VSE AVIATION

Korry Electronics

ILLUMINATED HMI SOLUTIONS

WHERE RELIABILITY MEETS VISIBILITY IN THE COCKPIT

VSE Aviation is an authorized distributor of Korry Electronics, a global leader in illuminated **Human Machine Interface (HMI)** solutions for aerospace and defense.

Cage Code: 81590

This partnership expands access to Korry's trusted portfolio of **cockpit switches, displays, Night Vision Imaging System (NVIS) solutions, and integrated control panels**, delivered with VSE Aviation's responsive support and distribution expertise to help keep aircraft operating at peak performance.

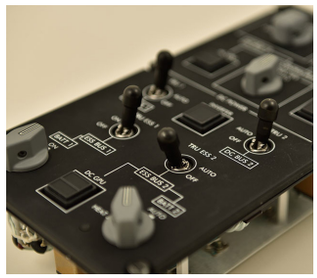

CORE PRODUCT PORTFOLIO

Illuminated Switches & Annunciators

Designed for high reliability, superior readability, and long service life across demanding environment.

389 Series Switches

- **Standard LED** illuminated switches
- **Mag-Latch** switches for safety-critical and fail-safe applications
- **Large-cap (1380)** switches for high-visibility annunciation, modular designs with advanced dimming, mechanical interchangeability, and robust performance

Chromalux® 307 Switchlights:

- Compact 3 / 8-inch illuminated switches ideal for high-density panels, offering bright, uniform legends, long mechanical life, and NVIS options

Chromalux® 427 & 428 Switchlights:

- 5 / 8-inch illuminated switches featuring life-of-the-aircraft LED lighting, interchangeable caps, flexible mounting options, and optional NVIS compatibility

Displays & Visual Interfaces

High-efficiency AMLCD displays optimized for cockpit and mission applications.

Multi-Function Displays (MFD1040 and related AMLCD platforms)

- Designed for superior brightness, color stability, and wide viewing angles across day, night, and NVIS modes

Korry Display Portfolio

- **Active-Matric Liquid-Crystal Display** (AMLCD) solutions supporting flight instruments, mission displays, control display units, and touchscreen-enabled interfaces

Core Product Portfolio

NVIS & Night Operations Solutions

Designed for high reliability, superior readability, and long service life across demanding environment.

Nightshield® NVIS Touchscreen Filters

- NVIS-compliant filters for tablets, handheld devices, and cockpit touchscreens
- Prevents interference with night-vision goggles
- Anti-glare matte finish optimized for touchscreen use
- Suitable for extreme environments and retrofit or new installations

Integrated Control Panels & Systems

Fully integrated control panels and system level HMI assemblies combine switches, annunciators, displays, and electronics into cohesive solutions.

Control Panels & Utility Control Systems

- Standard and custom panel configurations
- Communication, warning, advisory, flight, and engine control applications
- Designed for OEM programs, upgrades, and retrofit solutions
- Consistent lighting and ergonomic interface across the cockpit

Aerospace & Defense Applications

Engineered to meet rigorous aerospace and defense standards, these solutions support a wide range of commercial and mission critical platforms.

Supported Platforms

- Military fixed and rotary wing aircrafts
- Military ground and sea systems
