated garlic, onion powder.

Wt/Vol., Packaging, Price: 5.5 oz (155 gm) vacuum pack.

How Stored: Refrigerated or frozen.

New Product–Documentation: Talk with Richard McKelvey, sales manager of Lightlife Foods. 1990. June 20. This round tempeh burger was launched in Nov. 1989. It is marinated in pure lemon juice as opposed to lemon concentrate. The product is doing very well and growing. "If you try the Lemon Grill, you'll love it. So the company is working to get people to try it."

Label sent by Richard McKelvey. 1990. July 20. 4.25 by 5 inches. Green, yellow, and white on black. "Meatless. All natural. Two tempeh cutlets. Delicious as an entree or in a sandwich. Just grill in a lightly oiled pan, under the broiler or on a grill. Microwavable: 1-2 minutes."

7359. Product Name: [Viana Deep-fried Tempeh].

Foreign Name: Viana Fritierter Tempeh.

Manufacturer's Name: Viana Naturkost GmbH.

Manufacturer's Address: Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.

Date of Introduction: 1989. August.

Ingredients: Soybeans*, water, shoyu*, Rhizopus culture, vegetable oil, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Refrigerated.

New Product–Documentation: Bernd Drosihn. 1989. Tempeh: Ein traditionelles Nahrungsmittel mit Zukunft [Tempeh: A traditional food with a future]. p. 38. Says the company makes deep-fried (fritierter) Tempeh.

Label sent by Bernd Drosihn. 1990. April 8. The company address is now Schmittenstr. 106, D-5030 Huerth 6, West Germany. 4.75 by 1.5 inches. Self adhesive. Reddish-purple, brown, and yellow. Dot-matrix printed.

7360. Product Name: [Viana Seitan, Seitan Meatballs {Meatless}, Skewered Seitan Kabobs].

Foreign Name: Viana Seitan, Seitan-Klopse, Seitan Spiesse.

Manufacturer's Name: Viana Naturkost GmbH.

Manufacturer's Address: Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.

Date of Introduction: 1989. August.

Ingredients: Seitan: Wheat*, wheat flour*, shoyu*, wheat gluten, ginger*, kombu sea vegetable. * = Organically grown.

Wt/Vol., Packaging, Price: 250 gm in a 350 gm jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Talk with Bernd Drosihn, founder of Viana. 1990. April 7. He makes seitan; started in Aug. 1989.

Label sent by Bernd Drosihn. 1990. April 8. 4.75 by 2.75 inches. Reddish purple, black, tan, and gold. The company address is now 5030 Huerth 6, West Germany.

Brochure. 8.5 by 11 inches. 6 panels. Black and brown on white. The front panel reads: "Sometimes when all is quiet, someone says 'Seitan.'" A shadowy cartoon figure with turned up collar and mobster-type hat with the brim turned down is shown. Gives an explanation of seitan and 5 recipes.

Brochure. 1990. "Pasteten und Brotaufstriche im Pfandglas" The back panel states that Viana now makes Seitan, Seitan-Klopse, and Seitan Spiesse.

Letter with new Labels from Bernd Drosihn. 1992. July 16. The company address is now: Viana Naturkost GmbH, Willi Graf Str. 88, 5350 Euskirchen-Kuchenheim, Germany. They still make these 3 seitan products, however the Seitan Klopse is now called Seitan Burger. Klopse is an old East German word for meatballs. Spiesse is a skewered product like a kabob. All three products were first sold in Aug. 1989.

7361. SoyaScan Notes. 1989. Update on Tomsun Foods International, Inc. (Interview). Sept. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The company was in Chapter 11 bankruptcy and William Holmes, the new president, purchased it on 9 Feb. 1989. Holmes now owns 80% of the outstanding stock. The corporation moved to this new address from Greenfield, Massachusetts, 3 weeks ago. It is now basically just a marketing company. Tom Timmins is no longer associated with the company and no longer owns any stock in it. Jofu is now being made in Boston by a dairy. It is in honey and sugar flavored lines. The product is doing well. Tomsun also still sells tofu burgers and soy sauce. They no longer sell regular Tomsun Tofu, but they are looking for another company to make it for them. They were not happy with the company in New York that made it for them. They do not have a catalog of products. Address: 44 South Bayles Ave. Suite #200, Port Washington, New York 11050. Phone: 516-883-4900.

7362. Mizono, Bill. 1989. Selling pasteurized tofu in the produce case versus the dairy case (Interview). *SoyaScan Notes*. Sept. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bill strongly prefers to have Azumaya tofu sold in the produce case as long as the temperature is okay, which

it usually is (42-48°F). Even dairy cases sometimes rise above 45°F, as on their defrost cycle. Sales are much better in produce. Tofu is an impulse item and there is more impulse buying in the produce section than in the dairy section. It gets lost among the dairy products. Also there is more space and space flexibility of produce, as caused by seasonal vegetables. Produce is a commodity area. A lot of Safeway stores are switching tofu back to the produce case from dairy, since it sells better in produce. But in stores that moved tofu to dairy, it took a year for sales to rebound to their pre-move level. During that time, many customers started going to Lucky supermarkets for their tofu. Lucky sells tofu only in the produce case. Some divisions of Safeway have never moved tofu out of produce. Each store decides its own location. Most produce departments at Safeway sell the Azumaya tofu in a vertical “juice case” which is cooler. They buy it directly from the Richmond produce warehouse.

The FDA is incorrect in saying that tofu is a “hazardous product.” That is not true for pasteurized tofu. Azumaya had tests done in 1983 after *Yersinia* was found in tofu in Illinois and the state clamped down on tofu. Azumaya had a laboratory inoculate tofu with the four potentially toxic microorganisms (*Yersinia*, *Staphylococcus*, *Salmonella*, and *Clostridium Botulinum*) then pasteurize it like Azumaya does. They found that these organisms start growing only after 6 weeks at 69°F, and by that time the tofu was too sour and smelled too bad to eat, and the water was very cloudy. These tests showed that *pasteurized* tofu is not potentially hazardous. But the FDA does not distinguish between pasteurized and non-pasteurized tofu.

If health inspectors required all tofu to be moved out of the produce case, the produce buying division of each chain would decide where to relocate it. There are many considerations, and the main one to the produce division accounting department is that they get tofu sales credited to them no matter where it is sold. They have spent more than a decade to build the sales of this product and they are not about to give that up to the dairy department. They will put tofu into a refrigerated case where the temperature is at 45°F or below. Even when tofu is sold in the dairy case at Safeway, it still has a produce department label on it! Other than the produce case, Bill would like to see the tofu sold right next to the produce case, in a metal juice case. The produce department likes tofu with the vegetables because they feel that when people buy tofu they also tend to buy vegetables; so tofu sells vegetables. So the produce department does not like tofu to be sold in the dairy case. Another problem with an isolated glass case is that the tofu does not get as much attention as it should, and may be allowed to go out of date. But Bill feels it doesn't matter that much where the tofu case is located, as long as the consumer knows where it is. Moreover, Azumaya sells Kikkoman tofu, which can be sold in the produce case.

Azumaya dates their tofu for a 30-day shelf life, but that

is very conservative to allow for mishandling. Under typical good conditions it will stay fresh for up to 50 days. But he feels it would be a mistake to date the tofu for 50 days and to use that as a selling tool, as Nasoya does. Azumaya has almost no problems with spoilage, puffing or souring. If there is a problem, the company investigates it. It is generally caused by a refrigeration problem, or letting the product stand for a long time in the back room, unrefrigerated, because people are too busy to get to it. Safeway now sells Azumaya tofu in Hawaii, at far below Hawaii tofu prices. On the East Coast Azumaya undersells Nasoya. Bill is too busy with Stir Fruity (tofu yogurt) to start a tofu plant on the East Coast.

The new Mori-Nu ad about water disaster and life preserver is incorrect in saying that water-pack tofu has a shelf life of “mere days.”

Azumaya distributes Kikkoman aseptically packed tofu. He strongly prefers the flavor of his own product. Conclusion: FDA should have different temperature standards and “potentially hazardous” definitions for pasteurized and unpasteurized tofu. Azumaya and the Soyfoods Association should take the lead in educating FDA on these points. Address: President, Azumaya Inc., 1575 Burke Ave., San Francisco, California 94124. Phone: 415-285-8500.

7363. *Guardian (England)*. 1989. Nabisco sells off Del Monte to ease its debt burden. Sept. 26. p. 11.

• **Summary:** American food giant RJR Nabisco has just sold its worldwide Del Monte processed food operations for \$1.5 billion. “Kikkoman will take over some of Del Monte’s businesses in the Far East” [East Asia].

Note: RJR Nabisco, Inc., was an American conglomerate formed in 1985 by the merger of Nabisco Brands and R.J. Reynolds Tobacco Company. RJR Nabisco was purchased in 1988 by Kohlberg Kravis Roberts & Co. in the second largest leveraged buyout in history, adjusted for inflation (Source: Wikipedia, Sept. 2008).

7364. Bates, Dorothy R. 1989. The tempeh cookbook. Summertown, Tennessee: The Book Publishing Co. 96 p. Contains 11 color photos and some line drawings. Index. Sept. 26 cm.

• **Summary:** This is a vegetarian (but not a vegan) cookbook. Contents: Introduction to tempeh: Nutritive values, how tempeh is made, storing tempeh, cooking tempeh. Ingredients and suggestions: Discusses soymilk, soy oil, and tamari. Making tempeh at home. Appetizers. Salads. Soups. Sandwiches. Main dishes: Oriental, Italian, Mexican, American, International. Dessert. Contains 100+ recipes. Address: Summertown, Tennessee.

7365. Johnson, Dale W. 1989. General uses of whole soybeans. In: E.W. Lusas, D.R. Erickson, and Wai-Kit Nip,

eds. 1989. Food Uses of Whole Oil and Protein Seeds. Champaign-Urbana, IL: American Oil Chemists' Society. vii + 401 p. See p. 12-29. Chap. 2. Proceedings of the Short Course on Food Uses of Whole Oil and Protein Seeds held at Makaha, Hawaii, May 11-14, 1986. [35 ref]

• **Summary:** Contents: Introduction: Introduction. Oriental nonfermented products: Yuba, kinako Thai desserts (tofu guan, med khanoon), Thai foods (protein crisp, cooked baby food, canned evaporated soybean milk, taow-huey, kanom ping kaset). Fermented foods: Natto, hama-natto, tao tjo (a miso-type product made in Indonesia and Thailand), ontjom (made from peanuts, coconut press cake, or okara), kochu chang, ketjap, sufu, yogurt-type products, tauco, soy sauce, miso, tempeh. Western world type products. Full fat soy flour (enzyme active, heat treated). Soybean hulls. Whole soybeans in animal feed. Chapatty [chapati]. Full fat soy grits. Heat treatment of soybeans. Heat treatment and texturizing. Low-fat products. Snacks (soynuts—dry roasted or oil roasted, plain or seasoned). Soybean sprouts. Soy butter [soynut butter]. Combinations of soybeans and cereals. Soybeans as vegetables (mao-tou, edamame, or fresh green soybean). Defatted products. Nutrition. Soybean handling and equipment considerations. Solvent plant considerations. Address: Food Ingredients (Minnesota) Inc., 2121 Toledo Ave. North, Golden Valley, Minnesota 55422.

7366. **Product Name:** [Taifun Shoyu: Natural Soy Sauce].

Foreign Name: Taifun Shoyu: Natuerliche Sojasauce.

Manufacturer's Name: Life Food (Importer-Marketer). Made in Japan.

Manufacturer's Address: Stuehlingerstrasse 9, D-7800 Freiburg, West Germany. Phone: 0761/27 22 72.

Date of Introduction: 1989. September.

Ingredients: Soybeans, whole wheat, sea salt, water.

New Product—Documentation: Label sent by Anthony Marrese. 1990. March 22. 4 by 2.75 inches. Black, green, and orange on pink. Self adhesive.

Letter from Klaus Kempff of Life Food GmbH. 1990. June. This product was introduced in Sept. 1989.

7367. Lusas, Edmund W.; Erickson, D.R.; Nip, Wai-Kit. eds. 1989. Food uses of whole oil and protein seeds. Champaign-Urbana, Illinois: American Oil Chemists' Society. v + 401 p. Proceedings of the Short Course on Food Uses of Whole Oil and Protein Seeds held at Makaha, Hawaii, May 11-14, 1986. No index. 24 cm. [300+ ref]

• **Summary:** Of the 24 chapters, the first 10 are entirely about soybeans and soyfoods, and 5 of the remaining 14 chapters are partly about soya. Many individual chapters are cited separately. Address: 1. Protein R&D Center, Texas Engineering Experiment Station, The Texas A&M.

Address: Kikkoman Foods Inc., P.O. Box 69, Walworth, Wisconsin 53184.

7369. **Product Name:** Tofu (Soft, Hard, and Fried).

Manufacturer's Name: Wa Heng Dou-Fu.

Manufacturer's Address: 5063 24th St., Sacramento, CA 95822. Phone: 916-737-0545.

Date of Introduction: 1989. September.

Ingredients: Fried tofu: Soy bean, water, natural calcium sulfate, vegetable oil.

Wt/Vol., Packaging, Price: 8 oz.

How Stored: Refrigerated.

New Product—Documentation: Talk with Mr. Peng-Xiang (Martin) Lin, Owner. 1990. Jan. 19. He started this company in Sept. 1989. Before that, he made soyfoods out of his home.

Label sent by Martin Lin. 1991. Nov. 20. 6 by 7.5 inches. "Keep Fit. Fried Tofu. No preservatives added." Most of the label text is written in Chinese. Talk with Martin Lin. 1997. Aug. 6. His company name is "Wa Heng Dou-Fu Soy Sauce." He bought the company from his parents in 1996. Three years ago he started to make soy sauce and sold it to several restaurants because Kikkoman is too expensive. He no longer makes soy sauce but plans to make it again after doing more research.

7370. Belleme, John. 1989. Natural soy sauce: A brewing controversy. Part II. *Solstice* No. 37. p. 25-26, 28-30. Sept/Oct. [1 ref]

• **Summary:** Discusses the differences between HVP unfermented soy sauce (such as La Choy, Chun King, and Kame) and fermented soy sauce, then between modern high-tech fermented soy sauce (such as that made by Kikkoman from hexane defatted soybean meal and fermented for less than 7 months in fiber glass or stainless steel temperature controlled tanks) and "traditionally brewed" soy sauce (such as the macrobiotic brands "made from whole soybeans and aged in wood for at least 4 seasons at the natural temperature of the region"). Manufacturers of modern-high tech soy sauce often refer to their product as naturally brewed to distinguish it from "synthetic" HVP sauces. Now Kikkoman and San-J have succeeded in placing their high-tech products in some natural foods stores. Belleme discusses the objections that can be raised against these products: (1) Substitution of hexane defatted soy meal for whole soybeans. "The FDA and solvent extraction industry have set acceptable limits for hexane in soy meal at 25 parts per million (ppm)." San-J and Kikkoman assert that their products test negative for hexane residues. "San-J

brewmaster Yuji Yamamoto said that using soy meal rather than whole soy beans is more efficient because fermentation is faster, nitrogen yields are higher, and there is no crude soy oil to dispense with, as in whole soy bean soy sauce.” Belleme thinks that this oil can be used for soap. Because of the greater efficiency, soy meal soy sauce can be produced and sold less expensively than whole bean soy sauce.

(2) Heated non-wood vats. “San-J brewmaster Yamamoto says that their closed heated system is easier to clean, more efficient, and produces a clearer, milder, and better balanced soy sauce than the traditional method.” Jubei Sasaki of Sendai Shoyu Co. disagrees, arguing that the effect of seasonal changes and the wooden vats improve the shoyu flavor. Wooden vats may also give a product with more vitamin B-12.

“Although whole soybeans are always proudly listed as such, soy meal is usually referred to as ‘soybeans.’ Ironically, San-J’s black label soy meal tamari says ‘traditionally brewed,’ and makes no mention of defatted soybeans, thus making it difficult for the consumer to make an informed choice.” Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

7371. Kenyon, Michael. 1989. Worcestershire Sauce. *Gourmet* 49(10):122, 234-41. Oct.

• **Summary:** Discusses (without documentation) the origin and history of Lea & Perrins’ Worcestershire and the factory in Worcester where the sauce has been made since 1897. Says that in 1835 the first concoction was mixed up from Lord Sandys’ recipe. Two years later, John Wheeley Lea and William Perrins, discovered the forgotten brew in their cellar, took a second sniff and taste, and found it was quite nice. Apart from minor changes and the crucial aging, the “recipe for today’s Worcestershire sauce is the one brought back from India by Lord Sandys [Note: Not true; the main ingredient, naturally fermented soy sauce, has been replaced by HVP]. A 1928 rhyming advertisement went, “And waiter, when you bring my cheese, bring Lea & Perrins sauce back, please.”

Today, world consumption is about 25 million liters/year. The city of Worcestershire is located about 100 miles northwest of London, and 25 miles west of Stratford-on-Avon. The factory in Worcestershire makes 12 million bottles/year and more than half of all households in Britain are said to have a bottle in the pantry. It has been supplied to royalty since 1904. The factory at Worcestershire has an archives and museum. In 1988 BSN, a French-based food conglomerate, bought Lea & Perrins in both England and the USA (Fair Lawn, New Jersey).

C.W. Dyson Perrins (1964-1958), the millionaire grandson of William, the chemist, focused his energies on business—incl. the sauce business. In 1946 he founded the museum. Every summer he hunted at his castle in the Scottish Highlands, killing hundreds of birds (2,000 brace of

grouse, etc.) and wild animals.

The writer’s genealogical research indicates that the Lord Sandys whose name is tied by legend to Worcestershire sauce was Arthur Marcus Cecil, the third Lord Sandys (1798-1886). His grandfather’s family seat was in the county of Worcestershire. The writer also believes that Lord Sandys invented the Bloody Mary—a cocktail consisting essentially of vodka and usually spiced tomato juice. The term was first used in 1947 and Worcestershire sauce is often used as an ingredient. Address: Long Island, New York.

7372. **Product Name:** Kikkoman Naturally Brewed Tamari Soy Sauce.

Manufacturer’s Name: Kikkoman Corporation.

Manufacturer’s Address: Noda 278, Chiba-ken, Japan.

Date of Introduction: 1989. October.

Ingredients: Water, soybeans, salt, wheat, alcohol to preserve freshness.

Wt/Vol., Packaging, Price: 8.5 fl oz (250 ml) glass bottle with “one-touch” plastic dispenser cap. Retail for \$2.29 (12/91, California).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Product with Label purchased at Safeway supermarket in Lafayette, California. 1991. Dec. 30. 5 by 3.25 inches. Gold, red, and white on black. “Although shoyu is normally made with nearly equal parts of soybeans and wheat, tamari is normally made with soybeans and a small amount of wheat. Tamari soy sauce is a full-bodied seasoning with a deep-rich color and unique fine flavor. Kikkoman tamari soy sauce is naturally brewed in Japan... The touch of wheat in this tamari gives it a smoother taste, more complex flavor, and appealing color... Refrigerate after opening.”

Talk with Kikkoman sales dept. in San Francisco. 1991. Dec. 31. This imported product was first sold in America in Oct. 1989. The unique red cap can be closed after each use. In Japan a small amount is sold to restaurants for use with sashimi. Kikkoman used to sell tamari in the USA in 55-gallon drums but has discontinued this due to lack of demand.

7373. **Product Name:** Tofu Burgers, Teriyaki Burgers, Miso Burgers, Tofu Nuggets [Plain, or Barbeque].

Manufacturer’s Name: La Soyarie.

Manufacturer’s Address: 25 rue St. Etienne, Hull, QUE, J8X 1H5, Canada. Phone: 613-235-5356.

Date of Introduction: 1989. October.

Ingredients: Incl. tofu, soy sauce.

How Stored: Refrigerated.

New Product–Documentation: Soya Bluebook. 1989. p. 102-03. Contact: Koichi Watanabe, President.

SoyaCow Newsletter. 1994. July/Sept. Mr. Koichi Watanabe is president of La Soyarie in Hull, Quebec.

7374. Lima N.V. 1989. Lima: Tarif détaillant [Lima Foods catalog and price list]. Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium. 9 p. [Fre]

• **Summary:** This macrobiotic food catalog was bound into the back of the Bonnetterre catalog at a 1989 food expo in Paris. Lima sells the following soyfoods, each preceded by its product category: Fresh products: Skewered seitan/tofu, Presto natural tofu, Presto tofu legumes/vegetables, Presto tofu cheese. Legumes: Yellow soybeans. Sprouts: Green soy/mung (500 gm or 5 kg). Flours: Roasted soy flour. Vegetarian preparations: Lima soy sauce (500 ml or 1 liter), tofu, natural tempeh, tempeh with shoyu. Dressings: Salad dressing with soy and tomato, Salad dressing with soya herb. Specialties: Organic miso (1 month), Hatcho miso, Barley miso (organic or regular), Rice miso (organic or regular), Heiwa brand Instant miso soup (regular or red, From Japan), Tamari (250 ml, 1 liter, 18 liters), Mansan Tamari from Japan, Shoyu (250 ml, 1 liter, 18 liters), Sakai shoyu from Japan. They also carry one book titled “Tofu dans le Cuisine Macrobiotique” (Eddie Hara, 1982).

Accompanying the catalog is a packet of individual full-color sheets with of photos of products in a folder titled Lima: Quality is our passion.” There are sheets titled “Vegetable products rich in protein,” “Tamari and shoyu,” “Japanese specialties (incl. Heiwa brand shoyu and tamari),” and a brochure titled “Lima: 30 years as a producer of organically grown (biological) foods.” It describes the life and work of Edgar Gevaert (poet, artist-painter, ecologist, and a leader of the European peace movement). Address: Sint-Martens-Latem, Belgium.

7375. Mogi, Yuzaburo. 1989. The new yippies. *Look Japan* (Tokyo). Oct. p. 14-16.

• **Summary:** In this section on “Economy: Overseas investment,” Prof. Shôichi Rôyama interviews Yûzaburo Mogi, Executive Managing Director of Kikkoman Corp. Born in 1935, he graduated from Keio University, then rejoined Kikkoman. In 1961 he earned his MBA from Columbia University in New York City. His publications include *How to Make an Overseas Plant* and *Introduction to International Business*. Mogi is an excellent example of a Japanese business leader who thinks big, who sees the big picture, and realizes that the actions of each Japanese company or person overseas can affect all the others. Thus, the need to develop standards of good behavior on various levels.

Mogi is now chairman of the Association of Overseas Organizations of Japan’s Committee on the Development of Internationally-Oriented Personnel, and a key figure in the development of the recently released “Frictionless International Strategy.” Mogi believes the Japanese corporations with overseas operations need to become internationalized and globally oriented. Employees sent overseas need to learn the local language, become friends

and work well with their local colleagues, and make contributions to the local community. Returnees and their children should be treated better when they return to Japan—in an effort to minimize international friction.

Corporations should try to localize management and to see themselves “as an integral part of and dependent on the local community. The most important part of localization is having dealings with local corporations. Assuming all other factors are equal, local corporations should be favored over Japanese corporations. And among local corporations, emphasis should be placed on those closest to your plant and the community you are in”—to minimize investment friction. All Japanese companies should work together to minimize international friction trade friction. A photo shows Yûzaburo Mogi.

7376. NHK of Japan. 1989. [Japanese researchers discover that cancer patients have high levels of nitrosamines in their genes]. Television broadcast. Oct. 23. Evening news. [Jap]

• **Summary:** Medical researchers from Tokyo University announced experimental results showing that cancer patients have 5 to 10 times as much nitrosamines in their genes as healthy patients. Nitrosamines, known as carcinogens for some time, are thought to cause mutations, which can cause cancer. This may be a key discovery in cancer research.

Note: Four records in the SoyaScan database list nitrosamines, all in connection with soy sauce, and all as known carcinogens.

7377. U.S. Department of Commerce, Bureau of the Census, Foreign Trade Division. 1989. U.S. imports of merchandise for the year through July. Washington, DC: USDC. 4 p. Oct. 28 cm.

• **Summary:** This information, based on a search request, is printed from a statistical database: U.S. Imports of Merchandise. International Harmonized System Commodity Classification (HT SUSA) by country by Customs District. The information, which is used to calculate customs and record imports, is also available on a compact disk. This data is up to statistical month July 1989.

Soy sauce. Unit of quantity: kg. General imports: 11,901,248 kg.

Soybeans, whether broken or not broken, seeds for sowing. General imports: 333,533. Address: U.S. Department of Commerce, Bureau of the Census, Foreign Trade Division, Data User Services, Washington, DC 20233. Phone: (301) 763-4100.

7378. Levey, Robert. 1989. Japanese restaurant better than ever. *Boston Globe*. Nov. 2. p. 4.

• **Summary:** A review of the Japanese restaurant Roka on Massachusetts Ave. near Harvard Square. “You may meander around on the appetizer menu with some satisfying results. Under the ‘offbeat category,’ consider the edamame, a bowl

of Japanese green soy beans blanched in salted water and served cool. You pick up the whole pod, squeeze out the round soy beans and munch them like a party snack.”

A salmon entree with teriyaki sauce was also served, as was grilled eel seasoned with a “traditional slightly sweet, thickened soy sauce...” Address: Globe staff.

7379. Goldbeck, Nikki. 1989. American Wholefoods Cuisine. Bird lives: Seitan instead of turkey. *True Food* (Woodstock, New York) 2(3):4-5.

• **Summary:** Seitan is made from gluten, the same elastic-like protein that allows bread to rise. “Its meat-like appearance and texture make it suitable for cutlets, roasts, casseroles, stews, and similar preparations. Our first exposure to seitan was during the early 1980s while in Hong Kong. There, numerous vegetarian restaurants, based on the former traditions of the Chinese Buddhist monks, serve mock beef, pork, chicken and duck, all based on gluten. Often these items are indistinguishable from meat.”

The Goldbecks next encountered seitan in early 1989 (see *True Food*, Vol. 2, No. 2) when they dined on delectable California Seitan at the Unicorn Restaurant in Miami, Florida. Though seitan is high in protein (10%) and relatively low in fat, and in calories (118/100 gm), the quality of that protein is lower than that of many other vegetarian sources such as tofu, tempeh, and legumes. Soymilk or cashews can be used to make an excellent gravy.

Describes how to make kofu (raw gluten dough from 10 cups whole wheat flour) and seitan at home. The broth contains 6 cups water, ¼ to 1/3 cup soy sauce, 4-inch strip kombu seaweed, 4 thin slices of fresh gingerroot (optional), 2 cloves garlic (optional), pepper, thyme, sage, oregano, or other herbs and spices (optional). Gives recipes for: California Seitan (adapted from the Unicorn Restaurant). Brown sauce (with soy sauce). Seitan sauté. Mushroom gravy. Cashew gravy.

7380. Kikkoman Oriental cooking. 1989. Publications International Ltd., 7373 North Cicero Ave., Lincolnwood, IL 60646. 96 p. Illust. Index. 28 cm.

• **Summary:** This full-color cookbook features 125 recipes using Kikkoman’s full line of Oriental sauces. The book was published in two formats. The first was a small magazine format published in Jan. 1989, for sale at supermarkets during Chinese New Year. The second, published in Nov. 1989, was a larger size (28 cm tall), spiral bound on glossy paper with many color photos, for sale at bookstores. Both were 96 pages. Kikkoman supplied all the recipes.

Contents: Kikkoman brings the Orient home. Appetizers. Beef. Pork. Poultry. Seafood. Side dishes.

A color photo shows the following products, and they are used with their brand names in the recipes: Kikkoman Soy Sauce, Lite Soy Sauce, Teriyaki Sauce, Teriyaki Baste & Glaze, Stir-Fry Sauce, and Sweet & Sour Sauce. Tofu is used

in one recipe (p. 46).

7381. McCarty, Meredith. 1989. Fresh from a vegetarian kitchen. Turning Point Publications, 1122 M Street, Eureka, CA 95501-2442. ii + 263 p. Illust. by Bernice Kagan. Index. 28 cm.

• **Summary:** A macrobiotic cookbook containing over 450 recipes, many using tofu (at least 20, including many innovative sauces and dressings), tempeh, miso, amazake, soy sauce, soymilk, and amazake. A section titled “Soyfoods: Tofu and tempeh” (p. 151-55) contains 6 recipes and several variations. On page 202 is a recipe titled “Amazake-Soymilk” in which ¾ cup soymilk is mixed with ¼ cup plain amazake. The author has co-directed this natural health center in northern California since 1977. Address: Eureka, California.

7382. **Product Name:** [Tempeh with Tomato].

Foreign Name: Tempé à la Tomate.

Manufacturer’s Name: Société Soy.

Manufacturer’s Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

Date of Introduction: 1989. November.

Ingredients: Tempeh 90% (water, soybeans*), selected cultures (ferments), sunflowerseed oil, tomato sauce (5%; tomatoes*, onions*, carrots*, soy sauce, spices and aromatics). * = Organically grown.

Wt/Vol., Packaging, Price: 180 gm.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 18.1 gm, fats (lipids) 10.7 gm, carbohydrates (glucides) 6.4 gm, calories (Kcal) 194 (812 kJoules).

New Product–Documentation: Form filled out for Anthony Marrese by Bernard Storup. 1989. Nov. The product will be launched in Nov. 1989.

Label sent by Bernard Storup. 1990. Dec. 26. 3 by 5.5 inches. Red, green, yellow, purple, and brown or white. Illustration of palm trees in front of purple mountains. “A world of equilibrium. Biona certification symbol. Nature et Progres organic certification symbol. Dehulled soya is cooked and inoculated with a mold (champignon; *Rhizopus oligosporus*). From this fermentation is born tempeh, with such a savory flavor. Reheat in a saucepan (casserole) over low heat, stirring (remuant) from time to time.”

7383. *SoyaScan Notes*. 1989. Influence of Japanese and Japan on soyfoods in America (Overview). Dec. 7. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The Soyfood Center’s SoyaScan database presently contains 30,790 publications and commercial products related to soya. Of these, 876 (2.9%) concern the influence of Asian-Americans (Japanese, Chinese, Koreans, or Indonesians) or their home countries on soyfoods. Of these 876 records, 638 (73%) concern Japanese influence,

compared with 178 (20%) that concern Chinese influence—including Chinese from Taiwan, Hong Kong, Singapore, etc. Thus Japanese influence on soyfoods in America is much greater than that of any other Asian cultural group. We can identify at least seven major areas of influence:

1. Soyfoods Terminology. It is interesting to note that many of the most popular soyfoods in America are most widely known by their Japanese names. We say tofu (not doufu or bean curd), miso (not jiang or soybean paste), natto, okara (not soy pulp), yuba (not doufu-p'i or soybean skin). Even "soy" (as in soy sauce) is derived from the Japanese word "shoyu." Increasingly Americans interested in natural foods also use the terms shoyu and tamari to distinguish them from HVP soy sauce.

2. Kikkoman. By far the most influential Japanese soyfoods company in America today is Kikkoman, just as soy sauce is by far the most important soyfood product. Kikkoman was also the first Japanese company to introduce soyfoods to America. In 1868 the first Japanese immigrants to Hawaii took kegs of Kikkoman brand shoyu with them. In 1879 Kikkoman brand shoyu was registered in California, where it was exported to Japanese immigrants. Exports rose steadily, until between 1949 and 1954 exports of Kikkoman shoyu to the U.S. ranged from 213,000 to 305,000 gallons a year. Kikkoman's first real attempt to reach any foreign market dates from 1956 when, during the U.S. presidential elections, Kikkoman ran television ads to promote its product to mainstream American audiences as a seasoning for meat, fish, and poultry. In 1957 Kikkoman International Inc., a new sales company was established in San Francisco. Sales skyrocketed. In 1973 Kikkoman opened a huge modern shoyu plant at Walworth, Wisconsin. In 1976 Kikkoman passed La Choy to become America's best-selling soy sauce.

3. Introducing Soyfoods to Hawaii. The first Japanese who arrived in Hawaii in 1868 brought shoyu and miso with them. The earliest known soyfoods company there was a shoyu brewery started in 1891 in Honolulu by Jihachi Shimada. This was also the earliest known soyfoods company started by a Japanese anywhere in the Western world. Hawaii became part of the USA in 1898 by annexation. Hawaii and California were the first two areas in the U.S. where soyfoods became widely available. During the 20th century, Japanese started roughly 183 companies in Hawaii making shoyu, miso, and tofu—far more than Chinese (6) or Koreans (2). They developed innovative new products—such as sweet Hawaiian-style shoyu and miso. These products profoundly influenced the food life of Hawaii.

4. Soyfood Manufacturers in the USA. The earliest known soyfoods manufacturer in the Continental USA was a company (the name is unknown) run by the wife of Chieko Hirata that started making tofu in Sacramento in about 1895. The second earliest was Yamamori Jozo-sho, which started making shoyu in San Jose, California, in 1897.

Many of the earliest soyfoods companies in America were run by Japanese Americans. By 1942 at least 158 soyfoods manufacturing companies had been started in America by Asian Americans; of these, 143 (91%) were run by Japanese Americans. When *The Book of Tofu* was published in 1975, it listed 55 tofu companies in America, all run by Asian-Americans; 39 were Japanese- and 16 were Chinese-run. Today America's two largest tofu companies are both run by Japanese Americans: Azumaya Co. in San Francisco, and House Foods & Yamauchi Inc. in Los Angeles. Hawaii's three largest tofu companies are also run by Japanese Americans: Aloha Tofu Co., Kanai Tofu Factory, and Hawaii Tofu. Morinaga Nutritional Foods in Los Angeles and Kikkoman Foods in San Francisco both import large amounts of aseptically packaged long-life silken tofu from Japan.

Another major manufacturer is San-Jirushi Corp. of Kuwana, Mie-ken. In the late 1970s San Jirushi started exporting tamari and soybean miso to America. They set up an office in the early 1980s and began to promote their product as "real" tamari to industrial food processors and the natural foods market. In Sept. 1987 the company opened a state-of-the art tamari plant in Richmond, Virginia, with a capacity of 1 million gallons a year. The company now has 75% of the industrial soy sauce market in America.

In Oct. 1986 a major new joint stock company named American Soy Products began producing Edensoy soymilk in Clinton, Michigan. It was a joint venture between Eden Foods and 4 Japanese companies: Marusan Ai, Kawatetsu Shoji, Muso Shokuhin, and Seikensha. Edensoy has since become America's best-selling soymilk. Prior to 1986 much of the soymilk sold in America was made in Japan.

Finally, three of America's 4 largest miso manufacturers are run by Japanese-Americans. The largest is Miyako Oriental Foods in Los Angeles. The other two are located in Hawaii.

5. Soyfoods Imports from Japan. The first importers of shoyu and miso were Japanese distributors such as Japan Foods Corp., Mutual Trading Co. and Nishimoto. But starting in 1962 American macrobiotic and natural foods companies started to import large amounts of shoyu and miso. Pioneers were Chico-San, Erewhon, Eden Foods, Westbrae, Edward & Sons, Tree of Life, and Great Eastern Sun. U.S. imports of soy sauce from Japan jumped from 1.7 million lb (174,400 gallons, worth \$317,000) in 1949, to 18.6 million lb (1,897,000 gallons, worth \$3,116,000) in 1972, an 11-fold increase in quantity during only 23 years.

6. Teachers and Information. Many Americans first learned about soyfoods from Japanese teachers, especially macrobiotic teachers, such as George and Lima Ohsawa, Michio and Aveline Kushi, Herman and Cornelia Aihara, and Noboru Muramoto. All have written many influential books and lectured and taught extensively since the 1960s. In addition, many young Americans learned how to *make*

soyfoods from these macrobiotic teachers. Moreover, Japan is Asia's best source of information about soyfoods. For example, the Soyfoods Center's SoyaScan database contains 5,095 publications and products about soya and Japan, compared with 1,867 on soya and China or Taiwan.

7. Tofu Equipment Manufacturers. Hundreds of tofu companies have started in America since the mid-1970s. The majority of these are run by Caucasian Americans and most use specialized tofu equipment made in Japan by Takai Tofu & Soymilk Equipment Co., or by Sato Shoji.

7384. Guedemann, Ursula. 1989. Sojabohnen in Garten und Kueche [Soybeans in the garden and kitchen]. *Zum Beispiel* (Switzerland) No. 12. p. 21-22. Dec. 21. [2 ref. Ger]

• **Summary:** Soybeans are not hard to grow in one's own garden. The seeds can be ordered from Andreas Ellenberger of Ekkarthof, 8574 Lengwil. They can be cooked as whole dry soybeans, or made into sprouts, flour, or tofu. Contains 1 recipe using soy flour and 4 recipes using tofu.

A test of soy sauces conducted by and published in *AGE* (*Aktion gesuender Essen*) in June 1989 showed that Tamari-Bio and Tamari-Lima were the best value (*Bewertung*). In second place came Tamari-Tofu and Kikkoman-Soja-Sauce. Address: Switzerland.

7385. Krieger, Verena. 1989. Soja als Nahrungsmittel: genutzt oder missbraucht? [Soya as a food: Used or misused?]. *Zum Beispiel* (Switzerland) No. 12. p. 15-17. Dec. 21. [Ger]

• **Summary:** Soybeans can be fermented to make miso, soy sauce, tempeh, or natto. Or the protein can be extracted in traditional ways to make soymilk, tofu, or yuba. One can also make soy sprouts. In the Western world, soybeans are mostly misused to make high-protein meal for livestock fodder, and vegetable oil. Address: Lucerne, Switzerland.

7386. Kuntjoro, Sri Utami; Kusnadi, N.; Sayogyo, -. 1989. Demand for corn, cassava and soybean in human consumption: A case study in Java, Indonesia. *CGPRT Working Paper* No. 2. xvii + 116 p. Dec. 25 cm. [19 ref]

• **Summary:** Contains much original, detailed information and statistics on consumption, demand, and demand elasticity for secondary food crops (*palawija*) in Indonesia. The main secondary food crops are soybeans (including the soybean products *tahu* {tofu}, *tempe* {tempeh}, *kecap* {soysauce}, and *tauco* {Indonesian-style miso}), corn, cassava, and peanuts. "Pulses, soybean in particular, represent (after cereals) the most important source of vegetable protein for the people of Indonesia. On the whole, soybeans are consumed in the form of tahu (bean curd), tempe (fermented soybean) and kecap (soysauce). Among low-income households, tahu and tempe, which are relatively cheap in price, are (after cereals) a major source of vegetable protein. According to Sayogyo (1985), tempe is also popular

among people in the high income groups.

The National Socio-Economic Survey (Susenas), conducted by the Central Bureau of Statistics, collects socio-economic data from a large number of households throughout Indonesia. The use of chemical fertilizer on soybeans has increased from 5.19 kg/ha in 1973 to 80.39 kg/ha in 1982. Per capita consumption of soybeans has risen from 3.28 kg/year in 1968 to 4.45 kg/year in 1983. In the peak year, 1979, it was 5.33 kg/year.

Table 4.2 shows protein consumption from secondary food crops in 5 Javanese provinces in 1981. The amount of protein contributed daily per capita to the Indonesian diet by soyfoods (in the forms of tempeh, tofu, soybeans, soy sauce [kecap], and miso [tauco]) is greatest in Yogyakarta (22.57 gm; 61.1% of total protein consumption), followed by Central Java (14.57 gm; 37.4% of total), Greater Jakarta (13.78 gm; 33.3% of total), East Java (12.96 gm; 32.8% of total), and West Java (6.44 gm; 14.9% of total). As people's income rises, they tend to consume more soyfoods. Soyfoods provide Tempeh makes the greatest contribution to protein intake in every province, followed by tofu, soybeans, soy sauce (kecap), and tauco (Indonesian miso). Tempeh makes the greatest contribution in Yogyakarta, where it provides 17.86 gm/capita/day of protein, or 60% of the protein supplied by secondary crops, and more than any other single source. The amount of daily protein per capita contributed by tempeh is next most important in Central Java (11.48 gm/day), followed by East Java (9.28), Greater Jakarta (8.98), and West Java (4.16). Tofu makes its greatest protein contribution in Greater Jakarta (4.54 gm/day), followed by Yogyakarta (3.57), East Java (3.49), Central Java (2.80), and West Java (1.99). Address: Agricultural economists, Bogor Univ. of Agriculture.

7387. Berthier, A.M. 1989. Soja, quelle place dans l'alimentation? [Soya: What is its place in the diet?]. *Revue Laitiere Francaise* No. 483. p. 35. [Fre]*

• **Summary:** A brief study of the composition and nutritive value of the soybean and products derived from it, such as soy sprouts, tofu, soy sauce, and miso.

7388. **Product Name:** Col. Sanchez Taco Filling.

Manufacturer's Name: Col. Sanchez Traditional Foods Inc.

Manufacturer's Address: P.O. Box 5015, Santa Monica, CA 90405. Phone: 213-204-1137.

Date of Introduction: 1989.

Ingredients: Vital wheat gluten, beetroot, soybeans, soy oil, paprika, a unique blend of non-irradiated chilies, herbs and spices, sea salt, soy sauce.

Wt/Vol., Packaging, Price: 12 oz (340 gm) plastic bag.

How Stored: Frozen.

New Product-Documentation: Label sent by Kathryn Bennett of Col. Sanchez. 1990. Oct. 17. Front panel: 3 inches

square. Back panel: 5 by 3 inches. Both: Self adhesive. Black on red. "No cholesterol. High in fiber. Vegetarian. No cholesterol. All natural ingredients. No preservatives. High in fiber. Low in sodium. A percentage of our profits is donated to environmental causes."

7389. Product Name: Soya Nova Marinated Tofu Slices [Spicy, Curry, or Barbecue].

Manufacturer's Name: Soya Nova Tofu Shop.

Manufacturer's Address: R.R. #2 Rourke Road, C-28, Ganges, Saltspring Island, BC, V0S 1E0, Canada. Phone: 604-537-9651.

Date of Introduction: 1989.

Ingredients: Tofu: Organically grown soybeans, nigari, well water. Marinade: Water, tamari soy sauce, unrefined oil (safflower and toasted sesame oil), herbs, spices, fresh onion, garlic.

How Stored: Refrigerated.

New Product–Documentation: Letter from Greg Lundh of Silverking Soya Foods in Nelson, BC, Canada. 1990. Dec. 14. Soya Nova Tofu Shop introduced this product in 1989.

7390. Product Name: Tamari Joe's Traditional Tamari Shoyu Soy Sauce.

Manufacturer's Name: Trader Joe's (Distributor).

Manufacturer's Address: 538 Mission St., South Pasadena, CA 91030. Phone: 818-441-1177.

Date of Introduction: 1989.

Ingredients: Water, whole soy beans, whole wheat, sea salt, grain alcohol (a natural preservative).

Wt/Vol., Packaging, Price: 16 fluid oz (1 pint) bottle. Retail for \$1.59 (8/89, Concord, California).

How Stored: Shelf stable.

New Product–Documentation: Label. 1989. 5 by 3 inches. Black, blue, and red on white. Self adhesive. "No artificial preservatives. Keep cool or white spots may appear. These are harmless. Skim them off. Naturally brewed in America in wood vats for about 2 years." Illustration of an Edo-period Japanese man and woman sitting at a low table at a meal.

7391. Product Name: [Viana Tempeh Spreads (Regular, or Chutney)].

Foreign Name: Viana Tempeh Pastete, Tempeh Chutney.

Manufacturer's Name: Viana Naturkost GmbH.

Manufacturer's Address: Neusserstr. 199, D-5000 Cologne 60, West Germany. Phone: (02233) 41323.

Date of Introduction: 1989.

Ingredients: Chutney: Tempeh*, apple-pear puree*, rolled oats*, shoyu*, spices, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 200 gm.

New Product–Documentation: Bernd Drosihn. 1989.

Tempeh: Ein traditionelles Nahrungsmittel mit Zukunft [Tempeh: A traditional food with a future]. p. 38. Says the company makes Tempehaufstriche (Tempeh Spreads).

Talk with Bernd Drosihn, founder of Viana. 1990.

April 7. He started to make tempeh in about Aug. 1989 after leaving Soyastern. He makes 3 types of tempeh, 2 tempeh burgers, and 2 tempeh spreads (introduced in 1990). The burgers and spreads are selling well.

Label sent by Bernd Drosihn. 1990. April 8. The company address is now Schmittenstr. 106, D-5030 Huerth 6, West Germany. "4.75 by 1.5 inches. Self adhesive. Reddish-purple, black, gold or orange, and light purple. A fruity, sharp spread for bread." Ingredients for the pastete are: Organic tempeh, onions, shoyu, herbs, spices, and sea salt. "A spicy spread for bread."

7392. Product Name: Mexican Braised Tofu.

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1989.

Ingredients: As of 1998: Wildwood tofu (filtered water, soybeans organically grown in accordance with the California Organic Foods Act of 1990, nigari/magnesium chloride, a natural firming agent), marinade (soy sauce, water, brown rice syrup, rice wine, honey, ginger powder), water, green bell peppers, soy sauce, corn, onions, honey, tomato paste, lemon juice, sesame oil, cilantro, cider vinegar, garlic, jalapeño peppers, herbs, and spices.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1989, and made at Wildwood's plant in Fairfax.

7393. Product Name: Savory Baked Tofu (Organic).

Manufacturer's Name: Wildwood Natural Foods.

Manufacturer's Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1989.

Ingredients: 1998: Wildwood Tofu (filtered water, organic soybeans grown in accordance with the California Organic Foods Act of 1990, nigari {magnesium chloride, a natural firming agent}), soy sauce, unsweetened apple juice, apple cider vinegar, mustard, onion powder, sesame oil, garlic powder.

How Stored: Refrigerated.

New Product–Documentation: Original Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1989 at Fairfax.

7400. Echols, John M.; Shadily, Hassan. 1989. An Indonesian-English dictionary. Third ed. Ithaca, New York, and London: Cornell University Press. xix + 618 p. 24 cm. [Ind; Eng]

• **Summary:** Soy-related words include: (1) bijan (sesame; also wijen or bijen). (2) bungkil kedelai (soybean meal). (3) kacang (pea, bean, peanut), including kacang asin (salted peanuts), kacang atom or kacang ganéfo (peanuts fried in batter), kacang goréng (peanuts fried crisp), kacang hijau or kacang ijo (mung bean), kacang kedelai (soybean), kacang tanah (peanut). (4) kécap (soy sauce; kecap ayam {chicken prepared with soy sauce}). Note: kecap manis is not mentioned here or at "manis." (5) kecipir (four-sided bean eaten as a vegetable [winged bean; *Psophocarpus tetragonolobus*]). (6) kedelai, kedelé (soybean). (7) oncom (fermented cake made from soybean sediment). (8) ragi (yeast, fermentation agent). (9) tahu (tofu, soybean curd), including tahu goréng (fried tofu), tahu isi (tofu filled with meat), tahu kuning (firm yellow tofu), tahu pong (deep-fried puffy tofu), tahu témpé (tofu and tempeh).

Note: This is the earliest English-language document seen (May 2012) that contains the term "deep-fried puffy tofu."

(10) tahua (a by-product of tofu similar to yogurt in consistency). (11) takoa, takoah (see takua). (12) takua (firm spiced tofu). (13) taosi (see tauci [fermented black soybeans]). (14) tapai, tapé (sweet cake made of slightly fermented rice or tubers). (15) tauci, tauco, taucyo (fermented bean paste [like miso] used as a condiment).

Note: This is the earliest (and only) English-language document seen (Feb. 2009) that uses the word "taucyo" to refer to Indonesian-style miso. "Taoci" probably refers to fermented black soybeans, not to miso.

(16) taugé (bean sprouts). (17) témpé (fermented soybean cake, tempeh; something trivial and unimportant or low grade in quality; *Dlm jaman penjajahan org Indo témpé pribumi* = "During the colonial times the Eurasians considered the natives to be no better than tempeh"). Address: 1. Ithaca, New York; 2. Jakarta, Indonesia.

7401. Food & Agriculture Organization (FAO). 1989. Utilization of tropical foods: Tropical oil-seeds. Rome, Italy: Food & Agriculture Organization of the United Nations (FAO). xiv + 82 p. 21 cm. Series: FAO Food and Nutrition Paper 47/5. *

• **Summary:** The 1st chapter, titled "Leguminous oil-seed crops, has these contents: Soybean (p. 1-35): The golden bean from China, varieties and production, soybeans in the tropics. Hydrolysis of soybeans using microbial enzymes. Nutritional and acceptability aspects of soybeans: Cooking

characteristics, soybean flavour, digestibility of soybeans. Soybean processing in eastern Asia: Fermentation of soybeans. Fermentation inoculants: Koji and ragi, angkak and masam [a green fermentation starter from Nepal, made from wheat and selected moulds], preparation of koji. Preparation of soy sauce: Traditional Japanese shoyu, other types of soy sauce. Fermented soybean pastes: Types of miso, preparation of miso koji, preparation of mame miso, preparation of hamanatto. Other fermented soybean products: Natto and thua nao. Indonesian tempe: Preparation of tempe ragi, production of tempe kedele, other types of tempe, domestic use and nutritional content of tempe. Foods fermented by molds: Role of moulds in food processing, food safety aspects. Non-fermented soybean products: Production of soy milk, improving soymilk flavour. Soybean protein products: Preparation of tofu, preparation of yuba. Soybean cheese products: Preparation of sufu ("The Chinese prepare a fermented soy curd called *sufu*, which resembles a moulded, soft-texture cheese." Red sufu is made using "red rice koji" (angkak)). Use of soy milk and tofu residues: Preparation of oncom tahu, preparation of meitauza. Use of soybean sprouts. Soybeans as a cash crop. Soybean as an oil seed: Problems of small-scale extraction. Solvent extraction of soybean oil: Economic aspects, extraction process, refining operations. Nutritional and organoleptic aspects of soybean oil. Commercial production of vegetable fats and oils: Solid shortenings, effects of hydrogenation, hardness of fats. Margarine production: Composition of margarine, manufacture of margarine. Production of soybean grits and flour. Commercial production of soybean protein products: Protein concentrates, protein isolates, economic aspects. Introduction of soyfoods at the village level: Snack foods, vegetable relish, pastes and flour. Preparation of soybeans at the village level: Reducing bitter flavours, preparation of soybean flour. Prospects for soybean products in the tropics.

Concerning the preparation of sufu (p. 21): "... the cubes [of tofu] are drained and heated for about 15 minutes at 100°C to sterilize them. The sterilized cubes are cooled, placed on trays, and inoculated with one of the following fungi: *Actinomucor elegans*, *Mucor lienialis*, or *Rhizopus chinensis* var. *chungyen*, depending on the type of 'cheese' to be produced. They are then incubated at 12-20°C for three to seven days. At that stage, the cubes become covered with a white mycelium and are known as *pehtzu* [*pehtze*].

"In the final stages, the cubes of *pehtzu* are transferred to ageing tanks, where they are immersed in a mixture of rice wine and salt, 2-5% sodium chloride, for forty to sixty days. The alcohol content of this 'dip' (approximately 10 percent) is much higher than that normally obtained by anaerobic fermentation using osmophilic [osmophilic] yeasts. The final product, after completing the ageing period, is soft and pale yellow, with a pleasant taste and aroma. It is often served with sesame oil. More pungent cheeses are prepared by related processes, by adding other components to the final

brine solution. These may include red rice koji, fermented rice mash, anise or pepper. An outline of a preparation from Thailand, using red rice koji to give a red sufu is shown in Figure 3" (a flow sheet, p. 22; Source: Narudom Boon-Long. 1983. "Traditional fermented food products." United Nations University (UNU) Workshop Paper, CFTRI, Mysore, India). The peanut from Peru (p. 36+).

• **Summary:** Contents: Introduction. History. Present soy sauce situation. Change of soy sauce manufacturing methods from indigenous to modern processing. Microbiology and biochemistry. Application of new biotechnology for soy sauce manufacture. Forecast. References. Address: Kikkoman Corp., Chiyoda-ku, Tokyo, Japan.

7403. Fukushima, Danji. 1989. Historical development of soy sauce and fermented black soybeans in China (Document part). In: K. Steinkraus, ed. 1989. Industrialization of Indigenous Fermented Foods. New York and Basel: Marcel Dekker, Inc. xii + 439 p. See p. 2-8.

• **Summary:** "1. Chiang. In 1979, Kinichiro Sakaguchi proposed a unique hypothesis regarding the origin of soy sauce and miso as a result of historical biochemical investigations, and this hypothesis was later introduced by this author in English (Fukushima, 1985a, 1986b). However, new literature on the origin of soy sauce and miso appeared based on more detailed historical evidence (Pao 1982a, 1982b; 1984a, 1984b). According to these papers, soy sauce was derived from a Chinese food called 'chiang' ('hishio' in Japanese).

"Chiang is a tasty mash product and does not come in a liquid form. Therefore chiang belongs in the category of 'miso' in Japan. The first record of chiang can be found in the book entitled *Chou-li* (*Shurai* in Japanese) by Chou-kung (*Shuko* in Japanese), which was published around 1,000 B.C. in the Chou (*Shu* in Japanese) dynasty (1,222 BC to 249 BC). This book covers the matters on the early years of the Chou dynasty in ancient China (about 3,000 years ago). According to this document, chiang was made by the following procedure. First, yellow aspergilli were grown on millet. (Such mold-grown cereals are called 'koji' in Japanese.) Then the millet koji and the meat of fish, flesh, or fowl and salt were mixed with a good liquor in a bottle and kept for 100 days. Soybeans were not used in this chiang. The first literature in which soybeans appeared as a substitute for meat in chiang was the *Ch'i-min Yao-shu* (*Saimin-Yojutsu* in Japanese) by Chia Ssu-hsieh (Ka Shikyo in Japanese), the world's oldest encyclopedia of agriculture, published in 535 AD in China. This indicates that the

chiang in which soybeans was used originated sometime between the Chou and Han dynasties, when the cultivation of soybeans prevailed. The meats in the chiang described in *Chou-li* were gradually replaced by soybeans in the course of time and further cereals such as wheat, barley, and rice came to be used instead of millet, resulting in the production of many types of chiang. In the process of making chiang during these periods, soybeans were not used as a raw material in koji; rather they were added to the harvested koji prepared from the other cereals. The soybeans were digested by the enzymes of the koji. This digestion mixture was the final product, which was in the form of a mash. The liquid products which belong to the category of soy sauce did not appear in the literature before the later Han dynasty (about 25-220 A.D.).

"There is a description of the liquid product which was made by separating the liquid portion from the chiang in *Ssu-ming Yueh-ling* (*Shimin-Getsurei* in Japanese), published by Ts'ui Shih (Sai Shoku in Japanese) in the later Han dynasty. This liquid was called chiang ch'ing which means 'clear chiang.' The manufacturing processes of chiang and chiang ch'ing are shown in Figs. 1 and 2. Chiang ch'ing is a prototype of soy sauce but it differs from 'chiang-yu' which means literally shoyu or soy sauce in the Chinese characters. The first appearance of the name of chiang-yu was in *Shan-chia Ch'ing-kung* (*Sanya-Seikyo* in Japanese) by Lin Hung (Rin Ko in Japanese) in the Sung dynasty (960-1127 AD).

"The first record indicating use of all the raw materials to prepare koji for soybean chiang appeared in the *Nung-sung I-shin Ts'o-yao* (*Noso-Ishoku-Satsuyo* in Japanese) by Lu Ming-Shan (Ro Meizen in Japanese), published in the Yuan (Gen in Japanese) dynasty (1271-1368 AD). The flow sheet of this soybean chiang is shown in Fig. 3." (In this process, soybeans are roasted, dehulled, cooked, then mixed with wheat flour and spontaneously molded to form koji. The koji is dried in the shade, winnowed, and pounded, then mixed with spices and salt water to form a mash, which is insulated and aged to make the soybean chiang.) The chiang-yu described in *Pen-ts'ao Kang-mu* (*Honso-Komoku* in Japanese), published in 1590 by Li Shih-chen (Ri Jichin in Japanese) in the Ming (Min in Japanese) dynasty, was also made with koji manufactured by using soybeans and cereals (Fig. 4). (In this process soybeans were cooked in water, mixed with wheat, and spontaneously molded to form koji. Salt water was mixed in with a paddle, then the mash was insulated and aged. Finally it was filtered to make chiang-yu). The ratio of soybeans to wheat in the koji making was 3:2. This ratio is very close to that used in making regular Japanese shoyu, which is made by using equal amounts of soybeans and wheat, as will be described later. The general manufacturing methods of soy sauce in the Ch'ing (Shin in Japanese) dynasty are recorded in *Ch'ing-yuan Lu* (*Seienroku* in Japanese), written by Li Hua-nan (Ri Kanan in Japanese). Cooked soybeans and uncooked wheat were the

raw materials used in koji making. The resultant koji was mixed with brine. After aging, the soy sauce was collected by pressing a deep bamboo colander into the aged mash and ladling out the liquid which had accumulated.

"The original chiang was a mash-type product made with a koji that had been prepared from wheat, barley, rice, etc., and not from soybeans. Therefore, the soybean constituents were only changed through the in vitro biochemical reaction by the enzymes from the mold grown on the cereals. Accordingly, the degree of change of the soybean constituents was not very great and most of the soybean proteins were partially hydrolyzed into polypeptides through the in vitro enzyme action. The degree of liquefaction was not very large and the flavor was not as strong. In the case of chiang-yu, however, mold is grown on both the soybeans and cereals and, as a result, the soybean constituents are changed largely through the biochemical reaction both in vivo and in vitro by the mold throughout the entire process of manufacturing. Accordingly, much of the soybean constituents can be liquefied. The soybean proteins are hydrolyzed to single amino acids and, therefore, the flavor is sharp and strong in chiang-yu. Thus, it can be concluded that (a) the progenitor of miso is chiang, originated in China about 3,000 years ago; (b) the progenitor of soy sauce is chiang ch'ing, originated in China about 2,000 years ago; (c) chiang ch'ing had developed into chiang-yu in China and the regular type of shoyu called koikuchi in Japan at least 1,000 years ago.

"It is an amazing fact that the Chinese had utilized the enzyme action of mold in food manufacturing as early as 3,000 years ago. They deliberately selected yellow aspergilli from many types of aspergilli because they best facilitated the manufacture of chiang. If the definition of 'biotechnology' is to make the products necessary for the welfare of humans by using life phenomena, it can be said that people in ancient China had already produced foods by biotechnology as early as several thousand years ago. In this sense, it is not an exaggeration to say that soy sauce was a pioneer of the actual application of biotechnology.

"2. Shih. Shih is a fermentation product of soybeans, the form of which is a tasty nugget with or without salt. Shih is classified into five types by the kind of microorganism used in its manufacture. Those are *Aspergillus* type (called shih in the areas of Pei-ching, Hu-nan sheng, and Taiwan; and called hamanatto in Japan), *Mucor* type (shih in the area of Shan-tung sheng and natto in Japan), *Rhizopus* type (tempeh in Indonesia), *Bacillus* type (shih in the area of Shan-tung sheng and natto in Japan), and *Neurospora* type (oncom in Indonesia). The shih described here is the shih of *Aspergillus* type, which relates to soy sauce.

"The earliest literature in which shih appeared is *Shih-chi* (*Shiki* in Japanese) by Ssu-ma Ch'ien (Shiba Sen in Japanese), which was published in 85 BC. Shih is also described along with chiang in *Shuo-wen Chie-tzu*

(*Setsubun-kaiji* in Japanese) by Hsu Shen (Kyoshin in Japanese), the oldest dictionary in China published in 121 AD in the later Han dynasty. The raw material of the shih is soybeans as shown in Fig. 5. (In the process described in the *Shi-ching* by Hsie Feng (which survives only in the *Ch'i-min yao shu*), soybeans are washed, soaked, drained, and steamed. The cooked soybeans are cooled, then spread, furrowed, and piled. The last 3 steps are repeated 3 times a day for 3 days until the beans have become spontaneously molded. The resulting soybean koji is mixed with soybean cooking liquid, barley koji, and salt, put into an earthen pot, sealed, and insulated. It is then dried in the shade, mixed with a mulberry leaf extract, and steamed. The last 3 steps are repeated 3 times, resulting in salted soybean shih. In the second process described in the *Ch'i-min yao-shu*, soybeans are winnowed, cooked, drained, and cooled. They are piled, the temperature is measured, and then they are stirred. The last 3 steps are repeated 3 times until they are spontaneously molded. They are then spread and furrowed to make soybean koji. This is winnowed, washed, drained, dried, moistened, piled, fermented, and dried to give unsalted soybean shih.) Therefore the resultant shih (soybean nugget) contains a high amount of protein. In shih, much of the soybean constituents are present in a liquid state. The soybean proteins are hydrolyzed to single amino acids and, therefore, the flavor is sharp and strong. The flavor constituents of shih can be extracted easily by a salt solution. The original shih was served as nuggets; the brine extract came to be used as a seasoning gradually. In *Chi-min Yao-shu* (535 AD), there is a description of about 70 kinds of cookeries using shih extracts. It should be mentioned that shih and its brine extract developed into today's tamari shoyu in Japan." Address: Managing Director, Kikkoman Corp., Chiyoda-ku, Tokyo, Japan.

7404. Fukushima, Danji. 1989. Introduction of soy sauce to Japan (Document part). In: K. Steinkraus, ed. 1989. *Industrialization of Indigenous Fermented Foods*. New York and Basel: Marcel Dekker, Inc. xii + 439 p. See p. 9-10.

• **Summary:** "There is no literature on the exact time *chiang* and *shih* (fermented black soybeans) were introduced into Japan. In 702 AD, however, the Hishiotsukasa, the Bureau for the Regulation of Production, Trade and Taxation of Hishio, was established by the Taiho-Ritsuryo, one of Japan's earliest constitutions. This bureau was located at the imperial palace and produced various kinds of *hishio* (*chiang*) which was consumed by the imperial household. Among these products, the word 'misho' is found with the words 'chiang' and 'shih.' It should be noted that the word 'misho,' which is very close to the present word 'miso,' is found as one of the products in the bureau. *Misho* is also found in *Engishiki*, the enforcement regulation of the statutes, which was completed in 927 AD and became effective in 967 Japan. The first appearance of the present word 'miso,' was in

Nihon-Sandai-Jitsuroku, a Japanese dictionary published in 1597 during the Muromachi period. In the Edo period (1603-1867), several pieces of literature describing miso and shoyu were written, such as *Wakan Sansai Zue* (Narushima, 1712), *Honcho Shokkan* (Hitomi, 1695), *Mankin Sangyotai* (Miake, 1732), *Yoshu Fushi* (Kurokawa, 1682), and the like. The manufacturing processes described in these works are close to the present methods for producing miso and *koikuchi-shoyu*, thus it is presumed that the basic manufacturing processes of today's Japanese soy sauce had been formed by the early 17th century.

"In the second half of the 17th century, large-scale, industrial production of soy sauce began for consumption in large cities such as Edo (now Tokyo). Surprisingly enough, there are written records that soy sauce had been exported to India, southeast Asia, and Europe as early as the middle of the Edo period [the Edo Period was from 1600 to 1868] (Noda Shoyu Co. 1953). According to documents of the Dutch East India Company stored in the Archives in the Hague, Holland, soy sauce was exported [by Dutch merchants] from Nagasaki in the Kyushu district of Japan to several parts of India: Coromandel in 1668 and 1716, Ceylon in 1670 and 1699, Surat in 1717, Bengal in 1699, and Nagappattinam [Nagapattinam] in 1699. Carl Thunberg, a ship's doctor for the Dutch East India Company who stayed in Japan for a year and a half from 1775 to 1776, published a book of travels in 1796 (Thunberg, 1796). According to his book, a large quantity of soy sauce was shipped to Batavia (the former name for Jakarta [and Dutch capital of the East Indies]), India, and European countries." Address: Managing Director, Kikkoman Corp., Chiyoda-ku, Tokyo, Japan.

7405. Hesseltine, C.W. 1989. Fermented products. In: Ruth H. Matthews, ed. 1989. *Legumes: Chemistry, Technology, and Human Nutrition*. New York and Basel: Marcel Dekker, Inc. x + 389 p. See p. 161-85. [29 ref]

• **Summary:** Contents: Introduction: Fermented legume products. A table lists about 85 products with the vernacular name, legume from which it is made, country, and microorganism(s) used. Products made from soybeans include: Miso (bean paste), Shoyu (soy sauce), Sufu (Chinese cheese), Ontjom (Oncom), Hamanatto, Idli (with and without soy), Natto, and Tempeh. Address: Human Nutrition Information Service, USDA, Hyattsville, Maryland (and NRRC, Peoria, Illinois).

7406. Hesseltine, Clifford W. 1989. Fermented products. In: Ruth H. Matthews, ed. 1989. *Legumes: Chemistry, Technology, and Human Nutrition*. New York, NY: Marcel Dekker. x + 389 p. See p. 161-85. [29 ref]

• **Summary:** Contents: Introduction. Miso (bean paste). Shoyu (soy sauce). Sufu (Chinese cheese). Ontjom (oncom). Hamanatto (black beans [fermented black soybeans]). Idli. Natto. Tempeh (tempe).

Contains 3 tables and 9 figures (all flow sheets).
Address: Retired, Agricultural Research Service, USDA,
Peoria, Illinois.

7407. ISCAH (Instituto Superior de Ciencias Agropecuarias de la Havana) Video. 1989. La soya—Mito o realidad en la agricultura Cubana [The soybean—Myth or reality in Cuban agriculture (Color videotape)]. Agricultural College of Havana, Cuba: ISCAH. 17 minutes. [Spa]*

• **Summary:** This film was shown at agricultural cooperatives, schools, and ministries; it was not shown on television. Some 200,000 tons of soybeans are now being imported to Cuba. The rhizobium bacteria on soybean roots fix nitrogen in the soil, thus creating biofertilizer and reducing imports of commercial fertilizer. This biofertilizer works for both crop rotation and intercropping. Research on soybeans is being conducted at INCA (*Instituto de Ciencia Agrícola*), the research center for agriculture in Havana, under the Ministry of Higher Education.

In 1986 some 138 co-operatives planted soybeans. These were mainly vegetable, dairy, or citrus enterprises located in 34 principalities in 6 provinces. Some of the soybeans were mixed with bagasse from sugar cane for use as animal feeds. In Cuba, one *quintale* (pronounced keen-TAL-ay) = 100 pounds weight. Sacharina is a type of bagasse which may include soya. Soya is called “green gold,” because it requires low agricultural inputs, brings much profit, and is the world’s least expensive source of protein. Photos show commercial soy products: (1) Taoro, a type of soy sauce (*salsa de soya*) presently made in Cuba. (2) Three flavors of bottled soymilk, which is good for infants allergic to cow’s milk. (3) Soy yogurt in 1 liter bottles.

Some very interesting archival film footage shows Fidel Castro speaking on 3 April 1959 at the opening of a vegetable oil plant in Cuba. This was the first industrial enterprise in Cuba built after the Revolution. After cutting the ribbon, Fidel says: “We are going to start preparing the way for the planting of soybeans, so that we don’t have to import any more from abroad.” The video narrator then adds: “After 30 years of this, we think that there are no technical limitations to the development of this crop which can today prevent us from turning Fidel’s words into reality.” Address: Havana, Cuba.

7408. Leneman, Leah. 1989. Slimming the vegetarian way. Revised and reset ed. Wellingborough, Northamptonshire, England: Thorsons Publishers Ltd. 144 p. Index. 20 cm. 1st ed. 1980.

• **Summary:** The menus in this natural-foods, vegan cookbook are designed for 1 person and the daily calories intake is kept at about 1,000 calories. The book takes a positive attitude toward dieting by focusing on those foods you can eat, rather than those you should avoid. Each “menu” consists of breakfast, lunch, and dinner for 1 day.

For each meal there is one column for Imperial (Metric) measurements, one for American measurements, and one for calories, with a calories for each meal and for the day. There are menus for each of the four seasons plus chapters on crash diets, desserts, and a vegetarian wholefood calorie chart.

The preface to the new edition notes: “The greatest change which has occurred since the first edition of this book appeared has been the phenomenal proliferation of soya foods (soyfoods in American parlance). Tofu is arguably the best friend a slimmer ever had, for no other food so low in calories and high in protein is as versatile as tofu. Tempeh is another fine soya food for slimmers, though as it is not as readily available as tofu, I have confined its use to only one recipe. Since soya milk and yogurt are now so easy to obtain, I have given them as alternatives to the dairy versions, so that vegans, and others trying to cut down on dairy produce, will be able to use the book in the same way as lacto-vegetarians.”

Soy-related recipes include: Pineapple tofu salad (p. 36). Tofu celery loaf (p. 39). Tofu-stuffed aubergine (eggplant, p. 66). Scrambled egg or tofu, sausalata and tomato (p. 89, 118). Tofu slices on toast with creamy gravy (p. 98). Miso soup with tofu (p. 102). Spaghetti with tempeh and mushroom sauce (p. 127). Vegetable charlotte with smoked tofu (p. 129). Soya milk and soya yogurt are always listed as alternatives to skim milk or yogurt from cows. TVP is used as an ingredient in many recipes, and “Tamari (soy sauce)” is widely used as a seasoning. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

7409. Matthews, Ruth H. ed. 1989. Legumes: Chemistry, technology, and human nutrition. New York, NY: Marcel Dekker. x + 389 p. Illust. Index. 24 cm. Series: Food science and technology, No. 32. [150+ ref]

• **Summary:** Contains 10 chapters by various authors. Chapters 4 and 6 are cited separately. 1. Culture and genetics of grain legumes, by Edgar E. Hartwig (for soybeans, see p. 1-5). 2. Harvesting and storage of legumes, by S.S. Kadam, D.H. Salunkhe, and C.Y. Kuo. 3. Refined oils, by Clyde E. Stauffer. 4. Isolated soy proteins, by D.H. Waggle, Fred H. Steinke, and Jerome L. Shen. 5. Legume protein flour and concentrates, by Joseph G. Endres (for soybean protein flour, see p. 140-45; for soybean protein concentrate, see p. 151-53). 6. Fermented products, by Clifford W. Hesseltine. 7. Nutrient composition of raw, cooked, canned, and sprouted legumes, by Jörg Augustin and Barbara P. Klein (for soybeans, see p. 198-203, 208-11). 8. Nutrient content of other legume products, by David B. Haytowitz and Ruth H. Matthews (for soybeans, see p. 219-25, 229-38). 9. Animal feed uses of legumes, by Park W. Waldroup and Keith J. Smith (for soybean meal and whole soybeans, see p. 247-64). 10. Antinutritional factors, by Irvin E. Liener. Dr. Liener notes that plants did not evolve to serve humans or animals. Their main concern is their own survival. Thus,

nature has given them the genetic capacity to synthesize toxic substances to help ensure their own survival against predators of all kinds such as insects, fungi, or animals including humans. His Table 1 titled “Distribution of protease inhibitors present in legumes” (p. 341) shows that they are present in most legumes.

Other legumes discussed include peanuts, dry beans, dry peas, lentils, chickpeas, and winged beans. Address: Human Nutrition Information Service, USDA, Hyattsville, Maryland.

7410. Reddy, N.R.; Salunkhe, D.K. 1989. Fermentation. In: D.K. Salunkhe and S.S. Kadam, eds. 1989. CRC Handbook of World Food Legumes: Nutritional Chemistry, Processing Technology, and Utilization. Vol. III. Boca Raton, Florida: CRC Press, Inc. 323 p. See p. 177-217. [233* ref]

• **Summary:** Contents: Introduction. Soy sauce: Types of soy sauce, preparation of *Shoyu* composition, safety. Miso: Preparation, composition, nutritional quality, miso-like products. *Sufu*: Preparation, microorganisms, biochemical changes and composition, toxicology, method of preparation, chemical composition, physical properties, nutritional quality. *Tempeh*: Preparation, nutrient composition, nutritional quality, antinutritional and/or toxic factors, *tempeh* and *tempeh*-like foods from other legumes. Address: 1. Community Research Service, Atwood Research Facilities, Kentucky State Univ., Frankfort, Kentucky; 2. Dep. of Nutrition and Food Sciences, Utah State Univ., Logan, Utah.

7411. Routhier, Nicole. 1989. The foods of Vietnam. New York, NY: Stewart, Tabori & Chang. 239 p. Foreword by Craig Claiborne. Illust. (Photos by Martin Jacobs, mostly color). Index. 29 cm.

• **Summary:** An excellent and graphically beautiful book, with more than 150 authentic, traditional Vietnamese recipes. The book is dedicated to the fond memory of her mother, Tran-Thi-Cuc. Vietnam’s cooking has been influenced by the various nations that have occupied or conquered the country over the Centuries—and especially the Chinese and French. Yet the Vietnamese have been able to assimilate each of these imports to create their own unique cuisine.

Introduction (by the author): Vietnam “is shaped like an elongated letter S, with two wide river deltas, the Red River delta in the north and the Mekong River delta in the south, separated from each other by a long, narrow stretch of mountainous coastal land.” The deltas are the country’s most fertile, agriculturally productive, and populous regions. The Monsoons (seasonal winds) produce a dry winter season and a wet summer. The north has a temperate climate and a cold winter, whereas the south is tropical.

Vietnam’s land area is slightly smaller than that of Japan, and about three fourth’s the size of California.

Vietnamese food and cookery owes much to the French

colonialists, who ruled the country for almost a century (1859-1954). “In the old trading port of Cholon, the French built a new city as the central market for all of Indochina, and Saigon (now Ho Chi Minh City) was dubbed ‘the Paris of the Orient’” (p. 8-9).

“The Vietnamese are quick to point out that their cuisine, like their country, is divided into three regions, each with a distinct culinary tradition.” Yet these regional differences are not as important as they are in China. “In the north, the influence of China is most evident.” One popular northern dish is stuffed bean curd (*Dau Hu Nhoi*). The main city in Central Vietnam is Hue, where cookery has been brought to a high level of sophistication. The cookery of the tropical south is simpler than that of the north and center, but also spicier, and the food consists of a wealth of tropical fruits, vegetables, herbs and spices. The French influence is best seen here.

Soy related recipes: Color photo of crisp fried bean curd in tomato sauce (p. 15). Color photo of Bean curd and Chinese chive buds soup (*Canh dau phu he*, with 6 ounces soft bean curd {tofu}, p. 50; recipe p. 55).

The chapter titled “Vegetarian recipes” (p. 167-89) contains many tofu recipes. Vegetarian stir fry (*La han chay*, with 2 squares {8 ounces} semisoft bean curd {tofu}, p. 168). Crisp-fried bean curd in tomato sauce (*Dau phu soy ca chua*, with 1 pound firm bean curd {tofu}, p. 171). Braised bean curd (*Dau phu kho*, with 1 pound firm bean curd {tofu}, p. 172). Stir-fried bean curd with lemon grass on crisp cellophane noodles (*Dau phu xao xa ot chay*, with 2 pounds firm bean curd, p. 179). Stuffed bean curd (*Dau phu nhoi*, with 2 pounds firm bean curd {tofu}, p. 185. Note: “This centuries-old recipe is a Vietnamese adaptation of a well-known Hakka dish; there was a mass migration to northern Vietnam by both Cantonese and Hakkas [from southern China] in the 17th century).

Desserts: Jellyed bean curd with ginger syrup (*Dau hu nuoc duong*, with ½ cup dried soybeans, ¼ cup rice flour, and 1 teaspoon gypsum {see p. 232; this calcined calcium sulfate is sold at Chinese pharmacies} dissolved in 1 teaspoon cold water in a small water to curd / coagulate the hot soymilk, p. 201).

Sauces: Sweet and sour dipping sauce (*Soy chua ngot*, with 2 tablespoons soy sauce and 2 tablespoons *nuoc mam* {Vietnamese fish sauce}, p. 214). Soybean and ginger sauce (*Nuoc tuong*, with ¼ cup *tuong* {fermented soy bean sauce, see p. 234} and 1 tablespoons *nuoc mam* {Vietnamese fish sauce}, p. 215).

Appendix (p. 228-36) includes a glossary of basic Vietnamese foods. Items marked with an asterisk are essential ingredients: Bean curd / tofu (*dau hu*. “You can do absolutely anything with bean curd,...” The three types are pressed, firm, and semi-soft). Chile paste (*tuong ot tuoi*. “A fiery hot mixture of mashed fresh red chilies, garlic, salt and soybean oil. Do not confuse this product with the Chinese

hot bean paste). Fish sauce (nuoc mam. It is like Thai nam pla but stronger). Gypsum (*thach-cao*): “Chemically known as calcined calcium sulfate,...” Hoisin sauce (A “sweet, piquant brown paste made from soybeans, red beans, sugar, garlic, vinegar, chile, sesame oil and flour”).

Oyster sauce (Made from oyster extract, soy sauce, sugar and vinegar). Soybeans, dried (Dau nanh. Sold in oriental groceries). Soybean sauce (*tuong*. This traditional fermented Vietnamese sauce is made from ground soybeans, water, roasted rice flour, and salt. “It is sold, bottled, only in Vietnamese groceries.” Do not confuse *tuong* “with the saltier, thicker Chinese ground bean paste.” Vietnamese vegetarians commonly use *tuong* in place of fish or shrimp sauces). Soy sauce (*si dau*. Where soy sauce is called for in this cookbook, use Japanese Kikkoman or “light” soy sauce. Regular Chinese soy sauce “is dark and stains food black”).

Concerning “red beans,” Andrea Nguyen, food writer from Vietnam says (March 2012): Red beans are “more like Chinese *xiao dou* [than Japanese azuki beans]—and are called *dau do*. Typically seen in sweet soups. They’re not as important as mung beans (*dau xanh* / green beans).”

About the author: Nicole “was born in Saigon to a Vietnamese mother and French father. At a very early age she developed a great interest in cooking from her mother, who owned a [small, French-Vietnamese] restaurant in Laos. As a teenager, Ms. Routhier lived in France and Belgium, where she became versed in European styles of food preparation” (with portrait photo, inside rear dust jacket). Although she had a formal French education, she spoke only Vietnamese with her mother and nanny at home. She learned about cooking from her nanny, a native of Hue, and her mother, from Haiphong, both home cooks of the first order. In Laos, when the chef let her help in the kitchen of her mother’s restaurant, she knew what her true calling would be. She grew up during the Vietnam war, and experienced hard times, especially after her father left home. “During the war, food was scarce and we ate what we could. Sometimes we had to hide in the village bomb shelter for days if not weeks on end, and rice was often the only food available... I was hungry and terrified at the idea of lacking food. That childhood fear never abandoned me.” Later she knew better times, traveling with her family in Europe and Asia, and learning about food. “In Vietnamese tradition (as in most of Southeast Asia), recipes are never written but simply taught to the children by letting them help in the family kitchen” (from the Preface, p. 5). In the mid-1980s she had the good fortune to meet Craig Claiborne. When they first met, she was a student at the Culinary Institute of America in Hyde Park. She subsequently became a professional chef and cooking teacher (from the Foreword, by Craig Claiborne, written May 1989, p. 4) She is married to Anthony Laudin, and now teaches cooking in Manhattan, New York City. Address: Professional Chef and Culinary Teacher in New York City.

7412. Simpson, J.A.; Weiner, E.S.C. 1989. The Oxford English dictionary. 2nd ed. 20 vols. Revised by J.A. Simpson and E.S.C. Weiner. Oxford, England: Clarendon Press. [30 ref]

• **Summary:** Integrates the original OED and its 4-volume supplement (publ. 1972-86). Includes 5,000 new words and meanings. Completely redesigned and reset. Following each “headword,” it now uses the International Phonetic Alphabet to represent pronunciation. Over 500,000 words are defined with 2,400,000 illustrative quotations and superb etymologies. This work is more than five times the size of any other English dictionary. The full set sells for \$2,500. The English language grows by an estimated 450 words a year. Amazingly, the name James A.H. Murray does not appear on the title page of the various volumes.

Soy-related terms (soya, soya, soya bean, soybean) are in vol. XVI, p. 86.

Note: As of Nov. 1998, the CD-ROM version of the OED costs \$395.00. To order call 1-800-451-7556. Address: England.

7413. Simpson, J.A.; Weiner, E.S.C. 1989. The Oxford English dictionary. 2nd ed.: Ketchup. Oxford, England: Clarendon Press.

• **Summary:** Under the word “ketchup,” the etymology is traced back to Chinese (Amoy dialect) *kôechiap* or *kê-tsiap* brine of pickled fish or shellfish (Douglas *Chinese Dictionary* 46/1, 242/1). Malay *kêchap* (Dutch spelling *ketjap*), which has been claimed as the original source (Scott *Malayan Words in English*, p. 64-67), may be from Chinese.

First entry: 1711. Lockyer.

Note This is the earliest English-language document seen (Jan. 2006) that contains the term “kêchap.” Address: England.

7414. Simpson, J.A.; Weiner, E.S.C. 1989. The Oxford English dictionary. 2nd ed.: Worcestershire. Oxford, England: Clarendon Press.

• **Summary:** The earliest entry for Worcestershire sauce is: 1843. *Naval & Military Gazette* [England]. 1 April, p. 208, col. 2. Advertisement for “Lea and Perrin’s ‘Worcestershire Sauce’, prepared from a recipe of a nobleman in the country.” There are also entries for 1870 (in *Study Wind*, Lowell 1886) and 1889 (*Falling in Love*, by G. Allen). Address: England.

7415. *SoyaScan Notes*. 1989. Terms related to soyfoods, soybeans, and the soybean industry: Library of Congress subject headings and call numbers (Overview). Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Two different types of call numbers are used by American libraries for cataloging their books. Most larger libraries use the Library of Congress call numbers (LC numbers, which start with two letters) and many smaller

libraries use the Dewey Decimal System (Dewey numbers, which contain only numbers).

The following are from the Library of Congress Subject Headings (12th ed. 1989) and the Library of Congress Classification Schedules. The first edition of Class S (Agriculture), for example, was published in 1911, and the 4th edition in 1982. BT = Broader terms. NT = Narrower terms. UF = Use for. May Subd Geog = May subdivide geographically, e.g., Soy sauce industry-Japan.

Class H is Social sciences and economics. Class Q is science. Class S is agriculture (SB is plant culture. SB205 is field crops, legumes). Class T is technology (TX includes nutrition). Class Z is bibliography and library science.

 The following soy-related terms have a subject heading but no LC call number: Miso industry, Natto industry, Soy sauce, Soybean flour, Soybean glue, Soybean meal, Soybean milk, Soybean products.

7416. Steinkraus, Keith H. ed. 1989. *Industrialization of indigenous fermented foods*. New York, NY: Marcel Dekker. xii + 439 p. 24 cm.

• **Summary:** This book contains the following chapters on soyfoods: 1. Industrialization of fermented soy

sauce production centering around Japanese shoyu, by Danji Fukushima. 2. Industrialization of Japanese miso fermentation, by Hideo Ebine. It also contains chapters on the industrialization of the production of sake, tapai, African beers, magehu, ogi, and gari. The final chapter is titled “Industrialization of indigenous fermented food processes: Biotechnological aspects.”

The book is dedicated “To the memory of Prof. Andre G. van Veen, a pioneer in the study of indigenous fermented foods.” Address: Inst. of Food Science, Cornell Univ., Geneva, New York.

7417. **Product Name:** [Marinated Tofu].

Foreign Name: Mariniert Tofu.

Manufacturer's Name: Byodo Naturkost GmbH.

Manufacturer's Address: Hirschbergstr. 9, D-8000 Munich 19, West Germany. Phone: (089) 16 85 70.

Date of Introduction: 1989?

Ingredients: Water, organically grown soybeans, tamari and spices, apple vinegar, beet sugar syrup, nigari (Traditional Japanese).

Wt/Vol., Packaging, Price: 200 gm plastic bag.

How Stored: Refrigerated.

New Product—Documentation: Label sent by Anthony Marrese. 1990. April 15. 4 by 3 inches. Blue on white, printed on a 7 inch square plastic bag. “Sweet & sour. Serve cold in salads or enrobed with flour like Bratschnitte. A fresh soy specialty product. Store at 4-8°C. Member of the Natural Food Assoc. (Bundesverband Naturkost e.V.).”

7418. **Product Name:** [GranoVita Soya Mignon].

Foreign Name: GranoVita Soja-Mignon.

Manufacturer's Name: DE-VAU-GE Gesundheitswerk GmbH.

Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

Date of Introduction: 1989?

Ingredients: Soy protein, water, onions, rolled oats, corn germ oil, egg whites, modified starches, seasonings, yeast, salt, spices, sesame, sugar, fines herbs, smoked spices, carob flour (thickener), caramel. Sauce: Water, modified starches, seasonings, wheat flour, soy sauce, salt, sugar, flavor intensifier (MSG?), onions.

Wt/Vol., Packaging, Price: 375 gm can. Retail for DM 6.65.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 100 gm.: Calories 169, protein 11 gm, usable carbohydrates 11 gm, fat 9 gm.

New Product—Documentation: Label sent by Anthony Marrese. 1989. 9 by 4 inches. Green, red, white and black on yellow-green. Color photo on front panel shows the hamburger-like patties on a plate with vegetables. Neuform certification symbol. “Vegetarian. Contains no flesh. Four vegetarian ground steaks in a piquant sauce.”

7419. Product Name: [GranoVita Soya Sausage for Frying and Grilling {Meatless}].

Foreign Name: GranoVita Sojawurst zum Braten und Grillen.

Manufacturer's Name: DE-VAU-GE Gesundkostwerk GmbH.

Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

Date of Introduction: 1989?

Ingredients: Water, vegetable oils and fats in changing amounts, onions, egg protein, wheat protein, soy protein, spices, seasonings, salt, vegetable thickeners (carob bean meal and guar seed meal), wheat flour, glucose, apples, smoke seasoning, whole soybean product (Vollsoja-Erzeugnis), rolled oats, fine Graham bread crumbs, herbs, milk protein, soy sauce, caramel.

Wt/Vol., Packaging, Price: 200 gm cellophane bag. Retail for DM 3.48.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 10 gm, fat 24 gm, usable carbohydrates 4 gm, calories 272. 1 BE (Broteinheit, or diabetic exchange) = 300 gm.

New Product–Documentation: Label sent by Anthony Marrese. 2 by 5 inches. Brown, red, green, and black on white. "Contains no flesh. Prepare in the frying pan or on the grill." An illustration shows 2 sausages in a pan. Neuform certification symbol.

7420. Product Name: [Kolett's Soy Sauces (Italian, Mexican, Argentinian)].

Foreign Name: Kolett's Salasa de Soja (Italiana, Mejicana, Argentina).

Manufacturer's Name: DE-VAU-GE Gesundkostwerk GmbH.

Manufacturer's Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

Date of Introduction: 1989?

Wt/Vol., Packaging, Price: Glass jar.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Manufacturer's leaflet.

1989? GranoVita. Sin conservantes. No colorantes.

Alimentos Naturales. A color photo shows the three jars and labels. An illustration (line drawing) on the front panels shows a smiling, rotund Italian-looking chef. "100% vegetarian." These products are probably for export to Italy.

7421. Product Name: [Unicorn Tofulini {Tofu Tortellini}, and Ravioli].

Foreign Name: Unicorn Tofulini, und Ravioli.

Manufacturer's Name: Firma Unicorn (Marketer).

Manufacturer's Address: Pavillionstrasse 45, D-6630 Saarlouis, West Germany. Phone: 0 68 31 / 28 55.

Date of Introduction: 1989?

Ingredients: Dough: Whole wheat semolina*, water.

Filling: Smoked tofu*, tofu* (a soybean product), bread crumbs, roasted onions*, shoyu (soy sauce), sea salt, spice mixture*. * = Organically grown.

Wt/Vol., Packaging, Price: 250 gm vacuum pack. Retail for DM 4.95.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 9.2 gm, fat 2.8 gm, usable carbohydrates 45.8 gm, calories 245.

New Product–Documentation: Label sent by Anthony Marrese. 1989? 4 by 5.75 inches. Self adhesive with a hole/window in the middle. Red and green on white. "Without meat or eggs. Whole grain dough. Boil in salted water or vegetable bouillon for 15 minutes. Serve with your favorite margarine, herbs, or sauces. No preservatives." Logo is a unicorn head with an ear of wheat for a mane.

Letter from Bernd Drosihn. 1990. May 10. This company just markets tofu products, they do not make any.

7422. Product Name: [Hensel Soyfoods: Tofu Ready to be Cooked and Fried (With Herbs in Spicy Marinade)].

Foreign Name: Hensel Soja-Kost: Tofu koch- und bratfertig (Kraeuter-pikant mariniert).

Manufacturer's Name: Henselwerk GmbH. Div. of Walther Schoenenberger.

Manufacturer's Address: Muehlstrasse 5-7, Postfach 1120, D-7037 Magstadt, West Germany. Phone: 07159/4906.

Date of Introduction: 1989?

Ingredients: Tofu (water, soybeans, calcium sulfate and calcium chloride coagulants), marinated with yeast extract, soy sauce, and herbs.

Wt/Vol., Packaging, Price: 250 gm poly package. Retail for DM 3.70.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 12 gm, fat 6 gm, carbohydrates 1 gm, minerals 1 gm, calories 106.

New Product–Documentation: Label sent by Anthony Marrese. 1989. 3.5 by 5 inches. Printed on a white poly bag. Dark brown, yellow, and white on orange. "Fry or broil and use in soups or salads." Neuform certification symbol.

7423. Product Name: [2 Spring Rolls or Lumpia].

Foreign Name: 2 Fruehlingsrollen.

Manufacturer's Name: Horst Heirler.

Manufacturer's Address: Grubmuehlerfeldstr. 52, D-8035 Gauting bei Munich, West Germany.

Date of Introduction: 1989?

Ingredients: Wrapper/Egg Roll: Whole wheat flour, eggs, spices, salt, unhydrogenated vegetable oil. Filling: Soy sprouts, cabbage, carrots, green beans, onions, coconut, peanut sauce, potato flakes, soy sauce, spices, lemon juice.

Wt/Vol., Packaging, Price: 250 gm paperboard box. Retail for DM 5.0.

How Stored: Frozen.

New Product–Documentation: Label sent by Anthony Marrese. 1990. Feb. 5.5 by 5 by 1.5 inches. Paperboard box. Brown, orange, red, blue, and black on yellow. Text is in German, Dutch, and French. “Filled with fine vegetables. Heat and serve. Frozen. Whole-grain dough with fine vegetable filling. 2 vegetarian lumpia. Exklusiv Neuform certification symbol.” A color photo on the front panel shows two golden-brown spring rolls served on a plate surrounded by vegetables.

7424. **Product Name:** [Lima Tamari, and Lima Heiwa Mansan Tamari].

Foreign Name: Lima Tamari, Lima Heiwa Mansan Tamari.

Manufacturer’s Name: Lima Foods.

Manufacturer’s Address: Edgar Gevaertdreef 10, B-9830 Sint-Martens-Latem, Belgium.

Date of Introduction: 1989?

Wt/Vol., Packaging, Price: 250 ml dispenser, 1 liter bottle, and 18 liters.

How Stored: Shelf stable.

New Product–Documentation: Lima catalogue, price list, and color product brochure. 1989. A photo shows two sizes of Lima tamari bottles. The Mansan comes in a 250 ml bottle.

7425. **Product Name:** [Neuco Mushroom Soy Sauce].

Foreign Name: Neuco Pilz-Soja Sauce.

Manufacturer’s Name: Neukoellner Reformwaren GmbH (Subsidiary of Huegli) (Importer). Made in China (PRC).

Manufacturer’s Address: 7660 Radolfzell, West Germany.

Date of Introduction: 1989?

Ingredients: Water, soybeans, wheat, salt, edible mushrooms, yeast.

Wt/Vol., Packaging, Price: 140 ml jar. Retail for DM 3.10.

How Stored: Shelf stable.

New Product–Documentation: Label sent by Anthony Marrese. 1989. 5.75 by 3.25 inches. Black, red, yellow, purple, and brown on white. Color illustration shows a large mushroom, hairy yellow soybean pods, and purple soybeans. “With the valuable plant protein of the soybean. Eat right! A highly aromatic seasoning sauce. Made from naturally fermented soybeans and mushrooms.” Neuform certification symbol.

Letter from Bernd Drosihn. 1990. May 10. This company just markets tofu products, they do not make any. Their mother company is Huegli.

7426. Perelman, John. 1990. San Jirushi shoyu and tamari (Interview). *SoyaScan Notes*. Jan. 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The shoyu made at the Richmond, Virginia, plant (which contains only 20-30% wheat) became available for sale in Jan. 1990. San-J does not promote this product; the company sees its identity as a tamari brewer, where

they are the world’s biggest company. The gold label and the black label first became available during the 4th week of February 1990. The Szechuan Sauce and Teriyaki Sauce, reformulated using American-made tamari, became available in April 1989. Tamari Lite is still imported from Japan in drums and bottled in Richmond; the company has not yet installed its desalinization equipment in America, and probably won’t until at least 1991.

The tamari now brewed in America is much different in character and taste than the one particular tamari that they imported previously from Japan. They make numerous varieties of tamari in Japan, and the one imported to America had a very high solids content and is thus thicker and darker (closer to black than red), and has a much stronger flavor. After the moromi has finished aging, it has to be shoveled out of the vats; it is too thick to be sucked out. When the milder U.S.-made tamari was introduced, some of the many consumers who had been using the thicker imported product were upset. Therefore San-J is re-introducing the imported product under the name “Imported Whole Soybean Tamari: Wheat-free Soy Sauce.” It will only be sold in a 20-ounce bottle. It will be a really strange looking bottle and label. The big red dot is not on the label. It will be available the third week of March 1990.

San-J is vigilant about keeping their Gold Label out of supermarkets. A little of the Black Label (made with hexane defatted soybean meal) is sold in natural food stores to any store that wants to carry it. Concerning the waste oil from making tamari from whole soybeans, San-J needs a special license to dispose of it.

San-J has gotten three types of feedback on their U.S. made products, though much less feedback than they had expected (maybe one letter every 2 weeks): (1) Some people liked the imported, thicker better than the Gold Label. (2) Some were upset that San-J would make tamari with hexane-defatted soybean meal. (3) Tree of Life now sells a real wheat-free tamari that they are probably buying from Mansan or Marusan. They are promoting it as the “real” thing, rather than a new American-made product. (4) Some are upset that grain alcohol (from corn) is being added to all San-J products as a preservative. Tamari Lite has the most since it contains less salt. The brewmaster, Mr. Yamamoto, has worked in shoyu breweries as well.

The major brands of imported traditional shoyu are Tree of Life, then Westbrae or Eden (Marushima). Address: San Francisco, California. Phone: 415-821-4040.

7427. Belleme, John. 1990. Starting a new miso company in North Carolina (Interview). *SoyaScan Notes*. Jan. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John is in the process of starting a new miso manufacturing company named Smoky Mountain Miso Shop. It will be owned by a company named Traditional Foods Inc., which he and a partner started in about June

1989. Over the shop will be a non-profit organization named Institute of Traditional Foods, where people can come to live and study food preparation (tofu, tempeh, miso, seitan, tamari) both on a home and commercial scale, for short or long seminars. He will break ground for the plant in about 3 weeks. It will be attached to his home, 2,000 square feet, Japanese style and very compact, with a capacity of about 50,000 lb/year of miso. He hopes to find 2 distributors, one on each coast: Maybe Blake Rankin of Granum on the West Coast and Macrobiotic Wholesale Co. on the East Coast. Great Eastern Sun will be a competitor. His non-compete agreements with them have expired.

John's wife, Jan Belleme, (who works for Mitoku) is doing a story for *East West* about amazake. The new editor of *Solstice*, John Mann, has decided to focus on macrobiotics, and away from the environmental focus. He would like a story on amazake (\$200). *Solstice* reaches 60,000 people. John spent the summer at an organic winery.

Note: As of June 1993, this company was never started. Instead, John started a company making traditional seitan. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

7428. Belleme, John. 1990. Controversy concerning San-J tamari (Interview). *SoyaScan Notes*. Jan. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John recently wrote 2 articles about San-J tamari in *Solstice* magazine. After San-J was in operation he visited the plant and wrote a nice story about them. Then San-J came out with a shelf talker accusing most other soy sauce manufacturers of having alcohol in their products. They instigated this debate. They also sent literature to distributors in which they called their product "traditionally fermented," the same term they used on their imported product from Japan. They erased the line about "not made with chemically processed soybean meal." John started to get calls from retailers, so he contacted the other importers and asked them if they added alcohol to their soy sauce; all said they did not. So John published the results of his survey. He feels San-J was not clear about starting to sell tamari made with defatted soybean meal to companies that specialize in macrobiotic products. The ingredient listing on the label says simply "soybeans," which is deceptive. Moreover, when San-J used to import tamari from Japan, it contained added alcohol which was not listed on the label. This is illegal. John respects San-J and their products. Address: P.O. Box 457, Saluda, North Carolina 28773. Phone: 704-749-9537.

7429. Miller, Bryan. 1990. Restaurants. *New York Times*. Jan. 26. p. C20.

• **Summary:** This is a restaurant review of Shun Lee Palace, 155 East 55th St., New York City. The atmosphere is luxurious and spacious. Mock duck is a light, nonspicy and intriguing dish: "essentially layers of fried tofu skin [yuba]

that resemble the texture of duck skin (but not necessarily the flavor), served with hoisin sauce and scallions, like Peking duck." The flavor and texture, which are unusual, are loved by some people (such as the writer) and loathed by others.

7430. Hicks, Russel. 1990. History of Sweet Earth Natural Foods (Interview). *SoyaScan Notes*. Jan. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** This company was founded by Russel Hicks and Valerie Dallas. They started making and selling foods in 1978 in Pacific Grove. Their first product was named "Vegeburger by Sweet Earth," a soybean based burger introduced in 1978. In the early days, they also had a bakery named Sweet Earth Bakery (P.O. Box 22543 in Carmel). They did all kinds of things. After a year Russel and his wife left for 3 years, then they returned. The company's second product, launched in about 1983, was called "Tofu Rice Burger by Sweet Earth." Both products had round labels, so the product name was arched across the top and "Sweet Earth" was arched across the bottom.

In about 1983-84 Sweet Earth started to get serious about selling foods. In 1985 they introduced their fresh "Deli Line," consisting of perishable, healthy fast and natural foods—especially sandwiches, salads, and soups. (The burgers were vacuum packed with a 3-month shelf life.) Included in this line were various foods in which soy was a major ingredient: Lunch Rush Burrito (with tofu and rice, 1985), Tofummus Sandwich (1985; tofu + hummus), Miso-Vegetable-Barley Soup (1985), Oriental Rice Burrito (1987), Oriental Rice & Tofu Salad (made sporadically, 1987) TMT Spread (with tofu, miso, and tahini, 1989; no longer on the market due to short shelf life), and Tofetti Sandwich (1990). They distribute these perishable foods themselves in the Monterey area, then they have independent distributors that carry their deli line to Santa Cruz, the Bay Area, etc. Veggie Paté Sandwich (with Miso; 1990). They also use a lot of soy sauce and tamari as a seasoning. They buy their tofu from Jack in the Beanstalk in Salinas. They are Wildwood's biggest competitor in the Monterey area. "Tofu is definitely the food of the future. It's probably going to take a couple of more years. We've been watching this slow change. Ten years from now tofu will be everywhere and in everything. All kinds of foods will be made from it. We raise our children on tofu and they eat it right out of the carton. To them it's second nature. I really like the whole soy end of life. It really feels good. I like developing foods with tofu. The biggest problem with tofu is trying to get a long shelf life in products that use it." Address: 597 Lighthouse Ave., Pacific Grove, California 93950. Phone: 408-375-8673.

7431. **Product Name:** [Shoyu].

Foreign Name: Shoyu.

Manufacturer's Name: Miso Produções.

Manufacturer's Address: Rua do Douro, No. 92 r/c,

Rebelva, 2775 Parede, Portugal. Phone: (1) 247 50 68.

Date of Introduction: 1990. January.

How Stored: Shelf stable.

New Product–Documentation: Letter from Miguel Azguime, owner. 1989. Oct. 31. The shoyu is aged for 10 months. On 30 Nov. 1989 he writes that it will be available in Jan. 1990 in 500 ml and 1 liter containers. On his business card, below the company name is written: “Alternative cultures and foods (Alternativas Culturais e Alimentares).”

7432. **Product Name:** [Jean de Preneuf Tofu Burgers {Not Fried} (Garlic and Fines Herbes, Tomato and Basil, or With Three Cheeses)].

Foreign Name: Jean de Preneuf Dorés de Soja (Ail et Fines Herbes, Tomate et Basilic, Aux Trois Fromages).

Manufacturer’s Name: Société Soy.

Manufacturer’s Address: 1 rue du Crêt de la Perdrix, 42400 Saint-Chamond, France. Phone: 77.31.24.42.

Date of Introduction: 1990. January.

Ingredients: With Three Cheeses: Tofu (water, soybeans* 51%), Emmentaler (Swiss) cheese (8%), Comté cheese (2%), Cheddar cheese (2%), soy sauce*, rolled oats*, sea salt, spices and aromatics. * = Organically grown (issu de l’agriculture biologique).

Wt/Vol., Packaging, Price: 2 x 100 gm round patties vacuum packed in a paperboard box.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 12.4 gm, fats (lipids) 13.0 gm, total carbohydrates (glucides totaux) 9.6 gm, calories (Kcal) 205 (857 kJoules).

New Product–Documentation: Labels sent by Bernard Storup. 1990. Dec. 26. 3.25 by 4 by 2 inches from front to back. Paperboard box. With three cheeses: Blue, green, orange-brown, and yellow on white. Color photo of 2/3 of a patty on front panel. “Light and balanced. Keep your vitality with Tofu Burgers. For additional information write: Jean de Preneuf, 42 L’Orangerie, 42580 Letrat, France. Store at +4°C. To use: Remove the protective film with the peel-off tab. Re-heat, either: In a skillet over low heat for 5 minutes. In an oven for 7-10 min. In a microwave oven for 2 minutes. Or steam.”

“Soya, with exceptional natural qualities, rich in protein and free of cholesterol, is finally cultivated in France. We transform tofu, a traditional food that originated in China, so that all of the vitality of soya is protected. Ground with water, cooked, then filtered, the soya is transformed into ‘milk.’ Its coagulation gives us tofu. Easy and quick to prepare, tofu burgers are delicious culinary preparations for serving as a main dish, rich in vegetable proteins (riches en protéines végétales).”

Spot in SoyaFoods. 1991. Spring. p. 5. “Dorés de Soja.” The company name is given as “Jean de Preneuf.”

7433. **Product Name:** [Viana Soya Noodles with Shoyu].

Foreign Name: Viana Shoyu Soja-Nudeln.

Manufacturer’s Name: Viana Naturkost GmbH. (Marketer).

Manufacturer’s Address: Schmittenstr. 106, D-5030 Hueth 6, West Germany. Phone: (02233) 41323.

Date of Introduction: 1990. January.

Ingredients: Hard wheat*, wheat*, soybeans*, shoyu*, herbs*, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 250 gm cellophane bag.

How Stored: Shelf stable.

New Product–Documentation: Label sent by Bernd Drosihn. 1990. May 10. 3.25 by 3.5 inches. Self adhesive. Reddish-purple, black, brownish gold, and beige. “Spiced with herbs and soy sauce. Noodles made without eggs.” Introduced Jan. 1990.

7434. Wang, Guangjian; Kuan, S.S.; Francis, O.J.; Ware, G.M.; Carman, A.S. 1990. A simplified HPLC method for the determination of phytoestrogens in soybean and its processed products. *J. of Agricultural and Food Chemistry* 38(1):185-90. Jan. [14 ref]

• **Summary:** Discusses the phytoestrogen content of soybeans, defatted soy meal, hard tofu, soft tofu, dry spiced tofu, soy milk skin (p. 189) / soy milk film (p. 188) [yuba], soy milk, soy sauce, hot soy paste, sweet soy paste [miso?], fermented tofu, soy sprouts (homemade), soy sprouts (grocery), daidzein, genistein, formononetin, coumestrol. Address: Natural Toxins Research Center, Food and Drug Administration, 4298 Elysian Fields Ave., New Orleans, Louisiana 70122.

7435. Davis, Cynthia. 1990. U.S. Mills and Erewhon (Interview). *SoyaScan Notes*. Feb. 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Cynthia arrived at Erewhon in 1983. In April 1986 Erewhon acquired U.S. Mills, which had been founded in 1908 under the same name, U.S. Mills. They were and are a cereal manufacturing company. Their two main cereal brands were Uncle Sam’s Cereal (the product that the company was founded on), and Skinner’s Raisin Bran (America’s first raisin bran, introduced in 1926). In effect U.S. Mills and Erewhon were merged, and U.S. Mills was chosen as the corporate name, largely since it had been around longer. Ronald L. Rossetti had acquired Erewhon after it filed for Chapter 11 bankruptcy. He was and still is head of Nature Food Centres, a chain of health food stores. Erewhon was purchased by Rossetti as an individual, not by Nature Food Centres. Contrary to what the media often said, Erewhon was never, in any way, owned by, or part of, or a subsidiary of Nature Food Centres. The misconception (created by the media) that Nature Food Centres owned Erewhon caused real problems for Erewhon at one point. Then in Nov. 1986 Erewhon Inc. bought U.S. Mills. Ron Rossetti is presently no longer involved with U.S. Mills or

Erewhon. In May 1988 Chuck Verde (who was the president of Erewhon) and Cynthia Davis acquired the U.S. Mills/Erewhon business. They are now the main joint shareholders. At that time they brought in another company as an investor. Erewhon is their brand name for the natural food industry; the product charter has not changed and they are selling to the same market. Surprisingly U.S. Mills has nothing written about their long, interesting, pioneering, and complex history. However Cynthia feels that the history of Erewhon written in Ron Kotzsch in *East West* in Feb. 1984 was an good, accurate history up to that time. Address: U.S. Mills Inc., 395 Eliot St., Newton, Upper Falls, Massachusetts 02164-1131. Phone: 617-969-5400.

7436. Klaper, Michael. 1990. Personal history, present work, and views (Interview). *VegeScan Notes*. Feb. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Born on 19 July 1947, Dr. Klaper grew up on a dairy farm in Wisconsin. He graduated from the University of Illinois College of Medicine in 1972, was married, then did a 1 year internship followed by 5 years of general practice in British Columbia, Canada. After 3 years of residency retraining in Vancouver he worked for 3 years on an Indian Reservation in Humboldt County, California. Then did 1 year of anaesthesia residency at the Univ. of British Columbia Cardiovascular Service. He worked with surgeons who would ream cholesterol out of patients' arteries. It was basically plumbing problems. How long can you continue to pour bacon grease down the kitchen sink until it clogs the pipes? One day in 1981 an incident changed his life. A Mr. Phillips came in for open heart surgery. The serum in a blood sample Dr. Klaper drew was cloudy like glue—the man had just eaten a hamburger and a milk shake. During the operation, the surgeon pulled long tubes of cholesterol out of the man's arteries, then sewed him up. Michael realized that he was eating the same diet as Mr. Phillips. After the operation the overweight surgeon and staff went to the cafeteria and had that same diet. While Mr. Phillips was in the hospital, no one talked to him about changing his diet. They just asked him to come back for a checkup. Michael felt like he was in a Fellini movie. He decided that instead of putting people to sleep, it was time for him to start waking them up. So in June 1981 he resigned his lucrative position as an anesthesiologist, bought a vegan cookbook (from Gentle World) and followed a vegan diet. His blood pressure fell and he lost a 15-pound inner tube of fat around his waist that he had worn for years. He felt much better. In Oct. 1981, he moved to Gentle World in Florida, opened a clinic in nearby Orlando, and practiced "nutritional medicine" for the next 6 years. He was married a second time. At the clinic he especially liked to see fat patients. A change to a vegan diet worked miracles. Now they were putting "the right fuel in the tank." But he also noticed that in many arthritics, the inflammations in their joints got better, and that the asthma in

many asthmatics decreased or disappeared. In the late 1980s he moved to Felton near Santa Cruz, California, and worked with Earthsave Foundation and John Robbins. In early 1990 he moved to Los Angeles to continue this work. He also wrote several books on vegan nutrition.

Today his main work is lecturing about diet and the environment, how America's meat-centered diet is destroying both the earth's ecosystems and our bodies. He advocates changing to a vegan diet and wants people to understand "the true cost of a meat-centered diet." Most of his income now comes from speaking honoraria and sales of his book, none from medicine. He is living with friends in Los Angeles. His favorite periodicals on diet are: McDougall Newsletter, Vegetarian Times, Vegedine, and The Vegan. On ecology: E, and Buzzworm.

Concerning his personal diet: he gets about 600 mg/day of calcium which he thinks is sufficient because his protein intake is also low. For breakfast he has sliced fruit and raisins with apple or orange juice poured over the top. Whole wheat bread with almond butter (and sometimes a fruit puree). Sometimes a scrambled tofu omelet. For lunch: Green salad with yellow or red veggies and tahini dressing (with water and nutritional yeast), vegetable soup, and a sandwich with nut butter or tofu spread (with tahini and shoyu) and/or sprouts. For dinner: Potato or pasta or cooked whole grains (like brown rice), yellow steamed veggies, miso broth often with diced tofu. For snacks he likes almonds and/or raisins. His favorite sweet is Rice Dream [frozen dessert] or fruit. He admires the work of Dr. John McDougall but strongly disagrees with the way he strictly applies the concept of "percentage of calories from fat" in foods, using it to criticize foods such as tofu which actually have very little fat per typical serving.

As of Feb. 1990 Gentle World, a community of 20 people, is selling their land in Florida and moving to Maui. Contact them at Gentle World, P.O. Box U, Paia, Maui, Hawaii 96779. Phone: 808-579-9144. Mr. Waldbaum (Light) is a distant cousin of the Waldbaum family of supermarket fame. They have opened a restaurant named "The Vegan" on Maui and are using lots of soyfoods.

Update: In April 1992 Dr. Klaper announced the foundation of a newly accredited program called the Institute for the Advancement of Nutrition Education and Research, which aims to further physicians' knowledge about nutrition and health. He made the announcement at Natural Products Expo West, during his seminar called Soyfoods and Vegetarianism. As of Jan. 1993 the Institute has conducted two 4-day seminars, mostly for physicians who received Continuing Medical Education (CME) credits. Address: 8843 Pennfield Ave., Northridge, California 91324. Phone: 818-341-0652.

7437. Fabricant, Florence. 1990. Food notes: Quick, Hot Sichuan. *New York Times*. Feb. 14. p. C7.

• **Summary:** San-J International (the American division of San-Jirushi) has just launched a Sichuan Sauce, which is hot and spicy. San-J specializes in tamari, which it has been making in Virginia for a year. In 1804 the company was founded in Japan.

7438. Hom, Ken. 1990. Homecoming: Culinary fireworks go off when the author visits his ancestral village. *New York Times*. Feb. 25. p. SM45.

• **Summary:** When he was a small boy in Chicago, Illinois, the writer's mother began what became a repeated chant: we must return one day to the village of our ancestors (*gu xiang*).

In 1978 he set off with his mother to the village of Kaiping in the Foshan region of Guangdong Province. When they arrived, they were greeted by a large crowd of villagers and a banquet of 11 courses. "Most of the food was home-grown, and all of the relatives—20 members of the extended family—had helped in the preparation. Chinese water spinach, freshly plucked from the garden was cooked with fermented bean curd."

Recipes include: Hongshao doufu (Red-cooked bean curd family style; with "1 pound firm bean curd," 2 tablespoons hoisin sauce, 1 tablespoon light soy sauce, and 1 tablespoon dark soy sauce").

Chaodoya (Stir-fried soybean sprouts with pork; with "1½ pounds soybean sprouts or mungbean sprouts").

7439. Achter-Theiss, Elke. 1990. Speise statt Futter [Food instead fodder]. *Oeko-Test Magazin (Frankfurt, West Germany)*. Feb. p. 57-59. [Ger]

• **Summary:** Discusses whole dry soybeans, soybean meal, soy sauce, soymilk, tofu and silken tofu, tempeh, and miso.

7440. All-One-God-Faith. Rabbi Dr. E.H. Bronner Associates, SMMC. 1990. [Catalog and price list]. P.O. Box 28, Escondido, CA 92025. 2 p.

• **Summary:** Lists Balanced mineral bouillon (4 sizes), Balanced mineral seasoning (4 sizes), Balanced protein seasoning (5 sizes), barley malt sweetener, instant soup, kelp sea lettuce, lecithin protein granules, red grape vinegar, four pure oils (jojoba, lavender, peppermint, rose), and eight soaps (incl. the famous peppermint oil pure castile soap liquid). Address: Escondido, California.

7441. Hesseltine, C.W. 1990. Margaret B. Church, 1889-1976. *Mycologia* 82(1):144-47. Jan/Feb. [20 ref]

• **Summary:** "Dr. Margaret Brooks Church was a distinguished mycologist and a charter member of the Mycological Society who has been neglected in the history of mycology. She made several noteworthy contributions to systematic and applied mycology. She, along with Dr. Charles Thom, wrote the first manual on the genus *Aspergillus*. The first authoritative treatment of oriental

fermented foods in the West was written by her. It remains an accurate account of these fermentation processes. Dr. Church also conducted laboratory experiments on soy fermentations and collaborated with Japanese workers, especially Professor K. Oshima; Hokkaido Imperial University, Sapporo, Japan...

"Dr. Church was born in Providence, Rhode Island, on March 13, 1899. She received an A.B. in 1912, an A.M. in 1914, and a Ph.D. in 1918, all from Brown University.

"One of her most important contributions was the USDA Department Bulletin 1152 entitled, 'Soy and Related Fermentations,' published in 1923. At that time there was interest in establishing soybean production in the United States because soybeans were being imported into the U.S. from the Orient. This publication had many photographs of the industrial processes of making koji and soy sauce in Japan. Research in soy sauce production began in 1918 and continued for several years. Soy sauce, miso, molded [fermented] tofu, and natto were also described...

"Dr. Church's research dealt extensively with koji, and it is surprising that she knew even then that tane koji (koji inoculum) consisted of several selected mold strains of *Aspergillus oryzae*. The fact that yellow-green *Aspergillus* strains were employed in these fermentations undoubtedly led both Thom and Church to publish the taxonomic relationships of this group of molds in 1921. Her research on koji was a likely catalyst for her study of industrial enzymes...

"In 1938-1939, Dr. Church served as an indexer and abstractor for Biological Abstracts. Upon her retirement, presumably in 1939, she moved to Lyndon, Vermont." A large photo shows Dr. Church. Address: 5407 Isabell, Peoria, Illinois 61614.

7442. Karta, Susani K. 1990. The market prospective for tempe in the year 2000. In: Hermana, Mien K.M.S. Mahmud, and Darwin Karyadi, eds. 1990. Second Asian Symposium on Non-Salted Soybean Fermentation. Bogor, Indonesia: Nutrition Research and Development Centre. vii + 116 p. See p. 94-104. Held 13-15 Feb. 1990 in Jakarta, Indonesia. 23 cm. [11 ref. Eng]

• **Summary:** A very interesting paper. Contents: Introduction. Market situation for tempe in Indonesia. Health and nutritional significance of tempe. Tempe for weaning food. Constraints and trends in the market development of tempe. Recommended guidelines and strategies. Ideas for the diversification of tempe utilization (Tempe as a food ingredient, new tempe food opportunities).

Tempe "is a key protein source in the rice-diet of the people of Indonesia. It is consumed by millions of people of various ages and socio-economic status. It has gained popularity in the Netherlands, Japan, Malaysia, Singapore and other areas where Indonesians have settled. It has also slowly been making its way into the American diet, particularly, in the vegetarian, cholesterol-free and low-fat

food product markets.”

“Indonesia with a population of 177 million people (in 1988) and an annual population growth rate of 2%, is the largest tempe producer in the world and has the largest soyfood market in the region. In 1983, Indonesians consumed about 0.9 million MT [metric tons] of soybeans as food, which increased to about 1.5 million MT in 1988 (Table 1). About 50 percent of the total soybeans consumed was in the form of tempe, 40% as tofu and the remaining 10% was used for making soy sauce and tauco (a fermented whole soybean condiment). In 1988, the estimated soybean consumption for tempe was around 764,000 MT which amounted to an average per capita consumption of 6.45 kg of tempe (equivalent to 4.3 kg soybeans). In the past five years the consumption of soyfood has increased by an average of 10% annually.”

“Acute diarrheal disease is one of the leading causes of childhood mortality and morbidity in developing countries and is a major contributor of malnutrition. Approximately 25% of the growth differential between children in selected developing countries can be explained by diarrhea. The mortality and morbidity data from a total of 193 surveys carried out in 49 countries since 1981 by WHO (1986) indicate that, on average, a child under 5 years of age suffer 3.5 episodes of diarrhea per year and that about one-third of deaths in this age group are diarrhea associated.

“Investigations worldwide have found diarrhea incidence peaking between the ages of 6 months to 3 years.”

Tables: (1) Indonesian soybean production, imports, and consumption as food, 1983-1988. Soybean production increased from 536,000 tonnes (metric tons) in 1983 to 1,179,000 tonnes in 1988—more than double. Soybean imports, which were 391,000 tonnes in 1983, rose to a peak of 400,000 tonnes in 1984, then decreased to 350,000 tonnes in 1988. Consumption of soybeans as food increased from 927,000 tonnes in 1983 to 1,528,000 tonnes in 1988. Per-capita consumption figures are not given. Source: ASA estimates and BULOG statistics. (2) Nutritional composition of tempe (100 gm edible portion). (3) The essential amino-acid composition of tempe compared with the FAO/WHO reference pattern (expressed in milligrams per gram of nitrogen). (4) Fatty acids in soy tempe. (5) Global and regional population in 1980 and estimated number (millions) and distribution of diarrheal diseases. (6) Household Health Survey illness data by different age groups in Indonesia. (7) Potential demand for tempe flour in weaning food in the year 2000, Indonesia. (8) Demographic estimates for Asian developing countries. (9) Estimated number (millions) of children under age 5 in Asian developing countries. (10) Projected potential use of tempe flour in weaning food in Asian developing countries in the year 2010. Address: American Soybean Assoc., Singapore.

7443. Soejono, Irlan; Kagatsume, Masaru. 1990. Shifts and

development in trade of various food crops in East Asia, 1960-1984. *CGPRT Working Paper* No. 5. xviii + 168 p. Feb. 28 cm.

• **Summary:** For each country discussed, this book gives information on: Production and supply of coarse grains, pulses, and root and tuber crops. Consumption and demand. Trade and trade elasticities. Forecast and policy implications: Prediction on import demand, indication of policy implications. Countries: Japan (p. 1-28). People's Republic of China (p. 29-42). Republic of Korea (p. 43-62). Taiwan (p. 63-79). The Territory of Hong Kong (p. 81-92). Appendixes (p. 95-165). References (p. 167-68).

Summary: As people in the East Asia subregion become more affluent and westernized, they consume less food grains directly and more livestock products.

Japan: Japanese rice production peaked in 1963 at 13.42 million tons, but surpluses have continued to grow. The government has tried various schemes to induce farmers to switch from rice other crops, including soybeans. A graph (p. 6) shows that soybean production in Japan dropped from 418,000 tonnes in 1960 to 100,000 tonnes in 1976. Because of the Rice Farming Diversification Policy, soybean production since 1976 has increased, rising to 238,000 tonnes in 1984. The graph also shows harvested area and yield during this period. A graph (p. 13) shows the total demand for soybeans in Japan and its components, 1960-1984. The total demand has increased steadily from 1.517 million tonnes in 1960 to 4.814 million tonnes in 1984. About 80% of this demand (3.952 million tonnes in 1984) was for soybeans to be processed. About 90% of these (3.765 million tons in 1984) were crushed into oil and meal. Small and relatively static amounts were processed to make miso (182,000 tonnes) and soy sauce (5,000 tonnes) in 1984. Address: 1. Senior Agricultural Economist, CGPRT Centre, Jl. Merdeka 145, Bogor 16111, Indonesia; 2. National Research Inst. of Agricultural Economics and the Ministry of Agriculture, Forestry and Fisheries of Japan.

7444. **Product Name:** Seitan “Au Jus,” Veggie Seitan, or Frozen Seitan (Sold in 10-lb Bulk Box).

Manufacturer's Name: Sprout Delights.

Manufacturer's Address: 13090 N.W. 7th Ave., North Miami, FL 33168. Phone: 305-687-5880.

Date of Introduction: 1990. February.

Wt/Vol., Packaging, Price: 10 oz round plastic tubs with label on the snap-on lid.

How Stored: Frozen.

New Product—Documentation: Talk with John and Jan Belleme. 1992. July 11. Steve Bern of Sprout Delights in Miami has been making seitan for about 18 months. He has a bulk frozen product in a box, plus some refrigerated consumer products in small tubs. He is doing very well and may have even caused Creative Kitchens to go out of business. John estimates that Steve makes 300 to 500 lb/

week of seitan and distributes it with his own trucks only to the greater Miami area. People call him “Sprout Steve” because he was one of the first people in that part of the country who made unleavened, sprouted grain bread—which is his main product.

Talk with Steve Bern. 1992. July 11. Since 1982 he has run this bakery, which specializes in breads made of sprouts, like the early Essene breads made by Lifestream, but also makes a host of other innovative natural-food products. He introduced these seitan products on 1 Feb. 1990, then introduced large-scale seitan equipment in Aug. 1990. The Seitan “Au Jus” comes in a broth made from tamari, onion, garlic, kombu, and ginger. The frozen bulk seitan is sold in blocks only to other food manufacturers and to restaurants. They typically slice it, sometimes marinate in their own marinade, then use it in soups, or serve it like roast beef or a steak in entrees, frozen TV dinners, sandwiches, etc. He got involved with seitan because food manufacturers began to ask if he could make it for them. He now sells substantially more bulk seitan to the trade (other food manufacturers that make finished products from it) than packaged seitan to consumers via retail stores. Steve learned how to make seitan, first from the book *Cooking with Seitan* by Barbara and Leonard Jacobs, and then by hiring local people (such as Ricky Brandino, who knew how to make seitan) for several days to learn more about the process on a commercial scale. After that, Steve developed his own methods to guarantee standardized quality. Unlike most manufacturers, he adds fiber (rice bran) to the gluten to make it a little more digestible and improve the nutritional profile. Okara is too coarse and has a short shelf life.

Last year Steve made almost 60,000 lb of seitan, which works out to about 1,200 lb/week on average for a 50-week year. Now he is making only about 500 lb/week. He feels the drop has been caused by competition from the many other products entering the natural foods market. He is now developing new products such as a meatless seitan meat pie.

7445. Zoller, Stephen; Belleme, John. 1990. Soy sauce: A brewing controversy. *Solstice* No. 39. p. 4-5. Feb. [1 ref]

• **Summary:** First Zoller responds to Belleme’s two articles about San-J tamari in recent issues of *Solstice*. Then Belleme responds to Zoller.

Zoller contents that (1) San-J adds food grain alcohol (manufactured by Grain Processing Corp. and certified as kosher) to bring the level up to 2% to inhibit the growth of aerobic yeasts. No benzene is used in the production of this alcohol. (2) San-J’s shoyu is made with approximately 80% whole soybeans and 20% whole wheat. No wheat flour is used. (3) Soy grits are of two types: Food grade (which San-J uses) and ordinary (which is used for animal feed). San-J’s soy grits are certified as Kosher. (4) Traditionally brewed. The essential parts have not changed.

Belleme responds to each point, then concludes: “San-J

cannot have it both ways. When they were marketing only whole soybean tamari in the U.S., their promotional literature referred to soy sauce made with soy grits as ‘modern’ and ‘conventional.’ San-J Tamari (black label) and Shoyu (blue label) proudly said, ‘traditionally brewed,’ ‘aged in four seasons,’ and ‘made with whole soybeans, not chemically treated soy grits.’ When San-J began marketing their soy meal product in the U.S., the ‘modern’ process suddenly became traditional and hexane-extracted soy grits became Kosher. San-J’s soy grits may be Kosher, but the confusion they have caused in the natural foods market is not.

“Judging food based on flavor is a matter of personal preference, but natural food shoppers need more accurate labelling to make an educated choice.” Address: 1. Vice President and General Manager, San-J International, Richmond, Virginia; 2. Saluda, North Carolina.

7446. Life Food. 1990. Taifun Produkte: Preisliste fuer Wiederverkaeufer [Taifun Products: Price list for retail food stores]. Robert Bunsen-Strasse 6, D-7800 Freiburg, West Germany. 1 p. 30 cm. [Ger]

• **Summary:** This new price list takes effect on 1 March 1990. Products are: Tofu (400 gm or 250 gm vacuum pack). Tofu (1 kg pack for those buying fresh). Smoked tofu (200 gm). Sprouted tofu (250 gm vacuum pack), Hijiki tofu (200 gm vacuum pack), Tofu sausages (Grill-Knacker; Tofu Wuerstchen; 250 gm vacuum pack of four). Soya Patty (Soja Bratling; 6 or 12 pack). Tofu Cheese Patty (6 or 12 pack). Black Forest Patty (Schwartzwaelder Bratling; 6 or 12 pack). Tempeh Patty (Tempeh-Taler; 125 gm vacuum packed). Tofu Terrine (Graffiti or Rainbow; 200 gm, 500 gm, or 1 kg vacuum pack). Tofu Balls (Tofu-Kloesse; 4 in a 250 gm vacuum pack). Vegetable pouches (Gemuesetaschen; open, fresh). Spread for bread (Brottaufstrich; Tempeh 200 gm, Chickpeas 200 gm).

By request, we deliver various sprouts, tempeh, seitan, salad specialties, soy sauce [but no weights or prices for these “by request” items]. For feasts and celebrations, we recommend Taifun’s vegetarian party service.

Prices are given for each product: 1 DM equals about \$0.50.

The company now presents itself as Life Food—Freiburg’s Tofu Shop. Natural Foods (*Life Food—Freiburgs Tofurei. natuerliche Lebensmittel*). Address: Freiburg, West Germany. Phone: 0761/50 61 55.

7447. *SoyaScan Notes*. 1990. The isolation of Japan, trade with Holland, and shoyu (Overview). March 5. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Oda Nobunaga (1534-1582) was the first of the great unifiers of Japan. He eliminated the military power of the Buddhist church, destroying monasteries and killing monks. His bitter opposition to the Buddhists inclined him to favor the Christians, who thrived during his reign. Nobunaga

was followed by Hideyoshi (1536-1598), his best general, who completed his work of unifying Japan after 250 years of political disunity. In 1587 Hideyoshi suddenly ordered all Christian missionaries banished from Japan, and he subsequently confiscated their “sub-fief” in Nagasaki. He began persecuting Christians in 1597.

In 1603 Tokugawa Ieyasu (1542-1616) founded the Tokugawa shogunate. He was intensely interested in seeing that his heirs continued his rule—a feat that had eluded Nobunaga and Hideyoshi. He regarded Christianity as a menace, and he stamped it out, though it survived longest in Nagasaki. But he was eager for foreign trade apart from religion. In the second half of the 1500s, trade with Portugal and Holland had thrived. But in 1639 the Portuguese were expelled from Japan for suspected complicity in the Shimabara Revolt. In 1641 the Dutch were moved from Hirado to Nagasaki, where they were kept almost like prisoners on Dejima (also spelled Deshima), a small artificial island in the harbor. All Japanese were prohibited on pain of death from traveling abroad. By these steps Japan succeeded in blocking off most of the channels of foreign contact.

During Japan’s 215-year-long period of national isolation (1639-1854), the island of Dejima in Nagasaki Bay was the country’s only port open to foreign trade.

But Japan’s self-imposed isolation was by no means complete. In fact trade increased, though the Japanese were more selective about what they imported. The Dutch had a monopoly on trade between Japan and Europe. One of the items exported by Japan to Europe via Dutch traders was shoyu, is grey pottery jars with blue writing on them. On the jars was written “Jap. Soya” or “Japansch Zoya.”

7448. Yu, Stephen. 1990. New developments with tofu in Toronto (Interview). *SoyaScan Notes*. March 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Stephen is again working with soyfoods after the bankruptcy of Victor Food Products in about June 1988. He is now working as a consultant, and his main project is to “consolidate all of the tofu makers in the area and help them to go into the market as one team.” He is also trying to act as a communicator between the Soybean Marketing Board/Agricultural Canada and the tofu makers. He also has a family, with children aged 3 and 6, to support. In the last few days he has visited 6-7 tofu companies in Toronto; they all welcomed him with open arms and gave him the information he requested—although he does not know how true it is. He would like to work as a researcher for Soyfoods Center in Canada (\$50/hour), and to trade information. He will send a list of what he wants to know. He is interested in knowing the amounts of various soyfoods (such as Vitasoy soymilk, Kikkoman soy sauce and tofu, etc.) imported to Canada.

He started to make soyfoods in Canada in Feb. 1978. His first three products were tofu, tofu pudding (daufu-fa), and soymilk.

He knows a man in Canada who is doing a market study of the low-tech soyfoods industry in that country. He is an independent person who is working for the Soybean Marketing Board. The study concerns the overall picture of soybean use in Canada. The most interest is in tofu, and Stephen is doing the tofu and soymilk section of the report. Stephen can put us in touch. Stephen personally lost \$750,000 when Victor Food Products went Bankrupt.

Update: Talk with Stephen Yu on 8 July 1990. The report cost about \$70,000 to produce. He is not sure if it will be published. He is not busy nowadays, but does not feel like working on a history of his company. Address: 525 Highland Road West, Kitchener, ONT, N2M 5K1, Canada. Phone: 519-741-0922.

7449. Gaiser, Klaus. 1990. Huegli acquires majority ownership in Yamato Tofuhaus GmbH and in Heirler (Interview). *SoyaScan Notes*. March 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Huegli Naehrmitel A.G. is a Swiss company, but they have a German branch. The head of the German branch approached Gaiser and asked him if Yamato would like to work together with Huegli. Until the spring of 1989 Klaus had a business partner (Wolfgang Haberger, who had joined the company in early 1984) but he was not very happy with him, so he bought him out. At the time of the buyout, Huegli approached Gaiser, who was now suffering from undercapitalization. Gaiser found Huegli to be fair, trustworthy, and competent. Huegli bought more than 50% of Yamato in April 1989. Before that, Thomas Karas had tried to sell his company to Huegli.

In Jan. or Feb. 1990, Huegli purchased Horst Heirler, the biggest distributor of fresh health foods in West Germany. Heirler’s packaging is very attractive. To the best of Klaus’ knowledge, there is definitely no relationship between Huegli and Nestlé. Yamato has not yet announced its relationship with Huegli to the general public, so nothing has been published. Tofu production has not yet expanded enough to fill the needs of potential Huegli customers. Yamato is now selling tofu on one of Huegli’s tracks—to hospitals and factories (institutions; Grossverpflegung); other tracks are (2) Reform Houses, and (3) industry and supermarket chains. Presently Klaus is working most on track 1. To reach tracks 2 and 3 Yamato would have to develop new packaging and products suited to their very special needs. “At the moment Yamato and Huegli are not yet working so closely or effectively. Their new capital comes one step at a time for specific goals/projects.

Yamato presently makes 8 tofu products: Tofu (250 gm and 400 gm), Tofu Enriched with Mung Bean Sprouts, Smoked Tofu, (the best in Germany), three types of deep-fried tofu (Sour Marinated Tofu, *Hirschauer Laible* [Hirschau is a small village near Tuebingen]; *Laible* = little loaf or loaflet; the tofu is first marinated in soy sauce and

spices, then deep fried), and Tofu Burgers with Sprouts (*Sprossen Tofuletten*; made with mung bean, sunflower, radish, alfalfa, and mustard seed sprouts {no soy sprouts}, these burgers were deep fried), 2 tofu pâtés in glasses (a little like sausages), and soymilk sterilized in bottles. He presently developing some new products.

Note: Huegli Naehrmittel A.G. (P.O. Box, CH-9323 Steinach-Arbon, Switzerland. Phone: 71.46.92.92) was founded in 1935. They currently have about 600 employees and capital of 100,000 Swiss francs. They are a well-known company in Switzerland. Address: President, Yamato Tofuhaus GmbH, Rittweg 11/1, D-7400 Tuebingen–Hirschau, West Germany. Phone: 7071-71094 or 95.

7450. Kempff, Klaus. 1990. Brief history of Life Food GmbH–Taifun Tofurei (Interview). *SoyaScan Notes*. March 14. Conducted by Anthony Marrese in Germany.

• **Summary:** Klaus, known as Dhanya, lived in Miami, Florida, for 5 years and has an American wife, although they are separated. His interest in soyfoods began in America. After returning to Germany, in 1985, Klaus bought a little sprout business in a basement / cellar at Wallstrasse 3 in Freiburg. When he bought it, it had no name and was run by a commune of Bhagwan Rajneesh devotees as a Sannyas business.

Since April 1985 the commune had been making various sprouts (not including soy sprouts). Klaus named the business Life Food, and in July 1985 he and several others started producing tofu. In the spring of 1986, in Germany, he got a copy of *The Book of Tofu* by Shurtleff and Aoyagi which helped his work. He sold the tofu along with various sprouts (mung, alfalfa, radish, chick peas, wheat) at the market place. Looking for a way to use his okara, Klaus developed a Soy Burger and started selling it in about Nov. 1985.

Then health officials told them to move out of the basement or be shut down. While struggling with the decision, a new place (a little grocery store at Stuehlinger Strasse 9, D-7800 Freiburg) became available and an order for one hundred 400 gm packs/week of tofu came along, so in Dec. 1985 they decided to go for it and start making tofu on a larger scale. The business grew steadily and in May 1989 they moved into their present location, a larger, new and modern facility that was previously occupied by a catering service. They purchased a new pressure cooker for making the soymilk for their tofu.

Klaus had a friend named Wolfgang Heck (not a follower of Rajneesh), who was an organizer (*Veranstalter*) of international events. The two began to work together in late 1986. In May 1987 Wolfgang started a business named Taifun that cooked Life Food's tofu for the people in the nearby Market Hall for gourmet foods. Taifun had a small walk-up tofu lunch bar at an indoor market. Here they sold their products and tried out new second generation products.

Klaus and Wolfgang decided to merge their two companies. So on 1 Jan. 1990 Life Food GmbH was formed, with 5 shareholders, including Klaus and Wolfgang. Life Food GmbH bought Taifun (the brand name and equipment) and discontinued operation of the Taifun in the market hall. Taifun became the brand name for many of Life Food's products. But some confusion between Life Food and Taifun still remains. For example, today outside the tofu plant there is a big sign that says "Taifun Tofurei" in big letters and under it in small letters the name of the company, Life Food GmbH.

Life Food GmbH now employs 15 people. Present products they make are tofu burgers (3 types, each 90 gm, 1,250/week), tofu (500 kg/week, started Dec. 1985), tempeh (10-20 kg/week, started July 1987), Tofu Terrine Sausage (just starting; they are terrific). They made samples of white miso in March 1989 and are in the process of bringing it into production. Although most of their okara goes to farmers, some is used in their tofu burgers and the Hop Sing Bratlinge (burger dough for restaurants). Life Food is the only tofu producer in Freiburg, where they control the whole market. They have a 60 kg/hour Takai pressure cooker, a Takai hand okara press, and a meat-type grinder for the soybeans. They make tofu in 10-12 kg batches. They also import and sell a little miso and shoyu.

Follow-up interview by William Shurtleff. 1990. May 9. The company presently makes 800-1,000 kg/week of tofu and 10-15 kg/week of tempeh. They are hoping for a big standing order of 500 kg/week from the student dining hall at Freiburg Univ. The dining hall has already been buying tofu and tofu products for a long time. Their best selling product is tofu, followed by Smoked Tofu, then the Tofu Terrine (made by pressing tofu, mixing it with vegetables, and baking it in a baking pan; it resembles a goose liver pâté).

Update. 1990. May. Bernd Drosihn says Klaus Kempff is no longer in charge; Guenter Klein and Wolfgang Heck have taken over. Address: Founder, owner and manager, Life Food GmbH, Robert-Bunsen Strasse 6, D-7800 Freiburg, West Germany. Phone: (0761) 50 61 55.

7451. *SoyaScan Notes*. 1990. Origin and early exports of Kikkoman brand shoyu (Overview). March 19. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The Kikkoman brand was first used for shoyu (soy sauce) in the year 1784 (*Tenmei* 2) by the Saheiji MOGI family in Noda, Japan. In 1838 (*Tenpo* 9), Saheiji Mogi petitioned for and received registration for the brand name Kikkoman by the central government of Japan (*Bakufu Goryomaru*).

In 1872 and 1873, Mogi Saheiji entered Kikkoman in two world's fairs, the first held in Amsterdam and the second in Austria. Kikkoman was awarded a letter of commendation for excellence at the Austrian fair, and following this, Mogi Saheiji redoubled his efforts to promote the brand. But there

are no records showing that Kikkoman was exported to Europe following its recognition at these prestigious shows.

The earliest known export of Kikkoman brand shoyu was apparently in 1879. That year it was registered in California as a legally recognized brand name (a move that predated the same legal protection in Japan by six years!) and the same year a Mr. Demoto started to sell Kikkoman brand shoyu in California.

7452. Westra, Marianne. 1990. Early history and current work of Vanka-Kawat B.V. (Interview). *SoyaScan Notes*. March 29. Conducted by William Shurtleff of Soyfoods Center. Followed by letters on 1 June and 2 July 1990.

• **Summary:** This company was founded in 1958, and has been in business for 33 years. They began as both an importer and a manufacturer. The original products they made were tofu (tahoe) and soy sauce (both sweet and salty varieties). In 1958 they began to make the following types of soy sauce: Ketchup Kaki Tiga, Ketjap A, Ketjap Benteng Manis, Ketjap Benteng Asin, Yellow Label Soy, and Tiger Brand Soy. They were still making all of these varieties in 1990.

At the time they started the business, they think there were other manufacturers of soy products in the Netherlands, but they don't remember the names of any companies of individuals. There were small, local Chinese companies that made tofu before they did, and at least one company that made soy sauce before they did. Their mailing address and head office address have not changed since 1958. The mailing address is: Dr. Augustijnlaan 40, 2283 CH Rijswijk, Netherlands (near The Hague). In 1984 Vanka-Kawat was thought to be the second largest tofu maker in Europe and in the Netherlands (after Heuschen-Schrouff), producing 10,500 kg/week. They discontinued tofu production in March 1985 after coming to an agreement with Heuschen-Schrouff, because it was more economical for Vanka-Kawat to let Heuschen-Schrouff (which had all the equipment and knowledge) produce the tofu which Vanka-Kawat sold. They now buy their tofu from Heuschen-Schrouff. They also make sambals, and other foods. They have never made taotjo or miso, but they do import it. And they have never made tempe/tempeh, but they do buy it from the "first Dutch Tempeh factory" and then sell it.

They are not related to Linn Oriental Products (also called Soy-Lin or Lin Tahoe) in Westbroek, but they think that company started in about 1970. The company still exists; the owner is Chinese, but they do not know if it is Mr. Lin. Mr. G.L. Van Kasteren is the best man to talk to about soyfoods. He speaks good English.

This company, which is run by Indonesian-Dutch, imports foods from throughout Asia, though they started with Indonesia, and exports to West Germany, Belgium, France, England, and the USA.

Note: Anneke de Weerd says (April 1991) that the two

most popular types of soy sauce in the Netherlands are ketjap manis and ketjap benteng; ketjap asin is not well known.

Address: Head Office: 3e van de Kunstraat 18, 2521 BB Den Haag (The Hague), Netherlands. Phone: 70-388-8804.

7453. Carantino, Sabine. 1990. Le soja perd son amertume [Soya loses his bitterness]. *Management et Technologies Alimentaires* No. 2. March. p. 65-66. [Fre]

• **Summary:** Last Oct. 7 companies that process soybeans joined to create AFISA (Association Francaise des Industriels du Soja), the French soyfoods association (5 Blvd. de la Méditerranée, 31400, Toulouse, France). This article uses the term "soyfoods" and discusses soymilk, tofu, tofu products (desserts, prepared foods). ONIDOL is involved, as is GEPV (*Groupe d'Études sur les Protéines Végétales*, 10-A rue de la Paix, 75002, Paris, France; founded in 1975). It has been decided to finance a market study (which will be completed this year) of 4 European countries: Belgium, France, Great Britain, and West Germany. They may develop a "French Soya" logo. At the same time, ONIDOL is organizing an Interprofessional Committee for Soy Proteins Destined for Human Consumption. It will coordinate scientific studies, communication, and information on vegetable proteins and "soyfoods."

In Europe, the degree of advancement of use of soy protein in human foods differs considerably from one country to the next. The UK and Germany started earlier than France. In Germany, soyfoods are positioned on the "battlements of the dietetic market" whereas in France they are more oriented toward the mass market. In France, the high consumption of dairy products has not favored soymilk. 3-5 million liters of soymilk were produced in 1988, and the amount had roughly doubled by 1989. The new technologies allow production of soymilk with almost no bitter (beany) flavor, and it can be used to make good yogurts and desserts.

The first soy beverages and flavored desserts were launched only 5 years ago by Alpro (a division of Vandemoortele). The movement was then expanded with the creation of new brands, Celia (Laiterie Saint-Hubert-de-l'Hôtel) and Cacoja (Coopérative agricole de Colmar). Triballat created Soja Sun, a line of soy desserts. In 1988 the cooperative of Valence launched the Innoval line. Others include [Société] Soy, Sojadoc (Richemont) and Sojal. Many of the leaders are dairy companies, but they position their products very differently from dairy milk. Also in the French market are Lima from Belgium (with tempeh and tamari). Tonidoc makes soynuts sold as an aperitif. The French company Bunge, a third party, and Sofiproteol (Sofiprotéol) have created Sogip, which produces soy protein concentrates for use as both calf milk replacers and in human foods.

Concerning regulations, the definitions and uses of soy protein are set forth in a circular of 27 Aug. 1975, which related to another document of 12 Oct. 1972 for terminology. Finally a new circular of 1986 replaced the earlier ones. The

Codex Alimentarius will finish its work on these areas in 1991.

A sidebar describes Innoval and its goals. Address: France.

7454. Diamond, Marilyn. 1990. *The American vegetarian cookbook: From the Fit for Life kitchen*. New York, NY: Warner Books. xx + 422 p. Index. 29 x 22 cm. [74* ref]

• **Summary:** This is a beautifully presented vegan cookbook, with many creative and delicious recipes. Soy-related recipes and entries include: Description of unpasteurized misos (p. 42). Soy products (p. 43; see also How to replace animal products, p. 93). Red miso tea (p. 71).

Chapter 6, titled "How to replace animal products" (p. 93-119), is devoted largely to soyfoods, especially tofu. At one time the Diamonds were not fans of tofu, but now Marilyn hails it as an "extraordinarily healthful" food. She uses it in what she calls "stedda" foods—such as tofu salad "instead of" chicken salad. In this chapter you will find: Nondairy milk and cream: Soymilk (p. 94-95; the author finds nut and seed milks, almond and sesame, to be more flavorful). Enriched almonnaise (non-dairy mayonnaise with almonds and soymilk, p. 98). Instead of meat (p. 100): Exactly what is tofu? Culinary utopia: A dream come true. Buying and storing tofu. Wrapping tofu. Freezing tofu. Marinating tofu. Mixing tofu with other foods. How to proceed. "Stedda" sour cream. "Stedda" sour cream and onion dip. Cottage tofu or "stedda" feta. "Stedda" ricotta. Tofu "cheese" and olive spread. "Stedda" eggs: Rancheros (with tofu, p. 107). Scramblers (with tofu). Scrambled tofu (another way). Scramblers with fresh shiitake mushrooms. "Stedda Matzo brie (with soymilk and tofu). Burgers and other sandwiches (p. 110): "Stedda" egg salad (with tofu). Happy "chicken" burgers (with tofu). "Stedda" fish fillets (with tofu). "Stedda" meat marinades (* = with low-sodium soy sauce): All-purpose marinade I*. "Chicken" flavoring*. "Beefy" marinade*. Sweet and sour*. "Stedda" chicken fillets (with tofu). Mixed grill platter (with tofu). Kebobs! (with tofu). Tofu meunière. Lemon "stedda" chicken (with tofu). "Stedda" Chinese chicken salad.

"Sour cream" garlic dressing (with tofu, p. 128). "Cheesy" dijon dressing (with tofu, p. 130). French green salad with cottage tofu (p. 141). "Stedda" beef salad (with tofu, p. 155). "Stedda" mozzarella salad (with tofu, p. 159). Tofu salad (p. 169). "I used to love a fried egg" sandwich (with tofu, p. 181). Spicy tofu tacos (p. 186). Seasonings for soups (miso, p. 189). Basic cream soup (with light miso, p. 191). Miso soup with ginger and green vegetables (p. 193). Easy miso soup with vegetables and tofu (p. 194). Asparagus with tofu (p. 222-23). Vegetable lasagna with tofu ricotta (p. 278). Meatless bolognese spaghetti sauce (with frozen tofu, p. 280). Dairy-free "cheese" sauce for any pasta (with soymilk and light miso, p. 282). Tamale pie (with tofu, p. 311). Mushroom-leek crepes (with miso, p. 316). Winter

squash blintzes (with tofu, p. 317). Spinach quiche (with tofu and light miso, p. 317). Asparagus quiche (with tofu and light miso, p. 318). Country pot pie (with tofu). Spanokopita with "stedda" ricotta (with tofu, p. 320). Superb vegetable sushi (with tofu, p. 322). Baking ingredients (soy flour, p. 331, and soymilk, p. 333-34). Carrot-cake cookies (with soy flour, p. 346). "Cheesecake" bars (with tofu, p. 346). Easy banana bread (with tofu, p. 348). "Cheese" strudel (with tofu, p. 349). Mocha parfait (with tofu, p. 350). Baked Indian pudding (with soymilk, p. 350). Applesauce cake (with tofu, p. 352). "Chocolate" carrot cake (with tofu, p. 353). Holiday pumpkin pie (with tofu, p. 355).

Talk with Marilyn Diamond. 1991. Sept. 18. The book is in its 9th printing now and the publisher just allowed her to do a revision, correcting typos and improving recipes. The publisher is not even planning the paperback edition yet because the hardcover edition is selling so well. They now have a 10-year contract with Doubleday (with a 10-year option to renew), and she and Harvey are working on a book together titled "How to Save Your Husband's Life While Saving Your Own." It stresses the need to re-affirm the female energies, which are the earth energies. The Diamonds have established a foundation to support the environment and ecological projects. This last year they contributed funds from it to support tree planting through the National Arbor Day Foundation. Address: Bradenton, Florida 34209.

7455. Ontario Soybean Growers' Marketing Board. 1990. A profile of the Canadian soyfoods market—Characteristics and potential. Box 1199, Chatham, ONT N7M 5L8, Canada. vi + 40 p. March. 28 cm. Spiral bound.

• **Summary:** Contents: 1. Introduction: Background, study objectives. 2. Research procedures: Data limitations, data collection (data sources). 3. The soyfood market: Soyfood production and utilization, domestic production, imports and exports (introduction, whole soybeans, soy flours and meals, soy oil, soy sauce, protein substances, cream and other substances, bran & soy hulls, soy meal oil cake), balance, conclusions regarding opportunities.

4. Soybeans for food purposes: Natto beans (background, market characteristics, market potential), whole bean soyfoods (introduction, soynuts, full fat soy flours, soymilk, tofu, soy sprouts, tempeh, miso, natto, soy sauce), foods from soy ingredients (introduction, defatted soy flakes, soy protein concentrate, soy protein isolates, textured soy protein, consumption and imports). 5. Organic soyfoods: Introduction, organizations (major players, labelling requirements, certification), organic soybeans, organic soyfoods, market opportunities, recommendations.

6. Market estimates: Introduction, conversion rates, market characteristics (introduction, ethnic characteristics, immigration trends, implications), soyfood consumption (production). 7. Soyfood products: Introduction, new products (whole bean products, products from soy

components), existing products (products with potential for growth). 8. Marketing strategy: Introduction, respondent requests (background), market opportunities (traditional soyfoods, new products), systems development (system information needs, human resources, production research), institutional needs.

This study was commissioned by the Ontario Soybean Growers' Marketing Board to provide a description of the Ontario soyfood industry. "Production and utilization: In the 1988 crop year, approximately 1.12 million tonnes of soybeans were produced on 1.28 million acres in Ontario. Approximately 86% of the soybeans were sold through the Board, with the remainder being fed or retained on the farms where they were grown. In 1988, 860 thousand tonnes of soybeans were crushed in Canada to produce soybean meal and soy oil, and 272 thousand tonnes were exported.

"Imports and Exports: Canada had a negative balance, a deficit, of almost \$190 million in the value of soybeans and soy products traded. This is just over half a million dollars per day. Our largest single area of exports is whole soybeans for human foods. The percentage of these beans going to the major markets in 1988 were: USA, 37%; Pacific Rim Countries, 34%; and Europe and other 29%. Our greatest imbalance in exports and imports is in soybean meal or oil cake. Canadian crushers are unable to maximize their sales of oil cake because of difficulties in selling surplus soybean oil in the US. Soy oil being sold into the US presently faces a tariff of 18% which is decreasing at the rate of 2.25% per year as per the Canada United States Trade Agreement...

"Institutional development: We suggest the Board initiate the establishment of a Soyfood Development Association similar in structure and function to the Canola Council of Canada... There is a need to begin to bring all industry stakeholders together to systematically identify problems, information and research needs; develop data bases; and cooperatively promote the soyfood industry."

Soybeans for food purposes: The total volume of soybeans consumed as soyfoods in Vancouver (BC), Toronto (Ontario), and Montreal (Quebec) was estimated at about 6,000 tonnes, and imports were estimated to be equivalent to 8,000 tonnes of soyfoods.

Miso: One large Vancouver producer and one Toronto producer estimated that the volume of soybeans used to make miso in Canada is only about 35 tonnes/year.

Modern Soy Protein Products: Soy flour, concentrates, isolates, and textured soy protein products. Roughly 2,400 tonnes of soybeans are used in Canada for the production of these products, and 5,600 tonnes of soybeans are used to make the imported products (only bakery flour and extruded flour are made in Canada). Almost 1,000 tonnes of soy protein concentrates and isolates, and 400 texture soy proteins were imported, 83% from the USA. Total exports were 800 tonnes, of which 578 tonnes went to the USA. Soy flour (full-fat): The term "flour" generally signifies that

the material has been ground finely enough to pass through a 100-mesh screen. Only relatively small volumes of full-fat soy flours are used directly as human foods. Some are used in bread, crackers, and pastry products. 5 companies in Canada make 1,538 tonnes of soy flour worth \$495,000.

Natto: Canadians sell roughly 8 to 10 thousand tonnes of natto beans in Japan each year. Natto-type beans are "created by screening out the small beans from among regular food grade soybeans which have white hilums" (p. 15). In Japan about 100,000 tons/year of soybeans are used to make natto. Recently, Canada (via 3 companies—First Line Seeds, W.G. Thompson, and King Grain) has supplied about 10% of this market. Ontario produces about 8,000 to 10,000 tonnes of natto beans. Competition is expected to increase from U.S. seed breeders.

Soymilk: There are presently no large Canadian soymilk manufacturers. A plant is being built by an international trading company near Vancouver (YHS Pacific Fruit Concentrates Ltd., owned by Yeo Hiap Seng). It will supply both the local market and the Western U.S. market when it goes on stream later this year. A high proportion of imported soymilk is organic. Two brands account for 3/4 of all imports: Edensoy and Vitasoy. A high proportion of all soymilk imports are certified organic. This emphasis makes it difficult for Canadian producers to compete because of the shortage of organic soybeans in Canada. Consumption of soymilk is increasing at about 10% a year. Prices range from \$1.50 to \$2.75 per liter, with the organic product commanding the higher prices. Just under 100 tonnes of soybeans are used to produce soymilk in Canada: Vancouver 42 tonnes, Toronto 30 tonnes, Montreal 25 tonnes, plus imports 240 tonnes. 1 kg of soybeans produces 16.5 kg of soymilk.

Soynuts: The volume of soynuts made in Canada is quite small. One Toronto company [Grove Country Foods Canada, Inc.; they were in business 1-2 years, but were out of business by Jan. 1991], which began operation in Nov. 1988, sells a line of roasted nuts, which are roasted in the USA and chocolate-dipped in Ontario. Production was only a few tonnes in 1989 and is estimated to be about 10 tonnes in 1990.

Soy sauce: In 1986, according to Statistics Canada data, 2,503 tonnes of soy sauce were produced by 6 firms. The value was \$2,161 per tonne for a total of \$5,411,000. In 1988 Canada imported 5,680 tonnes of soy sauce valued at \$4 million, primarily from China, the United States, Hong Kong, and Japan. Exports were 58 tonnes valued at \$65,000. The major Canadian producers are China Lily and Sun Fresh in Toronto, Wong Wing and VH in Montreal, and Golden Dragon in Vancouver. The value of Toronto production is currently estimated to be about \$5 million.

Soy sprouts: One Toronto manufacturer uses 20-25 tonnes of soybeans per year.

Tofu: About 3,300 tonnes of soybeans are used to

produce tofu in Canada, more than any other soyfood. The volume of soybeans used is estimated at 1,400 tonnes in Toronto, 1,200 tonnes in Quebec (when a relatively large operation in Hull [La Soyarie, Inc.], near Ottawa, which exports to Ontario is included), 625-700 tonnes in Vancouver, and 125 tonnes for imported tofu. 1 kg of soybeans produces 2.4 kg of tofu.

Tempeh: Only about 33 tonnes of soybeans are used to make tempeh in Canada, and an estimated 15-20 tonnes in Ontario. Imports are relatively small. 1 kg of soybeans produces 1.6 kg of tempeh. Very few firms produce tempeh in Canada. One producer claims to have over half the Ontario market. A major distributor suggested they sold 4-5 times as much tofu as tempeh.

Soybean crushing: Since 1986 the number of firms crushing soybeans and producing soy oil has decreased from 3 to 2 [Central Soya owns two plants; in 1990 they bought the Canadian Vegetable Oil Processing (CVOP) plant in Hamilton, Ontario, formerly owned by Canada Packers Inc. They purchased Victory Soya Mills in Toronto in early 1985. So now 2 firms own 3 plants]. In 1986 the three plants made 95,108 tonnes of crude soy oil worth \$57,271,000. Two firms made deodorized soy oil, but the volume and value were confidential. Less than \$2 million of any type of soy oil is imported.

Consumption of soyfoods in Canada is strongly linked to Asian-Canadians. A table (p. 32) shows that according to the 1986 census, there were about 444,000 people of East- and Southeast Asian origin living in three major Canadian cities: Vancouver (155,105 people comprised 11.2% of the city's population), Toronto (234,325 people comprised 6.8%), and Montreal (55,585 people comprised 2.4%). Thus Toronto was by far the largest market, but Vancouver had the highest density of Asian-Canadians. A similar table (p. 33) updates the previous table to 1988. Immigration has increased sharply since then.

Note: This is the earliest document seen (Feb. 2002) that uses the term "food grade" (or "food-grade") in connection with Canadian soybeans (see p. 15). Address: Chatham, ONT, Canada.

7456. Krohn, Joni. 1990. Standard Industrial Classification (SIC) Codes: SIC classification ended in about 1984; SITC (Standard International Trade Classification) is now in use (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** *The Standard Industrial Classification Manual* is published by the Office of Management and Budget (OMB), which also publishes the SIC codes. Another related publication is *The Numerical List of Manufactured and Mineral Products*, and its *Alphabetic Index*, both published by the Census Bureau (within the Department of Commerce); these documents expand the basic 4-digit SIC codes to 7-digits to give more detail: Our industry is most

aptly characterized by 2075A = Soybean products.

0116 = Soybean farms. Any industry that starts with zero is agricultural.

2024-071 = Mellorine and similar frozen desserts, incl. those made with tofu.

2026-717 = Products which substitute for fluid milk products [probably includes soymilk].

2026-718 = Other perishable dairy product substitutes [probably includes soy yogurts & cheeses].

2035 = Pickled fruits and vegetables.

2035-234 = Other finished pickles and pickled products [incl. mixes, relishes, peppers, onions, and mushrooms; probably includes miso].

2035-351 = Other sauces, incl. Worcestershire, soy sauce, horseradish, meat, vegetable, etc.

2075 = Soybean flour, grits, meal, cake, and soy oil (unrefined).

2079 = Soybean cooking and salad oil.

2084 = Soybean fibers.

2099-955 = Tofu (Bean curd).

2099-998 = Other perishable prepared foods, sold in bulk or packages, not frozen [probably includes tempeh].

Note: in May 1984 the "Primary SIC" code assigned to tofu manufacturers by Dun & Bradstreet was either 2075 (Soybean Oil Mills), or 2099 (Food Preparation Nec.).

Examples of SITC numbers: Soya bean flour and other protein substances, textured 098.09. Soya bean flour, defatted (excl. protein concentrates) 081.31. Soya bean flour, non-defatted 223.9. Bean curd 098.09... Soya sauce 098.04. Soybean—see soya bean 098.04. Address: Dep. of Commerce, Bureau of the Census, Economic Surveys Div., Industry & Commodity Classification Branch, FOB-3, Room 2744, Washington, DC 20233;. Phone: 301-763-1935.

7457. Dorow, Detlef. 1990. A brief history of Berliner Tofurei (Interview). *SoyaScan Notes*. April 17. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The company started making tofu products in Aug. 1988. They started making 4 products: Natural tofu, herb tofu, spice tofu, and tofu with shoyu sauce. They now also make 4 other tofu products, and sell tofu snacks. They produce 1,000 kg/week of tofu, but they have the capacity to produce 7,000 kg/week if they worked 3 shifts. The company has 3 owners and 4-5 employees. Detlef started the company with two. He was the official owner. Now the other owners are his friend, Ralf Hoffmann, and a Taiwanese man [probably Shi-Jong Chen]. Address: Luebennerstr. 4, D-1000 Berlin 36, West Germany. Phone: 030/612-7931.

7458. **Product Name:** Fred Marken's California Pasta Peanut Sauce.

Manufacturer's Name: Fred Marken and Daughters Inc.

Manufacturer's Address: 1428 Yosemite Ave., San Francisco, CA 94124. Phone: 415-822-4675.

Date of Introduction: 1990. April.

Ingredients: Soy [sauce], ground peanuts, sugar, pressed sesame oil, fresh ginger, fresh garlic, 1/10 of 1% potassium sorbate, sodium benzoate.

Wt/Vol., Packaging, Price: 12 fluid oz bottle with tamper-proof screw-on cap.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: "Only 80 calories per 1 oz serving. Sodium: 40 mg per ½ teaspoon."

New Product–Documentation: Talk with Fred Marken. 1990. Oct. 29. This product was introduced in about April 1990. Label sent by Fred Marken. 1990. Nov. 5. 5 by 4 inches. Self adhesive. Blue, green, white, and brown. Water color impressionist illustration of sailboats under the Golden Gate Bridge. "Very low salt. No M.S.G. Adventure: Great over pasta, tofu, fish, vegetables, chicken, or as a dip. Excellent with tostada."

7459. **Product Name:** Fred Marken's Ginger Marinade.

Manufacturer's Name: Fred Marken and Daughters Inc.

Manufacturer's Address: 1428 Yosemite Ave., San Francisco, CA 94124. Phone: 415-822-4675.

Date of Introduction: 1990. April.

Ingredients: Soy [sauce] (water, wheat, soybean, salt), high fructose corn sweetener, corn starch, unrefined sesame oil, soy oil, fresh ginger, fresh garlic, xanthan gum (a natural thickener), 1/10 of 1% sodium benzoate, 1/10 of 1% potassium sorbate, 1/10 of 1% corn starch [actually xanthan gum].

Wt/Vol., Packaging, Price: 12 fluid oz bottle with tamper-proof screw-on cap.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: "Only 60 calories per 1 oz serving. Sodium: 60 mg per ½ teaspoon."

New Product–Documentation: Talk with Fred Marken. 1990. Oct. 29. This product was introduced in about April 1990. Label sent by Fred Marken. 1990. Nov. 5. 5 by 4 inches. Self adhesive. Pink, white, green, and brown. Water color impressionist illustration of plum blossoms on a branch. "Very low salt. No M.S.G. Exciting: Pour marinade over meat, fish, tofu or chicken, cover and refrigerate for at least 30 minutes. Barbecue, broil, bake, or microwave—brush on remaining marinade for extra flavor. Great in stir-fry."

7460. **Product Name:** Fred Marken's Old World Spinach Salad Dressing.

Manufacturer's Name: Fred Marken and Daughters, Inc.

Manufacturer's Address: 1428 Yosemite Ave., San Francisco, CA 94124. Phone: 415-822-4675.

Date of Introduction: 1990. April.

Ingredients: Soy [sauce] (water, wheat, soy bean, salt), high fructose corn syrup, pineapple concentrate, unsulphured molasses, fresh ginger, fresh garlic, soybean oil, partially hydrogenated soybean oil, whole eggs, vinegar, water, egg

yolks, salt, sugar, lemon juice and natural flavors, calcium disodium EDTA to protect flavors, sodium benzoate less than 1/10 of 1%, potassium sorbate less than 1/10 of 1%, xanthan gum.

Wt/Vol., Packaging, Price: 12 fluid oz bottle with tamper-proof screw-on cap.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Talk with Fred Marken. 1990. Oct. 29. This product was introduced in about April 1990. Label sent by Fred Marken. 1990. Nov. 5. 5 by 4 inches. Self adhesive. Blue, green, white, black, and brown. Water color impressionist illustration of a person bending over working in a garden. "Very low salt. No M.S.G. Impress your friends with this spinach salad." Recipe is given.

7461. **Product Name:** Fred Marken's Orange Sauce.

Manufacturer's Name: Fred Marken Inc.

Manufacturer's Address: 1428 Yosemite Ave., San Francisco, CA 94124. Phone: 415-822-4675.

Date of Introduction: 1990. April.

Ingredients: Orange juice from concentrate, soy [sauce] (water, wheat, soybean, salt), dijon mustard, high fructose corn syrup, corn starch, fresh garlic, xanthan gum (a natural thickener), 1/10 of 1% sodium benzoate, 1/10 of 1% potassium sorbate.

Wt/Vol., Packaging, Price: 12 fluid oz bottle with tamper-proof screw-on cap.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Talk with Fred Marken. 1990. Oct. 29. This product was introduced in about April 1990. Label sent by Fred Marken. 1990. Nov. 5. 5 by 4 inches. Self adhesive. Orange, blue, green, white, and black. Water color impressionist illustration of oranges on a blue table cloth on a table. "Very low salt. No M.S.G. Pour marinade over meat, fish, tofu, chicken, or duck, cover and refrigerate at least 30 minutes or overnight—barbecue, broil, bake or microwave. Brush-on remaining marinade for extra flavor. Great on duck."

7462. Leigh, Roberta. 1990. Soyfoods: Why their popularity is growing. Special advertising section. *New Age Journal* (Boston, Massachusetts) 7(2):100-. March/April.

• **Summary:** Since the 1920s, Americans have been taught that they need at least two servings of meat and two glasses of milk each day to get enough protein. Many people switching to vegetarian diets or reducing their meat consumption feel most comfortable if they continue to plan at least some of their meals around a high-protein food.

"Consequently, the popularity of soyfoods has boomed during the past two decades... They can also be prepared in a number of ways, such as tofu and tempeh, that mimic 'meatiness' in terms of eating satisfaction.

"Shoyu and tamari, both fermented soy sauces, and miso, a fermented soy paste, are often used as bases for

soups, gravies, and sauces; many people feel they impart a rich flavor to meat stock. Soy milk and soy cheese are popular with people who want to minimize or eliminate dairy products from their diets. There are even smokey-flavored imitation bacon products made from soy.

“Tofu is a cheese-like product containing the protein, oil, and soluble carbohydrates from whole soybeans that have been crushed and cooked...—Roberta Leigh.”

7463. Product Name: Lightlife Lean Links (Breakfast Sausages) [Mild, or Spicy].

Manufacturer's Name: Lightlife Foods, Inc.

Manufacturer's Address: 74 Fairview St., Greenfield, MA 01301. Phone: 413-774-6001.

Date of Introduction: 1990. April.

Ingredients: Textured vegetable protein (water, textured soy protein concentrate, soy protein isolate, vital wheat gluten), soy oil, soy sauce, spices, toasted sesame oil, salt, natural vegetable flavors, natural smoke flavor, carrageenan (from seaweed).

Wt/Vol., Packaging, Price: 10 oz (238 gm) vacuum pack. Retail for \$2.79 (6/90, California).

How Stored: Refrigerated.

Nutrition: Per 2 oz.: Calories 82, protein 13 gm, carbohydrate 4.9 gm, fat 1.1 gm, cholesterol 0 mg, sodium 482 mg.

New Product–Documentation: Product with Label purchased at Lafayette, California, Safeway supermarket. 1990. June 13. 5 by 4 inches. Self adhesive. Red, black, and yellow on white. “100% vegetarian. Meatless. All natural breakfast links. Zero cholesterol. Microwaveable. A delicious vegetable protein sausage alternative.” Back panel: “Delicious sausage flavor with only 1 gram of fat per serving and no cholesterol.” Soyfoods Center product evaluation. 1990. June 17. Score: 7.0. Pan fried or microwaved, a little dry (better if juicier) and the skin is a little tough.

Talk with Richard McKelvey, sales manager of Lightlife Foods. 1990. June 19. They make these products in house. The category seems to have great potential but they are working on the flavor. They have already made a lot of changes to the product, not ingredient changes but the way they are processed. He sent 2 Labels July 20.

Soya International. 1990. April/June. p. 23. Contact: Rick McKelvey. A new address is listed at P.O. Box 870, Greenfield, Massachusetts.

Talk with Michael Cohen. 1991. Sept. 17. There were some problems with this breakfast sausage with wheat gluten, so it was taken off the market, reformulated, and re-introduced about 8 months ago.

7464. Product Name: Stir-Fry Sauce, Stir Fry Spicy Sauce for Seafood, Chinese BBQ Sauce, and Steak Sauce.

Manufacturer's Name: Merrychef Foods SDN BHD.

Manufacturer's Address: 118A Jalan Burhanuddin Helmi,

Taman Tun Dr., Ismail, 6000 Kuala Lumpur, Malaysia. Phone: 03 719-7540.

Date of Introduction: 1990. April.

Wt/Vol., Packaging, Price: 250 gm glass bottles.

How Stored: Shelf stable.

New Product–Documentation: Spot in SoyaFoods. 1991. Spring. p. 4. “Stir fry sauces from Merrychef.” “Merrychef Foods produces a whole range of sauces for Western and Oriental cooking, most of which are exported. Their ‘Chinese’ range of ‘stir fry,’ ‘BBQ,’ and steak sauces are mainly based on soya and have been available in the UK for about a year and in Australia, Japan and Germany for a few months. Merrychef hopes to export to the U.S. this year as well as to supply the home market... Varieties include stir fry for meat, vegetables, sea food, Chinese BBQ and steak sauce.”

7465. Muso Co. Ltd. 1990. Muso product manual: Foods from Japan. Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. 62 p. Catalog. April. 30 cm. [Eng]

• **Summary:** This English-language catalog describes Muso's natural-food macrobiotic products that are exported to the West. There are 8 pages of color photos at the front, and many flowcharts and recipes in the body of the catalog. Interesting color photos include: Shoyu fermentation room. Spreading moromi before pressing to make shoyu. Hatcho miso aging room. Drying kombu and cultivating nori on nets. Umeboshi and brown-rice vinegar. Shiitake mushrooms growing on logs and huge kudzu roots.

Contents: Shoyu (organic, low salt), tamari (wheat-free soy sauce), miso (Hatcho, barley, rice, white miso, brown-rice miso, awase miso [mixed miso], buckwheat miso, unpasteurized miso [nama miso]), seaweeds, Japanese pasta, wheat free pasta (incl. kudzu noodles), Japanese tea, other beverages, soymilk, amazake, ume/plum products (incl. umeboshi), Japanese pickles, dried foods (incl. kudzu root starch, shiitake mushrooms, koya tofu, fu [gluten cake]), condiments (incl. tekka miso, *nori no tsukudani*, natto miso [miso condiment]), seasonings, instant foods (incl. brown rice mochi, yomogi mochi, kibi mochi, yaki mochi, abekawa mochi with kinako, cooked brown rice, ramen [Chinese style noodles], instant miso soup), crackers and chips, barley malt syrup and rice malt syrup, food supplements (plum balls, kombu balls), adzuki beans, black soybeans, nigari. Address: Osaka, Japan. Phone: 06-942-0343.

7466. Product Name: [Parma Soia Soy Drink (Chocolate, Strawberry, and 1 Other Flavor)].

Foreign Name: Parma Soia Soidrink (Al Cioccolata, Alla Fragola).

Manufacturer's Name: Parma Soia (Marketer-Distributor). Made in England by Unisoy.

Manufacturer's Address: Strada Logheretto 2, 43010 Corcagnano (Parma), Italy. Phone: 0521-639-148.

Date of Introduction: 1990. April.

Ingredients: Water, soya, cane sugar, strawberry puree.

Wt/Vol., Packaging, Price: 500 ml plastic bottles with foil lid.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Talk with Xavier Karis in Italy. 1990. June 13. About 2 months ago this company, located in Parma, started a line of soya products, including soya milk (Soilat) in plain and chocolate flavors (which they probably do not make themselves). Because this is a small company, nobody has made any trouble yet over the Italian name of their soymilk, but if they get bigger, they are bound to get in trouble because Italian law forbids use of the terms “soia” and “latte” together. Their phone is 0521-639-148.

Parma Soia brochure. 1990. Photo shows aseptic package.

Letter from Xavier Karis. 1990. June 15. On the plastic Soidrink bottle is written: “Produced in England.” Talk with Neil Rabheru of Unisoy. 1990. July 2. Unisoy makes this soymilk.

Label (for strawberry) sent by Xavier Karis. 1990. June 27. 9 by 2.5 inches. Red, gold, green, black, and orange on white. The semicircular logo on the front panel shows a large field with long rows of soybeans. Across the top in large letters is written: “Campi di Soia” (Fields of Soya), while across the bottom, in the same letters is written Parma Soia. There are three groups of soybean leaves at the bottom two corners and the bottom middle of the logo. And below that, an illustration of many ripe strawberries. “An energy beverage ideal for those who like sports, who study, and who live an active life. A Natural product, without preservatives or colorings. Shelf stable; Refrigerate after opening and consume within 3-6 days.”

7467. **Product Name:** [Parma Soia Soy Sauce (Regular, or Sweet)].

Foreign Name: Parma Soia Salsa di Soia (Regular, Dolce).

Manufacturer’s Name: Parma Soia (Marketer-Distributor).

Manufacturer’s Address: Strada Logheretto 2, 43010 Corcagnano (Parma), Italy. Phone: 0521-639-148.

Date of Introduction: 1990. April.

Wt/Vol., Packaging, Price: Dispenser bottle.

How Stored: Shelf stable.

New Product–Documentation: Talk with Xavier Karis in Italy. 1990. June 13. About 2 months ago this company, located in Parma, started a line of soya products, including soy sauce.

Parma Soia brochure. 1990. Photo shows product and label. The large, semicircular logo on the package shows a large field with long rows of soybeans. Across the top in large letters is written: “Campi di Soia” (Fields of Soya), while across the bottom, in the same letters is written Parma Soia. There are three groups of soybean leaves at the bottom two corners and the bottom middle of the logo.

7468. **Product Name:** Tofu Burgers (Tandoori, Tikka, and Teriyaki).

Manufacturer’s Name: Regular Tofu Co. Div. of Haldane Foods Group.

Manufacturer’s Address: 25 Hayhill, Sileby Road, Barrow upon Soar, Leicestershire LE12 8LD, England. Phone: 050981-6611.

Date of Introduction: 1990. April.

Wt/Vol., Packaging, Price: Two x 3 oz burgers per unit. 12 units per case. Wholesales for £6.75. Retails for £0.75 per unit.

How Stored: Refrigerated or frozen.

New Product–Documentation: SoyaFoods (ASA, Europe). 1990. 1(1):3.

Haldane Foods Group. 1990. “Twenty-one Today. Twenty-new and exciting products launched at Helfex alone.” At least 12 of these are soyfood products.

7469. Wolff, David. 1990. The Manchurian soya bean and the development of Northeast Asia, 1899-1922. *Asiatic Society of Japan, Bulletin (Tokyo)* No. 4. p. 2-4. April.

• **Summary:** The soybean was introduced into Manchuria at the end of the 1800s and by 1899 constituted 79% of the region’s total exports. The resulting prosperity made the area a theater of conflict between China, Russia and Japan. “By 1922, almost all bean shipments had been diverted from Vladivostok to Japanese-controlled Dairen, making such ‘typically Japanese’ foodstuffs as tofu and shoyu generally affordable for the first time... Thus the soya bean played an integral part in the history of Manchuria, bringing first wealth, then strife, and ultimately subjugation.” Address: PhD candidate in Russian and Chinese history at the Univ. of California at Berkeley.

7470. *SoyaScan Notes*. 1990. New Trend: Large European food companies, and agricultural- and dairy cooperatives now launching and actively promoting innovative new tofu and soymilk products: Mostly dairylike and meatlike products (Overview). May 8. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** In Jan. 1980 Vandemoortele N.V., one of Europe’s largest oilseed crushers, located at Izezem, Belgium, began to make its first commercial soymilk product (GranoVita Soja Drink in plain and carob flavors, packed in 500 ml Tetra Brik cartons) which was private labeled (co-packed) for DE-VAU-GE, a large Seventh-day Adventist health food manufacturer in West Germany. This was Alpro’s first customer. In June 1980 Vandemoortele created Alpro N.V. to take over this production. The company quickly became Europe’s leading soymilk producer and by 1990 had about 70% of the European soymilk market. Their new soymilk plant, costing about US\$15 million and having a capacity of 45 million liters a year, opened in Wevelgem in

June 1990.

In June 1984 Migros, Switzerland's leading retail food chain, launched 5 tofu products: Natural Tofu, Tofu Snack with Spices, Spicy Tofu Spread, Diced Tofu with Cream, and Tofu Bolognese. In 1985 they introduced Tofu with Mushrooms and Gravy, followed in 1986 by Canned Tofu Kashmir (with Curry and Fruits), Tofu Spread with Cheese (in a Tube), Tofu Chocolate Crème, and Tofunaise (in a Tube), then in 1987 by Seasoned Tofu. In 1986 Migros, a 61 year old cooperative with 1.4 million members, had net sales of 3,166 million Swiss francs. The tofu was made by a Migros company named Conserves Estavayer in Estavayer-le-Lac, near Zurich.

Galactina is a well established Swiss company (located in Belp) that has made a soymilk named Naga Sonda for enteral tube feeding since 1980. In 1981 they launched the product in liquid Tetra Pack. They entered the tofu market in 1984 with Galactina Tofu, then in 1985 added three types of Seasoned Tofu (Gourmet Diced with Soy Sauce & Spices, Provencale with Herbs, and Jardiniere with Vegetables), followed in 1987 with Tofu Spread and 1988 with Tofu Burger and Tofu Salads. All were marketed very attractively.

In Aug. 1985 DE-VAU-GE, one of Europe's oldest and largest producers of vegetarian health foods, began operation of its new soymilk plant (purchased from STS/DTD) in Lueneburg, West Germany. By 1990 they were Europe's second largest soymilk manufacturer, with 15-20% of the market. They also sold many tofu products and were planning to produce tofu in the near future.

In 1985 Laiteries Triballat, a large French dairy products company (mostly cheese, located at Noyal-sur-Vilaine, Brittany) introduced Sojasun, an innovative cultured soymilk yogurt in 4 flavors, two with bits of fruit and two with fruit puree. In Oct. 1988 and early 1989 they promoted the product extensively on French television and in German print media. Sales in several western European countries were said to be good.

In 1986 Parmalat, the Italian dairy giant, introduced a soymilk named Soialat. By 1989 they had created a subsidiary named Parma Soia, which sold three lines of more than 20 soy products. The Campi di Soia line (containing soymilk, soy pasta, sauce, and sprouts) was sold at supermarkets. The Nature Soy line was imported, and the Erboristeria line was for the health food market.

In Jan. 1987 Cacoja, a newly-formed affiliate of the Coopérative Agricole de Colmar (CAC), began production of soymilk and soy desserts at its new, fully-automated plant (with an ultrafiltration system) at Issenheim, France. Purchased from Alfa-Laval, the plant cost 11 million French francs and had a capacity of 1,500 liters/hour of soymilk containing 4% protein. By 1990 Cacoja was Europe's third largest soymilk producer.

In Sept. 1987 Rayner Burgess Ltd., a large British Food company that specializes in an array of unique condiments,

purchased Cauldron Foods Ltd., Britain's second largest tofu manufacturer, and the largest marketing its products to the Caucasian and health-food trades.

In Jan. 1988 British Arkady, a large British food conglomerate owned by Archer Daniels Midland Co. (Decatur, Illinois) acquired the Haldane Foods Group, and made it part of British Arkady's Health Foods Div. The Haldane Foods Group was put together by acquisition of Direct Foods Ltd. (founded 1980, acquired by the Group in 1985), Vegetarian Feasts Ltd. (founded 1984, acquired 1986), Haldane Foods Ltd. (founded 1983, acquired Aug. 1987), Vegetarian Cuisine Ltd. (founded 1985, acquired 1987), Regular Tofu Co. Ltd. (founded 1983, acquired Aug. 1987), Realeat Foods Ltd. (founded 1984, acquired Sept. 1988), Saucemasters Ltd. (founded 1988, acquired Feb. 1989), and Genice Foods Ltd. (founded 1988, acquired March 1989). Self-proclaimed as "Europe's leading healthier food group, most of these companies make tofu or soyfood products.

In April 1989 Huegli AG, a leading Swiss food company, purchased 75% ownership in Yamato Tofuhaus GmbH, one of West Germany's leading tofu manufacturers. At about the same time, Huegli purchased Horst Heirler, the country's leading distributor of fresh products.

Also in April 1989 Lima N.V. of Belgium, one of Europe's earliest natural foods companies, purchased Jonathan PVBA, Belgium's leading tofu manufacturer.

In Sept. 1989 Innoval (formerly Sojalpe), an acquired affiliate of Les Silos de Valence (a large 5,000-member cereal cooperative in Rhone Alpes, France), began to produce tofu, soymilk, and liquid soy concentrate (with an ultrafiltration unit) at a modern new plant, with a capacity of 2,000 liters/hour, purchased from Alfa-Laval at a cost of 20-21 million French francs.

In Feb. 1990 Euro-Nature, a French investment fund, purchased 97% Lima N.V. of Belgium.

In early 1990 Avo Feinkost GmbH, a large West German spice from Osnabrueck, launched the Sofit line of soy products, including various meatlike products, dressings, and salads.

7471. Nishikawa, Russ K. 1990. Possible carcinogens in HVP and HVP soy sauce (Interview). *SoyaScan Notes*. May 25. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In the high-acid, high-heat environment in which HVP (hydrolyzed vegetable protein) is made, several cancer causing substances can form: dichloropropanol, polychloropropionol (polychloropropanol?) and bichloropropionol (bichloropropanol). Address: The Ingredient Connection, P.O. Box 827, Martinez, California 94533. Phone: 415-370-7520.

7472. *SoyaScan Notes*. 1990. What are celiac disease, celiac sprue, and Duhring's disease / dermatitis herpetiformis (Overview). May 29. Compiled by William Shurtleff of

Soyfoods Center.

• **Summary:** People with these diseases must avoid consumption of gluten, even in minute amounts. This gluten can be found in wheat, oats, barley, or rye, and thus these people cannot enjoy any soy sauce except wheat-free tamari. *Webster's Dictionary* defines celiac disease (pronounced SEE-lee-ak; the term was first used in 1936 and is also spelled coeliac in the UK) as "a chronic nutritional disturbance in young children characterized by defective digestion and utilization of fats and by abdominal distention, diarrhea, and fatty stools." Wikipedia (Aug. 2011) defines it as "an autoimmune disease of the small intestine that occurs genetically predisposed people of all ages from middle infancy onward." The term celiac by itself (first used in 1662) is defined as "of or relating to the abdominal cavity."

But celiac sprue refers to a tremendous intolerance (much stronger than an allergy) to wheat or gluten in any food. Many people suffering from celiac sprue are also intolerant to milk and milk products. Thus they often consume soymilk instead of milk and wheat-free tamari instead of shoyu.

Duhring's disease, named after U.S. dermatologist Louis A. Duhring (1845-1913), is much less common and therefore less well known than celiac or celiac sprue diseases. Also known as dermatitis herpetiformis or dermatitis multiformis, it is caused by an inability of the small intestine to digest gluten. When a person who has Duhring's disease consumes even a minute amount of gluten, they will experience severe, extensive itching, and their skin will generally break out with a terrible rash and eruption of blisters (vesicles and papules, which occur in groups), often over much of the body, that last for weeks. But if they are scratched, they burn, causing intense pain. Spontaneous healing rarely occurs, except in children, and relapses are common. Many people with Duhring's disease are also dairy intolerant and 70% of them have some form of thyroid disease. Most people with Duhring's disease are Caucasian; few are African- or Asian-American. The disease is often misdiagnosed by dermatologists. A society has been formed at a university in Ohio to help those who suffer from Duhring's disease.

7473. Vanka-Kawat B.V. 1990. Topmerken in de Aziatische levensmiddelen: Prijslist [The top brands in Asiatic foods: Price list]. 3e v.d. Kunstraat 18, 2521 BB Den Haag, Netherlands. 22 p. [Dut]

• **Summary:** The subtitle is "Import-Export Asian Food Specialties." Imported items are listed by country of origin. Non-imported are listed by product type: China: Pearl River mushroom soy, soy superior, and superior soy. Philippines: Silver Swan soy sauce. Hong Kong: Best black soy, Best light soy, Best soy light, Best soy sauce, Black soy, Black soy yellow label, Hoi sin sauce Meechung, Taotjo bean sauce. Japan: Akamiso, Kikkoman menmi, Kikkoman shoyu, Kikkoman steak sauce, Kikkoman teriyaki sauce, Marukin

soy sauce, Morinaga silken tofu, Nagatani-en aka-miso, shiro-miso, Teriyaki sauce. Ketjap: Ketjap kaki tiga, Ketjap A, Ketjap 'A' manis, Ketjap benteng asin, Ketjap benteng manis, Ketjap vital, Superior soy, Tiger brand soy, Yellow label. Singapore: Salted soy beans sin sin, Taotjo bean sauce, Taotjo flower brand, Taotjo taksan. Taiwan: Black beans fermented [fermented black soybeans], Soy sauce ve wong, Tahoe amigo, Tauge [sprouts]. Fresh products: Vacuum packet fresh tofu. Fresh tempeh. Address: The Hague, Netherlands. Phone: 070-388- 88 04.

7474. Oka, Seizo. 1990. Early Japanese immigrants to Hawaii (Interview). *SoyaScan Notes*. June 7. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The first contracted labor immigrants from Japan arrived in Hawaii in 1868 aboard the ship *Scioto*. They took with them miso and shoyu. Before that time, some Japanese drifted ashore or were shipwrecked on Hawaii. A number of groups were supposed to follow the first group, but there was a dispute in the contract so the program was terminated with the first group.

The ship *Scioto* (pronounced sai-OH-tuh) was apparently named after a river in Ohio that flows 237 miles southward through Columbus and empties into the Ohio River in Scioto County. It belonged to the Pacific Mail Steamship Co. of the USA. In Japanese the ship's name is usually romanized in katakana as *Saioto-go* (or less commonly as *Shioto-go*), where "go" (the Japanese character for "number") is a suffix widely used with the names of ships, trains, and other vehicles. "Go" is not a counter for ships—the counter is "seki," such as isseki, niseki.

Robert W. Irwin, an American who became an agent in Yokohama for the Pacific Mail Steamship Co., played a key role in both the 1868 and 1885 contracts. The first group consisted of 148 Japanese. They were under a contract made between the Japanese government and the Hawaiian kingdom. But because of a dispute in the contract, 40 members of the group returned to Japan without fulfilling the contract; 108 remained in Hawaii and fulfilled the contract. Since they left in 1868, the first year of Meiji, they are often referred to as "Gannen mono" which means "Fellows of the first." In 1885 the contracted labor was resumed, and continued on for several years. The second group of contracted labor immigrants was carried from Japan to Hawaii on the ship named *City of Tokio*. Address: Founder and former Head, History Room, Japanese Cultural and Community Center, 1840 Sutter St. #206, San Francisco, California 94115. Phone: 415-751-5951.

7475. Stachura, Irena. 1990. About the ship *Scioto* (Interview). *SoyaScan Notes*. June 9. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** In the book titled *Merchant Sail* by William Armstrong Fairburn two vessels named *Scioto* are listed.

The first was built in 1831. Tonnage: 141 tons. Length: 81 feet. Beam/width: 23 feet. Depth: 9 feet. Rigging: Schooner (with triangular sails, pointed at the top). It was probably not built on the West Coast since there is very little information about it in the files of the National Maritime Museum. It was probably built on the East Coast. It is not listed as a Gold Rush vessel.

The second vessel named Scioto was built in the Skolfield yard. It was a ship, with 3 masts or more. For more information contact the Mystic Seaport in Mystic, Connecticut. Address: Research Librarian, National Maritime Museum Library, Bldg. e, Third Floor, Fort Mason Center, San Francisco, California 94123. Phone: 415-556-9870.

7476. Bailey, Jeff. 1990. Plains giant: What makes ConAgra, once on brink of ruin, a Wall Street favorite? Ten years of profit increases, shrewd food acquisitions led up to Beatrice deal. Tornado spares the directors. *Wall Street Journal*. June 13. p. A1, A4.

• **Summary:** ConAgra, a company which is not glamorous or well known, mills flour, corn and oats, sells fertilizer and frozen foods, and raises beef, chicken and catfish. However, last week it agreed to buy Beatrice Inc. for \$1.34 billion, making it the 2nd largest U.S. food processor after Philip Morris' Kraft General Foods. Charles M. Harper, ConAgra's aggressive chairman, will soon own the Chun King brand.

The company began in 1919 as Nebraska Consolidated Mills Co., with 4 small mills. In the early 1970s, ConAgra suffered big losses on the futures market when it tried to hedge its soybean meal inventories, used to feed its chickens. In 1974, when Mr. Harper became CEO, many analysts didn't think the company would last long. But since that time he has "built ConAgra into a food industry giant with \$15 billion in revenues and 19 straight years of earnings increases. A share of ConAgra bought for \$3 in 1974 when Mr. Harper took over would now be worth—following stock splits—\$430." ConAgra recently passed Cargill to become America's 2nd largest meat packer.

A portrait illustration shows Charles M. Harper. A pie chart shows ConAgra's business segments. Graphs show: (1) Annual revenue in billions of dollars from 1985 to 1990. (2) Annual return on common stockholders equity, 1985-1989 (avg. 23%). (3) The value of ConAgra's stock compared with the Dow Jones Food Index. Address: Staff reporter.

7477. Sakaguchi, Noboru. 1990. Early history of making tofu at Le Bol en Bois (Interview). *SoyaScan Notes*. June 14. Conducted by David de Korsak in France.

• **Summary:** In 1969 Mr. Sakaguchi made his first trip to Paris from his homeland, Japan. He returned to Paris in March 1974, and became aware of the possibility of buying a macrobiotic restaurant from a friend who at the time was a cook in that restaurant. From April-Aug. 1974 he returned to Japan to finalize a deal with Japanese investors and to

study tofu making. While he was in Paris touring vegetarian restaurants, Mr. Sakaguchi had been struck by the lack of protein in the foods he saw. Tofu naturally came to his mind as the food that would ideally supplement (and complement) that vegetarian cuisine. "Tofu was missing... I thought of this as my mission."

On 2 Sept. 1974 Mr. Sakaguchi opened Le Bol en Bois. He had expanded it to include a natural foods retail store located directly across the street. In the last quarter of 1975 he began trials making tofu using calcium sulfate as a coagulant. In about Nov. or Dec. 1975 he began commercial production of tofu, using real nigari as a coagulant. He sold this tofu only at Le Bol en Bois natural foods store and served it in his restaurant. An invoice dated 26 Dec. 1975 from Mitoku Company Ltd. in Japan shows that he imported 40 kg of nigari (\$17.34), 50 x 150 gm packets of nigari (\$33.27), a grinder for making tofu (\$562), other pieces of tofu making equipment (\$450.35), as well as 1,800 liters of Sakae Tamari-Shoyu, 900 liters of Johsen Tamari-Shoyu, and 200 kg of brown rice miso. Production remained limited (two days a week, 40 cakes per day) until the end of 1976. Mr. Sakaguchi made the tofu himself, helped by some Japanese students. One evening in the winter of 1976 an unusually large number of people came to the store to buy tofu. This corresponded to the end of a conference held by Michio Kushi in Paris. The store became the focus of a lot of interest and activity. Production jumped to roughly 240 cakes per day, two days a week. By the end of 1976 Mr. Sakaguchi had hired his first employee to help him make tofu.

In 1985 the tofu production activity was set up as a separate company named Daizou, located outside of Paris at Champigny sur Marne. At that time production was about 300 cakes per day, two days a week. Mr. Sakaguchi now began to make tofu more than twice a week and to sell this tofu at other retail outlets in addition to his own. Address: 883 Rue de Bernau—Z.I., 94500 Champigny Sur Marne, France. Phone: 48 82 39 90 or 47.06.33.71.

7478. Baynes, R.D.; Macfarlane, B.J.; Bothwell, T.H.; Siegenbert, D.; Bezwoda, W.R.; Schmidt, U.; Lamparelli, R.D.; Mayet, F.; MacPhail, A.P. 1990. The promotive effect of soy sauce on iron absorption in human subjects. *European J. of Clinical Nutrition* 44(6):419-24. June. [23 ref]

• **Summary:** The poor bioavailability of iron from soy alone, and the inhibitory effect of soy upon iron absorption from a mixed diet have been documented in many studies. Although the inhibitory component of soy has not yet been identified, there is evidence that it may relate to the intact, or partially intact, soy protein complex.

The addition of soy sauce to a meal of soy flour could not overcome the strong inhibition of iron absorption. However, when soy sauce was added to a meal of rice (instead of soy flour), the geometric mean of iron absorption increased significantly (13.9% with soy sauce vs. 5.2%

with soy flour). "The promotory effect of soy sauce on iron absorption appears to be due not only to its lack of soy protein content but may also be due to the presence of fermentation products other than organic acids." Address: MRC Iron and Red Cell Metabolism Research Unit, Dep. of Medicine, Univ. of the Witwatersrand, Johannesburg and Dep. of Medicine, Univ. of Natal, Durban, South Africa.

7479. Cardenas, Danilo C. 1990. Status of the Philippine soyfood industry. Paper presented at the International Conference on Soybean Processing and Utilization. Held 25-29 June 1990 at the Jilin Academy of Agricultural Sciences, Gongzhuling, China. *

Address: Supervising Science Research Specialist, Philippine Council for Agriculture, Forestry, and Natural Resources Research and Development (PCARRD), Los Baños, Laguna 3720, Philippines.

7480. **Product Name:** Soypreme Tofu Dinners [Tofu Marinara, Tofu Luau, or Tofu Stroganoff].

Manufacturer's Name: Cedarlane Foods.

Manufacturer's Address: 1864 E. 22nd Street, Los Angeles, CA 90058. Phone: 213-745-4255.

Date of Introduction: 1990. June.

Ingredients: Organic whole wheat (Kamut) pasta, tofu (organic soybeans, filtered water, nigari), green beans, carrots, corn, tomato puree, tomato juice, soy sauce, corn oil, garlic, olive oil, honey, sea salt, herbs, spices.

Wt/Vol., Packaging, Price: 11 oz package.

New Product–Documentation: Soya International. 1990. April/June. p. 23. Contact: Terry Mayo. Ingredients for the Stroganoff are: Organic whole wheat (Kamut) pasta, tofu, green beans, carrots, corn, water, soy sauce, corn oil, mushrooms, onions, organic whole wheat pastry flour, cooking wine, arrowroot powder, garlic, pepper, hydrolyzed soy protein, sea salt, parsley, kelp, dulse, papaya enzyme.

Ad in Whole Foods. 1991. July. p. 76. "Soypreme. Substituting without sacrificing."

7481. **Product Name:** Egg Rolls [Vegetarian, Pizza Tofu, or Spinach Tofu].

Manufacturer's Name: Health Is Wealth, Inc.

Manufacturer's Address: Sykes Lane, Williamstown, NJ 08094. Phone: 609-228-1150.

Date of Introduction: 1990. June.

Ingredients: Tofu Pizza: Stone-ground whole wheat flour, tomatoes, mozzarella cheese alternative (organic tofu, canola oil, casein, sea salt, citric acid, soy lecithin, guar gum), olive oil, soybean oil, natural spices.

Wt/Vol., Packaging, Price: 3 egg rolls per 9 oz package. Retail for \$2.49 (7/90).

How Stored: Frozen.

New Product–Documentation: Soya International. 1990. April/June. p. 22. The only soy ingredient in the Vegetarian

Egg Rolls is soy sauce. Spinach Tofu ingredients are the same as Pizza Tofu but with spinach instead of tomatoes. Contact: Robert Giacoboni.

Ad (color) in Natural Foods Merchandiser. 1990. Nov. p. 22. "The great taste of cheese without the cheese." Shows 3 types of Egg Rolls, 2 of which bear the word "tofu" prominently atop the front panel. "Health is Wealth has replaced the cheese in our ever popular egg rolls with tofu mozzarella."

Product (Egg Rolls [Pizza Tofu]) with Label purchased at Open Sesame in Lafayette, California. 1992. Feb. 13. 5 by 4.75 by 1.75 inches. Paperboard box. Red, white, and blue on black. Color photo of the prepared sticks. "The great taste of tomatoes & cheese without the cheese! Handrolled with Tofu Mozzarella, tomatoes, & stone-ground whole wheat. All natural. Cholesterol free. No MSG. No preservatives. Lactose free. Made with the cheese NûTofû alternative." 3 egg rolls (9 oz.) retail for \$3.99. The phone number is now 609-728-1998.

Soyfoods Center Product Evaluation. 1992. Feb. 13. Package design: Excellent, however the text on the front panel of the Spinach Tofu Egg Rolls that states "The great taste of spinach and cheese without the cheese!" seems deceptive, since the cheese in this product is made from cow's milk. The ingredients listing is likewise deceptive since it lists "casein (protein)" rather than "casein (milk protein)." Flavor: We liked the Spinach Tofu Eggs Rolls best—by far.

7482. **Product Name:** Lea & Perrins Flavored Soy Sauces: Soy & Garlic, Soy & Chilli, Soy & 5 Spice, Soy & Ginger.

Manufacturer's Name: Lea and Perrins Ltd. Subsidiary of H.P. Foods.

Manufacturer's Address: P.O. Box 31 Registered Office, Midland Road, Worcester WR5 1DT, England.

Date of Introduction: 1990. June.

Ingredients: Garlic: Soy sauce (water, soybean extract, salt, sugar, wheatflour), spirit vinegar, sake, garlic extract, colour: caramel, modified starch, emulsifier: lecithin, lemon juice.

Wt/Vol., Packaging, Price: 142 ml (5 fluid oz) bottle.

How Stored: Shelf stable.

New Product–Documentation: New Product News. 1990. Aug. 5. p. 46. "Lea & Perrins [in Great Britain] aims to lift soy sauce out of the commodity product area with the launch of a new line which will sell at almost twice the price of rival brands." Soya International. 1990. July/Sept. p. 4.

Talk with Sarah Stanley, executive secretary to the president at Lea & Perrins. 1991. Jan. 15. The company has no such product. At one time they distributed Secret of the Orient, which was a line of some packaged dry spice mixes, but they have turned those over to another individual, who is distributing them. They were not involved with this line for very long. Lea & Perrins in the USA is located at 15-01 Pollitt Dr., Fair Lawn, New Jersey 07410-2728. Phone: 201-

791-1600. Try Great Britain. H.P. Foods, 45 Northampton Rd., Market Harborough, Leicestershire, England LE16 9BQ. The company's world headquarters are in France: BSN Group, 7 rue de Tehran, 75831 Paris Cedex 8, France.

Four Labels and letter sent by J.W. Garnett, Factory General Manager, Lea & Perrins Ltd., P.O. Box 31 Registered Office, Midland Road, Worcester WR5 1DT, England. 1991. Jan. 29. 6.5 by 3.25 inches. Paper. Garlic: Green, black, red, and white. With the green "V" vegetarian logo; "Suitable for Vegetarians." UPC indicia. "A rich soy sauce combined with the fresh taste of garlic and carefully blended with Sake—an oriental rice wine. Use in place of soy sauce to liven-up stir-frys, round-off casseroles and give marinades extra flavour. No messy handling of raw garlic, simply add this blended Soy Sauce to your favourite recipes or sprinkle on your meals." Letter notes that this new line of soy products was launched in the UK on 25 June 1990. "We make no other products at this time that contain soy sauce under the Lea & Perrins Brand but there are some products under the HP sauce brand (namely HP Sauce, HP Fruity Sauce)."

7483. **Product Name:** Tofu Spicy, Tofu Teriyaki.

Manufacturer's Name: Nutrisoy Pty. Ltd.

Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.

Date of Introduction: 1990. June.

Ingredients: Spicy: Organic soybeans, water, soy sauce, sunflower oil, spices, herbs, natural nigari (magnesium chloride).

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Refrigerated.

New Product–Documentation: Labels with dates sent by Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling these products in June 1990. Spicy: Yellow, red, black and white on green. On the front are four small Chinese characters.

7484. **Product Name:** Yves Veggie Tofu Wieners.

Manufacturer's Name: Yves Fine Foods Inc.

Manufacturer's Address: 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.

Date of Introduction: 1990. June.

Ingredients: Tofu (water, organic soybeans, magnesium chloride), soy protein, canola oil, wheat gluten, unmodified wheat starch, natural smoke flavors, beet powder (coloring), paprika (coloring), tamari sauce, spices, guar gum.

Wt/Vol., Packaging, Price: 10 oz package. Retail for \$2.19 (7/90). 12 oz vacuum pack retails for \$3.29 (6/92, California).

New Product–Documentation: Soya International. 1990. April/June. p. 22. Contact: Yves Potvin. Spot in Health Foods Business. 1991. Jan. p. 76. Shows a small black-and-white photo of the package.

Ad (color, 2/3 page) in *Natural Foods Merchandiser*. 1992. April. p. 94. "Yves Veggie Cuisine." Shows packages of Veggie Wieners and Burger Burgers.

Product with Label purchased at Open Sesame in Lafayette, California. 1992. June. 3.5 by 10 inches. Vacuum pack. Red, yellow, blue-green, and black on white. Color photo of a wiener with trimmings in a bun. "Contains no meat. Cholesterol free. Made with 100% organic soybeans. No preservatives. Low in saturated fat. Since 1985 we have been committed to providing you with the highest quality in healthy, easy to prepare entrées. Always cholesterol and preservative free..." The company name is now Yves Veggie Cuisine Inc. The president is Yves Potvin.

7485. Muso Shokuhin. 1990. [Pure heart: Muso general catalogue]. Otedori 2-2-7, Chuo-ku, Osaka 540, Japan. 88 p. Printed 1 July 1990. 30 cm. [Jap]

• **Summary:** This strikingly beautiful, full-color catalog, pictures and describes Muso's natural-food macrobiotic products in Japanese for the Japanese market—although the title is written only in English. Includes many kinds of miso, shoyu (incl. Marushima Shoyu), black soybeans, yellow soybeans, kinako [roasted soy flour], seitan (in a jar from Marushima, p. 41; the product name is written as "Seitan" in large roman letters, then in smaller letters in katakana), San-Iku Foods canned products (Gluten Burger, Gluten Meat, Linketts, Soyees, Snack Joe; p. 41), yuba, gomoku nimame (cooked whole soybeans), many kinds of sea vegetables and related products, San-Iku Soyolac (8 different products), Marusan soymilk (5 different products; 3 are named mineral tou-jyan; the latter is the Chinese term for soymilk), macrobiotic books. Address: Osaka, Japan. Phone: 06-942-0343.

7486. Miller, Bryan. 1990. Restaurants:... Sushisay, basic and raw. *New York Times*. July 6. p. C18.

• **Summary:** This is a review of the Japanese restaurant Sushisay (38 East 51st St.), the only American outlet of a 26-restaurant chain in Japan. It specializes in raw and marinated seafood. One of the few cooked items, an appetizer, "is grilled squid legs. Bite-size pieces of crispy squid dipped in soy sauce are as addictive as popcorn." Another of its starters is "maguro natto, tuna in fermented soy beans, which had a texture and highly fermented flavor that was off-putting to some tastes." A soup the reviewer liked was "asari wan, a light miso broth with little-neck clams in the shell..."

7487. Marshall, Philip. 1990. Early work with soyfoods in the UK: Direct Foods, Whole Earth, Harmony Foods Ltd., and Haldane (Interview). *SoyaScan Notes*. July 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Brian Welsby founded Haldane Foods in 1983. But he was active with health foods long before 1980. He

used to do the product mixing for a company named Direct Foods Ltd. (in Petersfield, Hampshire), which was owned by Peter and Anna Roberts, a very nice, committed pair of vegans. They were among the first people to market dried soya products, particularly TVP, in the UK. And they were certainly the first people to develop the market for composite dry soya products—like burger mixes. Philip has no idea when Direct Foods started, but it may have been in the late 1960s. [Note: It started in Aug. 1969.] They were one of the pioneers of vegetarianism and veganism in England.

Greg and Craig Sams are brothers, both American. Both are very talented guys, excellent at marketing. Greg is in a wheelchair. In the early days, both were the key figures/principals at Whole Earth with the early events at Portobello Road. Whole Earth, which started as a bakery, became Harmony Foods, a large health food wholesaling company. [Note: In 1980 Harmony Foods Ltd. was at 12 Orpheus St., Camberwell, London S.E., England.] Harmony had some of its own Harmony Foods brands and was one of the first companies in the UK to import Japanese miso, shoyu, etc. At some point, Whole Earth was sold off as a health food wholesaler, and its still going with such popular brands as Whole Earth jams, sauce, etc.

Peter Fitch was responsible for putting together the Haldane Foods Group, which incorporates Direct Foods, Haldane Foods, and Realeat. Address: Owner, Cauldron Foods Ltd., 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol BS3 2TL, England. Phone: (0272) 632835.

7488. Oka, Seizo. 1990. Finding Shinzaburo Mogi and his soy sauce company in Denver (Interview). *SoyaScan Notes*. July 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Mr. Oka has made great efforts to collect copies of the early *Directory of Japanese in the USA* (*Zaibei Nippon-jin Kan*). These are vastly better sources of information on Japanese people and businesses in America than early American City Directories published by Caucasians. The first such directory was published in 1905, and Mr. Oka has it. It contains no reference to Shinzaburo Mogi, Kikkoman, or soy sauce in Denver. However Mr. Oka cautions that these directories were published in San Francisco, and information on Japanese outside of California was quite incomplete. The next directory Mr. Oka owns, and the 6th one published, was for 1910. Most, if not all of the directories for the years 1906-1909 were lost in the great San Francisco earthquake of 1909, and later in the internment of West Coast Japanese during World War II. The earthquake shut down the *Nichibei Times* newspaper and caused it to relocate to Oakland, where it was short staffed. Thus, even if Mr. Mogi did start a short-lived shoyu company in Denver in 1907, we will probably never be able to find it in a *Directory of Japanese in the USA*. Better give up looking. Address: Head and Founder, History Room, Japanese Cultural and

Community Center, 1840 Sutter St. #206, San Francisco, California 94115. Phone: 415-921-1485.

7489. Gerner, Bob. 1990. Best-selling soyfoods at Berkeley Natural Grocery Co. in Berkeley, California (Interview). *SoyaScan Notes*. July 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** By far the best selling soyfood product type at Bob's store is soymilk, accounting for 50-65% of total soyfoods sales. The best selling brands, in descending order of sales volume, are Vitasoy (about 40% of soymilk sales, and rising; his store promotes it more in part because he sees sales reps longer and in part because the Vanilla Vitasoy is his favorite soymilk product), Edensoy (30-35% and falling; it used to be the best seller), Westsoy and Westbrae Malted (20% and rising), Pacific Soy (from Tree of Life), and Other (Wildwood Yosoy, Quong Hop, Soy Moo, AhSoy, 5%).

The next best selling soyfood type is tofu (accounting for about 20% of total soyfoods sales, and rising), followed by soy sauce & tamari (10%, stable), soy cheeses (4%, rising), tempeh (2%, falling), soy ice cream (1%, stable or falling), and miso (1%, falling).

Total per capita purchases of soyfoods have risen steadily since the mid-1970s. There have been no plateaus or declines.

Bob dislikes (but understands) the way soymilk manufacturers discount their products, basically forcing him to buy very large quantities—typically 60 cases at a time. This policy favors large retailers, ties up a lot of his capital upfront, and takes up a lot of space in his warehouse. So 95% of the time he buys Vitasoy and Edensoy soymilk when they are on sale at discount prices, then he sells these at discount/sale prices—a practice that he does not like since it seems to contradict the idea of a “sale.” Customers won't buy soymilk any more at “regular” prices. Bob would rather buy what he needs from week to week, then sell all products at a regular price most of the time, then have promotions once in a while. Vitasoy has played a lot of games with distributors to try to get them to buy more at one time, and Bob has heard that this is hurting the distributors and that they don't like it. They can't make money selling at an 8% margin, which they often must do. Edensoy's discount is constant whereas Vitasoy has on and off discounts—which makes buying harder for Bob. Westbrae/Vestro has a more typical discount policy and Bob sells Westbrae products at a regular price most of the time. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

7490. **Product Name:** Cauldron Foods Tofu Kitchen {Frozen Ready Meals} (Indonesian: Vegetables & tofu in spicy satay sauce, Cantonese: Stir fry vegetables with tofu in black bean sauce, Shanghai: Sweet & sour vegetables with tofu, or Punjabi: Vegetable brian with tofu).

Manufacturer's Name: Cauldron Foods Ltd.

Manufacturer's Address: 149 South Liberty Lane, Ashton Vale Trading Estate, Bedminster, Bristol, Avon, BS3 2TL, England. Phone: (0272) 632835.

Date of Introduction: 1990. July.

Ingredients: Indonesian: Spicy satay sauce (water, sieved tomatoes, onions, peanut butter, creamed coconut, soy sauce, tomato puree, spices and seasonings, modified starch, vegetable oil, salt), Marinated Tofu (tofu–water soya beans, calcium sulphate, marinade–water, shoyu sauce, sugar, salt, garlic, ginger, citric acid), baby sweetcorn, sugar, snap peas, red peppers, vegetable oil. Fried rice: Cooked white and brown rices, sweet-corn, vegetable oil, onions, chives.

Wt/Vol., Packaging, Price: 400 gm box.

How Stored: Frozen.

Nutrition: Per 100 gm.: Protein 5.9 gm, fat 5.9 gm, carbohydrates 13.9 gm, calories 147.

New Product–Documentation: Letter (fax) from Philip Marshall. 1990. July 9. This product, in 4 varieties, was introduced in 1990. Labels (4) sent by Philip Marshall of Cauldron Foods. 1990. July 9. 9 by 7 by 1.25 inches. Multi-color. A large color photo of the ready-to-serve dish (accompanied by chopsticks or fork) is in the upper left hand corner of the front panel; behind it is a pastel blue, green, yellow, and black map of that part of the world from which the dish originates. Below the product name is a brief description of the dish. "Microwave or oven cook. A complete vegetable meal." Suitable for vegetarians: Circled green V certification symbol. Serves 1. The back panel gives information about tofu and detailed cooking instructions.

7491. Fleming, Diana J. ed. 1990. Country Life vegetarian cookbook: Delicious recipes from the kitchen of the Country Life vegetarian restaurants. Family Health Publications, 13062 Musgrove Highway, Sunfield, MI 48890. 190 p. Index. 23 cm.

• **Summary:** This book contains the most popular vegan recipes from Country Life vegetarian restaurants. In 1966 the first Country Life Restaurant opened its doors in Grand Rapids, Michigan. Today the 15 Country Life Restaurants, though all independently owned and staffed by Seventh-day Adventists, "share a common commitment to serve delicious, wholesome, 100 percent vegetarian food. They are also dedicated to furnishing educational programs, to ministering to the needs of the community, and to providing a relaxed, Christian atmosphere as a refuge for customers from the stresses of the work-a-day world." A list of the addresses and phone numbers of the 15 County Life restaurants (10 in the USA, 3 in Europe, and 2 in East Asia) is given on page 4.

"Soy or nut milk" is called for in many recipes throughout this book. Soy-related recipes include: Soy-oat waffles or pancakes (p. 20). Carob-banana tofu topping (p. 25). Tofu-pineapple "cottage cheese" (p. 28). Soy raisin puffs (with cooked whole soybeans, p. 35). Fluffy soy-corn

muffins (p. 36). Scrambled tofu (p. 38). Chipped tofu (p. 39). Tofu cheese rarebit (p. 40). Tofu potato latkes (p. 41). Soy whipped cream (#1-#3, p. 60-61). Tofu whipped cream (p. 61). Tofu orange whipped cream. Tofu cheesecake (p. 66). Carob tofu cheesecake. Tofu loaf (p. 73). Kidney bean and tofu pie (p. 83). Pasty (filled with frozen tofu, p. 84). Soybean creole (p. 88). Tofu balls (p. 93). Lasagne (with crumbled tofu, p. 94). Stuffed shells (with tofu, and soy mayonnaise or soy sour cream). Eggplant Parmesan (with tofu). Tofu cacciatore (p. 96).

Stir fry vegetables (with tofu, p. 103). Tofu foo young (p. 105). Oriental medley (with tofu, p. 106). Walnut cheese spread (with tofu, p. 108). Gluten and broth. Teriyaki sauce (with soy sauce, p. 111). BBQ sauce (p. 112). Tofu "egg" salad (p. 118). Thousand island dressing (with soy mayonnaise, p. 120). Olive dressing (with soy base, or Soyagen, p. 121). Soy mayonnaise (#1 with soy milk, #2 with soy base, #3 with Soyagen, p. 123-24). Tofu mayonnaise (p. 125). Aioli or garlic mayonnaise #1 (with soy milk). Soy sour cream (p. 126). Soy margarine (#1 and #2). Tofu cottage cheese. Tofu tomato stars (p. 135). Sour cream potatoes (with soy sour cream or mayonnaise, p. 139). Tofu gumbo soup (p. 146).

Soy milk (#1 from soy beans, #2 from soy base, p. 149). Soy base (from soy flour, p. 150). Basic nut milk (with cashews, walnuts, filberts, or Brazil nuts, and honey or dates, p. 151). Cashew-pear milk (p. 152). Half and half (with cashews and almonds). Almond milk supreme... plus many other nut and fruit milks.

One innovative ingredient in many recipes is "Lecithin-oil slicker: This is a replacement for products such as Pam, a food release spray. Pour 6 parts oil, not olive, peanut or sunflower, into a jar with 1 part liquid lecithin. Cover tightly and shake well. Keep at room temperature. Do not use lecithin granules. Measure oil first then use the same utensil to measure lecithin to help prevent sticking of lecithin on utensil."

At the end of the book are several very interesting chapters: "The protein myth: When too much of a good thing is a bad thing," by M.G. Hardinge and W.C. Address. One very interesting table (taken largely from G. Bunge 1902) shows that the longer it takes for a baby animal to double its birth weight, the lower the protein content of the mother's milk. Humans, with 1.4% protein in the milk, take 180 days (the longest). Cats, with 9.5% protein in the milk, take only 7 days (the shortest). A second chapter is titled "Dietary fat—good or bad?," by Bernell E. Baldwin. Address: Michigan.

7492. Karta, Susani K. 1990. The market prospective for tempeh in the year 2000. In: Ontario Ministry of Agriculture and Food, ed. 1990. Soybean Buyers Mission from New Markets, July 1-7, 1990. Tokyo, Japan: Ontario Ministry of Agriculture and Food. 61 p. July. See p. 19-33.

• **Summary:** Contents: Introduction. Market situation for

tempeh in Indonesia. Health and nutritional significance of tempeh. Tempeh for weaning food. Constraints and trends in the market development of tempeh. Recommended guidelines and strategies. Ideas for the diversification of tempeh utilization: Tempeh as a food ingredient, new tempeh food opportunities.

Tempeh flour (dried, ground tempeh) used in weaning foods could dramatically reduce the diarrheal diseases among children in Indonesia and other countries. The author estimates the potential demand for tempeh flour in weaning foods used for this purpose in the year 2000 to be 27,720 tonnes in Indonesia and 470,880 tonnes in all Asian developing countries. This assumes average tempeh flour consumption of 10 gm/day per child or 3.6 kg/year per child.

In 1983 Indonesians consumed about 927,000 tonnes of soybean as food, increasing to 1,528,000 tonnes in 1958. About 50% of these soybeans were used to make tempeh, and 40% to make tofu; the remaining 10% were used to make soy sauce and “tauco” (a fermented whole soybean condiment [Indonesian miso]). In 1988 the average Indonesian consumed 6.45 kg/year of tempeh (equivalent to 4.3 kg of soybeans). In the past 5 years, consumption of soyfoods in Indonesia has increased by an average of 10% annually.

According to a 1988 report from the Indonesian Ministry of Agriculture, the average daily per capita consumption of calories is still below the recommended Indonesian guidelines. In 1988, calorie consumption was only 1,794 calories/capita/day, or about 28% below the recommended 2,500 calories. Protein intake was about 43.3 grams/capita/day, or about 21% below the recommended 55 gm. “Consumption levels of traditional soyfood such as tempeh will continue to grow as the population attempts to meet its protein needs. Moreover, in view of the purchasing power of the average Indonesian consumer, we can expect a continuing increase in the demand for tempeh as it is widely available at a much more affordable price than animal protein... For tempeh manufacturing, imported soybeans are preferred because they are larger and cleaner.” Address: MSc, RD, Manager, P.T. Indofood Interna Corp., Jl. Ancol No. 4-5, Ancol Barat Jakarta Utara 14430 Indonesia. Phone: 690-1365.

7493. Ushijima, Shigeomi; Nakadai, T.; Uchida, K. 1990. Breeding of new *koji*-molds interspecific hybridization between *Aspergillus oryzae* and *Aspergillus sojae* by protoplast fusion. *Agricultural and Biological Chemistry* 54(7):1667-76. July. 6 fig. [34 ref. Eng]

• **Summary:** A description of the technique of protoplast fusion between a mutant of each of these two species of molds. The fused mold is stabilized by successive cultures. Address: Soy Sauce Research Lab., Kikkoman Corp., Noda 278, Japan.

7494. **Product Name:** Choplets.

Manufacturer's Name: Worthington Foods, Inc.

Manufacturer's Address: Worthington, Ohio.

Date of Introduction: 1990. July.

Ingredients: Textured vegetable protein (wheat gluten, soy protein concentrate), caramel color. Broth: Water, flavorings (hydrolyzed vegetable protein, spice extractives), yeast extracts, dextrose, salt, soybean oil, caramel color, monosodium glutamate.

Wt/Vol., Packaging, Price: 8 oz, 17 oz, and 30 oz can. 20 oz can retails for \$2.75 (7/90, California).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. 20 oz (567 gm) can. The ingredients are now: Textured vegetable protein (wheat gluten, soy protein concentrate), caramel color. Broth: Water, flavorings (hydrolyzed vegetable protein, spice extractives), yeast extracts, dextrose, salt, soybean oil, caramel color, monosodium glutamate.

Note: This product was first introduced in Oct. 1941, but did not contain textured soy protein at that time.

7495. **Product Name:** Cutlets.

Manufacturer's Name: Worthington Foods, Inc.

Manufacturer's Address: 900 Proprietors Road, Worthington, OH 43085. Phone: 800-628-3003.

Date of Introduction: 1990. July.

Ingredients: 1990: Textured vegetable protein (wheat gluten, soy protein concentrate), caramel color. Broth: Water, flavorings (hydrolyzed vegetable protein, spice extractives), yeast extract, dextrose, salt, soybean oil, caramel, monosodium glutamate.

Wt/Vol., Packaging, Price: 50 oz (1417 gm) can. Retails for \$6.25 (7/90, California).

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Product with Label purchased at Adventist Book Center in Pleasant Hill, California. 1990. July 19. Red and blue on white. The ingredients are now: Textured vegetable protein (wheat gluten, soy protein concentrate), caramel color. Broth: Water, flavorings (hydrolyzed vegetable protein, spice extractives), yeast extract, dextrose, salt, soybean oil, caramel, monosodium glutamate.

Note: This product was first introduced in 1960, but did not contain textured soy protein at that time.

7496. GEM Cultures. 1990. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. Aug. [4 ref]

• **Summary:** This catalog celebrates the company's tenth anniversary. Contents: 1. Powdered cultures for soycrafters: Powdered tempeh starter, PTS (11 gm [\$2.25, makes 5+ lb of tempeh], 35 gm, 500 gm, 1000 gm). Starter cultures for miso, amazake, shoyu, and tamari. Introductory koji kits.

Commercial spore packets for miso or shoyu. Powdered natto starter. Rice koji (cultured rice) for light misos, amazake, pickles. Most in home or commercial sizes. 2. Cookbooks with culture (lists 4 books). 3. Natural salts for curdling tofu: Natural nigari or Terra Alba calcium sulfate in 1 lb or 5 lb bags. 3. Self renewing cultures: Fresh viili culture, fresh kefir curds, fresh sourdough culture, seed miso. 4. Sea vegetables from the Mendocino Sea Vegetable Co. 5. Handy reusable items: Super sealers (lids for canning), cheesecloth (grade 60), gauze drawstring bags (for spices in mulled cider, whole herbs, etc.). Address: Fort Bragg, California. Phone: 707-964-2922.

7497. **Product Name:** Health Valley Tofu Fast Menu: Honey Baked Organic Beans with Tofu Wieners, Organic Black Beans with Tofu Wieners, or Organic Lentils with Tofu Wieners.

Manufacturer's Name: Health Valley Foods, Inc. (Product Developer-Distributor).

Manufacturer's Address: 16100 Foothill Blvd., Irwindale, CA 91706-7811.

Date of Introduction: 1990. August.

Ingredients: Organic small white beans, water, tofu wieners (tofu [organic soybeans, nigari, water], canola oil, wheat gluten, wheat germ, nutritional yeast, natural spices, tamari soy sauce [water, soybeans, wheat salt], natural hickory smoked flavor, paprika, beet powder, sea salt, guar gum), honey, tomatoes, onions, tomato paste, organic potato flakes, unsulfured molasses, concentrated organic apple juice, carrot powder, olive oil, apple cider vinegar, sea salt, paprika, natural herbs and spices, onion powder, garlic powder, organic oregano, organic sage, organic thyme.

Wt/Vol., Packaging, Price: 15 oz (425 gm) can. Retail for \$1.89 (1/91, California).

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 7½ oz.: Calories 140, protein 11 gm, carbohydrate 15 gm, fat 3 gm, cholesterol 0 mg, sodium 14 mg, potassium 260 mg.

New Product-Documentation: Label (Honey Baked) obtained at World Vegetarian Day in San Francisco. 1990. Oct. 6. 9 by 4 inches. Paper can label. Reddish brown, yellow, black, brown, green, and white on yellow. Full color photo of crock of beans with tofu wieners and a spoon dipping in. "3-minute main dish." Date of 8/90 written encoded on label.

Products with Labels (all 3) purchased at Open Sesame in Lafayette, California. 1991. Jan. 31. \$1.89 each. "Lead free can from Health Valley. This can is enamel coated for your protection."

7498. **Product Name:** Garden Gourmet Vege-Dogs in Pastry.

Manufacturer's Name: Tivall.

Manufacturer's Address: Imported by Tivall, USA, Inc.,

9633 E. Bexhill Dr., Kensington, MD 20895. Phone: 301-946-8855.

Date of Introduction: 1990. August.

Ingredients: Rehydrated soy protein concentrate and wheat gluten, soybean oil, egg whites, spices, salt, onion, garlic, tamari sauce, hydrolyzed vegetable protein, paprika, natural flavoring, guar gum (natural vegetable gum), lecithin, vitamin A, thiamine (Vitamin B-1), riboflavin (vitamin B-2), pyridoxine hydrochloride (vitamin B-6), vitamin B-12, nicotinamide, vitamin C, calcium pantothenate. Pastry: Wheat flour, soybean oil, partially hydrogenated soybean oil, water, sesame seeds, salt, mono and diglycerides.

Wt/Vol., Packaging, Price: 12 oz package.

How Stored: Frozen.

New Product-Documentation: Garden Gourmet brochure sent by Tivall, Israel. 1990. Sept. 4. Glossy insert. "The 'pig in a blanket' has left the pig behind. It its place is a lightly seasoned, wholesome entrée in a light puff pastry."

7499. **Product Name:** Garden Gourmet Vege-Puffs.

Manufacturer's Name: Tivall.

Manufacturer's Address: Imported by Tivall, USA, Inc., 9633 E. Bexhill Dr., Kensington, MD 20895. Phone: 301-946-8855.

Date of Introduction: 1990. August.

Ingredients: Rehydrated soy protein concentrate and wheat gluten, soybean oil, egg whites, spices, salt, onion, garlic, tamari sauce, hydrolyzed vegetable protein, natural flavoring, caramel color, lecithin, vitamin A, thiamine (vitamin B-1), riboflavin (vitamin B-2), pyridoxine hydrochloride (vitamin B-6), vitamin B-12, nicotinamide, vitamin C, calcium pantothenate. Pastry: Wheat flour, soybean oil, partially hydrogenated soybean oil, water, salt, mono and diglycerides.

Wt/Vol., Packaging, Price: 7 oz package.

How Stored: Frozen.

New Product-Documentation: Garden Gourmet brochure sent by Tivall, Israel. 1990. Sept. 4. Glossy insert. "This is a delightful entrée with fresh, wholesome ingredients and delicate seasoning in a superb puff pastry. Its a great solution to those center-of-the-plate menu-planning blahs!"

7500. **Product Name:** Heart & Soul Trim Slice Meatless Cold Cuts [Turkey Style, Roast Beef Style, Ham Style].

Manufacturer's Name: Gourmet Naturally (Manufacturer). Common Objective Co. (Marketer-Distributor).

Manufacturer's Address: 1. 5890 Black Welder St., Culver City, CA 90232; 2. P.O. Box 261, Hermosa Beach, CA 90254. Phone: 213-373-5826.

Date of Introduction: 1990. September.

Ingredients: Turkey Style: Water, vital wheat gluten, tofu, natural flavor, canola oil, natural smoke flavor, salt, herbs and spices, soy oil.

Wt/Vol., Packaging, Price: 4 oz (112 gm) paperboard box.

Recommended retail: \$1.79 (9/90).

How Stored: Refrigerated.

New Product–Documentation: Label sent by Andrew Harrison of Common Objective Co. 1990. Sept. 19. The Roast Beef Style and the Ham Style products contain most of the same ingredients, but no tofu.

Press release. Sept. 1990. “Try a slice of life.”

Products with Labels (Turkey, Ham, Roast Beef styles) purchased (\$1.75 each) from Berkeley Natural Grocery Co., California. 1991. Nov. 24. 4.5 by 5 by 5/8-inch paperboard box. Turkey: Red, yellow, green, tan, black, and pink on white, with little pink hearts scattered on the white background. Illustration of two slices of bread, with lettuce, and the words “Trim Slice” between them. “All natural. 97% fat free. No cholesterol. Trim Slice is completely free of cholesterol content, very low in fat and it tastes terrific in your favorite sandwich combination. Best of all, Trim Slice is a cruelty-free product containing no animal products or animal by-products.” A logo of a turkey in a red circle with a red line diagonally across the cow reads: “No meat. Just wheat.”

Soyfoods Center Product Evaluation. 1991. Nov. 26. Package design: Very good. Flavor and texture: One person rates excellent (9), another rates dislike slightly (4).

Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. Only three products in this line are currently on the market; they were introduced in Sept. 1990. Two others (Corned Beef Style, and Pastrami Style) are under development and will be introduced soon—even though they are listed on the labels of other products in the line as if they were available now. He owns a company, Gourmet Naturally, which manufactures only Heart & Soul Products, including this product. Legally this company is separate from Heart & Soul, but the two will soon be merging. Andrew’s forte is sales and marketing; he has worked with distributors and brokers in the natural foods industry for 12 years.

7501. **Product Name:** Heart & Soul Tofu Lasagna, and Tofu Enchilada [California, or Mexicali].

Manufacturer’s Name: Gourmet Naturally (Manufacturer). Common Objective Co. (Marketer-Distributor).

Manufacturer’s Address: 1. 5890 Black Welder St., Culver City, CA 90232; 2. P.O. Box 261, Hermosa Beach, CA 90254. Phone: 213-373-5826.

Date of Introduction: 1990. September.

New Product–Documentation: Talk with Andrew Harrison, President, Heart & Soul, Common Objective Inc. 1991. Nov. 27. These were Heart & Soul’s first soy products, introduced in March 1989. The first two products contained tofu, and the Mexicali Enchilada contained soy cheese. None of these are on the market any longer.

7502. **Product Name:** Munchees (With Soy Cheese)

[Spinach Tofu, Pizza Tofu, or Veggie].

Manufacturer’s Name: Health Is Wealth, Inc.

Manufacturer’s Address: Sykes Lane, Williamstown, NJ 08094. Phone: 609-728-1998.

Date of Introduction: 1990. September.

Ingredients: Spinach Tofu (1/92): Stone-ground whole wheat flour, spinach, organic tofu, canola oil, casein (protein), sea salt, citric acid, soy lecithin, guar gum, olive oil, soybean oil, natural spices.

Wt/Vol., Packaging, Price: 6 oz paperboard box contains 11-13 Spinach Tofu Munchees. Retail for \$2.39 (1/92, Lafayette, California).

How Stored: Frozen.

New Product–Documentation: Ad (color) in Natural Foods Merchandiser. 1990. Nov. p. 22. “The great taste of cheese without the cheese.” Shows 3 labels of Munchees, 2 of which bear the word “tofu” prominently atop the front panel. “Health is Wealth has replaced the cheese in our ever popular egg rolls with tofu mozzarella. Also new are our exciting pizza, veggie, and spinach munchees. Munchees contain the same egg roll fillings but in an individual, bite size, stone ground whole wheat pocket.”

Product with Label (Spinach Tofu Munchees) purchased at Open Sesame in Lafayette, California. 1992. Feb. 13. 5 by 4.75 by 1.75 inches. Paperboard box. White, green, and blue on black. Color photo of the prepared munchees which look like 1½-inch square deep-fried pillows stuffed with spinach and cheese. “The great taste of spinach & cheese without the cheese. 11-13 Egg Rolls wrapped in a stone-ground whole wheat pocket. Cholesterol free. No preservatives. Lactose free. Made with the cheese NūTofū alternative.” The phone number is now 609-728-1998.

Soyfoods Center Product Evaluation. 1992. Feb. 13. Package design: Excellent, however the text on the front panel of the Spinach Tofu Munchees that states “The great taste of spinach & cheese without the cheese.” seems deceptive, since the cheese in this product is made from cow’s milk. The ingredients listing is likewise deceptive since it lists “casein (protein)” rather than “casein (milk protein).” A previous ingredient listing which broke out the “soy cheese” and listed its ingredients seemed clearer and more standard. Flavor: We liked the Spinach Tofu Munchees best—by far.

7503. Ornish, Dean. 1990. Dr. Dean Ornish’s program for reversing heart disease: The only system scientifically proven to reverse heart disease without drugs or surgery. New York, NY: Random House. xxxi + 638 p. Sept. Index and recipe index. 17 cm. [288* ref]

• **Summary:** This is a landmark, pioneering book—indeed a classic. In addition to carefully documented information on how to reverse heart disease, it offers 100 pages of vegan recipes, including a 21-day menu. It focuses on a low-fat, low-cholesterol diet, regular moderate exercise, stopping

smoking, stress management through meditation and yoga, and (ideally) a support group.

Contents: Author's note. Foreword. Introduction—Heart and soul. Part one: Opening your heart. Part two: The opening your heart program. Part three: Opening your heart recipes. Introduction to the recipes by Shirley Elizabeth Brown, M.D., and Martha Rose Shulman. Twenty-one days of menus. The recipes. Epilogue. Appendix: Nutrient analysis of common foods. Selected references.

In the chapter titled "Introduction to the recipes" a long section on "Soybean products" gives basic information about the following: Whole soybeans, soy flour, soy milk ("It is much higher in fat, lower in vitamin B-12, and lower in calcium than nonfat cow's milk."), soy sauce, tamari, miso, soy cheeses, tempeh, textured vegetable protein (TVP), isolated soy protein, and tofu ("Tofu is a miracle food; it is very easy to digest, very high in protein, low in calories and fat, economical, and extremely versatile").

In the chapter titled "Recipes" is a long section on "Tofu Dishes," which begins with a good introduction: "Tofu is one of the most versatile foods." "Tofu is very high in protein and the perfect substitute for cheese and eggs." Eleven recipes follow: Tofu cheese with fresh herbs. Marinated tofu. Scrambled tofu and vegetables. Lydia's Mexican casserole. Tofu stew with miso. Sweet and sour wok-cooked vegetables with tofu. Chinese eggplant and tofu. Steamed fresh vegetables and tofu with soba noodles (and Misoyaki sauce). Stuffed manicotti (with Marinara sauce).

At the start of each chapter are great quotations. The 288 selected references, listed chapter by chapter at the back, are a valuable addition. As early as 1972 Dr. Ornish was learning meditation and yoga techniques from Swami Satchidananda; these evolved into the stress management program described in chapters 7-9. In 1975 he first became interested in conducting research on heart disease, when he was a medical student at Baylor College of Medicine in Houston, Texas. In 1977 he had the privilege of studying with Dr. Michael DeBakey, assisting in the operating room when he performed bypass surgery. Though his surgical skill was amazing, Ornish began to see the "limitations of technological approaches that literally and figuratively *bypassed* the underlying causes of the problem. It was the difference between temporizing and healing." Most bypass patients "would go home and continue to do the same things that led to the problem in the first place. They would smoke, eat a high-fat, high-cholesterol diet, manage stress poorly, and lead sedentary lives."

For details on this book and its significance, see MacNeil/Lehrer Newshour. 1990. Dec. Address: M.D., Preventive Medicine Research Inst., Sausalito, California 33658. Phone: 415-332-2525.

7504. **Product Name:** Meatless Healthy Bologna (Made with Tofu).

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 1990 North 57th Court, Boulder, CO 80301.

Date of Introduction: 1990. September.

Ingredients: Organic tofu [water, soybeans, gypsum, nigari (magnesium chloride)], soy oil, wheat gluten, egg white, tapioca starch, wheat germ, soy sauce (water, soybeans, whole wheat, salt), dried yeast, natural liquid hickory smoke, garlic powder, spices, natural flavor, beet powder and oleoresin paprika for color. "No more, no less."

Wt/Vol., Packaging, Price: 5.5 oz (156 gm) vacuum pack. Retail for \$2.10 (10/90, California).

How Stored: Refrigerated.

Nutrition: Per 1.5 oz.: Calories 120, protein 7 gm, carbohydrates 5 gm, fat 8 gm (polyunsaturated 7 gm; saturated 1 gm), cholesterol 0 mg, sodium 340 mg.

New Product—Documentation: Talk with Steve Demos. 1989. May 13. This product will be officially launched in Sept. Talk with Steve Demos. 1989. Nov. 1. The term Links need not be approved by the FDA. Anyone can use the term. The product is not yet out, nor has it been in any interstate sales yet. It is made in Denver. It should be out soon, probably by mid-December.

Label obtained at White Wave booth at World Vegetarian Day in San Francisco. 1990. Oct. 6. 5 by 7 inches. Flat vacuum pack with see-through front. Red, black, and yellow on white. "Cholesterol-free! Great for kids! Hearty luncheon slices." Talk with Lon Stromnes. 1990. Oct. 6. The product was introduced in Sept. 1990. Recommended retail is about \$2.10.

7505. Ford, Ashley. 1990. Milking the soybean: Asian firm opens drink plant. *Province (The) (or The Vancouver Sun) (Canada)*. Oct. 3.

• **Summary:** "Yeo Hiap Seng Ltd. of Singapore has been turning Ontario's soybeans into high-protein drinks for over two decades... This week, the company will open a \$13-million soybean-juice plant adjoining its juice-concentrate plant in Chilliwack... Chalk the investment up to a victory for the U.S.-Canadian free-trade agreement. Yeo says the agreement, plus the availability of high-quality soybeans, persuaded it to put in a plant at Chilliwack..."

"In 1988, the company purchased the adjoining Pacific Fruit & Concentrates Ltd. from the East Chilliwack Co-operative for about \$3 million. It is now known as YHS Pacific Fruit Concentrates Ltd. Last year, it also purchased Chun King, the oriental food division of RJR Nabisco, based in Windsor [Ontario, Canada]. The new plant will produce 300 cans a minute of a variety of soybean drinks for the Canadian and U.S. markets. The state-of-the art-factory will create 32 new jobs..."

"At the beginning of the century [in 1900], family patriarch Yeo Keng Lian began fermenting and selling soya sauce in Fujian province... Initially, soya sauce provided

Yeo's business success. In 1955, the company started producing soybean drinks, and has since gone on to produce other foods."

A photo shows Bill Chia showing off the canning line at Yeo's new soymilk plant. Note: This factory is a major Canadian consumer of soybeans for food/beverage use, but about 90% of the finished soymilk is exported to Asia—especially Singapore. Address: Business Reporter, Canada.

7506. Azumaya, Inc.; et al. 1990. Tofu: Made in the USA... The tradition continues (Ad). *Produce Business*. Oct.

• **Summary:** With this anti-Mori-Nu ad, run by "the largest tofu manufacturers and distributors in America," the U.S. tofu wars escalate. The four manufacturers are Azumaya, Hinoichi, Nasoya, and Kikkoman. All make pasteurized tofu. The three distributors are Hanmi Inc. in Seattle, Frieda's Finest in Los Angeles, and Fuji Natural Foods in Ontario, California. "It has come to the attention of produce procurement officers throughout the United States that a foreign (Japan) producer of an aseptically packed tofu has chosen to confuse the trade and general public with claims that their product is superior to traditional water pack tofu. The following addresses the various issues as we see them." These issues are: 1. Water packed tofu has superior taste. Sales of aseptic tofu are virtually nonexistent in Japan. 2. Consumers prefer fresh produce. 3. The assurance of our pasteurization. "An independent study revealed bacterium was unable to grow in pasteurized tofu held at 59 degrees Fahrenheit and below for six weeks." 4. A clear environmental choice. The aseptic package is ecologically unsound, whereas "water packed tofu is packaged in 100% recyclable plastic."

7507. Business Trend Analysts, Inc. 1990. The market for salad dressings, sauces and condiments. 2171 Jericho Turnpike, Commack, NY 11725. 275 p. Price: \$895.

• **Summary:** This is an update of the 1988 edition. Sauces include the following table sauces: Ketchup, meat (incl. steak, worcestershire, vegetable, and seafood sauces), barbecue, Mexican (incl. chili, taco, enchilada, etc.), prepared mustard, and soy and teriyaki. Gravies, dips, and dry sauce mixes are not included. Ketchup is the largest segment. Address: Commack, New York.

7508. YHS Pacific Fruit Concentrates. 1990. YHS Pacific Fruit Concentrates in Chilliwack descendant of 90-year-old family company headquartered in Singapore (News release). Chilliwack, BC, Canada. 2 p. Oct.

• **Summary:** Contains a good history of the company. The history up to 1962 is basically the same as that given by Shurtleff & Aoyagi in Feb. 1984. Then it continues: "Throughout the next two decades, Yeo's continued to expand and innovate: this was the first company in the world to pack soya bean drinks in paper tetra-paks using the ultra

high temperature process. In addition, the company acquired the franchises for international brands such as Pepsi and 7-Up, Mirinda and Schweppes.

"In 1989, Yeo's purchased Chun King, the oriental division of RJR Nabisco based in Windsor, Ontario, and bought Pacific Fruit & Concentrates Limited located in Chilliwack, B.C.

"Today with associated companies, plants and 4,000 staff members around the globe, and with its products exported to 35 countries, Yeo Hiap Seng Ltd. is still guided by the Yeo family and still adheres to the original formula for success: provide quality products and unite to succeed."

Note: The company's offices and headquarters are in Richmond, B.C. The soymilk plant is located in Chilliwack (population 9,000) about 55 miles to the east, on the south bank of the Fraser River, only about 10 miles north of the U.S.-Canada Border. Address: Chilliwack, BC, Canada. Phone: 604-277-7707.

7509. Kudou, Shigemitsu; Tsuizaki, I.; Shimoyamada, M.; Uchida, T.; Okubo, K. 1990. Screening for microorganisms producing soybean saponin hydrolase. *Agricultural and Biological Chemistry* 54(11):3035-37. Nov. [16 ref]

• **Summary:** Soybean saponins in miso and soy sauce are decomposed during fermentation by various species of *Aspergillus* mold. Address: 1&4. Kanesa Miso Co., Ltd., 202 Hamada, Tamagawa, Aomori 030; 2,3&5. Faculty of Agriculture, Tohoku Univ., 1-1 Tsutsumitori, Amamiyama-machi, Aoba-ku, Sendai 981. All: Japan.

7510. **Product Name:** Legume Vegetarian Franks & Beans.

Manufacturer's Name: Legume, Inc.

Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.

Date of Introduction: 1990. November.

Ingredients: Navy beans, water, tomato paste, organic tofu* [organically grown soybeans*, water, calcium sulfate (a naturally mined earth mineral)], sweet potato puree, apple cider vinegar, canola oil, molasses, honey, tamari soy sauce (water, soybeans, sea salt), onion, soy oil, isolated soy protein, mustard powder, garlic, spices, natural flavors, sea salt, beet powder, paprika oil, guar gum. * = Grown in accordance with California Health & Safety Code 26569.11. **Wt/Vol., Packaging, Price:** 9 oz plastic bag (boil-in-the bag).

How Stored: Frozen.

New Product—Documentation: Talk with Gary Barat. 1990. Oct. 31. Legume is now introducing 7 new boil-in-the-bag products. All are non-dairy, cholesterol-free. The word "tofu" does not appear on the front panel of any of the products because a huge segment of the American population does not have a positive image of tofu. These products will sell for about \$1 less each than the old Legume products. They will sell the products where they do not need to pay slotting

allowing allowances, as in Southern California where 15-20% of the company's total business now is. Business is way up in the kosher market. All will be introduced at the Natural Foods Merchandiser show in Philadelphia this weekend.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

7511. Product Name: Legume Vegetarian Chili.

Manufacturer's Name: Legume, Inc.

Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.

Date of Introduction: 1990. November.

Ingredients: Tomatoes, water, black beans, red chile beans, onion, corn, organic* tofu [water, organically grown* soybeans, magnesium chloride (nigari)], tomato puree, canola oil, sweet potato puree, tamari soy sauce (water, soybeans, sea salt), chile powder, garlic, natural flavors, spices, sea salt. * = Grown in accordance with California Health & Safety Code 26569.11.

Wt/Vol., Packaging, Price: 10 oz plastic bag (boil-in-the bag).

How Stored: Frozen.

New Product–Documentation: Talk with Gary Barat. 1990. Oct. 31. This weekend at the Natural Foods Merchandiser show in Philadelphia, Legume will introducing 7 new boil-in-the-bag products.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

7512. Product Name: Legume Hearty Vegetarian Stew (Made with Wheat Gluten).

Manufacturer's Name: Legume, Inc.

Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.

Date of Introduction: 1990. November.

Ingredients: Potatoes, wheat gluten [whole wheat flour, water, tamari soy sauce (water, soybeans, sea salt)], carrots, tomato paste, peas, water, sweet potato puree, canola oil, celery, parsley, onions, garlic, molasses, miso (soybeans, water, sea salt), tamari soy sauce (water, soybeans, sea salt), natural flavors, vinegar, oregano, spices, sea salt.

Wt/Vol., Packaging, Price: 10 oz plastic bag (boil-in-the bag).

How Stored: Frozen.

New Product–Documentation: Talk with Gary Barat. 1990. Oct. 31. This weekend at the Natural Foods Merchandiser show in Philadelphia, Legume will introducing 7 new boil-in-the-bag products. The Hearty Vegetarian

Stew (made with wheat gluten) is delicious. The gluten manufacturer is Tabachnik in New Jersey.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

7513. Product Name: Legume Vegetable Bean Ragout.

Manufacturer's Name: Legume, Inc.

Manufacturer's Address: 116 Fairfield Rd., Fairfield, NJ 07006. Phone: 201-263-1013.

Date of Introduction: 1990. November.

Ingredients: Tomatoes, black beans, red chile beans, water, onions, celery, tomato paste, corn, peas, green beans, sweet potato puree, canola oil, basil, parsley, green pepper, garlic, tamari soy sauce (water, soybeans, sea salt), honey, vinegar, spices, sea salt.

Wt/Vol., Packaging, Price: 9 oz plastic bag (boil-in-the bag).

How Stored: Frozen.

New Product–Documentation: Talk with Gary Barat.

1990. Oct. 31. This weekend at the Natural Foods Merchandiser show in Philadelphia, Legume will introducing 7 new boil-in-the-bag products.

Label sent by Gary Barat. 1990. Oct. 31. by 5.5 by 1.5 inches. Paperboard box. Green, white, and black. Full-color photo of the product in a white dish. "Low fat. No cholesterol. Microwaveable. All natural. Legume main courses."

7514. [Japanese in South America: Nishii Super Shoyu in Peru]. 1990. Television broadcast. Channel 26. California. Nov. 24. 7:00–7:30 P.M. 3 minutes. From Fuji TV channel 8, "Naruhodo da World," in Japan. [Jap]

• **Summary:** Nishii Shoyu, located in the Victoria district of Lima, Peru, is owned by Mr. Shinji Kawakami, age 75, the second-generation owner. The outside and inside of his shop, and the process by which he makes 5 tonnes/week of shoyu in the traditional hand-made way, are shown. He also makes miso. A close-up shows the 750 ml bottle and its colorful label, orange, blue, and green on yellow. One bottle costs the equivalent of about 300 yen. Address: Japan.

7515. Cederquist, Natalie; Levin, James. 1990. A vegetarians ecstasy: A healthy gourmet celebration of over 250 no cholesterol, no dairy, lowfat recipes devoted to long life and good taste. Glo, Inc., 2406 Fifth Ave., San Diego, CA 92101. 332 p. Dec. Illust. by Natalie Cederquist. Index. 28 cm. [13 ref]

• **Summary:** In this is innovative vegan cookbook, each recipe occupies 1 page and is accompanied by an illustration (line drawing). The glossary of ingredients mentions liquid aminos, miso, seitan, seaweeds, tamari, tempeh, and tofu.

Page 28 is devoted to singing the praises of soy products. "Dairyless and eggless: With optimum health in mind, I have chosen to use soy products and egg replacer rather than dairy and eggs. Dairy is mucus forming, it contains cholesterol, fat and hormones, in addition to the pesticides and antibiotics used in the farming and dairy industry.

"Soy and seed cheeses, soy yogurts, soy cream cheese, soy sour cream, soy and rice based ice creams are delicious non-dairy products in the natural markets for you to try which are cholesterol free and low in fat."

The book contains 28 recipes for tofu, and 12 for tempeh. Other interesting recipes are: Sprouted soy salad (with 3 cups soy sprouts steamed for 3 minutes, p. 76). Orange miso dressing (p. 99). Miso soup (p. 162). Miso sesame rice (p. 206). Aduki bean and brown rice pot (p. 212). Féjoada (with soy sausages, p. 213). Mushroom seitan in wine sauce with wild rice (p. 241). Seitan sauté (p. 267). Amazake carob pudding (p. 290). Address: 2. M.D., San Diego, California. Phone: 1-800-854-2587.

7516. Product Name: Easy Barbecue Sauces: Chinese Flavor (Soy Sauce with Wine), Crushed Garlic & Horseradish (in Soy Sauce), Clam Flavored Sauce (Seasoned with Horseradish and Parsley), or Ground Horseradish & Apple (in Soy Sauce with Vinegar).

Manufacturer's Name: Kagome.

Manufacturer's Address: Japan.

Date of Introduction: 1990. December.

Wt/Vol., Packaging, Price: 220 gm bottle. Retail for \$1.70.

How Stored: Shelf stable.

New Product–Documentation: Soya International. 1990. July/Sept. p. 5.

7517. Shurtleff, William; Aoyagi, Akiko. 1990. Tofu & soymilk production. 2nd ed. Lafayette, California: Soyfoods Center. 336 p. Illust. by Akiko Aoyagi Shurtleff. Index. Dec. 11. 28 cm. [223 ref]

• **Summary:** Contains many new advertisements, plus changes on the copyright page, on page 14 (Soyfoods Association is now located at Bar Harbor, Maine), and rear cover of both paperback and hardcover editions (new ISBN for each). Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

7518. Product Name: Summerfield's Tofu and Salsa Enchilada Dinner, and Tofu and Salsa Burrito Dinner.

Manufacturer's Name: Summerfield Foods, Inc.

Manufacturer's Address: P.O. Box 3235, Santa Rosa, CA 95402. Phone: 707-579-3938.

Date of Introduction: 1990. December.

Ingredients: Enchilada: Water, corn, tofu, brown rice, corn flour, textured soy flour, tomato paste, diced red bell pepper, dried garlic, dried tomatoes, chili powder, jalapenos,

green chilies, paprika, natural mochi [glutinous] rice starch, cilantro, garlic puree, vinegar, natural herbs and spices, tamari soy sauce, white pepper, dried tomatoes, mustard seed, dried red bell pepper, pimientos, dried onions, sea salt, liquid smoke.

Wt/Vol., Packaging, Price: 12 oz (340 gm) paperboard box. Retail for \$3.79 (1/91, California).

How Stored: Frozen.

Nutrition: Per 12 oz.: Calories 246, protein 12 gm, carbohydrate 46 gm, fat 32 gm (calories from fat 32, saturated fat 0.043 gm), cholesterol 0 mg, sodium 158 mg, potassium 448 mg, * dietary fiber 3.4 gm. * Fiber may reduce the risk of colon cancer and heart disease.

New Product–Documentation: Product with Label purchased from Berkeley Natural Grocery Co., California. 1991. Jan. 13. 9 by 7.25 by 1 inch paperboard box. Red, blue, and gold on white. Color photo of the dinner on a plate on front panel. "100% natural. Summerfield's, the fresh approach. Microwaveable. No preservatives. Keep frozen. Cholesterol free. Low fat. Low sodium. With herbs and spices." Right side panel lists percentage of U.S. recommended daily allowance, and diet exchange per serving (for diabetics): vegetable 0.6, bread 3.3, protein 0.2, fat 1.6. The back panel states: "Summerfield's naturally delicious foods are made from 100% pure and natural blends of the finest ingredients... Summerfield's recommends the nutrient guidelines established by the National Cholesterol Education Program (NCEP, Daily Average) for those adults with high blood cholesterol. These are: Total fat, less than 30% of calories. Saturated fat, less than 10% of calories. Polyunsaturated fat, less than 10% of calories. Cholesterol, less than 300 mg." The National Academy of Sciences recommends that daily sodium consumption for adults should be in the 1,100 to 3,300 mg/day range. "What comes around, goes around... Recycle!" Recycle logo. UPC indicia.

Soyfoods Center product evaluation. Box package is good except for a weak color photo on front panel. The dinners are rather tasteless and dry, with no character. Flavor score = 6. Film is hard to peel off container.

Talk with Bob Gerner of Berkeley Natural Grocery Co. 1991. Jan. 13. He started selling this product only 3-4 days ago.

Talk with Richard Rose. 1991. Jan. 13. This company introduced itself and displayed package mock-ups of products at the Philadelphia Natural Foods Expo in Nov. 1990. They said they planned to have 40 products, but Richard saw no products that contained soy. Roland Au, one of the principals, has worked with many natural foods companies. The two others have quite a bit of mainstream food company experience—perhaps a food brokers. The company started only a few months ago. The feeling of whole marketing program was too slick and faceless, no character or soul—like a graduate student project.

Talk with Roland Au. 1991. Jan. 15. The company

was incorporated in June 1990 by three active partner stockholders: Roland Au, Jack Stanghellini, and David Ryan. Their first products (all their canned items and some frozen dinners) were at the Natural Products Expo in Philadelphia and were shipped in Nov. 1990, and were in the stores by Dec. 1990. Their focus is strictly on the natural foods market, not on supermarkets, using natural foods distributors. They have distributors in many parts of the USA plus central and eastern Canada. They have 60 products. The 3-compartment tray, called a “composite fiber tray,” is made of wood fiber with a lacquer coating. It is recyclable. The film that covers the tray is made of Mylar; it is not the typical film, which may give off toxic gases during microwaving. All of the company’s products are and will be frozen or canned. The products exist for dietary reasons—to replace meat and cheese. The products we tasted are now being reformulated.

7519. Taira, Harue. 1990. Quality of soybeans for processed foods in Japan. *JARQ (Japan Agricultural Research Quarterly)* 24(3):224-30. Dec. [7 ref. Eng]

• **Summary:** Contents: Abstract. Introduction. Quality for food processing: Tofu, miso, natto. Variation of bean quality and suitability for processing. Factors inducing variations in the chemical composition and suitabilities for processing.

Figures show: (1) Consumption of soybeans in Japan in 1988 (1,000 tonnes): Total: 4,663 tonnes. Oil and meal 77%. Food 19%. Other 4%. Food products: 886 tonnes. Tofu and abura-age 57%. Kori-tofu 3%. Miso 20%. Natto: 11%. Other 9%. Individual food products (* An additional 69,000 tonnes are consumed in the form of cooked whole soybeans, yuba, kinako, moyashi {sprouts}, and others). Tofu and abura-age 505 tonnes. IOM and other USA 83%. Japan 11%. China 6%. Kori-tofu 29 tonnes. IOM and other USA 72%. China 28%. Natto 100 tonnes. China 50%. USA and Canada 30%. Japan 20%. Miso 179 tonnes. China 86%. Japan 11%. IOM 3%. Soy sauce: Defatted soybean flakes 183 tonnes (97%) and whole soybeans 5 tonnes (3%).

(2) Frequency distribution of solid matter extractability in soybean milk (105 samples; 60 cultivars and 7 lines)—for varieties Enrei, Fukuyutaka, Akishiro, Akiyoshi, Tamahomare, Fujimijiro, Hyuuga, Shirosenari. Average value of U.S. soybeans. Mode: 79%. Range 70-82%.

(3) Correlation between protein and sucrose content in soybeans. Inversely correlated. The more protein, the less sucrose. (4) Correlation between hardness of steamed seeds and ammonia nitrogen content in natto. Directly correlated. The harder the steamed seeds, the more ammonia nitrogen in the finished natto.

(5) Variation in chemical composition and suitabilities of soybeans for processing: Raw soybeans for processing, soybean milk for tofu, steamed seeds for miso, natto, cooked soybeans.

Tables: (1) Relationship between soybeans and processed foods in raw soybeans, soybean milk, and steamed

seeds. (2) Chemical composition and suitability of soybeans from USA, China, and Japan for processing into tofu, miso, natto, cooked soybeans. Varieties: Enrei, Fukuyutaka, IOM (USA; low protein, high oil), Tamahomare, Kitamuse, Miyagishirome (large seeded), Nattoshoryu (small seeded), Chinese (low protein, high carbohydrate). Address: Dep. of Utilization, National Food Research Inst., Ministry of Agriculture & Forestry, Koto-ku, Tokyo.

7520. Product Name: [GranoVita Heideland Organic Tofu & Grain Dumplings].

Foreign Name: GranoVita Heideland Bio-Tofu Getreide Kloesschen.

Manufacturer’s Name: DE-VAU-GE Gesundheitswerk GmbH.

Manufacturer’s Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany.

Date of Introduction: 1990.

Ingredients: Organic tofu (Water, organically grown soybeans, calcium chloride), onions, rye flakes, fine Graham bread crumbs (Graham-Paniermehl), egg protein, rolled oats, soy sauce, herbs, seasonings (Wuerzmittel), sea salt, spices (Gewuerze), garlic.

Wt/Vol., Packaging, Price: 6 dumplings weigh 250 gm.

Nutrition: Per 100 gm.: Protein 10.4 gm, fat 3.6 gm, usable carbohydrates 14.3 gm, calories 132. 1 BE (Broteinheit, or diabetic exchange) = 84 gm.

New Product–Documentation: Form filled out and Label sent by DE-VAU-GE. 1990. June 11. This product was introduced in 1990. Label: 2.5 by 4.5 inches. Self adhesive. Green, red, yellow, and black on white. Illustration of two red-roofed traditional houses among trees and bushes. “Contains no flesh. To prepare: Simply drop into lightly salted, boiling water and allow to simmer for about 10 minutes. Recommended in the context of a natural whole foods diet (*Im Rahmen einer Vollwerternahrung zu empfehlen*).” Exklusiv Neuform certification symbol.

Note: In German, *Heide* means “heath, moorland, or moor.” Thus Heideland refers to the moorland around Lueneburg where DE-VAU-GE is located.

7521. Product Name: [GranoVita Organic Tofu Grain Dumplings in Mushroom & Cream Sauce with Green Rye & Vegetables].

Foreign Name: GranoVita Bio-Tofu Getreidekloesse in Champignon-Rahmsauce mit Gruenkern-Gemuese.

Manufacturer’s Name: DE-VAU-GE Gesundheitswerk GmbH.

Manufacturer’s Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

Date of Introduction: 1990.

Ingredients: Dumplings: Organic tofu (water, organically grown soybeans, calcium chloride), onions, rye flakes, fine

bread crumbs (Paniermehl), egg protein, rolled oats, soy sauce, herbs, seasonings (Wuerzmittel), sea salt, spices (Gewuerze), garlic. Mushroom & Cream Sauce: Water, cream, milk, onions, butter organically grown rice flour, wheat flour, lemon juice, lecithin (vegetable emulsifier), carob flour (vegetable thickener), spices (Gewuerze). Green Rye & Vegetables: Water, corn, green rye, carrots, paprika, onions, wild rice, vegetable oil, spices (Gewuerze).

Wt/Vol., Packaging, Price: 350 gm.

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 13.5 gm, fat 21.1 gm, carbohydrates 47.8 gm, calories 435. 1 BE (Broteinheit, or diabetic exchange) = 88 gm.

New Product–Documentation: Form filled out and new Labels sent by DE-VAU-GE. 1990. June 11. The product was introduced in 1990. Label: 5 by 8.5 by 1.5 inch paperboard box. Black, gold, red, green, and orange on white. A stylish color photo on the front panel shows the dish ready to serve on a black plate with a green sprig, red tomato, knife and fork nearby. At the top of the front panel: “The whole foods kitchen for the gourmet” (Die Vollwertkueche à la Gourmet). “A ready-to-heat menu for 1 person. Enjoy without flesh.” The box contains two pouches: one with the tofu dumplings and sauce; the other with the grain and vegetables. The back panel shows how these can be heated in either a water bath, a cooking pot, or a microwave oven. Exklusiv Neuform certification symbol. There are three other similar products in this line.

7522. Product Name: [GranoVita Greek Vegetable Stew with Organic Tofu, Brown Rice, and Wild Rice].

Foreign Name: GranoVita Griechischer Gemuesetopf mit Bio-Tofu, Naturreis- und Wildreis-Beilage.

Manufacturer’s Name: DE-VAU-GE Gesundkostwerk GmbH.

Manufacturer’s Address: Luener Rennbahn 18, Postfach 1660, D-2120 Lueneburg (near Hamburg), West Germany. Phone: (04131)-303-145.

Date of Introduction: 1990.

Ingredients: Stew: Paprika, water, mushrooms, onions, organic tofu (water, organically grown soybeans, calcium chloride), vegetable oils, egg protein, tomato pulp, organically grown rice flour, olives, seasonings (Wuerzmittel), soy sauce, sea salt, guar flour (plant thickener), spices (Gewuerze), herbs, garlic. Rice: Water, brown rice, wild rice, vegetable oil, sea salt.

Wt/Vol., Packaging, Price: 350 gm.

Nutrition: Per 100 gm.: Protein 13.6 gm, fat 16.0 gm, carbohydrates 61.7 gm, fiber (Ballaststoffe) 4.0 gm, calories 445. 1 BE (Broteinheit, or diabetic exchange) = 68 gm.

New Product–Documentation: Form filled out and new Labels sent by DE-VAU-GE. 1990. June 11. The product was introduced in 1990. Label: 5 by 8.5 by 1.5 inch paperboard box. Black, gold, red, green, and blue on white. A stylish

color photo on the front panel shows the dish ready to serve on a black plate with a green sprig, mushroom, knife and fork nearby. At the top of the front panel: “The whole foods kitchen for the gourmet (Die Vollwertkueche à la Gourmet). A ready-to-heat menu for 1 person. Enjoy without flesh.” The box contains two pouches: one with the vegetable & tofu stew; the other with the grain and vegetables. The back panel shows how these can be heated in either a water bath, a cooking pot, or a microwave oven. Exklusiv Neuform certification symbol. There are three other similar products in this line. One of these, GranoVita Gruenkern Käsebratling (Green Rye Cheese Patties in Mushroom sauce with Vegetables & Rice) contains soy sauce as its only soy-based ingredient.

7523. Product Name: House of Tsang Hoisin Sauce.

Manufacturer’s Name: House of Tsang (Distributor).

Manufacturer’s Address: San Francisco, California.

Date of Introduction: 1990.

Wt/Vol., Packaging, Price: 8 oz jar.

How Stored: Shelf stable.

New Product–Documentation: Seen at Open Sesame in Lafayette, California. 1991. Feb. 16.

7524. Kudou, Shigemitsu; et al. 1990. Enzymatic hydrolysis of soybean saponins by *Aspergillus oryzae* KO-2.

Agricultural and Biological Chemistry 54(5):134. [16 ref]* Address: Kanasa Miso Co., Ltd., 202 Hamada, Tamagawa, Aomori 030; 2,3&5. Faculty of Agriculture, Tohoku Univ., 1-1 Tsutsumitori, Amamiya-machi, Aoba-ku, Sendai 981. All: Japan.

7525. Product Name: Mandarin Soyfoods Garden Patties [Bar-B-Que, Cajun, and Teriyaki].

Manufacturer’s Name: Mandarin Enterprises Ltd.

Manufacturer’s Address: 11031 Bridgeport Rd. #107, Richmond, BC, V6X 3A2, Canada.

Date of Introduction: 1990.

Ingredients: Bar-B-Que: Tofu (organically grown soybeans, water, magnesium chloride [purified nigari]), brown rice, soybean fibre [probably okara], soy grits, brown rice flour, fresh onions, fresh carrots, fresh celery, fresh green peppers, crushed tomatoes, sesame seeds, rice syrup solids, sea salt, spices, tomato powder, powdered fruit solids, sunflower oil, smoke and spice extracts, natural flavor, spinach powder.

Wt/Vol., Packaging, Price: 2 patties. 170 gm (6 oz).

Pinched ends box.

How Stored: Refrigerated or frozen.

Nutrition: Per 100 gm.: Calories 255, protein 10.3 gm, carbohydrates 27 gm, fat 6.0 gm (polyunsaturates 3.7 gm, monounsaturates 1.1 gm, saturates 0.6 gm, cholesterol 0 mg), dietary fiber 2.2 gm, sodium 1050 mg, potassium 425 mg.

New Product–Documentation: This is the line extension of 3 products launched in 1989. Talk with Gerry Blanchard

of Natural Promotions, Vancouver, BC, Canada. 1992. Jan. 22. His company developed the packages/labels for these products. Mandarin now has 10-11 distributors in the USA. Six flavors are now available.

Label for Bar-B-Que sent by Gerry Blanchard. 1992. Jan. 22. 7 by 5.5 inches. Paperboard sleeve. Red, brown, and dark green on tan and light green. Illustration of a tofu burger with trimmings between buns, surrounded by a tomato, green pepper, celery stalk, and sliced onion. Silhouette of a cowboy riding a horse and swinging a lasso. "Ready in 3 minutes. Prepared with tofu, savoury herbs & vegetables. Cholesterol free. Microwaveable. Heat and serve." Called "Pâtés Jardinières" in French.

Two leaflets for all 6 Mandarin patties also sent. One shows a huge illustration of a burger with the 6 packages below it. The other shows the six packages lined up in a typical produce case. On the back is a list of ingredients and nutritional composition for each flavor.

Ad in Vegetarian Times. 1992. April. "Mandarin Soy Foods. Since 1976 we have been committed to producing the finest in great tasting soyfoods. For a free copy of our newsletter "Soy News," just circle our number below."

7526. Parma Soia. 1990. La Soia dà sempre ottimi frutti [The soybean always gives the best fruits (Catalog)]. Strada Logheretto 2, 43010 Corcagnano (Parma), Italy. 8 p. 29 x 84 cm. Color. [Ita]

• **Summary:** This handsome color catalog has 4 connected panels on each side. One side displays the company's new line of 21 soy products. Most of the products are in the line titled "Campi di Soia" (Fields of Soya), but several imported products (including tofu) are in the Nature Soy line. The other gives information about the company (a subsidiary of the Italian dairy giant, Parmalat) and its plans to promote the line. The Campi di Soia line is thought to be sold through supermarkets. This brochure was distributed at CIBUS, the biggest food fair in Italy, held annually in Parma, on 6-9 May 1990. Address: Corcagnano (Parma), Italy. Phone: 0521.639148.

7527. **Product Name:** San-J Organic Shoyu: Naturally Brewed Soy Sauce (Bronze Label).

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: Colonial Heights, VA 23834.

Date of Introduction: 1990.

Ingredients: Water, organic soybeans, salt, organic wheat, organic alcohol (to preserve freshness).

Wt/Vol., Packaging, Price: 20 oz (592 ml) glass bottle. Retail for \$4.99 at Whole Foods in Lafayette (April 2012).

How Stored: Shelf stable; refrigerate after opening.

Nutrition: 1 tablespoon (18 gm) contains 960 mg of salt (40% of daily allowance).

New Product-Documentation: Bottle with label purchased at Whole Foods Market in Lafayette, California. E-mail

from Misako Binford of San-J. 2012. April 21. In reply to questions sent 30 April 2012. The product was introduced in 1990. San-J makes this product at their plant in Richmond, Virginia. The product was originally available in 5, 10, and 20 oz bottles for retail stores and in 5, 30, and 55 gallon containers for industrial customers. The product was now available in 10 and 20 oz bottles for retail and in 5 and 55 gallon containers for industrial customers.

7528. **Product Name:** [Tofu, Tofu Marinated in Shoyu, Tofu Pâtés].

Manufacturer's Name: Urten's Tofu.

Manufacturer's Address: Hoeje Gladsaxe 2, DK-2860 Soeborg, Denmark. Phone: +45 31-67 41-90.

Date of Introduction: 1990.

New Product-Documentation: Talk with Thomas Andersen of Urten's Tofu. 1990. May 22. He founded the company.

7529. **Product Name:** [Viana Smoked Tempeh].

Foreign Name: Viana Raeucher-Tempeh.

Manufacturer's Name: Viana Naturkost GmbH.

Manufacturer's Address: Schmittenstr. 106, D-5030 Huerth 6, West Germany. Phone: (02233) 41323.

Date of Introduction: 1990.

Ingredients: Tempeh*, shoyu*, smoke, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 200 gm.

New Product-Documentation: Label sent by Bernd Drosihn. 1990. April 8. 3.5 by 3 inches. Self adhesive. Reddish-purple, gold, and pea green. "Tasteful, well seasoned, and nourishing (herzhaft deftig). Ready to eat immediately."

7530. **Product Name:** Westbrae Natural Ramen Express (Instant Steamed Ramen Noodles in a Cup) [Oriental Vegetable, Golden Chinese Style, Savory Szechuan Style].

Manufacturer's Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer's Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990.

Ingredients: Oriental Vegetable: Noodle pasta: Whole wheat flour, sifted wheat flour (sufficient for processing), sea salt. Seasoning packet: Natural flavors, miso* (soybeans, rice, salt), soy sauce powder (soybeans, wheat, salt), corn*, green beans*, peas*, onions*, carrots*, garlic*, spices, xanthan gum (vegetable gum), parsley*. * = Dried.

Wt/Vol., Packaging, Price: 1.1 oz (31 gm) paper cup with peel-off paper lid. Retail for \$1.29 at Open Sesame (2/91, Lafayette, California).

How Stored: Shelf stable.

Nutrition: 1.1 oz (10 fl. oz as prepared): Calories 120, protein 4 gm, carbohydrate 22 gm, fat 1 gm, % calories from

fat 7, cholesterol 0 mg, sodium 745 mg, potassium 165 mg, dietary fiber 1.5 gm.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 3.5 inch diameter at mouth by 3 inches high. Paper cup. Red, black, green, and gold on white. On lid: “Westbrae Natural meals in minutes.” On side: “Low fat. No cholesterol. Recyclable. No hydrolyzed vegetable protein. Directions: 1. Fold lid back halfway. Empty seasoning packet into cup. 2. Add boiling water to ½ inch from top, stir well and re-cover with lid. Let stand 3-5 minutes. 3. Remove lid, stir and enjoy! Microwave: Boil water in separate container, then follow directions above. Savory broth with real ramen noodles, gently steamed, not fried, so there’s only 1 gram of fat. Enjoy a delicious satisfying meal in minutes!” Soyfoods Center product evaluation. Taste: very nice. The miso enriches the flavor of the broth. We like the environmentally friendly paper cup much better than the typical Styrofoam cup, and the paper seasoning packet better than its common foil counterpart. The package design is so-so. A counterpart product sold in supermarkets retails for about \$0.89 for 2.5 oz (with \$0.25 discount coupon) or \$0.356/oz. The Westbrae product sells for \$1.17/oz. or 3.3 times as much.

7531. Product Name: Westbrae Natural Fresh Miso (Instant Soup) [Mushroom, Snow Pea & Ginger, Green Bean & Sesame].

Manufacturer’s Name: Westbrae Natural Foods (Product Developer-Distributor).

Manufacturer’s Address: 5701 South Eastern Ave. Suite 330, Commerce, CA 90040. Phone: 213-722-9817.

Date of Introduction: 1990.

Ingredients: Mushroom: Noodle pasta: Whole wheat flour. Miso packet: Miso (soybeans, brown rice, water, sea salt), mushroom soup stock (shoyu, mirin, shiitake mushrooms, kombu), barley malt, spices, onion*, xanthan gum (vegetable gum). Spice packet: Honey powder, soy sauce powder (soybeans, wheat, salt), garlic*, natural flavor, onion*, mushrooms*, green onion*, spice. * = Dried.

Wt/Vol., Packaging, Price: 0.9 oz (25 gm) paper cup with peel-off paper lid. Retails for \$2.39 at Open Sesame (2/91, Lafayette, California).

How Stored: Shelf stable.

Nutrition: 0.9 oz (10 fl. oz as prepared): Calories 80, protein 3 gm, carbohydrate 14 gm, fat 1 gm, % calories from fat 11, cholesterol 0 mg, sodium 730 mg, potassium 125 mg, dietary fiber 2 gm.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1991. Feb. 16. 3.5 inch diameter at mouth by 3 inches high. Paper cup. Mushroom: Reddish brown, orange, blue, and yellow on white. On lid: “Westbrae Natural meals in minutes.” On side: “Low fat. No cholesterol. Recyclable. Directions: 1. Fold lid back halfway. Empty fresh miso packet and spice packet into

cup. 2. Add boiling water to ½ inch from top, stir well and re-cover with lid. Let stand 3-5 minutes. 3. Remove lid, stir and enjoy! Microwave: Boil water in separate container, then follow directions above. Delicious fresh miso soup, ready in minutes. Made with brown rice miso, fresh not dehydrated, for a deep, rich flavor. Delicately seasoned, with a sprinkling of tender noodles. A light, nutritious on-the-go soup.”

7532. Product Name: Peanut Braised Tofu.

Manufacturer’s Name: Wildwood Natural Foods.

Manufacturer’s Address: 31 Bolinas Rd., Fairfax, CA 94930. Phone: 415-459-3919.

Date of Introduction: 1990.

Ingredients: As of 1998: Wildwood tofu (filtered water, soybeans organically grown in accordance with the California Organic Foods Act of 1990, nigari/magnesium chloride, a natural firming agent), marinade (soy sauce, water, brown rice syrup, rice wine, ginger powder), peanuts, onions, celery, red bell peppers, water, soy sauce, apple juice, vinegar, tomato paste, honey, toasted sesame oil, ginger powder, mustard, garlic, salt, and spices.

How Stored: Refrigerated.

New Product–Documentation: Label sent by Billy Bramblett. 1998. July. He says this product was introduced in 1990, and made at Wildwood’s plant in Fairfax.

• **Summary:** Hercules was conceived in 1911, when the U.S. Circuit Court for the District of Delaware ordered the dismemberment of the Du Pont explosives business. The U.S. Supreme Court upheld the dissolution of John D. Rockefeller’s Standard Oil Corporation and James B. Duke’s American Tobacco Co. at about the same time. Explosives played a major role in America’s growing industrial strength. For the steel industry they blasted free iron ore. For the coal and petroleum industries they opened access to these key energy sources. And railroads could not have crossed the continent without explosives to clear the way.

Hercules Powder Co. began operations on 1 Jan. 1913 as an explosives manufacturer. The outbreak of World War I caused a vast expansion of the business.

Between 1955 and 1961 Hercules undertook a program of diversification, which led to a 68% increase in sales during the period. The first large acquisition of the period was the Huron Milling Company, a wheat flour processor based in Harbor Beach, Michigan. Huron appeared to be a close fit in terms of technology, manufacturing, and markets.

“Huron Milling had started as a flour mill in 1876. Two decades later it set a new course when it hired a graduate in chemistry from Michigan State named William L. Rossman and established a small research lab. In the next half-century, the company became a leader in the art and science of separating wheat into its major components—gluten and starch—and from these formulating a variety of edible and nonedible additives useful in several industries.

“By 1956 Huron Milling employed 500 people and had annual sales of \$12 million... On the gluten side, Huron Milling marketed [manufactured] food flavorings and enhancers such as monosodium glutamate (MSG) and hydrolyzed vegetable protein (HVP), medicinal glutamic acid, and enriched baking proteins.”

On 3 Dec. 1956 Hercules exchanged shares (then valued at approximately \$3.8 million) for Huron Milling’s assets. In 1958 Hercules began selling a new vital wheat gluten product for bakeries, Vicrum, which proved popular in the marketplace and partly offset the slump in MSG sales. “On the whole, during Huron’s first four years under Hercules,

the proteins proved more profitable than the higher bulk starches; in 1961, the proteins earned slightly more than \$250,000, and starches lost more than \$600,000.”

On 1 July 1961 Hercules revamped its departmental structure for the first time since 1928; Cellulose and Protein Products (Virginia Cellulose and Huron Milling) comprised one department. Between 1962 and 1973 grew only moderately. Address: 1. Managing Director, Winthrop Group, Cambridge, Massachusetts; 2. Post-doctorate fellow in business history, Ohio State Univ.

7537. Facciola, Stephen. 1990. *Cornucopia: A source book of edible plants*. Vista, California: Kampong Publications. ix + 678 p. Indexes (six!). 28 cm. [522* ref]

• **Summary:** “In your hands is one of the most remarkable efforts to come out of the struggle to preserve the genetic diversity of our planet... Steve Facciola has put together an easy-to-understand, easy-to-use compendium of the diversity of food plants available to consumer, gardener and scientist” (from the Preface). The largest and most comprehensive work of its kind, this book gives details on 3,000 edible plant species and 7,000 varieties.

Contents: Preface, by Noel Vietmeyer. Introduction. Acknowledgements. Botanical listings: Alphabetical listings of plant families (*Glycine max* and *Glycine tabacina* are listed in the family Fabaceae, pronounced fuh-BAY-see), fungi families, algae families, bacteria families. Cultivar listings (by common name for the most important and popular crops, e.g., shiitake, soybean, spinach, sprouting seeds). Sources (names, addresses and phone numbers of firms that sell seeds, plants, etc.: Domestic commercial, domestic non-commercial, overseas commercial, overseas non-commercial). Bibliography. Indices and appendixes: Index of principal vernacular names. Index of vernacular and other names occurring elsewhere in the text. Index of usage and edible parts. Index of species native to or naturalized in North America. Index of species not listed in Kunkel [Gunther Kunkel. 1984. *Plants for human consumption*. Koeltz Scientific Books, Germany]. Index of families and genera. Appendix A: Abbreviations used—For type of product offered, for annotated bibliographical citations, in descriptions for sources. Appendix B: Endnotes used in the cultivar listings.

As of Aug. 1994 an electronic version of this book is now available. It runs on Microsoft Windows and uses more than 25,000 hypertext links to cross reference information.

The main information on soybeans is found on pages 91 (Botanical listings for *Glycine max* and *Glycine tabacina*), p. 219 (*Aspergillus oryzae* culture), p. 221 (*Actinomucor elegans* culture for fermented tofu or sufu, and *Rhizopus* cultures for tempeh), p. 224 (*Bacillus subtilis* culture for natto), p. 482-83 (for “field soybeans,” lists 5 black-skinned cultivars, and 7 yellow-skinned cultivars; plus 11 “vegetable soybeans”—Agate, Butterbeans, Envy, Extra Early, Fiskeby

V, Hahto, Hakucho Early, Kanrich, Okuhara Early Green, Prize, and White Lion), p. 485-87 (sprouting seeds including soybean sprouts with directions for sprouting), and p. 500 (Soyfood cultures).

Additional information on food uses of soybeans is found throughout the book. Tofu: p. 9 (In Indonesia, a salt derived from the fruit of *Rhus javanica* (*Nurude, Mu-yen*) is used to coagulate tofu), p. 61 (In Japan the seeds of *Cannabis sativa*, called *asanomi*, are used in deep-fried tofu burgers (*ganmodoki*)), p. 76 (A vegetable curd similar to soybean tofu can be made from the seeds of the bottle gourd or calabash (*Lagenaria siceraria*)), p. 92 (The seeds of the Bonavista bean or hyacinth bean (*Lablab purpureus*) can be prepared as tofu), p. 127 (The seeds of okra, gumbo, or lady's finger (*Abelmoschus esculentus*) can be made into tofu or tempeh). Kecap (Indonesian soy sauce): p. 9 (In Indonesia, the plant tuberose (*Polianthes tuberosa*) is added to the substrate in making kecap), p. 191 (In Indonesia, fresh leaves of kaffir lime, also called ichang lime, makrut, or djeruk purut (*Citrus hystrix*) are used to flavor kecap). Miso: The following can be used as a substrate for miso—p. 88 (Peanuts), p. 94 (seeds of the velvet bean, also called cowitch, cowhage, benguk (*Mucuna pruriens*)), p. 155 (barley (*Hordeum vulgare*)), p. 156 (proso millet (*Panicum miliaceum*)). Address: 1870 Sunrise Dr., Vista, California 92084. Phone: (619) 726-0990.

7538. Gazel, Neil R. 1990. Beatrice: from buildup through breakup. Urbana, Illinois: Published for the University of Illinois, Bureau of Economic and Business Research by the University of Illinois Press. xxii + 235 p. Plus 3 unnumbered pages of plates. See p. 46-63. Illust. Index. 24 cm.

• **Summary:** This is a history of Beatrice Foods Co.

Chapter 6, "LaChoy and the bean sprout," is the most detailed history of LaChoy Food Products seen to date. Much of the history concerns the period after it was acquired by Beatrice in Sept. 1943. LaChoy is also mentioned on pages 9, 15, 35, 36, 39, 40, 43, 44, 64, 110, 112, 135, 146, 176, 193, and 209.

Beatrice was basically ruined by the purchase of Esmark in 1984 for \$2.7 billion. By 1985 the key philosophies of decentralized management and conservative financial policies had been abandoned, and employee morale was completely lost.

On 17 April 1986 Beatrice was acquired by KKR (Kohlberg, Kravis Roberts & Co.) for \$8.7 billion using a leveraged buyout (LBO)—at that time the largest leveraged buyout in history. Over the next four years, KKR sold off Beatrice, division by division.

Note 1. Neil R. Gazel was born in 1921. The term "Local girl makes good" (once Beatrice's slogan) is not mentioned.

Note 2. In 1990, ConAgra purchased the "La Choy" brand from Beatrice Foods.

Note 3. The Introduction to this book is excellent, with two tables and two remarkable graphs. It concludes (p. xxii): "The Beatrice story is considered a classroom case history of the building and breaking up of a major company. All of the events from the beginning in 1894 to the reckoning of 1986 and subsequent actions are detailed herein in an attempt to explain what happened and why." Address: Writer, Formerly Beatrice Foods' first public relations director.

7539. Heiser, Charles B., Jr. 1990. Seed to civilization: The story of food. New ed. Cambridge, Massachusetts: Harvard University Press. vi + 228 p. Illust. Index. 24 cm. [83* ref]

• **Summary:** An outstanding work, written for the general reader. "This is a classic book about the origins of agriculture and the influence of its discovery on the development of civilization"—Ghilleen T. Prance, Director of the Royal Botanic Gardens [England; on rear cover].

The Preface notes that this is a book about the plants (and animals) that stand between humans and starvation. The main subjects are ethnobiology, the study of plants and animals in relation to humans, and ecology, the study of organisms in relation to their environment. We humans "get all of our carbohydrates and nearly three-fourths of our protein from plant sources. Moreover, nearly all of the food we get from animals is in turn derived from plants. After all, life depends on photosynthesis; chlorophyll has been referred to as the green blood of the earth."

Table 5-1, "Estimated production of world's 32 major food crops" (p. 63) lists the top ten as (* = member of grass family; units in million metric tons): Sugar cane* 932. Wheat* 536. Corn* 481. Rice* 476. Potato 309. Sugar beet 286. Barley* 180. Manioc 137. Sweet potato 110. Soybean 95. Source: *FAO Production Yearbook*, 1986.

Chapter 7, "Legumes: The meat of the poor," contains a section on "Soybeans" (p. 129-33). It notes that there are no archaeological records of the soybean to help us determine when it was first cultivated, but it was mentioned in Chinese literature before 1000 B.C. Unlike most legumes, the beans are seldom eaten directly, but are used to make many different foods including bean sprouts, miso, tofu, soymilk (such as Vitasoy), tempeh, and soy sauce.

"The widespread cultivation and utilization of soybeans in the United States in the space of a few decades must be one of the most spectacular success stories in the recent history of agriculture."

Photos show: (1) A field of soybeans in the USA planted in rows, free of weeds. (2) Soybean plants ready for harvesting. (3) Soybean seeds. (4) A John Deere combine harvesting soybeans.

Note: Previous editions of this book were copyrighted in 1973 and 1981. Also discusses: Peanuts (p. 126-29). Potatoes and their remarkable history (p. 134-39). Tomatoes and their unusual history (p. 181, 206). Address: Distinguished Prof. Emeritus of Botany, Indiana Univ.

7540. Hesseltine, C.W. 1990. UJNR panel on toxic microorganisms. In: Albert E. Pohland, V.R. Dowell, Jr., and J.L. Richard, eds. 1990. *Microbial Toxins in Foods and Feeds: Cellular and Molecular Modes of Action*. New York: Plenum Press. xvii + 617 p. See p. 1-15. From a Symposium on Cellular and Molecular Mode of Action of Selected Microbial Toxins in Foods and Foods. Held 1988. Illust. 26 cm.

• **Summary:** The UJNR (United States–Japan Cooperative Program on Natural Resources) was established in May 1964. There were 7 original panels, one of which was Toxic Microorganisms. The initial emphasis was on botulism, soon followed by aflatoxins. The Panel consisted of 7 Japanese and 7 Americans; they comprised a mix a people who were experts on fungal mycotoxins and bacterial toxins. The Panel conducted many activities including joint panel meetings and study tours, exchange of mutual interest items, publication of 6 books, symposia, development of regulations, and interaction with other societies.

The 1966 study tours in Japan were longer than usual because of the review of 4 projects supported by the USA involving the use of soybeans in foods. These 1966 tours included visits to the following Japanese organizations working with soybeans: (1) Universities: Nagoya Univ. (Mycotoxins and soybean fermentations), Tohoku Univ., Faculty of Agriculture (Miso fermentation), Kyoto Univ. (Fermented soybean foods), and Tokyo Univ. of Education (Soybean cheese). (2) Japanese government laboratories: Noda Institute of Research, Chiba (Shoyu fermentation), Institute for fermentation, Osaka (Culture collection and fermentation in General).

(3) Trade association laboratories (each in Tokyo): Japanese Tofu Assoc., Japanese Shoyu Institute, Central Miso Institute. (4) Companies: Sendai Miso Shoyu Co., Sendai (Miso production), Koji Sanzaemon Roho, Kyoto (Koji starter production), Takeda Chemical Industry, Osaka (Antibiotic & flavor fermentations), Kikkoman Shoyu Co., Chiba (Shoyu production).

Talk with Dr. Walter Wolf of Peoria, Illinois. 2000. Aug. 14. He was on the UJNR Protein Panel, which met for about 10-12 years, on alternating years in Japan and the USA. Thus he went to Japan 5-6 times—the last time being in about 1988. The purpose of the panel was exchange of information about protein. They met with their counterparts at the NFRI (National Food Research Institute, Tsukuba). At a typical meeting there would be formal presentations by members of both teams, followed by a field trip to numerous facilities. Address: NRRC, Peoria, Illinois.

7541. Moosewood Collective (The). 1990. *Sundays at Moosewood Restaurant: Ethnic and regional recipes from the cooks at the legendary restaurant*. New York, NY: Simon & Schuster. 734 p. Illust. Index. 24 cm. A Fireside Book. [55*

ref]

• **Summary:** Since it opened in 1973 in Ithaca, New York, Moosewood Restaurant has become famous for its creative semi-vegetarian cuisine (fish are included on the menu and in this book) with a healthful emphasis. The restaurant is run by a group of 18 women and men, most of whom have worked together for nearly 10 years. Major decisions are made collectively. This is the Collective's second vegetarian cookbook. Each section, corresponding to the cuisine of 17 different geographical regions (e.g. Eastern Europe, Japan) and one ethnic group (Jewish) is written by a different member of the collective. The book contains many soy-related recipes: Tofu (20 recipes), tempeh (1), miso (1), soybeans (1), tamari roasted nuts (1), etc. The extensive "Guide to ingredients, techniques, and equipment" (p. 649-87) describes: Beans (incl. soy), chick pea flour (besan flour), dashi, Hoisin sauce, miso, seitan, soy sauce (see tamari soy sauce), light soy sauce, tempeh, tofu, vegetable oil (incl. soy oil), Worcestershire sauce ("The formula remains a well-guarded secret, but we do know that the Lea and Perrins product contains molasses, anchovies or sardines, sugar, garlic, tamarind, soy sauce, vinegar and spices"). Address: Ithaca, New York.

7542. Morningstar, Amadea; Desai, Urmila. 1990. *The ayurvedic cookbook: A personalized guide to good nutrition and health*. Santa Fe, New Mexico: Lotus Press. 351 p. Foreword by Yogi Amrit Desai. Introduction by Dr. David Frawley. Illust. by Amadea Morningstar. Index. 23 cm. [40 ref]

• **Summary:** This is a lacto-ovo vegetarian cookbook based on Ayurvedic principles. Contents: Part I: General Information. History of Ayurveda. Nutrition from an Ayurvedic perspective. Discovering your constitution. Attributes and nutritional needs of each constitution. How to imbalance your constitution. Understanding Ayurvedic nutrition: Taste. Digestion. Food combining and preparation. Balancing *Agni*. The digestive organs. The *chakras* and dietary change. Eating with the seasons. Getting ready to cook. Planning balanced meals easily. Menus: *Tridoshic*, *Vata*, *Pitta*, *Kapha*. Part II: Recipes. Part III: Appendices. 1. Most frequently asked questions and answers. 2. Enlarged food guidelines for basic constitutional types (many soyfoods are included). 3. Some basic information about nutrients. 4. Glossary of English and Sanskrit terms. 5. Food name equivalents in Latin, Sanskrit, Hindi. 6. Bibliography. About the authors (autobiographical).

The three Vatas (tridosha, three doshas, constitutional or body types) are Vata (pure air, head/wisdom), Pitta (pure fire, action), and Kapha (pure water, love/heart). Tridoshic foods or herbs are suited to all 3 constitutions; these include ghee, basmati rice, and asparagus. Concerning soya: "Many Vatas handle certain well-spiced soy products well, like tofu or liquid soy milk. Some do not. Let your gut be your guide.

Dairy is very calming to Vata, especially when it is warm” (p. 14).

“*Pittas* are often attracted to high-protein foods, and do seem to need a little more protein than other constitutions. Goat milk, cow milk, egg white souffles, tofu, tempeh, and the aforementioned cottage cheese are all effective in balancing Pitta. Most beans—with the exception of heating lentils—are excellent” (p. 16).

Anything which stimulates elimination tends to relieve *Kapha* (barley and beans being classic examples). Aduki beans are especially good, as are black turtle beans, though the latter are more difficult to digest. Soy beans and soy products are recommended less frequently. Over half of tofu’s calories come from fat, surprisingly, while only 4% of black beans’ do. Still, soy products like soy milk tend to be less *Kapha*-enhancing than dairy products” (p. 19).

“Examples of oily food include ghee, vegetable oils, animal fats, soybeans, many vegetables and citrus. Dry foods include corn, buckwheat, rye, millet, most beans and dark leafy greens, to list a few. These latter foods will need moistening of some sort to be more easily digested by most people” (p. 28).

In the menu section, under each constitutional type (dosha, such as Vata), recommended menus are given by season for each meal. For example, soy-related foods included in Vata menus are: Summer: None. Fall: Dinner—Miso tofu, Amasake. Winter: None. Quick day: Breakfast—soymilk. Beverage—Amasake. Weekend day: Nothing. On the road (when travelling): Dinner’ Chinese vegetables and rice (with tofu, if well tolerated).

Each recipe in the recipe section tells which constitution type it suits, how long it takes to prepare, in what seasons it is most healing, and how many it serves. For example,—Vata means that it calms Vata, + Vata means that it aggravates or increases Vata, and 0 Vata means that it is neutral for Vata. For brevity, we will give only Vata examples in the following. Soy-related recipes: About tofu (p. 102): Tofu and liquid soy milk tend to be cool and heavy, yet oilier than most other bean products. This oily lubricating quality helps their digestion, as does the pre-processing they have undergone as legumes... Eaten in excess, they will increase *Kapha*. Warming preparation, in the form of heat or warming spices such as ginger, tamari, cumin, turmeric, cinnamon or mustard seeds, aid their healthy breakdown in the system. Beans can be idiosyncratic in effect though; if your experience doesn’t match the descriptions given here, trust your direct experience first. Some people have a hard time digesting tofu in almost any form; an allergy to soy may be present. It was popular in the sixties and seventies to serve tofu cold, cubed and plain at health food-type salad bars. This is about the most difficult way to try to consume an already chilling food. Try tofu marinated, spiced and cooked, then make up your mind about its digestibility for you.”

Miso tofu (p. 102,—Vata). Tofu mushrooms (p. 104,—

Vata). Tofu pesto (p. 104,—Vata). Sauteed tofu and vegetables (p. 105,—Vata, but mildly + Vata with frozen tofu). East Indian lima beans (with tofu, p. 114). Spicy rice and yogurt (with soy milk, p. 131,—Vata; “Made with soy milk, which is lighter and cooler than yogurt, it is suitable for Pitta and *Kapha* as well”). Vegetable barley soup (with tofu, p. 188, 0 Vata).

About oils (p. 202-03): “Ghee is the highly preferred fat in Ayurveda, being light, easy to digest and potentiating to many of the foods with which it is served.” Sunflower oil is the next best choice, being agreeable to all doshas. “Sesame oil is specifically recommended when a warming effect is needed. It grounds Vata... The vast majority of oils are warming and heavy in quality, including...” soy oil. “Margarine is cold and difficult to digest and not often recommended by Ayurvedic physicians.”

About condiments: Salt, tamari, miso, and pickled ginger all heat up a meal and stimulate *agni* (fire). A detailed discussion is given of the medicinal function of sea vegetables in Ayurveda (p. 216-17).

About soy milk: Liquid soy milk can be a good alternative to cow’s milk, if you are sensitive to the latter. It is also less *Kaphagenic* (imbaling to *Kapha*) than cow’s milk, when properly prepared. Lighter than cow’s milk in its effect on the body, it cooks up easily in recipes. Like most high protein foods it promotes building, not cleansing. It is best used in restorative and maintenance programs. It can be warmed with cinnamon, cardamom, nutmeg or ginger and black pepper. Some *Vatas* do not tolerate it well. Dried soy milk powder and soy protein powder are much more difficult to digest than the whole liquid soy milks. Only the most stalwart *Pitta* is likely to be able to consume them without gas, as they are cold, heavy and dry. Whole soybeans and tempeh are often gas-producing as well. For adequate digestion they require much cooking and spicing, good *agni*, and a *Pitta* constitution. Hot soy milk (p. 264).

Scrambled tofu (p. 281,—Vata).

In appendix II (p. 293). The following legumes, in moderation, calm Vata: Aduki beans, soy cheese, soy milk (liquid), tofu, black lentils, mung beans, red lentils, and tepary beans. But these aggravate Vata: Soy beans, soy flour, soy powder, tempeh, garbanzos and most other beans. Among beverages, icy cold drinks and many others aggravate Vata. Beverages that calm Vata are soy milk (well spiced and hot), miso broth, many herb teas. Tofu is calming to Pitta and mildly aggravating to *Kapha*. Cool in action, some *Vatas* tolerate it well, others do not.

Aduki beans are mentioned on p. 19, 106, 109, 116, 124, 293, 306. Address: 1. Faculty member, The Ayurvedic Inst., Albuquerque, New Mexico; 2. Wife of Yogi Amrit Desai, member of Kirpalu Center for Yoga and Health, Lenox, Massachusetts.

7543. Nene, Y.L.; Hall, Susan D.; Sheila, V.K. eds. 1990.

The pigeonpea. Oxon, England: CAB International for; Patancheru, AP, India: International Crops Research Institute for the Semi-Arid Tropics (ICRISAT). x + 490 p. Illust. Index. 25 x 20 cm. [500+* ref]

• **Summary:** Contents (18 chapters, including): Foreword. Contributors. Acknowledgements. 1. Geography and importance. 2. Origin, history, evolution and taxonomy. 16. Nutrition and products. 17. Markets and outlook.

Pigeonpea (*Cajanus cajan* (L.) Millspaugh), a major grain legume, is widely grown as a backyard subsistence crop by small farmers in the semi-arid tropics. Worldwide, it ranks sixth in area and production compared with other grain legumes. All evidence indicates that the pigeonpea originated in Peninsular India. Today India produces more pigeonpeas than all other countries combined. The word “pigeonpea” probably originated in the Americas, where it arrived in the 15th century, because pigeons were fond of the seeds.

Chapter 16, “Pigeonpea: Nutrition and products,” by D.G. Faris and U. Singh (both of ICRISAT; 126 refs = many tables and photos) includes the following contents: Introduction. Nutrition. Supplementation value of pigeonpea in cereal-based diets. Nutritional quality of vegetable pigeonpea. Cooking quality. Human food: Whole dry seed (the tough seed coat results in a long cooking time “but is free from the lipoxidase that causes off-flavours in soybean...”), dhal, other products from dry seed (freshly sprouted seed {sprouts}, tempeh {made with a combination of pigeonpea and soybean; see photo}, pigeonpea sauce (ketchup) is a replacement for soysauce in Indonesia, canned whole dried seed, pigeonpea flour, extruded food, clear noodles). Vegetable (green seed {used as a green vegetable, often in place of green garden peas}, green pods). Animal feed. Medicinal uses (“There is a considerable folk medicine and ayurvedic listing of the curative effects of various parts of the pigeonpea plant”). Future. Address: 1. Deputy Director General, ICRIAT, Hyderabad, India.

7544. Perché la soia [Why soya?]. 1990. Strada Logheretto 2, 43010 Corcagnano (Parma), Italy. 6 panels. Catalog. 29 x 21 cm. [Ita]

• **Summary:** In this brochure, a color photo shows the entire *Campi di Soia* and *Erboristeria* lines. The two are almost identical in terms of product names and packaging except that the word “Erboristeria” replaces the word “Campi di Soia” for products sold to the health food trade. The *Erboristeria* line has a bottled cooked soybeans (*Semi di Soia*), and a different shaped soy fortified pasta (*Soipast*). Both lines now have a soy lecithin (*Lecitina di Soia*). In both lines, the bottled soymilk is named Soidrink (3 flavors) and the soymilk in a Tetra Brik Aseptic carton is named Soilat (1 flavor). Address: Corcagnano (Parma), Italy. Phone: 0521.639148.

7545. San-J International, Inc. 1990. In 1804 Napoleon

became emperor, Jefferson was reelected, and the Sato family brewed its first tamari (Ad).

• **Summary:** The wording of this ad was revised in early 1990. Address: Richmond, Virginia. Phone: 804-226-8333. Fax 804-226-8383.

7546. Titsingh, Isaac. 1990. The private correspondence of Isaac Titsingh, Vol. 1 (1785-1811). Introduced and edited by Frank Lequin. Amsterdam, Netherlands: J.C. Giebon. Index. 24 cm. Series: Japonica Neerlandica vol. 4. [3 soy ref. Dut]

• **Summary:** Text chiefly in Dutch, with some correspondence in English. Isaac Titsingh was born on 10 Jan. 1745 in Amsterdam, and died on 2 Feb. 1812 in Paris. He was buried in Père-Lachaise cemetery. The inscription on his gravestone, written in French, states: Here lies Isaac Titsingh, formerly a councillor of the Dutch East India Company, Ambassador to China and to Japan. Died at Paris the 2nd of February 1812, aged 68 years.

This book, dedicated warmly to Prof. C.R. Boxer, begins with a 17-page “General introduction,” by the author, in English. It discusses: Titsingh’s life and work, the nature and content of his correspondence, the manuscripts, and notes on the text. This introduction shows Titsingh as a truly remarkable man, 50-100 years ahead of his time, and a pioneer at the dawn of understanding between Japan and Europe. Titsingh loved Japan, and that love opened doors to him that were closed to mere merchants.

Brief biography (p. xv-xxii): Titsingh was born in 1745 into an affluent, “well-educated patrician family in Amsterdam which counted a number of well-known surgeons among its members. Isaac Titsingh first qualified as a surgeon in Amsterdam, then obtained a doctorate in law at Leiden. In 1765, at age 20, he set sail for Asia as an *Onderkoopman* (Junior Merchant) with the Dutch East India Company (*Verenigde Oostindische Compagnie*, VOC). In Asia, he first worked as an administrator in Batavia (today’s Jakarta, head of VOC’s Asian operations), then he spent a total of 3½ years in Japan, divided over three separate stays from Aug. 1779 to Nov. 1784, as *Opperhoofd* or *Kapitan*, Director of the VOC trade there. At this time, Holland was the only Western nation allowed to enter or trade with Japan; the VOC was confined to the tiny man-made island of Deshima in the Bay of Nagasaki on the southern Japanese island of Kyushu—where they could be constantly watched and their actions tightly controlled by Japanese authorities. While in Japan, Titsingh paid two official visits to the Shogun’s Court at far-away Edo (today’s Tokyo). He also visited the Emperor’s Court at Kyoto. From 1775 to 1792 he was Director of VOC’s trade in Bengal; he resided at Chinsurah, near Calcutta. “In that period he [learned to speak English] and made many good English friends, who later proved a great asset to him.” From 1792 to 1793 he returned to Batavia, this time as *Raad-Extraordinaris* (Councillor Extraordinary) of the Indies. From 1794 to 1795 he served

as ambassador to the Imperial Court at Peking; he attended the 60th anniversary of the reign of the Qianlong Emperor. In 1796, Titsingh finally returned to Europe after a brilliant stay of 31½ years in Asia. After a brief stay in London, he spent the last years of his life as a largely unknown recluse in Paris.

“Titsingh had a brilliant career, but he was not a typical careerist. He was one of the top VOC officials in the Orient, but he was not a typical VOC employee. He was deeply interested European-Japanese academic and cultural relations. “Titsingh’s position was unique.” The Enlightenment (ca. 1650-1750) was now well established in Europe and he helped to foster the interests of a number of Japanese pioneers who were interested in learning more about Holland (*Rangakusha*) and about European culture, and in opening up Japan to the outside world. Titsingh took an equally deep interest in learning more about Japan—but in a systematic and objective way, trying to eliminate the many Western prejudices about Japan. “Titsingh taught a number of Japanese to read and write Dutch, and he himself learned Japanese”—he was a prodigy at learning languages. He helped supply Dutch books in the fields of medicine, science, the arts, etc. to the *Rangakusha* and with some of them he became lifelong friends and correspondents. He developed a large collection of Japanese objects; he was granted the rare permission to take these (and a map of Japan) back to Europe. Charles Boxer described Titsingh as “the most learned of all the Hollanders who visited that country [Japan] during the two centuries and a half in which” the VOC was active there. George Sansom, the great Japanologist, described Titsingh as “a man of all-around accomplishment.” For much more about Titsingh, read this General Introduction.

Volume I of book contains 215 letters relating to the period 1785-1811. Of these, three mention soy [sauce], but only in passing. (1) Letter no. 5 of 24 Nov. 1785 (p. 9) (“... een provisie van sacky, soya en andere Japansche producted toetezended,...”).

(2) Letter no. 16 of 21 June 1786 (p. 27) (“295 krukken Zooija. 100 krukken Zackij...”).

(3) Letter no. 55 of 19 June 1789 (p. 124) (“...en kon gen balij zakij or zooija na boord krijgen”).

Note: Engelbert Kaempfer (1651-1716) traveled and worked in Japan for two years from Sept. 1690 to Nov. 1692 as chief surgeon to the Dutch East India Co. (VOC). While in Japan, he twice visited Edo and the Shogun Tokugawa Tsunayoshi there. His tact, diplomacy and medical skill overcame the cultural reserve of the Japanese, and enabled him to elicit much valuable information.

7547. Wagner, Lindsay; Spade, Ariane. 1990. *The high road to health: A vegetarian cookbook*. New York, NY: Simon & Schuster / Prentice Hall Press. xv + 288 p. Foreword by E. Lee Rice. Index. 24 cm. [54 ref]

• **Summary:** Lindsay Wagner, whose lovely color photo appears on the cover, first achieved widespread television in the early 1970s as “The Bionic Woman.” Recently she starred in the Academy-Award winning film *The Paper Chase*. This vegan cookbook uses no meat, dairy products, or eggs. A section titled “Raising the Dairy Question” (p. 13) discusses problems with milk and concludes: “A terrific substitute for milk products comes from that little marvel, the soy bean. Soy milk has the look and consistency of milk, and some brands even taste like it. Try some on your breakfast cereal, top your pies with our creamless Whipped Cream, spread your sandwiches with eggless Mayo Spread and enjoy Huevos-less Rancheros for brunch. You’ll never look at another carton of milk.”

Chapter 4, “About the ingredients,” includes discussions of Braggs Aminos, cold-pressed oil, kuzu, lecithin, miso, mochi, nori, soy milk, soy sauce, tempeh, tofu. Soy-related recipes include: Huevo-less rancheros (with tofu and soy milk, p. 65). Vegetarian “salami” (with firm tofu, p. 82-83). Mayo spread II (with soy milk, p. 88). Ginger tamari dressing (p. 131). Creamy oil substitute (with soy milk, p. 134). Tofu sour cream (p. 134). Eden cheesy sauce (with soy milk, p. 136).

Chapter 10 (p. 141-59) is titled “Entrées for the meat lover”; most of the recipes are based on soyfoods: Marinated tempeh (p. 141). Marinated tofu. Barbecued tofu or tempeh. Tempeh marinade. Teriyaki tofu. Polynesian tofu. Tofu piquant. Tofu ribs. Grilled tofu with summer vegetables. Japanese eggplant and tofu Romano. Pecan herb loaf (with tofu and soy flour). Easy tofu burgers. Easy easy burgers (with Marinated tempeh or tofu). New Age Italian sausage I (with Marinated tempeh and Marinated tofu). New Age Italian sausage II (with Marinated tofu). Spicy tempeh stir fry. Tofu cacciatore.

Lasagna with zucchini and mushrooms (in Light sauce with soy milk, p. 166). Manicotti stuffed with zucchini and tofu cheese (p. 175). Tacos (with Marinated tofu and tempeh, p. 187). Eggplant al forno (with tofu, p. 213). Banana-strawberry tofu pudding (p. 231). Italian cheesecake (with tofu, p. 243). Coconut-mocha cream frosting (with soy milk, p. 260). Tofu fruit sauce (p. 261). Mock whipped cream (with soy milk, p. 262).

An interesting last chapter titled “Afterword: Meat—We can live without it! Here’s why” discusses the role of an “animal-based diet” on destruction of the environment. Address: 1. California; 2. Woodland Hills, California.

7548. Zeffertt, Wendy. 1990. *Cultured foods*. Gentian Services, P.O. Box 2140, Olympic Valley, CA 95730. 151 p. Illust. by Nanct Zeffertt. Index and recipe index. 28 cm. Spiral bound. [32 ref]

• **Summary:** This book is a good introduction to the many kinds and benefits of cultured or fermented foods. Many chapters (and all soyfoods chapters) contain recipes.

Chapters related to soyfoods are 1. Why cultured foods? 2. Cultured dairy products. 3. Miso. 4. Tamari and shoyu (soy sauce). 5. Amazake, sake and mirin. 6. Tempeh. Where to order starter cultures. Glossary.

Note: This is not a vegetarian book; poultry and fish are used in some of the recipes. Address: Olympic Valley, California.

7549. Stanley, Sarah. 1991. Documents owned by Lea & Perrins concerning their company's early history (Interview). *SoyaScan Notes*. Jan. 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The company does not have a written company history, though it does have a brief brochure "Worcestershire Chronicle." More important, it does have many very old documents going back to the 1830s. These old ledgers (recently rebound), books, and 6-10 old scrapbooks are kept in two locked glass display cases at Fair Lawn, New Jersey. None have been published. There are also some old bottles in the showcases. No one at the company really knows the history of the company. A researcher might be able to use these documents on site if he/she were qualified and very careful. "We are about to embark on a project to put all of the written materials we have in books, cataloging and organizing them. We expect it to be finished in 6-8 months. We feel that our history is very valuable. We have a young lady named Reggie Aber who has recently retired, and who has the time and the interest to work on this project. We will buy new scrapbooks, and she will organize our existing documents by product, and within each product chronologically from earliest times to the present. The result will be a number of well-organized scrapbooks. Our major product is Original Worcestershire, but we also have other products. We are a big name but a small company, with only 110 employees, including office staff. The president is Mr. Dennis Newnham, an American. The company has never been located in Ridgely, Maryland, but they did have a fulfillment and coupon house there. The company was originally located in New York, but moved to Fair Lawn quite some time ago."

Update: Talk with Sarah Stanley. 1994. Jan. 6. The project was completed by Reggie Aber, but Sarah's assistant, who was handling the archives, has recently left the company and she has not yet been replaced. So there is nobody who knows the material and can answer questions concerning them. She hopes to be hiring a new person for this job in the next few weeks (the person will not be a trained archivist), and within about 3 months that person should know the material. The purpose of the project was simply to organize the company's early important documents in an archives, not to summarize them or write a company history. The company has two scrapbooks and documents organized in files by subject matter. So there would probably be a file on Worcestershire sauce, with early records. If a researcher

wanted to use these archives, he or she should write the company president, Mr. Dennis Newnham, giving details and requesting permission.

Update: Talk with Sarah Stanley. 1994. May 5. Contact Jackie Fallon for help on this project. Address: Executive Secretary to the President, Lea & Perrins Inc., 15-01 Pollitt Dr., Fair Lawn, New Jersey 07410-2728. Phone: 201-791-1600.

7550. Fantastic Foods, Inc. 1991. Add some character to a quick lunch (Ad). *Health Foods Business*. Jan. p. 40 (A-B).
• **Summary:** The front side of the glossy full-page ad shows a girl smiling behind 7 different "Fantastic Meals in a Cup." The text begins: "Who says a healthy vegetarian lunch can't have a smile in it?" On the back, the ingredients in each of 6 products are listed. Cha-Ca Chili contains textured vegetable protein. All-O-Round Spaghetti contains "soy sauce powder (soybeans, wheat, salt)." Splittin' Peas contains "miso and soy sauce powder (soybeans, rice, wheat, salt)." Leapin Lentils over Couscous contains "miso powder (soybeans, salt)." And Rockin' A B C's contains "miso powder (soybeans, rice, salt)." Address: California.

7551. **Product Name:** Fantastic Cha-Cha Chili, All-O-Round Spaghetti, Splittin' Peas, Leapin' Lentils Over Couscous, Rockin' ABC's.

Manufacturer's Name: Fantastic Foods.

Manufacturer's Address: 106 Galli Dr., Novato, CA 94949. Phone: 415-883-7718.

Date of Introduction: 1991. January.

Ingredients: See below.

Wt/Vol., Packaging, Price: 2 oz (56 gm) paper cup.

How Stored: Shelf stable.

New Product-Documentation: Ad (full page color) in *Health Foods Business*. 1991. Jan. p. 40A-B, and in *Whole Foods*. 1991. Feb. p. 27. "Add some character to a quick lunch." The label of each cup is clearly visible. Ingredients: Fantastic Cha-Cha Chili uses textured vegetable protein as the second ingredient. Fantastic All-O-Round Spaghetti is seasoned with soy sauce powder. Fantastic Splittin' Peas is seasoned with miso and soy sauce powder. Fantastic Leapin' Lentils Over Couscous is seasoned with miso powder. Fantastic Rockin' ABC's is seasoned with miso powder. All the products are low in fat. Just add hot water and serve. Same ad in *Natural Foods Merchandiser*. 1991. Jan. p. 25 (insert).

7552. Fowler Brothers. 1991. Catalog: January 1991. P.O. Box 2324, San Rafael, CA 94912. 79 p. 28 cm.

• **Summary:** The company is a "distributor of natural foods." The following makers, distributors, and brands of soyfood products are listed: I. Bulk Products: Miso (American Miso, 8 products), Soy foods (Turtle Island tempeh and Soy Deli tofu burger). Soy Sauce & tamari (San-J domestic shoyu

and tamari, Westbrae Johsen shoyu), Tofu (Quong Hop, 6 products).

II. Packaged products: Ah Soy (Westbrae, 7 soy drinks), Eden Foods (Edensoy, 6 soy drinks), Pacific Soyfoods (6 types of soysage), Pacific Tempeh (4 products), Quong Hop (11 soymilk and 4 tofu products), San-J (tamari crackers, 14 soy sauce & tamari products), Soy Deli (Quong Hop, 5 soy foods, 8 vacuum pack tofu), Sweet Earth (3 veggieburgers), Turtle Island (10 tempeh products), Vitasoy (7 soy drinks), Westbrae (2 instant miso soups, 14 soy drinks, 14 types of soy sauce and tamari). Address: San Rafael, California. Phone: 415-459-3406.

7553. Horitsu, Hiroyuki; Wang, M.Y.; Kawai, K. 1991. A modified process for soy sauce fermentation by immobilized yeasts. *Agricultural and Biological Chemistry* 55(1):269-71. Jan. 3 figs. 2 tables. [4 ref]

• **Summary:** Ceramic beads were used in a bioreactor to make fermented soy sauce by a continuous process in a short time. Address: Dep. of Bioresources Utilization, Faculty of Agriculture, Gifu Univ., Yanagido 1-1, Gifu 501-11. Japan.

7554. **Product Name:** Thai Peanut [Sauce]: Mildly Spicy Marinade & Dipping. Gluten Free.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-595-9545 or 415-821-4040 (Perelman).

Date of Introduction: 1991. January.

Ingredients: Tamari soy sauce (water, soybeans, salt, alcohol), peanuts, organic sugar, water, apple cider, vinegar, sake (water, rice, salt), honey, rice vinegar, garlic powder, salt, spices, lemon concentrate, canola oil, cilantro, xanthan gum.

Wt/Vol., Packaging, Price: 5.07 fluid oz (150 ml) dispenser, 10 fluid oz bottle, 20 fluid oz (592 ml). The 10 oz Gold Label retails for about \$2.29, and the Black Label for about \$1.99 (13% less).

How Stored: Shelf stable.

Nutrition: Per 2 Tbsp (35 gm): Calories 80, Calories from fat 30.

New Product–Documentation: Talk with Stephen Zoller. 1992. July 6. This product was introduced in Sept/Oct. 1991 at the Natural Foods Expo, but was not available in stores until Dec. 1991.

Two labels sent by Misako Binford of San-J International. 2012. May 14. The brown label now reads as shown above. "New. More peanut flavor. 10 fl. oz." A logo on the front panel: "Certified Gluten Free."

7555. Lesser, Peter; Elkin, Ed. 1991. History of Pacific Soyfoods in Olympia, Washington (Interview). *SoyaScan Notes*. Feb. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Pacific Soyfoods was started by Peter Lesser

in 1981. Initially it was run out of the kitchen a collective restaurant named Café a la Mode, located on 4th Avenue in Olympia, Washington. They made tofu from scratch, and used the okara from the tofu to make soysage, using a version of the recipe published in *The Farm Vegetarian Cookbook*. Initially these products were served in the restaurant (the okara was used in sandwiches), but by about June 1981, they had started delivering the Soysage to the local food co-op and to 1 or 2 local grocery stores in Olympia. When the restaurant was closed after a year of operation, the wholesale accounts still wanted Soysage, so Peter decided to keep the soy operation going and at that time, in Feb. 1982, he coined the term "Pacific Soyfoods."

Peter stopped making tofu and bought his okara from a Korean-American tofu manufacturer named Boo Han in Lakewood, Washington. In the spring of 1982, Pacific Soyfoods' landed its first wholesale account, Pacific Rim (formerly known as something like C.C. Grain), a collective wholesaler in Seattle, that delivered to the Puget Consumers Co-op (PCC) in Seattle. Soon thereafter he started selling to natural foods wholesalers, the first one based in Seattle and the second one based in Portland, Oregon. Then in 1983 he expanded his product line by adding to the Original Soysage, Italian and Mexican flavor, and changed from a fresh Saran wrap packaging to vacuum packaging. He expanded his distribution into the San Francisco Bay Area, first through Pacific Trading Co. (Mark Brawerman), then after he folded, Ben Lee at Quong Hop & Co. took over the distribution. At one point, Quong Hop offered to set up a plant in the state of Washington with Peter overseeing it, in order to reduce freight to Washington. Island Spring also distributed Peter's products, and he would sometimes get okara from them.

In about Nov. 1985 he introduced his first tofu burger, the Earthling Tofu Vegetable Burger. He bought the tofu for this burger from Boo Han.

On 1 April 1988 Peter sold Pacific Soyfoods to Ed Elin. At that time the company made four soyfood products: three flavors of Soysage, and Earthling Tofu Vegetable Burgers. Peter left and started Northwest Natural Foods, which makes Medallions, salmon or halibut patties/burgers with wild rice. He tried many times to make a salmon & tofu burger but was unable to get the right texture. (His phone number is now 206-866-9681.) Elin purchased his tofu and okara from Boo Han's, just up the road in Tacoma, Washington. About 12-15 months ago Boo Han changed hands; it is now named Hang Yang, owned by Mr. Choy, a Korean-American, who does not speak English—although his brother does. Hang Yang is very aggressive and doing well; he just upgraded to a new system.

Ed continued to make the same four products, and will be getting new labels (with some color changes) next week for two new flavors of burgers. To the Original Earthling, they will add a Barbecued Earthling and a Teriyaki Earthling. The Barbecued flavor should be on the market in late Feb.

and the Teriyaki in March. His business is “growing so fast I can’t believe it.” His bestselling product is the tofu burger. He has also become distributor for other companies outside the region; he brings up and distributes Quong Hop’s entire Soy Deli line. He plans to take on some tofu wieners and the JSL line of egg roll wraps and won-ton skins. By mid-summer he plans to have three of his own styles of tofu (soft, medium, and firm) private labeled by Han Yang.

He fully services his own products in about 175 supermarkets on a weekly or bi-weekly basis. His big accounts are Q.F.C. [Quality Food Centers, the big market in Seattle], and Safeway. He sells only in supers, no natural/health food stores. But he does sell his products to companies that distribute to natural/health food stores, such as NutriSource and the Mountain People’s Warehouse down south. The business in natural food stores is too small. Address: 2948 29th Ave. S.W., Building 2C, Olympia, WA 98502. Phone: 206-943-6234.

7556. Miyazawa, Mitsuo. 1991. [Re: Early shipments of miso and shoyu from Sendai Miso Shoyu Co. Ltd. to Mitoku]. Letter to Chris Dawson of Mitoku, Feb. 22. Based on a request from William Shurtleff at Soyfoods Center. 1 p. Handwritten, with signature. [Jap]

• **Summary:** “In Oct. 1970 Jōsen Shōyu was shipped in 18 liter cans, and red (rice) miso was shipped in 20 kg cans.

“In March 1976 brown rice miso was shipped in 20 kg cans. According to our research, these were the earliest dates that each of these products was shipped.”

Chris Dawson adds: “I understand that Johsen was the first with brown rice miso, so this must be the first shipment ever of brown rice miso... I am trying to pull together information about the first shipments of miso and shoyu by Mitoku. It is a little difficult since we do not have the records on hand and some of our early customers are no longer in operation.” Address: Sendai Miso Shoyu Co. Ltd., Furujiro 1-5-1, Sendai 982, Miyagi prefecture, Japan.

7557. Eden Foods, Inc. 1991. Eden Foods product overview (Leaflet). Clinton, Michigan. 12 panels. Feb. 23 x 10 cm.

• **Summary:** Two panels of this leaflet contain a brief history of Eden Foods, plus a chronology of key events in the history of Eden Foods: 1967–The first checking account was opened for Eden Foods, a source of macrobiotic and organic foods in Ann Arbor, Michigan. 1968–Eden Foods, Incorporated became a registered business, with food service, retailing and food processing operations. 1970–Eden Organic Certification Standards were implemented. Eden products were distributed in Michigan and Ohio. 1972–Trade relationship began with Muso Company, Ltd. of Osaka, Japan. 1979–Fire at warehouse reduced records, equipment and inventory to rubble. Two weeks later Eden Foods reopened. 1982–Schmidt Noodle Company, maker of Eden organic pasta since 1976, was acquired by Eden Foods.

1983–Edensoy soy beverage introduced; historic new item in natural foods market. 1985–San Francisco, California sales office and warehouse opened to service the West Coast. 1986–American Soy Products opened to produce Edensoy in Michigan; first aseptic soy beverage plant in the United States. 1988–Eden Foods joined OCIA, Organic Crop Improvement Association, for independent certification of crops. 1989–Eden and OCIA established standards for food processing as well as growing crops.

Six panels inside the leaflet describe the company’s main product lines and give color photos of leading products from each line: Edensoy soy beverage. Organic durum pasta. Organic tomatoes. Organic grain sweetener (100% barley malt). Oils & vinegars. Beans & grains. Fruit products. Seasonings (Sesame Shake = gomashio). Traditional Japanese pasta. Traditional Japanese miso. Japanese soy sauces. Japanese sea vegetables. Japanese oils & vinegars. Japanese chips & crackers. Japanese pickles. Japanese concentrated foods (plum, garlic, kombu). Japanese teas. Japanese specialty foods (macrobiotic).

The company’s trademark is now “Making a tradition of good health.” Address: 701 Tecumseh Rd., Clinton, Michigan 49236.

7558. **Product Name:** Meatless Healthy Bacon (Made with Tempeh).

Manufacturer’s Name: White Wave, Inc.

Manufacturer’s Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

Date of Introduction: 1991. February.

Ingredients: Soy tempeh (cultured organic soybeans, water), soy sauce (water, soybeans, whole wheat, salt), miso (soybeans, water, salt), dried yeast, beet powder for color, dehydrated onion, granulated garlic, natural liquid hickory smoke and spices.

Wt/Vol., Packaging, Price: 6.5 oz (184 gm) plastic pouch.

Nutrition: Per 1 oz.: Calories 27, protein 4 gm, carbohydrate 4 gm (incl. 3.3 g, dietary fiber), fat 1 gm, cholesterol 0 mg, sodium 310 mg.

New Product–Documentation: White Wave News.

1991. Vol. 4, No. 1. June. A photo shows the label. Like all White Wave products, Meatless Healthy Bacon is made with soybeans grown in accordance with Section 26569.11 of the California Healthy and Safety Code [i.e. organic soybeans]. A comparison of 1 oz. broiled/fried bacon (pork) with Meatless healthy Bacon shows: Fat: 14 gm vs. 1 gm. Saturated fat: 4.95 gm vs. 0.15 gm. Cholesterol: 24 mg vs. 0 mg.

Label sent by Lon Stromnes. 1991. July 30. 4.5 by 10.25 inches. Plastic pouch. Red, black, and yellow on white. “Cholesterol-free! Vegetarian breakfast strips. A great-tasting choice.”

7559. Dawson, Chris. 1991. Re: Chronology of early

shipments of shoyu and miso from Mitoku to Europe and the USA. Letter (fax) to William Shurtleff at Soyfoods Center, March 8. 1 p.

• **Summary:** 1969—First shipment of organic shoyu (Sakae Shoyu brand) from Fukaya Shoten in Shizuoka prefecture, Japan, to Mr. Sakaguchi of Le Bol en Bois in Paris, in 16 liter tins. This shoyu was made with MOA* ingredients.

1970, Oct.—First shipment of Jôhsen Shoyu and red rice miso from Sendai Miso Shoyu Co. Ltd. in Sendai, Miyagi prefecture.

1971—First shipment of Hatcho miso from Hatcho Miso Ltd. in Aichi prefecture to USA.

1976, March—First shipment of brown rice miso from Sendai Miso Shoyu Co. Ltd. in Sendai, Miyagi prefecture. In 20 kg tins.

1980, May—First shipment of Onozaki rice miso from Onozaki Koji-ten in Tochigi prefecture to Oak Feed in Miami, Florida. 84 cartons and 4 kegs.

1980—First shipment of buckwheat miso from Kamegen Jyozo in Nagano prefecture, to Europe. 100 packs of 500 gm each.

1984, Sept.—First shipment of organic tamari from Mansan Shoten in Aichi prefecture to Blake Rankin of Granum in Seattle, Washington. Four x 18 liters.

1984—First shipment of organic soybean miso from Mansan Shoten in Aichi prefecture to Jon Judson of Soy Source, Christchurch, New Zealand.

1987—First shipment of organic young (*waka*) Hatcho miso from Hatcho Miso Ltd. in Aichi prefecture to USA.

1989—First shipment of organic Hatcho miso from Hatcho Miso Ltd. in Aichi prefecture.

* Note: MOA refers to Mokichi Okada International Association, which is a commercial association related to the Japanese religion *Sekai Kyusei Kyo* which means “helping the world religion.” Its basic tenet is to “Make heaven on earth,” to bring peace on earth and health to all people. There are approximately 700,000 members in Japan. Mokichi Okada lived 1882-1955. The commercial company was formed in 1920 and is now known as MOA Trading Company. Its purpose is to promote natural and organic farming and provide natural products for people. Address: International Sales Manager, Mitoku Co. Ltd., C.P.O. Box 780, Tokyo 100, Japan. Phone: 3-3201-6701.

7560. **Product Name:** Earthling Tofu Vegetable Burger [Barbecued, or Teriyaki].

Manufacturer's Name: Pacific Soyfoods.

Manufacturer's Address: 2948 29th Ave. S.W., Building 2C, Olympia, WA 98502. Phone: 206-943-6234.

Date of Introduction: 1991. March.

Wt/Vol., Packaging, Price: 8 oz. or 16 oz.

New Product—Documentation: Talk with Peter Lesser of Northwest Natural. 1991. Feb. 8. He plans to introduce these two new products in Feb. and March (respectively) 1991.

7561. Cox, J. 1991. Let's hear it for the soy. *Men's Health* 6:42-43. April. *

7562. **Product Name:** [Céréral Natura Soja: Soyabased Sauces (Bolognese, Lemon, Garlic, or Paprika)].

Foreign Name: Céréral Natura Soja.

Manufacturer's Name: Céréral Wander Nutrition SA.

Manufacturer's Address: Z1 La Lombardière, 07100 Annonay, France. Phone: 75 33 22 31.

Date of Introduction: 1991. April.

New Product—Documentation: Spot in SoyaFoods. 1991. Spring. p. 4. “Natura Soja.” Products include a range of soyabased sauces with no cholesterol: Bolognese (190 ml), lemon (250 ml), garlic (220 ml), and paprika (220 ml) sauces.

7563. Paine, Heather. 1991. Soya and SIAL '90: Editorial. *SoyaFoods (ASA, Europe)* 2(1):1. Spring.

• **Summary:** “Last year's SIAL (Salon International de L'Alimentaire) was certainly impressive and all the more so because soyafoods and products containing soya had a remarkably good presence... French soyafoods companies were well represented with many new products... In the ‘new products’ section a soya-oil based margarine from Denmark (Margarines AMA-Dragsbaek Margarine Fabrik S A) won a SIAL D'Or award and a soyamilk from Argentina (AdeS) was highly commended.” Address: editor, SoyaFoods, 27a Santos Rd., London SW18 1NT, UK. Phone: 081-874-5059.

7564. Tatsumi, Yoshiko. 1991. Kotokoto fukkura—Mame ryôri [Simmer slowly and they expand: Bean cookery]. Tokyo: Zaidan Hôjin Nôsan Gyôson Bunka Kyôkai. 214 p. April 30. [Jap]

• **Summary:** The word *kotokoto* in the Japanese title describes the sound of bubbles coming up during simmering; it is sometimes translated as “pit pat.” This book contains a section of edamame recipes (p. 52-58). After that comes a section on tofu, miso, and shoyu (p. 59+). Address: Cooking teacher, Japan.

7565. Carper, Jean. 1991. The food pharmacy guide to good eating: More than 200 totally healthy recipes. New York, NY: Bantam Books. xxiv + 422 p. Index. 24 cm.

• **Summary:** This is a book about the medicinal and therapeutic properties of food. Part I has a long section (p. 9-13) titled “The vegetarian advantage,” extolling the many health benefits of a vegetarian diet—based on many different scientific studies. However the book also contains an even longer section (p. 265-326) titled “Seafood, poultry, and meat main dishes”—with sidebars about how eating fish is good for your health.

The index contains 9 entries for tofu, 6 for soy sauce and for whole soybeans, 5 for miso, 2 for soy oil and its omega-3

fatty acids, and 1 for soy milk.

7566. **Product Name:** Chief Brand Soya Sauce.
Manufacturer's Name: Chief Brand Products.
Manufacturer's Address: Uriah Butler Highway, Charlieville, Trinidad and Tobago, West Indies. Phone: 809 665 4144.

Date of Introduction: 1991. May.

Wt/Vol., Packaging, Price: 200 ml bottle.

How Stored: Shelf stable.

New Product–Documentation: Spot in SoyaFoods (ASA, Europe). 1991. 2(2):8. “Soya sauce from Trinidad.” Chief Brand Products, the largest manufacturer of spices, curry powder, and condiments in Trinidad and Tobago, exhibited this product at the International Food and Drink Exhibition in London in April/May. The company exports to the Caribbean and North America.

7567. *Giornale della Soia (Il) (Italy)*. 1991. Fabbricazione della salsa di soia nel Kwangtung, China [Soy-sauce manufacturing in Kwangtung, China]. 7(3):19. May. [1 ref. Ita]

• **Summary:** This is a reprint of a paper by Elizabeth H. Grof published in 1919 in the *Philippine Journal of Science* 15(3):307-16. Sept. A map shows that Kwangtung is the province in southeastern China surrounding the city of Canton.

Note: This is the earliest Italian-language document seen (April 2012) that uses the term *salsa di soia* to refer to soy sauce.

7568. *Japan Company Handbook (Tokyo: Toyo Keizai, Inc. Quarterly)*. 1991. Foods. Spring. Second section. [Eng]

• **Summary:** In the section on Foods, 1 page of statistics is given on each of the following soy-related companies: Torigoe Flour Milling, Marukin Shoyu (Japan's 5th ranked shoyu maker, based in Shozu island), Yutaka Shoyu (based in Tokai area, also makes miso), Sanbishi (shoyu maker based in Tokai area), Kibun. Address: Tokyo, Japan.

7569. Benjamin, Hania; Storkson, J.; Nagahara, A.; Pariza, M.W. 1991. Inhibition of benzo (a)pyrene-induced mouse forestomach neoplasia by dietary soy sauce. *Cancer Research* 51(11):2940-42. June 1. [12 ref]

• **Summary:** Japanese-style fermented soy sauce (shoyu) was shown to have anticarcinogenic activity in mice fed diets designed to induce cancer. Cancer inhibition was found to be greatest in the mice receiving the most shoyu. Shoyu was also found to contain antioxidant activity which may be related to the observed anticarcinogenic effect. Address: Dep. of Food Microbiology and Toxicology, Univ. of Wisconsin, Madison, WI 53706.

7570. Raloff, J. 1991. A soy sauce surprise. *Science News*

139(23):357. June 8. [1 ref]

• **Summary:** Japanese have an eight-fold higher risk of stomach cancer than Americans. Some Japanese scientists suspect that the difference may be caused by soy sauce, which contains precursors of chemicals that cause mutations in bacteria. But a U.S. research team (Michael W. Pariza and co-workers at the University of Wisconsin–Madison) have observed just the opposite, that Japanese-style fermented soy sauce “exhibited a profound anticarcinogenic effect.” They discovered that soy sauce contains compounds with substantial antioxidant activity; many antioxidants are known to inhibit the development of cancer. Their results appeared in the June 1 issue of *Cancer Research*.

7571. Brummer, Alex. ed. 1991. Notebook: Glow germs. *Guardian (England)*. June 21. p. 15.

• **Summary:** Kikkoman, the Japanese soy sauce maker, “has developed a process that will cause germs in food, in anything from lager to the best sirloin, to glow like fireflies in the night.” That could be a problem for restaurants!

7572. Rossant, Colette. 1991. Food: The sound of soba. No chewing please. The correct way to eat soba is to ‘froosh,’ or slurp, the noodles up with a sustained intake of breath. *New York Times*. June 23. p. SM39-SM40.

• **Summary:** Colette first tasted “soba, a nutty-tasting buckwheat noodle, in Tokyo.” It was freshly made, and served hot or cold. There was cold soba “in baskets with a dipping sauce [made with soy sauce], soba topped with natto (fermented soy beans) and sprinkled with sesame seeds...”

There is now a soba restaurant in New York City named Honmura An. Contains four soba recipes plus recipes for dashi (basic stock) and tempura. All of the soba recipes call for soy sauce, as does the tempura dipping sauce.

7573. Miso, shôyu no rûtsu wa doko ka? O-shôyu sukii tanken-tai [Where are the roots of miso and shoyu? Two shoyu-lovers go exploring in China]. 1991. Television broadcast. Channel 26. California. June 9. Sat. 8-9 P.M. [Jap]

• **Summary:** This program is part of the series “Shin Sekai Kikô” (New World Homeward Voyage). In Japan, the two explorers first visit two historic places in Wakayama prefecture: In one shop, Kinzanji miso is still made. The Buddhist monk Kakushin from Shinshu in Japan learned to make this miso from a temple named Kinzanji in southern China. They also visit Kadocho, a shop where shoyu is still made in the ancient way. They then travel to China, arriving in Shanghai, and go directly to Hangchow (also spelled Hangzhou; Pinyin: Hangzhou; Japanese: Kôshu), the capital of Chekiang province, located a little to the southwest. In the market there they find a relative of Kinzanji miso, named *tien tou-shih* (sweet fermented black soybeans) sold at a soy sauce shop.

The shop owners suggest that they go to Chungking

(pinyin: Chongching; Japanese: Jûkei), a major city in Szechuan province, to learn more. There they find *tou-shih*, which resembles Japan's Hamanatto or Daitokuji Natto. Then they visit the ruins of Kinzanji temple where Kakushin learned to make miso. After walking up a long, steep rock path they discover that only a historic bell tower is left.

Now they travel to Yunnan province, in central southern China, wedged between Vietnam and Burma. They arrive at Kunming (pinyin: Kungming; Japanese: Konme). In this area the weather is semi-tropical and many types of fermented foods are made. Now they travel 800 miles by car to the southern tip of Yunnan to a mountain village named Shisan Panna. There lives the primitive Aini tribe, in thatched houses with barefoot children. An elderly woman shows them how she makes miso. Roast the soybeans in a wok, then add water and cook. Pour into a bamboo basket (1 foot diameter, 10 inches deep) lined with a banana leaf, fold the ends of the leaf over the top, and place then basket on a rack over the open-hearth fireplace sunk in the middle of the room's floor (Jap: *irori*) for 2-3 days so that the warmth aids the fermentation. Transfer the fermented soybeans to a wooden mortar, add salt and hot chilies (no grain), then pound to a paste. Shape this into 3-4 inch diameter patties, put these on a shallow 2.5 foot diameter bamboo tray, and place on the rooftop in the sun for 3 days. Broil the patties directly over the fire, put in a mortar, add more salt and chilies, and pound to a paste. Now add boiling water and serve. The result is a spicy miso soup with a bit of a natto flavor (Japanese: natto-jiru). Thus, the Japanese apparently did not invent miso soup! Address: Japan.

7574. Product Name: Traditional Foods Hickory Smoked Seitan, Seitan Curry, Seitan with Ginger, Seitan with Garlic & Herbs.

Manufacturer's Name: Santa Fe Organics.

Manufacturer's Address: 906 Locust St., Columbus, NC 28722. Phone: (704) 894-3132.

Date of Introduction: 1991. June.

Ingredients: Hickory smoked: Organic wheat flour* & vegetable broth seasoned with whole bean soy sauce, onion, garlic, and natural hickory smoke. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: Retorted in a 1 pint (16 oz) glass jar with a 2-piece canning lid. Retail for \$3.99 on the East Coast.

How Stored: Shelf stable; refrigerate after opening.

New Product–Documentation: Talk with Lenny Jacobs. 1991. Nov. 15. The Bellemes' new seitan products are now on the market. They are expensive but good. The Bellemes were going to spell seitan as "saytan" but they got a lot of flack from the idea and decided to drop it.

Talk with Jan Belleme. 1991. Nov. 14. Santa Fe Organics (run by John Belleme) started making four seitan

products in June 1991. They are made from high-protein wheat flour. The plant is located near Rutherfordton, but not on their property. The principal owner of the business, who lives in Santa Fe, New Mexico, chose the business name. Starting the business took much longer and was much more complicated than expected. They do not yet have a brochure describing the products, but every distributor who has seen them immediately wants to carry them.

Talk with John Belleme. 1992. March 7. He makes his seitan using a seitan machine that he ordered from Muso in Japan.

Talk with a reporter. 1992. March 12. John Belleme believes that it is not good to make seitan starting from vital wheat gluten, since the latter is made from white flour and the finished raw gluten does not absorb flavors nearly as well as raw gluten made from whole wheat. This reporter found that the Bellemes' products had a flavor and texture that was remarkably similar to that of meat.

Labels for all 4 products sent by Santa Fe Organics. 1992. April. 8 by 2.5 inches. Two pastel colors plus white. Illustration of ears of wheat. Hang tag (neckhanger: 2.5 x 2-inch, 6-panel leaflet) attached to neck of jar with a rubber band. "Seasoned Wheatmeal. All natural vegetarian entree. Please recycle this container. Printed on recycled paper. Copyright 1991 Santa Fe Organics."

7575. Folkers, Doerte. 1991. Verbraucherwissen ueber Soja als Naehrstoffquelle und Lebensmittel [Consumer knowledge of soya as a source of nutrients and a food]. In: F. Meuser and P. Suckow, eds. 1991. Soja in Lebensmitteln: Vortraege 2. Hamburger Soja-Tagung. Berlin: Technische Universitaet Berlin, Institut fuer Lebensmitteltechnologie und Gaerungstechnologie–Getreidetechnologie. 171 p. See p. 9-21. [10 ref. Ger]

• **Summary:** Discusses German consumer attitudes toward soya and plant proteins based on surveys using 8 questions with 2,000 people in 1989. When asked which of 9 foods on a list were important sources of protein, those foods receiving the highest percentage of responses were fish (85.3%), meat (72.4%), soybeans (50.3%, up from 39.0% in 1978), and butter (41.0; even though it is mostly fat and contains almost no protein). When asked if people need more or less protein, 39.3% said "about the same as before," 33.6% said "more," and 25.5% said "less."

When asked if people should consumer more plant protein or animal protein, 61.3% said more plant protein and therefore less animal protein, 19.5% said "same as before," 12.9% said that it makes no difference since "protein is protein," and 5.4% said more animal protein and therefore less plant protein.

"One source of plant protein is the soybean. Do you know if the soybean is used as a food or in foods?" 48.3% said they did not know. 37.2% said yes, as a food. 28.0% said yes, in foods.

“Which foods are you aware of in which soya is used?”

Soya oil 34.1%, in breads and baking 26.3%, soy sprouts 17.8%, soy sauce 14.6%, in convenience prepared foods (*Fertiggerichten*) 9.7%, in sausages and cold cuts 8.9%, in meat substitutes 7.7%, as soybeans 7.6%, in noodles and pasta 7.0%, tofu and tofu products 6.9%, soybean flour 5.9%, vegetables 5.8%, salads and raw foods 5.4%, soyburgers or patties (Soja-Bratlinge) 4.1%, soymilk 4.0%, other 15.0%.

“I will read you a list of foods in which soya is used. Please tell me if you have heard of it, tried it, or purchased it.” (percentage responses): Soy oil 70.5%/24.2%/17.7%. Raw soy sprouts 55.5%/24.0%/14.4%. Soy sauce 54.5%/28.1%/17.6%. In bread 39.5%/19.6%/14.2%. In convenience prepared foods 28.5%/10.0%/6.5%. Soyburgers or patties 21.3%/7.3%/3.5%. Soymilk 19.4%/4.0%/1.8%. Tofu and tofu products 18.6%/7.6%/4.6%. In noodles or pasta 17.6%/5.9%/3.4%. Address: Inst. fuer Ernährungsoekonomie und -soziologie der Bundesforschungsanstalt fuer Ernährung, Stuttgart, Germany.

7576. Kandler, O. 1991. Bedeutung der Milchsäuren Gärung fuer die Herstellung von Sojaprodukten [Significance of the lactic acid fermentation for the production of soy products]. In: F. Meuser and P. Suckow, eds. 1991. Soja in Lebensmitteln: Vortraege 2. Hamburger Soja-Tagung. Berlin: Technische Universitaet Berlin, Institut fuer Lebensmitteltechnologie und Gärungstechnologie–Getreidetechnologie. 171 p. See p. 45-62. [32 ref. Ger]
• Summary: Contents: Introduction. Overview of lactic acid bacteria and lactic acid. Occurrence of lactic acid in soy products. Lactic acid fermentation in the production of soy sauces and pastes. Fermented lactic acid soy beverages. Conditions for growth and acidification. Acidification and carbohydrate content. Selection of bacteria. Future developments. Summary. Address: Botanisches Institut der Ludwig-Maximilians-Universitaet, Munich, Germany.

7577. Messina, Mark; Messina, Virginia. 1991. Increasing use of soyfoods and their potential role in cancer prevention. *J. of the American Dietetic Association* 91(7):836-40. July. [56 ref]

• Summary: Contents: Abstract. Introduction. Historical perspective. Soybeans and the US food supply: Soy protein products, retail soyfoods sales. Nutrient contribution of soyfoods. Soybeans and cancer risk: Experimental studies (isoflavones, protease inhibitors, epidemiology, breast cancer, colorectal cancer). Conclusions. Implications.

“Soybeans contain, in relatively high concentrations, several compounds with demonstrated anticarcinogenic activity. Two of these compounds—protease inhibitors and phytic acid—have traditionally been viewed as antinutrients... It may not be appropriate to evaluate soybeans on nutrient content alone; dietitians need to know about the nonnutritive dietary compounds, called phytochemicals, which may have

anticarcinogenic effects... Overall, the epidemiologic data suggest that soy consumption may lower colorectal cancer risk, whereas there is only moderate support for the role of soy in reducing breast cancer...”

Table 1 (p. 838) gives the “Proximate composition and selected nutrient content of various soyfoods in common serving sizes and in 100-gm edible portions” (based on Haytowitz 1986). The soyfoods are: Miso, natto, okara, roasted soybeans (dry- or oil roasted), soy sauce (tamari), tempeh, firm tofu (raw), regular tofu (raw). Address: 1. Diet and Cancer Branch, Div. of Cancer Prevention and Control, National Cancer Inst., Bethesda, Maryland 20892; 2. Registered Dietitian, private practitioner, Washington, DC.

7578. **Product Name:** Shamah’s Savory Seitan.

Manufacturer’s Name: Shamah’s Savory Seitan.

Manufacturer’s Address: HC-2 Box 39, Route 212, Mt. Tremper, NY 12457. Phone: 914-688-7945.

Date of Introduction: 1991. July.

Ingredients: Organic whole wheat flour, organic unbleached white flour (with wheat germ), water, tamari, garlic flakes, ground ginger, sea salt.

Wt/Vol., Packaging, Price: Bulk, or 1 lb in a 32 oz round plastic tubs with a snap-on lid.

How Stored: Refrigerated, 10-14 day shelf life.

New Product–Documentation: Talk with David Goldbeck of Woodstock, New York. 1991. Nov. 18. A new company has started making seitan in Woodstock. It is now sold at Sunflower Natural Foods in Woodstock. Shirley, the manager at Sunflower, would have the name and address (which she did). Talk with Winifred Shamah Hament, founder and owner of Shamah’s Savory Seitan. She launched her seitan in July 1991. The address shown above is her home address; she makes the seitan in St. Gregory’s Church, Route 212, Box 66, Woodstock, New York 12498. She makes about 100 lb/day. She simmers a 15-20 lb loaf of kofu in a broth for 1 hour, lets it cool overnight, then cuts it into small pieces. She sells seitan both in bulk (5 lb in a large plastic bucket to health food stores or restaurants) or 1 lb of seitan immersed broth in a 32-oz container. The sauce has a shorter shelf life than the seitan. Seitan freezes wonderfully (in the sauce), without any change in texture or loss of quality.

She has been a vegan for 20 years, and a single mother of 4. She has been a teacher but she wanted to do her own thing, something new in her life. Making seitan with a machine is hard work, but making it by hand is just too hard. “The response to my product has been incredible. I’m in five-star restaurants with no vegetarian dishes except seitan.” One restaurant makes it into a mock Peking duck (that’s how they use it in Chinatown, New York); they wrap the seitan with yuba. Rudy’s, a five-star restaurant, broil it then serve it with a Dijon & wine sauce or in Mexican dishes. She learned how to make seitan at home from a friend about 2 years ago. She lived in Long Island for a while and a friend owned

Rising Tide natural foods (in Glen Cove, L.I.), which made their own seitan and sold it only at their store. They have been making it for more than 2 years. From Rising Tide she learned how to make seitan on a commercial scale.

She buys ground wheat (100 lb at a time) and uses a kneading machine. The yield of seitan from 100 lb wheat flour is 85-90 lb. The future growth looks to be in bulk sales to institutions (schools, hospitals, Grand Union, restaurants). Seitan is a good product and people love it. When demonstrating seitan to those who are unfamiliar with it, she cuts the seitan into thin slices, breads them in cornmeal seasoned with garlic and sea salt, then deep fries it and serves it fresh and hot. The market is where the tofu market was 10 years ago. In New York Chinatown she has seen a product like seitan sold in cans, as well as a white loaf that looks like a liverwurst—very tight in texture.

7579. Product Name: Snack'n Savory Tofu.

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

Date of Introduction: 1991. July.

Ingredients: Organic tofu (water, soybeans, nigari (magnesium chloride)), soy sauce, honey, soy oil, spices, granulated onion, granulated garlic.

Wt/Vol., Packaging, Price: 4 oz (114 gm) plastic pouch.

How Stored: Refrigerated.

New Product—Documentation: Label sent by Lon Stromnes. 1991. July 30. 3 by 5 inches. Plastic pouch. Red, white, yellow, green, and blue on reddish-brown. "Ready to eat! Delicious hot or cold! Great in salads."

Note: This is a new version of a White Wave product named Savory Baked Tofu, launched in Dec. 1979.

Ad in Natural Foods Merchandiser. 1992. December. Soyfoods 2000 (Special supplement insert, p. 6). Mentions Snack'n Savory Tofu.

7580. *Toyo Shinpo* (Soyfoods News). 1991. Kenkô shokuhin to shite no nattô: Nattô no "tare" no genjô [Natto as a health food: The present status of natto's tare sauce]. Aug. 1. p. 6. [Jap]

• **Summary:** In Japanese, the word *tare* refers to seasoning sauce based on soy sauce.

7581. Tara, Bill. 1991. Pioneering macrobiotics and soyfoods in London (Interview). *SoyaScan Notes*. Aug. 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Starting in the late 1960s, the pioneering work with soyfoods in London was done by Craig and Greg Sams. They and their parents were Americans, and they had gone to college in America. Their father was employed by the U.S. armed forces as an historian; they spent a lot of their time growing up between America and England. Greg fell out of a tree while going to college in Berkeley in the late 1960s

and was paralyzed from the waist down, so he was confined to a wheelchair, but was still very active and innovative. In the late 1960s they set up a macrobiotic natural foods cafe / restaurant on Portobello Road in London, then changed it into Ceres Grain Shop, a natural foods retail store. As volume increased, they began to distribute their products out of the back of their shop, and in about 1971 founded Harmony Foods Ltd. as a distribution company located in a warehouse on Ladbroke [sic, Latimer] Road. The model and evolution was similar to that of Erewhon in Boston. Harmony Foods was the first natural foods distributor in England, and probably the second in Europe after Lima Foods of Belgium. Soon they were importing macrobiotic foods from Japan, and distributing organically grown grains from England and from The Camargue (a marshy island in the delta of the Rhone River in the south of France), etc.

Among their early Japanese imports were bulk miso and "tamari" (actually shoyu), imported from Muso in wooden kegs. They repackaged the miso and shoyu in glass bottles under the Harmony Foods label in London. This was the first Japanese miso and shoyu sold in England. In about 1972, as soon as Erewhon started having miso and shoyu packed in Japan, the Sams had the same thing done with theirs, then they applied their own labels in London. But they continued to import in bulk as well. A Chinese company in London made tofu and [mung] bean sprouts, then sold the tofu to the Sams brothers; they sold it unpackaged in open trays in water. At that time, tofu was not emphasized much in macrobiotic circles so not much was sold; it was considered too yin. The Sams also sold deep-fried Rissoles filled with TVP instead of meat; as early as 1970 the Rissoles were being made by an Israeli guy (name?) who owned a shop (name?) by the Hempstead Heath. Marigold Foods also used TVP in the mid-1970s.

In 1970 Bill Tara, then a vice president at Erewhon in Boston, passed through London on his way to India. One purpose of his trip was to scout out the possibility of Erewhon setting up a distribution point or center in England. Paul Hawken was president of Erewhon at the time, and Erewhon was importing miso and tamari from both Muso and Mitoku in Japan. Bill and Paul had been roommates in a warehouse in San Francisco, then they took over the Erewhon food store from Evan Root, Paul starting 2-3 months before Bill. In London, the Sams brothers were just opening a new natural foods restaurant in the Notting Hill area so Bill and Paul Petrofsky spent 2 weeks fixing it up. Paul later started Baldwin Hill Bakery with Hy Lerner. Bill stayed in London 2-3 months during this first visit.

In about 1972 Bill returned to London with Russel Demerais, on the Erewhon payroll, again to start an Erewhon distribution center. But Erewhon went through a cash crisis and Harmony foods had grown dramatically. So Bill and Peter Bradford (an Englishman who had come to American in about 1970 and worked for Erewhon doing organic

agriculture at Erewhon Farms near Keene, New Hampshire) began to work for the Sams brothers both at Ceres Grain Shop (the retail store) and Harmony Foods (in the warehouse). Bradford, who now has a very successful natural food store in England named Clearwater Natural Grocer, has been one of the most important promoters of soyfoods in the UK. At this time, Craig Sams set up a bakery. By now, miso and tamari sales had increased; Harmony was still affixing its own label to unlabeled packs.

In 1974 Bill and Peter established Sunwheel as a natural food/macrobiotic distributor. They picked up exotic Japanese imports that Harmony found unprofitable and wanted to drop—so there was little or no competitive feeling with the Sams. By late 1974 Sunwheel Hatcho Miso, Mugi Miso, and Tamari were on the market, imported from Muso (Yuko Okada) in Japan. Sunwheel also made granola and peanut butter. Sunwheel never sold any other soyfood products; they had very limited warehouse space and no refrigeration.

Note: On 17 Aug. 1975 Renée Tara wrote William Shurtleff in California. She was living at 30 B Market St., Bradford-on-Avon, Wilts., England. She is writing a European Macrobiotic Cookbook. She requests information on miso and invites Shurtleff to visit.

In about 1977 Sunwheel acquired a retail store that had been started in and by the Community Health Foundation. By 1979 Sunwheel was very successful, but it needed to be recapitalized or sold. So the partners decided to sell it to a larger health food company; Peter kept the retail store.

In Nov. 1975 Bill established the Self Health Center which by 1976 grew into the Community Health Foundation (CHF). By 1976 CHF was offering classes in soyfoods. Paul Jones was the key man with tofu; he taught classes and started making tofu out of his home in the Highgate area. Paul Jones was definitely the first Caucasian to pioneer tofu in England. Simon Bailey, a baker who was originally with one of the first natural foods stores in England, located in Bath, taught about tempeh. These people were experimenting in the kitchen with soyfoods and taught in a sort of an apprenticeship program. Jon Sandifer, who is still with CHF, learned tempeh from Simon Bailey. CHF sold some tofu and tempeh through its own sit-down restaurant named The Seven Sheaves, then renamed The Natural Snack and changed to a cafeteria. A few people did experiments with miso but it never got to a commercial scale in part because of persistent rumors that Lima Foods was going to start making it.

By the late 1970s soyfoods were growing in popularity in the UK. Two separate groups promoted them; the vegetarians and animal rights people (who liked TVP), and the natural foods and macrobiotic people. Marigold Foods also used TVP in the mid-1970s.

Much of important pioneering commercial work with soyfoods in Europe was done by macrobiotic groups in the Netherlands and Belgium. Bill often went there to teach in

1974-79. Tofu, and later tempeh, were emphasized by groups such as Manna in Amsterdam and De Brandnetel in Antwerp. Macrobiotics was much more active in the Lowlands than in England.

The Sams brothers later started Whole Earth as a marketing company for their jams. They sold it fairly soon. Greg Sams (disabled) is no longer in the food business; he runs The Chaos Shop in London which sells photographic reproductions of computer-generated chaos patterns. Craig started Realeat Co. and now may be with the Haldane Foods Group. Address: Director, Nova Inst., P.O. Box 4648, Estes Park, Colorado 80517. Phone: 303-586-6265.

7582. Sams, Craig. 1991. Pioneering macrobiotics and soyfoods in England, 1967-1979 (Interview). *SoyaScan Notes*. Aug. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Craig and Greg Sams were both born in America. Their mother is from Nebraska and their father from Pittsburgh, Pennsylvania. Greg is 4 years younger than Craig. During the 1950s and 1960s the family went to England periodically, largely because Craig's father worked in England as a historian for the U.S. Air Force. In 1965 Craig took a year off from college, traveled around the Indian subcontinent, and got hepatitis. Upon returning to the Univ. of Pennsylvania in Philadelphia for his final year, he fell in with 3 followers of macrobiotics and got interested in macrobiotics. In about Feb. or March of 1966 he went to the Paradox, a macrobiotic restaurant in New York and decided that he wanted to start a similar restaurant in London. In late 1966 Craig's brother, Greg, fell out of a tree in Berkeley, was paralyzed from the waist down and was confined to a wheel chair—as he still is.

In Feb. 1967 Craig started a restaurant named the Macro at 10-A Airlie Gardens, Holland Park, London. Yoko Ono, John Lennon's wife, was one of the first regulars. She was the first person Craig met in London who was aware of macrobiotics; she had learned about it in Japan. But Craig had to close Macro after 2 months because of zoning problems. In mid-1967 Greg joined Craig in London and in Dec. 1967 they opened a new macrobiotic / natural foods restaurant named Seed at 136a Westbourne Terrace, W.2, London—a few minutes walk from Paddington Station. Soyfoods were a part of the menu. They got Kikkoman shoyu, shiro-miso, and Hatcho miso from a Japanese import company named Mikado-ya, which was run by Japanese in southeast London out of the basement of a house and supplied Japanese embassies in Europe and Africa. At that time Craig thinks there were no Japanese restaurants or retail stores in London. Seed soon started to import Hatcho and barley (mugi) miso from Muso in Japan. Seed never used any of Lima's soyfood products. Seed also used fermented tofu; they mixed it with tahini, spread it on bread, and called it a Rarebit—an alternative Welsh Rarebit, which is cheese

on toast. Seed purchased fresh tofu and [mung] bean sprouts from a Chinese company named Lung Kee on Fermoy Road, Paddington, London, right on the banks of the canal. It was run by one Chinese man who employed about 15 West Indian / Jamaican women who made the foods. Bean sprouts accounted for most of Lung Kee's business. Craig has no idea when Lung Kee started making tofu. In addition to its mainstay, brown rice, Seed served the tofu diced in miso soups, or sauteed with vegetables such as nitsuke carrots, etc., or as a dessert with tofu and apple concentrate whipped with fruit to a thick creamy consistency and chilled. The restaurant did well. It was soon famous for its "groovy vibes" and its free meal of brown rice, veggies, and green tea for those who could not afford to pay. Although the Sams brothers were not "proponents of the brown rice and marijuana regimen" (as Kotzsch had implied in 1985, p. 221), Seed was a favorite hangout for a host of '60s counterculture celebrities such as The Beatles, The Rolling Stones, Yoko Ono, and others. Americans such as Bill Tara, Peggy Taylor, Eric Utne, and Paul Petrofsky also worked there. Then people began to ask the Sams if they could buy staple foods from the restaurant. So food was soon packaged and sold over the restaurant counter.

In about March 1969, to meet the growing consumer demand, the Sams brothers opened Ceres, a natural foods / macrobiotic retail store, at 8-A All Saints Road, 2 blocks from and parallel to Portobello Road. Ceres also did extremely well, with Greg and various managers having the main responsibility while Craig focused on the restaurant. Soyfoods retailed by Ceres included Hatcho and mugi miso, tamari, fermented tofu, and fresh tofu sold in trays immersed in water. Eventually Bill Tara and Peter Bradford took over management of Ceres. Soon other people began to open restaurants and natural foods / macrobiotic stores like Ceres in college towns in England: Infinity Foods in Brighton (at Sussex University; Peter Deadman, Robin Bines, Simon Bailey were involved), Arjuna in Cambridge, Harvest in Bath, and On the Eighth Day in Manchester. In 1970 the Sams developed a large mobile tent macrobiotic restaurant and made a lot of money by taking it to various big rock festivals.

In Aug. 1970 Harmony Foods was established as a natural foods / macrobiotic import, product development, and distribution company. The money from the mobile restaurant was used to rent a building at No. 10 St. Luke's Road in London (only about 300 yards from the Ceres shop), and to import enough products to start a line / range of products under the Harmony Brand (the logo was a yin / yang sign). They stored and packed these in basement at Harmony Foods. Starting in 1969, the first imports for the restaurant and for Ceres had come from Muso in Japan, and from a macrobiotic society in Vietnam came red rice and green tea. In 1970 they started to import 4-5 tons of organically-grown brown rice from The Camargue in the

south of France. Grown by the same man who grew brown rice for Lima Foods, it became the company's main product. Harmony Foods started out with about 20 customers—16 conventional health food shops and 4 of the new wave of natural foods stores (which the natural foods stores called "grain shops"). Wholefood of Baker Street was the pioneer "organic shop" that started in the 1950s. They were part of the Soil Association, so organic growers used it as an outlet for the first organically grown produce retailed in England. They soon became an important outlet for Harmony Foods as well. In addition a man named Ivan Seruya would collect food (mostly produce) from the organic growers and deliver it to restaurants like Seed and Manna in London. One other product that was grown organically was Pimhill Flour. Harmony Foods was a pioneer in developing new organic growers (such as Stewart Patterson who farmed wheat with horses) and in putting organically grown foods into retail outlets.

By Aug. 1970 Harmony Foods was distributing soyfoods, including Hatcho miso, mugi (barley) miso, and tamari from Muso in Japan—imported in wooden kegs and packed in glass jars. These were the first miso and shoyu products available at retail outlets in England.

In Jan. 1971 Harmony Foods outgrew its building on St. Luke's Rd. and moved into a larger warehouse at 191 Latimer Road (Maidenhead), a former cosmetics factory. Just before the move, Bill Tara informed the Sams that he was in London to set up Erewhon Europe to compete with Harmony. The restaurant, Seed, was sold in the spring of 1971 and reopened as The Magic Carpet. In 1971 Ceres was renamed Ceres Grain Shop and relocated at 269 A Portobello Rd.

In mid-1972 the shop next to Ceres closed. The Sams took it over and made it into Ceres Bakery. It transformed large amounts of wheat, organically grown in England, into unique and delicious naturally leavened breads. The enzymes in the freshly-milled flour helped to leaven the bread.

When they closed down Seed, the restaurant on All Saints Road, there was still a demand for simple macrobiotic food, so in about Feb/March 1971 they opened Green Genes, a sort of macrobiotic workingman's café on a much smaller scale. Each person picked up her or her food from a counter; there was no table service. It was open for lunch only whereas Seed had been open only in the evenings.

In 1972 they began to publish a magazine titled *Seed: The Journal of Organic Living*. Bill Tara and Peter Bradford helped with it occasionally. It continued for 6 years. That same year, above Ceres Bakery, started Ceres Bookstore, which only last for 1½ years.

Meanwhile Bill Tara and Peter Bradford had expanded and transformed Ceres Grain Shop, but in a way that led to extensive shoplifting, so it was scaled back to near its original size and finally sold in 1979 to Jack Weller. By that year all efforts and resources were focused on Harmony

Foods, the wholesale business. Peanut butter (non-organic), the first product manufactured by Harmony, was now in two of the leading supermarket chains, Safeway and Waitrose. Address: 269 Portobello Road, Notting Hill, London W11 1LR, England. Phone: 071-229 7545.

7583. McSweeney, Daniel. 1991. Consumer survey 1991. *Whole Foods*. Aug. p. 34-36, 39, 41.

• **Summary:** This survey was conducted at 18 natural foods stores throughout the USA. Product purchases. Percentage of respondents who purchased a type of product at a natural foods during the past 12 months: Cheese substitute 28%, meat 34%, miso 34%, sea vegetables 33%, soy milk 51%, soy sauce 36%, tamari 52%, tempeh 33%, tofu 57%, yogurt (dairy) 64%.

7584. Oshita, Ichiko; Kanamori, H.; Mizuta, M.; Sakamoto, I. 1991. Shôyu-chû no hen'i gen kassei o yûsuru beta-karuborin yûdôtai [A mutagenic β -carboline derivative in soy sauce]. *Shokuhin Eiseigaku Zasshi (J. of the Food Hygienic Society of Japan)* 32(4):272-77. Aug. [17 ref. Jap; eng]

• **Summary:** "A yellow substance (YS) isolated for the first time from soy sauce by HPLC showed weak mutagenicity in *Salmonella* TA 100 without S9 mix. The mutagenicity of the YS increased 7.5 times (His⁺ revertants / μ g/plate) after treatment with sodium nitrite.

"The YS was identified as 1-(5-hydroxymethyl 2-furyl)-9H-pyrido [3, 4-b] indole (1-hydroxymethyl -furyl-Beta-carboline) by MS, ¹H-NMR and ¹³C-NMR. The survey showed that the concentration of YS in Koikuchi soy sauce (regular fermented) was 2.0 μ g/ml. The semi-fermented Koikuchi soy sauce and the soy sauce supplemented with amino acid had 0.79 μ g/ml and 0.38 μ g/ml, respectively. The amount of YS in three kinds of soy sauce increased two fold by heating (120°C, 20 min). The concentration of YS in soy sauce might serve as a good quality indicator for soy sauce." Address: 1. Hiroshima Chuo Women's Junior College, 3-1-15, Gion, Asaminami-ku; 2-4. Hiroshima Prefectural Inst. of Public Health, 1-5-70 Ujinkanda, Minami-ku. Both: Hiroshima, Japan.

7585. Pickarski, Ron. 1991. Friendly foods: Gourmet vegetarian cuisine. Berkeley, California: Ten Speed Press. 277 p. Illust. Index. 23 cm. [23 ref]

• **Summary:** This is a stylish vegan cookbook, with a wealth of sophisticated and delectable soyfoods recipes. The author recommends only high-quality ingredients. Brother Ron grew up in Michigan and during high school spent time in the restaurant business flipping hamburgers. Later he became a Franciscan monk (OFM). A look at his own health revealed the need to change his diet. So Brother Ron changed to a natural vegetarian diet and experienced weight loss and renewed energy. Now he considers himself a food missionary—helping people transform their lives

through food. Friendly foods are "foods that are friendly to our bodies, our pocket books, our busy schedules, and our environment."

In the section on dairy-like products, the author recommends soy milk and some "tofu ice creams." He recommends use of soy cheeses sparingly since they are high in fats (especially the softer types). He considers nondairy creamers to be a less healthful than their dairy counterparts, since they are high in saturated fats and artificial additives. "Typically, nondairy creamers contain corn syrup solids, partially hydrogenated vegetable oil (including coconut oil, cottonseed oil, palm oil, or palm kernel oil), sodium caseinate, sodium phosphates, mono- and diglycerides, sodium silico aluminate, and artificial color. I do not consider this type of product to be an example of a high-quality food."

Soy-related recipes include: Marinated vegetables with marinated tofu (p. 41). Shish kebabs (with marinated tofu, p. 42). Marinated tofu with scallions (p. 43). Gefilte tofu with horseradish and charoset sauce (p. 49-50). Zucchini bisque (with tofu, p. 66). Tofu wakame salad (p. 82). Tofu cottage cheese (p. 89). Vegan sour cream (with soy milk, p. 90). Soy mayonnaise (with tofu, p. 90). Silken tofu mayonnaise (p. 91). Lemon cream dressing (with tofu, p. 92). Oil-less miso dressing (with soy milk and white miso, p. 96).

In the chapter on entrees, there are detailed descriptions of tofu, tempeh, and seitan. Soysage (with cooked soybeans and soymilk, p. 105). "Meatballs" (with cooked soybeans, p. 107). American loaf (with silken tofu, p. 112-13). Tofu spinach pie (p. 120). Auberge Hanfield pie (with silken tofu, p. 121). Russian vegetable pie (with silken tofu and tofu cottage or ricotta cheese, p. 122). Greek moussaka (with tofu topping, p. 128-9). Sweet and sour tempeh (p. 133). Southern fried tofu (p. 134). Tofu Swiss steak (p. 135). Tempeh stew (p. 136). Thanksgiving day tofu (p. 137). Tofu Jamaican run down stew (p. 138). Tofu paneer (p. 139). Seitan (p. 140-43). Seitan à la Normandie (p. 144). New England boiled dinner (with tofu or seitan, p. 145). Seitan Parmesan (with vegan cheese made with tofu, p. 147-48). San Francisco stir-fry (with seitan or tofu, p. 151). Berner platte (with protein accompaniments made with tofu and Soysage, p. 155-56). Vegan Béarnaise sauce (with silken tofu, p. 161). Miso sauce (p. 164-65). Tahini lemon sauce (with silken tofu, p. 165). Steamed kale with lemon miso sauce (p. 176).

In the dessert section, there is mention to tofu chocolate as an alternative to chocolate. Carob cake (with tofu chocolate, p. 217). Chocolate cream couscous cake (with filling made with silken tofu, p. 220). Silken tofu chocolate "cheesecake" (p. 221). Key lime shamrock torte (with silken tofu, p. 222). Raspberry sabayon sauce (with silken tofu, p. 232). Tofu chocolate "buttercream" icing (p. 234). Tofu chocolate ganache (p. 234-35). Mocha grain coffee (with any grain coffee substitute, cocoa, brown rice syrup, and soy milk, p. 238). Christmas soy nog (with soy milk and lecithin granules, p. 238).

The last section of the book, titled “The Culinary Olympics,” gives recipes that Brother Ron prepared while competing in these Olympics, starting in 1978. These Olympics are held every four years at Frankfurt, Germany, by the International Cooks Society. The American Culinary Federation is the U.S. organization that promotes the competition. “In 1978 I won a gold medal in the national competition, which qualified me to compete in the 1980 Culinary Olympics. In 1980 I founded the American natural foods team and, with this team, international competition to gain widespread competition for vegetarian cuisine. In that year, I became the first professional vegetarian chef to compete in the Olympics and win a medal for totally vegetarian foods. I also competed in 1984 and 1988... My team won bronze and silver medals in all three years that we entered the competition.” Soy-related recipes dominate this section, and include: Baked tofu pâtés (spinach, tarragon, or carrot, p. 241-42; won a bronze medal in 1984). Tofu and sea vegetable quenelles (beet, spinach, or carrot, p. 243-45; won a silver medal in 1988). New York cima roll (with tofu, p. 248-49; won a silver medal in 1988). Tofu seitan Wellington (p. 250-51; won a bronze medal in 1984). Vegan London broil (with seitan, miso, and tamari, p. 251-52; won a bronze medal in 1984). Southern blackened tempeh with tomato-apricot-ginger coulis (p. 253-54; won a silver medal in 1988). Carrot cream in squash shell (with soy milk and tofu, p. 255-56; won a silver medal in 1988). Chocolate squash confection (with Tofu Chocolate Ganache, p. 259-60; won a silver medal in 1988). Address: O.F.M., St. Anthony’s Shrine.

7587. *SoyaScan Notes*. 1991. The concepts of alkaline (*arukari-sei*) and acidic (*sansei*) foods in Japan (Overview). Sept. 20. Compiled by William Shurtleff of Soyfoods Center.
• **Summary:** It is common knowledge among most typical Japanese that foods can generally be classified along a continuum that ranges from alkaline at one end to neutral (*chusei*) in the middle, to acidic at the other end. Alkaline foods (those with an alkaline ash) are generally considered to promote and protect health. It is widely believed that one should try to keep one’s blood a little on the alkaline side of neutral. According to E.C. Grey’s *The Food of Japan*

(League of Nations, 1928) and *Inshoku Jiten (Encyclopedia of food and drink)*; Motoyama 1958; see *arukari*) and to discussions with numerous Japanese, well-known alkaline foods are as follows. Each food is followed by an “alkaline value” in parentheses taken from Grey (1928, p. 56-111; the “alkalinity is due to lime and magnesia”): sea vegetables including kombu (88.9), wakame (55.8), nori (35.3); black soybeans (40.2), yellow soybeans (38.1), soyfoods (and Soyfoods Center) including yuba (25.6), kinako roasted soy flour (25.2), Hamana natto (Hamanatto 24.8), natto (19.3), green soybeans (ao-daizu, dry; 17.8), Misozuke (vegetables preserved in miso, 16.3), shoyu (14.3); red miso (11.5), okara (9.0), white miso (8.1), edamamé (green vegetable soybeans, 5.8), aburage deep-fried tofu pouched (6.7), soymilk (3.8), tofu (1.1), shiitake mushrooms (41.0), azuki beans (27.0), umeboshi salt plums (3.1), dried fruits including dried fig (46.8), dried persimmon (21.3), raisins (15.3), cheese (18.0), most fresh fruits including yuzu (citron, 11.7), buckwheat (7.0), fig (6.3), lemon (5.9), banana (4.6), mikan (mandarin orange, 4.0); root vegetables including potatoes (13.9), tororo imo (11.5), daikon radish (5.0); most green vegetables such as komatsuna cabbage (11.3), or daikon leaves (10.9), pickled vegetables such as takuan (14.6). Alkaline beverages or liquids include tea, coffee, dairy milk (2.6), condensed milk (8.0), powdered milk (26.6), grape wines, and vinegar.

Acidic foods, which the Japanese believe should be used in moderation, include: white sugar (0), mizuame [rice syrup] (0), chocolate (3.0) and other sweet foods, eggs (2.8), flesh foods including chicken (5.2), pork (5.2), beef (5.1), fresh fish (avg. 5.3), alcoholic beverages including amazake (0), beer (0), sake (0); animal fats including butter (1.6), margarine (0.9).

Many Japanese find that acidic foods, when consumed in excess, give them acid indigestion. Neutral foods include rice (0.5-2.9), wheat (3.5-6.6), barley (2.7-4.6), and wheat gluten (1.0).

Note that this classification system is unrelated to the yin-yang continuum used by macrobiotics; most Japanese are unaware of macrobiotics. The latter, for example, considers meat to be yang (alkaline), whereas wines, fruits, and milk are yin (acidic).

7588. Lydon, Sandy. 1991. How to do research on Japanese and Chinese agriculture in California (Interview). *SoyaScan Notes*. Sept. 25. Conducted by William Shurtleff of Soyfoods Center. [5 ref]

• **Summary:** Sandy has done extensive research on the Chinese and Japanese in 3 counties in and around Monterey County. He has read every newspaper on the subject since the earliest times and keyed the important information into his bibliographic database. Most Asian immigrants began, in about the 1870s, as field laborers, then became contract workers, then lease holders. In the typical 5-year reclamation lease, they would find a landowner would had land that

needed to be cleared, take 4 years to clear it, then farm it the 5th year. The owners never renewed the leases.

The best researcher on Chinese agriculture in California is Sucheng Chan, who is now chair of the Asian-American Studies Dept. at the University of Santa Barbara. She traveled all over California, living out of her car, visiting county seats and examining documents, such as assessors records, lease books, poll taxes, etc. to try to reconstruct a more accurate picture of the early Chinese in California. All is contained in her 1986 book *This Bittersweet Soil*.

Another good researcher is Peter C.Y. Leung at the Univ. of California at Davis, Asian-American Studies Dept. His field is the Chinese in the Sacramento Valley. He has written about Locke, near Walnut Grove.

Another group are the archaeologists at the University of Idaho at Moscow, probably in the Archaeology or Anthropology Dept. Most are white and have relatively little knowledge of Asian-American culture. They do digs and produce lots of printed reports, detailing discoveries of things such as shoyu containers. They try to reconstruct the early history in this way. They have an archaeological clearinghouse and museum.

Paul Chace at the Univ. of California at Riverside is interested in this Asian-American archaeology viewpoint, and he knows the researchers well. He is at 1823 Kenora Dr., Escondido, California 92027. Phone: 619-743-8609.

Very important, influential, and wealthy is the Japanese-American National Museum in Japan Town, Los Angeles. They have a scholarly advisory committee and have raised about \$10 million during the last year. Akemi Kikumura, curator of their whole collection, is a great lady and very knowledgeable. The museum has a great collection of interviews with early Japanese-Americans.

Nearby is the UCLA Japanese-American Collection, which is vast but not well organized. In about the 1970s, they sent people all over California to do interviews with first-generation Japanese immigrants. They have a newsletter and many exhibits. Address: History Dep., Cabrillo College, Aptos, California 95003. Phone: 408-479-6223.

7589. Gerner, Bob. 1991. The origins and early history of Westbrae Natural Foods in California, through December 1971 (Interview). *SoyaScan Notes*. Sept. 29 and Oct. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Westbrae started as a natural foods distribution company in July 1970 before it opened a retail store. Bob Gerner worked as the manager of the coffee house at the University of California at Davis. They had their own baker (a woman), and they baked everything from scratch. She was interested in natural foods, and Bob was starting to get interested. Occasionally he would visit the Sacramento Real Food Company (1500 Q St., Sacramento). Bob's girlfriend, Kristin Brun, who lived in the Santa Cruz mountains, taught Bob how to make granola and bread. So the people at the

coffee house at Davis started make and serve granola there. At one point, Bob got so interested in natural foods that he decided he wanted to go into the new field. The baker was also interested, so they decided to open a store, even though they had no money. Bob quit his job as manager of the coffee house but stayed on as a cook. He met four other couples who planned to open natural foods retail stores, so they joined together.

In May 1970 the ten partners (none of whom had any money) opened the Natural Food Works on Olive Drive in Sacramento. (It still exists, though on G Street.) The store opened during final exams of Bob's senior year, so he skipped his last 3 finals and never graduated. Bob was chosen to be manager, since he was the only partner with any business experience. One of the store's main products was granola, which Bob made at night on the stove in the coffee house at Cal Davis (on the sly, from midnight until 6 o'clock in the morning).

Buying the ingredients for granola in bulk and merchandise for the store from suppliers involved a lengthy truck route. Since Bob was manager of the store and no one else wanted to do the route, Bob was elected. He drove a truck weekly to the San Francisco area and bought rolled oats from The Food Mill in Oakland, cashew nuts from Hirschfelder in San Francisco, 2 barrels of honey from Les Garabaldi (a bee-keeper in Canyon), miso and soy sauce from Chico-San in Chico, apple juice from Heinke's in Paradise. Then he stored all the ingredients in his room that he rented in a farmhouse in Dixon, a farm community near Davis. He weighed and bagged the ingredients in his room.

One of the partners suggested that they start a small farm or garden. So on a ½-1-acre plot behind a church he planted an organic garden and grew vegetables for the store. But the store couldn't sell them all, so Bob decided to try to distribute them and granola to other young natural food stores in Berkeley.

In late June 1970 Bob attended the founding meeting of Organic Merchants (OM), held outdoors on the side of Mt. Shasta. OM was the first trade association for natural food retailers on the West Coast and the first organic trade association.

In July 1970 Bob started distributing granola, fresh vegetables, and Heinke's apple juice in the company truck. He delivered these foods to various natural food retail stores in Berkeley: Wholly Foods (2999 Shattuck Ave. at Ashby), Good Natured Foods (on Solano), the Granary (and a macrobiotic retail food store on Shattuck near Vine), and Ma Revolution (on Telegraph).

Soon his granola ingredients and other items were added to his line (these were his sole worldly possessions): 2,000 lb dried organic pears (dried on a farmer's lot while camping out in the Santa Cruz mountains), fresh apples, fresh tomatoes, etc. Later, when Bob got too busy, Heinke's delivered their juice to his sister Margaret's house in El

Sobranter, and he used her house as a juice warehouse.

Originally the distribution company had no name; it was Bob Gerner doing business as Bob Gerner with no business license. It was strictly cash and carry.

Some of the training in how to run the store was provided by Fred Rohé of New Age Natural Foods in San Francisco in early 1970. One of the partners went to work at Rohé's store, where he learned many of the basics, such as how to stock shelves, mark-up prices, etc. Fred ran this free training program, which took several days, for anyone who wanted to open a natural food store.

After a few hectic weeks as manager of this unwieldy, undercapitalized 10-person partnership, Bob decided to quit. He could see it wouldn't work. But he still kept working for them until someone else volunteered to do the truck run free of charge.

Being out of a job, Bob decided to start a new natural foods company with a smaller number of closer friends—though he still had no money. Bob's sister (Margaret), and his brother-in-law (Bob Ortiz) got together and founded the new company. Kristin was not interested in becoming a partner at that time. Bob found a truck. Ortiz, who was a teacher and a mechanic, retired as a teacher getting \$500 from his pension fund, bought the truck for \$100, and became the truck driver. Originally the company was run out of Margaret and Bob Ortiz's home. While looking for a warehouse and granola factory, the 3 partners found a vacant market (originally a small Safeway supermarket, more recently a market with a Chinese tenant, but it had had no tenant for 18 months) at 1336 Gilman St. in Berkeley. They signed the lease on 10 Aug. 1970. But the building was zoned for a retail store, so they opened a retail store in the first 12 feet of the building, and used the other 80% for a kitchen and warehouse for their wholesale business. The company still had no name, and in fact it did not have enough money to take down the sign on the building that said "Westbrae." So, what the heck, they decided to call the company "Westbrae Natural Foods." On 2 Feb. 1971 the store opened for business and got a business license.

Companies that began distributing natural foods in northern California before or at about the same time as Bob Gerner were Landstrom and K&L (Kahan & Lessin; both big, old-line distributors of health foods and supplements, from Los Angeles, started in the 1930s), The Food Mill in Oakland (1930s), Chico-San in Chico (about 1965; Bob bought their Spiral Foods soy sauce and miso in bulk wooden tubs from the Osoba Noodle Nook Restaurant [2505 Hearst in Berkeley] and from a garage in San Francisco), and New-Age Natural Foods in San Francisco (Fred Rohé; he started retailing in 1965-67, then began distributing in the early 1970s). Bob recalls that he would go to New-Age Natural Foods, buy many bulk staples such as 50-pound sacks of whole grains (wheat or rye berries) and beans from Arrowhead Mills. Rohé sold these to Bob and others like

him from his retail store at wholesale prices. Westbrae had a flour mill to grind its own fresh flour. By about early 1971 Fred opened a separate natural foods wholesale facility (named New Age Distributing) in San Jose. At first they wholesaled only produce. Then they branched out into dry goods, working with Dennis Morgan. The company changed its name to The Well in about 1972-73, then later it was renamed Pure and Simple. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

7590. Gerner, Bob. 1991. More early history of Westbrae Natural Foods in California, 1972 to 1980 (Interview). *SoyaScan Notes*. Sept. 29 and Oct. 1. And 11 May 1992. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Gordon Bennett arrived in 1972. He started as a customer, then began work as a janitor, then became a partner. At that time Bob Ortiz was asked to leave. The first year in business, Westbrae made only \$7,000 profit before any wages were paid to the three partners. Profits were plowed back into the business. Bob lived in the store to save money.

In 1972-73 Westbrae rented a small separate warehouse several blocks away at 1340 San Pablo Ave. They also rented a rat-infested bakery on East 14th St. in Oakland. There they baked granola and bread; Ganesh (Ganesha) was their bread baker and delivery man. In the late fall of 1973, after less than a year on San Pablo Ave., they moved into a much larger warehouse nearby at 1224 10th Street and incorporated the company. At that time Westbrae began importing traditional, natural foods from Japan. They imported soy sauce in bulk and bottled it at their 10th street facility. Also at that time, Bob transferred all his past company records to the corporation. Bob Gerner owned 28% of the stock, Margaret and Kristin (who had now joined) owned 24% each. Three employees owned stock: Gordon Bennett owned 18%, and Jerry Heverly and Rick Lewis each owned 3% each. The company formed an AESOP (accelerated employee stock ownership plan); the goal was for everyone who had worked for the company for a given time to own shares. As soon as Westbrae formed the corporation and the AESOP, there was constant fighting. They spent more time fighting about ownership than running the business. Prior to incorporation, Bob had made most of the decisions himself; afterwards, though president, he ran the company by committee, and felt that the board should make all the major decisions. This was crazy and rendered Bob ineffective, but he felt he no longer owned the company. Also, he didn't realize that Gordon's main goal was to become the head of the company.

From Feb. 28 to March 2, 1974, Bob traveled throughout Japan, with William Shurtleff as his guide, looking at potential suppliers.

At that time Westbrae had financial problems. They hired Stewart Emery to conduct a self-realization seminar

for all the employees in the mountains to give more focus. Before the seminar, the owners had a meeting in which they shared frank feelings about one another—who was effective and who wasn't, how the company was going, etc. Rick Lewis got voted off the board of directors and Gordon Bennett became general manager, replacing Bob Gerner, who was demoted to chairman and president. Stewart Emery later said that the seminar was his only failure. Rick Lewis was asked to work in the retail store as a clerk; he used that as a base to organize a union. On 22 Dec. 1975 the production employees formed a union, named the Alternative Food Workers Alliance. Westbrae was stuck with a union until Gordon Bennett sold the company to Vestro. At one point they may have joined the teamsters union.

Bob and Gordon had an ongoing struggle. In July 1976 Bob left Westbrae (although he was still president) and bought the retail store (Westbrae Natural Foods) back from the company at a very good price. It had been losing money, the company couldn't sell it (in part because it was unionized), and Gordon wanted to just shut it down. Bob closed it for 3 months, remodeled it, then opened it again in late November as Gilman Street Gourmet: Natural Foods & Delicatessen. Shortly thereafter, Westbrae moved its warehouse from 10th Street in Berkeley to Emeryville because the company needed more space and the rent was much better. Bob was disappointed with the move because the 10th Street warehouse had been just a few blocks from his Gilman Street Gourmet.

In about 1977 Bob, Gordon, Margaret Ortiz and Kristin Brun got together for two sessions at Kristin's house, to discuss and have recorded the early history of Westbrae; a woman whom Kristin found apparently wrote down that history. Kristin now lives in Richmond Annex with Marty Roth, and probably has lots of early Westbrae documents and photos. In July 1977 the Oakland Tribune, then the San Francisco Chronicle each did nice articles about Westbrae. In September 1977, Westbrae Natural Foods moved its warehouse and offices from Berkeley into a much larger building at 4240 Hollis St., Emeryville, California 94608.

Gordon was a good manager, but in 1976, at the time Bob Gerner left, he and Bob were each earning only \$800/month. Gordon began to push for higher salaries, so he called in Lloyd Dubroff and Bruce Handler who ran a seminar called POEM (Plan, Organize, Execute, and Manage). Bob hired them as consultants at the retail store, then they served as mediators on a conflict between Gordon and Bob over pay levels. They tripled Gordon's salary to \$52,000 a year and he liked them instantly. Gordon hired them as consultants on a continuing basis, then he decided they should be on the board. Kristin Brun got voted off the board and they got voted on. In March or April 1979 Gordon announced at a board meeting that he was going to take a sabbatical starting in 6 months and that he didn't want to run the company any more. The board members said "We think you should leave

now," so they voted him off the board—much to Gordon's surprise. The board made Lloyd Dubroff the general manager and chief operating officer, and Bruce Handler became CEO. At that point Bob ceased to be president of Westbrae, but he still owned the controlling share of stock—which he continued to own until 1985.

Dubroff and Handler's first move was to draft a budget and get the financial statements up to date. The financials showed that the company was doing very well. Westbrae had just opened a warehouse in the City of Bell (4841 Eastern Ave.) near Los Angeles (named Westbrae South), so Dubroff and Handler bought Celestial Natural Foods, a wholesale company run by Carter Allen on the docks in Oahu, Hawaii that Gordon had been pursuing and that had been a major customer of Westbrae's. Soon they began to increase inventories to 98% in stock, but they suddenly found that they were unable to pay the bills. The comptroller had made serious errors in the financial records, and Westbrae was almost bankrupt. The companies in Hawaii and Los Angeles were both losing large amounts of money, Bob Gerner returned to the company and began fending off angry suppliers and getting permission to string put payments. It was a very stressful time for Bob as he struggled to keep the company he had founded out of bankruptcy.

In Dec. 1979 or 1 Jan. 1980 the board invited Gordon Bennett back in as general manager. Gordon saved Westbrae. He transformed the company from an importer-distributor to an importer-manufacturer. He closed down the operations in Hawaii and Los Angeles, and sold off Westbrae's distribution rights in northern California—at a pretty good price. He also reduced the number of employees. Westbrae's top money-making products were now imported soy sauce (they imported it in drums and bottled it in Berkeley), and tamari-roasted nuts. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

7591. Gray, Sylvia Ruth. 1991. Re: Vitamin B-12. Letter to William Shurtleff at Soyfoods Center, Sept. 29. 2 p. typed. Typed, with signature.

• **Summary:** Sylvia initiated the vitamin B-12 project in 1988 after reading various scientific studies showing low levels of B-12 in common macrobiotic and vegetarian foods. "At present, more than fifty vitamin B-12 food assays have been completed on 12 vegetarian cobalamin sources and 12 animal product sources. Seven cobalt assays have also been completed. A very recent assay on the brain of range fed/finished beef showed vitamin B-12 content of 1/46th of previously norms for this organ." Assays cost \$85 each.

"In my estimate, the concentration of toxic and/or antinutritive factors in all beans and bean products (with the exception of very aged products such as miso and shoyu) renders them 'iffy+' for daily use." A color photo of Sylvia, her youngest daughter, and two granddaughters is enclosed.

Address: Strictly Macrobiotics and The Vitamin B-12 Project, 315 First Ave., Salt Lake City, Utah 84103. Phone: 801-521-7936.

7592. Bates, Dorothy R. 1991. *The TVP cookbook: Using the quick-cooking meat substitute*. Summertown, Tennessee: The Book Publishing Co. 96 p. Illust. Index. Sept. 22 cm.
• Summary: Contents: Introduction. Nutritional information. Ingredients. Breakfast. Appetizers. Soups. Sandwiches. Main dishes. Desert.

This vegan cookbook is devoted exclusively to TVP, which is quick and easy to prepare, and has all the healthful qualities of other soyfoods—but without the fat. TVP (which stands for “textured vegetable protein”) is a registered trademark of the Archer Daniels Midland Company, Decatur, Illinois. TVP comes in two textures: small granules and larger chunks. Note: The publisher got ADM’s permission to use the TVP trademark, and ADM is now very excited with the book. Address: Summertown, Tennessee.

7593. Nishimoto, Miyoko. 1991. *The now and Zen epicure: Gourmet cuisine for the enlightened palate*. Summertown, Tennessee: The Book Publishing Co. 250 p. Color photos. Index. 24 x 21 cm.

• Summary: This is a gorgeous, delightful vegan cookbook (though it uses honey), loaded with color photos. Most recipes, designed for entertaining, embody an atmosphere of elegance with a sense of fun, capturing the best of traditional European cuisine, offering gourmet recipes with an element of Japanese style, simplicity, and flavor. Each recipe is accompanied by a nutritional analysis, and most are remarkably low in fat.

The author is founder and owner of the Now & Zen Bakery (1838 Golden Gate Ave., San Francisco, CA 94115) which is well known for its tofu cheesecakes and other delights, and which sells dried okara. She is also a jazz vocalist and vegetarian chef. Born in Japan to a Japanese mother and an American father, she moved to Mill Valley, California, with her parents when she was age 7 and became a vegetarian at age 12. A photo on the rear cover shows Miyoko Nishimoto. She shows great virtuosity in the use of soyfoods—and wheat gluten. The section on ingredients contains excellent, detailed information on miso, nut milks and creams (almond milk and cashew milk, which the author prefers for some uses to soymilk), agar, okara, soy milk and soy cream, soy sauce, soy sour cream, soy yogurt, tamari, tempeh, tofu, frozen tofu, and pressed tofu.

Soy-related recipes include: Tofu “cheese” (p. 32). Tofu “boursin” or herb-garlic cheese ball (p. 33). Tofu “feta” cheese (p. 35). Tofu cream cheese spread with herbs (p. 36). Eggplant and tofu pâté (p. 51). Smoked tofu, mushroom, and garlic canapés (p. 53). Tofu “mornay” sauce (p. 65). Tofu aioli (p. 82). An introduction to quick and tasty tofu cream soups is given on p. 108. Each of the following cream soups

contain tofu. Cream of pumpkin soup (p. 109). Cream of corn soup (p. 110). Cream of green pea soup (p. 111).

Mediterranean eggplant and tofu gratin (p. 115). Tofu burgers suprême (p. 118). Creamy tempeh curry (p. 119). Tempeh mexicali (p. 121). Sweet and sour tofu (p. 122-23). Whole cabbage with hearty tempeh stuffing (p. 124-25). Herbed soybean casserole or stew (p. 132). Savory tempeh and vegetable stew (p. 134-35). Tofu bourguignon (p. 138-39). Homemade tofu pasta (p. 142-43). Ginger tempeh with green peppers (p. 145). Homemade gluten, Tempeh and gluten burgers, and the Great gluten turkey with dressing (p. 150-160). Tempura tofu (p. 163). Marinated tofu (p. 164). Smoky marinated tofu (p. 165). Believable bacon (with tofu, p. 166). Beans and “bacon” casserole (with tofu, p. 167). Orange-soy dressing (p. 177). Tofu sour cream (p. 179). Tofu mayonnaise (p. 180). Tofu thousand island dressing (p. 182). Tropical coconut banana ice cream or sauce (with tofu, p. 212). A different pumpkin ice cream (with tofu, p. 213). Italian cheese-less cake (with tofu, p. 216). Cashew cheesecake (with tofu, p. 217). Tofu crème (p. 218).

For a lengthy and very positive review of this book by Carol Flinders, see *Vegetarian Times* Nov. 1991, p. 86-87. Address: San Francisco, California.

7594. Kennedy, J. Robert. 1991. *History of Chico-San’s distribution and import operations* (Interview). *SoyaScan Notes*. Oct. 3. Conducted by William Shurtleff of Soyfoods Center.

• Summary: Chico-San never really developed its own distribution company. It used other established distributors, such as Balanced Foods in New Jersey, K&L (Kahan & Lessin) in Los Angeles, Landstrom in San Francisco, and Health Foods Incorporated in Chicago. “We had a tough time getting started in selling macrobiotic foods. Chico-San also sold a lot of macrobiotic foods through its mail-order service because most of the large distributors only wanted the best-selling items such as rice cakes, soy sauce, and sesame salt; they wouldn’t take the complete macrobiotic line.” In late 1962, shortly after the company was established, Chico-San got a few vans and began a few small routes down to the San Francisco Bay Area and as far north as Redding, distributing 2 types of whole-grain bread (a rice loaf and an unleavened whole-wheat bread) and gluten-nut crackers to the Berkeley Co-op and established (old-line) health food stores. The Berkeley Co-op was one of the first to carry the full line of macrobiotic products. These routes continued until about 1964-65.

Chico-San’s first really successful product was rice cakes. They were introduced in 1963 but initially the big distributors showed no interest. That changed starting in about 1964 when a new generation of rice cake machines began to make a better product and a few of the big distributors started to carry them. By 1965 Chico-San’s rice cakes and other popular products were being sold at more

than 150 California outlets. It was the national popularity of the rice cakes that kept Chico-San from developing its own distribution company, and relying instead on large established distributors—and later brokers.

By about 1966-1967 rice cakes and rice chips (*senbei*) were beginning to cut a wedge into the mass market nationwide, so Chico-San created the Spiral Foods brand for these mainstream products, keeping the Chico-San brand for the health food market.

Concerning imports of miso and soy sauce from Japan, Chico-San first imported directly from George Ohsawa; he located the manufacturer, put the order together, and shipped it himself. Then came Nippon C.I., which was started by George and some of his disciples in Tokyo, but it didn't last very long. In 1966 Chico-San started importing from Muso Shokuhin in Osaka. But after Muso started selling a lot to Erewhon (which became a major competitor for Chico-San), Bob felt that product quality began to decline, so he began to do all his importing from Ohsawa Japan, a company that was developed by George's sister-in-law (Lima Ohsawa's sister), Flora Tanaka, at George's request. Bob felt the quality of products from Ohsawa Japan was better than from Muso, but the prices were higher and the company was not quite as professional in its business dealings.

Concerning the sale of Chico-San to Heinz, Bob is overall not very happy with the outcome. Granted, rice cakes are now much more widely known and sold in supermarkets, but the loss of Chico-San "put a big hole in the process of selling macrobiotic foods." Bob and Herman Aihara bought back the macrobiotic line from Heinz and created Ohsawa America in Chico to try to sell it. Early general managers were Marty Roth, then Lane Seiger (who had previously worked for Bob at Chico-San). But the volume was not there on relatively few products to sustain a company profitably and eventually the company ran up debts of \$300,000. At that point Bob basically gave the company to Sierra Natural Foods in Brisbane, California. Sierra had several thousand products; they only paid for the inventory. Bob is now working to develop new products from rice—such as a rice-crust pizza and crackers. Address: Chico, California. Phone: 916-891-0970.

7595. Gilbert, Linda C.; Starr, Sara M. 1991. Natural foods companies broaden their horizons: Organic, vegetarian, convenience dominate industry. *Food Business* 4(20):44. Oct. 21.

• **Summary:** Discusses these three industry trends, plus San-J International, White Wave, and Lightlife Foods.

San-J will be introducing its OCIA organic certified tamari gold label in November. The 10-ounce product will sell for the same price as its non-organic counterpart. "While the majority of White Wave's \$3 million sales still come from tofu, tempeh products reportedly are not far behind. The company says it is growing at about 30 percent annually,

and its first and second generation tempeh products are achieving more than 100 percent growth. White Wave's latest offering is a soy yogurt product called Dairyless that is made with live active yogurt cultures, including acidophilus and bifidus. Lightlife Foods, another major soy foods company, has redesigned its logo and added two new products, a vegetarian chili and a sloppy joe mix, both made with tempeh." Address: 1. President; 2. Vice president. Both: HealthFocus Inc., Emmaus, Pennsylvania. Phone: (215) 967-2233.

7596. Fukushima, Danji; Motai, Hiroshi. 1991. Antimicrobial activities of soy sauce and manufacturing of preservative-free low-salt soy sauce including productions through bioreactor systems. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 113-20. [17 ref]

• **Summary:** Soy sauce is generally very resistant to the growth of microorganisms because of its high salt content (16.9% w/v for regular koikuchi shoyu). Nevertheless, a special microorganism such as *Zygosaccharomyces rouxii*, can grow atop soy sauce even under these circumstances. Therefore preservatives such as sodium benzoate or n-butyl-p-hydroxybenzoate have been used. However consumers now want soy sauce without preservatives and with reduced salt. Soy sauce containing either 9% or 13% salt is now available.

As the salt content of shoyu increases, the water activity decreases. Most microorganisms cannot grow when the water activity is below 0.9 which corresponds to a 14% salt solution. Soy sauce naturally contains two microbicidal (antimicrobial) substances: Alcohol (typically 2.5%) and organic acids (such as lactic, acetic, and citric acids).

"There are two basic methods for preparing preservative-free low-salt fermented soy which are quite different. One is prepared by removing some quantities of salt from ordinarily made soy sauce (method A). The other is produced by adjusting the salt content by the addition of water to specially made low-salt high-nitrogen soy sauce (method B)."

"Most of the genen-shoyu on the Japanese market are prepared by electrodialysis through ion exchange membranes by the method A described above. The consumption of genen-shoyu is grown steadily on the today's Japanese market and the production is estimated to be about 1% of total soy sauce consumption (Hirose, 1989). Usujio-shoyu is mainly produced by the method B and the total production marked by JAS was 15,345 kl in 1988." Address: Kikkoman Corp., 1-25 Kanda Nishiki-cho, Chiyoda-ku, Tokyo 101, Japan.

7597. Matsuura, M.; Obata, A.; Fukushima, D. 1991. Long-life packed tofu in the United States. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on

Soybean Processing and Utilization. 130 p. See p. 37-40. [12 ref]

Address: Food Research Lab., Kikkoman Corp., Noda City, Japan.

7598. Product Name: [Tofu, Tofu Mayonnaise, Hot Squash Pies with Miso-Tofu Topping, Tofu Tart (with Cocoa or Carob), Tofu Salad with Tahini, Vegetarian Spring Rolls (Filled with Rice, Tofu & Soy Sprouts), Seitan].

Foreign Name: Tofou, Tourte au Giraumon (Nappage Miso, Tofou et Umé), Tarte au Tofou (cacao-pays, ou fruits de saison), Salade de Tofou (Tofou, crème de Sésame, tamari, aromates), Nems, Seitan.

Manufacturer's Name: Pascal Pinault.

Manufacturer's Address: "Caplet," 97226 Morne Vert, Martinique, French West Indies 0033. Phone: +59 6 55 56 57.

Date of Introduction: 1991. October.

New Product–Documentation: Talk with Pascal's sister, Marie, who calls from Orange County, California, to enquire about a source of tempeh starter for Pascal. 1993. March 17. Pascal has been very involved with soyfoods for many years. He has been making tofu and tofu products out of his home in Martinique for several years; he sells these mostly to restaurants. He would like to start making tempeh.

Letter, price list, and resume sent by Pascal Pinault at the above address. 1993. April 2. In Martinique he has been making an average of 12 to 20 pounds of tofu every week since Oct. 1991. His business has no formal name. He uses most of the tofu he makes to produce second generation products such as tofu mayonnaise, hot squash pies with miso-tofu topping, tofu & cocoa (or carob) sweet pie, tofu salad, spring rolls (*Nems*). For details see entry for the letter.

Note: This is the earliest known commercial soy product made in Martinique or any French Overseas Department.

7599. Product Name: [Seitan].

Foreign Name: Seitan.

Manufacturer's Name: Pascal Pinault.

Manufacturer's Address: "Caplet," 97226 Morne Vert, Martinique, French West Indies 0033. Phone: +59 6 55 56 57.

Date of Introduction: 1991. October.

New Product–Documentation: Letter from Pascal Pinault. 1993. April 27. "I first started to make seitan in Martinique under the same circumstances as tofu—lack of vegetable proteins other than beans. Not having ready-made gluten, I first made it by washing white-flour wheat dough. That was a very long and messy process but was well worth it. Then I found wheat gluten in the Tama catalogue—the company I mentioned that specializes in imported Japanese food products. That's when I started to [make and] sell seitan—though there is not much demand for it. My product was of good quality, cooked with ginger, Sakae-Johsen shoyu, and

Hokkaido kombu-dashi! I learned to make seitan while living in the Catskill mountains of New York from a macrobiotic British girl friend who also taught me how to make amazake." For background details see letter from Pinault, April 1993.

Letter from Pascal Pinault. 1993. July 7. "I first made seitan, in Martinique, in 1989, from regular white flour. I started selling it in October 1991, but I was, by then, making it from dry wheat gluten. Because I am making it only on order (usually phone call), I am packaging it in a regular medium size plastic freezer bag. Customers know they have to eat it within a few days. From Tama, I ordered what I believe is dry wheat gluten (except when I was making it from flour), not even knowing of fresh gluten, or what 'dry vital' wheat gluten is. Tama has discontinued gluten (I now get it from CELNAT)."

7600. Saio, Kyoko; Watanabe, Tokuji. 1991. Food use of soybeans in Japan. In: K. Okubo, ed. 1991. Japan part of Proceedings of the International Conference on Soybean Processing and Utilization. 130 p. See p. 35.

• **Summary:** In 1988 some 47,000,000 tons of soybeans were consumed in Japan; 79% of this amount was used to make edible and 19% (8,900,000 tons) was used for foods. In the process of making edible soy oil, more than 3,000,000 tons of defatted soybean meal were produced; 89% of this was used as livestock and poultry feeds, and 12% was used in foods (mostly for soy sauce, but with some for soy protein products and others). There has been a rapid increase in consumption of edible oil and defatted meal in Japan, accompanied by an increase in animal protein in the diet.

In 1988 Japan produced only 290,000 tons of soybeans domestically, and most of this amount was used for foods, especially tofu (60%), miso (24%), natto (9%), and other foods (dried-frozen tofu, yuba, kinako, etc.). The consumption of these foods has risen proportionally to the increase in Japan's population, which means that over all per capita consumption is static.

A recent survey conducted in Japan showed that 82% of Japanese ate soyfoods more than 3 times/week, and that Japanese people had a rather good image of these foods, describing them as healthy, natural, tasty, good for daily use, inexpensive, and delicious.

Japanese enjoy both traditional and modern soyfoods. The technologies for making "Vegetable Protein Products" from soybean meal have been introduced from the USA since 1970, but these have been modified and adapted to suit Japan's tastes and needs. "The importance of soybean foods in Japanese dietary life cannot be too much emphasized. We love them as traditional but also new foods." Address: 1. Research Council Secretariat, MAFF; 2. Tokyo Metropolitan Food Technological Research Center. K. Saio is presently at: National Food Research Inst., MAFF, 2-1-2, Kannondai, Tsukuba 305, Japan.

7601. Smoky Mountain Natural Foods. 1991. Fall/Winter 1991. Natural foods price list [Mail order catalog]. 15 Aspen Court, Asheville, North Carolina 28806. 23 p. 28 cm.

• **Summary:** This is a “Catalogue of natural foods, body care and home products for a healthier, more natural way of life.” This mail-order company, which began operation in Jan. 1991, sells products made by other companies; it does not do any manufacturing and does not have its own brand on any products. Their specialty is macrobiotics products, and they buy their Japanese imports from Macrobiotic Wholesale Co. They sell miso (Miso Master American Miso, Mitoku Japanese miso, Traditional Foods domestic miso, and instant miso soups from Edward & Sons), black soybeans and azuki beans (organic are grown in the USA, non-organic from Hokkaido), sea vegetables, soy sauce (San-J shoyu and tamari, Mansan tamari, Sakae shoyu, Johsen shoyu), San-J teriyaki sauce and Szechuan sauce, Nasoya dressings and Nayonaise, Natto miso chutney, Sesame miso sprinkle, Tekka condiment (jar or bag), jinenjo tekka, MMB [Mitoku Macrobiotic, a premium brand] organic farmhouse tekka, seitan, MMB traditional dried tofu, Tofu burger, scrambler, and stroganoff, Sweet Cloud sesame miso munchie, Sweet life miso candy.

John Troy is not connected to this company, nor is John Belleme; John is the wizard, and now he makes sauces from the Wizard’s Cauldron. He also works with John Belleme at Traditional Foods making seitan. Address: North Carolina. Phone: 1-800-926-0974.

7602. Wong, Anson. 1991. Global Protein Foods in Valley Cottage, New York (Interview). *SoyaScan Notes*. Nov. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Global Protein Foods hopes to be ready to start tofu production in about 2 months or less. Mr. Yasuo Hachijin is presently at the plant in Valley Cottage, and some Takai workers (Mr. Tsunoda) are installing a Takai tofu production system. Valley Cottage is in Westchester County, about 45 miles or a little less than 1 hour drive north of Manhattan, across the river from White Plains to the west. They plan to start with a 6-product line: silken tofu, firm tofu, extra firm tofu, fried tofu (thick or thin), and a dessert tofu. They are experimenting with fruit flavored tofu, a yogurt-like product, etc. They will be targeting their products to two markets: the American market and the Japanese market. The brand for the Japanese market will be something like Kyozen-nen (which is established in Japan), and for the American market G.P. Initially, the company will be focusing its marketing efforts on the tri-state area, which consists of New York City, Connecticut, New Jersey, and possibly maybe a little bit of Pennsylvania. This is equivalent to a 50-mile radius from the plant. Their main competitor in the American market is Nasoya, whose tofu is also the most expensive but the taste and quality are very good. There

are many competitors in the Japanese market: Mori-Nu, Kikkoman, and Kyoto-Foods (from Terre Haute, Indiana—their tofu is “very good”). Mr. Hachijin is also involved with Kyoto Foods, but he sees them as a competitor.

Anson’s background is in the plastics industry; the food industry is new to him. He went to the recent Natural Products Expo in Baltimore, Maryland. Address: Sales Manager, Global Protein Foods, 707 Executive Blvd., Building E., Valley Cottage, New York 10989. Phone: 914-268-8100.

7603. **Product Name:** Meat of Wheat Sun Burgers, Grilled Burgers, Chicken Style, Sausage Style, Hearty Original (Seitan Loaf), or Chicken Style Chili.

Manufacturer’s Name: Ivy Foods.

Manufacturer’s Address: Office: 7613 S. Prospector Dr., Salt Lake City, UT 84121. Phone: 801-943-7664. Fax: 801-943-7311.

Date of Introduction: 1991. November.

Ingredients: Sun Burger: Wheat gluten, brown rice, tamari, miso, onion, garlic, lemon juice, bean flour [white bean, black bean, garbanzo], yeast, flour, walnuts, vegetable oil [canola oil], xanthan gum, spices and natural seasonings.

Wt/Vol., Packaging, Price: 16 oz plastic bag inside a paperboard box.

How Stored: Refrigerated.

Nutrition: Per 98 gm.: Calories 221, protein 26 gm, carbohydrate 28 gm, fat 2 gm, cholesterol 0 mg, sodium 277 mg.

New Product–Documentation: Talk with Goldie Caughlan of Puget Consumers Co-op in Seattle. 1992. Feb. 7. The company is selling gluten-based products under two trademarks: Wheat Meat and Meat of Wheat. Ivy Foods, the maker, is a member of Ivy International. Some of the products are of excellent quality. The company, a new company, will be showing the products shortly in Tacoma, and then at Anaheim. They were at the Anaheim show in early 1991 scoping out the market. She is not sure whether or not they have any products for sale yet. They also seem to be selling some Worthington products (Morningstar Farms line).

Talk with Mira Blue Machlis (pronounced MAK-liss) of Ivy Foods. 1992. Feb. 7. She and her husband, Mark, own this company. Mark has been in the restaurant business all his life, and his father originally owned all the Farrel’s Ice Cream parlors in the northwest. Their company introduced their products in 1991 at Anaheim as Wheat Meat. The government was 9 months late in letting them know that they couldn’t use that Trademark, because it was already registered. Their attorney did a trademark search and they got a copy of the trademark application and found out the person who owns the trademark. The trademark was registered in about 1982 although it states that the owner first started making the product in 1977. The owner of the trademark no longer lives where the Trademark was registered, but

they have his phone number. Their company is now test marketing 5 gluten-based products in Salt Lake City and the surrounding area. And these products are available by mail order. They plan to make a gluten-based chili, which Sysco, a restaurant supply company, is now carrying. Ivy Foods, a regular business, is a member (not a division) of Ivy International, a contemplative group. "We are considering opening the company up to be a cooperative after a while. We're not in this to make money. We're in this more to set up a model business. We make all of our decisions through contemplation. We try to do things a little more consciously, and to recognize that food really is a vehicle for nurturing. This country has kind of forgotten that. When we moved to Salt Lake City we opened up a little vegetarian restaurant, the Sun Bun Café, with 2 partners. Mark started developing the Sunburger for them. It became so popular that we decided to take it to the natural foods show at Anaheim to see what the response was. The response was overwhelming. Now we are ready." Originally they considered food service operators their main potential customers, but now they hope to establish their base among natural food consumers. The little natural food store in town sells about 100 lb/week. After that base is stabilized, they plan to focus more on mainstreaming.

They have applied for a trademark on Meat of Wheat. They manufacture the products and their temporary plant will soon be moving to a new location.

Talk with Mark Machlis of Ivy Foods. 1992. Feb. 27. Most of their products (Chicken, Sausage, and 2 burgers) were first available for sale in Nov. 1991 at several stores in Salt Lake City. They now have a mail order program which allows them to ship their products in bulk as cheaply as they can put them in a store. This is good for people in outlying areas.

Products (Sun Burger, Chicken Style) with Labels sent by Mark Machlis. 1992. March. 4.25 by 6.5 by 2.75 inches. Paperboard box. Chocolate brown, red, white, green, gold, and tan. Sun Burger: Color photo of two patties on a wooden cutting board surrounded by grains and vegetables. "Vegetarian. Gourmet grain protein." Contains three preparation hints. At the top of one side panel is a symbol of one green circle inside another. Between the two is written "Animal Free" in bold green letters. In the central circle is an illustration of a lion and a lamb." The text reads: "As citizens of the world seek ecological balance, consciously made food choices open new options for Animals and Mankind... 'The frog does not drink up the pond in which he lives' (Buddhist Proverb)."

"Ivy International seeks to assist more conscious shoppers with an easily recognizable symbol which will clearly identify a vegan food product from lacto-ovo vegetarian products. For the free brochure, 'More Conscious Nourishment,' write to: Ivy International, Brighton Star Route, Brighton, Utah 84121.

Soyfoods Center Product Evaluation: Sun Burger. Package design: Generally excellent, but the term "Wheat Meat" is a registered trademark owned by another person, and a refrigeration statement should appear more prominently. The ingredients terms "bean flour" and "vegetable oil" are ambiguous. Sensory evaluation: All liked the product (score of 8); good texture and flavor. Chicken Style: Sensory evaluation: Some liked the product (score of 8), but one person did not (2), saying it reminded her of bread. The pieces are like torn pieces of chicken.

Leaflet. "Meat of Wheat Gourmet Grain Protein." A black and white photo shows each of 4 products. "All natural ingredients. Low fat. No cholesterol. High protein. Animal free." Ingredients in other products: Chicken Style: Wheat gluten, bean flour, vegetable oil, spices and natural seasonings. Sausage Style: Same as Chicken Style. Hearty Original: Wheat gluten, tamari, onion, garlic, lemon juice, bean flour, yeast, walnuts, vegetable oil, spices and natural seasonings. In a chart titled "Nutritional Comparisons," each of 4 products is compared with its meat counterpart and a Worthington counterpart. In each case the Ivy Foods product has a lower percentage of calories from fat (9-17%).

Wheat of Meat recipes: Contains 8 recipes on the front and back of one sheet. The Chicken-Style Chili is available only for institutional and restaurant use.

Spot in Natural Foods Merchandiser. 1993. Sept. p. 76. Receive up to 20% off on Meat of Wheat Sausage Style.

Ad in Vegetarian Times. 1993. Sept. p. 50. "Meat of Wheat." Available in: Grilled Burgers, Sun Burgers, Chicken Style, Sausage Style, Hearty Original. Order from your health food store or call Ivy Foods direct at 1-800-280-1313. Gives a recipe for Meat of Wheat Magnificence.

Ad in Vegetarian Times. 1993. Oct. p. 32. "Meat of Wheat." "Sausage Style ideas: Pizza topping, manicotti & lasagne, tacos & burritos, tossed with pasta.

Ad in Vegetarian Times. 1993. Nov. p. 20. "Giving Thanks." Make a vegetarian "no Tom" turkey using Wheat of Meat Chicken Style.

7604. **Product Name:** Jaclyn's Salsa Chicken Style in Mild Salsa with Mexican-Style Organic Brown Rice, Green Beans, Corn and Organic Kidney Beans (Vegetarian).

Manufacturer's Name: Jaclyn's Food Products, Inc.

Manufacturer's Address: P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.

Date of Introduction: 1991. November.

Ingredients: *Organic brown rice, vital wheat gluten, tomatoes, tomato puree, green beans, corn, *organic red kidney beans, green peppers, red peppers, canola oil, garlic, onions, brown rice syrup, apple cider vinegar, sesame oil, sea salt, rice bran, almond butter, kombu (sea vegetable), chili powder, spices. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 11.5 oz (325 gm) paperboard box. Retail for \$4.45 (11/91, California).

How Stored: Frozen.

Nutrition: Per 11.5 oz.: Calories 325, protein 28 gm, carbohydrates 35 gm, dietary fiber 12 gm, fat 9 gm (polyunsaturated fat 2 gm, saturated fat less than 1 gm), cholesterol 0 mg, sodium 290 mg, potassium 410 mg.

New Product–Documentation: Product with Label purchased at Berkeley Natural Grocery Co. in California. 1991. Nov. 24. 7.5 by 6 by 1.25 inch paperboard box. Red, blue, green, pink, and black on tan. Color photo of the meal served on a white plate. “Vegetarian Dinner Classics. 100% natural. Low calorie. No cholesterol. Low fat. High fiber. Dairy free. Heat and serve in your oven or microwave. Do not refreeze.” The main ingredient in this “wheat protein which is derived from 100% whole grain wheat. The wheat protein is blended with rice bran and almond butter to make it tasty and easy to digest. Then it is cooked in a special tamari broth flavored with poultry seasonings and cut into bite-size pieces so that its taste and texture resembles chicken.”

Soyfoods Center Product Evaluation. 1991. Dec. 2. Package design: Very good. Flavor: Good, but a little too spicy. A bit too expensive.

7605. Product Name: Jaclyn’s Sesame Chicken Style in Sesame Sauce with Seasoned Organic Brown Rice, Broccoli, Carrots and Water Chestnuts (Vegetarian).

Manufacturer’s Name: Jaclyn’s Food Products, Inc.

Manufacturer’s Address: P.O. Box 1314, Cherry Hill, NJ 08034. Phone: 609-983-2560.

Date of Introduction: 1991. November.

Ingredients: *Organic brown rice, vital wheat gluten, broccoli, carrots, water chestnuts, tamari soy sauce (water, soy beans, sea salt), unsweetened pineapple juice, sesame oil, sesame seeds, brown rice syrup, apple cider vinegar, rice bran, almond butter, kombu (sea vegetable), ginger, sea salt, chives, spices. * = Organically grown and processed in accordance with Section 26569.11 of the California Health and Safety Code.

Wt/Vol., Packaging, Price: 11.5 oz (325 gm) paperboard box. Retail for \$4.45 (11/91, California).

How Stored: Frozen.

Nutrition: Per 11.5 oz.: Calories 325, protein 31 gm, carbohydrates 40 gm, dietary fiber 15gm, fat 8 gm (polyunsaturated fat 2 gm, saturated fat less than 1 gm), cholesterol 0 mg, sodium 635 mg, potassium 390 mg.

New Product–Documentation: Product with Label purchased at Berkeley Natural Grocery Co. in California. 1991. Nov. 24. 7.5 by 6 by 1.25 inch paperboard box. Brown, blue, green, pink, and black on tan. Do not refreeze.” The main ingredient in this “wheat protein which is derived from 100% whole grain wheat. The wheat protein is blended with fiber and seasonings to make it tasty and easy to digest. Then it is cooked in a special tamari broth and cut into sirloin-style strips so that its taste and texture resembles meat.”

7607. Packaged Facts. Subsidiary of FIND/SVP. 1991. The Oriental foods market. 581 6th Ave., New York, NY 10011. Nov. *

• **Summary:** Talk with David Weiss, president of Packaged Facts. 1991. Nov. 26. This is an update of the Feb. 1989 edition of this company’s market study of the same title. It was “completely rewritten by a different author, Linda Linton.” They have added new statistics and even went back and changed some sales figures from the previous report. He does not know how the author gathered statistics on U.S. tofu production and sales, but he knows that she did not contact

individual companies, one by one. “That is a very difficult way to get the information because (1) you don’t know if you’re getting the right information and (2) there may be something you are missing. We don’t use SIC codes. Our figures are undoubtedly guesstimates. A little of it came from the Public Relations Dept. of Nielsen Marketing Research; they don’t cover it all but they are good on packaged goods. A little also came from SAMI. There is nobody measuring the tofu market. This study only covers tofu sold as tofu, not including second-generation products. Some figures may have come from a tofu association, if there is one. Most of our reports are written from secondary published data. We just compile the figures. We are planning to do a report on the whole soy market—not just tofu.” Address: New York. Phone: 212-627-3228.

7608. Silver, Jimmy. 1991. History of work with natural foods, Erewhon, Pure & Simple, and Pure Sales. Part I (Interview). *SoyaScan Notes*. Dec. 9 and 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jimmy was born on 21 March 1942 in Philadelphia, Pennsylvania. His father was an officer in the Army Medical Corps. After a brief stay in Baltimore, when Jimmy was in 4th grade, the family moved to Manhasset, Long Island, New York. He grew up there and graduated from high school. He graduated from Oberlin College in Ohio, then did graduate work at the University of Illinois in the Inst. of Labor and Industrial Relations. He finished his course work after 18 months, but did not write his thesis, then went to New York as a labor organizer. After receiving a draft notice during the Vietnam War, he enrolled in the University of Michigan at Ann Arbor studying Medical Care Organization. Again he completed his course work for the doctoral program, but facing the doctoral thesis, he dropped out in 1967 or 1968.

He was briefly introduced to natural foods and macrobiotics in 1967 in Ann Arbor by a friend named Earl Rosner. One day, in the midst of the psychedelic counterculture he had a deep inner realization that Americans were destroying their ecosystem, both within and without. He quit using psychedelics and began to eat only natural foods. He read *You are All Sanpaku* and *The Book of Judgment*, early macrobiotic works. He bought the books and “health foods” at an old-line health food store named Zerbo’s, run by Harry Zerbo in nearby Livonia, Michigan. At the Kuwahara trading post in downtown Detroit he bought real Japanese food—such as various sea vegetables, soba, and noodles—and Koda Brothers Kokuho Rose brown rice.

At about this time (1967-68) Jimmy got into the music business, and was sort of in business with a poet named John Sinclair, who was a great bear of a man, who the media regarded as the Pharaoh of the Hippies, and who managed a band named the MC-5. Jimmy and John were partners in a production company named Trans-Love Productions—

Gets You There on Time. Jimmy managed a rock group named Iggy Pop and the Stooges. After a few months John introduced Jimmy and Susan (his girlfriend of several years and wife to be) to Jim Semark, another poet who was into macrobiotics, Baha’i, and meditation. In mid-1968 Semark invited Jimmy and Susan to a macrobiotic cooking class taught by Michio Kushi at Semark’s home in Detroit; then they soon met Michel Abehsera—who they thought was wonderful and very down to earth.

Jimmy and his wife, Susan, were married on 23 Oct. 1968 in Ann Arbor. He and Susan were in Ann Arbor at the time the food co-op changed into Eden Foods but they were never members of the co-op or the Zen Macrobiotic Supper Club—for reasons that he cannot now recall. He and Susan were loners and membership in such groups wasn’t their style. Jimmy’s parents still lived on Long Island in New York so when he and Susan visited them, they used to go into the city and buy foods from Arnie Greenberg (who owned Greenberg’s, a Jewish deli-grocery store at 125 1st Ave., near Ratner’s vegetarian delicatessen, in New York City). Arnie carried foods in bulk and packaged natural foods from suppliers such as Infinity. Infinity Foods was a small food warehouse on the 2nd or 3rd floor run by a bunch of Scientologists (including Howard Rower and Jason Hammond [son of John Hammond Sr. of Columbia Records and brother of the white blues guitarist John Hammond Jr. of John Hammond and the Nighthawks]) who were into macrobiotics and natural foods. Jimmy had their catalog and visited their warehouse. Located in downtown New York at 171 Duane St. on the west side near the commercial produce and meat area, Infinity started in the mid-1960s and was the first company to import macrobiotic foods from Japan—before Erewhon. The Erewhon retail store used to carry Infinity’s products. Then Infinity fell on hard times and disappeared. Arnie would also ship him macrobiotic staples by Greyhound bus. He recalls Gloria Dunn, who looked like a gypsy, and he recalls Eden Organic Foods which was on the second floor of a building near downtown Ann Arbor. Shortly after Bill Bolduc started Eden, Jimmy and his wife left for Los Angeles with Iggy Pop.

Their first daughter, Rachel was born on 23 Jan. 1969 in Ann Arbor. He went to Los Angeles with his band in the spring of 1970. He played music at night then during the day would hang out at the Erewhon retail store on Beverly Blvd. in Los Angeles with Bruce Macdonald and Paul Hawken. He thinks that Michio Kushi had sent either Bill Tara, Bruce Macdonald, or Paul Hawken from Boston to open a branch of Erewhon in Los Angeles in about the summer of 1969. Years later when the store became a wholesale company, it was given the name Erewhon West, since it had different ownership from Erewhon in Boston. At the end of the summer of 1970, he and his wife moved to Los Angeles to live with Aveline Kushi, who had a house on Franklin Ave. in Hollywood. He wanted to work with Erewhon, not in

the retail store on Beverly Blvd., but in the little warehouse that they were just acquiring kitty-corner to across the street from the retail store. In about 1970 it began wholesaling and distribution business. But when Jimmy returned in the fall, Hawken was gone; he had moved to San Francisco and gone to work with Fred Rohe. Hawken had apparently had a falling out with Michio and Aveline Kushi. So Jimmy worked with Bruce Macdonald (“a wild man then, as ever”).

Jimmy and his family then moved to Boston, where they lived and worked from Dec. 1970 to 1976. Jimmy had been asked by Michio Kushi to take over the failing restaurants (Sanae and The Seventh Inn) in Boston. Both were owned by Sanae Corporation. Richard Sandler and Warren Durbin had grandiose plans to expand Sanae, so they opened The Seventh Inn on Boylston St. in Boston. It was an immediate failure and they struggled with it for years afterwards—then they just up and left. Paul Hawken at Erewhon had promised to help Jimmy with Sanae.

Then Jimmy worked in Los Angeles with Erewhon West (owned by John Fountain—John Deming was the financial backer) from 1976 to 1980. John Deming’s family controls the Murphy Oil Co. in Louisiana and they are extremely wealthy. Erewhon West had financial troubles trying to compete with Nature’s Best and K&L—big, established distributors. In 1980 Deming fired Fountain and was going to liquidate the company—just shut it down. So Jimmy and Jeff Hilgert bought the assets from Deming and in June 1980 they transformed Erewhon West into Pure Sales. The company has done various things over the years. Initially it sold natural food consumer products. John Fogg developed the excellent marketing concept for So Tamari in about 1981. When Erewhon went bankrupt in 1981, they voided their contract with Pure Sales to permit the use of their name for a royalty—so within 90 days Pure Sales eliminated the Erewhon name from all of their products; all of the Japanese products became “So” products (So’ Tamari, So’ Ramen, etc.), a name Jimmy coined, which meant nothing but sounded Japanese. Continued. Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

7609. Silver, Jimmy. 1991. History of work with natural foods, Erewhon, Pure & Simple, and Pure Sales. Part II (Interview). *SoyaScan Notes*. Dec. 9 and 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In 1982 Jimmy and Jeff Hilgert sold their business (which was growing very fast), except for the name (Pure Sales), to Fillmore Foods, a supplement company that wanted to expand into natural foods. Fillmore Foods named the new company Pure & Simple—its rebirth. Bruce Macdonald, always one to see an opportunity, started Pure & Simple making natural tortilla chips in San Diego. The chips were reasonably successful. “It’s not clear to me whether Bruce coined the name Pure & Simple or whether he found it

on the back of a Corn Nuts package.”

When Phil Parente / Parenti got involved in raising money to take over New-Age Natural Foods (Fred Rohe’s company), somehow Pure & Simple became part of the package. Bruce Macdonald took the name Pure & Simple, which he controlled, to Parente, offered to trade the name for shares in the company if Parente would continue producing his chips. He also suggested many other product ideas to expand the line. Parente agreed. Then in the early 1970s Parente was sued by the company that makes Corn Nuts because they wanted to use the Pure & Simple name. The two companies fought a legal battle over this name for several years. Parente won. Then Parente began to expand Pure & Simple. An ex-disc jockey named A.J. Celeri got Parente involved in some carrot packing operation that his family had been involved in. Then they got into organic chickens and eggs, and finally opened a big New Age natural foods supermarket in Palo Alto. A good idea that had arrived too early, it was not successful. Soon the whole thing was completely out of hand. In the end, Phil Parente ran the original Pure & Simple into the ground. He had the mafioso from the produce market chasing him, and all the people who had invested money in the company were also after him. Pure & Simple never filed formal bankruptcy papers; it just went down the drain. During this period Pure & Simple and The Well were both located in the same warehouse [at 795 West Hedding St.] in San Jose. Jimmy thinks that Pure & Simple was the name of the whole company, which owned the line of Pure & Simple branded grocery products, such as jams and juices. The Well was simply the fresh produce distribution arm of Pure & Simple.

The Lundberg brothers, producers of organically grown rice in Richvale, California, had a brother-in-law or a cousin named Dick who worked as a salesman for Shade Foods, a maker of yogurt toppings in Belmont, California. Dick went to Bill Shade and recommended that Shade acquire the Pure & Simple name and run the company. So Shade Foods bought Pure & Simple, which at that time was only producing a line of jams and a few other minor products. They were grossing about \$4,000 a month and they had about \$9,000 a month in expenses. Shade Foods ran Pure & Simple for about a year—into the ground. Roger Hillyard knows this whole story. Roger had a brokerage named Omega and he took Jeffrey Hilgert (who was employed by John Deming at Erewhon—Los Angeles) to Shade Foods in hopes that Jeffrey would take over the marketing of the Pure & Simple products. Jeffrey convinced Shade Foods to sell the company to Deming. Shade agreed to sell. Jimmy later bought Pure & Simple (along with Erewhon—Los Angeles) from Deming. When Jimmy sold his business (Pure Sales) to Fillmore, most of his 100 products or SKUs [SKU = stock keeping unit] were under the Pure & Simple brand. These products went off the market in about 1985-86 when the whole thing, with \$5 million in sales, fell apart. Pure Sales is

now primarily a supplier of organically grown ingredients to natural food manufacturers.

Of all the original natural food companies based on the Erewhon format, Eden Foods is the only one that has survived and thrived in its original format. But Eden might not be in existence if it hadn't been for soymilk.

Note: Jimmy Silver and his wife and family have long lived in Irvine, California. The physical office of Pure Sales has been in Costa Mesa since 1985. Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

7610. Product Name: The Eco Burger (3.2 oz, or 4.0 oz), The Eco Mex Burger, Eco Spheres (non-meatballs), Eco Pizza Topping, Eco Taco Filling, Eco Crumble, and Eco Breakfast Patty.

Manufacturer's Name: Ecotriton Foods.

Manufacturer's Address: Box 655, Langley, WA 98260-0655. Phone: (206) 221-0655.

Date of Introduction: 1991. December.

Ingredients: Eco Burger: Texturized soy protein, water, isolated soy protein, soy sauce, vital wheat gluten, modified vegetable gum, grape juice concentrate, natural flavors, organic vegetable powders (onion, spinach, carrot, garlic, celery), dry yeast, beet juice concentrate, salt, malt powder, rice bran, pea fiber, vegetable tocopherols (natural antioxidant and vitamin E source), vitamins and minerals (calcium phosphate, beta carotene, vitamin C, vitamin A, niacinamide, vitamin E, zinc oxide, iron, copper gluconate, calcium pantothenate, vitamin D-3, vitamin B-6, vitamin B-1, vitamin B-2, vitamin B-12, folic acid, biotin, potassium iodide).

Wt/Vol., Packaging, Price: Eco Burger: 3.2 oz or 4.0 oz.

How Stored: Frozen.

Nutrition: Eco Burger. Per 4.0 oz: Calories 138, protein 25 gm, carbohydrate 10 gm (dietary fiber 5 gm), fat 0 gm, cholesterol 0 mg, sodium 488 mg, potassium 500 mg.

New Product–Documentation: Kathie J. Anderson. 1991. Food Business. Dec. 9. "Burgers without the beef: Ecotriton Foods unveils premium meatless line." The company, co-founded by Robert Davis in 1990, will unveil its complete line of Eco-brand meatless products this month in Chicago.

Talk with Bob Davis. 1992. Nov. 2. His company, Ecotriton Foods, has a line of 7 fat-free meatless products including 3 soy burgers (which are beyond Harvest Burger), meatless meatballs, pizza topping, taco filling, and Eco Crumble (like stroganoff). He also has a fat-free hot dog on the same formulation that is much better than Lightlife Foods' Smart Dog. This is the first fat-free line of meat alternatives—its the next step after Lite. The vegetarian products contain extra beta-carotene, an entire anti-oxidant system, mixed tocopherol system, 4 grams of fiber and rice bran, 5 organic vegetables. They are based on textured soy protein isolate bound with methyl cellulose.

He now sells his products at the University of Michigan, as well as in 35-40 restaurants. In Washington, he sells 200 burgers a day to a sit-down restaurant in a nice district.

CBS-TV did a special on the company because of the good reception given the products. All the products are pre-cooked, so the chefs love them. He has a total substitution program for restaurants; you can have it with meat or with Eco-meat. Sysco now distributes the products. He started selling the products 2 years ago. He has invested about \$800,000 in the products and company, including \$20,000 on brochures, videos and labels. He has been trying to sell the company for about 2 months. He is interesting in incorporating seitan into his product line. His strong point is product development R&D, and product concept.

Labels for each product sent by Bob Davis. 1992. Nov. 3. 7 by 4 inches. Self adhesive. Black on white. Illustration of Planet Earth. "Healthy foods for a healthy planet."

Company portfolio sent by Bob Davis. 1992. Nov. 3. Dr. Gary J. Post is the company CEO and Robert C. Davis is president. "All Ecotriton Foods products are: 100% fat free, 100% cholesterol free, low in calories, high in fiber, enriched with 5 organic vegetables, fortified with beta carotene, 100% vegetarian... Ecotriton Foods is founded on the concept of Ecology + Nutrition. All of our products meet the internally developed concept of Ecotriton which is: (1) maximizing nutrition, (2) optimizing taste, and (3) minimizing environmental impact."

Article by David L. Lewis. 1993. *Cars & Parts*. Jan. p. 147. "Ford Country: Soyburger." "Henry Ford, were he alive, would be pleased by a recent *USA Today* report that a 'meat alternative' patty made of soy protein and rice bran, will soon find its way into supermarkets. The compound, advertised as 95 percent fat free, will be produced by Believe, Inc., which also makes a tofu hot dog."

Talk with Robert Davis. 1993. Feb. 19. All of the above Eco products are built on a matrix/base of spun soy protein fiber, named 200E Fiber, made by Ralston Purina, and sold frozen in filaments 6-7 inches long. Robert did a lot of product development work at the Ralston Purina laboratory in St. Louis, Missouri, and he feels that the company is making a lot of 200E fiber. He imagines that it is used mostly as a meat extender. Robert is no longer working with Ecotriton Foods; Gary Post, a fairly wealthy chiropractor, is trying to keep the company alive. Ecotriton has applied for a patent on the process for making the Eco line of products, based on spun soy protein fiber.

7611. Product Name: Redwood Vegetarian Rashers (Tempeh Bacon).

Manufacturer's Name: Redwood Company (The). Div. of JRJ Trading (Importer-Marketer-Distributor). Made in America.

Manufacturer's Address: 243 The Broadway, Muswell Hill, London, N10, England.

NET 10 FLOZ (296 mL)

Date of Introduction: 1991. December.

Ingredients: Tempeh, shoyu, malt syrup, sea salt, yeast extract, mixed spices, fermented red rice.

Wt/Vol., Packaging, Price: Retail for £1.99.

How Stored: Refrigerated or frozen.

New Product—Documentation: Health Food Business (London). 1992. Jan. p. 12. "Vegetarian breakfast treats with JRJ's organic bacon." This bacon-like product made with organic tempeh retails for £1.99. The tempeh is made from organic soybeans with red rice added to give an authentic color; red rice gives much better color retention than the usual beetroot color. Salt is also added.

Talk with Jeremy Duncan, owner of The Redwood Co. 1992. June 16. This product was introduced in late 1991. About 6 months ago the company moved to its present address: Unit 4, West Burrowfield, Welwyn Garden City, Hertfordshire, AL7 4TW, England. He owns both The Redwood Co. and JRJ Trading, which is an import company. Nowadays he no longer thinks of Redwood as a division of JRJ Trading.

Spot in SoyaFoods. 1992. Autumn. p. 5. "Tempeh alternative to bacon." This may be England's first vegetarian alternative to bacon.

7612. Rondot, Pierre; Sudaryanto, T.; Djauhari, A.; Anwarhan, H. 1991. Soybean utilization, processing, and production policy in Indonesia. *Palawija News (Bogor, Indonesia)* 8(4):1-6. Dec.

• **Summary:** "More than 80% of the households in Java consume soybean. The next highest consumption rate is in North Sumatra where 55% of the households eat soybean regularly. In Java, annual soybean consumption per capita

varies from 11 to 16 kilograms compared with one to six kilograms in other areas of Indonesia. Java, which produces 47% of Indonesia's soybean, is also its greatest consumer.

"Average soybean consumption for the whole of Indonesia increased from 3.42 kg/cap/year in 1969 to 5.78 kg/cap/year in 1985. Consumption per capita of processed soybean is higher in urban areas than in rural areas."

"The Indonesian 'poultry revolution' has given rise to the modern animal feed-mill industry,... As Indonesia did not have a crushing industry until 1988, the meal had to be imported to regulate the national demand and to sustain the development of the 'poultry revolution'."

In 1987, according to SYGAP survey data, Indonesians consumed 749,600 tonnes of tempeh (86 gm/week), 714,700 tonnes of tofu (82 gm/week), and 48,200,000 liters of kecap (ketjap; Indonesian soy sauce). Per capita consumption of onchom was 4 gm/week. Address: 1. Agricultural Economist, ESCAP/CGPRT Centre, SYGAP Project, Bogor, Indonesia.

7613. **Product Name:** San-J Organic Whole Soybean Tamari: Wheat Free Soy Sauce (Gold Label; Traditionally Brewed Gourmet Soy Sauce; OCIA Certified Organic).
Manufacturer's Name: San-J International, Inc.
Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-595-9545 or 415-821-4040 (Perelman).
Date of Introduction: 1991. December.
Ingredients: Water, whole soybeans (OCIA certified), sea salt, alcohol (to preserve freshness).
Wt/Vol., Packaging, Price: 5.07 fluid oz (150 ml) dispenser, 10 fluid oz bottle, 20 fluid oz (592 ml). The 10 oz Gold Label retails for about \$2.29, and the Black Label for about \$1.99 (13% less).

How Stored: Shelf stable.

Nutrition: Gold label: Per 1 tbs.: Calories 11.34, protein 1.84 gm, carbohydrate 1.06 gm, fat 0 gm.

New Product–Documentation: Talk with Stephen Zoller of San-J. 1992. July 6. This Gold Label product, certified organic by the Organic Crop Improvement Association (OCIA) was introduced in Dec. 1991. This wheat-free, whole-soybean product itself is certified, not just the beans going in. The company's previous Gold Label Tamari was made with Virginia-grown soybeans that were not claimed to be organic. The company now uses ultrafiltration to do its filtration. San-Jirushi in Japan liked this idea so much that they decided to install it in Japan, i.e. reverse technology transfer. Each year in the spring at San Jirushi, Japan, some 2-6 managers are promoted. After promotion, they typically come to visit the U.S. plant.

Label sent by Steve Zoller. 1992. July 7.

Two labels sent by Misako Binford of San-J International. 2012. May 14. The gold label now reads: "Organic Tamari: Gluten Free Soy Sauce. 10 fl. oz. Made with 100% soy." Two logos on the front panel: (1) Non GMO Project verified. (2) Certified Gluten Free. She notes: Gold. Created 1988. Made organic around 1990 or 1991.

7614. Product Name: [Sunflowerseed Snacks].

Foreign Name: Snack Girasole.

Manufacturer's Name: Soy & Rice.

Manufacturer's Address: Via A. Canale 8/c, 10078 Venaria Reale (TO), Italy. Phone: 011-402-0380.

Date of Introduction: 1991. December.

Ingredients: Sunflowerseeds, shoyu [spelled Shoyou].

How Stored: Shelf stable.

New Product–Documentation: Letter and Label sent by Bosco Franca and Garafola Carmelo of Soy & Rice. 1992. Feb. 4 by 2.75 inches. Black on white. Self adhesive. The logo is that developed by Mitoku which states in Japanese characters "*I Shoku Dô Gen*" (Medicine and food come from the same source, or Your food is your best medicine). Store at 4°C [39.2°F].

Note: The company also makes Gomashio (sesame salt).

7615. Whole Foods. 1991. Tofu making gains: Oriental foods near \$1 billion level. Dec. p. 1, 20. Cover story.

• **Summary:** A new study by the market research company Packaged Facts [a subsidiary of FIND/SVP] projects that retail sales of tofu will be \$95 million in 1991, up 9.2% over 1990. Sales have grown steadily from \$61 million in 1986, to \$66 million in 1987, to \$71 million in 1988, to \$78 million in 1989, to \$87 million in 1990.

Tofu is viewed as part of the Oriental foods market, which is projected to have retail sales of \$992 million in 1991, up 5.5% over 1990. The major components of the Oriental foods market, ranked by projected retail sales in million dollars in 1991 are: Frozen foods (\$296), dry soups

(\$287), Sauces (\$160, including soy sauce), canned goods (\$154), and tofu (\$95). Note that tofu comprises the smallest segment.

Reasons for tofu's steady growth include its connection with two individual rising trends: ethnic foods and healthy eating. Michael [sic, David] Weiss, president of Packaged Facts, explains that Oriental sauces are also benefitting from the proliferation of Oriental restaurants "because increased familiarity with oriental food has stimulated consumers to begin preparing the dishes at home."

Note: All of the data on tofu in this report are derived from previously published sources.

7616. Product Name: [Toform Tofu Patties (With Mushrooms)].

Foreign Name: Toform Tofu Bratlinge (Champignon).

Manufacturer's Name: Amaï.

Manufacturer's Address: Sandweg 41, 7070 Schwaebisch Gmuend, Germany.

Date of Introduction: 1991.

Ingredients: Tofu (water, soybeans*, calcium sulfate) 78%, mushrooms 10.6%, rolled oats*, soy sauce, sunflowerseed oil, parsley and spices, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 2 x 100 gm vacuum pack. Retail for DM 4.50 (1/92, Germany).

How Stored: Refrigerated.

Nutrition: Per 100 gm.: Protein 11.7 gm, fat 10.8 gm, carbohydrates 8.1 gm, calories (kcal) 176 (737 kJoules).

New Product–Documentation: Label sent by Anthony Marrese. 1992. Jan. 13. 4 by 7.5 inches. Self adhesive.

Blue, white, green, and orange on tan. "Organically grown." Exklusiv Neuform certification symbol.

7617. Product Name: Tempeh Pâté.

Manufacturer's Name: Big Carrot Natural Foods Store (The).

Manufacturer's Address: Toronto, Canada.

Date of Introduction: 1991.

Ingredients: Incl. tempeh, carrots, tamari.

New Product–Documentation: Talk with (call from) RoseAnn Lawrence of Santa Rosa, California (Phone: 707-573-0596). This is the best natural foods store and deli she has ever seen. They even have their own cookbook—but it doesn't contain the recipe for this product. The pâté is made and sold in the store's deli. The recipe is a secret but the ingredients are on the label. It is sold in the form of a big loaf, like meatloaf, and the tempeh adds a chunky consistency. It is delicious spread on pita bread.

7618. Product Name: Alpamare.

Manufacturer's Name: Bioforce of America Ltd. (Importer). Made in Switzerland.

Manufacturer's Address: Importer: P.O. Box 507, Kinderhook, NY 12106. Made by Bioforce AG, CH-9325

Roggwil/TG, Switzerland. Phone: 800-645-9135.

Date of Introduction: 1991.

New Product–Documentation: Catalog from Bioforce of America Ltd., P.O. Box 507, Kinderhook, New York 12106. 1991. Feb. 17. Alpamare is a seasoning sauce with herbs, concentrated kelp, and soy.

7619. **Product Name:** Mitoku Macrobiotic Mansan Organic Tamari: Traditional Wheat Free Soy Sauce.

Manufacturer's Name: Mitoku USA (Importer). Made in Japan.

Manufacturer's Address: Tokyo, Japan.

Date of Introduction: 1991.

Wt/Vol., Packaging, Price: 10 fluid oz bottle.

How Stored: Shelf stable.

New Product–Documentation: Label seen at Open Sesame in Lafayette, California. 1991. Feb. 16.

Mitoku Company Ltd. 1992. "Mansan Organic Tamari: Incomparable Quality and Flavor." *Natural Health*. Feb. p. 126. This ½-page ad has an illustration by Akiko Aoyagi Shurtleff of a man standing on the rim of a huge vat ladling liquid tamari into floating keg. A bold symbol of the character for "tamari" appears in a box to the upper right. "Mansan Organic Tamari is available in North America under the Mitoku Macrobiotic and Emperor's Kitchen label. Exported exclusively by Mitoku Co., Ltd., Tokyo, Japan."

7620. **Product Name:** Harbor Lites Sea Sauce [Ginger Soy, Garlic Grille, Lemon Chablis, Tomato Tarragon].

Manufacturer's Name: Simply Delicious, Inc. [Div. of The Wizard's Cauldron, Ltd.].

Manufacturer's Address: 8411 Hwy. NC 86 North, Cedar Grove, NC 27231. Phone: 919-732-5294.

Date of Introduction: 1991.

Ingredients: Ginger Soy: Tamari soy sauce, water, white wine vinegar, ginger puree, rice syrup, white wine, lemon juice, garlic juice, pepper mash, sea salt, natural herbs & flavours, toasted sesame seed oil, shiitake mushrooms, natural vegetable gum, natural hickory smoke.

Wt/Vol., Packaging, Price: 10 fl. oz glass bottle with white plastic twist-off cap.

How Stored: Shelf stable.

New Product–Documentation: All four products, with Labels, sent by John Troy. 1991. Labels are turquoise blue and reddish brown on tan. Each sauce is meant to be served on seafood. The Garlic Grille has tamari soy sauce as the first ingredient. Lemon Chablis has "clear shoyu" as the sixth ingredient. Tomato Tarragon has "clear shoyu" as the seventh ingredient.

7621. **Product Name:** "Beefy" Burrito (Renamed Mexican Tofu Burrito), and Mexican Tofu Sloppy Joe.

Manufacturer's Name: Soy Devine.

Manufacturer's Address: Box 668, Miranda, CA 95553.

Date of Introduction: 1991.

New Product–Documentation: Talk with Mara Devine. 1995. June 1. In 1995 Cajun Barbecue Style was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. She moved from Miranda to Arcata, California, in June 1993.

7622. **Product Name:** Seitan [Syrian Spice, Hungarian Peppercorn, Pepperoni Style, and Lemon Teriyaki flavors].

Manufacturer's Name: Vegan Epicure.

Manufacturer's Address: 210 Park Place, Ithaca, NY 14850. Phone: (607) 272-0432.

Date of Introduction: 1991.

Ingredients: Pepperoni: Wheat gluten, shoyu (water, soybeans), apple cider vinegar, fennel seed, spices.

Wt/Vol., Packaging, Price: Vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Spot in Vegetarian Journal. 1994. March/April. p. 27. Talk with Susie Gutierrez, founder and owner of Vegan Epicure. 1994. March 11. She introduced these flavors in 1991.

Product and Label for Pepperoni Style sent by Susie Gutierrez. 1994. March 14. 3.75 by 2.25 inches. Black on red. 16 oz. This is a dark brown log of seitan, 2½ inches in diameter and 7½ inches long. Also sent product and same size Label for Hungarian Peppercorn Seitan. Black on orange-yellow. 8 oz. Ingredients: Water, wheat gluten, shoyu (water, soybeans), spices, apple cider vinegar, red wine vinegar, lemon juice, black peppercorns. Each little cylinder is 1 inch in diameter and 3 inches long. Also sent product and same size label for Lemon Teriyaki Seitan. Black on blue. 8 oz. Ingredients: Water, wheat gluten, shoyu (water, soybeans), apple cider vinegar, red wine vinegar, lemon juice, spices. Each slice is 3 by 8 by 1/8 inch thick.

7623. Arora, Dilip K.; Mukerji, K.G.; Marth, E.H. eds. 1991. Handbook of applied mycology. Vol. 3: Foods and feeds. New York, NY: Marcel Dekker, Inc. x + 621 p. Illust. Index. 26 cm.

• **Summary:** Contains 17 chapters by various authors. Two chapters, of special interest, are cited separately: 10. Nonproteinaceous fermented foods and beverages produced with koji molds, by Tamotsu Yokotsuka (of Kikkoman). 11. Proteinaceous fermented foods and beverages prepared with koji molds, by Tamotsu Yokotsuka. Address: 1. Banaras Hindu Univ., Varanasi, India; 2. Dep. of Botany, Univ. of Delhi, Delhi, India; 3. Univ. of Wisconsin–Madison, Madison, Wisconsin.

7624. Chelf, Vicki Rae. 1991. Cooking with the right side of the brain: Creative vegetarian cooking. Garden City Park, NY: Avery Publishing Group Inc. viii + 283 p. Illust. incl. many color plates. Index. 28 cm.

• **Summary:** This vegetarian cookbook, which contains

over 500 healthful recipes, shows a strong macrobiotic influence. The extensive glossary of ingredients includes good descriptions of adzuki beans, many sea vegetables, amaranth, amasake, gluten, gluten flour, koji, kudzu, miso, mochi, natto, natto miso, okara, quinoa, seitan, shoyu, silken tofu, soybeans, tamari, tempeh, tofu, and T.V.P. (Textured Vegetable Protein). All of these ingredients are used in recipes. There are at least 26 tofu recipes, 6 seitan recipes, and 4 tempeh recipes.

The author, who also illustrated this book, has been a vegetarian for 16 years. While living in Quebec, Canada, she wrote several French-language vegetarian cookbooks. The right side of the brain controls thoughts and actions that are creative, intuitive, spontaneous, and artistic, whereas the left side controls more logical, concise, analytical, and scientific thinking. Conventional education encourages development of the left side of the brain. This book encourages creative experimentation and improvisation with the recipes given.

7625. Ching, Emily; Ching, Ko-Shee; Austin, Theresa. eds. 1991. Monk's beef stew. Yue's tofu store. Cerritos, California: Wonder Kids Publications. 28 p. Illust. 21 x 21 cm. Series: Chinese Children's Stories: Tales about Food, No. 35. [Eng; Chi]

• **Summary:** This book contains two separate children's stories. There are different color illustrations of China on almost every page. The English text is generally on one page and the Chinese text on the other, but sometimes the English text is on the top of a page and the Chinese text at the bottom, with a full-page illustration on the facing page. The first story is about how monks followed the great Su Dongpo's instructions to make beef stew, seasoned with soy sauce. The "Pork Song" is the most popular poem that Su Dongpo wrote about food. Note: Su Dongpo [pinyin] (1036-1101) was a famous Song/Sung dynasty poet.

The second story begins by saying that "during the Warring States period [475-221 BC] the earliest Chinese tofu store was owned by the great general Yue Yi," general of the Yen state. He was also an obedient son. When he was young, his parents were quite old. They could not chew food very well since most of their teeth were missing. Yue Yi had always wanted to invent something tasty, which his parents could eat easily. Since many soybeans were planted around the family home, he soaked the beans, ground them to a paste, then cooked them." But his parents disliked this food, because it was full of grounds (okara). So they next day, after grinding the soaked soybeans with water, he strained them through a cotton cloth, then cooked the milk in a pot. This time his parents enjoyed his soybean soup.

One day Mrs. Yue's gums started to bleed. The doctor took her pulse, then said to Yue Yi that his mother had probably eaten too many soy beans, a heating food that increases the body's internal temperature. He gave her a medicine to lower her body's temperature. Yue Yi learned

that the medicine contained gypsum [calcium sulfate], which has cooling effects. The medicine worked and her gums stopped bleeding. Then Yue Yi thought of putting gypsum in the soybean soup, so no one would need to worry about eating too much. The next day he bought some gypsum, ground it to a powder, then stirred it into the hot soybean milk. Surprisingly it turned into a gel. He and his parents found that it tasted delicious, refreshing, and tender.

Soon the neighbors came to his house to taste it. They too were pleasantly surprised "It is as tasty as meat." They called it the "mansion bean meat"—a name which caught on.

So Yue Yi opened a tofu shop to make and sell his new "mansion bean meat." His parents ate it, and lived long, healthy lives. Yue Yi traveled far and wide, teaching people how to make "mansion bean meat." Soon many elderly Chinese were enjoying this new food.

Many people in China decided to start their own business making "mansion bean meat" but they thought this three-character name was too long. So they combined the characters for "mansion" and "meat" to make the word "tofu"—in which *to* indicates "bean" and *fu* has the pronunciation of "mansion." Soon a new industry was born in China. "As a token of Yue Yi's kindness to the elderly and his spirit of unselfishness, the people recognized him as the grandfather of the tofu business and often offered incense in Yue Yi's name!" Illustrations show: (1) A hand-turned stone mill. The front of a tofu shop, with people carrying cakes of tofu. Photos show: (1) Large, flat blocks of tofu on wooden boards, uncut and cut into cakes. Note: The source, date, or authenticity of the story of Yue Yi is unknown. Yue Yi is not mentioned in Huang (2000) *Science and Civilization in China*. Address: Cerritos, California.

7626. Clearspring Ltd. 1991. Traditional Japanese soya sauces. London: Clearspring. 1 p. 1 folded sheet (2 p.). Illust. 21 cm. *

7627. Clearspring Ltd. 1991. Macrobiotic quality wholefoods. London: Clearspring. 1 p. 1 sheet. 21 cm. *

• **Summary:** This leaflet advertises Clearspring's line of largely Japanese malt syrups, Japanese teas, sea vegetables, miso, soya sauces, amazake, umeboshi, pasta, sauces and crackers.

7628. Dieudonne, Marie-Paul; Dieudonne, Pascal; Saulnier, Alain; Ferrenbach, J.P. 1991. Les nouveaux aliments: Soja—algues [The new foods: Soya and sea vegetables]. Editions S.A.E.P., Ingersheim 68000, Colmar, France. 95 p. Color photos. Index of recipes. 22 cm. Series: Delta 2000. [Fre] • **Summary:** Contents: Part I of the book (p. 4-53) is about sea vegetables, by Marie-Paul and Pascal Dieudonne; Part II (p. 54-91) is about soya, by Alain Saulnier and J.P. Ferrenbach. Introduction. Economic aspects: Soybean production (worldwide, USA, France), world production of

protein from various sources in million tonnes (FAO 1976; wheat 51, soya 24.9, rice 23.5, corn 23.4, meat 21.9, fish 11.8, cow's milk 6.7), protein yield, nutritional composition of various protein sources. Main nutritional characteristics of soya. Products made from soybeans: Tofu, tempeh, soymilk (*le jus de soja*), soy sprouts, shoyu or soy sauce. The causes of this explosion [of interest in soya]. Recipes: Of the 35 recipes, 33 feature tofu, 1 features tofu and soymilk, and 1 features soy sprouts. A number of the recipes include fish.

At the end is a glossary (p. 92-93) and a recipe index (p. 94-95). This book, which contains many beautiful color photos, is probably published by or in cooperation with Sojinal (formerly Cacoja) of Colmar and Issenheim. Address: Colmar, France.

7629. Duong, Binh; Kiesel, Marcia. 1991. *The simple art of Vietnamese cooking*. New York, NY: Prentice Hall Press. xvii + 326 p. Foreword by Jacques Pépin. Illust. (color photos by Becky Luigar-Stayner). Index. 24 cm.

• **Summary:** About the authors: Binh Duong was born in Vietnam in Nha Trang, on a beautiful bay on the country's south central coast. He was raised in Da-Lat in the mountains; his father was an engineer. In 1975, near the end of the Vietnam war, he fled to the USA, where he became a well-known chef. He and Marcia Kiesel met in 1998 in the test kitchens of *Food & Wine* magazine.

"There is a certain finesse, a certain quality to Vietnamese cooking that sets it apart from other types of oriental food: Clean, clear sauces; a minimum of fat; an abundance of vegetables; and very distinctive flavors" (p. xi, from the Foreword, by Jacques Pépin).

The best place to eat for most people in Vietnam, especially if one does not have much extra money, is at "the food stalls in the open-air market. The atmosphere is convivial; the food as pure and fresh as it can be made."

"There are only a few basic ingredients in Vietnamese cooking, but they are vital ones: *nuoc mam*, or fish sauce, lemongrass, a handful of unusual herbs, rice paper, and rice flour" (p. xvi-vii).

The chapter on "Key ingredients" (p. 10-29) includes: (1) Bean curd, dried (*tau hu ky* [yuba]); it comes in thin sheets or rolled "bean sticks" [dried yuba sticks]. Sold in plastic packets or colorful paper packages. Can be fried until crisp or softened in water then simmered or sauteed.

Note: This is the earliest English-language document seen (Nov. 2011) that uses the term "tau hu ky" to refer to yuba. (2) Bean curd, fresh (*dau khuon*): Japanese name: Tofu. (3) Bean curd, fried (*dau khoun chien*): Cubes of fried tofu, especially delicious filled then simmered in a flavorful stew. Sold 10 cubes in a 2-oz pack. (4) Bean curd, red (*chao*): "A spicy wine-fermented tofu that imparts a reddish-brown luster and rich flavor to marinades." Better quality products are sold in glass jars or small crocks. (5) Hoisin sauce (*Tuong ngot*): From China, hoisin is made from soybeans,

garlic, sugar, and spices. (6) Vietnamese bean sauce (*Tuong cu da*). Made from soybeans, cooked rice, and water. (7) Soy sauce (*xi dau*): Used quite a bit in Vietnam, especially by Vegetarian Buddhists who do not eat fish sauce. "Japanese soy sauces are light, pleasant and well suited to Vietnamese cooking."

Dipping sauces and condiments: Soy vinaigrette (*Nuoc xi dau giam*, with "3 tablespoons soy sauce," p. 51). Rich bean sauce (*Nuoc tuong ngot*, with "1 heaping tablespoon pure Vietnamese bean sauce or Chinese bean paste," p. 54).

Soy related recipes: Garlic chive and tofu soup (*Canh dau khuon*, with three 3-ounce tofu cakes, cut into 2-inch pieces, p. 91. "Tofu, highly prized even by nonvegetarians because it is so nutritious, picks up the flavors it is cooked with and takes on a smooth and unusual texture that is quite pleasant"). Fried tofu stuffed with pork and mushrooms (*Dau khuon don thit*, with two "2-ounce packages fried bean curd, p. 242-43).

"Vegetarian cooking of the Vietnamese Buddhists" (p. 269-96). Begins with a page about how Buddhism came to Vietnam and its place in modern Vietnamese life and food. Vegetarian tofu soup (*Canh chua chay*). Vegetarian summer rolls (*Goi cuon chay*, with tofu). Vegetarian spring rolls (*Cha gio chay*, with firm tofu cakes and Soy dipping sauce). Fried tofu salad (*Goi dau khuon*). Carrot, jicama, and tofu salad (*Goi chay*, incl. three 3-ounce tofu cakes and "1 large sheet dried bean curd [yuba], broken in half crosswise"). Fried tofu with green beans (*Dau khuon xao dau*). Grilled tofu and vegetables (*Dau khuon va la ghiem nuong vi*). Curried tofu sauté (*Dau khuon xao la lan*, with firm tofu cakes). Lemongrass-scented vegetable sauté (with tofu). Fried vegetables with noodles (with tofu and 1 large sheet of yuba). Squash and sweet potato stew with coconut and peanuts (*Kiem*, with yuba and tofu). Fried tofu with tomato and vegetables (*Dau khuon xao thap cam*). Hoisin dipping sauce (*Nuoc cham tuon*). Soy dipping sauce (*Xi dau cham*, with soy sauce). Address: 1. Chef and owner of the Truc Orient Express, Hartford, Connecticut; 2. Assoc. director of the test kitchen and a food writer at *Food & Wine* magazine.

7630. Fukushima, Danji. 1991. Recent progress of soybean protein foods: Chemistry, technology, and nutrition. *Food Reviews International* 7(3):323-51. [29 ref]

• **Summary:** Contents: Abstract. Introduction. Chemistry: Chemical composition of soybeans (Soybean globulins composed of four major components—2S, 7S, 11S, 15S), importance of three-dimensional structures of soybean protein molecules in food processing, influence of biologically active substances in soybeans on food processing. Technology: Traditional soybean protein foods and recent progress in their technology (soy milk {remove the hypocotyl and hull to remove off flavors; Soyasaponin A as the strongest off flavor}, tofu, kori-tofu, yuba), fermented soybean protein foods: Application of bioreactor for soy

sauce production, nontraditional soybean protein foods and recent progress on their technology, recent progress on new soybean protein foods in which soybean proteins are the key material (modified abura-age, modified ganmodoki, deep fried texturized soy protein nuggets). Nutrition: Recent progress on nutritive values of soybean proteins (Soybean proteins have an amino acid score of 100 for persons more than 2 years old), physiological function of soybean proteins (they lower cholesterol levels when used to replace animal proteins). Future of soybean protein foods (Kikkoman fermented soy sauce is well on its way to becoming a universal seasoning. Tofu and tempeh also seem to have a bright future).

"The most important chemical reactions during the process of soybean protein foods are the intermolecular reactions among the residues exposed on the surface of the protein molecules through the denaturation process. In native soybean protein molecules, most amino acid residues responsible for the reactions-such as cysteine (-SH), cystine (S-S), and hydrophobic amino acid residues-are buried in the inside region of the molecule, inaccessible to water. These residues become reactable with each other through the exposure from the inside by heat denaturation during processing. The unique textures of soybean protein foods, such as tofu, kori-tofu, yuba, and texturized products produced by extruder, etc., are the results of both the intermolecular interchange reaction between the exposed -SH and S-S groups and the intermolecular hydrophobic reaction among the exposed hydrophobic amino acid residues. The exposure of amino acid residues is also important for the hydrolysis of soybean proteins by enzymes, through which soy sauce is produced, because the cleavage of the peptide bonds is carried out after binding between the active sites of the enzymes and the enzyme-specific amino acid residues exposed through denaturation." Address: Kikkoman Corporation, 1-25 Kanda Nishiki-cho, Chiyoda-ku, Tokyo 101, Japan.

7631. Hesseltine, C.W. 1991. Peoria, an international center of fermentation excellence. *Transactions of the Illinois State Academy of Science* 84(1-2):1-11. [11 ref]

• **Summary:** This paper was presented on 28 Sept. 1989 as the after-dinner address for the 50th Anniversary Celebration of the Peoria (Illinois) Branch of the American Chemical Society. Contents: First fermentations. Hiram Walker Co. (1816-1899; for many years they operated the world's largest bourbon whiskey plant in Peoria). Takamine. Northern Regional Research Center. Penicillin & Dr. Andrew Moyer. Penicillin-others (incl. Dr. Kenneth Raper). USDA's Agricultural Research Service (ARS) culture collection (which dates back to 1904). Polysaccharides. Mycotoxins. Fermented foods (especially soyfoods such as miso, shoyu, and tempeh). Fermentation in Peoria today (ADM uses the old Hiram Walker distillery to make fuel alcohol from corn).

Honors and awards. References.

"Dr. Jokichi Takamine was the father of commercial enzymology and one of the pioneers of biotechnology. He was born in 1854 in Japan and received his Doctor of Pharmacology and Ph.D. in Engineering. He became very interested in Western concepts that would be useful to the Japanese but he also was interested in Japanese contributions to the West in science, industry and culture. In 1884 he married an American girl whose father helped him financially start the Takamine Ferment Company in Peoria in 1890. This company's business was to produce 'diastase,' a mixture of glucoamylase and α -amylase. This mixture of amylases was produced by the koji molds (*Aspergillus oryzae* and *A. soyae*) and it was here in Peoria that fungal amylase was first introduced to the West. In the production of alcohol from grain it is necessary to break down the starch to sugar, which is then fermented to alcohol. Up to this time the starch conversion step of grain was brought about by the use of malt produced by the germination of grains.

"In the Takamine process the malt was replaced by fungal α -amylase and, therefore, was a process in direct competition with malt utilization. Apparently this new innovation was greeted with apprehension by the malt manufacturers. There was labor agitation and a propaganda campaign against Takamine. In 1894 the distillery where he worked was burned to the ground. Arson was suspected but never proven. The distillery which used fungal amylase was rebuilt, but the company dissolved the Takamine corporation and Takamine left Peoria in 1894. In 1894 Takamine obtained a U.S. patent on his enzyme diastase preparation called Taka-diastase.

"Later Takamine founded the Takamine Laboratories in the East [Clifton, New Jersey] and the Sankyo Pharmaceutical Company of Tokyo. He also isolated crystallized adrenaline at the same time that this was done by J. Abel at John Hopkins. Takamine obtained patents on adrenaline. He is also known for arranging for three thousand cherry trees for planting at the Tidal Basin in Washington. Recently a book on Dr. Takamine was prepared and printed by the Miles Company, which some years ago bought the Takamine Laboratories. The book contains his writings translated into English along side the original Japanese."

"The ARS Culture Collection is one of only two large culture collections in the USA, and its primary function is to find and maintain useful or potentially useful microbial and genetic taxonomic material. This collection dates back to 1904 when Charles Thom was hired by the USDA to investigate the mold cheeses. In making these studies, Thom secured several hundred strains of *Penicillium* and *Aspergillus* which became the nucleus of the ARS Culture Collection. At first Thom was at the Connecticut Agricultural Experiment Station, but in 1913 he moved to Washington, DC, taking his cultures with him. The oldest mold culture in the Collection is a strain of *Actinomyces*

elegans isolated in 1892. Thom's collection had no formal recognition, and the story is told how Thom worked in the Laboratory on weekends to transfer his collection. In 1940 when the Fermentation Laboratory was established at NRRC, the Thom Collection was moved from Washington, DC, to Peoria and was formally recognized as one of the fermentation groups with Dr. K. Raper in charge. Dr. J. Wickerham joined the group to be curator of the Yeast Collection, and W.C. Haynes was selected to maintain a Bacterial Collection. Since then the number of curators has increased from 3 to 6. Some famous private collections were added in 1940, including the Harvard Collection which had strains isolated before 1900." Address: 5407 Isabell, Peoria, Illinois 61614.

7632. Homma, Gaku. 1991. The folk art of Japanese country cooking: A traditional diet for today's world. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p. Illust. Glossary and index of Japanese words. Recipe index. 26 x 20 cm.

• **Summary:** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as foods, utensils, techniques, houses, etc. He uses the Japanese words first, then explains what they mean (in parentheses) in English. Thus the book makes it easy and enjoyable to learn Japanese food-related words.

Moreover, the book is brimming with interesting information about traditional soyfoods in Japan.

The author was born in 1950 in Akita, capital of Akita prefecture, in northeastern Japan. Starting as a young boy, he studied Aikido with the founder, Morihei Ueshiba (1883-1969), as a live-in student in the small town of Iwama, in Ibaragi [Ibaraki] prefecture. He was curator of the Lake Ogawara Folk Art Museum, in Aomori prefecture, northeastern Japan, where he worked for about 4 years and learned much of the most interesting tradition, history and other information in this book. Since 1977 he has been living in Denver, Colorado.

Contents: Preface. Foreword. 1. Introduction. 2. The background of country cooking—Folk art and custom. 3. The background of Japanese staple foods. 4. The background of country cooking—Basic preparation. 5. Country meals. Closing. Lake Ogawara Folk Art Museum (*Ogawara Minzoku Hakubutsukan*), located in Furumagi, Misawa City, Aomori prefecture. Founded by Mr. Yukio Sugimoto. Officially opened 29 Aug. 1961. Displays over 15,000 pieces of folk arts and crafts.

Edamame (green soybeans, p. 49-50). In and around his home town, Aug. 15 was too early for harvesting fruits, so they celebrated *mame meigetsu* on Sept. 15. The main food offered at this festival was *eda mame* (green soybeans) along

with boiled chestnuts, other fruits, and sweet potatoes. The name of the festival is derived from the word *mame*, which means "bean." In other areas the festival might be called *kuri meigetsu* ("chestnut full-moon") or *imo meigetsu* ("sweet potato full-moon")—depending on the main crop produced. All of the various crops harvested were offered to the moon.

Concerning soybean oil (p. 73): The section titled "Abura—Oils" states: In the Lake Ogawara Folk Art Museum an antique wooden tool (*abura shibori*, see photo) used for extracting oil is on display. The seed or food "to be pressed was placed between two pieces of wood and wedges were hammered into place with a big wooden mallet, driving the pieces together.

"In the Lake Ogawara area this method was used to make rapeseed oil, a popular cooking ingredient." Clearly, the oil was produced in small quantities. "The traditional Japanese farmer was never able to produce enough oil for deep-frying foods."

"There are many sources for natural oils in Japan. From sesame seeds we obtain *goma abura*, from Japanese nutmeg we obtain *kaya abura*, from corn we obtain *kimi abura*, from peanuts we obtain *rakkasei abura*, and from soybeans we obtain *daizu abura*."

Concerning yuba: Although very healthful, yuba (dried soymilk film) is not as popular as most other Japanese soy products. "Tofu is made by bringing soybean 'milk' to a boil. As it boils, a thick film forms on the surface. This film is picked up on a cloth and laid out to dry. The resulting food is yuba.

Note 1. This is the earliest English-language document seen (May 2012) that uses the term "dried soymilk film" to refer to yuba.

"I have served yuba to people visiting from Japan and had them ask me what it was." Yuba is popular in China and parts of southern Asia. It can be eaten fresh or dried. "Yuba is available in Oriental markets in the United States, but chemicals have usually been added during production." A photo shows various dried yuba sheets and dried yuba sticks on a shallow, round, woven Japanese tray (p. 92).

Tofu ("soybean cake"), yuba ("soybean film") and natto ("fermented soybeans") are all examples of soybean products (*daizu seihin*) (p. 139).

In the section on *Nimono*—"Poached dishes" is a recipe for yuba and kikurage ("Soak 2 oz. yuba and cut into 1-inch pieces," p. 186).

Concerning *tonyu* (soymilk): It is mentioned only in the recipe for homemade tofu—using "2 cups *daizu* (soybeans) and ½ teaspoon *nigari* (coagulant)" (p. 142-43).

Note 2. Koji, miso, miso soup, miso-dama, natto, shoyu, tamari, and tofu are each discussed in detail in separate records. Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

7633. Homma, Gaku. 1991. Miso, miso soup, miso-dama, and tamari (Document part I). In: Gaku Homma. 1991. *The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World*. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• **Summary:** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, homes, etc.

Here we will discuss only those parts of the book relating to miso, miso soup, miso-dama, and tamari: The author arrived in Denver, Colorado, in 1977. One day an Aikido student of his took him to a local health food store. In the Japanese section he found hijiki, wakame, nori, miso, and soba. To his surprise, he found that although the foods were expensively priced, each was of “third-rate quality” (p. 5).

He started a Japanese restaurant in Denver, but never advertised it as a health food restaurant. Would anyone serve unhealthy food in a restaurant? Occasionally there would be customers with questions such as, “What kind of miso or shoyu do you use?” He realized that many customers were worried about their diets, rather than being grateful that they had enough food and that they could had the freedom to choose to eat whatever they wanted (p. 11).

He was born in Akita, in northeastern Japan, where the winters are harsh, and traditional people stored foods for winter survival. Some vegetables were buried in miso (soybean paste). Some soybeans were also preserved by making them into miso, which was a *hozonshoku* (preserved food) (p. 16, 18).

During the Kamakura period [1185-1333] Zen Buddhism became very popular with the samurai. Since Zen forbade the consumption of any warm-blooded animals, the diet was strongly affected. One popular food was “*kanbutsu* (lightly salted, dried fish) flavored with a mixture of soy sauce and miso called *hishio*” (p. 26). A photo shows Zen priests, heads shaved, eating in a monastery. Note: *Hishio* was similar to Chinese soybean jiang, a mash with the consistency of thin congee [rice porridge] or apple sauce; it could be separated by straining or filtering into liquid soy sauce [like tamari], with the solid residue being somewhat like miso, although with less flavor.

During the Muromachi period [1336-1573], Zen Buddhism continued to influence the Japanese diet, which consisted mainly of rice, cooked vegetables, and an early form of miso named *namé miso* (“lick miso” [finger lickin’ miso]) (p. 27).

In traditional Japanese farmhouses, fish or fowl were sometimes marinated with salt and miso or tamari (juice from making [soybean] miso), “flash-seared on both sides to seal in juices and flavor, then stuck into the *venkei* (bamboo basket stuffed with rice straw used to store foods above the

sunken open-hearth fireplace {*irori*}) to be smoked” (p. 32).

In traditional farmhouses, if there was more meat than could be eaten during lunch and dinner, “the rest was marinated in miso and tamari. The miso would keep the meat from spoiling during the night. The next morning the meats were rinsed lightly, seared, and put in the *venkei*” for the rest the working day. When the family returned for a meal, the meat was ready to eat” (p. 38).

Fishermen would mix their cooked rice with *umezu* (the juice left over after pickling umeboshi salt plums). And they would eat fresh fish with their *umezu* rice balls. First they would split the fish in half from the inside out—without using a knife. Then they would dip the fish in tamari or miso, and eat it uncooked, on the spot. Sometimes the tamari was mixed with wasabi (Japanese green horseradish) as a dip. Wasabi is a sterilizing agent, served with sushi to this day (p. 39).

A dish found in Homma’s home town of Akita is called *kayaki* or *kai yaki*, which means “shell bake.” “A large scallop shell is placed over the fire and filled with fish, tofu, and seasoned vegetables. Miso, soy sauce, or *shottsuru* (juice from pickling fish) as added for taste” (p. 40).

In the Owu mountain range of northeastern Japan, men whose livelihood depends primarily on hunting are called *Matagi*. “These people also farmed, but they were takers of life.” So their lives, like those of the fishermen, were restricted and controlled by religious customs. On long hunting trips, the only food or “flavoring they carried was a dried ball made out of soybean paste called *miso dama*. All they had to do was to add water to make miso or miso soup (p. 42).

After the Tokyo Olympics in 1964, “Japan became a country inspired by consumerism.” Japanese wanted to be like Americans. In “modern” families, the husband and wife both began to work outside the home. In the evening, just as the husband walked through the door, the wife would tear open a pouch of instant *misoshiru* (miso soup) and add hot water—“looks so real and tastes so good”—as they chased the American dream (p. 46).

Table manners: “When you are being served a meal, your chopsticks should lay horizontally in front of you at the close edge of the table. Your rice bowl is on your left and your miso soup is on the right...” In Japanese restaurants in the USA, when serving dinner, they usually serve a salad and then *misoshiru* or *osumashi* (clear soup) before the meal (p. 56-57).

When you are a guest in a Japanese home, you “can only ask for *misoshiru* a second time. This is very formal; if it is a casual situation the rules are not as strict, yet manners are important in all situations” (p. 58).

Slightly sour Chinese cabbage mixed with tofu and chopped *negi* (Japanese onion [or leek]), “simmered with water, miso, and *sakekasu* (rice wine lees), makes a delightfully sour dish...” “The first bulbs to appear after the

winter snow melted belonged to the *fuki* (butterbur) plant. “These bulbs were seasoned with miso and roasted, or made into *sunomono*” (seasoned with rice vinegar) (p. 66).

“Miso and tamari—soybean by-products: Making miso was traditionally a community effort that began May 21st or 22nd (*haru higan* or the spring equinox).” Soybeans are soaked overnight, boiled, drained, and poured into a large tub. Men wearing rice-straw shoes to protect their feet crush the beans. The women then shape the crushed beans, while they are still warm, into pyramids, squares, or balls, depending on the locality [just like with *meju* in Korea]. After the shapes have cooled, they are tied with rice-straw rope and hung under the eaves of the house (see 2 photos, p. 68). When the naturally occurring fungus [mold] begins to grow on the soybean shapes, it is said that “the flower has opened.” When the shapes are covered with a fragrant bloom of mold, they are transferred to the *misodaru* (large cedar miso tub). Just before miso making time this tub is filled with water or weighted with rocks and soaked in a river so that the wooden staves would swell tight. It is then tested for leaks. Salt and water are added and the tub is covered. From time to time the cover is removed and the miso is stirred to enhance the fermentation process. This farmhouse method of making soybean miso is simpler than that which requires the use of koji, and the miso has a saltier taste.

While soybean miso is fermenting, a dark, rich, delicious liquid gathers at both the top and bottom. This is collected and called tamari (or miso-damari), and is used in traditional farm houses like soy sauce. In the countryside, shoyu (soy sauce) was traditionally made “as a cash crop to be sold in the cities. The mountain people and country farmers couldn’t afford shoyu, so they used tamari or taremiso instead.

As a child, it was Homma’s job to crush the boiled soybeans. His family used koji. The traditional farmer keeps a storage shed for the tubs of miso and pickles near his house—but not too near. “City people sometimes use the phrase ‘you smell like miso’ to mean that you come from” the countryside.

“Sometimes on larger farms, miso was stored for up to eight years. To have old miso in your house meant that you had a large, prosperous family” (p. 67-69). Continued. Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido ad Cultural Center, Denver, Colorado.

7634. Homma, Gaku. 1991. Miso, miso soup, miso-dama, and tamari (Document part II). In: Gaku Homma. 1991. *The Folk Art of Japanese Country Cooking: A Traditional Diet for Today’s World*. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• **Summary:** Continued (p. 72): *Kojikabi* is the koji mold [*Aspergillus oryzae*]. Koji (made from either steamed rice or barley) and its mold serve as a source of enzymes, which break down [hydrolyze] starches into sugars and proteins

into amino acids, in the process of making both miso and shoyu. Koji is also used to make sake, and in farmhouses it was used to make *nigorizake* (unrefined sake, also called *doburoku* or *ohho*) in parts of the northeast prefectures. Nigorizake has been made from *genmai* (brown rice) since the Edo period (1600-1868). (p. 72).

Japan’s traditional “seasonings are still undergoing change to suit current tastes [and lifestyles]: witness ‘lite’ soy sauce and reduced-salt miso!” (p. 74).

A photo shows *miso dama* [which could be called miso koji] and konnyaku dama hanging from the eaves of a traditional farmhouse (p. 83, 85).

There are many ways to preserve fish; one way is to marinate them with miso or tamari (which also add a subtle flavor) and then to dry them. Fish and shellfish (*gyokai-rui*) which have been dried are called *himono* (p. 90).

Homma has childhood memories of morning kitchen sounds. Rice being washed, snapping of kindling to start a fire under the *kama* (rice pot), “the sounds of chopping, as the tofu and scallions were cut for the miso soup” (p. 104).

A whole fish can be used by a single person with no waste. “One section can be eaten fresh that day. The second can be marinated in shoyu or miso for six to seven hours and frozen; this way it is ready to bake and eat at any time” (p. 112).

Breakfast—Setting the table. The simplest breakfast includes *ichihan*, *ichiju*, and *issai*, which means one bowl of rice, one bowl of soup, and one side dish. This simple breakfast is served during religious training, eaten for four or five days consecutively before a fast, or eaten to change one’s diet or to lose weight.” “The *ichiju* is either a kombu- or shiitake-based miso soup or a clear soup. The *misoshiru* contains a god balance of tofu and vegetables.” The many *issai* include *tsukemono* (a variety of vegetables pickled with miso, salt, shoyu, or *nuka* {rice bran}), and *yakimono* (fish grilled either plain or marinated in shoyu, miso, *sakekasu* {rice wine lees} or *nuka*) (p. 122).

Okayu is rice porridge. “If you take plain okayu and mix in vegetables, fish, and miso or shoyu, you have *zosui* (p. 125).

“Morning side dishes: Tsukemono—pickles. Originally tsukemono were vegetables pickled in miso. Miso was called ‘ko’ in earlier times. *Ko no mono* [literally “fragrant things”; *ko* is the Japanese character for “fragrance”] is the old name for pickles.” Today miso pickles are still made in Japan, but salted pickles are more popular (p. 126).

Recipe for *miso zuke*—Pickles made with miso (p. 132).

Yakimono—Grilled and broiled dishes (for breakfast):

One way to prepare fish for breakfast is to marinate them for 1-3 days in miso, shoyu, or *sakekasu* (saké lees). A recipe for *Kasu zuke yaki*—Fish marinated in rice wine lees is given (p. 144, 146).

Recipes for *Nasu no miso ni*—Japanese eggplant sauteed with miso, Tekkamiso—Soybeans and burdock sauteed with

miso (p. 151).

Misoshiru—Miso soup: *Misoshiru* is an integral part of the traditional Japanese breakfast. Japanese farmers started their workday very early. Traditionally they began their day with a large pot (*nabe*) of grains, cereals, vegetables, and miso mixed together to make a porridge like *zosui*. In the last 50 to 60 years the *misoshiru* and rice have been served separately in the traditional Japanese breakfast. There follows a detailed, very interesting 7-page discussion of the art of making and consuming miso soup. Homma has found nothing that evokes as much gratitude and delight from Japanese traveling in the USA as to be served real miso soup. “For myself, if I think of my mother’s *misoshiru* I become the most homesick!” “The most important point to consider when making *misoshiru* is timing.” The best time to add the miso (which has been mixed with a small amount of dashi to dissolve it) to the soup is just as everyone is sitting down to the table to eat. “As soon as it starts to boil, remove it from the heat and serve.” Three recipes are given for making *misoshiru dashijiru*: (1) With kombu and shiitake. (2) With kombu and katsuobushi. (3) With niboshi or yakiboshi (dried sardines or anchovies). Thirteen miso soup recipes are given: (1) Tofu and wakame. (2) Wakame and potato (*jagaimo*). (3) Wakame and shiitake. (4) Sliced tofu and negi leeks. (5) Bits of tofu (*kuzushi tofu*) with spinach. (6) Cabbage with agé (deep-fried tofu puff), (7) Soybean sprouts (*daizu no moyashi*) with agé. (8) Snow peas with agé. (9) Daikon (Japanese white radish) and carrots. (10) Onion and potato. (11) Kabocha (Japanese pumpkin). (12) Sweet potato (*satsuma imo*). (13). Asari or hamaguri (short-neck clam or regular clam). Diagrams (p. 158) show 3 ways (from 3 dishes to 6) of setting the breakfast tray (*ozen*).

Aemono recipes: *Shiraae*—Vegetables and tofu flavored with miso. *Kaiso no ume shiraae*—Sea vegetables and tofu flavored with miso and pickled plum. *Burokkori no shiraae*—Broccoli and tofu flavored with miso and pickled plum. *Nanohana no ume shiraae*—Rapeseed leaves and tofu flavored with miso and pickled plum. *Sayaingen no goma misoae*—Green beans flavored with miso and sesame seeds (p. 178-80).

Nabemono (one pot) recipes: *Tsumire nabe*—Fish ball and vegetable casserole flavored with soy sauce [and miso]. *Nabemono* with miso flavor base: *Butaniku or toriniku nabe*—Pork or chicken and vegetable casserole flavored with miso. *Gyuniku nabe*—Beef and vegetable casserole flavored with miso. *Kaisen nabe*—Seafood casserole flavored with miso (p. 226-28). Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido ad Cultural Center, Denver, Colorado.

7635. Homma, Gaku. 1991. Natto (Document part I). In: Gaku Homma. 1991. *The Folk Art of Japanese Country Cooking: A Traditional Diet for Today’s World*. Translated by Emily Busch. Berkeley, California: North Atlantic Books.

xii + 270 p.

• **Summary:** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, houses, etc. He uses the Japanese words first, then explains what they mean (in parentheses) in English. Thus the book makes it easy and enjoyable to learn Japanese food-related words. Moreover, the book is brimming with interesting information about traditional soyfoods in Japan.

This record will focus on natto, which originated in Japan in the northeastern provinces (*Tohoku Chiho*) where the author lived.

In the index (p. 276), under “Soybean products (*daizu seihin*),” he defines three different types of natto: (1) Fermented soybeans (natto). (2) Slightly crushed natto (*hikiwari natto*). (3) Whole bean natto (*tsubu natto*). He notes that natto is discussed mainly on page 139.

In Chapter 3, “The background of Japanese staple foods,” in the section titled “Products used daily” (p. 94-100) is a subsection on “Natto—Fermented soybeans” (p. 97): “*Natto* is a very popular item on the Japanese breakfast table, but either you love it or you hate it; there is no middle ground. *Natto* is boiled soybeans that have been fermented by introducing the natto fungus [sic, natto bacterium, *Bacillus subtilis*]. Open a package of natto and the first thing to hit you is a very strange aroma. If you stir it, it becomes sticky. Someone watching this might say ‘yech.’ The translator of this book, Emily, is one of these people. Although she has lived in Japan and traveled extensively in Southeast Asia, she says ‘Natto is not for me.’

“Like the tofu peddler, the natto peddler came every morning. Now natto is available throughout Japan, but in the past, because of the growing conditions needed to produce it, many people had not eaten natto in southern Japan. Some of the visitors I have had at Nippon Kan, especially the young [Japanese] visitors who lived south of Osaka, had never tasted natto.

“The weather in northern Japan is favorable for the natto fungus [sic]. Traditionally it was common for the farmers to make their own natto at home. I have tasted homemade natto from many different parts of Japan. Like most traditional foods, the taste and texture varies depending on the location and the family recipe.

“The first natto was discovered, it is thought, when soybeans stored for safekeeping became contaminated with water and created the appropriate environment for the natto fungus [sic]. Historically, many Japanese foods were discovered accidentally, such as in the course of storing or preserving foods.

“Since its initial discovery, the process has been isolated and developed in a controlled procedure.

“To eat natto, pour it from its container into a bowl and

stir vigorously with chopsticks until it turns sticky. Then add miso or tamari and shoyu or umeboshi (pickled plums) to suit your taste. Spoon it over rice and eat. Although some people may not agree, I find it tasty.

"I met a very old woman in Denver [Colorado, USA] who was a wonderful traditional Japanese cook. She knew all of the techniques for making homemade sake, natto, tofu, umeboshi and tsukemono—everything in her kitchen was homemade. Sometimes this old woman would make natto and bring it to my home. It did not taste like the natto available in grocery stores. She fermented the soybeans in a styrofoam cup using plastic bread wrappers for a cover. She then wrapped the cups in layers of crumpled newspaper as insulation to keep them warm. So you see, traditional Japanese methods can have a place in modern America."

In Chapter 5, "Country meals," the section titled "Breakfast (*Choshoku*)" (p. 120-58) notes (p. 121-22): "The most simple breakfast includes *ichihan*, *ichiju*, and *issai*, which means one bowl of rice, one bowl of soup, and one side dish. This simple breakfast is served during religious training, eaten for four or five days consecutively before a fast, or eaten to change one's diet or to lose weight.

"Prior to a fast, this meal is served in less and less quantity until the first day of the fast when *okayu* [rice porridge] is served... Traditionally, the *ichihan* or *meshi* (cooking rice) used for the breakfast meal is brown rice or barley or 60% white rice mixed with 40% barley. The *ichiju* is either *kombu*- or *shiitake*-based miso soup or a clear soup. The *misoshiru* (miso soup) contains a good balance of *tofu* and vegetables. There are many *issai* (called *okazu*) but they can be divided into the following basic categories: *tsukemono* (a variety of vegetables pickled with *miso*, salt, *shoyu*, or *nuka* (rice bran)); *ohitashi* (a variety of vegetables boiled quickly and flavored with *shoyu*); *daizu seihin* (*tofu*, fried *tofu* cutlets, grilled *tofu*, *natto* and other soybean products); *yakimono* (fish grilled either plain or marinated in *shoyu*, *miso*, *sakekasu* {rice wine lees}, or *nuka*); and *jobina* (a variety of dishes prepared and stored in the refrigerator to be eaten anytime).

"One or more side dishes are selected from these categories; you don't eat them all in one meal! Every morning you can arrange a new combination. Interestingly, as you increase the number of side dishes the portions of each decrease, so that you are always serving the same amount of food...

"Long ago Japanese people did not eat sitting around large tables. When sitting around the *irori* [sunken fireplace], a small tray was placed on the right side of each person. On each tray was a small side dish plate... After the meal, warm water was poured into their rice bowl and they used their chopsticks to clean it. After a sip of the water was taken, it was poured into the soup bowl, swirled around, sipped again, poured into the side dish plate, swirled and drunk... No washing required! We can conclude from this that the foods

being eaten at the time were not oily, as the dishes could be easily cleaned with hot water." Note: This may well be the origin of the Zen *oryoki* (nested eating bowls and chopsticks wrapped in white cloth) and its ritual.

Also in Chapter 5, under "Breakfast," is a section on "*Daizu seihin*—Soybean products," which includes a subsection on "Natto—Fermented soybeans" (p. 139): *Natto* is a very popular breakfast food made by stuffing boiled white [yellow] soybeans into a *tsuto* (casing made from rice straw) and leaving them to sit in a warm, darkened room. Before they are stored, a natural natto fungus [sic, bacterium] is introduced to start the fermentation process. The result is *natto*, which has a sticky 'goosey' texture and a pungent odor. Most Americans in my experience turn their noses up at the sight (and smell) of *natto*. Continued. Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

7636. Homma, Gaku. 1991. Natto (Document part II). In: Gaku Homma. 1991. The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• **Summary:** Continued (p. 139). "When making *natto*, the mixing bowl needs to be completely clean and free from any traces of salt. The natto fungus [sic, bacterium] is easily destroyed by salt. Salt is used to preserve most Japanese foods but *natto* is completely opposite.

"There are two kinds of *natto*. The first is called *tsubu* and is made from whole soybeans. The second is called *hikiwari* and is made from slightly crushed soybeans.

"Commercially made *natto* can be found in the frozen section of your local Oriental market for about one dollar. There are many different brands to choose from. Defrost the *natto* to room temperature before eating. Making *natto* from scratch involves a fairly complicated procedure. This book will concentrate on how to enjoy commercially produced *natto*.

A sidebar across the bottom of page 139 is titled "How to eat natto:" "1 package natto (*tsubu* or *hikiwari*).

"Suggested garnishes include chopped scallion, cilantro, parsley, trefoil, seaweed, Japanese hot mustard, seven-taste pepper [*shichimi togarashi*], and ginger.

"A. If frozen, defrost natto at room temperature. Remove from package and put in a bowl. Stir vigorously with chopsticks until sticky. Fold in one or two types of garnishes. 1 teaspoon each, and stir vigorously.

"B. Choose from 1 teaspoon shoyu, 2 or 3 pinches of salt, or 1 teaspoon miso. Add and stir again.

C. If you like it spicy, add Japanese hot mustard, seven-taste pepper, or thin matchstick slivers of ginger to taste. Other garnishes include soaked *sukikombu* [sliced dried Laminaria kelp soaked and dried in thin sheets] and *funori*

(floating seaweed; [*Gloiopeltis furcata*]).

“Follow steps A, B, and C just before meal time.

“D. Serve with a bowl or warm white rice. Place about 1 teaspoon of *natto* onto your rice and eat them together. The chopsticks used for serving *natto* are separate from your own chopsticks because the *natto* is so sticky. Try not to touch your own chopsticks to the *natto*; touch the rice only. If your chopsticks do touch the *natto* they will become slippery and other foods will tend to slip. Another method is to use the *nori* (dried strips of [paper-thin] seaweed) to pick up the *natto* and rice. Place a 2-inch square of *nori* on top of the *natto* and with your chopsticks scoop up a bite of *natto* and rice wrapped in *nori*. This method is the least sticky.”

On page 170 is a recipe for Natto soba, in which 3 oz. of *natto*, stirred until sticky, is used in place of grated Chinese yam in Tororo soba. *Soba* is the Japanese word for “buckwheat noodles.” Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

7637. Homma, Gaku. 1991. Koji (Document part). In: Gaku Homma. 1991. *The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World*. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• **Summary:** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, houses, etc. He uses the Japanese words first, then explains what they mean (in parentheses) in English. Thus the book makes it easy and enjoyable to learn Japanese food-related words. Moreover, the book is brimming with interesting information about traditional soyfoods in Japan.

This record will focus on koji (p. 72, 73) which originated in China, where it is called *qū* or *ch'u*.

Koji is mentioned in the section on making miso and tamari. “To make modern commercial miso, koji is added as a catalyst to start the fermentation process. Koji is malted rice or sometimes barley, although rice koji is the most popular. *Shiro miso* or white miso has a high percentage of koji. *Aka miso* (red miso) has a lower percentage... It was my job as a child to crush the boiled soybeans used to make miso. The crushed beans were then poured into a wooden tub, mixed with koji, covered and left to ferment for an average of six months to a year” (p. 67-68).

In the section on *Shottsuru*: “The end of November and December in my home town of Akita was the season for *hata hata* or sand fish. Thousands and thousands were caught at sea or were washed up on shore in what looked like an invasion.” “For many years, *hata hata* was the source of winter protein in Akita and the surrounding areas... A favorite

delicacy was *sushizuke*, which was *hata hata* mixed with koji and white rice in large quantities (sometimes 60 gallons). The mixture was left in a large press to pickle. As the koji and white rice fermented, the vinegar produced preserved the fish. The press kept poisons [toxins] from forming by limiting the access to oxygen” (p. 69).

In the section on *Kanmi* (sweets): “Rice or barley (rice being the more popular of the two) is steamed and mixed with *kojikabe* [also called *tané koji*] (a mold that changes starches to dextrose) to make koji. Koji you remember is used as a catalyst to make miso and shoyu.

“Because of the high starch content in rice, if this koji is brewed and distilled, it becomes quite sweet. This unique sweet taste from fermenting koji is the basis for making *saké* (drinking rice wine) and *mirin* (cooking rice wine).

Today sake is drunk all over the world. In the old days, sake was too expensive for farmers and common people. The farmers drank *nigorizake* [*nigori-zake*], which was homemade sake. This *nigorizake* did not go through the final filtering separation process, so it was not clear like the sake we see today.

“About 60 or 70 years ago, a new government liquor law was instigated to control the production of homemade sake. It became illegal to brew sake. Of course, unlawful brewing continued. In my hometown area the local word for *nigorizake* is *doburoku* or *ohho*. This *doburoku*, brewed in secret under penalty of law, was most delicious. Today it is no longer illegal to produce *nigorizake* to be sold in liquor stores so long as the producers pay an alcohol tax.” “*Nigorizake* has been made from *genmai* (brown rice) since the Edo period (p. 72).

“To make *mirin*, *nigorizake* is filtered to separate the clear sake from the dregs or lees (the later is called *sakekasu*). Distilling this *sakekasu* results in *shochu* (distilled spirits). *Mirin* is the result of fermenting and straining *shochu*, adding it to steamed sticky rice and koji, and fermenting the lot together. *Mirin* is the most popular sweetener used in Japanese cooking” (p. 73). Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

7638. Homma, Gaku. 1991. Shoyu (Document part). In: Gaku Homma. 1991. *The Folk Art of Japanese Country Cooking: A Traditional Diet for Today's World*. Translated by Emily Busch. Berkeley, California: North Atlantic Books. xii + 270 p.

• **Summary:** This is a remarkable book by a remarkable man, with many deep insights into both traditional and modern cultures in Japan and the USA; it gives a unique, authentic view of Japanese culture, and makes liberal use of the Japanese names for things, such as food, utensils, techniques, houses, etc. He uses the Japanese words first, then explains what they mean (in parentheses) in English. Thus the book

makes it easy and enjoyable to learn Japanese food-related words. Moreover, the book is brimming with interesting information about traditional soyfoods in Japan.

This record will focus on shoyu (soy sauce). Pages 68-69: While farmhouse miso is fermenting in a tub, juices leak from the bottom and are collected underneath. This flavorful liquid is called *tamari* or *taremisō*; it is much different from the commercial *tamari* sold in the United States.

Page 122: Japanese pickles (*tsukemono*) are vegetables pickled with miso, salt, shoyu, or rice bran (*nuka*).

Page 129: A recipe for Pickled Japanese white radish and carrots (*Daikon to ninjin zuke*) calls for 1 tablespoon shoyu as an ingredient.

Pages 136-40: Various recipes, including Ohitashi, Tororo imo, Grated daikon, and steamed Japanese eggplant call for shoyu as an ingredient. Shoyu is also a required seasoning for natto and Chilled tofu.

Pages 146-50: Shoyu is used to season various grilled fish dishes, and pre-prepared side dishes (*Jobina*).

Page 172-74: Shoyu is a standard seasoning for wheat-flour noodles (*udon*), for various *aemono* recipes (p. 180-82), for simmered land and sea vegetables (*nimono*) (p. 186-88), other for tofu dishes as well as chicken, beef, pork, and fish dishes (p. 190-98, 203-06, 208, 218, 222, 226). Address: Former owner and head chef, Domo restaurant, Denver, Colorado. Founder and chief instructor Nippon Kan Aikido and Cultural Center, Denver, Colorado.

7639. Kikkoman K.K. 1991. Dai 73 ki jigyo hōkoku-sho. Heisei 2 nen 1 gatsu 1 nichi–Heisei 2 nen 12 gatsu 31 nichi [73rd annual financial report. From 1 Jan. 1990 to 31 Dec. 1990]. Tokyo, Japan. 13 p. 20 cm. [Jap]

• **Summary:** Color photos show most of Kikkoman's main products. Address: Tokyo, Japan.

7640. Landwehr, John; Krog, P.C.J. van der. 1991. VOC: A bibliography of publications relating to the Dutch East India Company, 1602-1800. Utrecht, Netherlands: HES Publishers. xlii + 840 p. + xvi p. of plates. Illust. Facsim. 28 cm. *

• **Summary:** In Dutch, VOC is an abbreviation of Vereenigde Ost-Indische Compagnie.

7641. Mallalieu, Huon L. 1991. The illustrated history of antiques: the essential reference for all antique lovers and collectors. London: Quarto Publishing. 640 p. Illust. Maps. Index. 29 cm. [soy ref]

• **Summary:** In chapter 10 titled "Glass," by Perran Wood, under "The 18th Century" (p. 488) is a caption to a "Soy Cruet Bottle." English c. 1780. Sets of deep blue, green and, more rarely, amethyst decanters, rinsers and cruet bottles (such as this one) became popular in England towards the end of the 18th century. They were placed in stands and marked in gilt with the contents."

A color photo shows this beautiful bottle, with gold

lettering and designs on a purple background." Address: Authority on antiques, London.

7642. Passmore, Jacki. 1991. The encyclopedia of Asian food and cooking. New York, NY: William Morrow. 320 p. Illust. by Jan Smith. Index. 24 cm. [44 ref]

• **Summary:** The most complete book of its type seen to date (May 2010), with many helpful cross references (sometimes flawed). Soyfoods are mentioned throughout. Unfortunately, for Chinese foods, the author does not distinguish between Mandarin and Cantonese, or between pinyin (newer) and Wade-Giles (older) styles of romanization. For some of the "Also known as" it is not clear to which of several previous entries this refers (see "Soybean").

Ame (ah meh, Japan): A sweet jelly made from millet.

Azuki bean (*Phaseolus angularis*). Native to China; used in China since the Han Dynasty (206 BC–AD 220): An [or anko] (Japan): A sweetened paste of ground azuki beans available in smooth (*koshi-an*) and crunchy [chunky] (*tsubu-an* or *tsubushi-an*). *Sarashi-an*: A flour of ground azuki beans. Also known as *hong dow* (China), dried red beans, red beans [*adzuki* beans, *aduki* beans]. See also: Red bean paste, sweet.

Bean curd: Also known as *dou-fu*, *dow foo* (China); *tahu* (Indonesia), *momen tofu*, *tofu* (Japan); *ta hu*, *ta hua* (Malaysia); *tahure* ([fermented tofu] Philippines); *tauhu kau* (Thailand); *dau hu*, *dau hu chung* (Vietnam); bean custard, soybean cake. Illustrations of: Fried bean curd, pressed bean curd. Almond bean curd (non-soy). Bean curd "brains": Also known as *doufu nao* (China); *taho* (Philippines). "Cotton" bean curd: Also known as *momen tofu* (Japan). Freeze-dried bean curd: Also known as *char doufu*, *doufu pok* (China); *agedofu*, *atsu-age*, *nama-age* (Japan); *tauhu tod* (Thailand), *dau hu chien* (Vietnam). Fried bean curd pouches: Also known as *aburage*, *usage* (Japan). *Gan modoki*. Grilled bean curd: Also known as *doufu kan* [sic], *gone* (China); *yakidofu* (Japan). Instant bean curd. *Okara*. Pressed bean curd: Also known as *doufu kan* (China), *taukwa*, *tauhu kuning* (pressed yellow bean curd) (Indonesia, Malaysia); *tokwa* (Philippines); *tauhu leong* (Thailand); *dau hu ki* (Vietnam). Silk bean curd: Also known as *kinugoshi tofu* (Japan), *shui doufu* (China), *taho* (Philippines).

Note: The author seems to be confused about "Silk bean curd." Japanese *kinugoshi* is made from relatively thick soymilk, which is "set" using a coagulant but without any separation of curds and whey. Yet on page 26 we read: "In China the name [for silk bean curd] translates as 'water bean curd,' It has a very smooth, delicate texture achieved by straining the coagulated liquid through fine mesh, then allowing the strained curds to settle without pressing." This is not a description of silken tofu, but rather of Japanese regular tofu (*momen-goshi*) made without any pressing weights.

Contains a recipe for homemade "Bean Curd" plus 3 bean curd recipes.

Bean curd by-products: Bean curd skin [yuba], bean curd sticks: Also known as fu jook pin, gee jook (China), yuba (Japan), forng ta ohu [tauhu] (Thailand); rolled bean curd, second bamboo.

Fermented bean curd: Also known as foo yu, fu-ru, narm yu (China), tahoe, tahu (Indonesia, Malaysia), tausi (Philippines), bean curd cheese, Chinese cheese, pickled bean curd, red bean curd, soybean cheese.

Moldy bean curd. Bean curd cheese: See bean curd by-products (fermented).

Bean pastes and sauces: Shih and jiang from China: (1) Bean sauce (jiang) also known as taucheo or tau sa (Malaysia, Nonya and Singapore cooking), mien see [mian shi] (China), taoco [Pron. = tao-cho] (Indonesia), tuong ot (Vietnam), bean paste, brown bean sauce, yellow bean sauce. (2) Black bean sauce (a recent addition to the family of Chinese sauces. A major ingredient is puréed fermented black beans with a hint of garlic and star anise. It tastes best when freshly made). (3) Chili bean paste (in addition to chopped dried chilies, it sometimes contains fermented black beans): Also known as lat chu jeung, as lat chu jeung yau (Garlic) (China); kochujang (Korea); bean paste with chili; hot bean paste; Sichuan hot bean paste. (4) Dhwen-Jang (Korea). See also miso. (5) Hoisin sauce (China): A sweet, thick, reddish brown sauce. One ingredient is fermented soybean paste. Not to be confused with the Chinese barbecue sauce called sha cha jang. Also known as hoi sin cheung (China); barbecue sauce. (5) Soybean paste. Also known as mean see jiang (China). (6) Sweet bean paste. In this context it is not the sweet bean paste made from azuki beans, but rather a sweet, thick, dark brown sauce made of ground fermented soybeans and sugar. Its salty-sweet flavor is used in marinades and roast meats. Also known as tim mean jiang (China).

Bean sprout: Mung bean sprouts, silver sprouts (mung bean sprouts with the roots and seed pods removed), soybean sprouts. Also known as: Daai dau nga choy (soybean sprout), ngunn nga choy (silver sprouts), nga choy, sai dau nga choy (mung bean sprout) (China); tauge (Indonesia); moyashi (Japan); kacang ijo, kacang djong, kacang padi (Malaysia); togue (Philippines); taun gawk (Thailand); gia (Vietnam); bean shoots.

Beijing duck sauce (recipe with ½ cup sweet bean paste). Vietnamese-style Beijing duck sauce (with ½ cup sweet soy sauce–kecap manis).

Black bean: See Fermented black bean. Black bean sauce: See Bean pastes and sauces. Fermented black bean sauce. Black soybean: See soybean.

Broad bean paste. Broad bean sauce: “The best is made in Pixian, a city in Sichuan province, where it is used instead of soybean-based seasoning sauces.”

Brown bean sauce: See Bean pastes and sauces.

Che hau sauce (Che how, China): See Bean pastes and sauces (Hoisin). Chick-pea.

China: Has the “oldest and most well-documented cuisine in the world.” Chinese cheese: See Bean curd by-products (fermented). Chinese hot bean paste: See Bean pastes and sauces.

Dau hu (Dow hoo, Vietnam): See bean curd. Dau hu chien (Dow hoo chee-ian, Vietnam): See Bean curd, fried. Dau hu chung (Dow hoo chee-ung, Vietnam): See Bean curd. Dau hu ki (Dow hoo kee, Vietnam): See Bean curd, pressed.

Dengaku (plus recipe).

Dhwen-jang (Dwen-jang, Korea). Similar to Chinese soybean paste or Japanese akadashi miso. Also known as Korean bean paste. Doufou Kan [doufu gan], China: Bean curd (grilled, pressed). Dou-fu (Dau-fu, China). See Bean curd. Doufu nao (Dau-fu-nou, China): See Bean curd “brains.” Doufu pok (dau-fu pork, China). See bean curd, fried. Dow foo (dau fu, China): See Bean curd.

Edamame (e dah ma meh, Japan): See soy bean.

Fermented bean curd: See Bean curd by-products. Fermented bean curd cake. See Bean curd by-products; tempe.

Fermented black beans (Shih, China). With recipe for “Fermented black bean sauce” (p. 106). Also known as dau see (China), black beans, dried black beans, preserved black beans.

Fermented red rice. Flours and thickeners: Kuzu (Japan). Mung bean flour. Soy flour (incl. kinako). Foo yu (Fu you, China). See Bean curd by-products (fermented). Forng Tao Hu (Fong tao huu, Thailand). See Bean curd by-products, bean curd sticks. Fu jook pin (Fu juk pin, China): See bean curd by-products, bean curd skin. Fu-ru (Fu yue). Gee Jook (Ji Juk, China): Bean curd sticks.

Gluten: Kau fu, kohana fu, matsutake fu, mein jin pau, nama fu, su tang, yaki fu. Also known as: Kau fu, mianjin, mein jin pau, su tang (China), kohana fu, yaki fu (Japan).

Gochujang (Korea). See also: Chili paste, chili sauce. Korean barbecue sauce.

Grilled bean curd: See Bean curd, grilled.

Hatcho miso: See miso, Hatcho. Hot bean paste. Hot black bean sauce. Inaka miso: See miso.

Japan: “Japanese cooks revel in the artistry of their craft. The Japanese love of nature is a challenge to present each ingredient as reminder of its origins: to bring nature to the table....” Regional cuisines are not of great importance in Japan; cooking methods (incl. Dengaku), salting (incl. Teriyaki), cutting and slicing techniques.

Kecap asin (Ket-chup a-seen, Indonesia): See Soy sauce, sweet and salty. Kecap cair (cha-ear, Malaysia): See soy sauce, light. Kecap hitam (Indonesia): See soy sauce, sweet and salty. Kecap ikan (Indonesia): See Fish sauce. Kecap manis (mah-niece, Indonesia): See Soy sauce, sweet and salty. Kecap petis (pet-is, Indonesia): See fish sauce. Kinugoshi tofu (Japan): See Bean curd, silk.

Kochujang (go-choo jang, Korea): See Bean pastes and sauces; chili pastes.

Koikuchi shoyu (Japan): See soy sauce. Continued.
Address: Author of several books on Asian cuisine.

Mianjin (China): Gluten.

Mien see (mien-si [mian shi], China): See Bean pastes and sauces.

Miso (Japan): (1) Hatcho-miso. (2) Inaka miso or Sendai miso. Also known as Red miso. (3) Shinshu miso. (4) Shiro miso.

Mochi. Monosodium glutamate. Also known as: Mei jing (China); aji-no-moto (Japan); servuk perasa (Malaysia); ve tsin (Vietnam), M.S.G., taste essence, taste powder.

Moyashi (Japan): See Bean sprout.

Mung bean. Also known as moong ke dal (India); kacang djong, kacang eedjo [hijau, katjang idjo] (Indonesia); kacang hiau (Malaysia); tau ngok (Thailand); dau xanh (Vietnam); green gram.

Nama-age (nah-mah ah-geh, Japan): See Bean curd, deep fried.

Nama fu (Japan): Raw / uncooked wheat gluten.

Natto (Japan). See soybean.

Noodles: (1) Bean curd noodles (China). Also known as Soy noodles, soy vermicelli.

Oils and fats: Soybean oil. (2) Bean curd skin noodles (China) [yuba noodles].

Peanut (with many foreign names and recipes).

Preserved black beans: See Fermented black beans.

Pressed bean curd: See Bean curd (pressed).

Red bean paste, sweet: “An important ingredient in Chinese and Japanese cooking, sweet red bean paste is made by boiling the red azuki bean and mashing it to a paste with lard or oil, then cooking it until it is fairly dry or thick. In Japan, red bean paste is made in two textures: the smooth purée is koshi-an and the chunky version, with the beans only partly crushed, is tsubushi-an. It is a filling for cakes and sweet buns, and is used in several desserts.” Also known

as hong dow sar (China), an (Japan). Contains a recipe for Sweet red bean paste.

Red rice: See Fermented red rice.

Rice: Many type of glutinous and non-glutinous.

Rolled bean curd: See Bean curd sticks [dried yuba].

Seaweed: Many different types. Seaweed gelatin or Seaweed jelly: See agar agar.

Sendai miso (Japan): See miso.

Sesame seed: Black sesame seed, sesame oil, sesame paste, white sesame seed.

Shinshu miso (Japan). Shui doufu (China): See bean curd (silk). Silk bean curd: See Bean curd (silk).

Soybean (*Glycine max*): (1) Black soybeans. (2) Fresh soybeans [edamame]. (3) Yellow soybeans. Soybean cheese: See Bean curd, fermented [fermented tofu]. Soybean condiment: See Bean pastes and sauces. Soybean milk. Also known as tau cheing, tau ni (China). With homemade soymilk recipe. Soybean noodle: See Noodles, bean curd. Soybean oil: See fats and oils. Soybean paste: See Bean pastes and sauces. Soybean sprout: See bean sprout. Soy flour: See Flours and thickeners.

Soy sauce: “An ancient seasoning, first used in China more than 3,000 years ago. Known in its original form as *shih*, it was a thin salty liquid in which floated fragments of fermented soybeans.” “Soy sauce is to Chinese and Japanese cooking what the pungent, salty fish sauce known as nam pla or nuoc mam is to Thailand and Vietnam respectively.” (1) Dark soy sauce. Also known as jang yau, see yau (China); koikuchi shoyu, tamari (Japan), kecap pekat (Malaysia); mushroom soy. (2) Light soy sauce: Thinner, saltier, and lighter in color and flavor. It is used in cooking where its light color will not spoil the color of the ingredients. Also known as sang chau, see yau (China), shoyu, usukuchi shoyu (Japan), kecap cair (Malaysia), toyo (Philippines), nam siew (Thailand), xi dau (Vietnam), thin soy sauce. (3) “Lu soy (China) is a ‘master sauce’ based on soy sauce with sugar, ginger, and five-spice. It is used for simmering poultry and other meats to give a rich flavor and to color the food a deep brown. Also known as lu shui (China).”

Soy sauce, sweet and salty: (1) “Kecap asin (Indonesia) is a thick, salty, dark soy-based sauce used to impart a strong color and flavor. Its sweet counterpart is *kecap manis*. It is similar to, but thicker than, several dark soy sauces used in Chinese cooking.” (2) Kecap hitam (Malaysia) is a sweet dark soy sauce. Slightly less spicy than kecap manis. (3) Kecap manis (Indonesia) is a sweet, dark, thick, aromatic soy sauce, especially widely used with satay. “It is similar to, though finer in flavor than, Chinese sweet soy sauce” [tian mian jiang]. Also known as kecap bentang manis (Indonesia); sweet soy sauce. (4) “Sweet soy sauce (China) is a dark, sweet sauce combining soy sauce, sugar, and malt sugar. Its distinctive malt-like taste goes well as a dip for fried snacks, poultry, and seafood.” It appears frequently on the table in homes and restaurants in Fukien province,

opposite Taiwan on the coast of south-eastern China. For a recipe, see Sweet soy sauce pork (p. 230). Note: This is not generally a commercial product. (5) Tim cheong (Malaysia) is a thick, sweet, black soy sauce, similar to that used in China. In Malaysia it is served with poh pia. Its flavor is closer to that of kecap hitam than to kecap manis.

Sprouts, soybean. See Bean sprout, soybean. Sushi (describes many types, with recipes). Sweet bean paste or Sweet bean sauce: See Bean pastes and sauces.

Taho (Philippine bean curd brains). Tahoe (Indonesia or Malaysia, fermented bean curd). Tahu (Malaysia bean curd). Ta hua (Malaysia bean curd). Tahure (Philippine bean curd).

Tamari (Japan): See soy sauce. Taucheo (Malaysia or Singapore, bean pastes and sauces). Tauge (Indonesia bean sprout). Tauhu kao (Thailand bean curd). Tauhu kuning (Indonesia and Malaysia bean curd pressed). Tauhu leong (Thailand bean curd, pressed). Tauhu tod (Thailand bean curd, fried). Taukwa (Indonesia and Malaysia bean curd pressed). Tau sa (Malaysia bean paste and sauces). Tausi (Philippines, bean curd products [sic, fermented black soybeans], fermented).

Tempe (Indonesia, Malaysia): Fermented soybean cake [tempeh]. Oncom [Ontjom]. Tokwa (Philippine bean curd pressed).

Tosa soy sauce (Japan): The classic sashimi accompaniment. Recipe given.

Tsukemono: Takuan, umeboshi.

Usu-age (Japan): See Bean curd (fried) purses.

Winged bean. Yuba (Japan).

Brief biography: "For more than twenty years she has been professionally involved with Asian food as a writer, teacher, publicist, researcher, consultant, and, of course, cook. She has traveled extensively in Asia and lived in Hong Kong for more than ten years, working as a food writer on a number of newspapers and magazines, which led to a career as a food consultant. Her most recent book, *Asia the Beautiful Cookbook* was listed by *Publishers Weekly* as one of the best books of 1987." Address: Author of several books on Asian cuisine.

7644. Shufu-no tomo. 1991. Anzen shokuhin no hon: Munôyaku, mutenka no honmono shokuhin otoriyose gaido [The book of safe foods: A guide for getting real foods without agricultural chemical or additives]. Tokyo: Shufu-no-tomo-sha. 144 p. Illust. 26 cm. Tokubetsu henshû (Special edition). Shufu-no-tomo Seikatsu Series. 26 cm. [Jap]

• **Summary:** This beautiful book is about Japanese natural foods, organically grown without agricultural chemicals and processed without chemical additives. It is packed with color photos and descriptions of the products, the people and companies that make them, and the places where they are made. The name, address, and phone number of each company is included. Miso (p. 16-20). Shoyu (p. 21-27). Natto and tofu (p. 76-78).

Amazake (p. 16-17): Koji-ya Saburouemon, Nakamura 2-29-8, Nerima-ku, Tokyo, Japan. Phone: 03-3999-2276. 100 years old, 6th generation.

Miso & Shoyu (p. 18): Sendai Miso Shoyu, Kojo 1-5-1, Wakabayashi-ku, Sendai-shi, Miyagi-ken 982, Japan. Phone: 022-286-3151.

Miso & tamari (p. 19): Nakamura Jozo, Tatsuno-cho 1536, Yokkaichi-shi, Mie-ken 510, Japan. Phone: 0593-26-0456. Started 70 years ago. 3rd generation. About 15 years ago started to make naturally fermented soy products.

Miso (incl. barley miso; p. 20): Shirouza Shoten, Meihama 3-3-27, Nishi-ku, Fukuoka-shi, Fukuoka-ken 819, Japan. Phone: 092-881-0413.

Shoyu made with whole soybeans (p. 21): Kikkogo Shoyu Kondo Shoyu Moto, Yamada 733, Itsukaichi-machi, Nishitama-gun, Tokyo 190-01, Japan. Phone: 0425-95-1212.

Shoyu (p. 22-23): Kadocho, Kita-machi 7, Yuasa-machi, Arita-gun, Wakayama-ken 643, Japan. Phone: 0737-62-2035. 5th generation.

Shoyu (p. 24): Yamaki Shoyu, Kotobuki 3-3-16, Honsho-shi, Saitama-ken 367, Japan. Phone: 0495-24-6161.

Unpasteurized miso, and shoyu (p. 25): Shoku Seikatsu Kenkyu-kai, Miroku-ji 83, Fujisawa-shi, Kanagawa-ken 251, Japan. Phone: 0466-22-0635. Started in about 1970.

Shoyu, amazake base, koji, miso (p. 26): Inoue Shoten (Igeta Shoyu brand), Owari-machi 57, Kitakyo, Nara-shi 630, Japan. Phone: 092-741-5360. 4th generation. Started during the Genji era (1864-65).

Shoyu (p. 27): Jokyu, Daimyo 1-12-15, Chuo-ku, Fukuoka-shi 810, Japan. Phone: 092-741-5360. Started 135 years ago.

Natto (p. 76): Kuroishi Natto, Fukuroi 1-74, Kuroishi-shi, Aomori-ken 036-03, Japan. Phone: 0172-52-3958. Started 60 years ago.

Natto (p. 77): Shojiki Mura, Nishitakao 5-237, Kitamoto-shi, Saitama-ken 364, Japan. Phone: 0120-421351. A relatively new company.

Tofu (p. 78): Kurihara Shoten, Endo 2022, Fujisawa-shi, Kanagawa-ken 252, Japan. Started in about 1977. Address: Tokyo.

7645. Vakirtzoglou, Euphrosini. 1991. Nea mayriki-sintayes me soya [Recipes for soya]. Thessaloniki, Greece: Published by the author. 127 p. Illust. Index. 29 cm. [Gre]

• **Summary:** This attractive book, the first of its kind ever published in Greek, contains large color photos of its soy-based dishes on almost every page. It features recipes using soy oil, soy sauce, soy margarine, textured soy flour (mince and chunks), soya-based pasta, soymilk, and tofu—but no tempeh. The last 2 pages of the book are full-page color photos of various soya products that are imported to Greece, largely by Mr. George Tselepidis (Andreou Dimitriou 47, Sikies 56625, Thessalonika, Greece. Phone: 625741) who is very interested in new soya products (and perhaps making

them), and is the exclusive agent for the soya products used by the author. These products include Provamel Soya Milk, Sunwheel soya sauce and tamari, Meridian soya margarine, soy oil, and ten shelf-stable soy products with Greek labels. Published with technical and material support from Biotrek S.A., Greece's primary dealer in soya products.

The book contains many recipes and ideas for using soyfoods in place of meat and milk during Lent and other religious holidays of the Greek Orthodox Church. The attractive 4-page brochure promoting the book contains colorful photos of many soy-based preparations on a table in front of Greek Orthodox icon paintings.

The author notes in a letter that she hopes to translate the book into English and is now preparing another book on Soya Sweets, Pastry, and Confectionery. Unfortunately, there are presently no companies in Greece making tofu, soymilk, or tempeh, nor are these products available in Greece.

In addition to writing, the author has owned a private kindergarten for the last 3 years, and for more than 1 year she has given cooking and housekeeping lessons in an organization named "Faros Tiflon Elathos," which educates the blind. Address: Lahana 35, GR-546 38 Thessaloniki, Greece. Phone: 031 824 311.

7646. Yokotsuka, Tamotsu. 1991. Nonproteinaceous fermented foods and beverages produced with koji molds. In: Dilip K. Arora; K.G. Mukerji; E.H. Marth, eds. 1991. Handbook of Applied Mycology. Vol. 3: Foods and Feeds. New York, NY: Marcel Dekker, Inc. x + 621 p. See p. 293-328. Chap. 10. [135 ref]

• **Summary:** Contents: 1. Introduction (Eight types of traditional fermented foods and beverages, early history of fermented foods, three types of microorganisms used for or found in food fermentations, distribution of fermented foods worldwide, koji in Japan and China, different meanings of the term "koji molds"). 2. Nonproteinaceous, nonalcoholic lactic-acid fermented foods. 3. Alcoholic fermented beverages: A. Made from sugar-containing raw materials. B. Saccharification processes in alcoholic beverage manufacture (malt and koji). C. Mixed culture dough inocula for food and beverage fermentation in Southeast Asia. D. Alcoholic beverages in China and Taiwan (chu / qu is Chinese koji). E. Yakju and Takju in Korea. F. Rhizopus vs. Aspergillus as enzyme producers in alcoholic beverage fermentations... H. Mirin, amasake [amazake], and lao-chao. 4. Vinegar.

Figures show: (1) The course of tropical storms (shown on a map of the world). (2) Classification of microbes (filamentous fungi, yeasts, bacteria) used to make fermented foods or beverages (based on sexual characteristics). Phycomycetes (septate mycelia, sexual spore formation) -> Mucor and Rhizopus (asexual spores are formed on top of sporangiphore which is covered with sporangium). Mycomycetes (nonseptate mycelia, asexual and sexual spore formation) -> Ascomycetes (sporeforming in special sacs or

saci) -> Monascus, Saccharomyces and Zygosaccharomyces (spore is formed by budding or conjugation of two cells), Penicillium (no foot cells, no vesicle; penicillium means a brush), Aspergillus (asexual conidiophore are formed by splitting from sterigmata attached to top of conidiophore (vesicle)). Fungi imperfecti (spore nonforming) -> Torulopsis. Schizomycetes -> Eubactriales (bacteria) -> Acetobacter, Micrococcus, Pediococcus, Bacterium, Clostridium. (3) Famous Chinese wine-producing areas: They make Shandong yellow wine, Shaoxing (W.-G. shaohsing) wine, Fujian yellow wine. Note: Kaoliang liquor is a typical distilled wine in China. (4) Flow chart of process for making Shaoxing jiu (from glutinous rice). Address: Research Div., Kikkoman Corp., Noda City, Chiba prefecture, Japan.

7647. Yokotsuka, Tamotsu. 1991. Proteinaceous fermented foods and condiments prepared with koji molds. In: Dilip K. Arora, K.G. Mukerji, and E.H. Marth, eds. 1991. Handbook of Applied Mycology. Vol. 3: Foods and Feeds. New York, NY: Marcel Dekker, Inc. x + 621 p. See p. 329-73. Chap. 11. [118 ref]

• **Summary:** Contains a great deal of very interesting information. Contents: 1. Introduction. 2. Fermented soybean foods in East and Southeast Asia: A. Douchi (China), Hama-natto (Japan), and in-yu (Taiwan). B. Shuidouchi (Shandong province, China), thua-nao (Thailand), kinema (Nepal), and natto (itohiki natto) (Japan). C. Tempe [Tempeh] and Oncom [Onchom] (Indonesia) (Making soybean tempe, volatile flavor of tempe, chemical composition and nutritional value of tempe, tempe bongkreng). D. Fermented tou-fu (soybean curd) products: Sufu (China and Taiwan), Tofuyo (Okinawa, Japan).

3. Fermented salty condiments in a slurry or paste made from soybeans and cereals: A. Doujiang (touchiang) (China) and Taucu [tauco] (Southeast Asia). B. Doubanjiang (Toupanchiang). C. Tianmianjiang (Tienmienchiang). D. Gochujiang and Doenjang (Korea). E. Hishio (Japan). F. Miso (Japan) (Production and consumption of miso, making rice miso and barley miso).

4. Fermented salty liquid condiments made from soybeans and cereals: A. Japanese shoyu (Manufacture of koikuchi and usukuchi shoyu, manufacture of tamari shoyu). B. Soy sauce produced in east and southeast Asian countries other than Japan (Korea, Taiwan, Hong Kong, Singapore, Malaysia, Indonesia, Thailand, People's Republic of China {the process, acid hydrolysis, was illegal until recently}, chijhi or whole soybean soy sauce still made in the basins of the Zhujiang {Pearl} River and the Huanghe {Yellow} River).

5. Biochemistry involved in shoyu and miso manufacture: A. Selection of raw materials. B. Contribution of improved cooking methods of raw materials to increase the enzymatic protein digestibility. C. Selection and

improvement of koji molds. D. Improvement in koji making. E. Microbial and chemical control of salty mash fermentation. F. Flavor evaluation of koikuchi shoyu. G. Stability of color of pasteurized shoyu. H. Nutritional concern about shoyu and miso (salt content). Safety of koji molds and shoyu (aflatoxins).

6. Conclusion.

Tables show: (1) Chemical composition of kinema, thua-nao, and douchi. (2) Changes in nitrogenous compounds during natto fermentation. (3) Changes of nitrogen compounds in sufu making. (4) Constituents of some types of miso. (5) Chemical composition of various kinds of genuine fermented shoyu in Japan. (6) Effect of cooking conditions of thoroughly moistened defatted soybean grits on the enzymatic digestibility of protein. (7) Differences between *A. oryzae* and *A. sojae* used for shoyu fermentation. (8) Proteinases produced by *Aspergillus sojae*. (9) Enzyme composition of koji as influenced by the difference of material. (10) Various metabolic patterns by lactobacilli in shoyu mash. (11) Digestibilities of protein in shoyu, miso, natto, and tempe fermentations. (12) Results of quantitative analysis of flavor constituents in koikuchi shoyu.

Figures show: (1) Flow sheet of tempe making. (2) Flow diagram of sufu making from 1 kg soybeans (with all quantities of ingredients, temperatures, and times). (3) Flow diagram of rice-miso fermentation from 1,000 kg soybeans and 600 kg milled rice. (4) Flow diagram of koikuchi shoyu fermentation from 330 kg defatted soybean meal (or 400 kg whole soybeans) and 340 kg wheat kernels. (5) Flow diagram of tamari-shoyu fermentation from 800 kg defatted soybeans, 346 kg wheat, 20 kg roasted barley flour, and 439 kg NaCl. (6) Microflora changes in shoyu mash fermentation. (7) Classification of *Aspergilli*. (8) Fermented foods and condiments made from soybeans mixed with or without cereal grains or flour.

Hama-natto in Japan (p. 332): The Taiho Laws, which took effect in 701, mention an office in Japan's imperial court that dealt with several fermented soyfoods including "douchi [2 Chinese characters given] or kuki (1 Cc): in Japanese, miso and jiang (1 Cc) or hishio (1 Cc)..." "The method of preparing salted and unsalted douchi [fermented black soybeans] is described in the book *Yoshufushi* (1686) and elsewhere. According to the oldest record about douchi in Korea, in 683, the product apparently was not an important food commodity in that country.

Salted douchi [fermented black soybeans, which originated in China] appeared in Central Japan with names such as "Hama-natto, Daitokuji-natto, and others, and in Taiwan as *In-si*."

Concerning *shuidouchi* (Chinese salted natto with minced ginger. p. 332-35): This unusual product can be considered an intermediate form between douchi (salted fermented soybeans / fermented black soybeans) and the itohiki-natto family of foods; unlike douchi it is fermented

with a *Bacillus* bacterium rather than with an *Aspergillus* mold, but unlike natto it is a salted product and has ginger added. To make *shuidouchi*: Boiled soybeans are naturally inoculated with *Bacillus subtilis* and incubated at high humidity and at 30-40°C. This preference for a high temperature may be why the *Chi-min yao-shu* (6th century China) recommended that, when making douchi [fermented black soybeans], the temperature during incubation be kept rather low. In Shandong, China, *shuidouchi* are made as follows: Clean, soak, and boil soybeans until soft. Place in a cloth bag and cover with straw, which is the best natural source of *B. subtilis*. After incubation for 1-2 days at 25-30°C the soybeans will be covered with viscous substances. Mix the sticky soybeans with minced ginger and salt, then pack tightly into jars, and age for one week. They are now ready to consume (See references 5 and 6). Address: Research Div., Kikkoman Corp., Noda City, Chiba prefecture, Japan.

7648. Dinh, Daniel. 1992. Present status of soyfoods in Vietnam (Interview). *SoyaScan Notes*. Jan. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Tofu and soymilk are the only two soyfoods that are widely known and used in Vietnam. Daniel's relatives made fish sauce (*nuoc-mam*) in Vietnam. Before 1975 there was a trade association of fish sauce manufacturers in Vietnam and their company was one of only 12 major manufacturers in the association. Then in 1975 when the Communists took over, he had to flee the country, and his family decided to destroy their fish sauce factory, lest they face death or prison as capitalists. Now the situation is ripe for his return to Vietnam, and he is interested in learning to make miso and soy sauce, and perhaps starting production in Vietnam. Address: 22821 Sherman Way, West Hills, California 91307. Phone: 818-704-6432.

7649. **Product Name:** Ginger Tamari Sauce.

Manufacturer's Name: California Olive Oil.

Manufacturer's Address: 134 Canal St., Salem, MA 01970.

Date of Introduction: 1992. January.

Ingredients: Soy sauce, gingerroot, natural spices, cane juice, natural lemon.

Wt/Vol., Packaging, Price: 10 oz bottle and 55 gallon drum.

How Stored: Shelf stable.

New Product-Documentation: Spot in Whole Foods.

1992. p. 69. The product is designed for those "looking to reduce sodium in their diet."

7650. **Product Name:** [Marinated Tofu, and Smoked Tofu].

Foreign Name: Tofu Marinato, and Tofu Affumicato-Alimento Derivato dalla Soja.

Manufacturer's Name: Biolab.

Manufacturer's Address: Via dei Grabizio 11, 34170

Gorizia, Italy. Phone: +39 481 533522.

Date of Introduction: 1992. February.

Ingredients: Soybeans (*fagioli di soja*), nigari–*cloruro di magnesio*, water, tamari soy sauce, smoke from beechwood firewood (*fumo di legna*).

Wt/Vol., Packaging, Price: 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.

How Stored: Refrigerated.

New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This new (Dec. 1998) label (3½ by 5 inches) has the same pastel background for all tofu products—a stylized view of the sea and sky, with mountains on both sides and rolling hills in the foreground. At the top left is a smiling sun. Text: “Organically grown (*prodotti dalla agricoltura biologica*).” “Ready in 5 minutes (*Pronto in 5 minuti*).” Refrigerate at 4°C. A small symbol shows a person recycling the container. An earlier label shows four black birds flying above some orange clouds in a gray sky past a pale yellow sun. Letter from Massimo and Maura. 1999. Jan. 5. “To make Pickled Tofu, we leave tofu immersed for one night in a mixture of tamari and water. The next day, the tofu is deliciously flavored. We then either pack it as is (it becomes Pickled Tofu) or we smoke it (all smoked tofu must be pickled before smoking).” Follow-up letter (fax) from Massimo and Maura. 1999. Jan. 22. Marinated tofu is “Tofu Marinato.” They still produce a very small amount of it (about 5-6 kg/week) for a distributor who sells many of their products under his own label. This is a carry-over from the early days of Biolab.

7651. Kushi, Michio. 1992. Introduction to *Culinary Treasures of Japan*, by John and Jan Belleme. 16 p. Jan. Unpublished manuscript.

• **Summary:** This manuscript, which was published in a condensed form in the actual book, tells the story of Mitoku and their work to export traditional Japanese natural foods to the Western world. Michio Kushi was instrumental in getting Mr. Akiyoshi Kazama involved in this work. Mr. Kushi, who became a World Federalist after World War II, came to the U.S. in Nov. 1949 to study at Columbia University. He continuously sought ways of establishing world peace, and increasingly came to believe that a proper diet is the basis for health, happiness, and peace.

In April 1966 the author’s wife, Aveline, opened a small store named Erewhon in Boston. Michio began to search for a Japanese source for foods that Erewhon would sell. He was introduced to Mr. Kazama (who lived in Tokyo) through a Japanese friend, Mr. Obayashi, who resided at that time in New York City. Michio felt that Mr. Kazama understood his desire for foods of high quality. So Mr. Kazama “began his search for food producers and manufacturers who were sincere and willing to supply the kind of quality we requested. I know that for him, at that time, it was a great gamble. It was also a painstaking and slow step-by-step

process.”

Mr. Kazama was born on 1 Feb. 1930 in Yamanashi prefecture. He graduated from Waseda University in Tokyo, then was selected to study business in the United States. After arriving in Chicago, Illinois, he was drafted by the U.S. government to serve in the American Army in Korea and in Japan from 1956 to 1958. Upon his return to Japan, he settled in Tokyo where he became an import agent for a German company dealing in optics and electronics. After the Kushis contacted him, he became involved in the emerging natural food business. [He founded a company named Mitoku. Mi = Michio. To = Tomoko (Aveline’s given name in Japanese). Ku = Kushi].

In 1968 Mr. Kazama made his first shipment of Japanese natural foods to Erewhon; the order was worth \$3,000. The Kushis first met Mr. Kazama in Boston in 1970. Over the years, the volume of Mitoku’s exports steadily grew, and expanded to Europe, Australia, and the Middle East. Today Mitoku ships its products to about 35 countries. Approximately 40% of Mitoku’s exports go to America, 40% to Europe, and 20% to Australia and other regions. Annual sales are about \$10 million. Among the major suppliers are Sendai Miso Shoyu Co. Ltd., Hatcho Miso Co. Ltd., Hagaromo Miso, Ltd., Hanamaruki Miso Co. Ltd, San Iku Foods Co. Ltd.

Distributors of Mitoku’s products include the following: In the USA: Westbrae Natural Foods Inc., Great Eastern Sun Inc., U.S. Mills Inc., Tree of Life Inc., and Shojin Natural Foods (Hawaii). In Canada: Koyo Foods Inc., Flora Distributors Ltd., and Timbaktu. In Costa Rica: Distribuidora de Productos Macrobianicos S.A. In England: Sunwheel Foods Ltd, Clearspring Natural Grocer, Meridian Foods Ltd. In France: Celnat, Tama. In Belgium: Lima N.V. In the United Arab Emirates: Emirates Trading & Marketing Est. In South Africa: Key Health. In Austria: Naturkostladen, Lebenszeichen. In Switzerland: S’lotusbluemli, Terrasana, Futonhaus. In Sweden: Kung Markatta. In Norway: Alternative Import. In Finland: Makro Bios. In Portugal: Armazens Da Matinha. In Spain: Kunga. In Italy: La Finestra Sul Cielo, Probios S.R.L., Dalla Terra al Cielo, Solo Natura. In Israel: Tivoli Ltd. In Australia: Pureharvest. In New Zealand: Enso. In Singapore: Nature’s Best. In Yugoslavia: General Export. In Japan: Seibu Department Stores Ltd., Tokyu Department Stores Ltd. Among the countries reached indirectly through trans-shipment are Hungary, reached through Austria, various South American countries reached through the United States, and other countries such as Poland, Czechoslovakia, Iceland, Andorra, Ireland and the Caribbean Islands.

As Mitoku developed its international operations, Mr. Kazama hired many students from Western countries, including Blake Rankin (USA), Ferro Ledvinka (Italy), Christopher Geoffrey Dawson (New Zealand, starting 1979), Robbie Swinnerton (England), Terrie Adams (USA), and

Michelle Harbroun (France).

“For the past 10 years, Mitoku has echoed and supported the macrobiotic perspective with its motto ‘Isshoku-Dogen.’ These words, though they have been forgotten in the last few centuries by the very people in the health care field who should remember them well, mean literally ‘medicine and food have the same source,’ and can be translated as ‘food is medicine.’ This saying has been used and known as part of the ancestral heritage of wisdom transmitted from generation to generation for several thousand years in Oriental countries such as China, Korea and Japan.

“In an attempt to preserve Japanese traditions, Japan has instituted a ‘Living Treasures’ program granting official recognition and support to [living masters in] various cultural areas such as theater, music, dance, sculpture, carpentry, weaving... and arts and crafts. Ironically, though, Japan has not granted the same official recognition to its traditional methods of food processing and production in spite of the fact that increasingly large numbers of people throughout the world are now appreciating traditionally processed Japanese food products and have become aware of their important health benefits. The Japanese traditional arts of producing miso, soysauce, tofu, natto, amazake, rice vinegar, sake, mirin, condiments and pickles as well as cooking methods and preparation are unique among the culinary practices of the world... These foods are also works of art... It is my hope and recommendation that official recognition and support be granted by the ‘Living Treasures of Japan’ to those who have dedicated their life to the traditional art of food production and processing in spite of the hardships and commercial disadvantages they are compelled to face in business competition and present-day economical conditions.”
Address: 62 Buckminster Rd., Brookline, Massachusetts 02146.

7652. Product Name: Traditional Japanese Soup (in a Cup) [Mild Miso, or Dark Miso].

Manufacturer’s Name: San-J International, Inc.

Manufacturer’s Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 800-545-9545 or 415-821-4040 (Perelman).

Date of Introduction: 1992. February.

Ingredients: 1995: Liquid broth in foil pouch: San-J rice miso (water, whole soybeans, rice, salt), kombu extract (seaweed, barley malt), water, alcohol, salt, shiitake mushroom powder. Dried vegetables in foil pouch: Fu ([baked] wheat gluten), tofu (soybean curd), scallions.

Wt/Vol., Packaging, Price: 0.930 oz (23.6 gm) net paper cup. By March 1995 1.1 oz. Retail for \$1.49 (3/95, California).

How Stored: Shelf stable.

New Product–Documentation: Spot in *Natural Foods Merchandiser*. 1992. July. p. 72. Shows a black-and-white photo of the side of both cups. Both products are prepared with real miso paste (not dried) for authentic Japanese flavor

and texture. “Just add boiling water to create instant soup for lunch-on-the-go or a low-fat first course.”

Talk with Steve Zoller of San-J. 1992. July 6. This product was introduced in Feb. 1992. Product with Labels sent by Steve Zoller. 1992. July 7. Illustration: On the dark miso a Japanese man drinking a cup of miso soup; on the mild miso, a Japanese woman doing the same. “Directions: Squeeze contents of miso packet into [paper] cup. Empty contents of vegetable packet into cup. Add boiling water to ½ inch from top of cup. Cover for 1 minute. Stir well before eating.”

Ad (8 by 11 inches, color) in *Natural Foods Merchandiser*. 1992. Sept. p. 35. “188 years and one minute later, its soup.” Shows a Japanese man and woman, kneeling on opposite sides of a low table in a tatami mat room, each drinking a paper cup of San-J miso soup. “Seven generations after San-J’s founding fathers began making miso near Nagoya, Instant Miso Soup-In-A-Cup comes to America.” San-J: Established 1804.

Product with Label purchased at Open Sesame in Lafayette, California. 1995. March 11.

7653. *SoyaFoods (ASA, Europe)*. 1992. Nestlé invests in Asia. 3(1):2. Winter.

• **Summary:** “Nestlé, the world’s biggest food group, is investing \$100 million in new factories in five countries belonging to the South-East Asian Nations (ASEAN). The Swiss-based company will own 60% of the companies and will manage them.”

Two of the 5 factories will be making soya products. “The Indonesian factory will be soya-based and soya sauce powder will be produced in Singapore.”

7654. Macdonald, Bruce. 1992. How Erewhon got involved in wholesaling and distributing natural foods (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Erewhon went through three phases of selling: (1) Retail. (2) Wholesale, direct to natural food retail stores and restaurants. (3) Wholesale, to natural food distributors (such as Eden Foods). Bruce started phase 2, selling direct to natural food stores and restaurants, primarily in New York.

In the spring of 1969, during Bruce’s tenure as general manager, Erewhon got into the wholesale business, running it initially out of their retail store at 342 Newbury Street. Paul Hawken was not involved in the wholesaling to other companies before he left for Japan. Their store was divided into 4 parts: The front half was the retail store, the back half contained the mill (a little 5-inch Meadows Mill later used for grinding whole-grain flours), a walk-in refrigerator, and packing tables (where Bruce recalls working with Jim Docker, packing little 1-5 lb paper bags of grains), an office, and the basement (connected to the ground floor by a dumb waiter), which was the warehouse for storage of

commodities.

The wholesale business began in the basement. It started because Erewhon got a good deal on some sesame oil. A company named Sesame Products in Texas had developed the Egyptian salt method of naturally removing the hulls / husks of the sesame seeds. The company apparently went bankrupt, but actually they were a front for some illicit import dealings, such as electronic parts from Mexico. They got caught, and had to sell their high-quality oil. Bruce got the opportunity to buy (for Erewhon) all of their existing sesame oil for 10 cents on the dollar (90% discount). So he bought all the oil, most of which was in amber pint bottles, but the rest of which was in about 5-8 large drums. He trucked it to Erewhon's retail store at 342 Newbury St., and helped to unload it. He and co-workers put Erewhon labels on the amber bottles (Bruce does not remember who designed these labels; Paul Hawken had them designed), bottled the bulk oil manually, labeled that as well, and moved it all to the basement. Erewhon was now ready to jump into the wholesale business, and natural sesame oil was their first wholesale product. Somehow Bruce / Erewhon had to sell 250-300 cases of natural sesame oil. But since he had bought it at a 90% discount, he was able to sell it at a profit below the price of other sesame oils on the market. In the spring of 1969, Bruce put the oil on a truck and drove it to Greenberg's (125 First Ave.) in New York City, Paradox Restaurant, Georgie Abehsera's restaurant, etc. He also took Erewhon's whole line of products, including their new imports from Japan. "Greenberg's took on the entire line of Erewhon products. Suddenly, it just took off. A month or two later Erewhon was sending a van down to New York City ever week."

Next Erewhon expanded its line of mechanically pressed, unrefined oils. Bruce had seen some expeller-pressed corn oil at Paul Keene's Walnut Acres, so he ordered it from Shawnee Milling Co. in Shawnee, Oklahoma. Erewhon considered hexane solvent extraction to be the "big bad method" of removing oils, expeller pressing to be so-so (because the temperature in the worm-screw reached 140-160°F), and hydraulic pressing to be the best since it kept the product coolest. This golden corn oil foamed upon being heated and tasted like butter in baked goods. Erewhon's third natural oil was a safflower oil. (In 1970 Paul Hawken wrote a pamphlet titled "The New Oil Story").

Next Erewhon added a line of grains. They got non-organic brown rice from Koda Brothers in Dos Palos, California. The company was owned by Japanese-Americans, who were the first to break out of the cooperative marketing scheme, in which all growers mixed their rice together. They had rubber rollers, which did not scratch the grain during dehulling. Their Kokuho-Rose white rice has been the rice of choice for 30 years among Japanese-Americans. Bruce thinks they may have first sold brown rice (in 100 lb peat bags) to Infinity in New York, then to

Erewhon.

Then Erewhon added a line of products imported from Japan. These first arrived in about Nov. 1968, just as the Erewhon retail store at 342 Newbury St. was opening. All the Japanese imports came in bulk from Muso Shokuhin in Osaka, rather than individually packaged. Tamari (from Marushima) and miso (including bulk mugi [barley] and Hatcho miso), moromi, etc. came in wooden kegs, loose, rather than in containers, so there was lots of breakage. Most of these imported products were stored in the basement. Erewhon bought some noodles (soba and udon in 5 kg boxes) from Japan Foods, then from Nishimoto Trading Co. and also from Muso. The product line was very simple, consisting of no more than 400 different items. The best-selling wholesale items were the oils, tamari, miso, rice, and imported kuzu, umeboshi (salt plums) and azuki beans. In the retail store there was no produce case or freezer, no vitamins or supplements, no potatoes or dairy products.

Initially, Erewhon's largest customer was the combined 4-5 macrobiotic study houses in Boston, Massachusetts, accounting for roughly 50% of sales. Erewhon had an old van that delivered the food to the study houses, initially at retail prices; this business kept the retail store afloat. By the late spring of 1969 the wholesale business began to take off, and the macrobiotic study houses were now allowed to buy at wholesale prices. Some additional delivery trucks were acquired.

The macrobiotic products, other than what Erewhon imported, were only available in health food stores, through Chico-San. Because of the high mark-ups at several stages in the process, these products were tremendously expensive for consumers. So Erewhon decided to sell direct to East Coast stores, cutting out the distributors, to keep prices down. Now things started to move very fast, and Erewhon soon achieved national distribution. "It was like introducing products into a vacuum. The whole natural foods industry was starting up, all these little places like Eden Foods in Ann Arbor [Michigan], Tom Swan in Chicago [Illinois], etc.

Bruce traveled to New York and lined up new wholesale customers among macrobiotic restaurants and food stores. Samsara, a macro restaurant in the lower east side run by George ("Georgie") Abehsera, was Erewhon's first customer and its biggest restaurant customer. (Michel Abehsera's younger brother, George later became the baron of the clay and soap business, Three Sheaves, Pierre Cattier, then Nature de France). Right around the corner was Arnie Greenberg, who had a deli on the lower east side, and was one of the first to merchandise macrobiotic foods; he rapidly became Erewhon's best customer. He was very busy selling a mish-mash of foods though he had no particular personal commitment to macrobiotics. Before him, Irma Paule in New York City had run "The Little Cupboard" but had gotten in trouble and was no longer in business at this time. Other good restaurant customers were the Paradox, and the Caldron

(Gloria Bremmer at 308 E. 6th St.). The Good Earth, a retail store run by Townley, soon began to order; he was one of the original honest organic produce retailers. The restaurants and the food stores accounted for about equal sales volume for Erewhon. Erewhon shipped all its goods to New York (its sole market) via common carrier; Erewhon owned no delivery trucks of its own. There were no other natural food stores in Boston. One other unique customer was Jimmy Silver, who was macrobiotic, the manager of a rock band named Iggy Pop and the Stooges, and had hair down to his waist. He would drive down from New York with his cute little wife, Susie, and buy \$300.00 of food at a time for the whole band. It was the biggest single order that Erewhon ever got in those days. Not long after that, Jimmy dropped out of the music scene and came to Boston.

Then Roger took over from Bruce as general manager in about Oct. 1969, right after Bruce married Maureen, his first wife, and left for Los Angeles to help start the branch of Erewhon there. The Erewhon store in Boston (at 342 Newbury St.) started with sales of about \$400 a day. The day of Bruce's wedding, on a Saturday in about Oct. 1969 was the first day that the Erewhon store's sales topped \$1,000 a day. It was a milestone day and in those days it seemed like big money. But two years later, Erewhon's sales were \$20,000 a day.

In Los Angeles, Bill Tara had opened the doors, and put the bricks and boards up for a new Erewhon store. But Bill was never comfortable doing business; he preferred to teach macrobiotics. So Aveline Kushi encouraged Bruce to come to Los Angeles (where she was living at the time) and to get the West Coast branch of Erewhon started. So Bruce and Maureen moved to Los Angeles.

How did Erewhon finance this growth? At the beginning Erewhon, the trailblazer, was extremely profitable, since they had essentially no competition, and had thriving retail stores in Boston and Los Angeles. The dollar was very strong (from 1967 to 1971 one dollar was worth 355 yen), so Erewhon could buy an item for \$1, sell it for \$3.50 and still be \$2 under any competition (mainly Chico-San). Erewhon invented the concept of a natural food store. Fred Rohe in San Francisco had developed a related idea, perhaps a little before and in parallel with Erewhon. His Sunset Health Foods, later named New Age Foods, was a modified health-food store that sold vitamins, whereas Erewhon was a pure natural foods store, that didn't sell vitamins. In addition, Erewhon had quality standards and a philosophy of foods that no one in the industry had.

After Bruce left, Erewhon moved into its first real warehouse on Farnsworth St. This represented the first real commitment to the wholesale business. A fleet of trucks was acquired. Eventually semis [semitrailers] were delivering all over New England. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

7655. Macdonald, Bruce. 1992. The origin and development of Erewhon's operations in Los Angeles. Part I. 1969 to 1971 (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Erewhon started a retail store in Los Angeles because Aveline's youngest son, Hisao, had some form of leg disorder, congenital or from infancy, probably in his knee. Aveline found a Japanese doctor in Los Angeles who she believed (and it turned out that she was right) could cure it. But the doctor had to see Hisao almost daily. So in about August 1969 Aveline moved to California. Bill Tara went with her, while Michio stayed in Boston, Massachusetts. Aveline got a very nice house at 7511 Franklin Ave. in Hollywood. Later she moved into the former Japanese embassy, which was a mansion in a very nice neighborhood, several blocks away on [7357] Franklin Ave. Bruce also lived in this mansion. In Los Angeles, Bill Tara started Erewhon's second retail store, called Erewhon West, in large part because Aveline needed good macrobiotic food. Tara rented a very small space at 8003 Beverly Blvd. and called the new store "Erewhon West." Later the name changed several times, but it ended up being just "Erewhon." He got some cinder blocks and boards, ordered a shipment of food worth about \$500 from Erewhon-Boston, then he opened the door for business.

Bruce was married on 13 Sept. 1969 to Maureen Traill in Boston. The marriage ceremony took place in the Old South Church, and some 200 people (including Michio Kushi) attended. It was the biggest wedding in the Boston macrobiotic community to date. Maureen had lived in a macrobiotic study house run by Susan Hillyard, and had studied cooking with Aveline Kushi and Susan Hillyard.

About 2 weeks after the wedding, in early October 1969, Bruce and his new wife left Boston. At that time, Roger Hillyard took over as general manager of Erewhon-Boston from Bruce. They drove to Los Angeles, arriving in late Oct. 1969. The first thing Bruce did was to build a walk-in cooler. Bill Tara, who was always more interested in the teaching, philosophical, and scholarly side of macrobiotics, left shortly after Bruce arrived. Bruce was more oriented toward the business side. Bruce became the head of the store, and Jimmy Silver soon came out from Boston to work with him at the store. Initially, sales were very slow: During the first two weeks that Bruce was there, there were *no* sales on eight of the days. Natural food stores were just beginning to open in the U.S. "That was Aveline's store. Wherever Aveline went, she had to have a store—to feed the study house. And it was unbearably hot. But eventually it did work."

Soon shipments of foods began to arrive directly from Japan, sent by Paul Hawken with whom Bruce talked frequently by phone. So in the summer of 1970 Bruce put out a wholesale price list and rented a warehouse (about 2,000 square feet) catty-corner across the street (something like 7990 Beverly Blvd.). One of their first wholesale

accounts was Fred Rohe in San Francisco. Soon the first Erewhon products packaged in Japan began to arrive, and because of these retail packs the wholesale business took off. The first seitan came in shrink packs; it later came in jars. Tamari was the best-selling import, followed by miso, then umeboshi. The foods still arrived in small boxes or single kegs; containers did not begin until later. At about this same time Tom DeSilva, a lawyer who became a yoga instructor, applied for a job as a janitor; he just wanted to be around.

Erewhon West soon outgrew its first warehouse, in part due to a deal made with the Lundberg Brothers. Bob Kennedy of Chico-San was the pioneer in contracting with the Lundbergs to grow short-grain brown rice in California. The Lundbergs allotted a certain amount of acreage to organic brown rice and Chico-San agreed (in a contract) to buy all of the organic brown sold on that acreage. Chico-San had exclusive rights to all the organic brown rice produced by the Lundbergs. But Chico-San sold this rice for a high price (much of it in rice cakes or 1-lb bags), which prevented Kennedy from selling the amount he had contracted to buy. Chico-San was always in danger of breaking the agreement and losing his exclusivity. So [in early 1970] a side deal (contract) was made, between Erewhon and the Lundbergs, in which the Lundbergs packaged the unsold rice exclusively for Erewhon and labeled it “unsprayed.” Chico-San would not allow it to be labeled “organic.” Erewhon never talked with Kennedy or Chico-San about this side deal. “He hated our guts! But we did him a real favor; we sold the rice and we didn’t really hurt him, since we were selling into an entirely new market—on the East Coast and in bulk and in boxcars.”

With this arrangement, Erewhon got into the rice business in a big way, selling their rice for \$11.00 a bag versus about \$30.00 for the same product from Chico-San labeled “organic.” Brown rice soon became Erewhon’s biggest product; they sold it to Eden Foods, Laurelbrook, Tom Swan in Chicago [Illinois; he didn’t last long], Tree of Life in Florida, Food for Health in Tucson (Arizona), some distributors in Northern California, Green Mountain Grainery in Boulder (Colorado), etc. It was rice that gave Erewhon nationwide distribution, putting their products in every natural food store in the USA. Bob Kennedy was furious but he was stuck with his 5-year contract. Note: The fire in early Aug. 1972 that burned Chico-San to the ground essentially rendered the contract null and void.

Now Erewhon-West began to catch up with Erewhon-Boston in sales because of two factors: They could get a shipment from Japan 3 weeks faster than Boston, and they were near the source of brown rice.

When Paul Hawken returned from Japan in Dec. 1969 he went direct to Los Angeles, but stayed only several weeks. He then went to San Francisco and worked for several months with Fred Rohe (they had become close friends) on writing educational pamphlets and trying to organize Organic

Merchants. After returning briefly to Erewhon West in Los Angeles, he returned to Boston. Paul’s direct contribution to starting Erewhon West was insignificant; he wasn’t there long enough to do much. Bruce turned it into a real business. “Paul’s real contribution was finding new suppliers and products in Japan (he toured Japan with Yuko Okada’s father), getting the products labeled in Japan, then arranging for them to be shipped to Los Angeles in containers. Mr. Kazama and Mitoku came later. Erewhon had tried to order Hatcho miso from Muso, but Muso couldn’t get it. But Mr. Kazama got it; he is a supreme negotiator! I’ve never met anyone quite like him.

“One of the secrets to Erewhon’s success was always having, as a base, a successful retail store, that had a big mark-up and was generating cash. That was our “calling card.” Then the warehouse could grow off of that. The store was also a wonderful place to test and develop new products. “A store is a cash business. With distribution, sooner or later, you have to give terms—such as net 30 days. Thus the adage: ‘If you’re going to grow a business, you need \$2 in capital for ever dollar that you grow.’”

In late 1970, to keep up with the explosive growth, Erewhon rented a second warehouse at 8454 Steller Drive (10,000 square feet). In his “spare time,” entrepreneurial Bruce founded two other businesses of his own: Pure & Simple, and The Natural Living Company. Pure & Simple, located in the Steller Drive warehouse, was the first of America’s new wave of natural food snack companies. Bruce had talked over the idea with Paul Hawken, who felt that snack foods were not appropriate for Erewhon at that time. The company’s first product was Corn Munchies, which was the first natural corn chip. They would make corn tortillas, cut them into wedges, fry them in sesame oil, and season them with tamari. The Corn Munchies soon became very successful. The Natural Living Co. made bodycare products and cosmetics, starting with Sesame Shampoo and Sesame Lotion. Bruce had met a brilliant chemist named Carlos de Villalvilla, a Cuban aristocrat who was head of research for Max Factor. He was a concert pianist with 2-3 PhDs. Bruce asked him to develop a line of cosmetics without preservatives or mineral oil (a vegetable oil should be used instead of a petroleum derivative). Carlos used sesame oil (which is very stable) as the vegetable oil in these first two products.

By early 1971 Erewhon had outgrown the 10,000 foot warehouse and another 20,000 square feet in an old bakery, from which they did all transshipments to distributors. The store expanded twice, taking over the corner fish store (live fish in aquariums), to 8001 Beverly Blvd. Jim Gronemeyer did the remodeling. Tommy DeSilva worked there, and ended up owning the business. Continued. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

7656. Macdonald, Bruce. 1992. The origin and development

of Erewhon's operations in Los Angeles. Part II. 1971 to 1991 (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In one of its first issues (the very first was published in Jan. 1971), *East West Journal* published an interview with Bruce while Erewhon—Los Angeles was at the peak of its activity. They arranged for imports of natural foods from Japan to come into Los Angeles. They developed labels for the products with nice stories about each product; Burton Block did the graphics and helped with the text. He later became famous with the Nutragen designs.

In early 1971 Bruce found out that Paul Hawken had somehow obtained some stock and thus ownership in Erewhon and had not mentioned it to Bruce.

So Bruce went back to Boston and discussed the matter with Paul. Paul said, essentially, "That's the way it is." Ultimately Bruce felt that Michio was to blame for the problem, but "when I found out that Paul had some stock, I felt he had broken a blood bond with me and had deliberately deceived me. I felt more disgust than anger towards Paul because I had considered him a very close friend.

"I was not upset at Michio. Basically I have always felt that he was just stupid. He had the greatest opportunity—like the founding of the computer industry and he was Bill Gates—and he couldn't comprehend the American entrepreneurial spirit. Michio's approach was the traditional Japanese one. You come to work for a company, we pat you on top of the head, you have lifetime employment, but don't ever ask to own any of it. But he was in a country that was entrepreneurial to its core. Hey, we don't mind working for nothing—at the beginning. He should have offered the people who conceived and built Erewhon partial ownership in the company to motivate them and to keep them around. Failing to do that was Michio's biggest mistake."

On 21 Jan. 1971 *The Wall Street Journal* ran a front-page feature story on the emerging new natural foods industry. A person from Merrill-Lynch came in and said, "We could package this business and raise millions for you."

Bruce had always thought that Aveline had always owned all the Erewhon stock—from day one to the bitter end. The Kushi's attorney, Morris Kirsner, had put it in her name because they were worried about something happening like had happened to Irma Paule who ran the Ohsawa Foundation in New York. After Beth Ann Simon (a former heroin addict) died in Nov. 1965, the FDA raided the Ohsawa Foundation late one night and found its Nature's Cupboard to be selling food, as well as books, recommending the food as a cure for illness. Charged with "false advertising," the center was closed down, and the focus of macrobiotic teaching shifted to Boston. Michio was always concerned about teaching and being a purveyor of the foods about which he was teaching.

Seeing no future for himself in Erewhon, Bruce left Erewhon forever in May 1971 to attend to his two other thriving businesses. Bruce, who had been president of

Erewhon on the West Coast, had been willing to work hard to build the company for a small salary (\$150/week), reinvesting all earnings, on the understanding that he would become a part owner later—the entrepreneurial way. That had been his basic approach, and he assumed Paul and Michio were thinking the same way. But it never happened.

Erewhon had more than 99% of the market share on all of the Japanese imports. Bob Kennedy was buying from Tokyo C.I., which was very tiny. They had excellent sources for oils and grains, had built "Erewhon" into the top brand name, and had developed an aura of almost invincibility and quality. In short, they owned the market they had created.

Who got Muso (in Osaka) exporting Japanese natural foods? Probably Michio talking to Mr. Okada. Lima Ohsawa was more closely associated with Tokyo C.I. than with either Muso or Mitoku. Bob Kennedy had a certain allegiance to Lima Ohsawa. Herman and Cornelia Aihara had a little conflict with Michio and Aveline Kushi; "it was never on the surface but it sure was underneath." The split began in 1961 when Herman and Cornelia, following Ohsawa's advice, moved to Chico, California, with the group (including Bob Kennedy) that started Chico-San, Inc. in early 1972; Michio and Aveline decided to stay on the East Coast. All four (Michio and Herman, Aveline and Cornelia) were best buddies up until 1961. After that, there was a certain coolness. Bruce remembers, for examples, that when he and others were out in California, they never invited Herman (a sensei) down to lectures or other events. That was unusual. Bruce thinks (but is not sure) that Bob Kennedy (Chico-San) never bought (or never bought much) from Muso.

What happened to Erewhon—Los Angeles? One of the people who financed the early growth of Erewhon was John Deming, whose family were wealthy rice [sic, oil] barons. He married Judy Coates, lived on a trust fund, and invested something like \$150,000 to \$200,000 in Erewhon. Paul Hawken was close friends with him, in part because Paul gone out with Judy Coates, then later married Judy's sister, Dora. Then (according to hearsay) something happened and John asked for his money back. Erewhon said they couldn't pay him, but offered him Erewhon—Los Angeles instead. "So Deming ended up owning the West Coast" [Erewhon—LA]. [Note: For John Deming's version of this, see Dec. 1994 interview with him].

When Bruce was in Los Angeles, Tom DeSilva had been his "right hand man." In a major policy goof, they put Jim Gronemeyer in charge of the warehouse—which was sort of running the company. That blew up rather quickly. Bruce was long gone, so he does not know the details. Then Tom DeSilva took over, before Deming came in (in 1973-74) and took over Erewhon L.A. Deming owned the company and John Fountain was the manager who ran it. He bought much more than he needed. Someone stole a lot of money; it was a sick scene. They moved the warehouse from Steller Drive down to Vernon; it just declined, although the retail store,

run by Tom, did well. Then Tom bought the retail store from John Deming in 1980. It was named Erewhon Natural Foods, and it quickly expanded into neighboring storefronts as they became available, adding a vitamin section, a deli, and then a restaurant named Nowhere Cafe. In 1990 Tom heard a rumor that their landlord would not renew their lease and would, in fact, use the space to open similar businesses. Acting quickly on this news, Tom located a 12,000 square foot space at 7660 Beverly Blvd. next to CBS Television Studios in the street level of a five-story apartment building. The new Erewhon store had to be designed, built, and permitted from an empty shell; this was accomplished within a year. The new store opened in 1991 with annual sales exceeding \$9 million.

During much of the early history of Erewhon, Paul Hawken was in Japan. Paul's main reason for going to Japan was so that Erewhon could develop consumer packages and have the products (tamari, miso, noodles, seaweeds, kuzu) packaged in Japan. Hawken didn't return from Japan until the Erewhon store and 2 warehouses in Los Angeles (8554 Steller Drive, plus part of an old gigantic bakery) were up and running at full speed. They could get imports from Japan 2-3 weeks sooner in Long Beach than in Boston. From the West Coast, they shipped the goods as far east as Chicago, Illinois.

Warren Clough of Shiloh Farms was involved with organic farming before Erewhon; Warren was a very early pioneer.

Very little documentation remains on the early history of Erewhon. In about mid-1971 *East West Journal* published an interview with Bruce about Erewhon, conducted by his first wife, Maureen. It contained a photo of Bruce, and a good chronology of developments at Erewhon-Los Angeles. That was the real active time for the West Coast. In Aug. 1973 Paul Hawken wrote a self-serving article in *East West Journal* titled "Erewhon: A biography. The view within," which is full of inaccuracies. Bruce thinks that Patricia Smith (Patti, in Monrovia, California) might have early Erewhon catalogues. She was working for Trader Joe's until several months ago. She now has a new job elsewhere. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

7657. Macdonald, Bruce. 1992. The origins and early history of Pure & Simple, The Well, and New Age Distributing (Interview). *SoyaScan Notes*. March 16. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In late 1970, Bruce was managing the Erewhon store and distribution company in Los Angeles. To keep up with Erewhon's explosive growth, he rented a second warehouse at 8454 Steller Drive (10,000 square feet). In his "spare time," entrepreneurial Bruce founded two other businesses of his own: Pure & Simple, and The Natural Living Company. Pure & Simple, located in the Steller Drive warehouse, was the first of America's new wave of natural

food snack companies. Bruce had talked over the idea with Paul Hawken, who felt that snack foods were not appropriate for Erewhon at that time. Pure & Simple's first product was Corn Munchies, which was the first natural corn chip. They would make corn tortillas, cut them into wedges, fry them in sesame oil, and season them with tamari. The Corn Munchies soon became very successful.

Bruce left Erewhon in May 1971 over an ownership dispute. His first move was to merge Pure & Simple with The Well, a natural food distributor in San Jose. Originally the Well had been named New Age Distributing, but Fred Rohe had started to get into financial troubles, so he had split off the distributing company as a separate business, which Phil Parenti / Parente was running.

Note: A letterhead shows that in Sept. 1979 Pure & Simple Natural Foods Inc. was located at 1045 Pepitone St., San Jose, California 95110. Phone: 408 / 295-7479. Jon Hoeffler ordered books on miso and tempeh. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

7658. Young, Rich. 1992. Early history of macrobiotics and natural foods in America (Interview). *SoyaScan Notes*. March 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** First the names of some good sources: For Infinity Foods and Shadowfax: David Simon, 201-209-1646 (now doing business as Wholesome Brokers, still into scientology, formerly with Erewhon and a macrobiotic). For early Erewhon: Evan Root, 617-566-4783, in Brookline; he is very down to earth and sensible, like Jimmy Silver. For Erewhon-Los Angeles: Tom DeSilva, 213-655-3537. For Essene: Howard and Denny Waxman (brothers who founded Essene, which is still in business in Philadelphia, Pennsylvania). For Laurelbrook: Margy Coates, 301-877-1695, is one of the angels on this planet.

Rich worked for the Kushis for over 13 years. He studied with them at Arlington Street Church before Erewhon existed. Evan and Peggy Taylor, Ronnie Coates and Marty Russell started Sanae; Rich worked there for 18 months, washing dishes and buying. Then he worked at *East West Journal* for 18 months when Robert Hargrove was editor, in advertising and sales. Then for the Seventh Inn for 18 months, shortly after it started and the two guys who founded it quit. It never got off the ground. Evan Root was followed by Ty Smith who was followed by Richard Sandler. Then in 1972 Rich went to work for Tom Chappel of Tom's of Maine (natural toothpaste).

Bruce Macdonald married Maureen Traill, his first wife, in the first "official" macrobiotic wedding in Boston, Massachusetts, at the Old South Church on Copley Square. Then Bruce and Maureen moved to Los Angeles where Bruce played a major role starting Erewhon-Los Angeles. Bruce has had 6 children by four women. Now Bruce runs

home-based Right Hand Press which publishes the teachings of Linda Green, an Avatar, dowser, and pendulum-using spiritual teacher from Oklahoma.

Rich thinks that one of the first people to develop a process for putting soy sauce on nuts was Nik Amartseff, who created Nik's Snacks that were sold by Erewhon. Nik started out working with Fred Rohe's New Age Foods in San Francisco. Ask Rich about Erewhon's Hopi Seeds and Nik's Snacks.

Rich began to work at Erewhon in 1974 when Bill Garrison was the president; he continued until the company went bankrupt. When Paul Hawken left Erewhon, Bill Garrison took over. In 1975, under Bill, the company was losing money. Michio brought in Ty Smith on the condition that if Ty could make the company profitable, Michio would give Ty shares in the company. At 33 Farnsworth St., as president Ty (who Rich has great respect for) made the company profitable, but Michio reneged on the deal. So Ty left—he is now in Hawaii running a combination convenience store, deli and gas station. Tom DeSilva knows how to reach him. Then Michio brought in as president Jeff Flasher, who was very close to Ty and thus knew that Michio could not be trusted. One day Jeff went to Michio and said that Erewhon could stay at 33 Farnsworth Street and probably stay profitable, but it wouldn't grow as fast due to the limited space. Or Erewhon could move into a much larger warehouse and potentially sell a lot more food, but they would incur significant debt in the process. Jeff left the decision up to Michio and Michio decided to go for the larger warehouse, with the promise that he (Michio) would come through with a certain amount of money by a specified date. Michio was not able to do this.

Jeff Flasher is a wonderful person and his wife, Linda, at the time was extremely intelligent and helpful to Erewhon. Another reason for the downfall was the pressure of the full-line distributors, which led Erewhon to greatly expand its product line and to include many products of marginal quality. It was a choice between being a manufacturer (they made nut butters and granolas) and a brand name (from imports), versus competing with the full-line distributors. Michio chose the latter approach. That was a major reason for Erewhon's downfall. Address: Right Hand Press, Cambridgeport, Vermont.

7659. Weissman, John. 1992. Pioneering work with seitan, Wheatmeat, and Tan Pops in America, mid-1976 to 1992 (Interview). *SoyaScan Notes*. March 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Continued: In the fall of 1976 John formally founded the Vegetable Protein Company, registered with the city of Cambridge, and moved his operation out of his home into a commercial shop in Central Square at 140 River St. in Cambridge. Robert Allen left the company to begin a new career in the field of men's clothing. In 1976-77 John

tried to get a trademark for Wheatmeat but was unable to because I.T.T. (Wonderbread) owned the trademark for a bread product. With Tan Pops as the main cash product from 1976-1978, the business became a real commercial business and began to grow. Selling as many as 85 Tan Pops a day at Erewhon alone, he began to earn a modest living. For the first time, John began to use machines to help him in making his products. In 1977 he developed a portion-control method for the Tan Pops, running the seitan through a meat grinder, and forming them into cylinders, like a fat sausage, rather than the former slabs. John also began to experiment with new ingredients in the Wheatmeat and Tan Pops—such as vital wheat gluten, which he purchased from Ogilvie Ltd. in Montreal, Quebec, Canada. Other ingredients used included oat bran and oat flour mixed with wheat, whole toasted soy flour. The formula was constantly changing. At one point the main ingredients in the Tan Pop were vital wheat gluten and whole wheat flour. Neither Wheatmeat or Tan Pops were ever made entirely from vital wheat gluten.

In addition to the Wheatmeat Tan Pop, John developed and made a Tofu Pop, introducing it in the spring of 1977. He bought squares of plain pressed tofu (3 inches on a side and 3/4 inch thick) from a Chinese retail food store in Boston's Chinatown—he does not recall the company's name and he is not sure if they made the tofu or bought it from elsewhere. Later he bought tofu from Yah Kee, a Chinese tofu maker. He skewered the pressed tofu squares, coated them with his dry flour mix and corn batter, and deep-fried them. He first sold these at the very first Bread & Circus natural food store purchased by Anthony Harnett in Brookline. The product was introduced just after Anthony bought the store—but it was discontinued after a month or so, because it sold slowly; the unflavored tofu was too bland.

One day in the spring of 1979 he realized that deep-frying was unhealthy, and that day he and an employee moved his Pitco deep-fryer down to the basement, thus starting the "Vegetable Protein Museum of Natural History"—and stopped making Tan Pops. At that point he reformulated the Solar Burgers by adding TVP (they were made from a mixture of seitan and soy in various forms, incl. soynuts and TVP). He also made a TVP chili, which he thinks was called Vegetarian Chili.

In about 1978-79 John introduced another new product to salad bars around Boston. Named Smoky Soy Bits, it was a combination of TVP and gluten (produced by Ogilvie Ltd. in Canada) made into bacon-like bits, but without hydrogenated oils or salt (he used tamari instead). It was an "all natural" product—to the extent that TVP is natural.

In Nov. 1980 John introduced Weissman's Original Tofu Sausage, which tasted like bologna. A 6-ounce mixture of spices and tofu in a cellulose casing, it was cooked in a smokehouse. His company made it for the first 4 years and it eventually became his best-selling item. As its popularity increased, he phased out retail sales of Wheatmeat and Solar

Burgers, and sold these Tofu Sausages to restaurants in bulk. After this period he invented only tofu products.

In 1983 John invented Pasta Pals, a tofu-gluten meatball. He discontinued it when Lipton Tea Inc. brought the trademark from him in late 1984. Lipton still owns the registered trademark.

In May 1984 John had to leave his food plant at 140 River Street in Cambridge. So he arranged with Michael Cohen to make the Tofu Sausage at his plant in Greenfield, Massachusetts. This was disastrous for John, since the product's new poor quality almost ended any reputation it had left in the marketplace. But it was quite an education for John. In January 1985 he took back the product and began making it for himself again.

In the fall of 1984 John arranged with Ademar Reis, owner of Season's Harvest (a sandwich maker who was John's first customer for bulk-packed Solar Burgers in 1976) to have the Solar Burger made at Ademar's shop. John also wanted him to make Smoky Soy Bits and showed him how. Reis made the products for John briefly in late 1984, however this situation did not work out for John either. But it did for Ademar, who to this day makes soy "bacon" after the manner John showed him, using textured soy flour or concentrate, and flavorings similar to or the same as those from raw material sources which John supplied to him. Reis now also makes a tofu meatball.

In 1985 John changed the company name to VegPro. He continued to make Solar Burgers and Wheatmeal, but from then on he only invented and worked on tofu products. In about 1986, based on the success of his Weissman's Original Tofu Sausage (6 oz), he introduced a new Tofu Savvy line of products (starting with a 3-lb Boloney), each in a 2-3 lb loaf shape like a meatloaf, and sold to delis. He buys his tofu from a tofu maker in Massachusetts. With names like Tofu Salsa Savvy (bulgur and tofu), Curry (with brown rice and veggies), Spice-Seed, and Boloney, these are offshoots of the tofu sausage, but they involve a highly proprietary process that John has developed. Delis sell the sliced loaves for use in sandwiches.

In 1990 he began to test market (in one Bread & Circus store) two new types of tofu franks: Good Dogs, and Bad Good Dogs (hot & spicy), each with a registered trademark. They were only on the market for 1-2 months because they didn't keep well—but he still feels they are excellent products. He made them himself because he doesn't like to have them made on meat processing machines.

Today John works as a very creative solo craftsman and a chef, still making a line of food products himself, including the Weissman's Original Tofu Sausage (6 oz), and the Tofu Savvy line. His products are sold at about 10 outlets, including five Bread & Circus stores, plus some co-ops, restaurants, and health-food stores.

He no longer makes Solar Burgers, but someone from California is making another product with that name.

On 19 April 1988 John received federal trademark #1,485,401 for Wheatmeal. He knows of people in Utah and Pennsylvania who are using his registered trademark, Wheatmeal, illegally.

John, now age 43, is a musician, selling foods he has developed, and writing a novel. He is almost a vegetarian, but he eats some fish. Address: VegPro Co., 133 Nottingham Rd., Brighton, Massachusetts 02135.

7660. Bounds, Sarah. 1992. The subject of soya. *BBC Vegetarian Good Food (England)*. Spring. p. 28-29, 31-32.

• **Summary:** An introduction, with many color photos, to soyfoods, including TVP, tofu, soya milk, soya flour, soya oil, soy sauce, miso, tempeh, fresh soya [green vegetable soybeans; "soya beans can be eaten fresh straight from the pod, served green and tender..."], and whole dry soybeans. Contains considerable incorrect information.

7661. GEM Cultures. 1992. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. March. [4 ref]

• **Summary:** A new addition to the catalog is "Tofu form boxes" named "Total Tofu!" Each is made by a local woodworker in Mendocino County using American beech wood. The 8 by 5 by 3½-inch size is large enough to press 2 pounds of tofu. Included also is a 3 oz packet of natural nigari, 3 ounces of Terra Alba calcium sulfate, a double square of Grade 60 cheesecloth to line the box, and directions on how to make tofu and soymilk. Price of a Total Tofu kit, postpaid, is \$32.00. Address: Fort Bragg, California. Phone: 707-964-2922.

• **Summary:** This is one of the best sources known on the subject, which includes much information on the export of shoyu from Japan to other parts of Asia and to the Netherlands by the Dutch East India Company (VOC).

Chronology and basic concepts: Almost all shoyu (soy sauce) exported from Japan during the 1600s and 1700s (and all soy sauce exported officially or legally) was exported from a tiny man-made island named Dejima in Nagasaki Harbor. Most of it was exported by the Dutch East India Company (VOC), which was the only European company allowed to trade with Japan during this period of isolation from 1600 to 1854. The Japanese government classified all soy sauce exported from Deshima into two basic types: (1) Official trade freight (*motokata nimotsu*, also called *compania nimotsu*), and (2) Private trade freight (*waki nimotsu*, also called *yakusha / sojya* {staff / sailor} *nimotsu*). Official trade freight was the kind engaged in by the Dutch East India Co.; this freight was recorded in the Nagasaki Trading Firm Journal. Private trade freight referred to the goods traded privately by Dutch sailors and by the chief and staff working at the Nagasaki Trading Firm.

Note: In about 1600 the Chinese obtained an official trade permit and settled in Nagasaki. At the peak of Chinese activity there, about a century later, as many as 190 Chinese ships a year were visiting Nagasaki, and one-sixth of the town's population hailed from the East Asian mainland.

1609-1641—The Dutch East India Co. (VOC) maintains a trading post at Hirado, a small island off the northwest coast of Kyushu.

1634—Dejima (literally "protruding island," also spelled Deshima), a small artificial island in Nagasaki Harbor is constructed as ordered by shogun Iemitsu; it originally accommodated Portuguese merchants.

1638-1639—The Portuguese (and other Catholic nations) are expelled from Japan for suspected complicity in the Shimabara Revolt of 1637.

1641 May—The Dutch East India Co. is moved from Hirado to Dejima, where they were kept almost like prisoners on the tiny island. For 200 years, Dutch merchants were generally not allowed to cross the little bridge from Dejima to Nagasaki, and Japanese were likewise banned from entering Dejima. From 1641 to 1853 the Dutch are the only Western nation allowed to trade with or to enter Japan,

but solely on Dejima. Chinese and Korean traders are still welcome, but their movements are restricted.

Dutch ship arrivals: From 1641 to 1671 an average of 7 ships per year. From 1671 to 1715 about 5 per year. From 1715, only 2 ships were permitted each year; this was reduced to 1 ship in 1790 and again increased to 2 ships in 1799.

1647—Exporting of shoyu (soy sauce) to Asia from Japan (as official trade freight) began. The first shipment was 10 kegs (*taru / balien*) sent to Amping, on today's Taiwan, by the VOC's Taiwan Trading Firm. From 1647 to 1720, this shoyu was exported from the Nagasaki Trading Firm to each regional trading firm in Asia, including today's Hanoi, Vietnam (1652); Ayuthaya, Thailand (1657), Jakarta, Indonesia (1659), Malacca, Malaysia (about 1660), 250 km northwest of Phnom Penh, Cambodia (1665), Paliacatta, 40 km north of Madras, India (1666), Bengal region, India (1666), Colombo, Sri Lanka (1670), Surat, northwest coast of India (1672), Amboina, Banda, and Ternate, in the Moluccas, Indonesia (1693), Sulawesi Island (Celebes), Indonesia (1693).

Note: This document contains the earliest date seen (May 2010) for soybean products (shoyu) in Cambodia (1665); soybeans as such had not yet been reported by that date.

1685—The Shogunate at Edo limits the amount of "private trade freight" to 400 *kan* (1 *kan* = about 3.75 kg), or about 1,500 kg or 3,300 lb.

1669 March 31—20 kegs of shoyu are shipped from Japan to Batavia on a Chinese ship (Source: Diary of Casteel Batavia). This is the earliest document seen showing a Chinese ship exporting shoyu from Japan.

1687—20 kegs of shoyu made in Kyoto (1 keg = about 29.104 liters) is shipped to the Ceylon (today's Sri Lanka) trading headquarters. It is believed to have been made by a sake brewer in Kyoto. At that time, Sakai city, a southern suburb of Osaka city, was located on the edge of Osaka Bay at the mouth of the Yamato River. It is one of the largest and most important seaports in Japan during the Medieval era, and is also famous in the Kyoto/Osaka area (along with Kyoto) for its soy sauce production. During the period 1764-1780 shoyu was made in Sakai by 4 manufacturers, including Shobei Hosoya. Soy sauce made in Sakai was transported by ships along the Inland Sea (north of Shikoku), through the narrow straight between northern Kyushu and Shimonoseki, around the north and west sides of Kyushu, to Nagasaki. These ships from Sakai were called the "Sakai Raw Silk Carrier Boat" or *Sakai Bune*. They had been authorized to ship imported silk from Nagasaki since the Keichô period (1596-1611) of Edo era. The ship was empty going back from Sakai to Nagasaki and the space was used for soy sauce exports. Much of the shoyu exported from Japan to the Netherlands is thought to have been made in the Kyoto / Osaka area. It was probably made mainly in Sakai, while that

made in Kyoto was exported in small amounts for special occasions. Extremely low priced shoyu is thought to have been made in Kyushu, and exported to China. None of the shoyu exported during the Edo / Tokugawa period (1600-1867) was made in the Edo / Tokyo (*Kanto*) area.

1711—In the Chinese and Western Freight Log it is recorded that 61 kegs of shoyu (56 large kegs and small kegs) as well as 40 kegs of miso were exported as “official trade freight,” whereas 867 kegs were exported as “private trade freight.” Thus, the private freight (in this rare year where records exist) was about 8 times as much as the official freight.

1712—Some 999 kegs of shoyu and miso are exported as “private trade freight.” Unfortunately we are not told how many of these contained shoyu and how many contained miso.

1721-1792—The VOC exports Japanese shoyu only to its trading headquarters at Batavia (today’s Jakarta, Indonesia); from there it is transferred to each regional trading firm.

1737—The VOC first exports Japanese shoyu to the Netherlands, from its Batavia headquarters. Thus, Japanese soy sauce first arrived in the Netherlands (and in Europe) in 1737. All this shoyu was exported as “official trade freight.” This export route was used until 1760. During the 24 years from 1737 to 1760, approximately 46,000 liters of soy sauce were exported from Dejima to the Batavia headquarters, and 15,600 liters (about 1/3 of the total) were then shipped from Batavia to the Netherlands. In 1742 and 1743, no shoyu was transshipped from Batavia to the Netherlands. Thus, during the 22 years that shoyu was transshipped from Batavia to the Netherlands as “official trade freight” was about 707 liters/year. The amount exported was calculated based on the capacity of the “large keg” (29.104 liters); the small keg held exactly half this capacity (14.552 liters). In addition, a substantial amount of shoyu was presumably exported from Batavia to the Netherlands as “private trade freight.”

Also in 1737 the limit of 400 *kan* on “private trade freight” is abolished, so that any amount can be exported in this way.

1790—Shoyu is first exported from Japan in comprador bottles; these bottles, made of grey / white porcelain, were recorded as “sterilized soy sauce” and 550 of them were used this year to export shoyu.

1795—The book titled *Travels in Europe, Africa, and Asia, Made between the Years 1770 and 1779...*, by Charles Peter Thunberg (a Swede) is published in English. An entry from about the year 1776 (Vol. 4, p. 107), in the chapter on Commerce, reads: The traffic in Soy [sauce]... is more considerable [than that of tea. Japanese] soy is much better than that which is brewed in China. For this reason, soy is not only exported to Batavia [Jakarta], in the wooden kegs in which it is made, but likewise sold from thence to Europe and to every part of the East Indies. In some places in Japan too the soy is reckoned still better than in others;

but, in order to preserve the very best sort, and prevent its undergoing a fermentation, in consequence of the heat of the climate, and thus being totally spoiled, the Dutch at the Factory [at Desima / Dezima / Dejima] boil it up in iron kettles, and afterwards draw it off into bottles, which are then well corked and sealed [by applying bitumen / coal tar to the stopper]. This mode of treatment renders it stronger and preserves it better, and makes it serviceable for all kinds of sauce.

Note: This early discovery of pasteurization and sealing in porcelain bottles explains how the Dutch were able to keep this soy sauce from spoiling becoming overfermented while it was being shipped from tropical Japan, to Batavia [Jakarta], across the Equator, around the Cape of Good Hope (south of Africa), then all the way to the Netherlands.

1799—The Dutch East India Co. (VOC) is dissolved.

1804-1829—A total of 2,672 kegs of shoyu is exported in Chinese ships during most of these 26 years from Japan. About 153 kegs/year are exported (range: 12 to 322 kegs, but with no exports in 1805, 1816-18, 1824-28).

1854—Japan’s policy of self-imposed national isolation is abolished / ended. Shoyu can be exported freely, without limits.

Some 670 liters a year went to Holland. The soy sauce to be sent to Holland was put in a special container with special outside packaging. The shoyu that was exported was made mostly in Kyoto. In 1765 the famous French-language *Encyclopedia*, by Denis Diderot, had a section on soy sauce.

Brief biography of Teijirō Yamawaki: 1914—Born in Japan. 1950—Graduated from Tokyo University, Dep. of Literature, Faculty of Japanese History. 1954—Awarded his doctorate (PhD) in history from Tokyo Univ. Between 1960 and 2002 he was the author of at least 8 books in Japanese including: (1) *Smuggling (Nukeni)* (1965, Nikkei Shinsho). (2) *Trading with Chinese Merchants in Nagasaki* (1964, Yoshikawa-kobunkan). (3) *Nagasaki Trading Firm of Dutch Merchants* (1980, Chiokoron). (4) *Encyclopedia of Silk and Cotton during the Edo Period (Jiten Kinu to Momen no Edo Jidai)* (2002, Yoshikawa-kobunkan, Tokyo, 230 p.).

A careful analysis of the records shows that there were two sizes of wooden (cedar) kegs used for exporting soy sauce from Japan. The “large taru” had a capacity of 29.1 liters, whereas the “small taru” had about half that capacity. Note: However during the 20th century, the typical wooden taru used for packaging soy sauce, had a capacity of either 9 *shô* (16.2 liters) or (later) 10 *shô* (18 liters = 4.75 gallons U.S.). Each cedar keg had a wooden lid, was held together with braided bamboo hoops, and tied with packing rope. Address: Lecturer, Tokyo Metropolitan Daisan High School of Business Studies; Dep. of Literature and Graduate School of Hosei Univ., Tokyo, Japan.

7666. Yamawaki, Teijirô. 1992. The Comprador Merchant Guild [*Konpura Nakama*] (1-2). In: Yamawaki, Teijirô. 1992. “Soy Sauce Export in the Edo Period—According to the Nagasaki Trading Firm Journal.” A Translation of *Edo jidai shôyu no kaigai yushutsu*. Noda, Japan: Kikkoman Institute for International Food Culture (KIIFC). 16 panels. See panels 14 and 15. [1 ref. Eng]

• **Summary:** The “Comprador Merchant Guild” refers to the group of merchants who were authorized to coordinate the trading of commodity goods, exported products and freight between the Dutch staff at the Nagasaki Trading Firm [Dutch East India Company, or VOC] or the Dutch sailors and Japanese merchants.

Comprador is the Portuguese word for “buyer.” The Comprador Merchant Guild, an abbreviation of the “Merchant Guild for the Sales of Various Goods at Dejima,” was established in 1666 by 16 merchants under the authorization of Michisada Kono, the governor of Nagasaki. (The number of members increased to 17 at one stage.) They were the privileged group of merchants whose marketing rights were assured by the governor of Nagasaki.

The Comprador Merchant Guild was generally thought to have sold goods to Dutch merchants, but actually they worked for the Dutch merchants as their buyer in order to gain margin profits. The name, “Merchant Guild for the Sales of Various Goods at Dejima” refers exactly to this kind of activity.

In Nagasaki, in addition to the Comprador Merchant

Guild, there was the Interpreter Guild, a group of interpreters who assisted the transaction of trading private freights. They gained commissions by interpreting and coordinating the trading of *waki nimotsu* (“private trade freight”) under the license granted by the governor of Nagasaki in 1670. In the *Nagasaki Public Service Yearbook* written in 1701, 16 comprador guild merchants were counted as part of the 90 guild interpreters. Hence the comprador guild merchants and guild interpreters were treated as having the same social status.

History of the Comprador Merchant Guild: As mentioned in Panel 14, the guild was established in 1666 under the authorization of Michisada Kono, governor of Nagasaki. We now are going to take a closer look at the history of the Guild. (Excerpt from Episodes associated with Comprador Bottles, Masao Ichikawa).

In 1642, when the Hirado Dutch Trading Firm [part of the Dutch East India Co., or VOC] was relocated to Deshima / Dejima, a tiny artificial island in Nagasaki harbor, Heizaemon Koyanagi and Bunzaemon Kujiraya, two merchants engaged in the marketing of Dutch merchant goods in Hirado, accompanied the Dutch merchants and were given permission to continue business operations in Nagasaki. Later, in 1653, when the business became more prosperous, they recruited Rihei Hirayama and three other merchants from Hirado. Hence the merchant guild by this time was organized by six merchants. In 1666, Hikozaemon Murata and another nine merchants joined and the 16-member guild was established. Since then the number of the guild merchants has remained the same, except for a certain period when it consisted of 17 merchants.

The number of guild shares was fixed at 16. There were no restrictions concerning exchange of shares, and they were transferred to member’s descendents, friends or relatives. In 1858, when a trading treaty with the Netherlands, England, France and Russia became effective, the guild ceased to enjoy its commercial privileges, and the original purpose of the guild disappeared. So in June 1868 the merchant guild branched out into new businesses including the manufacturing and/or distribution of bread. In 1874, however, because of a slump in business, the Comprador Merchant Guild dissolved; the shares and sales office were sold, and the assets divided between the guild merchants.

Besides their regular business operations, the Comprador Guild Merchants were ordered by the Edo Shogunate to accompany the Dutch to Edo in 1844, 1850 and 1855, and to supervise them in the purchase of prohibited goods or to assist them as transaction agents. Address: Lecturer, Tokyo Metropolitan Daisan High School of Business Studies; Dep. of Literature and Graduate School of Hosei Univ., Tokyo, Japan.

7667. Yamawaki, Teijirô. 1992. The Comprador soy sauce bottle (1-2). In: Yamawaki, Teijirô. 1992. “Soy Sauce Export

in the Edo Period—According to the Nagasaki Trading Firm Journal.” A Translation of *Edo jidai shōyu no kaigai yushutsu*. Noda, Japan: Kikkoman Institute for International Food Culture (KIIFC). 16 panels. See panels 8, 9, and 13. [Eng]

• **Summary:** The amount of soy sauce exported from Japan was recorded by the barrel in the Nagasaki Trading Firm Journal. But not all of this soy sauce was actually exported in barrels; some of it was exported in sterilized glass bottles (called “kerder bottles”), which were soon replaced by sterilized grayish white pottery bottles (called “comprador bottles”).

The records show that two sizes of barrels were used to export soy sauce. The capacity of the small barrel was about 14.5 liters (3.8 gallons), roughly half of that of the large barrel (approximately 29.104 litres, or 7.78 gallons).

The pottery bottles [many of which still exist and are even sold or displayed on the Web] were made in Imari or Hasami near Nagasaki to cover the shortage of glass kerder bottles. They were then replaced with the pottery bottle similar to the baked bottle currently used as sake bottles (*tokkuri*). [Note: Both types of bottles were ordered, examined, paid for, and supplied by the Comprador Merchant Guild].

The full name of the comprador bottle shaped like a sake bottle is “comprador soy sauce bottle,” in order to distinguish it from the comprador sake bottle.

According to Mr. Yamawaki, a comprador bottle contained about 552 millilitres [a little more than 1 pint or half a quart] and 550 of them were used for the first time in 1790 for soy sauce export. These bottles of soy sauce are recorded in the Journal as “sterilized soy sauce.” Soy sauce exported as official trade freight (*motokata nimotsu*) was discontinued in 1793. Eventually in 1799, the Dutch East India Company was dissolved. The Nagasaki Trading Firm

subsequently came under the supervision of the East Indian Governor-General in Batavia, and soy sauce exports were resumed. At this time, the bottles were modeled after the ones used in 1790.

It was suggested by the late local historian, Mr. Masao Ichikawa, also a former notary in Amakusa, Nagasaki, that the comprador bottles came in two different styles.

They have the letters (all caps) “JAPANSCHZOYA” or “JAPANSCHSOYA” written on the shoulder. The early comprador bottles have handwritten letters on them and are grey/white porcelain. Two of the three bottles exhibited are the early comprador bottles. One of them, which is of yellowish earth-color, is considered to have been used even earlier than the white porcelain bottle.

Late comprador bottles have “JAPANSCHZOYA” and “CPD” stamped. “CPD” is the monogram that came from “comprador”. On the opposite side of the bottle, a circular or oval stamp in Western characters or in Chinese characters, referring to the Nagasaki Comprador Trading Company or the Nagasaki Comprador Store, is seen. According to Mr. Yamawaki, the term, “trading company” came to be used during the Meiji period. This means that the late comprador bottle with the Chinese character stamp was also used during the Meiji period.

The capacity of comprador bottles differs from bottle to bottle. The capacity of one bottle exhibited in the Noda City Local Museum is 575 millilitres while that of another bottle is 460 millilitres (See: *Comprador soy sauce and soy sauce produced in Tokatsu region*, by Norio Tanaka). Based on the amount of soy sauce and the number of the bottles exported, Mr. Yamawaki assumes that a bottle contained approximately 522 millilitres.

As mentioned in Panel 8, “JAPANSCHZAKY” is seen on the shoulder of the bottles of the same shape used for sake

export.

Transportation of Comprador soy sauce bottles: It must have been very difficult for the Dutch to maintain the quality of the soy sauce they shipped all the way to the Netherlands by way of Batavia, right on the equator and around the Cape of Good Hope. How did Dutch merchants prevent the products from spoiling without any of the refrigeration or vacuum packaging technology we have today?

The following is an excerpt from the 1795 book *Travels in Europe, Asia, and Africa, Made between the Years 1770 and 1779*, by C.P. Thunberg, a Swedish doctor and botanist who worked for the Nagasaki Trading Firm as a medical doctor.

“Japanese people produce extremely high-quality soy sauce, much better than the Chinese equivalent. A large amount of soy sauce is shipped to Batavia, India and Europe. The Dutch discovered a reliable method for preventing soy sauce from being degraded or fermented at a high temperature. They boil soy sauce in an iron pot and pack it into bottles applying bitumen (coal tar) to the stopper.” (Translated by Tamaki Yamada; Thunberg’s 1795 book is in English).

Note: All this took place long before Appert’s invention of canning in 1809 and Pasteur’s invention of pasteurization in 1862. In fact pasteurization had been practiced in Japan for 200 to 300 years before this time.

In 1790, 550 comprador bottles were used for the first time to export “sterilized soy sauce”. This seems to refer to the soy sauce that was boiled and packed into bottles with coal tar-applied stopper, as described by Thunberg.

A photo shows a page that mentions soy sauce from the trading records of the Dutch East India Company (National Central Archive, Hague, the Netherlands). Address: Lecturer, Tokyo Metropolitan Daisan High School of Business Studies; Dep. of Literature and Graduate School of Hosei Univ., Tokyo, Japan.

7668. Amartseff, Nik. 1992. The invention and commercialization of roasting soybeans, seeds, and nuts with shoyu or tamari: Hopi Seeds and Nik’s Snaks at Erewhon (Interview). *SoyaScan Notes*. April 3. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In about 1969-1970, Nik met Paul Hawken at New Age Natural Foods in Palo Alto, California, where Nik had been hired by Fred Rohe to create the natural deli department. Nik knew David Mastrandrea. Paul offered Nik a job at Erewhon. When Nik saw the coming demise of New Age, he accepted Paul’s offer, and arrived in Boston in about May of 1971.

At about the same time, Paul met a guy named Jerry (his last name started with “S,” perhaps “Sh,” and sounded like a German Jewish name). Jerry was roasting very small batches of sunflower and pumpkin seeds in iron skillet in his home kitchen in Berkeley, California; while they were

still hot, in the skillet with the fire off, he would season them by rapidly mixing in undiluted tamari and continuing stirring until the liquid was evaporated and the flavor absorbed by the seeds. He bagged them and peddled them on the streets. Nik thinks that Jerry launched the first such commercial product, probably in about 1968. He had become reasonably successful when Paul met him in about 1969-1970, so Paul invited him to come to Boston, where Paul set him up in a corner of the recently acquired warehouse at 33 Farnsworth St. Jerry started production using his former simple skillets, then Paul helped him to buy a used cast-metal tumbler-style coffee roaster, converted to a peanut roaster, that could process 50 lb at a time. After being roasted, the seeds were poured into a large rectangular sieve, custom fabricated for this purpose. Jerry was making and packaging this line of Hopi Seeds as a one-man operation. Each seed was roasted and seasoned separately. They were on the market sometime between late 1969 and early 1970. His production soon exceeded his ability to handle it; he was selling through Erewhon wholesale. When Nik arrived in May 1971, Hawken asked Nik to assist Jerry. But after 1 month, Jerry suddenly disappeared—it was apparently related to his selling marijuana on the streets. Soon thereafter, by the summer of 1971, Nik increased the line from 2 products (sunflower, and pumpkin seeds) to 5 (almonds, cashews, and soybeans). They were sold in 1 oz polyethylene-cellophane bags. Erewhon had received a shipment of specially processed, split soybeans, and a new easy-to-clean, easy-to-empty roaster made of sheet steel was developed (it’s construction resembled a cement mixer). While the roasted seeds were still inside, Nik would spray in the tamari using a sprayer with a long nozzle, then finish cooking them on low heat.

When Nik arrived in May 1971, the main soy products that Erewhon sold were traditional tamari and miso, imported from Japan, plus soybeans and soy flour (toasted from Arrowhead).

By the fall of 1971 Nik was no longer directly involved with manufacturing the tamari-roasted seeds and nuts; he had been promoted to installing Erewhon’s first semi-automatic equipment to make the Hopi Seeds, granolas, etc. The main management people at Erewhon in those days were Paul Hawken (the alleged head), Bill Tara, Hy Lerner, and Yuko Okada (of Muso Shokuhin). Wally Gorell (who was designing packages for a while). Erewhon was setting up its West Coast operations at this time and there seemed to be an ongoing power struggle between Hawken versus Tom DeSilva and Roger Hillyard. At one point, Roger went to Arrowhead Mills. Nik continued to work for Erewhon until about May 1972. Later he returned in Sept. 1973 and stayed until about 1977.

At one point, Wally left Erewhon and Paul Hawken got a small graphic design firm to design a more sophisticated label for the Hopi Seeds and to change the name. The name they came up with was Sol Seeds, with a stylized logo of the

sun. But the name had not been researched and the owner of that registered trademark threatened to sue. By now Paul Hawken was gone and Ty Smith was president. When Nik returned to Erewhon in Sept. 1973, he renewed his involvement in this line, which still contained only 5 items. By about 1974 he had built the line into one that contained up to 12 products, including trail mixes and mixed nuts and seeds. So at that time Ty honored Nik by renaming the line “Nik’s Snaks.” The name “Sol Seeds” never appeared on a commercial Erewhon product. By the time Nik left Erewhon in about 1977, there were about 18 items in the Nik’s Snack line, a total of about 30 products including the various sizes of one product. Nik had taken a home operation, that never got sophisticated but was based on a good idea, and made it sophisticated in terms of the manufacturing process, product development, the package design, and the marketing. Nik’s Snaks were a good-selling product for Erewhon for as long as the company existed. Many other natural foods companies developed their own competing lines of “tamari-roasted seeds and nuts.” Address: Right Hand Press, P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

7669. Macdonald, Bruce. 1992. Introduction to macrobiotics and early work at Erewhon (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center. • **Summary:** Bruce was born on 5 Feb. 1946 in New London, Connecticut. In 1964 he entered the University of Connecticut, and essentially majored in LSD. He was an early buyer (for personal use only) of LSD from the Boohoo Church in Florida. This “Church” was the original importer of LSD from Sandoz Labs in Switzerland. Arthur Klets was head; Timothy Leary and Richard Alpert were involved.

At Christmas, 1965, Bruce dropped out of the university because he had a kidney disease that just wouldn’t go away. He went to a doctor who gave him, sequentially, 4-6 varieties of antibiotics. Each one worked for several weeks until the microorganisms became resistant. Seeing that he was on a dead-end road at age 18, he freaked. He took a bus to New York and, to his surprise, sitting next to him was Kathy Bellicchi (who is now living in Brookline, Massachusetts). She was from Bruce’s home town and he had known her in passing when they were younger, but he hadn’t seen her in a while. She said to him, “Just eat brown rice and salt and it will go away. I know somebody that I’d like to introduce you to. He’s got a little teeny restaurant in New York City called L’Epicerie [at Second Ave. and 57th St.]. He is Michel Abehsera.” Bruce recalls: “Michel is a rather spell-binding personality; also really smart and well-spoken. In 15 minutes he had me absolutely convinced that this was what I needed to do. And he was right. So I rented this apartment for \$69 a month on Stanton, down on the Lower East Side” [of Manhattan, New York City]. For the next year, Bruce worked at a boring job for Bennett Brothers (an old, established mail order company in Manhattan selling

trinkets—not natural foods) to pay the bills, and he began to study macrobiotics, and yin/yang. Finding a chart which showed buckwheat to be the most yang grain, he decided to start eating buckwheat as his main food. After receiving a call from an old friend, Bort Carleton, in Vershire, Vermont (a good, clean, quiet place for healing) he moved there and began living in a cabin with Bort (a shoe and boot tycoon in Boston), who was also involved with macrobiotics. Later, Bort also sponsored a macrobiotic study house. Soon Bruce was cured—permanently—of his kidney disease. He became a true believer in macrobiotics. He and Bort would drive to Boston to listen to Michio Kushi’s lectures in the old church.

In June 1967 Bruce moved to Boston, and began to live in the University Road study house. After four quick affairs with lovely young women (“I was really yang”), Michio called him over to 216 Gardner Road and asked him to “chill out” (calm down) with these girls, since Michio was “involved” with the same young ladies. Michio and Aveline had initially gotten together in a marriage arranged by George Ohsawa, who sent Aveline to America to marry his best student. Michio and Aveline had an “open marriage,” and both of them had affairs with younger people of the opposite sex the whole time that Bruce was in Boston. This was well known in the upper echelons of the still small macrobiotic community.

By late 1967 Bruce was working as a carpenter for Michio’s landlord (Mr. Fogelman), redoing his house at 216 Gardner Rd. Paul Hawken hired Bruce to be the contractor and carpenter to remodel the new Erewhon retail store at 342 Newbury St. Bruce did most of the design and contract work, then he assisted Jim Docker (a master carpenter) in the remodeling, getting thick planks from Boston piers for the floors, and constructing the shelves with dowels rather than nails. Erewhon had a little store below street level at 303-B Newbury Street, that later became Tao Books. While the business was at 303-B Newbury, in Aug. 1968 the first imports from Japan started to arrive from Muso Shokuhin. These included tamari (soy sauce) and miso. But Erewhon was unable to get Hatcho miso (“the Emperor’s miso”) in foil packs, and that was Erewhon’s first contact with Mr. Kazama; he was able to get that product for Erewhon in less than boat-load quantities. From then on, Erewhon started to import from both Muso and Kazama / Mitoku. The Erewhon store at 342 Newbury St. opened in November 1968, on Thanksgiving day, and several months later, in March 1969, Paul Hawken went to Japan. Paul asked Bruce to take over as general manager of Erewhon. Roger Hillyard ran the retail store in the front of the building.

What finally happened to Erewhon? Michio always said that Erewhon was a school; he should have said it was a business. Address: Right Hand Press, P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

7670. Macdonald, Bruce. 1992. The development of

Erewhon: Early financing and suppliers (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** How did Erewhon finance its rapid early growth? Initially there was a deal with the State Street Bank in Boston to borrow about \$25,000. Bruce was on the West Coast so he didn't really know the details. But State Street said "no," so they switched to New England Merchants bank. Bruce believes that Paul Hawken flew back from Japan to negotiate that loan—in about 1970 or early 1971. They got a slug from New England Merchants—probably in the neighborhood of \$100,000. Also, the Japanese companies were giving Erewhon some time to pay; it was Mitoku at the beginning, then Muso later on. Bruce saw some of Erewhon's filings for the bankruptcy. As he recalls, Erewhon owed Muso about \$200,000 and Mitoku (Mr. Kazama) about \$200,000 to \$250,000. That was quite surprising to Bruce. Apparently, right up to the end, Erewhon had been buying in roughly equal quantities from Muso and Mitoku. "Money was always extremely tight. Let's say you double your sales. As you increase your inventory, you also increase your accounts receivable—the money that people owe you. Bruce used to buy commodities from Cornucopia. "I used to order about \$8,000 worth a week and he gave me three weeks to pay. So essentially he invested \$24,000 in commodities—money that he never saw again. When the 4th week came I paid the 1st week, on the 5th week I paid the 2nd week—but I always owed him \$24,000. We did that with all our suppliers, but at the same time we were extending credit to all the people we were selling to. There is a rule of thumb; as your sales explode, you need \$3 in capital for every dollar increase in sales. You need a dollar for the extra inventory, a dollar for the extra receivables, and you need a dollar for the extra equipment you need to buy to service it. That could be moving into a new warehouse, buying a new flour mill or new trucks or pallet jacks. Be we didn't have those three dollars. So we had to squeeze 'em and it was always very tight."

Who were the early, important organic farmers who grew crops organically for Erewhon. Arrowhead Mills (from Hereford, Deaf Smith County, Texas) was a major supplier of winter wheat, rye, corn, soybeans, pinto beans, etc. for about the first 3 years, before Erewhon had developed any of its own sources; that came later, after Paul Hawken returned from Japan. Paul probably visited Arrowhead Mills in Texas about 50 times; Bruce visited maybe 3 times, but he remembers the long windrows of composted cow manure that were eventually put on the fields. Frank Ford was a real farmer, who believed in working with nature. There was an older fellow, whose name now escapes Bruce, who was the brains behind Arrowhead's farming. He had studied Ehrenfried Pfeiffer's biodynamic method and had developed this method of keeping the soil fertile. "It was the most amazing thing. They were able to grow such good quality

wheat and other crops in part because they were enriching their soil like nobody else in that area."

Ted Whitmer, the spring wheat farmer in Montana, was another early supplier. He did not have a contract with Erewhon; he just grew the wheat and sold it (in his bags) to anyone who would buy it. Spring wheat is a high-gluten wheat that is used for bread. Winter wheat, which grew in Texas, is higher in minerals because it is in the ground longer (you plant it in the fall), but it doesn't have much gluten. Lewis B. Cox, an organic farmer from Washington state, grew gorgeous pastry wheat, sold in his bags. Paul Keene at Walnut Acres was a retail mail order operation; Erewhon didn't buy much from him. Shiloh Farms, in those days, was Arrowhead Mills' big distributor. Erewhon didn't buy much from them because they bought from Arrowhead direct.

The contract farming came later. There was a 5-year contract between Bob Kennedy and the Lundbergs. The Lundbergs had been growing rice for decades. When they contracted to grow brown rice for Chico-San, they decided to leave the local rice co-operative (which mingled together all the rice grown by its members); they had to keep their organic rice separate. Leaving the co-op was a big risk for them, in part because they now had to sell all their non-organic rice by themselves—with no help from the co-op. Paul Hawken did all the rice negotiations with the Lundbergs. Even after Erewhon sold all this "unsprayed" rice, they could not buy rice labeled "organic" from Lundberg for a number of years. That was when Paul Hawken went out to contract for organic rice farmers in the South—Carl Garrich in Lone Pine, Arkansas, and Willow Farms in Louisiana. That rice was sold in Erewhon's bags and those were some of the first contract farming deals. At that point, Erewhon really began to have an impact on the expansion of organic farming in the United States.

But the person who should be given the credit for contracting organically grown crops, from farmers who had not previously grown organically, is Bob Kennedy of Chico-San. He was the innovator! Paul Keene was another innovator—a decade before Arrowhead Mills [1946-47 vs. 1960]. As far as someone from outside, specifying an organic product and agreeing to buy and market it—that was Bob Kennedy. The Lundbergs had a big family farm when Kennedy first approached them. They were concerned about all the chemicals they were using. But they had to make a rather major investment; they had to install a rubber roller rice mill which they bought from Japan. They also had to break away from the rice co-operative for their organic rice. So for them, it was a huge commitment, and they deserve plenty of credit as well.

Bruce knows nothing about Erewhon's early operations in Canada; that was strictly from the East Coast and must have come later. "The Erewhon branches in Toronto and Milliken, Canada, were related to a guy named something like Fredericks, who was extremely wealthy. He had had

been a vegetarian for many years and one day woke up paralyzed. Someone involved with macrobiotics got him on a macrobiotic diet and he had a remission. He set up something but it never amounted to a hill of beans.”

Bruce was not involved in Erewhon’s exports to places like Sunwheel in the UK. Erewhon never exported much of anything, except to Canada. The Japanese foods were sent directly to Europe. Eden Foods was by far the leader in exporting macrobiotic and natural food products to Europe.

The first soy sauce that Erewhon *sold* was probably purchased from Infinity, a small company in New York. “A \$1,000 order would be the largest that they ever got.” Infinity was importing soy sauce from Japan before Erewhon. For a short time, Erewhon was by far Infinity’s largest customer—before Erewhon began importing from Japan. When Erewhon stopped importing from Infinity, that was one of two reasons for Infinity’s decline; the other was that Howard Rower began moving up in the Scientology hierarchy. The first soy sauce that Erewhon *distributed* was probably imported from Japan through Muso and made by Marushima. Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

7671. Macdonald, Bruce. 1992. Ceres, Shadowfax, and Erewhon (Interview). *SoyaScan Notes*. April 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Frank Calpeno, who was heavily into macrobiotics, started Ceres as a natural food distributor in Colorado Springs, Colorado. “He was a sweetheart of a guy.” He was going to be a Green Mountain Granary retail store in Colorado Springs; George Slavin made a deal with him. Whatever the deal was, that ruined the basic idea of the retail store. By the time Bruce arrived (ca. 1972) Frank ran his own natural foods retail store in Colorado Springs; not until years later did he become a distributor. He may have been doing a little distributing before 1980, which is when Bruce left Colorado, but not much. He was not a major player.

Shadowfax was a little natural foods distributor that was established in about 1970-71 by Charlie Smail in Binghamton, in upstate New York. Bruce thinks they were not macrobiotic, but they were strictly natural foods. They started at about the same time as Laurelbrook. They were going great guns for a while and then they petered out. Bruce was on the West Coast so he does not know what happened to them.

Mottell was another small natural foods distributor in New York; he was also going great guns for a while (roughly 1970-1980), but didn’t last for long. New York was a tough market for distributors; they came and went.

Essene started as a strict macrobiotic retail store that was one of the original distributors of Erewhon products. “When we first set up all of these distributors down-line from Erewhon, they were one of the first—along with Food for Life in Chicago (Illinois), Eden Foods in Michigan, Green

Mountain Granary in Colorado, Westbrae in Emeryville, etc. Most of these people had natural foods stores and Erewhon helped them to expand into being distributors—based on the model of Erewhon. They modeled themselves after Erewhon and bought a large percentage of the products they distributed from Erewhon.” Their catalogs were often identical or almost identical to that of Erewhon. This all happened shortly after Bruce left for the West Coast, so in about 1970-71. Essene was run by Denny and Howard Waxman; they still exist. Within the last year or so they moved out of the tiny store they had into a larger, nicer space. The only one Bruce can think of that did not start as a retail store was Laurelbrook.

What does Bruce think was responsible, above all, for creating that Erewhon model? “Paul Hawken and myself. We established the quality standards, the retail store look and environment, the packaging design, the price list and catalog content and design, etc.”

Was Bruce ever aware of a power struggle within Erewhon in Boston? No. The chain of authority was always clearly established and respected. In later years things got a little weird with Bill Garrison (who ran the company into the ground), Ty Smith (who rebuilt it). Erewhon made a comeback under Ty, who was the last real live wire to run the place, before it went into its long, slow erosion and decline.

A decisive even was the lawsuit, which had to do with Erewhon’s refusal to sell to co-ops. The co-ops sued Erewhon. That was the straw that broke the camel’s back. Even though Erewhon won the lawsuit, but they lost because the legal fees cost them something like \$250,000. There was not enough money to pay these fees and Erewhon never recovered. And Erewhon made other mistakes after that. Trying to become a full-line super-distributor. Doubling the number of items in the catalog. Moving into a huge and expensive warehouse. The labor union strike, etc.

Bruce hired Jeff Flasher out of jail in Los Angeles—where he first worked for Erewhon, L.A. In about 1970 Bruce got a letter from a guy named John Beverage, who was in jail. He said that he could get out if he could prove he had a job. Bruce wrote him back, “You’ve got a job.” John Beverage came to Erewhon West Coast, worked for 3-4 months and was a wonderful, sweet guy. He developed a very successful company making alfalfa sprouts in Boulder, Colorado throughout the 1970s and into the 1980s. Unfortunately he died of a liver disease several years ago.

Anyway his roommate and best friend in jail was Jeff Flasher—who had been caught dealing pot [marijuana]. When John Beverage was working at Erewhon he told Bruce that he had a friend, Jeff Flasher, who was coming up for parole, and he asked Bruce if he would do the same thing for Jeff. Bruce said, “sure.” Jeff Flasher became the miller for Erewhon West Coast. Several years later Bruce heard that Jeff was president of the company. “I was astonished.”

Bruce believes that by focusing more on one product,

Erewhon could have become a dominant force. San-J has built up and now owns the real tamari market, which means the market for natural soy sauce. They have nearly 70% of the market. While Bruce was at Green Mountain Commodities, San-J became the dominant player. They do all the bottling for Eden now. It happened when the dollar collapsed relative to the yen. Remember, in 1987 a dollar would buy 255 yen; it now buys about 130 yen. So, basically, all Japanese imports doubled in price, which enabled San-J—an American manufacturer of tamari and shoyu—to take such a large share of the market; they were \$2 a bottle less expensive. Eden Food was a major importer of tamari [natural shoyu] from Japan, as was Westbrae with their Johsen. Tree of Life was a major importer and Arrowhead Mills used to sell quite a bit.

Some big questions: Why didn't Erewhon West Coast move to San Francisco, since 95% their wholesale business was in northern California? It made no sense for Erewhon West Coast to be in Los Angeles—which had a tropical climate. Erewhon West Coast was a major factor in Erewhon's early growth, largely because they could bring containers imported from Japan into the USA through the West Coast. "We began to rival the East Coast in sales for a while." One month, the East Coast did \$390,000 a month in sales while the West Coast did \$330,000 a month. Why did Michio Kushi fail to grasp America's entrepreneurial spirit? Why was he not honest and straightforward in his offers of stock ownership in Erewhon with Paul Hawken, Ty Smith, and Bruce Hawken? Address: P.O. Box 100, Cambridgeport, Vermont 05141. Phone: 802-869-2010.

7672. Kushi, Aveline. 1992. The origin of seitan and how it came to America (Interview). *SoyaScan Notes*. April 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Aveline thinks George Ohsawa coined the term "seitan," but Aveline is not sure when he coined it. Since he died on 23 April 1966, he probably coined it in the early- to mid-1960s. She first heard the term from George Ohsawa, she thinks in the early 1960s while she and Michio were still living in New York; they moved to Massachusetts in 1963. Shortly after hearing about seitan, she bought some canned gluten-based meatlike products made by Seventh-day Adventist food companies, probably in New York. She does not remember how, where, or when she first learned to make seitan. Beginning shortly after her last son was born in 1964 in Boston, she taught many of her macrobiotic students how to make seitan starting with high-protein wheat flour. She taught seitan-making in almost all of her cooking classes, and she taught how to use the starch like kuzu as a thickener to make creamy soups. Starting in about 1984-85 she started to use the starch, together with rice syrup, to make sweet dumplings for desserts.

The first seitan imported to America was made by Marushima Shoyu Co. on Shodoshima in Japan. George

Ohsawa went to visit the company, talked with Mr. Mokutani (who is still the chairman, and a close friend of the Kushis, and a great admirer of Ohsawa), and showed him how to make it. Marushima began to make seitan commercially in the late 1960s. It was imported to America by Muso Shokuhin at about the same time the first miso and shoyu were imported. She thinks it came in small jars, and was so salty that she used it as a seasoning in place of soy sauce in stews (such as soybean stews) or cooked it with vegetables; this cooking made it softer. She is not sure which Japanese company (Muso or Mitoku) exported this seitan to America, or which American company imported it, but it probably started to be imported in about 1969.

Concerning wheat gluten, about 15 years ago, the Kushis, through Mr. Kazama, convinced a Japanese manufacturer of dried wheat gluten (*fu*) to make the product from whole wheat flour. Since that time it has been imported to America by various importers of macrobiotic foods.

Follow-up talk with Aveline. 1992. July 8. She has just talked with Lima Ohsawa (age 93) by phone in Japan. Lima has no recollection of ever making seitan in a cooking class in America, or of ever teaching anyone in America how to make it. Initially Aveline thought she might have learned to make seitan from Lima, but after talking with Lima she thinks she may have learned to make it herself by trial and error, after she moved to Boston. Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6869.

7673. Kushi, Michio. 1992. The main reasons for Erewhon's decline and bankruptcy, and current work with macrobiotics worldwide (Interview). *SoyaScan Notes*. April 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michio has thousands of files in his basement, and some of them probably contain early catalogs and other information about Erewhon. Erewhon definitely started to import from Mitoku first, and then Muso—but they were about the same time. Michio set up all these connections before Paul Hawken went to Japan. Mr. Kazama came to America and they talked about the items Michio wanted to import. Then Muso was approached. Michio thinks Erewhon started importing foods from Japan 1-2 months before Hawken went to Japan. Hawken and Evan Root went to Japan at the same time. The main purpose of Hawken's trip was to study Japanese language and culture, and to set up more good connections for Erewhon and to arrange for products to be packaged individually; previously all were shipped in bulk. Paul didn't find out any new sources, Mr. Kazama did that.

Michio believes that there were two main reasons for Erewhon's decline and bankruptcy: (1) The company tried to expand too much too fast. At the end it was selling 4,000 products; (2) This rapid expansion led to Erewhon having many poor quality products. The company should have concentrated on high quality macrobiotic foods. Management

wanted to have a wider selection of products, in part because competitors were offering a wide selection. Also, Erewhon gave up its virtual monopoly on macrobiotic-quality products imported from Japan and revealed many secrets about the Japanese manufacturers and suppliers of those foods and how those foods were made. If he had to do it over again, Michio would concentrate on only the best quality foods, and let the company grow slowly and naturally. For example, the quality of tamari soy sauce began to decline at a very early date. Likewise with the umeboshi plum and sea vegetables. "The quality of every product was declining because of too rapid growth in the company's sales. Moreover the educational activities didn't keep up with the company's growth. Muso and Mitoku have been keeping good quality as best they can but the so-called other natural food buyers, who were not concerned with macrobiotics, also started to go to Japan and buy those products, not only from Muso and Mitoku, but from other suppliers too—especially suppliers of soy sauce and miso with lower quality. These inferior quality products were retailed for a cheaper price at stores in America. The public did not know about the difference in quality, so Erewhon began to face big competition.

Even though Aveline owned Erewhon, neither she nor Michio ever received any salaries or money from the company. They wanted to let the management of Erewhon have a free hand, so they didn't tell them how to run it—to slow growth and concentrate on keeping quality high. "Erewhon was more like an educational place." There were debates over whether or not Erewhon should carry organic cheese and vitamins. Michio and Aveline opposed carrying these products, but let management do as it wished.

At the time Erewhon was growing most rapidly, the company needed money to finance the expansion, but bank interest rates were extremely high—about 15-18%. Inventory control for 4,000 items is very difficult and expensive; it requires a large warehouse and shallow inventories. During the last few years, Erewhon was able to fill only 40-50% of its orders because so many items were out of stock. Also as the company grew, many non-macrobiotic employees had to be hired to drive the delivery trucks, and they created a labor union. Erewhon had to battle with this union for 1½ to 2 years, and that cost a great deal of money. Truck drivers cut prices to stores in order to try to meet the prices of competitors. Financial difficulties piled up starting at the time when interest rates jumped and the union was formed.

Bill asks why Aveline and Michio didn't give talented managers a share of the ownership in Erewhon to motivate them to stay with the company. Michio says that Paul Hawken owned one-third of the Erewhon shares. Evan Root owned shares in Sanae. The Kushis paid all or part of Evan and Paul's travel and living expenses in Japan. Paul got his one-third shares after he returned from Japan and became president. When he resigned, he was definitely paid for the value of his shares. Paul wrote from California that

he needed the money and offered to sell back his shares. So Michio and Aveline sent him the money and Paul sent his shares back to them. Only later did Michio learn that Paul needed the money because of his divorce from Dora Coates. Other people (whose names Michio also remembers) also owned some shares. Michio does not feel that giving managers ownership would have helped Erewhon. Michio thinks that the people who managed Erewhon during its last 5 years had the necessary business skills necessary to manage a company of that size that was growing rapidly.

Another reason for Erewhon's fall was that Michio did not pay serious enough attention to what was happening at Erewhon. He was too involved in teaching in America and Europe. At the time he noticed what was happening and stepped in, the situation had already become too serious. There was much sloppiness allowed by management, even though their intentions were good. He should have noticed a year before. It was a very sad situation. "Yet Erewhon had meaning as a pioneer company. That spirit still remains. My purpose at present is to continue education all over the world. Macrobiotics is now spreading all over the world, even to the Soviet Union, Thailand, and Japan. In Leningrad some 300 medical doctors are now studying macrobiotics as a group to help find a solution to the health problems of their country. His books are being translated into many Eastern European languages. Also it is very important to reach the scientific, medical, and nutrition professions—as well as governments. Their attitudes are now rapidly changing. Macrobiotics is now growing tremendously. My main concern with natural foods is that the quality be kept very good. My current effort is to elevate the quality of each product. For example, miso should definitely be fermented for 2-3 years. Soybeans and grains should all be organically grown, and only very good sea salt should be used—such as that made by S.I. Salt, an American company in New Mexico, and Lima salt in Europe [from Lima Foods in Belgium]. Michio now goes to Japan twice a year, and there he gives many lectures all over the country, helps to set up chapters of One Peaceful World, and works with food makers on product quality. He also formed the Japan Organic Natural Food Association (*Yûki Nosui Sanbutsu Kyôkai*) in Japan, of which he is president. About 200 companies are members.

On the one hand, Michio is happy with the way his work is going now. "But of course, I am always dissatisfied too. My time and my ability are limited. I can't help as many people as I would like. The demand is so great. So I always feel sad on that point. Whenever you talk with people from Erewhon, please extend my best wishes. And say always that Michio is thinking of them and their happiness. I hope sometime in the future we can get together. Then we can talk more about how to build one peaceful world—and not only food, but more about health, families, government, economics, and spiritual matters, and how to make the many countries more united and harmonious in one world. Let's

work together.” Address: 62 Buckminster Rd., Brookline, Massachusetts 02146. Phone: 617-232-6869.

7674. Root, Evan. 1992. Recollections of early work with Erewhon and Sanae. Trip to Japan with Paul Hawken (Interview). *SoyaScan Notes*. April 11. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of April 29.

• **Summary:** Evan (his first name rhymes with “heaven”) does not have any early Erewhon catalogs, but he thinks Marc van Cauwenberghe might have some in his library on macrobiotics. He does have a letter to the general public announcing the opening of the first Erewhon retail store on 9 April 1966. It was at 303-B Newbury St., below street level. Initially Evan owned (titularly) 100% of the stock in Erewhon, but soon he passed it to Aveline Kushi after legal documents were drawn up. While he was at Erewhon the little retail store sold the following soy products: whole soybeans and probably soy flour (probably from Walnut Acres or a Mennonite community, both in Pennsylvania), soy sauce and miso (probably both obtained from Infinity Foods in New York; Infinity imported these products from Japan). Hamanatto was also sold. No tofu was sold at the store, but firm tofu was available from nearby Chinatown.

The Kushis imported miso, shoyu, condiments, etc. from Japan about twice while Evan was managing the Erewhon retail store. This direct importing was infrequent and the quantities were small due to the lack of cash. It was much easier to buy from Infinity or Chico-San and not tie up the money. In fact it was the norm to stretch out those friendly distributors as long as possible for payment.

Before he left Erewhon, in Oct. 1967, Evan personally hired Paul Hawken, with Aveline’s permission, to take his place. Then Evan opened the first macrobiotic restaurant in Boston, named Sanae (meaning “young rice plant” in Japanese); it opened in early 1968 on Newbury St. In late March 1969, Evan and Paul Hawken left Boston and traveled to Japan together. Several months before they left, Evan had been given 50% of the shares of stock in Sanae by the Kushis for the work he had done at Sanae. The Kushi’s lawyer, Morris Kirsner, had drafted the agreement to read that if Evan did not return to management of the company within 18 months, he would agree to sell this stock back to the Kushis at an agreed-upon price. Evan thinks that Paul had a similar type of stock arrangement in Erewhon, but he is not sure what it was (Note: See interview with Aveline Kushi, March 1993). Evan went to Japan mainly to study the language and culture. He ended up staying there 3 years and 7 months, largely in Tokyo (Setagaya-ku, Shoinjinjima-mae). He studied Japanese at the Tokyo School of Japanese Language. After 18 months, there was a lad named Hiro Fujieda living with the Kushis in Boston. Rather than Hiro pay rent to the Kushis, Hiro’s family would pay Evan monthly in Japan on a monthly basis—until the value of the

stock was paid off. Evan used this money to support his studies.

After about a year, in late 1971 or early 1972, Evan went to work for Muso Shokuhin in Osaka. He translated letters that arrived from Europe and America into spoken Japanese, and then answered the correspondence. By the end of his stay in Japan, Muso was exporting quite a volume of natural foods and exports were a big part of the company focus. Evan thinks that Ty Smith took his place when Evan left.

Returning to Boston in early Oct. 1972 (along with Mr. Masuda and Michelle Matsuda), Evan became an employee of Sanae after several months, working as maître d’. In 1971, while Evan was in Japan, Sanae had expanded to open another larger branch restaurant in Boston, originally called “Sanae” but informally called “Big Sanae,” then later formally named The Seventh Inn (at 269 Boylston St.). When Evan was in Japan, he heard that the restaurants were not doing well, so Yuko Okada (originally of Muso Shokuhin, who was working at Erewhon) took over management of Sanae. Hiroshi Hayashi, a top cook in a lineage, traveled to Boston from Japan, bringing with him his disciple, Chika Abe, to take charge of cooking at Sanae. His disciple, Mr. Yozo Masuda, later joined them. Hayashi is now at a restaurant named Latacarta in Peterborough, New Hampshire (Phone: 603-924-6878).

Evan’s recollection is that Paul Hawken’s trip to Japan was more to study the language and culture, but he did work on Erewhon business while he was there. Moreover, he returned from Japan after about 9 months to work at Erewhon. Evan feels that few of the people involved in early macrobiotic businesses saw themselves strictly or even mainly as businessmen. “None of us were in it, as I saw it, for the money. For us, the whole thing was a Cultural Revolution with respect to Japan.” Evan also identified strongly with the phrase “Biological Revolution.”

When Paul Hawken returned from Japan, he built Erewhon into a big natural foods company. Address: 541 Washington St., Brookline, Massachusetts 02146. Phone: 617-566-4783.

7675. DeBona, Don; Callebert, Mark. 1992. Update on Lima Foods and Euronature (Interview). *SoyaScan Notes*. April 19 and 23. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The following is based on a talk that Don had in North Carolina with Mark Callebert, general manager of Lima Foods in Belgium, then a direct interview with Mark in Belgium on April 23, followed by a letter from Mark on June 16 with exact dates. Mark has worked with Lima for about 16 years (since 1 Sept. 1975).

The Gevaert family sold Lima in May 1988 to a company named Vibec in Quebec, Canada. Vibec was a construction company (they were not involved with foods) and the owners spoke French. The contact with Vibec was made via Henry Lucy, a Frenchman who was on the Lima

board of directors (and also a shareholder), who was a friend of Michio Kushi (Michio had healed Henry's wife), who had quite a lot of money, and who also had a construction company in Africa. Michio was also on the Lima board for a while. Vibec purchased Lima as a way of getting involved in the new European market without borders which will begin at the end of 1993. However Pierre Gevaert and his son, Daniel (who was production manager at Lima, France), kept their property and mill in the south of France where Lima used to make miso. At that time Lima had a lot of financial problems. Pierre Gevaert owned the majority of the stock in Lima, and his relatives (mostly his brothers and sisters) owned the rest. Mark and Frank Stevens (Pierre Gevaert's son-in-law) played key roles in negotiating the deal, then stayed on to run the company. On 22 April 1989 Lima purchased Jonathan P.V.B.A., which is still a fully owned subsidiary (daughter company) of Lima. But the marriage of Lima (a Belgian natural foods company) and Vibec (a Canadian construction company) was a strange one, and for that reason it didn't last long.

Then in September 1989 Lima was purchased from Vibec by Euronature (pronounced as in French, YU-ro na-TYUR), a large international food company headquartered in Paris, France. Euronature is a holding company that was founded in June 1989; the president of Euronature was able to raise a lot of money from banks and insurance companies to create the holding company. Frank Stevens was killed in an automobile accident in Nov. 1989.

Lima is presently doing well, is financially very solid, and the future looks bright. Lima has sales of about \$15 million a year, but the company is not yet profitable. Mark feels that they will become profitable when sales reach about \$17 million/year. Their traditional high standards of food quality are completely supported by Euronature. Pierre Gevaert (born 21 July 1928 now in his mid-60s) no longer owns any part of Lima and neither he nor his son have been active with the company since it was purchased by Euronature. Pierre lives in the south of France and works on his organic farm there. Lima is still headquartered at Sint-Martens-Latem in Belgium.

Euronature has 4 major divisions: (1) Natural foods division, including Lima Foods, Lima's bakery and muesli factory, and several natural foods distribution companies; (2) Gourmet division; (3) Seafoods division (Euronature's largest), with branches scattered throughout Europe; (4) French specialty foods division.

Lima's largest product lines are their muesli products (which they make at their own plant), their bakery (located 6 km from Sint-Martens-Latem in Belgium), their sesame division (they make tahini and gomashio, and were one of the first to grow sesame seeds organically), and their tomato canning division (located in the south of France, it makes tomato sauces and ratatouille). Lima's leading soyfood products are tamari, shoyu, organic miso, their soymilk

products (including regular and Mocha-Soy soymilk, and Soy Desserts, all made by Alpro in Belgium), fresh tofu salads, and tofu in cans and jars. Imports from Japan are now quite small, representing only about 10% of Lima's total sales. Although Lima no longer makes its own miso, it still sells quite a lot of miso—much of it from past batches made by Jan Kerremans in the south of France. Lima is now looking for other sources, including American Miso Co. in North Carolina. Jan now works part time as a consultant for Alpro in Belgium.

Jonathan's main products are now seitan and tofu (both fresh [pasteurized] and in jars), plus many second-generation products made from seitan and tofu, such as fresh tofu spreads, tofu pates, seitan brochettes, etc. Jonathan makes all of the seitan, tofu, and related products sold by Lima. Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

7676. Product Name: KISS (Keep It Simple Stirfry) [Lemon Teriyaki, Garlic Italian, or Spicy Szechuan].

Manufacturer's Name: Turtle Island Foods, Inc.

Manufacturer's Address: P.O. Box 176, Hood River, OR 97031. Phone: (503) 386-7766.

Date of Introduction: 1992. April.

Wt/Vol., Packaging, Price: 15 oz package. Each retails for \$2.79.

How Stored: Frozen.

New Product—Documentation: Leaflets from Natural Products Expo West at Anaheim, California. 1992. April 10-13. "KISS." and "Discover Turtle Island"—since 1980. To make Lemon Teriyaki KISS, soy-brown rice tempeh is marinated in a zesty teriyaki sauce with lemon. Sold refrigerated or frozen in reusable/recyclable tubs, it is ready to stir-fry when you are! It is great for stir-fries, soups, pasta salads, and hors d'oeuvres. For Garlic Italian KISS, soy tempeh spiced with Italian herbs is marinated in an oil and vinegar based garlic sauce. Perfect for spaghetti, lasagne, pizza, or pasta dishes. For Spicy Szechuan KISS, soy tempeh with cashews is marinated in a spicy red sauce from Northern China. Ideal for stir-fries, sweet & sour, and other Oriental dishes.

7677. Wilson, Lester A.; Murphy, Patricia A.; Gallagher, Paul. 1992. Soyfood product markets in Japan: U.S. Export opportunities. Ames, Iowa: MATRIC (Midwest Agribusiness Trade Research and Information Center). x + 64 p. April.

• **Summary:** Contents: Figures. Tables. Acknowledgments. Introduction. I. Soybean processing (by Wilson and Murphy). Food from soybeans: Soybean chemical composition, environmental influences on soybean composition. Soyfood manufacture: Soymilk, tofu, momen tofu, kinugoshi tofu, packed tofu, aseptically-packaged tofu, deep-fried tofu, kori tofu. Tofu-related research: Recent

studies at Iowa State University, summary, future research. Other nonfermented soyfoods: Yuba, kinako, texturized soy protein foods. Fermented soyfoods: Miso, shoyu, natto, tempeh. Japanese Agricultural Standards (JAS). Identity preservation and transportation. U.S. soybean quality and the Japanese market: Grain quality, judging quality, potential new markets.

II. Japanese soyfood markets (by Gallagher).

Demand and growth prospects: Consumption patterns, demand analysis, forecasts. The U.S. share of the food soybean market: Sources and uses, market share analysis, determinants of relative prices, prospects. Trade and trade barriers: Soybeans, processed products. Summary and recommendations.

Appendixes: A. Excerpts from specifications and standards of food additives, etc.—Manufacturing and storage of tofu. B. Excerpts from standards and certification systems in Japan. C. Additional agricultural standards for soybeans. References.

Table 2.1 shows soybean use for soyfood production in Japan; actual (1986) and projected (2000). Soybeans for tofu are expected to increase from 524,000 to 609,700 tonnes. Soybeans for miso are expected to decrease from 156,000 to 101,600 tonnes. Soybeans for natto are expected to increase from 92,000 to 118,600 tonnes. Figures 2.1 to 2.4 show Japanese per capita consumption of tofu, natto, miso, and soy sauce from 1965 to 1988. Tofu: Japanese annual per capita consumption of tofu has risen since 1965, except that it fell during 1973–1977. In 1965 about 3.6 kg/capita of soybeans were used to make tofu, increasing to 4.4 kg/capita in 1988. If 1 kg of soybeans yields 2.8 kg of tofu, then per capita tofu consumption in 1988 was 12.32 kg or 27.1 lb.

Natto: Japanese annual per capita consumption of natto has risen steadily, from a little less than 0.4 kg in 1965 to 0.6 kg in about 1968, to 0.8 kg in 1988.

Miso: Japanese annual per capita consumption of miso fell from 8 kg in 1965 to about 5.4 kg in 1985, then it began to rise to about 5.7 kg in 1986.

Soy sauce: Japanese annual per capita consumption was about 12 liters in 1965. It fell to 11 liters in 1967, rose to 13 liters in 1973, then fell to 9.8 liters in 1985, after which it rose for 1 year. Address: 1-2. Prof. of Food Science and Human Nutrition; 3. Assoc. Prof. of Economics. All: Iowa State Univ. Phone: 515-294-0160.

7678. **Product Name:** Yves Veggie Cuisine Burger Burgers (Fat Free—Contains No Meat).

Manufacturer's Name: Yves Veggie Cuisine.

Manufacturer's Address: 1138 East Georgia Street, Vancouver V6A 2A8, B.C., Canada. Phone: 604-251-1345.

Date of Introduction: 1992. April.

Ingredients: Water, onions, textured soy protein, wheat gluten, soy protein isolate, brown rice syrup solids, pea fiber, onion powder, malt extract, yeast extract, salt, tomato paste,

Dijon mustard, rice flour, natural flavor, vegetable gums.

Wt/Vol., Packaging, Price: 2 patties in 6 oz (170 gm) paperboard box.

How Stored: Refrigerated or frozen.

Nutrition: Per patty (85 gm): Calories 83, calories from fat 0, total fat 0 gm (0% daily value; saturated fat 0.0 gm), cholesterol 0 mg, sodium 380 mg (16%), total carbohydrate 9 gm (dietary fiber 4 gm [15%], sugars 6 gm), protein 11 gm. Calcium 6%, iron 9%, vitamin C 2%. Percent daily values are based on a 2,000 calorie diet.

New Product—Documentation: Ad (color, 2/3 page) in *Natural Foods Merchandiser*. 1992. April. p. 94. “Yves Veggie Cuisine.” Shows packages of Veggie Wieners and Burger Burgers.

Product with Label purchased at Safeway in Lafayette, California. 1996. June. 5 by 3½ by 1 inch paperboard sleeve. Red, yellow, and black on white. Photo on front panel of a burger with grill marks atop lettuce and tomatoes below a sesame bun. “Contains no meat. Fat free.”

7679. Creighton, Barry. 1992. Cable Springs Bakery and recollections of Tan Pups in Boston (Interview). *SoyaScan Notes*. May 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Barry started baking while he was living in Los Angeles, California, at a macrobiotic study house run by Carolyn Heidenry. Then he moved to Boston and continued selling (out of his apartment) the baked goods he had developed in Los Angeles. He and Cathy were married about a year later on 7 Jan. 1974 then in August 1974 they started Cable Springs Bakery as an incorporated official business.

At that time (Aug. 1974) he is quite sure that a product named Tan Pups (skewered seitan deep-fried in a breaded batter) were on the market. Barry thinks that Tan Pups were probably introduced 6–12 months before his bakery opened, i.e. in early 1974 or late 1973. The Tan Pups may have been made by the Queensberry Bakery [actually they were not], which was run by two brothers (whose names Barry does not remember); it was a natural foods- rather than a macrobiotic bakery. Both his Cable Springs Bakery and Queensberry Bakery sold their products at the Erewhon retail store on Newbury Street in Boston. They were sort of competitors, and Barry first saw Tan Pups in that Erewhon store. Barry also recalls that Tan Pups were on the market when his son, David, was born on 3 March 1975. But not long after that, Queensberry Bakery went out of business, and their Tan Pups were therefore no longer available. Barry almost bought Queensberry Bakery, but after a series of negotiations decided not to. Cable Springs Bakery was sold to Bruce Berman in August 1975; Barry had owned the business for a year. Then he and Cathy went to Vermont. Cathy learned about seitan from Michio Kushi during a consultation concerning her daughter, Eliza's, broken leg. She learned how to make seitan from Kathy Bellicchi at the Beacon

Hill Study House in Boston, and she learned how to make kofu (raw wheat gluten) from Lima Ohsawa's book *The Art of Just Cooking*. Cathy developed a recipe for Tan Pops in 1975 in Vermont. The best Tan Pops are made by the longer double deep-fry process that Cathy developed for seitan burger parties in Cambridge.

Today at their community in Alaska, they still make Tan Pops on their full-moon night feasts. His daughter makes most of the Tan Pops; she learned from him and Cathy. To make double-fried Tan Pops: Make raw wheat gluten dough and cut it into large chunks (4 by 1½ by 1½ inches). Get 3 pots going on the stove: (1) A pot of oil for deep-frying; (2) A pot of boiling water; (3) A pot of broth containing 12 cups water, 1½ cups tamari, 30 thin slices of ginger, and lots of kombu. Deep-fry the chunks, dip them in the boiling water, then simmer in the broth for 1 hour. Drain and cool. Skewer chunks on chopsticks. Prepare a tempura batter containing 4 cups each corn flour, pastry flour, and unbleached white flour, 2 tablespoons sea salt; add water to mud consistency. Dip skewered chunks in tempura batter and deep-fry again. Address: Foundations Inc., HC2, Box 564-B, Kasilof, Alaska 99610. Phone: 907-262-2824.

7680. Bellicchi, Kathy. 1992. Recollections of seitan in Boston from 1970 (Interview). *SoyaScan Notes*. May 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In Aug. 1969 Aveline Kushi had moved to Los Angeles where her youngest son, Hisao, had undergone traditional Japanese bone massage therapy. Kathy arrived in Boston in early 1970 when Aveline had just returned briefly from Los Angeles. At that time Aveline gave some cooking classes in Boston which Kathy attended, and Kathy remembers that Aveline taught how to make seitan in these classes. That was the first time Kathy had ever heard of seitan. Before that time, Kathy had lived in New York, had been macrobiotic since 1965, and had cooked with Michel Abehsera and many other macrobiotics in New York; she never heard of seitan while in New York prior to early 1970. But the Ratners chain of restaurants in New York did serve Protose Steak made of wheat gluten.

Kathy recalls that in the early 1970s seitan was considered by macrobiotics to have medicinal properties. For example, when Cathy Creighton arrived in Boston and Eliza had a broken leg, many people suggested that Eliza be fed seitan to help the leg to heal.

To make seitan back in the early days, Kathy would grind a special type of hard Minnesota wheat into flour, knead flour and water together thoroughly to make a dough, then let that dough stand under water—often for several hours. She would then further wash the raw wheat gluten, strain the starch water to separate the bran (which settled to the bottom), dry the bran on cookie sheets in an oven, and use it to make bran pickles. The starch water would be used to thicken a seitan stew—so everything was used. Most people

made seitan by first deep-frying the wheat gluten, then cooking it in a tamari-ginger broth to make seitan; everyone said it had to be deep-fried first, and Tan Pops probably came from that concept. Kathy thinks that this method may have come from George Ohsawa to Herman Aihara to Aveline Kushi. To make seitan stew, chunks of seitan were simmered with chunks of onions, carrots, and other vegetables; just before it was served, some of the starch water was added to give the stew a nice sheen and little thickness. It turned clear when added.

She remembers that Tan Pops were made by the Queensberry Bakery in Boston. Kathy does not recall the names of the two brothers who ran the Queensberry Bakery. Matthew Chait, an actor who had a cart named the Ricycle at Boston University, worked out of the Queensberry Bakery; he or Vern Verona might know more about Tan Pops. Address: 55 Meadowbrook Rd., Brookline, Massachusetts 02167. Phone: 617-734-1380.

7681. Sinclair, Valerie. 1992. Japanese cuisine is several settings. *New York Times*. May 10. p. NJ 13.

• **Summary:** This is a review of the Japanese restaurant Sukeroku (68 Route 23, corner of Pompton Ave., Little Falls, in upstate New York—near Utica, between Albany and Rochester). About four years ago a new owner added a karaoke bar to the sushi bar and tatami rooms. Some dishes illustrate well the contrast in textures so prized in Japan. For example “raw squid rings with chopped fermented [soy] beans (ika natto).”

7682. Wollner, Joel. 1992. Re: Ode to Tan Pops. Letter (fax) to William Shurtleff at Soyfoods Center, May 19. 2 p.

• **Summary:** “Did you ever eat a ‘Tan Pup?’ [sic, Tan Pop]. Hot? If not, you can’t imagine the ecstasy (and agony) you missed. A Tan Pop’s crusty exterior belied a succulent interior, redolent of soy sauce, garlic, and herbs. The vegetarian’s version of the famous ‘Corn Dog,’ from which their name was played, the Tan Pop was a crispy-crusted, batter-fried chunk of Wheatmeal, ¼ pound, stuck on a skewer. More exotic than any blanketed hot dog, freshly cooked, steamy hot Tan Pops were so incredibly irresistible, they made many a glutton of gluten. No one, outside their maker, Johnny Weissman, of the Vegetable Protein Company, Cambridge, MA, knew the exact recipe. In the years I worked at Erewhon’s Newbury Street store, from 1977 to 1980, Tan Pops were a big hit, with a loyal following. Two mornings each week, ‘Johnny Wheatmeal,’ as we called him, brought in a batch of 50 or more steamy hot, freshly made Pops. I can still smell them today, mouth watering. We displayed them still hot in a large wood bowl at the checkout counter. I believe the store paid around 50¢ to 60¢ each, and they retailed for 75¢ or 85¢. As soon as they arrived, the store staff started in eating them, and eating too much of them. One Tan Pop was great, but rich as they

were, two or more was courting belly aches. Still, there were never enough to go around, but Johnny would only complain about how difficult they were to make. I don't know how long Tan Pops were sold at Erewhon before I started working there, nor do I know what became of Tan Pops or Johnny Wheatmeal in recent years. I remember learning that Johnny held a federal registration of the name 'Wheatmeal.' He also marketed Wheatmeal cutlets of several ounces each, refrigerated or frozen, plain (unseasoned) or cooked in soy sauce broth, which he sold to Erewhon and other Boston area natural food stores. As I recall, the Wheatmeal ingredients included wheat gluten and soy protein. Johnny Wheatmeal was something of a vegetable protein visionary, who experimented with many wheat and soy protein products, such as sausages. I also remember that Andrew Levine, formerly a clerk at Erewhon Newbury, used to spend a fair amount of time chatting with Johnny Weissman. You can reach Andy at Yellow Emperor in Eugene, Oregon (503) 485-6664."

Note: To find out who developed the forerunner of Tan Pops, Joel suggests contacting Matt and Helen Sandler in Aspen, Colorado, or Hannah Bond (also known as Anne Harris) in Athens, Vermont. Both, in fact knew, that the forerunner was Tan Pops, developed by Nik Amartseff of Brookline, Massachusetts, in about March 1972. Address: Joel Wollner Associates, P.O. Box 1343, Clifton Park, New York 12065. Phone: 518-371-7014. Fax: 518-373-8337.

7683. Okada, Yuko. 1992. Re: Muso's soymilk factory in the USA. Importing organic soybeans to Japan. Letter (fax) to William Shurtleff at Soyfoods Center, May 21. 1 p. [Eng]
• Summary: "Did you know that I have a soymilk factory in the U.S.? It has been operating for almost 7 years. It was the first soymilk company in the United States and is growing every year. The company is located in Michigan, where most of the organic soybeans are grown." Note: The author is probably referring to Muso's 15% ownership in American Soy Products, Inc., whose plant at Saline, Michigan, began commercial operation in Nov. 1986.

Muso is also importing organic soybeans into Japan, and has already imported about 300 metric tons this year. The use of organic soybeans in Japan is growing on the part of companies making shoyu, miso, tamari, tofu, etc. for Muso. Address: Muso Co., Ltd., Kosei Bldg. 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 06-942-0341.

7684. *New York [magazine]*. 1992. Hot tips. 25(21):52-54, 56, 58. May 25. See p. 54. [1 ref]

• Summary: "Key West. Dinner for 4. Edward Brown. Tropica." The recipe for "Spicy conch chowder" calls for "3 tablespoons kecap manis (Indonesian thick sweet soy sauce), available at Adriana's Bazaar and Dean & DeLuca."

On the same page, the recipe for "Marinated bluefish fillets" calls for "¼ cup kecap manis (available at Adriana's

Bazaar and Dean & DeLuca)."

Also on page 36: "3 tablespoons kecap manis (Indonesian thick sweet soy sauce),..."

Note: This is the earliest English-language document seen (April 2012) that uses the term "thick sweet soy sauce" to refer to *kecap manis*.

7685. *SoyaFoods (ASA, Europe)*. 1992. BSN goes saucy [by purchasing Amoy]. 3(2):2. Spring.

• Summary: "French agrifood group, BSN (1990/91 turnover 80 billion French francs) have purchased the Hong Kong firm Amoy Industries International Ltd. (1990/91 turnover 146 million French francs), an important force in the Asian sauce market. The Hong Kong leader of the soya sauce sector was previously owned by the Pillsbury Group (GrandMet) and Hang Lung." BSN is already a major force in the sauce market with brands such as Lea & Perrins, and HP.

7686. *Whole Foods*. 1992. Source book 1992. 15(5):33-294. May. Illust. Index. 28 cm.

• Summary: Contents: How to use this book (p. 8). Wholesalers/distributors alphabetical listing. Wholesalers/distributors geographical listing. Brokers. Publishers. Associations. Consultants/service companies.

Product directories: A listing of manufacturers/importers/growers by products: Foods (p. 77-111—soy-related categories include: Beans/bean products, cheese substitutes, coffee substitutes, cultures, miso, soy products, soy sauce, soymilk, tamari, tempeh, tofu, tofu entrees), vitamins and supplements, herbs, cosmetics/personal care, miscellaneous products. Brand names. Product index. Manufacturers/importers/growers alphabetical listing.

Note: The listings related to soy products are full of errors. Address: South Plainfield, New Jersey.

7687. Gerner, Bob. 1992. Recollections of Mithra Grossman, Intermountain Trading, and Family Orchards (Interview). *SoyaScan Notes*. June 25. Conducted by William Shurtleff of Soyfoods Center.

• Summary: This company, started in about 1975 by Mithra Grossman, began as Intermountain Trading Co. at 2546 Tenth St., Berkeley, California 94710. Located very near Westbrae, Mithra was a consolidator—and had a beautiful blond Swedish wife. He would collect a variety of natural foods made on the West Coast of the U.S. by companies such as Heinke, Westbrae, etc., then put them on rail cars and ship them to the East Coast. Also starting in about 1975 he began buying miso from Westbrae that the latter was importing from Japan. At one point Westbrae was selling 25-50% of their imported miso to Mithra Grossman, who shipped it all over the USA to other wholesalers. Westbrae did not have enough business to import that much. Gradually he became a distributor, then he started developing and marketing a

line of mixed packaged nuts, etc. to which he gave the name Family Orchards. The fruit and nut mixes in the Family Orchards snack line contained two types of soyfoods: Soynuts, and tamari-roasted peanuts. (For details see the company's Ad in Tom Riker and Richard Roberts. 1979. *The Directory of Natural & Health Foods*. p. 60-61). Grossman bought most of the raw materials for his Family Orchards line from Westbrae. In about 1979-1980 his company went out of business; he blamed Westbrae for its failure and bore strong resentment toward them. The price structure under which Westbrae had sold its products to Grossman was no longer profitable for Westbrae, who decided to raise prices. Address: Owner, Berkeley Natural Grocery Co., 1336 Gilman St., Berkeley, California 94706. Phone: 415-526-2456.

7688. McGlasson, Linda. 1992. Soyfoods in the next century: Feeding the world one bean at a time. *Health Foods Business* 38(6):30-34, 36. June. [1 ref]

• **Summary:** A table gives estimated retail sales of soyfoods in the USA in 1990, in descending order of sales (million dollars): soy sauce \$395.5, tofu \$94.1, second generation products (such as dips, dressings, entrees, non-dairy desserts, cheeses, yogurts, and imitation meat products) \$81.6, soymilk (not including infant formulas made with isolated soy proteins) \$60.0, miso \$44.5, soynuts \$9.7, tempeh \$7.5. Total \$657 million. Source: Soyatech in Bar Harbor, Maine. The two fastest growing segments are soymilk (increasing at 20% a year) and second generation products (15-20% a year). "Soyfood sales are expected to grow steadily through the next decade as health and environmental concerns become increasingly important factors in food purchasing decisions... an estimated 33 to 50% of all adults are reducing their intake of meat, yet they still have the craving.

Protein Technologies International of St. Louis, Missouri, is developing a line of structured proteins, which are look-alike meat components. There are versions that look and feel like ground beef, crab meat, and chicken.

Angelo Morini, founder of Galaxy Foods, began trying substitutes for the real cheese he was using in his pizza business. He left the pizza business in 1968 and began making soy cheese full-time. The company began slowly by selling to food service customers, then they started marketing the cheese nationally in 1984. In 1985 Galaxy started in the health food industry with a new line, Soyco. Following a fire, the company has relocated in a new 55,000 square foot state-of-the-art manufacturing facility in Orlando, Florida. They are now producing soy cheese products and are scheduled to launch 30 new items this year.

One sidebar, titled "Quickie Dictionary of Soyfoods," defines tofu, miso, tempeh, soymilk, and shoyu. Another says "Soyfoods Take Spotlight in New Infomercial." The infomercial is based on Dr. Michael Klaper's education seminars for doctors and other health professionals titled

"Let Food Be Your Medicine." Klaper (a noted physician, author, environmentalist and nutritionist [and vegan]) is co-founder and director of the Institute for the Advancement of Nutrition Education and Research. The tentative title for the new infomercial is "The Nutrition for the 90s, a Transition to Health." It will begin airing in July on cable TV. Radio's Top 40's Countdown host Casey Kasem will emcee the show with Dr. Klaper. The show will feature top scientists and doctors, plus testimonial interviews with many celebrities and famous athletes. Address: Managing editor.

7689. **Product Name:** Traditional Foods Original Traditional Seitan.

Manufacturer's Name: Santa Fe Organics.

Manufacturer's Address: 906 Locust St., Columbus, NC 28722. Phone: (704) 894-3132.

Date of Introduction: 1992. June.

Ingredients: Organic wheat flour, vegetable broth seasoned with whole bean soy sauce, onion, and kombu.

Wt/Vol., Packaging, Price: Retorted in a 1 pint (16 oz) glass jar with a 2-piece canning lid.

How Stored: Shelf stable; refrigerate after opening.

New Product-Documentation: Letter from John Belleme of Santa Fe Organics. 1992. March 9. "In a few weeks we will be adding an 'original' flavor, which will be seasoned with soy sauce, onion, and kombu. We now have eight distributors." Talk with John Belleme. 1992. July 1. Their most recent product is a traditional original seitan, sold in canning jars just like the company's first line of products, launched in early June, 1992. "It was made to satisfy the needs of all the macro [macrobiotic] people who were not satisfied with all these flavors we had. They wanted something they could do their own thing with."

7690. *SoyaScan Notes*. 1992. Fresh Fields, a new natural foods supermarket chain on the East Coast (Overview). Sept. 1. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Fresh Fields, a relatively new chain of natural foods supermarkets with headquarters in Rockville, Maryland, appears to be very successful in appealing to the upscale consumer. The president is Mark Ordan. Unlike most traditional natural foods stores, they carry a large selection of natural meats and poultry from "animals raised without hormones, antibiotic feed additives, or other growth-promoting drugs." They also sell freshly baked breads plus hundreds of soyfood products. They publish a 6-panel leaflet titled "Soy Foods: Soy good for you," which introduces consumers to tofu, tempeh, soy 'milk,' shoyu/tamari, and miso. A 12-page color brochure describes the chain, its philosophy and its products. Fresh Fields' prices are high but their service is excellent and their stores quite attractive and well managed. On the side of each shopping bag is printed: "Fresh Fields. Land of the Free. Free of artificial colors and flavors. Free of artificial preservatives. Free of steroids. Free

of nitrates. Free of hormones. Free of growth stimulants. Free of antibiotics. Free of irradiation. Free of tropical oils. Free of refined sugars. Free of beached flours. Free of hydrogenated oils. Free of worry. Free of confusion. Free of hassle. Free of guilt.

“Fresh Fields. Good for you foods.”

7691. Okada, Yuko. 1992. Re: History of Muso Co. Ltd. (Muso Shokuhin) in Japan. Letter (fax) to William Shurtleff at Soyfoods Center, July 2. 2 p. [Eng]

• **Summary:** Muso was formed as an establishment in February 1966, and Yuko has worked for the company since that time. His current title is president of Muso Co., Ltd. for Export and Import division, a position he has held for the last 6 years. Yuko first went to the USA in April 1970. First he worked at the Erewhon retail store and at the Erewhon warehouse as production manager and import manager. After 2 years he began to manage a macrobiotic restaurant [the Seventh Inn] for 2½ years as executive vice president. After the restaurant had paid off all its debts, he returned to Erewhon as import manager, and was also in charge of determining the cost of all production.

Yuko thinks that Muso began to ship foods to Erewhon in 1968. [Note: Kotzsch. 1984, Dec. *East West Journal* p. 14-21 states that Muso began to export foods in 1969.] The main food items shipped during the first year were shoyu (made by Marushima Shoyu Co.), several types of miso (made by Kanemitsu Miso Co. and Ohta Hatcho Miso Co.), black soybeans, azuki beans, many types of sea vegetables and teas, buckwheat noodles, umeboshi pickles, and takuan (daikon pickles).

The following Westerners have worked for Muso over the years: Paul Hawken (March-Oct. 1969), James Docker (several months), Jim Ledbetter (several months), Evan Root (several months), Tyler Smith (6 months), Steve Earle (4 years). Only Americans have worked at Muso.

Muso moved to their present address in the Kosei Building on 1 Dec. 1986. The company still maintains a domestic distribution company at its former address at Otedori 2-5-1, Higashi-ku, Osaka. Address: Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 06-942-0343.

7692. Richardson, Jean. 1992. Sierra Natural Foods is out of business. Ohsawa Japan has stopped exporting (Interview). *SoyaScan Notes*. July 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** When Ohsawa America was having problems surviving, Lane Seiger offered their mail order business to Gold Mine Natural Food Co., then offered their import business to Sierra Natural Foods. Gold Mine purchased their Japanese imports from Sierra.

In July 1991, Sierra Natural Foods declared bankruptcy and went out of business. At the time they owed Ohsawa

Japan a lot of money, which they never paid. Following this unfortunate experience, Ohsawa Japan stopped exporting products to America. Prior to this, Nama Shoyu (Unpasteurized Shoyu, made by Yamaki Co., run by Mr. Kitani) was the best seller of all the products Sierra imported from Ohsawa Japan. After Sierra's bankruptcy, in March 1992, Gold Mine began importing macrobiotic foods from Muso in Japan. Address: Co-owner, Gold Mine Natural Food Co., 1947 30th St., San Diego, California 92102. Phone: 619-234-9711.

7693. Aihara, Cornelia. 1992. Early recollections of seitan (Interview). *SoyaScan Notes*. July 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Cornelia first learned how to make *kofu* (raw wheat gluten) from a Japanese book about *Shojin Ryori* (Buddhist Vegetarian Cookery) that Lima Ohsawa sent her. The book used only white flour to make kofu, but Cornelia substituted whole wheat flour. She does not remember when she first heard the word seitan or from whom she learned the process for making kofu into seitan. Nor does she know who coined the term “seitan.” She never saw George or Lima Ohsawa make seitan in America. Cornelia thinks that in earlier times in Japan, seitan was called “shigure.”

Cornelia first made seitan in about 1970 in San Francisco. In her *Chico-San Cookbook* (1972), Cornelia first wrote about seitan, giving a recipe for making “Seitan” at home (#516). The ingredients listing called for 10 cups wholewheat flour, 4 cups unbleached white flour, 5 cups water, and 2 teaspoons salt. After making the basic plain gluten, pull it into 1-inch pieces and drop these into boiling water. Boil until the pieces rise to the surface of the water. Then: “Sauté 1 tablespoon of fresh minced ginger in 1 tablespoon sesame oil. Add 1 cup of soy sauce and bring to a boil. If you wish to store the Seitan for any length of time use more soy sauce, up to 2 cups, depending on how long it will be kept. Add the cold gluten pieces and simmer, covered, for 3 hours, stirring frequently. Remove the cover and continue cooking until all the liquid is gone. Stored in the refrigerator, it will keep a long time. Cook it with vegetables or use it to season soups and stews.”

In her book *The Dô of Cooking (Ryorido)*. Vol. 1 (1972, March) Cornelia gave a similar recipe for seitan (p. 71-72). Part 1 described how to make wheat gluten and part 2 described how to use that wheat gluten to make seitan. After 1970 Cornelia taught many macrobiotic students how to make seitan in her cooking classes. In later years she used only whole wheat flour, omitting the unbleached white flour.

Herman Aihara does not remember when he first heard the word seitan. He is not interested in food from this viewpoint; his interest is in philosophy. Address: Vega Study Center, 1511 Robinson St., Orville, California 95965. Phone: 916-533-7702.

7694. Yamazaki, Kazuko. 1992. Early recollections of seitan (Interview). *SoyaScan Notes*. July 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Kazuko (the wife of Junsei Yamazaki) is sure that George Ohsawa coined the term “seitan” quite a while before he died in April 1966. She first became interested in macrobiotics in Japan in about 1962-63 (Showa 37-38). In about 1965 she may have seen seitan sold at macrobiotic food stores in Japan. Ohsawa Japan also sold seitan, probably by 1962-65; Marushima Shoyu K.K. may have made that seitan. She probably first heard the term “seitan” from Lima Ohsawa, who frequently taught how to make and use kofu (raw wheat gluten) and perhaps seitan in her cooking classes. The first seitan she saw or tasted was sold in little cubes or pieces that were very dark, hard, and salty. In Japan, Chinese people at one store in Aoyama, Minato-ku, Tokyo, made kofu (raw wheat gluten), and she once went there to buy some. She and Lima also tasted a delicious sausage-like product made from soybeans by the Chinese; she does not remember what it was called, but it was not called seitan. Lima Ohsawa often used that kofu in her cooking classes.

After George Ohsawa died, Lima Ohsawa traveled to Taiwan with a group of Japanese and there she met an interesting group of Taoist vegetarians. Some people in that group were very skilled at using wheat gluten in cookery. After returning to Japan, Lima invited that group of Taoist vegetarians to Tokyo. Kazuko met them in Tokyo. At that time they made a product closely resembling seitan. Later they started a business making it in Japan and began selling some to Ohsawa Japan.

One person in Japan who might well know the early history of seitan is Aiko TANAKA. She is now about 65 years year old but she began studying macrobiotics with Lima Ohsawa when she was about 18 years old. She went to Taiwan and had a lot of contact with the group of Taoist vegetarians. Address: Route 1, Box 1333, Orland, California 95963. Phone: 916-865-5979.

7695. Troy, John. 1992. Update on Wizard’s Cauldron and work with miso (Interview). *SoyaScan Notes*. July 11. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** John makes many lines of products that contain miso. “The Wizard” line, sold through Joel Dee of Edwards & Sons, contains three products: Hot Stuff, Stir Crazy (a stir-fry sauce), and Sweet & Sour Sauce. The Premier Japan line is also exclusive to Edwards and Sons. The Simply Delicious line consists of many salad dressings, such as Lemon Tahini, Ginger Plum (with umeboshi plums), Tofu Poppyseed, and Miso Sesame (the only miso product in this line). His favorite salad dressing (which is also his best-seller) is the Miso Sesame; it is sweetened with rice syrup, and contains both clear shoyu and white miso. “It’s really nice.”

A fourth line, called “Troy’s” is a line of sauces, such as a steak sauce and a poultry sauce. Three of these

products contain miso: Miso Magic (a sauce for grains and vegetables), and Cracked Peppercorn Steak Sauce, and Honey Mesquite Barbecue Sauce. John’s favorite sauce is his Thai Peanut Sauce. A fifth, called Harbor Lites, is a line of six seafood sauces—all of which contain either soy sauce or miso. The Garlic Grill contains miso. There is also a Ginger Soy in this line.

American Natural Foods (ANF), started in 1984, attracted many local investors who finally got control of the board of directors and encouraged John to do things that went against his beliefs; the company eventually lost about a million dollars, and John lost everything he had. It didn’t go bankrupt; it’s still alive but John “walked away from it.” It’s sole product is Miso Mustard, which is made by Morehouse Foods.

At the end of 1985 John was penniless, and had to draw unemployment to buy groceries. “But it was a real blessing in disguise.” John started doing some consulting work. In 1986 he started a new company named “Wizard’s Cauldron,” which was initially just a consulting company. John was able to buy the trademark for Hot Stuff away from ANF, then cut a deal with Joel Dee. In Oct. 1987 Edwards and Sons became the exclusive distributor of his Premier Japan line and his Wizard Baldour condiments and sauces, including Hot Stuff. He saved enough money to buy a little plant, then started real small, making food products again. The new company’s first product line, the Simply Delicious salad dressings, was launched in 1989. The company has been growing and growing, until now it is a very healthy little company with one million dollars of annual sales. This is the first time John has owned his own plant; previously he always had to use co-packers. “I’m just having a wonderful time with it, but it was a hard lesson to learn.” John buys his miso from Don DeBona of American Miso Co. He also uses a lot of clear shoyu, which he buys from San-J; they make it in Japan. He consulted for San-J, and when he visited their plant in 1986 he noticed some stuff dripping from a vat. They said it was clear shoyu which they said they used in sauces, dashi, etc. He brought back a 5-gallon pail to the USA, and eventually made it a featured ingredient in his line of salad dressings. Address: The Wizard’s Cauldron, 8411 Hwy. NC 86 N, Cedar Grove, North Carolina 27231. Phone: 919-732-5294.

7696. Mokutani, Kiyoshi. 1992. The invention and development of seitan in Japan (Interview). *SoyaScan Notes*. July 12. Conducted by William Shurtleff of Soyfoods Center. Followed by a letter of July 1992.

• **Summary:** In 1959 Mr. Mokutani met Sakurazawa Nyoichi (George Ohsawa) and his wife Lima, and started to study macrobiotics with them, and to eat a macrobiotic diet—after he had undergone two surgical operations for a gastric ulcer and a duodenal ulcer in 1959 and 1960.

In the spring or summer of 1961 he first developed a sample of what is now called *seitan* using only wheat gluten

and shoyu as ingredients (no ginger or kombu). He extracted the gluten from wheat flour in his own company. His first goal was to develop a wheat gluten product made from organically grown wheat. He also wanted to make a type of low-fat *tsukudani* made without animal products. Note: *Tsukudani* is a dark and salty Japanese condiment typically prepared from small cubes of shellfish, fish, beef, kombu, or vegetables (gobo [burdock], fuki [butterbur, coltsfoot]) that have been simmered for a long time in soy sauce.

In the fall of 1961 he took a sample of the new product he had invented to George Ohsawa. He took great interest in it and at that point Ohsawa coined the term “seitan” to refer to this product. The term “seitan” had never existed previously in Japan. Ohsawa usually wrote the term “seitan” using the katakana syllabary and characters, however when he occasionally wrote it in Chinese characters, he used the character *sei* (also pronounced “nama” in Japanese) meaning “fresh” or “raw” (since it is made from fresh wheat gluten), plus the character *tan* which is the first character in the Japanese word *tanpaku*, meaning “protein.” Ohsawa also gave him instructions for improving the product by mincing the wheat gluten and simmering it in soy sauce. Today on the front of each bottle of seitan is written “*Sakurazawa Nyoichi shido*” (Made with guidance from George Ohsawa).

Initially, in 1961 and early 1962, he had no intention to sell seitan; he sent samples free of charge to macrobiotic people throughout Japan.

In 1962 Mr. Mokutani started to manufacture seitan for commercial production. Marushima Shoyu K.K. (Marushima Shoyu Co., Inc.), of which he was director and head of the technical department, was the first to make seitan in Japan. After production began, most of the seitan made by Marushima Shoyu K.K. was sold (in small glass jars) to the macrobiotic food wholesalers in Japan (such as Muso Shokuhin, Ohsawa Japan, and Tsurushima [located in Yamaguchi-ken]) and to the macrobiotic community. The first company to export Marushima’s seitan was Ohsawa Japan, Inc. (where Lima Ohsawa’s sister was president). It was imported to the USA by Bob Kennedy of Chico-San, located in Chico, California.

A friend of Mr. Mokutani’s named Mr. Tsurushima owned a company in Yamaguchi prefecture; it made soba and noodles, and sold many macrobiotic foods. Mr. Mokutani asked Mr. Tsurushima to sell his seitan, which Mr. Tsurushima did.

Mr. Mokutani is currently president of two companies: Marushima Shoyu Co., Inc., and Junsei Shokuhin Marushima Co., Inc. (located at Higashi Onomichi 9-2, Onomichi cit, Hiroshima prefecture). The latter company sells soy sauce as well as more than 800 kinds of natural foods. They also sell freeze-dried gluten product which can be marinated in seasoning then grilled as a fat-free meat substitute, or mixed with meat as a seasoning to reduce the meat’s total fat content. Address: Chairman, Junsei Shokuhin Marushima

Co., Inc., Higashi-Onomichi 9-2, Onomichi-shi, Hiroshima-ken 722, Japan. Home address: Niihama 1-3-57, Onomichi city, Hiroshima prefecture. Phone: 848-20-2506.

7697. Shurtleff, Akiko Aoyagi; Sandler, Matthew; Okada, Yuko. 1992. Memories of the delectable gluten cutlets served at Tenmi, near Shibuya station in Tokyo, Japan (Interview). *SoyaScan Notes*. July 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Yuko Okada thinks that Tenmi first started in about 1968. By the early 1970s, a 10-minute walk from Shibuya station, it was a combination macrobiotic restaurant and food store. The restaurant was named *Tenmi* (Heaven + Flavor) and the store was named *Shizen Shokuhin Senta* (Natural Foods Center). Both were located at Sakuragaoka 4-3, Shibuya-ku 150, Tokyo. Phone: 03-496-7100. Both were still there in 1983.

The head of the restaurant (and a longtime friend of George Ohsawa), Mrs. Michi Ogawa, made one of the most delicious meatless entrees that we have ever tasted—called *Kôfu Katsu* (Gluten Cutlets). *Kofu* (raw wheat gluten) was simmered in a seasoned broth, then dipped in batter, dusted with Japanese-style bread crumbs (*panko*), and deep-fried. Crisp on the outside, succulent and juicy on the inside, it had a flavor and texture remarkably like that of a pork cutlet. It was served on a bed for thinly-sliced strands of cabbage and topped with one’s choice of a natural *tonkatsu* (pork cutlet) sauce (based on soy sauce), or a wedge of lemon.

Such a tasty cholesterol-free menu item could be a hit at almost any restaurant in the Western world—served with either of the above sauces, or with tartar sauce.

From an historical point of view, these Gluten Cutlets, made with seitan, were completely different from the typical Japanese macrobiotic seitan, which was a dark brown salty seasoning or hors d’oeuvre to eat while a person was drinking, as a yang balance for the yin of the alcohol. Address: 1. Soyfoods Center, Lafayette, California 94549; 2. P.O. Box 10277, Aspen, Colorado 81612; 3. Muso Co., Ltd., Kosei Bldg., 2nd Floor, Tanimachi 2-5-5, Chuo-ku, Osaka 540, Japan. Phone: 1. 510-283-2991.

7698. GEM Cultures. 1992. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 9 p. Aug. [4 ref]

• **Summary:** This catalog celebrates the company’s 12th anniversary. The first section is titled “Powdered cultures for soycrafters.” On page 1: “Powdered Tempeh Starter, PTS: Tempeh is a delicious Indonesian, cultured soyfood with a chewy texture. Whether your interest is in exotic foods, eating lower on the food chain for health, social or economic reasons, or cutting back on meat, cholesterol, or calorie consumption, tempeh fills the bill. A vegetarian source of Vitamin B-12, this versatile food can be fried in the traditional manner or baked, broiled, steamed, or barbecued. Easily cultured without special equipment, homemade

tempeh tastes and smells wonderful, slices better, and costs far less than commercial tempeh.

“The tempeh mold, *Rhizopus oligosporus*, that binds the cooked soybeans together into a sliceable cake, is grown on an entirely vegetable medium. Mature spores are harvested and combined with sterile organic rice flour for easy and accurate measuring on every batch. Complete culture directions and recipes are included. One pound of dry soybeans prepared as directed will make 1 3/4 pounds of tempeh. Preparation time—less than 2 hours. Incubation time—about 24 hours at 85 F (32 C). Kept cool and dry, PTS has at least a 6-month shelf life at full potency.

“Kit PTS, 11gm, three 1-pound batches (makes 5+ pounds). \$2.50 each.

“Big PTS, 35 gm, ten 1-pound batches (makes 18 pounds). \$4.00 each.

“Half Kilo PTS, 500 gm, packaged in bulk. \$35.00 each.

“Full Kilo PTS, 1000 gm, packaged in bulk. \$65.00 each.

“Powdered Natto Starter: Called *Natto* in Japan and *Thau-nao* in Thailand this cultured soyfood has a strong, somewhat persistent, unique flavor. The bacteria, *Bacillus subtilis* var *natto*, that culture the cooked soybeans make a sticky, viscous polymer during the 6-12 hours of incubation which creates wispy threads evident when the cultured soybeans are pulled apart. A good source of protein, this robust soyfood adds zest to any grain or noodle dish, soup or sandwich. A little goes a long way, so what is not intended for use in a day or two may be easily frozen.

“Natto Starter Kit: This packet contains complete culture directions, recipes, and enough spore to start 3 recipes of natto, each making 5 cups or 1 1/2 pounds.

“Bulk Natto Starter: A concentrated spore preparation, this vial has sufficient spore to start 48 pounds of dry soybeans. Prepared according to the included directions it will therefore make about 86 pounds of natto.

“Natto Starter Kit: Makes 4 1/2 pounds. \$2.50.

“Commercial Natto Starter: Makes 86 pounds. \$10.00.”

Also: Amazake, miso, shoyu, and tamari starters from Japan. Five types of *tane koji* (koji starter) imported from Japan. Commercial miso and shoyu koji spore packets. Organic light rice koji. Natural salts for curdling tofu: Natural nigari, Terra Alba calcium sulfate. Self-renewing cultures: Kombucha tea fungus. Fresh sourdough. Seed miso. Fresh fil mjolk, fresh viili, fresh kefir curds. Cookbooks with culture. Sea vegetables from the Mendocino Sea Vegetable Co. Kitchen culture items. Address: Fort Bragg, California. Phone: 707-964-2922.

7699. McSweeney, Daniel. 1992. 10th Annual Whole Foods Consumer Survey: Getting to know your customers. A profile of an aging and affluent consumer emerges from the survey. *Whole Foods*. Aug. p. 32-34, 36, 38, 43-44.

• **Summary:** A table titled “Food purchases” (p. 43) shows

the percentage of respondents who purchased a type of product at a natural foods during the past 12 months, in descending order of popularity (also shows percentages for 1991 and 1990): Tofu 52%. Soy milk 42%. Tamari 38%. Soy sauce 29%. Miso 28%. Tempeh 25%. Cheese substitute 19%. Sea vegetables 17%. Note: The sample size is not given.

7700. *Nestle Company Newsletter*. 1992. About Bean Products Ltd. in Cumbernauld, Scotland. Summer. *

7701. **Product Name:** Tofu Tempeh Burger, Tofu Vegies Burger.

Manufacturer's Name: Nutrisoy Pty. Ltd.

Manufacturer's Address: 255 Forest Road, Arncliffe 2205, NSW, Australia.

Date of Introduction: 1992. August.

Ingredients: Organic soybean (non genetically modified), water, soy sauce, sunflower oil, spices, natural nigari (magnesium chloride), culture (*Rhizopus oligosporus*).

Wt/Vol., Packaging, Price: 200 gm.

How Stored: Refrigerated.

New Product—Documentation: Label and letter (e-mail) from Tony Wondal of Nutrisoy. 2005. April 26. He started making and selling these two products in Aug. 1992. Note: He invented this interesting Tofu Tempeh Burger.

7702. **Product Name:** Meatless Tofu Steaks.

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

Date of Introduction: 1992. August.

Ingredients: Ingredients: Tofu (water, organically grown soybeans, nigari (magnesium chloride)), soy sauce (water, soybeans, wheat, salt), granulated garlic, granulated onion, and spices. Soybeans grown and processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 6 oz (170 gm) vacuum pack.

How Stored: Refrigerated.

Nutrition: Per 3 oz.: Calories 170, protein 20 gm, carbohydrates 4 gm, fat 9 gm (saturated fat 1 gm, polyunsaturated fat 8 gm), cholesterol 0 mg, sodium 350 mg. Percentage U.S. Recommended Daily Allowance (U.S. RDA): Protein 30%, vitamin A 35%, calcium 25%, iron 25%.

New Product—Documentation: *Vegetarian Times*. 1992. Aug. p. 83. ‘Meats’ to meet. White Wave makes marinated Meatless Tofu Steaks. Label sent by Lon Stromnes of White Wave. 1993. Feb. 26. 4 by 4.75 inches. Self adhesive. Full color: Black, red, pink, and white. Photo shows a tofu steak between buns on a plate with trimmings of onions, green peppers, cheese, and lettuce. “Contains no meat.”

7703. Waxman, Howard. 1992. History of Essene, natural foods retailer and distributor (Interview). *SoyaScan Notes*.

Sept. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Essene began in March 1969 as a macrobiotic natural foods retail store named Essene Macrobiotic Supply at 2031 Samson St. in Philadelphia, Pennsylvania. Primarily a juice and snack bar, it was founded by Denny Waxman, Charles Smith (Smitty), and Stanley Petrowski; Stanley left after several months. Howard was not involved with the company at that time. After about a year, the growing retail store moved to 320 South St. (at 3rd) in Philadelphia and changed its name to Essene Traditional Foods.

By Feb. 1971 a distribution company, also named Essene Traditional Foods, was started in the retail store—following the Erewhon model. An ad in *East West Journal* (Feb. 1971, p. 10) shows that “Essene,” at 320 South St., was a distributor and wholesaler of natural and traditional foods, including miso, tamari, sea vegetables, and organic grains, vegetables, and beans. They made stone-ground wheat flour on the premises. The distribution company soon outgrew the store and by May 1972 had moved into a small warehouse at 58th & Grays Ave., Philadelphia PA 19143. Then it moved to a larger warehouse in Boyertown, about 1 hour drive outside Philadelphia. The distribution company went out of business in about 1976-78; it had been in business for about 5 years.

In 1981, when Bill Tara returned to the United States to become director of the Kushi Institute of Boston, Massachusetts, Denny Waxman, head of the Philadelphia East West Center, went to London to run the Community Health Foundation and the Kushi Institute. He stayed two years. Denny now lives in Portugal.

The retail store is still in business, owned by Howard. He moved to his present address about 3½ years ago, from 320 South Street, Philadelphia, PA 19147. Address: Owner, Essene Natural Foods, 719 S. 4th St., Philadelphia, Pennsylvania 19147. Phone: 215-922-1146.

7704. **Product Name:** La Soya: Authentic and Natural Soy Sauce of China.

Manufacturer's Name: Amasi International Inc. (Importer). Made in China.

Manufacturer's Address: 378, Isabey, Montreal, QUE H4T 1W1, Canada. Phone: 514-738-3000.

Date of Introduction: 1992. September.

Ingredients: Water, whole soybeans, whole wheat, sea salt.

Wt/Vol., Packaging, Price: 15 fl oz (450 ml) glass bottle or 2.64 U.S. gallons (10 liters) tin.

How Stored: Shelf stable.

New Product–Documentation: Leaflet from Natural Products Expo East. 1992. Sept. 11-13. Baltimore, Maryland. “The taste of a thousand seasons... La sauce aux mille saisons.” This is an authentic Chinese soy sauce.

Vegetables of the sea: Underwater harvest. 14. Brown rice vinegar: Japan's liquid treasure. 15. Traditional vessels: Vats, crocks, and barrels. Glossary. Worldwide importers.

Concerning soy sauce, this book discusses Sendai Shoyu and Miso Co., Johsen, tamari, Mansan Brewing Co. founded by Oguri family in 1875, almost destroyed in Sept. 1959 by the fierce Ise-wan typhoon, “discovered” in 1982 by Akiyoshi Kazama of Mitoku. Now a macrobiotic staple.

For details on the uncondensed introduction to this book see Kushi (1992) “Introduction to *Culinary Treasures of Japan*.” Though very interesting, it contains a number of factual errors and statements that leave the wrong impression. Address: Saluda, North Carolina.

7707. Diaz Carrasco, Humberto; Busto Garcia, I.; Velazquez Diaz, O.; Fernandez Diaz-Silveira, M.; Gonzalez Mauri, J.; Ortega Herrera, J. 1992. *El cultivo de la soya para granos y forrajes* [The cultivation of the soybean for its seeds and as a forage]. Havana, Cuba: Ministerio de la Agricultura, Instituto de Investigaciones Fundamentales en Agricultura Tropical [INIFAT]. 16 p. Nov. [37 ref. Spa]

• **Summary:** Contents: Origin and distribution of the soybean. Importance worldwide. Soya in Cuba. Morphology. Physiological aspects. Favorable attributes of the soybean. Main issues to consider in planting, management, harvest, and benefitting/profitting from the soybean. Rotations with soya.

The section titled “Soya in Cuba” (p. 4-7) states: “The first annual report of the Agricultural Experiment Station at Santiago de las Vegas (*Estación Experimental Agronómica de Santiago de las Vegas*), mentioned the acclimatization of 50 varieties of soya. Today this station is INIFAT (*Instituto de Investigaciones Fundamentales en Agricultura Tropical*) of the Cuban Ministry of Agriculture (MINAG). Note 1.

Santiago de las Vegas is a town located 10 miles south of Havana in Habana Province. Note 2. This report, published in June 1906, covers work done during the period 1 April 1904 to 30 June 1905. It contains the earliest date seen for soybeans in Cuba, or the cultivation of soybeans in Cuba (1905; one of three documents).

“During the period 1917 to 1920 Calvino issued information on the study of soybeans in Cuba; he indicated that the variety Biloxi did well in Cuba. At the end of the 1920s, Francisco B. Cruz studied 8 varieties of soybeans. In 1937 the forage characteristics of the variety Ootootan were evaluated. In 1952 Calzadilla Cabrales delivered seeds of the variety Improved Pelican to the Agricultural Experiment Station at Santiago de las Vegas; this unique commercial variety was used in Cuba until 1978. In 1955 a pamphlet titled *The cultivation of soybeans (El cultivo del frijol soya)* was published by this same station (Muller 1955).

“In 1958 the Cuban Bank for Agricultural and Industrial Promotion (*Banco de Fomento Agrícola e Industrial de Cuba-BANFAIC*), in cooperation with the Agricultural Experiment Station at Santiago de las Vegas, published a bulletin titled *The cultivation of soybeans (El cultivo del frijol soya)* (Gonzalez et al. 1958). This bulletin described the areas of soybean extension located in the savannah areas of Santo Domingo (province of Villa Clara), in the estate ‘Pablo’ (*Ciego de Avila*), and in the rice-growing area of southern Pinar del Rio. Other key documents published from 1968 to 1989 are cited and summarized.

“In 1978 at San Nicolás de Bari, in Havana province, the first Cuban soy sauce (*salsa soya*) factory was started at an investment cost of more than 4 million pesos and with an annual production capacity of 2,000 tonnes/year.

“At the Food Research Institute of the Ministry of Food Industry (*Instituto de investigaciones para la Industria Alimentaria del Ministerio de la Industria Alimenticia (MINAL)*), situated in El Guatao, there was installed [in 1984] the so-called “Mechanical Cow” (*vaca mecánica*). This piece of equipment was acquired in Brazil for extracting soymilk; it had a capacity of 200 liters/hour. The Food Research Institute made soymilk (*leche de soya*) in vanilla, chocolate, and strawberry flavors.

“As part of a continuation of previous investigations, during the period 1981-1991, at INIFAT and at the “El Tomeguín” Seed Station (*Estación de Granos*), both part of the Cuban Ministry of Agriculture (MINAG), work was undertaken on genetic improvement and introduction, with the objective of obtaining soybean varieties that could be planted at different seasons of the year to produce seed, forage, or both, that were easy to harvest mechanically, and were less susceptible to the principal diseases and pests which attack this crop.

“As a result of this work, the following varieties are now available for spring planting: Cubasoy-23, 42, Williams, and Duocrop. The varieties IGH-24, R-315, INIFAT-112,

INIFAT-V9, Cubasoy-120, and 96 can be planted during the months of July and August, and the varieties INIFAT-382, INIFAT-V9, and Cubasoy-120 can be planted during the months of December and January.

“In parallel to the work described above, within the “Principal State Problem of Beans and Soybeans” (*Problema Principal Estatal de Frijol y Soya*), in various Cuban institutions (National Institute of Agricultural Science {*Instituto Nacional de Ciencia Agrícola, INCA*}, Institute of Animal Science {*Instituto de Ciencia Animal, ICA*}, INIFAT, and others), investigations were conducted that made it possible to maximize the utilization of the new crops. Among these were rotation and intercropping with sugar cane, citrus crops, tobacco, potatoes, and rice, rhizobium biology, mineral nutrition, irrigation, mechanization, incidence and control of pests, diseases, and weeds, uses and storage of the seed, production of elite seed varieties, etc. which permit integral crop management of the soybean under Cuban conditions.” Address: Havana, Cuba.

7708. Griffis, Gil; Wiedermann, Lars. 1992. Marketing food-quality soybeans in Japan: A manual on how to profit from the niche market in Japan for value-added soybeans. 5th ed. St. Louis, Missouri: United Soybean Board. 25 p. Nov. 28 cm.

• **Summary:** Contents: Introduction. Japan: Desired soybean characteristics, tofu (procedure for making tofu, desired soybean characteristics, color of hilum, seed size {the larger the better, preferably more than 20 grams/100 beans}, color of cotyledons, hull, composition, special notes, American interpretation), miso (same categories of information as tofu), natto (ditto; seed size: The smaller the better, with a maximum of 5.5 mm diameter. Round shape is preferred to oval in order to limit swelling during the soaking and boiling processes), food quality soybean varieties (name or code-name of 42 varieties, maturity zone, release year, used to make what soyfoods), distribution channels, marketing channels, protocol, pricing, organically-grown soybeans.

Taiwan: Introduction, list of 4 major buyers, users, and trade associations. Korea. Southeast Asia. United States.

Appendix I. Distribution systems for soybeans used for food in Japan: Tofu (23,000 tofu shops of which 13,000 are members of the Tofu Association), natto, miso.

Appendix II. Food soybean imports by country of origin, 1984-1991. USA is the largest supplier (845,000 tonnes in 1991), followed by China (279,000), then Canada (28,000). Total imports, which have stayed about constant during this period, were 1,152,000 tonnes in 1991.

Appendix III. Distribution by usage of soybeans used for food-1991, direct use only in tonnes (metric tons). Tofu: 607,000 tonnes total, of which 562,000 come from the USA and Canada, 25,000 from China, and 40,000 from Japan. Up 2% from 1989.

Miso: 171,000 tonnes total, of which 38,000 come from

the USA and Canada, 121,000 from China, and 12,000 from Japan. Up 0.5% from 1989.

Natto: 147,000 tonnes total, of which 87,000 come from the USA and Canada, 50,000 from China, and 10,000 from Japan. Up 9% from 1989.

Other: 39,000 tonnes total, of which 20,000 come from the USA and Canada, none from China, and 19,000 from Japan. Total food use of 964,000 tons is up 2% from 1989. Source: Japanese trade newspapers and trade associations. These figures do not include a estimated 492,000 tonnes of soybeans used indirectly (in the form of defatted soybean meal) for soy sauce, 222,000 tonnes used for soy protein, and 20,000 tonnes for other indirect uses.

Appendix IV. Directory of direct importers of food-quality soybeans for each is given: Home office in Japan. Representative office in the U.S.

Appendix V. Traders of food-quality soybeans (3 companies).

Appendix VI. Soy food organizations in Japan (tofu, miso, soymilk, packaged tofu, natto). Appendix VII. Helpful contacts.

Food quality soybean varieties (with maturity group / zone, and year released; table, p. 5): Chico (00, 1983), Grande (0, 1976), Proto (0, 1989), Minnatto (0, 1989), NattoKing [Nattoking] (I, 1988), Disoy (I, 1967), Vinton (I, 1978), Vinton 81 (I, 1981), King Natto (I, 1985), Kato (I, 1989), Magna (II, 1967), Prize (II, 1967), Marion (II, 1976), LS201 (II, 1989), Provar (II, 1969), Beeson (II, 1969), Kanrich (III, 1956), Kim (III, 1956), LS301 (III, 1989), Verde (III, 1967), IL2 (III, 1989; from Illinois), Hawk (III, ?), Emerald (IV, 1975), Vance (V, 1986), Camp (V, 1989), Hartz 936X (VI, 1981), Hartz 914 (VI, 1989), Hartz 922 (VI 1989), Merrimax (? , 1986).

Note: This report was originally published in Sept. 1989, mainly for use by the American Soybean Association office in Tokyo. Address: 1. Division Director for Asia; 2. Country Director for Japan. Both: American Soybean Assoc.

7709. *Toyo Shinpo (Soyfoods News)*. 1992. Nattô no seizôhō. Kikkōman (KK) ga shutsugan. Tokkyo shutsugan shōroku [How to make natto: Kikkoman applied for a patent. Details of the patent application]. Dec. 1. p. 12. [Jap]

• **Summary:** A long and detailed article.

7710. McCloud, Tina. 1992. Natto: A breakfast dish that's an acquired taste. *Press (Newport News, Virginia)*. Dec. 7.

• **Summary:** "It's the color and consistency of pork and beans, but sticks together like stretched chewing gum." The owner of two Japanese restaurants in Newport News, Mr. K. Nishikawa, notes that "nibbling natto seems a pretty disagreeable way to start the day. Unembellished natto has 'no flavor and smells funny.'" He imports the fermented soybean product frozen from Japan. The key lies in the seasoning. In northern Japan, natto is widely eaten as a

breakfast food, served over steamed rice and mixed with mustard and soy sauce. Some people mix in onions and raw egg. The sushi chef at one of Mr. Nishikawa's restaurants serves natto in sushi.

7711. Arocena, Javier. 1992. [Re: Recent developments at Zuaitzo]. Letter to William Shurtleff at Soyfoods Center, Dec. 14. 2 p. Typed, with signature on letterhead. [Spa; eng+]

• **Summary:** In June 1988 he moved his company to Plaza Santa Maria, 01001 Vitoria-Gasteiz. He knows of three other soyfoods manufacturers in Spain: Natur-Soy, Vegetalia, and La Sojeria, all near Barcelona.

"I was a pioneer in the production of tofu and seitan in Spain but for the last 12 years I have kept on doing the same thing, working only at the family level, making little but doing it well.

"Now we are living in the country at Villanueva Tobera, 09214 Condado de Treviño (Burgos), Spain... about 25 km from Vitoria-Gasteiz.

"As of today, our plans are not to increase our work with tofu and tempeh derivatives, but rather to develop new products, above all the full gamut of fermented soy products... such as miso, tamari, natto, and amazake." But since he has difficulty understanding English, he would like to get Spanish-language publications. Address: Zuaitzo, Villanueva Tobera, 09214 Condado de Treviño (Burgos), Spain. Phone: 945/28 86 30.

7712. Soyfoods Assoc. of America. 1992. Soyfoods 2000: Merchandising soy products into the next century (Ad). *Natural Foods Merchandiser*. Dec. 16-page color special supplement, 8½ by 11 inches, inserted after p. 28.

• **Summary:** Contains full color ads by Morinaga Nutritional Foods, Inc. (Mori-Nu Tofu, Firm and Extra Firm), Lightlife Foods, Inc. (5 types of tempeh, Tempeh Burgers [Lemon Grill, American Grill, Barbecue Grill], Tofu Pups, Vegetarian Chili, Sloppy J, Foney Baloney, Fakin Bacon, Lean Links), Worthington Foods, Inc. (Natural Touch Okara Pattie, Garden Pattie, Dinner Entrée, Lentil Rice Loaf), Sovex Natural Foods, Inc. (Better Than Milk, Tofu Ice Cream [Vanilla or Strawberry], Good Shepherd Spelt, Millet-Rice Flakes, For Goodness Flakes!), Vitasoy (U.S.A.) Inc. (Light Vanilla, Original, and Cocoa soy drinks).

Contains black-and-white ads by White Wave, Inc. (Five Grain Tempeh, Meatless Tofu Steaks, Soya A Melt Soy Cheeses [Regular or Fat Free] and Singles, Lemon Broil Tempeh, Amaranth Tempeh, Teriyaki Burgers, Organic Tofu, Dairyless Non-Dairy Yogurts, Tempeh Burgers, Sea Veggie Tempeh, Meatless Healthy Franks, Snack'n Savory Tofu), Cemac Foods Corp. (Unbelievable brand Cheesecake; based on nonfat baker's cheese; contains no soy, no fat, no cholesterol), Solait International Ltd. (Solait Powdered Soy Beverage), Tofutti Brands, Inc. (Lite Lite Tofutti, Tofutti

Cuties, Land of the Free [Non-dairy frozen desserts, free of fat and sugar, sweetened with fruit juice], Tofutti Egg Watchers, Better than Cream Cheese, Sour Supreme [Non-dairy sour cream], Premium Tofutti, Tofutti Soft Serve Mix), Sharon's Finest (TofuRella), American Natural Snacks (Soya Kaas), Great Eastern Sun (Miso Master brand misos), The Macrobiotic Wholesale Company, Turtle Island Foods, Inc. (Keep It Simple Stirfry–Diced Marinated Tempeh), Betsy's Tempeh (Tempeh), Quong Hop & Co. (The Soy Deli–9 Tofu Burgers, 3 Savory Baked Tofu, Pacific Tempeh, 3 Tempeh Burgers, 7 fresh water packed and vacuum packed tofu), MYCAL Group (natural dehulled soybean flakes).

Articles and sidebars include: “Welcome to the future: Soyfoods 2000.” “Soyfoods Association names new executive director” (Virginia Messina, whose photo is shown). “Soyfoods Association mission statement.” “The modern evolution of soyfoods,” by Michael Whiteman-Jones and William Shurtleff (Shurtleff's photo is shown). “Unraveling the soyfoods merchandising mystery,” by Michael Whiteman-Jones. “Research shows soyfoods may help prevent cancer,” by Mark Messina, PhD (whose photo is shown). “Key reasons to buy soy: Environmental, nutritional, economic.”

This attractive insert was coordinated by Franke Lampe and edited by Lisa Turner, both of NFM.

7713. Vaidya, Achutananda. 1992. Re: Pioneering and making tofu and other soyfoods in Nepal. Letter to William Shurtleff at Soyfoods Center, Dec. 26. 9 p.

• **Summary:** “I started making tofu in 1974. I did not have any connection with my uncle in starting my tofu company, however I did have a chance to see him make tofu at his residence in Kathmandu, and from that time I got the idea in my mind to make tofu myself. I learned the details of the process in Nepal from Mr. Akifumi Nakamura of Kobe, Japan, a member of the Japan Overseas Cooperation Volunteers (JOCV), who worked at the Central Food Research Laboratory in Kathmandu, which was also my office in 1974. I worked together with him as a counterpart for two years learning how to make tofu. During his stay there I learned wholeheartedly the process of making tofu. I learned from him that this food product called “Bhatmas-ko-paneer” in Nepali is known as “tofu” in Japan. Vita-Tofu is the brand-name of my tofu. This tofu is not packaged. It is sold in the form of rectangular cakes out of water-filled cans or bowls because most of the local vegetable shops do not have refrigerators. Even to this day sale of tofu is difficult during the hot summer months because of lack of refrigeration in food retail stores. At the start, for the first 4-5 years, I delivered my tofu from door to door because even at that time the people of Kathmandu did not know about tofu. They did not want to buy it because they did not know how to cook it.

“From July 1979 to March 1980 I was invited to Japan

for 9 months training at the Akita Prefecture Brewing Laboratory. During that time I also learned in detail the processes for making soy sauce, miso, and soyamilk. During that period I also got a chance to read *The Book of Tofu*, *The Book of Miso*, *Miso Production*, and *The Book of Tempeh* all of which helped me very much. I still have all those books. In 1985 I was invited by the Rotarians of Akita-Aomori to return to Japan for 1 month (Jan/Feb. 1985) to receive further technical training in making tofu, miso, soy sauce, soyamilk, moyashi (sprouts), koji, fruit fermentations for wine, etc. Today I produce tofu, soy sauce, and miso in my small factory in Kathmandu. I currently have an electric wet grinder imported from Kyoto, Japan, in 1976. My other equipment (a basket pressing machine and tofu presses) were all made in Nepal by Nepalese mechanics.”

Accompanying this letter are 27 color photos showing the following: Vita Tofu in Nepal. Making koji with his wife in Nepal. Studying and making tofu, miso, and shoyu in Japan in 1980 and 1985. His business card notes: “Food Technology in Brewing from Japan. Products & Suppliers: Tofu (Vita), Soyamilk (Vitabean milk), Soya Curd, Soya Sauce, & Miso.”

His Curriculum Vitae notes that he was born on 28 Dec. 1947, resides at 9/374 Bhedasingh, Kathmandu, and is married. Address: Founder and owner, Nepal Soya Industries, 9/374 Bhedashing, Jamaguthi, Kathmandu, Nepal.

• **Summary:** A colorful overview of the history of soybeans and soyfoods from 1100 B.C. to the present, worldwide. Discusses the history of tofu, Samuel Bowen, Benjamin Franklin, T.A. Van Gundy, Madison College, Henry Ford, Seventh-day Adventists, Erewhon, Asian Americans, Kikkoman, the \$1,000 million soyfoods market in America, countries with the highest per-capita consumption of soyfoods, the future of soyfoods. Address: 1. NFM; 2. Soyfoods Center, P.O. Box 234, Lafayette, California 94549.

7716. **Product Name:** Dressings: Creamy Miso (Vegan), or Tamari Vinaigrette.

Manufacturer's Name: Martin Brothers Fresh Dressings.

Manufacturer's Address: P.O. Box 1686, Austin, Texas 78764. Phone: (512) 478-4434.

Date of Introduction: 1992-1994?

Ingredients: Incl. miso.

Wt/Vol., Packaging, Price: 12 oz bottle.

How Stored: Refrigerated.

New Product–Documentation: Spot in Vegetarian Times. 1998. March. p. 12. “Mixed dressings.” A 12-oz bottle retails for \$4.29. A color photo shows the labels. Talk with Brett Davis of Martin Brothers. 1998. March 10. These products were first introduced locally in about 1992-94. The company makes only salad dressings. For details, talk with Carl Martin, owner.

7717. **Product Name:** [Seitan, and Smoked Seitan].

Foreign Name: Seitan, Seitan Affumicato–Alimento Derivato dalla Farina di Frumento.

Manufacturer’s Name: Biolab.

Manufacturer’s Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.

Date of Introduction: 1992.

Ingredients: Wheat gluten (washed by hand), tamari soy sauce, vegetable extract based on: sea salt, yeast extract, vegetable oil (non-hydrogenated), leeks, carrots, sweet peppers (also called bell peppers; *peperoni*), celery, parsley, spices, sea salt, water, traces of wheat starch, traces of smoke [in the smoked seitan only].

Wt/Vol., Packaging, Price: 300 gm (2 servings of 150 gm each) vacuum packed separately, side by side.

How Stored: Refrigerated.

New Product–Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This new (Dec. 1998) label (3½ by 5 inches) has the same pastel background for all seitan products—a stylized view of the sea and sky, with mountains on both sides and rolling hills in the foreground. At the top right is a smiling sun. At the lower left are two sunflowers; at the lower right ears of wheat. Text: “Organically grown (*prodotti dalla agricoltura biologica*).” “Ready in 5 minutes (*Pronto in 5 minuti*).” Refrigerate at 4°C. A small symbol shows a person recycling the container.

7718. Atlas, Nava. 1992. Soups for all seasons: Bountiful vegetarian soups. New Paltz, NY: Adam Enterprises. 128 p. Illust. by Nava Atlas. Index. 21 x 18 cm.

• **Summary:** The witty literary aphorisms, quotations (with sources), and marvelous whimsical drawings that have become the author’s trademark appear throughout this vegetarian cookbook. The recipes are arranged by season. The last chapter, accompaniments (p. 107-24) includes bread, muffins, biscuits, scones, croutons, and dumplings.

Soy related: Soymilk is given as an alternative in every recipe that calls for milk or low-fat milk (see p. 20, 28, 31, 34, 92, 123). Likewise, soy cheese is given as an alternative that calls for dairy cheese (see p. 16, 32, 114). “Natural soy sauce” is used to season many recipes (see p. 14, 80, 82, 119). Simple miso broth (with kombu and diced tofu {bean curd}, p. 13). Dashi with miso and vegetables (p. 13).

Miso soup with winter vegetables (with wakame {Japanese sea vegetable}, shiitake mushrooms, etc., p. 62). Chinese cabbage and bean curd soup (with “½ pound tofu {bean curd}, cut into ½-inch dice,” p. 80). Miso spinach soup with baby corn (with “¼ pound block tofu, cut into ½-inch dice,” p. 81). Address: Author and illustrator, New Paltz, New York.

7719. Berk, Zeki. 1992. Technology of production of edible flours and protein products from soybeans. *FAO Agricultural Services Bulletin* No. 97. 178 p. [173 ref]

• **Summary:** Contents: Foreword. 1. The soybean: Background, production, marketing, agricultural characteristics, physical characteristics and morphology of the soybean, chemical composition (moisture, proteins, lipids, carbohydrates, minerals). 2. Utilization of soybeans: Utilization options for soybeans, whole bean utilization, the oil mill route (utilization of the oil fraction, utilization of the meal fraction). 3. Oil-mill operations: The expeller (operation principles, advantages and disadvantages of the expeller process, equipment), the solvent extraction process (operation principles, receiving and storage of soybeans, preparation for extraction, solvent extraction, post-extraction operations). 4. Edible soybean flours and grits: Introduction, definitions, composition and quality parameters (definition and classification of edible soy flours and grits, composition, quality standards), full fat soy flour and grits (production processes, utilization), defatted soy flours and grits (production processes, utilization). 5. Soybean protein concentrates (SPC): Introduction, definition, composition, types, production processes (the aqueous alcohol wash process, the acid-wash process, heat denaturation/water extraction process), utilization (basic considerations, use in bakery products, meat products, other uses). 6. Isolated soybean protein (ISP): Introduction, definition, composition, types, production processes (conventional process, problems in conventional processing, alternative processes), utilization (meat products, seafood products, cereal products, dairy-type products, infant formulas, other uses). 7. Textured soy protein products: Introduction, spun-fibre based texturization, extrusion texturization, steam texturization, utilization (meat extenders, meat analogs, other applications). 8. Soymilk and related products: Introduction, composition and classification, production processes (the traditional process, the Soya Technology System (STS) Process, the INTSOY (Illinois) process, the Buhler Process for soy micro-powder), soymilk related products. 9. Tofu, tempeh, soysauce and miso: Introduction, soy sauce, miso, tempeh, tofu (Introduction, regular and silken tofu, kori-tofu, deep-fried tofu, fermented tofu). Appendixes: I. Standards and specifications. II. Organizations and government agencies. III. Manufacturers and suppliers of soybean processing plants and equipment. IV. Sample budget quotations for complete soy processing or soybean related food manufacturing plants. Address: Technion–Israel Inst. of

Technology, Haifa, Israel.

7720. Buswell, Robert E., Jr. 1992. *The Zen monastic experience: Buddhist practice in contemporary Korea*. Princeton, New Jersey: Princeton University Press. xiii + 264 p. + [8] p. of plates. See p. 120-21. Illust. Index. 25 cm. [190+* ref]

• **Summary:** The section titled “Meals” (p. 120-25) notes that there are many similarities between the diet in the monasteries and that in the homes of the local agricultural peasants. “The major difference is that all meals served in the monasteries are vegetarian [actually vegan]. The bodhisattva precepts of the Mahayana branch of Buddhism forbid monks from eating the flesh of any sentient being.” Cereal grains provide 70-80% of the caloric intake. “In addition to steamed rice, meals always include some kind of soup (*kuk*)... The soup is generally based on *toenjang*, a fermented bean paste like Japanese miso and flavored with soy sauce (*kanjang*) and sesame salt.”

“Bean products constitute one of the largest components of the monastic diet during all seasons. The basis of many bean products is *meju*, a fermented bean paste somewhat like the Japanese *nattō* [more like the Japanese *miso-dama*, or soybean koji]. *Meju* is used as a major ingredient in producing soy sauce, red-pepper paste, and *toenjang*. Cooked black [soy] beans, seasoned with soy sauce, sugar, and white sesame, are served at least once a day. Tofu (*tubu*), or bean curd, frequently appears on this menu, but this is always purchased from a professional maker, who delivers it to the monastery on the back of his motorcycle. When the tofu is especially fresh, it is served steamed in whole blocks, to be dipped into a sauce made of soya, sesame oil, and red-pepper sauce.”

Because of Mahayana Buddhism’s dietary restrictions, monks don’t eat garlic or onions, so widespread in the diets of regular Koreans. Those foods are considered “to be mild aphrodisiacs, something celibates can do without. To compensate for the blandness of the food, the kitchen staff replaces the garlic and onions with lots of red pepper (*koch’u*), along with red-pepper paste (*koch’ujang*),” brown sesame and white sesame. At the ceremonial dinner on festive days, white rice is replaced by glutinous rice and special dishes such as fried tofu and nori (*kim*) are served.

Note: The author was privileged to spend five years as a Buddhist monk in Korean monasteries between 1974 and 1979, primarily at Songgwang-sa. He made two additional trips to Songgwang-sa in Nov. 1987 and July 1988. The monastery is in Suncheon near the southern coast of Korea.

7721. Cardenas, Danilo C.; Legaspi, Benjamin M. 1992. The status of soybean production and utilization in the Philippines. In: *Increasing Soybean Production in Asia: Proceedings of a Workshop*. 1992. Bogor, Indonesia: CGPRT Centre. 187 p. See p. 119-35. Held 21-24 Aug. 1990 at

Phitsanulok, Thailand. [8 ref]

• **Summary:** Contents: Introduction. Production situation: Production trends, economics of soybean production, price trends, marketing of soybean. Philippine foreign trade situation: Soybean imports, soybean exports. Soybean utilization. Government policies/programs affecting the industry: Policies, programs. Major problems besetting the local soybean industry. Conclusions.

The soybean, also known locally as “*utao*,” has become an increasingly important economic crop in the Philippines. Yet in 1987 (the latest year for which figures are given) only 5,698 tonnes (metric tons) were harvested from 6,490 hectares, having a value of 45,169,000 pesos. This represented only 0.02% of the total Philippine quantity of agricultural production, and only 0.05% of total farm area and value. Philippine soybean production peaked at 11,466 tonnes in 1982. Most of the country’s soybeans are grown in the southern Mindanao region (72.1%), followed by northern Mindanao (10.0%) and central Mindanao (9.4%). Imports of soybeans and products have steadily increased since Philippine farmers do not produce enough soybeans to meet local demands; the value (FOB US\$) rising from \$61,989,000 in 1980 to \$127,981,000 in 1988. The main imports are soybean meal (accounting for 86.87% of total import value), refined soybean oil (5.19%), soybeans (4.18%), and crude soybean oil (223%). Before March 1986 the National Food Authority (NFA) had the sole authority to import soybeans, but with the introduction of the trade liberalization program, importation has reverted to private firms. In 1989 the country’s major sources of imported soybeans were China (which supplied 42% of total imports), Brazil (34%), and the USA (15%). Exports, which are negligible, have grown from \$136,000 to 1,123,000 during the same period. The main exports are soy sauce (accounting for 91.03% of total value), salted and fermented soybeans [fermented black soybeans] (*tausi*, 3.34%), and soybeans (2.65%).

Table 7 lists and describes “Soybean-based food products popularly used in the Philippines.” Fermented products include soy sauce, salted and fermented soybean (*tausi*), tempe (tempeh), soybean paste (miso), and soybean curd (fermented tofu cubes; a soft cheese-type product with a salty but mild flavor, eaten as a relish or cooked with meat and vegetables). Non-fermented products include soybean sprouts (*toge*), soybean cheese (*tokwa* [tofu]), Geerlings cheese (taho, soymilk curds; a sweet dessert or snack food for children), soybean milk, and roasted soybean (soy coffee).

“In terms of food usage, Filipinos, unlike other Asians, have not developed a taste for soya-based products... Most of the soy products available in the market are either made at home or in family-operated shops.

“It is interesting to note from the report of Co (1987) that small scale food processors engaged in manufacture of

taho and tokwa preferred locally grown beans to imported ones. They claimed that local soybeans have a distinctive 'fresh' quality which imparts a finer and smoother texture to their finished products providing a longer shelf life than that produced from imported beans.

"Recently, several developments in the local economy have signaled a revival of interest in the use of soybean as food. In 1980 Nestle Philippines Incorporated began commercial production of powdered soymilk products and later a baby soya-cereal food formulation and a soya-based meat extender which is produced primarily for export to other Asian countries. Today Nestle Philippines, in co-operation with the Land Bank of the Philippines, the Regional Offices of the Department of Agriculture and PCARRD is encouraging local production of soybean and had adopted a no importation policy.

"Some years ago, the use of TVP also gained a permanent foothold in the local processing industry. It is used in the manufacture of ground meat products and as a meat extender. Almost all TVP used in the country is imported except for the locally manufactured full-fat TVP which is being produced by the Vitarich Corporation, one of the biggest feed millers in the country. The company has built a full-fat soya processing plant capable of utilizing 900 MT [metric tons] of soybean per month. Unfortunately, all its raw soybean requirements are imported from the U.S. and China.

"Soybean flour, protein concentrate and protein isolates are the newest soya-based products and are now used extensively in the country for the formulation of meat emulsion products. All raw materials are imported and there is no local manufacturing capability at present."

"Programmes: As early as the 1970s, the government tried to involve itself to some degree in boosting national soybean output, despite the low priority it accorded to soybean in general. It was an involvement borne out of an urgent need to meet the growing requirements of the local feed milling and livestock industry, rather than of a need to address the high incidence of malnutrition among Filipinos. Accordingly, the government launched a number of programmes to improve soybean production, most of which failed to achieve their goals. At present, only the PCARRD-coordinated Soybean Pilot Production Programme continues to function. This programme was initiated in late 1983." Address: 1. Supervising Science Research Specialist, Philippine Council for Agriculture, Forestry, and Natural Resources Research and Development (PCARRD); 2. Dep. of Agriculture Bureau of Plant Industry, Los Baños National Crop Research and Development Centre. Both: The Philippines.

7722. Chainuvati, Chavalvut. 1992. Soybean production and utilization in Thailand. In: Increasing Soybean Production in Asia: Proceedings of a Workshop. 1992. Bogor, Indonesia:

CGPRT Centre. 187 p. See p. 1-15. Held 21-24 Aug. 1990 at Phitsanulok, Thailand. [6 ref]

• **Summary:** Contents: Introduction: Importance of agriculture, establishment of the Department of Agricultural Extension, DOAE's functions & responsibilities, soybean production, soybean production area, crop seasons, cultivation practices, harvesting, vegetable soybean. Soybean production and consumption campaign: Previous activities, 1990 activities, new creative work. Conclusion.

Thailand produces about 650,000 tons of soybeans each year. Of this, the first-grade seed is used for either home food industries (150,000 tons) or for next season's seed and other grain use. The remaining 500,000 tons are second grade seed, which are crushed to yield soy oil and soybean meal. The 20% of production used for food is used as follows: Fresh soybeans (*toa rae*) sold in open markets. Home industries: Soymilk, curd (tofu), soy sauce, fermented soybeans (*tao chiew*), soybean sprouts, starch or protein isolate for hot dogs or other sausages, and crisps (*Tao Nao*). Soy milk industries: Instant powdered milk mixed with dairy milk, fresh soymilk in packages, fresh soymilk in open market restaurants. "No soy grain [soybean seeds] is exported, except for a small amount of first-grade soybean to Singapore and Malaysia for making the above mentioned food."

"Vegetable soybean: Vegetable soybean is becoming more popular in agri-business, as many frozen-product companies are showing interest in this new crop. Seed is imported from Japan and Taiwan. Production yield has been impressive in several regions of the country such as Chiangmai, Chachoengsao, Petchburi, etc. Two companies which are close to the extension offices, are Chiangmai Frozen Food Co. and Okada Corporation Ltd.

"The Department of Agricultural Extension plays the role of middleman between private companies and the farmer. Extension officers also transfer new information to the local farmers. Additionally, a national plan on vegetable soybean has been submitted to the policymakers and a future plan includes the promotion of domestic consumption."

"Previous activities: In 1972 the idea of a soybean campaign was first thought of by scientists in the Institute of Food Research and Product Development, Kasetsart University and the Department of Agricultural Extension. The major sponsor and co-creator, was the American Soybean Association. The co-institutes organized a grand dinner to open the campaign. Afterwards, the Department of Agricultural Extension encouraged Bangkok and provincial headquarters to organize exhibitions, field days and local broadcasting or publications on soybean production and processing. The home-economists from various provinces and organizations met for training and a seminar. The Food Institutes of Kasetsart University played a major role through publications, technology transfer, demonstrations and seminars."

"Since the opening of the soybean campaign, we assume

that about 50 percent of the total population has received information about soybean. At least 10 percent of the population has started or increased soybean consumption, both industrial and home made products. This evaluation was carried out by the working group using stratified random sampling with a well-designed questionnaire.

“From general observation, soybean has become more popular than in the past. Urban people are now aware of soybean products and do not object to consuming soybean in their regular diet. Rural people, however, have very definite ideas about food and it is difficult to change their traditional food habits. The main target of our campaign was therefore to introduce soybean products into the daily food pattern of rural villagers.” Address: Div. of Crops Promotion, Dep. of Agriculture Extension, Bangkok, Thailand.

7723. Fruin, W. Mark. 1992. *The Japanese enterprise system: Competitive strategies and cooperative structures*. Oxford, England: Oxford University Press (At the Clarendon Press). viii + 397 p. Illust. Index. 25 cm. [5 soy ref]

• **Summary:** The appendix of this book contains tables (p. 329+) showing the 200 largest industrial firms in Japan in the years 1918 (Kikkoman was 80th, p. 331), 1930 (47th, p. 337), 1954 (126th, p. 346), 1973, and 1987. Kikkoman does not appear in the last two.

Letter (e-mail) from Mark Fruin. 2011. Dec. 20. “Kikkoman falls out of the largest 200 industrial firms in 1973 and 1987. It’s not so much that Kikkoman didn’t do well in those years as other industries and firms grew a lot faster by comparison. Its revenue base stayed relatively small—soy sauce, other soy foods, and various other endeavors that were not that large relative to the Toshibas, Hitachis, Hondas and Toyotas of the world.”

Among the 200 “largest industrial firms in Japan in 1918 and 1930, Noda Shoyu Company represents the only major Japanese corporation that became large on the basis of an indigenous technology [shoyu manufacture] and represents organizational and managerial continuity from the Tokugawa era” (p. 86).

A separate section (p. 108) titled “Noda Shoyu (Kikkoman)” notes that this company was one of the few successful rural enterprises; its manufactured products were packaged and branded at Noda, in rural Chiba prefecture, in the countryside. Although located a day’s sail from Tokyo in the late 1800s, Kikkoman evolved rapidly into a dynamic and thriving enterprise as its management created a cluster of related businesses to support its manufacturing activities. In 1900 Kikkoman established its own bank; in 1904 its own research and development laboratory; and in 1911 it helped to build a railroad line from the nearby town of Kashiwa [situated between Noda and Tokyo] through the town of Noda. “As soon as practical, during the 1910s and 1920s, hydraulic presses, steam boilers, conveyor belts, and transfer lines for bottling and canning were installed (p. 108).

Noda Shoyu / Kikkoman is also mentioned or discussed on pages 87 (Kikkoman was subjected to the longest labor strike in pre-World War II Japan {1927-28}; Fruin “posits its outbreak as a clash between traditional methods of labor organization and management and modern requirements for high-volume production and an attendant need for direct management of the production function”), 129, 154-55, 309 (local governments—such as that at Noda—were often unable to “muster adequate resources for social welfare and community benefits.” So Kikkoman “financed railroads, grammar schools, cultural centers, water works, fire departments and town halls in Noda for exactly these reasons”), 320, and 324. Address: Palo Alto, California.

7724. Iwata, Masakazu. 1992. *Planted in good soil: A history of the Issei in United States agriculture*. 2 vols. New York, NY: Peter Lang Publishing. American University Studies. Series IX. History. Vol. 58. [500* ref]

• **Summary:** Soybean production in the USA is not mentioned in this book, but in Vol. 1: Page 124. Saburôji Yoshimura of Ogden, Utah, recalls that for the \$6.00 a month that he and others of his work gang paid for food, they received only a limited amount of rice “along with *miso shiru* or soy bean paste soup and *kyabeji no tsukemono* or pickled cabbage.”

Page 205. In Vacaville, California, in the early 1900s, “the Issei obtained Japanese products from their fellow countrymen whose shops carried supplies such as rice, soy sauce, and other Oriental items.”

Page 297 notes that in California, as in the other Pacific Coast states, “Japanese farmers purchased American clothes almost exclusively, but their food was largely of foreign origin. Soy sauce, *sake* (rice wine) and other delicacies were imported from Japan. In later years many of these items were manufactured here and in Hawaii, but in 1910 it was reported that from 50 to 70 percent of the food consumed by the Japanese farmer was imported.”

Volume 1 of this book discusses in detail the Wakamatsu Tea and Silk Farm Colony, which was established in 1865 in Coloma in the Gold Country near Sacramento. They came with the intent of growing bamboo, tea plants, raising fish, etc. The colony lasted for only 12-18 months, then failed. In Vol. 1, the famous pioneering Wakamatsu Colony is mentioned on at least 12 pages including p. 36-43, 60-62, and 64.

In Vol. 2, miso is mentioned on p. 554 (In Washington state “*miso shiru*, or soy bean paste soup,” was enjoyed by Issei farmers for breakfast).

In Vol. 2, Chapter 17, titled “The Southwest—Violence in Arizona” includes a discussion of the Tadano family. In 1913, “an unforgettable year,” Arizona passed an Alien Land Law which prevented Japanese who were not born in the USA from owning land in Arizona (p. 676). However they could lease land or real property in the state for a

period of up to five years. In 1916, Issei Tadeshi Tadano, arrived in Arizona from California's Imperial Valley and grew cantaloupes under paper covers, which hastened their maturation (p. 677). The new method was soon used by other Issei farmers. In 1921 a revised Alien Land Law prevented Issei from both owning and leasing land in Arizona. A crisis took place in 1934 when White farmers took the law into their own hands and tried to drive all Japanese from the lands of the Salt River Valley. "In the early morning hours of September 13, six masked riders armed with machine guns and rifles raided a lettuce ranch operated by Magoichi Inouye, Truma Yamamoto, and Takeshi Tadano. In the Tadano situation, the raiders fired in the direction of Tadashi Tadano, the son of the rancher [Takeshi], who had been asleep in the field guarding an irrigation watergate to prevent the repetition of the flooding of the newly planted lettuce field by vandals [on Sept. 9, footnote 68]. At the first shot the son fell to the ground and feigned death. The gang excitedly started for their cars but did not leave the scene until they had pushed the youth's pickup truck into the Grand canal [footnote 69, refers to photo].

"After their departure, the son dashed back to his home and reported the details to his father who placed calls to the sheriff's department and the Japanese community leaders." A week after the Tadano shooting incident, Arizona night riders struck again at another farm in a yet another act of intimidation (p. 696-97). Not much was ever done by the Arizona authorities for the Japanese. Note: Eventually the Tadano family went into the business of making soy sauce.

In Vol. 2, a Glossary (p. 891-95) defines *Miso shiru* (p. 893) as "Soy bean paste soup."

At the end of Vol. 2 (p. 957-60) are three maps (with legend) of Japanese American farming settlements in the United States: (1) Western United States. (2) Central United States. (3) Eastern United States. For example, in Washington state there were communities in Seattle, Yakima, Moses Lake, and Spokane.

Note: This is the earliest English-language document seen (Aug. 2011) that uses the term "soy bean paste soup" to refer to miso soup. Address: 879 N. Vail Ave., Montebello, California 90640. Phone: 213-723-4389.

7725. Leneman, Leah. 1992. *The tofu cookbook*. Hammersmith, London, England: Thorsons—An imprint of HarperCollins Publishers. 127 p. Illust. Index. 24 cm.

• **Summary:** "These no-meat, no-dairy, cruelty-free recipes foster health and a healthy environment by replacing meat and dairy products in traditional recipes with tofu... and soy milk. From bouillabaisse and guacamole to lasagna, curries, and ice cream, here are delicious new takes on your favorite international recipes." The copyright page notes: "Many of these recipes previously appeared in *The International Tofu Cookery Book* and *Soya Foods Cookery*."

Contents: Introduction. Types of tofu. Other soya (soy)

foods: Soya milk, soya yogurt, soya mayonnaise, bean curd sticks or sheets, tempeh, soy sauce, miso, soya cheese (such as Veeze). Notes on recipes. Making tofu at home. 1. Soups and dips. Note: Ingredients for every recipe are given in both Imperial/Metric and American units. 2. Salads. 3. British- and American-style dishes. 4. Mexican-style dishes. 5. Mediterranean-style dishes. 6. Indian-style dishes. 7. Chinese- and other Far Eastern-style dishes. 8. Desserts. Recipe reference chart (for quick and easy recipes, recipes suitable for a single portion, and recipes for a dinner party).

Note: *Webster's Dictionary* defines bouillabaisse (pronounced bu-yuh-BAYZ, a term derived from the French and first used in 1855) as a highly seasoned fish stew made with at least two kinds of fish. See also: Potpourri. Address: 19 Leamington Terrace, Edinburgh EH10 4JP, Scotland.

7726. Sass, Lorna J. 1992. *An ecological kitchen: Healthy meals for you and the planet*. New York, NY: William Morrow and Company, Inc. xv + 492 p. Index. 26 cm. [35+* ref]

• **Summary:** This excellent vegetarian (actually vegan), ecological cookbook, proves that the most environmentally sound diet is also the healthiest and, for many, the most delicious and economical. It emphasizes whole grains, fruits and vegetables, focuses on unprocessed and minimally packaged foods, use of regional and seasonal foods, efficient menu planning, and creative recycling of leftovers. Delightful quotations relevant to the book's subject are scattered throughout.

The author's guiding principles for cooking ecologically are: "Eat a plant-based [vegan] diet; buy organic, regional, seasonal produce whenever possible; and use nontoxic products to keep your kitchen clean."

The chapter titled "Tofu and tempeh" (p. 217-31) contains basic information and many recipes. Other soy-related recipes include: Thai vegetable soup (with tofu, p. 39). Ten-ingredient lo mien (with tofu, p. 165-66). Triple bean maybe it's chili (p. 186-87). Black soybeans (p. 191-92; keep the skins on by adding salt). Curried mustard greens with tofu (p. 255). Chinese-style stir-fry of kale, onions, and marinated tofu (p. 258). Tahini-miso spread (p. 315). Sun-dried tomato dip (with tofu, p. 318). Brilliant beet dip (with tofu, p. 319). Onion upside-down cornbread (with tofu, p. 323-24). Tofu whip (like whipped cream or whip topping, p. 398).

The very fine chapter / glossary "Ingredients A to Z" (p. 399-468) includes: Aduki / azuki beans, agar, almond butter, almonds, amaranth, amasake (incl. koji), arame, barley malt syrup.

Black beans—fermented (salty black beans): "Black beans, fermented (Salty black beans): A little of this Chinese specialty—small black soybeans preserved in salt—goes a long way. About 1 tablespoon adds a deliciously complex flavor to stir-fries. Chop the beans finely to disperse their flavor. If

you like the taste but want to reduce the salt, soak the beans briefly in water before using. Fermented black beans last for about a year in a well-sealed jar under refrigeration.

“Bragg Liquid Aminos: This is a *very tasty* soy-sauce-like condiment made by extracting amino acids from organic soybeans. Its flavor is more winelike and complex than most soy sauces. It is salty, so sprinkle sparingly. (There is no added salt, but 125 milligrams of sodium per ½ teaspoon come from the natural sodium in the soybeans.)

“Unlike soy sauce, Bragg Liquid Aminos is not fermented, making it an ideal seasoning for those who suffer from yeast sensitivities. Delicious added to stir-fries or plain-cooked grains. It is readily available in health food stores.” Also in natural food stores.

Daikon, dulce, gomashio, hijicki / hizicki [sic, hijiki], job’s tears, kombu, kuzu (kudzu), kuzu kiri, lupins, miso, mochi, natto, nigari, nori, peanut butter, peanuts, quinoa, rice-brown, rice cakes, rice syrup, sea vegetables, tamari-roasted seeds, seitan (wheat gluten), sesame butter (tahini), sesame oil, sesame seeds, shoyu, soybeans, soybeans-black, soy cheese, soy flakes, soy flour, soyfoods, soy grits, soy ice cream, soy milk, soynuts, soy oil, soy powder (powdered soy milk), soysage, soy sauce, soy yogurt (fermented), tahini, tamari soy sauce, tempeh, tofu, umeboshi plums, wakame, wasabi, winged beans. Note: Also contains recipes for many of these glossary items.

A color portrait photo on the inside rear dust jacket shows Lorna Sass—with a brief biography; she is a culinary historian, cookbook author, and food writer. Address: Box 704, New York City, NY 10024.

7727. Titsingh, Isaac. 1992. *The private correspondence of Isaac Titsingh, Vol. 2 (1779-1812)*. Introduced and edited by Frank Lequin. Amsterdam, Netherlands: J.C. Giebon. Index. 24 cm. Series: Japonica Neerlandica vol. 4. [1 soy ref. Dut]
• Summary: Text chiefly in Dutch, with some correspondence in English. Soy [sauce] is mentioned only once in this book, in letter no. 221 of June 1785 (p. 544) (“*Een kast afgekookte soya op kannetjes*”).

7728. Toomay, Mindy; Hadler, Susan Geiskopf. 1992. *The best 125 meatless pasta dishes*. Rocklin, California: Prima Publishing. xvi + 318 p. Illust. Index. 22 cm.

• Summary: This vegetarian pasta cookbook contains information about tofu, tempeh, and miso, plus 7 tofu recipes, 2 tempeh recipes, and 2 miso recipes. Agé (puffy deep-fried tofu) is used in: Soba in broth with fried vegetables and agé. Soy sauce is used in various broth recipes.

7729. Toussaint-Samat, Maguelonne. 1992. *A history of food*. Translated from the French by Anthea Bell. Malden, Massachusetts, and Oxford, England: Blackwell Publishers Inc. xix + 801 p. Illust. Index. 23 cm. [200* ref]

• Summary: A fascinating book of vast scope. The author’s principal interest is in the medieval and Renaissance culture of Europe, in particular the domestic economy, food, and clothing. Thus the focus of the book is on Europe (especially France) and the Middle East. It also emphasizes the symbolism of foods.

Chapter 2, “The history of gathering,” contains a section titled “Soya: the most widely eaten plant in the world” (p. 51-56), which is long on myth and symbol, and short on historical accuracy. It briefly discusses the following: Soya milk, soya flour, miso, jiang, soya sauce, soya oil and meal, bean-sprouts, tofu, dried soya beans.

Interesting chapters include: The history of meat (p. 93+). The history of cereals (p. 125+). The history of oil (p. 205+). The history of bread and cakes (p. 223+). An essential food: The history of salt (p. 457+). Spice at any price (p. 480+, including The great trading companies). The lure of sugar (p. 552). The potato revolution (p. 711+). The assurance of dietetics (p. 755, including an excellent “Chronology of dietary progress” from 2 million B.C. to the present, with detailed information on food developments during the paleolithic, mesolithic, and neolithic periods of the Stone Age). Address: Historian, journalist, writer, France.

7730. Tropp, Barbara; Schreil, Arminda Asprer. 1992. *China Moon cookbook*. New York, NY: Workman Publishing. x + 518 p. Illust. (by Sandra Bruce). Index. 24 cm.

• Summary: China Moon Cafe is a small restaurant that Barbara opened in 1986 in downtown San Francisco in a 1930s art deco coffee shop on Post St. Barbara says she is primarily a cooking teacher but she is also one of the best writers in the world of food, and a superb interpreter of real Chinese food and ingredients to Westerners. Each recipe is made from scratch, in the traditional way, and comes with interesting (often lengthy) headnotes or sidebars.

Barbara prefers not to peel gingerroot but all of her chefs and sous-chefs insist that it be peeled—so it is (p. 8-9).

Ingredients for infusion: “Chinese fermented black beans should be moist and pliable to the touch. They should taste good, with a nice range of flavor in the aftertaste. My favorite brand is Pearl River Bridge, in a round yellow box. Don’t use beans that are hard and shriveled” (p. 14).

The index contains 17 entries for hoisin sauce, 7 for black bean(s) (Chinese fermented), 5 for black bean sauce, 4 for bean sauce (all soy-based), 1 for mushroom soy sauce, and none for tofu (although it is described on p. 508).

“Mushroom soy sauce—infused with dried black (shiitake) mushrooms is the flavorful star of the black soy sauce family” (p. 148).

Black beans: “Don’t wash ‘em! Black bean sauces are usually flat and murky affairs. A practice followed religiously by most all Chinese cooks is to wash off the salt and mash the beans.” Barbara does neither (p. 245).

Bean pastes: “All in the family: Hot bean paste, sweet

bean paste, and hoisin sauce are close culinary cousins. Soy bean- and wheat-based condiments all, they might easily have been one in ancient times. Regional distinctions and the march of modernity have given us three separate products with flavors that work beautifully in combination.” Barbara likes Koon Chun hoisin sauce and Szechwan brand hot and sweet bean pastes. They are made in Taiwan and are widely available (p. 308).

The “Glossary of special ingredients” (p. 501-08) includes descriptions of: Bean pastes (hot bean paste, sweet bean paste). Black soy sauce (Concentrated, made with molasses; her favorite is Pearl River Bridge. The English label reads “Soy, Superior Sauce.” “The Chinese name for black soy sauce is ‘old head soy,’ referring to the extra aging process that gives this soy its savor”). “Hoisin sauce: This brown, salty-sweet sauce has a fascinating history in China; it changes its name and style from region to region, being wheat-based in some areas and soybean-based in others.” She prefers Koon Chun brand. Salted black beans: They are fermented black soybeans. She prefers Pearl River Bridge brand packed in a cardboard box. Soy sauce: Her favorite brand is Pearl River Bridge; its label reads “Superior Soy.” “Tofu: This protein-rich white substance made from soybeans delights the Chinese and baffles Westerners.”

On the rear cover: “Barbara Tropp is the Julia Child of the Chinese Kitchen”—San Francisco Chronicle. Two color photos show Barbara Tropp, one on a motor scooter. And there is a brief biography Address: San Francisco.

7731. Velde, Paul van der; Bachofner, Rudolf. eds. 1992. *The Deshima diaries marginalia, 1700-1740*. Tokyo: Japan-Netherlands Institute. xxiii + 595 p. Illust. (some color). 27 cm. Series: Nichi-Ran Gakai gakujutsu sosho, No. 12.

• **Summary:** Translation of marginal notes from official diaries kept at the Dutch factory in Nagasaki. Dutch resident merchants lived from 1641 to 1860 on the artificial isle of Deshima in Nagasaki Bay; during this time they were the only European or Western country allowed to trade with Japan. After Japan opened its doors to Western trade in the 1850s, the Dutch lost their trade monopoly.

Soy [sauce] is mentioned only once, but not as an item of export from Japan, in an entry for 29 April 1724 (p. 287).

In the index there are many entries for saké (p. 586, 591) and seaweed (p. 586)—mostly as presents for Dutch officials.

None of the following are mentioned in the index:

Beans, mebos, miso, catchup, kecap, ketchup, ketjap, sauce, umeboshi. Address: Netherlands.

7732. Bell, Maryellen. 1993. Spring Farm will bring people from China to make soy sauce in Houston, Texas (Interview). *SoyaScan Notes*. Jan. 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** AmCal is the parent company of Spring Farm and Calco in Houston. Spring Farm is an Oriental company

that is starting a series of farms to grow Oriental vegetables in Houston. Spring Farm is in the process of bringing several soy sauce makers from China (PRC) to set up a company in Houston to make Chinese-style soy sauce. They plan to use defatted soybean meal. Address: Spring Farm, 10103 Fondren Rd. #555, Houston, Texas 77-96-4552.

7733. Yates, Ronald E. 1993. Wisconsin’s other brew—The joy of soy: How a Japanese sauce company found a happy home in Walworth, Wisconsin. *Chicago Tribune Magazine*. Jan. 31. p. 12-17. Sunday. Cover story.

• **Summary:** Gives a history of Kikkoman and tells how this major Japanese company ended up building a soy sauce plant in Walworth, Wisconsin (population 1,164). Back in 1615, in the Kansai plain region of Japan, the troops of Tokugawa Ieyasu, founder of Japan’s last great feudal shogunate or dynasty, have stormed the Osaka castle of rival warlord Toyotomi Hideyori and have put him—as well as his family and retainers—to the sword. Among those killed was the warrior husband of a woman named Maki Shige; she was also marked for death by the shogun. Using her wits and resources, she managed to evade her pursuers. Along with her children, she slipped out of Osaka, journeyed some 300 miles across the Kansai plane to the Kanto plain, and settled in the village of Noda, northeast of Japan’s capital at Edo (now Tokyo). Then Maki changed her name to Mogi and began a new life as a rice farmer. By 1630 she had learned the art of brewing shoyu, or Japanese-style soy sauce. “The widow Mogi’s soy sauce is especially coveted because of its quality.” It is to this widow that the Mogi family, which founded Kikkoman, traces its origins.

An important part of the story is how Yuzaburo Mogi, who graduated from Columbia University in 1961 with a degree in business administration, spearheaded Kikkoman’s efforts to build a factory in America; the plant was finished in June 1973, and by the end of its first year of operation it had produced 1.6 million gallons of soy sauce. Today, as Kikkoman prepares to celebrate its 20th anniversary in Walworth, the plant’s production has grown eightfold to 13 million gallons a year and Kikkoman now controls about 50% of the U.S. soy sauce market—ahead of its major rivals La Choy and Chun King.

Kikkoman is the world’s largest manufacturer of soy sauce. In Japan, Kikkoman has about 30% of the domestic soy sauce market—but here it must compete with some 2,500 other manufacturers.

Note: Before to joining the Chicago Tribune’s financial department, Ron Yates spent 6 years as the newspaper’s chief Asia correspondent, based in Tokyo.

7734. Potter, Michael. 1993. Re: A brief chronology of Eden Foods. Letter to William Shurtleff at Soyfoods Center, Feb. 14—in reply to inquiry. 2 p.

• **Summary:** William Shurtleff sent Michael Potter a

chronology of Eden Foods that he (Shurtleff) had compiled from various sources, and asked for Potter's comments, which follow. This letter is a follow-up to a letter written by Potter to Shurtleff on 1 March 1992.

"Eden Foods, Inc. was first incorporated as a non-profit corporation in the winter of 1967/1968, I believe. It was later (Bill Bolduc told me, in a manner that was not consistent with state law) reincorporated (after Ron Teegarden pulled out) as a regular corporation under the name Eden Organic Foods, Inc. This WAS done by Bill Bolduc in November of 1969.

"Mr. William Shurtleff, traditionally corporations do not define the date they were *founded* as the date they became 'officially' or legally 'incorporated.' Commonly, decades separate these two occurrences, sometimes centuries.

"These thoughts will loosely follow your 2-page 'chronology of key events.' Eden was buying and selling soyfoods, tamari and miso, for more than 2 years prior to Nov. 4, 1969.

"During the spring of 1970 I became a partner of Joyous Revival natural foods in Birmingham, Michigan. I developed a relationship with Bill Bolduc... [the Eden's store's manager], as we were both attempting the same things and respected the quality of the work each other was doing. Frequently Bill B. asked me to move to Ann Arbor.

"After a falling out with my partners in December 1970, I visited Bill and Judy [his wife] in January 1971 and was hired by Bill on the spot, at his home, in his kitchen. My first job was to help a failing new Eden retail outlet in downtown Detroit on the campus of Wayne State University. (I never lived in Detroit at the time. I lived in Walnut Lake 30 minutes north.) By late spring or early summer 1971, after closing this Eden store, my pregnant wife Carol and I moved to Ann Arbor where I assumed responsibility for the Eden Foods store at 211 South State St. It is of interest that Eden Foods' name had already been legally changed back to just Eden Foods, Inc., when I moved to Ann Arbor.

"During the winter of 1971/1972 I was given what amounted to 13.5% of the common stock of Eden Foods, Inc. The share holdings then broke down: Bill Bolduc and Tim Redmond owned the same number of shares, but Judy Bolduc owned a small number of shares so the Bolducs owned the largest block.

Mid-Summer, July 1973, Bill thought the company was going out of business and after I stepped into a near fist fight between Bill and Tim outside the warehouse we were sharing with Mid West Natural Foods; I told them 'that if they'd just quit fighting and leave things alone, all would be well.' Bill immediately offered to sell me all of his stock. I asked Bill how much he wanted for it. After a very brief pause he said "\$2,500." I told him that I'd try to get the money. We parted. Bill left and Tim and I went back to work. The next day I visited a friend named Ray Suber and asked him to help me purchase the stock. He said he would and to come back the

next day. I did and was given \$2,500 cash as a 'contribution to the natural foods movement.' With the \$2,500 I purchased all of Bill and Judy's Eden Foods, Inc. stock. Neither Bill nor Judy 'sold their stock back to the company.' They sold it to me for cash. They were glad to get out because they were convinced the company couldn't make it."

From a talk on 31 Oct. 1993: There was a 51% Tim Redmond / 49% Michael Potter share holding configuration in Eden Foods, but it lasted for less than a year. When Michael bought all of the Bolduc's stock, he owned the majority of Eden Foods' stock. But he realized that Tim Redmond's father might withdraw his \$10,000 if he knew Michael had majority ownership, and if that happened Eden would not be able to survive. So Michael immediately (as part of the transaction with the Bolducs) gave Tim enough of his stock so that Tim owned 51% and Michael owned 49%.

About 3 months later, Michael loaned about \$44,000 in cash to Eden Foods. This was money that Michael's father had entrusted to him. But Michael became uncomfortable having no control over something for which he was responsible—both the company and his relationship with his father. Michael discussed his feeling with Tim, and Tim agreed to give Michael equal ownership in exchange for Michael converting his \$44,000 loan into an investment in Eden Foods. Now neither partner could make a major decision without the other's agreement—a good situation for Eden Foods.

"In September 1973, at Royce Seeger's home, I received the unanimous recommendation of an employee steering committee and became Bill Bolduc's successor as president of the company. My first goal was to get us away from MidWest Natural Foods for moral and ethical reasons. I located a new facility in the process of being constructed and developed a relationship with the owner/builder, John Sheer. In the spring of 1974 we relocated to that 4601 Platt Road, Ann Arbor warehouse.

"During this period I was building and moving Eden's retail store to 330 Maynard St. in Ann Arbor. The move actually took place in the summer of 1973. It included a large store, a large fast food (chapati sandwiches, etc.) deli, and a natural foods bakery named Sun Bakery, that relocated itself from Kalamazoo, Michigan. These three operations were under one roof in a 6,000 square foot old printing plant at the University of Michigan's campus, leased by Eden Foods, Inc. This operation paid off all Eden's debt and paid for the new warehouse, computer, offices, trucks and equipment. The wholesale operation was carried by the retail until late 1974 after trucks were put out on regular routes throughout the Mid-west.

In October 1974 I made my first of eleven trips to the People's Republic of China (Eden made a total of 13 trips between Oct. 1974 and Nov. 1979) and stopped in Japan on the way back to visit Yuko Okada at the Muso Company. Prior to 1974 Eden Foods imported shipments from Mr.

Kazama of the Mitoku Co. in Japan. After my visit to Muso, seeing their educational activities, their macrobiotic center activities, etc., I decided to import Japanese foods exclusively from Muso. Tim Redmond had cultivated the Mitoku connection and initiated our first Japanese imports.

“Spring 1979 Cliff Adler is hired by myself to do sales work for Eden in Chicago. During that summer he lends Eden Foods \$100,000, for which he is paid bank interest rates.

“After the Nov. 27, 1979 warehouse fire Cliff converted his \$100,000 to stock in February 1980 as Tim Redmond left, certain that Eden was finished. Tim’s stock was redeemed with Eden giving him title to our operations at 330 Maynard St. In one transaction Tim was bought out by the company, Cliff and I became 34% shareholders, 10% was sold to Frank Dietrich of Natural Foods, Inc. (Toledo, Ohio) for \$100,000 and the following percentages of Eden Foods’ common stock were given to Eden managers shortly after we laid off 35 people: Ronnie Roller 5%, Michael Gordon 4%, Mark Cook 4%, Kathy Knor 3%, Bill Swaney 3%, and Bob Duha 3%. This free stock was limited to book value and had to be sold to Eden Foods whenever the person left the company regardless of the reason for leaving. It could not be sold another way.

“In early 1984 when Mike Gordon left Eden his stock was awarded to Michael Potter as a bonus by the Board of Directors... to be continued.” Address: Chairman, Eden Foods, Inc., 701 Tecumseh Rd., Clinton, Michigan 49236. Phone: 517-456-7424.

• **Summary:** Beta-glucosidases are enzymes in soybeans. Address: Research & Development Div. of Kikkoman Corp., 399 Noda, Noda City, Chiba prefecture 278, Japan.

7737. Bates, Dorothy R.; Wingate, Colby. 1993. Cooking with gluten and seitan. Summertown, Tennessee: The Book Publishing Co. 128 p. March. Illust. by Barbara McNew and Thomas Johns. Index. 22 cm.

• **Summary:** This is vegan cookbook. Seitan is gluten cooked in a soy sauce broth. This book calls vital wheat gluten “instant gluten flour.” It has already had the starch and bran removed and needs only to be mixed with seasoning and liquid. Miso is used as a seasoning in several recipes, and “tamari” in many seitan seasoning sauces.

Contents: Introduction. A word on nutrition. Making gluten. Making seitan. Ingredients. Recipes (a nutritional analysis is given for each recipe): Appetizers, soups, salads, American, Asian, Continental, Mexican, Italian. Sources for ingredients. Address: Summertown, Tennessee.

7738. **Product Name:** Smoked Tofu [Sweet Amilla, or Hot Obsession]. Renamed Sweet and Hot Teriyaki, respectively, in 2002.

Manufacturer’s Name: North Coast Distributors.

Manufacturer’s Address: 2655 Cloverdale, Concord, California. Phone: 510-798-4393 or 510-944-0599.

Date of Introduction: 1993. March.

Wt/Vol., Packaging, Price: 6 oz or 16 oz plastic tub. Wholesales for \$1.80 or \$4.75 respectively (3/95, California).

How Stored: Refrigerated.

New Product–Documentation: Price list from Natural Products Expo West at Anaheim, California. 1995. March. Printed black orange. Talk with Hanan Onn. 1995. March 22. These two products were launched in about March 1993.

7739. Pinault, Pascal. 1993. Re: Tama–France’s best importer of Japanese natural foods. Letter to William Shurtleff at Soyfoods Center, April 27. 5 p.

• **Summary:** Tama is located at 883, rue de Bernau, 94500 Champsigny / Marne, France. Phone: (1) 49-83-79-94. Fax: (1) 47-06-37-85. Tama traces its origins to the 1960s when it was part of a restaurant, Le Bol en Bois, the first vegetarian place in Paris. This restaurant (at 35, 40 Rue Pascal, 75013, Paris) now specializes in macrobiotic cooking. They added a health food store and a “new age” book shop.

“Tama distributes Mitoku products and excellent miso, soy sauces, amasaké, kuzu, Japanese seaweeds, mochi, etc.

They have an excellent list of books concerning natural foods and cooking. They print their own brochures about tofu, seaweeds, and others. Tama has a subsidiary branch named Tofu-Daizou which makes the best tofu in France, as far as I know." Address: "Caplet," 97226 Morne Vert, Martinique, French West Indies 0033. Phone: 596 55-56-57.

7740. Herian, Anne M.; Taylor, S.L.; Bush, R.K. 1993. Allergenic reactivity of various soybean products as determined by RAST inhibition. *J. of Food Science* 58(2):385-88. March/April. [16 ref]

• **Summary:** RAST stands for "radioallergosorbent test." Soybean allergy is a common childhood food allergy, although it is less common than allergies to cow's milk, eggs and peanuts. Food allergies are generally more common in children than in adults. In this study of atopic adult patients, using RAST inhibition as a measure, the allergenicity of a variety of soy products was compared to that of whole soybeans. Results indicated that, when expressed on a per protein basis, although extracts of tofu, miso, tempeh, and fermented soy sauce were allergenic, they were as little as one tenth as allergenic as extracts of whole soybeans. Address: 1. Dep. of Food and Research Inst., Dep. of Food Microbiology and Toxicology, Univ. of Wisconsin, Madison, Wisconsin 53706; 2. Dep. of Food Science and Technology and Food Processing Center, Univ. of Nebraska, Lincoln, Nebraska 68583-0919, address inquiries to second author.

7741. *SoyaScan Notes*. 1993. New Trend: Specialized manufacturers of tofu and tempeh become manufacturers of many types of soyfoods (Overview). May 22. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The first soyfoods manufacturer in America to make a wide variety of different types of soyfoods was White Wave of Boulder, Colorado. They began as a tofu manufacturer in Sept. 1977, but by 1978 had introduced Soy Sannies (sandwiches with miso-tahini spread) and Soymilk (in 3 flavors). In 1979 they launched Soy Tempeh, Polar Bean (a soymilk-based soy ice cream, which they also made from Tofu Today / Tofruzen starting in 1985), Soya Rice Tempeh, Vegetarian Soysage, Tamaried Nuts, and a host of deli-type ready-to-serve tofu products such as Missing Egg Salad, Tofu Cheesecake, Tofu Cinnamon Rolls, etc. In Jan. 1989 White Wave began its move into dairylike products in a big way with Soy A Melt (a soy cheese with casein) followed in May 1991 with White Wave Dairyless (a soy yogurt in 5 flavors and the company's most successful product ever). New flavors of soy yogurt were introduced in 1992 and 1993. Note: White Wave was also the first post-1975 soyfoods company in America to grow by acquiring other companies—Soyfoods Unlimited (a tempeh manufacturer) in Dec. 1986; and Laudisio Veggie Life, a maker of veggie burgers, in March 1993.

Lightlife Foods in Greenfield, Massachusetts (named

The Tempeh Works before April 1987) started as a tempeh manufacturer in Sept. 1979. In May 1984 they started to make Weissman's Original Tofu Sausage for John Weissman of the Vegetable Protein Co. In Sept. 1985 they launched Lightlife Meatless Tofu Pups (meatless hot dogs), and in Oct. 1987 they launched Lightlife Party Pups (meatless frankfurters—cocktail size Tofu Pups; Renamed Tofu Party Pups by Feb. 1988). Today Lightlife makes a wide range of tempeh and tofu products.

Sharon's Finest in Santa Rosa, California (named Brightsong Tofu from June 1978 to June 1980; Redwood Valley Soyfoods Unlimited until June 1982; Brightsong Light Foods until June 1987; Rose International until 1990) started as a tofu manufacturer in June 1978. By Aug. 1980 they were making and selling soymilk. Their diversification began in 1984 with Mix Plus+ (a liquid mix to make tofu frozen desserts) and LeTofu (non-dairy soy ice cream in hard pack and soft serve). Related ice cream products followed. In early 1986 Richard Rose reformulated Soy-O, a soymilk yogurt for Brown Cow West. In May 1986 the company launched Fruit D'Lite (a fruit-sweetened sorbet/mousse liquid soft serve mix) in 4 flavors using isolated soy protein as the soy ingredient. The move into soy cheese began in June 1986 with Mozzarella Style Tofu-Rella (an organic tofu-based cheese analog with casein). In July 1987 the company launched Le Yogurt (a dairy-based soft-serve frozen yogurt dry mix). In Jan. 1992 they launched Heart's D'Lite (a fat-free cheese alternative in various flavors) with organic tofu and casein and tofu as the main ingredients. By 1992 Sharon's Finest was primarily a marketer of soy cheeses; they sold their cheese to many other food companies and even exported them to the UK.

7742. Library of Congress, Subject Cataloging Div., Processing Services. 1993. Library of Congress subject headings. 16th edition. Washington, DC: Cataloging Distribution Service, Library of Congress. 4 volumes.

• **Summary:** For the basic idea, words and LC call numbers see the 12th edition (1989). Address: Washington, DC.

7743. **Product Name:** Seitan: Traditionally Seasoned Wheat Gluten.

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

Date of Introduction: 1993. May.

Wt/Vol., Packaging, Price: 8 oz packed in water in molded plastic tray with heat-sealed, peel-off plastic film lid.

How Stored: Refrigerated.

New Product—Documentation: Talk with Lon Stromnes. 1993. Feb. 9. This product will be launched at the Natural Products West Expo in Anaheim this month. The name has not yet been determined. White Wave aims to be a major nationwide player in the seitan industry. The product will

be introduced packaged in a tofu tub, with a broth and a beautiful label. White Wave will make the seitan itself in Boulder. They will start with one flavor, then expand the line into meatless seitan pork chops, burgers, etc.

Talk with Lon Stromnes. 1993. April 14. A mock-up of this product appeared at the Anaheim show, but the product will probably not be on the market until about mid-May. Label brought by Steve Demos of White Wave. 1993. July 31. 4½ by 5¼ inches. Green, dark blue, brown, and white on turquoise. Illustration of an open-sided Japanese hut in front of a green mountain, with a moon in the upper left corner. "Sauté with ginger and tamari."

Ad (1/8 page, black-and-white) in *Natural Foods Merchandiser*. 1993. Oct. p. 22. "Devilishly good." At the bottom of the ad is a line that reads: "Traditionally seasoned 'Wheat Meat.'" In the lower right hand corner is a Vegan certification symbol and a Star K kosher sign.

7744. **Product Name:** Veggie Life Burger.

Manufacturer's Name: White Wave, Inc.

Manufacturer's Address: 6123 E. Arapahoe Rd., Boulder, CO 80303. Phone: 303-443-3470.

Date of Introduction: 1993. May.

Ingredients: Cooked rice (brown rice, water), tofu (water, soybeans, gypsum, nigari (magnesium chloride)), wheat gluten, soy sauce (water, soybeans*, whole wheat, salt), green peppers, mushrooms, onions, carrots, sunflower seeds, oat flour, sesame seeds, granulated garlic. * = Soybeans grown and processed in accordance with the California Organic Foods Act of 1990.

Wt/Vol., Packaging, Price: 5 oz. (142 gm) vacuum pack.

How Stored: Refrigerated or frozen.

Nutrition: Per 71 gm. patty: Calories 110, protein 5 gm, carbohydrate 16 gm, fat 3 gm, cholesterol 0 mg, sodium 210 mg.

New Product–Documentation: Talk with Steve Demos, president of White Wave. 1993. May 22. On 15 May 1993 the burger hit the market with a new White Wave label that reads: "White Wave Veggie Life Burger." The retail product consists of 2 patties vacuum packed (2.5 oz each), and the 3.5 ounce for foodservice.

Label sent by Leonardo Laudisio. 1993. June 15. 4 by 4.5 inches. Self adhesive. Red, black, orange, yellow, blue and white. "No meat. No eggs. No dairy."

White Wave news release. 1996. Feb. "White Wave beefs up its vegetarian burger line. Vegetarian cuisine company launches new Prime Burger, Chick'n Burger, and the new Veggie Life Burger."

Label sent by Paul Chasnoff of White Wave. 1996. May 2. 5.5 by 4 by 3/4 inch. Paperboard sleeve. Dark green, green, brown, tan, and beige. Color photo of the burger on a little lettuce, topped with a sliced pickles, relish, and a bun. The product name is now: "VeggieLife: Seasoned Grain & Vegetable Patty." The ingredients in this product are very

similar to those in the original May 1993 product, except that the tofu is organic. The weight is now 6 ounces instead of 5. "Cholesterol free."

7745. Rekers, Ellen. 1993. Re: Gist-brocades n.v., soy sauce manufacturer in The Netherlands. Letter (fax) to William Shurtleff at Soyfoods Center, June 10. 1 p.

• **Summary:** Gist-brocades is one of the largest producers of soy sauce in Holland. "This company is trying to orient itself on the world market of soy sauce."

Note: Several days earlier, Soyfoods Center received a letter (fax) from Annemarie Dill of the Market Intelligence Group, Gist-brocades n.v., Delft, Netherlands, asking about information on the world market for soy protein isolates. Address: Royal Netherlands Embassy, Office of the Agricultural Counselor, 4200 Linnean Ave., N.W., Washington, DC, 20008. Phone: 202-244-5300.

7746. Weiner, Michael. 1993. New developments with Amano and Yamashita (Interview). *SoyaScan Notes*. June 18. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Michael works as a consultant for Peter Joe of Sunrise Market Ltd. and with Amano Foods. He used to consult with Mandarin Enterprises in British Columbia. Now his main work is as a broker, representing various U.S. companies such as Vitasoy, Knudsen, Santa Cruz, etc. Amano still makes all of Westbrae's organic miso. Amano is trying to construct a 60,000 square foot plant. They had a joint venture with Yamashita but it fell apart. Now Yamashita is constructing their own 60,000 square foot soy sauce plant in Oregon. The ground breaking will take place in a couple of weeks. Michael does not feel that this will be much of a threat to Amano, which plans to sell a lot of Amano products in supermarkets. The market is big and growing rapidly. Soyfoods now are given large amounts of shelf space (8-16 linear feet) in the produce section of all supermarkets in western Canada (British Columbia, Alberta, and Manitoba). A major reason for this is that Mandarin and Sunrise have an excellent relationship with the people in charge of the produce section in western Canadian supermarkets. Initially Michael helped to establish some of these relationships; these companies got a few facings for their tofu. Then Mandarin added their tofu burgers. Then Sunrise added Yves Wieners and soy cheese. The products sold, which is proof that exposure will work. Michael was involved in trying to make the same thing happen in Ontario with the Loblaws chain, and in Quebec, but they were never allowed to give the program a try—not even in 1-2 stores.

Safeway supermarkets are so sold on soyfoods that they have developed special open-front, vertical, refrigerated "Tofu Products" cases that are placed adjacent to the produce case, but have a lower temperature. They are quite large and contain everything from soy drinks to tofu, soy cheese to meatless hot dogs. Soyfoods are very widely available on

Vancouver Island.

Sunrise and Michael jointly import Mori-Nu tofu into Canada from Japan. Also Sunrise distributes some juice products for which Michael is the broker. Mori-Nu does not sell well in supermarkets because it's retail price is too high. Address: President, New Age Marketing, P.O. Box 39590, White Rock, BC, V4A 9P3, Canada. Phone: 604-538-0127.

7747. Nagayama, Hisao; Tokue, Akihiko. 1993. The naked kitchen: Shōyu. *Look Japan (Tokyo)* 39(447):24-25. June.

• **Summary:** Color photographs of 4 types of shoyu in shallow plates, each with a pattern on the bottom, show that shiro shoyu is the lightest in color, followed by usukuchi shoyu, koikuchi shoyu, and finally tamari (the darkest). Usukuchi, popular in the Kyoto area, is salty as well as light. "Among the more celebrated local varieties is Nagoya's shiroshōyu, a nearly transparent liquid whose slightly sweet taste sets it apart." No sashimi is complete without shoyu.

7748. **Product Name:** Blue Mountain Country Farm Tempeh, and Tempeh Burgers.

Manufacturer's Name: Naturama.

Manufacturer's Address: 84 Kloof St., Gardens, Cape Town 8000, South Africa.

Date of Introduction: 1993. June.

Ingredients: Tempeh: soybeans, tempeh starter. Burgers: Soybeans, tempeh starter, tamari, 100% pure apple juice, virgin olive oil.

Wt/Vol., Packaging, Price: Tempeh: 300 gm. Tempeh Burgers: 200 gm.

How Stored: Frozen.

New Product–Documentation: Letter from Michael Tidd, founder and owner of Naturama. 1993. July 25. "I have just begun a small-scale tempeh shop here in South Africa and I am just about to start some Amazake experiments." By using your "Book of Tempeh" "I have been able to start selling tempeh and tempeh burgers on the local market with increasing success." Letter and Labels sent by Michael Tidd. 1993. Aug. 12. He began producing tempeh and tempeh burgers on 28 June 1993. Concerning soyfoods companies in South Africa, "there are only a couple of home kitchen size tofu makers in so far as I can see whom I shall try to locate so as to send you their particulars. I think due to various reasons the wholefood movement has definitely been slow off the mark here compared to the U.S. and Europe, but nonetheless its only a matter of time before it spirals upwards."

Both tempeh Labels. 3.75 by 5.5 inches. Black ink on white paper (photocopied). Tempeh serving suggestion: "Indonesian Fried Tempeh: Thaw tempeh, soak pieces of fresh tempeh in brine (4 tsp. salt in 4 cups water) for 20 minutes. Pan fry in oil or margarine or deep fry till golden brown. Try it topped with sauce, baked on pizza or in sandwiches."

Tempeh burgers serving suggestion: "Thaw burgers then either pan fry for 3-4 minutes each side or grill for 2 minutes each side. Serve in a wheat-free roll with lettuce, tomato, and pickle."

Letter from Michael Tidd. 1994. Nov. 11. He "lived for a couple of years in South Africa until April 1994." He sold his business, Country Farm Foods, which was making tempeh and amazake in South Africa, to Bobby McLean, and he is now living in Reading, England. "I am about to have a go here in England."

Talk with Michael Tidd, who calls from Reading, England. He will soon start making and selling tempeh as Tidd's Tempeh.

7749. **Product Name:** Tofu Jerky [Spicy, or Mild].

Manufacturer's Name: Cedar Springs Naturals.

Manufacturer's Address: Health Zone of Temecula, 27468 Ynez Rd., Suite B-7, Temecula, CA 92590. Phone: 909-694-5488.

Date of Introduction: 1993. July.

Ingredients: Tofu (made from whole soybeans), 100% natural soy sauce (made from sea salt), organic honey, and nature's finest herbs and spices.

How Stored: Shelf stable.

New Product–Documentation: Talk with (call from) Donna Cochran. 1993. July 8. She is looking for a source of tofu. She wants to make tofu jerky. Talk with (call from) Donna Cochran. 1993. July 17. This product was launched commercially on 1 July 1993. She would like to send Soyfoods Center a free sample in exchange for free evaluation and consultation. Product with Label (2 flavors) sent by Michael Molver and Donna. Home address: P.O. Box 128, Winchester, California 92596. Phone: 909-926-9716. 4.25 by 5.25 folded in half over top of plastic bag. Black on beige or pink. A large illustration (line drawing) shows cedar trees growing in front of mountains and clouds. Front panel: "No beef. All natural. High protein. Low fat. No animal products. No preservatives. No cholesterol. No wheat. A vegetarian snack."

7750. Executive Committee Secretariat. 1993. The Roots of Biotechnology in Monsoon Asia: The Third Asian Symposium on Non-Salted Soybean Fermentation and International Soybean Food Fair. Akita Cultural Center, Akita City, Japan: 4-6 June 1994 (Leaflet). Akita, Japan. 2 p. July.

• **Summary:** The executive committee for this event is: Chair: Prof. Tadao Watanabe. Vice-Chair: Prof. Fumio Yamauchi. Indonesia Advisor: Dr. Darwin Karyadi. United Nations University (UNU) Food and Nutrition Programme Advisor: Dr. Abraham Besrat.

The symposium hopes to focus on South-South cooperation for technical transfer of soybean technologies (koji, tempe, natto) to Africa in order to alleviate an

impending protein crisis beyond the year 2000.

Program outline: Part I: International Soybean Food Fair—Industrial/commercial exhibition and cooking demonstration of ethnic cuisine using soybean products. Part II: Public Symposium—World soybean overview with perspectives for international technical cooperation in Africa. Part III: The Third Asian Symposium on Non-Salted Soybean Fermentation. Session 1. Koji for fermented soybean (Kikkoman, Nagano Miso Institute, China, Korea, Akita). Session 2. Natto in Asia—Microbiology, enzymology, health-medical studies. Kinema of Nepal, Tuanao [Thua-nao] of northern Nepal, Bhutan. Session 3. Tempe (Overview by Dr. Darwin Karyadi, contributions from Indonesia, Germany, USA, Japan and others—on microbiology, biochemistry, nutrition, physiology, medical studies, cooking, and industrial development). Part IV: The Role of Soybeans in Africa—The Perspective beyond 2000 (organized in cooperation with UNU Food and Nutrition Program). Sessions: Agriculture of Sub-Saharan Africa and soybean development (World Bank, IITA, JICA). Tofu technology adapted to West Africa (Dr. Nakayama, IITA). Indigenous fermented legumes in West Africa. Introduction of soy into Sub-Saharan African diet. Achievements of UNU Tempe Training Program (Indonesia/UNU; with Poster presentation of UNU funded research). Proposal on South-South cooperation.

Technical tours will be organized from three participating countries: Indonesia, USA, Germany. Address: c/o Akita International Assoc., Aidex Building 8th floor, 2-1-60 Sanno, Akita City, Japan 010. Phone: 0188-64-1181.

7751. **Product Name:** [Seitan].

Foreign Name: Seitan.

Manufacturer's Name: Izvor. Then Biolosk Kmetija Trampus (Trampus Organic Farm) from July 1994.

Manufacturer's Address: Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: (386) 068 59 481.

Date of Introduction: 1993. August.

Ingredients: Incl. wheat.

Wt/Vol., Packaging, Price: 250 gm plastic pouches.

New Product—Documentation: Ad (full-page color) on rear cover of *Bio Novice* (Bio News, Ljubljana, Slovenia). 1994. Oct. No. 14. This attractive ad for seitan shows an inset photo of a field of wheat below a blue sky with billowing clouds. The background is a photo of dark brown of seitan. "Ingredients: Wheat gluten from organically grown wheat, tamari, and kombu (a sea vegetable). Contains no cholesterol. Weight: 250 gm. Shelf life: 15 days refrigerated at 1-5°C. Manufacturer: Trampus Organic Farm, Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: 068 59 481. Distributor: Izvor d.o.o., Dolenjska cesta 13/1, 61108 Ljubljana. Phone and fax: 061 1272 649.

Letter (fax) from Jan Krizstan. 1995. April 28. "I made this ad using an enlarged photo and the text from our original

seitan label (which was 10 by 7 cm) and a color scan of seitan as the background photo."

Talk with, then letter from Jan. Krizstan. 1995. March 1 (which see). "Now (at the end of February 1995) we are making about 50 kg of seitan per week by hand. We sell it in some 20 healthy food shops all over Slovenia. It's packed in polyethylene (PE) plastic pouches. We put ¼ kg (4 pieces dimensions 8 by 12 cm) of seitan into each bag."

Letter (fax) from Jan Krizstan and Mirko Trampus. 1995. April 28.

Jan first made seitan in August 1993 on a very small scale and by hand at his home kitchen. "It was sold 'wild' on the market—only in healthy food shops in Ljubljana, whose owners dared to sell it without legal permission. 'Wild' because Mirko and I didn't have a kitchen for its legal production at that time yet. It was made of Mirko's high quality organic wheat and had a label with very brief information on the PE [polyethylene] package, but no address of the manufacturer. Customers liked it very much because it was soft and had a mild flavor. It was cooked in shoyu/kombu broth. Then we stopped production for some time because it became too dangerous to play games with sanitary inspection. We started making it again in March 1994. From March to June 1994 we sold seitan under my small private enterprise Izvor d.o.o. (The Source Ltd.). My company still existed but from the very beginning of July 1994 we started to sell seitan under Biolosk Kmetija Trampus (Trampus Organic Farm)—this time legally, because Mirko had obtained permission to produce seitan as a side-activity to his farming."

7752. Obis, Mariclaire Barrett. 1993. Take another look at soyfoods. *Vegetarian Times*. Aug. p. 54-56, 58, 60, 62, 64, 66. [8 ref]

• **Summary:** A good introduction to soyfoods including whole dry soybeans, fresh green soybeans, soy flour and grits, soy sauce, soy oil, textured vegetable protein, soymilk, okara, soy yogurt and cheese, tofu, tempeh, and miso. Address: Contributing editor, *Vegetarian Times*.

7753. Hachmeister, Kathleen A.; Fung, Daniel Yee-Chak. 1993. Tempeh: A mold-modified indigenous fermented food made from soybeans and/or cereal grains. *Critical Reviews in Microbiology* 19(3):137-88. [185 ref]

• **Summary:** An excellent review of the literature. Contents: Introduction. Mold-modified indigenous fermented foods: Miso, shoyu (soy sauce), hamanatto, sufu, fermented rice (sierra rice), tapé (lao-chao), ang-kak, ogi, tempeh, ontjom (oncom, lontjom), bongkreng (tempeh bongkreng), kenima. Processing developments in legume tempeh manufacture: Traditional tempeh fermentation, industrial production of tempeh, methods of preparation (cleaning, dehulling, hydration and acid fermentation, partial cooking, draining, cooling, and surface drying, inoculation,

fermentation containers, incubation, harvesting, storage, and preservation, uses and preparation of tempeh). Organoleptic properties of tempeh. Microbiological aspects of legume tempeh: Microbial ecology, traditional and modern soaking methods, effect of soaking, acidification, and initial bean pH, effect of boiling prior to inoculation, effect of *Klebsiella* and *Enterobacter*, effect of lactic acid bacteria and yeasts, microbiological safety and quality, heating prior to consumption. Nutritional quality of legume tempeh. Chemical and biochemical changes in legume tempeh: Changes in protein and amino acids, changes in carbohydrates, changes in lipids, antioxidant potential, changes in minerals, changes in vitamins. Antinutritional factors associated with legumes: Flatulence-producing factors, protease inhibitors, tannins, phytic acid, hemagglutinins, other antinutritional factors. Cereal grain tempeh—practical applications: Background information, materials and methods, results and discussion, conclusions and future developments. Summary. References. Address: Dep. of Animal Sciences and Industry, Kansas State Univ., Manhattan, KS 66506.

7754. Shurtleff, William; Aoyagi, Akiko. comps. 1993. Bibliography of koji—grains and/or soybeans cultured with *Aspergillus oryzae*: 535 references from 700 B.C. to 1993, extensively annotated. Lafayette, California: Soyfoods Center. 151 p. Subject/geographical index. Author/company index. Language index. Printed Sept. 5. 28 cm. [535 ref]
• Summary: This is the most comprehensive bibliography ever published about koji. It has been compiled one record at a time over a period of 18 years, in an attempt to document the history of this subject. It is also the single most current and useful source of information on this subject available today, since 59% of all records contain a summary/abstract averaging 185 words in length.

This is one of more than 40 bibliographies on soybeans and soyfoods being compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyfoods Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features: 25 different document types, both published and unpublished; every known publication on the subject in every language—including 242 in Japanese, 226 in English (plus 75 with an English summary), 33 in German, 11 in Chinese, etc.; 16 original Soyfoods Center interviews and overviews never before published. Thus, it is a powerful tool for understanding the development of koji and related products from their earliest beginnings to the present.

The bibliographic records in this book include 478 published documents and 28 unpublished archival documents. Each contains (in addition to the typical author, date, title, volume and pages information) the author's address, number of references cited, original title of all non-English publications together with an English translation of

the title, month and issue of publication, and the first author's first name (if given).

The book also includes details on 33 commercial koji products, including the product name, date of introduction, manufacturer's name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to make best use of this book, a complete subject and geographical index, an author/company index, a language index, and a bibliometric analysis of the composition of the book (by decade, document type, language, leading periodicals or patents, leading countries, states, and related subjects, plus a histogram by year) are also included. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

7755. White Wave, Inc. 1993. White Wave soyfoods food service product list (Leaflet). Boulder, Colorado. 1 p. Single sided. 28 cm.

• Summary: Lists six categories of products: (1) Tofu: Vacuum pack organic hard style tofu (2/5# pouches). Meatless tofu steaks (2/4# pouches).

(2) Dairyless Soy Yogurt: Lemon kiwi (6/2# tubs). Organic plain quarts (6/2# tubs).

(3) Soy A Melt Soy Cheese: Cheddar style (4/7.25# loaves). Mozzarella style (4/7.25# loaves). Monterey jack style (4/7.25# loaves). Garlic herb style (4/7.25# loaves).

(4) Meat Substitutes: Meatless healthy franks (10# cases). Meatless healthy bologna (10# cases). Vegetarian sloppy joe (19# buckets). Traditionally seasoned seitan (2/6# pouches). Diced traditionally seasoned seitan (2/6# pouches).

(5) Veggie burgers: Tempeh burger (60/3 oz. cases). Teriyaki tempeh burger (60/3 oz. cases). Veggie life burger (48/3.5 oz. cases). Lemon broil tempeh (90/2 oz. cases). Tempeh cutlet (60/3 oz. cases).

(6) Tempeh: Original soy tempeh (20/8 oz. packs). Address: 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

7756. White Wave, Inc. 1993. White Wave soyfoods retail product list (Leaflet). Boulder, Colorado. 1 p. Single sided. 28 cm.

• Summary: Lists six categories of products. * = Also available in food service pack: (1) Tofu: Reduced fat organic tofu. Organic tofu*. Snack'n savory tofu. Meatless tofu steaks*. Spicy szechuan stir fry. Tofu in garlic sauce stir fry.

(2) Dairyless Soy Yogurt: Raspberry. Strawberry. Blueberry. Peach. Apricot mango. Lemon kiwi*. Vanilla. Organic plain quarts*.

(3) Soy A Melt Soy Cheese: Cheddar style*. Mozzarella style*. Monterey jack style*. Garlic herb style*. Mixed

variety case. Fat free cheddar style. Fat free Mozzarella style. American soy singles. Mozzarella soy singles. (4) Meat Substitutes: Meatless healthy franks*. Jumbo meatless healthy franks*. Meatless healthy links. Meatless healthy bologna*. Meatless healthy bacon. Vegetarian sloppy joe*. Vegetarian chili. Tempeh barbecue. Traditionally seasoned seitan*.

(5) Veggie burgers: Tempeh burger*. Teriyaki tempeh burger*. Veggie life burger*. Lemon broil tempeh*. Tempeh cutlet*.

(6) Tempeh: Original soy tempeh*. Soy rice tempeh. 5-grain tempeh. Wild rice tempeh. Address: 1990 North 57th Court, Boulder, Colorado 80301. Phone: 303-443-3470.

7757. Austin, Ruth; Miller, Carolyn. 1993. Hercules Incorporated and HVP (Interview). *SoyaScan Notes*. Oct. 5. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Hercules Incorporated acquired the plant at 79 E. State St., Harbor Beach, Michigan 48441, and they manufactured HVP there for many years. They sold their HVP operations in Aug. 1990 to Champlain Industries Inc. (31 Styertowne Rd., Clifton, New Jersey 07012. Contact Joe Hresko. Phone: 201-778-4900). The plant is still in Harbor Beach and most of the HVP are still manufactured there, but orders should be placed with Clifton, New Jersey. The company also makes autolyzed yeast products in Clifton, New Jersey. Champlain Industries is a Canadian-owned company. The parent company is Champlain Industries Ltd. with headquarters at Cornwall, Mississauga, Ontario, Canada.

Carolyn Miller, who works for Hercules, coordinated the writing of a history of the company, which began on 1 Jan. 1913 as a manufacturer of explosives. It was created as a result of a divestiture by the Du Pont Co. The book was actually written by business historians. Address: Hercules Incorporated, Hercules Plaza, Wilmington, Delaware 19894. Phone: 302-594-5000.

7758. Tenbusch, Jim. 1993. Huron Milling Company's work with HVP (hydrolyzed vegetable proteins) and wheat gluten (Interview). *SoyaScan Notes*. Oct. 12. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jim has worked at Huron for about 20 years and is now plant manager. As far as he knows, no history of the company has ever been written. For early company history, talk with Robert Brobst, who was plant manager for about 40 years; he retired about 15 years ago. He is retired (Phone: 517-479-6054).

Back in the early days there was a big market for wheat starch, but no market for wheat gluten. Then they started using wheat gluten to make HVP and monosodium glutamate (MSG). The plant stopped making wheat gluten in 1973, due to competition and the high freight required to bring in the starches by rail. Their main product is now HVP. About 90%

of the raw material for their HVP is soybean meal, although they also use small amounts of wheat gluten, corn gluten, wheat bran, cottonseed meal, and whey protein. When he arrived about 20 years, the main ingredient for making HVP was already soybeans, but he has no idea when Huron started using soybeans. Each protein source gives a different flavor profile to the finished HVP. Wheat gluten, for example, improves the mouthfeel of an HVP and the glutamic acid it contains serves as a flavor enhancer.

The largest manufacturer of HVP in America is probably the A.E. Staley Manufacturing Co. in Decatur, Illinois. Staley uses a lot of corn gluten in their HVP. Huron is a close second to Staley, followed closely by Fidco, then by Basic Foods and Griffith Laboratories. Jim knows that Huron used to sell a lot of HVP to Stange, but he does not know if Stange was ever a manufacturer or a competitor.

Huron's catalog lists about 90 different HVP products; these vary according to color (light to dark), pH, salt content, and form (liquid or powder). They no longer make HVP in paste form. To make light colored HVP, you start with a dark product and lighten it by using a carbon slurry to absorb the dark colors. The main applications of HVP are in sauces, flavorings (they sell a lot of product to flavor houses, who make blends for TV dinners, hamburger helpers, noodle packages, etc.), and soups. Address: Plant Manager, Huron Milling Co., 79 E. State St., Harbor Beach, Michigan 48411. Phone: 517-479-3211.

7759. Redmond, Tim. 1993. New developments at the Soyfoods Association of America (SAA) (Interview). *SoyaScan Notes*. Oct. 29. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Tim has been very active in shepherding SAA during the past year. He is the vice president, on the executive committee, and a director. The original \$30,000 grant to SAA from the American Soybean Association increased to about \$40,000. SAA will soon be sending 3,000 packets to the media and 5,000 packets to health professionals. Each packet contains fact sheets, a soyfoods brochure, and a brochure announcing the "First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease," which is scheduled to be held on 20-23 Feb. 1994 in Mesa, Arizona. In addition, Tim is now drafting a letter to new and prospective members, including San-J (which has never joined), Worthington Foods, Kikkoman, Ralston Purina, etc. SAA needs more money to promote soyfoods on a broad basis.

Michelle Edwards, Dan Burke's long-time secretary, is now the Executive Director of SAA.

Tetra Pak Inc. has donated \$50,000 to SAA over a period of 3 years, primarily to aid in the development of soymilk standards. Note: This is the largest single grant ever received by the Soyfoods Association. As of Jan. 1995, according to Dan Burke (Treasurer of SAA) the funds are being used

mainly to pay for legal advice (from Hyman, Phelps & McNamara in Washington, DC) on the standards and to promote soyfoods. Peter Golbitz, who has spent a great deal of time in compiling the standards, has not received any payment for his time. Address: Vice President of Marketing and Sales, American Soy Products, Inc., 1474 N. Woodland Dr., Saline, Michigan 48176. Phone: 313-429-2310.

7760. Seeger, Royce. 1993. Recollections of work with Eden Foods (Interview). *SoyaScan Notes*. Oct. 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** At age 18 Royce was introduced to macrobiotics by Jimmy Silver. He was never involved with the food buying co-op before Eden Foods started. He started working for Eden Foods in about the fall of 1970 at the store on State Street. He was married with a child, he needed a job, and he was interested in macrobiotics, so the job was a natural. At the time he started work, Bill Bolduc, Mark Retzliff, and Tim Redmond were working at that store. After he had worked there about a year, Michael Potter arrived. Initially he ran the cash register, stocked the shelves, and ran the 8-inch stone flour mill grinding wheat, corn, rye, rice, etc. into flour. Shortly after he started work, he also began to mill soy flour. Tom Vreeland grew the soybeans organically. Royce toasted the soybeans lightly, about half way, so that the flour could be milled more easily and was still yellow. The roasting got rid of the heavy raw taste, but some raw soy flour taste still remained. Initially the soy flour was sold in paper bags, but the bags became very oily, so they switched to packing it in 3 sizes of cello bags which we heat sealed. The bags were considered biodegradable. Eden couldn't buy too large a supply since they became brittle after a while. A printed label was affixed by hand to each cello bag. The flour was also sold in big 25 lb paper flour bags, which were stamped with a rubber stamp to indicate the contents.

Eden also made Kokoh, a macrobiotic baby cereal, which contained roasted soy flour and was also packed in the small cello bags. All the ingredients were roasted together and then ground; soy was one of the ingredients. The soy was roasted longer than it was for the flour.

Eden was also importing miso in kegs from Japan. Employees would pack the miso into 1- and 2-lb bags. Eden still imports its miso in bulk kegs.

In those days the store wasn't making much money; it had just come from being a co-op, so often the only pay employees got was to have their bills paid—such as rent, so they didn't get evicted. They didn't really get a pay check. In about 1973 Royce quit work at Eden to do some construction work for a friend, and then moved to Arizona to be with his wife's parents. After about 10 months he returned to Ann Arbor and went back to work for Eden Foods. This time he stayed until 1978, running the mill and doing packaging. Then he left for a second time; he needed to make more money.

In 1982 Royce returned to work for Eden for a third time. He started working in production at a small bottling line where Eden bottled soy sauces (imported in 55 gallon drums from Japan), vegetable oils, and vinegar. Eden still bottles its soy sauce this way. One person runs the filler, which fills 6 bottles at a time; he slides in 6 bottles, pulls down the lever which fills them, then he puts them on a conveyerized line. The next person on the line puts on caps. Finally, at a labeling machine, one person labels one bottle at a time. Then he went back into running the mill, grinding flours. Royce has been working at Eden, more or less, since 1982. However in 1987 he developed testicular cancer, which had spread throughout his lymph system. His weight dropped to 155 lb and parts of his spine had to be removed. The cancer is now in remission and he feels like he is getting stronger. Royce now serves as Michael Potter's driver, since Michael is not allowed to drive at all by himself. Royce likes working at Eden Foods, even though he is not an official employee, since he is receiving disability payments. Address: 133 S. Clinton, Manchester, Michigan 48158. Phone: 313-428-0973.

7761. **Product Name:** Lightlife Savory Seitan [Barbecue Sauce, Teriyaki Sauce, or Traditional Bulk].

Manufacturer's Name: Lightlife Foods, Inc.

Manufacturer's Address: P.O. Box 870, Greenfield, MA 01302. Phone: (413) 774-6001.

Date of Introduction: 1993. October.

Ingredients: Barbecue: Organic stone-ground wheat flour, water, soy sauce, honey, spices, spice extracts, natural flavors, salt, potato starch, dried onion, guar gum, liquid smoke, kombu.

Wt/Vol., Packaging, Price: 8 oz paperboard box.

How Stored: Refrigerated or frozen.

New Product—Documentation: Leaflet distributed at Natural Products Expo East in Baltimore, Maryland. 1993. Oct. "New! Lightlife. Savory Seitan."

Spot in NFM's New Product Review. 1994. Spring (May). p. 12. A photo shows two 8 oz packages of the product (Teriyaki Sauce and Barbecue Sauce).

7762. Hillyard, Roger. 1993. Work with Erewhon, Arrowhead Mills, and The Well (Interview). *SoyaScan Notes*. Nov. 10. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Fred Rohe started out working for Thom's Natural Foods, a retail store in San Francisco. Then Fred bought Sunset Health Foods (a health foods retail store at 1319 Ninth St. in the Haight-Ashbury district of San Francisco) and renamed it New Age Natural Foods—at the same address. Roger thinks it was in about 1965 or 1966, because he was living in San Francisco at that time and had just gotten involved in macrobiotics—in Jan. 1966. He started buying his foods from Marina Health Foods (on Chestnut)

but when Fred opened his store, Roger started buying his foods there.

At some point Fred bought a chicken farm, transformed it into a natural chicken farm, and created New Age Resources as the company that owned it.

Then Fred teamed up with Phil Parenti / Parente and they did two big things at about the same time: (1) They opened a second store on California Street in Palo Alto, which was a natural foods supermarket (perhaps the first of its type in the USA). David Mastandrea was the manager and Nik Amartseff may have run the deli. At the time the store opened in Palo Alto, Roger was on the East Coast in Boston with Erewhon. (2) Fred and Phil started a distribution company named New Age Distributing.

Then they got into financial difficulties; they had tried to do too much too fast. The stores reverted to Fred and the distribution company and chicken ranch went to Phil. That's when Phil renamed the distribution company The Well. But legally and corporately, it was still New Age Natural Foods—which was the parent company of The Well. Phil was active from day to day at The Well. Then The Well purchased Pure & Simple from Bruce Macdonald; the products at that time were apple juice, corn chips, and fruit butters. By the time of the natural distributors conference at Pajaro Dunes, California, the line had expanded to other fruit juices and Japanese imports, which were coming from Mr. Kazama of Mitoku—all sold under the Pure & Simple brand and distributed by The Well, which was now a master distributor. Some of these products were sold to other distributors, and all were sold to retail stores.

Irwin Carasso, the founder of Tree of Life, sponsored the natural food distributors conference in St. Augustine, Florida. Roger thinks Irwin was the 2nd or the 3rd person who began importing natural foods directly from Mr. Kazama in Japan—First Erewhon, then Pure & Simple, then Tree of Life. Eden Foods started importing after Tree of Life, and after that St. Augustine conference; but they imported from Muso. Initially Erewhon had insisted that everyone import the Japanese products under the Erewhon brand; they maintained that monopoly for quite a while.

At the time the *Deaf Smith Country Cookbook* was published (1973), Roger and his ex-wife Susan (and 2 kids) were living and working in Hereford, Texas. They spent a year there. While Susan was working on the cookbook, Roger was contracting with local farmers for everything from grains to maple syrup, helping to establish Arrowhead's line of consumer packaged products (graphics, copy, etc.) and (most important) he got Arrowhead's distribution system and network going, selling to other distributors. Roger was employed by Arrowhead. Irwin Carasso was one of the first to be named a wholesaler of Arrowhead Mills' products. Next came Shadowfax. The NNFA convention that year was in Washington, DC.

When they left Texas, after a year, they hopped back in

the school bus, drove to Los Angeles and hung out there for a couple of weeks (staying with Bobby Orgo, who worked for Erewhon in Los Angeles), then they drove to Atascadero, but they had no destination. They went to visit Bruce Macdonald (who at that time was living in Santa Cruz, California, and working each day for The Well—Pure & Simple). He sold the Pure & Simple brand then went along with it from Southern to Northern California.

Roger, Susan and their family ended up living in Soquel, California (near the Pacific Ocean and Santa Cruz), in about mid-March 1973; his youngest son was born on March 29, right after they got settled. Jean Allison (from Boston) came out and helped Susan for a while.

The Well went out of business in about 1979. It continued to grow and expand. In very few years, it grew from \$3 million to \$10 million in sales. The peak year was in about 1978, then it went rapidly downhill. It had the wholesale distribution entity, a small production facility in San Jose where it manufactured fruit butters and bottled tamari and some oils, and also raised alfalfa sprouts. Then (in about 1976-77) it bought out Max Kozek, the organic wholesale supplier from Los Angeles. It also had a project to produce 40 acres of organic carrots in the San Joaquin Delta, and about 10 acres in Borrego Springs (east of San Diego). It also had some acreage of organic apples and peaches (small, real old, so there was not production and it was not of high quality), and substantial crop investments in organic produce via contracts with individual growers, as with John Mason who was a hothouse tomato grower in California. Then it bought a wholesale distribution company [Essene Traditional Foods] in Boyertown, Pennsylvania. With all those ventures, scattered near and far, The Well was (1) undercapitalized, and (2) it lost an incredible amount of money on some of its individual ventures, such as the organic carrots (nematode problems). Phil Parenti owned most of the stock at this time, but he did not have a controlling percentage. The other main stockholder was not a regular participant in the company; Roger does not remember his name. Roger had only stock options. The Well just folded up shop and disappeared; it was not sold to anyone. But the Pure & Simple brand name was sold to Jimmy Silver and John Fountain. Phil Parenti went to Monterey, California, and worked with his father in property development. Roger does not know where he is now. Address: Farley's Coffee Shop, #1315 18th St., Potrero Hill, San Francisco, California 94107. Phone: 415-648-1545.

7763. *SoyaScan Notes*. 1993. Manufacture and sale of soyfoods in Poland (Overview). Nov. 11. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** The following information about soyfoods companies in Poland was provided by the Polish consulate, the American Soybean Assoc., and a Westerner traveling in Europe:

Polsoja was started in early 1993 by Piotr Poninski and

three partners. It is probably the first tofu shop in Warsaw, Poland, and the only tofu shop in Poland that makes and sells tofu on a regular basis. Five people work at the company. Address: ul. Hetmanska 61, 05-120 Legionowo (near Warsaw), Poland. Phone/fax: (48 22) 18 21 11

Solida Sp. z o. o. is a Chinese-owned company founded in 1992 by two Chinese partners: Mr. Lu Shihua (president) and Mr. Liu Zhonghua. The sales manager is Mr. Bugosiaw Zwadzki. They make and sell soy sprouts. They plan to sell tofu. Address: ul. Kmicica 1/212, 02-728 Warszawa (Warsaw), Poland. Phone/fax: (48 22) 47 23 09.

Okregowa Spółdzielnia Mleczarska is a dairy co-operative that supposedly makes or used to make tofu. They were taught how by Prof. Stanislaw Gwiazda. Polsoja has never seen or eaten their tofu. They probably started in 1992. Probably nobody speaks English there. Address: ul. Chopina 2, 12-100 Szcztytno, Poland. Phone: (48 889 89) 22 11.

Prof. Stanislaw Gwiazda is said to have traveled in East Asia and claims to know tofu technology. He works in the faculty of food technology at the main School of Agriculture in Warsaw, where he specializes in proteins and fats. He helped the Szcztytno start or try to start making tofu. Address: Szkoła Główna Gospodarstwa Wiejskiego, Katedra Produktów Białkowych i Tuszczowych, ul. Grochowska 272, 03-849 Warszawa, Poland. Phone: (48-22) 10 18 42.

Polgrunt Sp z o. o. makes soy pâtés and soy flour. They also sell soybeans, TVP (imported from Serbia via Hungary), soy sauce, and maybe other soy products. They may start making tofu in the future. They probably started in 1991 or 1992. Address: ul. Pabianicka 17/19, 97-400 Beichatow, Poland. Phone: (48 841 83) 255 64.

There is also an unknown Vietnamese man who is making tofu for the Vietnamese community in Warsaw. He probably does everything in his kitchen for just a few people.

7764. Wilson, Don. 1993. The pioneering work of Aqua Agra in Florida with sprouts and soyfoods. Part II (Interview). *SoyaScan Notes*. Nov. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** “When we started talking about making tofu, it became very evident to me that we would need a bigger space, so in about March or April of 1977 we moved over to 100 Highline Dr., Longwood, Florida 32750. We went from 4,000 square feet of floor space to 50,000 square feet. We outgrew our plant on Seminola Blvd. in about 4-5 months.” In June 1977 Don’s first child, a son, was born. On Highline Drive, Don built rooms to grow the various sprouts and also diversified the company into chopping and packing huge amounts of fresh vegetables; there was a separate packet of sauce (such as teriyaki) in each bag for making stir-fries. All that was needed was some tofu to complete the stir-fry. Don bought his tofu equipment used from Robert and Mary Brooks, whose company Swan Foods in Miami had gone out of business. The purchase became a mess because Robert

had failed to inform Don about the liens that were against his equipment due to Robert’s unpaid bills. So Don started to make tofu in 1978. He sold it chiefly to the chain stores—first to Albertson’s (the smallest group), then to Publix, and then to Winn Dixie (the biggest chain). He did not deal with restaurants or health food stores. At the height of production, Aqua Agra was making at least 25,000 to 30,000 lb/week of tofu. He was the first person to introduce tofu to supermarkets in Florida.

In the summer of 1979 Don attended the second annual Soycrafters Conference at Amherst College in Massachusetts. “I will never forget that as long as I live. Some of the major U.S. food companies, such as General Mills and a few others, sent representatives in 3-piece suits. I was standing in the back of the auditorium where these guys were and I’ll never forget listening to their comments as they talked about what a bunch of dingdongs they had been sent to observe, and how this had absolutely no place in the American food chain whatsoever. I can remember walking away from that conference thinking to myself, ‘I sure am glad these big guys think this way because all it would take is one big corporation to get involved in this and a lot of small businesses would soon go down the drain.’”

Aqua Agra grew rapidly. Many of his employees were Asian-Americans and they were wonderful workers. the copycats that tried to compete with him couldn’t. About 2 years after Aqua Agra started making tofu, the *Sentinel Star* newspaper did a rather nice story on the company in 1980.

In early 1981 Don started making soymilk, which he sold in bulk to the nearby Seventh-day Adventist Florida Hospital—but not to any of the chain stores. He sold about 300 gallons a week.

At about the same time he started making soy yogurt in individual unprinted cups with a pressure sensitive label. Most of his sales were of plain yogurt, but he also sold strawberry, peach, and blueberry flavors. The yogurt was sold to local health food stores, to Del Champs in Alabama, and to a broker in New York named Marty Grossman, who sold a lot.

In late 1981 Aqua Agra began to make soy tempeh. They sold less than 100 lb/week, and only to a few health food stores in Orlando who had asked for it.

Don and his wife had to close the company in about mid-1982, after 6 years in business. At that time they were making about 75 products. He and his wife were each working 100 hours a week. “The doctor gave me a choice. He said, ‘You can either get rid of that business and live, or you can keep it and die! But you’re gonna do one of the two.’” Don was so sick and tired of everything at that time that he decided not to even sell the company—just to shut it down and walk away.

Don feels that he was a little bit before his time. “People found it amusing that a sergeant in the United States Marine Corps. was involved in making hippie food.” Address: 2321

Virginia Dr., Altamonte Springs, Florida 32714.

7765. Coward, Lori; Barnes, N.C.; Setchell, K.D.R.; Barnes, S. 1993. Genistein, daidzein and their beta-glycoside conjugates: Antitumor isoflavones in soybean foods from American and Asian diets. *J. of Agricultural and Food Chemistry* 41(11):1961-67. Nov. [31 ref]

• **Summary:** This is a very important article. Isoflavones were first extracted with alcohol (80% aqueous methanol) and then the fat was removed from the extract with hexane solvent. Details of the isolation process are given. The results showed that most Asian and American soy products, with the exception of soy sauce, alcohol-extracted soy protein concentrate, and soy protein isolate, have total isoflavone concentrations similar to those in whole soybeans. Asian fermented soyfoods contain mainly isoflavone aglucones, whereas in nonfermented soyfoods of both Asian and American origin isoflavones are present mainly as beta-glycoside conjugates. The estimated daily intake of these isoflavones by Asians is similar on a body weight basis to the isoflavones in soy-containing diets which inhibit mammary tumorigenesis in animal models of breast cancer. Therefore, it is possible that dietary isoflavones are an important factor accounting for the lower incidence and mortality from breast cancer in Asian women.

“The concept of reducing cancer risk by chemoprevention has become an important aspect of current cancer research. It has been suggested that two so-called phytoestrogens, lignans and isoflavones, may play a role in the prevention of estrogen-dependent breast cancer and colon cancer.

Three tables show the isoflavone concentrations in various types of soyfoods. For each food, the content of the following is given: Conjugated genistin, conjugated daidzin, genistein aglucone, daidzein aglucone, total isoflavones, D/G ratio, percentage of genistein aglucones, and percentage of daidzein aglucones. After each food listed below we will show the total concentration “as is” and then (if given) on a dry weight basis.

Table 1 shows isoflavone concentrations (in mg per gram) in basic nonfermented Asian soyfoods: Soy milk (0.252 / 3.256), Tree of Life tofu (0.417 / 2.031), Mori-Nu tofu (0.494 / 3.827), soy flour (1.338), soy powder (1.748), and soy nuts (2.363).

Table 2 shows isoflavone concentrations (in mg per gram) in fermented Asian soyfoods: Tempeh (0.430 / 1.130), miso (0.920 / 1.379), rice miso (0.404 / 0.721), barley miso (0.721 / 1.195), Shiromiso soup mix (0.708), Akamiso soup mix (0.882).

Table 3 shows isoflavone concentrations (in mg per gram) in other soyfoods: Soy sauce (0.023 / 0.090), soy cheese (0.050 / 0.105), Tofutti soy ice cream (0.032 / 0.092), Ice Bean soy ice cream (0.117 / 0.360).

Although flavonoids are found in many plants,

vegetables, and flowers, isoflavones such as genistein and daidzein are found in just a few botanical families. This is because of the limited distribution of the enzyme chalcone isomerase largely to tropical legumes. Partly for this reason, isoflavones are a very minor part of American or British diets. Address: Depts. of Pharmacology and Biochemistry and Comprehensive Cancer Center, Univ. of Alabama at Birmingham, Birmingham, Alabama 35294, Mass Spectrometry Lab., Children’s Hospital Medical Center, Cincinnati, Ohio 45229.

7766. **Product Name:** Tofu Turkey, and Cashew Gravy.

Manufacturer’s Name: Daybreak Foods.

Manufacturer’s Address: 768 18th St., Arcata, California 95521. Phone: (707) 825-7480.

Date of Introduction: 1993. November.

Ingredients: (1) Tofu Turkey: herbs, tofu, garlic, turmeric, tamari, rice flour, vegetarian nutritional yeast, salt, white pepper. Bread Stuffing: onions, celery, bread crumbs, herbs, canola oil, salt, white pepper, miso, water, bayleaf. (2) Cashew Gravy: Cashews, water, sea salt, tamari, white pepper, flour.

How Stored: Refrigerated.

New Product–Documentation: These are two separate products: Labels (Tofu Turkey, Cashew Gravy) sent by Matthew Schmit. 2002. Sept. 24. Both are pressure sensitive, green on white, 3.5 x 2.5 inches.

Talk with Matthew Schmit. 2009. March 6. Daybreak Foods is no longer in business. He sold his restaurant and company to a couple in about 2004. The new owners (Paul, and his wife, Hahnelea Boehm—an ex-employee of Matthew’s) continued to make the Tofu Turkey and the Gravy for the Thanksgiving and Christmas season only until 2007, and they were quite as aggressive as Bob Meeks was. They closed in the fall of 2008; they were splitting up and the restaurant got caught up in the legal battle.

7767. Kelley, Hubert W. 1993. Always something new: A cavalcade of scientific discovery. *USDA Agricultural Research Service, Publication No. 1507*. 150 p. Nov.

• **Summary:** This book is filled with photos and commemorative stories about the research discoveries and breakthroughs in the field of crop utilization at the four regional USDA’s Agricultural Research Service (ARS) labs during the 50 years since they were established.

Chapters include: Introduction. Gambling on science. Penicillin and the war years [World War II]. Midstream changes and corrections. Frozen foods. Soybean oil (p. 85-88). Vegetable oils in Industry (p. 89-91). Food safety (p. 97-104; Aflatoxin, other mycotoxins). Food for Peace (p. 116-18). Fuels from agriculture (p. 118-19). Proteins in milk, grains, and oilseeds (p. 125-20). Peanuts (p. 131). U.S. crops in Asian foods (p. 132-33; Tofu, tempeh, soy sauce, sufu). Microorganisms (p. 134-36; Incl. the ARS culture

collection). Focus on the future (p. 147-50; soy oil printing inks).

The most important work of the Northern regional laboratory in Peoria was the development of penicillin starting in June 1941. A brief chronology: 1941 Dec.—Andrew J. Moyer, a chemist at the Northern lab, developed the basis for the industrial process—deep vat fermentation. 1942 March—Only enough penicillin is available to treat a single case. 1942 Dec. 31—Seventeen U.S. pharmaceutical companies are working on penicillin. 1944 June 6—Thanks to the combined efforts of many people, enough penicillin is available in quantity by D-Day (invasion of Normandy, France) to treat wounded allied soldiers. Penicillin was the world's first commercial antibiotic. By the 1950s, hundreds of antibiotics were on the market. Address: Director (retired), Information Staff, USDA Agricultural Research Service (ARS).

7768. Product Name: Kikkoman Tofu: Soybean Curd (Aseptically Packaged) [Firm, or Soft].

Manufacturer's Name: Kikkoman International, Inc. (Importer). Made in Japan by Morinaga.

Manufacturer's Address: 50 California St., Suite 3600, San Francisco, CA 94111. Phone: 415-956-7750.

Date of Introduction: 1993. November.

Ingredients: Water, soybeans, glucono delta lactone and calcium chloride (coagulating agents).

Wt/Vol., Packaging, Price: 10.5 oz Tetra Brik Aseptic carton.

How Stored: Shelf stable; refrigerate after opening.

New Product—Documentation: Talk with Morinaga Nutritional Foods. 1994. March 18. Morinaga in Tokyo is now making and packaging this product for Kikkoman. The first batch arrived in the USA in Nov. 1993. The product was formerly packed in a foil retort pouch in a paperboard box.

7769. Kashama, Johnny. 1993. Re: Projet Miso in Kigali, Rwanda. Questions answered on Soyfoods Center questionnaire and returned to SC on 21 Dec. 1993. 3 p. Handwritten, with signature. [Eng]

• **Summary:** The following is based on a interview with Mr. François Munyankindi of Projet Miso (B.P. 2018, Kigali, Rwanda). Projet Miso (Project Miso), was founded on 1 Oct. 1990 to manufacture miso and to contribute to the improvement of the diet of the people of Rwanda. It was founded by Mrs. Suzanne Dionne of the *Fonds de Contrepartie Rwanda-Canada*, which is the owner. It is a cooperative venture between Canada and the government of Rwanda. The company began to ferment red miso in 1992 and to sell it in April 1993; it now makes red miso (340 kg/week), tamari (14 liters/week), and shoyu (it is still in the fermentation and has not yet started to be sold). Miso is the best-selling product of the three, with sales of 102,000 Rwandese francs per week (1 U.S. dollar = 145 francs). They

learned the process by studying *The Book of Miso* and *Miso Production* by Shurtleff and Aoyagi. The company employs 11 people: 1 manager, 6 production workers, and 4 office workers and others. The company has 290 square meters of production space and 27 square meters of office space.

Mr. Munyankindi thinks [and he is correct!] that this is the first company in Africa to make and sell miso, tamari, or shoyu. The miso is accepted by the local people. "As you know, miso is a medicinal food and it is recommended by many physicians." Address: c/o Tofu—Rwanda, P.O. Box 1906, Kigali, Rwanda. Phone: (250) 76730.

7770. Viana Naturkost GmbH. 1993. Sound im Glas [Sound in Glass]. Euskirchen-Kuchenheim, Germany. 6 panels. 21 cm. Company catalog. [Ger]

• **Summary:** This stylish, 6-panel company catalog is black, red, and white on pea green. The company sells Brown-Rice Miso (*Genmai* Miso) and Barley Miso (*Mugi* Miso). Spreads for breads include Chickpea Spread (*Kichererbsen Pastete*, with shoyu and soybeans), Vegetable Garden (*Gemuesegarten*, with organic tofu), Inka (with organic tofu), Toto (with organic tofu), and Miso Squash Paste.

Note: During 1993-94 Viana purchased modern tofu production equipment from Takai in Japan. Address: Willi Graf Str. 88, 33881 Euskirchen-Kuchenheim, Germany. Phone: 02251/56076.

7771. Product Name: [Skewered Tofu and Seitan].

Foreign Name: Spiedini di Tofu e Seitan.

Manufacturer's Name: Biolab.

Manufacturer's Address: Via dei Grabizio 11, 34170 Gorizia, Italy. Phone: +39 481 533522.

Date of Introduction: 1993.

Ingredients: Tofu (soy & water), seitan (washed by hand, containing wheat gluten, corn starch, soy sauce, spices), carrots.

Wt/Vol., Packaging, Price: 200 gm vacuum packed.

How Stored: Refrigerated.

New Product—Documentation: Label and letter sent by Maura Ghiraldini and owner Massimo Santinelli. 1998. Dec. 5. This label (5.5 by 4.75 inches) has dark red text on a wavy blue, red, and yellow pastel background. A small blue and white oval logo states: "AgriEco Bio—Organically grown and certified (*Prodotti Biologici—Controllati e Garantiti*).” Refrigerate at 4°C. A small symbol shows a person recycling the container. This product has been discontinued. It was delicious by too labor-intensive.

7772. Harcan Kingsoya Co. Ltd. 1993. Veg-A-King (Brochure). Ontario, Canada. 4 p.

• **Summary:** This is a portfolio-style leaflet with one insert describing Veg-A-King soy sauce. "Harcan Kingsoya Co. Ltd. is a Chinese/Canadian joint venture company set up to bring you authentic soyfoods and exotic sauces. Our Chinese

partner is a leading food manufacturer and exporter in Heilongjiang Province, China.” The company has established a manufacturing plant in Scarborough, Ontario, Canada. The brand name is Veg-A-King.

“Veg-A-King soy sauce is our flagship product. We use a traditional recipe which has a long history in China. Brewed naturally from premium soybeans, wheat and bran, it contains no artificial colours or added flavourings.”

The company also makes an impressive line of 17 meatlike soyfoods products such as Vege-Beef, Vege-Chicken, and Vege-Shrimp. Pressed tofu is the basic ingredient of these foods. “Through further processing it can be shredded, formed, steamed, deep-fried or smoked to make different delicious foods” for vegetarians. Premium quality Canadian soybeans are used in manufacturing soymilk, tofu, and dried bean curd.

Two photos show foods being made in the factory. Address: 33 Casebridge Court, Units 5&6, Scarborough, ONT M1B 3J5, Canada. Phone: (416) 283-8328.

7773. Product Name: Diet Chow Mein with Pasta Noodles. **Manufacturer’s Name:** Major Marketing Ltd. (Marketer-Distributor).

Manufacturer’s Address: 22 Mark Rd., Hemel Hempstead, Herts, England.

Date of Introduction: 1993.

Ingredients: Pasta noodles, chow mein flavours (Flavourings), textured vegetable protein, modified starch, maltodextrin, sea salt, vegetable fibre, dried vegetables (peas, red peppers, mushrooms, chives), vegetable oil, carob flour, soy sauce sachet.

Wt/Vol., Packaging, Price: 70 gm plastic cup. Retail for 0.75 p. in London.

How Stored: Shelf stable.

Nutrition: Per 100 gm.: Energy 1193 Kjoules / 281 Kcal (calories), protein 12.0 gm, carbohydrate 56.0 gm, fat 2.5 gm.

New Product–Documentation: Label (plastic cup) sent by Heather Paine of SoyaFoods in London. 1993. Nov. 3 inches deep by 3.75 inches across hexagonal mouth. Black, blue, green, brown, and white on tab. Illustration of the Great Wall of China. “Directions. Open pot and remove [soy] sauce sachet. Add boiling water up to mark. Allow to stand for 2 minutes, stir thoroughly. Stand for 2 further minutes. Add more water if required. Stir in sauce to taste. Your diet meal is now ready to enjoy.”

7774. Product Name: Tamari.

Manufacturer’s Name: Projet Miso (owned by Fonds de Contrepartie Rwanda-Canada).

Manufacturer’s Address: Projet Miso, B.P. 2018, Kigali, Rwanda. Phone: (250) 76730.

Date of Introduction: 1993.

How Stored: Shelf stable.

New Product–Documentation: Letter from, form filled out, and label sent by Johnny Kashama based on an interview with François Munyankindi of Projet Miso, Rwanda. 1993. Dec. 21 (which see). This company began to ferment tamari in 1992 and to sell it in 1993. This is the first company in Africa to make and sell miso, tamari, or shoyu.

Label. 3.25 by 2.25 inches. Red, black, and white. “Projet Miso–Tamari.”

7775. Product Name: San-J Organic Tamari: Organic, Gluten Free Soy Sauce. Reduced Sodium (Platinum Label).

Manufacturer’s Name: San-J International, Inc.

Manufacturer’s Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 804-226-8333.

Date of Introduction: 1993.

Ingredients: Incl. tamari soy sauce.

How Stored: Shelf stable.

New Product–Documentation: E-mail from Misako Binford of San-J. 2012. May 8. An attached Excel spreadsheet gives that date each San-J product was first sold commercially, starting in 1987. This product was first sold in 1993. Most products launched in 1987 or before were imported from San-Jirushi in Kuwana, Japan. Platinum label is Organic wheat free (now it says gluten free with the same formula) reduced sodium Tamari Soy Sauce.

Two labels sent by Misako Binford of San-J International. 2012. May 14. The platinum label now reads: “Organic Tamari: Gluten Free Soy Sauce. Reduced Sodium. 10 fl. oz. Made with whole 100% soy.” Two logos on the front panel: (1) Non GMO Project verified. (2) Certified Gluten Free. She notes: 1993. Platinum.

7776. Product Name: Seitan [Hot & Spicy Szechuan, BBQ Style, Mexican Chili].

Manufacturer’s Name: Vegan Epicure.

Manufacturer’s Address: 210 Park Place, Ithaca, NY 14850. Phone: (607) 272-0432.

Date of Introduction: 1993.

Ingredients: Hot & Spicy Szechuan: Wheat gluten, shoyu (water, soybeans), apple cider vinegar, Chinese peppercorns, spices, honey.

Wt/Vol., Packaging, Price: 8 oz. vacuum pack.

How Stored: Refrigerated.

New Product–Documentation: Spot in Vegetarian Journal. 1994. March/April. p. 27. Talk with Susie Gutierrez, founder and owner of Vegan Epicure. 1994. March 11. She introduced this flavor in 1992.

Label for Hot & Spicy Szechuan sent by Susie Gutierrez. 1994. March 14. 3.75 by 2.25 inches. Black on purple. 8 oz. These dark brown slices are 3 by 5½ by 1/8 inch thick.

7777. Product Name: [Viana Organic Tamari].

Foreign Name: Viana Bio Tamari: Kraeftige Sojasauce.

Manufacturer's Name: Viana Naturkost GmbH.

Manufacturer's Address: Willi Graf Strasse 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251/56076. Fax: 02251/75638.

Date of Introduction: 1993.

Ingredients: Spring water, soybeans*, sea salt. * = Organically grown.

Wt/Vol., Packaging, Price: 500 ml bottle.

How Stored: Shelf stable.

New Product–Documentation: Label sent by Bernd Drosihn, founder and owner of Viana. 1994. Feb. 14. 5.5 by 1.5 inches. Red and yellowish gold on dark green. "Viana Bio Tamari is a traditional soy sauce, which can lend a powerful note to your foods. Dip tip: Tamari, water, a little vinegar, peanut butter, garlic, pear concentrate or honey."

7778. Boots, Gypsy; Arthur, Mike; Hopkins, Jerry. 1993. *The Gypsy in me! How to look younger and have more energy as you grow older.* Camarillo, California: Golden Boots Co. vi + 102 p. Illust. No index. 22 cm.

• **Summary:** Contents: Dedication and thanks. Introduction, by Charlie Fox. 1. Natural beginnings. 2. Living in nature. 3. Love and marriage. 4. Hollywood meets health nut. 5. Semi-stardom with Steve Allen. 6. Never too late to rejuvenate. 7. Exercise is a way to live. 8. Vital foods. 9. Eat and drink to your health. 10. Recipes for a healthier you. 11. Traveling through life.

In Chapter 8, titled "Vital foods," the section on legumes includes soy milk, tofu, tempeh, and texturized vegetable protein. Here Gypsy notes that he has always been a vegetarian. Eggs and dairy products once formed a major part of his diet, but now he rarely eats those foods.

Chapter 10, titled "Recipes for a healthier you," contains the following soy-related recipes: Scrambled tofu. Baked soy bean casserole. Tofu mushroom loaf. Tofu burgers. Soy burgers. Soya-rice flour coffee cake (with soy flour). Shakes (with seed, nut, rice, or soy milk). Many other recipes are seasoned with soy sauce. The Gypsy Boots smoothie (p. 93) calls for: 1 cup fresh apple or orange juice. 1 ripe banana. 1 tablespoon Kyo-Green. 1 date or a few raisins.

Contains many photos, both in black-and-white and color of Gypsy Boots, alone, or with family (p. iii, 19), friends, and celebrities. On the cover is a color photo of Gypsy in short pants standing barefoot on rocks in a stream. Eight unnumbered pages of color photos of Gypsy and friends on glossy paper follow page 70. This book has an unusually commercial tone. Throughout the book, Gypsy discusses the benefits of garlic supplements, wears Wakunaga's Kyolic T-shirts in photos, and plugs Kyolic garlic quite a bit. Address: Camarillo, California.

7779. Chaplin, Joyce E. 1993. *An anxious pursuit: Agricultural innovation and modernity in the lower South, 1730-1815.* Chapel Hill, North Carolina: Univ. of North

Carolina Press. xiv + 411 p. Illust. Maps. 25 cm. [725* ref]
• **Summary:** This book, about agricultural innovation in the Lower South during the American colonial era, contains some early references to the soybean and peanut in America.

Page 138: The Royal Society of Arts awarded a gold medal to Samuel Bowen in 1766 (10 June 1766, Minutes of Committee, p. 21, reel 1) for "making sago powder out of dried sweet potatoes and vermicelli noodles from soy beans grown in Georgia. (The first product thickened foodstuffs and starched textiles; the latter testified to a surprisingly sophisticated English palate.)"

Pages 146-47 describe the work of Samuel Bowen, based on the Hymowitz and Harlan 1983. "The most successful experiments with Asian agriculture, and astonishing examples of agricultural creativity, were the handiwork of Samuel Bowen... who claimed to have been a prisoner of war in China for four years; he viewed many parts of the country, observing Chinese methods of agriculture. After his release and return to England, Bowen arranged with James Flint, an officer of the East India Company, to emigrate to Georgia and experiment with Asian crops there." Flint was the first Englishman legally permitted by Chinese authorities to learn Chinese. Bowen arrived in Georgia in 1764 and bought land along the coast, possibly using funds from Flint. He began in 1765 to grow soybeans—from which he made soy sauce and soy vermicelli noodles. He conjectured that there was a market for these Asian foods and that soybean sprouts (or the water in which they are soaked) could help prevent scurvy in the Royal Navy (for soybean sprouts, see Ellis Manuscripts, Linnean Society of London).

Page 156 discusses peanuts: Through the Atlantic slave trade, blacks gradually transferred plants that originated in the Americas (such as peanuts and capsicum peppers) to lands where they were enslaved. "Whites discovered uses for slaves' products only when they learned of external markets for them. This was clearly the case with peanuts. Blacks had often grown and marketed peanuts, but whites paid little heed until European chocolate manufacturers wanted the product for its bland oil." In 1807, George Izard wrote to his brother, Henry Izard, the unexpected news that a British merchant was offering \$2 a bushel for 1,000 bushels of peanuts. In 1808 David Ramsay, in his *History of South Carolina*, claimed that planters could make up to 20 pounds sterling from peanuts; planters paid the slaves to grow the peanuts on their own time, then purchased them for cash.

Pages 156-57 discuss the early introduction of sesame seed, which blacks called benne or binny, from Africa to South Carolina starting in 1747. "Cultivation of things like peanuts and sesame helped reinforce a base of surprisingly autonomous slave labor in the lowcountry" of South Carolina.

During the War of 1812 there was a slump in U.S. agricultural exports such as cotton. "In the lowcountry,

planters experimented with sugar and sheep and paid slaves to produce secondary crops like sesame or peanuts.”

Note: The War of 1812 was fought between the United States and Britain from 1812 to 1815. Called the second American war for independence, it began over alleged British violations of American shipping rights. American soldiers attacked Canada unsuccessfully, and the British retaliated by burning the White House and other buildings in Washington, DC. American warships frequently prevailed over British vessels. The greatest American victory came in the Battle of New Orleans—a battle fought, ironically, two weeks after the peace treaty had been signed. Address: Prof. of History, Vanderbilt Univ., Nashville, Tennessee.

7780. Escano, Crisanto R.; Gaddi, Virgilio Q. 1993. Country report 11—Philippines. In: N. Chomchalow & P. Narong, eds. 1993. Soybean in Asia: Proceedings of the Planning Workshop for the Establishment of the Asian Component of a Global Network on Tropical and Subtropical Soybeans. Bangkok, Thailand: FAO Regional Office for Asia and the Pacific. viii + 218 p. See p. 92-108. RAPA Publication (FAO), No. 1993/6. [12 ref]

• **Summary:** Contents: (1) Introduction. (2) Production: Status, major growing seasons and cropping systems, constraints, resolving constraints. (3) Processing, utilization and marketing: Status, supply and demand, exportation of soybean products, constraints, resolving constraints.

Figures: (1) Trend in soybean production, Philippines, 1980-90. (2) Soybean area harvested, Philippines, 1980-90. (3) Trend in the soybean yield, Philippines, 1980-90. (4) Regional shares of total production, Philippines, 1990. (5) Soybean and soybean product shares in importation, Philippines, 1990. (6) Country of origin, soybean meal import, Philippines, 1990. (7) Country of destination, soy sauce export, Philippines, 1990.

Tables: (1) List of soybean-based food products popularly used in the Philippines. (2) Volume and value of soybean imports, 1980-90.

Soybean production increased from about 9,800 tonnes (metric tons) in 1980 to a peak of 11,466 tonnes in 1982, then decreased to 5,614 tonnes in 1990. Area planted to soybeans increased from about 10,000 ha in 1980 to a peak of about 11,000 ha in 1982, then decreased to about 7,000 ha in 1990. The average yield for the period 1980-1990 was 920 kg/ha, but has generally been falling since 1983. Southern Mindanao has been the single most important soybean producing region in the Philippines for more than a decade, accounting for about 67% of total Philippine soybean production in 1990; Central Mindanao comes next with about 23%.

A brief history of soybean production in the Philippines from 1983 to 1990 appears on pages 99-10. Popular soyfoods products in the Philippines include: A. Fermented products: Soy sauce (toyo), fermented soybean curd (tausi

[sic, fermented black soybeans]), tempeh (tempe), soybean paste (miso), soft fermented soybean curd (tahuri). B. Non-fermented products: Soybean sprouts (toge, tauge), soybean cheese [curds] (tokwa), Geerlings cheese (taho [tofu]), soybean milk (soymilk), and roasted soybean powder (soy coffee).

Philippine imports of soybeans and soybean products have increased rapidly since 1980, yet 93% of these imports in 1990 were soybean meal, of which 38% comes from India, 33% comes from the USA, 22% from China, and 7% from others.

In April 1991 the General Milling Corporation's soybean solvent extraction plant began operation in Tabango, Batangas. It is expected to reduce the country's imports of soybean meal but increase the imports of raw soybeans. Address: 1. Scientist III; 2. Subject Matter Specialist. All: PCARRD, Los Baños, Laguna, Philippines.

Foreword and notes by Stanley L. Faulk. Introduction by Robert Wear. Illust. Index. 25 cm. Series: War and the Southwest, No. 1.

• **Summary:** Page 148: "As the war progressed and supplies diminished, the carpenters were not permitted to build coffins anymore. Instead *miso* barrels were used. *Miso* is a reddish brown paste made from soy beans and has a very good flavor. The barrels were about thirty inches in diameter and twenty-four inches tall. A dead body would not fit into a barrel that size, so the bones of the corpse were broken in order to cram the body into the barrel... the dead were taken away and cremated."

Page 149-50: The mosquitoes were even worse than the fleas and bed bugs because their bites would itch for a much longer time. "Everyone complained so much that the Japanese decided to let us cover the large cracks between the planks of the walls and the ceiling. They gave us stacks of old Japanese newspapers to be torn into strips... The galley made up a lot of rice or wheat paste, and each room was issued two soy sauce buckets full of paste to stick the newspaper strips up with."

Page 163: He liked to catch little smeltlike fish, from 3-6 inches in length, "then he would have me cook them for him. He liked them cooked whole by dipping them in a soy sauce and sugar mixture and then broiling them over the coals in the hibachi."

Page 293: "Our noon chow was one bread bun per man and nothing else. They were mildewed and almost inedible. There was a very small amount of *miso*, a fermented soybean paste, mixed with some parched soybeans, and we drew lots to see who would share this... Cigarettes were now back down to one per day."

Soybean in Asia: Proceedings of the Planning Workshop for the Establishment of the Asian Component of a Global Network on Tropical and Subtropical Soybeans. Bangkok, Thailand: FAO Regional Office for Asia and the Pacific. viii + 218 p. See p. 64–69. RAPA Publication (FAO), No. 1993/6.

• **Summary:** Contents: (1) Production and uses. (2) Research activities. (3) Germplasm.

Germplasm: “Soybeans were introduced from abroad since the old days. Genetic resources of landraces were continuously collected and surveyed since the beginning of this century. In recent years, a number of soybean varieties were introduced from many foreign countries and international institutions, including Korea, China, Nepal, Thailand, USA, AVRDC, etc. Today the total soybean accessions are about 6,000 including wild soybeans. They are conserved and managed in the National Center of Genetic Resources within the National Institute of Agrobiological Resources.”

Figures: (1) Scheme of domestic soybean price in Japan. (2) Geographical distribution of soybean varieties according to their ecotypes and location of soybean breeding stations in Japan.

Tables: (1) Planted area, production and yield of soybean in Japan. Total planted area has decreased from 306,000 ha in 1960 to 146,000 ha in 1990. Production has decreased from 418,000 tonnes (metric tons) in 1960 to 220,000 tonnes in 1990. Yield has increased from 1,360 kg/ha in 1960 to a peak of 1,790 kg/ha in 1990. (2) Trends of soybean supply and demand. Japan’s imports have increased from 3,244,000 tonnes in 1970 to 4,330,000 tonnes in 1991, when 97.3% of the soybeans used in Japan were imported. Uses of soybeans in 1990: Oil 3,630,000 tonnes—up from 2,505,000 tonnes in 1970. Food 725,00 tonnes—up from 522,000 tonnes in 1970. Fermented products (miso, shoyu, natto) 196,000 tonnes—down from a peak of 208,000 tonnes in 1980. Animal feed 95,000 tonnes—up from 10,000 tonnes in 1970. (3) Trends of soybean price. (4) Trends of seed production. (5) Soybean research activities in Japan. (6) Objectives of the respective breeding stations for soybean. (7) Characteristics of the leading and some unique soybean varieties in Japan. For each of 15 varieties gives: Name, year registered (1928–1991), breeding method (crossing, pure line, mutation, back-crossing), ecotype, weight of 100 seeds, seed color, hilum color, characteristics. Address: National Agricultural Research Centre, Tsukuba City, Japan.

7783. Kushi, Michio; Kushi, Aveline; Jack, Alex. 1993. Macrobiotic diet: Revised and enlarged edition. Tokyo and New York: Japan Publications. 400 p. Illust. Index. 21 cm. [67 ref]

• **Summary:** Edited by Alex Jack, this is the revision of a book first printed in 1985.

The chapter on “Beans and bean products” has the following contents: Daily use. History. Quality. Varieties: Azuki beans, black-eyed peas (sometimes known as yard-long beans), black turtle beans, broad beans, chick-peas, great northern beans, kidney beans, lima beans, lentils, mung beans, navy beans, peas, pinto beans, soybeans (p. 195–99) (introduction, miso, natto, okara, soy flour, soy grits, soy milk, soy oil, shoyu, tempeh, tofu {incl. nigari, fresh tofu, soft tofu, firm tofu, deep-fried tofu, pickled tofu, fermented tofu, frozen tofu, dried tofu}), vilia, soy yogurt, yuba.

For information on cooking soy, see p. 204–07. Note: Natto is not usually made with koji (p. 207). For “Health benefits” and for “Soy foods and cancer research” (p. 208–09).

Black soybeans (also known as “Japanese black beans”) are mentioned on pages 60, 121, 189, 200, and 204.

“Natto is a fermented soybean product that resembles baked beans connected by long sticky strands. Its strong odor takes some adjusting to but once appreciated natto is enjoyed regularly as a small side dish or condiment” (p. 196). Address: 1–2. Brookline and Becket, Massachusetts.

7784. Levenstein, Harvey A. 1993. Paradox of plenty: A social history of eating in modern America. New York, NY: Oxford University Press. ix + 337 p., [8] p. of plates. Illust. (8 p. of plates). Index. 25 cm. [1473* endnotes]

• **Summary:** Contents: Prologue: Depression paradoxes.

1. Depression dieting and the vitamin gold rush (The New Nutrition, Victor Lindlahr, Gayelord Hauser, the willingness to eat for health more than for pleasure, Alfred W. McCann, Prof. Elmer McCollum and acidosis). 2. The great regression: The new woman goes home. 3. From Burgoon to Howard Johnson’s: Eating out in Depression America. 4. One-third of a nation ill nourished? 5. Oh what a healthy war: Nutrition for national defense [World War II].

6. Food shortages for the people of plenty. 7. The golden age of food processing: Miracle Whip *über Alles*. 8. The best-fed people the world has ever seen? (Insta-Burger-King chain of early 1950s, Ray Kroc visits San Bernardino, the McDonald brothers, Clementine Paddleford). 9. Cracks in the façade: 1958–1965 (kitchen appliances do not reduce time women spend on food preparation, growing suspicion of the food industries, food additives, refined and processed foods, Gayelord Hauser). 10. The politics of hunger.

11. Nutritional terrorism (DDT and pesticides, Rachael Carson and *Silent Spring*, USDA, mercury in fish from the Great Lakes, Jerome Irving Rodale {ex-auditor for the IRS “was quite unlike most of the others in the huckster-filled health food business.” Circulation of his *Organic Gardening and Farming* magazine soared from 60,000 in 1958 to 650,000 in 1970}. “Soon the doors were open to the usual horde of health food advocates and fad diet promoters impatiently waiting for the moments when they could again hold center stage.” Gayelord Hauser, his women and his

Five Wonder Foods, Adelle Davis, Organic foods, natural foods, health food stores, the government had sided with the medical establishment to keep the public from turning to vitamins—rather than to doctors—to solve health problems, the FDA and Food Faddism, vitamin advocates, Ralph Nader, agribusiness, cholesterol awareness, the AMA's council on foods, National Heart Association, Linus Pauling bankrolled by Hoffmann-La Roche, the largest wholesaler of vitamin C, in 1971 Michael Jacobson helped found the Center for Science in the Public Interest, middle class was rapidly losing faith in the food industry and government).

12. The politics of food (The New Left vs. Ralph Nader, radicals, *Ramparts* magazine, Francis Moore Lappe, vegetarianism, Berkeley radical Alice Waters opens Chez Panisse, aphorism *Man ist was er isst* {Man is what he eats, by Ludwig Feuerbach, 1804-1872, German philosopher}, avoidance of meat and white foods, natural foods, Zen macrobiotic diet, Georges Ohsawa, Yin and Yang, Warren Belasco, brown rice, soy sauce, granola, Fred Rohe, Charles Reich, *Mother Earth News*, *Berkeley Barb*, “back to Nature,” organic foods, the women's movement, LSD, Theodore Roszak, Frederick Stare sets up American Council for Health and Nutrition. Jean Mayer, reviling white sugar, John Yudkin, America's puritanical streak, Robert Choate destroys sugar and sugar-laden breakfast cereals, the public grows to despise sugar).

13. Natural foods and negative nutrition (You are what you eat {1969}, *Fortune* magazine predicts convenience will win out over natural foods. Delaney Amendment, cholesterol and heart disease, loss of faith in the core of America's postwar national credo: the ideal of the balanced meal and faith in the Basic Four, Senator McGovern and his committee's special report *Dietary Goals for the United States* {1977-1978}, which called for a complete about-face in government nutrition policy. “All previous government efforts had centered on getting people to eat more of what was thought to be good for them. *Dietary Goals* emphasized eating less of what was thought to be bad for them”—what Levenstein calls “Negative Nutrition.” A great outcry came from the beef, dairy, and egg producers).

14. Darling, where did you put the cardamom? (The rise of gourmet, high ethnic, and upscale cuisines, French food, Julia Child, Craig Claiborne, snobbery, ethnic food boom, Oriental foods). 15. Fast food and quick bucks (Pizza, McDonald's, Kentucky Fried Chicken, franchises). 16. Paradoxes of plenty. Abbreviations used in frequently cited periodicals.

Born in 1938, Levenstein's first book was titled *Revolution at the Table: The Transformation of the American Diet*. This is a carefully researched, generally well written and very interesting cultural history of food and eating in the USA from 1930 to 1993—and of America's ongoing food wars. However by trying to take a fair and balanced centrist position, and by trying to prevent value judgments

from creeping in (e.g., a healthy, balanced diet is better than an unhealthy one), Levenstein no doubt disappoints, and perhaps even infuriates, all sides. His sources on natural and organic foods and vegetarianism are scant and often very negative. Address: Prof. of History, McMaster Univ., Univ. of Hamilton, Ontario, Canada.

7785. Mallalieu, Huon L. 1993. The illustrated history of antiques: the essential reference for all antique lovers and collectors. London: Aurum Press; Philadelphia, Pennsylvania: Courage Books. An imprint of Running Press. 640 p. Illust. Maps. Index. 29 cm. 1st ed. 1991. [soy ref]

• **Summary:** The contents of this 2nd printing are identical to those of the 1991 first printing; however the publishers are different. Address: Authority on antiques, London.

7786. Marks, Copeland; Kim, Manjo. 1993. The Korean kitchen: Classic recipes from the land of the morning calm. San Francisco, California: Chronicle Books. 236 p. Illust. Index. 23 cm. [8 ref]

• **Summary:** Korea is a peninsula surrounded by water (including the Yalu River that marks the border between China and Korea). There are an estimated 200 varieties of kimchi such as cabbage, cucumber, eggplant, white radish, turnip, etc. The glossary (p. 7-13) includes: Denjang paste (a fermented soybean paste and flavor enhancer). Gochu Jang (hot fermented chili paste; Gochu means chili). Seaweed: Kelp (*Ulva conglobata*, laver (*Porphyra umbilicalis*, sold in very thin sheets [nori]), *miyuk* (*Undaria pinnatifida* [wakame])). Soy sauce (with directions for making it at home). Soybean curd (Two types: Chinese is a firm square about 4 inches on a side and 1 inch thick; Japanese is soft and creamy, about 2 inches thick).

Concerning Gochu Jang: This is the main seasoning in Korean cooking. It has been prepared at home for centuries and stored in the many black pottery pots so conspicuous on Korean rooftops or gardens. Each year on March 3, an auspicious date, the householder starts to prepare enough gochu jang to last all year. Ingredients: Glutinous rice (cooked to a pudding consistency), fermented soybean cake (*meju*), hot red chilis, salt, and barley malt syrup mixed with water. These are mixed and allowed to ferment [outdoors] in a pottery jar for at least 3 months. In early May, as the weather warms, the [woven conical bamboo] cover of the storage jar is removed early each day “so that the sun can strike and warm the contents to accelerate fermentation. At night the cover is replaced.” The fermentation process eventually reduces gochu jang to a smooth, jamlike consistency with a many-dimensional flavor; it adds a lively sting and rich red color to any food with which it is used. “Korean cooking without this indispensable condiment is unthinkable.”

Recipes include: Beef shreds in soy sauce (p. 48). Fried spiced bean curd (p. 57, *Tubu choerim*). Stuffed bean curd

(p. 58, *Tubu gui*). Crushed bean curd salad (p. 70, *Tubu sang she*). Bean curd and pork patties (p. 96). Assorted stuffed fritters (p. 100-01, *Jon*). Seasoned dipping sauce (p. 109, *Yang yeum kanjang*). Simple bean curd soup p. 117, *Tubu kook*). Bean curd soup with clams (p. 125, *Sundubu*). Vegetable soup with soybean curd (p. 135, *Tubu jigae*). Soybean sprout soup (p. 136, *Kongnamul kook*). Address: 1. Food historian; 2. Dr. (Mrs.), expert on history, science, and preparation of kimchi.

7787. Matsumoto, Valerie J. 1993. Farming the home place: A Japanese American community in California, 1919-1982. Ithaca, New York: Cornell University Press. ix + 262 p. Illust. (photos). Index. 24 cm. [100+* ref]

• **Summary:** A very interesting look, spanning three generations, at the Cortez Colony, in Cortez, Merced Co., San Joaquin Valley, central California, the last Japanese Christian farming community formed by Kyutaro Abiko in 1919. It is written from a feminist perspective.

In the lean early years at Cortez, "the settlers' diet was limited; meals often consisted of *miso* soup and rice,..." (p. 47).

New Year's was the major holiday of the year. Everyone would partake of carefully prepared traditional Japanese dishes such as chicken *teriyaki*, *ozoni* (a soup containing mochi, symbolizing prosperity), *mame* ([soy] beans, symbolic of good health), and sushi (vinegared rice "rolled in sheets of toasted seaweed or stuffed into soybean wrappers [deep-fried tofu pouches]) (p. 78).

A glossary of terms (p. 231) includes: an (sweetened red bean paste), azuki (red beans), kinako (soybean flour), mame (beans), miso (fermented soybean paste), nori, shoyu (soy sauce), sushi, teriyaki (broiled meat cooked with soy sauce, wine, and ginger).

Photos show: Abiko family portrait, 1925 (p. 27). Address: UCLA.

Tahini (sesame, p. 106, 225, 493). Tempeh (p. 22, 34, 56, 60, 96, 99, 105, 124, 216, 221, 242, 250, 290, 307, 310, 482-86f; vitamin B-12 and p. 98). Thirst. Tobacco. Tofu (p. 22, 25, 34, 55-56, 60, 68, 81, 105, 124, 242, 250, 290, 300, 303, 307, 310, 317, 327, 486-89f). Tomato. Tongue coating and digestion (p. 399). Umeboshi plums (p. 78, 159, 222, 272, 307, 414, 583f). Umeboshi vinegar (p. 414). Urinary incontinence and deficiency of kidney qi (p. 318-19). Urination, frequent, from kidney qi and yang deficiencies (p. 318). Valerian root. Vegan (p. 5, 95, 137, 261, 389, 502). Vegetarianism (p. 81-82, 95). Vitamin B-12. Vitamin E. Vitamin K. Wakame. Warming foods (p. 18-20, 26-27). Warts. Watermelon. Wind, bodily (foods which quell, 286-89; incl. black soybean, p. 468). Yang. Yin.

Talk with Heartwood Institute. 1997. Nov. 12. This is basically a massage school that also offers retreats. Paul's background is in the martial arts and massage. He graduated from a college after 4 years but the name of the college is not available. He also did 2 years of graduate work at an institution whose name is not available. The Institute sent their catalog/brochure. Address: Director, Heartwood Inst. Wellness Clinic and Oriental Healing Arts Program, 220 Harmony Lane, Garberville, California 95542. Phone: 707-923-5000.

7790. Ramli, M.N.; Jainudin, A.; Tg. Mahmud, T.Y. 1993. Country Report 7—Malaysia. In: N. Chomchalow & P.

Narong, eds. 1993. Soybean in Asia: Proceedings of the Planning Workshop for the Establishment of the Asian Component of a Global Network on Tropical and Subtropical Soybeans. Bangkok, Thailand: FAO Regional Office for Asia and the Pacific. viii + 218 p. See p. 70-74. RAPA Publication (FAO), No. 1993/6.

• **Summary:** Contents: (1) Introduction. (2) Production: Status (Soybean is not presently grown commercially in Malaysia), major growing seasons and cropping systems, constraints, resolving constraints. (3) Processing, utilization and marketing: Status, supply and demand, constraints, resolving constraints. (4) Resources: Personnel, seeds. (5) On-going research projects. (6) Information required.

Tables: (1) Import of soybean and soybean products in Malaysia. Amount and value in 1988, 1989, and 1990 of soybean, soybean flour (non-defatted), soybean oil, soybean cake & other residues, soysauce. Address: 1. Deputy Director. All: MARDI, Serdang, Selangor, Malaysia.

7791. Shimizu, Kay. 1993. Tsukemono: Japanese pickled vegetables. Tokyo: Shufunotomo / Japan Publications. 112 p. Illust. (color). Index. 27 cm. [Eng]

• **Summary:** Tsukemomo are Japanese pickled foods, primarily vegetables. Drying and pickling were two of the earliest ways of preserving food. If you've never tried Japanese tsukemono, get ready for a delicious surprise. This excellent book is a good place to start. We would start with takuan and umeboshi (p. 22).

Soy related recipes: Basic *miso-zuke* (p. 36-37). Spicy pickled celery (*Celery miso-garame*) (p. 37). *Koji / miso / kasu* tsukemono base (p. 39). Amazake (p. 40-41). Daikon radish pickled in koji (*Bettara-zuke*) (p. 41). Scallions in shoyu (*Rakkyo shoyu-zuke*) (p. 43). Garlic with soy sauce (p. 64). Garlic with bean paste [miso] (p. 64). Okra and onion pickles (*Okra shoyu-zuke*) (p. 70). Soy-flavored daikon pickle (*Daikon shoyu-zuke*) (p. 82, 84). Asparagus with bean paste (*Asparagus miso-zuke*) (p. 87). Spicy cabbage tsukemono (*Cabbage shoyu-zuke*) (p. 88). Cooked and pickled kelp (*Nori tsukudani*) (p. 97). Soy sauce pickled vegetables (*San-bai-zuke*) (p. 98).

A 2-page glossary includes: "Age (abura-age)—deep-fried soybean cake (*tofu*). An—sweetened red *azuki* beans prepared as a paste for confections. Amazake—non-alcoholic creamy-thick hot drink prepared from rice fermentation with the addition of rice koji.

"Drop lid. A necessary item for Japanese pickling. A wooden cover which is smaller in diameter than the pot opening, so lid will lay flat on top of food, and weight can be placed on top of lid."

Dou-ban-jiang—spicy Chinese brown bean paste, contains chili. Koji—a yeast-like rice mold that works primarily to convert starches into sugars during a fermentation process.

Mirin—a thick sweet wine made from glutinous rice,

used primarily for cooking. Miso—fermented soybean paste. Mochiko—glutinous rice flour. Mochi—glutinous rice that has been pounded until soft and sticky, then formed into cakes. Mochi-gashi—a confection made from glutinous rice.

Natto—fermented soybeans with sticky texture and strong aroma. Nori—edible seaweed, laver. Shoyu—Japanese soy sauce, considerably lighter than Chinese soy sauce, which should not be substituted for shoyu.

Suribachi—Japanese pestle and mortar (earthenware bowl with ridged edges). Tsukudani—food simmered with shoyu, sugar, mirin and water until almost all liquid evaporates.

Ume—Japanese plum; technically a species of apricot, but usually translated as plum. Umeboshi—pickled plum. Wakame—an edible seaweed, thinner and softer than konbu kelp. Wasabi—Japanese green horseradish, most familiar in the west as a mound of pungent green paste served with sushi or sashimi.

Note: Real wasabi is very expensive, and is a completely different plant from horseradish, from a different genus and species. Real wasabi is rarely found outside Japan and is much more potent than its imitation, “western wasabi”—a mixture of horseradish, mustard, and green food coloring. Address: Saratoga, California.

7792. So, Yan-kit. 1993. Yan-kit's classic Chinese cookbook. London: Dorling Lindersley Ltd., London. 239 p. Illust. (color photos). Index. 24 cm. [1 ref]

• **Summary:** This is a remarkable Chinese cookbook. Although the text of this book was copyrighted in 1984, the photographs, layout and design have been updated to 1993. The first 192 pages of the book are printed in full color on glossy paper. The author is a woman—lovely, cultured, and centered.

In the section on “Ingredients” is a two-page spread titled “Beans and bean products” (p. 12-13) of 12 fine color photos, each with a caption and Chinese characters. They are: (1) Bean curd, fresh [fresh tofu]. (2) Bean curd, puffed [deep-fried tofu puffs], used to absorb tastes and juices. (3) Bean curd sheet [thin dried yuba sheet]; must be moistened before use. (4) Black beans, fermented [fermented black soybeans]. “Whole soybeans preserved with salt and ginger.” (5) Red beans (azuki). (6) Red bean paste: a thick paste made from puréed, sweetened azuki beans, often used a filling for sweets.

(7) Bean curd “cheese,” red fermented [Fermented tofu with ang-kak], with salt and rice wine. (8) Bean curd “cheese,” white fermented [Fermented tofu], with or without chili. (9) “Crushed yellow bean sauce: purée of fermented yellow soybeans, wheat flour, salt and water” [with fermented black soybeans]. (10) “Szechwan [Sichuan] chili paste: spicy hot paste of dried chili and crushed yellow bean sauce.” (11) “Soybean paste: paste of crushed soybeans combined with chili, sugar and salt.” (12) “Yellow beans in salted sauce: Whole yellow soybeans fermented with salt,

wheat flour and sugar” [with fermented black soybeans].

Also in the section on “Ingredients” is another two-page spread titled “Sauces, oils, fats, wines and vinegars” (p. 26-27) which states: “Soy sauce is the most basic but also the most important seasoning. Used with salt, it helps to turn simple ingredients into Chinese cuisine.” Shallow, round “viewing” dishes contain: (1) Thin soy sauce. (2) Thick soy sauce. (5) “Hoisin sauce: soybeans, wheat flour, salt sugar, vinegar, garlic, chili, and sesame oil. (6) “Sweet bean sauce: Made from crushed yellow bean sauce combined with sugar. Note: The four vegetable oils shown are corn oil, sesame oil, peanut oil, and hot chili oil.

Soy related recipes (the page with recipe appears before the page with the photo): Bean curd soup (p. 58, 57). Steamed prawns in mixed bean sauce (with “1 tablespoon fermented black beans,” p. 78, 77). Bean curd soup with fish stock (with “2 cakes bean curd, drained,” p. 81, 83). Stir-fried clams in black bean sauce (with “1½ tablespoons fermented black beans, rinsed, mashed with 1½ teaspoons sugar,” p. 88, 87). Steamed trout with black beans and garlic (with “2 tablespoons fermented black beans, rinsed and partially mashed with ½ teaspoon sugar,” p. 95, 93). Willow chicken in black bean sauce (with “3 tablespoons fermented black beans, rinsed and mashed,” p. 106, 109). Soy sauce chicken (with “½ pint thick soy sauce,” p. 116, 115).

Green pepper beef in black bean sauce (with “2½ tablespoons fermented black beans, rinsed and mashed with ¼ teaspoon sugar and 1 teaspoon oil,” p. 142, 141). Bean curd puffs (deep-fried tofu, p. 152). Eight-treasure vegetarian assemblage (with “1 tablespoon fermented red bean curd cheese, mashed with 1 teaspoon own juice or water” and “8 bean curd puffs, halved,” p. 153, 151). Wheat gluten (homemade, p. 156-57). Red-braised gluten (p. 157, 155). Pi pa bean curd (The “pi pa” is a celebrated Chinese musical instrument, p. 158-59). Pock-ma bean curd (“This internationally famous Szechwan dish was the creation of the wife of chef Ch'en Shen-fu, who worked in the [provincial] capital, Ch'eng-tu [Chengdu] during the 2nd half of the 19th century. If pockmarks on her face earned her this rather derogatory nickname, ‘Pock-ma’ or ‘Pock-woman,’ they also immortalized her bean curd dish” [Mapo doufu]. Ma stands for “mazi” which means a person disfigured by pockmarks. Po translates as “old woman,” p. 159, 161).

Deep-fried bean curd in earthen pot (with “4 cakes bean curd, drained,” p. 162, 161). A vegetarian menu (of the six dishes shown, 2 contain tofu, p., 168-69). Deep-fried bean paste sauce with noodles (with “1½ pounds ground yellow bean sauce,” p. 185, 181).

Deep-fried five-spice rolls (from Fukien, with “1 package dried bean curd sheets [yuba] {usually 8 ounces, containing 8 sheets, each 13 by 6 inches},” p. 195). Eight-treasure bean curd (“The 18th-century poet and official Yüan Mei, wrote a cookery book called Sui-yüan Recipes, a unique legacy of his times from a Chinese man of letters.

In the recipe called “Prefect Wang’s Eight-Treasure Bean Curd,” Yüan Mei briefly outlined how the dish traced its origin to the Imperial kitchen.” Includes “2 cakes bean curd, drained,” p. 215, 149). Bean curd in simple sauce (p. 219). Stir-fried spinach in bean curd “cheese” sauce (with “2½ to 3 cakes white bean curd ‘cheese’ with chili,” p. 220).

A Glossary (p. 227+), which starts with a page of definitions of “Beans and bean products,” defines the same items whose photos appear on pages 12-13. Likewise for the glossary page on sauces (p. 231). Address: England.

7793. Tamura, Linda. 1993. *The Hood River Issei: An oral history of Japanese settlers in Oregon’s Hood River Valley.* Urbana and Chicago, Illinois: University of Illinois Press. xli + 337 p. Foreword by Roger Daniels. Illust. Index. 23 cm. [605* endnotes]

• **Summary:** A superb book, carefully researched and well. By telling, in depth, the story of one small community of Issei in Hood River, Oregon, from their youth in Japan until their return home after the brutal internment camps, she captures the exquisitely the story of the ordeals faced by the first generation of Japanese (such honest, hard-working people) in racist America. Through her many interviews, the Issei are able to speak for themselves, in their own words, throughout this book.

Soy-related passages: funyu = fermented bean cake = 59! miso = p. 65, 67, 77. Soy sauce = 25, 26, 66, 75, 138. soybean = p. 26.

Page 58: Sekihan (steamed rice mixed with red beans [azuki]). Page 134: O-hagi (sweetened bean jam filled with mashed rice).

Linda Tamura is a native of Hood River and a third-generation Japanese American. Address: Prof. of education and chair of the Education Dep., Pacific Univ., Forest Grove, Oregon.

7794. Tran, Van Lai. 1993. Country report 15–Vietnam. In: N. Chomchalow & P. Narong, eds. 1993. *Soybean in Asia: Proceedings of the Planning Workshop for the Establishment of the Asian Component of a Global Network on Tropical and Subtropical Soybeans.* Bangkok, Thailand: FAO Regional Office for Asia and the Pacific. viii + 218 p. See p. 143-150. RAPA Publication (FAO), No. 1993/6.

• **Summary:** Contents: (1) Introduction. (2) Production: trend, major growing seasons and cropping systems, constraints, resolving the constraints, future research. (3) Processing, utilization and marketing: Consumption, processing, marketing, constraints, resolving the constraints. (4) Resources: Personnel, seeds. (5) On-going research projects. (6) Information required. (7) Conclusion.

Tables: (1) Area, yield, and production of soybean in Vietnam, 1970-90. (2) Soybean production constraints in Vietnam. (3) Several research findings on soybean breeding and farming patterns. (4) Identified constraints for soybean

production in Vietnam. (5) National requirement for food and production of soybean. (6) Methods of soybean processing of Vietnam. (7) Constraints to soybean processing, utilization, and marketing. (8) Future research priority for soybean in Vietnam. (9) Number of scientists working on soybean research. (10) Training needs on a priority basis. (11) Soybean varieties of high yield potential.

Introduction: “Soybean has been cultivated in Vietnam for a long time. Le Quy Don, in his book “*Van Dai Loai Ngu*”, written in 1773, mentioned about soybean cultivation. It is the second most important legume in Vietnam. All soybean products are used as human foods and animal feed because of its high food value (40-50% of protein and 20-25% of oil).

“The Government of Vietnam, which is conscious of the importance of soybean and its role of human food and animal feed, and the possibility to increase its production, has listed soybean as the number two most important crop after groundnut in her agricultural development policy.”

Table 1: Area planted to soybeans in Vietnam grew from 17,078 ha in 1970 to 149,000 ha in 1990, projected to grow to 300,000 ha in the year 2000.

Production of soybeans in Vietnam increased from 5,277 tonnes (metric tons) in 1970 to 146,020 tonnes in 1990, projected to grow to 420,000 tonnes in the year 2000.

Yield of soybeans in Vietnam grew from 309 kg/ha in 1970 to 980 kg/ha in 1990, projected to grow to 1,400 kg ha in the year 2000.

“Most of the soybean produced in Vietnam is consumed as human food prepared by traditional methods, which include fermented products such as soysauce, soypaste (miso), soycurd (fermented tofu), and soycheese, and non-fermented products such as soymilk, soycurd (tofu) and soybean oil.

Note: This is the earliest English-language document seen (March 2009) that uses the term “soypaste” to refer to miso.

Concerning the Vietnamese names of these foods, Huong Quan Nguyen (Zomore Quan) writes, in reply to a question from Soyinfo Center. 2008. Aug. 17. Soy sauce = “xi dau” (the Vietnamese “d” written without the bar across the vertical stroke is pronounced “Z”).

Soy paste = “tuong dau nanh” or “tuong Cu Da.” “Tuong” is a generic term meaning “sauce.” As you know, Cu Da is the name of the village famous for its soy paste. “Tuong Cu Da” literally means “sauce made in Cu Da Village.” Soy paste is made in many villages in North Vietnam, not just in Cu Da. I have heard that Tuong Ban and Tuong Pho Thoi are just as good as Tuong Cu Da.

Soy curd = “dau hu” (which is unfermented. Once the soy curd is fermented, it is referred to as “chao”).

Soy cheese = “chao” (this word has no diacritical mark).

Note: Zomore asked six Vietnamese people who are knowledgeable about soyfoods and all are aware of only one

kind of fermented tofu in Vietnam; therefore they cannot imagine what fermented “soycheese” is. Address: Legumes Research and Development Centre, INSA, Dong Da, Hanoi, Vietnam.

7795. Verreault, Georges. 1993. *Journal d'un prisonnier de guerre au Japon, 1941-1945* [Diary of a prisoner of war in Japan, 1941-1945]. Sillery, Quebec, Canada: Septentrion. 313 p. See p. 161. Illust. Portraits. 23 cm. [Fre]

• **Summary:** On this day of fish, we had fish prepared in what the Japanese call “sweet Soya sauce.”

Note: No French name for this sauce is given. Address: Canada.

7796. Champlain Industries Inc. 1993? Standard HVP Hydrolyzed Vegetable Protein. Luxor premium products. Specialty products. Clifton, New Jersey. 9 p. Manufacturer's catalog and/or price list. Undated. Address: P.O. Box 3055, 25 Styertowne Rd., Clifton, New Jersey 07012. Phone: 1-800-222-4904.

7797. **Product Name:** Veg-A-King Soya Sauce.

Manufacturer's Name: Harcan Kingsoya Co. Ltd. (Importer-Bottler). Made in China.

Manufacturer's Address: 33 Casebridge Court, Units 5&6, Scarborough, ONT M1B 3J5, Canada. Phone: (416) 283-8328.

Date of Introduction: 1993?

Ingredients: Water, soya beans, wheat, salt, sugar, sodium benzoate.

Wt/Vol., Packaging, Price: 17 fl. oz bottle, and 2 litre or 4 litre plastic jugs.

How Stored: Shelf stable.

New Product–Documentation: Leaflet (in English and Chinese) describing product, with color photos of jugs and label, obtained in Ontario, Canada. 1994. Oct. “Harcan Kingsoya Co. Ltd. is a Chinese/Canadian joint venture company set up to bring you authentic soyfoods and exotic sauces. Our Chinese partner is a leading food manufacturer and exporter in Heilongjiang Province, China... Veg-A-King soy sauce is our flagship product. We use a traditional recipe which has a long history in China. Brewed naturally from premium soybeans, wheat and bran, it contains no artificial colours or added flavourings.”

Talk with Mark O'Neill of Chatham, Ontario, Canada. 1994. Dec. 5. Harcan does no fermentation in Canada. They import a condensed soy sauce (which is almost in solid form) from China, dilute it with water, bottle and sell it.

Talk with Duff MacKinnon of the Ontario Ministry of Agriculture and Food in Guelph. 1995. March 6. Harcan exports soy sauce to Europe.

7798. *SoyaScan Notes*. 1994. Keywords used with more than 1,000 documents in the SoyaScan database, as of 1 January

1994 (Overview). Jan. 1. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** 1. USA 24,636. 2. Commercial soy products 6,565. 3. Japan 5,948. 4. Tofu 5,122. 5. Soymilk 3,884. 6. Illinois 3,642. 7. Soy sauce 3,387. 8. California 3,129. 9. • **Summary:** Contents (each accompanied by tables and charts; each section covers the years 1991-1994): Imports of soya beans for sowing (almost all come from the USA, followed by Chile and Japan). Imports of soya beans for oil extraction (almost all come from the USA). Imports of soya beans, nes [meaning unclear] (almost all come from USA, followed by Taiwan, China, and Japan).

Imports of soya-bean oil crude, whether or not degummed (almost all comes from the USA, followed by France). Imports of soya-bean oil and its fractions, refined but not chemically modified (almost all comes from the USA, followed by Singapore). Imports of veg fats & oils & fractions hydrogenated, inter or re-esterified, refined or not (almost all comes from the USA followed by UK and Netherlands). Imports of animal or veg fats & oils...

Imports of soya bean flour and meals. Imports of soya sauce (main suppliers are: USA, China, Japan, Hong Kong, Taiwan, Philippines, South Korea). Imports of protein concentrates and textured protein substances (almost all comes from USA). Imports of Soya-bean oil-cake and other solid residues, whether or not ground or pellet (almost all comes from USA). Imports of bran, sharps and other residues of leguminous plants, pelleted or not (almost all comes from

USA).

Exports of soya beans for sowing (most goes to USA, followed by France, Germany and Austria). Exports of soya beans, for oil extraction (most goes to Netherlands, followed by France, Portugal and Spain). Exports of soya beans, nes (most goes to USA, followed by Hong Kong and Singapore). Exports of soya bean flour and meals (almost all goes to USA). Exports of soya-bean oil crude, whether or not degummed (almost all goes to the USA). Exports of soya-bean oil and its fractions, refined but not chemically modified (almost all goes to Pakistan, followed by USA). Exports of veg fats & oils & fractions hydrogenated, inter or re-esterified, refined or not (almost all goes to the USA). Imports of animal or veg fats & oils... (almost all goes to USA).

Exports of soya sauce (main buyers are UK, Japan, United States, Finland, Cuba).

Exports of protein concentrates and textured protein substances (almost all goes to USA). Exports of Soya-bean oil-cake and other solid residues, whether or not ground or pellet (almost all goes to USA). Exports of bran, sharps and other residues of leguminous plants, pelleted or not (almost all goes to USA). Address: Trade Evaluation and Analysis Division, International Markets Bureau, Markets and Industry Services Branch, Agriculture Canada, Ottawa, Ontario, Canada.

7800. Shurtleff, William; Aoyagi, Akiko. comps. 1994. Soyfoods industry and market—Bibliography and sourcebook, 1985 to 1993. Lafayette, California: Soyfoods Center. 361 p. Subject/geographical index. Author/company index. Language index. Printed 11 Jan. 1994. Published Jan. 1995. 28 cm. [1985 ref]

• **Summary:** This is the second of the two most comprehensive books ever published on the soyfoods industry and market worldwide.

In May 1982 the first study of the burgeoning soyfoods industry in the Western world was compiled by Shurtleff and Aoyagi, and published by Soyfoods Center. In April 1985 the fifth edition of that book, titled *Soyfoods Industry and Market: Directory and Databook* (220 pages), was published. It contained statistics through 1984, the market size and growth rate for each soyfood type, rankings of leading soyfoods manufacturers of each soyfood type and the amount each produced, analyses, trends, and projections. This book is published to update the 1985 market study.

In the decade since 1984 the soyfoods market has continued to grow at a very healthy rate, with some soyfood types (such as soymilk) growing at a truly astonishing sustained rate—in both the USA and western Europe—as the statistics in this book show so vividly. In 1975 only 75 new commercial soyfood products were introduced in the USA, yet that number skyrocketed to 217 in 1979, reaching an amazing 422 new products in 1987.

During the decade from 1984 to 1994, Soyfoods Center has invested most of its time and resources in the production of SoyaScan, the world's largest computerized database on soyfoods, which contains more than 44,500 records as of Jan. 1994. This database also includes a wealth of carefully researched statistics and analyses of the soyfoods market; those from the start of 1985 to the end of 1993 are contained in this book. Its scope includes all known information on this subject, worldwide. Its focus, however, is statistics, analyses, and trends concerning the soyfoods industry and market in the United States and Europe.

In May 1990 Soyfoods Center conducted an in-depth study of the tofu market in Europe (137 pages), and in July 1990 of the soymilk market in Europe (261 pages). All original interviews and published records from both of these market studies, plus a summary of each study, are included in the present book.

The SoyaScan database is composed of individual records. One record might be an original interview with the head of the largest soymilk company in Europe, on the size and growth of the soymilk market in Europe, and new trends in that market, conducted by William Shurtleff of Soyfoods Center. Another might be a published article or an unpublished document concerning the growth of the market for soy yogurts or soy sauce in America.

This book documents the growth of each product category in every country worldwide. The book contains three extensive and easy-to-use indexes: A subject/geographical index, an author/company index, and a language index. These allow you to find the exact information you need on the soyfoods industry and market quickly and easily. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

7801. United Soybean Board; Nebraska Soybean Program. 1994. Designed for life: A closer look at the versatile soybean's contribution to human health (Brochure). Lincoln, Nebraska. 12 panels. 23 x 10 cm each. [1 ref]

• **Summary:** Contents: Soybean fiber. Soybean protein (in soy flour, isolates, concentrates). Soybeans: The newest and oldest of designer foods. Finding and using soybeans: Miso, tofu, natto, tempeh, full fat flour, soymilk, soynuts, soy sauce. Soybean oil: 85% unsaturated fat, no cholesterol, high in polyunsaturates, hydrogenation and *trans* fatty acids. Once upon a time ("circa 1500 BC, Yu Xi-ong and Gong Gang-shi, who were either bandits or warlords depending on your perspective..." discovered the soybean. Note: This story has no basis in historical fact). The soybean: Health insurance in a pod.

Photos show: Two hands holding up a large Chinese bowl of miso soup containing squares of tofu. A table set with dishes of various East Asian soyfoods. Charts: Bar charts showing percentage of saturated, monounsaturated, and polyunsaturated fatty acids in soybean oil and other oils

and fats. Nutritional analysis of 1 cup of cooked soybeans.

Note: This brochure was developed for the United Soybean Board (USB) by the Evans Group in Seattle, Washington. It was mailed mostly to food manufacturers. Address: Lincoln, Nebraska.

7802. United Soybean Board. 1994. Soybeans: Unlocking the secret to good nutrition. Healthcare guide. St. Louis, Missouri. 8 p. 28 cm. [5 ref]

• **Summary:** Contents: A critical food source from the dawn of history. The only vegetable that contains complete protein. World soybean production (1992/93, bar chart). The most versatile food on earth. Health benefits of soy foods (discusses only soybean oil!). Nutritional analysis of soybeans, kidney beans, and peanuts. Bar chart showing the fatty acid composition of soybean oil and other oils and fats (soybean oil is “the balanced oil”). Hydrogenation and health. Cis and *trans* fatty acids. Soybean oil’s place in the diet. Whole soybean foods: Tofu, tempeh, miso, natto, soy sauce, full fat soy flour, soy “nuts” and soymilk. Soybean fiber (the outer hull). Soy protein products: Defatted soy flours, soy isolates, soy concentrates. Isoflavones (incl. Genistein). Soybeans, the “All American” legume. For more information call 1-800-Talk-Soy.

Note: This brochure was developed for USB by the Evans Group in Seattle, Washington. It was mailed mostly to dietitians, nutritionists, and members of the food industry. It focused more on soy oil than on soy protein. Address: St. Louis, Missouri.

7803. Clifton, Claire. 1994. Flavor of the month: Soy sauce. *Guardian (England)*. Feb. 26. p. A39.

• **Summary:** The writer and Yan-Kit So, the Chinese cookery writer (a woman) tasted more than a dozen soy sauces. They were astonished to find how much the quality varied. Fo Shan Superfine, made in Guangdong, China, was considered the best. The other two brands they liked were Kikkoman (Japanese) and the Kim Ve Wong brand from Taiwan.

Yan-Kit So’s latest cookbook is the magnificent *Classic Food of China* (Macmillan).

7804. Asbridge, David D. 1994. Agricultural importance of soybeans. In: Mark Messina, ed. 1994. First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease: Abstracts. Chesterfield, Missouri: United Soybean Board. 27 p. See p. 6. Held 20-23 Feb. 1994 at Mesa, Arizona.

• **Summary:** “Soybeans are omnipresent in American life... Last year, the average American consumed only four pounds of soyfoods in the form of soy protein products, tofu, soymilk, tempeh, miso, soy sauce, and soynuts. They consumed over 40 pounds of soybean oil in the form of margarine, salad dressings, cooking oils, and shortening. They consumed 204 pounds of meat, poultry, and eggs.

Soybean meal, the most widely used processed feed ingredient in the U.S., is the leading source of protein for meat and poultry animals. To meet this huge demand for soybeans, vast resources are needed. In 1992, 440,000 U.S. farmers planted 59 million acres of soybeans. That’s enough to nearly cover the entire state of Arizona. The farm value of the 2.2 billion bushel crop was more than \$12 billion dollars. Once farmers sold the 1992 crop, the majority of the soybeans were either crushed into meal and oil, or exported. The meal and oil were valued at \$6 billion and \$3 billion, respectively. Exports, which historically make up one-third of the U.S. soybean crop, directly reduced the U.S. trade deficit by almost \$4.5 billion dollars and indirectly employed 126,600 people. It has been estimated that since 1975, the value of the soybean crop has been about \$275 billion in nominal terms. The multiplier effect brings the total impact to the US economy of soybean production to \$800 billion.” Address: American Soybean Assoc., 540 Maryville Centre Drive, Suite 390, P.O. Box 27300, St. Louis, Missouri 63141-1700.

7805. Andoh, Elizabeth. 1994. Tokyo’s rich array of regional dining. *New York Times*. March 6. p. XX6, XX19 (Sunday).

• **Summary:** Contains excellent reviews of the following Tokyo restaurants: Konomi, Kakiden, Itosho, and Shigeyoshi. The latter served “warabi ferns wrapped in fresh yuba (broad ribbons of bean curd [tofu])” and a “soup, which contained cubes of tofu and strips of fried bean curd... well seasoned with a burnished brown miso.”

Note: This brief description of yuba is inaccurate; yuba is made from soymilk, not tofu. Address: Japan.

7806. *Toyo Shinpo (Soyfoods News)*. 1994. Miso no shukka juncho. Shōyu wa tomoni genshō. 93 nen no seisan shukka [Miso and shoyu production and shipment in Japan for 1993: Miso is increasing but shoyu is decreasing]. March 21. p. 5. [Jap]

• **Summary:** In 1993 in Japan 559,238 tonnes (metric tons) of miso were produced and 578,024 tons were shipped. Also in 1993 some 1,163,843 kiloliters of shoyu were produced and 1,189,896 kiloliters were shipped.

7807. Wood, Brian J.B. 1994. Bean Products Ltd.: The earliest known company to make fermented soy sauce in the United Kingdom (Interview). *SoyaScan Notes*. March 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Brian Wood was born in Birmingham, England. He earned his BSc and PhD degrees at Birmingham University in the Malting, Brewing, and Applied Biochemistry Department, where he studied lactic acid bacteria for his PhD. In 1959 he came to the USA on a fellowship from the National Cancer Institute for post-doctoral research at the Dept. of Biochemistry and Biophysics, University of California at Davis. With Lloyd

Ingraham, he studied the mode of action and kinetics of the enzyme tyrosinase. One day in 1960 Prof. Herman Pfaff, who taught food science and microbiology at Cal-Davis and is still one of the world's leading authorities on yeasts, took a group of students (including Brian) taking a course of his to visit Lucky Lager (a beer brewery) in or near San Francisco. During the trip they also visited a small Japanese shoyu factory in San Francisco (probably in Chinatown) that made fermented soy sauce. There Brian first became interested in the soy sauce fermentation process. He wondered what involvement lactic acid bacteria might have in the process.

Then he studied with Prof. Goldman in the Department of Zoology, and in 1961-62 traveled to the Antarctic, where he studied microalgae. In 1962 he returned to Britain, spent 6 years with Unilever, then in 1968 took up his present appointment teaching and doing research at the University of Strathclyde (in Glasgow, Scotland), in the Department of Applied Microbiology (which in 1982 was incorporated into the Dept. of Bioscience and Biotechnology).

Professor Morris, the head of the department, had served in East Asia during World War II and had considerable appreciation of the importance of Oriental foods. He was trying to build a link with Singapore, and assigned Yong Fook-Min of Singapore to work with Brian for his MSc. There he and Brian began to investigate the role of lactic acid bacteria in East Asian soybean fermentations, starting with soy sauce. Yong was an exceptionally hard worker and his 1971 MSc thesis produced the four key papers on which all later work was founded. In 1974 Yong and Wood wrote "The Microbiology and Biochemistry of Soy Sauce Fermentation," a definitive 38-page study containing 270 references. After that, Brian had three students (including Sumbo H. Abiose, a Nigerian woman) complete PhD's and write doctoral dissertations on aspects of fermented soyfoods.

In 1974 Goel, Yong, and Wood applied for a British Patent on a quick method for making soy sauce; it was issued in 1976. In about 1978 Brian became interested in starting a commercial soy sauce factory in Scotland. So that year he initiated discussions with Edward North, head of the university's Center for Industrial Innovation. North referred Brian to Dr. Colin Walker and together in late 1979 they got a grant of £84,000 from the Wolfson Foundation, to study the feasibility of starting such a factory and what problems would be involved in scaling up from laboratory to commercial scale. By 1980-81 it became clear that the project was feasible. The University of Strathclyde provided some of the start-up capital, additional money came from remaining Wolfson Foundation funds, and Brian's group obtained overdraft facilities from the university's bank (The Bank of Scotland), which meant they could borrow a specified amount of money and the university would guarantee the loans. Since no individual researchers put up any money, the university owned the soy sauce company. In April 1982 the group established a company named

"Bean Products Ltd." in Cumbernauld, which is about 11 miles northeast of Glasgow. They selected Cumbernauld for various reasons, one of which was that advantageous rental terms were available there. They moved into a new rental structure, in a space with 8,000 square feet. They had a rent holiday for 1-2 years. Employees of the company consisted of a salaried factory manager (Christopher Corden), a salaried accountant/office and business manager (Michael Riddle), a PhD graduate of Brian's department served as company microbiologist, biochemist, chemist etc. (Dr. Jennifer Mackie), and they had about 4 workers who made soy sauce. Brian was employed by the university, not by the company. Some weeks he spent a great deal of time at the factory and other weeks he spent little or no time there—in part because of the demands of his extensive teaching schedule. Dr. Colin Walker spent more time at the plant than Dr. Wood. There they made one Southeast Asian-style fermented soy sauce for the UK wholefoods market. The main ingredients were whole soybeans and koji that was made in small plastic trays—ordinarily used for carrying bread. Roughly equal parts of soybeans and roasted cracked wheat were used. The soy sauce was fermented for about 3 months at 38-40°C using a temperature controlled fermentation. The "salt mash" (moromi) was inoculated with yeasts and bacteria. A dark sugar preparation was added to the finished sauce to sweeten the flavor, darken the color, and thicken the consistency. The company bottled a small amount of the finished soy sauce and sold it mostly to health food shops under two labels: "Bean Products Japanese-Style Soy Sauce" and "Bean Products Chinese-Style Soy Sauce." But most of their product was blended with other ingredients after the fermentation to the specifications of other companies. It was shipped to these companies in bulk plastic containers; some bottled it under their own labels, but most used it as an ingredient in foods. Cauldron Foods used it as an ingredient in their tofu burgers.

After a while the university, which owned Bean Products, became uneasy as money flowed out during the startup process. So in May 1984 they sold the company to Nestle (for a relatively low price), and it was renamed Nestle Foods—Cumbernauld. After Nestle bought the plant, Dr. Wood became inactive in the company. Jennifer Mackie, Chris Corden, and Michael Riddle stayed with the company. Nestle sold their soy sauce under the Sarsen's brand—the same brand they used for their vinegar, pickles, and other related products. Nestle continues to operate the plant at its original site (though they have expanded into an additional 4,000 square feet) using the same basic process. Dr. Wood estimates that they make about 1,500 metric tons a year of the Chinese-style fermented soy sauce. Most of it is either sold to other food processors, or to other companies who package it under their own label for resale to consumers.

Concerning other early soy sauce manufacturers in the UK, Brian vaguely remembers hearing that an Indian

entrepreneur was making soy sauce in the area of London at about the same time as Bean Products Ltd. He owned a number of food-related companies which sold mostly to the local Indian market. When Colin Walker was in London in about 1980 or 1981 he tried to visit the plant, but failed. Note: This company may have been either United Breweries International (UK) Ltd., or Soyco, both located in London. Address: Dep. of Bioscience and Biotechnology, Univ. of Strathclyde, Glasgow, Scotland.

7808. Hymowitz, Ted. 1994. New developments related to the introduction of soybeans to Peru (Interview). *SoyaScan Notes*. March 31. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Recently Ted was in Peru, where he met a native Peruvian at the University of San Marcos who has a PhD in archaeology. He is an expert on the emigration of the Chinese to Peru and their culture in Peru, and he has written a major article about the food of the Chinese in Peru. Although he did not have any information at hand about the introduction of soybeans to Peru by the Chinese, he seemed very interested in the question and he is now searching for information related to the early arrival of soybeans in both Peru and Brazil. Ted speaks Portuguese. The Peruvian man told Ted that the first Chinese arrived in Brazil in 1813, and the first soy sauce factory arrived in Peru in the 1930s or 1940s. Ted is quite sure the soybean arrived in South America before the earliest date that is now known (1882). He thinks it may have arrived in Peru before Brazil since many more Chinese emigrated to Peru than to Brazil in the early days. Some 100,000 Chinese went to Peru but only a few went to Brazil. Not many soybeans are grown today in Peru, and not many soy products are made there.

Update—1996 Jan. 15. Ted's contact in Peru has been through all the early Chinese records in Brazil and he can find no mention of the soybean. Address: Prof. of Plant Genetics, Urbana, Illinois.

7809. Van Rysdam, Casey. 1994. New developments with Soya Kaas and cheese alternatives (Interview). *SoyaScan Notes*. April 26. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Soya Kaas, Inc., which was owned by Richard McIntyre and his wife, no longer exists. Previously it only existed on a piece of paper from the viewpoint of trademark registration. Soya Kaas, the cheese alternative, is now manufactured by a company named Swan Gardens in Atlanta, Georgia. "In February 1992, when the McIntyres decided to sell their business, American Natural Snacks (ANS) worked with them to structure an agreement that met the needs of both parties. We were both pleased with the result and it was a true 'win-win.'" Richard is no longer affiliated with Swan Gardens, but he continues to have a very good relationship with the company. ANS had been the

exclusive national marketing and distributing company for the brand. So when Richard decided he wanted to leave the company, ANS was the logical choice to buy it (though they did not buy the building, which they still rent from Richard). From the standpoint of the trade and of consumers nothing really changed after the sale. The invoicing, the shipping, etc. remained the same. Swan Gardens is now an operating division and wholly owned subsidiary of ANS, and ANS is a wholly owned subsidiary of Tree of Life. Tree of Life is a publicly owned company because its parent company [Royal Wessanen, NV, The Netherlands] is publicly owned.

"Richard is an incredibly bright and innovative person. He is one of those rare people who can see a new idea, grab it, identify it, and make it a commercial reality. He had already visualized and developed his own soy cheese, Soya Kaas, and taken it past the laboratory stage when Soyarella was introduced. He did not get the idea from Soyarella. He both an excellent entrepreneur and a good manager and businessman. He built Swan Gardens into a strong, well-managed business."

ANS has two basic activities: Food manufacturing and contract packaging of bulk foods for sister companies that are distribution divisions (everything from rebottling of oils and Japanese shoyu and tamari to bulk trail mixes). They are a national manufacturer and marketer of confections, with lines like Carafection, Cocofection, Chocofection, Chatfields, products like carob and chocolate chips that are malt-sweetened and dairy free, alkaline-free cocoa powder. They sell these products nationally to both Tree of Life and to Tree's competitors. They have 5-6 national brands and about 50 products (SKUs), and Soya Kaas is one of the major brands.

Within the Soya Kaas family are the core items (12), bulk in 7-lb loaves, 2 shredded items, 3 cream cheeses, 2 Veggie Kaas spreads (without casein, but they have never promoted it as "dairy free"). A new item will be Soya Kaas slices; most sliced cheeses are extruded, not sliced, and they are made on equipment that is extremely expensive—whether or not the slices are individually wrapped.

One of the challenges Casey's business has been marketing Soya Kaas fairly and honestly with respect to the milk protein issue, without detracting from its potential. The current labels always state clearly that the product contains casein which is a milk protein, and it does not say "Dairy Free" (which would be legal). Yet neither does it say "Warning! A cow died for this product" [which is, of course, not true]. His company has consumer flyers that tell the story of caseinate, explaining what it is, where it comes from, and why it is used in Soya Kaas products. Casey agrees that many people who consume cheese alternatives that contain casein think (mistakenly) that they are truly non-dairy products.

Casey wonders whether the soy oil used in many cheese alternatives is hydrogenated or unhydrogenated. He works

very hard and it costs him more money to be sure that the oil in Soya Kaas is not hydrogenated. Consumers want unhydrogenated oil since they believe it is safer.

Follow-up letter (fax) of 6 May 1994 in response to enquiry. Over the last two years, as packaging ran out and they reordered or redesigned labels, they stated in the ingredients listing that casein is a milk protein. In July 1989 the Soya Kaas plant moved to its present location at 6029 Lagrange Blvd. in Atlanta. It had previously been at 218 Laredo Dr., Decatur, Georgia 30330. Address: President, American Natural Snacks, P.O. Box 1067, St. Augustine, Florida 32085-0410. Phone: 904-825-2057.

7810. Kath. Gemeinden St. Johann und St. Joseph. 1994. Soja fuer Ghana [Soya for Ghana]. Duisburg-Hamborn, Germany. 24 p. Illust. 21 cm. [Ger]

• **Summary:** Each year this group of German Catholics has one development-help project in Ghana. In 1991 and 1992 it was trees for Ghana. In 1993 it was soya for Ghana. Contents: Development help? by Gottfried O. Praem. Africa's need (incl. population growth, demographics, per capita GNP, and infant mortality). Our new project: Soya for Ghana. Why soya? Yields a variety of foods, healthy, ethical (in relation to eating animals and protecting the environment), good for agriculture. History of the soybean plant. Food products from the soybean: Soymilk, tofu, soy protein, soy sauce, miso, tempeh, soy oil, soy sprouts. Cultivation of soybeans in northern Ghana. Planting and harvest. Ghana—the land and its agricultural products. Teaching hygiene in Ghanaian. Dear money: Where does it come from and how is it spent? Past projects in Ghana and the 1993 Soya for Ghana project. The Bole mission station in northern Ghana (90,000 inhabitants of which 4,000 are Christian). Recipes. A talk with Brother Rudolf, age 62, during his visit to Hamburg in Sept. 1993. Address: Duisburg-Hamborn, Germany.

7811. *SoyaScan Notes*. 1994. Foods of East Asian origin that the macrobiotic movement/community has played a leading role in introducing to America, starting in about 1960 (Overview). May 10. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** These include brown rice, rice cakes, miso (many types), shoyu (traditional Japanese-style soy sauce), tamari (Japanese soy sauce containing little or no wheat; prior to about 1980 many practitioners of macrobiotics referred to natural shoyu as “tamari,” thus inadvertently popularizing real tamari, which now may be better known in the USA than it is in Japan), natto (fermented soybeans), seitan (wheat gluten seasoned with a soy sauce broth; this word was coined by George Ohsawa), amazake (thick rice beverage), umeboshi salt plums, sea vegetables (kombu, wakame, hijiki, nori, etc), tofu, soymilk, alternatives to dairy products (macrobiotics do not consume dairy products),

buckwheat noodles (*soba*), kuzu, rice syrup, barley malt syrup, azuki beans, sesame seeds, sesame salt (*gomashio*), daikon (white radish) and daikon pickles, kabocha (Hokkaido pumpkin), shiitake mushrooms (also known as Chinese black mushrooms, they have a firm “meaty” texture), burdock, jinenjo (glutinous yam).

They have done this by starting and running many natural food companies to import, distribute, manufacture or grow these foods; by writing cookbooks and other books about these foods; by teaching classes (including many cooking classes in which these foods are used); by influencing other people to do all of the above.

The Japanese names of many of these foods have become anglicized and are now the standard English-language names.

The macrobiotic movement also played a major role in introducing “tahini” or sesame butter (a Middle-Eastern food) to America, starting with George Ohsawa's book *Zen Macrobiotics* in 1960. Of the first 20 records in the SoyaScan database that mention “tahini,” 14 are associated with macrobiotics. Likewise, 22 of the first 50 records are associated with macrobiotics.

7812. Daley, Rosie. 1994. In the kitchen with Rosie: Oprah's favorite recipes. New York, NY: Alfred A. Knopf. xii + 130 p. Illust. Index. 20 x 19 cm.

• **Summary:** Note: Oprah is Oprah Winfrey, one of America's best known TV celebrities, famous—in part—for her lifelong struggle to control her weight, and for her Oprah Winfrey Show.

Contains 50 recipes that are low in fat, sugar, and salt. On pages 114-15 is Rosie's recipe for Chocolate Tofu Cake. The author says: “My version of chocolate cheesecake provides all of the treat with none of the guilt. I replace the typical bulk ration of cream cheese with tofu...” Other soy-related recipes: Cauliflower puree with peas (and brown rice miso, p. 20). Several recipes contain reduced-sodium soy sauce (p. 25, 33, 54, 88, 92, 102). Address: Chicago, Illinois.

7813. Kikkoman great grilled recipes and more. 1994. Lincolnwood, Illinois: Publications International. 95 p. May 17. 21 cm. Series: Favorite Brand Name Recipes, Vol. 5, No. 68.

• **Summary:** This color book is saddle stitched, so it looks like a magazine. Contents: Summertime and the grillings is easy with Kikkoman. From the butcher shop. Burgers, ribs & kabobs. Pleasing poultry. From the sea. Magnificent mealtime salads. Savory side dishes.

7814. Melina, Vesanto; Davis, Brenda; Harrison, Victoria. 1994. Becoming vegetarian: A complete guide to adopting a healthy vegetarian diet. Toronto, Canada: Macmillan Canada. x + 262 p. Foreword by Louise Lambert-Lagacé. Index. 26 cm. [20 ref]

• **Summary:** An excellent vegan sourcebook and cookbook by three registered dietitians. For the Contents and details, see the 1995 revised American edition.

Talk with Vesanto Melina. 1996. July 22. This book has presently sold about 25,000 copies in Canada alone. A revised U.S. edition was published in Nov. 1995 by The Book Publishing Co. in Summertown, Tennessee. Address: Canada.

7815. *Health Foods Business*. 1994. San-J brewery expansion. June. p. 55.

• **Summary:** San-J International's tamari soy sauce brewery, the world's first outside Japan, has expanded and added fermentation tanks to the facility. This has enabled the company to increase production by 75% as of April.

7816. **Product Name:** Mushroom Pâté, and Chestnut and Red Wine Pâté.

Manufacturer's Name: Cauldron Foods Ltd.

Manufacturer's Address: Units 1-2, Portishead Business Park, Portishead, Bristol, BS20 9BF, England. Phone: (275) 818448.

Date of Introduction: 1994. July.

Wt/Vol., Packaging, Price: 113 gm tray. Retails for £0.90 (7/94, England).

How Stored: Refrigerated.

New Product–Documentation: Spot in Soyfoods (ASA, Europe). 1994. Summer, p. 5. "Cauldron Foods introduces new patés." As part of their new line of vegetable patés, Cauldron has launched two varieties containing soya as an ingredient. Mushroom Pâté contains ground soybeans, and Chestnut and Red Wine Pâté contains soy sauce. The products are sold in major UK supermarkets and health food shops. A photo shows four packaged products.

7817. Dwyer, Johanna; Goldin, B.R.; Saul, N.; Gaultieri, L.; Barakat, S.; Adlercreutz, H. 1994. Tofu and soy drinks contain phytoestrogens. *J. of the American Dietetic Association* 94(7):739-43. July. [45 ref]

• **Summary:** Phytoestrogens, compounds with weak estrogenic activity such as isoflavones, coumestans, and resorcylic acid lactones (lignans), are found in several dozen plants eaten by humans, including some soy products. As the intake of soyfoods rises in the American diet, the activity of phytoestrogens may reach biologically effective levels. Phytoestrogens appear to have both estrogenic and antiestrogenic activity. They may also help prevent cancer. "Anticancer activity has been demonstrated by inhibition of tumor cell growth. Also, they appear to act in other ways that may inhibit tumor formation and growth, including inhibition of tyrosine kinase; inhibition of cell growth stimulated by epidermal growth factor; inhibition of steroid aromatase kinase and of DNA topo-isomerase; elevation of sex-hormone-binding globulin; and possibly lowering of

endogenous estrogen levels."

Of the various products tested, tofu contained the highest level of isoflavones. Different brands of tofu contain from 73.0 to 97.5 micrograms per gram (wet weight) of the phytoestrogen daidzein and 187.4 to 215.9 micrograms of genistein per gram. By comparison, the soy drink First Alternative (made by Protein Technologies International of St. Louis, Missouri) contains only 7.0 micrograms of daidzein per gram of weight and 21.0 micrograms of genistein. The two soy-based specialty formulas tested were nearly devoid of these two isoflavones.

The tofu products tested were: Kikkoman firm, Nasoya soft, Azumaya soft, and Vitasoy silken. The soy-based specialty formulas were Jevity Isotonic, Enrich, and Glucerna—each made by Ross laboratories, Columbus, Ohio.

Note: What is the isoflavone content of a typical 130 gm serving of tofu? 9.5 to 12.7 mg of daidzein and 24.3 to 28.1 mg of genistein.

A sidebar (p. 741) features an interview with Johanna Dwyer and Nora Saul (both women); their hospital happens to be located in Boston's Chinese community. "Journal: What are phytoestrogens? How do they function? Dwyer: Phytoestrogens such as isoflavonoids and lignans, are compounds found in certain plants that are inherently active or are converted by human intestinal microflora into biologically active, hormone-like substances. Phytoestrogens exert weak estrogenic activity, most likely attributable to their ability to activate estrogen receptors in cells such as those in the vagina, uterus, and mammary glands. Depending on the biological environment and their chemical structures, phytoestrogens can function as either estrogens or antiestrogens.

"For example, in premenopausal women, who have high levels of circulating estrogens, phytoestrogens may function as antiestrogens. This is because phytoestrogens that bind weakly at estrogen receptor sites may compete for a place on the estrogen receptors with endogenous estrogens, which have much stronger affinity for the receptor sites. On the other hand, in postmenopausal women, who have low levels of endogenous estrogens, phytoestrogens may function as estrogens. Although phytoestrogens only bind weakly at estrogen receptor sites, there is little other estrogen in circulation, so phytoestrogens do bind to estrogen receptors. At present, however, this explanation is based on hypotheses and must be tested."

"Journal: Why are these substances important biologically? Dwyer: A growing body of research suggests that phytoestrogens may reduce risks of certain cancers, especially hormone dependent diseases such as breast and prostate cancers." Address: 1. Prof. of Nutrition at the Tufts Univ. Schools of Medicine and Nutrition and director of the Frances Stern Nutrition Center, New England Medical Center, Boston, Massachusetts.

7818. Kevin, Kitty. 1994. Three centuries of quality: It's natural for Japan-based Yamasa Corporation. *Food Processing (Chicago)* 55(7):24-28, 30-31. July.

• **Summary:** This is the first of a series of two articles in this issue about Yamasa, the world's second-largest shoyu manufacturer. It focuses on Yamasa's history, its production facilities in Japan, and its decision to build a shoyu manufacturing plant at Salem, Oregon, in the USA. The company was founded in 1645 by Gihei Hamaguchi, of Kishuu, who moved to Choshi to start shoyu production. Yamasa has been manufacturing soy sauce at a single location (200,000 square meters or about 50 acres in size) in Choshi for 350 years. Michio Hamaguchi, the current and 12th president of Yamasa, is the founder's direct descendant. Choshi, located about 2 hours by train north of Tokyo, is on the coast at the end of a small peninsula that juts into the Pacific Ocean. The meeting at Choshi of warm ocean currents from the south and cold currents coming down from the north creates an ideal climate for making shoyu. Gihei Hamaguchi chose Choshi, above, all for its climate.

Today there are at least 2,600 shoyu makers in Japan. As of 1993, Yamasa had \$3.3 million in capital, \$320 million annual sales, 1,100 employees, and plants in Choshi, Japan, and Salem, Oregon. A detailed description of the shoyu-making process is given, accompanied by color photos. The finished shoyu is run into plastic bottles at the rate of 300 per minute.

"When Yamasa set up the first soy sauce lab in 1901 and started physico-chemical testing of soy sauce to preserve quality, it was the beginning of quality control for soy sauce."

Economics seems to be at the heart of the decision to establish a shoyu plant in the USA. The Japanese yen has risen steadily in value against the dollar for the last 20 years, making Japanese exports very expensive. There is a growing demand for soy sauce outside of Japan and the U.S. market is now large enough to justify a production facility. Soybeans and wheat and inexpensive in America. Salem, Oregon, seems ideal for Yamasa, not only for its climate, but also because of its proximity to Japan, water quality, location near the booming West Coast market [and far from Kikkoman in Wisconsin], and excellent offers from the state of Oregon and the city of Salem. It is Yamasa's desire to have the plant run by an entirely American work force. A color photo shows Yamasa's range of soy sauce products, including blends of soy sauce and citron or orange which are used for preparing sukuyaki or tempura. Address: Assoc. Editor.

7819. Ritchie, H. Russell. 1994. Coming to America: Japanese processor, Kentucky construction company forge global friendship. *Food Processing (Chicago)* 55(7):33-34, 36. July.

• **Summary:** This is the second of a series of two articles in this issue about Yamasa, the world's second-largest soy sauce

manufacturer. Yamasa's new 65,000 square foot plant in Salem, Oregon, will be finished this month (June) at a cost of \$24 million. It is being built by James N. Gray Construction Co. of Louisville, Kentucky. Yamasa decided to build its first plant in Oregon because there is a very big demand for their soy sauce in the USA, especially on the West Coast, and because Salem has a temperate climate and high quality water very similar to those of Choshi.

In 1992 Yamasa sold 1.3 million gallons of soy sauce in the USA, all of it imported. When the new plant is in full operation, it will be able to produce at least 1.7 million gallons a year. Sales of the product are already handled through an established office in Los Angeles, California. Color photos show: The front of Yamasa's new plant in Salem. An outdoor tank farm consisting of thirty-two 15,000 gallon tanks for brewing and thirteen 10,000 gallon tanks for storing raw soy sauce (two photos). The wheat processing room inside the factory. Address: Editor.

7820. *Soyfoods (ASA, Europe)*. 1994. U.S. soyfoods consumption predicted to grow. 5(2):3. Summer.

• **Summary:** A U.S. study titled *An economic analysis of the use of soybeans as human food* predicts that domestic increases in consumption of soyfoods could use an additional 100 to 240 million bushels of soybeans each year. The study was conducted for the North Central Soybean Research Program by researchers at Agricultural Education and Consulting in Savoy, Illinois (Phone: 217-352-1190).

The study found that the following food categories which have the greatest potential to use soya as an ingredient (listed in descending order of projected use levels): (1) Flour products—bread, bakery products, pasta, and pizza dough. 2. Meat products—ground beef and processed meats. 3. Dairy products—liquid milk replacements, processed cheeses and yogurt. 4. Snack foods—crisps, extruded snacks, snack nuts and meat snacks. 5. Soyfoods—tofu, soymilk, tempeh, soy sauce, and miso. 6. Fresh vegetables—green vegetable soybeans.

However there will be tradeoffs. For example, increased use of soya to make meatlike products will ultimately lead to less need for soybean meal to feed livestock animals. But overall, the researchers believe that net crop income, at least for the North Central Region of the United States, will rise from nearly 8% to over 30%.

1994. Kikkoman and other major Japanese soy sauce manufacturers—Bibliography and sourcebook, 1645 to 1994: Detailed information on 484 published documents (extensively annotated bibliography), 46 commercial soy products, 45 original interviews (many full text) and overviews, 43 unpublished archival documents. Lafayette, California: Soyfoods Center. 169 p. Subject/geographical index. Author/company index. Printed Aug. 8. 28 cm. [604

ref]

• **Summary:** Shoyu or Japanese-style soy sauce is one of the oldest and most important sauces or condiments in Japan. Japanese speak of the “Big Five” manufacturers: Kikkoman Corporation, Yamasa Shoyu Co., Ltd., Higashimaru Shoyu, Higeta Shoyu, and Marukin Shoyu. In recent years other smaller companies have established a significant presence in the Western world—especially San-Jirushi and Sendai Miso-Shoyu.

The origins of Kikkoman can be reasonably traced back to the year 1661, when Takanashi Hyozemon XIX, whose descendants manage Kikkoman today, began to brew shoyu in the town of Noda, in today’s Chiba prefecture, about 30 miles northeast of Tokyo. Over the years and centuries, Kikkoman has steadily expanded its share of the soy sauce market, in Japan and around the world, until today it dominates most markets in which it is sold, and makes—in our opinion—one of the world’s truly great soy sauces.

This book is about those companies, their history, development, and commercial products, and their rise to power in Japan and internationally.

This is one of the most comprehensive books (and the most comprehensive bibliography) ever published about Kikkoman and other major Japanese soy sauce manufacturers. It has been compiled, one record at a time, over a period of 19 years, in an attempt to document the history of this subject. Its scope includes all known information about these companies, worldwide, from 1645 to the present.

This book is also the single most current and useful source of information on this subject, since 64% of all records contain a summary/abstract averaging 114 words in length.

This is one of more than 45 books on soybeans and soyfoods being compiled by William Shurtleff and Akiko Aoyagi, and published by the Soyfoods Center. It is based on historical principles, listing all known documents and commercial products in chronological order. It features: 30 different document types, both published and unpublished; every known publication on the subject in every language—including 364 in English, 241 in Japanese (many with an English-language summary), 10 in German, etc.; 45 original Soyfoods Center interviews and overviews never before published. Thus, it is a powerful tool for understanding the development of these Japanese companies and soy sauce from their earliest beginnings to the present.

The bibliographic records in this book include 485 published documents and 43 unpublished archival documents. Each contains (in addition to the typical author, date, title, volume and pages information) the author’s address, number of references cited, original title of all non-English publications together with an English translation of the title, month and issue of publication, and the first author’s first name (if given).

The book also includes details on 46 commercial soy products (mostly soy sauce), including the product name, date of introduction, manufacturer’s name, address and phone number, and (in many cases) ingredients, weight, packaging and price, storage requirements, nutritional composition, and a description of the label. Sources of additional information on each product (such as references to and summaries of advertisements, articles, patents, etc.) are also given.

Details on how to make best use of this book, a complete subject and geographical index, an author/company index, a language index, and a bibliometric analysis of the composition of the book (by decade, document type, language, leading periodicals or patents, leading countries, states, and related subjects, plus a histogram by year) are also included. Address: Soyfoods Center, P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

7822. Business Trend Analysts, Inc. 1994. The health and natural food market: Past performance, current trends, and opportunities for growth. 2171 Jericho Turnpike #342, Commack, NY 11725. 325 p. Sept. Price \$995.00. *

• **Summary:** Chapter 3 of this report, the first of seven chapters that discuss individual product categories, is titled “The Market for Soy Foods: An in-depth analysis of historical, current, and projected sales. Trends in the U.S. market for soy foods. Manufacturers’ total sales of soy foods. Manufacturers’ sales of soy foods, by distribution channel. Total retail sales of soy foods. Retail sales of soy foods, by distribution channel. Retail sales of soy foods, by type: Soy sauce, tofu, second generation, soymilk, miso, soynuts, tempeh. Worldwide soybean production, total and per capita. U.S. production of soybean oil. New product introductions in the market for soy and vegetarian foods, including names of manufacturers, brand names, and product descriptions.

Under “Report Highlights and Special Features” we read that after the 3-year recession, most product categories posted strong gains, but “several segments failed to cash in on the growth bonanza. Manufacturers’ sales of soyfoods were up a meager 2½%, while the market for frozen health foods declined slightly... One-third of consumers under the age of 35 feel it is extremely important that the food products they purchase are natural; the percentage is even higher among older consumers. Over 40% of adults believe they will contract heart disease or cancer.” Today 68% of adults are overweight, up from only 58% a decade ago.

Overall report Contents: 1. Executive summary. 2. Overall market dynamics (including Soyfoods). 3. The market for soy foods. 4. The market for herbal teas. 5. The market for dairy foods. 6. The market for grains and cereals. 7. The market for frozen foods. 8. The market for snack foods. 9. The market for groceries. 10. The health food consumer. 11. The health/natural food store industry. 12. Competitor profiles. 13. Industry directory. Address:

Commack, New York. Phone: 516-462-2410.

7823. *Newsletter of the Soyfoods Association of America* (San Francisco, California). 1994. Yamasa builds in America. Sept. p. 1.

• **Summary:** “Yamasa Corporation, the world’s second largest manufacturer of soy sauce, has constructed a 65,000-square-foot plant in Salem, Oregon, USA. Yamasa has been manufacturing soy sauce in Choshi, Japan, for 350 years. The company decided to build their plant in Oregon because of very high demand for their soy sauce in the U.S., especially on the West Coast.” Salem’s temperate climate and water quality are also similar to those of Choshi.

In 1992, Yamasa sold 1.3 million gallons of soy sauce in the United States, all of it imported. When fully operational, the new plant will be able to produce 1.7 million gallons per year.

7824. Vlahandreas, Dawn. 1994. Brewing a soy-sauce plant in Salem is a patient process. *Statesman Journal* (Oregon). Oct. 19. p. 8B.

• **Summary:** A photo shows Koji Okamoto, senior vice president, administration, for Yamasa Corp. USA, as he overlooks the outdoor fermentation tanks at Yamasa’s new plant in Salem, Oregon. “Yamasa has just finished the first stage of its initial batch of soy sauce brewed in the United States. It’s a test run for 65,000-square-foot, \$30 million Salem processing plant, which opened in late July... Last month the company began processing with 20 tons of Illinois soybeans, 20 tons of Oregon wheat and 15 tons of California salt.” It takes 6 months until a batch of soy sauce to be ready. In April, 1995, Yamasa’s first batch of soy sauce will be ready for shipping.

7825. Biolosk Kmetija Trampus (Trampus Organic Farm). Distributed by Izvor d.o.o. 1994. Seitan [Seitan (Ad)]. *Bio Novice* (Bio News, Ljubljana, Slovenia) No. 14. Oct. Rear cover. [Slv]

• **Summary:** In this attractive full-page color ad for seitan, an inset photo shows a field of wheat below a blue sky with billowing clouds. The background is a photo of dark brown of seitan. “Ingredients: Wheat gluten from organically grown wheat, tamari, and kombu (a sea vegetable). Contains no cholesterol. Weight: 250 gm. Shelf life: 15 days refrigerated at 1-5°C. Manufacturer: Trampus Organic Farm, Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: 068 59 481. Distributor: Izvor d.o.o., Dolenjska cesta 13/1, 61108 Ljubljana. Phone and fax: 061 1272 649.

Letter (fax) from Jan Krizstan. 1995. April 28. “I made this ad using an enlarged photo and the text from our original seitan label (which was 10 by 7 cm) and a color scan of seitan as the background photo.”

7826. Okamoto, Koji. 1994. Re: New developments at

Yamasa Corp. USA in Salem, Oregon. Letter to William Shurtleff at Soyfoods Center, Nov. 8—in reply to inquiry. 1 p. Typed, with signature.

• **Summary:** Fermentation of shoyu at Yamasa’s new plant in Salem began at the end of August 1994. The first commercial product will be ready for sale in early April 1995. The average fermentation time of each batch will be 6 months. The name of the product on the label will be Yamasa Soy Sauce.

An article that appeared recently in the *Nikkan Kogyo Shinbun* (7 Oct. 1994) describes how the 7th Gihei Hamaguchi protected nearby villagers from a tidal wave by setting fire to harvested rice straw. After the tidal wave, realizing that in order to protect the villagers from future tidal waves, he would have to construct a strong embankment, he did so at his own expense. After the project was completed, the villagers proposed building a shrine from him. He, of course, turned down their request. The embankment still remains solid and protects the villagers at Arita-gun, Wakayama-ken, Japan. Gihei wanted to conceal his act of setting fire. His kind act was discovered not by a Japanese but by the famous British author Lafcadio Hearn (lived 1850-1904; Japanese name: Koizumi Yagumo), who wrote *Kaidan*, a well-known Japanese-language book of ghost stories. Gihei’s name became famous in London earlier than in Japan. Note: Mr. Okamoto does not know when the 7th Gihei Hamaguchi lived or what his relationship with Yamasa was. Address: Senior Vice President, Administration, Yamasa Corp. USA, 3500 Fairview Industrial Drive, Salem, Oregon 97302. Phone: 503-363-8550.

7827. Kennedy, J. Robert. 1994. How rice syrup and grain syrup came to America from Japan (Interview). *SoyaScan Notes*. Nov. 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Chico-San was launched on 6 March 1962 in Chico, California, as a retail store and a wholesale business, capitalized with \$10,000. The first Yinnies grain syrup (rice and barley) and Yinnies (rice syrup candies) that Chico-San sold in America were made in Chico-San’s food plant at 1262 Humboldt Avenue, in Chico, California, and sold in about 1971. The Yinnies syrup was on the market about 2-3 months before the candy. The candy was made by boiling down the syrup a little more, then pulling it like taffy using a regular taffy-pulling machine (Bob’s idea, never conceived of in Japan). So already Bob had developed two American innovations: Growing koji on brown rice, and pulling Japanese-style rice candy to give it a texture like taffy. Bob recalls that the demand for the Yinnies syrup (which was used as an all-purpose natural sweetener, especially by macrobiotics) was greater than the demand for the Yinnies confection. These macrobiotic products were made using the traditional Japanese koji process, except that the koji was made from organically-grown brown rice, grown by the

Lundberg Brothers at Wehah Farms in Northern California.

Bob used to visit Japan 2-4 times a year in the early 1970s, because Chico-San was importing a large number of Japanese food products and Bob went to visit the farmers and suppliers. During these visits, Lima Ohsawa took him to visit several traditional Japanese shops that made rice syrup (*amé* or *mizuamé*) from koji. Bob observed carefully and took a few notes, which may still be in his diaries (which are in storage). He may have ordered a few samples from Japan, but they were not sold in America.

Bob dabbled and experimented with making rice syrup for at least two years before the product was launched commercially. During this time he learned how to make koji and rice syrup mostly from Mr. Junsei Yamazaki who had emigrated to Chico from Japan in 1963 (sponsored by Bob Kennedy) to make miso and natural shoyu for Chico-San. After graduating from Tokyo Agricultural University, Yamazaki had been a rice farmer in Japan for 17 years. In 1964 he began his first experimental production of miso and shoyu in Chico. His first large batches were made in mid-1970. Since he had to make koji for both miso and shoyu, it was an easy step to make rice koji for amazake. The amazake was cooked, filtered (to removed the fiber), then simmered slowly to yield rice syrup—a slow but relatively simple process. By the late 1960s or early 1970s Yamazaki was making small batches of rice syrup on an experimental basis in the back room at the Humboldt Ave. plant. By 1971 production of rice syrup was in full swing; it was sold in a 12 oz. glass jar and labeled “Yinnies Grain Syrup.”

On 14 Sept. 1972 disaster struck. A fire at the Chico-San plant and warehouse at 1262 Humboldt Ave. destroyed 90% of the company’s natural food inventory worth approximately \$350,000. The company moved to 2244 West First Street in Chico and struggled to get back on its feet. For several months, they continued to make Yinnies syrup from koji in the traditional way in a newly-built koji room. But the demand for this syrup was much greater than the amount that could be made using the traditional koji process. Bob had a friend named Carl Abbott, who worked at a nearby nut plant (Continental Nut Co.) and was also a very bright food chemist. So right after the fire Bob asked Carl if he could do some research to find a way to expand output of rice syrup using natural enzymes with organically grow brown rice to maintain the natural quality and without addition of chemicals—such as caustic chemicals. Carl met with experts at Miles Laboratories (who had never worked with brown rice before), determined the best commercial enzymes, then made adjustments in cooking times and temperatures to fit the needs of the enzymes. Bob is not sure, but he recalls, two enzymes were purchased from Miles: Alpha-amylase to liquefy the rice, and gluco-amylase to break down the rice carbohydrates into sugars (mostly maltose). When Chico-San switched over to using commercial enzymes with brown rice to make rice syrup, they discontinued the use of koji.

In 1971 and 1972 sales of Chico-San’s rice cakes began to increase dramatically. After the 1972 fire, it took the company about a year to get back to manufacturing any significant volume of rice cakes. By 1973 the demand for rice cakes was growing like mad. Bob had to build new and better machines that could keep up with the demand. Sales of Yinnies syrup were also growing nicely. Then the company ran out of space at the location on West First Street. So on 1 Jan. 1979 the company moved its Rice Cake machines back to the original address at 1262-1266 Humboldt Ave.—which had been renovated after the fire, and on which Chico-San now had a 10-year lease. Chico-San retained 6,000 square feet of its location on West First Street for the manufacture of Rice Syrup. At about that time Bob met Pat and Cheryl Mitchell, owners of California Natural Products (CNP) in Manteca, California. They were making various syrups, but definitely not from rice.

Note: Robert Nissenbaum of Imagine Foods (23 Nov. 1994) strongly disagrees with this 1979 date. He is certain that in the summer of 1984 he visited the Chico-San plant that was making rice syrup. It was located in Chico, in a sort of garage at the end of an alley. He was buying rice syrup from Chico-San at the time for use as a sweetener in amazake he was making in Missouri, and he wanted to find out why the quality was so inconsistent. He thinks that CNP first began making rice syrup under contract for Chico-San after August 1984.

Bob Kennedy decided to contract with CNP for production of all his Rice Syrup. Bob sold all Chico-San’s Yinnies syrup equipment to Pat and Cheryl; this equipment was compatible to whatever they were doing. He also told them all his secrets for making brown rice syrup and had them sign a non-disclosure agreement and a contract which stated that CNP would make rice syrup only for Chico-San. Chico-San guaranteed in writing to buy a specified amount of rice syrup. “Everything went fine until I sold the business to Heinz.”

When Heinz bought Chico-San on 16 Nov. 1984, they wanted it all or nothing. If they decided after six months that there were parts of the business they did not want, Bob could buy those parts back. Chico-San carried \$100,000 to \$150,000 inventory of Japanese food imports. Bob expected to be able to buy back the Yinnies syrup business if Heinz decided not to pursue it, but the contract wording, unfortunately for Bob, allowed Heinz to essentially trade the rice syrup business to CNP. Bob lost track of what was happening between Heinz and CNP. He was supposed to work for Heinz as a consultant for about a year, but he didn’t like it so he asked to be released from that obligation—which they did after about 3 months. “If I had had a crystal ball at the time, I would have kept the rice syrup business, but at the time I did not think much about it. I was really a little burned out with Chico-San. I was doing 10-12 hours a day for years. It was quite a relief to be free of it.”

Bob Kennedy knew about Robert Nissenbaum, who was developing Rice Dream non-dairy ice cream before Chico-San was sold to Heinz. Chico-San was shipping hydrolyzed rice (made by CNP) to Robert Nissenbaum before Nissenbaum was aware of CNP. [Note: Robert Nissenbaum—see interview of Nov. 1994—says he bought only rice syrup from Chico-San, and he became aware of CNP at about the same time as Chico-San, before CNP was processing rice]. Then Chico-San was sold to Heinz in Nov. 1984 and Rice Dream (made with rice beverage from CNP) started to be manufactured in Palo Alto, California, in Jan. 1985. Address: Chico, California. Phone: 916-891-0970.

7828. *Soyfoods (ASA, Europe)*. 1994. In depth: Food Ingredients Europe. 5(3):6-7. Autumn.

• **Summary:** Food Ingredients Europe, the international exhibition of food ingredients, was held this year on Oct. 4-6 in London, England, at Earl's Court. This was the biggest FIE in its 9-year history, with more than 500 exhibitors. The American Soybean Association (ASA) had a very successful booth at the U.S. Pavilion. One of the most interesting new products was Befine, from a company named VPS Europe. This unique, patented soya-based granule, sold fresh or frozen, mimics the texture of ground meat but it is not TVP or textured soy protein concentrate. Made from organic whole soybeans, it contains 18% protein. ADM Protein Specialties Division introduced their new WMR4, a dry soymilk based on soy protein isolate. Protein Technologies International exhibited Supro brand Isolated Soy Protein and Fibrin brand soy fiber. A line of texturized Danprotex (H-29, B-39, and F) and functional Danpro (DS) soy protein concentrates were launched by Central Soya Aarhus A/S, a member of the Eridania/Beghin-Say agro-industrial group. Kikkoman Trading Europe exhibited their naturally fermented soy sauces in liquid and dehydrated forms. Other soy sauce exhibitors included Henry Lamotte GmbH and Mandarin Soy Sauce Inc. Loders Crokiaan exhibited a new soya concentrate line. Alsace-based Sojinal, which supplies soy products to the food industry, exhibited along with their new sister company, Sevenday. SFI Netherlands BV (SFI = Special Food Ingredients, formerly Solnuts Inc.) exhibited their line of dry roasted soynuts. Also present were Stern Lecithin and Soja GmbH & Co. KG, Sapa and Dafa Associès (makers of Dafasoy for the food, dietetic, and pharmaceutical industries), Soya Mainz & Co. KG and Solbar Hatzor (soy protein concentrates), Dalgety Food Ingredients International (with the former Spillers Premier Products), Lucas Meyer GmbH (with a phosphatidyl choline lecithin powder and a de-oiled lecithin for frozen doughs), Edelsoja GmbH, Celia SA, Freeze-Dry Foods GmbH, and GMB Proteins (a division of Bush Boake Allen Ltd.). The address and fax number of each company is given.

7829. Gold Mine Natural Food Co. 1994. Macrobiotic,

organic and Earthwise products for you and your home (Mail order catalog and price list). San Diego, California. 64 p. 28 cm.

• **Summary:** Soy-related products include organic black soybeans, organic yellow vegetable soybeans, organic aduki beans, Ohsawa soy sauce, Ohsawa tamari, South River miso, Junsei Yamazaki miso, Ohsawa yuba, Ohsawa organic dried tofu, and kuzu. Address: 3419 Hancock St., San Diego, California 92110-4307. Phone: 1-800-475-3663.

7830. Hills, Benjamin. 1994. Re: New developments at Lean Green Foods on the Big Island of Hawaii. Letter to William Shurtleff at Soyfoods Center, Dec. 1 p.

• **Summary:** "Holiday Greetings! What a year! It has seen the birth and infancy of a soyfood company determined to make a difference in the protein supply of the Pacific Rim. So far it is quite local, with color pictures of ginger teriyaki tempeh burger popping up all over restaurant tables of the Big Island to sold out accounts on Kauai. Soon I will be consulting to soy operations in the Philippines, Siberia, Italy, and India, and traveling to those places. Also exploring export possibilities to Australia and New Zealand.

"It has been a tremendous amount of work, but with daily rewards from the enthusiasm of satisfied customers. Mine are truly products to believe in...

"I have been blessed further by the presence of a soy angel, the original in my life, Susan Wallace, from Oregon... Her ever-resent enthusiasm and support for Lean Green Foods has helped immensely in the development of my life in soy."

Update: 1997. Dec. 8. Talk with Rosie Sison, who (with a friend) recently visited Benjamin at his shop in Hilo. 1998. Dec. 8. His location is beautiful, right next to the ocean, with lagoons and waterfalls nearby. He made them some delicious tempeh dishes from his freshly-made tempeh. Address: Lean Green Foods, P.O. Box 534, Volcano, Hawaii 96785. Phone: 808-985-8563.

7831. **Product Name:** Ginger Teriyaki Tempeh Burger.

Manufacturer's Name: Lean Green Foods.

Manufacturer's Address: P.O. Box 534, Volcano, Island of Hawaii, HI 96785. Phone: (808) 985-8563.

Date of Introduction: 1994. December.

Ingredients: 1998/12: Certified organic soybeans (grown in accordance with sec. 26569.11 of the California Health and Safety Code), ginger juice, soy sauce (water, wheat gluten, soybeans), mustard, lemon juice, vinegar, fructose, sesame oil, guar gum, tempeh culture.

Wt/Vol., Packaging, Price: 6 oz. (170 gm) vacuum pack.

How Stored: Frozen.

New Product—Documentation: Christmas letter sent by Benjamin Hills. 1994. Dec. Lean Green Foods is now making a ginger teriyaki tempeh burger. Color pictures of it are "popping up all over restaurant tables of the Big Island to

sold out accounts on Kauai.” One secret to the flavor is the 24-hour soak in cold marinade—not hot!

Label brought by Benjamin Hills. 1998. Dec. 21. 3.5 inches diameter. Self adhesive. Green on white. Logo says “Made in Hawaii.” “100% vegetarian. 2 patties—Keep frozen. Try our tempeh chili. To cook: This precooked burger may be grilled, fried or microwaved.” Address is now: P.O. Box 10562, Hilo, Hawaii 96721.

7832. Product Name: Soy Sauce.

Manufacturer’s Name: Projet Miso (owned by Fonds de Contrepartie Rwanda-Canada).

Manufacturer’s Address: Projet Miso, B.P. 2018, Kigali, Rwanda. Phone: (250) 76730.

Date of Introduction: 1994.

How Stored: Shelf stable.

New Product–Documentation: Letter from, form filled out, and label sent by Johnny Kashama based on an interview with François Munyankindi of Projet Miso, Rwanda. 1993. Dec. 21 (which see). This company’s shoyu is still being fermented, and will be ready to sell in 1994. This is the first company in Africa to make and sell miso, tamari, or shoyu.

Label. 3.25 by 2.25 inches. Red, black, and white. “Projet Miso–Soy Sauce.”

7833. Product Name: Soy Sauce.

Manufacturer’s Name: Wa Heng Dou-Fu Soy Sauce.

Manufacturer’s Address: 5063 24th St., Sacramento, CA 95822. Phone: 916-737-0545.

Date of Introduction: 1994.

How Stored: Shelf stable.

New Product–Documentation: Talk with Martin Lin. 1997. Aug. 6. His company name is “Wa Heng Dou-Fu Soy Sauce.” He bought the company from his parents in 1996. Three years ago he started to make soy sauce and sold it to several restaurants because Kikkoman is too expensive. He no longer makes soy sauce but plans to make it again after doing more research. He believes that Kikkoman adds HVP to its soy sauce prior to fermentation.

7834. Product Name: Smoked Tofu [Garlic Teriyaki, or Mild Szechuan].

Manufacturer’s Name: Wildwood Natural Foods.

Manufacturer’s Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

Date of Introduction: 1994.

Ingredients: 1998–Garlic Teriyaki: Wildwood tofu [filtered water, organic soybeans (grown and processed in accordance with the California organic foods act of 1990), nigari (magnesium chloride, a natural firming agent)], soy sauce, Fruitrim (fruit juice, natural grain dextrins), rice vinegar, garlic powder, molasses, onion powder, spices.

Wt/Vol., Packaging, Price: 6.5 oz. Retail for \$3.29.

How Stored: Refrigerated.

New Product–Documentation: Wildwood Natural Foods price list. 1995. Jan. 9. Talk with Billy Bramblett of Wildwood. 1998. June 23. Wildwood’s two smoked tofu products were introduced in early 1994. They cut the tofu, make a marinade, then send both to a smoke house in San Jose—which cleans out their plant for each Wildwood run. They marinate the tofu in tubs, then smoke it on racks in a real smokehouse with real smoke made from cedar chips. The smoking and baking chamber (about 8 feet tall and 4 feet wide) is next to the chamber where the fire is. The tofu is kept in this chamber at a relatively low temperature (about 240°F) for 24–36 hours. Of this time, it is being smoked for about 6–8 hours using smoke that is ducted into the chamber; the rest of the time it is just being baked. When ready, it is vacuum packed.

7835. Fryer, Anne-Marie; Fryer, Wil. 1994. *Das kleine Buch ueber Salz, Miso und Shoyu* [The little book about salt, miso, and shoyu]. Voelklingen, Germany: Ost-West-Bund Verlag. 79 p. Illust. No index. 15 x 10 cm. Series: Ost-West Naturkostführer, Band 7 (No. 7). [11 ref. Ger]

• **Summary:** Contents: The dependence of life on salt (Life on Earth began in the sea). Production of miso and shoyu, Nutritional aspects. Table of nutritional values. Healing value. Quality. About cooking. Cooking with salt. Cooking with miso. Cooking with shoyu. Glossary. Bibliography (all are by macrobiotic authors).

7836. Jacobs, Barbara; Jacobs, Leonard. 1994. *Cooking with seitan: The complete vegetarian “wheat-meat” cookbook*. 2nd ed. Garden City Park, New York: Avery Publishing Group. xi + 185 p. Foreword by Nikki and David Goldbeck. Illust. Index. 26 cm. [20 ref]

• **Summary:** Contents: Acknowledgments. Foreword. Preface. Introduction. 1. A Newly discovered ancient food. 2. Making your own seitan. 3. Appetizers and snacks. 4. Sauces and marinades. 5. Soups and stews. 6. Salads and salad dressings. 7. Side dishes. 8. Elegant entrées and hearty casseroles. 9. Desserts. Manufacturers of seitan and seitan products. Mail-order distributors. Bibliography.

In the Introduction, Barbara Jacobs writes (p. 2-3): “In 1970, when we first tasted seitan, it was a tasty but exotic snack food, owing its extremely salty flavor to the fact that it was an imported Japanese specialty food, flavored for the Japanese taste. In addition to being heavily salted, this seitan was hard, chewy, and quite expensive. It was really just a snack food to be eaten while drinking beer. Unfortunately, no one involved in the natural foods movement in this country was familiar with the methods used to make this food.

“In 1971, Leonard became the head chef at the Seventh Inn, one of Boston’s first natural foods restaurants. During that time, he and I began our search for different traditional food-preparation techniques and studied with experts in all areas of cooking and baking. In March 1971 a young

Japanese woman named Yumie Kono came to work at the Seventh Inn. It was Yumie who taught us how to make seitan. Even macrobiotics leaders Michio and Aveline Kushi—experts in the preparation of healthy Japanese foods—had never actually made seitan.”

In 1975 Jonathan’s Seitan Shop in Antwerp, Belgium, began to make seitan. In the mid-1970s, a seitan product named Tan Pups had become a very popular snack food. “Created in Boston, tan pups were similar to the country fair specialty of dough-covered hot dogs on a stick. Tan pups were pieces of seitan that had been dipped in flavored batter and deep fried. Boston area natural foods stores carried these healthy snacks as staple items.”

The basic recipe for seitan (p. 20-21) involves simmering 2-2½ cups of freshly homemade wheat gluten in a “basic broth” of 4 cups water, ¼ to ½ cup natural soy sauce, a 3-inch piece of kombu (a sea vegetable), 4-6 slices (1/8 inch) of fresh gingerroot (optional), and 1 tablespoon sesame oil (optional). Address: Medfield, Massachusetts.

7837. Manley, Charles H. 1994. Process flavors and precursor systems: Commercial preparation and use. In: Thomas H. Parliament, M.J. Morello, and R.J. McGorin, eds. 1994. *Thermally Generated Flavors: Maillard, Microwave, and Extrusion Processes*. Washington, DC: American Chemical Society. x + 492 p. See p. 16-25. Chap. 3. Index. 24 cm. ACS Symposium series No. 543. Held 23-28 Aug. 1992 in Washington, DC. [14 ref]

• **Summary:** Hydrolyzed vegetable proteins (HVP’s) “have been used for more than 100 years to add meat-like flavor to prepared foods. They represent one of the earliest forms of process flavors, and they are composed of amino acids generated by the hydrolysis of vegetable protein with HCl [hydrochloric acid]. The heat used to hydrolyze the protein also produces a roast-like flavor character.”

“Recently certain chlorinated glycerides have been found” in HVP’s. “Some European countries have set 50 ppm as a safe level.” Address: Takasago International Corp. (USA), 100 Green St., Teterboro, New Jersey 07608.

7838. Okamoto, Koji. 1994. Syllabus for MBA course at Willamette University (Salem, Oregon). Salem, Oregon. 11 p. Unpublished manuscript.

• **Summary:** Mr. Okamoto teaches an MBA course at Willamette University in Salem Oregon. In the syllabus, page 3 is titled “History of Soy Sauce Brewing and Yamasa. This chronology contains some interesting dates: 1647—Soy sauce was first exported from Japan by the Dutch. 1715—Heating of soy sauce started. 1885—Yamasa invented a western-style sauce named Mikado Sauce. 1899—Yamasa’s 10th generation president, Gihei Hamaguchi, established the Soy Sauce Research Institute in Choshi after he studied fermentation in Great Britain. 1943—Yamasa started manufacturing pharmaceutical ingredients.

Page 4 discusses the Japanese soy sauce market. Total production in Japan is 317.5 million gallons per year. The market is saturated and the price has been stable for 20 years. There are 2,500 shoyu makers in Japan. The five largest (Kikkoman, Yamasa, Higashimaru, Higeta, and Marukin) have 50% of the market. In Japan, 38% of shoyu is used in homes, and 62% is used in companies. In Japan, Yamasa produces 33 million gallons of soy sauce per year, worth \$400 million. It is the second largest soy sauce manufacturer after Kikkoman. The company has 1,100 employees, with branches in 10 major cities including Tokyo, and \$3,750,000 capital. Net income before taxes is \$20 million per year.

Why has Yamasa expanded to the United States? There is a strong market in the USA. The yen is worth more and more against the dollar, which makes imports from Japan expensive. Salem has inexpensive soft water (1 cubic meter costs more than 15 times as much in Choshi as in Salem), inexpensive energy (less than half the price of a kilowatt-hour in Japan), and inexpensive labor. Land in Salem is extremely inexpensive compared with that in Japan. There are no regulations on wheat in America. There are no transportation charges on materials and finished products to and from Japan, and no import duty on finished products at U.S. ports (typically 3% FOB)—for shoyu sold in America.

Why Yamasa chose to build in Salem, Oregon: Water that is of good quality and inexpensive. An enterprise zone with a 3-year property tax exemption. Local government & Sedcor were very enthusiastic and cooperative. Receptive food processing industries. Good plant location. Salem is located far away from Kikkoman, a strong competitor in Walworth, Wisconsin; Kikkoman’s U.S. production rose from 1.59 million gallons in 1973 to 23.81 million gallons in 1993. Easy access to freeway north and south. Seaport and airport available nearby.

The U.S. investment. In June 1992 Yamasa Corp. USA was formed as a subsidiary of Yamasa, Japan. Investment: \$30 million. Number of employees: 40. Sales and marketing office: In Los Angeles, California. Breakdown of investment: Land, 25 acres, \$650,000; Building, 65,000 square feet, \$6.5 million; Machinery \$15.0 million; Furniture and fixtures \$500,000. The keys to survival (11 points). What Japanese management expects from U.S. management (11 points, incl. “Learn foreign languages,” and “Don’t forget to say ‘sorry’”). Address: Senior Vice President, Administration, Yamasa Corp. USA, 3500 Fairview Industrial Drive, Salem, Oregon 97302. Phone: 503-363-8550.

7839. Pan, Lynn. 1994. *Sons of the Yellow Emperor: A history of the Chinese diaspora*. New York: Kodansha International. xx + 418 p. Illust. (16 pages of plates). Index. 22 cm. [174* ref]

• **Summary:** On page xiv is a very interesting map of southern China, with a blowup of southern Kwangtung [Guangdong] province, the area around Canton the Pearl

River, the South China Sea, Macao, and Hong Kong. For this area was at the heart of the Chinese diaspora—especially in the 19th and 20th centuries and especially from two small areas southeast of Canton: (1) Sam Yap (Three Districts) of Punyu, Shuntak, and Namhoi—the more affluent counties. (2) Sze Yap (Four Districts) of Hoiping, Sunwui, Toishan, and Yanping—the poorer and ruder area southwest of Sam Yap. Although the people from both areas speak Cantonese, they have difficulty understanding each other's speech. Other important languages of the diaspora were Hakka and its numerous variants (spoken in Guangdong, Fujian, etc.) and Hokkien (spoken in southern Fujian, Taiwan, and by many overseas Chinese throughout Southeast Asia). It is closely related to Teochew / Teochiu, though mutual comprehension is difficult.

In Part Four: 1960s to 1980s, Chapter 16, titled "Food" contains a history (p. 320-23) of Amoy Food Limited, now an international firm, with its headquarters in Hong Kong, owned largely by overseas Chinese. For many overseas Chinese, "perhaps no label has quite the resonance of Amoy." In 1908, T'ao-hua Ta-t'ung, the predecessor of the company, was founded in Xiamen for producing bottled soy sauce and dairy milk. Its founder was Yang Ko-fei, who soon brought in other shareholders. In 1911 clashes between the founder and other shareholders lead to a break-up of the company, with one party going it alone as T'ai-hua (Tao Fia), and the other as Ta-T'ung. Yang Ko-fei went with the latter company, whose chief shareholder was Tan Kah Kee, the rubber and pineapple magnate.

It became increasingly apparent, however, that the two companies would do much better if they operated as a single unit. So in 1928, when a new rival appeared, they merged, with the smaller of the two now located in Hong Kong. Thereafter the company experienced steady growth. Eventually the branch in Hong Kong came to eclipse the parent company in Amoy. In 1937, when the Japanese invaded China and war broke out, almost the entire canning plant was moved to Hong Kong from Amoy. In 1951, when the company went public, the ownership passed mainly into the hands of overseas Chinese.

Today Amoy Foods' products are on the shelves of supermarkets and Asian markets in 37 countries. Half of Amoy Foods' shares are owned by the American food giant Pillsbury (owner of Haagen-Dazs and the Burger King hamburger chain) and the other half by Hang Lung (a Hong Kong real estate company). Amoy's line of 34 sauces include dark soy sauce (lau-ch'ou), light soy sauce (*sheng-ch'ou*), black bean sauce [made of fermented black soybeans], sweet and sour sauce, etc.

On the roof of the Amoy factory's main building a visitor can see a demonstration of the old-fashioned process; "here, an old man with sleeves rolled up goes from earthen vat to earthen at plunging his arm into the thick brew of black and yellow soy beans to give it a gentle, almost loving

stir. He works rhythmically, with deep concentration. A Soy Master with thirty or forty years behind him, he stands in a line which goes back to the fifth century, from when dates the earliest surviving soy sauce recipe."

Companies like Amoy have helped to make Chinese foods more widely available in the West. Not so long ago, Chinese cookbooks published in England said that Worcestershire sauce was an acceptable substitute for soy sauce, because the latter was available only at delicatessens and specialty shops [Asian grocery stores] in London. Even during the last five years, the range of Chinese foods available in London's Chinatown has grown remarkably. In Chinatowns in the United States [and especially those in San Francisco {California} and New York] the selection of Chinese foods has long [perhaps always] been greater than at those in London or other places in Europe.

Page 324: The first person to make tofu in Europe was Li Shih-tseng [Li Yü-ying, Li Shizeng], a Chinese intellectual and educator. As a young student of biochemistry in France in 1900, Li was to be greatly influenced by the writings of Nietzsche and Bergson. A Francophile, Li was one of the founders of the Work and Study Program, which sent Chinese students abroad for part-time work and part-time study. One of these students, who would later become famous, was Deng Xiaoping. While establishing his tofu [beancurd] factory in France, Li drew on his knowledge of biochemistry; the factory provided jobs for many students in the Work-Study Program.

Li, a vegetarian, was a firm believer in the nutritional value of tofu and other soybean foods. His factory also made and sold soybean flour, fermented tofu, soy-bean milk, and soy-bean jam, and these foods nourished not just Chinese, but also Westerners, including American soldiers who fought in France during World War I (Lin Hai-yin 1971, p. 125). "All this was before the faddish demand for tofu by health food enthusiasts, and before it became widely known as an unbeatable source of protein. The company closed after the war, but among certain Chinese *émigrés* [emigrants from China] France was never to lose its reputation for beancurd. In Europe up to the 1980s *tofu kan*, a particular variety of fermented beancurd [sic, pressed tofu] much demanded by eastern Chinese palates, could only be had in Paris, and the handful of *émigrés* in London had to send over for it."

Li was also a founder of the Université Franco-Chinoise at Lyons, a sort of accommodation and placement agency.

About the author (facing p. 418). Lynn Pan was born in Shanghai; she left as a child. She "has lived as an immigrant in North Borneo and England, and worked as a social scientist, journalist and writer in London, Geneva, Helsinki, and Hong Kong." In 1981 she returned to Shanghai for the first time, and was gripped by deep, haunting sensations of nostalgia. She had found the place where she belonged, her inheritance, and she began to write this book. She is the author of at least five other books—all listed facing the title

page. Her Epilogue and Afterword at the end of this book are both very interesting.

• **Summary:** “Developed from a symposium sponsored by the Division of Agricultural and Food Chemistry at the 204th National Meeting of the American Chemical Society, Washington, DC, August 23-28, 1992.” Address: 1&3. Kraft General Foods; 2. The Quaker Oats Co.

7841. Soedewo, Mang Eri. 1994. A freedom fighter: my life with Eri-san. [Jakarta?]: Airlangga University Press. xvi + 607 p. See p. 246. Illust. Maps. 21 cm. *

• **Summary:** Page 246: “The prospect of having one egg for himself every day made his eyes shine. I also gave him a bottle of the sweet soya sauce he was so very fond of.”

Since the early days of our marriage, we had to endure being apart from time to time, sometimes for long periods of time.

7842. Stepaniak, Joanne. 1994. The uncheese cookbook: Creating amazing dairy-free cheese substitutes and classic “uncheese” dishes. Summertown, Tennessee: The Book Publishing Co. 192 p. Index. 21 x 18 cm. [16 ref]

• **Summary:** This is an excellent, very creative cookbook with a poor index, developed especially for people who, due to choice or chance, have eliminated cheese from their diet. The recipes are well designed to satisfy any compelling cheese fantasies you may have.

Contents: Introduction. Cheezes, spreads & dips. Soups and chowders. Fondues & rarebits. Sauces, pestos & dressings. Pizzas, polentas & breads. Quiches, casseroles & entrées. Sweets. Glossary. Mail order suppliers of natural foods.

Tofu is used as a major ingredient throughout this cookbook. For example: Muenster cheese (p. 23). Chunky Roquefort dip & dressing (p. 24). Tofu cottage cheese (p. 27). Tofu ricotta (p. 27). Betta feta (p. 28). Brie (p. 31). Liptauer käse (p. 32). Boursin cheese (p. 33). Tofu cream cheese—rich or light (p. 34-35). Kefir cheese (p. 36). Garbanatto (p. 39). Hot Parmesan artichoke dip (p. 41). Pecan cheese (p. 42). Egg-free (vegan) mayonnaise (p. 89). Tofu sour cream (p. 90). Calzones (p. 100-10). Tofu tetrazzini (p. 122) Tofu devonshires (p. 140). Mattar paneer (p. 146). Tofu cheezecakes & cream pies (ten varieties, p. 164-74). Tofu whipped topping (p. 172).

Many other recipes also call for “low-fat, dairy-free (vegan) milk” which is defined (p. 183) as “a generic term which refers to any creamy beverage such as soymilk, nut milk, or rice milk that is produced from non-animal products.

Interesting products in the glossary (p. 180-184) include: Agar, barley malt syrup, brown rice syrup, liquid aminos, mirin, miso, seitan, tahini, tamari, tempeh, toasted sesame oil, tofu, umeboshi plum paste, vegan milk, yeast—nutritional (*Saccharomyces cerevisiae*).

7843. Yamasa Corporation U.S.A. 1994. Yamasa Corporation U.S.A. (Brochure). Choshi, Japan. 4 p. 21 x 21 cm. [Eng]

• **Summary:** This glossy color brochure gives basic information about Yamasa in the USA and Japan. In Salem, Oregon, Yamasa Corporation U.S.A. is located on a 25-acre site. Floor area of plant: 65,000 square feet. Initial production capacity: 1.7 million gallons per year of soy sauce. Production began: Summer 1994. Distribution will begin: Spring 1995. A color photo shows the front of the plant.

In Choshi, Japan, Yamasa Corporation is located at 2-10-1 Araoicho, Choshi, Chiba prefecture 288, Japan. President: Michio Hamaguchi. Founded: 1645. Items produced: Soy sauce, flavor enhancers, liquid seasonings, pharmaceuticals, diagnostics, fine chemicals. Yamasa in Japan will celebrate its 350th anniversary in 1995. In 1957 Yamasa invented a 5'IMP/5'GMP (IG) production method for a new type of flavor enhancer through enzymatic degradation of ribonucleic acid (RNA). Yamasa IG is now exported to food manufacturers around the world. The RNA degradation technology is also recognized as new biotechnology. A color aerial photo shows the Yamasa complex at Choshi.

Page 3 shows a flowchart of the process for manufacturing soy sauce. The terms koji and moromi are used. Address: Choshi, Japan.

7844. **Product Name:** Tofu, Soymilk, Dried Tofu Curds, and Veggie Burgers.

Manufacturer's Name: Harcan Kingsoya Co. Ltd.

Manufacturer's Address: 33 Casebridge Court, Units 5&6, Scarborough, ONT M1B 3J5, Canada. Phone: (416) 283-8328.

Date of Introduction: 1994?

New Product—Documentation: Talk with Duff MacKinnon of the Ontario Ministry of Agriculture and Food in Guelph. 1995. March 6. Harcan makes tofu, soymilk, dried tofu curds, and veggie burgers. They have a very small plant. One partner, from mainland China, speaks excellent English. The other two partners are Canadian.

7845. Rosas, Juan Carlos; Young, Roberto A. 1994? El cultivo de la soya. Quinta edición [The cultivation of soya. 5th ed.]. *Departamento de Agronomía (Zamorano, Honduras)*, Publication No. AG-9603. 68 p. Undated. [Spa]

• **Summary:** Contents: 1. Overview: Economic importance, chemical composition, history, taxonomy. 2. Morphology of the soybean plant. 3. Physiology of the growth and development of the soybean plant: Stages of development.

4. Environmental factors that affect the cultivation of soya: Soil, water, irrigation, light / photoperiod, temperature, period of growth. 5. Practical cultivation: Preparation of the soil, time of planting, density of planting, quantity of seeds, systems of cultivation, control of weeds (methods of weed control, chemical control). 6. Mineral nutrition of soybeans (and inoculation). 7. Diseases that affect the cultivation of soybeans and their management: Bacterial, fungal, viral, other, seed treatment. 7. Insects that attack soybeans. 8. Harvest and storing. 10. Improvement of soybeans. 11. Processing and utilization: Industrial processing (extraction of oil, soy flours, soy protein concentrates {*concentrados proteicos de soya*}, soybean cake). Direct consumption: In the Far East, the soybean is consumed in the form of fermented and non-fermented foods. Fermented foods include shoyu, miso, mato [sic, natto], and tempeh, while non-fermented foods include soymilk (*la leche de soya*), tofu, yuba (*juba*), and kinako. 12. The cultivation of soya in Honduras (history).

In 1972, the Ministry of Natural Resources (*Ministerio de Recursos Naturales*) reported the initiation of commercial soybean production on a small scale in various departments of the country (Olancho, El Paraíso and Comayagua). Three varieties were used at that time: Biloxi, Hardee and Jupiter. However, before these reports were made, at the Panamerican Agricultural School (*la Escuela Agrícola Panamericana (EAP)*), some hectares had already been planted with the varieties Jupiter and Pelican. Discusses additional developments in 1974, 1982, 1986, 1987, and 1988. Address: 1. PhD; 2. PhD.

7846. **Product Name:** Marinated Tofu Cutlets.

Manufacturer's Name: Wildwood Natural Foods of Santa Cruz, Inc.

Manufacturer's Address: 1560 Mansfield Ave., Suite D, Santa Cruz, CA 95062. Phone: 408-476-4448.

Date of Introduction: 1994?

Ingredients: Tofu (organic soybeans grown accordance with the California Organic Foods Act of 1990, filtered water, nigari/magnesium chloride, a natural firming agent), hi oleic safflower oil, marinade (unsweetened pineapple juice, soy sauce, fresh ginger, garlic powder, ginger powder, onion powder).

Wt/Vol., Packaging, Price: 6.0 oz. (175 gm) vacuum pack. Retail for \$2.89.

How Stored: Refrigerated.

New Product–Documentation: Product with Label purchased at Open Sesame in Lafayette, California. 1995. March 11. Label. 2 by 4 inches. Red and black on gold. Silhouette of a forest. “Wonderful, hearty texture. Marinated in our pineapple teriyaki. Try it in stir fry, sandwiches, and all vegetarian entrees. Made with organic tofu.” The plastic pouch is about 4½ by 5 inches.

7847. Rower, Howard. 1995. History of The Infinity Company and Infinity Foods. Part I (Interview). *SoyaScan Notes*. Jan. 22. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Howard grew up in a Jewish family in Boston, Massachusetts. In about 1964 or 1965 he got interested in macrobiotics. John Hammond, his next door neighbor and a blues singer, was involved in macrobiotics and he told Howard about it one day. So Howard went to the Ohsawa Foundation in New York City, which was run by Irma Paule in those days. He bought some groceries from her and began practicing macrobiotics. George Ohsawa came to New York in 1965 for a summer camp (See Kotzsch 1985, p. 137) and Howard met him. “Ohsawa said he was looking for a guy like me and he wanted me to grow rice in New York state. I found out that was a pretty impossible task so I asked him to pick something easier. He said ‘Okay, grow kuzu.’ I said, ‘Okay, when you get back to Japan, send me some kuzu plants.’ And he said, ‘Oh no. That’s not the Zen way. The Zen way is for you to do it yourself, now.’ I spent about 6 months finding out what a kuzu plant was. Finally I got some old agricultural bulletins that described how good kuzu was, then later described how bad it was. I finally managed to find somebody in the South who dug up some kuzu in the winter and sent it to me. I grew it in my garden in New York. The next year when Ohsawa came, I sat him down under this huge kuzu vine, like an arbor, at the back of my house. I said ‘There’s the kuzu you wanted.’ I took some of the kuzu roots and actually extracted kuzu from them and put it in a test tube. I showed it to Ohsawa, told him it was the first kuzu ever extracted in New York, and gave him the test tube. He was astonished and delighted. He said, ‘Now we have to begin to work. I knew I was right. You *are* the man I’m looking for. You must begin to import macrobiotic food products from Japan at once. I will ship them to you.’ So we started this relationship and in 1965 I began importing foods from Ohsawa in 1965. He used to send me tamari [soy sauce] and miso in beautiful little 18-liter wooden kegs, tied with rope.” Howard sold these products to health food stores and to Michio Kushi.

Also during 1965 Howard read a book about grain and he got very interested in freshly-ground flour. A grain of wheat is alive, but as soon as you mill it, it dies. After 5 days the taste and nutritional value have both declined. So people should mill flour, then keep it refrigerated, and use it as soon as possible. So Howard bought a little home flour mill, and set it up in his house. He ground some wheat flour, his wife made some bread, and they really liked the bread. They served the bread to friends who came to dinner, then they wanted fresh flour, so he made flour for them. Pretty soon he was delivering flour to people, then a health food store wanted to sell it, so he had a label made, even though he didn’t have a company name at all. So he threw the *I-Ching* to help him choose a name. The hexagram

was “Perseverance Furthers.” He was going to name the company “Thomas J. Perseverance” so it would sound like a real person. His brother, who was visiting at the time, said “That’s a stupid name. You might as well call it Infinity if you’re going to have a dumb name.” Howard liked the name Infinity, and decided to name his company The Infinity Co. However, later he did have some labels printed on which Perseverance Foods was the company name—just for fun. He once had a lawyer named Bill Pratt, so he sold “William Pratt Old Barrister” brand honey. One of his children pinched his thumb in the flour mill at home and his wife became concerned that a more serious injury could happen. Moreover everything in the house began to dusted with a thin layer of flour.

Howard started The Infinity Company in about 1965 at 188 Duane Street in New York, in the lower Manhattan neighborhood named Tribeca. It distributed, imported, and manufactured natural foods. George Hannides (pronounced HAN-uh-dees) came to work with him, and he later became a minor working partner.

Howard had a friend who practiced karate in a loft at 188 Duane Street, and his landlord gave Howard a small space that had a desk in it on another floor of the same building. So Howard moved in his mill and started doing business as The Infinity Company. Within 2-4 years Howard incorporated the company and changed the name to The Infinity Food Company. Then the health food stores began asking Howard to make other kinds of fresh flour, such as rye flour or corn meal. He did, and soon the product line had expanded to 250 different products. Eventually he had two 30-inch flour mills plus a 24-inch mill and some little 8-inch ones. He had a room full of mills, and milling was a large part of Infinity’s manufacturing business. In addition, at one point, the company was getting truckloads of dried fruit and of fruit juices from California, plus jams and jellies made without sugar from the City of Industry, California.

“Michio Kushi was operating out of a house on Harvard Square in Cambridge. He was selling groceries in the hallway. He had started out in New York, then he ran into some kind of terrible financial trouble. He fled to Cambridge to avoid his creditors. His wife, Aveline, ran the business and he was the guru. In the early days, Michio was Erewhon’s biggest asset. He used to go around and lecture, then people would say ‘Where can we get this food,’ and he’d say ‘Go to Erewhon.’” Howard is not sure whether or not he ever sold products to Erewhon in the early days. Howard is not sure whether or not he began importing foods before Erewhon. “Erewhon didn’t have any kind of an operation going on when I had my warehouse. They became important later. In the beginning, they may have been getting some products from Ohsawa in Japan at the same time I was. Erewhon was located in the Kushi house in Cambridge, where a few of the real loyal macrobiotics lived with the Kushis and helped to pay the rent. They had sort of a grocery display in the hall,

and they sold some foods. In the early days, Erewhon bought miso, tamari and other typical macrobiotic products from Infinity.” Continued. Address: 84 MacDougal St., New York, NY 10012. Phone: 212-982-3620.

7848. Silver, Jimmy. 1995. Purchase of the Erewhon and Pure & Simple brand names from John Deming (Interview). *SoyaScan Notes*. Jan. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** From the day that Jimmy began to work for Erewhon—Los Angeles in 1976, he always believed that John Fountain owned the company and that John Deming was only an investor. “For years, John Fountain ran that company into the ground. I have no idea why Deming wasn’t paying attention to what was happening. Then Deming showed up and said to me ‘Listen, this company really belongs to me, and I need to know what you think about what’s happening.’ I told him, then he said ‘I’m going to get rid of Fountain and I really need to have you stay. It’s going to be a great opportunity for you.’ But when he found out what was really happening, and there was going to be work involved, he became somewhat dismayed by the whole thing. It was totally bizarre.”

So Jimmy stayed on and worked for John Deming, who sacked John Fountain in late 1978 or early 1979. Jimmy then hired Jeffrey Hilgert. In early 1980, Jeffrey negotiated with Shade Foods (a maker of yogurt toppings in Belmont, California) for Erewhon—Los Angeles to buy the Pure & Simple name, plus a few jam products, from Shade. No physical assets were purchased. Payments were made over a period of several years.

Jimmy had recommended to John Fountain that Erewhon—Los Angeles be converted from a wholesale distributor to a master distributor of branded products that were sold nationally. When John Deming came in, he liked the idea and told Jimmy to make the change. So Jimmy arranged for K&L, Nature’s Best, and many other distributors to take on the line of products that Erewhon—Los Angeles had formerly distributed for itself. The Erewhon—Los Angeles warehouse and offices were moved from Vernon to Santa Ana, California. The Santa Ana warehouse was much smaller—no more than 8,000 square feet. It housed only the imported Japanese products and Johnson’s Spaghetti Sauce.

When Jimmy and Jeff Hilgert bought Erewhon—Los Angeles from John Deming in mid-1980, they basically wanted the right to use two names: Pure & Simple, and Erewhon. Erewhon—Los Angeles was a very small company, with sales of only about \$35,000 a month at the time, and there were large debts which Silver and Hilgert agreed to pay off for Deming. “He said, ‘I have to have this amount of money’—which was a ridiculous sum. He should have just given us the company and walked away. It wasn’t really worth anything, except that it had these two valuable names—

if it could control them.

“John presumably had an agreement with Michio Kushi which allowed him to use the name Erewhon in exchange for paying royalties—a percentage of the sales of the business—to Michio. This is what all the subsequent problems hinged on. After Erewhon went bankrupt, they informed John (without our knowing it) that they were going to require us to stop using the Erewhon name—because we had no right to it, because Deming had never executed the appropriate documents with Michio and wasn’t paying Michio any royalties. The agreement that John had told us he had with Michio—that he had sold us—did not exist! By the time we discovered this, we had already paid him something like \$80,000 to \$100,000. I didn’t find out until much later that Erewhon notified him that they were going to withdraw the use of the name from him. At that point, John came to us and said ‘Look, you still owe me several hundred thousand dollars for the business, but I’d like to accelerate the payments because I really need cash, and in exchange I’ll reduce the amount of money you owe me to \$250,000.’ He wanted us to pay the balance due over 6 months rather than over something like 5 or 10 years. So we began accelerating the payments. He knew that both he and we would be sued by Erewhon, but we didn’t know it. After we had paid him \$180,000 of the \$250,000, Erewhon sued us. We went to John and asked him to defend us against the Erewhon suit since we still believed he had this agreement with Michio. Even though we had paid him \$180,000 and were in the process of paying the rest, he refused to defend us. He told us it was our problem, that he didn’t think it was a productive use of money, and that he thought he thought we should just walk away from it. So Jimmy hired a lawyer to defend himself, and asked John to produce a copy of his signed contract with Michio. I guess we neglected to scrutinize his agreement with Michio at the beginning because we trusted him and he had been using the Erewhon name for years. John did show us a copy of a written agreement at the time we made the deal, but the agreement had time frames on it, and it had to be renewed and renegotiated, and he said he was in the process of doing that. I learned a lot from this experience, but the tuition was high.

“In June 1980 we signed the agreement to purchase Erewhon—Los Angeles from John Deming, then we renamed it Pure Sales, which had two major lines of branded products: Erewhon, and Pure & Simple—plus Johnson’s Spaghetti Sauce. At the same time we were paying Deming, we were also paying Shade Foods for rights to use the Pure & Simple name. We took Deming’s business from \$35,000 sales a month to about \$350,000 a month within about a year.

Concerning names: Erewhon—Los Angeles had been a natural foods distribution company in Vernon, California, run by John Fountain. There was a time when Jimmy used both the names Erewhon—Los Angeles and Erewhon West, then Erewhon West took precedence as a name when the

company became a master distributor of branded products and its products began to be distributed nationwide. The name change took place before Erewhon—Boston declared bankruptcy.

“After Erewhon refused to allow us to use the Erewhon name, we had to come up with a new name and re-label all our products in 90 days at a cost of something like \$50,000 to \$90,000. I called the pasta “Johnson’s” and the tamari So’ Tamari, So’ Pasta, etc.” John had had his lawyer, Fred Marks, write several very specific sentences into the agreement describing the conditions under which we would not have to pay John. There was a hearing in Boston, Massachusetts, and we had to go before a bankruptcy judge there. When we lost the lawsuit, because there was no valid agreement between Deming and Kushi, our lawyer asked the judge to issue the order in the language that Deming’s lawyer had written into our contract. And he did and the judge did. We got a court order losing to Erewhon but it was worded in John’s lawyer’s language. So we went back to John and said ‘We’re not going to pay you for the balance due.’ We told him we thought he should pay back the \$180,000 we had already paid. He refused. After a month or two he sued us for the \$50,000. So we counter-sued him for everything that we had paid him plus our costs of relabeling—a total of about \$250,000 to \$350,000. John came to us and said that he would drop his suit if we would drop ours. We did not pursue our case because we wanted to focus on our booming business and we did not have the resources to prosecute a lawsuit—nor were we willing to go through the emotional energy drain. So we walked away from it. John had lots of money and for him the whole thing was like a monopoly game. Address: President, Pure Sales, P.O. Box 5116, Irvine, California 92716-5116. Phone: 714-540-5455.

7849. Anand, Karen. 1995. In fashionable taste. *Times of India (The) (Bombay)*. Jan. 31. p. 32.

• **Summary:** Discusses basic types of food that are popular in the 1990s. The section titled “Vegetarian” begins: “This must be the most ‘in’ thing that has happened to food. It is great for health. Overseas, vegetarianism is often seen as much the same as health food. Buzz words include: Tamari, a thick soya sauce with a little more flavour than a good brand “of ordinary Chinese soya.” Miso, also made from the soya bean, is used to flavour soups. Humous [Hummus] and Pitta [Pita] bread started out as elements of Levantine cuisine, but are now used widely by vegetarians. “Tofu, a soya bean curd,” is eaten by many who have lactose intolerance.

Other cuisines discussed are French bistro, Mediterranean, Southern Florida / Creole, and Comfort food.

7850. Brennan, Jennifer. 1995. The emperor’s soy sauce. *Gourmet*. Jan. p. 92-93, 135-36.

• **Summary:** This noted Anglo-Indian food writer describes her visit to the Goyo-gura in Noda, where Kikkoman still

makes soy sauce in the traditional way. A Kikkoman guide tells her that the Goyo-gura is “The home of the imperial soy sauce,” which is supplied to the emperor of Japan. Noda, located in northwest Chiba prefecture, is cradled between the Tone and Edo rivers.

The buildings remind her of “old London mews houses.” The soybeans are steamed in cast-iron kettles called *shikake-gama*. Wheat is roasted with a wooden paddle in a large shallow iron vessel, resembling an oversized wok, by a master roaster (*mugi-iri*). Unrefined salt is dissolved in fresh well water and the resulting brine is boiled and strained to remove any bitterness or impurities. The koji, made with wheat, soybeans and *Aspergillus oryzae* culture, is stirred twice a day. It is mixed with brine to become moromi, which is allowed to ferment in large cedar vats for one year. The room holding these vats “is a visual explosion.” A wall of glass separates the viewers from the vats, which hold batches of moromi in varying stages of maturation and are buried up to their rims in the wooden floor. Every surface—floor, walls, and ceiling—is painted a vivid glossy orange. “If one could walk into the center of a pumpkin, this is what it might be like.” The orange color has symbolic connections to Shintoism.

In the old days, after the fermentation was finished, the moromi was poured into cotton sacks, which were stacked in a wooden pressing chamber called a *fune*, or boat. The liquid shoyu was pressed out into a tub, then poured into a vessel to be heated to stop the fermentation; finally it was bottled in ceramic containers. To evaluate the quality of the shoyu for color, aroma, consistency, and flavor, professional tasters use small white dishes called *kikimi-zara*.

A room beyond the tasting chamber serves as a small museum. There are ceramic jugs in which soy sauce was first exported to Europe from Nagasaki in the mid-1600s by the Dutch. A porcelain bottle on display, decorated with the raised Kikkoman logo, held the shoyu that was awarded a special prize at the Vienna International Exposition of 1873. A sepia photograph shows the old *takasebune* flatboats on the Edo River carrying shoyu down to the city of Edo—today’s Tokyo. Another photo shows members of the imperial family visiting the Goyogura. As she leaves, the author is presented with the “ultimate personal souvenir... It is a scarlet-labeled bottle in a simple beige carton—the emperor’s shoyu.” Her search is complete. Address: Author of several books on Asian cuisine.

7851. Mindell, Earl. 1995. *Earl Mindell’s soy miracle*. New York, NY: Simon & Schuster. A Fireside Book. 256 p. Index. 22 cm. [97 ref]

• **Summary:** Contents. Part I: Soy—The miracle food. 1. The soy story: explaining the miracle. 2. Soy by any other name. 3. Does soy prevent cancer? 4. Heart and soy. Part II: Soy for special needs. 5. Just for women: Rx for menopause and osteoporosis. 6. Just for men: Rx for prostate problems. 7.

Kids, cancer, and heart disease. 8. Tips for vegetarians. Part III: Not by soy alone. 9. Thirty-seven miracle foods from the Pacific Rim. Earl’s pearls: A guide to vitamins and minerals. Part IV: Get more soy in your life. 11. Savvy substitutions. 12. Cooking with soy. 13. Breakfast the soy way. Part V: Seventy super soy recipes (p. 149-230). Glossary. Resources. Selected bibliography.

Pages 12-13 note that soybeans are an abundant source of many different types of phytochemicals, including isoflavones, genistein, protease inhibitors, and phytic acids.

Chapter 2 describes the different types of soy foods. Traditional soy foods: Soy milk, tofu (firm tofu, silken tofu, yakidofu, koyodofu [sic, koya-dofu]), okara, natto, tempeh, miso, soy sauce, kinnoko [sic, kinnako] flour. Soy protein products: Soy protein concentrates, soy protein isolate, soy flour, texturized soy protein, meat analogs. Other soy products: Soy fiber, soybean oil, lecithin. Questions about soy foods. Page 33 asks the question: “If phytochemicals in soybeans are so healthy, why can’t they be extracted from food and made into a pill like a vitamin?” Answer: Researchers are not yet certain which phytochemicals are the most important. “There may even be other beneficial compounds in soy that have yet to be identified. Your best bet is to eat the real food.” A section titled “Soy’s top ten benefits” (p. 36-38) discusses: 1. Antioxidant. 2. Breast cancer. 3. Cholesterol lowering. 4. Colon cancer. 5. Hip fracture. 6. Hot flashes. 7. Immunity. 8. Kidney disease. 9. Lung cancer. 10. Prostate cancer.

Chapter 3, titled “Does soy prevent cancer?” discusses six compounds which cancer researchers believe may be effective in cancer prevention: Isoflavones, genistein, daidzein, protease inhibitors, phytic acid, and saponins. A long section later in the chapter discusses each of these, with special emphasis on genistein.

Note: The author has also written *Earl Mindell’s Herb Bible* and *Earl Mindell’s Food as Medicine*. He is a newcomer to this field. This book may appeal to those who are looking for miracles from the foods they eat. Most of the information contained in this book can be found in Mark and Virginia Messina’s outstanding *The Simple Soybean and Your Health* (1994), and the *First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease: Proceedings from a symposium held in Mesa, Arizona, on February 20-23, 1994*, published in full in *The Journal of Nutrition* Vol. 125, No. 3S, March 1995 Supplement. It was from this symposium and the outline published before the symposium that Mindell got his idea for this popular book.

Dr. Mindell is an R.Ph. (Registered Pharmacist) with a PhD in Nutrition from Pacific Western College in Renton, Washington.

According to a review of *Earl Mindell’s New and Revised Vitamin Bible*, by James A. Lowell, PhD. (Nutrition Forum, June 1986) “Mindell claims to hold valid credentials in nutrition. Although he does have a bachelor’s degree in

pharmacy from the University of North Dakota, his Ph.D. is from the University of Beverly Hills, an unaccredited school which lacks a campus or laboratory facilities.” Mindell helped to found the Great Earth chain of vitamin and health food stores, numbering about 200 in 1986, America’s second largest such chain. Address: R.Ph, PhD, registered pharmacist and Prof. of Nutrition at Pacific Western Univ. in Los Angeles. He lives in Beverly Hills, California.

7852. Product Name: Vegan Cajun Burger (On a Bun), and Cajun Tofu Sloppy Joe (The Filling).

Manufacturer’s Name: Soy Devine.

Manufacturer’s Address: 1881 Fieldbrook Road, Arcata, CA 95519. Phone: 707-849-8430.

Date of Introduction: 1995. January.

Ingredients: Processed organic tofu [frozen], tomato sauce, onions, honey, mustard, cider vinegar, safflower oil, tamari (Westbrae), peanut butter, garlic, miso, spices (incl. paprika, cayenne, allspice).

New Product–Documentation: Talk with Mara Devine. 1995. June 1. Cajun Barbecue Style was first introduced in 1987. In Jan. 1995 it was renamed and divided into two products: Vegan Cajun Burger, and Cajun Tofu Sloppy Joe. The latter product is sold as a product in its own right, but also serves as the filling for the burger. She moved from Miranda to Arcata, California, in June 1993.

7853. New York Times. 1995. Good eating: Northern lights, south of the park. Feb. 5. p. CY16.

• **Summary:** This is a brief restaurant review of China Grill (60 West 53rd St., New York City). “Among starters are steamed mussels with a ginger black bean sauce;...”

“Main courses include grilled aged Sichuan beef tossed with sake, shallots, soy [sauce] and cilantro.” Reviewed 19 Nov. 1993.

Note: This is the earliest (and only) document seen (Nov. 2011) that uses the term “ginger black bean sauce” to refer to a sauce made from salted fermented soybeans (fermented black soybeans) and ginger.

7854. Arnold, Kathryn. 1995. The joy of soy. *Delicious!* (Boulder, Colorado). Feb. p. 34-36. [3 ref]

• **Summary:** The soybean “has long been revered by vegetarians as a nutritional powerhouse. However, the real secret is that soyfoods may help prevent disease.” They are cancer fighters and good for the heart. A table (p. 36) lists 12 different types of soyfoods and their uses: Tofu, tempeh, okara, miso, natto, TVP, soymilk, soy grits, soy flour, soy cheese, soy sauce, soy yogurt.

Note: This periodical, which began publication in about 1983, is published for natural products consumers by New Hope Communications in Boulder, Colorado. As of March 1998 some 425,000 copies of *Delicious!* are distributed each month to over 900 health food retail stores throughout the

United States.

7855. Anand, Karen. 1995. Get fresh at TK’s: Good food guide. Bon appetit. *Times of India (The) (Bombay)*. March 7. p. A4.

• **Summary:** Top quality ingredients and an informal ambience make it a pleasure to dine at TK’s, the Hyatt Regency’s new Japanese restaurant. TK’s stands for Teppan Yaki Kitchen. Newcomers may wish to wish to choose from one of the four reasonably priced set menus (two are vegetarian), each of which includes 5 courses, such as “Japanese miso soup and dessert.” Three sauces comes with grilled dishes; the “soya ginger sauce” is used primarily to season seafood, but it is delicious on many other foods.

7856. Product Name: Soy Miracle Ultimate Shake (Chocolate Royale, Creamy Vanilla Almond).

Manufacturer’s Name: FreeLife International.

Manufacturer’s Address: 354 Woodmont Rd., Suite 5, Milford, Connecticut 06460. Phone: 1-800-882-7240.

Date of Introduction: 1995. March.

Ingredients: Ultra Soy Complex I (Trademark) {An exclusive blend of Supro brand soy protein isolate, soy fiber, soy lecithin, tofu powder, soy flour, tamari soy powder, miso powder, & Cholestatin (Trademark) (mixed soy phytosterols)}, crystalline fructose, complex carbohydrate (maltodextrin), Dutch cocoa powder, natural flavors, xanthan gum, oat fiber, calcium phosphate, magnesium oxide, potassium chloride, siberian ginseng, ascorbic acid, inositol, choline bitartrate, blue-green micro algae, L-carnitine, vitamin E acetate, Spanish bee pollen, apple pectin, citrus bioflavonoid, niacinamide, zinc oxide, invertase (plant enzyme), ferrous fumarate, D-calcium pantothenate, vitamin A palmitate, manganese sulfate, pyridoxine hydrochloride, riboflavin, thiamine hydrochloride, bromelain, papain, folic acid, biotin, vitamin D-3, potassium iodide, chromium, picolinate, sodium selenate, sodium molybdate, cyanocobalamin.

Wt/Vol., Packaging, Price: 15 oz (240 gm).

How Stored: Shelf stable.

Nutrition: Per one level scoop (14 servings per container): Calories 95, calories from fat 0, total fat 0 gm (0% daily value; saturated fat 00 gm), cholesterol 0 mg, sodium 150 mg (6%), potassium 150 mg (4%), total carbohydrate 16 gm (dietary fiber 2 gm, sugars 10 gm), protein 10 gm. Vitamin A 100%, vitamin C 100%, vitamin B-1 100%, vitamin B-2 100%, vitamin B-6 100%, vitamin E 100%, niacinamide 100%, pantothenic acid 100%, folic acid 100%, biotin 100%, vitamin D-3 100%, vitamin B-12 100%, calcium 30%, phosphorus 20%, magnesium 20%, iron 25%, zinc 100%, iodine 100%. Percent daily values are based on a 2,000 calorie diet.

New Product–Documentation: FreeLife leaflet. 1995. “FreeLife: Experience the incredible benefits of FreeLife’s

exclusive Soy Miracle products.” “The cornerstone of the Soy Miracle Ultimate Body Program is the fat-free Ultimate Shake. The Ultimate Shake was specially designed to be a great-tasting source of many important nutrients needed to achieve optimal health and to help decrease excess body fat when used as part of the complete Soy Miracle Ultimate Body Program.

“Dr. Mindell’s exclusive formula, Ultra Soy Complex I, contains eight of the most powerful soy foods synergistically combined to create the ultimate nutritional shake. These soy foods include the world’s best soy protein isolate, soy fiber, soy lecithin, tofu powder, soy flour, tamari powder, miso powder, and mixed soy phytosterols. The Ultimate Shake also contains blue-green micro-algae, Siberian ginseng, Spanish bee pollen, and active enzymes [from the soy flour?] for better absorption.

“The Soy Miracle Ultimate Shake can be used as a complete meal replacement or healthy snack and provides 100% of the USRDA of all essential vitamins and most minerals. For maximum fat-loss results, replace one or two meals each day with a delicious Soy Miracle Shake and eat at least one well-balanced meal. Increase your daily physical activity and supplement your diet with FreeLife’s Soy Miracle Ultimate Antioxidant and Ultimate Body Toner.”

Label for Chocolate Royale sent by Carolyn Ashman of Napa, California. 1995. May 15. She is a FreeLife distributor. Phone: 707-259-9459. “Directions: As a dietary supplement, add one level scoop (scoop included in can) of Soy Miracle Ultimate Shake (TM) to 8 fl. oz. of skim milk or Westsoy nonfat soy milk and blend or shake until smooth. For best flavor, milk should be very cold. For maximum results” the shake should be used together with the two other products in this line and “the complete Soy Miracle Ultimate Body Program (TM).”

Talk with Luke Taffuri, Vice-President of Operations, FreeLife International (354 Woodmont Rd. #5, Milford, Connecticut 06460. Phone: 1-800-882-7240). 1995. May 30. To buy these products, you must be sponsored by a distributor. Cost: \$61.25 for all 4 products incl. shipping. Each can of shake is \$18.55. Antioxidant is \$19.60. Body toner is \$18.55. How much genistein is in these products? If each day you take one serving of a shake and two antioxidant pills plus two body toner pills, you will get 20 mg/day of genistein, plus 16-17 mg/day of daidzein. These products were introduced on 1 Feb. 1995, at the same time as Dr. Mindell’s book became available. The company, FreeLife, was started in 1995.

Talk with Karma McLleskey of Fairfax Station, Virginia. 1995. Aug. 18. Luke Taffuri runs the computers at Freelif. The people who know the most about the products are Ray Faltinsky (president) and Kevin Fournier (vice president).

7857. Furuhashi, Hideki. 1995. Japanese soyfoods markets. Paper presented at a conference titled “Producing Soybeans

for the Soyfoods Market.” 9 p. Held 2 March 1995 at Ames, Iowa.

• **Summary:** This paper consists of nine very interesting statistical tables, one on each page. Table 1 shows the supply and demand for soybeans in Japan from 1984 to 1992 (in tonne = metric tons). The supply of Japanese-grown soybeans decreased from 126,000 tonnes in 1984 to a low of 73,000 tonnes in 1992, and imports increased from 4,401,000 tonnes in 1984 to 4,725,000 tonnes in 1992. The demand for soybeans from crushers has stayed about steady, ranging from a low of 3,428,000 tonnes in 1991 to a high of 3,928,000 tonnes in 1985. Demand for food uses has increased from 786,000 tonnes in 1984 to a high of 927,000 tonnes in 1992 (up 18%). Demand for use as feed has increased from 55,000 tonnes in 1984 to 95,000 tonnes in 1992.

Table 2 shows soybean utilization in Japan by type of food product from 1987 to 1994: Use of soybeans for tofu and aburage stayed about steady at 498,000 tonnes, by far the largest food use. Use for miso decreased slightly from 180,000 tonnes in 1987 to 170,000 tonnes in 1994. Use for natto grew strongly from 97,000 tons in 1987 to 110,000 tonnes in 1994. Use for kori-tofu (dried-frozen tofu) grew slightly from 29,000 tonnes in 1987 to 30,000 tonnes in 1994. Use for soy sauce grew strongly from 5,350 tonnes in 1987 to a record 25,300 tonnes in 1992, dropping slightly to 23,000 tonnes in 1994. Use for soymilk decreased slightly from 4,000 tonnes in 1987 to 3,100 tonnes in 1994. Total use of soybeans for food in Japan grew slowly from 875,350 tonnes in 1987 to 930,000 tonnes in 1994 (up 6%).

Table 3 shows Japanese population and per capita consumption of soyfoods from 1982 to 1992. Population grew from 103,720,000 to 124,452,000 during this period, while per capita consumption grew from 6.8 to 7.4 kg/capita (up 8.8%).

Table 4 shows per family expenditures and consumption per year on tofu, natto, miso, and soy sauce from 1982 to 1992. For example, expenditures on tofu increased from 2,535 yen in 1982 to 7,992 yen in 1992, while consumption fell from 87.98 cakes to 79.26 cakes. Thus in 1992 the average Japanese family consumed 1 cake of tofu every 4.6 days.

Table 6 shows imports of soybeans for food from the USA, Canada, and China from 1982 to 1992. Imports from the USA are subdivided into IOM, Beeson, and other identified varieties. In 1992 about 88.7% of food-grade soybeans imported to Japan from the USA were IOM. Moreover, of all these soybeans imported for food use in 1992, about 76.6% came from the USA, 21.5% from China, and 1.85% from Canada.

Table 6 shows the amount spent per capita by people of different 5-year age-groups on four soyfood products. The average person in the age 60-64 year group spent ¥2,976 on tofu, ¥1,539 on miso, ¥1,490 on soy sauce, and ¥1,098 on

natto. The average person in the age 30-34 year group spent ¥1,581 on tofu, ¥603 on miso, ¥508 on soy sauce, and ¥708 on natto.

Table 7 shows the source of soybean used to make four soyfood products in 1984, 1990, and 1992. In 1992, of the 498,000 tonnes of soybeans used in tofu and aburage in Japan, 74.8% of the soybeans were IOM from the USA, 6.0% were Beeson (USA), 8.0% were other U.S. varieties, 3.0% were from China, and 8.0% were grown in Japan. Of the 30,000 tonnes used to make dried-frozen tofu, 86.7% were IOM and the rest were from China. Of the 108,000 tonnes used to make natto, 55.5% were from the USA and Canada, 39.8% were from China, and 4.6% were grown in Japan. Of the 176,000 tonnes of soybeans used to make miso, 88.0% were from China, 5.7% were white-hilum beans from the USA, and 6.25% were grown in Japan.

Table 8 shows that production of soybeans in Japan from 1982 to 1994 has decreased sharply. In 1982 some 262,300 tonnes were produced on 147,000 ha with a yield of 1,782 kg/ha. In 1994 some 98,800 tonnes were produced on 26,500 ha with a yield of 1,620 kg/ha.

Table 9 is two charts showing the distribution system for (1) Imported soybeans from suppliers to end users, and (2) Domestic soybeans from farmer to end users. Farmers sell to the Zenno Nokyo or a collector. Address: Mitsui & Co. Phone: 515-294-0160.

7858. Golbitz, Peter. 1995. Traditional soyfoods: Processing and products. *J. of Nutrition* 125(3S):570S-572S. March. Supplement. First International Symposium on the Role of Soy in Preventing and Treating Chronic Disease. [9 ref]
• Summary: Contents: Introduction. Soymilk. Tofu. Tempeh. Miso. Soy sauce. Address: Soyatech, Inc., Bar Harbor, Maine 04609. Phone: 360-379-9544.

7859. Iowa State University. 1995. Producing soybeans for the soyfood market: Conference schedule and registration (Leaflet). Ames, Iowa. 6 panels.
• Summary: On Thursday, 2 March 1995, Iowa State University held a 1-day conference titled "Producing Soybeans for the Soyfoods Market" at the Holiday Inn Gateway Center, Ames Iowa. No proceedings were published. Schedule: Wednesday evening: Tour of Iowa State University's Pilot Plant and Center for Crops Utilization and Research. Soyfoods tasting reception follows at the Holiday Inn Gateway Center for conference registrants. Thursday. Morning session: Markets, trade, and policy. 8:30 a.m.—Welcome and introductions, by Lester A. Wilson. 9:00—Japanese soyfoods markets, by Hideki Furuhashi, Mitsui & Co. 9:45—Growth potential for soyfood beans in Asian markets, by Lester A. Wilson. 10:30—Break. 10:45—U.S. participation in soyfoods markets in the Pacific Rim, by Robert Neal, Agri-Grain Marketing. 11:30—Trade policy changes and opportunities, by Paul Gallagher. 12:15—Lunch.

Afternoon session: Soybean varietal effects on soyfood quality. 1:30 p.m.—The effect of varietal characteristics on perceived soyfood quality, by Keisuke Kitamura, Chief, Legume Breeding Lab, MAFF [Ministry of Agriculture, Forestry and Fisheries], National Agricultural Research Center, 3-1 Kannondai, Tsukuba, Ibaraki 305, Japan. 2:15—Soybean breeder panel discussion, with Keisuke Kitamura, Walter Fehr (ISU), Dennis Strayer (Strayer Seeds), Tom Brumm (MBS Seeds), Clark Jennings (Pioneer Hi-Bred Intl.), Jerry Lorenzen (FTE Genetics). 2:45—ISU research presentations: (1) Soybean varietal and storage effects on tofu processing—Pilot plant study, by Lester A. Wilson and Patricia Murphy. (2) Rapid quality testing with near-infrared whole grain analyzers, by Charles Hurburgh. 3:30—Break. 3:45—Health benefits of soyfoods, by Mark Messina (American Soybean Association health consultant); Isoflavones in soybeans and soyfoods, by Patricia Murphy (ISU Dep. of Food Science and Human Nutrition). 5:00 p.m.—Closing comments and questions.

Conference sponsors: Midwest Agribusiness Trade Research and Information Center (MATRIC, Iowa State Univ.). Center for Crops Utilization Research (ISU). Utilization Center for Agricultural Products (UCAP, ISU). Iowa Soybean Promotion Board. MSGA/MSPRC (Minnesota Soybean Growers Assoc. / Minnesota Soybean Research & Promotion Council). Registration fee: \$100 before Feb. 15, or \$125 thereafter.

A five-page directory of the 74 attendees is attached. Address: Ames, Iowa.

7860. Mogi, Yuzaburo. 1995. Re: Selection to become President and Chief Executive Officer of Kikkoman. Letter to William Shurtleff at Soyfoods Center, March 3. 1 p. Printed, with signature.

• Summary: "On February 6th, the Board of Directors selected me to become President and Chief Executive Officer of Kikkoman Corporation, effective that date."

Note: This printed announcement was sent to friends and shareholders of Kikkoman. Address: Tokyo, Japan.

7861. Ontario Soybean Growers' Marketing Board. 1995. Technical soybean mission: Japan, Hong Kong, Malaysia, Singapore. March 10-26, 1995. Chatham, Ontario, Canada. 23 p. 28 cm. [Eng]

• Summary: Contents: Participating members: Dr. Karen Lapsley, Mr. Ron McDougall, Mr. Michael Loh, Mr. Doug Jessop (food technologist and tofu expert, Harrow Research Station), Mr. Kim Cooper (marketing specialist, OSGMB). Note: This is the first Canadian soybean mission in which a food technologist (Doug Jessop) participated. Background. Mission objectives. Acknowledgements. Mission details—Japan: Canadian embassy.

Japan Miso-Co-op Industrial Association: Japan imports about 250,000 tonnes {metric tons} of soybeans from China

each year, and about 150,000 tonnes of that amount is for the miso market. The remaining miso soybeans come from Canada, USA, and Japan. The best soybean for making miso comes from the Hokkaido area of Japan. It is a large, white hilum type, perhaps Toyomasuri. Generally the larger the soybean the better for making miso. Japanese miso makers need two types of soybeans from Canada: (1) Normal SQWH (Special Quality White Hilum); average values for color, taste and texture are acceptable though higher values would be preferable; (2) High Premium Soybeans; they would consider paying a premium for better color, taste, and texture.

Azuma Natto Foods Co. Ltd.: This natto company uses 7,000 tonnes/year of soybeans making them the third largest natto maker in Japan. They use 65% USA, 25% Japanese, and 15% Canadian soybeans. There are four sizes of natto: Small natto < 5.5 mm accounts for 72% of the natto market in Japan; Large natto, 5.5 to 6.2, account for 18%. Extra large natto > 8.5 mm account for 18%. Split seed natto account for 10%. Factors in assessing the suitability of soybeans for natto are: Fat content should be less than 19%. Total sugars—Group 1 contains sucrose, fructose, and glucose, group 2 contains raffinose and stachyose. Calcium affects the hardness or softness of natto. The ideal range is 180-250 mg/100 gm. Sanwa Company—Tofu manufacturer.

Wed., March 15—Japan Tofu Association: There are over 20,000 tofu makers in Japan, and 53 of these are members of this association, with half of the 53 being in the Tokyo area. Only 185 tofu manufacturers in Japan have 30 or more employees. Tofu makers consider there are two types of organic soybeans: true organic and semi-organic. The association imports about 2,000 tonnes of each type from the USA; they are OCIA certified.

Home Foods Company Ltd. uses 4,000 metric tons of soybeans a year, mostly a blend of 70% Chinese white hilum and 30% U.S. white hilum. The soys from the USA are I.O.M. soybeans, especially the “High Super” variety. For the more premium market they use a blend of 50% Japanese soys and 50% Harovinton soybeans. They have also just started blending 50% Chinese and 50% Canadian white hilum soybeans. The two most important criteria for their soybeans are high protein and high total sugars. Sugar levels of Chinese soybeans (24-25%) are higher than those of Canadian soybeans (23-24%).

Thursday, March 16—Takeya Miso Co.: Ikuo Fujimori, President. Takeya has two plants employing 100 production workers and using 5,000 to 6,000 tonnes of soybeans yearly. 70-80% of their products are sold in supermarkets. For years they have been using the U.S. soybean variety Kanrich.

Nagano Chushin Agricultural Experiment Station: They have been breeding soybeans since 1957 and in that time have developed and released 17 varieties, the most famous being Enrei. The staff of 34 includes 5 soybean breeders. Dr. Nobuo Takahashi has been breeding soybeans for over

18 years. Japan has domestic soybean area of 370,500 acres (150,000 ha); it is decreasing, so imports are increasing.

Nagano Miso Industrial United Co-operatives: This group consists of 8 local co-ops made up of 160 miso manufacturers, who pay a fee to this group based on sales. There was a detailed discussion of the types of sugars in soybeans necessary for good miso.

Friday March 17—National Food Research Institute. Tsukuba is developing into a science research park, now containing over 200 different research institutes. NFRI, originally founded in 1934 as the Rice Institute, moved to Tsukuba from Tokyo in 1973. Thirty years ago, all tofu in Japan was made with Japanese soybeans. Dr. Toshiro Nagai spoke about natto: In 1992 the natto needs of Japan were met by soybeans from China (45%), USA (38%), Canada (17%), and Japanese domestic (8%). Natto consumption has increased by about 10% for each of the last few years. Dr. Sayuki Nikkuni spoke about miso: In 1992 the miso needs of Japan were met by soybeans from China (87%), USA (6%), Japan (6%), and Canada (1%). Dr. Kaoro Koyama spoke about tofu: In 1992 the soybeans for tofu totaled 490,000 tonnes and came from USA (390,000 tonnes; 80%), Canada (50,000; 10%), Japan (20,000; 4.1%), China (20,000; 4.1%), and South America (10,000; 2.0%).

Asahi Food Processing Co. Ltd. This plant, which has 350 employees and operates 365 days/year, was established in 1972 and produces tofu, fried tofu, natto, noodles, and juices. They use 15 tonnes of soybeans daily or 4,900 tonnes/year, of which 38.8% are grown in Japan and the remaining 61.2% are IOM from the USA. Each day they make 120,000 cakes of tofu, 100,000 pieces of fried tofu, and 20,000 packages of natto. Most of the soybeans they use in production are dehulled. They use about 500 tonnes/year of OCIA certified soybeans from the USA and some semi-organic soybeans from Japan. The prices they pay per kg of soybeans are: IOM 30-40 yen; Vinton, identity preserved varieties, and Harrovinton [Harovinton] 100 yen; organic 120-140 yen; Enrei (Japanese) 400 yen.

Saturday, March 18—Hong Kong. Canadian High Commission. Canada Packers (Hong Kong) Ltd.

Monday, March 20. Shenzhen Economic Zone: This area of 30 square km, just outside the Hong Kong border, contains 1 million people or 60% of the provincial population, all of whom require a special permit to work in the area. This economic zone is booming, basically due to spiralling costs in Hong Kong, where many businesses and factories are closing and moving to this area, where land and labor costs are much lower.

Shenzhen Vitasoy (Guang Dong) Foods & Beverage Co. This plant, which is only one year old, produces a major share of the soymilk for Hong Kong. They are able to import soybeans at a low tariff rate because they ship the majority of their finished products back into Hong Kong. The plant uses Canadian SQWH (Special Quality White Hilum) soybeans,

but has problems with uneven seed size. They presently receive the soybeans in 45 kg jute bags, but would prefer strong 45 kg poly-lined paper bags. A small percentage of dairy milk is mixed with the soymilk, which is thought to improve its texture and taste.

Tuesday, March 21. Dah Chong Hong, Ltd. This was the first company to import Canadian soybeans for food use in the early 1970s. Dah Chong pointed out that Ontario soybeans were experiencing increasing competition from Quebec soybeans, especially in the past two years. The Quebec soybeans are 5-10% less expensive, due to lower basis levels, lower freight costs, and being more aggressive in a new market. Their quality is similar to Ontario, though the seed coat color is somewhat darker. There are about 50 tofu makers in Hong Kong, 10 larger size and 40 smaller size, although there is not a large difference in size. Consumers believe that packaged tofu is not as fresh as that purchased fresh daily from local markets.

Amoy Food Ltd. (Dr. Alain Butler; This plant makes soy sauce and other sauces used in cooking. They use only Canadian soybeans, the Maple Glen variety from Quebec). Wed., March 22. The group visited Hung Tao Soya Bean Products Pty., a traditional Hong Kong tofu and soybean sprout plant in the New Territories.

Thursday, March 23—Malaysia. Canadian High Commission. Yeo Hiap Seng (Malaysia) Berhad (Contains excellent details on the company). Chop Lee Kit Heng Sdn. Bhd. (A soybean trader selling to end users in Malaysia).

Friday, March 24—Singapore. Canadian High Commission. Yeo Hiap Seng Ltd. (Singapore). Meeting with nine tofu manufacturers in Singapore. (The name of each company is given. There are 40 tofu makers in Singapore, and the majority now use Canadian soybeans. Tofu growth in the last 5 years has been very rapid and competition is fierce). Asia Corporation Pte. Ltd. (This company accounts for about 70% of the soybeans imported into Singapore and Malaysia. They first brought Canadian soybeans into the area in 1978). Canadec Private Ltd. Sing Yeap Trading Pte. Ltd.

Saturday, March 25—Unicurd Food Company Pte. Ltd. (Mr. Goh gave a tour of his facility and discussed his plans for a new plant in late 1995). Yam Thye & Co. (Warehouse).

Encore Ltd.: Sylvia B. Hollenstein, managing director. This company, based in Switzerland, uses Swiss technology to produce soy yogurts, chocolates, and noodles in Switzerland from Chinese soybeans—mostly for the taste. The products are shipped from Switzerland to the company's 3 retail stores in East Asia; they plan to expand to 10 retail stores by the end of 1995.

Appendixes A through J, issued as a separate document, contain extensive and detailed information and some published documents related to the technical mission. Address: P.O. Box 1199, Chatham, ONT N7M 5L8, Canada. Phone: 519-352-7730.

7862. Smith, Paul. 1995. History of Soy Products of Australia Pty. Ltd., and the work of Vincent R. "Ron" Smith. Part V. 1980-1995. Bayswater, Victoria, Australia. 6 p. Aug. Unpublished manuscript. Handwritten. Updated by several interviews with and letters to William Shurtleff in March 1995.

• **Summary:** In April 1980 Ron and Mabel Smith's eldest son, Paul, abandoned his career as an architect and joined them full time at Soy Products of Australia. Born on 23 January 1949 at Queens Road, South Melbourne, Paul had Architecture, Landscape Design, and Master of Business Administration (MBA) degrees. He had been a director of the company since Aug. 1977. In 1990 Paul became General Manager of the company following Mabel's retirement. In 1981, at the request of William Shurtleff of Soyfoods Center, Paul wrote a brief history of his company (which see). Thereafter, his interest in the company's history steadily grew, and he did extensive research on the subject. Paul is thinking about writing a biography of F.G. Roberts, so he has collected some documents about his life, including articles from *Nature's Path to Health*, published exercise regimes, iridiagnosis charts, and some recipe books. Unfortunately the company has no product catalogs from before 1985. Paul has written parts of the story and he has written an outline article in a 1985 company brochure.

Paul's human sources of information on F.G. Roberts were: His father and mother, Ron and Mabel Smith. Mrs. Gladys Hawken (F.G. Roberts' daughter). Mrs. Esmae Noeline Jackson (1937 -; née Grimes, granddaughter of F.G. Roberts and his wife Gladys; she was reared by both of them). Grahame Newitt (1939 -; chiropractor, grandson of F.G. Roberts, and brother of Esmae). Mr. David Evans, a naturopath who operated F.G. Roberts' clinics at Newcastle and Sydney during the 1930s. Mr. William Pruss, who worked with F.G. Roberts' brother, W.E. "Bill" Roberts in Sydney during the 1930s and 1940s. Nurse Cogan who operated F.G. Roberts' shop and clinic at Ballarat, Victoria, continuously from 1937 until her death in 1993. Numerous patients of F.G. Roberts, including Mr. Shugg (from Surrey Hills, a suburb of Melbourne), Nan Yates (diagnosed with terminal cancer in 1969 and still alive today), and Mrs. Alice Harding (diagnosed with cancer of the liver in 1939, who remarried at age 80 and died in 1987 at age 88).

The "Roberts" brand has been used continuously since F.G. Roberts commenced manufacturing in 1932 at 40a Chapel St., St. Kilda. The "Roberts" brand name applies to numerous other products, developed by Roberts in the 1930s, which have nothing to do with soybeans, e.g. "Molasses," "Alfalfa Tea," "Skin & Healing Ointment," "Vita Balm" (a heat rub), "Malted Bran," cider vinegar, etc., some of which we still manufacture and sell in addition to our soy products.

Apparently many of F.G. Roberts' personal papers and records were either dumped or acquired by Stephen (?) Newitt when Gladys Roberts Hawken sold her home to

move into Corinella Retirement Village about 2 years ago. At least one complete set of *Nature's Path to Health* from July 1930 to Jan. 1947 still exists, privately owned, bound in five volumes.

Concerning old advertisements for products made by F.G. Roberts, Paul has original issues of *Nature's Path to Health* from 1935 (2 issues), 1936 (2 issues), and 1937, plus the April-May 1949 issue. He has seen later and earlier issues, and from some of these he has been able to photocopy articles and advertisements.

In the company's archives Paul can find no product labels or brochures which predate the move to Bayswater in 1968. All existing old labels have the Power Road, Bayswater, address, but many of them were copies of earlier labels with only the address changed. Some of the artwork goes back to the 1930s and early 1950s in format and design.

Even though F.G. Roberts was baptised a Seventh-day Adventist, attended an SDA college and married a woman who became a devout member of that church, he left the SDA church for many years during the middle of his life due to a mismatch between his views and the more conservative views held by the church and its elders at that time. There was intense competition between Roberts and Sanitarium Foods, owned by the SDA church. Roberts was a proponent of Norman Vincent Peale's "Power of positive thinking, and was very critical of Sanitarium Foods' use of wheat gluten in their meatlike products, nutmeats, etc. He also felt the SDA diet was too high in starch, sugar, and gluten. Ron Smith recalls that Roberts never discussed the matter with him.

Gladys, F.G.R.'s wife, remained a staunch SDA parishioner and member of the church throughout her life, paying out of her own income to send a number of children to SDA colleges in Australia and Fiji. F.G.R. upheld his wife in her religious beliefs and works, often waiting outside in the car while she and the children attended church. Yet F.G.R. was a very spiritual / religious person judging from the memories of those who knew him, and the tone of his magazine, *Nature's Path to Health*. His granddaughter, Esmae Jackson, was brought up in the Seventh-day Adventist religion and is still a devout, active member of the church. F.G.R. and his wife, Gladys, reared Esmae, due to friction between herself, her mother, and her stepfather. They paid Esmae's fees to attend the SDA college in Oxley Rd., Hawthorn (very near the 1954-1968 factory) and later Avondale College (SDA), where she studied to be a teacher. Esmae speaks very highly of the kindness and generosity of her grandparents for paying her school fees, etc. She apparently had a very happy and secure childhood with them. Paul suspects that F.G. Roberts felt that a religious background was not important to his work and it may have alienated some potential customers. He was widely known throughout Australia, and treated many SDA patients, including several people that Paul knows who formerly worked for the company.

Since 1957, Soy Products of Australia Pty. Ltd. has operated in two parts: One part is a flour milling / commodity type operation, producing heat-treated / stabilised / debittered products including Debittered Full Fat Soy Flour and Grits (the grits come in coarse and fine mesh), Lightly Steamed Full Fat Soy Flour, Heat Treated Soy Fibre Flour (from soy hulls), Stabilised Wheat Germ, and Stabilised Wheat Bran. They also produce heat treated wholegrain rice flour, and maize flour. The other part of the business produces specialty retail products under the Roberts' brand name for the health food, diabetic, and coeliac [celiac] markets. This product range, remaining true to Roberts' philosophy of minimally processed whole foods, continues to include such soy-based foods as Soy Compound, Gluten Free Plain Flour, Gluten Free Self Raising Flour, Soy Crunch, and Vita Elm.

They also make some vegetarian burgers. In addition, since 1963, Soy Products of Australia has supplied cleaned and bagged Australian-grown soybeans to various commercial manufacturers of tofu, soy sauce, and other soyfoods in Australia. Since the early 1970s, most of these soybeans have been grown in the Riverina area in southern New South Wales and northern Victoria.

75% of the company's annual turnover relates in some way to soybeans. About 40% of their turnover is sold under the Roberts brand name and the remaining 60% is sold as commercial commodity products. They also do a fair amount of specialist contracting for the food industry, mainly stabilising bran and wheat germ, and milling, sieving, and mixing a variety of food stuffs for human consumption. They also process rice, maize, rye, barley, oats, wheat, and other grains for internal use. They are currently testing buckwheat, lupins, and chickpeas for both internal (i.e., under the Roberts brand) and external use. They propose to use them in conjunction with soy in a variety of applications. They are moving increasingly towards making user-friendly, convenience "health" or healthy foods which meet F.G. Roberts' ideals.

The company has 6 full-time employees and also employs a pool of casuals as required. The mill is highly automated, needing only a single operator. Last year's sales figures are confidential.

As of 1995 Paul Smith is involved in all aspects of the business, including building, plant and equipment selection, design, and development, product development, packaging design, information technology, etc.

V.R. "Ron" Smith is presently the Managing Director and major shareholder of the company; his wife and son Paul own the remaining shares. His main duties now revolve around maintenance and plant installation, with some consultative input on milling, sieving, and general product development. He no longer plays an active role in the day to day running and management of the company.

An excellent 4 by 6 inch black-and-white photo sent by Paul Smith shows F.G. Roberts, dressed in a coat, tie, and

hat. Address: Director/General Manager, Soy Products of Australia Pty. Ltd., 69 Power Road, Bayswater, VIC 3153, Australia. Phone: (03) 729-1738 or 729-3611.

7863. Kawakami, Kozo. 1995. *Tsurezure Nihon shokumotsushi: Dai 3 kan* [Leisurely history of Japanese foods. Vol. 3]. Tokyo: Tokyo Bijutsu. 195 + 3 p. Illust. Index. 21 cm. [Jap]
• Summary: As the title implies, the author is writing about 50 foods he finds particularly interesting.

Entries containing an asterisk (*) are about or mention soy. About Mr. Kawakami (sensei) by TANAKA Seiichi. *Dengaku tofu* * (p. 1+). History of *dengaku tofu* * (p. 3+). *Yuba* * (p. 8+). Summary of “History of Tofu” * (p. 13+). *Abura-age* of tofu (Deep-fried tofu pouches) * (p. 17+). *Itohiki natto* * (p. 21+). *Tororo* (Grated tororo imo—glutinous yam—is often served atop dishes such as soba = buckwheat noodles) (p. 24+).

Oroshi daikon (Finely grated juicy raw daikon = Giant Japanese white radish) (p. 30+). *Oroshi-gane* (Grater) (p. 33+). *Mentori daikon* (One method of cutting the daikon root to keep the shape during the simmering) (p. 37+). *Owari daikon* and *miyashige daikon* (Names of daikon varieties) (p. 39+). *Gobo* (Burdock root) (p. 43+). *Sasagaki gobo* (burdock root) and *sasagaki daikon* (*Sasagaki* is a special shaving/cutting method. End result: the cut vegetables look like bamboo leaves) (p. 48+). *Yatara-zuke* (A kind of pickles) * (p. 52+). *Kaku-ae* (p. 55+). *Asa-zuke* (pickled asa) (p. 57+). *Takuan-zuke* (Pickled radish) (p. 62+). *Osaka-zuke* (p. 67+).

Fu, *ki-bu*, and *shofu* / *sho-fu* (Types of baked wheat gluten) (p. 70+). History of the development of *fu* (Part 1) (p. 76+). History of the development of *fu* (Part 2). *Kanso-fu* (dried) and *Kaki-fu* (Broiled) (p. 81+). *Awase-fu* and *Yose-fu* * (p. 86+; tofu is mentioned). *Chirimen-fu* (p. 88+). *Tosa-fu* (p. 91+). *Shian-fu* * (p. 94+; tofu is mentioned). *Yamakawa-fu* and *Chiyo-fu* (p. 97+).

Azuki beans and *Aka* (red) *azuki* beans (p. 101+). *Dainagon azuki* (a special variety of *azuki* beans) (p. 106+). *Azuki no suri-jiru* (Soup of pureed *azuki*) (p. 109+).

Hishio—the other name is *shoyu no mi* (Moromi mash & *shoyu* presscake) * (p. 115+). *Suri-Hishio* (ground *hishio*) * (p. 121+). *Ume-bisho* and *Yubi-hishio* * (p. 125+). *Hishio* and *shishi-bishio* * (p. 130+). *Azuki Kai* (*Azuki* porridge), *Aka-kai* (Porridge), *Uncho-juku* (Porridge) (p. 133+). *Unzo-kai* (Porridge) and *Unzo* (p. 138+). *Kowaii* and *Seki-han* (Rice recipes; *Sekihan* is red *azuki* rice) (p. 141+). History of *shiso* (*Shiso* leaves are translated as “Beefsteak leaves”) (p. 148+).

Asazuki (p. 150+). History of *Karashi* and *Keshi* (p. 153+). What is *Araragi*? (p. 158+). *Tade* / *Tadé* (p. 163+). *Itachi hajikami* and *Inu sansho* (p. 167+). History of *sansho* (*Sansho* seeds are one type of spice) (p. 170+). *Hajikami* and *Shoga* (Ginger) (p. 174+). History of *myoga* (A Japanese leafy plant with a strong flavor that is often used for a topping for *Hiyakko Tofu*) (p. 178+). *Myoga-take* (p.

181+).

Sai??? *Seki* (Chinese Name) and *Niragi* * (p. 184+). *Kawakami sensei* and the *Rikagaku Kenkyujo* (Note: *Rikagaku* means physics and chemistry), by MATSUSHITA Sachiko, Honorary Professor of Chiba University (p. 190+). 96 Years of my father’s life by Kozo Kawakami’s eldest son (Tadashi? / Tsutomu?) (p. 192+). My father, Kozo Kawakami,—A view from his 2nd son (p. 194+).

A photo (p. 191) shows the members of the *Rikagaku Kenkyujo* seated together on tatami mats in a room. A separate outline sketch and legend shows the name of each member.

The section titled “*Kawakami sensei* and the *Rikagaku Kenkyujo*,” by Prof. Matshita states (p. 190): I was able to receive his guidance for 20 years ever since I became a member of the *Ryôrisho Genten Kenkyu Kai*, a study group that started in 1994. They met at Keio University’s old wooden classroom. These people studied old culinary documents together. I listened to his lecture on the *Ryôri Monogatari*. I could not do my present work that involves Edo period culinary literature without his influence.

I also saw him at the members meeting, visited his home, listened to his talks, and took a look at his sketchbooks on many occasions. On those occasions, he enjoyed talking about his experience at *Riken* (*Rikagaku Kenkyusho*) before the war and his teacher Dr. SUZUKI Umetaro. His work on the history of Japanese Food History got started after he retired. His work before his retirement was on agricultural chemistry (*nogei-kagaku*). He worked mostly on Vitamin A at Dr. Umetaro SUZUKI’s Lab. in *Rikagaku Kenkyusho* until he moved to *Manshu Kokuritsu Tairiku Gakuin* in 1937. He received his PhD in Agriculture.

I first met him at a funeral of the late TSUJI Michiyo sensei in June 1989 held at Enmeiji Temple in Urawa. The late TSUJIMURA Michiyo sensei was in the same lab as Kawakami sensei.

The photo on the next page shows the golden age of *Riken* group who worked under Dr. Suzuki. I made a copy of one of the 3 photos from late TSUJIMURA Michiyo Sensei’s album. He didn’t have any photos from our days in Manchuria, so I was very happy and drew the picture below. The man in the center in the dark suit is Kawakami sensei.

Letter (e-mail) from Naomichi Ishige, Japanese food historian. 2008. May 18. KAWAKAMI Kozo, who passed away in 1994, was the foremost philologist on Japanese food culture. Thus, his writing is reliable enough. Continued: Address: Japan.

7864. *Ontario Soybean Growers’ Marketing Board Newsletter*. 1995. Producing soybeans for the soyfood market. April. p. 3.

• Summary: In early March, 1995, Iowa State University conducted a seminar titled “Producing Soybeans for the Soyfoods Market.” Topics covered included an introduction

to soyfoods (complete with tasting at Iowa State's Center for Crops Utilization Research facility), a review of Japan's soyfoods market, trade policy changes and challenges, quality assessment, and the effects of varietal characteristics on soyfood quality.

Speaking on Japan's soyfoods market, Hideki Furuhashi of Mitsui & Co. reported that consumption of tofu and natto is increasing slowly in Japan, while miso and soy sauce are decreasing. China has been supplying Japan with 250,000 to 300,000 tonnes/year of soybeans, mainly for making miso and natto. Japan imports between 120,000 and 130,000 tonnes/year of identity preserved soybeans, up from 100,000 tonnes 5 years ago. For example, 50,000 tonnes of Vintons were imported in 1994.

Bradley Hildebrand of Cargill in Minneapolis, Minnesota, reported that the U.S. exports about 130 million bushels/year of soybeans to Japan. About 30 million bushels (23% of the total) are used to make soyfoods. Most of the soybeans used for soyfoods in Japan are "IOM" beans because they are grown in Indiana, Ohio, and Michigan. IOM soybeans are not any specific variety or hilum color, but they are generally higher in protein and better in quality than other U.S. soybeans. They trade at a premium of 10-20 cents per bushel over other U.S. soybeans in Japan. IOM soybeans are traded on the Japanese grain exchange. For shipment to Japan, IOM soybeans are railed to Baltimore (Maryland) or Norfolk (Virginia) for shipment via panamax size vessels. They may also be railed to Mobile (Alabama) or New Orleans (Louisiana) for vessel shipment.

Hildebrand reported that IOM soybeans will keep the largest market share due to their low price, however there is a market for variety soybeans. He said that Vinton is the most popular variety for making tofu in Japan, but it does not yield high enough in the field to make it price competitive. "He suggested that breeders need to develop a high-yielding soybean with Vinton's tofu-making characteristics. However he said the market for variety soybeans is not huge and is easily flooded." Address: Box 1199, Chatham, ONT, Canada N7M 5L8.

7865. Yamasa Corporation U.S.A. and its new soy sauce plant in Salem, Oregon (Photographs). 1995.

• **Summary:** These six black-and-white photos were sent to Soyfoods Center in April 1995 by Koji Okamoto (Senior Vice President, Administration, Yamasa Corp. USA, 3500 Fairview Industrial Drive, Salem, Oregon 97302). Each glossy photo is 5 by 7 inches. Four photos show the equipment inside the soy sauce plant. Two photos show a large semitrailer (16 wheeler) leaving the plant. On one side is written in large letters: "Here goes another shipment of U.S. made Yamasa Soy Sauce." On the left and right of the sentence is the Yamasa logo.

Fermentation of shoyu at Yamasa's new plant in Salem began at the end of August 1994. The first commercial

product was ready for sale in early April 1995. The average fermentation time of each batch will be 6 months.

7866. Yamasa Corporation USA. 1995. Yamasa press kit (Portfolio with news release and photos). Salem, Oregon: Yamasa Corporation USA. Ten inserts. April 14. 30 cm.

• **Summary:** On the cover of this purple portfolio is a gold seal (2.75 by 1.75 inches) bearing the Yamasa name and logo. The ten documents enclosed in this portfolio include: (1) A two-page news release titled "First shipment of U.S. manufactured Yamasa soy sauce." Yamasa Corporation U.S.A. has recently begun shipping U.S. made soy sauce from its Salem, Oregon, facility. Yamasa is the world's second largest manufacturer of soy sauce. Mr. Yuzo Seki is director and manager of the production department of Yamasa Japan.

(2) Six black-and-white photos (each 7 by 5 inches) showing the inside and outside of the Yamasa plant at Salem.

A business card from Koji Okamoto, Senior Vice President, Administration & Finance, Yamasa Corporation U.S.A. Address: 3500 Fairview Industrial Drive, Salem, Oregon 97302. Phone: 503-363-8550.

7867. Zoller, Stephen. 1995. New developments at San-J (Interview). *SoyaScan Notes*. May 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** San-J recently expanded its soy sauce production capacity by 75%. The company is doing well. They still use Gauger & Silva Inc. as their advertising firm. Their account executive is Kim Marcus. Address: Vice President and General Manager, San-J International Inc., 2880 Sprouse Dr., Richmond, Virginia 23231. Phone: 804-226-8333.

7868. Liu, Keshun; Orthoefer, Frank; Thompson, Keith. 1995. The case for food-grade soybean varieties. *INFORM (AOCS)* 6(5):593-96, 598-99. May. [10 ref]

• **Summary:** Contents: Introduction. Food beans vs. oil beans. Traditional soyfoods: Soymilk, tofu, toasted full-fat soy flour [kinako], soy sprouts, soy sauce, miso, tempeh, natto. Soy protein ingredients: Soy grits and flour, soy protein concentrates, soy protein isolates. Soyfood nutrition. Current size of food bean market. Breeding of food beans. Conclusions.

"Oil/meal beans include all the commonly produced soybeans." The oil is typically used for food and the meal for livestock feed. However the "new varieties of food soybeans" are generally exported to countries in East Asia for preparation of Oriental soyfoods. Table 3 compares the attributes of food beans vs. oil beans. Seed size: Large vs. small to large. Seed uniformity: High vs. no preference. Hull color: White-yellow vs. yellow. Hull quality: Thin, firm vs. no preference. Hilum color: Clear to buff vs. clear to blank. Protein content: High vs. medium to high. Oil content: Low

to high vs. high. Cleanliness: U.S. Grade 1 or better vs. any grade. Major applications: Tofu, soymilk vs. oil, defatted meal.

In addition to their use in making traditional soyfoods, the “new food-grade varieties,” especially those with high protein content, have been marketed for preparation of toasted full-fat soy flour, defatted soy flour, and soy protein concentrates and isolates.

Photos show: (1) Keshun Liu, Frank Orthoefer, and Keith Thompson. (2) Color and size comparison of soybeans for food use and those intended for crushing (color). The “food beans” are larger than the “oil beans.”

Note: This is the earliest English-language document seen (July 2001) that contains the term “oil beans” or the term “oil/meal beans,” both used in contrast to “food beans” or “food soybeans.” This is also the earliest English-language document seen (July 2001) with the term “food-grade” (or “food grade”) used in the title to refer to soybeans or soybean varieties. Address: 1. Project Leader, Soyfood Lab., Jacob Hartz Seed Co. Inc., 901 N. Park Ave., Stuttgart, Arkansas 72160; 2. Vice President for research and development, Riceland Foods Inc., P.O. Box 927, Stuttgart, AR 72160; 3. Vice president, International Soyfood Sales, Jacob Hartz Seed Co.

7869. Lazzaro, Don. 1995. History and current status of soymilk in Australia (Interview). *SoyaScan Notes*. June 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ceres Natural Foods is their holding company and Pureharvest is their trading name. They made this name change in 1982 since they found the word Ceres was difficult for many people to pronounce. The first soymilk they imported to Australia was made by Saniku in Japan and imported from Mitoku.

Don is interested in macrobiotics. In early 1979 he took over the running of a small macrobiotic and natural foods retail store in Melbourne named Ceres Wholefoods. The only way he could make it viable was to try to buy at better prices, so in April 1979 he started a wholesale and import company, which he named Ceres Natural Foods, also in Melbourne. There was a company named Real Foods (run by Michael Pels) in New South Wales, Australia, that was importing, through Mitoku in Japan, tamari, soy sauce, miso, tofu, etc. Real Foods was the first company in Australia to import foods from Mitoku in Japan.

Don knew Michael from when they both used to live in Sydney in about 1978. Michael purchased some rice cake machines (the same kind used by Chico-san) through Mitoku from Airin Co. These machines were very poorly engineered and constructed. Michael has already sold 168 of these machines to Quaker.

When Don took over the Ceres Wholefoods retail store in 1979, he approached Michael and asked to be the distributor in Victoria of the food products Michael was

importing from Japan through Mitoku. Michael said okay, and Don began distributing. Don asked Michael to import some soymilk from Mitoku, which he did in mid-1980. The stick-on label over the Japanese label said Ceres Natural, in Choc-Malt and Natural flavors. But the first soymilk in Australia was imported from Japan in about 1977-78, through Muso by 3-4 health food stores named Russel's; it was made by Marusan in a stand-up plastic pouch. Not much of it was sold. In about 1980-81, Michael decided to get out of the whole import business in order to focus on making rice cakes. So Mitoku Mr. Kazama and Chris Dawson asked Don to become their importer in Australia. Don also ran a 3rd company, a center that provided information and advice on macrobiotics.

Jim Wilson, who was running Spiral Foods in Australia, had been importing from Mitoku. He convinced Mitoku not to sell to Don, his competitor; Mitoku agreed. Mitoku then approached Saniku, and in about 1981 Don began importing soy milk made by Saniku through Mitoku. Don sold it under the same label he had used before. The Muso started to import some soymilk packaged in Tetra Brik cartons through Spiral Foods. Don got the same product from Kibun, and on it began to use the name Pureharvest.

In short: Four companies pioneered in importing soymilk to Australia: Real Foods, Russel's, Spiral Foods, and Ceres Natural Foods. There was also a little relatively beany Chinese soymilk sold in the ethnic Chinese market. Ceres, as a result of its Tetra Brik package, managed to get fairly good distribution into the grocery / supermarket trade, starting in late 1983 or early 1984. By this time Ceres was by far the biggest seller of soymilk in Australia. They were importing five 20-foot containers per month of the Kibun soymilk product. Ceres was actively promoting this soymilk, doing trade shows, etc.

In 1986 Ceres was approached by a small soymilk maker named Australian Natural Foods (ANF) in Sydney; basically they had old machinery and were in trouble. They approached Don asking if they could make a soymilk for him. They worked out an exclusive deal and formula, and in Nov. 1986 Ceres launched this as Aussie Soy in its first 1 liter package, in Tetra Brik. Sales shot up. It was trucked in a dairy tanker to Bon Lait in Victoria (almost 1,000 miles away) where it was packaged in a dairy that had a Tetra Brik packaging machine. In about 1990-91 ANF first got its own Tetra Brik packaging machine. That same year ANF launched its own soymilk product, named So Natural, to compete with Sanitarium's So Good. It is made from whole soybeans, and is very similar to the Aussie Soy product they have long made for Don.

As early as 1980 Sanitarium Foods was importing Soyolac in tins / cans. They sold it mostly to Seventh-day Adventists through their own retail stores. Then in April 1987 Sanitarium Foods launched their own So Good soymilk (made from a blend of soy protein isolates, made

and packaged by dairy companies) in Australia. They went into it in a big way, with a national campaign. It was the best thing that ever happened to Don and Ceres, because this campaign grew the market dramatically. By April 1987 Ceres was selling 10,000 cartons / month of their Aussie Soy, not including their Japan imports. One year later the figure had skyrocketed to 60,000 cartons / month, increasing to 152,000 on year after that.

Nevertheless, according to the *Australian Grocery Industry Marketing Guide* (1995), Sanitarium has 71% of the dairylike (unflavored) Australian soymilk market, followed by Vitasoy at 7% (they launched in about 1991, and have done a very aggressive marketing campaign), then So Natural (made by ANF) at 5%, Sun Gold at 5%, and Aussie Soy at 4-5%. Of the total Australian soymilk market, flavored soymilks account for only about 5% of the total; the remaining 95% is dairylike; it's a milk alternatives market. Each of the three major supermarket chains in Australia (Woolworth's Safeway, Franklin's, and Cole's) has its own soymilk brand. Franklin's has an isolate soymilk made by ANF, starting about a year ago. Sun Gold, made by Associated Dairies of New South Wales, is almost identical to So Good, made by the dairy company that used to mix Sanitarium's product. In about 1990 Sanitarium set up their own soymilk mixing and packaging factory.

Today the soymilk retail market in Australia is \$45 million, with a population of only 17 million people. This is huge on a per capita basis. This market has three main segments: (1) Middle class, educated, with some allergies—70%. (2) Age 50 and older, concerned with cholesterol—20%. (3) Natural foods and vegetarian—10%.

In late 1993 and early 1994 Don approached Berrivale Orchard Ltd. (a cooperative of fruit growers, headquarters in Berri, South Australia) to see if they would be interested in making a soymilk product for Ceres / Pureharvest—because Don's relationship with ANF had become intolerable.

In 1979, to get tofu to sell at his retail store, Don used to go to Chinatown in Melbourne twice a week. He bought it from a little Chinese company (whose name he does not remember) located opposite Victoria Market. He would take a couple of buckets and carry it home in bulk, under water. Address: Pureharvest, 15 Ardena Ct., East Bentleigh, Victoria 3166 Melbourne, Australia.

7870. Krizstan, Jan; Trampus, Mirko. 1995. Re: Update on work with seitan, tofu, and shoyu in Slovenia. Letter (fax) to William Shurtleff at Soyfoods Center, June 19. 3 p.

• **Summary:** Jan and Mirko have received and enjoyed reading copies of *Tofu & Soymilk Production*, *The Book of Tempeh*, and *The Simple Soybean and Your Health* sent by Soyfoods Center. We made our first two cauldrons full of tofu on the night of June 12—52 kg of very sweet, aromatic and full bodied firm natural nigari tofu from 32 kg of Mirko's dry organic soybeans. We were so happy. We supply

all of our retail outlets (34 of them as of today) with copies of simple introductory ads (some information about what is seitan and tofu, the way of Mirko's organic farming, and some recipes for preparing tofu and seitan). Each customer who comes to a healthy food shop and buys our organic (or other's regular) seitan or tofu gets such a copy for free. We already have very positive feedback—people say that our recipes are very simple and understandable and the meals taste good. Making tofu and seitan is becoming a kind of meditation to us and we agree with the sentence in your *Tofu & Soymilk Production* that 'When the master becomes selfless, the tofu makes itself.' Of course, we found that we are apprentices—the real master is Tofu.

"Since May 19 some very ill people from Republic of Croatia have come here to Metlika to buy our tofu and seitan. We gave them some tofu, seitan and shoyu plus information for preparation of meals using tofu and seitan. Most Slovenian (and Croatian) people have never heard of shoyu or tamari until now. It feels so nice to help ill people with healthy foods." Address: Mestni trg 22/1, 68330 Metlika, Republic of Slovenia. Phone: (386) 068 59 481.

7871. Great Eastern Sun. 1995. Pricelist. Effective June 5, 1995 [Mail order]. Asheville, North Carolina. 37 p. 28 cm.

• **Summary:** Contents: Catalog information. Miso Master organic miso (traditional, mellow, or sweet). Sweet cloud organic sweeteners. Haiku organic Japanese tea. GES organic English tea. Emerald Cove sea vegetables. Emperor's Kitchen condiments (soy sauce, vinegars, ume plum products, toasted sesame oil, mirin, dried vegetables, shiitake mushrooms, beans, seeds, grains, dry condiments, Atlantic sun-dried sea salt). Traditional Japanese macro pasta. Traditional Japanese specialty items (misos, candies, seaweed and ume, organic pasta, liquid condiments, specialty products {snow-dried tofu, HamaNatto, Zenryu fu (round cakes of wheat gluten), shonai fu (flat sheets), organic brown rice koji, organic nuka rice bran, organic brown rice dinner with azukis [azuki beans], or with vegs, mochi (4 types), noodles (some or bifun rice noodles), ume products, teas, pickles (incl. natto miso chutney)}, personal care products, kitchenware, knives). Address: 92 McIntosh Road, Asheville, North Carolina 28806. Phone: 704-252-3090.

7872. Jacobi, Dana. ed. 1995. *The natural health cookbook: More than 150 recipes to sustain and heal the body*. New York, London, Toronto, Sydney, Tokyo, Singapore: Simon & Schuster. 271 p. . June. 25 cm.

• **Summary:** This is a selection of the best recipes published in *East West Journal*, compiled by Dana Jacobi, Dan Seamens, and the editors of *Natural Health* magazine. The recipes are generally low in fat, free of white sugar and other refined foods, and nutrient dense, based on grains, legumes, and vegetables; some contain fish and shellfish. Chapter 4 is titled "Seitan, tempeh, and tofu." Miso and soy sauce are

used throughout as seasonings.

Contains recipes for Amasake dressing (p. 153), and Amasake scones (p. 191). Amasake (or Amazake) is defined in the Glossary of ingredients (p. 243). Address: New York City, NY.

7873. *Men's Confidential* (Emmaus, Pennsylvania). 1995.

Two birds with one soy. June.

• **Summary:** Genistein, a chemical component of soybeans, may have protective effects against two major male diseases—prostate cancer and heart disease. New research has evaluated which soy products contain the most genistein per serving. The clear winner? Tofu. Kikkoman Firm, Nasoya Soft, Azumaya Soft, and Vitasoy Silken all contain about 10 times as much genistein as First Alternative soy milk. Contains a recipe for a shake made in a blender with silken or soft tofu, frozen berries, a banana, and a little honey.

7874. Natural lifestyle magazine and mail-order market. 1995. Asheville, North Carolina: Natural Lifestyle Supplies. 55 p. Catalog. 28 cm.

• **Summary:** A macrobiotic mail-order catalog with several nice articles, it sells many types of soyfoods and related products, including the full line of Kushi Cuisine, organic soybeans (yellow and black), azuki beans, amazake, Rice Dream, soymilk, soy Malted (Westbrae), Nasoya Vegi-Dressings, Nayonaize, Farmhouse Tekka, organic soy sauce, fresh tofu, snow-dried tofu, kuzu, and miso. Publisher: Tom Athos. Editor and graphic design: Debbie Athos. Address: 16 Lookout Drive, Asheville, North Carolina 28804-3330. Phone: 1-800-752-2775.

7875. **Product Name:** SJ Grilling Sauce.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 804-226-8333.

Date of Introduction: 1995. June.

Ingredients: Incl. tamari soy sauce, tomatoes, honey, spices.

Wt/Vol., Packaging, Price: 10 oz bottle. Retail for \$2.89 to \$3.29.

How Stored: Shelf stable.

New Product–Documentation: Press Release sent by Kim Markus of Gauger & Silva. 1995. June 26. “San-J blends East and West with new SJ Grilling Sauce.” The new sauce combines two favorite cooking flavors—tamari and tomato—for a grilling sauce with an Asian twist. It can also be used for marinading, stir-fry, and barbecues and “is a perfect addition to meat, fish, chicken, and vegetables.” “A subsidiary of San Jirushi, the world's largest brewer of tamari soy sauce, San-J opened the first tamari brewing plant in the United States in 1987.”

Spot with photo in NFM's New Product Review. 1995. Fall. p. 4. “San-J International.” The product is certified kosher by Organized Kashruth Labs.

Press Release from Meghan O'Shea of Gauger & Silva. 1996. March 25. “Here comes summer!” The product is called “San-J International's new SJ Grilling Sauce” even though it is 9 months old.

7876. **Product Name:** Soygenol 100.

Manufacturer's Name: FreeLife International.

Manufacturer's Address: 354 Woodmont Rd., Suite 5, Milford, Connecticut 06460. Phone: 1-800-882-7240.

Date of Introduction: 1995. July.

Ingredients: Each Vita-Coat tablet contains: Soygenol (soy-phosphatide-bonded Japanese grape seed extract {2:1 ratio; 100 mg}), green tea standardized extract (30% polyphenols; 100 mg), Ultra Soy Delivery System (soy polysaccharides and plant enzymes; 5000 IU).

Wt/Vol., Packaging, Price: 60 caplets. Sells for \$19.95 wholesale, \$28.50 retail (\$0.47/caplet, or \$0.95/day).

How Stored: Shelf stable.

New Product–Documentation: FreeLife leaflet sent by Karma McLeskey of Fairfax Station, Virginia. 1995. Aug. “Soygenol 100. The world's first soy-activated premium Japanese Grape Seed Extract [extracted and sold by Kikkoman using only water and pure grain alcohol] with Green Tea Extract. Developed by the number one nutritionist in America, Dr. Earl Mindell! Research continues to provide us with greater insight into the devastating effects that free radicals can have on our health. Free radicals are small yet destructive unstable molecules which attack and damage the cells of our body and can lead to cancer, arthritis, heart disease and can speed up aging. Fortunately, antioxidants can help fight free radical damage. Two of the most beneficial antioxidants are grape seed extract and decaffeinated green tea extract. Grape seed extract has been shown to be 20 times stronger than vitamin C and 50 times stronger than vitamin E! Green tea extract has been shown to be 200 times stronger than vitamin E!” This product, released in July 1995, is “the next generation in proanthocyanidin (OPC) supplements.” Dr. Masquelier is the discoverer of OPCs, which come from grape seeds and pine bark.

Leaflet (6 panels, color) sent by Karma S. McLeskey of Virginia. 1995. Aug. 21. “Soygenol 100. Nature's miracle. The world's first soy-activated premium Japanese Grape Seed Extract with Green Tea Extract.”

7877. Read, E.C.K. 1995. England's Worcestershire Sauce: Flavors of the world. *Bon Appetit* 40(7):32-33. July.

• **Summary:** Gives a brief, cute, undocumented, copycat (and probably untrue) history of Lea & Perrins' Worcestershire sauce and recipes (by Lane Crowther) for using it.

In a slim bottle at the end of the bar, the anchovy is enshrined with tamarind, vinegar, molasses, garlic, onions, soy [sauce], chili peppers, cloves, and lesser ingredients “in the elixir known as Worcestershire Sauce.”

The bartender says he buys the bottles by the case,

mostly to make Bloody Marys. Worcester (the sauce has always contained anchovies and tamarind) is a city (and the county seat) on the River Severn. The original sauce is said to have been made in the “early 1800s” by John Wheeley Lea and William Perrins, based on a recipe from Marcus Sandys, the British governor in Bengal, India. Their first market outside England was ocean liners. The U.S. maker of Worcestershire Sauce, “Lea & Perrins of Fair Lawn, New Jersey,” was formerly John Duncan & Sons of Manhattan [New York City], an early importer of the sauce—which is now used in “such morning-after remedies as Bloody Marys and Prairie Oysters...”

7878. Schwartz, Arthur. 1995. The Schwartz that ate N.Y.: Soy vey! Who has great soy dishes. *Daily News (New York)*. Aug. 8. Food section. p. 4.

• **Summary:** The title of the left column is a play on words using the Yiddish term “Oy vey!” which means something like “On no, not more.” The author, is luke-warm about his subject: “Big news. Soybeans are good for us. Like we didn’t know it already.” A sidebar gives a brief definition of each of the different types of soyfoods.

The right column lists New York City restaurants that serve great soy dishes: Josie’s, Golden Unicorn (Chinese), Angelica’s Kitchen (macrobiotic), The Fashion Cafe, Zen Palate. Part II is for takeout: Healthy Pleasures, Natural Frontier, Whole Foods.

The recipe of the week is Quick tofu hoisin. A table lists various soyfoods and the amount of protein contained in each.

Note: Arthur hosts a talk show titled “Food Talk” on WOR radio in New York. On Tuesday, Aug. 8, at 12:30 p.m. Dana Jacobi was his guest to talk about soyfoods. She invited listeners to send a SASE to Soyfoods Center for free tofu recipes and a free catalog of publications. About 150 listeners responded.

7879. FreeLife International. 1995. Soygenol 100: Nature’s miracle. The world’s first soy-activated premium Japanese Grape Seed Extract with Green Tea Extract (Leaflet). Milford, Connecticut. 6 panels.

• **Summary:** The front panel states that Soygenol was “Developed by America’s number one nutritionist, Dr. Earl Mindell, R.Ph., Ph.D.” Contents: Free radicals cause disease and aging. Antioxidants to the rescue. Only Soygenol delivers 100% Proanthocyanidin power you need. One panel, with a color photo showing Dr. Mindell, states: “Dr. Earl Mindell is the world’s leading expert on vitamins, dietary supplements and nutrition. For 30 years Dr. Mindell has led a personal crusade to show individuals how to heal themselves and stay healthy naturally. Dr. Mindell is the author of numerous books on health and nutrition, including his 7 million copy bestseller, Earl Mindell’s Vitamin Bible... Dr. Mindell appears on more than 300 radio and television

programs annually.” Another photo shows a bottle of Soygenol (60 tablets, with 3 soybeans in a pod on the front panel).

“FreeLife’s grape seed extract is made to Dr. Mindell’s exacting specifications in an exclusive association with Kikkoman (TM), one of Japan’s largest corporations and the world’s most trusted producer of soy and wine grape products. FreeLife is the only company in the United States that has the exclusive right to use the Kikkoman grape seed extract. Kikkoman Japanese Grape Seed Extract is the first and only grape seed extract processed without harsh chemical solvents such as propylene glycol which is found in nail polish removed and antifreeze. You don’t want these chemicals in your body. Kikkoman utilizes a proprietary process which uses only water and pure grain alcohol in the extraction process. The grain alcohol is completely removed in the drying process. Our grape seed extract is completely water soluble and bioavailable.”

“The soybean is naturally rich in phosphatidylcholine, which is an important component of the cell membranes and also an efficient delivery system of nutrients... Recent research suggests that Soy-activation may increase the biological activity of the grape seed extract 3 fold and increase absorption and activity!... Each Soygenol 100 tablet contains tiny strands of unique fiber derived from the miraculous soybean called soy polysaccharides. Upon ingesting the tablet, these mini-fiber strands act like a sponge, absorbing water into the tablet to speed disintegration, helping to maximize nutrient availability.”

“Suggested usage: 2-3 tablets a day for the first week. Double this amount for the next 10-14 days. Then stay at this level or decrease back to 2-3 tablets a day. For maximum results, use Soygenol 100 in conjunction with the Soy Miracle Ultimate Antioxidant, a full-spectrum antioxidant. Always take Soygenol 100 with or after meals.” Address: 354 Woodmont Rd., Suite 5, Milford, Connecticut 06460. Phone: (203) 882-7250.

7880. Mountain Ark Trading Company. 1995. Catalog—September-December 1995 [Mail order]. Fayetteville, Arkansas. 30 p. 27 cm.

• **Summary:** Soy-related products in this mail order catalog include: Miso, soy sauce, tempeh, tofu, black soybeans, yellow soybeans, tofu dressings, natto miso. Also: Sea vegetables, amaranth, quinoa, teff, blue corn. The general manager is Nick Masullo. Address: P.O. Box 3170, Fayetteville, Arkansas 72702. Phone: 1-800-643-8909.

7881. Orthoefer, Frank T.; Liu, Keshun. 1995. Soybeans for food uses. *International Food Marketing & Technology (Germany)* 9(4):4-8. Aug. [5 ref]

• **Summary:** Contents: Introduction. Traditional soy foods: Soy milk, tofu, toasted whole soybeans and full-fat soy flour, soybean sprouts, yuba, soy sauce, tempeh, natto,

miso. Soy protein ingredients: Soy grits and flour, soy protein concentrates, soy protein isolates. Soy nutrition: Soy protein, fat and calories, phytochemicals. Food bean market. Summary.

Two “different types of soybeans have emerged: oil beans and food beans. This is particularly true in the US soy market...”

Of the fourteen phytochemicals, seven are present in soybeans. These seven are phytates, isoflavones, carotenoids, coumarins, triterpenes, lignans, and phenolic acids. Phytochemicals have been shown to affect human health as much as vitamins and minerals, and many of them have anti-cancer properties. The discovery of phytochemicals may change how the nutritional value of food is assessed.

The world market for soybeans for food use is estimated at about 1 million metric tons (tonnes). In Japan alone about 830,000 tonnes are made into soyfoods as shown in a pie chart as follows: Tofu (552,000 tonnes, 63.4%), miso (180,000 tonnes, 21.5%), natto (90,000 tonnes, 10.7%), soymilk (10,000 tonnes, 1.2%), soy sauce (5,000 tonnes, 0.6%), and others (22,000 tonnes, 2.6%). In the USA the food bean market is estimated at 50,000 tonnes. Other major markets for food beans are in Korea, China, Taiwan, Hong Kong, Singapore, Malaysia, and Thailand. Food-grade soybeans can be sold by the growers at a premium of 5-20% above the base price. The demand for food beans is increasing steadily. Address: 1. Vice President, R&D, Riceland Foods, Stuttgart, Arkansas; 2. Project Leader, Soy Food Lab., Jacob Hartz Seed Co., Stuttgart, Arkansas.

7882. Product Name: Spice of Life Meatless Meats [Beef, Ground Beef, Mexican Beef, Teriyaki Beef, Chicken, Chicken Mince, Italian Sausage, Pepperoni, Smoked Ham, Unflavored, Unflavored Mince].

Manufacturer's Name: Spice of Life Meatless Meats.

Manufacturer's Address: Van Nuys, California. Phone: 818-342-6573.

Date of Introduction: 1995. August.

Ingredients: Heartline Meatless Meats, spices and seasonings.

Wt/Vol., Packaging, Price: 8 oz., 5 lb, and 25 lb packs; retail for \$2.99, \$15.95, and \$79.95 (11/95, California).

How Stored: Shelf stable.

New Product–Documentation: Talk with Pam Montanaro of Soy Cubano! (Global Exchange) in San Francisco. 1995. Nov. 1. Spice Williams Crosby has just introduced a meatless jerky and a line of meatless meats.

Talk with Jackie Padgett. 1995. Nov. 1. She is Spice's twin sister. This is a small family-owned company. These are dry products that must be reconstituted by boiling in water for a few minutes. They have a shelf life of one year. Bragg's amino acids are used for the flavoring. She is feeding abused children and homeless people in the Los Angeles area. The products have been in restaurants and health food stores for

the last few months. They are sold at only 4-5 health food stores. Spice is an actress and stuntwoman, and has been a vegan for many years. She has a monthly column in Ms. Fitness, where she writes on veganism etc. She feeds about 1,000 homeless people each year at very little cost using her products in meatless meals. She got involved in this years ago when she was a musician. She decided to turn her life around, so she started. She had been registered nurse (who cared for elderly people when she was younger) and medical transcriber. She found that one of the best ways to do good things for your mind is to treat your body right. So she went gung ho in her research, and became a vegan. She uses a lot of soy products, and has been a real pioneer in this area for 15-17 years. She has written a booklet titled “Sixty reasons why The Spice of Life will improve your life, your world, and your workout.” She mentions the environment, personal health, ethics, spirituality, history and recent epidemiology. She also has lots references.

Spice of Life Total Fitness Catalog. 1995. Nov. 4 panels. Lists prices for the many flavors in retail packs and institutional packs. Send orders to Lumen Foods, 409 Scott Street, Lake Charles, Louisiana 70601.

Talk with Greg Caton, president of Lumen Foods. He uses a slightly different formula when making these products for Spice of Life. In place of soy sauce he uses Bragg's Aminos, which is HVP supplied by A.E. Staley Mfg. Co. in Decatur, Illinois.

7883. Stevens, Jane Ade; Stevens, Roger. ed. and comp. 1995. U.S. soyfoods directory. Lebanon, Indiana: Indiana Soybean Development Council. 31 p. 28 cm.

• **Summary:** This first edition of the directory contains more than 270 company listings. The cover is checkerboard red and white. Contents: Forward [sic, Foreword]. How to use the Soyfoods Directory (incl. Internet access). Soyfood descriptions (alphabetical): Edamame (Sweet beans), food use soybeans (whole soybeans), organically grown soybeans, isolated soy proteins, lecithins, meat analogs (meat alternatives), miso, natto, nondairy (soy) frozen desserts, okara, soy cheese & yogurt, soy flour & grits, soy grits, soy meal & flakes, soynuts, soyoil, soy protein concentrates, soy sauces (tamari, shoyu, teriyaki), soymilk, tempeh, textured soy proteins, tofu & products. Composition and nutrient content of soyfoods (large table, p. 7). Soybean products chart: From whole soybeans, from soybean meal, from soyoil and lecithin. Soyfood companies by product (products listed alphabetically).

Soyfood companies (alphabetical by company name; Each listing contains address, contact, phone, soy products, product names, distribution, to locate product, classification). Soyfood companies by state (alphabetical by state; California has by far the most). Professional associations and industry information resources. U.S. soybean facts. Soyfoods directory survey.

This directory's address on Internet's World Wide Web is <http://www.in.net/soy>. For more information or suggestions, call 1-800-275-7679. Address: Stevens & Associates, 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 1-800-275-7679.

7884. Product Name: Kikkoman Goyogura Shoyu.

Manufacturer's Name: Corti Brothers (Marketer-Distributor). Imported by Golden Pacific International. Made in Noda, Japan, by Kikkoman Corp.

Manufacturer's Address: Corti Bros.: 5810 Folsom Blvd., Sacramento, CA 95819. Phone: 916-736-3800.

Date of Introduction: 1995. September.

Ingredients: Soy beans [Whole, grown in Japan], wheat, salt.

Wt/Vol., Packaging, Price: 8.3 oz (250 ml) glass bottle.

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 1 tablespoon (15 ml): Sodium 890 mg. Calories 10. Protein 1 gm.

New Product–Documentation: Sample (product with Label) sent by Darrell Corti of Corti Brothers in Sacramento. Talk with Darrell Corti. 1996. His company started selling this product in Sept. 1995. Corti Brothers is presently the only company in America where one can buy this high-quality natural shoyu. Jennifer Brennan says "Purveyors by appointment to the Imperial Household." Imported by Golden Pacific International, 1580 Tennessee St., San Francisco, California 94107.

7885. Truth in Labeling Campaign. 1995. You have the right to know what is in your food: An introduction to Citizen Petition #94P-0444, subsequent legal action, and the Truth in Labeling Campaign. Dairen, Illinois. 7 p. [2 ref]

• **Summary:** Contents: Why a petition? The petition. The Truth in Labeling Campaign. Why a petition? "Because the FDA has been unwilling to evaluate toxic potential of monosodium glutamate (MSG) objectively,... Labeling of MSG would make diagnosis of possible MSG-sensitivity easier... Millions of Americans are sensitive to MSG." "MSG is called glutamic acid when used in supplements." The "glutamate industry" is very powerful. "The FDS's rejection of the FASEB September, 1994 draft final report on the safety of MSG in food was not without precedent."

"The glutamate industry has in place the most aggressive and insidious deceptive campaign to deceive the public into believing that MSG is safe. The International Glutamate Technical Committee (IGTC) structures and supervises research designed to demonstrate that MSG is safe." "Promotion of propaganda is accomplished through the Glutamate Association, the IGTC, the International Life Sciences Institute, and the International Food Information Council (IFIC), if not others."

"Whereas there was a balanced discussion of MSG safety / toxicity in the Wall Street Journal, the Washington

Post, the New York Times etc. prior to the airing of a '60 Minutes' segment on MSG in late 1991; only a few objective discussions of the problem have aired in major media in the last three and a half years."

"On December 13, 1994, a Citizen Petition was filed with the U.S. Department of Health and Human Services, Food and Drug Administration to require that Monosodium Glutamate (MSG) be clearly labeled when used in food." "The FDA failed to respond to the petition, as required by law, within 180 days of filing. On August 29, 1995, 29 individuals, including physicians, scientists, and parents on behalf of their children, filed suit in federal court asking the court to intercede on their behalf and require that all MSG in all processed food be labeled." Address: P.O. Box 2532, Dairen, Illinois 60561.

7886. Wilson, Lester A. 1995. Soy foods. In: D.R. Erickson, ed. 1995. Practical Handbook of Soybean Processing and Utilization. Champaign, Illinois: American Oil Chemists' Society Press; St. Louis, Missouri: United Soybean Board. viii + 584 p. See p. 428-59. Chap. 22. [41 ref]

• **Summary:** Contents: Introduction. Soybean chemical composition. Unfermented soy foods: Soymilk, tofu (momen, kinugoshi or silken, packed tofu, aseptically packaged tofu, deep-fried tofu, kori tofu or dried-frozen tofu), other nonfermented soy foods (yuba, kinako or roasted whole soybean flour, fresh {edamame} and canned soybeans, texturized soy protein-based foods). Fermented soy foods: Miso, shoyu (soy sauce), natto, tempeh, sufu. Japanese Agricultural Standards. Identity preservation and transportation. Soybean quality characteristics: Overview, judging quality (tofu, miso, natto). Note: This is the earliest English-language document seen (Dec. 2005) that contains the term "roasted whole soybean flour."

Tables: 1. Nonfermented soy food products and common names by country. 2. Fermented soy food products and common names by country. 3. Chemical composition of soy foods. 4. Per capita annual consumption of soybeans (kg) in selected Asian countries (China, Indonesia, Japan, Korea, Malaysia, Philippines, Thailand; for the years 1968, 1978, 1988, 1994).

Figures: 1. Flowchart of refrigerated and shelf-stable soymilk production. 2. JAS seal of approval. 3. Diagram of equipment used in large scale tofu production (each piece of equipment is numbered and labeled). 4. Flowchart of regular tofu production. 5. Graph showing percent transmittance of whey versus coagulant concentration for soymilks at 6% solids made from Weber, Vinton, and Amsoy soybeans. A concentration of 0.023 N was selected as the optimum coagulant concentration, since it gave the most transparent whey. 6. Graph showing percent transmittance of whey versus coagulant concentration for Amsoy soymilk at concentrations of 4, 5, and 8% solids. Concentrations of 0.018N, 0.019N, and 0.035N, respectively, were selected

as optimum coagulant concentrations. 7. Flowchart of kinugoshi (silken) tofu production. 8. Flowchart of packaged tofu production. 9. Flowchart of aseptically packaged tofu production. 10. Flowchart of kori (dried-frozen) tofu production. 11. Diagram of equipment used in large scale production of dried-frozen tofu (each piece of equipment is numbered and labeled). 12. Flowchart of miso production. 13. Diagram of the interactive factors producing the characteristic attributes of miso. 14. Flowchart of tempeh production. Address: Iowa State Univ., Ames, Iowa.

7887. Paine, Heather. 1995. Processing trends in Europe. Paper presented at the Third Bi-Annual SoyAfrica Conference. 14 p. + 11 p. of tables, charts, and graphs. Held 3-5 Oct. 1995 at Johannesburg, South Africa. Organized by Aproma. [10 ref]

• **Summary:** Contents: Introduction. History and production. The benefits of soya: Nutrition, functional properties. Products & applications: oil-based products (soya bean oil, soya lecithin), soya protein products (full-fat soya flours, defatted soya flours, soya concentrates, soya isolates), soya fibre products (incl. soy bran), whole soybean products or soya foods (soya milk or drink, tofu, yuba, soya sauce, miso, tempeh, natto). Trends and problems: Growing market for soy protein ingredients, U.S. soyfoods market, soymilk sales, problems of quality and image and legislation. Address: Editor, Soyfoods, England.

7888. **Product Name:** Tree of Life Tamari, and Shoyu.

Manufacturer's Name: Tree of Life, Inc. (Marketer-Distributor). Made in Richmond, Virginia, by San-J International.

Manufacturer's Address: St. Augustine, FL 32084.

Date of Introduction: 1995. October.

Ingredients: Incl. organic soybeans.

How Stored: Shelf stable.

New Product–Documentation: Spot with photo in NFM's New Product Review. 1995. Fall. p. 6. "Tree of Life" has introduced domestically made Organic Wheat Free Tamari and Organic Shoyu. Both new products are made with organic soybeans. The tamari has the sodium content reduced by 25%.

7889. **Product Name:** Tofurky: A Delicious Vegetarian Holiday Feast.

Manufacturer's Name: Turtle Island Foods, Inc.; Simple Living Network (Distributor).

Manufacturer's Address: P.O. Box 176, 601 Industrial Ave., Hood River, OR 97031. Distributor: P.O. Box 233, Trout Lake, WA 98650. Phone: 1-888-TOFURKY (863-8759).

Date of Introduction: 1995. October.

Ingredients: Each Tofurky includes: (1) 2 lbs. seasoned, baked & basted organic tofu roast: Organic tofu (organic

soybeans*, water, nigari), nutritional yeast, poultry seasoning, salt, tamari, fresh ginger, organic pear sweetener; (2) 8 tempeh-wild rice & cranberry drumettes: Textured soy protein (soy flour and water), soy tempeh (organic soybeans*, water, apple cider vinegar, starter), grated carrots, organic wild rice*, malt extract, natural flavor, dried cranberries, vegetarian Worcestershire sauce, isolated soy protein, carrageenan, herbs and spices. (3) 1 pint golden nutritional yeast-mushroom gravy: Water, nutritional yeast, chopped fresh mushrooms, canola oil, unbleached white flour, diced onion, shoyu soy sauce, salt, spices; (4) Stuffing: Organic whole wheat bread cubes*, onion, celery, walnuts, dried cranberries, canola oil, sesame oil. * = Organically grown in accordance with Section 26569.11 of the California Health & Safety Code.

Wt/Vol., Packaging, Price: 3 lb 12 oz or 2¼ lb.

How Stored: Frozen.

New Product–Documentation: Audrey Van Buskirk. 1995. Nov. 10. Willamette Week. "A different drumstick." About Tofurky.

Polly Timberman. 1995. Nov. 15. Hood River News. "Soy be it! Tofurky provides a holiday feast for vegetarians."

Leaflet for Thanksgiving 1995. 8½ by 3.75 inches.

Printed black on orange paper. No gravy. Two sizes: 2 lb., and 3 lb 12 oz.

Leaflet for Christmas 1995. Same size and color. Now comes with gravy. Two sizes: 2 lb 12 oz, and 4 lb 4 oz.

Ad (2¼ inch square, black and green) in Vegetarian Times. 1996. Nov. "Vegetarian Times Buyers Mart."

Unnumbered pages at back of magazine. "100% vegan.

Cooks in minutes. Serves 8 hungry adults. At local natural stores or via mail order. Call Toll Free: 888-Tofurky.

Next day US delivery: \$49.95 + \$7 S&H [shipping and handling]."

Talk with lady from Simple Living Network (SLN).

1996. Oct. 31. This product, made by Turtle Island Foods (in Hood River, Oregon), was launched in October 1995, before Thanksgiving last year. Tofurky is also described on and can be ordered from the SLN Web site: <http://www.slnt/CIP/Tofurky>. There are 3,000 pages on this Web site.

Talk with Seth Tibbott, founder and owner of Turtle Island Foods. 1996. Nov. 1. See interview titled "History of Tofurky." Talk with (call from) Seth. 1996. Nov. 5. Tofurky will appear on the Today Show on Nov. 12 (Tuesday morning TV).

Leaflet #1 or "rack card" (3 5/8 by 8½, color) titled "Tofurky: A delicious vegetarian holiday feast." Tells all about the product in a question and answer format. Leaflet #2 (8½ by 11 inches), printed black on gray, titled "Tofurky! The meatless stuffed tofu roast." "Tofurky! consists of 3 pounds of basted and baked organic tofu in a 9-inch pie pan filled with a herbed, whole wheat bread crumb" stuffing. "The tender tofu slices can be cut into 8 generous servings."

Press release. 1996. Oct. 20. "Will that be turkey or

Tofurky.”

Box with Label sent by Seth Tibbott. 1996. Nov. 6. The outer box is 13¼ by 10½ by 3¼ inches. Printed red on cardboard color. New weight: 5 lb 15 oz. “The original Tofurky: A delicious vegetarian feast. 100% vegan. Cooks in minutes. Serves 8. Keep frozen or refrigerated. 1% of all sales from this product to Farm Sanctuary Adopt a Turkey Program.” The inner box is white. The label is printed black on white. Net weight: 2 lbs. 12 oz. On the label are printed two logos and addresses, and a UPC. The Higher Taste, 2402 SE Belmont Ave., Portland, Oregon 97214. Turtle Island Foods, Inc., PO Box 176, Hood River, Oregon 97031. Vegetarian Journal. 1996. Nov/Dec. p. 8. “Tofurky.”

Dinner with Bob & Pattie Gerner to test and give feedback on Tofurky 97. 1997. May 10. A delicious sliceable roast, made mostly of gluten and tofu, may replace the former marinated baked tofu. The roast ingredients are: Water, vital wheat gluten, organic tofu, natural vegetarian seasoning, wild rice blend, shoyu soy sauce, fresh onions, granulated garlic, tomato sauce, molasses, sea salt.

Talk with Seth in early 1997. He sold 800 Tofurky in 1995 and 4,000 in 1996.

7890. United Soybean Board. 1995. The absolutely astounding supermarket soybean search. Chesterfield, Missouri: USB. 6 panels. 28 cm.

• **Summary:** This colorful, six-panel foldout contains a panoramic 4½-panel illustration of the inside of a modern supermarket. Each of the aisles and sections are marked. Additional signs show the many places that soy appears in the store.

The bottom half of the first page states: “Ever since the famous American chemist George Washington Carver began exploring the mysteries of this little legume near the turn of the century, the growth in food and technical uses for soybeans has been nothing short of astronomical. Today, every aisle of your local supermarket contains soybean products, and we’re not just talking tofu. Take a look at the astounding number of products containing soybeans at the Super Duper Food Store in Anytown, USA.”

A sidebar explains four symbols for marking foods made from whole soybeans (circle) or containing soy oil, soy lecithin, and soy protein or soybean meal. For example (moving from left to right): Margarine & spreads. Tofu. Tofu ice cream. Peanut butter (with soy oil). Desserts and Mixes (with soy oil). “Super Soy—Oh Boy” (Soy milk end display, by the case). Cooking oils. Mayonnaise, Salad dressing. New Chips Asoy! Sauces. A sign reading “Think soy.” Soya Snax. Soy Joy (in the refrigerated drinks section).

One full page, titled “Believe It,” gives a detailed alphabetical listing of 76 categories supermarket items that contain soy, and what type they contain. For example: “Cosmetics: Soybean oil. Crackers: Soybean oil, soybean oil shortening. Croutons: Soybean oil. Diet drinks: Soybean

oil, soy lecithin, soy protein isolate.” Also included are: Soy sauce. Soy nuts. Tofu. Not mentioned: Miso. Soy milk. Meat alternatives. Address: 16305 Swingley Ridge Dr. #110, Chesterfield, Missouri 63017.

7891. United Soybean Board. 1995. Soybeans: How a little bean becomes an ingredient in thousands of products from margarine to tofu to chicken feed (Brochure). Chesterfield, Missouri: USB. 12 panels + poster. 23 cm.

• **Summary:** This attractive color publication is folded so that the first 12 panels are a brochure. However when fully unfolded, a large color poster appears. The brochure notes: In 1992/93 the USA produced 51% of the world’s soybeans. An early history of the soybean in the USA [full of errors]. America livestock (including poultry) consume about 22.5 million tons of soybean meal a year. How soybeans are grown. Composition of the soybean. Foods made from soybeans: Edamame, miso, natto, soy milk, soy sauce, tempeh, tofu or soybean curd, full fat flour. Photos (each incorrect) in the brochure show: “1904: The famous American chemist George Washington Carver discovers that soybeans are a valuable source of protein and oil. 1920s: Combines first used to harvest soybeans. 1922: First U.S. soybean processing plant opens. 1929: Soybean pioneer William J. Morse spends two years in China, gathering more than 10,000 soybean varieties for U.S. researchers to study. 1940: Henry Ford takes an ax to a Ford car body to demonstrate the strength of the soybean plastic he has developed.”

The color poster (16 by 27 inches) is a cartoon showing how soybeans are processed into various products, including full fat flakes, crude and degummed soybean oil, soy concentrates, soy isolates, soy flours, and defatted soy flakes. A soybean utilization/processing diagram at the bottom of the poster shows 137 different products that can be made from the soybean, including 33 whole soybean products (“Traditional soyfoods” incl. tofu, soy milk, miso, tempeh, soy sauce, natto), 33 soybean meal products (26 edible uses + 7 feed uses), and 71 soy oil products (13 edible uses, 19 industrial uses, and 18 applications for lecithin). The seven types of lecithin applications are: Emulsifying agent (4 applications), nutritional (medical use, dietary use), anti-spattering agent (in margarine manufacture), stabilizing agent (in shortening), anti-foam agent (yeast manufacture, alcohol manufacture), dispersing agent (in paint, ink, and rubber manufacture, and in insecticides), and wetting agent (in cosmetics, paint pigments, and calf milk replacers).

Accompanying the brochure/poster is a note pad with the same slogan across the top of each sheet: “Soybeans—Designed for life.” Across the bottom is written: “United Soybean Board—Investing check-off dollars.” Address: P.O. Box 419200, St. Louis, Missouri 63141-9200.

7892. Buskirk, Audrey Van. 1995. A different drumstick.

Willamette Week (Oregon). Nov. 10.

• **Summary:** “Only in Oregon... Two Oregon vegetarian outlets joined forces to produce Tofurky. The ‘bird,’ created by The Higher Taste, a Portland vegetarian caterer, is made with seasoned organic tofu, filled with a stuffing of cranberries, walnuts and bread crumbs, basted with a honey, ginger and tamari sauce and baked until golden. It comes with four ‘dark meat drumettes’ made by Hood River’s Turtle Island Foods, a soy foods manufacturer, with grated organic tempeh, wild rice and carrots shaped into drumsticks. Think this sounds great? Awful? Taste it for yourself this Saturday, Nov. 11, between 11 and 4 pm, at Food Front, 2375 NW Thurman St.”

A large cartoon shows a mother serving a turkey on a platter to her husband and son, seated—with knives and forks upraised—at the table.

7893. Gordon, Jonathan. 1995. Work with soyfoods in England and Australia (Interview). *SoyaScan Notes*. Nov. 16. Conducted by William Shurtleff of Soyfoods Center. [1 ref]

• **Summary:** Jonathan’s PhD thesis was titled “Improved lactic fermentation of soymilk for the preparation of soya bean curd,” a subject closely related to soy yogurt. He submitted this thesis in 1992 at the University of Strathclyde [Glasgow, Scotland], working under Brian Wood. When he was midway through writing his thesis, he won a *Monbusho* [Ministry of Education] scholarship to Japan. Just as he was preparing to go, he and his wife had a baby and he decided not to go. Prior to that the University of Strathclyde had applied for a patent on the process he discovered in his thesis. When he didn’t go to Japan, the university did not finish the patent application process. Its present status is unclear. He discovered how to do a lactic fermentation of soymilk that gave a good, low pH in a reasonable period of time. Brian Wood was an expert in lactic acid fermentations; he developed a 6-week miso and soy sauce process which he sold to Nestle. He was very unhappy with the outcome of this sale, because Nestle shut him out of involvement with the company. He expected to be actively involved with the company.

Jonathan’s interest in tofu goes back to the late 1970s. A native of England, he spent two years (1979-1981) at Findhorn, a spiritual community in Scotland, where he first heard of tofu and he helped to make tofu once a week. Jonathan thinks that Jacques (a French Canadian) started the tofu operation in Findhorn, before Jonathan arrived. Jacques and Allen (British) were making tofu in 1979 when Jonathan was there. Each Thursday after dinner they would take over the kitchen and make about 30-40 lb of tofu, which was served in the communal dining room the next day. Jonathan left Findhorn in March 1981 and arrived in Australia in about July or August 1981. He traveled in Australia with a girlfriend (Karen James of California, who had just finished a professorship at UCLA) and they lived together at the

Homeland Foundation in Upper Thora, Bellingen, New South Wales, where they made tofu with other members of the community. Karen also made tempeh. Upper Thora is a little town in the Bellingen (pronounced BEL-ing-un) valley. Some community members had already been making tofu for a long time before he arrived; the tofu company was a completely established local business, with customers and delivery routes, when he arrived. They made about 300 lb/week of tofu and delivered it themselves to nearby communities in insulated cold boxes (called “Eskis,” short for Eskimos) in a van. Homeland was also making tempeh at the time, but Jonathan was not a tempeh maker. He left Australia in 1982 to return to England.

In 1982 Jonathan became the foreman and tofu maker for The Regular Tofu Company (RTC) Ltd. in England, owned by John Holt. Jonathan was not with RTC when it started. John Holt was a “Premmie,” a disciple of Guru Maraji, the young guru from India. His tofu shop was located in a house adjacent to the Premmie community house or ashram. He converted the small community kitchen (about 14 feet square) into a tofu shop. It had 2 cauldrons and a grinder. This was John Holt’s private business; it was not a source of food and income for the Premmie community. John had a family at the time and he employed Premmies to do his work. At this time the tofu was made in a caldron. Guru Maraji came to that part of England many times. Leicester is one of the “Asian centers” of England; it has the largest immigrant population of any city in the country and there were 2 or 3 “Premmie” houses there. Maraji has a large Indian following, in addition to his Western disciples.

Jonathan also helped John Holt design his new factory in at Hayhill Industrial Estate (Unit 25, Sileby Rd., Barrow Upon Soar, Leicestershire LE12 8LD, England). into which Holt moved in about 1984. John Holt lived in Sileby, the town adjacent to Barrow Upon Soar.

Note: This company began making tofu in Dec. 1981 at 75 Chandos St., Leicester, LE2 1BU, England. In June 1984 (now located at 16 The Halcroft, Syston, Leicester, England LE7 8LD) they introduced 4 soy products under the Soyboy brand. John Holt had venture capital in the business, but they weren’t getting a sufficient return on their money so John had to sell the company to another rather small company named something like Rainbow (they were making soup and burger dry mixes), which later sold it to Haldane.

Jonathan probably has John Holt’s home address in Leicestershire. After Holt sold his business, he bought a franchise in a restaurant business (something like a pancake house) in Northampton or Nottingham, England. Jonathan has heard of Michael Cole of Manchester, but he does not know whether or not Michael ever worked for John Holt. Cole won the Entrepreneur Award of something like £50,000, and that enabled him to build a factory. In the early days only two companies in England were distributing semi-nationally—John Holt’s and Michael Cole’s. Address:

Director of Operations, White Wave Inc., Boulder, Colorado.
Phone: 303-443-3917.

7894. Product Name: FVP Paste.

Manufacturer's Name: Kikkoman Trading Europe GmbH.

Manufacturer's Address: Heerdter Lohweg 57-59, 40549 Dusseldorf, Germany. Phone: +49 211 596 087.

Date of Introduction: 1995. November.

How Stored: Shelf stable.

New Product–Documentation: Soyafoods (ASA, Europe). 1996. Spring. p. 6. "New soya products at FiE '95."

This product, exhibited at the Food Ingredients Europe Exhibition, is Kikkoman's new soy sauce paste which has been developed as a substitute for chemical hydrolyzed vegetable protein and yeast extract. Obtained by enzymatic hydrolysis, FVP Paste is a concentrated vacuum evaporated product. Compared to similar products, it has less aroma and a light color; thus the food it is used to season can better keep its original flavor and color. Applications include sauces, gravies, soups, oriental foods, meat products, stir-fry vegetables, mustard, salad dressings, marinades, etc.

7895. Melina, Vesanto; Davis, Brenda; Harrison, Victoria. 1995. *Becoming vegetarian: A complete guide to adopting a healthy vegetarian diet.* Summertown, Tennessee: The Book Publishing Co. x + 262 p. Foreword by Suzanne Havala. Index. 26 cm. [20 ref]

• **Summary:** An excellent vegetarian and vegan sourcebook and cookbook by three registered dietitians. Contents: Acknowledgements. Foreword. Introduction. 1. What is a vegetarian? 2. The evidence is in. 3. Without meat—exploding the myths. 4. Without dairy products. 5. Veganism: More food for thought. 6. Fats and oils: A balancing act. 7. Fiber: The gift from plants. 8. The vegetarian food guide: Putting it all together. 9. Vegetarian nutrition in the growing years. 10. Vegetarian diplomacy. 11. From market to meals. 12. Recipes: Simple treasures. Appendixes: 1. Glossary. 2. Nutrition recommendations.

This book contains a wealth of accurate, positive information about many different types of soyfoods (especially tofu) and related subjects, including tofu, soymilk, tempeh, miso, soy yogurt, soy cheese, soy sauce, tamari, and soy oil (incl. omega-3 fatty acids). Plus wheat gluten, seitan, rice milk, sea vegetables, adzuki beans (p. 66, 162), quinoa, amaranth, macrobiotics, phytochemicals, plant estrogens found in tofu and other soy products (p. 75; they may contribute to positive calcium balance and have a protective effect on the bone health of Chinese and Japanese women), dietary fiber.

Talk with Vesanto Melina. 1996. July 22. This book was originally published in Canada in May 1994 by Macmillan Canada in Toronto. A revised U.S. edition was published in Nov. 1995 by The Book Publishing Co. in Summertown, Tennessee. Address: Canada.

7896. Product Name: SoyaDeli FlavorPlus, and FlavorBase.

Manufacturer's Name: Miwon Co. Ltd.

Manufacturer's Address: 720 Banghak-Dong, Dobong-Ku, Seoul 132-020, Korea. Phone: +82 2 992 1191.

Date of Introduction: 1995. November.

Ingredients: Incl. soy sauce, amino acids, sugar, nucleotides, and salt.

How Stored: Shelf stable.

New Product–Documentation: Soyafoods (ASA, Europe). 1996. Spring. p. 6. "New soya products at FiE '95." These two products, exhibited at the Food Ingredients Europe Exhibition, can be used to improve the flavor of a wide variety of food products. FlavorPlus is a dehydrated enzymatic soy sauce post-formulated with amino acids, sugar, nucleotides, and salt. It can be used as a flavor enhancer or flavor base in a wide range of savory applications. FlavorBase is an enzymatically hydrolyzed soya protein used to improve flavor in processed products; it can be used to make soy sauce and in various fermentation media.

7897. Caton, Greg. 1995. New developments at Lumen Foods (Interview). *SoyaScan Notes*. Dec. 6. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** In Oct. 1995 Greg started his own TVP plant, which is making his new "Reverence" line of products. He used to buy the extrudite (textured soy flour) from either ADM or Central Soya. He would wash it to remove all of the oligosaccharides (which usually cause flatulence), then flavor it, oil it, cook it, dry it, mix it, etc. He does not use organic soybeans, because he finds that customers are not willing to pay for the end product, which is about twice as expensive. However by putting the product through a multiple washing cycle and using purified water than has been ionized and run through a carbon filter, he partially compensates for the non-organic soybeans.

Greg has at least two private label customers: Spice of Life in California, and Dr. Marvin Goldberg, an M.D. in Michigan who buys in container loads. Greg uses a slightly different formula when making these products for Spice of Life. In place of soy sauce he uses Bragg's Aminos, which is powdered HVP supplied by A.E. Staley Mfg. Co. in Decatur, Illinois, reconstituted in water by Paul Bragg's daughter in Santa Barbara, California, and sold at high prices as Bragg's Aminos. Greg admired Paul Bragg, who had an impeccable reputation. Bragg died tragically roughly 5 years ago at about age 95 while swimming off the coast of Florida; he was caught in an undercurrent and drowned. He was Jack LaLanne's mentor and he followed Vivekananda.

Last year meat analogs [alternatives] were the single fastest growing category in the health food trade. For the last three years Lumen has experienced a growth rate of 50%

a year in their mail order business. Mail order is currently about 40% of the company's total business; it used to be about 5%. His company is almost becoming a mail-order company, like Harvest Direct.

Greg is a computer programmer and he designed his own site on the World Wide Web. He is a "webmaster" and knows HTML and Java script, which allows things to move on a Web page. He is now spending a great deal of time developing Veggie Net as part of his web site; it will contain pictures with accompanying quotations related to vegetarianism. Address: President, Lumen Food Corp., 409 Scott St., Lake Charles, Louisiana 70602-0350. Phone: 318-436-6748.

7898. Ledvinka, Ferro. 1995. Introducing macrobiotics and soyfoods to Italy (Interview). *SoyaScan Notes*. Dec. 24. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ferro was a pioneer of macrobiotics in Italy. In the process he also helped to introduce soyfoods, especially to Florence. He first learned about macrobiotics when he read a book on macrobiotics in Italy. He started eating a macrobiotic diet. In Rome there was a macrobiotic center founded and run by Marquesa Parvolo, who had been cured of leukemia or a blood disease by George Ohsawa several years before. In 1971 he heard a lecture at this center in Rome by Rob Dobrin, who gave him Michio Kushi's address in Boston, Massachusetts. In the summer of 1972 he traveled to Boston to study macrobiotics, and there he learned how to make tofu and seitan. After leaving the USA, he returned to Italy, living in Rome. From there he worked to spread macrobiotic food and philosophy to all major Italian cities.

In Jan. 1977 Ferro went to Japan to work with Mr. Kazama at Mitoku, exporting macrobiotic foods to Italy and other European countries. The first Italian company to order these foods (including Japanese miso and tamari) was ProBios in Florence. They were followed by two Italian Macrobiotic Centers, located in Rome and Milan. In Oct. Ferro left Japan, returned to Italy, lived in Rome for a while, then moved to Florence, where he established the pioneering Fondazione Est-Ouest at via de Serragli 4, in Florence. This was a combination macrobiotic restaurant and macrobiotic study center. Ferro also worked for a while with ProBios. He taught various people to make tofu, seitan, and tempeh—but none of the restaurant customers would buy or eat these strange new foods. So Ferro decided to fry them and serve them as a snack, free of charge, before each meal. A Tuscan proverb says that "Even a slipper, if fried, tastes good." In this way people in Florence started to eat these new foods. The restaurant made and served these foods from about 1982 to 1985. Then people who were working in the restaurant moved to another place, became independent, and they started a small food factory named Soyablab. The founder of Soyablab, Matteo Iacovelli, is now the chairman of the Kushi Institute in Milan. Another person who helped a lot on the

way was Alfredo Ingannamorte. These people learned how to make tofu and tempeh in Boston. Alfredo studied at the Kushi house in Becket. Matteo worked at a macrobiotic restaurant (Open Sesame) in Brookline Village. Address: Via Pellicceria 6, 50123 Firenze (Florence), Italy. Phone: 055-827 274.

7899. Huang, Hsing-Tsung. 1995. Early history of soybeans and soyfoods in China (Interview). *SoyaScan Notes*. Dec. 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** The early *jiang* in China was made from meat or fish. The *jiang* used by Confucius was almost surely made from meat and fish. Many of the ancient books were annotated during the Han dynasty in an attempt to explain the meaning of certain words and passages. A very eminent scholar in the late Han dynasty (about 100 A.D.), talking about events in roughly 500 B.C., said that the *jiang* used by Confucius was made from meat and fish.

The soybean was not an important crop in China until the early Han, say 200 to 300 B.C. The soybean is mentioned in the *Book of Odes*, which is the most ancient and most reliable of Chinese books, not as a crop but as a plant that people gathered from the wild. Then is a series of books that were traditions of the Chou dynasty; these were codified and gathered by about 300 B.C., but in them there are not many references to the soybean. However by the time of the Western (Former) Han (206 B.C. to 8 A.D.) there were references in the literature to cartloads and big urns of *jiang* [Chinese-style miso]; *shi* (fermented fermented black soybeans) was also mentioned many times in the literature. Both these foods had become commodities.

Soy is also found in the Han Tomb No. 1 at Ma-wang-tui (pronounced "ma-wang-DUI"), a big archaeological find in China. A woman ruler was buried here in about 165 B.C. with all the 5-6 major grains, including wheat, barley, rice, 2 kinds of millet, soybean (*shu*), and hemp. Also found in the tomb were several seasonings including "soy sauce (*jiang*), *shi* ('salted darkened beans'), and leaven (*qu*)."

The earliest reference to pasteurization in China concerns pasteurization of wine, around the 11th century, long before the Japanese were pasteurizing shoyu before shipping it to Holland. He is not aware of any early reference to the Chinese pasteurizing soy sauce, but he will look again. However soy sauce is so highly salted that it does not require pasteurization, whereas wine does. The wine was filled into to earthenware jars with a small mouth, which was covered with cloth or leaves, then sealed with mud.

Dr. Huang will travel to China next month (to Foochow, capital of Fujian province) and he hopes to see some of the existing traditional fermentation processes. Soymilk was not an important traditional food in China, but it was becoming important when he traveled there in the 1940s with Dr. Joseph Needham. When they visited northern China, early in the morning people would have a huge iron wok of hot

soymilk, which they sold for breakfast. Joseph liked the soymilk with bits of *youtiao* (deep-fried bread sticks; W.-G. *yu t'iao*).

One of the chapters in Dr. Huang's book deals with nutrition in China. The Chinese diet is said to be lacking in calcium. It is well known that for calcium to be absorbed, you need lactose, and the ability to tolerate lactose. Thus, it would be surprising to find higher bioavailability of the calcium in soymilk or tofu. Before the time of Confucius (551-479 B.C.) the Chinese ate a lot more animal products than they do now, but the agricultural system developed with the emphasis on grains, less emphasis on animal products, and no emphasis on milk—probably because of the lactose intolerance of the Chinese people. Thus, the Chinese never developed a dairy industry. Mongols are not as lactose tolerant as northern Europeans, but they are heavily dependant on animal milks as a source of food. They get around this problem by converting animal milk into yogurt. This fermentation converts the lactose to lactic acid, which both solves the lactose intolerance problem and extends the life of the product by lowering the pH.

Another interesting problem: Europeans are the only ones who make true cheese, using rennet. The Mongolians and all the pastoral people in Asia rely on various animal milks, including horse's milk to make koumiss, and they even make a type of cheese that is sort of like cottage cheese, coagulated by acid. Dr. Huang thinks the discovery of rennet is one of those major, accidental discoveries that is very rare. If you wash an animal stomach carefully before using it to store milk, that will wash all the rennet away. Another such major discovery is the Chinese discovery of *chu* or koji. Address: 309 Yoakum Parkway #403, Alexandria, Virginia 22304.

7900. Straus, Karen Cope. 1995. At home with the McCartneys: Share the season's best with Paul and Linda. *Vegetarian Times*. Dec. p. 41-45.

• **Summary:** This is largely a selection of lacto-vegetarian recipes from two of Linda McCartney's popular vegetarian cookbooks. Ingredients include TVP granules, soymilk, and soy sauce. Her first cookbook, *Linda McCartney's Home Cooking*, remains "one of the best-selling vegetarian cookbooks published to date." Several nice color photos show Paul and Linda.

7901. **Product Name:** [Kikko Soy Sauce—Seasoned with Ginger and Garlic].

Foreign Name: Kikko Ajoikion.

Manufacturer's Name: Kikko Corporation S.A.

Manufacturer's Address: Calle Robert Fulton No. 115, Lima 3, Peru. Phone: 326-1358 or 326-0955.

Date of Introduction: 1995.

Ingredients: Shoyu, ginger, garlic, and spices.

Wt/Vol., Packaging, Price: 350 ml (11.84 fl oz.) plastic

bottle.

How Stored: Shelf stable.

New Product—Documentation: Company history form filled out and label sent by Marco Kamego, a present owner of Kikko Corporation S.A. 1997. Dec. 29. Label: 7.5 by 2.75 inches. Full-color front panel on tan and white. Color illustration of an onion, carrot, tomato, lettuce, and potato. "Soy-sauce seasoning or dressing enriched with natural ginger and garlic."

7902. **Product Name:** [Kikko Shoyu: Premium Soy Sauce].

Foreign Name: Kikko Shoyu: Salsa de Soya.

Manufacturer's Name: Kikko Corporation S.A.

Manufacturer's Address: Calle Robert Fulton No. 115, Lima 3, Peru. Phone: 326-1358 or 326-0955.

Date of Introduction: 1995.

Ingredients: Soybeans, wheat, salt, sugar, caramel color, water, preservative.

Wt/Vol., Packaging, Price: 350 ml (11.84 fl oz.) plastic bottle.

How Stored: Shelf stable.

New Product—Documentation: Company history form filled out and label sent by Marco Kamego, a present owner of Kikko Corporation S.A. 1997. Dec. 29. Label: 7.5 by 3 inches. Full-color front panel on red and white. Color illustration of a turkey and various vegetables. "Concentrated savor, color, and aroma."

7903. **Product Name:** [Kikko Mensi Sauce].

Foreign Name: Kikko Salsa Mensi.

Manufacturer's Name: Kikko Corporation S.A.

Manufacturer's Address: Calle Robert Fulton No. 115, Lima 3, Peru. Phone: 326-1358 or 326-0955.

Date of Introduction: 1995.

Ingredients: Soybean paste, shoyu, garlic, sugar, and wine vinegar.

Wt/Vol., Packaging, Price: 350 ml (11.84 fl oz.) plastic bottle.

How Stored: Shelf stable.

New Product—Documentation: Company history form filled out and label sent by Marco Kamego, a present owner of Kikko Corporation S.A. 1997. Dec. 29. Label: 7.5 by 2.75 inches. Full-color front panel on tan-orange and white. Color illustration of a turkey on a plate surrounded by vegetables. "Sauce for seasoning all types of meats. The ideal sauce for baked turkey" (*Salsa para aderezar todo tipo de carnes. El Adobo ideal para el pavo al horno*).

7904. **Product Name:** Rising Sun Tofu.

Manufacturer's Name: Olive Tree Works.

Manufacturer's Address: 6713 New Hampshire Ave., Takoma Park, MD 20912. Phone: 301-270-5110.

Date of Introduction: 1995.

How Stored: Refrigerated.

New Product–Documentation: Talk with Yaron Semititsky of Olive Tree, Inc. 1997. July 24. Their fourth soy product, Rising Sun Tofu, was launched in 1995. It is similar to Savory Tofu but with East Asian seasonings, such as ginger and soy sauce.

7905. **Product Name:** San-J Sweet & Tangy: Polynesian Glazing & Dipping. Gluten Free.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 804-226-8333.

Date of Introduction: 1995.

Ingredients: Honey, water, apple juice concentrate, tamari soy sauce (water, soybeans, salt, alcohol), apple cider vinegar, pineapple juice concentrate, tomato paste, rice vinegar, onion juice (onion juice, vinegar salt), arrowroot, garlic powder, canola oil, xanthan gum, spice.

Wt/Vol., Packaging, Price: 10 fl oz glass bottle.

How Stored: Shelf stable.

New Product–Documentation: E-mail from Misako Binford of San-J. 2012. May 8. An attached Excel spreadsheet gives that date each San-J product was first sold commercially, starting in 1987. This product was first sold in 1995.

Two labels sent by Misako Binford of San-J International. 2012. May 14. Black, red, white, and blue on yellow. Outline of two bended palm trees. The label now reads as shown above. One logo on the front panel: Certified Gluten Free.

7906. Alexander, Victoria; Harris, Genevieve; Dyson, Sharon. 1995. *A taste of Australia: the Bathers Pavilion cookbook*. Berkeley, California: Ten Speed Press. xiii + 122 p. See p. 36, 72, 78. Illust. (color, incl. photos by Rodney Weidland). 27 cm.

• **Summary:** Bathers Pavilion is a restaurant fronting the beach in Sydney, New South Wales, Australia. “Thick, sweet soy sauce (kecap manis) is mentioned on pages 36, 72-73, and 78-79. In the headnotes to the recipe for “Marinated pork fillet with peanut sauce” we read (p. 72): “Kecap manis is a thick, sweet soy sauce from Indonesia. It is sweetened with palm sugar and flavoured with star anise and salam leaves (a little like bay leaves). Do not substitute for kecap manis as no other soy sauce will produce the same results.”

Tofu is mentioned on pages 18, 30, and 45.

On pages 78-79 is a recipe for “Venison, tamarind and tempe hot pot,” whose headnote begins: “Tempe is made from the remaining soy bean solids after they have been pressed to make soy milk. The solids are then compressed and fermented. Tempe has a wonderful nutty flavour...” Note: This is a description of okara tempe; most tempe is made from whole, dehulled soybeans rather than from okara.

The word “soy” is used to refer to soy sauce on pages 30 (light soy sauce), 42 (Japanese soy sauce), 43, and 52 (dark

soy sauce). Address: 1. Owner, The Bathers’ Pavilion.

7907. Hayot, Roger; Linderman, Sheila. 1995. *Dinner at the Authentic Cafe*. New York, NY: Macmillan. 246 p. See p. 14. Illust. 24 cm.

• **Summary:** Authentic Cafe is located in Los Angeles, with Roger Hayot as head chef. It is on the site of his father’s former butcher shop. Many of the recipes are meatless, except that they might call for chicken stock.

In the glossary (p. 14): “Ketjap manis: This is a thick, sweet soy sauce (made from soy sauce and molasses) from Indonesia. It’s great for dipping. Ketjap manis is available in Asian groceries.”

Soy is mentioned on 10 pages, incl. p. 14, 17, and 65. Soy sauce is mentioned on 10 pages, incl. p. 14, 17 (glossary definition), 48 (Thai chicken satay, with ketjap manis), 64-65 (Soy-cilantro sauce), and 140. Address: Los Angeles, California.

7908. Herbst, Sharon Tyler. ed. 1995. *The new food lover’s companion: Comprehensive definitions of over 4000 food, wine, and culinary terms*. 2nd ed. Hauppauge, New York: Barrons. xvi + 715 p. 18 cm. 1st ed. published 1990. *Barron’s Cooking Guide*. [325* ref]

• **Summary:** This carefully researched and well written dictionary of food terms also contains 21 useful appendixes and a good bibliography. All enquiries should be directed to: Barron’s Educational Series Inc., 250 Wireless Blvd., Hauppauge, New York 11778.

Soy and related entries can be found under the following headings: Adzuki bean (also azuki), agedashi, cheese–imitation cheese (generally includes tofu and lecithin), fermented black beans (also called Chinese black beans and salty black beans), flour–gluten flour, kecap manis / ketjap manis, kudzu, milk (see soy milk), miso, natto, okara, queso fresco (also called queso blanco), quinoa, seitan, shoyu (Japanese for soy sauce), soybean, soybean oil, soy flour, soy milk, soy pea (see soybean), soy sauce (light soy sauce, dark soy sauce, Chinese black soy, tamari), tempe or tempeh, tofu (also called soybean curd and bean curd).

7909. Holzen, Heinz Von; Arsana, Lother. 1995. *The food of Indonesia: Authentic recipes from the spice islands*. Singapore: Periplus Editions; Clarendon, VT: Distributors, United States, Charles E. Tuttle. 120 p. Introduction by Wendy Hutton. Illust. (color photos). Index. 21 x 23 cm. Series: Periplus World Cookbooks.

• **Summary:** Recipes by Heinz von Holzen & Lother Arsana; food photography by Heinz von Holzen. Facing each recipe is a full-page glossy color photo. One recipe per page (usually). For each recipe, the Indonesian name is given first, in bold caps, above the English equivalent. The section titled “Indonesian ingredients” (p. 34-39) includes soy sauce (the two types are thick sweet soy sauce–*kecap manis*, and the

thinner, saltier light soy sauce—*kecap asin*), and tempeh—a Javanese creation.

Soy related: *Sambal kecap*—Sweet soy sauce sambal (with 2 tablespoons sweet soy sauce, p. 44). *Sambal tauco*—Salted soy bean sambal (with ½ cup salted soybeans {tauco}, p. 45). *Gulai tempeh & Sambal goreng tempeh*—Tempeh stew (with 4 fermented soy cakes {tempeh}) & Hot spicy fried tempeh (with 2 fermented soybean cakes, p. 68).

Note: This book calls for an unusually large proportion of meat, fish, and poultry.

7910. Holzen, Heinz Von; Arsana, Lothar. 1995. The food of Bali: Authentic recipes from the island of the gods. Singapore: Periplus Editions. 132 p. Introduction by Wendy Hutton. Illust. (color). Index. 20 cm. Series: Periplus World Cookbooks.

• **Summary:** Tempeh is mentioned in the text on pages 6, 15 and 16—but it is not mentioned in the glossary of ingredients (p. 25-33) and is not called for in any recipes. The Glossary (p. 35) says that the two types of soy sauce used are “sweet soy sauce (*kecap manis*), and “thin soy sauce (*kecap asin*). As an alternative to sweet soy sauce use dark black Chinese soy sauce, and add brown sugar to sweeten it.

Recipes by Heinz von Holzen & Lothar Arsana; food photography by Heinz von Holzen. Rich in graphics; poor in content. Address: 1-2. Grand Hyatt Bali.

7911. Kikkoman International, Inc. 1995. Kikkoman industrial products (Brochure). San Francisco, California. 6 p. 28 cm.

• **Summary:** On the cover of this glossy color brochure is a 12 oz bottle of Kikkoman all-purpose soy sauce against a textured beige background. “The world’s leading soy sauce manufacturer offers two lines of naturally brewed soy sauce for the industrial market: one liquid and one dehydrated. And that means a world of natural flavor solutions for you.” For each product is given the product name and code, description, benefits / applications, and ingredients.

The liquid products are: Soy sauce. Preservative-free soy sauce. Lite soy sauce. Less salt soy sauce. Teriyaki sauce. Premium soy sauce—PTN (Higher total nitrogen than regular soy sauce. Ingredients: Water, soybeans, wheat, and salt).

The dehydrated products are: Dehydrated soy sauce—SN-1 (spray dried). Dehydrated soy sauce—KS-32. Dehydrated soy sauce—RS-50. Dehydrated teriyaki sauce. Natural flavor enhancer. Dehydrated soy sauce—HN. Granulated soy sauce.

On the rear cover is a description of naturally brewed soy sauce, and a comparison of it with non-brewed soy sauce (which “is often opaque with a harsh, overpowering flavor and pronounced chemical aroma”). A table lists other industrial products from Kikkoman. Address: P.O. Box 420784, San Francisco, California 94142-0784. Phone: (415) 956-7750.

7912. Nakano, Makiko; Smith, Kazuko. 1995. Makiko’s diary: a merchant wife in 1910 Kyoto. Translated with Introduction and Notes by Kazuko Smith. Stanford, California: Stanford University Press. xii + 256 p. With introduction and notes by Kazuko Smith. Illust. Maps. Index. 24 cm. [100*+ ref]

• **Summary:** This diary was written by Makiko Nakano (1890-1978). A somewhat blurry photo of her (taken ca. 1910) faces the title page. Sample pages from her actual diary are shown occasionally (see p. 56). She is married and her parents also both live in Kyoto. Tofu and miso were a regular part of her family’s diet.

Jan. 1 [1910] (p. 57). Jan. 1. New Year’s day. Black [soy] beans (*kuromame*) are served for lunch.

Feb. 1 (p. 81): “Because it was a cold night with a howling wind outside, I decided it would be a good chance to make frozen tofu. I took the tofu I bought for this purpose out onto the big roof, poured hot water over it, and left it there overnight. It was bitter cold. I thought my ears were going to freeze.” Endnote (p. 82): “5. *Kôya-dôfu* or *shimi-dôfu*. Freezing coarsens the tofu, which then takes on a distinctive flavor when cooked in a mixture of soy sauce and sugar.”

“The family custom was to serve the same menu on the first day of each month.” That menu was miso soup, salad of grated radish and carrots, and broiled mackerel.”

Feb. 2. As soon as she awoke in the morning, she thought about the tofu she had left outside the previous night. She hurried up to the roof in spite of the cold. “It was frozen solid. In fact it was so thoroughly frozen and stuck to the board that pouring hot water over it did not help much to loosen it.” She was finally able to dislodge it by pounding it with a hammer for some time. She cooked it with *katsuo-dashi* right away and served it to her husband for breakfast. He complained about it (p. 82).

On Feb. 2 she again put out tofu on the roof to freeze. First thing next morning she rushed up to see it. “It was beautiful! I soaked it in hot water first, then cooked it in soy sauce, *sake*, and sugar. It was perfect and he liked it! My experiment was a success.”

Kôya-dôfu is mentioned on page 93. Regular tofu is mentioned on pages 10, 24, 25, 60, 68, 87, 89, 93, 117, 227. Soy sauce is mentioned on pages 82, 83, 225, and 252. Miso is listed on about 21 different pages (see index). Address: Kyoto, Japan.

7913. Pankey, Susan M. 1995. Why the brown bean was blue: The story of a soybean frown turned upside down. 2nd ed. Nebraska: Nebraska Foundation for Agricultural Awareness. 32 p. Illust. by Libby Mortensen. No index. 23 cm. 1st ed. 1992.

• **Summary:** This is a children’s book, written in rhyming verse, about the many things that can be made from

soybeans. The soybean is “blue” (unhappy) because people don’t understand all the great things that it can do. From soybeans we can make soybean oil, mayonnaise, margarine, soap and shampoo, insecticides, varnish and paint, lecithin (used in medicines and chocolate bars), soy flour, hot dogs, soy sauce, tofu, soybean meal for livestock feeds, soy ink, glue.

Also describes how soybeans are grown and crushed to yield soybean oil and meal. This edition is printed with soy ink on recycled paper. Both the first edition (1992) and this second edition were published by the same Nebraska Foundation for Agricultural Awareness with funding from the Nebraska Soybean Board. Project coordinated by Ellen Hellerich, Nebraska Agriculture in the Classroom (Lincoln, Nebraska). Address: Upstate New York.

7914. Sass, Lorna J. 1995. Lorna Sass’ complete vegetarian kitchen: Where good flavors and good health meet. New York, NY: Hearst Books. xiv + 492 p. Index. 26 cm. [35+* ref]

• **Summary:** First published in 1992 as *An Ecological Kitchen: Healthy Meals for You and the Planet* (William Morrow—which see). This innovative vegan cookbook offers 250 cholesterol-free recipes. It features a complete glossary of wholesome ingredients for stocking the vegan pantry (no meat, dairy, or eggs). Address: New York City.

7915. Whitley County Historical Society (Indiana). 1995. Whitley County and its families, 1835-1995. Paducah, Kentucky: Turner Publishing Co. 232 p. See p. 21. Illust. 1 map. 29 cm. *

• **Summary:** The entry for “Shinzo Ohki” (p. 21) states: “Shinzo Ohki died at age 84 just after beginning a game of golf—a game he loved.

“Ohki was born in Japan in 1883, one of nine children. He studied English and went to night school, saving enough money to come to the United States. He became acquainted with Mr. and Mrs. William Distin of Columbia City, Indiana, and was employed in their home.” In 1907 he graduated from Columbia City High School, and in 1911 from New York University.

Ohki founded the Oriental Show-You Co., in Columbia City, Indiana, “for the production of oriental sauce [soy sauce] and chop suey. He sold the company in 1962 to Beatrice Food Company of Chicago [Illinois]. During its operation there, the company distributed its products throughout the Midwest and employed many people.

“Ohki was a trustee and elder in the Columbia City Presbyterian Church and was an active Rotarian.”

7916. Wibisono, Djoko; Wong, David. 1995. The food of Singapore: authentic recipes from the Manhattan of the East. Boston, Massachusetts and Singapore: Periplus. 120 p. See p. 104. Introduction by Lee Geok Boi. Illust. (color by Luca

Invernizzi Tettoni). Map. Index. 20 x 23 cm.

• **Summary:** In the section on “Poultry,” the recipe for “Duck in fragrant soy sauce” (p. 104) has a headnote which begins: “A Teochew favorite sometimes made with goose, this is a simple but very tasty way of simmering duck in soy sauce flavored with ‘black’ spices (cinnamon, star anise and cloves).” The ingredients include: “4 cups light soy sauce. 3 tablespoons black soy sauce.”

Note 1. This is the earliest English-language document seen (April 2012) that contains the term “fragrant soy sauce,” which refers to a kitchen preparation rather than to a commercial product.”

Note 2. Teochew food, from southern China, is characterized by steaming, light soups and fish dishes (p. 15).

Bean curd is mentioned on pages 10, 27, 48 (dried bean curd), 52 (firm bean curd), 66, 68.

Black soy sauce is mentioned on pages 14, 33, 39, 42, 52, 58, 64, 72, 82, 86, 98, 102, 104. Note: This appears to be a commercial product.

Deep-fried beancurd (*tau foo pok*) is mentioned on page 27.

Note: This is the earliest English-language document seen (May 2012) that contains the term *tau foo pok*.

Fermented bean curd (*nam yee*) is mentioned on page 27.

Soy sauce is mentioned throughout this book, including “light soy sauce” (which is saltier and paler than the dark black variety), “sweet soy sauce” (Indonesian, p. 33 [probably *kecap manis*]), and “black soy sauce.”

Yellow bean sauce is mentioned on page 32. Address: 1. Executive Chef; 2. Chef responsible for Chinese cuisine. Both: The Beaufort Sentosa, Singapore.

7917. Agar, Anne. 1995? Good taste guide cookery book: Lea and Perrins. Worcester, England: Lea & Perrins. 28 p. Illust. (color). 22 cm. *

• **Summary:** Recipes that call for Lea & Perrins’ Worcestershire Sauce. Includes a recipe for Bloody Mary ice cream. Address: New York, NY.

7918. Kushi Macrobiotics Corp. 1996. Kushi Cuisine order form. Stamford, Connecticut. 2 p. Revision #3. Jan. 19.

• **Summary:** This 1-page (back-to-back) photocopied order form lists 26 meals, seasonings, and snacks, which range in price from \$4.39 to \$0.99. Soy-related items include: Buckwheat noodles (soba style) + soy-ginger sauce (4 servings, \$4.39). Quick brown rice + red azuki beans & onions (4 servings, \$2.59). Instant miso soup + garden & sea vegetables + shiitake mushrooms (12 servings, \$3.99). Instant chicken-free vegetarian noodle soup + tofu & mushrooms (6 servings, \$3.99). Traditional premium (shoyu style) soy sauce (10 oz, \$2.99). Wheat-free premium (tamari style) soy sauce (10 oz, \$3.59). Postage for \$0 to \$10.00 is \$4.95. Address: P.O. Box 1434, Stamford, Connecticut

06904. Phone: 1-800-200-4184.

7919. **Product Name:** [Mansan Tamari Shoyu].

Foreign Name: Tezukuri osashimi tamari.

Manufacturer's Name: Corti Brothers (Marketer-Distributor). Made in Aichi prefecture, Japan, by Mansan Shoten.

Manufacturer's Address: Corti Bros.: 5810 Folsom Blvd., Sacramento, CA 95819. Phone: 916-736-3800.

Date of Introduction: 1996. January.

Ingredients: Whole soybeans, well water, salt, sake [to preserve freshness].

Wt/Vol., Packaging, Price: 300 ml glass bottle. Retail for \$7.99 (Jan. 1996).

How Stored: Shelf stable; refrigerate after opening.

Nutrition: Per 1 tablespoon (15 ml): Sodium 890 mg. Calories 10. Protein 1 gm.

New Product–Documentation: Sample (product with Label) sent by Darrell Corti of Corti Brothers in Sacramento. Corti Brothers Newsletter. 1996. Winter. p. 5-6. "The Mansan company has been making shoyu since 1874. Both a sake producer and a shoyu brewer, the plant outside Nagoya is a remarkable amalgam of traditional equipment and technology and modern science." Darrell was the first Westerner to visit the plant. He had to remove his shoes and put on clean slippers so as not to introduce foreign microorganisms. "Seeing the battery of enormous cedar casks packed with stones, the daily ladling process, and the scrupulous cleanliness is an extraordinary experience." The processing of this soy sauce takes up to 18 months. Soybean koji is mixed with water and salt, then placed in enormous cedar casks. "A bamboo bucket is inserted into the mash and large flat river stones are piled on top to keep the mash submerged. The fermenting liquid is ladled out of the bucket which acts like a percolator and is poured over the stones daily to trickle down on the rest of the mash, assisting fermentation and concentrating the liquid. With the daily aeration and the long production cycle, the [tamari] shoyu becomes thick and dense. It turns a rich, dark brown color and has an enticing aroma."

Talk with Darrell Corti. 1996. His company started selling this product in Jan. 1996. He visited the factory in Japan in about 1990-91. The company has an excellent laboratory.

7920. GEM Cultures. 1996. Catalog [Mail order]. 30301 Sherwood Rd., Fort Bragg, CA 95437. 10 p. Jan. [4 ref]

• **Summary:** New additions include *The Simple Soybean and Your Health*, by Virginia and Mark Messina, and a maple tofu kit. Contents: Soycrafters Section: Tempeh, natto, koji starters, miso, koji, tofu boxes, tofu coagulants (natural nigari, Terra Alba naturally occurring calcium sulfate or gypsum). Books. Bread cultures. Dairy cultures. Tea fungus–Kombucha. Sea vegetables. Kitchen items. Ordering

information. Address: Fort Bragg, California. Phone: 707-964-2922.

7921. Lai, Benny. 1996. Dah Chong Hong—A pioneer in using Ontario soybeans. *Canadian Export Soybeans (OSGMB, Chatham, Ontario, Canada)* 9(1):2. Jan.

• **Summary:** In the mid-1970s Mr. Lai was working in the Food and Edible Oil Dept. of Dah Chong Hong's head office in Hong Kong. He and co-workers imported 800 bags of Ontario special quality white hilum soybeans into Hong Kong for testing. They distributed the soybeans to more than 30 manufacturers of soybean curds, tofu, soy milk, soy sauce, and other soy products. "The quality was considered not very terrific by most end-users, in terms of 'yield' when manufacturing the soy products, but was acceptable." To further explore development of this imported product, Mr. Lai and Mr. Chi-bun Leung flew to Canada, where they were warmly welcomed and treated Dah Chong Hong's as pioneers. "Since that time Dah Chong Hong has imported Ontario soybeans for the Hong Kong market continuously every month now for more than 20 years. The overall quality of Ontario soybeans has improved over the years, and the quantity has been growing from only one or two containers per month in the mid-1970s, to hundreds of containers per month presently."

In 1984 Dah Chong Hong (Canada) Ltd., a wholly owned subsidiary of the head office in Hong Kong, was established in Vancouver, British Columbia, Canada. "One of our goals is to export more Canadian soybeans to many countries in Asia." The address in BC is: 4211 No. 3 Road, Richmond, BC V6X 2C3. Phone: 604-273-8222. Fax: 604-273-9222. Address: President, Dah Chong Hong (Canada) Ltd., 4211 No. 3 Road, Richmond, BC V6X 2C3, Canada. Phone: 604-273-8222.

7922. Lumen Foods. 1996. Soyfoods never tasted so good! (Ad). *Vegetarian Times*. Jan. p. 95.

• **Summary:** Color photos show the labels of five "Heartline Meatless Meats" in Teriyaki Beef Style, Beef Fillet Style, Italian Sausage Style, Chicken Fillet Style, and Ground Beef Style. "29¢. Ask about our new line of unflavored "textured vegetable proteins." A 5 lb. bag costs \$4.35 and makes 15 lbs. of "meatless meat." That's \$0.29/lb!"

"A proven LDL and triglyceride lowering product as reported in the New England Journal of Medicine."

"Made from pure defatted soy flour, Heartline cooks up in just 10 minutes (just add water!)." A sampler of four 8-oz packets costs \$19.95. Each makes about 1 pound. Note: Therefore the cost of the ready-to-eat product is \$4.99/lb. "In addition, we'll send you our tenth anniversary, limited edition of The Lumen Book—over 240 pages of facts covering every facet of vegetarianism, 300 scientific studies and research sources, and 60 easy-to-use recipes. This book alone justifies your purchase."

"Online users: Send orders/messages to: LumenFoods@aol.com. Web users: Catch us at www.lumenfds.com."
Address: 409 Scott St., Lake Charles, Louisiana 70601.
Phone: 1-800-256-2253.

7923. Soyfoods Center archival collections, from the 1600s ongoing. 1996. Lafayette, California. [6313 ref]

• **Summary:** As of 1 Jan. 1996 the Soyfoods Center Archives contains 6,313 unpublished archival documents—mainly correspondence, interviews, photographs, and unpublished manuscripts relating chiefly to the history of soybeans and soyfoods, and to a lesser extent, the history of vegetarianism and natural foods.

Main subject areas include: early history of soybeans and soyfoods; modern soy protein products; soyfoods industry and market; industrial utilization of soybeans; soy pioneers in the U.S., Europe, and worldwide; major U.S. soybean crushers; Seventh-day Adventists worldwide; pioneer U.S. soy protein companies; pioneer U.S. natural food companies and distributors; soybeans, soyfoods, Third World nations, and world hunger; nutritional and medicinal value of soybeans and soyfoods; and soybean production, trade, and marketing.

Document level access is available through the repository's SoyaScan information retrieval system.

Most important specific subject areas: Miso, natural foods, Seventh-day Adventists, soy sauce, soybean, soybean industry, soybean products, soyfoods, soyfoods industry, soymilk, tempeh, tofu, vegetarianism. Address: P.O. Box 234, Lafayette, California 94549. Phone: 510-283-2991.

7924. Hagler, Louise. 1996. Soyfoods cookery: Your road to better health. Summertown, Tennessee: The Book Publishing Co. 160 p. Illust. Index. 21 cm. Introduction by Mark and Virginia Messina.

• **Summary:** Contents: Foreword, by Louise Hagler. Introduction, by Mark Messina and Virginia Messina: Introduction, soybeans—a powerhouse of nutrition, soy and cancer (soybeans—a phytochemical factory, genistein and non-hormone cancers, soy and cancer treatment, isoflavones in the diet), soyfoods and heart disease—beyond cholesterol, soyfoods and bone health, soyfoods and kidney disease, menopause, perspective on soyfoods, about the Messinas. Basic soyfoods (glossary): Whole soybeans, fresh green soybeans, soymilk, okara (soy pulp), soymilk powder, soy protein concentrates, soy protein isolates, tofu, freeze-dried tofu, tempeh, textured vegetable protein, miso, soy flour or grits, yuba or bean curd stick or sheet, natto, soy sauce, soy oil, soy lecithin, convenience soyfoods (frozen soyburgers, frozen tamales and burritos, frozen soy hot dogs or wieners, frozen fat-free soy ground meat replacement, frozen soy pizza, tempeh burgers, frozen tofu lasagne, stuffed shells, manicotti, tortellini or ravioli, frozen soy breakfast links or "sausages" or tempeh "bacon," "ground" tofu, meatless chili

mixes, meatless burger mixes, soy "cheeses," eggless soy mayonnaise, tofu salad dressings, soy ice creams, frozen pot pies, frozen pocket breads, instant miso soup, eggless soy cake, quick bread, pancake and waffle mixes, liquid soy coffee creamer, smoked or baked tofu). Feeding babies and children soyfoods. Breakfast, brunch & bread. Whole soybeans. Sauces, spreads, dips & dressings. Soup & salad. Main dishes. Desserts. Drinks & yogurt.

No dairy products or eggs are used; honey is called for in some recipes. Optional microwave instructions are sometimes included. Address: Summertown, Tennessee. Phone: 615-964-3571.

7925. Quincannon, Jane. 1996. Sensei Muramoto: A gentle man. *Macrobiotics Today* (Oroville, California). Jan/Feb. p. 27-28.

• **Summary:** "Sensei" is the Japanese word for teacher. The writer studied and worked with Noboru Muramoto. "This scholarly and energetic man was quiet, humble, and one of the least arrogant persons I have ever known. And the hardest working. Sensei was up at dawn each day to write, study history, science or economics, to weigh grams of Chinese herbs for his teas, to clean his sea salt, produce traditionally fermented foods, and tend his vast garden. His vitality and commitment was inspiring.

"At age 15, Noboro Muramoto met George Ohsawa, the founder of the modern macrobiotic movement, after reading the senior teacher's books on healing. As Sensei tells it, 'I had a very bad condition, was overweight, with Vitamin B deficiency, eye trouble, and always tired. I went to the doctor, got treatment, but never got better. I found George Ohsawa's book. It is amazing what kinds of diseases can be cured just by food.'

"Immediately I decided to try this diet: Brown rice, miso soup, a pickle—very simple food. Soon I got well. Since that time, I never forgot this diet. At George Ohsawa's classes I learned directly from him, a very interesting person. His subjects were almost always philosophy and principles. I had a great interest in the healing power of food. I was his last student, for a short time, but I still received a big influence."

Muramoto "Sensei met Herman and Cornelia Aihara shortly after the 1966 death of George Ohsawa. He first met Michio and Aveline Kushi in 1971, when he was invited to lecture in New York City."

"In 1972, Sensei moved to San Francisco to create, with the Aiharas, the Herb Tea Company" [Rising Sun / Herb-T Company].

"In 1983, Sensei Muramoto, with Lino Stanchich, created Great Life Products Company, in order to manufacture and distribute high quality macrobiotic foods made from his special sea salt. Lino and I had the privilege of working with Sensei for three years making varieties of miso and its by-product, tamari, along with barrels of

pickled umeboshi plums made with home-grown shiso leaves. Students came to our school, Asunaro, in the hills of Southern California, to study traditional food production and receive Sensei's information and enjoyable teachings... Sensei's dream has been that every macrobiotic household produce such foods as miso, umeboshi, tamari, shoyu, as well as mochi, tofu, tempeh, tekka and other healing, delicious condiments. To that goal he dedicated his life."

"Sensei named his school Asunaro, which is translated from the Japanese to mean 'Tomorrow is perfect.'" "And work he did, up until the last day of this lifetime."

A photo shows Muramoto sensei standing in front of a blackboard, outdoors, at one of the G.O.M.F. French Meadows summer camps. Address: New Jersey.

7926. Product Name: Thai Peanut Dressing, Honey Curry Dressing, and Tamari Mustard Dressing.

Manufacturer's Name: San-J International, Inc.

Manufacturer's Address: 2880 Sprouse Dr., Richmond, VA 23231. Phone: 804-226-8333.

Date of Introduction: 1996. February.

Ingredients: Tamari-Mustard (4/96): Water, honey, carrot puree, certified organic tamari soy sauce (water, soybeans, salt, alcohol), apple cider vinegar, onion puree, mustard seed, mustard flour, garlic, onion powder, xanthan gum, white pepper.

Wt/Vol., Packaging, Price: 12 oz glass bottle. Suggested retail price: \$3.49.

How Stored: Shelf stable.

New Product–Documentation: Press release from Gaugher & Silva. 1996. Feb. 1 "San-J takes a new course and creates unique salad dressings: World's largest tamari soy sauce brewer enters salad market with exotic flavors." "These three all natural low fat and fat free dressings mark San-J's first entry into the salad dressing market." Product with Label sent as a free sample by Gaugher & Silva. 1996. April 20. Back, yellow, orange and gold on white. "Fat free. All natural."

Leaflet (8½ by 11 inches, glossy, color). 1996. Dec. 10. "Lettuce inspire you." Shows Tamari Mustard Dressing being poured from a glass bottle onto salad ingredients in a wok. Also shows bottles of Honey Curry Dressing and Thai Peanut Dressing. The ingredients in each of the 3 dressings are listed on the back of this leaflet. Accompanied by a "Lettuce inspire you" "neckhanger," which contains 4 coupons (for various San-J products) and 4 recipes.

7927. Stacy, Michelle. 1996. Can soy save your life? Michelle Stacy separates hype from hope. *Food & Wine*. Feb. p. 88-94, 96. [1 ref]

• **Summary:** This story is based on the study by Dr. James Anderson in the *New England Journal of Medicine* (Aug. 1995). "In its cholesterol-busting guise, soy bears an eerie resemblance to another unglamorous food: oat bran."

"A growing body of evidence suggests that it [soy] may help prevent certain cancers, slow calcium loss from bones and moderate symptoms of menopause. Many of these effects, researchers posit, are due to natural substances in soy called isoflavones, which resemble the hormone estrogen and may replicate the many protective effects of estrogen without any of its drawbacks."

But many marketers, including Ronald Paul (president of Technomics, a food-consulting firm in Chicago) believe that soy has a bad image. "It's going to be a marketing challenge to change the public's view of it. I always like to say that if you can make the kiwi a success you can make anything a success." Will companies start to promote their products by advertising on the package "Excellent source of soy!"? Another obstacle to acceptance for some people that tofu reminds them of the health-food era of the 1960s.

Photos show the following packaged soyfoods, each with a brief description: Edamame, soy sauce, soy milk, soy flour, miso, tempeh, roasted soybean powder, tofu. Contains the following recipes, each accompanied by a color photo: Grilled tofu salad. Miso-carrot dressing. Tempeh sandwiches. Chili con tofu. Miso-clam soup. Fried tofu with mushroom gravy. Miso-stuffed chicken. Silken tofu in ginger syrup. A full-page color photo shows green vegetable soybeans in and around one large pod. Small photos show most of the recipes, plus a field of soybeans, and a farmer holding a young soybean plant. Address: Author of *Consumed: Why Americans Love, Hate, and Fear Food* (Simon & Schuster).

7928. Mountain Ark Trading Co.; Macrobiotic Company of America. 1996. The "new" Mountain Ark consumer direct catalog—spring 1996 [Mail order]. 799 Old Leicester Hwy., Asheville, NC 28806. 37 p. March 15. 28 cm.

• **Summary:** This is a very comprehensive mail order catalog, with an excellent index, for macrobiotic whole foods, specialty cookware, cookbooks and books on natural healing, futons, furniture, etc. Soy-related products include: Aduki beans—precooked, amaranth, amazaki concentrate, amazaki [amazake] pickles, arame (sea vegetable), barley malt, black soybeans, brown rice malt, brown rice syrup, cookbooks, dulse (sea vegetable), fu (dried wheat gluten), green nori flakes, hamanatto, hijiki, Hokkaido azuki beans, Hokkaido black soybeans, Japanese plums (*umeboshi*), jinenjo soba, Job's tears, kamut, kanten bars, kelp granules, kinako, kombu cha, kuzu, miso, mochi, natto miso, natto starter spores, nigari, nori, quinoa, sea palm—California, seaweed sesame shake, seaweed cookbook, seitan, shoyu, soy sauce, tamari, tofu making kit, tofu—dried, wakame. Many of these products are imported from Japan.

Bruce Macdonald of Macrobiotic Company of America acquired the company from Frank Head of Fayetteville, Arkansas, on 1 Feb. 1996. The entire catalog can be viewed on the Internet at <http://www.mountainark.com>. Address: Asheville, North Carolina. Phone: 1-800-643-8909.

7929. Nance-Kivell, Greg. 1996. Re: New developments at EarthStar (formerly Chinese Farmhouse Tofu). Letter (fax) to William Shurtleff at Soyfoods Center, March 28 and April 2. 3 p. Typed, with signature on letterhead.

• **Summary:** “In Jan. 1991 the Challenge Foundation (a nonprofit organisation working with the disabled) bought a small tofu business called Chinese Farmhouse.” It consisted of a plant with one 100 liter gas cooker, two 80-liter round coagulation tubs, one hydraulic press, two 10 kg pressing trays, and a wall-mounted ratchet pressing system.

“A small group of two supervisors and five staff (disabled) made about 60 kg of tofu per day, on a good day, for 3-4 days per week, and cleaned on remaining days. The Foundation had no idea of food manufacturing, but thought that a hands-on manufacturing plant might be suitable for this group of workers. They became alarmed when overheads, establishment and staff costs made the venture non-viable. Workers are paid award-based wages—indexed to the level of disability.

Starting in late 1991, Greg was asked to help, two days a week, as a consultant. They bought more equipment and employed more staff. Sales increased to a break-even point at about 700 kg/week (3,000 kg/month). The overwork fatigue set in and production dropped. Products include: Tofu (hard, organic), tofu (herbed), soya yogurt (3 fruit flavours), soya mayonnaise, and dressings (4 flavours).

At present they are developing an ice cream and related products based on soy yoghurt, and are looking at tamari and shoyu production from whey and okara. Don McCallum is the factory manager.

Enclosed is a label for EarthStar certified organic tofu (750 gm). Note: The letter of 2 April 1996 was handwritten on letterhead with signature—in reply to 7 questions that Shurtleff faxed to Greg about the first letter. Address: Consultant Food Technologist, EarthStar, 5 Kay Street, Murwillumbah (P.O. Box 654), Murwillumbah, NSW 2484, Australia. Phone: (066) 72 5931.

7930. Saekel, Karola. 1996. Tallying the tofu. *San Francisco Chronicle*. April 24. Food section. p. 2, col. 5.

• **Summary:** This article gives the results of a special taste panel which rated the flavor and texture of ten brands of tofu sold in the San Francisco Bay Area. The article begins: “Thanks to better nutrition information and the availability of good and easy recipes, tofu has escaped from its niche as a strictly ethnic and/or health fanatics’ food and found its way into many Western kitchens.”

The rankings: 1. Trader Joe’s tofu (19 oz, \$0.89 = \$0.75/lb!). 2. Hinoichi (14 oz, \$1.09). 3. Wo Chong (14 oz, \$0.79). 4. Global Protein Foods (12 oz, \$1.89). 5. Golden Gate (19 oz, \$1.63). 6. Soy Deli (made by Quong Hop & Co., 12 oz, \$0.99 to \$1.39). 7. Mori-Nu (shelf-stable, 10.5 oz, \$0.85 to \$1.29). 8. Kikkoman (shelf-stable, 10.5 oz, \$1.29). 9.

Azumaya (14 oz, \$0.98 to \$1.19). 10. Wildwood Natural Foods (16 oz, \$1.39 to \$1.59).

Note: This is the earliest (and only) English-language document seen (April 2003) that uses the term “health fanatics” (or “health fanatic”). Address: Chronicle staff writer.

7931. Spieler, Marlena. 1996. Tofu transformations: Mild-mannered bean curd becomes quick-change artist. *San Francisco Chronicle*. April 24. Food section. p. 1, 5.

• **Summary:** In a box above the masthead on the front page of this issue of the Chronicle, is written “Love affair with tofu.” The food section of this issue is devoted largely to tofu, and this is the lead article. “Tofu and I go way back. But like all good relationships, this one took a while to blossom into love. In the days when Birkenstocks were chic (the first time around) you could find tofu, but eating it was an ordeal. The dishes were nutritionally correct but seldom delicious. So I ignored tofu and hoped that, along with those clumpy sandals, it would go away.

But over the years, as study after study showed the health benefits of eating soybeans, tofu—one of the easiest, most accessible ways to eat soybeans—could not be ignored.” From a friend just returned from Japan, she discovered she liked tofu and the way it made her feel. “It is in vegetarian dishes, however, that tofu shines. At the vegetarian Chinese restaurant Vegi Food, on Clement Street in San Francisco, almost everything comes with tofu in one form or another.” She describes many good ways to serve tofu. A large sidebar (p. 1), titled “Quick and easy ideas for adding tofu to your life, gives recipe ideas: Tofu pesto. Tofu, tomatoes and olive plate with nicoise flavors. Tofu and black bean tortas. Super-simple tofu bowl. Mexican tofu and vegetable simmer. Stir-fried cabbage and black mushrooms with tofu and hoisin sauce. Curry tofu in vegetable masala. Sicilian tofu-coffee sweet.

Page 5 contains many enticing full tofu recipes. One sidebar (p. 5) titled “Preparation techniques for a firm, dense texture,” describes: Fried tofu. Broiled and dry-baked tofu. Flavored, grilled tofu. Pressed tofu. A second sidebar (p. 5) titled “The many faces of tofu,” describes fresh tofu, fried tofu, marinated tofu, and smoked tofu. Photos show tofu dishes from Millennium restaurant. Address: Bay Area food writer; Special to The Chronicle.

7932. Alam, M.S.; Chaudhury, E.H. 1996. Soybean utilization in Bangladesh. In: Alex Buchanan, ed. 1996. Proceedings of the Second International Soybean Processing and Utilization Conference: 8-13 January 1996, Bangkok, Thailand. Bangkok, Thailand: Printed by Funny Publishing Limited Partnership. Distributed by The Institute of Food Research and Product Development, Kasetsart University. xviii + 556 p. See p. 92-95. [6 ref]

• **Summary:** Contents: Abstract. Introduction. Utilization and

consumption. Conclusion.

"In Bangladesh soybean is not a major oilseed crop but production and utilization have increased in recent years. A government action plan was undertaken for large scale cultivation and product utilization through a Crop Diversification Programme. The main idea of the programme is to alleviate protein calorie malnutrition from cereal-based diets in Bangladesh."

Most of the soybean grown in Bangladesh is used as feed by the poultry and cultivated fish industries. Some soyfood products, such as "soybread, soybiscuit, soyflour, soysauce, noodles, chanachur and tofu," as well as some confectionery beverages, have started to be prepared by some private food companies and are already on the market.

Cultivation of soybean in Bangladesh started when a non-government organization (NGO) named Mennonite Central Committee began demonstrations with farmers in the early 1970s. Research [other than that conducted by MCC] started in 1975 when a Coordinated Soybean Research Project was undertaken by the Bangladesh Agricultural Research Council (BARC).

Fig. 1 shows approximate soybean acreage in Bangladesh (1975-1993). This acreage has increased steadily from less than 100 acres in 1975 to about 2,200 acres in 1988; then it jumped suddenly to about 4,700 acres in 1989, increasing to about 6,200 acres in 1993.

There is presently in Bangladesh a high interest in soybean production and utilization, although utilization has been a problem in the past. "The general human food use is limited, due mostly to food taboos."

Most people in Bangladesh consume soybean oil in their daily dishes because of its high quality and low price compared to traditional mustardseed oil. Soybeans grown in Bangladesh do not have their oil extracted. They are used for feed and food. Address: Oilseed Research Centre, Bangladesh Agricultural Research Inst., Joydebpur, Gazipur 1701, Bangladesh.

7933. Chansa-Ngavej, Kanjana; Niyomrit, Sutthirux; Vethchagarun, Siripen. 1996. Halophilic protease-producing lactic acid bacteria as starter culture in soy sauce fermentation. In: Alex Buchanan, ed. 1996. Proceedings of the Second International Soybean Processing and Utilization Conference: 8-13 January 1996, Bangkok, Thailand. Bangkok, Thailand: Printed by Funny Publishing Limited Partnership. Distributed by The Institute of Food Research and Product Development, Kasetsart University. xviii + 556 p. See p. 288-90. [4 ref]

• **Summary:** "Abstract: From 1993-1995 our research has focused on a novel process of utilizing halophilic protease-producing lactic acid bacteria as starter culture in the moromi stage of soy sauce fermentation." The goal of the research is to increase the protein content of soy sauce for local consumption and for export.

One traditional way to preserve soybeans is to transform them into soy sauce by fermentation, using the mold *Aspergillus oryzae*.

Two photos show transmission electron micrographs of a lactic bacterial isolate (LAB 1.1) grown in two different media. Address: 1-2. Dep. of Microbiology, Faculty of Science, Chulalongkorn Univ., Thailand; 3. Scientific and Technological Research Equipment Centre, Chulalongkorn Univ., Phya Thai Road, Bangkok 10330, Thailand.

7934. Goulart, Frances Sheridan. 1996. Oh, soy! *Fit* (New York). March/April. p. 77-79.

• **Summary:** On the section titled "A nutritional wonder," the authors notes that soymilk has 15 times more iron than dairy milk, 50% less fat, and no cholesterol. Tofu is one of the two best sources of calcium (yogurt is the other) recommended by the Osteoporosis Foundation for meeting adult calcium needs (1,000 mg/daily). One 4-oz. serving of tofu provides twice as much calcium as one cup of plain yogurt. Soybeans provide the antioxidant vitamins A and E.

A sidebar titled "Your soy shopping list" gives brief definitions of tofu, tempeh, miso, natto, soy milk, soy cheese, soy sauce, and textured vegetable protein (TVP). Address: Connecticut.

7935. Husin, Adinan; Ahmad, Hasimah Hafiz. 1996. Soybean as a consistent industrial resource. In: Alex Buchanan, ed. 1996. Proceedings of the Second International Soybean Processing and Utilization Conference: 8-13 January 1996, Bangkok, Thailand. Bangkok, Thailand: Printed by Funny Publishing Limited Partnership. Distributed by The Institute of Food Research and Product Development, Kasetsart University. xviii + 556 p. See p. 497-507. [30 ref]

• **Summary:** Contents: Abstract. Introduction. Processing of soybean. Food uses of soybean. Processing of soybean oil. Processing of protein products: Flours, protein concentrates, protein isolates, textured protein products. Unfermented soy products: Soy curd/tofu, soymilk, snacks. Fermented products: Tempe, soy sauce, cheese (Commercial cheese alternatives claim to taste, melt, and stretch like regular cheese. Soy cheese now comes in Jalapeno Jack style, Cheddar style, mozzarella style, Garlic-herb style, and Monterey Jack style). Non-food uses ("Soy oils are used in non-food applications such as in the preparation of soaps, paints, varnishes, resins, plastics, lubricants and agrochemicals"). Promoting the use of soybean. Conclusion. Address: Food Technology Research Centre, MARDI, G.P.O. Box 12301, 50774 Kuala Lumpur, Malaysia.

7936. Leelawatcharamas, Vichien. 1996. The effect of soybean type on soy sauce production. In: Alex Buchanan, ed. 1996. Proceedings of the Second International Soybean Processing and Utilization Conference: 8-13 January 1996, Bangkok, Thailand. Bangkok, Thailand: Printed by Funny

Publishing Limited Partnership. Distributed by The Institute of Food Research and Product Development, Kasetsart University. xviii + 556 p. See p. 183-88. [7 ref]
Address: Dep. of Biotechnology, Faculty of Agro-Industry, Kasetsart Univ., Bangkok, 10900, Thailand.

7937. Nakajima, Mitsutoshi; Snape, Jonathan B.; Reddy, K. Kondal; Nabetani, Hiroshi. 1996. Application of membrane technology to soybean processing. In: Alex Buchanan, ed. 1996. Proceedings of the Second International Soybean Processing and Utilization Conference: 8-13 January 1996, Bangkok, Thailand. Bangkok, Thailand: Printed by Funny Publishing Limited Partnership. Distributed by The Institute of Food Research and Product Development, Kasetsart University. xviii + 556 p. See p. 508-14. [15 ref]

• **Summary:** The various types of membrane technology include ultrafiltration (UF), microfiltration (MF), nanofiltration (NF), electrodialysis (ED), and reverse osmosis (RO).

Contents: Abstract. Introduction. Soybean oil processing: Solvent recovery (by reverse osmosis), degumming (UF membranes can be used to remove phospholipids from soybean oil in hexane), lipid separations (separation of tri-, di-, and mono-glycerides and fatty acids from soybean oil by membrane technology), removal of contaminants (such as nickel catalysts from hydrogenated oils), removal of pigments (pigments in soybean oils include chlorophyll, carotenoids, xanthophyll, and their derivatives; use of expensive bleaching earth might be eliminated), wastewater treatment (a typical soybean oil extraction plant {1000 tonnes/day} generates 1,000 cubic meters of waste water each day; each liter contains 100 mg of suspended solids). Soybean protein processing and Beta-amylase production: Soybean saccharides processing, soysauce and other seasonings production. Conclusions.

Membrane technology has been widely accepted in many separation processes, including bioseparation. Although only a few industrial membrane processes have been installed for soybean processing, membrane technology has many potential applications in this broad field. One of the main advantages of membrane technology over conventional processing operations is that much lower temperatures can be used. This leads to large saving in energy costs associated with heating, and minimizes the thermal damage to heat-sensitive soybean components. Figure 1 shows how soybean oil might be processed using MF, UF, NF and RO purification near the beginning of the process, and nitrogen with gas separation membrane between the “refined soybean oil” and “packed oil” stages.

Ultrafiltration can be used to remove low molecular substances such as phytic acid. “When soy milk was processed by UF diafiltration, 86% of the oligosaccharides were removed,” and the soymilk quality was improved because off-flavors were reduced (Asahi Kogyo Group,

1987). The Kibon [Kibun] Group (1987) has used UF to concentrate soymilk. Soybean has high Beta-amylase activity, and soybean whey has been used for Beta-amylase production. Recently a new industrial plant for Beta-amylase production that uses defatted soybean meal has been installed (Nomura et al. 1994). (p. 512).

Note: This is the earliest document seen (March 2002) that uses the term “nanofiltration” in connection with soy. Address: 1&4. National Food Research Inst., MAFF, Tsukuba, Ibaraki, Japan 305; 2. Nippon Lever B.V., Shibuya, Tokyo, Japan 150; 3. AP Agricultural Univ., Hyderabad, India.

7938. Nguyen, M.H.; Hicks, P.A. 1996. Australian membrane technology for soybean processing. In: Alex Buchanan, ed. 1996. Proceedings of the Second International Soybean Processing and Utilization Conference: 8-13 January 1996, Bangkok, Thailand. Bangkok, Thailand: Printed by Funny Publishing Limited Partnership. Distributed by The Institute of Food Research and Product Development, Kasetsart University. xviii + 556 p. See p. 534-39. [6 ref]

• **Summary:** The most common membrane technology processes are microfiltration (MF), ultrafiltration, reverse osmosis (RO—also known as hyperfiltration, HF), and electrodialysis. Contents: Abstract. Introduction: Principles. Simple applications. Ultrafiltration membrane as a membrane reactor. Potential applications: Microfiltration of process water, ultrafiltration of soy whey, nanofiltration for soy whey recovery, advanced applications (counterdiffusion for the desalting of soysauce {fig. 3}, microfiltration, ultrafiltration, osmotic distillation). Address: 1. Senior Lecturer, Univ. of Western Sydney, Hawkesbury, Australia; 2. Agricultural Engineering/Agro Industry Officer, RAP, FAO of the UN, Bangkok, Thailand.

7939. *Soyfoods (ASA, Europe)*. 1996. Kikkoman to build European production plant. 7(1):2. Spring.

• **Summary:** Kikkoman, the world’s largest maker of soy sauce, plans to built its first European plant in Hoogezaand, the Netherlands. Work is scheduled to start in July 1996 with a completion date of March 1998. The plant will have a capacity of about 4 million liters/year. Kikkoman currently imports about 20 million bottles of soy sauce to the European market from its plant in Singapore.

But Kikkoman may face some new competition. A Japanese company named Wadakan has announced that it also plans to make soy sauce in the Netherlands, in Zoetermeer, starting in Nov. 1996, with initial production of 10 million liters/year.

Kikkoman also has plans to build a second plant in the United States, to complement their existing plant at Walworth, Wisconsin.

7940. *Soyfoods (ASA, Europe)*. 1996. New soya products at

FiE '95. 7(1):6-7. Spring.

• **Summary:** "Every year the Food Ingredients Europe Exhibition seems to get bigger and bigger, with more exhibitors and more visitors." Last year's FiE, held 7-9 November 1995 in Frankfurt, Germany, was no exception, and many soy products—especially soy sauces and related seasonings—were on display.

Miwon Co. Ltd. (Seoul, Korea) has developed a range of ingredients under the brand name SoyaDeli. Products include FiberPro, PeptiPro, FlavorPlus, and FlavorBase.

Kikkoman Trading Europe GmbH (Heerdter Lohweg, Germany) introduced FVP Paste, made by enzymatic hydrolysis and concentrated in a vacuum.

Wan Ja Shan International (Middletown, New York) is one of the largest makers of naturally brewed soy sauce and Oriental sauces in the USA. Their products include soy sauce, preservative-free soy sauce, stir-fry sauce, hoisin sauce, teriyaki sauce, tamari soy sauce, dehydrated soy sauce, dehydrated teriyaki sauce, and clear soy sauce.

Ajinomoto Europe Sales GmbH (Hamburg, Germany) was selling San-J Tamari in both liquid and dried forms.

Nikken Foods (Tokyo, Japan) is a large maker of natural food flavors. Exported mainly in powdered form, these include a wide array of soy sauce, natural flavor enhancers, and other fermented products, including white miso powder and red miso powder.

Inproba BV (Baarn, Netherlands) offers a wide selection of about 160 Oriental products, both at retail and to the food industry. These include various soy sauces and other soy products, and they can also develop custom recipes for their customers.

Upcoming FiE exhibition and conferences: 1996 Nov. 12-14 at Paris, France; 1997 at London, UK; 1998 at Frankfurt, Germany.

7941. Tyler, Jim; Neville, Jan. 1996. Wellspring Natural Food Co. Mail order catalog. Amherst, Massachusetts: Wellspring. 32 p. 28 cm.

• **Summary:** This is the first issue of this catalog, and Wellspring started in 1996. Soy-related products include: Miso, shoyu, black soybeans (from Hokkaido, Japan), yellow soybeans (organic), azuki beans, snow-dried tofu, kuzu, miso ramen, kinako, natto miso chutney, tekka miso, soymilk, and amasake.

Jim has been a macrobiotic teacher and counselor since 1975-76 and Jennifer was a chef at the Kushi Institute. Main competitors include Gold Mine and other such companies. This catalog is service oriented, easy to use, and more than 80% of the products have lower prices than the competition. Address: P.O. Box 2473, Amherst, Massachusetts 01004. Phone: 1-800-578-5301.

7942. Wang, Zeyuan; Yue, Shaoxian. 1996. Improved quality soybean soysauce using grain amaranth. In: Alex Buchanan,

ed. 1996. Proceedings of the Second International Soybean Processing and Utilization Conference: 8-13 January 1996, Bangkok, Thailand. Bangkok, Thailand: Printed by Funny Publishing Limited Partnership. Distributed by The Institute of Food Research and Product Development, Kasetsart University. xviii + 556 p. See p. 245-47. [1 ref]
Address: 1. Agriculture Bureau, Meigu County, Sichuan Province, China; 2. Inst. of Crop Breeding and Cultivation, Chinese Academy of Agricultural Sciences, Beijing 100081, China.

7943. DeAngelis, Lissa; Siple, Molly. 1996. Recipes for change: Gourmet wholefood cooking for health and vitality at menopause. New York, NY: Dutton Signet. A Div. of Penguin Books USA Inc. xvi + 400 p. May. Index. 25 cm. [34* ref]

• **Summary:** In the upper right corner of the front cover we read: "Feel great without hormone replacement therapy!" This is a book, with a natural foods and macrobiotic slant, about using foods in place of hormone therapy to help deal with nine problems that occur around the time menopause: Premenstrual syndrome, hot flashes, fatigue, heart palpitations, memory lapses, mood swings, irritability and depression, weight gain, waning interest in sexuality, hypothyroidism. All menu suggestions are divided into two choices: Vegetarian and non-vegetarian (but with many vegetarian dishes). Pages 4-5 note that science has found active ingredients in foods that promote good health during menopause. Soybeans and soy products are "rich in phytohormones... sometimes called phytoestrogens." Four types of food are "off the menu" = should not be consumed: Refined sugars, caffeine and coffee, processed oils, and refined white flour and refined grains. The subsection titled "Phytohormones" (p. 16) lists ten foods, including tofu and brown rice, as good sources. The benefits of phytohormones and soyfoods are also discussed in the section on "Breast cancer" (p. 55-56).

Soy-related recipes include: Miso soup (p. 90). Bean basics (p. 120-23). Tofu teriyaki with vegetables (p. 123-24). Tempeh, green beans, and carrots with mustard sauce (p. 132-33). Tempeh slices for sandwiches (p. 148-49). Tofu alfredo sauce (p. 303).

The recipes also call for: Adzuki beans, almond butter and tahini, almond milk, kudzu, and plums (umeboshi). The last page is titled "About the authors." Photos of Lissa DeAngelis and Molly Siple appear on the inside rear dust jacket. Address: 1. Private nutrition consultant, North Edison, New Jersey; former Assoc. Director of the Natural Gourmet Cookery School in New York City for 10 years; 2. Registered Dietitian, Los Angeles, California.

7944. Messina, Mark; Messina, Virginia. 1996. The dietitian's guide to vegetarian diets: Issues and applications. Gaithersburg, Maryland: Aspen Publishers, Inc. xi + 511 p.

Index. 24 cm. [1939 ref]

• **Summary:** Contents: Preface. Acknowledgments. Part I: An overview of vegetarian diet. 1. Demographics and definitions: History of vegetarianism, profile of vegetarians, types of vegetarian diets. 2. Health consequences of vegetarian diets: Differences in dietary components of vegetarian and nonvegetarian diets, cardiovascular disease, hypertension, cancer, diabetes, obesity, kidney disease, renal stones, gallstones, diverticular disease, other conditions, the dairy connection, phytochemicals, conclusion.

Part II: Vegetarian nutrition. 3. Protein: A historical perspective on protein, protein requirements, vegetarian diets and protein digestibility, assessing protein quality, plant proteins and nitrogen balance, protein complementarity, conclusion. 4. Calcium: Osteoporosis, calcium and osteoporosis, calcium absorption and the RDA, calcium excretion, bone health of vegetarians, meeting the calcium RDA on plant-based diets, plant sources of calcium, other factors that affect bone health/fracture rate, conclusion. 5. Minerals: Iron, zinc, selenium, copper, magnesium, phosphorus, manganese, iodine, sodium, chloride, potassium, fluoride, chromium, molybdenum. 6. Vitamins: Vitamin B₁₂ (cobalamin), riboflavin, vitamin D, vitamin B₆, vitamin B₁ (thiamin), niacin, folate, biotin, pantothenic acid, vitamin C (ascorbic acid), vitamin A, vitamin E, vitamin K. 7. Food guides for vegetarians: A history of food guides, developing food guides for vegetarians, vegetarian food guides, appendix 7-A—food guides for vegetarians (food guide for lacto-ovo vegetarians and vegans, the 1-2-3-4-5 vegetarian food guide, American Dietetic Association's vegetarian food guide, the vegetarian food pyramid, the vegetarian food pyramid, macrobiotic food guide).

Part III: Vegetarian diets throughout the life cycle. 8. Pregnancy and lactation: Weight gain and calorie needs in pregnancy, weight gain in pregnant vegetarians, meeting nutrient needs of pregnancy on a vegetarian diet, meal-planning guidelines, adolescent pregnancy, potential complications of pregnancy, common conditions of pregnancy, vegetarians and lactation, appendix 8-A—food guides for pregnant and breast feeding vegetarians (food guide I, food guide II). 9. Vegetarian diets in infancy: Growth in vegetarian infants, vegetarian diets during the first six months of infancy, solid foods for vegetarian infants, comparison of sample menu plans for 9-month old vegan and omnivore infants, potential concerns in infant feeding, macrobiotic diets in infancy, fatty acids in the diet of vegetarian infants, conclusion. 10. Preschool and school-age children: Growth of vegetarian children, diets of vegetarian children, protein, fat, calcium, vitamin D, vitamin B₁₂, iron, zinc, guidelines for meal planning for vegetarian children, milk in the diets of vegetarian children, counseling parents of vegetarian children, vegetarian diets for school-age children, school lunch, bag lunch, appendix 10-A—meal-planning guidelines for children (other food guides). 11. Vegetarian

diets for adolescents: Growth of vegetarian adolescents, nutrient needs of vegetarian adolescents, meal-planning guidelines for vegetarian adolescents, eating disorders. 12. Vegetarian diets for older people: Dietary status of older vegetarians, nutrient needs of older vegetarians, meal planning for older people.

Part IV: Practical applications for counseling vegetarians. 13. Counseling vegetarian clients: Dietary assessment, counseling clients to plan menus based on vegetarian food guides, vegetarian diets as dietary therapy, reducing fat in vegetarian diets, reducing food costs on vegetarian diets. 14. Diabetes: Diet therapy for diabetes, vegetarians and diabetes, the diabetic exchange lists, appendix 14-A—exchange lists for meal planning. 15. Vegetarian diets for athletes: Vegetarian diets and athletic performance, nutrition needs of athletes, risks of amenorrhea in female vegetarians and female vegetarian athletes. 16. Vegetarian food preparation: Preparing grains, preparing beans, using tofu, using textured vegetable protein, using egg substitutes, cooking with sweeteners.

Glossary of vegetarian foods. Resources on vegetarian diet: Vegetarian resources for dietitians, resources for vegetarian clients, on-line services, mail-order vegetarian foods.

Appendixes. A. Fiber, cholesterol, and macronutrient intakes of adult vegetarians and nonvegetarians. B. Lipid levels in adult vegetarians and nonvegetarians. C. Blood pressure of adult vegetarians and nonvegetarians. D. Anthropometric data of female adult vegetarians and nonvegetarians. E. Anthropometric data of male adult vegetarians and nonvegetarians. F. Intake ratios of N-6 to N-3 fatty acids on vegetarian and non-vegetarian diets. G. Protein, calcium, phosphorus, sodium and potassium intakes of adult vegetarians and nonvegetarians. H. Iron intake and status of vegetarians and nonvegetarians. I. Mineral intake of adult vegetarians and nonvegetarians. J. Water soluble vitamin intake of adult vegetarians and nonvegetarians. K. Fat soluble vitamin intake of adult vegetarians and nonvegetarians. L. Fiber, cholesterol, and macronutrient intakes of vegetarian and nonvegetarian school-age children and teenagers. M. Water soluble vitamin intakes of vegetarian and nonvegetarian school-aged children and teenagers. N. Fat soluble vitamin intake of vegetarian and nonvegetarian school-aged children and teenagers. O. Mineral intake of vegetarian and nonvegetarian school-aged children and teenagers. P. Fiber, cholesterol, and macronutrient intakes of elderly vegetarians and nonvegetarians. Q. Water soluble vitamin intake of elderly vegetarians and nonvegetarians. R. Mineral intake of elderly vegetarians and nonvegetarians.

The information on vitamin K is excellent and extensive (despite one small error): Table 6-12 (p. 197) gives the vitamin K content of selected foods. The content of soybean oil is 77 micrograms per tablespoon (not milligrams as

stated). Other rich sources are (per ½ cup cooked): Lentils (261 mcg), kale (179 mcg), spinach (141), broccoli (119). The source of these statistics is: USDA Provisional table on vitamin K content of foods. 1994. Hyattsville, Maryland: USDA.

Index listings for individual soyfoods: Tofu: p. 38-82, 392. Tempeh: p. 391. Soymilk: p. 214-15, 284-85, 391. Miso: p. 389. Soy cheese, soy flour, soy yogurt, soybeans, soynuts, Take Care (fortified soy protein beverage sold in powdered form), tamari: p. 391 (Glossary of vegetarian foods). Address: 1. PhD; 2. MPH, RD. Both: Nutrition Matters, Inc., 1543 Lincoln St., Port Townsend, Washington 98368. Phone: 360-379-9544.

7945. Reed, M.H. 1996. In Pleasantville, serenity and sushi. *New York Times*. June 16. p. WC15.

• **Summary:** This is a review of the Japanese restaurant Hanada Sushi in Pleasantville, New York. Recommended dishes include: Seaweed salad, agedofu, and seafood teriyaki.

“Outstanding too was agedofu bathed in a gingery sauce, the silken tofu cube fried quickly and topped with broad shavings of bonito.”

7946. Kikkoman Corporation. 1996. Annual report 1995. 339 Noda, Noda-shi, Chiba 278, Japan. 24 p. 28 cm. [Eng]

• **Summary:** The information in this English-language annual report is current as of April 1996. Contents: Financial highlights. Profile. A message from the president. Management strategy. Financial section. Corporate history. Global network. Board of directors and officers. Corporate data.

Kikkoman is the world's leading producer of soy sauce. The phrase “all-purpose seasoning” has come to be associated with Kikkoman soy sauce worldwide. However this phrase was first used in connection with Kikkoman soy sauce in 1956 by the *San Francisco Chronicle* [California] when introducing the Japanese product to the American public. It was adopted by Kikkoman the following year.

During 1995, net sales rose 1.1% over the previous fiscal year to 203.3 billion yen, down from a peak of 211.7 billion yen in 1992 (See p. 12). Net income declined 32.8% to 4.4 billion yen, down from a peak of 6.6 billion yen in 1994. In 1993 net income was 4.7 billion, in 1992 it was 4.9 billion, and in 1991 it was 6.2 billion—very volatile. Kikkoman's financial performance was hurt by a very difficult financial for Japan as a whole, including the Great Hanshin Earthquake in Kobe in January. A recent trend in the Japanese food and beverage industry has been the proliferation of low-priced private brands. In response, Kikkoman is hoping that consumers will maintain their brand loyalty and is introducing value-added products such as *Tokusen Marudaizu Shoyu* (Deluxe Shoyu Made from Whole Soybeans), *Tokusen Marudaizu Gen-en Shoyu* (Deluxe

Low-Sodium Shoyu Made from Whole Soybeans), *Steak Shoyu*, and *Hon Tsuyu* (a new concentrated soy sauce base). Kikkoman is also planning to build a second U.S. plant on the west coast of the United States, and a new plant in the Netherlands.

A bar chart (p. 6) shows that Kikkoman's net sales peaked in 1992 at 148.4 billion yen, dropping steadily to 140.2 billion yen in 1995. Sales of Kikkoman soy sauce have reflected this rise and fall. However overseas sales have grown steadily. A bar chart (p. 7) shows them rising from \$330 million in 1991 to a record \$434 million in 1995.

Page 22 gives a detailed chronology of Kikkoman from April 1925 to April 1996.

Letter (fax) from Tsutomu Kishi, Manager, Kikkoman General Affairs Dept. 1996. Sept. 2. This is the first English-language annual report that Kikkoman has ever published. Address: Noda, Japan.

7947. Mogi, Yuzaburo. 1996. Re: Moving to new headquarters in Tokyo. Letter to friends of Kikkoman, July. 1 p. Typed, without signature on letterhead.

• **Summary:** Kikkoman is moving its Tokyo headquarters at Kanka, Nishiki-cho to Nishi-Shinbashi on Saturday, August 10, 1996. They will be open for business on Monday, August 12, with a new address and telephone numbers. The new address: Kikkoman Corporation, 2-1-1, Nishi-Shinbashi, Minato-ku, Tokyo 105, Japan. Phone: 03-5521-5360. Fax: 03-5521-5359. Address: President and Chief Executive Officer, Kikkoman Corp., 1-25 Kanda Nishiki-cho, Chiyoda-ku, Tokyo 101, Japan. Phone: 03-3233-5605.

7948. Natural lifestyle magazine and mail-order market: Spring-summer '96. 1996. Asheville, North Carolina: Natural Lifestyle Supplies. 63 p. Catalog. 28 cm.

• **Summary:** A macrobiotic mail-order catalog with several nice articles, it sells many types of soyfoods and related products, including the full line of Kushi Cuisine, organic soybeans (yellow and black), azuki beans, amazake, Rice Dream, soymilk, Westbrae Malted, Nasoya Vegi-Dressings, Nayonaise, Farmhouse Tekka [miso], organic soy sauce, fresh tofu, snow-dried tofu, kuzu, and miso. Publisher: Tom Athos. Editor and graphic design: Debbie Athos. Address: 16 Lookout Drive, Asheville, North Carolina 28804-3330. Phone: 1-800-752-2775.

7949. McNabola, Bill. 1996. Brief history of Hercules work with gluten and HVP (Interview). *SoyaScan Notes*. Aug. 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bill has been with Hercules since 1977. Hercules started out as a wheat gluten manufacturer, then evolved into a manufacturer of HVP for use as a flavoring. By 1977 they had gotten out of the gluten business and were only in the HVP business. Address: Director, New Business Development, Hercules Inc., Hercules Plaza, Wilmington,

Delaware 19894. Phone: 302-594-5000.

7950. Obata, Akio; Matsuura, M.; Kitamura, K. 1996. Dehydration of sulfhydryl groups in soymilk by lipoxygenases during soybean grinding. *Bioscience, Biotechnology, and Biochemistry* 60(8):1229-32. Aug. [27 ref]
Address: Research & Development Div. of Kikkoman Corp., 399 Noda, Noda City, Chiba prefecture 278, Japan.

7951. *Ontario Soybean Growers' Marketing Board Newsletter*. 1996. Profile: Harcan Kingsoya Co. Ltd. Aug. p. 7.

• **Summary:** Harcan Kingsoya began operations Canada in 1991, in Scarborough. The company was formed by Bernard Leung, Michael Cheung, and a Chinese soyfoods manufacturer in the People's Republic of China. The company's first and main product is soya sauce. They also produce tofu, soymilk, and "dried soybean curd." In the future they also plan to produce "veggie-food" products such as burgers, sausage, and ham. Harcan products are marketed under the Veg-A-King and VAK brand names. The company's market was originally Europe, but now they are shipping to local supermarket chains and wholesalers in Ontario. Address: Box 1199, Chatham, ONT, Canada N7M 5L8.

7952. Gaiser, Klaus. 1996. Re: Update on work with seitan and tofu in Germany. Letter (fax) to William Shurtleff at Soyfoods Center, Sept. 21. 3 p. Typed, with signature on letterhead. [Ger]

• **Summary:** Klaus founded Topas GmbH in April 1993. Originally the name stood for TO-fu + PA-sta, but after late 1996, as Klaus developed more and more seitan products, it came to mean TO-fu + PA-sta + S-eitan. Klaus sold his company Yamato Tofuhaus [in April 1989] to a firm named Huegli. With the money from the sale he purchased a 300-year old oak-framed farmhouse (with a 2,000 liter fountain in the old vault cellar) for himself, his wife, and 5 children. For the next three years he stayed on to manage Yamato Tofuhaus, but by the end of 1992 he found the work unsatisfying so he left and decided to start another health food business of his own. In the meantime, Huegli bought Heiler, Germany's biggest reform food wholesale company. Heiler was also dealing with tofu, so together Huegli and Heiler sold quite a lot of tofu and tofu products—about 2 metric tons per week of tofu convenience foods by 1992 and maybe another ton of tofu and tofu-varieties such as smoked tofu. Nowadays their annual sales are not that high; Klaus has no exact statistics, but he would estimate they are about two-thirds of 1992 levels.

In early 1995 Klaus tried to find a place for his company in the tofu market again, but he soon realized his place had been taken. "The German health food market was and is so

flooded with tofu products that you just have to come with a real big bang to awaken any interest of the retail shop owners in a new tofu product. They just don't see any reason for selling the 23rd variety of tofu-burger and the 17th variety of tofu-spread."

Klaus then remembered an old recipe that used wheat gluten. He saves each and every product development experiment in his computer and has about 800 by now. The gluten was colored with red fermented rice (*beni-koji*, made with *Monascus purpureus*) and thus was very meat-like. In fact, when spiced, it so resembled a sausage that he first thought it was too daring to offer such a product to vegetarians. This product turned out to be the basis for his new business. He called it "Wheaty" and started selling it as a cold cut in late 1995. Since that time, monthly sales have gone up and up. "A mere joy." He could sell much more if he had enough money for costly advertisements, etc. Now his company is selling seven products, based mostly on seitan, with some tofu. Other companies are now starting to try to imitate his most successful product, Wheaty. Klaus believes that seitan has a very bright future in Germany, yet in a new form. The traditional lumps of gluten cooked in soy sauce have not been able to electrify large portions of the population. So Klaus has "re-invented seitan" to resemble familiar German meat products. "And this is the most effective way to convince a greater number of 'normal' people of the value of a vegetarian diet."

One serious problem is that red-fermented rice made with *Monascus purpureus* is not allowed as a food ingredient in Germany; there was a recent ruling by a German court of law. Moreover, as a food coloring, it is classified as a "food additive" so it needs an "E-number" from EC bureaucracy in Brussels, Belgium,—which it has not yet gotten. This is a pity, since it is the only natural heat-resistant meat color, as well as an excellent flavor enhancer, source of vitamin B, and cholesterol reducer. If it were legal, it could be made by Karl Selg-Mann, who is Germany's only manufacturer of soy sauce and miso.

Talk with Klaus by phone. 1996. Sept. 21. He presently does not own a factory; he finds other food companies to make his products. Klaus speaks almost perfect English. He hitch-hiked in England and Scotland in 1975, then lived for a year in China in 1976, arriving 3 days after Mao Tse-dong died [Note: Mao died in Sept. 1976]. The BNN (*Bundesverband Naturkost und Naturwaren*), a German organization promoting organic foods, has established regulations concerning wheat gluten; originally they said it could only be made from whole wheat. But they found that was too expensive so now they allow the use of 10% by weight of vital wheat gluten. Address: Founder and owner, Topas GmbH, Bollbergstr. 41, 72116 Öschingen [near Tuebingen], Germany. Phone: 07473/25515. Fax: 07473/8320.

7953. Sheridan, Margaret. 1996. Is tofu ready for the big leagues? *Los Angeles Times*. Sept. 26. p. H8, H10, H11.

• **Summary:** The article begins: "Tofu, the spongy off-white soybean cake that spells B-O-R-I-N-G for so many people, is about to get a marketing makeover. Slick packaging, toll-free consumer hotlines, new products, and a blitz of cookbooks created by chefs rather than earnest vegetarian activists are some of the strategies tofu companies plan to use to bring tofu into the mainstream." A number of second generation tofu products found in supermarkets, and forthcoming cookbooks are listed.

"But some advertising and marketing professionals say that's not enough." The author talks with many such people who dislike tofu for various reasons: "Tofu is a joke... Tofu is a sissy. Bland, white, boring. It needs to take a stand. Become something. And that name! Its terrible." "Tofu goes against the American palate... Very little in American food, except baby food or gelatin, has that texture. Even buying tofu is alien. What else do you buy floating in water? And Americans love convenience. Bean curd is anything but. It's not an open-and-eat product." "I buy tofu but it just sits there, floating in my refrigerator. It makes me feel stupid and guilty. What do you do with it? I end up tossing it out." Hinoichi is America's largest tofu manufacturer. In March 1997 the company plans to move from its present 50,000 square foot plant in Los Angeles to a facility three times that size in Garden Grove. Harry Tanikawa, Hinoichi sales manager, notes that tofu and soy have been helped by good research and press from the medical community. He adds: "When you see fast-food places such as Panda Express in the shopping malls adding more tofu items to the menu, when you can buy a tofu hot dog at Dodger Stadium, you know tofu has arrived." Note: Dodger Stadium is a major league baseball park in Los Angeles.

Worthington Foods has experienced a sales rush in meat alternatives; the category went from nothing four years ago to \$150 million a year. The company's best-selling items, sold under the Morningstar Farms brand, are breakfast patties, sausage links, garden burgers, and spicy black bean burgers—according to Don Burke, executive vice president of sales and marketing. The people who buy Worthington products are "the masses, people who want to cut down a little on meat and saturated fat. Most are aging baby boomers who want taste, convenience, and a health benefit."

Tofu "recipes for the mainstream" include: Red flannel hash. Mushroom scrambler. Tofu-stuffed French toast. Tofu slaw. Tofu citrus shake. Tofu cheesecake (p. H11).

The article ends with two sidebars: 16 "Tofu do's and don'ts." Soy food: Its many looks (p. H11)—Defines different soyfoods: Tempeh, miso, textured vegetable protein (TVP), soy milk, soy flour, soy cheese, soy sauce, tamari. Address: Times staff/food writer.

7954. *ASA Today* (St. Louis, Missouri). 1996. ASA/Japan

hosts 40th anniversary celebration. 2(10):1-2. Sept.

• **Summary:** An estimated 175 "Soycomplex Leaders" from throughout Japan attended the ASA [American Soybean Association] /Japan 40th Anniversary celebration in Tokyo, according to ASA/Japan Country Director Kent Nelson. In 1946 ASA started activities in Japan as a member of the Japanese American Soybean Institute (JASI), which included the Japan Oilseed Processors Association (JOPA), the Japan Oil and Fat Importers & Exporters Assoc. (JOFIEA), and the Japanese tofu, soy sauce, and miso associations.

A photo shows ASA Executive Officer George M. Strayer and Mrs. Strayer in October 1955 leaving Waterloo, Iowa, enroute to Japan on a trade mission.

One sidebar (p. 2) titled "Meeting Japan's needs now and in the future," states: Japan imports 97% of its soybeans. Nearly 25% of Japan's imported soybeans are used for food. Japan is projected to import its 5 billionth bushel of soybeans from the USA in the second half of the year 2000. "Japan remains the top single country market in the world (soymeal included) and is expected to remain the largest export market for US producers into the year 2000."

A second sidebar (p. 1) titled "ASA/Japan celebrates 40th anniversary," notes that in 1956, Japan imported 536,000 metric tons of US soybeans. In 1995 Japan imported eight times that amount, over 4 million metric tons. This fall a unified trade team composed of JOPA processors and JOFIEA importers will meet with ASA and United Soybean Board leaders in St. Louis, Missouri, to discuss short, medium, and long-term goals.

7955. Demetrakakes, Pan. 1996. Quality for the ages: A centuries-old brewing process is helping Kikkoman stake out the quality niche of the soy sauce market. Plant report. *Food Processing* (Chicago) 57(9):61-62, 65-66. Sept.

• **Summary:** At Walworth, Wisconsin, Kikkoman now makes 18 million gallons/year of soy and other sauces—using 300 fermentation tanks. Most of the 134 employees work on the plant's six packaging lines. The company makes 18 different products, and all but one (kotterin) use a soy sauce base. Kikkoman is well positioned to take advantage of two of the biggest trends in American eating habits: (1) Growing interest in ethnic—especially Asian—cuisine, and (2) The rising popularity of eating out; more than half of America's food dollars are now spent on food prepared outside the home. Both the foodservice and the industrial markets have become major users of Kikkoman products. "Kikkoman's main competition is lower-quality, acid-hydrolyzed soy sauce [which is not fermented]. This competition is perhaps most acute in the retail market, whose buyers tend to be less sophisticated than food professionals." Kikkoman stresses the superior color and flavor of its "brewed soy sauce." The shoyu-making process is described. Photos show: (1) Bottles of Kikkoman soy sauce on the bottling line—Kikkoman's most labor-intensive operation. (2) Some of the company's

more than 300 fermentation tanks; a man on a ladder is climbing up one. (3) Three workers checking the quality of a batch of soy sauce. A sidebar titled “An old tradition for an aged sauce” gives a brief history of soy sauce. Kikkoman, established in 1630, “boasts of being one of the oldest continuously operating food processing companies in the world.”

“Soy sauce originated more than 2,500 years ago in China.” It came to Japan in about the 6th century with Buddhism. In Japan “it was discovered that adding wheat to the soybeans would yield a richer, more mellow flavor.” By the 1600s, “soy sauce as we know it today had largely been developed.” Address: Senior Editor.

7956. Hastings, Carl. 1996. Soybean products in human foods. Paper presented at Regional Workshop on Soybean Processing and Utilization for Central America and the Caribbean. 4 p. Held Sept. 15-18 in Jamaica.

• **Summary:** Contents: Introduction. Soy sprouts. Whole soybeans: Cooked green beans, cooked soybeans, roasted or deep fat cooked soybeans (soy nuts—salted, flavored, etc., candy coated, salad topping, bakery ingredient or topping, soynut butter, soy coffee) fermented soybeans (tempeh—*Rhizopus*, natto—*Bacillus*, hamanatto—*Aspergillus*). Cereal blends: CSM (Corn-Soy-Milk), WSB (Wheat-Soy-Blend), other (bulgur, oat, sorghum grits).

Refined soy oil: Solvent extracted, physically extracted, uses, lecithin. Soy protein: Soy flour (full fat, defatted), concentrates, isolates, textured, uses. Hulls. Soy fiber. Soy milk: Liquid, powder, uses (plain, flavored, fortified, blends, instant formula, nutritional beverages, tofu, soy cheese, frozen desserts, yogurt, soymilk film (yuba)). Soy sauce. Soy paste (miso). Soy pulp (okara). Address: Reliv, Inc., Chesterfield, Missouri.

7957. Jacobi, Dana. 1996. The natural kitchen: Soy! 75 delicious ways to enjoy nature's miracle food. Rocklin, California: Prima Publishing. xii + 244 p. Oct. Index. 22 cm. Series: The natural kitchen. [16 ref]

• **Summary:** Contents: Preface. Acknowledgments. Introduction: Soy and health. All about soyfoods: Traditional soyfoods (tofu, miso, tempeh, soy sauce, soymilk), other Asian soyfoods (okara, yuba, kinako, natto), second-generation soyfoods (soy dairy products, soy deli foods, textured vegetable protein {TVP}, textured soy protein {TSP}, soy isolate (isolated soy protein)), more soy choices (fresh soybeans, dried black soybeans, soy flour, soy grits, soy flakes, soy nuts), cooking with soyfoods (tofu {pressing, freezing, marinating, sautéing and pan-crisping, frying, braising, pureeing, parboiling, storing and handling tofu}, miso, tempeh, soymilk, other soy dairy foods), cook's notes (herbs, spices and flavorings, nuts, oils, produce, stock, sweeteners).

Soups, appetizers, and first courses. Main dishes. Pasta

and light dishes. Side dishes and sauces. Salads, burgers, and kebabs. Desserts. Breakfast and beverages. Mail order sources.

The Preface states: “If you are new to soy, you will find descriptions of soyfoods, from tofu to soymilk... If you already cook with soyfoods, the approximately 75 recipes in this book and their variations will expand your repertoire. These recipes will take you across lines that people who cook with soy rarely approach. The dishes bring familiar and satisfying textures along with flavors that are full and deep. Whether ethnic or classic, they are dishes with verve and elegance.” The author first tasted tofu, with her parents, in 1953, “at the precocious age of eight,” at The Great Shanghai on 125th St. in Manhattan, New York City. Address: Food writer, New York, NY.

7958. Tibbott, Seth. 1996. History of Tofurky (Interview). *SoyaScan Notes*. Nov. 1. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** King Harvest Natural Foods was a vegetarian sandwich company, deli, and juice shop in Portland, Oregon. They made a fresh Tofurkey Sandwich—which was just tofu, slightly browned, maybe marinated in some turkey-like seasoning, with some trimmings. In 1980, when Seth started delivering his tempeh to stores in Portland, he first saw this sandwich, which he enjoyed eating in Portland-area stores. That was when he first heard the word “Tofurkey.” In about 1982-83 King Harvest discontinued their Tofurkey Sandwich; they never made it again, though they are still in business making other sandwiches and food products.

The ancestor of Tofurky was created in 1991 by Hans and Rhonda Wrobel of The Higher Taste—one of Seth's customers—a caterer and food manufacturer in Portland, Oregon, with a little deli; they make tempeh & lettuce sandwiches and tofu sandwiches. They started making a vegetarian stuffed Tofu Roast with gravy for their customers at Thanksgiving. They sold about 30 units the first year, 1991, largely to a local audience—including Seth. It was tofu in a pie pan with stuffing in the middle, then another layer of tofu on top. It was baked and tasted good—but it sold for \$30. Seth saw this as a meat alternative that had potential at Thanksgiving. The vegetarian recipes for making mock turkey are too long and complicated for the typical cook.

Seth wanted to use the name “Tofurky” (which he coined) for his new product idea. But before he did, he called the folks at King Harvest and asked them if they had a trademark on or any other rights to the name. They said “No.” He then asked them for permission to use that name. They said “Fine—”No problem”—in part because they hadn't made the product for more than ten years.

In October 1995 Turtle Island, together with The Higher Taste (in an informal and unwritten joint venture), introduced the first “Tofurky.” Higher Taste made the product's

centerpiece, a dome-shaped layer of marinated tofu with a whole wheat stuffing inside. Seth had been developing a tempeh burger that tasted more like turkey than burgers, so he got a drumstick form (Holomatic) and started making tempeh drumsticks. He added four of these to the Higher Taste Tofu Roast, and included a recipe for Nutritional Yeast Gravy. Turtle Island, which had good distribution for its tempeh, was responsible for marketing the product. Seth test marketed it as a frozen product in 24 natural food stores and co-ops on the West Coast; it retailed for \$24.99 to \$27.99 and weighed 3 lb 12 oz. There as also a 2 lb 4 oz size. Seth sent out some press releases and product attracted extensive local media coverage. No products were sold by mail order. Most natural food stores (such as Nature's), to which Seth introduced the product enthusiastically, predicted that it would never sell. But Seth had a strong belief in it. Somebody at the Puget Consumers Co-op (PCC) in Seattle, Washington, took the product, even though they doubted it would do well. Then "it caught fire" at the PCC's seven upscale stores in Seattle. They had to install a special telephone line—a Tofurky Hotline—for all the Tofurky special orders they were getting. Turtle Island did demos in PCC stores which further stoked the demand. After Thanksgiving, Turtle Island was flooded with calls and letters ("fan mail") from happy customers who said things like "Wow! I've been waiting 20 years for this." Usually food manufacturers only hear from customers when they are upset. "The customers believed in the product more than the savvy retailers—who had completely missed this niche." Feedback cards were included in every product, and this feedback indicated that the gravy (originally created by The Farm in Summertown, Tennessee, but greatly improved on by Seth) was what made the product delicious, but consumers wanted the gravy itself—not just the recipe—included with the product. In 1995 about 800 Tofurkys were sold, mostly at Thanksgiving but some at Christmas (with gravy).

Realizing that the product had real potential, Seth contacted a lawyer and registered "Tofurky" as a trademark. This year (1996) the tofu is made by Island Spring in Vashon, Washington. When extra firm tofu was seasoned then baked, it froze quite well. The tofu is sent out in 8-oz blocks (each 3½ by 5 by ¾ inches)—not in the shape of a turkey or drumsticks. The drumettes are a little spicier, and come with cranberries, wild rice, carrots. This year the product is frozen but they are also test marketing it refrigerated. Several West Coast distributors carry the product. Now the whole package weighs 5 lb 15 oz; the wholesale price is \$24.95 to \$25.60, so it retails for about \$33-\$36. Last week, Seth sent out 50 press releases to print, radio, and TV sources. This year (1996) more than 800 have been sold already, and Seth expects total sales to reach 2,000 to 3,000. The 1996 ingredients in the Golden Mushroom gravy are: Water, nutritional yeast, expeller pressed canola oil, unbleached flour, chopped fresh mushrooms, diced onion, shoyu, herbs, spices, non-dairy

lactic acid culture. Note: This gravy is delicious! Note: The following number of Tofurkys were sold: 800 in 1995, 4,000 in 1996, 15,000 in 1997, 45,000 in 1998, and an estimated 55,000 to 59,000 in 1999.

Who coined the word Tofurky? Seth didn't, though he was the first to spell it in that way, without an "e"—for two reasons: First, it was the right number of letter for a phone number. And second, he spelled it wrong the first time he wrote it and then kept repeating his mistake. Most people who hear the word for the first time spell it "Tofurkey" so Seth has had to purchase a second Internet domain name spelled "Tofurkey.com." Seth was also the first to register the name (by any spelling) as a trademark.

But at least four other people and groups probably coined the word "Tofurky" before Seth coined "Tofurky." (1) Jeremiah Ridenour believes that he coined it many years ago. (2) Peter Golbitz sent Seth a photo showing him with long hair and some Tofurky he made. (3) King Harvest Natural Foods in Portland, Oregon (see above). (4) A group of Rastafarians, black from inner-city Tacoma, Washington, had developed a very delicious barbecued tempeh, so Seth was exploring a co-packer arrangement. After the first Tofurky season, when they heard on the news that Seth made Tofurky, they sent him a flaming e-mail saying it was bad karma for him to rip them off because they had invented the word "Tofurkey." They refused to shake Seth's hand. They now took him to be the white devil, so he left under that cloud. Jeremiah and Peter were friendly about it, but Jeremiah likes to joke with Seth about how Seth owes him several million dollars in royalties for use of his name "Tofurky." Seth now sometimes jokingly calls his business "Tofurky Island." Address: Turtle Island Foods, Inc., P.O. Box 176, Hood River, Oregon 97031. Phone: 541-386-7766 OF.

7959. Kikkoman International Inc. 1996. The art of soy sauce: Foodservice recipes, tips, and menu ideas. San Francisco, California. 36 p. Illust. No index. 15 x 22 cm. Spiral bound.

• **Summary:** Contents: Introduction—The art of soy sauce. What is soy sauce? Soy sauce and the secrets of flavor enhancement. Kikkoman and the art of soy sauce. Soy sauce infusions (with mushroom, garlic, ginger, shallot, chili). Meet the chefs (with a small portrait photo of each): Tim Cushman, Barbara Tropp, Lawrence Chu, Takayoshi Kawai. The recipes.

Each recipe yields 24 servings and is accompanied by a descriptive quotation from the chef who developed it. Many recipes are accompanied by a full-page color photo. The Introduction begins: "Right now, all across America, a new culinary style is evolving. So new, in fact, it has yet to be named. Some call it 'Asian-inspired.' Some call it Pan-Pacific.' Others simply call it brilliantly eclectic. It's a cuisine without boundaries that draws on the flavors of

Asia, incorporating them into Western cooking to create fresh flavors and new ideas the world has never seen.” The majority of the recipes in this book contain red meat, fish, or poultry. Address: San Francisco, California. Phone: 1-800-944-0600.

7960. Duncan, Lindsey. 1996. Overcoming *Candida albicans*. *Conscious Choice (Chicago)*. Nov/Dec. p. 38-39.
 • **Summary:** The author (a man) states incorrectly that tofu is a fermented food. “*Candidiasis* is a yeast/fungal infection caused by the toxins given off in abundance by the common yeast *Candida albicans*... It thrives on sugar, yeast, breads, alcohol and food molds found in cheese, grapes, mushrooms, and fermented foods (vinegar, tamari sauce, tofu, etc.)... *Candida*’s main home is in the intestines.” It is often caused by the use of systemic antibiotics.

Note: *Candidiasis* can often be cured by eliminating all sweets and fruits from the diet, taking acidophilus supplements, and using non-dairy protein sources—of which tofu is one of the best. A respected book on the subject is *The Yeast Connection* by Crook. Address: CN, Founder, Home Nutrition Clinic, 1431 7th St., Santa Monica, California 90401. Phone: 310-576-3606.

7961. Fukutake, M.; Takahashi, M.; Ishida, K.; Kawamura, H.; Sugimura, T.; Wakabayashi, K. 1996. Quantification of genistein and genistin in soybeans and soybean products. *Food and Chemical Toxicology* 34(5):457-461.

• **Summary:** Discusses: Soybeans, soy nuts, soy powder, soymilk, tofu, miso, natto, soy sauce, genistein. Address: 1-3,5-6. Biochemistry Div., National Cancer Center Research Inst., 1-1 Tsukiji, 5-chome, Chuo-ku, Tokyo 104; 1,4. Tsumura & Co., 3586 Yoshiwara, Ami-cho, Inashiki-gun, Ibaraki 300-11. All: Japan.

7962. **Product Name:** Soy Sauce.

Manufacturer’s Name: King Pappap Products Ltd.

Manufacturer’s Address: Hague, P.O. Box 43, Falmouth Tielawany, Jamaica. Phone: 809-954-3681.

Date of Introduction: 1996.

New Product–Documentation: ‘95-’96 Soya Bluebook Plus. p. 110. The managing director is Dudley Eaton.

7963. Chen, J.D.; Xu, Hong. 1996. Historical development of Chinese dietary patterns and nutrition from the ancient to the modern society. *World Review of Nutrition and Dietetics* 79:133-53. [23 ref]

• **Summary:** During the Han and Tang dynasties (206 BC to 907 AD) people in China started to pay attention to vegetarian food and to use vegetable oil. “Bean products, such as bean curd, were already used in recipes” (p. 136).

A famous saying has been handed down from ancient times: “Breakfast should be eaten well, lunch must be in one’s fill, and food for dinner should be little.”

Generally people eat porridge or millet gruel as the main food for breakfast; with it they eat soybean milk, salted vegetables, eggs (boiled or fried), and deep-fried twisted dough sticks. For lunch and dinner, salt or soy sauce were often added during cooking.

The soybean is mentioned on page 148. Address: 1. Research Div. of Sports Nutrition and Biochemistry, Inst. of Sports Medicine, Beijing Medical Univ.; 2. Dep. of Sports Medicine, Beijing Univ. of Physical Education. Both: Beijing, China.

7964. Danival. 1996. Danival: The environmental approach. Mezin, France. 7 p. 30 cm. Lay-flat comb bound. [Eng]

• **Summary:** Contents: Introduction. Map of France (showing Danival in the southwest near the Garonne River valley, in the historical region of Gascony). Danival, Daniel Gevaert and the Pruneaux d’Agen (plums). Danival Atlantic sea salt (incl. nutritional analysis).

“The jury of the ‘Enterprise and Environment’ competition organized by the French Ministry of the Environment has awarded the Special *Ecoproduit* 1992 prize to Danival for their overall approach to environmental questions.

“The range of organic foods which Danival presented to the jury are manufactured in strict conformity with *Nature et Progres* specifications through the whole production process.

“All packing materials can be re-used and recycled. Preserves are bottled in glass jars with tinplate caps.

“A small hydro-electric generator is powered by the old water mill. In this way, part of the factory’s power supply is produced from a renewable source of energy.

“Danival’s originality also lies in their know-how in the manufacture of miso and shoyu. These two products are obtained from fermented soya beans and are very rich in easily digested vegetable protein.” For the past ten years Daniel Gevaert, the son of Pierre Gevaert, has been farming 60 hectares in the fertile Garonne Valley—also known as the Valley of the Four Seasons. His agricultural methods are exclusively organic. “The farm is Danival’s main supplier of raw materials—and this is where Danival has the edge!”

“The company is housed in the Andiran water-mill buildings and employs nine people full time. Today Danival’s range of organic products includes 9 varieties of jam, pureed prunes, semi-rehydrated Agen prunes, peach and apple compotes, concentrated tomato puree, ratatouille, tomato ketchup, tomato sauce, bolognaise sauce, spaghetti sauce, sweet-corn, chick peas, azuki beans, lentils, haricot beans, Japanese pumpkin puree, seitan, gluten powder, miso, shoyu, and Atlantic sea-salt from the Ile de Ré.”

“All packaging materials can be re-used and recycled. Preserves are bottled in glass jars with tinplate caps.

“A small hydro-electric generator is powered by the old water mill. In this way, part of the factory’s power supply is produced from a renewable source of energy.

“Danival’s originality also lies in their technical know-how in the manufacture of miso and shoyu. These two products are obtained from fermented soya beans and are very rich in easily digested vegetable protein.” Address: Moulin d’Andiran, 47170 Mézin, France. Phone: +33 5 5397 0023. Fax 5 5397 0010.

7965. Gelles, Carol. 1996. 1,000 vegetarian recipes. New York, NY: MacMillan. [vii] + 598 p. Index. 24 cm.

• **Summary:** In the Introduction, a section titled “Soy products” (p. 17-18) includes brief definitions of soybeans, bean curd (tofu), miso, seitan, soy flour, soy milk, soy nuts, soy sauce and tamari, soy sprouts, tempeh, and textured vegetable protein (TVP).

In the chapter on “Entrees” is a section (p. 217-27) is titled: “Tofu, tempeh, seitan, and textured vegetable protein (TVP).”

The index contains 20 entries for tofu, 5 each for tempeh and soybeans, 4 for textured vegetable protein (TVP), 3 for seitan, and 1 for miso.

A table (p. 14) gives the time to cook various types of beans (that have been soaked overnight, the soak water discarded, and fresh water added) in a pot or saucepan (not in a pressure cooker); the adzuki bean takes the shortest time (45 to 90 minutes) while the soybean takes by far the longest time (2½ to 3½ hours [which is not nearly long enough]). Herein lies one key reason that Asians strongly prefer soyfoods to whole soybeans. Address: Author, food stylist and recipe tester, New York City.

7966. Hosking, Richard. 1996. A dictionary of Japanese food: Ingredients & culture. Boston, Rutland, Vermont, Tokyo: Tuttle Publishing. 239 p. Illust. by Richard C. Parker. Index. 21 cm. [16 ref]

• **Summary:** This appears to be the same as the original 1972 edition. An excellent, accurate book. The basic entry for each word is given under its Japanese name (thus *daizu* rather than soybeans). Each entry includes the Japanese term in kana (usually hiragana) and (usually) kanji (Chinese characters). One hundred small illustrations are very helpful.

Here is an example: “dengaku (hiragana, kanji) a preparation in which food such as eggplant, taro, konnyaku, or tofu are dressed with a sweetened miso topping and grilled on skewers. Fish *dengaku* is called *gyoden*.”

Seventeen appendices (p. 197-235) give detailed discussions of the following important Japanese foods and related items: Chopsticks. Katsuobushi. The kitchen and its utensils. Kombu. The meal. Miso. Saké. Salt. Sansai. Soy sauce. Sushi. Tea. The tea ceremony. Umami and flavor (incl. MSG). Vegetarianism (incl. Buddhism, shôjin ryôri, and fucha ryôri). Wasabi. Wasanbon sugar.

The author has lived in Japan since 1973. He holds an M.A. degree from Cambridge Univ. Address: Prof. of Sociology and English, Hiroshima Shudo Univ., Japan.

7967. Kikkoman K.K. 1996. Dai 78 ki jigyo hôkoku-sho. Heisei 7 nen 1 gatsu 1 nichi–Heisei 7 nen 12 gatsu 31 nichi [78th annual financial report. From 1 Jan. 1995 to 31 Dec. 1995]. Tokyo, Japan. 13 p. [Jap]

• **Summary:** Color photos show most of Kikkoman’s main products. Address: Tokyo, Japan.

7968. Kleiner, Art. 1996. The age of heretics: Heroes, outlaws, and the forerunners of corporate change. New York, NY: Currency Doubleday. xii + 414 p. See p. 273-89. Illust. Index. 24 cm.

• **Summary:** From the rear cover: “Art Kleiner has uncovered a kind of secret history that links the medieval monastic orders, the counterculture of the sixties, and the key agents of corporate change in the modern world. I think its a landmark for people both inside and outside the most influential institution of the modern age—the corporation”—by Howard Rheingold, author of *Virtual Reality, Virtual Communities and Tools for Thought*.

Chapter 8, titled “Millenarians,” begins with a history of Erewhon Trading Company (p. 273-89), which makes it appear that Paul Hawken was the only important person in the company. Nevertheless, the history is full of interesting insights, many related to Erewhon’s role as a pioneer in the countercultural natural foods industry and (for a while) the largest distributor of natural foods and macrobiotic foods in the United States. Kleiner is a engaging and insightful writer. Erewhon was started by Michio and Aveline Kushi who, in the 1950s, had met at La Maison Ignoramus [literally, The House of Ignorance], a macrobiotic institute founded by renegade philosopher George Ohsawa outside Tokyo. Ohsawa claimed to have cured himself of tuberculosis by eating a diet of brown rice, miso soup, and cooked vegetables (from both land and sea). Ohsawa came to believe that a good (macrobiotic) diet is the foundation of both personal and societal health. The first step is to change your own diet, then to help others change theirs. Ohsawa was a Japanese writer, had lived in Paris in the 1920s, and was deeply interested in world government—as well as in Zen. Ohsawa recruited the Kushis to go abroad (Michio was the first to leave Maison Ignoramus and to do so) to promote world government. Michio and Aveline fell in love in the United States and were married. They eventually started teaching young Americans in Cambridge, Massachusetts. Before long they were prosecuted for practicing acupuncture without a medical license—but they prevailed and stayed. In the mid-1960 macrobiotic diets called for staples that were rarely found in East Coast food stores: brown rice, miso, tamari, etc. The Kushis started to sell food and books out of their home in Cambridge. Then [in April 1966] they moved the little store out of their home into a basement retail space at 303-B Newbury Street—and named the fledgling company Erewhon. “... one of their students, Paul Hawken, took over

as clerk”—or at least so says this book. Hawken was only eighteen, a lean young man from California. The rest of the story is how Hawken (apparently single-handedly) built Erewhon and the early natural foods movement.

From the publisher's description: "The author explores the nature of effective leadership in times of change and defines its importance to the corporation of the future. He describes a heretic as a visionary who creates change in large-scale companies, balancing the contrary truths they can't deny against their loyalty to their organizations. This book reveals how managers can get stuck in counterproductive ways of doing things and shows why it takes a heretical point of view to get past the deadlock and move forward." Address: Former editor of *The Whole Earth Catalog* and freelance business reporter during the 1980s, Oxford, Ohio.

7969. Mai, Pham. 1996. *The best of Vietnamese and Thai cooking: Favorite recipes from the Lemon Grass Restaurant and Cafes*. Rocklin, California: Prima Publishing. xii + 274 p. Illust. (Some color photos). Index. 24 cm.

• **Summary:** The author's family name is "Mai" and her given name is "Pham." She prefers to write and say her name, Asian style (and as in American phone books), with her family name first.

The book is dedicated with a free-verse poem to her father, Xuan Pham, and her mother Thom Vo. Born in Vietnam and raised for ten years in Bangkok, Thailand (where her father was the Vietnamese military attaché to Thailand) Mai Pham (like her sister Denise, and her two brothers) was brought up with food as the center of her family and universe. She came to the U.S. with her family in 1975. "One minute we were in the comfort of our home in Saigon, and the next we were fleeing our country with just the clothes on our backs. After graduating from the University of Maryland with a degree in Journalism in three years, she pursued a career in broadcast journalism. At age 16 she hosted a radio show for American GIs. At age 18 she managed to talk ABC News into giving her her first break as a television reporter. In 1983 she "landed a reporting job as the first Vietnamese-born television journalist in the United States." Just a few years earlier she had been living in a refugee's quagmire. After several years of reporting, she went to work in public relations and then as a speech writer for the governor of California.

When she met her husband-to-be, Trong, her life again changed dramatically. He was a scientist turned entrepreneur who had founded the successful La Bou bakery / cafe chain in Sacramento, California. Trong convinced her to open a restaurant with him. "He talked about the incredible excitement and satisfaction of taking a simple idea and turning it into a successful business. Inspired by his success and encouraged by his infectious enthusiasm, she decided to go for it. So in 1998, with practically no experience in the

food industry, a do-or-die kind of commitment, and a strong belief in their unique concept, the two young people opened the Lemon Grass Restaurant. Mai Pham had found a way to express her passion for cooking. Vowing to share with Sacramento the best of Vietnams and Tahi Foods, she worked day and night to adapt to a restaurant setting the recipes handed down from her mother and grandmother (p. x-xiii).

Today, in addition to being chef and owner of the award-winning Lemon Grass Restaurants and Lemon Grass Cafes in Sacramento, California, Mai teaches Southeast Asian cooking. She is married to Trong Nguyen, founder of the Northern California-based La Bou Bakery / Cafe chain and "the biggest cheerleader behind this and almost every major project I have encountered."

As she got deep into her research and reflected on her own experiences, she "became convinced that Vietnamese- and Thai-style cooking could be a healthful alternative to a modern Western diet. The typical Asian diet consists mainly of carbohydrates, vegetables, fish, and very little red meat. To stay full, we eat large portions of inexpensive foods such as rice and noodles and lots of greens, many of which grow in the wild. Meat is served only in garnish-size portions.

Often they enjoyed a typical meal-in-one dish. Vietnamese cooking is influenced by Chinese, Indian, French, and Thai cookery, but is more delicate in its execution. For example, a Vietnamese stir-fry is less greasy than its Chinese counterpart. Instead of salt or soy sauce, Vietnamese cooks season almost every dish with *nuoc mam*, or fish sauce [its Thai counterpart is *nam pla*] (p. 4-5). Almost all meals are planned around rice.

Basic ingredients related to soy: (1) Bean sauce: Made of fermented soy beans, water, and salt, it comes in a chunky form with whole soybeans or as a purée. The author prefers the chunky variety sold in jars by Koon Chun. (2) Hoisin sauce: Made from soybean purée, sugar and caramel sauce. Never serve it strait. Try Koon Chun. (3) Soy sauce: Each brand is different and she uses them all. Kikkoman all-purpose Japanese. Golden Mountain light Thai-style. Sweet soy sauce made from dark soy and caramel, to give a rich, dark color. Chinese-style dark soy sauce containing molasses. Flavored soy sauces such as mushroom or onion, sold in small glass bottles. "Make sure the mouth of the bottle is wiped clean after each use."

Sauce recipes include: Hoisin-peanut sauce (p. 35). Cilantro-lime soy sauce (p. 36).

Chapter 7, titled "Those four days: vegetables" (p. 155-77) begins: "Walk into the Lemongrass kitchen and if it happens to be the 1st 14th, 15th, or 30th day of the lunar month, chances are you will find many of our staff eating vegetarian. By abstaining from meat on those sacred days, they are reaffirming their belief in the teachings of Buddha and rededicating their commitment to a life free of indulgence, greed, and conflict." As a child Mai Pham looked forward to those four days because of her grandmother,

a devout Buddhist, happened to be visiting, her mother would prepare a sumptuous vegetarian meal for all to enjoy together. One favorite was vegetarian spring rolls, which were no less tasty than their meat counterpart. The family's favorite sweet and sour soup, usually served with shrimp or fresh catfish, was prepared with fresh pineapple, tofu, cabbage, bean sprouts, and chopped saw-leaf herb. Actually, Mai Pham has always preferred the vegetarian version.

When Lemon Grass Restaurant first opened there was only one vegetarian dish on the menu. Now the menu features an entire vegetarian section, with entrees, salad rolls, spring rolls, etc. "To enhance flavor and texture, sometimes a simple ingredient such as tofu is first fried then simmered before being added to the finished dish. Because of the skill required for this specialized cooking, temples—where the monks and nuns eat a strict meatless diet year-round—are known to have the best vegetarian food." In Vietnam, vegetarianism is observed for religious rather than for health or other reasons.

Recipes: Vegetarian fisherman's soup (with "¼ pound extra firm tofu, cubed (fried or plain)"). Vegetarian spring rolls (with "½ pound extra firm tofu, drained and mashed with the back of a fork"). Su Co's delight (with "¼ pound extra firm tofu, drained and cut into 1-inch cubes"). Water spinach and cabbage in garlic-bean sauce (with 1½ tablespoons bean sauce").

Flat noodles with chicken and Chinese broccoli (with 1 tablespoon fermented whole yellow soybeans, p. 180-81. Called *rad na*, this dish "gets its distinctive flavor from the fermented yellow beans. In Bangkok, you can find this dish on practically every street corner and even in hotels"). Steamed striped bass with black beans, ginger, and green onions (with "1 tablespoon drained Chinese-style fermented whole black [soy] beans, chopped," p. 219). Address: Chef and owner, Lemon Grass Restaurant and Cafe, Sacramento, California.

7970. Smith, Andrew F. 1996. *Pure ketchup: A history of America's national condiment with recipes*. Columbia, South Carolina: University of South Carolina Press. xiii + 242 p. Illust. (some color). Index. 24 cm. [200+* ref]

• **Summary:** Part I, "History" is related to the history of soy sauce and the first 3 chapters have the following contents: 1. Introducing ketchup and its polyglot parentage: Introduction, origins, catchup, catsup, or ketchup?, the British. 2. The rise and demise of homemade ketchup: Introduction, mushroom, fish and seafood, and walnut ketchups, pickles, sauces and ketchups, ketchup in 18th-century America, the rise of tomato ketchup, ketchup in 19th-century Britain and America, reason's for ketchup's initial success, ketchup commonalities, homemade ketchup's high-water mark, the fall of homemade ketchup. 3. The commercialization of ketchup: Early tomato ketchup manufacturing, the rapid expansion of commercial ketchup, manufacturing ketchup at

the turn of the century [around 1900], commercial nontomato ketchups, America's national condiment.

By the mid-1700s, three general types of ketchup had emerged in England: mushroom, fish, and walnut. "Mushroom ketchup was a particularly successful condiment." The earliest known recipe for mushroom ketchup appeared in 1728 in a book by Richard Bradley (p. 14). By the mid-1700s, many British cookbooks or cookery manuscripts included one or more non-tomato ketchup recipes. The base ingredient in "Harvey Sauce" was mushroom ketchup. "'Worcestershire Sauce' included both walnut and mushroom ketchups, and some receipts employed 'Canton soy' as an ingredient" (p. 17).

In 1804 James Mease (*Domestic Encyclopedia*, Vol. 3, p. 506) wrote: "Love Apples" make "a fine catsup." Then in 1812 Mease published the earliest known tomato ketchup recipe. It consisted of unstrained tomato pulp with spices. Since it was not sieved, it was quite thick. Vinegar was replaced by brandy. The first Anglo-American recipe for tomato sauce was published in 1804 in Great Britain by Alexander Hunter. Initially the terms "tomato sauce" and "tomato ketchup" were not highly differentiated. Ketchup tended to be thicker, contain more tomato solids, and last longer—due to its vinegar content. Address: Brooklyn, New York and Jackson, New Jersey.

7971. Steinkraus, Keith H. ed. 1996. *Handbook of indigenous fermented foods*. 2nd ed., revised and expanded. New York, Basel, and Hong Kong: Marcel Dekker, Inc. xii + 776 p. Illust. Index. 26 cm. Food Science and Technology Series, Vol. 73. Index. 26 cm. [350 + soy ref]

• **Summary:** This 2nd edition is about 108 pages longer than the original 1983 edition. Contents: Introduction to indigenous fermented foods. (1) Indonesian tempe and related fermentations: Protein-rich vegetarian meat substitutes. (2) Indigenous fermented foods involving an acid fermentation: Preserving and enhancing organoleptic and nutritional qualities of fresh foods. (3) Indigenous fermented foods involving an alkaline fermentation. (4) Indigenous fermented foods in which ethanol is a major product: Type and nutritional significance of primitive wines and beers and related alcoholic foods (incl. Chinese koji (big *qu* {bricklike in shape and made from barley or wheat and soybeans, inoculated with *Aspergillus* molds), and small *qu* ({spherical, plate-circular or rectangular in shape and made from rice or rice bran with various herbs, inoculated with *Mucor* and/or *Rhizopus* molds}), p. 449), Japanese amazake (p. 480-81).

(5) Indigenous amino acid / peptide sauces and pastes with meatlike flavors (p. 509-654): Introduction.

(A) Soy sauces: Japanese shoyu: Koikuchi, usukuchi, and tamari; Chinese chiang-yu, by Tamotsu Yokotsuka (p. 511-17). Biochemistry of *Saccharomyces* (*Zygosaccharomyces*) *rouxii*, by Steinkraus, Franta, and

Ayres (p. 517-24). Umami flavor, by Kawamura and Kare (p. 524-28). Chinese fermented products related to soy sauce (big *qu*, small *qu*, and jiang, by Chen & Ho, p. 528). Taiwanese soy sauce, by Liu (p. 528-33). Malaysian soy sauce: Kicap, by Ong, Mercian, Poesponegoro and Tanuwidja (p. 531-39). Indonesian soy sauce: Kecap, by Saono, Poesponegoro and Tanuwidja (p. 539-43). Korean soy sauce, by Chang (incl. homemade kanjang and meju, p. 543-44). Taiwanese black bean sauce: Inyu, by Jan et al. (p. 544). Philippine taosi, by Steinkraus (p. 544-45).

(B) Fermented soybean pastes: Japanese miso, by Ebine, Shurtleff and Aoyagi (p. 545-56). Indonesian tauco, by Saono et al. and Winarno (p. 556-59). Korean Doenjang and kochujang, by Chang, Shurtleff and Aoyagi (p. 559-64).

(C) Fermented fish-shrimp sauces and pastes (p. 565-606).

(D) Fish-soy sauce and fish-soy paste, by Ismail, p. 607-11).

(E) Miscellaneous Oriental fermentations. Japanese natto (itohiki natto), by Hayashi and Ota (p. 611-24). Japanese Hama-natto (hamanatto) and related products (incl. yukiwari natto, p. 624-26). Chinese red rice: Anka (Angkah), by Lin, Su and Wang, Sooksan and Gongsakdi, and Pichyangkura (p. 626-33). Chinese sufu, by Su and L.-P. Lin (p. 633-41). Preserved duck eggs / Century eggs, Chinese pidan (p. 641-42). Pidans are made by a chemical process, not by fermentation. Note: Chapter 5 contains about 240 references. Much of the text in this chapter is similar to that in the original 1983 edition, although this chapter is 7 pages longer and contains 3-4 new sections.

(6) Mushrooms: Producing single-cell (microbial) protein on lignocellulosic or other food and agricultural wastes.

(7) General papers related to indigenous fermented foods. Address: Inst. of Food Science, Cornell Univ., Geneva, New York.

7972. Tetsudo Unyukyoku. 1996. Shio sato shôyu miso ni kansuru chôsa [Survey concerning salt, sugar, shoyu, and miso]. Tokyo: Yushodo Shuppan. 23 cm. Series: Juyo Kamotsu Jokyo, no. 9. [Jap]*
Address: Japan.

7973. Verreault, Georges. 1996. Diary of prisoner of war in Japan, 1941-1945. Rimouski, Quebec, Canada: Vero. 288 p. See p. 157. Illust. Portraits. 23 cm. *

• **Summary:** "Yes we really had fish, cooked the traditional Japanese way, in sweet soya sauce. The three meals of the 6th day of the 10th month of the nineteen hundred and forty-fourth year, are over. Let's forget them!"

Note: The first French edition was published by Les éditions du Septentrion (in Quebec) in 1993. This is a translation of: *Journal d'un prisonnier de guerre au Japon, 1941-1945*. Georges Verreault lived 1920-1966; he died at

about age 46.

7974. Winter, Ruth. 1996. Super soy: The miracle bean. New York, NY: Crown Publishers Inc. 192 p. Index. 21 cm. [106 ref]

• **Summary:** On the cover is written: "This wonder bean can help fight cholesterol, high blood pressure, blood sugar, cancer, ease menstrual and menopause symptoms, and keep a colon healthy. Includes a cookbook of 50 soy recipes from New York's Natural Gourmet Cookery School."

Contents: Introduction: The Cinderella bean. 1. How soy protects the heart and blood vessels: Full of fiber, the Eskimo secret omega-3 fatty acids, lecithin and vitamin E, preventing strokes, magnificent magnesium, soy and the Mediterranean diet, foam to wash out cholesterol?, cholesterol competitors—phytosterols, is it thyroid hormone [when thyroxine levels rise, cholesterol falls]?, amino acid at work?, could it be the B's?, is it the flavonoids?, the bean and obesity, high blood pressure and the bean, could it be just avoiding meat and dairy products?, summing it up. 2. How soy protects against cancer: Protease inhibitors, trypsin inhibitors, plant estrogens, polyphenols, terpenes—antioxidants, fighting phytates, maybe it's due to low-count amino acid, saponins, inositol—the cancer-fighting phytic acid, which soy products have the most anticancer potential?, potential adverse effects of soybeans. 3. How soy helps ease digestive problems: Promoting regularity, calcium and soybeans. 4. How soy is beneficial in diabetic diets. 5. How soy is proving beneficial to women: The soy and the cycle, other hormonal benefits, magnesium, PMS and pregnancy, contraceptive or fertility inducer?, so "B" it, the bones need it, magnesium and bones, boron and bones, it could be the phytates. 6. Soy and men: Soy and sex, protein power. 7. Soy products and their nutritional value: Soybeans, edamame, soybean sprouts, tofu (also known as bean curd and dou fu-tofu), tempeh, soy milk, yuba, soy cheese, okara, soy yogurt, soy sauce, soy oil, soybean lecithin, soy nuts, miso, natto, soy flour, soy powder, soy protein isolates, concentrates and grits, texturized soy protein, convenience of soy foods. 8. Easy ways to add soy to your diet: Some other easy ways to add soy to your diet, sensible soybean use. 9. Recipes: Appetizers, soups, salads, main dishes/entrées, side dishes/breakfast, sauces/dips, desserts. Glossary. Where to get more information. References. Address: M.S., Health and science writer, Short Hills, New Jersey.

7975. Stevens & Associates, Inc. ed. and comp. 1997. U.S. 1997 soyfoods directory. Lebanon, Indiana: Indiana Soybean Development Council. 47 p. 28 cm. [29 ref]

• **Summary:** This second, expanded edition of the directory contains more than 270 company listings. Contents: Foreword. How to use the Soyfoods Directory (incl. Internet access). Daily soyfood guide pyramid (color). Soyfood descriptions (alphabetical): Introduction, green vegetable

soybeans (edamamé), hydrolyzed vegetable protein (HVP), infant formulas—soy based, lecithin, meat alternatives (meat analogs), miso, natto, nondairy soy frozen dessert, okara (see soy fiber), soy cheese, soy fiber (okara, soy bran, soy isolate fiber), soy flour, soy grits, soy protein concentrate, soy protein isolate, soy protein—textured, soy sauce (tamari, shoyu, teriyaki), soy yogurt, soybeans, soymilk (soy beverages), soynut butter, soynuts, soyoil & products, sprouts—soy, tempeh, tofu & tofu products, whipped toppings (soy based—“similar to other nondairy whipped toppings, except that hydrogenated soyoil is used instead of other vegetable oils”), yuba. Soybean products chart: From whole soybeans, from soybean meal, from soyoil and lecithin. Soyfood companies by product (products listed alphabetically).

Composition and nutrient content of soyfoods (large table, p. 14). Soyfood companies (alphabetical by company name; Each listing contains address, contact, phone, soy products, product names, distribution, to locate product, classification). Mail-order soyfoods: Soyfood mail order companies (listed alphabetically by company). Soyfood companies by state (alphabetical by state; California has by far the most). Soybean promotion & research organizations (national, and state). Professional associations and industry information resources. Soy cookbooks (19). Soy resource books (10). Soyfood fact sheets and recipes: 1-2 pages each for meat alternatives, miso, soyoil, soy flour, soymilk, tofu, textured soy protein, whole soybeans. Soyfoods directory survey.

This directory is on the Internet's World Wide Web at <http://www.soyfoods.com>. For more information or suggestions, call 1-800-301-3153. The Internet version of the Directory continues to improve. “The first year saw hits to our site increase from 1,000 the first month to more than 8,000 per month now. We have added a new search engine that makes it easier to find information and a new monthly e-mail newsletter, *Soyfoods USA*, designed to inform media sources, dietitians and consumers about the latest soyfoods information. To subscribe to this popular newsletter, just send an e-mail message to soyfoods@ind.com with the words ‘Subscribe Soyfoods USA’ in the body or subject field.”

Talk with Roger Stevens. 1997. March 10. The 1997 directory was first available in January 1997. About 100,000 copies of this directory were printed, and all but 7,000 have already been sent out free of charge. About 77,000 copies were sent to registered dietitians nationwide; all are members of the American Dietetic Association. Another 10,000 copies were sent to the American Association of Family and Consumer Sciences—basically extension personnel at the Cooperative Extension Service in each county; these people provide a lot of consumer information about foods and agriculture. About 500 copies were sent to each of the 20 state soybean development councils. The remaining 6,000

copies were sent to callers who left their name and address at a toll-free answering service. The next step is to do a media tour in Indiana. Traveling with a registered dietitian, they expect to generate a lot of requests from citizens of Indiana. One of the goals is to show other states that if you promote soyfoods in this manner, you will get a lot of interest. Roger hopes to encourage other states to take a more active role in promoting soyfoods. The directory has generated a tremendous amount of information on the part of dietitians who call the toll-free number and have many questions about soyfoods; Roger tries to refer them to people who have the answers—such as 1-800-Talk-Soy. The Indiana Soybean Council has had to hire a new person just to handle the requests for this directory.

Next Roger plans to do a survey of registered dietitians to learn more about their responses to the 1997 directory. He might ask: Did you receive the book? Do you use it? If so, in what way and how often? How many people do you influence with regards to soyfoods as a result of this book? So if each of the 77,000 dietitians influences, on average, 10 people a year, the directory has reached more than 750,000 people. One major goal of this book is to help dietitians include more soyfoods in their own diets and in the diets of their clients. How can we better help you do this? Do you want a cookbook? A starter kit? Shall we include coupons?

From the focus groups he has already conducted, Roger thinks that future editions of the directory will be presented more like a cookbook or recipe book, with the directory in the back. “People really like the recipes. They just hand them out to their clients. We get requests for 100 books at a time from dietitians, who give the entire book to their clients at classes, in their offices, etc.” Roger has the funds to do the research to find out exactly what dietitians want in the way of soyfoods recipes and how they want them organized.

Other possible questions: Which part or parts of the book do you find most valuable? Which do you find least valuable. Is there any information which is not in the book that you wish were included?

Roger would also like to develop for the next edition of this book a graphic presentation of the inside of a typical supermarket showing all the different products which contain soy.

Note: The word “soyoil” is used instead of “soy oil” throughout this directory. Address: Stevens & Associates, 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

7976. Pearce, Jean. 1997. Getting things done: Starting out on soy. *Japan Times (Tokyo)*. Feb. 12. p. 17. Wednesday. [Eng]

• **Summary:** “Last week’s columns reported on recent research pointing to the dietary benefits of soybean products in relieving complaints associated with menopause.” Discusses isoflavones and the isoflavone content (in

micrograms per gram) of kinako (roasted soy flour, 2,589), roasted soybeans (1,625), edamame (1,354), natto (1,273), regular tofu (509), fried tofu (695), soy milk (357), miso (373), shoyu (16).

Gives several tofu recipes and recommends *The Book of Tofu* by Shurtleff & Aoyagi.

“And finally, kudos to Japan Airlines for creating natto in a palatable form, freeze-dried and flavored... It has been tremendously successful. In two years, total sales amounted to ¥56 million. Just think of all those isoflavones.” A photo shows Jean Pearce. Address: Columnist.

7977. Dawkins, William. 1997. Poisoning scare hits Kikkoman. *Financial Times* (London). Feb. 25. p. 28.

• **Summary:** Kikkoman, the world’s largest maker of soy sauce, has 30% of the Japanese market. This year a summer epidemic cause many Japanese to temporarily stop eating in restaurants and to avoid fast food. Soy sauce was not itself implicated in the food poisoning, yet Kikkoman suffered a 22.1% decline in unconsolidated recurring profits. Address: Tokyo.

7978. **Product Name:** [Loyu–Shoyu Made from Sweet Lupin Seeds].

Foreign Name: Loyu (Lupinen-Shoyu).

Manufacturer’s Name: Geestland–Paul E. Bremer.

Manufacturer’s Address: An der Packhalle V, Nr. 1, 27572 Bremerhaven, West Germany. Phone: (0471) 971 20 63.

Date of Introduction: 1997. February.

Ingredients: Incl. Sweet lupins*. * = Organically grown (*aus kontrolliert oekologischem Anbau*).

How Stored: Refrigerated.

New Product–Documentation: This leaflet (6 by 8¼ inches, printed black on yellow) from Biofach, March 1997, contains a list of all 13 lupin products made by the company. It says that Loyu was introduced in Feb. 1997. Six other lupin products introduced in Feb. 1997 were: *Lopino-Felafel*, *Lopino-Cheesy*, *Lopino-Champignon*, *Lopino-Zucchini-Ravioli*, *Lopino-Kräuter-Ravioli*, and *Lopino-Dinkle-Ravioli*. On the back is a list of 13 reasons to choose Lopino products made from lupins.

7979. Witt, Barbara. 1997. Pan-Asian express: Quick fixes for Asian food fans. New York, NY: Bantam Books. xiii + 194 p. Index. 24 x 14 cm.

• **Summary:** The author, who grew up in Connecticut, loved Chinese food and Mott Street in New York City. An excellent writer, she won the James Beard award in 1993. The section on “Seasonings” (p. 8-13) gives descriptions of: Hoisin sauce, sesame seeds, soy sauce (Kikkoman is a good brand; tamari is darker and stronger), soy sauce–dark (sometimes called “black soy”; Koon Chun is a good brand), soy sauce–mushroom (flavored with straw mushrooms; Pearl River Bridge is a good brand). Soy sauce–shrimp (The

Chinese equivalent of Thai and Vietnamese fish sauce. Pearl River Bridge is a good brand), soy sauce–Indonesian (*Ketjap manis*; not to be confused with the less subtle Chinese sweet soy sauce).

The section on “General packaged goods” (p. 15-18) gives descriptions of: Black beans–Chinese salted (Chinese salted black beans: “The ancient and original soyfood that produced miso and soy sauce looks kind of pitiful...” Good brands are Mee Chun and Pearl River Bridge. Avoid those flavored with five-spice powder), coconut milk (canned is excellent), coconut cream, tofu (“innocuous”).

Soy-related recipes include: Seared corn, tomato, and black bean relish (with “chopped Chinese black beans,” p. 40-41). Silky tofu walnut dip (p. 50-51). Bean paste soup (*miso shiru*, with red bean paste, p. 91). Romaine salad with lemon soy dressing (with soy sauce, p. 95-96). Tropical fruit, avocado, and tofu salad (p. 110-11). Scallops with pork and black beans (with “Chinese fermented black beans,” p. 146-47). Curried mushrooms, peas, and potatoes (p. 171-72). Address: Washington, DC.

7980. DeBona, Don; Chaplin, Paul. 1997. Update on miso in Europe (Interview). *SoyaScan Notes*. March 20. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Don attended Biofach in Germany this month; this is the forth time he has attended. He has had two students who came from Europe to study miso-making with him at American Miso Co. in North Carolina. Jan (pronounced *Yon*) Kerremans, who worked at Lima Andiran in southern France, studied with Don for 2 months, Oct. 1984 to Nov. 1984. Jan was a minority partner with Pierre Gevaert. Jan now still works for Lima, but not as a miso maker; originally Flemish, he married a French woman, lives in Paris, and is Lima’s sales rep.

Paul Chaplin from Wales studied with Jan Kerremans at Lima in France during May and June 1984, then with Don for 2 months, in October and November 1985. His miso manufacturing business in Wales is still tiny, but it is growing well. Total turnover (income) in fiscal 1996 (Nov. 1995 to Nov. 1996) was £28,000 (= \$44,800). Paul’s new address is: Source Foods (Organic Priority) 9 Cwm, Business Centre, Marine Street, Cwm, Ebbw vale, NP3 6TB, Wales, UK.

For both Jan and Paul, Don provided miso-making instruction, as well as room and board, free of charge. Barry Evans did not like Don to be teaching other people to make miso.

Pierre Gevaert was the founder of Lima. His son is named Daniel, and Daniel’s wife is Valérie. Daniel studied miso-making with Jan Kerremans in southern France. In early 1990, after Pierre Gevaert died, Daniel and his wife took over Lima’s miso company at Andiran in southern France. They changed the company name to Danival from Lima-Andiran. The two of them now make two types of

miso, and they also sell shoyu and tamari—but it is not known if they make the latter two products or not. Lima and Danival are no longer in contact with one another because there are bad feelings between them; Lima purchases their miso from American Miso Co.—much to Danival’s chagrin.

Other new miso companies in Europe: Noka, run by Karl Selgmann, in Alzey, Germany. Karl used to be with Mr. Hiroshi Kozaki of Kanta Kozaki in Urbach; that company started in 1990. Paul Chaplin has visited Noka.

Two new miso makers in Yugoslavia are Sladjan Randjelovic and his wife, Vladimirka, of Lion Health Food Co. (Zagorska 12/9, YU-11080 Zemun, Belgrade, Serbia / Yugoslavia). Their business card says: “Belgrade, London, and Beijing.” Vladimirka is actively involved in the business. They are both very macrobiotic. They already make *mizuamé* (rice syrup or rice malt). Their miso was of fairly good quality. They also made an interesting miso with added shiitake and kombu.

Hans Weisseneder is making miso for Sojvita in Lichtenwoerth, Austria. He had photos of his vats which are in a wine cellar outside of Vienna.

In Europe, imports of miso from Japan are almost certainly larger than total European miso production. Address: General Manager, American Miso Co., Route 3, Box 541, Rutherfordton, North Carolina 28139. Phone: 704-287-2940.

7981. Danival. 1997. Price List—Danival: 1 March 1997. Mezin, France. 21 p. 30 cm. [Eng]

• **Summary:** Contents: Unrefined Atlantic sea salt. Tomato preserves. Vegetable preserves (incl. azuki with hijiki sea weed). Mushroom preserves. New condiments. Fruit purees with no added sugar (but 35% corn syrup for sweetness). Cereal sweeteners (barley malt, wheat syrup, corn syrup, rice syrup, apple syrup). Desserts and fruit juice. Fruit desserts. Agen prunes. Danival’s macrobiotic food range: “Europe’s leading manufacturer of organic macrobiotic food products. Produced in France, traditional Japanese manufacture. Non genetically engineered soya, grown by Mr. Berjon from his own seed beans since 1991.” Brown rice miso* (unpasteurized, 4 sizes), barley miso* (unpasteurized, 4 sizes), young shiro miso* (unpasteurized, 2 sizes), shoyu* (unpasteurized; 5 sizes), tofu*, smoked tofu*, tempeh with shoyu and wakame*, seitan with shoyu and hijiki*, gluten powder*. * = Organically grown, certified by AB-Ecoconcert.

A 4-page French-language color insert (dated March 1997) contains color photos of many of these products, sealed in glass jars—incl. “Bio Miso (*Orge/Gerst*), Sauce Bolognaise Seitan, Raviolis (*Farcies au Seitan*), and Bio Shoyu.” Address: Moulin d’Andiran, 47170 Mézin, France. Phone: +33 5 5397 0023. Fax 5 5397 0010.

7982. *Food Product Design*. 1997. Kikkoman kicks up new

production facility. March. p. 22-23.

• **Summary:** In February, Kikkoman International began construction of its second soy sauce manufacturing plant in Folsom, California. The new facility, expected to cost \$35-40 million, will have an initial capacity of 2.6 million gallons/year of soy sauce. The first product shipments are scheduled for the fall of 1998.

Kikkoman’s first U.S. plant was built in 1973 in Walworth, Wisconsin. Since that time the plant’s production of soy sauce has increased tenfold. For the past decade, Kikkoman soy sauce has experienced double-digit growth in foodservice and industrial sales.

Kikkoman is a multinational corporation with sales of more than \$2 billion per year and 4,250 employees.

7983. Viana Naturkost GmbH. 1997. Preise und Neues [Prices and new products]. Euskirchen, Germany. 28 p. 30 cm. [Ger]

• **Summary:** This impressive, stylish/classy color catalog from Biofach, March 1997, consists of two parts. The 20-page smaller format (26.5 cm) black-and-white insert gives the prices of all products for 1997. The larger color catalog describes new products. The price list contains the following product categories: Basic and seasoned tofu products. Fresh tofu spreads. Tofu hot dogs. Wheat gluten products. Tofu cutlets. Tempeh. Seitan. Burgers and snacks. Spreads in glass jars. Soy sauce and miso products (organic shoyu, organic tamari, barley miso, brown rice miso). Fresh patés. Deli salads. Soya mayonnaise (Vianaise). Rice drink. Noodles. Fresh pasta stuffed with tofu fillings (Tortellini, Maultaschen). Frozen products (incl. Chili con tofu and spring rolls). Sprouts (11 types & products, not incl. soy sprouts). Spreads from Noka. Canned products (*Konserven*). Address: Willi-Graf-Str. 88, 53881 Euskirchen-Kuchenheim, Germany. Phone: 02251-9446-0.

7984. Fallon, Jackie. 1997. Re: Was soy sauce ever used in Lea and Perrins’ Worcestershire sauce? Letter to William Shurtleff at Soyfoods Center, April 7. 1 p. Handwritten, with signature on letterhead.

• **Summary:** Jackie is sorry she couldn’t be of more help. She was able to clarify only two things and couldn’t find any dates.

“From what I understand, the recipe hasn’t changed & I don’t know where (if at all) soy fits into the picture.

“I threw in a couple of new things I found with dates and sources—hope it helps. Sincerely,...”

Printed in red, across the bottom of the letterhead, “Quality Products Since 1835.” Address: 15-01 Pollitt Drive, Fair Lawn, New Jersey 07410. Phone: 201-791-1600.

7985. Andoh, Elizabeth. 1997. In Tokyo’s ryotei, the art of service [omotenashi]. *New York Times*. April 20. p. XX6, XX24 (Sunday).

• **Summary:** Contains excellent reviews of five of Tokyo's fine, traditional (and often expensive) restaurants: Tatsumura, Tsukiji Tamura, Bon, Kocho, and Saryo Arai.

Bon serves a type of vegetarian cuisine called fucha, which traces its origins to the Buddhist temple food of China. Bon serves "ivory-colored spirals of nama yuba (silky, fresh soybean curd sheets)" and uses kudzu in some dishes. Address: Japan.

7986. Labbé, Max. 1997. *Ces étonnants aliments végétaux fermentés et lacto-fermentés* [Those astonishing fermented and lactic-fermented vegetable foods]. Auvers sur Oise, France: Published by the author. 116 p. Preface by Richard Hwei-Ming Bau. Illust. No index. 21 cm. [Fre]

• **Summary:** Part III of this popular book, titled "Asiatic Specialties," contains the following sections and subsections (p. 77-103): Chinese and Japanese fermented foods: Shoyu and tamari, miso, umeboshi, nuka pickles, natto, sufu. Characteristics and way of tempeh: Definition, preparation, arrangement of grains before inoculation. Indonesian tempeh: Preparation of the cakes, preparation of the inoculum. Javanese tapé (tapeh) and its culture. American-style tempeh. A color photo on the rear cover shows Max Labbé. Address: 3 rue Emile Level, F- 75017, Paris.

7987. Noble Bean. 1997. *Tempeh—Noble Bean* (Leaflet). McDonalds Corners, Ontario, Canada. 2 p. Front and back. 28 cm.

• **Summary:** The top three-fourths of the front of this black-on-tan leaflet shows six tempeh products (packages and labels) made by Noble Bean. On the bottom quarter is a brief description (left column in French, right in English) of tempeh. On the back is a very brief description (in French and English) of Noble Bean and its history since 1979, an illustration of the countryside production facility (in a trailer), and a recipe for tempeh teriyaki. Address: RR#1, McDonalds Corners, ONT, Canada K0G 1M0. Phone: 613-278-0173.

7988. Raymond, Jennifer. 1997. *Fat free & easy: Great meals in minutes! No added fat. No cholesterol. No animal ingredients.* Calistoga, California: Heart & Soul Publications. 152 p. Recipe index. 26 cm.

• **Summary:** A very useful vegan cookbook. Contents: Introduction. Health consequences of high-fat diets. How much fat should you eat? Calculating your fat intake. Sources of fat in food. Fats are not created equal. Tips for cutting the fat. Meeting your protein needs. Problems with excess protein. Protein myths and facts. Salt. Menu planning and menu ideas. Stocking your pantry. Ingredients that may be new to you. Recipes: Breakfast foods, breads & muffins, sandwiches, sauces & spreads, salads & dressings, soups & stews, vegetables, grains & side dishes, main dishes, sweets.

In this book, all recipes that would typically call for milk

(such as smoothies or pancakes), call for "soy milk or rice milk." Many recipes are seasoned with soy sauce. Other soy-related recipes include: Scrambled tofu (p. 33). Missing egg salad (with tofu, p. 47). Creamy cucumber dip (with tofu, p. 49). Cucumbers with creamy dill dressing (with tofu, p. 61, 66). Holiday tofu roast (p. 113). Truly terrific tacos (with Boca Burgers, p. 119). Tofu cheesecake (p. 133). Chocolate tofu pudding (p. 136). Creamy prune pudding (with tofu, p. 139). A photo (p. 151) shows Jennifer Raymond, her husband Stephen Avis, and their five dogs. Address: 1418 Cedar St., Calistoga, California 94515. Phone: 707-942-2180.

7989. Gevaert, Valérie. 1997. Re: Brief history of Danival and current activities. Letter to William Shurtleff at Soyfoods Center, May 13—in reply to inquiry. 2 p. Typed, with signature. [Eng]

• **Summary:** "Daniel Gevaert purchased the Lima Andiran site in early 1990—but not the Lima trademark—and established Danival the same year in June. Our miso and shoyu, as well as our fruit and vegetable preserves are prepared with certified organic ingredients, and we also package unrefined Atlantic sea-salt. Our company name is indeed Danival." The address and phone and fax numbers are shown below.

"My full name is Valérie Fenech Saint Genieys. Daniel and I have been married for 15 years, and we have two sons, Benoît age 14 and Martin age 10.

"We began producing miso as soon as we bought the site, and put it on the market for the first time in 1992, after completing the first 18 month production cycle. Our shoyu products were launched the following year. All Danival's products are prepared on site. We buy 90% of our raw material in France (soya, vegetables, fruits and cereals), giving priority to local producers in our region in the south-west.

"Daniel's skills in preparing miso came to him from his father, who was in charge of miso production for Lima. At the time, Jan Kerremans was an employee whose task was to work on the miso recipe. Daniel himself has had the great privilege of receiving the teaching and guidance of the master-craftsman who is personally responsible for miso preparation within the imperial court of Japan, and who has imported his traditional skills and knowledge to Daniel while visiting Danival or during Daniel's frequent trips to Japan. We are both familiar with your publications and find them of great value."

Note 1. Near the top of the letterhead, below and to the left of the logo and company name, is written "Fabricant de père en fils." In the center of the stationary, in a light half-tone, is a line drawing of a traditional shoyu seller (which also appears in *The Book of Miso*, 2nd ed., by Shurtleff & Aoyagi, p. 262). A printed seal in the lower left corner shows that the company won special mention for the *Prix Écoproduit* 1992, in the "Enterprise and Environment"

competition organized by the French Ministry of the Environment.

Note 2. Enclosed with the letter are five brochures and booklets, some of which are cited separately. Address: Moulin d'Andiran, 47170 Mézin, France. Phone: +33 5 5397 0023. Fax 5 5397 0010.

7990. Seemo (H. Shapira). 1997. Re: History of Dakini Health Foods Pvt. Ltd., in Pune/Puna, India. Letter (fax) to William Shurtleff at Soyfoods Center, May 13—in reply to inquiry. 7 p. Handwritten.

• **Summary:** Seemo is Mr. H. Shapira from Israel and Kairava is Mrs. J. Spaelstra from the Netherlands. Seemo is in charge of tempeh, Kairava in charge of tofu & soymilk. They are making the earliest known commercial soybean tempeh in India. For their first letter see Dakini (1997).

Both Seemo and Kairava are devout disciples of Osho (formerly called “Sri Rajneesh”), he since 1984 and she since 1986. They arrived in Pune to stay in about 1988/89. Initially to support themselves, they had a gem and crystal shop, a wholesale new-age jewelry operation, and a motor bike repair shop. Now they have finally found what they want to do for work. “It’s love and Zen.” Osho died in Pune on 19 Jan. 1990; they returned to India the next day; the fire was still burning at the burning ghat. In the year before his death, his discourses were mostly about Zen. He died in Pune due to heavy metal poisoning and radiation damages done to him by U.S. marshalls in an Oklahoma jail cell, where he was kept unlawfully in 1985.

Their company started with the idea of making white tahini and possibly Turkish halva [halvah] (in which white tahini is a main ingredient). It was extremely difficult to get started. As foreigners doing business in India, they had to register a “Pvt. Ltd.” company. Then they could not find a space for the company, since Pune is a rapidly growing city. So Seemo pulled down the back garden in his rented house, constructed a shed with a floor area of 25 square meters, and moved his bedroom up to the second floor. This gave him an additional 24 square meters where the bedroom used to be. They also have a 25 square meter storeroom where they make the tempeh. He got electrical connections then waited for 8 months while a colloid mill (copy of a 1940 model), hot air oven, and filling machine were delivered. The mill proved to be a technical nightmare; he had to totally rebuild it. Finally their small factory started operation. Then they added peanut butter and brown tahini to their product line—with no additives or preservatives. They had to set aside their plan to make halva.

Spicer College, run by Seventh-day Adventists, is located in Pune. They have a health food store and they make peanut butter—nearly edible, with too much sugar and salt, plus other ingredients. Their sesame butter (brown tahini) is gritty, rancid, and inedible. They also produce grape juices (very, very sweet), pastries (Mmmm good). And they make

and bottle soy milk in plain and chocolate flavors, but it is loaded with white sugar and Class II permitted preservatives! They also make pretty good tofu; Seemo used to eat it now and then for the last 8 years. “Besides being actually able to taste the Bible in it, I had no reason to complain.” This tofu is now served at the Osho commune. “Pune old timers told me that once—20 years ago—the place was managed by an enthusiastic old American woman and the quality of their products was very good.

At Dakini, they now also make hummus in their kitchen, 15 kg/week in summer and 60 kg/week in winter. They pack it in 200 or 400 gm cups and sell it at various shops in town to foreigners and Indians. They like it.

Seemo started developing the tempeh about 8 months ago. Last year a friend of his found a book titled *Handbook of Indigenous Fermented Foods*, edited by Dr. Keith H. Steinkraus, in a pavement stall for 400 rupees (US\$13.00). Since he had been to Bali, Indonesia, many times, he tried making some of the foods but rarely got any edible products. So before leaving Pune, he gave the book to Seemo as a gift. As he read it, Seemo got really excited. He had grown up in a meat-eating family. Even while traveling and living in Europe, he continued to eat meat and junk foods. “Then I understood it was not good for me on all levels, and went vegetarian.” Living in Holland later on, he started to learn about tofu, and then tempe, tamari, etc. “So now I was a healthy, well-fed vegetarian.” Then he moved to India, but after some years of eating fried foods, lentils and lots of dairy products, he started to eat meat again, 2-3 times a month. “It did not feel too good, but I had no idea how to manage my diet, and living on mostly dairy products did not suit my body. So when Dr. Steinkraus’ book fell into my hands, I got excited and realized that it might be possible to make tempe here in India at a small, affordable investment.

“So I first got a small incubator built; its actually like a cool box ½ meter wide and 1½ meters high, made of galvanized sheet metal with insulation and 8 shelves (of which I now use only 3).” At the bottom are heaters, which give 250-540 watts of heat. Two old computer cooling fans distribute the heat, and a thermostat regulates it. “It’s not a perfect machine but I can do 5-12 kg/day when I want and, most important, I can produce in it excellent spore powder—since it is difficult to import anything here. Actually, I nearly gave up the project, because I was making sporulated tempeh, then sun-drying it and running in through my spice grinder. The powder looked great. The tempe cakes used to get hot, then very hot, then smelly with funny colors (no white mold). I double-checked everything. In the end, only the grinding was left, so I bought a small hand-turned grain mill (500 rupees = US\$15.00). Since then, perfect tempeh has been happening.

“For starter, I first got a packet of spores from Holland. Later I got 1 gram of white tempe starter from an American friend in Goa (she used to make her own supply down there),

and playing with it I found it a bit more suitable for my use. So most of my spore stock now is from this starter, and some is mixed. I still have to study how to make tempe and starter during the different seasons here. Now it is very hot and dry. Next month is monsoon (wet), followed by a month that is hot and humid, and then the 3-month 'cold' season."

About half of all tempe produced is sold frozen; the other half is sold fresh. Seemo also plans to try making dry tempeh. He gives away lots of tempe as samples; most people love it. Starting this July, it will appear on the menu of one restaurant, possibly two—first as Tempeh Stroganoff and Tempeh Shashlik (steamed, then spiced, then barbecued). "When I get *The Book of Tempeh* I will introduce it to more places. Meanwhile, I have totally forgotten about eating meat. I feel strong and light. I find my vision benefits too; I haven't noticed that with tofu. Now that I am a bit more confident working with the mold, I hope to raise some capital, move to a suitable place (possibly well out of town), and then start to make tamari shoyu, and definitely some miso too. So that's a little of our story. Thank you." Address: Dakini Health Foods Pvt. Ltd., Vidyut Nagar, Plot A2, Kawdewadi, Pune / Puna 411 001, India. Phone: 0091-212-63-1990 (phone and fax).

7991. Liu, KeShun. 1997. Fermented Oriental soyfoods. In: KeShun Liu. 1997. Soybeans: Chemistry, Technology, and Utilization. Florence, Kentucky: Chapman & Hall. xxvi + 532 p. See p. 218-96. Chap. 5. Index. [127 ref]

• **Summary:** Contents: Introduction. Fermented soy paste (*jiang* and miso): Varieties of miso and jiang, koji and microorganisms involved, koji starter and its preparation, Chinese jiang preparation (traditional household method, pure culture method, enzymatic method), Japanese miso preparation (rice koji preparation, treatment of soybeans, mixing and mashing, fermentation, pasteurization and packaging), principles of jiang and miso preparation, major factors in jiang and miso making (raw materials, cooking temperature and time, conditions during koji preparation, proportions of ingredients, fermentation conditions, novel processing for special products). Soy sauce (*jiangyou* or shoyu): Varieties of soy sauce, soy sauce processing (traditional Chinese household method, modern Chinese method, processing of Japanese shoyu, comparison of soy sauce and *jiang* or miso preparations), principles of making soy sauce (action of koji enzymes, fermentation by lactic bacteria and yeasts, color and flavor formation, glutaminase and glutamic acid), chemical soy sauce, progress in soy sauce preparation (use of defatted soy grits or flakes, improvements in treating soybeans, development of an automatic koji-making system, application of microorganisms with specific activities, techniques to shorten production time, improvements in soy sauce clarification), chemical composition, quality attributes and standardization, mycotoxins. Tempeh:

Varieties of tempeh, preparation (traditional method, pilot plant method, petri dish method), microorganisms involved, factors affecting tempeh fermentation (starter, dehulling and aeration, moisture, temperatures, acidity, losses of solids), changes during fermentation (general changes, protein, lipid, carbohydrates and other constituents), production of vitamins, storage, nutritional value. Natto: Preparation, microorganisms involved, factors affecting natto quality (raw material, soybean cooking conditions, storage), changes during fermentation, trends in research on natto and *B. natto* (development of novel strains of *B. subtilis*, purification and characterization of key enzymes, studies into genes encoding key enzymes of *B. subtilis*, studies of possible physiological roles of natto). Fermented black soybeans (douchi or hamanatto). Sufu: Preparation, types of sufu, microorganisms involved, effect of mold growth, effect of brine aging.

Figures show: (1) Photo of Chinese chiang, and Japanese red and white miso, each on one of three spoons in a shallow white bowl. (2) Flow chart of a Chinese method for making koji starter from whole soybeans and wheat bran. Adapted from Shi and Ren (1993). (3) Flow chart of a pure-culture method for making Chinese jiang from whole soybeans (65%) and wheat flour (35%). Adapted from Shi and Ren (1993). (4) Flow chart of an enzymatic method for making Chinese jiang from whole soybeans (65%) and wheat flour (35%). Adapted from Shi and Ren (1993). (5) Flow chart of the manufacturing process for Japanese rice miso [red miso]. Adapted from Fukushima (1981). (6) Diagram of the interactions of basic miso components during miso fermentation. From Shurtleff and Aoyagi (1983) who adapted it from Shibasaki and Hesseltine (1962). (7) Graph of trichloroacetic acid (TCA)-soluble nitrogen (N) contents of miso samples prepared with soybeans cooked at different temperatures for 10 minutes, followed by 0 days or 25 days of fermentation. Adapted from Nikkuni et al. (1988). (8) Graph of temperature and time control curves for different types of Japanese miso during fermentation. Adapted from Shurtleff and Aoyagi (1983). (9) Photo of soy sauce in three different containers: dispenser, small Yamasa bottle, and large Chinese can (Soy, Superior Sauce). (10) Flow chart of a typical manufacturing process for koikuchi shoyu, the most widely used type of Japanese soy sauce. Adapted from Fukushima (1981). (11) Graph (salt content % vs. temperature) Of safety zone for enzymatic digestion of shoyu koji. Protein digestibility and amino acid content in Zone A are better than those in Zone B. From Yokotsuka (1986). (12) Graph of lactic acid fermentation of shoyu mash as a function of time. Adapted from Jose et al. (1976). (13) Flow chart of role of the proteolytic enzymes of koji mold in liberation of amino acids from proteins. Adapted from Fukushima (1985). (14) Chromatogram of organic acids in fermented and chemical [HVP] soy sauce manufactured in the United States. Optical densities vs. retention time. From Fukushima (1979a). (15) Flow chart of traditional

Indonesian method for making tempeh from whole soybeans. Adapted from Winarno (1989). (16) Four superimposed graphs of change in pH and organic acids as a function of incubation time during accelerated acidification of soybeans at 30°C. Shows acetic acid, lactic acid, citric acid, and pH. Adapted from de Reu et al. (1995a). (17) Graph of water soluble nitrogen content in the fermentation of soybeans with *Rhizopus oligosporus* during the traditional tempeh process at 25, 30, and 37°C, and with the rotating drum reactor at 36°C. (18) Photo of two chopsticks lifting some Japanese natto from a bowl full of natto; the thin strings connecting the natto above and below are clearly visible. (19) Flow chart of typical method for making Japanese natto from whole soybeans. (20) Photo of Chinese fermented black soybeans (*douchi*) on a white plate. (21) Flow chart of typical method for making Chinese fermented black soybeans from whole soybeans. (22) Photo of cubes of sufu (Chinese cheese) in a shallow white bowl. (23) Flow chart for making Chinese sufu from firm tofu.

7993. Kikkoman Corporation. 1997. Annual report 1996. 339 Noda, Noda-shi, Chiba 278, Japan. 24 p. 28 cm. [Eng]
• Summary: The information in this English-language annual report is current as of April 1997. Contents: Financial highlights. Profile. A message from the president: The year

in review, an emphasis on growth, principal management issues, looking ahead. Overseas operations—A world brand: The Americas, Europe, Asia and Oceania. Financial section. Corporate history. Global network (directory of Kikkoman names, addresses, and phone numbers worldwide). Board of directors and officers. Corporate data.

During fiscal 1996, ended 31 December 1996, consolidated net sales worldwide rose 1.3% over the previous fiscal year to 206.0 billion yen, down from a peak of 211.7 billion yen in 1992. Net income surged 63.8% to a record 7.3 billion yen, up from 4.4 billion yen in 1995. In 1993 net income was 4.7 billion, in 1992 it was 4.9 billion, and in 1991 it was 6.2 billion—very volatile.

Overseas sales jumped 21.8% in 1996 to 54.4 billion yen, and accounted for 26.4% of consolidated net sales, up 4.4 percentage points from fiscal 1995. “Although the declining value of the yen helped boost overseas sales, this impressive result mainly reflects the excellent performance of the company’s subsidiaries in the United States.” In Japan, difficult conditions resulted in a 4.4% decrease in sales.

During the past year: Kikkoman increased efforts to boost sales of its premium-quality *Marudaizu* Soy Sauce (made from whole soybeans rather than defatted soybean meal). July 1996—Kikkoman starts construction of its first soy sauce manufacturing plant in Europe, located in the city of Hoogezand-Sappemeer, in the northern Netherlands. Aug. 1996—Relocated its Tokyo Head Office to Nishi-Shinbashi in central Tokyo, in a move to expand the role of this office—and introduced E-mail. Feb. 1997 began constructing its second U.S. soy sauce manufacturing plant in Folsom, California, on a 52-acre site; the ground-breaking ceremony took place in March 1997. Feb. 1997—Launched a new *Yakiniku no Tare* (Steak Dipping Sauce) in *Akadare* (Red Label) and *Kurodare* (Black Label) flavors.

“The Americas.” Kikkoman’s new plant in Folsom, California, is scheduled to come on stream in autumn 1998 with an initial production capacity of 10,000 kiloliters per year (about 2.64 million gallons per year). The plant will be operated by Kikkoman Foods, Inc., the company’s wholly-owned Wisconsin-based subsidiary, and approximately 25 local employees will be hired. The plant will supply Kikkoman *Koikuchi Shoyu* (regular soy sauce) to customers in the western United States and Canada. Kikkoman’s first shoyu plant outside Japan began operation in Wisconsin in 1973. Kikkoman has increased the production capacity of that plant 10-fold to meet expanding demand. [Note: Since the initial capacity was about 10,000 kiloliters/year, the current capacity must be about 100,000 kiloliters/year or 26.4 million gallons/year.] Over the years, Kikkoman has captured approximately 50% of the market for soy sauce and soy sauce-related seasonings in the USA. A bar chart shows the relative production volume growth at the Wisconsin plant. It has increased 2.4 fold since 1986. In addition to its plant in Wisconsin, Kikkoman has four subsidiaries in

the USA: (1) Kikkoman International Inc. (San Francisco, California), which markets a broad range of Japanese and Asian foodstuffs, primarily soy sauce, teriyaki sauce, noodle sauce, and tempura sauce. (2) JFC International Inc. (San Francisco), North America's largest importer and distributor of Japanese and other Asian foodstuffs. (3) Japan Food (Hawaii), Inc., which wholesales soy sauce plus other Japanese and Asian foodstuffs in Hawaii. (4) Japan Food Canada Inc., which wholesales soy sauce plus other Japanese and Asian foodstuffs in Canada.

In Europe, Kikkoman's plant in the Netherlands is expected to start deliveries of soy sauce in Oct. 1997. It has an initial production capacity of approximately 4,000 kiloliters per year. "Kikkoman currently supplies the European market with soy sauce produced at its Singapore plant. When operations commence at the Dutch plant, this volume will be available to meet the burgeoning demand for soy sauce in Asia and Oceania."

In Asia and Oceania: Kikkoman has two production plants, in Singapore (est. 1983) and Tainan, Taiwan (President Kikkoman Inc., which makes a sweet soy sauce developed for local tastes; it was established in Feb. 1990 as a joint venture company). "Marketing activities in Asia are performed by Kikkoman Trading (S) Pte. Ltd. of Singapore, and JFC Hong Kong Limited, while in the competitive markets of Australia and New Zealand, Kikkoman Australia Pty. Limited is enhancing the Kikkoman name. The latest addition to Kikkoman's Asian marketing network is Shanghai Kikkoman Trading Co. Ltd., which was established in December 1995" [in China]. Address: Noda, Japan.

7994. Product Name: Tofu-Mexi Patties: 2 Baked.

Manufacturer's Name: Tofu Shop Specialty Foods Inc.

Manufacturer's Address: 100 Ericson Ct., Suite 150, Arcata, CA 95521. Phone: 707-822-7409.

Date of Introduction: 1997. June.

Ingredients: Tofu (filtered water, organic whole soybeans*, nigari), fresh jalapeño peppers, carrots, cilantro, garlic, soy sauce (water, organic soybeans*, organic wheat*, salt), lime juice, arrowroot powder, sunflower seeds, celery, green onions, distilled vinegar, chili powder, cumin, salt. * = Grown according to CA Natural Foods Act of 1990.

Wt/Vol., Packaging, Price: 6 oz. vacuum packed.

How Stored: Refrigerated.

New Product–Documentation: Two Labels sent by Matthew Schmit. 2002. Sept. 9. The product was introduced in June 1997. Label #1 of June 1997. 3 inches diameter. Self adhesive. Red, black, and white on yellow. "Perishable, keep refrigerated. Good source of protein. Low in saturated fat. Cholesterol free. Illustration of an adobe pueblo overlooking waves and two stylized native American animals (rabbit and squirrel).

Label #2 of Oct. 2002. "Mexi Patties: Baked Tofu." Red and orange-yellow on white. 3 inches diameter. No adhesive.

A handsome, impressionistic watercolor illustration shows a tofu shop on stilts on a cliff with a tree arching overhead. "Good source of protein. Low in saturated fat. Cholesterol free."

7995. Andoh, Elizabeth. 1997. Tea and temple fare in Kamakura. *New York Times*. July 20. p. XX6, XX18 (Sunday).

• **Summary:** Contains reviews of restaurants in Kamakura. Saami serves dishes that include wheat gluten, and "soy foods," and a sweet tofu-based pâté known as gisei-dofu [gisei-dofu], plus "goma-dofu, creamy sesame pudding drizzled with soy sauce and topped with a dab of fiery wasabi horseradish."

Kintame uses traditional pickling mediums including "miso paste." Their "house soup is ozoni, a creamy, pale, a miso-thickened broth.

Fushiki An offers shojin ryori, temple-style vegetarian cuisine including goma-dofu and a "clear broth with cubes of silken bean curd..." The chirashi-zushi contained "soy-simmered koya-dofu bean curd..." Address: Tokyo, Japan.

7996. Kikkoman International Inc. 1997. Build a better burger with Kikkoman: Foodservice menu ideas (Brochure). San Francisco, California. 4 p. 15 x 22 cm.

• **Summary:** Five burger recipes that use Kikkoman soy sauce. The Kikkoman slogan is now: "The true taste of soy sauce." Address: San Francisco, California. Phone: 1-800-944-0600.

7997. *Soyfoods (ASA, Europe)*. 1997. Japanese soy sauce sales hit by food poisoning scare. 8(2):2. Summer.

• **Summary:** Kikkoman, the world's larger maker of soy sauce with 30% of the Japanese soy sauce market, suffered a 22.1% decline in unconsolidated recurring profits—in part because of an outbreak last summer of food poisoning (caused by *E. coli*) in Japan. Just over half of Kikkoman's total sales come from soy sauce. Soy sauce was not implicated in the poisoning, but its sales fell when many Japanese temporarily stopped eating in restaurants and avoided fast food.

7998. Myong, Jung. 1997. A Korean food manufacturing company named "Zion" plans to start making soy sauce, tofu, and soy sprouts in America (Interview). *SoyaScan Notes*. Aug. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jung is Korean. She works for a Korean company named "Zion" which currently makes soy sauce and tofu in Korea. They are planning to start a factory in the USA to make soy sauce, tofu, and soy sprouts. Address: 20973 Glenbrook Dr., Walnut, California 91789-4818. Phone: 909-595-4681.

7999. Little Tokyo Service Center. 1997. L.A. Tofu Festival, August 9-10. Los Angeles, California. 22 p. Illust. 26 cm. Saddle stitched (stapled).

• **Summary:** Contents: 1997 LA [Los Angeles] Tofu Festival committees and volunteers. Schedule of events, Aug. 9-10. Map of events. Letter from Little Tokyo Service Center, with thanks to House Foods / Hinoichi Tofu as the Title Sponsor. List of sponsors by rank. Honorary chairpersons: Sandy Gooch and Rob Fukuzaki. Health education and health benefits of tofu. Tofu: A 2,000 year old health food miracle, compiled by William Shurtleff of Soyfoods Center. 1997 LA Tofu Festival restaurant profiles (20 restaurants, p. 7-9): Aloha Food Factory (Alhambra, CA, started Oct. 1990—Tofu specialty dish: Tofu with cha-shu on stir fried vegetables). Berth 55 (Long Beach, 1988—Tofu poke dish). Buk Chang Dong Soon Du Bu (LA, April 1996—Spicy tofu casserole with oyster, shrimp & clams). Chez Sateau (Arcadia, 1981—Tofu cheesecake, Tofu Caesar Salad. Chef Sato was “Chef of the Year of Los Angeles” and 1980 Chef of the Year of southern California.” He was also a member of the 1980 U.S. Team for the Cooking Competition in the Culinary Olympics). Curry House (Beverly Hills, Aug. 1996—Tofu steak {marinated in soy sauce}, Tofu cheesecake). Furaibo (LA, Aug. 1994—Tofu salad with original ginger). Indo Cafe (Los Angeles, 1993—Stuffed tofu cake {tofu filled with ground chicken and shrimp}, Fried tofu {marinated in turmeric and candlenut}). Jozu Restaurant (LA, Dec. 1, 1996—Fried tofu with marinated porkchops). Little Tokyo Lion’s Club (LA, 1974—Tofu miso soup, Futomaki sushi). Mr. Ramen (LA, Oct. 1993—Vegetarian {with tofu} ramen). Ocean Seafood Restaurant (LA, 1990—Mabo tofu, Tofu with mixed vegetables, Tofu in clay pot). Papa Jon’s Cafe (Long Beach, 1990—Greek tofu salad, Tofu lentil salad, Potato-tofu salad, Sesame tofu salad, Tofu spinach, Lasagna, Tofu broccoli stir-fry, Spaghetti and tofu balls, Tofu/lettuce/tomato {TLT} sandwich, Tofu scramble {breakfast}, Tofu dessert pies, Tofu frosting {on cake}, Tomato basil w/tofu, Teriyaki tofu, and Spinach mushroom pasta w/tofu). Pat Greenberg, “Fitness Gourmet” (Beverly Hills, Renowned instructor of the “Joy of Soy” cooking classes). Southern California Cuisine (LA, 1994—Tofu ravioli served with Curry sauce or traditional marinara sauce). Suehiro Cafe (LA, 1972—Stir-fried eggplant, Bell peppers with tofu braised in miso sauce, Deep-fried tofu with sauce). Three Brothers Restaurant & Catering (Harbor City, 1983—Chinese tofu salad, Tofu seafood salad). Tofutti Brands Inc. (Cranford, New Jersey, 1982—Non-dairy frozen desserts, Tofutti tortellini, Mini ravioli, Tofutti cookies). Unique Catering (Chino Hills, 1995—Tofu patty with shiitake sauce, String beans with tofu dressing, Inari-sushi). Vegetarian Delight (San Gabriel, 1991—Veggie fish in hot braised sauce). Wild Oats Community Market (Santa Monica, 1984—Tofu tempeh deli salad).

8000. Fischer, Paul. 1997. History of House of Herbs, and of the Far East line of condiments which includes soy sauce, teriyaki sauce, and hoisin sauce (Interview). *SoyaScan Notes*. Sept. 11 and 15. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** House of Herbs was started in 1939 by Patricia Winters. She was quite a woman, who invented the first under-arm deodorant called Oder-Ono, and she sold that company in 1929. Her husband, Ezra Winters, who was a muralist. He was doing a mural in a post office depicting the use of herbs and spices in medicine, cosmetics, and food. She was retired after selling her business, lived in Connecticut, so she started growing herbs in her back yard. Then she started selling them at the New York Flower Show around 1940-41, and out of that she developed a business, House of Herbs.

Paul has been working for other people in the specialty food business since 1955. He worked for Virginia Deere Extract Co., for a specialty food distributor, and for a packer of Spanish olives. In 1972 he had been for Virginia Deere for about 5 years. He and his wife lived in New Jersey and their plant was in Brooklyn; it was a long commute and he was getting very tired of it. His wife agreed with his desire to go into business. They found a business named House of Herbs (in Greenville, New Hampshire), which was on the verge of bankruptcy, and was now owned by Republic Foods (a mini-conglomerate)—having changed hands 3 or 4 times since Patricia Winters first sold it. In late May 1972 Paul and his wife bought House of Herbs and began running it in New Hampshire. In 1974 they moved the company to 28 Ann Street, Passaic, New Jersey—where it is still located.

House of Herbs presently makes a line of condiments under the Far East brand. The first product in the line was HVP soy sauce. In 1974 House of Herbs was a small specialty food company, that packaged and sold herbs and spices, cooking wine and wine vinegar, which he sold to specialty food distributors. One of these distributors in Atlanta, Georgia, was distributing Kikkoman Soy Sauce; Kikkoman then went direct, so this distributor got very angry and asked Paul if he could make a soy sauce for him. Paul said “Sure I can.” So Paul bought some Hercules HVP, got the federal standards or specifications (E-610), and developed an HVP soy sauce which he called “Maestro Brewed Soy Sauce”—even though it was not fermented. That was the first product in the line. The ingredients (shown above) are the same now as they were in the beginning. Also in 1974 Paul developed a Teriyaki Sauce, also under the Maestro Brand. Then he added more (such as Sweet & Sour Sparerib Sauce, Oyster Sauce, Brown Sauce, etc.), since he

found he needed a line to sell the products. In about 1975 or 1976 he visited San Francisco, California, for a convention. He saw a Far East travel agency, so he took the man's business card and used it to design a new label with the Chinese characters for "Far East" on it. Then he registered it in the U.S. Patent Office as a trademark. In about 1987 he introduced a Hoisin Sauce (which see). He basically cooks, mixes, and bottles the ingredients to make this line; no fermentation is involved. Paul wants to start making Hatcho miso, since fermented soy beans, the main ingredient in his Hoisin sauce, are no longer available from Wah Jah Shan.

Paul will be age 67 in November 1997. "I am not going to retire. I love my little business. It's very exciting. I go to Florida, where I have a little house, in the winter. I'm too young to retire. Business has been very, very good the last 3-4 years and all of a sudden, it has dropped way off. So now I'm looking for a way to make Hoisin Sauce—because nobody makes a good product." Address: Owner, House of Herbs, Inc., 38 Ann St., P.O. Box 178, Passaic, New Jersey. Phone: 201-779-2422.

8001. Fischer, Paul. 1997. History of Wan Ja Shan / Mandarin Soy Sauce Co. (Interview). *SoyaScan Notes*. Sept. 15. Conducted by William Shurtleff of Soyfoods Center.
• Summary: This company still exists and is very active. Even though they are not listed in the 1997 *Soya Bluebook* in the USA (they are listed as Wan Jia Shian Brewery Company Ltd. in Taipei, Taiwan; manufacturer and exporter of soy sauce; Mr. Wu Jen-chun, president), they are listed twice in the *U.S. 1997 Soyfoods Directory*, under Mandarin Soy Sauce, Inc. (p. 22) and Wan Ja Shan (p. 28), both at 419 N. St., Middletown, New York. They make Wanjashan Soy Sauce and Teriyaki Sauce.

Mr. Wu came from Formosa. Before 1945 he worked for Kikkoman at their factory in Formosa, and that is how he got into the soy sauce business. When the Japanese were thrown out of Formosa, he probably started Wan Jia Shian in Taipei, Taiwan. Paul does not know what happened to the Kikkoman plant in Formosa after 1945.

When Mr. Wu came to America, Paul was still rather new in this business. Paul was involved in trying to make Oriental food products and he thought he might be able to work out a joint venture with Mr. Wu. Paul had a packing and bottle plant and he thought Mr. Wu might be able to make the product. The idea worked, and Paul and Mr. Wu became close friends, with Paul and his wife even being invited by Mr. Wu for dinner at his son's house in Middletown, New York. Before that, Mr. Wu and Paul had gone shopping together for used food equipment—each needed a kettle. Mr. Wu took Paul through his factory and showed him their Fujiwara soy sauce equipment, from Japan. A man named Mr. Lee came over and set up the entire factory. One day Mr. Lee wrote down the recipe for Hoisin Sauce for Paul.

At the time Mr. Wu needed a stainless meter; Paul had one, which he gave them as a present. They were very, very friendly. About 7-9 years ago, Mr. Wu's son, Michael, took over the company. Before that their son-in-law ran the company, but not very successfully. So they sent him up to Albany, New York, where he opened a bakery. Michael now runs the company. He is still very friendly, but starting about 4 years ago, when Paul places an order for fermented soy beans for his Hoisin Sauce—Michael stopped delivering it. Michael wanted to make his own Hoisin Sauce, but he was also upset because Paul had a better recipe. Michael had a problem with syneresis with his starch, which he couldn't overcome. His Hoisin Sauce was like a glob of Jello sitting in a bottle of water. Moreover, it was much too salty. Both companies try to sell to the same customers. So Paul has had to try to figure out how to make Hoisin Sauce on his own.

Paul used to get "fermented soybeans" from Mandarin to make his Hoisin Sauce. About 4-5 years ago, they stopped selling these fermented soybeans to Paul because they started making Hoisin sauce themselves. So Paul's sauce has been off the market for 4-5 years. On the East Coast of the USA, Paul's Hoisin sauce is most widely used on barbecued spareribs, as well as Peking Duck—made with Mexican wheat flour tortillas. All the other brands of Hoisin Sauce are much too salty for Paul's taste. Address: Owner, House of Herbs, Inc., 38 Ann St., P.O. Box 178, Passaic, New Jersey. Phone: 201-779-2422.

8002. Lightlife Foods, Inc. 1997. Now your soy set can be as effective as it is appetizing: Introducing Lightlife's "Eating Healthy Can Be Soy Easy" merchandising program (Leaflet). Greenfield, Massachusetts. 1 p. 28 cm.

• Summary: This full-color, glossy leaflet shows a shelf set of all of Lightlife's soy products in the produce section, flanked on both sides by celery, lettuce, tomatoes, artichokes, bell peppers, and mushrooms. Products (from top to bottom) include: Smart dogs!, Wunderdogs, Tofu Pups, Lightburgers, Marinated Grilles (barbecue, lemon, tamari), Smart Deli, Lean Links (Italian, breakfast), Soy Gourmet, Gimme Lean (meatless), Tempeh, Savory tempeh strips, and Nasoya tofu. At the top is a booklet (1997) titled "Eating healthy can be soy easy."

The text reads: "As any as 120 million people are on meat restrictive diets—and just about everybody else wants to cut cholesterol and fat. Soyfoods, for many of these people, are becoming one of their basic food groups. These consumers are spending more of their food dollar in the produce department and that's why Lightlife soy set in your produce section makes sense—and sales. Only Lightlife provides a fully integrated, complete merchandising system."

"As a leading producer of meatless soy based products, Lightlife delivers satisfying flavor through an entire line of mouthwatering vegetarian replacements for hot dogs, burgers, sausage, luncheon meats, ground meat, and

tempeh.”

“Why lightlife? Proven category leader. Merchandising support. No spoilage.” www.lightlife.com. Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001 Ext. 129.

8003. Lightlife Foods, Inc. 1997. Eating healthy can be soy easy (Brochure). Greenfield, Massachusetts. 12 p. 22 cm.

• **Summary:** On the cover of this full-color, glossy brochure is a color photo of a meatless burger (between buns, with onion, tomato, and lettuce), a hot dog (in a bun, with a bead of mustard on top), and a plate of stir-fried tempeh with veggies. In the background are rolling soybean fields. In the foreground are three pods of green vegetable soybeans, and 15 whole dry soybeans.

Contents: Ten reasons to include soyfoods and soy protein in your diet (p. 2-3): 1. You will be in good company. 2. Lower your cholesterol. 3. Lower your risk of cancer. 4. Menopausal symptoms. 5. Soyfoods are nutritious. 6. A quality protein source. 7. Save our precious resources. 8. A variety of alternatives and greater availability. 9. Better quality. 10. Soyfoods are “in.”

Glossary of common vegetable protein foods (p. 4-5): Tofu, tempeh, meat analogs, soymilk, soy cheese, soy flour, soy protein, textured vegetable protein (TVP), seitan, miso. A table shows each Lightlife product, serving size, and grams of soy protein (soy tempeh has the most at 24 gm per 4 oz serving, followed by Gimme Lean at 18 gm per 4 oz).

Products (with a brief definition of each) and mission statement (p. 6-7): Smart dogs. Tofu pups. Wunderdogs (The first low-fat vegetarian hot dog just for kids). Smart deli slices (fat free). Foney baloney (Kids love it). Lean links sausages. Gimme lean (fat free). Marinated smoky tempeh strips (“Fakin’ Bacon”). Fakin’ bacon bits. Marinated tempeh “grilles” (soy tempeh patties in Tamari, Lemon, and Barbecue flavors). Lightburgers (fat free). Lightsausages (fat free). Tempeh (in 5 varieties—Soy, Three Grain {millet, brown rice, barley}, Garden Vegetable, Quinoa-Sesame, and Wild Rice), Savory seitan, Vegetarian request (100% vegetarian, all-natural entrees). A color photo shows many products in their packages.

Getting started (p. 8-10; how to use key products). About Lightlife (since 1979). Address: P.O. Box 870, Greenfield, Massachusetts 01302. Phone: 1-800-274-6001 Ext. 129.

8004. Ontario Soybean Growers’ Marketing Board (OSGMB). 1997. Overview of the Canadian soyfoods market. Chatham, Ontario, Canada: OSGMB. 44 p. 28 cm.

• **Summary:** This excellent, complete, and accurate market study was compiled by the Collège d’Alfred of the University of Guelph, under contract with the Ontario Soybean Growers’ Marketing Board (OSGMB). The project leaders were Suzanne Lavoie, Charles Goubau, and Ian

Walker. The field research was conducted between Jan. 15 and Aug. 31, 1997. The first study of the Canadian soyfoods market was published in March 1990 (vi + 40 pages).

Contents: Acknowledgments. Summary. Introduction. Research procedures: Methodology, limitations (of the 100 companies in this study, over 75% were visited, interviews were conducted in person, and product samples were collected). The Canadian soyfoods market: History, structure of the Canadian soyfood industry, market highlights by region (The Maritimes, Quebec, Ontario, the Prairies {Manitoba, Saskatchewan, and Alberta}, British Columbia), factors influencing the soyfoods market (A closer look at Canadian demographic trends, a closer look at Canadian immigration trends, a closer look at vegetarianism and family food expenditure trends, research on soyfoods and their health benefits, the American influence). Supply and demand of soybeans for use in soyfoods: Soybean production in Ontario, imports and exports of soybeans, imports and exports of soy products, the soybean crushing industry in Ontario, consumption of whole soybeans by soyfood processors. Opportunities in the Canadian soyfoods market. Soyfood processors and their needs. Market opportunities for food-grade soybeans. Summary comments. Bibliography.

Tables show: (1) Major soyfood companies established in the province of Quebec (p. 13). (2) Major soyfood companies established in the province of Ontario (p. 16). (3) Major soyfood companies established in the province of British Columbia (p. 19).

(4) Percentage of change in units and sales (p. 21). (5) Percentage distribution of population—Canada (p. 22). (6) Percentage distribution of age groups—Canada (p. 22; In the 15-24 age group, 19% did not eat meat in 1992, down from 23% in 1986).

(7) Percentage of population who do not eat meat & share of budget spent on meat, Canada 1986 and 1992 (p. 28). (8) Canadian soybean: Supply and disposition (September–August crop year)—in metric tons (p. 31). (9) Canadian soybean exports by country of destination (p. 32. In 1997-98 some 325,000 tonnes went to the European Union, 145,000 to the USA, 85,000 to Japan, 40,000 to Hong Kong, 75,000 to other Asia, and 15,000 to other places).

(10) Imports and exports—All countries, dollar values (p. 33. The leading imports are soybean meal \$202.7 million, crude soybean oil \$16.75 million, and whole soybeans for oil extraction \$12.59 million. The leading exports are protein concentrates and textured protein substances \$9.1 million, soybean meal 6.5 million, and brans, sharps and other residues \$4.3 million).

(11) Soybean crushing facilities in Canada (p. 34. All are located in Ontario province; ADM Agri-Industries Ltd., Windsor. Capacity: 3,600 tonnes/day of raw soybeans. CanAmera Foods, Hamilton, 3,000. Helin Oil Packers, Whitby, 250. Started crushing in 1997. Cold Springs Farm Ltd., Thamesford, 100. Started 1995. Sunfield Oil Seeds,

Wingham, 100. Started 1994. Dennis Jackson Seeds Services Ltd., Dresden, 40. Started 1994. Tri County Protein Corporation, Iroquois, 100. Not in operation yet).

(12) Estimated quantities of soybean utilized by soyfood processors—1996—metric tons (p. 35. Total volume of whole soybeans consumed: 9,650 tonnes, of which 4,780 are for soymilk, 4,775 are for tofu, and 95 are for other soyfood products). Total volume of whole soybeans consumed by province (by soyfood processors): British Columbia 3,825 tonnes, Ontario 3,050 (excluding crushing plants), the Maritimes and Quebec 2,535, and the Prairies 240.

(13) Major foreign companies in the Canadian soyfood market (p. 37. Soy cheese: Soyco Foods, Sharon's Finest, Cemac Foods Corp. {Nu-Tofu}. Frozen desserts: Tofutti Brand, Inc. Tempeh: Turtle Island Foods Inc. Tetra Pak packaged soymilk: Westbrae Natural Foods, Cenat, Pacific Select, Vitasoy USA Inc., Eden Food Inc. Tofu: Mori-Nu, Vitasoy USA Inc. Prepared dishes: Amy's, Sharon's Finest. Meat analogs: Fantastic Food Inc. MGM Brands, Northern Soy, Soy Boy, Turtle Island Foods Inc. Salad dressing: Nasoya Foods. Soy sauce: Eden Foods Inc., Kikkoman Foods Inc.).

The Prairie Provinces (Manitoba, Saskatchewan, and Alberta) contained about 16.6% of Canada's population (4.5 million persons) in 1995. "The province of Alberta [Capital = Edmonton] is different from the other two Prairie provinces, due mainly to its larger population base, its growing Oriental population and its proximity to Vancouver. Calgary [a large city in Alberta province] and Edmonton have their own Chinatowns, including small Oriental-owned tofu and soymilk production facilities." Note: According to the Canadian Soyfoods Directory (1997, p. 14), there are 7 soyfoods companies in Alberta province, 2 in Manitoba, and none in Saskatchewan. Address: OSGMB, 180 Riverview Dr., P.O. Box 1199, Chatham, ON N7M 5L8, Canada. Phone: 519-352-7730.

8005. Fitzpatrick, Michael. 1997. Soy far, so good. *Guardian (England)*. Oct. 25. p. B57.

• **Summary:** This article is mostly about soy sauce. "As for promoting longer life, reports of the Japanese press have declared soya beans to be anti-carcinogenic, especially the revolting fermented soya-bean concoction called natto."

American consumers already use vast amounts of soy sauce, but to promote it in Europe, Kikkoman sponsors an annual competition in the UK and Germany named "Kikkoman Masters." Kikkoman asks chefs in these two countries to make their own favorite recipes using Kikkoman soy sauce.

In the UK, Japanese soy sauces are definitely more expensive than their Chinese counterparts, and there are more varieties of Chinese soy sauce on the market to choose from. Yet there are an estimated 7,000 soy sauce makers in Japan—although many of the smaller ones sell only locally or

regionally.

The Yamasa company makes and sells three types of soy sauce: regular, table number one with reduced salt, and one made especially for raw fish [sashimi]. Two other brands [owned by other companies] are Higashimaru (from Osaka) and Kurashi-more (declaring itself top grade and expensive).

8006. Madison, Deborah. 1997. *Vegetarian cooking for everyone*. New York, NY: Broadway Books. x + 742 p. Oct. Illust. Plus 24 full-page color plates. Index. 26 x 21 cm. A tenth anniversary edition was published by Broadway Books in 2007, featuring a new introduction by the author.

• **Summary:** One of the most comprehensive vegetarian cookbooks ever published; Contains 1,400 recipes. One chapter, titled "The Soy Pantry" (p. 593-609) has the following contents (with many recipes): Introduction (The soybean is the cow of the Orient). Soy milk. Tofu. Tempeh. A sidebar (p. 594) lists more recipes that include soyfoods, by chapter.

Soy-related recipes (not including those on p. 593-609) include: Soy oil (p. 43). Bechamel sauce (p. 53; dairy-free variation uses soy milk). Tofu "mayonnaise" (p. 60). Tofu garlic "mayonnaise" (p. 60). Sesame sauce with tofu (p. 67). Peanut-tofu sauce (p. 69). Spring rolls with napa cabbage and tofu (p. 107). Tofu salad spread (p. 129). Marinated tofu sandwich (p. 130). Tempeh on rye sandwich (p. 130). TLT—Tempeh, lettuce, and tomato sandwich (p. 130). Buckwheat noodle salad with grilled tofu and roasted peppers (p. 178). Green goddess dressing (p. 190; dairy-free variation with silken tofu). Miso soups (about, plus 5 recipes; p. 231-33). Mushrooms with paprika and sour cream—variation with tofu (p. 255). Thai tofu and winter squash stew (p. 257). Winter vegetable pot pie (p. 259; dairy-free variation can use soymilk).

In the section on "Stir-fries" and stir-frying is a subsection titled "Some essential Chinese ingredients." The last entry (p. 262) is: "Salted and fermented black beans: Black soybeans partially fermented and preserved with salt add a rich flavor to vegetables, especially asparagus, green beans, and broccoli. Crush them with the flat of a knife before adding them to release their flavor. The best come in a plastic bag with ginger and orange peel."

Vegetable stir-fry with fermented black beans (with "2 tablespoons fermented black beans, chopped," p. 263). Mushrooms and tofu in Hoisin sauce (p. 269). Stir-fried broccoli, mushrooms, and peppers with caramelized tofu (p. 270). Dried mushroom, leek, and tofu stir-fry with Chinese barbecue sauce (p. 270). Goat cheese enchiladas with corn and red mole (p. 292; silken tofu can replace a portion of the goat cheese to give a less rich version). Soybeans (about; p. 314). Somen in broth with silken tofu and spinach (p. 482-83). Soba in broth with spinach, purple dulse, and silken tofu (p. 483). Udon with stir-fry and five-spice tofu (p. 484). Smoothies (p. 594). Protein drink for breakfast (p. 617, with

soy milk). Breakfast burritos with tofu (p. 625). Scrambled tofu (p. 627). Scrambled tofu with herbs and cheese (p. 627). Scrambled tofu with tomatoes and salsa (p. 627). Multigrain waffles (with soy flour, p. 633).

Also used in the recipes are: Quinoa. Sea vegetables. A color photo on the cover shows Deborah Madison.

The dust jacket (and *Jessica's Biscuit Cookbook Catalog*, spring 1998) says: "What Julia Child is to French cooking and Marcella Hazan is to Italian cooking, Deborah Madison is to contemporary vegetarian cooking. At the Greens restaurant in San Francisco [California], where she was the founding chef, and in her two acclaimed vegetarian cookbooks, Madison elevated vegetarian cooking to new heights of sophistication... Madison received the M.F.K. Fisher Mid-Career Award in 1994... She has been a board member of the Santa Fe Area Farmers' Market for the past six years in Santa Fe, where she lives with her husband, Patrick McFarlin."

Marion Cunningham, author of Beard Award winners *The Fannie Farmer Cookbook* and *The Fannie Farmer Baking Book*—"If I could have only one book on the subject of vegetables, *Vegetarian Cooking for Everyone* would be it."

Letter (fax) from Dana Jacobi. 1998. April 26. This cookbook just won the IACP/Julia Child award as the "cookbook of the year" for 1998—the highest honor given, out of 432 books nominated—and a tremendous honor for vegetarianism as well as for Deborah Madison. Note: IACP is the International Association of Culinary Professionals. This book also won the IACP/Julia Child award as the best general cookbook of the year (out of 54 cookbooks nominated, and beating out the new 1997 edition of *The Joy of Cooking*). Two major sets of cookbook awards are given each year: The IACP/Julia Child awards (given in April at a different location each year) and the James Beard awards (given in May in New York City). Each set offers awards in something like 10 different categories. There is surprisingly little overlap among the nominations for both in each category. Address: Santa Fe, New Mexico.

8007. *Soya Bluebook Plus*. 1997. Oilseed glossary: Definitions and terms commonly associated with oilseed products or processing. 1998. p. 354-60.

• **Summary:** Acidulated soapstock, activated, amino acids, antioxidant, biodiesel, biotechnology, bleaching, bleaching earth, bolls, Bowman-Birk trypsin inhibitor, bran, break material, cake, canola, canola meal, catalyst, coconut, coconut–desiccated, coconut milk, coconut meal, cold pressed soy oil, cold test, confection sunflower, cooking oil, copra, copra meal, corn bran, corn feed meal, corn flour, corn germ meal (wet milled), corn gluten feed, corn gluten meal, corn grits, cotton linters, cotton plant by-product, cottonseed–glandless, cottonseed cake (or cottonseed flakes)–mechanical extracted, cottonseed meal–solvent

extracted, cottonseed screenings, cotyledon, cracked corn, cracking, crude cottonseed oil, crude soy oil, defatted soy flour, degermed, dehulled–dehulling, degummed soy oil, degumming, deodorized, desolventizer-toaster, diglyceride, drying oil, edamame, edible crude soy oil, edible refined soy oil, emulsifier, endosperm, esterification, expanded–expanding, expeller, extracted–mechanical, extracted–solvent, extruded, extruder, extrusion, fat, fatty acid, feed (feedingstuff), feed grade, fermented–fermenting, flaking, flour, free fatty acid (F.F.A.), full-fat soy flour (enzyme active or heated/toasted), fully refined soy oil, genetic engineering, germ, ghee, gossypol, grain, green vegetable soybeans, grits, groundnut, gumming, high-fat flour, hilum, hulls, hydrogenated vegetable oil, hydrogenization [sic, hydrogenation], hydrolyzed corn protein, hydrolyzed soy protein, isolated soy protein, kibbled soybean meal, Kunitz trypsin inhibitor, lecithin, lecithinated soy flour, linseed meal, linters, lipoyxygenase, low gossypol cottonseed meal, low-fat soy flour, malto dextrins [maltodextrins], margarine, maturity groups, meat analogs [meat alternatives], meat extenders, melting point, methyl esters, miso, monoglyceride, natto, nutraceuticals, oil, okara, once refined soy oil, oxidation, palm kernel oil, palm olein, palm stearin, peanut hulls, peanut meal, peanut skins, pellets, polymerization, processing or extraction of oilseeds (also called "crushers" or oil mill operations–solvent extraction, continuous pressing, batch pressing), protein, pulses, raffinose, rancidity, rapeseed meal–mechanical extracted, refining, refractive index (R.I.), rolled or rolling, salad oil, shortening, soapstock, solvent extracted, solvent extracted soybean flakes, soy flour, soy grits, soy protein concentrate, soy protein isolate, soy sauce (incl. that hydrolyzed with hydrochloric acid), soy sprouts, soya, soya lecithin, soybean(s), soybean ground, soybean cake, soybean curd, soybean fatty acids, soybean feed–solvent extracted, soybean flakes and 44% protein soybean meal, soybean flakes and high protein or solvent extracted soybean meal, soybean hay sun-cured ground, soybean hulls (or seed coats), soybean meal, soybean meal–dehulled–solvent extracted, soybean meal–dehulled–mechanical extracted, soybean mill feed, soybean mill run, soybean processor, soybean protein product–chemically modified, soybean seeds–extruded ground, soybean seeds–heat processed, soybean solubles–condensed, soybean solubles–dried, soyfoods, soymilk, soynuts, spinning (to texturize soy protein isolate for food or industrial use), stachyose, steepwater, sterols, sunflower hulls, sunflower meal–dehulled–mechanical extraction, sunflower meal–dehulled–solvent extracted, sunflower meal–mechanical extracted, sunflower meal–solvent extracted, sunflower seed–oil varieties, technical grade refined soy oil, tempeh, textured soy concentrate, textured soy flour, textured soy protein, toasting, tofu, transgenic, triglyceride, trypsin inhibitors, unsaponifiable matter, unsaturation, vanaspati–vegetable ghee, wet-milled, whole-pressed cottonseed–mechanical

extracted, winterized oil, yuba. Address: 318 Main St., P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207-288-4969.

8008. Gonzalez-Watanabe, Yvonne; Watanabe, Joji. 1997. Introducing tofu to Hispanics. Visit to the House Foods America Corp. tofu factory in Garden Grove near Los Angeles (Interview). *SoyaScan Notes*. Nov. 9. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Yvonne and her husband Joji (who first contacted Soyfoods Center on 12 Sept. 1997) are interested in translating *The Book of Tofu* into Spanish and introducing tofu to the Hispanic community, starting in Los Angeles. Yvonne, age 24 was born in the USA, where her parents (who are both from Costa Rica) lived for 30-35 years; her father was a pharmacist. She learned to speak some Spanish at home. Her parents have returned to Costa Rica. Yvonne (who was raised a Catholic) now works in a real estate office and teaches vegan cooking classes at the Kanzeonji Non-Sectarian Buddhist Temple and Shiva Ashram Yoga Center at Mt. Washington in Los Angeles; there both she and Joji practice Zen meditation and yoga. Rev. Ryugen Watanabe, Joji's uncle, is a Soto Zen master, yoga teacher, and the head of this temple. Both Yvonne and Joji are vegetarians, and she is a vegan. Her sister is an editor for *El International*, a big Spanish language magazine located in Miami, Florida.

Yvonne got interested in vegetarianism and soyfoods through Rev. Watanabe. She had had severe migraine chronic headaches for many years. After trying every possible remedy to no avail, she told her uncle, Rev. Watanabe, about her problem. He said simply but forcefully, "It's your diet." She thought: "He's crazy. I have a great diet." In 1994, although she had been eating meat for 30 years, she tried the vegetarian diet he recommended and got quick relief. Following his advice, she began by giving up red meat and pork, then phased out chicken and fish until after 8-9 months she was consuming a vegan diet. As Yvonne began educating herself about vegetarian nutrition, she was looking for alternatives to meats as a source of protein. Rev. Watanabe told her about tofu, and even taught her how to make it at home from whole soybeans. Now Yvonne teaches other people how to make tofu at home.

Yvonne has great admiration for Rev. Watanabe. "He's really great. He's been teaching Zen and yoga for more than 20 years and he still charges the same, low prices—\$2.00 for a yoga class. If you can pay, you pay. If you can't, how about rolling some incense. It's wonderful. I've never seen someone so committed to people."

Yvonne has been a vegan ever since and has not had a headache in almost five years. A friend of Yvonne's had migraine headaches that were so bad, she had to give herself shots. Yvonne suggested that she try switching to a vegetarian diet. She hasn't had a headache in a year. Over the years many of Yvonne's female relatives (her mother, sister, cousin, etc.) have become vegan—largely because they want

to lose weight.

Joji, age 36, was born in Tokyo but has lived in the USA since age 6. He speaks Japanese and English and is a financial consultant. Joji graduated from USC, and now works in a corporate environment in real estate financing. His grandmother, Masa Miyai, lives with them. Four years ago they shut down their business selling medical supplies to Latin America. Now they are developing a project to introduce tofu to Hispanics.

On Oct. 18-19 Yvonne and Joji visited Soyfoods Center, where they talked with Bill Shurtleff about their project and book publishing. They photocopied many Spanish-language documents and recipes related to tofu. Upon returning to Los Angeles, they developed a one-page Spanish language brochure on tofu, visited with Margaret Endo in order to arrange for a booth in next summer's Tofu Festival, and began to do research.

Their first research project was a visit to the House Foods America Corp. tofu plant in Garden Grove, Southern California. After a brief meeting with employee Miyuki Nagano, she took them on a walking tour of the plant, so they were able to observe the entire tofu-making process. It is completely automated, except when a worker smooths the curds in the pressing trays before they are pressed. The company employs about 120 people at this facility. Of the 78 workers in the factory (including shipping and receiving), 98% are Hispanic men, but the office workers are all Japanese. The company has its own delivery trucks; its marketing is focused on California, in part because of increased competition from companies outside the state—as in Massachusetts [Nasoya Foods]. The company invites the Hispanic workers to take home tofu, but they don't—probably because they don't know what to do with it. The company has a full test kitchen and laboratory, and Miyuki is interested in developing tofu recipes that Hispanics will like. The company also makes natto at this plant.

Update: Talk with Yvonne. 1997. Nov. 23. Her cousin, Alejandra Jimenez, from Costa Rica has just arrived in Los Angeles to work with her on the tofu project. Alejandra's native language is Spanish but she also speaks perfect English and has a master's degree in English. Another cousin from Costa Rica is part of an all-male rock band, whose members are ages 30-37; all were born and raised in Costa Rica. She served them 3 tofu recipes—which they liked very much: (1) Tofu cubed in miso soup; (2) Chilled tofu, cubed with sesame oil, rice vinegar, and soy sauce; and (3) Crisp freshly deep-fried tofu cubes, with soy sauce. They are interested in using tofu as part of a weight-loss program.

They all went to a Chinese vegetarian restaurant in nearby San Gabriel named Vegetarian Delights. Run by a Chinese-American lady, it served a delicious dish named Roasted Black Bean Fish, that tasted remarkably like fish—but used tofu instead of fish. Yvonne made friends with the owner. Address: 6029 LaPrada St., Los Angeles, California

90042. Phone: 213-254-1712.

8009. Eden Foods, Inc. 1997. Eden soy sauces: Traditionally brewed shoyu & tamari (Ad). *Vegetarian Times*. Nov. p. 71.

• **Summary:** This 1/3-page color ad shows bottles of the following: Eden organic tamari (soy sauce; Purple label is “Naturally brewed” in the USA for about 6 months; Green label is “Traditionally brewed” for up to 2 years and imported from Japan). Eden organic shoyu. Eden selected shoyu (2 sizes). “Eden Soy Sauces are created just as they have been for centuries by master brewers who are truly artisan craftsmen. They are aged and tended for over two years, creating rare and versatile soy sauces.” Address: Clinton, Michigan 49236. Phone: 1-800-248-0320.

8010. Ontario Soybean Growers’ Marketing Board (OSGMB). ed. and comp. 1997. Canadian soyfoods directory. Chatham, Ontario, Canada: OSGMB. 27 p. 28 cm.

• **Summary:** This excellent, complete, and accurate directory was compiled by the Collège d’Alfred of the University of Guelph, under contract with the Ontario Soybean Growers’ Marketing Board (OSGMB). The project leaders were Suzanne Lavoie, Charles Goubau, and Ian Walker. The first Canadian soyfoods directory was published in April 1994 (22 pages).

Contents: Foreword—Ontario Soybean Growers’ Marketing Board (OSGMB). Acknowledgements from researchers. Table of contents. Soyfood product descriptions: Green vegetable soybeans—Edamamé, meat analogs, miso, natto, okara, soy cheese, soy flour, soy frozen desserts, soy grits, soy isolate fibre, soy lecithin, soy oil, soy protein concentrate, soy protein isolate, soy pudding, soy sauce, soy sprouts, soy yogurt, soymilk (soy drink and soy beverage), soynuts, tempeh, textured soy flour—TSF, texturized soy protein, tofu, whole dry soybeans, yuba. Soyfoods for your health: Heart disease, cancer, osteoporosis, other conditions. Composition and nutrient value of soyfoods. Soyfood companies by product. Soyfoods companies by province: Alberta (7), British Columbia (21), Manitoba (2), Nova Scotia (2), Ontario (54), Quebec (20). Soyfood companies (105 companies that make or market wholesale soyfoods)—complete listings (address, phone and fax numbers, contact person, products). Soyfoods distributors—complete listings (13). Soybean distributors—complete listings (28). Research information sources—complete listings (24). Soyfoods information sources (23). Canadian soyfoods directory questionnaire.

Spot in *Ontario Soybean Growers’ Marketing Board Newsletter*. 1997. Dec. p. 5. The Canadian Soyfoods Directory was launched in November after a two-month delay. “The project was undertaken following numerous information requests from consumers, processors and health professionals.” Funded by the Board of OSGMB, it has been mailed to all Registered Dietitians across Canada, and it will

soon be available on the Board’s website. Address: OSGMB, 180 Riverview Dr., P.O. Box 1199, Chatham, ON N7M 5L8, Canada. Phone: 519-352-7730.

8011. Macdonald, Bruce. 1997. Macrobiotic Company of America is thriving and macrobiotics is making a comeback in America (Interview). *SoyaScan Notes*. Dec. 2. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Bruce’s company focuses on high quality, macrobiotic foods. Company sales and number of accounts are growing rapidly. When he bought the company in Sept. 1993, they had about 900 accounts; this grew to about 2,500 in 1997 and 5,000 at present. The number of individual/personal accounts is growing the most rapidly. The main individual buyers seem to be aging baby boomers—those from the same generation as the people who founded the movement 30 years ago in the late 1960s and 1970s. Why are they buying? First, macrobiotics has been Americanized and de-mystified. Many of the teachers are now Americans and the heavy Japanese emphasis is disappearing. Second, the baby-boomers are realizing that they had better start eating well or they will soon pay the price in poor health and shorter longevity.

Bruce’s best-selling macrobiotic products are kuzu, nori and wasabi powder (for people to make sushi at home), 4-year soy sauce (*nama shoyu*), and Johsen organic shoyu (in quarts or 10 oz bottles). He gets 100-200 catalog requests each week and does no advertising. Lenny Jacobs likes to say that macrobiotics is on the decline, but he doesn’t know what he’s talking about. Address: President, Macrobiotic Company of America, Asheville, North Carolina 28806. Phone: 704-252-1221.

8012. Kamego, Marco. 1997. Re: History and present status of Kikko Corporation S.A., manufacturer of soy sauce and miso in Peru. Letter to William Shurtleff at Soyfoods Center, Dec. 29. 3 p. [Eng]

• **Summary:** Mr. Kamego filled out a 3-page company history form sent by Soyfoods Center. This company was founded in April 1957 in Peru by Mr. Manuel Toshihiko Kamego (Marco’s father) and Mr. Alejandro Kioyasu Kamego (Manuel’s brother). In 1957 the company, named *Fabrica de Siyau Kikko Sociedad de Responsabilidad Limitada*, was located at Av. Colombia 171, Pueblo Libre, Lima, Peru. Phone: 32-3754. The company’s first two products, Kikko Siyau (“soy” sauce—but made with Peruvian common beans, *Phaseolus vulgaris*, instead of soybeans because the latter were not available) and Miso Kikko (both *shiro miso* {sweet white miso made with rice} and *aka miso* {red miso made with barley}) were both introduced in 1957. These products may have been the world’s first shoyu and miso made with common beans instead of soybeans. In 1960 the company first began to use soybeans in its products; they were grown in Tumbes, on the northern coast of Peru.

From the beginning, the company was dedicated to the traditional, nearly hand-made production of sauces and foods to supply the restaurants and homes of Peruvians of Asian origin through the home delivery system. Marco writes: “We are the pioneers of soy sauce manufacturing in Peru. It is through our product that the Peruvian native people have come to know soy sauce, its use and quality. Our company has succeeded because of tenaciousness, as well as adaptation to the requirements of the Peruvian market.” The Kamego family originated in Japan. The two Chinese characters (*kanji*) with which the family name is written, can also be pronounced “Kikko” and mean “turtle’s shell.” This explains the origin of the Kikko brand and emblem/logo. Note: The name and logo is very similar to that of Kikkoman, the world’s leading manufacturer of soy sauce.

In 1964 the company introduced its third soy product, Mensi Kikko (in Chinese *mien shih* = sweet wheat-flour fermented black soybeans), obtained from fermentation of whole soybeans; it is known as *mianchi* (*mien shih*) in China and *doenjang* in Korea. In 1979 Ajinomoto, the world’s leading manufacturer of seasonings and of MSG, began to produce soy sauce in Peru in competition with Fabrica de Siyau Kikko, but as of 1997 Kikko is still the leader in the Peruvian market, ahead of Ajinomoto.

In July 1994 the company moved its factory and offices to a new location, which is the present address: Jr. Alexander Fleming 432, Ate, Lima 03, Peru.

In 1995 the company was reorganized as Kikko Corporation Sociedad Anonima (S.A.). This new company was formed from the merger of the original company with Sazonadores S.R.L. Note: *Sazonadores* means “seasonings” in Spanish. At this time the company launched three new products: Kikko Shoyu; Salsa de Soya, Salsa Mensi (*mensi* / *mien shih* seasoned with spices), and Ajoikion (soy sauce seasoned with ginger and garlic; in Peruvian, *kion* means ginger—the Spanish word is *jengibre*; in Spanish, *ajo* means garlic).

Present status: The company now makes each week: 25,000 liters of soy sauce, 2,000 liters of Salsa Mensi, and 2,000 liters of Ajoikion. Their second best-selling product is sweet and sour sauce, but it contains no soy. They still make *shiro miso* (sweet white miso) fermented for 5 months, but have discontinued red miso. The company employs 51 people, including 5 in management, 36 production workers, and 10 office and others. The current owners are Manuel Kamego, Marco Kamego, and Alejandro Kamego’s heirs. Net sales last year were \$1,500,000. The net worth of the business is about \$115,000. The company’s sales have grown, on average, at about 2% each year over the past 2-3 years. The building is 2,000 square meters in size: 1,800 for production and 200 for office space. As of late 1997 the factory is located at Robert Fulton 115, Lima 3, Peru. Most of the soybeans now used by the company come from Bolivia

Marco encloses attractive full-color labels for four products: Kikko Shoyu, Salsa Mensi, Ajoikion, and Kikko Siyau. Address: Jr. Alexander Fleming 432, Ate, Lima 03, Peru. Phone: +511 326-0870 or 1200.

8013. Kikko Corporation S.A. 1997. Kikko–Salsas naturales. Siempre lo hace más rico [Kikko–Natural sauces. Always makes it richer]. Lima, Peru: Kikko Corporation S.A. 4 p. 30 cm. [Eng; Spa]

• **Summary:** This glossy, full-color brochure is written mostly in English, but with Spanish on the cover. On the cover is the embossed Kikko logo on a blue photograph of sliced vegetables and shrimp on plates. The inside is a two-page spread, with all-English text. The text is superimposed on a color photo of Japanese foods. Across the top in big white-and-black letters: “Kikko, since 1957, leading manufacturer of natural sauces.” At the top left is a sidebar telling about the company, its history, and market position. Today the Kikko brand has become a leader in the Peruvian market; it has been the most consumed soy sauce in Peru since 1957. The soy sauce is aged for no less than 6 months. Across the bottom are color photos of each of the company’s five bottled sauce products, with a description of each next to the photo. On the back is one photo of all the company’s products together. The address of the plant and offices and all phone numbers are given. Address: Jr. Alexander Fleming 432, Ate, Lima 03, Peru. Phone: +511 326-0870 or 1200.

• **Summary:** “Activity #3. Tempeh, soy sauce, and other mold-fermented foods.”

8015. Grogan, Bryanna Clark. 1997. Twenty minutes to dinner: Quick, low-fat, low-calorie vegetarian meals. Summertown, Tennessee: The Book Publishing Co. 192 p. Illust. Index. 21 cm.

• **Summary:** This vegan cookbook contains a wealth of soy-related recipes. The glossary mentions tofu, soymilk, soymilk powder, tempeh, miso, soy sauce (shoyu, tamari) textured vegetable protein, Chinese condiments (hoisin sauce, Chinese black bean sauce, Chinese brown bean sauce, Szechuan hot bean paste), seitan, soy bacon bits or chips.

In the section titled “Ingredient substitutions,” under “Yeast products” we read (p. 15): “I can think of no practical substitutes for light miso or certain fermented Chinese products like doufu-ru (Chinese fermented bean curd, which has a strong ‘blue cheese’ type of flavor).”

The recipe for “Buffalo potato wedgies” (an alternative to “Hot wings”) advises: “Dip the crusty wedgies into Vegetable Dip (p. 48)—you can add a bit of crumbled, white

Chinese fermented tofu (doufu-ru) to make it more like traditional blue cheese dressing or dip.”

Also includes soy-free options for recipes with tofu and soymilk. Address: Denman Island, east of Vancouver, British Columbia, Canada.

• **Summary:** The recipe for Korean-style grilled steaks (p. 353-54) is an adaptation of *bulgogi*, the well-known Korean barbecue dish that features thin strips of beef. Both San Francisco and Los Angeles have large communities of Korean immigrants, with many Korean restaurants and markets. “Note: To make *samjan* sauce, mix 2 parts *dhwen-jang* [*doen-jang*], or Korean bean paste, with 1 part *gochujang*, or Korean barbecue sauce.” Both are available in Asian food stores. Miso may be substituted for *dhwen-jang* and *sambal ulek* for *gochujang*.

Note: This is the earliest English-language document seen (March 2009) that uses the word “*gochujang*” to refer to Korean-style red pepper and soybean paste (miso).

Teriyaki recipes appear on pages 318 and 327.

Contains a good bibliography, and many sidebars, on the history of California cooking. Address: California.

8018. Katzen, Mollie. 1997. Vegetable heaven. New York, NY: Hyperion. xv + 223 p. Illust. (Color by Mollie Katzen). Index. 27 cm.

• **Summary:** A handsome vegetarian cookbook. Soy-related recipes include: Vietnamese salad rolls (with firm tofu, p. 11). Kung pao lettuce cups (with firm tofu, Northern Chinese, p. 13). Eggflower soup with pasta shells (with firm tofu, p. 32). Potato soup with rosemary and roasted garlic (with silken tofu, p. 33). Coconut-lemon grass soup (with firm tofu, p. 43). Baked coated nuts sweet or savory (with soy sauce, p. 57). Basic soyburgers (with cooked soybeans and tofu, p. 76). Green beans and tofu in crunchy Thai peanut sauce (with firm tofu, p. 103). Magic carrot flans (with milk or soymilk, p. 122). Scalloped potatoes three variations (with milk or soymilk, p. 130). Sandwiches to write home about (with firm tofu, p. 136). Buckwheat soba with squash, smoked tofu, and basil (with smoked tofu and miso, p. 144). Tiny pasta stew (with firm tofu, p. 151). Horseradish aioli (with silken tofu, p. 168). Peanut-chile [chili] dressing (with soy sauce, p. 174). Homemade butterscotch pudding (with milk or soymilk, p. 194). Pumpkin mousse with gingersnap crumbs (with silken tofu, p. 196). Bittersweet chocolate-banana mouse (with silken tofu, p. 197).

A color photo on the rear cover shows Molly Katzen.

Address: California.

8019. Keogh, Brian. 1997. The secret sauce: A history of Lea & Perrins. Worcestershire, England: Leaper Books. viii + 135 p. Index. Illust. 21 cm.

• **Summary:** The best history to date of Lea and Perrins, with many interesting dates, stories, photographs and reproductions of early documents, by a man who worked for that company as an archivist and accountant his entire working life.

Note: A letter of May 1994 from Pamela Street, Director, International Division, Lea & Perrins International Ltd. (Worcester, England) says: “I have spoken to our Archivist, Mr. Brian Keogh, who has provided the enclosed papers from our archives. I trust they are of interest to you.”

Contents: Acknowledgments. Introduction. Before the sauce. John Wheeley Lea & family. William Henry Perrins & family partners. The secret recipe. Sauce making. Trade, a tribute to some diverse activities. Bottles and barnacles. Labels on the bottles. Buildings. Malvern water & Burrow Bros. Fruit juice. “By appointment”—The ultimate accolade for British companies. Workers & wages at Lea & Perrins. A factory at war 1940-1944. Edward Coles Corbett: Eccentric! Hero! Super salesman! John Duncan & the USA. Tales from

Canada. Central America & the West Indies. Australia & New Zealand. A few saucy stories. Sample adverts from the 1840s to 1950s. Lea & Perrins after 1930.

Although one chapter is titled “The secret recipe (p. 27-34), soy sauce, which was long the main secret ingredient, is not mentioned.

The following is a brief early chronology gleaned from this book:

1823 Jan. 1—Mr. John Wheeley Lea, an established chemist, takes into partnership Mr. William Henry Perrins, at his chemist shop on Broad Street, Worcestershire (p. 1). They prepare a catalog for the occasion which lists over 300 items, including herbs and spices from around the world. The catalogue includes two ingredients of the sauce to be—anchovies and tamarinds. Note: It also includes “India soy.”

1837—Lea and Perrins Worcestershire sauce is first made commercially in Worcestershire. The secret formula is developed and first made by Mr. J.W. Lea and Mr. W.H. Perrins in the back of their chemist shop at 68 Broad Street, Worcester (p. vii). Worcester is a thriving commercial town on the River Severn, where it controls the major East-West crossing. For centuries the river had been used to carry goods between Bristol and Cardiff (in the southwest, near the ocean) to the Midlands (in the northeast) (p. 1). “Records suggest that the first three batches were brewed in four-gallon jars, then afterwards in twenty-eight casks. More staff were soon required” to meet the growing demand. “From the beginning the bottles were hand-filled and closed by a cork and sealed.” Hand filling continued until 1845 (p. 63).

1840s early—The sauce starts to be “extensively exported” (p. vii).

1843—The earliest advertisement known to the author, from *The Pictorial Times* (no exact date or page is given) is displayed on pages 127-29, together with ads from 1848, 1851, 1897, 1903, 1905, 1907, 1923, and 1934.

1844—Production figures for the year show a record 1,326 dozen 12 oz and 1,314 dozen 6 oz bottles; this totals 31,680 bottles made and bottled in the back of the shop at 68 Broad Street. All bottles are still hand-filled. They soon rented a warehouse on the Quay, then another on Bank St. (p. 64).

1849—The name “John Duncan & Son” first appears on the label of the sauce. However Duncan was not the product’s first agent in New York! That honor goes to “Messrs. Innes & Co.” whose name appeared on the product’s label at an earlier date.

1850—The Great Western is the first railway to arrive in Worcester; mechanical transport begins (p. 2).

1866 Jan. 1—Lea and Perrins have sold their three chemists shops and are now free to concentrate on making and selling their sauce—which is increasingly popular worldwide (p. 65).

The section titled “The Sandy’s family” (p. 29-30) debunks the myth of an early and oft-repeated connection

between “Lord Sandys” and the invention / discovery of Worcestershire sauce. It states: “... no Lord Sandys (either as Sandys of Hill) was ever a governor of Bengal, or as available records show, ever in India. The identity of the nobleman thus remains an intriguing mystery.”

Photos show: (1) Four colorful orange labels (from top left to right): 1. Early 1850s. 2. 1876 Banknote type border started. 3. From 1905 with white signature. 4. Modern label (p. 60). (2) Sample of a Chinese label (p. 61).

Talk with Brian Keogh. 2006. Feb. 23. He is now writing a fictional book about ponies and horses. He is donating his documents and artifacts related to Lea & Perrins to the company so they do not get lost, but nobody there is much interested in the history. Address: 9 Redfern Ave., Worcester WR5 1PZ, England.

8022. Kittler, Pamela Goyan; Sucher, Kathryn P. 1997. *Food and culture in America: a nutrition handbook*. Belmont, California: West/Wadsworth. xiv + 535 p. Illust. (photos). Index. 26 cm. [100+* ref]

• **Summary:** What is American food anyway? Does it include sushi, soy sauce, miso soup, or tofu? How about Peking duck

or pot stickers? How about enchiladas, chile rellenos, or tacos?

This excellent and original work is arranged in chapters by cultural groups or subcultures living in the USA.

The chapter on "Latinos" states under "Foreign influence" (p. 286) that the "demand for Asian ingredients by later immigrants resulted in the introduction of soybean products,..." Under "Regional variations" (p. 290) that Cubans like a chicken dish marinated in lime juice and soy sauce. Under "Meal composition and cycle" (p. 290) that West-African fritters are made from the meal of soybeans..."

The chapter on "Asians," under "Chinese," notes (p. 328-30) that "Soybeans are transformed into an amazing array of food products that are indispensable to Chinese cooking," including soy sauce, soy milk, bean curd or tofu, black beans ("made with cooked fermented soybeans preserved with salt and ginger. Black beans are usually added as a flavoring in dishes"), hoisin sauce, and oyster sauce. Soy oil is also used in Chinese cooking. The Hakkas enjoy tofu stuffed with meat (p. 332). Every Chinese meal aims for a good balance of *fan* (grain foods, such as rice or wheat) and *tsai* (side dishes). "The Chinese believe that a good diet is critical for physical and emotional harmony and necessary to strengthen the body against disease" (p. 334). During pregnancy, soy sauce may be avoided to prevent dark skin (p. 335). Chinese who avoid fresh dairy products because of lactose intolerance, may consume soybean curd and soy milk (if fortified with calcium) as alternatives.

Under "Japanese," soy sauce is a traditional food of Japan (photo, p. 341). Soybean products (p. 350) are an important part of the Japanese diet; they include tofu, shoyu (soy sauce), miso, and teriyaki sauce—to name just a few. Second-generation Japanese use more soy sauce than non-Asians (p. 354) but as their diet becomes Americanized, they fall prey to more diseases of affluence. The response to dairy products and lactose intolerance is similar to that of Chinese, with the use of tofu and soy milk.

Under "Koreans" (p. 363, 366) Soybean products are in important part of the diet; they include soy sauce, soy paste, and soybean curd or tobu [*sic*, *tubu*] (tofu).

Under "Southeast Asians and Pacific islanders." Adobo is a popular Filipino stew, seasoned with soy sauce (p. 389). Soy products include soy milk and tempeh (p. 399, 402, 404, 421-22).

The "Glossary of ethnic ingredients" mentions many soy products including (p. 490): "Black beans, fermented: Black soybeans salted and fermented to produce a piquant condiment. Used in Chinese cooking as a seasoning or combined with garlic, ginger, rice wine, and other ingredients to make black bean sauce." Address: 1. M.S., Food and nutrition education consultant; 2. Dep. of Food and Nutrition, San Jose State Univ., California.

8023. Messina, Virginia Kisch; Messina, Mark. 1997. Soy to

the world. In: 1997 Medical and Health Annual. Published by Encyclopedia Britannica, Inc. See p. 197-202.

• **Summary:** In the section titled "Diet and Nutrition" is a long subsection on "Soy to the world." Contents: Introduction. Sacred crop (history). Varied and versatile: Whole soybeans (incl. green vegetable soybeans), traditional soyfoods (soymilk, tofu, okara, yuba, tempeh, miso, soy sauce or shoyu), modern soy products (textured soy flour or TVP), "second-generation" soyfoods. One of nature's most nutritious foods. Health benefits: the evidence so far: Cancer, heart disease, osteoporosis, kidney disease, menopause. Tofu on your table (how to incorporate soy into American diets; incl. TVP, soymilk, soy flour, soy nuts). Address: 1. M.P.H., R.D.; 2. 8025. Nutrition Education Service, Sanitarium Health Food Company. 1997. Sensational soy cookbook. Sydney, London, Vancouver, New York: Murdock Books. 64 p. Illust. Index. 20 cm. [32 ref]

• **Summary:** A saddle-stitched vegetarian cookbook on glossy paper loaded with color photos and lightweight text. The author and nutritionist is Cathy McDonald of Sanitarium. Recipes developed by Wendy van der Veer of Sanitarium. Contents: The story of soy. The soy family: Miso, soy beans, soy breads & cereals, soy cheese, soy drink, soy flour, soy grits & soy flakes, soy 'meats,' soy pasta, soy sauce, soy snacks, tempeh, TVP, tofu, tofu desserts (ice cream and yoghurt). Breakfasts. Soy for health (isoflavones, menopause, breast cancer, osteoporosis, prostate cancer, heart disease). Light meals. The secrets of soy. Main meals. Soy in perspective. Desserts. Sensational soy (sample menus). Snacks. Know your nutrients. Bibliography.

Estimated isoflavones in soy foods (table). Address: 1 Sanitarium Drive, Berkeley Vale, NSW 2261, Australia.

8026. Passmore, Jacki. 1997. *The vegetarian table: Thailand*. San Francisco, California: Chronicle Books. 160 p. Illust. (color photos). Index. 24 cm.

• **Summary:** The author dedicates this book to Isobel, her daughter, friend and critic, “who can’t pass a day without tofu.”

The Introduction notes that Thailand has a strong and living Buddhist tradition. Since Nature provides plenty of food, Thai cuisine has evolved with a moderate use of red meat, following “the Buddhist precepts on the slaughter of animals.” But many Thais make an exception for seafood, with this charming rationale: “If a fish is stupid enough to swim into a trap and die, then we may as well eat it!”

This book relies heavily on tofu as a meat alternative. The index has 28 entries at “Tofu,” so we will list only a few representative examples below. Contains a wealth of full-page color photos. In place of widely used fermented shrimp and fish pastes, this book uses various salt-fermented soy products such as yellow bean sauce, Chinese bean pastes, fermented tofu in brine, and tempeh (p. 11).

The Glossary defines the following that contain soy: Chili bean paste, fermented tofu, Hoisin sauce, kecap manis [sweet soy sauce], soy sauce (3 types), tempeh, tofu (tao hoo in Thailand); “The soybean is singularly one of the most important food plants in the world.” Few other food products can match the versatility and goodness of tofu. Incl. firm tofu, soft tofu, fried tofu and “bean curd sheets” or sticks [yuba], yellow bean sauce.

Soy-related recipes include: Classic Thai rice soup (with 6 oz. firm tofu, p. 74). Sweet and sour pomelo salad (with ¼ cup {3 oz.} cubed tempeh, p. 78). Green vegetable chu chee curry (with tofu or tempeh, p. 97). Vegetarian jungle curry (with fried tofu, p. 102). Tofu and beans with red curry paste (with fried tofu, p. 105). Clay pot of fried tofu and vegetables in brown sauce (p. 107). Stir-fried tempeh with garlic and pepper (p. 108). Stir fry of wheat gluten or tofu with straw mushrooms (p. 109). Tofu & tomato stir fry (p. 131). Thai fried rice with tofu and egg (p. 135). Pineapple fried rice (with firm tofu or tempeh, p. 136). Glutinous rice with peanuts and mushrooms (with diced fried tofu or tempeh, p. 141).

8027. Rombauer, Irma S.; Becker, Marion Rombauer; Becker, Ethan. 1997. *The joy of cooking*. New York, NY: Simon & Schuster / Scribner. xiv + 1136 p. Illust. Index. 24 cm.

• **Summary:** Soy-related subjects include (* = recipe): Soy sauce butter* (p. 77). Asian black bean sauce* (with “3 tablespoons preserved black beans” [fermented black soybeans], p. 83). Japanese wasabi soy sauce* (p. 83-84). Ginger soy sauce* (p. 84). Soy and sherry marinade* (p.

85). Description of miso soups and their role in the Japanese diet (p. 107-08). Light-colored miso soup with simmered vegetables and dark-colored miso soup with sautéed vegetables and Mongolian Hot Pot—a miso soup based dish* (p. 108). Ginger soy vinaigrette* (p. 238).

One long chapter is titled “Beans and Tofu” (p. 270-294). Lentils with spinach and soy sauce* (p. 280). The section titled “soybeans” (p. 287) discusses their nutritional value, health benefits (“They contain substances thought to help prevent breast and other cancers, as well as Omega-3 fatty acids, which reduce the risks of heart disease”), how to cook yellow and black soybeans, how to dry-roast [to make soynuts], many ways of processing, soy milk, okara, fermented black beans, soy sauce, tamari, miso, soy cream cheese, soy sour cream, and soy cheese. There are also substantial subsections describing the following soyfoods: (1) Soy milk, including a recipe for making it at home (p. 287-88). (2) Tofu, including silken tofu, cottage tofu, frozen tofu, sautéed or fried tofu, and smoked tofu (p. 288-89). Recipes containing tofu include: Szechuan spiced tofu, Southeast Asian curried vegetable stew, Smoked tofu burgers, and Brown rice tofu salad with orange sesame dressing (p. 289-90; the latter recipe calls for toasted sesame oil and adzuki beans, with smoked tofu being optional). (3) Tempeh, including recipes for Moo shu tempeh and Szechuan-style “hacked” tempeh. (4) About soy protein, describing textured vegetable protein and textured soy concentrate, with recipes for Dinner loaf Tex-Mex style and Lion’s head (p. 292). This is followed by a subsection describing seitan and with recipes for Root vegetable and seitan stew, and Seitan kibbe (p. 293-94).

Asparagus with mustard miso* (p. 343-44). Baby bok choy with soy ginger sauce* (p. 349). Steamed scallops or shrimp with soy sauce* (p. 513). Grilled or broiled whole red snapper with ginger soy vinaigrette* (p. 548-49). Small fish, fillets, or steaks poached in soy sauce* (p. 555-56). Chinese soy-braised chicken* (p. 601-02). The chapter titled “Know your ingredients” (1059-87) includes short descriptions of bean sauce, Hoisin sauce, miso, nori, salted and fermented black beans, sesame oil, sesame paste, soy sauce, tamari, tonkatsu sosu (dark spicy sauce based on soy), wakame, wasabi, vinegars from fruit and grains, margarines (mentions trans fatty acids, but not soy), and shortenings (p. 1065-69).

Subjects related to vegetarianism include: Discussion of vegetarian diets (positive and accurate, in Chapter 1, p. 3). List of vegetarian side-dishes and main courses in this edition (27 recipes, p. 20). Vegetarian chili* (p. 283). Dairy-free chocolate cake* (vegan, p. 932). Ultra-orange cake* (vegan, p. 932-33).

Irma Rombauer (the grandmother of Ethan Becker) first wrote the *Joy of Cooking* in 1931, “when domestic help was fast becoming a thing of the past and women all over the country were once again heading to the kitchen.”

Note: This cookbook was written by a committee

of experts, put together by Maria Guarnaschelli. Many controversies and clashes of opinion arose out of this arrangement. Address: 3. Cockaign, Cincinnati, Ohio.

8028. Saio, K. 1997. Soybean foods: Nutritionally and industrially valuable. In: Napompeth, Banpot, ed. 1997. World Soybean Research Conference V: Proceedings. Soybean Feeds the World. Bangkok, Thailand: Kasetsart University Press. xxiv + 581 p. See p. 521-26. Held at Chiang Mai, Thailand, 21-27 Feb. 1994. [10 ref]

• **Summary:** Contents: Abstract. Introduction. Localization of the components seeds and foods. Roles and behavior of the components in soybean food. Physical functionalities of the components. Nutrition and physiological functionalities of the components. Conclusion.

Contains 4 figures (incl. 11 photos and 1 graph) and 4 tables. Table 3, "Chemical composition of main soybean foods (in 100 gm)" includes tofu (regular), abura-age, kori-tofu, yuba, kinako, soybean sprouts, natto, miso (dark yellow), soy sauce (common), TVP [textured soy flour], isolate, soybeans (Japanese). Address: National Agricultural Research Center, 1-1-3 Kannondai, Tsukuba, Ibaraki, Japan 305.

8029. Soy Vay Enterprises, Inc. 1997. Soy Vay "Have we got a taste for you." "This stuff is good!" (Leaflet). Felton, California. 2 p. Front and back. 28 cm.

• **Summary:** On the front of this attractive color leaflet is a large photo of the company's five bottled products on a bamboo sushi wrapper surrounded by fresh garlic, onions and leeks, plus wooden chopsticks and a dish of roasted sesame seeds. The products are Soy Vay Veri Veri Teriyaki (7.5 oz or 21 oz; 1983), Cha-Cha Chinese Chicken Salad Dressing & Marinade (13 oz; 1994), Soy Vay Chinese Marinade (22 oz; 1982), and Soy Vay Island Teriyaki (20 oz; 1994).

On the back is a description of each product and its case size. Four of the five products bear a Kosher seal. The date of introduction is handwritten below each. Address: 5969 Hillside Dr., Felton, California 95018.

8030. Srisawat, Pinyo; Jonglertjesdawong, Yingsak. 1997. The vegetarian taste of Thailand: Vegetable, tofu & seafood dishes from Cha Am restaurant. Berkeley, California: SLG Books. 224 p. Illust. Index. 28 cm.

• **Summary:** Cha Am is a popular Thai restaurant which opened in Berkeley, California in 1985. This is a very beautiful and strange book. Beautiful because on every other page is a spectacular full-page color photo, showing the prepared recipes, ingredients, and many lovely scenes from Thailand. Strange because the word "vegetarian" is in the title, yet a large number of recipes call for fish or seafoods (which have never been eaten by vegetarians) as the main ingredient.

Soy-related recipes include: Tau hoo neng: Steamed bean curd (p. 21). Tao hoo nam daeng: Bean curd stew (p. 27). Tao hoo op moor din: Clay pot bean curd (p. 33). Hoi jor name jim boi: "Seafood" rolls with plum sauce (p. 43; the filling is rolled in "bean curd sheets" [probably pressed tofu sheets, but possibly yuba], each 8 inches square). Tom som Tauhoo: Spicy bean curd soup (p. 63). Tao jiao lon: Spicy fermented soy bean dip (p. 185). On pages 212-13 are full-page color photos of various Thai soybeans and soyfoods.

The section titled "Gluten" (p. 214-17) describes this product and shows how to make it at home. Gluten is also used in recipes throughout the book.

The interesting glossary (p. 221-24) includes descriptions of: Bean curd (*tau hoo* is soft tofu; *tao kwa* is firm tofu, used for stir-frying, deep-frying, and braising). Bean curd, fermented (*tau hoo yee*; the two most common types are red and white. The red variety is cured in a brine with fermented red rice flavored with annatto seeds and rice wine). Bean curd, spongy (deep-frying gives tofu a spongy texture, so it can absorb the flavors of any sauce in which it is cooked a second time). Bean sauce (a seasoning made from fermented soybeans, flour, and salt. There are four popular types: yellow bean sauce, brown bean sauce, black bean sauce, and hot bean sauce. The preferred sauce is made from whole soybeans. The ground varieties are often quite salty). Beans, black fermented (also known as salted black beans, these are small black soybeans fermented with salt and spices. They are delicious when combined with garlic, fresh ginger, or chilies. Note: Fermented white soybeans are called *tao jiao*). Soy sauce (*si iu*; These recipes call for the Chinese rather than the Japanese type. The three most widely used soy sauces are light soy sauce {*si iu khao*}, dark soy sauce {*si iu dam*}, and mushroom soy sauce).

Note: This is the earliest English-language document seen (Feb. 2004) that uses the word "tauhoo" to refer to tofu. Address: Bangkok, Thailand.

8031. Sunarlim, N.; Anwarhan, H. 1997. A synthesis of agronomic results of SYGAP II in Indonesia. In: Napompeth, Banpot, ed. 1997. World Soybean Research Conference V: Proceedings. Soybean Feeds the World. Bangkok, Thailand: Kasetsart University Press. xxiv + 581 p. See p. 500-02. Held at Chiang Mai, Thailand, 21-27 Feb. 1994. [5 ref]

• **Summary:** SYGAP is the soybean yield gap analysis; it was conducted in three locations in Indonesia. The objectives were to identify and alleviate yield constraints and to develop a package of improved practices—which is described.

In Indonesia, about 70% of the soybeans are used for human consumption, mainly in the forms of tempeh, tofu, soy sauce, and tauco (fermented whole soybeans). Address: Bogor Research Inst. for Food Crops, Tentara Pelajar 3A, Bogor, Indonesia.

8032. Kikkoman International Inc. 1998. Talk about a

signature sauce! The true taste of soy sauce (Ad). *Nation's Restaurant News* 32(3):47. Jan. 19.

• **Summary:** This full-page color ad, targeted at restaurateurs, shows the words "Kikkoman Soy Sauce" on a fish fillet. The text reads: "Don't use just any soy sauce. Start with Kikkoman. Because among leading brands, only Kikkoman is naturally brewed and aged for full flavor. *Your* flavor. Whether that fish dish is Asian or fresh from the American mainstream. Catch our latest recipe ideas. Call 1-800-944-0600."

"The true taste of soy sauce" is a registered trademark, printed in white letters on a red background.

8033. Early soyfoods in China—Chronological (SoyaScan database search report). 1998. 12 p. incl. index. Jan. 23. Unpublished manuscript. [20 ref]

• **Summary:** This carefully customized database search was conducted for Mark Messina to document the fact that soyfoods have been widely consumed for a long time in China. Among the 20 records are the earliest Chinese-language and English-language documents that mention or discuss soyfoods in China, with emphasis on soy sauce (15 records), tofu (12 records), and Chinese-style miso (chiang, 6 records). Also includes the earliest English-language records that give significant industry or market statistics on soy sauce or tofu in China.

8034. Early soyfoods in Japan—Chronological (SoyaScan database search report). 1998. 36 p. incl. index. Jan. 23. Unpublished manuscript. [20 ref]

• **Summary:** This carefully customized database search was conducted for Mark Messina to document the fact that soyfoods have been widely consumed for a long time in Japan. Among the 47 records are the earliest Japanese-language and English-language documents that mention or discuss soyfoods in Japan, with emphasis on tofu (27 records), soy sauce (26 records), miso (20 records), and soymilk (8 records). Also includes the earliest English-language records that give significant industry or market statistics on tofu, miso, or soy sauce in Japan.

8035. Golbitz, Peter. 1998. *Tofu & soyfoods cookery: Delicious foods for a healthy life*. Summertown, Tennessee: Book Publishing Co. 176 p. Illust. (3 photos). Recipe index. General index. 21 cm.

• **Summary:** Contents: Preface and acknowledgments. The history of soyfoods. A closer look at soybeans. Soybeans and health: Introduction, malnutrition, cardiovascular disease, cancer, osteoporosis, menopause, more to come. Using soyfoods: Whole dry soybeans, tofu, soymilk, soy flour, textured soy protein, green vegetable soybeans, tempeh, miso, soy sauce, soy protein concentrate, soy protein isolates, natto, soybean oil, second generation soyfoods, meat alternatives, cheese alternatives, soy yogurt, nondairy frozen

desserts, mayonnaise and dressings, instant soups and other dry mixes, margarine, lecithin, soynuts and soynut butter, soy sprouts, okara or soy pulp. Basic recipes. Breakfast. Bread. Salads & dressings. Soups & sandwiches. Main & side dishes. Desserts & drinks. Glossary. U.S. & Canadian soyfoods companies. Sources of information on soyfoods. Nutrients in soyfoods.

Contains 125 of Peter Golbitz's favorite recipes, selected from the works of some of "the world's leading soyfoods chefs." A list of these "leading vegetarian and soyfoods pioneers" (all of whose books have been published by The Book Publishing Co.) appears on the rear cover. Peter (born in 1952) lives with his wife, Sharyn Kingma, and son on a beautiful island off the coast of northern Maine. A color photo of the family appears on the rear cover. Twenty years ago (in 1978) Peter was "first introduced to tofu and the wonders of soyfoods." A photo of Peter with his book appears in the Book Publishing Catalog of Jan. 1999. Address: President and Founder, Soyatech, Inc., Bar Harbor, Maine. Phone: 207-288-4969.

8036. Greenberg, Patricia; Hartung, Helen Newton. 1998. *The whole soy cookbook: 175 delicious, nutritious, easy-to-prepare recipes featuring tofu, tempeh, and various forms of nature's healthiest bean*. New York, NY: Three Rivers Press (Crown Publishers / Random House). ix + 221 p. Illust. Index. 24 cm.

• **Summary:** Contents: Acknowledgments. Introduction. All about soy: Health benefits of soy (reduces the risk of heart disease, lowers the risk of breast cancer, eases the symptoms of menopause, protects against prostate cancer, prevents digestive disorders {when using whole soybeans or soy products containing high levels of fiber}, eliminates the problem of lactose intolerance, prevents the problems of milk allergy, beneficial in diabetic diets), cooking with soy products (meat analogs or meat substitutes {soy sausage, soy bacon, hamburgers and hot dogs}, miso, okara, soy cheese, soy milk, soy sour cream, soy yogurt, soy flour, whole soybeans, soybeans—green, soybeans—roasted, tempeh, textured vegetable protein (TVP), tofu & silken tofu; Soy-based foods (containing little or no protein): Egg replacers, soy margarine, soy mayonnaise, soybean oil, soy sauce) how to get optimum nutrition from soy (protein, carbohydrates, fat, cholesterol, fiber, sodium), nutrition information. Sample menus (for 3 meals a day, 7 days a week). Recipes: 1. Appetizers, dips, and spreads. 2. Salads and vegetables. 3. Brunch and breads. 4. Pizza and sandwiches. 5. Soups and stews. 6. Main dishes. 7. Pastas and grains. 8. Desserts.

This books contains almost 200 delicious and easy ways to add that essential 25 grams of soy protein to your diet. These recipes (each of which includes a nutritional analysis) are based on more than ten years of experience and experimenting (p. 2). Address: P.O. Box 10853, Beverly Hills, California 90213. Phone: (310) 474-4539.

8037. Mitchell, Paulette. 1998. *The complete soy cookbook: More than 150 simple recipes for good health and great taste*. New York, NY: Macmillan Publishing (A Simon & Schuster Macmillan Co.). xlix + 270 p. Illust. Index. 24 cm.

• **Summary:** A very attractive vegetarian cookbook. Each recipe is marked with one of three symbols: V = vegan, lo = lacto-ovo vegetarian, and l = lacto vegetarian. Contents: Preface: An ancient Asian secret isn't a secret anymore. Introduction: The whys (cancer, heart disease, osteoporosis, menopause, diabetes), the hows, soy food ingredients (soybeans, sweet beans {edamame}, tofu, tempeh, texturized vegetable protein {TVP}, soy milk, soy flour, soy oil, soy sauce), other soybean products (soybean sprouts, okara, miso, roasted soynuts, isolated soy protein {ISP}, dairy and meat analogs), a note on food allergies. Soy success: Stocking your refrigerator and pantry, using the recipes, kitchen equipment. 1. Appetizers. 2. Soups. 3. Salads. 4. Entrees. 5. Desserts. Appendix: Recipes listed by soy food categories (and within each category by recipe type—such as salads, soups, desserts): Whole soybeans (32 recipes), sweet beans (green vegetable soybeans, 7 recipes), tofu (96), frozen and thawed tofu (14, all entrées), pressed tofu (12), tempeh (14), textured vegetable protein (TVP, 4), soy milk (14). Note that tofu was used in by far the most recipes (96), followed by whole soybeans (32).

Paulette, who lives in Minneapolis, Minnesota, is a cooking instructor, restaurant consultant, and lecturer. Paulette is the author of many Macmillan books, including *The 15-Minute Vegetarian Gourmet*, *The 15-Minute Single Gourmet*, and *The Complete Book of Dressings*. This book is dedicated to her 14-year-old son, Brett. Address: Minneapolis, Minnesota. Phone: 612-941-7576.

8038. **Product Name:** Smoked Tempeh [Savory Herb, Spicy Peanut, Sweet & Tangy].

Manufacturer's Name: Smoke & Fire Natural Foods.

Manufacturer's Address: 1885 North Main St., Sheffield, MA 01257. Phone: 413-528-6891.

Date of Introduction: 1998. January.

Wt/Vol., Packaging, Price: 6 oz vacuum pack. Retail for \$2.15 (1998/07, Massachusetts; Range: \$1.89 to \$2.50).

How Stored: Refrigerated, 90 day shelf life (at 34-36°F).

New Product—Documentation: Talk with then form filled out and Label sent by José Antunes (pronounced jo-ZAY ahn-TU-nays), founder and president, who is Portuguese. 1998. June 29. The idea for this pioneering product was sort of a logical extension of smoking tofu. José likes tempeh very much and he wanted to have more products in his line. An invoice [sent to Soyfoods Center] shows that the Savory Herb flavor was first sold on 26 Jan. 1998 and the Spicy Peanut on March 9. A case of six wholesaled for \$12.60 (for each product).

Note: This is the first smoked tempeh product seen

worldwide.

Leaflet (8½ by 11 inch) from Natural Products Expo East (Baltimore, Maryland). 1998. Sept. 9-13. The company's new registered trademark is "Soy with Sizzle." Gives the ingredients and product specifications for all the company's products including a new product: Sweet & Tangy Smoked Tempeh. Talk with José. 1998. Sept. 16. His company has discontinued the Spicy Peanut and added a new flavor, Sweet & Tangy Smoked Tempeh, which was launched at the Baltimore show. It is now on the market. Its ingredients: Organic soy tempeh (organically grown soybeans, water, tempeh culture), organic shoyu soy sauce, organic apple cider vinegar, organic ground mustard seeds, organic evaporated cane juice, lemon juice, organic orange rind, granulated onion, granulated garlic, spices & natural wood smoke.

8039. Denby, Leo. 1998. How seitan is made at Sheffield Seitan in Vermont (Interview). *SoyaScan Notes*. Feb. 3.

Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Leo and Christina, owners of Sheffield Seitan, presently make their seitan as follows: Leo starts by milling hard red spring wheat, purchased from Ted Whitmer in Bloomfield, Montana until 2-3 years ago when he went out of business; he gave his word that his wheat was organically grown, but it was never certified organic. Under the original Meadows stone mill (part of the business since 1979, electrically powered, with an 8 inch diameter stone), he has devised a bran shaker; the finely milled wheat flour and bran falls through the vibrating screen, whereas coarser bran and flakes are separated out.

Christina makes the gluten using an 80-quart Hobart mixer. 7 gallons of water are mixed with 60-70 lb of water in the Hobart's metal bowl than mixed with a dough hook at the slowest speed for 10-15 minutes—until the gluten has formed and set up. Then they turn off the machine and allow it to rest for 10 minutes. Then she adds water, clicks the mixer on then off quickly to just get the dough hook turning, then she bails out the water into a drain with a small pail. Then she adds more water, and clicks the mixer on and off a few more times to get the starch out of the gluten. As the starch starts coming out, there is more room to add more water. Then she will turn the mixer off, leave the lukewarm water in the bowl, and start stretching the dough and hosing out some of the bran—which collects in pockets in the gluten. The final yield per batch is 40-44 pounds of wet gluten from 70 pounds of wheat flour. The small amount of bran left in the gluten is beneficial, allowing it to shear well when chewed. Gluten made from wheat is much better quality than that made from vital wheat gluten. When you chew seitan made from the latter, you get recoil and squeak.

Then put the gluten (about 20 pounds per pail) into 5-gallon pails with water and put the pails in a chest freezer overnight. The gluten gets stiff/tight and more dense but

never totally freezes—though the water around it freezes. The next day, remove the raw gluten from the freezer, break and remove the ice, and add some fairly warm water to the pail, then after several minutes pour it off. Transfer the gluten to a big metal bowl on a pedestal next to the work table. Add warm water to cover the gluten and leave until the consistency is just right. Then, using a serrated knife, they cut off pieces of the gluten that weigh slightly more than 1 pound. Check the weight on a scale. Squeeze, then knead the gluten in both hands above the bowl to form a ball. For patties, press between sheet pans to the appropriate thickness. Now cook the raw gluten in broth to make seitan. Into a rectangular stainless steel pan cooker (2 feet by 4 feet by 6 inches deep, with a removable lid), pour the seitan broth consisting of approximately 12 gallons water, 2 gallons naturally fermented soy sauce (made by Wan Ja Shan / Mandarin Soy Sauce Co. in New York), and about one-third cup of a mixture of 6 parts garlic powder and 1 part cayenne powder. This will fill the cooker to a depth of about 4 inches. No kombu or ginger are used. This broth is used to make 4 batches of seitan, where a typical batch is thirty 1-pound patties or 90 wheat puffs. Heat the broth using two gas burners. Cook each batch of seitan for about 1 hour (40 minutes on the first side, then flip over each piece). Adjusting the temperature of the broth is critical. Start with hot broth; when you drop in the gluten, it will sink out of sight. Once it starts to float to the top (indicating that the gluten is set), turn down to a simmer. If you cook at too high a temperature for too long, the gluten will become spongy, which is undesirable. Larger pieces take longer to cook than smaller ones.

To package the finished seitan, remove from the cooker, put the pieces on stainless steel sheet pans (sloping slightly so the broth drains to one end and can be reused) on a rolling rack, and wheel it to near the door. If necessary, press or gently squeeze the seitan pieces to remove excess broth. Open the door a crack to let in some cold winter air to cool it. Exhaust fans running in the shop also help draw in the air and cool it. When the seitan is relatively dry, put each type in its own container. The pounder goes in a poly bag, and the excess of the bag is cinched underneath with a twist so it does not stick out like a plume. Put on the label (self-adhesive, 2 by 3½ inches). All the products except the Wheat Puff are sold frozen. If a store buys Wheat Puffs with frozen products they are shipped in the same box so the frozen products keep the Wheat Puffs cool.

To make the Wheat Puffs use a Fryolating process with canola oil and a water-based tempura batter—which contains no eggs, dairy products, or meat. The batter is made of wheat flour, cornmeal, rice flour (milled in the shop), garlic powder, and cut basil, plus water. After the Wheat Puffs are fried, spread them out on kraft paper on the sheet pans and put a fan on them to cool them, before putting in brown paper kraft bags for delivery. Do not crowd in the bags. These 3-ounce

patties are a hand-held food with a coating—no stick. The Wheat Puff is the product most people love best. Address: Owner, Sheffield Seitan, Box 1, Lyndon, Vermont 05849. Phone: 802-748-3327.

8040. Indiana Soybean Board. 1998. Indiana soyfoods locator guide: A guide to finding soyfoods in the supermarket and health food store. Lebanon, Indiana: Indiana Soybean Development Council. 48 p. 28 cm.

• **Summary:** This is the first edition of this Guide. On the cover is a paper grocery bag resting on a bed of soybeans and chock full of foods: Veggie Slices (soy cheese), soynut butter, veggie burger, tofu, soymilk, soy flour, plus carrots, celery, and cooking oil. Contents: Food pyramid. Soyfoods descriptions—Meat the Bean: Introduction, green vegetable soybeans (edamame), hydrolyzed vegetable protein (HVP), infant formulas—soy based, lecithin, meat alternatives (meat analogs), miso, natto, nondairy soy frozen desserts, soy cheese, soy fiber (okara, soy bran, soy isolate fiber), soy flour, soy grits, soy protein concentrate, soy protein isolate (isolated soy protein), soy protein—textured (textured soy protein, textured soy flour), soy sauce (tamari, shoyu, teriyaki), soy yogurt, soybeans, soymilk—soy beverages, soynut butter, soynuts, soybean oil & products, sprouts—soy, tempeh, tofu & tofu products, whipped toppings—soy-based, yuba. A taste for health—Scientists are learning about soy's health benefits: Heart disease, osteoporosis, menopause, cancer, isoflavones. Soyfood icon chart. Soyfood facts & recipes: Meat alternatives, soybean oil, textured soy protein, whole soybeans, soy flour, soymilk, tofu. Composition and nutrient content of soyfoods. Soyfood conversion charts: description of one serving of soyfoods, guide to modifying recipes, soyfoods substitution chart. Mail order soyfood companies. Soyfoods Web site packed with information. Soy cookbooks. Soy resource books. 1-800-talksoy. Soyfoods market search map; where to find soyfoods in the supermarket (a two page color layout of a supermarket displaying where soyfoods are located). Soybeans... they're in almost everything. Finding soyfoods at the supermarket (store listings by county). Address: Indianapolis, Indiana 46205-1744. Phone: 1-800-275-7679.

8041. *River Currents: News from South River Miso Company*. 1998-- . Serial/periodical. South River Farm, Conway, Massachusetts. Vol. 1, No. 1. Winter 1998-- . Frequency: Annual. 28 cm.

• **Summary:** This newsletter contains: News about the company, with photos. A catalog of its products with current prices and a detailed description of each type of miso and tamari. Order form. Miso recipes. Frequently asked questions about miso. Company mission statement: "Life is sacred. Food is sacred." Address: Conway, Massachusetts.

8042. Stevens & Associates, Inc. ed. and comp. 1998. U.S.

1998 soyfoods directory. Lebanon, Indiana: Indiana Soybean Development Council. 47 p. 28 cm. [33 ref]

• **Summary:** This third edition of the U.S. Soyfoods Directory was produced for the Indiana Soybean Board by Stevens & Associates.

Note: Nasoya Foods has its own listing but Azumaya does not. Azumaya is listed under Vitasoy USA Inc. as a brand. Address: Stevens & Associates, 4816 North Pennsylvania Street, Indianapolis, Indiana 46205. Phone: 317-926-6272.

8043. Kikkoman International Inc. 1998. Asian noodles are surfacing everywhere (Ad). *Nation's Restaurant News*. March 2. p. 29.

• **Summary:** This full-page color ad, targeted at restaurateurs, shows a bowl of noodle soup. "They're profitable, they're different, and they're surprisingly easy to add to the menu. All it takes is a few good recipes and one essential seasoning: Kikkoman Soy Sauce. Some soy sauces are harsh and overpowering. But Kikkoman is naturally brewed and aged for full flavor, so it complements and balances all kinds of noodles from Pad Thai to Pasta Primavera and anything in between. For 21 unexpected recipes call 1-800-944-0600."

"The true taste of soy sauce" is a registered trademark, printed in white letters on a red background.

8044. Perry, Charles. 1998. Rot of ages: A medieval rotted sauce lives again. *Los Angeles Times*. April 1. p. H6. Food section.

• **Summary:** Murri is a sauce that used to be made by Arabs from lumps of raw barley dough wrapped in fig leaves and allowed to rot / fermented with naturally occurring *Aspergillus* mold for 40 days. Properly made, it smelled distinctly like soy sauce. But it hasn't been made for 400 or 500 years. Why did it die out? Address: Staff Writer, Food Section, Los Angeles Times, California. Phone: 213-237-7806.

8045. Kikkoman International Inc. 1998. Want to build a better burger? The true taste of soy sauce (Ad). *Nation's Restaurant News*. April 27. p. 48.

8046. Brown, Susan; Brown, Allan. 1998. The Noble Bean. *Food for Thought: Newsletter of the Ontario Natural Food Co-op (Canada)* No. 17. p. 6. April.

• **Summary:** "Noble Bean is owned and operated by Susan and Allan Brown. We manufacture our products out of a 750 sq. ft. production facility on 10 acres of land near Elphin, Ontario, in the Ottawa Valley. We are 22 miles from the town of Perth and 60 miles from Ottawa. Originally we were based in Toronto 18 years ago. Previously, we had spent many years living in the country and after establishing our market in the city, we had an excellent cottage industry that we could carry on from afar."

"Tempeh had been a part of our diet for years and once we learned how to make this amazing food, we started commercial production in 1980. We made our first major purchase of cooking equipment from a 60-year-old gentleman in Port Perry who had been stocking a few Toronto natural food stores with tempeh for a year. He had a stroke and could no longer continue. With a \$500 loan, we paid \$200 for a large custom-made cooker, a colander, racks and utensils, which we still use today.

"It was slow going at first, turning the industry and the public on to a new protein source. We made about 48 pounds per day, 4 days a week. While we were based in Kensington Market, we serviced the Toronto stores ourselves. Our production rate steadily increased as people became familiar with this new food. In 1985, when we did make the jump out of the city back to the land, we started producing 120 lbs. per day. It was at this time we took on our first distributor and our product got out much further.

"Through all of these times we were fortunate to be able to make a living at home. Children changed our lives immensely. Our two boys were raised with this business and home-schooled for years as they were growing. They are an integral part of the production line whenever they like and have the opportunity to make some serious pocket money.

"As the demand increased so did our production. We now make 200 lbs. per day, 3 days per week. We offer 6 different tempeh products all made from organically grown ingredients."

Contains 3 tempeh recipes: Ginger tamari tempeh. Lemon broil. Tempeh salad—Our summer favorite! A sidebar describes "What is tempeh?" Address: Owners, Noble Bean, RR# 1, McDonalds Corners, ONT, Canada K0G 1M0. Phone: 613-278-0173.

8047. Sass, Lorna J. 1998. The new soy cookbook: Tempting recipes for tofu, tempeh, soybeans & soymilk. San Francisco, California: Chronicle Books. 120 p. Illust. (25 color photos by Jonelle Weaver). Index. 21 x 23 cm.

• **Summary:** Contents: Introduction—The soy of cooking (descriptions of soybeans, black soybeans, soymilk, tofu, tempeh, miso, soy sauce). Appetizers and soups. Entrées. Soy on the side: Vegetables and grains; Salads, slaws and dressings; Scones and a few desserts. Mail order sources. Table of equivalents. A black-and-white photo shows the author. Note: This is not a vegetarian cookbook. Ingredients include swordfish, shrimps, mussels, codfish, clam chowder, etc.

Letter (fax) from then talk with Lorna Sass. 1996. Sept. 8. This trade paperback book, with many full-page color photos, is scheduled to be published in the spring of 1998. Chronicle Books is now publishing a series of books titled *The Vegetarian Table*, with each book featuring the vegetarian cookery of a different country. Address: 46 West 83rd St., New York City, NY 10024. Phone: 212-799-1085.

8048. Gonzalez-Watanabe, Yvonne. 1998. Introducing tofu and soymilk to Costa Rica. Update on soyfoods work in the Los Angeles area (Interview). *SoyaScan Notes*. May 4. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Yvonne just returned from a month (March 29 to April 24) in her native country of Costa Rica, where she was teaching about and studying tofu and soymilk. She gave 8 classes in people's homes, where she taught them how to make and use soymilk and tofu; about 30-40 people attended, and about half the people attended more than one class. During these classes she developed a recipe for tofu seviché (pronounced say-VEE-chay), which is traditionally made with marinated raw fish but occasionally with green plantain or avocados substituted for the fish. Yvonne used tofu in place of the fish, and it was a big hit.

Vegetarianism is now quite popular in San Jose, the capital of Costa Rica, but it goes under the name of macrobiotics. There are a number of "macrobiotic" restaurants in the capital; all serve only vegetarian food.

When Yvonne tried to interview the one existing Chinese-run tofu company, they were very uncooperative. It seemed like they might be going out of business because tofu is now being made on a small scale in many other places. Yohan, the big chain of Japanese-run food stores, now makes fresh tofu each day in the store. Many small Chinese food markets and restaurants also make their own tofu. Kikkoman Tofu, sold in aseptic packages, is fairly widely available.

Yvonne's booth and tofu recipe brochure for the LA Tofu Festival are progressing nicely. Margaret Endo has found advertisers for the booklet, which will enable Yvonne to expand its size. She has also found a Costa Rican celebrity to be the host at her booth—Lily Melgar, a well-known actress and friend of her cousin. Yvonne went to Lily's home and prepared her favorite tofu recipes, which Lily liked very much.

Update: Talk with Yvonne. 1998. July 8. The Southern California Gas Co. will be sponsoring Yvonne's booth at the LA Tofu Fair—which is now set for Saturday and Sunday, August 15-16. They will pay for all the bands, the music, and a Spanish-language flyer—largely because they are interested in reaching the Hispanic population in the Los Angeles area. Yvonne has been meeting a large number of people who are interested in tofu—some of them local celebrities. One Puerto Rican lady who is a musician, goes by the name "La India." Ricky Martin from Mexico is a pop music star. Yvonne has cooked Hispanic vegan tofu recipes for both of them.

Update: Talk with Yvonne. 1998 Dec. 10. She is now the guest chef on a TV show in Los Angeles (KCET—Channel 52) twice a month teaching cooking—vegetarian and soyfoods. She receives no pay for this, but it is very interesting and good exposure. Address: 6029 LaPrada St., Los Angeles, California 90042. Phone: 213-254-1712.

8049. Louie, Elaine. 1998. Vegetarian that's filling. *New York Times*. May 13. p. F8.

• **Summary:** Julie Sahni, cookbook author and teacher, says that vegetarianism has been an inextricable part of Indian culture since about 500 B.C., when Mahavira, a Hindu philosopher, developed the concept of ahimsa, or non killing. Although meat is scarce in Indian cookery, protein is not. A recipe for Indian chickpea ragout shows this.

A recipe for Bean curd sauté, adapted from Youngin Hyun, calls for "2 pounds extra-firm or firm bean curd" [tofu]. Hyun, a Manhattan [New York City] photographer and talented home cook, says that Koreans, which also have a long and rich tradition of vegetarian cookery, have used beans as a protein source since 107 B.C. In Korea, all beans, including soybeans, are called "the meat of the soil." Koreans began making bean curd (called *du bu*) during the late Koryo Dynasty (918-1392), according to Mrs. Hyun. Today bean curd comes in two consistencies, firm or silken. The silken type can be sliced then drizzled with a mixture of soy sauce, sesame oil, vinegar, sugar, and chopped scallions. The firm kind is used in stews and sautéed dishes. In the decade after the Korean war (which ended in 1953), Koreans ate lots of bean curd as the poor country rebuilt itself.

8050. Japan Tariff Assoc. 1998. Exports of soy sauce (shoyu): No. 2103.10-000. *Japan Exports and Imports: Commodity by Country*. June. No. 618. p. 83. [Eng: jap]

• **Summary:** For each country, gives the quantity and value for the current month, and for the cumulative year to date. Address: 4-7-8, Kohji-machi, Chiyoda-ku, Tokyo 102-0083, Japan. Phone: 81-3-3263-7221.

8051. Kikkoman Corporation. 1998. Annual report 1997. 339 Noda, Noda-shi, Chiba 278, Japan. 26 p. 28 cm. [Eng]

• **Summary:** The information in this English-language annual report is current as of April 1998. Contents: Financial highlights. Profile. A message from the president (Yuzaburo Mogi): The year in review, foundation, growth, and opportunity, serving a global market, toward the new century. A strong global operating presence: The Americas, Europe, Asia and Oceania, Japan. Operational review. Financial review. Financial section: Consolidated balance sheets, etc. Corporate history (chronology from April 1925 to October 1997). Global network (directory of Kikkoman names, addresses, and phone numbers worldwide). Board of directors and officers. Corporate data.

During fiscal 1997, ended 31 December 1997, consolidated net sales worldwide rose 4.0% over the previous fiscal year to 214.3 billion yen, breaking the record of 211.7 billion yen set in 1992. Yet income decreased by 21.6% to 5.711 billion yen.

Overseas sales expanded 10.6% in 1997 to 60.1 billion yen, and accounted for 28.0% of consolidated net sales.

The Americas: "In June 1998, Kikkoman Foods, Inc.,

the centerpiece of Kikkoman's expansion in North America, will celebrate 25 years of operations. The number of items produced at the plant has risen to more than 100, and the plant's production has expanded more than 10-fold."

"On April 17, 1998, Kikkoman commenced operations at its second U.S. plant, in Folsom, California. Built at a cost of US \$46 million, the plant covers an area of approximately 210,000 square meters and has an initial annual production capacity of 10,000 kiloliters of soy sauce. In autumn 1998, the Company will begin delivering soy sauce produced at its second U.S. plant, in Folsom, California."

"Kikkoman's English-language Internet home page, opened in April 1997, receives approximately 100,000 hits a month, mainly from people in the United States. In particular, the recipes listed on the home page have attracted a great deal of interest, with site visitors frequently requesting further recipe information."

Europe: In Oct. 1997 Kikkoman Foods Europe B.V. began operation of its plant in the Netherlands.

Letter from Keiji Yamazaki of Kikkoman, San Francisco. 1998. Aug. 7. Kikkoman's annual reports are published in mid-June each year. Address: Noda, Japan.

8052. Shimbo-Beitchman, Hiroko. 1998. Magical miso. *Saveur* (New York, NY) No. 27. May/June. p. 100-08, 110, 112.

• **Summary:** A beautiful article, loaded with glossy color photographs (by Christopher Hirsheimer and Tom Wagner) and recipes. Photos show: (1) Shiromiso in a stylish bowl. (2) A Japanese worker, in clothing with traditional designs, stands on the rim of a miso vat and shovels what will become miso at Yamaki Jôzô, a miso brewery built in 1902 by the Kitani family, in Kamiizumi-mura, Honjô city, Saitama prefecture, 75 miles northwest of Tokyo, Japan (full page). *Yama* means "mountain, *ki* stands for Kitani, and *jôzô* means "brewery. Kazuhiko Morita is the brewery's director. The company has been making three basic types of miso, plus shoyu and tofu, since 1902. Yamaki partially automated in the mid-1980s and today makes about 400 tons of a miso a year; it is not pasteurized and no alcohol is added in packaging as a preservative. (3) Looking down into a bowl of miso soup with tofu and wakame (full page). (4) The exterior of Yamaki Jôzô; a tree bearing bright orange persimmons stands in front of several traditional wooden buildings. (4) Hiroko Shimbo-Beitchman. (5) Mr. Morita, in traditional clothing, smelling the koji in a large, automated, stainless-steel koji incubation room. (6) The man shoveling the finished koji out of the incubation room onto a conveyor belt. (7) Eggplant Dengaku (with red and white miso, full page). (8) Walnuts being ground to a paste in a suribachi. (9) Steaming the soybeans at Yamaki Jôzô; 5,300 pounds of whole soybeans are steamed at a time. The company has two giant steel pressure cookers. For akamiso, the beans are cooked for about 7 hours until soft and yellow. (10) Cooling

the cooked soybean on a conveyor belt. Most of the miso's flavor comes from the beans; the aroma and sweetness come from the kôji. (11) Mixing the cooked soybeans and koji, with salt and a little spring water. Then the mixture is forced through a machine like a meat grinder to produce a smooth paste, which will ferment more easily than a chunky one. (12) Putting the ingredients for akamiso into 100-year-old cedar vats, which are covered with plastic sheeting then weighted. After several months it is moved to another set of barrels, then again a few months later. It can age for up to two years. (13) Three packages of commercial Japanese miso: akamiso, akadashi-miso, and shiro miso.

Recipes: Miso soup with tofu and wakame. Eggplant dengaku with two miso sauces. Green beans with miso dressing. Broiled miso-marinated black cod. Panfried miso-marinated beef. Steamed pork with mamemiso. A sidebar describes the different types of miso, with details on akamiso, mamemiso, and shiro miso. The company also makes brown rice miso (unpasteurized), and a kit (with koji and instructions) for making your own miso at home.

Traditionally miso made at home was the source of great family pride. "*Temae miso desu ga*," one would say—meaning "I don't want to boast about my miso, *but...*" Today Japan's 50 largest miso manufacturers control about 90 percent of the market. But miso connoisseurs prefer miso made by smaller companies in the traditional way; these are painstakingly preserving old-fashioned techniques and regional miso styles. Address: Teacher of Japanese cooking, Hiroko's Kitchen, London, England. Phone: Fax: 44-171-289-0855.

8053. Tamang, J.P. 1998. Role of microorganisms in traditional fermented foods. *Indian Food Industry* (Mysore, India) 17(3):162-67. May/June. [32 ref]

• **Summary:** This article is mainly about the benefits of fermentation and fermented foods. Contents: Introduction (main microorganisms are filamentous fungi, yeasts and bacteria, especially LAB = lactic acid bacteria). Biopreservation. Bioenrichment. Microorganisms that produce enzymes. Microorganisms that destroy undesirable components. Enrichment of the diet. Mixed starter culture. Traditional fermented foods of medicinal value (koumiss, kvass). Conclusion.

The following fermented soyfoods are mentioned: Kinema, hawaijar, miso, natto, shoyu, tauco, and tempe [tempeh]. Koji is also mentioned.

"Fermented foods are defined as foods that have been subjected to the action of selected microorganisms by which a biochemically and organoleptically modified substrate is produced, resulting in an acceptable product for human consumption." Address: Microbiology Research Lab., Dep. of Botany, Sikkim Government College, Gangtok, Sikkim-737 102, India.

8054. Yates, Ronald E. 1998. *The Kikkoman chronicles: A global company with a Japanese soul*. New York, San Francisco & Washington, DC: McGraw-Hill. xviii + 206 p. Illust. Index. 24 cm.

• **Summary:** Contents: Preface. Introduction. Acknowledgments. 1. Completing the circle. 2. From Osaka Castle to the Big Foot Prairie: A brief history of Kikkoman. 3. A global company with a Japanese soul. 4. There's no business like shoyu business: A concise soy sauce primer. 5. Diversify or die: Kikkoman's strategies for success. 6. The road to Walworth: Kikkoman's big gamble on the Big Foot Prairie. 7. A soy sauce plant grows in the land of cheese. 8. A culture of selective risk: The enduring secret of Kikkoman's success. 9. High-tech fireflies and a trailblazing orange. 10. Soy sauce meets cyberspace: Big changes on the road to the twenty-first century. 11. Conclusion.

For ten years, during the 1970s and 1980s, Ron Yates was the business correspondent for the *Chicago Tribune* in Japan. He speaks Japanese. This book is generally well-written, but it contains a mixture of fascinating new insights about Kikkoman plus a fair amount of questionable and

undocumented information about Kikkoman's origins and early history—for example the story of Shige Maki and the unchallenged idea that Kikkoman's "roots can be traced back to 1630" (p. ix). Page 53 states that shoyu kegs (*taru*) hold 18 liters or 4.75 gallons. Questions about the Shige Maki story are examined in a separate record. Address: Head, Journalism Department, Univ. of Illinois (Urbana).

8055. Yates, Ronald E. 1998. *Shinzaburo Mogi in America: Making shoyu in Denver, Colorado, and Toronto, Canada. Work with and investment in the Oriental Show-You Co. in Columbia City, Indiana*. In: Ronald E. Yates. 1998. *The Kikkoman Chronicles*. New York, San Francisco & Washington, DC: McGraw-Hill. xviii + 206 p. See p. 125-32. • **Summary:** "Somewhere in Denver, Colorado, are the remains of what is most likely the first Japanese-built and managed soy sauce plant in the continental United States." It is fairly certain that Shinzaburo Mogi went to Denver in 1892. He was barely 20 years old and had a bold idea—to produce shoyu in the USA (p. 125). "As the fifth son of the Kashiwa branch of the Mogi family, he did not join the family business in Japan. His older brother, Shichirouemon Mogi, became the first president of the Noda Shoyu Co." (p. 129).

Kenzaburo "Ken" Mogi (not to be confused with Yuzaburo Mogi's younger brother, also named Kenzaburo) traveled to Denver in the early 1980s in search of info about his great-granduncle. "Kenzaburo, the son of Katsumi Mogi, who served as Kikkoman's president from 1980 to 1985, had heard the stories of this little-known member of the Mogi clan for years—some of them from Keizaburo Mogi, who served as president of Kikkoman from 1962 to 1974, when he became chairman of the board. Ken Mogi managed to learn that "Shinzaburo Mogi had indeed managed a soy sauce plant in Denver in 1907. Unfortunately the operation was not successful, Kenzaburo learned after meeting with a man who apparently worked with Shinzaburo Mogi at the plant... But failure in Denver didn't stop Shinzaburo Mogi from pursuing his dream of making soy sauce in North America" (p. 130). After Denver, he apparently helped manage a soy sauce plant in Toronto, Canada. Eventually, he settled in Chicago where he was involved in the trading business—including the importing of Japanese (most likely Kikkoman) shoyu to the United States" (p. 130-31).

Note: As of Nov. 2004 Soyfoods Center is aware of very little evidence indicating that Shinzaburo Mogi ever started a plant making fermented soy sauce in Denver, Colorado, or anywhere in the United States. We believe that Kikkoman has spread this unfounded rumor. On 7 Feb. 2005 Kenzaburo Mogi IV, the first person from Kikkoman who tried to find evidence of these existence of this soy sauce plant in Denver, replied to a letter from William Shurtleff asking whether Ken thought the Denver soy sauce plant was a theory or a fact: "I also think it is unfortunate that the theory is told as a fact."

Address: Head, Journalism Department, Univ. of Illinois (Urbana).

8056. Yates, Ronald E. 1998. The story of the origins of Kikkoman in a woman named Shige Maki (Document part). In: Ronald E. Yates. 1998. *The Kikkoman Chronicles: A Global Company with a Japanese Soul*. New York, San Francisco & Washington, DC: McGraw-Hill. xviii + 206 p. See p. x-xi, 13-19, 62.

• **Summary:** Before we recount this story, we would like to say that we question its authenticity. Why was Shige Maki not mentioned in Mark Fruin's classic 1983 history of Kikkoman titled *Kikkoman: Company, Clan and Community*, published by Harvard University Press? William Shurtleff asked Dr. Fruin in late 1998 if he had ever heard of Shige Maki and he replied "No." Why has Soyfoods Center never heard this story before? Why does Mr. Yates provide no documentation to support this story—or the story that Kikkoman traces its origins back to 1630—for which we have never seen any credible evidence. We find this all very suspicious.

According to Mr. Yates, Kikkoman now traces its origins back to a woman named Shige Maki, who in 1615 was living in the Shadow of Osaka Castle, where her husband, Yorinori, was a samurai warrior (retainer) serving the warlord Hideyori Toyotomi. Hideyori (1593-1615), whose archrival was Ieyasu Tokugawa, was the son of Hideyoshi Toyotomi, one of Japan's greatest warlords and a man credited with uniting Japan in 1590 by subjugating the five western provinces of Japan's main island, Honshu. In 1586 Hideyoshi built the magnificent Osaka Castle—the largest and most impressive castle in Japan. For the next 5 years, Hideyoshi continued to consolidate his power via a series of battles and castle sieges. In 1591 he issued an edict establishing four distinct classes of people. At the top were samurai, followed by farmers, artisans, and merchants. That rigid social order lasted until 1868, when Japan's emperor Meiji ended feudalism and ushered in the nation's modern era. In 1597 Hideyoshi invaded Korea; he died there in 1598 during the campaign. His Japanese forces withdrew and in 1600 Ieyasu Tokugawa, a senior general in Hideyoshi's army, seized power following the battle of Sekigahara when he defeated an army of Hideyoshi's former vassals and retainers. This move was viewed as betrayal by many of Hideyoshi's men. In 1603 Ieyasu was awarded the titled of shogun by the emperor; he was the first of Japan's powerful line of Tokugawa shoguns that would rule Japan virtually unchallenged until the mid-1800s when Commodore Matthew Perry of the United States and his squadron of black ships forced Japan to open its doors to global politics and commerce.

The Toyotomi family, now led by 19-year old Hideyori, vowed revenge on Ieyasu Tokugawa. Shige Maki and her husband, Yorinori, supported Hideyori. But in June 1615 Hideyori was defeated at Osaka Castle. Yorinori committed

suicide; Shige Maki and her young son, Heizaburo, escaped from the castle and fled. For 15 years the two were on the run. "Eventually, Shige Maki and Heizaburo settled in the small farming community of Noda, about 30 miles north of Edo (now Tokyo). In the interim they had changed their name from Maki to Mogi, with Heizaburo altering his first name to Shichizaemon. No descriptions of Shige Maki exist, but she must have been one tough and resourceful lady. Not only did she survive the bloody battle of Osaka Castle and outwit the shogun's henchmen, but she spent years working in the rice fields of Noda" (p. 13-17).

On pages x-xi the author tells the end of this story somewhat differently: Because Shige Maki and "all others who had supported Toyotomi were on Tokugawa Ieyasu's death list, she changed her name to Mogi and blended in with the rice farmers in the area [of Noda]. For 15 years, she and her son cultivated rice and in the process learned the craft of brewing *shoyu*—the Japanese word for soy sauce... Using her new name of Mogi, the resourceful woman... made some refinements in the production process and more than 300 years ago began making the product that the world today knows as Kikkoman."

Continuing on p. 19: "Among the earliest recorded shoyu producers in Noda were Hyozzaemon Takanashi and Shichizaemon Mogi [Shige Maki's son]. Local records show that Takanashi was producing fermented shoyu in 1661, while the Mogis were making miso [by 1662].

"A year later, on August 22, 1662, some 47 years after she had escaped from the ruins of Osaka Castle, Shige Maki died. There is no doubt that if Shige Maki had not been as intrepid and resourceful as she was, there would be no Kikkoman Corporation today."

On page 62 Yates tells this story with still another twist: "When Shige Mogi (nee Maki) and her son Schiroemon [sic, Heizaburo] began making miso and shoyu in Noda in the 1600s, it was still very much a farmhouse industry."

Note 1. Soyfoods Center believes, based on three detailed histories of Kikkoman published in Japanese, plus the excellent research of Mark Fruin and others, that Kikkoman cannot trace its connections with soy sauce back farther than 1661, when Hyozzaemon Takanashi started to make shoyu in Noda. We want to emphasize that there was no connection between the Takanashi and Mogi families until 1768 (more than 110 years after Hyozzaemon Takanashi started to make shoyu in 1661). Mr. Yates presents no evidence that Shige Maki or her son ever made soy sauce (shoyu).

Mr. Yates continues (p. 19-20): In 1768 the eldest son of the Hyozzaemon Takanashi clan married the "daughter of the fifth generation of the Shiroemon [sic, Shichizaemon] Mogi line. This was to be only the first of a series of alliances between the Mogi and Takanashi families."

Note 2. According to Fruin (1983, p. 16) Shichizaemon Mogi started to make miso in Noda in 1662. This was

the Mogi family's earliest connection with foods or condiments made from soybeans. Address: Head, Journalism Department, Univ. of Illinois (Urbana).

8057. Yates, Ronald E. 1998. History of Oriental Show-You Co. in Columbia City, Indiana (Document part). In: Ronald E. Yates. 1998. *The Kikkoman Chronicles*. New York, San Francisco & Washington, DC: McGraw-Hill. xviii + 206 p. See p. 131-32.

• **Summary:** Oriental Show-You Co. was founded by Shinzo Ohki. He was born in 1884 in Kamakura, Japan, the son of a shoemaker and one of eight children. As a boy, Ohki served an apprenticeship in his uncle's saké (rice wine) warehouse. In 1901, barely 17 years of age, he used the money he had saved to emigrate to the United States. He made his way to the Midwest, where he settled in Columbia City, Indiana. There he graduated from high school, later graduating from New York University.

From New York, he moved to Detroit, Michigan, where he established a business importing tea and bulk shoyu [Japanese-style soy sauce] from Japan. He bottled the soy sauce and sold it with his tea. Before long he discovered a large demand for soy sauce from the Asian community in that area.

Returning to Columbia City, Indiana, Ohki recruited a partner, established the Oriental Show-You Company, Inc., and went into business bottling his imported soy sauce in an old canning plant. As demand for his soy sauce continued to grow, Ohki realized he would be more successful if he learned how to make the product himself.

So in 1917 he returned to Japan, learned how to make shoyu, obtained a formula for the naturally fermented product, and (with a wife) returned to Columbia City, where he began to make shoyu.

He received some help from the U.S. Department of Agriculture in obtaining and culturing the necessary microorganisms needed to produce the koji required for traditional, natural shoyu. Soon his shoyu was sold in most Asian grocery stores in the area.

In the 1920s Shinzaburo Mogi (a descendant of Kikkoman's Mogi line), who was now working for the Yamato Trading Co. in Chicago, discovered Oriental Show-You in one such store. Intrigued by the idea of making traditional Japanese shoyu in America, "Mogi traveled to Columbia City to see the operation for himself." He found that Oriental Show-You Co. used a natural aging process that took about 24 months from start to finish. Impressed with Mr. Ohki and his shoyu operation, Mogi invested in the company and became a major stockholder, continuing as such until the start of "World War II when his property (as was the case with all Japanese immigrants) was seized by the U.S. government under the 'Alien Property Custodian Act' [sic].

"Mogi returned to Japan shortly before the beginning of

World War II." He showed his daughter, Katsuko, the stock certificates she still owned from the Oriental Show-You Co. "They're worthless now," he said, and tore them up. Shinzaburo Mogi died in 1946 in Japan.

Oriental Show-You Co. continued to make shoyu until 1961, when it was acquired by Beatrice Foods, Inc. and became part of La Choy Food Products. The plant was eventually moved out of Columbia City and the fermentation process was discontinued in favor of the faster and less labor intensive HVP soy sauce process. Today the only evidence of the Oriental Show-You Co. in Columbia City is a few crumbling remnants of the factory's foundation.

At its peak, the Oriental Show-You Co. was making about 30,000 gallons per year of soy sauce. It was "perhaps the first successful Japanese shoyu operation on America's mainland" [sic].

Note: Early Japanese shoyu manufacturing companies were started on the West Coast of the USA in San Jose, California (1897 and 1907), Melrose, California (1908), Fruitvale, California (1908), Los Angeles, California (1908), Portland, Oregon (1909), Oakland, California (1909, two companies), and Stockton, California (1910). Source: Japanese-American Yearbooks.

Shinzaburo Mogi never worked for Noda Shoyu Co., Kikkoman's predecessor, and his efforts on behalf of shoyu in the United States were never sanctioned by Noda Shoyu Co.; his innovative activities abroad were completely independent. Address: Head, Journalism Department, Univ. of Illinois (Urbana).

8058. Cook, Anne. 1998. Kikkoman knows taste of success: Faculty member at UI writes book on soy sauce firm. *News-Gazette (Champaign, Illinois)*. July 4. p. A3. [1 ref]

• **Summary:** Ron Yates, who is now head of the journalism department at the University of Illinois (Urbana) has recently written a book titled *Kikkoman Chronicles*, a history of the world's largest maker of soy sauce, published by McGraw Hill. For ten years, during the 1970s and 1980s, Ron Yates was the business correspondent for the *Chicago Tribune* in Japan. He speaks Japanese. Kikkoman's history started in 1630. This article states (incorrectly) that (1) shoyu had been brewed in Japan since the 6th century; (2) the founder of Kikkoman's plant in Walworth, Wisconsin, Yuzaburo Mogi, came to the United States in the early 1970s as a Columbia University student; he came to the U.S. even though he didn't speak English. The handwriting was on the wall in the 1960s in Japan. The market was saturated. Mogi said he needed to learn about America. A photo shows Ron Yates. Address: Staff writer.

8059. Cooley, Jim; Coral, Mary; Wickberg, Ellen. 1998. How smoked tofu came to America (Interview). *SoyaScan Notes*. July 14. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Jim Cooley, founder and owner of Central Soyfoods, made the first commercial smoked tofu in the USA. The idea for this product came from Mary Carol, with whom he still lives. Mary (who was born in 1937) grew up in Venice, California. The grocery store near her home sold tofu, since there was a large Asian-American population working at the truck gardens in Venice. Mary's family was poor, and her mother would buy tofu regularly because it was inexpensive and nutritious. Mary is sure she had eaten tofu by the mid-1940s. After living for several years in New York City, Mary moved with her academic husband to Lawrence, Kansas. As a faculty wife with lots of spare time, Mary learned how to make tofu from Ellen Wickberg, whose husband, Ed (Edgar), was in the Department of History at the East Asian Center at Kansas University in Lawrence. Ellen had traveled with her husband to Taiwan for a year and learned how to make tofu (for her own use at home) by standing outside a tofu factory at the end of a lane and watching. Ellen and Ed had gone to college at the University of California in Berkeley during the 1950s—before they moved to Lawrence. Ellen used to buy tofu at the local co-op in Berkeley. Tofu was not available in 1962 in Lawrence, Kansas (where they lived from 1962-69), so Ellen decided to make her own. She went to the local pharmacist to buy some food-grade gypsum. He didn't want to sell it to her because he said it would set up in her stomach. Eventually Ellen made both tofu and doufu-gan (pressed) tofu in Lawrence; she recalls smoking the doufu-gan.

Mary loved to cook and she collected cookbooks. From one of her Chinese cookbooks (which she can't find), Mary Coral learned how to smoke tofu on a kitchen scale, as follows: Put a whole block of tofu between boards, outside, and press it gradually all day long, until it was about ½ inch thick and very firm. Paint it with soy sauce or a seasoned soy-sauce marinade. Arrange bricks in the back yard to make a stand for a wok. Put pine needles (not a lot; she used blue spruce needles from a tree in her back yard) in the bottom of a dry the wok. Over them place a metal grill or rack and on that arrange slices of the firm, marinated tofu. Light the needles with a match, then snuff the fire for a while by putting the lid on the wok. Steam for 45-60 minutes. "Ellen and I used to do these elaborate meals. We don't eat like that any more. We'd start eating early in the evening and go on for 10 or 12 courses. There wasn't a lot to do in this town!"

Jim learned how to make tofu and smoked tofu from Mary Coral, who was making her own tofu at home in Lawrence, Kansas, by about 1964-65, when Jim first met her. His first commercial smoked tofu was made as follows. One of his employees had a family-size backyard smoker on wheels named Mr. Meat Smoker. It was similar to a backyard barbecue grill, but taller and slim. Jim sliced cakes of tofu horizontally into halves, then put them on the grill in the smoker, with the lid on, and smoked them for 45-60 minutes. The smoke came from red-hot charcoal topped with hickory

chips, which had been soaked overnight in water to make them smoke better and longer before they finally burned. He smoked 25 lb of tofu in each batch. But slicing the tofu took a lot of time and space, so he tried smoking whole, uncut cakes of tofu with liquid smoke in order to double the amount of tofu that could be smoked in one batch. The resulting flavor and texture were basically unchanged, and the tofu still had grill marks on it. As sales increased, Jim bought a larger smoker—a Sunbeam backyard grill (on wheels with a propane tank), which he adapted to smoking. After someone stole that, he tried having his tofu smoked in a commercial smokehouse that smoked ribs. They smoked the tofu for several years. The cost and flavor were about the same, but the process was inconvenient, because Jim had to deliver the tofu then pick up the finished product. Occasionally, they would not clean their smoker well, and some meat drippings would end up on the tofu—which made it unusable. After the smokehouse went out of business, Jim purchased an army field oven that had been converted to a smoker by the grandfather of one of his employees. He adapted it, by getting the right sized grills and putting in a pan of water so it did not get too hot. Now he can do 48 lb of tofu per batch. The cakes of tofu go in weighing a little more than 1 lb and they come out at about 14 ounces. Both smoking and liquid smoke are still used. People like the product very much. In 1986, shortly after he got his vacuum packing machines, Jim introduced smoked tofu in a larger salad bar pack containing 4 x 14 oz pieces weighing 3½ lb total. Address: 1-2. Central Soyfoods, 11 West 14th St., Lawrence, Kansas 66044; 3. Vancouver, BC, Canada. Phone: 785-843-0653 and 604-733-3602.

8060. *CaliforniaCare News (Blue Cross of California)*. 1998. I'm soy excited: It's not just tofu anymore. Summer.

• **Summary:** "Soy foods come from the soybean." They are turning up everywhere in many forms: Vegetable oil, soy flour, "tofu (soybean curd), soynut butter—a peanut butter alternative that's lower in fat, soy milk, yogurt, cheese, and frozen desserts (good dairy substitutes for the lactose intolerant), meat substitutes, such as soy burgers and soy hot dogs (especially good for those trying to cut down on red meat).

"A healthy choice: Many soy foods are high in protein. Two exceptions are soybean oil, which is high in fat, and soy sauce, which is high in sodium.

"Soybeans also contain a chemical that is similar to the female hormone estrogen. Researchers say this chemical may help prevent and treat some cancers, heart disease, and osteoporosis. It can also relieve the hot flashes associated with menopause."

To learn more, call the United Soybean Board at 1-800-Talk-Soy (825-5769).

A color illustration (cartoon) shows a group of singing soy products: green vegetable soybeans in the pod, soy

cheese, soy flour, and a soy hot dog in a bun. Address: 21555 Oxnard St., Woodland Hills, California 91367.

• **Summary:** Three past editions of this report have been published by Business Trends Analysts, Inc. (BTA), which is located at the same address as The Leading Edge Group. BTA is the parent company. Since it was founded 20 years ago, it had published reports under two brand names, each of which has a different style. Business Trends Analysts Reports tend to contain mostly secondary research, with an abundance of charts and graphs, and less text and analysis. Leading Edge Reports are conducted by a person with a specialty in that area. The report contains much more primary research and in-depth analysis, and is roughly twice as expensive. This report was conducted by Melina Laverty.

Chapter 5 of this report is titled "Soyfoods and alternative meat products: Market dynamics.

Overall report—Contents: 1. Executive summary. 2. Overall market dynamics (including Soyfoods). 3. The market for soy foods. 4. The market for herbal teas. 5. The market for dairy foods. 6. The market for grains and cereals. 7. The market for frozen foods. 8. The market for snack foods. 9. The market for groceries. 10. The health food consumer. 11. The health/natural food store industry. 12. Competitor profiles. 13. Industry directory. Address: Commack, New York. Phone: 516-462-2410.

8062. Robertson, Robin. 1998. The soy gourmet: Improve your health the natural way with 75 delicious recipes. New York, NY: Penguin/Putnam/Dutton. xv + 191 p. July. Introduction by James W. Anderson, M.D. Index. 21 cm. A Plume book.

• **Summary:** Contents: Foreword. Introduction: Health benefits of soy protein, by James W. Anderson, M.D. 1. The soy solution. 2. Soy what? (soybeans, tofu, tempeh, textured soy protein or TVP, soy milk, miso, soy sauce, soy flour, dry-roasted soybeans or soy nuts, soy convenience foods, egg replacers). 3. Making soy protein work for you. 4. Breakfasts. 5. Let's do lunch. 6. What's for dinner? 7. Desserts. 8. Shakes and more. 9. Sample menus. Glossary (In addition to the soy foods described at Chapter 2: Gomasio, soy cheese, soy protein powder, and tamari soy sauce).

The author, who is a woman, worked as a professional chef during the 1980s, when she used large quantities of meat, eggs, and dairy products to prepare dishes in classic cuisines, such as French and Italian. In 1987 she made a dramatic change in her life, when she decided to stop working in professional kitchens, and start to pursue a healthier lifestyle, becoming a vegetarian, eliminating all

meat and dairy products from her diet. Having lost both parents to heart disease and stroke, she had a personal interest in helping people learn how to cook and eat properly. Using soy products such as tofu, tempeh, and soy milk, she was able to recreate her favorite old recipes—sautéed dishes with cream sauces, rich pasta dishes, and even delicious cheesecakes—all without cholesterol. But these soy foods actually offered a double benefit, for recent scientific studies show that they actually reduce cholesterol levels.

8063. Kikkoman International Inc. 1998. Holy guacamole! (Ad). *Nation's Restaurant News*. Aug. 10. p. 76.

• **Summary:** A large color photo shows a tortilla wrapped around a mixture of meat and vegetables on a plate. On the tortilla is branded: "Kikkoman naturally brewed soy sauce." The text reads: "Kikkoman keeps turning up in the most unexpected places. At one major Mexican chain, they've discovered that nothing brings out the flavor of their fajitas like a marinade of Kikkoman and pineapple juice. That's because unlike some soy sauces, Kikkoman is naturally brewed and aged for full flavor. Your flavor." Address: San Francisco, California. Phone: 415-956-7750.

8064. Little Tokyo Service Center. 1998. The Third Annual L.A. Tofu Festival, August 15-16. Los Angeles, California. 26 p. Illust. 26 cm. Saddle stitched (stapled).

• **Summary:** Contents: 1999 LA [Los Angeles] Tofu Festival committee. About Little Tokyo Service Center. Festival sponsors, by rank. Celebrity Co-chairs: Huell Howser and Lilly Melgar. Festival health providers. Schedule of events (orange insert). Map of events (pink insert). *Coma Tofu: El que y porque!* (Eat tofu: The what and why!) in Spanish, with 2 recipes by Yvonne Gonzalez. Tofu: A 2,000 year old health food miracle, compiled by William Shurtleff of Soyfoods Center. Tofu Q&A. 1997 LA Tofu Festival participant profiles (39 restaurants, p. 7-9). Advertisements (p. 13-26), including ads for Vitasoy (incl. Nasoya & Azumaya), Whole Foods Market (incl. White Wave—Vegetarian Cuisine), Yuasa, Inc., Patricia Greenberg and her *Whole Soy Cookbook*, the Indiana Soybean Council and Prang Fun Pro Soybean Crayons, House Foods America Corporation and its Hinoichi tofu (full page, inside rear cover). Address: Little Tokyo Service Center (Resource Development Center), 231 East 3rd St., Los Angeles, California 90013. Phone: 213-473-1600.

8065. Ndungi Khotu, Aubry. 1998. Contribution a l'avant-projet d'une usine de production de lait de soja en poudre a Lubumbashi [Contribution to the rough draft for a factory for the production of soymilk at Lubumbashi, Congo]. Civil Engineer thesis, University of Lubumbashi, Polytechnic Faculty, Dep. of Industrial Chemistry. v + 154 + 16 p. Illust. 30 cm. [73 ref. Fre]

• **Summary:** Preface and dedication. Introduction. Part

I: Review of the literature. 1. General information about soya and proteins: 1.1. The soybean (Botanical, origin and history, soybean production and commerce worldwide, soya in the Democratic Republic of the Congo {Congo, formerly Zaire}, structure and composition of soybean seeds, utilization of soybeans {with diagram}, food uses of soybeans {oil and meal, soy flour (4 types), soy concentrates and isolates, textured soy proteins {TVP, thermoplastic extrusion, spun fibers}, soymilk, tofu, other uses (shoyu, miso, tempeh, yuba)}, industrial uses of soybeans {linoleum, plastics, paints, varnishes, etc.}). 1.2. Proteins (in the human body, in foods), the structure of proteins (amino acids, ionization and acid-base properties of amino acids), protein bonds, denaturation. 1.3. Soya proteins (glycinin or globulin 11S, globulin 7S, hemagglutinins or lectins, protein inhibitors and other antinutritional factors, amino acid composition of soy protein). 1.4 Factors affecting the food value of soya: Acceptability problem (food value of raw soybeans), intolerance to soy proteins, off-flavors in soya and their source, inactivation of lipoxygenase, other treatments affecting the food value of soya: Alkalies.

2. Preparation and properties of soymilk. 2.1. Properties. 2.2. Advantages and disadvantages of soymilk compared with cow's milk. 2.3. Preparation. 2.4. Commercial / industrial production using the Alfa-Laval process.

3. Reminder of certain operations required for the preparation of soymilk powder: 3.1. Homogenization. 3.2. pasteurization and sterilization. 3.3. Concentration by evaporation. 3.4. Drying by atomization. 3.5. economies of energy in dewatering operations.

4. Some ideas on the methods of sensory evaluation: 4.1. The different methods. 4.2. Results and interpretations.

5. Important ideas in the study of the market, in determining the capacity of production, and in the economic evaluation of a project: 5.1. Study of the market. 5.2. Determining the capacity of production. 5.3. Economic evaluation of a project, incl. estimating fixed capital by adding capital costs.

Part II: Experimental, industrial calculations, economic calculations. Introduction. 6. Origin and characterization of the raw materials, trials for inactivation of lipoxygenase. 7. Determination of the optimal conditions for the preparation of soymilk. 8. Results of pilot plant trials. 9. Market study and determination of the capacity of production. 10. Description and calculations for the installation. 11. Economic evaluation of the project. General conclusion.

Tables show: (1) Number of people that can be supported for 1 year by the production from one acre devoted to certain crops and animals. Fewest: Beef 190. Pork 319. Poultry 457. Most: Potatoes 5,329. Split peas 6,901. Soybeans 9,075. Algae 43,200–154,000. Yeast 3,275,000. (1.1) Leading soya producing countries in 1985 (worldwide, with area, production, and yield; USA, Brazil, China, Argentina, India). (1.2) Leading soya producing continents

in 1985 (North and Central America, South America, Asia, USSR, Europe, Africa, Oceania). (1.3) Leading soya trading countries in 1985. Importers: Japan, Netherlands, R.F.A. (Republique Federal Allemagne = Germany), Spain, Italy. Exporters: USA, Brazil, Argentina, China, Paraguay. (1.4) Production of soya in the Congo, by province 1970-1978 (the leading producer by far in 1978 was Western Kasai). (1.5) Production of soya in Katanga [formerly Shaba, before that Elisabethville] (1990-1994; by far the leading producer is Tanganyika). 1.6 Total production of soya in the Congo (1,000 metric tons) from 1970-1995 (increased from 1.7 in 1970-74 to 18 in 1995). (1.7) Average composition of different parts of the soybean seed. (1.8) Physico-chemical composition of soybean seed (ranges and average). (1.9). Mineral content of soybeans. (1.10). Vitamin content of mature soybean seeds and soybean meal. (1.11) Fatty acid composition of soybean oil. (1.11A) Enzymes in the soybean: Lipoxidase, urease, lipases, beta-amylase. (1.12) Properties and characteristics of the water-soluble fractions of soybean seeds. (1.12A) Variations in the solubility of proteins from defatted soy flour at various pH levels. (1.12B) Amino acid composition of soybean protein. Address: Lubumbashi, Katanga Province, Congo.

8066. Perry, Charles. 1998. Forklore: Got rotted milk? *Los Angeles Times*. Sept. 2. p. H2. Food section.

• **Summary:** The Arabs used to take eroted barley and made it into a relative of soy sauce called *murri*. After the mold had grown on the barley, instead of mixing it with water and salt to make a soy sauce, they mixed it with milk. There were poems in praise of this particular condiment—called *kamakh ahmar*. Once the milk had changed color, you could add other things such as onions, herbs, spices, etc. Charles tried making it and it worked well. The enzymes in the molds turned the milk into instant blue cheese (having veins of greenish blue mold). It had a delicious, high flavor. Address: Staff Writer, Food Section, Los Angeles Times, California. Phone: 213-237-7806.

8067. Yates, Ronald. 1998. Behind the scenes: Writing *The Kikkoman Chronicles* (Interview). *SoyaScan Notes*. Sept. 8. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Concerning the story that Kikkoman traces its origins to a woman named Shige Maki, who came to Noda in 1615: Ronald was told this story by Yuzaburo Mogi. He made no attempt to verify or document it; he assumed it was part of the company lore. As far as he knows, it has never appeared before in print—at least in English.

Concerning the activities of Shinzaburo Mogi in the United States (he is said to have started a company that made shoyu briefly in Denver, Colorado in about 1907), Ronald did no original research on this subject. He got most of his information from Ken Mogi.

This book was authorized by Kikkoman, and the

company set up a committee to read all the text, check the facts and correct any errors. Ronald made the decision to do it this way, avoiding the controversial or dark parts of Kikkoman's history in exchange for the extensive help and cooperation he received. For example, he was asked not to discuss a major conflict between Kikkoman and JFC (Japan Foods Corp. in San Francisco, California) that took place at the time Kikkoman acquired JFC, and the lawsuit that followed. He also avoided discussion of a suicide in the 1980s by a member of the board of directors. He was asked not to mention the fact that the emperor of Japan intervened to help end the Great Noda Strike of 1927-28.

What did Ronald find most interesting in this study of Kikkoman? (1) The way the company manages itself. The continuity and familial environment among management and all employees which creates a fierce loyalty to the company. Yes, employees know that there is a glass ceiling that limits their rise to the very top levels of management, but they deeply appreciate the way Kikkoman respects and listens to each and every employee. Even in Walworth, Wisconsin, there is a very remarkable bond between Kikkoman and the people of this small agrarian community, and between the local workers and the company. (2) The innovative way that Kikkoman created a market in America for a traditional Japanese product—shoyu. (3) Kikkoman's history is filled with extremely interesting characters. Saheiji Mogi created the Kikkoman brand, and promoted it worldwide. Keizaburo Mogi, father of Yuzaburo, took Kikkoman out of the doldrums following World War II by innovative processes of internationalization and product diversification. Yuzaburo Mogi, the current CEO, has been perhaps the most innovative. "He really stuck his neck out to convince the company to start a shoyu factory in America. His father supported him, but some board members were secretly hoping that he would fail." Ronald was very fortunate in being able to spend about 3 weeks with Yuzaburo, starting in Walworth and continuing in the Netherlands and Japan. They spoke mostly in English (Yuzaburo speaks excellent English) and Ronald tape recorded every session. Address: Head, Dep. of Journalism, Univ. of Illinois, Urbana. Phone: 217-333-0709.

8068. *SoyaScan Notes*. 1998. Who coined the terms "Chinese Vetches" and "Chinese caravances" (or garavances) (Overview). Sept. 13. Compiled by William Shurtleff of Soyfoods Center.

• **Summary:** Samuel Bowen probably coined the term "Chinese Vetches," which first appears in May 1767 in an article by Henry Yonge of Georgia; Yonge received these Vetches from Samuel Bowen. The term appears next in connection with soybeans in the minutes of the American Philosophical Society for the Promotion of Useful Knowledge (Philadelphia), which show that on 16 January 1769 Samuel Bowen presented to the Society a "Sample

of Chinese Vetches, six bottles of Soy and six pounds of powdered sago..."

James Flint probably coined the term "Chinese caravances" (or "garavances") in connection with soybeans. Benjamin Franklin probably first heard the term from Flint. During the 1700s, the word "caravances" or "garavances" was widely used to refer to all kinds of beans. Then in a letter dated 11 January 1770 Benjamin Franklin (who was in London, England) wrote a letter to John Bartram in Philadelphia, describing Chinese caravances (soybeans) which he enclosed. Franklin mentioned that he had learned about these caravances from James Flint.

8069. Ginsberg, Beth; Milken, Mike. 1998. The taste for living cookbook: Mike Milken's favorite recipes for fighting cancer. Santa Monica, California: CaP CURE. Distributed by Time-Life Books. 118 p. Illust. Index. 26 x 27 cm. [2 ref]

• **Summary:** This is a gorgeous, low-fat vegetarian cookbook in which about half the recipes use soy as a major ingredient. It is loaded with color photos (many full page), playful graphics, and good advice. Note: 100% of the proceeds from this book are used to fund prostate cancer research. The book is available at bookstores nationwide, or it can be ordered by dialing toll-free 1-877-884-5433 (LIFE). Contents: Introduction, by Michael Milken. Preface, by Beth Ginsberg. Four nutritional principles of CaP CURE to fight prostate cancer and other hormonal cancers: (1) Limit dietary fat to 15% of total energy intake (calories). (2) Eat 5 or more fruit and vegetable servings per day. (3) Consume 25 to 35 grams of dietary fiber a day. (4) Consume 40 to 60 grams of soy protein a day. "Americans have a five times higher incidence of prostate cancer than people living in Asia and eating a traditional diet. Soups. Exercise. Entrees. Soy and soybeans. Sandwiches and sides. Cruciferous vegetables. Breakfasts and shakes. Desserts. Healthy pantry. Afterword, by Donald S. Coffey, PhD, President of the American Assoc. for Cancer Research and Professor of Urology, Oncology, Pharmacology and Molecular Sciences, Johns Hopkins Hospital, Baltimore, Maryland: We are what we eat, how does food cause or protect us from cancer (ROS = reactive oxygen species), how did we lose our way?, how did our diet change ("The great apes were primarily vegetarian, consuming great quantities of vegetables that are high in fiber"), what should we do? About CaP CURE.

Soy-related recipes include: French onion soup (with soy cheese and soy sauce, p. 20). Broccoli potato soup (with grated nonfat cheddar-style soy cheese, p. 22). Shiitake miso soup (with silken tofu and low-sodium tamari sauce, p. 22). Taco salad with a chili lime dressing (with 1½ lb fat-free soy meat, p. 26). Chinese roasted tofu salad (p. 33).

Note. This is the earliest English-language document seen (May 2012) that contains the term "roasted tofu," it refers to grilled tofu.

Orange ginger dressing (with white miso and tamari,

p. 33). Chef's salad with miso shallot dressing (and Soy Deli Slices, p. 34-35). Thousand island dressing (with tofu, p. 34-35). Chopped vegetable salad (with 1 cup edamame, p. 36). Teriyaki tofu bowl with Chinese vegetables (p. 40). Tofu dog casserole with a pretzel crust (p. 42). Soy and Soybeans (with a sidebar on "understanding tofu," p. 44-45). Lasagne with "soysage" (with fat-free vegetarian sausage, silken tofu, and soy cheese, p. 46). Spinach cannelloni with fresh tomato sauce (plus soy milk and low-fat tofu, p. 48-49). Vegetable fritatta with roasted tomato salsa (and 2 lb tofu, p. 54-55). Enchilada pie with ranchero sauce (and 1 lb soy cheese). Greek spinach pie in a phyllo nest (with tofu, p. 61; remake of spanakopita). Homemade vegetable pizza with soy cheese (p. 62-63). Vegetable reuben (with tempeh bacon strips, p. 68). Tofu egg salad sandwich (p. 72). New Deli (fat-free hot dog, p. 75). VLT with herb mustard (and fat-free tofu bologna slices, p. 76). Broccoli in soy cheese sauce (p. 78-79). Fruit shake (with soy protein isolate, p. 84). Blueberry banana multi-grain pancakes (with soy milk, p. 87). Strawberry shortcake (with soy milk, p. 96). Carrot cake (with silken tofu, p. 100-01). Devil's "fool" cake with cocoa frosting (plus silken tofu, p. 104). Tofu cheesecake with fresh berry topping (p. 106-07). Banana cream pie (with 3 cups vanilla soy milk, p. 108). Old fashioned chocolate pudding (with 2 cups cocoa soy milk, p. 109). Maple flan (with 2 cups soy milk, p. 110). Address: CaP CURE, 1250 4th St., Suite 360, Santa Monica, California 90401. Phone: 310-458-2873.

8070. Goldbeck, Nikki; Goldbeck, David. 1998. *The healthiest diet in the world: A cookbook and mentor*. New York, NY: Dutton (Penguin/Putnam Inc.). xiii + 561 p. Sept. Illust. General index. Recipe index. 25 cm. [840+* ref]

• **Summary:** This is an excellent book, with a wonderful title that lives up to its promise. Both authors are real professionals, with 25 years in the field. Contains extensive information about the importance of a wholefoods, natural foods diet, with plenty of fresh fruits, vegetables, beans, and soyfoods as sources of the many recently-discovered phytochemicals, which offer promising health benefits. The authors are fans of soyfoods, which are featured in both the text and recipes throughout the book.

In Part I, "Goldbeck's Golden Guidelines," No. 5 is "Super Soy Foods" (p. 14-15) which encourages readers to "Make soy foods a regular part of your diet."

Part II is the recipe section, titled "In Nikki's kitchen: Healthiest diet recipes." The main soyfoods used in recipes are tofu (48 recipes!), tempeh (15), soy milk (14), miso (8), soybeans, whole dry (3), and soy flour (2). This book contains so many soy-related recipes that we cannot possibly list all of their names. So here are two samplers of such recipes to give a feeling of their diversity, extent, and inviting names. (1) Salad dressings and salads: Creamy miso-mustard coleslaw (p. 178). Tofu mayonnaise (p. 190). Creamy tofu Russian dressing (p. 191). Creamy tofu ranch

dressing (p. 191). Lemon-tahini dressing (with soy sauce, p. 192). Creamy miso-mustard dressing (p. 193).

(2) Tempeh recipes: Tempeh strips (p. 31). Tempeh breakfast links (p. 32). Baked Italian tempeh (p. 38). Tempeh burgers (p. 39). Skewered tempeh with orange-nut crust (mini kebabs, p. 61). Maple-pecan tempeh (p. 98). Baked corn-tempeh hash (p. 98-99). Picadillo (Latin American sloppy Joes with tempeh, p. 99). Tempeh mushroom stew (p. 100). Asian grill (with marinated tempeh, p. 101). Tempeh kebabs (p. 102). Shish kebab in a bag (p. 103). Tempeh-bean chili (p. 114-15).

In Part III, "Mentor," one entire chapter is dedicated to soyfoods ("5. In praise of soybeans," p. 408-29). The contents of that chapter: Introduction. Soy's special assets. The phytochemical furor. Protein plus. Soy fiber. Vitamins and minerals. Soy concerns. Soy food selection (incl. Western-style dairy and meat alternatives; soy cheese, soy ice cream, "soy-based imitation meat"). Stick with traditional soy foods: Tofu, tempeh, soy milk, soy nuts, whole soybeans (incl. edamame or green soybeans), soy sprouts, soy flour, soy grits, soy sauce, miso, okara (soy fiber), natto. Soy for health: Introduction, cancer (breast, prostate, and other hormonally influenced cancers), heart disease, diabetes, osteoporosis, women and soy, infant feeding. Nikki's dialog boxes: Mixing and matching soy protein. Just because they call it "milk": Nondairy vs. dairy. The question of salt. How to acquire your anti-cancer soy intake. Twenty-five grams of soy protein a day?

Soybeans are also mentioned in Chapter 6, "The beauty of beans" (see p. 431, 434). The 43-page bibliography of current scientific information on the health benefits of foods is worth the price of the book.

In the chapter titled "Controversial carbohydrates" is a long section about the glycemic index of foods titled "G-Force: A new perspective on carbohydrates" (p. 280-89); it includes a 6-page table showing G-force [glycemic index] ratings for individual foods. "Foods with a high G-Force [55 and above, bad] raise blood sugar levels quickly; this is usually matched by a rapid rise in insulin. Foods with low G-Force cause blood sugar levels to rise gradually, in which case insulin is usually released more evenly." Foods that tend to have a high G-Force are: Desserts and sweets (doughnut 108, graham crackers 106), foods made from refined flours (baguette 136, bagel 103, white wheat bread 100), sweet and refined breakfast cereals (puffed rice 132, Cornflakes 119, Cheerios 106), sugars (maltose 150, glucose 137, sucrose 92). Foods groups that tend to have low G-force are: Fruits (apple 54, apple juice 58, orange juice 63, but watermelon 103), legumes (soybeans 25, chickpeas 47), dairy products (yogurt 20, milk 46). vegetables (non-starchy). Address: Woodstock, New York.

8071. Kikkoman Foods, Inc. 1998. *Something's brewing in Folsom: Invitation to grand opening of new Kikkoman plant*

in Folsom, California (Card). Walworth, Wisconsin.

• **Summary:** The opening ceremony for Kikkoman's new soy sauce plant in Folsom, California, will take place on Tuesday, October 6, 1998, at 11:30 a.m. to 1:30 p.m. at 1000 Glenn Drive, Folsom, California. There will be a buffet luncheon and festivities immediately following the ceremony.

This invitation packet contains four pieces. (1) An invitation card and description of the event (5 by 7 inches, printed with brown ink on beige paper). "For over 350 years, Kikkoman has been producing the world's finest soy sauce from soybeans and wheat, using a time-honored natural aging process. Now, Kikkoman is bringing the process to California.

"Mr. Yuzaburo Mogi, President and CEO Of Kikkoman Corporation, requests the pleasure of your company at a festive ceremony and luncheon to celebrate the Grand Opening of the new Kikkoman Plant in Folsom, California, at the plant site." (2) A map show how to drive to the plant (off highway 50). (3) A response card (RSVP). (4) An addressed return envelope. Address: Walworth, Wisconsin.

8072. *Soya & Oilseed Bluebook*. 1998--. Serial/periodical. Bar Harbor, Maine: Soyatech, Inc. Peter Golbitz, publisher and editor. Frequency: Annual.

• **Summary:** Preceded by *Soya Bluebook Plus*. A directory and information book for the soybean processing and production industries. The first issue (shipped Sept. 1998) is subtitled "The annual directory of the world oilseed industry." On the cover, below a map of the world is printed the date "1999" in large letters, followed by "A Soyatech Publication." Crops featured on the front cover and inside are "soya, corn, cottonseed, canola, rapeseed, sunflowerseed, palm kernel, palm, coconut, and peanut."

Contents (the four main sections are marked with a fold-out tab): Translations of oilseed terminology (English, German, French, Spanish, and Portuguese). Organizations and government agencies: Complete listings by country. Oilseeds and oilseed products: White pages (Index, individual crops), catalog pages, yellow pages (complete company listing by country). Equipment supplies and services. Oilseed statistics. Oilseed reference: Oilseed glossary, standards and specifications, oilseed technical charts and tables. Indexes: Comprehensive index, internet address index, brand name index, advertiser index.

Soy-related terms appearing in the translation section (p. 9-15) are: (1) Oilseeds and products: dairy analogs, lecithin-edible, lecithin industrial, meat analogs, miso, organic soy products, soy distillate, soy fiber, soy flakes-defatted-edible, soy flakes-full fat, soy flour-defatted, soy flour-enzyme active, soy flour-full fat, soy flour-low fat, soy flour-roasted, soy flour-textured, soy grits, soy isoflavones, soy livestock feed, soy oil margarine, soy oil shortening, soy oil-crude, soy oil-edible, soy oil-hydrogenated, soy oil-industrial,

soy oil-refined, soy oil-based fuel, soy protein concentrate, soy protein isolate, soy protein-hydrolyzed, soy protein-industrial, soy sauce, soy sterols & tocopherols, soy-based foods-other, soybean fatty acids, soybean hulls, soybean meal, soybean meal-full fat, soybean seed breeder, soybean seed (for planting), soybean soapstock, soybeans-food grade, soybeans genetically modified, soybeans-green vegetable, soybeans-identity preserved, soybeans-non-gmo, soybeans-organic, soybeans, whole dry, soymilk beverages, soymilk powder, soynuts, tempeh, tempeh starter cultures, textured vegetable protein, tofu & tofu products, tofu powder. (2) Equipment & services: Coagulants for tofu, soymilk & tofu processing equipment, sprouting equipment. Address: 318 Main St., P.O. Box 84, Bar Harbor, Maine 04609. Phone: 207-288-4969.

8073. Byrd, Deborah. 1998. Soy what? Once-bland products touted as tasty, hearty protein sources. *Contra Costa Times*. Oct. 21. p. G1, G9. [9 ref]

• **Summary:** Includes a brief review of nine new books that contain soy recipes, a discussion of the health benefits of soyfoods, a talk with William Shurtleff of Soyfoods Center, a glossary and brief description of several soyfoods (edamame, dry soybeans, tofu, tempeh, miso), and 5 recipes: Luscious lemon pie (with silken tofu). Tempeh simmered in red wine with *herbes de provence*. Tofu teriyaki. Chocolate velvet pudding (with silken tofu). Mushroom almond spread (with firm silken tofu). A huge color photo shows Chocolate velvet pudding in a stem glass with a sliced peach. Address: California.

8074. Fuller, Glen. 1998. A brief history of Sovex Natural Foods, Hearty Life, McKee Foods, and Fuller Life Inc. (Interview). *SoyaScan Notes*. Oct. 28. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Glen is interested in the history of Sovex, which is now named Fuller Foods, Inc. John Goodbrad did not buy any business from the Hurlingers in Michigan. Rather, he bought their formula for making Sovex spread and the brand name. The word "Sovex" is derived from the words "soy vegetable extract." The soy part of it was real soy sauce, and still is. Glen has heard of the Hurlingers in Holly, Michigan, but they didn't call their company Sovex. Glen does not know the name of the Hurlinger's company, but he thinks he could find it in the company archives. In about 1961 Ruth Goodbrad, John's wife, began making Sovex in their basement. In the early years, Sovex was basically Ruth's business.

In 1962 John Goodbrad called Glen about the granola business. John had an opportunity to buy a formula for granola, which he later did buy. At the time, Glen was a student at Southern Adventist College, where John worked for Collegedale Distributors, and Ruth, was still manufacturing Sovex in their basement. John bought the

granola formula, under an exclusive arrangement, from a fellow named Layton Gentry—who sold the same formula with the same exclusive rights to at least 6 other individuals or companies who wanted to make granola! Every one of them thought they had an exclusive agreement! For example, the founders of the Bread Shop (in California) bought the formula from Mr. Gentry during the same calendar year. Right after John bought the granola formula, he formed a corporation and named it Sovex Foods Inc. after the spread. After John bought the granola formula, Ruth also manufactured the granola in their basement. Ruth continued making these two products in the basement of their home until about 1966, at which time they moved the food processing up into a building in Collegedale.

On 1 March 1974 McKee Foods acquired the business from Mr. Goodbrad, who didn't really want to sell it. He was a fine and honest man, very much dedicated to his company and involved in it, but he had to sell it for financial reasons. That is usually difficult for an entrepreneur. During his 1980 interview with Soyfoods Center, he may not have mentioned the fact that Sovex was owned by McKee since he was always sensitive to the fact that a health food company was owned by a snack food company.

Goodbrad was president of the company from that day in March 1974 until 30 June 1990. During that time he reported to Glen Fuller, who was vice-president of McKee Foods and responsible for McKee's subsidiaries. On 30 June 1990, when Mr. Goodbrad retired, Glen took over the company and moved his offices from the parent company to Sovex. He retained his position as vice-president of McKee, but also became president and CEO of Sovex. In the early 1990s, Glen changed the company name to Sovex Foods, Inc. from Sovex Natural Foods, Inc.

About 4 years ago, Sovex licensed a local business (named the Village Market) in Collegedale to manufacture the Sovex seasoning spread in their little deli kitchen. There are many other similar products worldwide, such as Marmite, Vegex, Solvex, etc.

Glen has the "Minute Book" for the corporation which goes back to the date it was established in 1962. He could resurrect most of the history from that book, with solid documentation as to dates.

John Goodbrad is deceased, but his wife, Ruth, is still living in Collegedale and very alert. She really started the manufacturing operations.

Glen has never gotten involved in the actual manufacturing of soymilk. He buys the powdered or fresh soymilk he uses from the manufacturer. Some products also use soy isolates or soybeans. Glen does the product formulation and marketing. Glen has a great deal of interest in how his products are manufactured and his company has very strict quality standards. The company is continually inspecting its suppliers, and trying to stay on the cutting edge of product development. Glen knows Elmer Schettler very

well; Sovex marketed Elmer's Solait until 30 Sept. 1998, even after Sovex was merged with McKee Foods. There was apparently a falling out and lawsuit between Elmer and Willis Miller, but it was finally settled. Address: Founder, President & CEO, Fuller Life Inc., 1628 Robert C. Jackson Dr., Maryville, Tennessee 37801. Phone: 423-681-4171.

8075. Goodbrad, Ruth. 1998. History of Sovex Natural Foods, Inc. (Interview). *SoyaScan Notes*. Oct. 30. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Ruth, who has just turned age 81, is the widow of John Goodbrad and a Seventh-day Adventist. She and John were married for 54½ years and she has only the fondest memories of him. "Oh, he was good looking and he was the best man on earth!" In 1953 Ruth and John moved to Collegedale from Boulder, Colorado. They built a large house and moved into it in 1954. John was called to Collegedale to be assistant business manager for Collegedale Distributors, and he was for 20 years. He was in charge of many different businesses.

Ruth has always heard that her Sovex spread was first developed by the Hurlingers in Holly, Michigan. She has never heard that it was first made by a man named Mr. Sampson in California. Sovex was Ruth's business; she had nothing to do after her son and only child, Johnny (who is now age 55), graduated from college, got married, and moved to Miami. She told John that she needed something to do at home. He never wanted her to work outside their home. So he told Ruth that he had heard about a lady in Michigan who wanted to sell her Sovex spread. Ruth's mother-in-law (John's mother) made a spread similar to Sovex before; it was a concoction of the same ingredients, brewer's yeast and real soy sauce, mixed in about the same way. Ruth learned the recipe from her mother-in-law and made it at home several times for her own use. Ruth and John drove up to Michigan together, spent the weekend, watched the product being mixed and bottled, then had the mixer shipped down to Collegedale. The product wasn't cooked.

John had almost nothing to do with Ruth's Sovex business during the years that she made the seasoning-spread in the basement of their family home in Collegedale. He was busy with his full-time job at Collegedale Distributors. Sovex was a family business, but Ruth did the work. She continued to use real soy sauce, which she bought by the drum. Soon she added granola to the products she was making in her basement. She bought the granola formula from a man named Layton Gentry in Nashville but she changed the formula to make it crunchy and renamed it "Crunchy Granola." Both honey and brown sugar were used as sweeteners. Mr. Gentry later, and in violation of his promise to the Goodbrads, sold his granola formula to about six other people or companies. Soon the granola took off, and Ruth could hardly keep up with the demand—though she loved the work. She had three granola ovens and the Sovex

mixer in their large recreation-room basement. She hired Mario DeLeon (a Seventh-day Adventist from Panama) as Head Mixer to help her make the food. One especially good customer was Mr. Dimmock, a distributor from Maryland. He would back his van up to the door and load it up with about 500 pounds of granola, in drums. Some of it was sold to Miami Beach, Florida, to large gatherings of young people. By about 1969-71 the business had outgrown the basement—thanks to worldwide granola sales. Ruth's son, Johnny, came home to help with the family business. They bought some land nearby, designed a food production plant, had it built, and moved Ruth's business up and out of the basement. The food plant has since been expanded several times. At one point they had an offer from General Foods to buy their granola business, but they refused because General Foods wanted to move the business away from Nashville. This became the subject of a story in the *Wall Street Journal*. Ruth still has this and other articles about the company.

Ruth knows Glen Fuller well. His first marriage was to her sister's daughter, Carolyn Radford—before he married his second wife, Jeanine. McKee Foods was founded owned by O.D. and Ruth McKee, both Seventh-day Adventists who Ruth knew well and liked very much. They started the company in Chattanooga, then opened a branch in Collegedale after 1953. Their son was Ellsworth McKee; he ran the company after his father retired. After McKee Bakery bought Sovex in 1974, Glen oversaw operations at Sovex, and John reported to him. But in about 1990, after Glen had surgery (a colostomy), Ellsworth McKee had told Glen, when he was in the hospital, that he would not be able to return to his former position at McKee, so he would need to find another job. Glen told John that he would have to leave so that Glen could take over his place. John did not want to retire, but he was told by Glen that either he would retire and go home or Glen would make him do so. Glen wanted John's desk and his job. John was heartbroken. He came home and just sat on the couch, looking out the window with nothing to do. Several years later he had a heart attack. He passed away about a year later on 12 Dec. 1993. Address: Collegedale, Tennessee. Phone: 423-396-2826.

8076. Product Name: Kikkoman Soy Sauce.

Manufacturer's Name: Kikkoman Foods Inc. Subsidiary of Kikkoman Shoyu Co. Ltd.

Manufacturer's Address: 1000 Glenn Dr., Folsom, California 95630.

Date of Introduction: 1998. October.

Ingredients: Water, wheat, soybeans, salt, sodium benzoate: Less than 1/10 of 1% as a preservative.

Wt/Vol., Packaging, Price: 10 fluid oz (296 ml).

How Stored: Shelf stable.

New Product—Documentation: Kikkoman Corporation. 1999. Annual report 1998. 30 p. "Corporate history (p. 27). "1998 October—The second manufacturing plant

of Kikkoman Foods, Inc., in Folsom, California, begins shipments.

8077. Auerbach, Jon G. 1998. Exit the entree: What is turkey day without the bird? Some find it more pleasant dining on pheasant, boar, woodcock or Spaghettios. *Wall Street Journal*. Nov. 25. p. A1, A6.

• **Summary:** Although 91% of Americans are expected to eat a turkey this Thanksgiving, many now prefer alternatives to the traditional bird. One man serves ostrich fillets instead, with a dash of soy sauce. "Nationally, People for the Ethical Treatment of Animals [PETA] is promoting Tofurky, a meatless, soy-based (not basted) turkey alternative." According to USDA statistics, turkey production in the USA is expected to drop by 5% this year to about 5.2 billion pounds.

Why do Americans eat turkey at Thanksgiving? In part because a well-documented Pilgrim feast in 1621 included turkey. But animal scientists say turkey really caught on because they could breed big birds with lots of meat—leading to an affordable feast.

What do Americans dislike about turkey? It takes all day to cook, ties up the whole kitchen, and the dark meat (such as the legs) cooks more slowly than the white meat (the breast); so on a big bird, the breast may be dry by the time the legs are cooked. Address: Staff Reporter.

8078. *Soyafoods (ASA, Europe)*. 1998. Unilever to buy Shanghai soy sauce brand. 9(3):2. Autumn.

• **Summary:** An article in the *Financial Times* (London, 21 July 1998) states that Unilever soon plans to buy Lao Cai, one of Shanghai's leading brands of soy sauce. This will increase Unilever's relatively limited food presence in China—which now comes mostly from sales of Wall's Ice Cream and Lipton's tea. The acquisition of Lao Cai will cost Unilever an estimated £10 million. Since 1986 the company has invested \$640 million in 12 joint ventures, employing about 6,500 people.

8079. Stepaniak, Joanne. 1998. The vegan sourcebook. Los Angeles, California: Lowell House. xvi + 352 p. Index. 24 cm. Special nutrition section by Virginia Messina. [196* ref]

• **Summary:** Contents: Preface. 1. Vegan roots. 2. The vegan identity. 3. The way the West was weaned. 4. Which came first? 5. Invisible oppression. 6. Environment in crisis. 7. Shooting the myths. 8. Animals and entertainment. 9. Science: Fact, fiction, or fantasy. 10. The compassionate consumer. 11. The body beautiful. 12. Ethics in action. 13. Of principle and practice. 14. Ascent and evolution. 15. Embracing the choice. 16. Reorienting the compass. 17. Challenges, gifts, and offerings. 18. The Vegan table. 19. Secret ingredients. 20. Vegan nutrition. Appendixes: 1. Vegan nutrition charts. 2. Menu planning using the Vegan food pyramid. 3. Special ingredients and Vegan recipes.

4. The Vegan lifeline: Resources and organizations. 5. Recommended reading. Bibliography.

Soy-related recipes or discussion: Soymilk (p. 188-89). Soy cheese, soy yogurt and sour cream (made from silken tofu), vegan cream, puddings, ice cream, and popsicles (p. 190-91). Use of tofu in place of eggs to bind or thicken (p. 192-93). Miso, tamari and shoyu (p. 256-57). Tofu, regular and silken (p. 258). Quinoa, seitan, tahini (p. 258). Sour cream and onion dip (with tofu, p. 275). Sesame-miso spread (p. 275). Tofu-vegetable spread (p. 277). Miso master dressing (p. 282). Curried tofu salad sandwiches (p. 290). Tofu sour cream (p. 310). Creamy fudge frosting (with tofu, p. 315). Address: Swissvale, Pennsylvania.

8080. Karp, Jonathan. 1998. Adding U.S. soybeans to India's spicy diet faces big roadblocks: Protein-loaded legume could help the hungry, if only they'd eat it. Hiding 'that beany taste.' Currying favor? *Wall Street Journal*. Dec. 8. p. A1, A6.

• **Summary:** Virgil Miedema, the American Soybean Association's director for South Asia, is the son of a soybean farmer from North Dakota and speaks near-fluent Hindi. He believes that adding American soybeans to Indian diets can do wonders for their health. But there are two problems: (1) India, the world's fifth largest soybean producer, already grows so many soybeans that it exports the soy protein, although the country has a shortage of dietary protein; (2) Indians dislike the beany taste of soy—according to food scientist V.D. Devdharma, who shares Mr. Miedema's mission. The population of India is now growing by 16 million people a year—devouring the gains of the 1960s Green Revolution. Some 53% of Indian children under age 5 are malnourished. Per capita availability of lentil protein is half what it was in 1947, so the Indian government is producing lentil alternatives made of soy protein and wheat flour. The brown pellets, designed to look and taste like dal, contain 60% more protein.

The American Soybean Association (ASA) opened an office in India in 1996. It hired Mr. Miedema who had spent 17 years in South Asia with the Peace Corps and the U.S. Agency for International Development (USAID). His mission is to repeat ASA's success in China, where in just 15 years it helped turn that soybean producer into a major importer. In 1997, China bought \$657 million of U.S. soy products. "Of course, the Chinese have been eating soybeans—as soy sauce and tofu, among other things—for millennia." Mr. Miedema's approach is to encourage Indian companies to add soy to everyday Indian foods—such as the wheat flour used to make chapatis.

One company, AFM Foods, Mr. Miedema's first partner,

is making soy-fortified flour for chapaties that contains 35% more protein than wheat—"and can reduce the risk of cancer and the aches of menopause."

But attempts to use soy as food in India have failed before. A decade ago the ASA backed three local companies that failed in trying to popularize soymilk. RJR Nabisco Inc. quit making soy oil and Nestle SA (the Swiss food giant) recently withdrew its soymilk powder and soy-based baby food because of poor sales.

Sanjeev Chaudhry (formerly involved with Nabisco's soy oil factory) is head of the India office for Protein Technologies International. He uses Supro brand soy protein isolate to develop turbocharged soy products. He sells about 100 tons a year to 25 customers, mostly food manufacturers.

Large-scale cultivation of soybeans in India began in the 1970s to reduce dependence on imported edible oils. Soy oil still is not popular, and for Indians see soybeans as an evil threat. Ms. Vandana Shiva believes that free trade in agriculture, inevitably controlled by multinational corporations selling expensive genetically engineered seeds, will destroy India's farmers and local foods.

Yet Mr. Vergheze Kurien, a famous Indian nationalist from the western town of Anand, has decided to join the soybean forces. As head of India's National Dairy Development Board, he was largely responsible for making India self sufficient in milk and the world's largest producer of cow's milk—while thwarting foreign dairy firms. He then branched out into edible oils to help his country cut costly imports. Though he retired last month, his main project is now developing the lentil alternatives.

The idea has been simmering for a decade, starting with U.S.-funded soybean research at an Indian university. The dairy board, whose sister organization, Amul, is one of India's largest food marketers, accepted the challenge of developing an inexpensive, uniquely Indian protein alternative. Mr. Kurien argues that if soy can be made into chicken and bacon, why not into dal? After years of fine tuning, the product launch is at hand. If it succeeds, the ASA could try for a second wave of products (made from U.S. soybeans) such as "soymilk and tofu, which looks and feels like Indian cottage cheese, called paneer." Indians say that tofu does not taste as good as paneer, but Mr. Miedema responds that its better for you. An illustration (dot-style) shows Mr. Miedema. Address: Staff Reporter.

8081. Hills, Benjamin. 1998. New developments at Lean Green Foods in Hawaii, and moving to Chico, California (Interview). *SoyaScan Notes*. Dec. 21. Conducted by William Shurtleff of Soyfoods Center.

• **Summary:** Benjamin calls from Walnut Creek, California, and would like to visit. We have lunch together, and enjoy his Ginger Teriyaki Tempeh Burger. In June of this year, Benjamin moved his tempeh manufacturing operations to Oregon, where Seth Tibbott of Turtle Island is now making

all of Benjamin's tempeh. He intended to keep Lean Green Foods in Hawaii as a tempeh importer and distributor. He is making more money now than when he was making the tempeh himself in Hawaii—but not enough money to live on.

After 6 years in Hawaii, he is planning to move to Chico, California. He will keep his involvement with soy, but not as a manufacturer. He may try to market tempeh burgers at concerts on the West Coast. His girlfriend, Jean Green, a Rolpher and dancer in Hilo, plans to sell her house there and move to Chico with Benjamin.

Tempeh burgers have lost market share to the meat alternative burgers from Gardenburger and Worthington largely because of fat content, but also a little because of flavor, price, and availability (in supermarkets). Though the price difference is small, the meat alternative products are sold at a much bigger margin, which allows the manufacturers to spend much more advertising their products.

His son Bo (Bodhi), age 22, won a full athletic scholarship to Gonzaga University in Spokane, Washington, where he now plays shortstop on the baseball team. He fully expects to get drafted into the major leagues this year after graduation. He has been an outstanding athlete since he was a child, including an excellent tennis player. Address: Lean Green Foods, P.O. Box 534, Volcano, Hawaii 96785. Phone: 808-985-8563.

8082. Nikkan Keizai Tsūshin-sha (Nikkan Keizai News Agency). 1998. Miso no shuyō-meka [Japan's largest miso manufacturing companies]. Tokyo, Japan. 1 p. [1 ref. Jap]

• **Summary:** This table ranks Japan's top fifty miso manufacturers in descending order of volume produced. For each company it gives the company name, prefecture where the company is located, and tonnes (metric tons) of miso produced in 1993, 1994, 1995, 1996, and 1997.

The top ten companies (with their output in tonnes) for 1997 and 1998 are: (1) Marukome 77,000 / 81,500 (they do not export any). (2) Hanamaruki 38,800 / 39,200 (they export to Westbrae, Canada). (3) Kanesa 27,300 / 27,800. (4) Marusan-ai 26,230 / 26,800 (they export to Eden Foods). (5) Miyasaka Jozo 19,080 / 18,900. (6) Hikari Miso 14,700 / 16,000. (7) Yamajirushi 15,200 / 15,100 (they export to San-J). (8) Fundōkin Shoyu 13,900 / 14,100. (9) Ichibiki 13,100 / 13,000. (10) Takeya 12,000 / 11,500.

Also: (11) Marudai 11,300 / 11,400. (13) Nagano Miso 9,500 / 9,450. (16) San Jirushi Jozo 8,750 / 1,700. (25) Sendai Miso Shoyu 4,900 / ? (they export to Westbrae).

The total amount of miso produced in Japan by all companies was as follows by year (in tonnes): 1993–561,259. 1994–540,390. 1995–539,427. 1996–542,077. 1997–542,238. 1998–548,750. Address: Japan.

8083. Burnham, Trudie. 1998. Innovative soy cooking. Freedom, California: The Crossing Press. 95 p. No index. 15

x 18 cm.

• **Summary:** Contents: Preface. Introduction. Appetizers, snacks, and side orders. Salads. Dressings and toppings. Main dishes. Beverages. Desserts and treats.

The introduction begins: "Let's face it. In a society like ours, obsessed with fast, low-fat food, tofu is the ultimate answer." This is a "user-friendly guide to a soya-based vegetarian diet. Many recipes are vegan, or use a minimum of dairy foods.

The glossary of ingredients includes kelp, kudzu, lecithin, mirin, miso, nutritional yeast, oils (use expeller pressed), sea vegetables, seeds (Sunflower, pumpkin, poppy and sesame are used for eating; alfalfa, radish, red clover, and fenugreek are for sprouting), slippery elm powder, soy milk, soy sauce, soysage, sweeteners, tahini, tempeh, tofu, umeboshi plums, vinegars.

"Missing egg salad: I invented this and word seemed to travel fast and wide, because I saw it in a California deli a year later with the same name." Address: New Zealand.

8084. Ling, Kong Foong. 1998. Food of Asia: authentic recipes from China, India, Indonesia, Japan, Singapore, Malaysia, Thailand and Vietnam. Singapore: Periplus. 160 p. Illust (color). Index. 31 cm.

• **Summary:** A very attractive book printed on glossy paper with at least one color photo on almost every page. The introduction and essays are by Kong Foong Ling. The index, which is poor, makes the book hard to use if you are looking for particular foods found throughout Asia such as soybeans, soy sauce, miso, salted / fermented black beans, yuba [bean curd skin], etc.

Contents: The flavors of Asia. Ingredients. The Asian kitchen. China. India. Indonesia. Japan. Malaysia & Singapore. Thailand. Vietnam. Appendix.

The "Ingredients" section includes: Bean curd (incl. cotton or momen tofu, silken bean curd, deep-fried bean curd or aburage, grilled bean curd or yakidofu, fermented bean curd or nam yee). Bean curd skin [yuba]. Black beans, salted (and fermented). Hoisin sauce ("A sweet sauce made of soy beans, with spicy and garlicky overtones"). Miso (incl. red miso and white miso). Salted soy beans (incl. "yellow bean sauce"). Soy sauce (incl. light soy sauce, black soy sauce, red soy sauce, Kikkoman, tamari, thick sweet soy sauce (kecap manis—Indonesian)). Tempeh. Also: Red beans (dried azuki). Seaweed (incl. dried kelp, golden kelp, mozuku, salted dried kelp, laver or nori, wakame). Sesame (black and white seeds, tahina {tahini}). Sesame oil. Sesame rice crackers.

Beancurd or bean curd is mentioned on pages 12, 29-30, 34, 36, 88, 94, 101, 155.

Fermented bean curd: p. 25.

8085. Lotong, Napha. 1998. Koji. In: Brian J.B. Wood, ed. 1998. Microbiology of Fermented Foods. 2nd ed. Vol. 2. London: Blackie Academic & Professional / Thompson

Science. An imprint of Chapman & Hall. xx + p. 441-852 + 11-117. See p. 658-95. Illust. Index. 24 cm. [165 ref]

• **Summary:** Contents: Definition and scope. Soybean koji: Raw materials (soybean wheat), koji preparation (Japanese soy sauce koji, miso-dama, koji produced by natural inoculation, preparation procedures, microorganisms involved, koji enzymes), application of soybean koji (soy sauce fermentation, soybean paste fermentation, sufu fermentation, fish sauce fermentation). Rice koji and similar products: Mould enzymes used in the fermentation of alcoholic foods and beverages (saké rice koji, preparation of rice koji, roles of rice koji in saké brewing, saccharolytic enzymes obtained by using starter cakes as inocula, and their applications, saccharolytic enzymes used in distilling industries in Thailand), ang-kak, miso rice koji. Seed inocula: Tane koji, production of seed inocula for soybean koji in Southeast Asia, preparation of flask-like plastic culture bags, types of seed koji, factory stock cultures, production of seed culture in other South East Asian countries, dry starter cakes (raw materials and method of preparation), spore mass produced on rice adhering to inside surface of flasks. Conclusion. Address: Dep. of Microbiology, Faculty of Science, Kasetsart Univ., 50 Paholyothin Rd., Jatujak, Bangkok 10900, Thailand.

8086. Rinzler, Carol Ann. 1998. The healing power of soy: The enlightened person's guide to nature's wonder food. Rocklin, California: Prima Publishing. xiv + 194 p. Illust. Index. 24 cm. [119 endnotes]

• **Summary:** Contents: Preface. Introduction: Not your ordinary bean, the first soybeans (history), how to talk soy (glossary of soyfoods—miso, soybean oil, soy concentrates, soy flour, soy isolates, soy milk, soy “nuts,” soy sauce {shoyu, tamari, teriyaki}, tempeh, texturized soy protein {TSP}, tofu). 1. The nutritional wonder bean: Vitamins, minerals, proteins, fats, carbohydrates, fitting soy into your diet, summing up. 2. Something special in the bean: Hormones and people and plants, fabulous phytoestrogens, the safety of phytoestrogens, summing up. 3. Soy and your heart: Heart Disease and its victims, cholesterol and your heart, soy versus cholesterol, soy's cholesterol busters, beyond cholesterol, summing up. 4. Soy, the cancer fighter: The statistics of cancer, diet and hormone-related cancers, the Asian experience, how soy fights cancer, is soy safe?, a practical guide to your personal war on cancer, summing up. 5. Building better bones with soy: Your hormones and your bones, the hormone dilemma, soy and your bones, getting the calcium you need, summing up. 6. Hot news about hot flashes: What a hot flash is, soy and hot flashes, other plants that may relieve hot flashes, vitamins, minerals and hot flashes, simple lifestyle changes, summing up. 7. Cooking with soy: The joy of soy, whole soybeans, tofu, tempeh, texturized soy protein (TSP), soy flour, soy milk, soy sauces, soybean oil, miso. Appendix A: Shopping for soy through the

mail. Appendix B: Directory of soy manufacturers. Appendix C: Directory of soy researchers whose studies are included in this book. Sources.

The author has written seventeen books, including *Nutrition for Dummies* (IDG) and *Estrogen and Breast Cancer* (Hunter House Books). A frequent contributor to publications such as *American Health*, *Woman's Day*, and the *New York Times*, she lives in New York.

Note: Another quick, generic book about soy and good health by one who is not very familiar with the subject—though the footnotes show that she consulted many publications; nothing new. The history chapter is full of errors. Address: New York.

8087. Sinclair, Charles Gordon. comp. 1998. International dictionary of food and cooking. Chicago: Fitzroy Dearborn. 594 p. See p. 234. 24 cm. *

• **Summary:** Vietnamese: dau hu: Bean curd. dau hu chien: Fried bean curd. dau hu chung: Bean curd. dau hu ki: Dried [sic, pressed] bean curd (p. 161).

fu jook pin (Chinese): Bean curd sticks [dried yuba sticks] (p. 219).

“gochujang (Korean): A chilli paste similar to sambal olek” (p. 234).

Indonesian: Kecap asin is thick, salty, dark colored soy sauce used for coloring and flavor. Kecap bentang manis: See kecap manis. Kecap manis: A sweet, thick, dark colored aromatic soy sauce used as a seasoning and condiment, and for satay. “Also called ketjap sauce, kecap bentang manis, sweet soya sauce” (p. 292).

Ketjap (Ho [Holland, Dutch]) Ketchup. Ketjap sauce. See kecap manis.

The word “soya” appears on 100 pages in this book. For example: Aburage (Japanese): Soya bean pouches made by deep-frying slices of pressed bean curd.

For “soy bean” see “soya bean.” For “soy bean oil” see “soya bean oil.” For “soy sauce” see “soya sauce.”

“Sweet bean paste. A thick brown sauce made from ground fermented soya beans mixed with sugar and brine. Popular in Taiwan as a condiment or seasoning” (p. 530).

8088. Solomon, Charmaine; Solomon, Nina. 1998. Charmaine Solomon's encyclopedia of Asian food. Boston, Massachusetts: Periplus Editions. xiv + 480 p. Color illust. ([28] p. of plates). 29 cm. [67* ref]

• **Summary:** An outstanding book; the color illustrations of many ingredients are spectacular and very informative. The author has an insatiable curiosity.

Contents: List of illustrations. Introduction. How to use the *Encyclopedia of Asian Food*. Acknowledgements. A-Z of Asian Food. Bibliography. Illustrated index of selective ingredients. Index of recipes. Index of alternative words and main entries.

Soy related entries: Bean curd (p. 26-28, incl. all the

different types, yuba, deep-fried tofu types, fermented tofu incl. ch'ou doufu [chou doufu]: "Despite its overpowering aroma, slimy texture, unappetizing color and the unfortunate odor it leaves on the breath, those brave enough to partake of it consider it a delicacy".

Bean paste, sweet (p. 29. The three colors and types are red {from adzuki beans}, yellow {from mung beans, husked and split}, or black {from black soy beans}. "The pastes are usually available ready-made sweetened in cans. It is possible to make your own, starting out with dried beans." Name in Chinese: dow sa, tau sa {sweet bean paste}).

Bean paste, yellow (p. 29. Despite what the label says, this thick, salty condiment is brown, not yellow, in color).

Bean sauces (p. 29. "Made from fermented soy beans," they range in color from yellow to brown to black [sweet black bean paste]. Their consistency is more like pastes that must be spooned from the jar than pourable tomato ketchup).

Beans, salted yellow (p. 31. Canned yellow soybeans which have been salted and fermented).

Beef (p. 31-37 incl. Teriyaki steak, Sukiyaki, Beef with black bean sauce, incl. "2 tablespoons canned salted black beans [fermented black soybeans]").

Black bean (p. 43-44. Black soy beans which are fermented and salted. "Some are sold in cans in a salty liquid, others in plastic bags, covered with salt crystals." Also called "preserved black beans").

Flours & starches (p. 157-61). Incl. soy flour, which is "used mostly in Japan [where it is called kinako] and China. In Korea roasted soy bean flour and fermented soy bean flour are used to make a variety of bean pastes."

Legumes & pulses (p. 206-18). A long and interesting section. All entries have a scientific name. Many have an illustration. Those found in many Asian countries (e.g., green bean, green pea) have the name in each country. Includes: Introduction, adzuki bean, asparagus bean (see winged bean), asparagus pea, black-eyed pea (a variety of cowpea), black gram, blue pea, broad bean, butter bean (see lima bean), chick pea, cowpea (see yard-long bean), fenugreek, green bean, green pea, hyacinth bean (see lablab bean), lablab bean, lentil, lima bean, long bean (see yard-long bean), moong bean (see mung bean), moth bean, mung bean, parkia, peanut, pigeon pea, red bean (see adzuki bean), red kidney bean, rice bean, sataw bean (see parkia), snow pea, soy bean (short entry), sugar snap pea, tamarind, white gram (see black gram), winged bean (China: su-ling dou; India: Goa bean; Indonesia: kecipir; Japan: shikakumame; Malaysia: kacang botor; Philippines: sigarilyas; Sri Lanka: dara-dhambala. Thailand: thua pu). Yard-long bean (this is the fresh bean known by a host of names). Recipes: Adzuki bean soup.

Master sauce (p. 232). "Also known as 'flavour pot' or 'lu,' this sauce has a base of soy sauce, water, sugar and Chinese wine or sherry, with a few variable additions..." Cooking with it is similar to 'red-cooking.'

Miso (see soy bean products). Mushrooms & fungi (p. 237-40, incl. recipe for Braised bean curd, cloud ear and vegetables, and Braised soy mushrooms). Natto (see soy bean products).

Oils (p. 258-59, incl. coconut oil, gingelly oil [sesame oil], mustard oil, palm oil, palm kernel oil, peanut oil, perilla oil, sesame oil). Note: Soy oil is not mentioned here! Okara (see soy bean products). Salads, incl. recipe for Indonesian vegetable salad (gado-gado), that calls for 4 oz. fried bean curd. Shoyu (see soy sauce).

Soy bean, dried (349). China: da dau, wong dau, hak dau, tai dau. Indonesia: kacang kedelai. Japan: daizu. Korea: jaa jang. Malaysia: kedelai. Philippines: utaw. Thailand: thua lueang.

Soy bean, fresh. China: mao dau. Indonesia: kacang soja. Japan: edamame. Malaysia: kacang soja. Recipe: Fresh soy beans with bean curd.

Soy bean products (p. 350): Miso (incl. recipe for miso soup). Natto. Soy bean paste (go). Soy milk. Tahuri (Philippine fermented tofu). Tokwa (tokwan; very firm square tofu).

Soy bean sprouts, with recipe for soy bean sprout salad. China: dai dau nga choi. India: bhat. Indonesia: kacang kedele, taugh. Japan: daizu no moyashi. Korea: Kong namul. Malaysia: kacang soja, taugh. Philippines: utaw. Thailand: thua-lueang.

Soy sauce (p. 351-52). Chinese soy sauce: Dark soy sauce. Light soy sauce ("Usually labeled 'superior soy'"). Mushroom soy sauce (Dark soy sauce that has been flavored with straw mushrooms). Japanese soy sauces: Koikuchi (regular shoyu), tamari, usukuchi. Korean soy sauce ("About the same colour as Chinese light soy sauce, but not as fiercely salty and with a sweet malted aroma"). Thick and flavoured soy sauces: Kecap asin ("A dark, salty soy sauce, from Indonesia, a little thicker than the dark soy of China"). Kecap manis (A thick, sweet soy sauce from Java, Indonesia). Kicap cair: "The Malaysian equivalent of light soy sauce." Kicap pekat: "The Malaysian equivalent of dark soy sauce, though thicker than the Chinese version, but not as thick as kecap manis." Ponzu shoyu. Toyo mansi (p. 352): "A soy sauce used in the Philippines soured with kalamansi juice."

Note: This is the earliest document seen (April 2012) that uses the term "Kicap cair" or the term "Kicap pekat" to refer to light and dark Malaysian soy sauces, respectively.

Tempeh (p. 386). Incl. recipes for Savoury Tempeh and Thai style tempeh. Tofu (see bean curd).

Also discusses: Adzuki bean, agar-agar (incl. almond bean curd, awayuki), almond, amaranth, cowpea, crab in black bean sauce (recipe at crab), daikon, millet, monosodium glutamate ("I would strongly recommend omitting it"), Nonya (pronounced 'Nyonya.' The unique cookery found in Malaysia and Singapore resulting from the fusion of Malay and Chinese cuisine during the last century),

peanut, peanut sauce, sago (this palm flowers only once in its life, at about age 15. Just before flowering, it builds up a large reserve of starch in the pith. The tree is felled, the pith scooped out, ground and washed to make sago starch), seaweed (incl. agar-agar, hijiki, kombu / konbu, mozuku, nori / laver, wakame), sesame paste, sesame seed, vegetarian meals (“By far the most important vegetarian food in the Far East... is bean curd”). Address: Australia.

8089. Stacey, Jenny; Keller, Maureen. 1998. *The soy sauce cookbook: Explore the flavor-enhancing power of Asia's magic ingredient*. New York, Tokyo and London: Kodansha International. 80 p. Illust. Index. 29 x 15 cm.

• **Summary:** This stylish, vertically rectangular book, contains many excellent color photos on glossy paper—of both recipes and scenes related to soy sauce. Contents: Introduction—Soy sauce: Light and dark soy sauce, what is soy sauce?, the history of soy sauce, how soy sauce is produced (koji, non-brewed or HVP, Chinese-style), soy sauce today. Savory snacks. Poultry with pizzazz. Sizzling seafood. Rice, pasta, and noodles. Main meat dishes. Sensational salads. Vegetable variations.

Interesting color photos in the Introduction include: (1) A traditional soy sauce ceramic jar with the “Kikkoman” logo and the Chinese characters for “shoyu” on it. (2) A glass bowl of dark soy sauce. (3) Kikkoman’s *Goyo-gura*, Noda, Japan. (4) Ancient Japanese illustration showing soy sauce production. (5) A glass bowl of light soy sauce. (6) Another ancient Japanese illustration showing soy sauce production. (7) Shoyu fermenting in vats inside the *Goyo-gura*. (8) Three small, modern soy sauce containers, two glass bottles and one glass dispenser. Note 1. Photos 1, 6 and 7 were courtesy of Kikkoman Corp.

Note 2. The recipes call for “light soy sauce,” “dark soy sauce”—terminology that we find confusing. The book contains numerous other factual errors. Address: 1. U.K.; 2. Colorado.

8090. Wise, Victoria. 1998. *The vegetarian table: Japan*. San Francisco: Chronicle Books; London: Hi Marketing. 156 p. Illust. (color photos by Deborah Jones). 22 x 21 cm. Series: *The Vegetarian Table*.

• **Summary:** Contents: Introduction. Basic ingredients and seasonings for the Japanese table. 1. Appetizers and condiments. 2. Soups. 3. Rice. 4. Noodles. 5. Vegetables. 6. Sweets. Table of equivalents.

Ingredients include: Soybeans, soy sauce, tofu (incl. silken tofu, tofu puffs, grilled tofu), miso (red, white, yellow, brown, barley), fresh soybeans, dried soybeans (incl. black soybeans), soybean sprouts, freeze-dried tofu, soybean milk skin (yuba), and soybean curd pulp [okara]. Azuki beans, sea greens [sea vegetables incl. agar, kombu, nori, wakame], sesame seeds, umeboshi (pickled plums), wasabi, saké.

Contains too many soy-related recipes to list them all.

The color photos and food styling are superb—perhaps the most beautiful we have ever seen in a cookbook.

Note: Other books in this series (all published by Chronicle Books) are: *France*, *India*, *Italy*, *Mexico*, and *North Africa*. Address: Oakland, California.

8091. Wood, Brian J.B. ed. 1998. *Microbiology of fermented foods*. 2nd ed. 2 vols. London: Blackie Academic & Professional / Thompson Science. An imprint of Chapman & Hall. [300+ ref]

• **Summary:** Soybeans are discussed extensively in Vol. 1, especially in the chapter titled “Fermented protein foods in the Orient: shoyu and miso,” by Yokotsuka and Sasaki (p. 351-416). This and other chapters that mention soy are cited separately.
